An employee cannot recover for injuries which, upon the evidence, could have been occasioned only by the loosening of a button upon a carding machine, owing to the neglect of a fellow servant to tighten a screw. *Smith* v. *Lowell Mfg. Co.* (1878) 124 Mass. 114.

A foreman superintending the construction of a bridge acts as a mere servant in choosing the method of fastening the tackle employed. *Ulrich* v. *New York C. & H. R. Co.* (1898) 25 App. Div. 465, 51 N. Y. Supp. 5.

A master is not liable for the negligence of a fellow servant in so placing a suitable rope as to be cut and weakened unnecessarily. *Prescott* v. *Ball Engine Co.* (1896) 176 Pa. 459, 35 Atl. 224.

Putting a gangplank into position for the purpose of loading a heavy piece of machinery in a railway car is the function of a mere servant. *Trimble* v. *Whitin Mach. Works* (1898) 172 Mass. 150, 51 N. E. 463.

of an appliance which he is not obliged, and has not undertaken, to furnish in a completed state, and the workmen themselves construct it according to their own judgment, the master is not liable for the manner in which they used the materials thus supplied.[1]

A master, not being responsible for the arrangement of materials for temporary purposes, is not bound to indemnify a member of a shipping gang for defects in the construction of skids on which such gang is moving iron beams, where the materials have been selected and the skids built by such gang under general orders from the master, not limiting the materials or mode of construction. *Cunningham* v. *Ft. Pitt Bridge Works* (1901) 197 Pa. 625, 47 Atl. 846.

An employee engaged in unloading a spar from a scow cannot recover for injuries due to the fact that a skid over which the spar was being hauled, and which had been placed by the workmen themselves, flew up and struck him. *Liermann* v. *Milwaukee Dry-Dock Co.* (1901) 110 Wis. 599, 86 N. W. 182.

Other cases which proceed upon the theory that an employer is not liable for injuries caused by the failure of a fellow servant to adjust or fasten properly a plank, or other similar appliance, which was being used as a temporary bridge for the passage of the workmen themselves, or for the purpose of transferring goods from one place to another, are the following: *The Islands* (1886) 28 Fed. 478 (here it was shown that the usual practice preferred by the workmen themselves was not to tie the skid); *Hudson* v. *Ocean S. S. Co.* (1888) 110 N. Y. 625, 17 N. E. 342; *McCampbell* v. *Cunard S. S. Co.* (1895) 144 N. Y. 552, 39 N. E. 637 (some stress was laid on the fact that the appliance —a skid— was of simple construction, but this factor is not material, as is shown by the authorities here referred to); *Dirrer* v. *Hall* (1897) 21 Misc. 452, 47 N. Y. Supp. 630, Reversing (1897) 20 Misc. 677, 46 N. Y. Supp. 533; *Conroy* v. *New York C. & H. R. R. Co.* (1895) 13 Misc. 53, 34 N. Y. Supp. 113, Reversing (1895) 11 Misc. 641, 32 N. Y. Supp. 921; *O'Connor* v. *Hall* (1900) 52 App. Div. 428, 65 N. Y. Supp. 136.

An employer of longshoremen is not liable for the death of one of them resulting from the failure to lay the usual planks about the platform or "stool" on which they stand in performing their work of lowering merchandise into the hold of the vessel, where it is customary for them to lay such plank, and is not the duty of the master. *Hogan* v. *Smith* (1891) 125 N. Y. 774, 26 N. E. 712.

An employer is not liable for defects in a "trussed plank," a temporary contrivance constructed out of materials selected by the workmen themselves while fitting a roof on a building. *Keystone Bridge Co.* v. *Newberry* (1881) 96 Pa. 246, 42 Am. Rep. 543 (plank gave way while a rafter was being carried across it).

No action can be maintained where a servant was injured by a casting which fell out of a truck, owing to the fact that the wheels of the truck pressed downward the end of a plank laid by himself and a fellow servant across a soft piece of ground. *Shanke* v. *United States Heater Co.* (1900) 125 Mich. 346, 84 N. W. 283.

A master is not liable where a coservant of the injured person caused the injury by improperly setting a ladder. *Treka* v. *Burlington, C. R. & N. R. Co.* (1896) 100 Iowa, 205, 69 N. W. 422. Or by insecurely fastening it. *Quinn* v. *Fish* (1893) 6 Misc. 105, 26 N. Y. Supp. 10; *Ballenq* v. *New York & C. Rail S. S. Co.* (1899) 28 Misc. 238, 58 N. Y. Supp. 1074; *Manning* v. *Manchester Mills* (1900) 70 N. H. 582, 49 Atl. 91.

The placing of planks across a coal chute under the direction of a foreman, for the purpose of furnishing a place for an employee to stand on while prising open the bottom of a gondola car, is merely a detail of the work. *Warszewski* v. *McWilliams* (1901) 64 App. Div. 63, 71 N. Y. Supp. 680.

An employee whose fingers were severed while operating a machine, molding the top of a piano, cannot recover therefor, where the defect complained of is that a guard upon the machine was too narrow, when it formed no part of the machine, but was attached by the workmen as a protection. *Gleason* v. *Smith* (1898) 172 Mass. 50, 51 N. E. 460.

[1] *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860, Reversing (1894) 81 Hun, 592, 30 N. Y. Supp. 1103.

Persons engaged in the same general

615. Rationale and limits of a master's exemption from liability for the adjustment or preparation of instrumentalities.— The limits of a master's liability for an injury caused by a scaffold or other appliance

work are fellow servants i. respect to the negligence of one of them in constructing appliances with which they are to work, where their work includes the construction of such appliances. *Marsh* v. *Herman* (1891) 47 Minn. 537, 50 N. W. 611.

"The master is never liable for failing to supply a safe place for the servant to work, when the work consists in making safe the place the condition of which he complains." *Bedford Belt R. Co.* v. *Brown* (1895) 142 Ind. 659, 42 N. E. 359.

"The rule which requires the master to provide a safe place and safe appliances for the servant is applied when the place in which the work is to be done is furnished or prepared by the master, as in the case of a ship or a mill or a factory, or when the machinery or other appliances with which the servant is employed to work are furnished by the master; but it has no application when the place at which the work is to be done or the appliances for doing the same are to be prepared by the servant himself. If the appliance is furnished by the master for the purpose of enabling the servants to perform the work in which they are to be engaged, he is required to see that it shall be reasonably safe for that purpose; but, if the preparation of that appliance is a part of the work which the servant is required to perform, the master is not liable for any defect in its preparation. The rule does not apply to a case where several persons are employed to do certain work, and, by the contract of employment, either express or implied, the employees are to adjust the appliances by which the work is to be done.'" *Callan* v. *Bull* (1896) 115 Cal. 593, 45 Pac. 1017.

"Where, however, the master does not undertake the duty of furnishing or adapting the appliances by which the work is to be performed, but this duty is intrusted to or assumed by the workmen themselves, within the scope of their employment, he is exempt from responsibility if suitable materials are furnished and suitable workmen are employed by him, even if they negligently do that which they thus undertake." *Kelley* v. *Norcross* (1877) 121 Mass. 508.

(a) *Application of the rule in the case of scaffolds, stagings, etc.* — The earliest reported case turning upon the liability of a master for a defective scaffold is *Wigmore* v. *Jay* (1850) 5 Exch. 354, 14 Jur. 837, 19 L. J. Exch. N. S. 369. There the plaintiff's husband was one of the bricklayers employed by defendant for the purpose. The scaffold was erected under the superintendence of the defendant's foreman, the defendant not being present, and was constructed by men in the employ of the defendant, who used an unsound ledger, in consequence of which the scaffold broke while the plaintiff's husband was at work upon it. The unsoundness of the pole had been previously pointed out to the foreman, but the deceased could not see its defect on account of some planks being laid across it. Recovery was denied on the grounds that the defendant had not personally superintended the erection of the structure, and that his foreman was a fellow servant of the plaintiff's intestate, and not shown to have been "a person deficient in skill, or an improper person to be employed for that purpose." The main contention of plaintiff's counsel was that *Priestley* v. *Fowler* (1837) 3 Mees & W. 1, Murph. & H. 305, 1 Jur. 987, had no application, for the reason that the persons erecting a scaffold are not fellow laborers of a man who is merely employed to work thereon, and the case followed was *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837 (where the plaintiff was traveling on a train, and the delinquents were the trainmen). The actual decision thus rendered is quite in harmony with the more recent authorities, but it will become clear as we proceed with the review of the cases cited in this and the next sections that the tests at present applied for the purpose of determining the right of the servant to maintain his action are in some important respects different from those referred to by the English judges.

The doctrine which is now regarded as defining the nature and extent of the master's responsibility under such circumstances as those involved in *Wigmore* v. *Jay*, *supra*, is that which is set forth in the following extracts from the opinions in various cases.

constructed or adjusted as a part of the work are determined upon the hypothesis that it is his duty, in the alternative, "to furnish either a

Where the servant is injured by defects in a temporary staging intended to be used only in finishing the building where it was constructed, "If the plaintiff's employers furnished sufficient quantities of suitable materials for staging, employed suitable workmen, and did not themselves undertake the duty of furnishing the staging as a structure, but only of supplying materials and labor by which it might be built and from time to time adapted to the work, and if the duty of furnishing or adapting the staging as an appliance for use in the work of finishing the room was intrusted to or assumed by the workmen themselves, within the scope of their employment, the employers are not answerable to the plaintiff for his injury. . . . On the other hand, if the staging was furnished by the employers as a completed structure, or if they themselves supervised and directed its construction, or if, relying upon its construction by their workmen for themselves, the employers negligently failed to provide suitable and sufficient materials, or negligently hired incompetent workmen, the employers might be answerable to the plaintiff." *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528.

"It was not enough to prove that the scaffolding gave way under the circumstances resulting in an accident, or that it was in fact defective, unless it was made to appear that this was the proximate result of some omission of duty on the part of the defendants or their foreman. If they furnished suitable materials for the construction of a proper platform, and the workmen themselves constructed it according to their own judgment, the defendants were not liable for the manner in which they used the material so furnished." *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860.

"Where an employer employs mechanics to do a certain amount of work, the doing of which requires the use of scaffolds which it is a part of the work of the mechanics so employed to construct, and the employer furnishes proper materials with which to construct the scaffolds, the negligent use of such materials either by improperly uniting them together or by selecting materials not proper for the particular use for which they are selected, whereby one of such mechanics is injured, as the accident was not the result of the neglect of a duty that a master owed to his employees the master is not liable; and that, to establish a cause of action for such an injury, the plaintiff must prove, in addition to the fact that there was negligence in the selection of the materials for the building of the scaffold, the additional fact that the master, or someone that stood in the relation of representative of the master, assumed to construct the scaffold, and then directed the employees to use it as a constructed scaffold." *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697.

"If this plaintiff and his coemployees had, without specific instruction from the master, or one acting for the master and under his authority in the performance of the duty which he owed to his employees, constructed this scaffold of improper material, it would undoubtedly be a case where the negligence was that of a fellow employee or coservant with the plaintiff, for which the master would not be liable." *Richards* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 231.

"Where the master employs competent workmen and provides suitable materials for the necessary staging to be used by them, and intrusts the duty of erecting it to them as a part of the work which they are engaged to perform, he is not liable to one of them for injuries resulting to him from the falling of the staging." *Jones* v. *St. Louis, N. & P. Packet Co.* (1891) 43 Mo. App. 398.

"For an injury received by one workman from the negligence of others in increasing the scaffold's height, the employer would be no more liable than he would be for the fall of a ladder furnished by him to his workmen, when the fall was the result of one of them negligently placing it insecurely." *Maher* v. *McGrath* (1896) 58 N. J. L. 469, 33 Atl. 945.

"With respect to the building of ordinary scaffoldings and other simple structures of that nature, which laborers and mechanics are in the habit of constructing for themselves, . . . the master is under no obligation to do more than to supply a sufficient quantity of material which is reasonably well adapted for the making of such struc-

suitable platform or scaffold for doing the work that the plaintiff and his coemployees were required to do, or proper and suitable material-

turns." *Kerr-Murray Mfg. Co.* v. *Hess* (1899) 38 C. C. A. 647, 98 Fed. 50.

"A staging built and used by employees engaged in erecting a building is not a place provided by the master for his servants to work in, but an instrumentality provided by the servants as a means of carrying on the work they have undertaken to do." *Garrow* v. *Miller* (1900) 72 Vt. 284, 47 Atl. 1087.

In *Hoppin* v. *Worcester* (1885) 140 Mass. 222, 2 N. E. 779, a city employed a master builder to furnish labor and tools required in the erection of a building by the city highway commissioner. The city furnished the materials necessary and paid the builder and his men. A directed it, one of his men, to erect a staglug, and the man used a defective bracket belonging to A, whereby one of A's workmen was injured. It was held that, the master builder not having had any authority from the city to furnish the bracket, except an implied permission to use it under his contract, the negligence was held to be that of servants in constructing unsafe staging, and not that of a master in not furnishing proper materials.

Other cases in which the principles thus set forth have been held to prevent the injured servant from recovering are the following: *Noyes* v. *Wood* (1894) 102 Cal. 389, 36 Pac. 766; *Perigo* v. *Indianapolis Brewing Co.* (1899) 21 Ind. App. 338, 52 N. E. 462 (injury was caused by the removal of the supports by a fellow servant, plaintiff having notice of what was going on); *Kennedy* v. *Spring* (1893) 160 Mass. 203, 35 N. E. 779 (mason's "tender" injured by negligence of mason in selecting improper materials or in improperly fastening them); *Oelschlegel* v. *Chicago G. W. R. Co.* (1898) 73 Minn. 327, 76 N. W. 56, 409 (negligent selection of plank for temporary scaffold); *Marsh* v. *Herman* (1891) 47 Minn. 537, 50 N. W. 611; *Beesley* v. *F. W. Wheeler & Co.* (1894) 103 Mich. 196, 27 L. R. A. 266, 61 N. W. 658 (riveter and carpenters under the same superintendent, engaged in ship building, held to be fellow servants, so as to preclude recovery by the riveter for injuries caused by negligence of the carpenters in constructing a scaffold on which he works); *Olson* v. *Nixon* (1898) 61 N. J. L. 671, 40 Atl. 694 (part of work; no undertaking to furnish; ship carpenter injured); *Judson* v. *Ocean* (1889) 110 N. Y. 655, 22 N. E. 555, Reversing (1886) 41 Hun, 637; *Bother* v. *Townsend* (1891) 120 N. Y. 105, 26 N. E. 1017, Reversing (1890) 32 N. Y. S. R. 1055, 10 N. Y. Supp. 899; *Hogan* v. *Smith* (1891) 125 N. Y. 774, 26 N. E. 742; *Donnelly* v. *Brown* (1887) 43 Hun, 470 (foot of ladder used for supporting a scaffold was insecurely placed); *Hogan* v. *Field* (1887) 44 Hun, 72; *McCormack* v. *Crawford* (1886) 4 N. Y. S. R. 835; *Thompson* v. *Libbey* (1892) 40 N. Y. S. R. 324, 19 N. Y. Supp. 680; *Swain* v. *Brooklyn Alcatraz Asphalt* (1901) 57 App. Div. 50, 68 N. Y. Supp. 50 (plaintiff was one of several carpenters engaged in taking down a building); *Pfeiffer* v. *Dialogue* (1900) 61 N. J. L. 707, 40 Atl. 772 (plaintiff was lading iron plates to a vessel, while he stood on a scaffold which was increased in height as the work progressed); *Ferguson* v. *Galt Public School Board* (1900) 27 Ont. App. Rep. 480 (plank in gangway constructed by a mason and hod carrier was insufficiently nailed, and gave way under the latter); *State* v. *Armour* (1893) 81 Wis. 623, 51 N. W. 1000 (foreman directed plaintiff to adjust a plank in a scaffold); *Cudden* v. *American Steel Barge Co.* (1894) 88 Wis. 409, 60 N. W. 800; *Peffer* v. *Cutler* (1892) 83 Wis. 281, 53 N. W. 508.

A mason cannot recover for injuries sustained by falling from a staging, due solely to the carelessness of a laborer employed to assist him, in placing one of the barrels supporting the staging so that it rested unevenly on some rubbish on the floor. *O'Connor* v. *Neal* (1891) 153 Mass. 281, 26 N. E. 857.

A master is not required to see that planks laid without fastening, in the usual manner, upon a scaffold erected by his direction, are at all times properly adjusted. Such duty falls upon the servant using the scaffold. *Jennings* v. *Iron Bay Co.* (1891) 47 Minn. 111, 49 N. W. 685.

An unqualified instruction that it was the duty of the employer to furnish a proper scaffold is erroneous where the evidence is that it was part of the employment of the injured person and co-workmen to erect the scaffolds upon which they worked. *Banzhaf* v. *Ludwig* (1898) 28 Misc. 496, 59 N. Y. Supp. 535, Reversing (1899) 27 Misc. 821, 57 N. Y. Supp. 828.

Where a workman was injured by the

fall of a scaffold erected under the supervision of his foreman, as the building progressed, an instruction that the employer is bound to furnish a safe place of work is erroneous. *Lambert* v. *Missisquoi Pulp Co.* (1900) 72 Vt. 278, 47 Atl. 1085 (stagings erected under supervision of foreman, as a building progressed).

Other cases applying the same doctrine in one or more of its various phases are cited in the next three sections.

Both on the ground relied upon in these cases and also on the ground of the unauthorized use of the appliance, a contractor who provides a sufficient scaffold for his work is not liable for the death of an employee from the giving way of an insufficient scaffold constructed for the use of another contractor's employees, and not adopted by him for the use of his workmen, upon which such workman goes in the performance of his work. *Maw* v. *Ferguson* (1892) 44 N. Y. S. R. 372, 17 N. Y. Supp. 349.

(b) *Application of the rule in the case of other instrumentalities.*—A railway contractor is not liable for defects in a trestle which is not a structure furnished for employees to work on, but is itself a part of the work which they are engaged to perform, and is a thing which they themselves make, and "as much a part of the construction of the road as was digging in the pit, loading cars, driving teams, or tamping dirt on the dump." *Kindall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020. As to this case in the Federal courts, see § 616, note 1, *infra*.

The making of the projecting steps in a pile of lumber being a part of the work which the men in the yard are hired to perform, none of them, whether pilers, sorters, or measurers, can recover for injuries caused by the selection of a knotty plank for one of the steps. *Fraser* v. *Red River Lumber Co.* (1890) 42 Minn. 520, 44 N. W. 878 (1891) 45 Minn. 235, 47 N. W. 785.

A master is not liable for an injury to a servant, caused by the fall of a heavy pump, due to the giving way of an eyebolt insecurely fastened in the ceiling by a fellow servant for the purpose of raising such pump. *Watts* v. *Beard* (1897) 18 App. Div. 243, 45 N. Y. Supp. 873.

"There is no question," said the court, "about the competency of the plaintiff's coemployees, nor of the strength and sufficiency of the eyebolt. The difficulty arose from the failure to securely fasten it in the ceiling for the purpose designed. If this preparation for the work of hoisting the pump was within the duties of the defendants, then whoever did it represented them, and the negligence was theirs. This is the contention of the plaintiff's counsel, by whom it is insisted that they failed to use the care required of them to afford to the plaintiff a safe place for his work. When the men commenced the performance of the work of adjustment of the pump there was no want of safety in the situation, or in the existing conditions, at the place where this was to be done, nor was there any defect in the appliances employed in the work. The accident arose from the failure to make such use of them as to give safety to its performance. It is not important to inquire whether the failure of the eyebolt to retain its place in the ceiling was attributable to the use of a larger sized bit than should have been used, or to an unsubstantial condition at the place in the wooden ceiling where the hole was made for it. The eyebolt was not designed as a permanent attachment to the ceiling, or for subsequent use in the business of the defendants. It was adopted as a temporary expedient for the occasion—employed as a means to accomplish the purpose then in view, and the use made of it was within the details of the work which the workmen were proceeding to perform. In that view any negligence to which the plaintiff's injury may have been attributable was not that of the defendants, but was that of his coemployees."

A member of a bridge gang cannot recover for injuries caused by the fact that a wedge used in constructing a temporary track for the conveyance of materials slipped out of place. *Bedford . R. Co.* v. *Brown* (1895) 142 Ind. 659, 42 N. E. 359.

A triangle made from plank and used for scraping a mast is of such simple construction that it is not negligence on the part of the owners of a vessel not to have a completed triangle on board, if suitable materials are provided. *Kalleck* v. *Ewing* (1897) 169 Mass. 200, 47 N. E. 598, Former Appeal (1894) 161 Mass. 469, 37 N. E. 450.

The decisions cited in this note should be compared with those cited in § 613, *supra*.

for the construction of such a platform."[1] Under the general principle stated in § 594, *supra*, the question whether the one or the other of these duties was chargeable to the master is primarily one for the jury, under proper instructions.[2] So far as regards the control or review of the conclusions of a jury, the essential matter for the consideration of a court is the effect of the evidence, as indicating the relation which the servant responsible for the defects in the instrumentality bore to the plaintiff and the defendant, either in directing the work which resulted in the production of that instrumentality, or in providing the materials of which it was to be constructed.[3]

What that relation is, may, as an analysis of the cases shows, be determined by following either one of two lines of investigation, to each of which certain logical conceptions are peculiarly appropriate. For the sake of clearness, therefore, it will be well to differentiate between the alternative theories of the evidence which is customarily presented in cases of this class, though at the same time it should be remarked that the interval between them is so easily bridged that the courts quite commonly pass from one to the other in the course of the same opinion.

The starting point of one of these lines of investigation may be said to be the question whether the construction or adjustment of the defective instrumentality was a function which the master was justified in leaving to the servants themselves. Thus, to take the most numerous group of cases under this head for the purposes of illustration, the mere fact that a staging was not built under the immediate personal supervision of the master is manifestly not sufficient to justify a trial judge in ruling, as a matter of law, that the plaintiff cannot recover. The omission to exercise such supervision may itself have been negligent.[4] That the delegation of the function was

[1] *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697.

[2] *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874 (negligence here was in the erection and support of a run for large stones, and in the selection of the gear), Citing *Arkerson* v. *Dennison* (1875) 117 Mass. 407, where the general rule was laid down as follows: "When the preparation of the appliances is neither intrusted to nor assumed by them, the master may be held guilty of negligence if defective appliances are furnished, even though the workmen themselves are employed in the preparation of them. In such case, negligence appearing, it is a question of fact for the jury whether that negligence was in respect of what was done or undertaken by the fellow workmen, or was the negligence of the master."

[3] *Richards* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 234.

[4] *Arkerson* v. *Dennison* (1875) 117 Mass. 407. There the plaintiff, by direction of his employer, went onto a staging which, being either constructed of unsuitable materials, or insufficiently fastened together, was insecure, and which was built before the plaintiff began work by persons who were afterwards his fellow workmen, the defendant directing what lumber was to be used

not culpable is sometimes inferred from positive evidence, showing that such workmen as those in question generally construct their own scaffolds and adjust their own appliances.[5] But specific testimony of such a custom is not necessary to negative fault in this regard. The virtual effect of the authorities is that, whenever the defective scaffold or other appliance was essentially one of a temporary character, constructed or adjusted with a view to some particular piece of work, the master cannot be held negligent, merely for the reason that he left such construction or adjustment to the servants themselves.[6] Accordingly, whenever the instrumentality is one of this

therefor, and, although the staging was not built under his direct personal supervision, superintending the work generally. The court said: "Whether a particular structure or appliance is one for which the master is responsible to his servant may depend upon circumstances, including the nature and scope of the employment of those engaged in its preparation and use. It may depend upon the question whether the direction and charge of the work is confided to the workmen, or some of them, or retained by the employer, or left unprovided for. If the employer directs his workmen to do certain work, leaving it to them to provide the structures and appliances required for its prosecution, he may be responsible only for care in selection of the men and material assigned for it. But if he simply employs them to work under his direction, giving them no charge or responsibility in regard to the result to be accomplished or the appliances to be used, that responsibility remains with him. The negligence of fellow workmen for which the master is held to be exempt from responsibility is negligence in respect to that which the workmen undertook or were set to do. . . . It would have been competent for the jury to find that the defendant had not intrusted the preparation of the staging to anyone else, and therefore that he retained the charge and direction of it himself, and was bound to exercise some degree of care in regard to it, which he neglected to do."

"When the selection of materials or construction of the appliances to the business is such that it may properly be left to the workmen, in their capacity as workmen, and within the scope of their employment, and it is so left by the master, he is relieved from responsibility for their negligence." *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

"The liability of the master cannot be determined merely by showing that the place where the workmen were engaged in his service was a scaffold, but it must depend upon the nature of the scaffold and the purposes it is to subserve, whether it could be properly left to the workmen to determine and control the method of its construction, and whether they did in fact control its erection, or whether the master had charge thereof." *F. C. Austin Mfg. Co.* v. *Johnson* (1898) 32 C. C. A. 309, 60 U. S. App. 661, 89 Fed. 677.

See further, as to this case in § 617, *infra*.

Another case recognizing the criterion adverted to in the text is *O'Connor* v. *Rich* (1895) 164 Mass. 560, 42 N. E. 111.

[5] In *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860, the court remarked that "when a gang of masons are engaged in plastering or pointing a room, the construction of proper platforms or places upon which to stand while doing the work is one of the details of the business that is generally left to the workmen themselves."

In *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697, one of the evidential factors enumerated was that it was "customary" for carpenters employed to do the particular kind of work in question to construct the necessary scaffold.

See also *Noyes* v. *Wood* (1894) 102 Cal. 389, 36 Pac. 766, where the same conception is adverted to.

[6] In a recent case it was observed that the courts draw a distinction between a scaffold which is a permanent platform furnished by the employer, on which he invites his workmen to stand in doing

character, the burden of proof lies on the servant to overcome the presumption of nonculpability by adducing some positive evidence from which an obligation on the master's part to furnish such instrumentality in a completed state is reasonably inferable.[7] On the other hand, it is also clear, both upon principle and authority, that the fact of an appliance being ordinarily prepared by the plaintiff's fellow servants is not necessarily a bar to the action. Since the duty to furnish safe appliances rests upon the master, he must discharge his duty in the premises. Negligence, however often repeated, will not ripen into an excuse for a neglect from which injury results.[8]

It will be observed that the theory upon which recovery is, from this standpoint, permitted or denied, is simply that, as there is no culpability on the master's part, the general principle is left to operate, that in selecting and using the materials the workmen act as each other's fellow servants.[9]

their work, and a temporary and movable platform to be increased in height as the work progresses by the workmen themselves as their needs require. *Maher* v. *McGrath* (1896) 58 N. J. L. 469, 33 Atl. 945. Contrasting *Mulchey* v. *Methodist Religious Soc.* (1878) 125 Mass. 487.

In *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697, it was considered that the cases containing the latest expressions of opinion of the court of appeals established this principle: "Where an employer employs mechanics to do a certain amount of work, the doing of which requires the use of scaffolds is a part of the work of the m employed to construct, and e furnishes proper materials w hich to construct the scaffolds, the negligent use of such materials, either by improperly uniting them together or by selecting materials not proper for the particular use for which they are selected, whereby one of such mechanics is injured, as the accident was not the result of the neglect of a duty that the master owed to his employees the master is not liable."

A servant cannot recover for injuries caused by the fall of a scaffold, where the evidence is merel a rope which should have secured a spar slipped or came untied. *Rickett* v. *Atlas S. S. Co.* (1884) 12 Daly, 441.

Compare also the rulings cited in the following notes.

[7] See *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860, where one of the grounds on which it was held that the plaintiff failed to make out a case for the consideration of the jury was that he had not shown that it was the duty of the master, under the circumstances, to construct the platform on which the masons were to do the work; but that, on the contrary, the proof showed that this duty was assumed by the workmen as one of the details of the work.

[8] *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

[9] In *Ross* v. *Walker* (1891) 139 Pa. 42, 21 Atl. 157, 159, where the action was held not to be maintainable for an injury caused by a defective falsework, the court said: "It is not material to this inquiry to know whether 'Duffey had entire charge and control of the work' as a foreman or not; nor to know whether he selected from the mass furnished by the employer the materials to be used for any particular purpose or not; nor whether he hired and discharged men or not. The inquiry is, Was it the employer's duty, after having provided materials ample in quantity and quality, to supervise the selection of every stick out of the mass for every purpose? To state this question is to answer it. This was not his duty, and for that reason Duffey, if he did select the timber, which is more than doubtful under the testimony, did not represent Walker as a vice principal in such selection. He and his fellow workmen were to judge of the suitability of the pieces

The essential question to be determined, if we choose the alternative line of investigation, is whether the master, as a matter of fact, assumed to furnish the scaffold or other instrumentality in a completed form, or merely furnished the materials and left them to be used by the servants themselves.[10] Clearly, if such assumption is established, the master will be liable, as for negligence, even if the circumstances were otherwise such that he would have been justified in leaving the servants to prepare the defective instrumentality themselves.[11]

The case is for the jury where the evidence is conflicting, or reasonably consistent either with the hypothesis that the defective appliance was constructed by the fellow servants of the injured person out of materials furnished by the master, or with the hypothesis that it was

of timber they used for the uses to which they put them, and their error in judgment, or their careless discharge of this duty was their fault or failure, and not that of their employer. He had discharged his duty when he furnished an abundance of materials from which they could select what was needed. The actual selection out of this stock of the sticks needed from time to time was not his duty but that of the workmen themselves. If there was a visible defect in a stick, common prudence and common care on their part would have rejected it and supplied its place with another out of the stock at their command." It was held error to have refused to instruct the jury that, if they found the defendant put the work in charge of a competent foreman, and provided suitable materials for the scaffolding in sufficient quantity, then he was guilty of no negligence and the verdict must be in his favor.

See also the language used in *Keystone Bridge Co.* v. *Newberry* (1881) 96 Pa. 246, 42 Am. Rep. 543.

[10] In one of the cases already cited, it was laid down that, generally, "to establish a cause of action for such an injury plaintiff must prove, in addition to the fact that there was negligence in the selection of the materials for the building of the scaffold, the additional fact that the master, or someone that stood in the relation of representative of the master, assumed to construct the scaffold, and then directed the employees to use it as a constructed scaffold." *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697.

[11] *Kinnare* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860 (where, however, the action was held not to be maintainable for the reason that there was no evidence that the defendants actually constructed or directed the construction of the platform which gave way); *Glasgen* v. *Gilbert* (1896) 165 Mass. 443, 43 N. E. 199; *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528.

"Where an employer employs men to do particular work, furnishing them with a complete scaffold as an appliance with which to do the work, if that completed scaffold is an unsafe or an improper appliance for the purpose for which it was to be used, there is a violation of the duty imposed upon the employer to furnish his employees proper appliances with which to do the work." *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697.

In *Miller* v. *Missouri P. R. Co.* (1891) 109 Mo. 356, 19 S. W. 58, the court said: "Cases often arise where the master becomes liable by reason of the fact that he undertakes by himself, or through a representative, to do certain things which might have been left to the servant to perform. Thus, where the master provides suitable materials for a staging and intrusts the duty of erecting the structure to the workmen as a part of the work which they undertake to perform, he is not liable for injuries resulting to one of them from the falling of the staging; but, if the master undertakes to furnish the stage, he must use due care in its erection, and, if there is negligence on his part or on the part of one representing him in that regard, he is liable for injuries resulting to the servant using the structure."

constructed under the direction of the defendant or his representative.[12]

The proper instructions to be given for the guidance of the jury are elaborately discussed in the case cited below.[13]

[12] *Bryer* v. *Foerster* (1896) 9 App. Div. 542, 41 N. Y. Supp. 617.

[13] In *Colton* v. *Richards* (1878) 123 Mass. 484, the evidence tended to show that the staging was erected by fellow workmen of the plaintiff, out of material furnished by the defendant; that the staging was insecure by reason of a small piece of defective timber, called a putlog, on which the floor of the staging rested, and which had been in use by the defendant about two years; that the material for the staging was lying on the ground in piles near the building, and, from the mass, persons who were afterwards the fellow workmen of the plaintiff selected such material as they wanted, including the putlog in question; that some of the workmen were journeymen whose trade it was to learn to build safe and proper staging, and that they superintended the erection of this staging. The plaintiff asked the judge to instruct the jury as follows: "1. It is the duty of an employer to provide reasonably safe and proper material and implements for his workmen to work with and use, and his failure so to do is negligence. 2. If it was the duty of the defendant to provide for the plaintiff a completed staging as a structure, as an implement or appliance to carry on this work, then he was bound to see that the staging was a reasonably safe and strong one, and suitable to the work required of the plaintiff, and the fact that fellow workmen of the plaintiff used poor material furnished by the defendant, in the erection of such staging, is no defense. 3. If the putlog was a manufactured and completed implement or utensil, and was furnished by the defendant for the plaintiff's use, he is liable, even though it was put in use by the act of the plaintiff's fellow workmen." The judge refused to give these instructions, and instructed the jury that the plaintiff could not recover, unless they were satisfied that the defendant did not exercise ordinary care in the selection of men and materials to erect the staging, and that such want of ordinary care caused the accident; and that, if the defendant was to furnish a staging as a completed structure, he was to use such care in so doing as any person of ordinary prudence would use in providing such a structure, and that, if he was only to furnish material, he was to use ordinary care in the selection of material; that if he was to furnish this putlog as a manufacturer's utensil, he was to use ordinary care in so doing." In the substitution of these instructions for those requested, there was held to be no error, and that the jury must have found either that the defendant did not assume the alleged duty in any of the forms suggested, or that the duty, whatever it was, was faithfully performed.

There being evidence in the same case which the defendant contended showed that he did not superintend the erection of the staging, the judge also instructed the jury, at the defendant's request, as follows: "1. If the defendant employed competent men to take charge of the erection of this building and of the necessary staging, and furnished suitable material for building the staging, out of which material a fellow workman, not under the superintendence of the defendant or his agent, selected a defective putlog, which broke after the staging was erected, by which the plaintiff was injured, the defendant was not liable. 2. The defendant is not liable if he used ordinary care and prudence in the selection of competent workmen and materials, from which this staging was made." After these instructions had been given, the court, at the defendant's request, further ruled, in substance, that if the defendant employed competent men to take charge of the erection of this building and of the staging necessary, and furnished suitable material therefor, he would not be liable if a fellow workman, not under the superintendence of the defendant or his agent, selected a defective putlog, by the breaking of which the plaintiff was injured; and added that the defendant would not be liable if he used ordinary care and prudence in the selection of competent workmen and materials, from which the staging was made. It was objected by the plaintiff that this last and additional sentence does not state the full measure of the defendant's duty, when, as master, he takes

616. Special circumstances not affecting the extent of the master's liability.— (As to the effect of an express undertaking on the master's part to furnish an appliance the construction of which he might have left to the servants, see the preceding section.)

a. Superior rank of the delinquent employee.—It would seem that inferences unfavorable to the defendant will more readily be drawn, where the delinquent coservant was in a position of control which normally left him free to arrange the details of the work at his own discretion, without any interference on the master's part.[1] But it is

upon himself the business of furnishing a completed staging for the use of his workmen. The court said: "In such case, it may indeed be true that the exercise of due care in selecting men and materials will not always satisfy the obligation assumed. It may still be his duty, especially when he superintends the work himself, to see that the completed structure is in itself reasonably safe and fit for the uses to which it is devoted. But this last statement appears to have been only intended to apply to a case where the duty of the master did not include the building of the staging, but ended with the supply of materials. The judge has just told the jury that, if the defendant was to furnish a completed staging, he was bound to use such care as a person of ordinary prudence would use in providing such a structure. This was sufficiently definite in the absence of any request for more specific instructions. The plaintiff relied on the defendant's neglect of duty in several forms, as we have seen, and the instructions asked by the defendant, taken together, imply that they all refer only to that which related to the supply of suitable material for the work. They expressly refer in terms to the case where the plaintiff and his fellow workmen are employed to take charge not only of the erection of the building, but of the necessary staging also, and where the defective timber is selected by a fellow workman, not working under the superintendence of the defendant or his agent. As applied to such a case, all parts of the instructions given at the defendant's request are correct and consistent; and the plaintiff's objection is not well taken."

[1] In *Woods* v. *Lindvall* (1891) 1 C. C. A. 37, 4 U. S. App. 49, 48 Fed. 62, a contractor for railway construction was held liable for defects in a trestle erected for the purpose of the work by his superintendent. The court said, speaking of this official: "He had authority to direct all the men on that section, between thirty and forty in number, when to work, where to work, and how to work, and it was their duty to obey his orders. He superintended and supervised all the work on the section, and hired and discharged workmen at his discretion. In these respects he was invested with all the power and authority his principals possessed. He did not ordinarily do manual labor; his chief duty was to supervise personally the work, including the building of the trestle, and to give directions how all parts of the same should be done. He went back and forth between the places where the different crews were at work on the section, directing and instructing, and occasionally assisting, each of them in the work they were doing. Johnson, who framed the bents and put up the trestle, worked in obedience to his orders, as well as the other men. As the plaintiffs assumed, through Murdock, the superintendence and control of the construction of the trestle, they were bound to exercise ordinary care to make it reasonably safe and secure for those called to do work upon it. In the discharge of this duty Murdock occupied the place of the plaintiffs in error, and any failure on his part to exercise ordinary care in the discharge of this duty is imputable to them. Whether the trestle was one of those structures the building of which the master might have committed to ordinary fellow laborers, without any instructions or superintending care, by simply providing them with adequate materials and tools to do the work, need not be discussed. The plaintiffs in error did not attempt to build the trestle in any such way. They did not leave the mode and manner of its construction to the discretion or judgment of the laborers doing the work, but

clear from the decisions that, if the rest of the facts show that the work of construction was intrusted to the servants, as part of their duties, the mere fact that the delinquent employee was a foreman, exercising some control over the injured person, is not sufficient to show that the master assumed to furnish the servants with such a structure as was necessary to do the work.[2]

b. Similarity or dissimilarity of the work in which the delinquent and injured servants were engaged.— (Compare § 620, *infra.*) In many of the cases belonging to the category now under review the court has laid more or less stress upon the fact that the plaintiff himself was one of that particular set or group of servants to whom the construction of the defective instrumentality was intrusted.[3] It is

they constituted Murdock their representative, and imposed on him the duty, and conferred on him the authority, to supervise, direct, and control its construction, and required the laborers to obey his orders and directions in the premises. Under these relations Murdock did not sustain the relation of a fellow servant to the defendant in error in respect to this work. He stood in the shoes of his employers, and was their representative, and they are responsible for the results of his negligence in the work so committed to his direction, supervision, and control." A different conclusion with regard to the same facts was reached by the supreme court of Minnesota in *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020.

In *Blomquist* v. *Chicago, M. & St. P. R. Co.* (1895) 60 Minn. 426, 62 N. W. 818, a foreman of a crew of stone-masons, with power to hire and discharge the workmen, was held to be a vice principal in respect to a common laborer aiding the masons, who was injured by the negligent manner in which a derrick was constructed, when the foreman directed where and how it should be built. The case was distinguished from *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020 (see § 614, note 1, subd. [h], *supra*), on the ground that the place, the plan, and the manner of putting up the appliance had been especially and unconditionally delegated to the foreman. (Canty, J., dissented.)

[2] See *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860; *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697; *Swain* v. *Brooklyn Aleatra; Asphalt Co.* (1901) 57 App. Div. 56, 68 N. Y. Supp. 50.

In *Kitlea* v. *Faxon* (1878) 125 Mass. 485, the defendant employed a carpenter to superintend the entire job of repairing a building, and directed him to erect a staging, which was solely for putting on the gutters. In doing so, he insecurely fastened the brackets to the building. On the next day the defendant ordered copper gutters of a coppersmith, and directed him to send a man to put them on. This man was sent accordingly, and was directed by the carpenter where to go on the staging, which fell and injured him. The court said: "There was no evidence which would justify the jury in finding that either of the defendants undertook to furnish a staging for the plaintiff, or to assume the risk of its safety. It was like the ordinary case where a man, in building or repairing a house, employs various servants in different departments of labor. Neither of the defendants retained any charge or direction of the work of putting up the staging, but intrusted it to Higgins. He and the plaintiff were fellow servants employed in the same service, and each took the risk of the negligence of the other. It is not contended that there was any evidence of negligence on the part of the defendants in the employment of Higgins, it appearing that he was a skilful and competent carpenter. It follows that the plaintiff has proved no negligence for which the defendants, or either of them, are responsible."

[3] *Colton* v. *Richards* (1878) 123 Mass. 484; *Kelley* v. *Norcross* (1877) 121 Mass. 508; *Adasken* v. *Gilbert* (1896) 165 Mass. 443, 43 N. E. 199; *Moore* v. *McNeil* (1898) 35 App. Div. 323, 54 N. Y. Supp. 356; *Whalton* v. *Sprague Electric Elevator Co.* (1896) 1 App. Div. 264, 37 N. Y. Supp. 174; *Voyes* v. *Wood*

undoubtedly under such circumstances that the rule operates least harshly, especially if the injured person was himself an expert as regards the construction of the appliance which proved defective.[4] In some states of the evidence such a situation may even render the defense of contributory negligence available to the master.[5]

But it may be now taken as settled law that the mere fact that the injured and negligent persons were not doing the same kind of work is not of itself a sufficient ground for predicating a right of recovery.[6]

(1891) 102 Cal. 389, 36 Pac. 766; *Mahon* v. *McGrath* (1893) 58 N. J. L. 439, 33 Atl. 945 (master not liable to a hod carrier for an injury from the negligent manner in which masons constructed a scaffolding); *Crawford* v. *Stewart* (1886; Pa.) 6 Cent. Rep. 110, 8 Atl. 5; *Stutz* v. *Armour* (1893) 84 Wis. 623, 54 N. W. 1000; *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017; *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874; *Willis* v. *Oregon R. & Nav. Co.* (1884) 11 Or. 257, 4 Pac. 121.

"If this plaintiff and his coemployees, without specific instruction from the master, or one acting for the master and under his authority in the performance of the duty which he owed to his employees, constructed this scaffold of improper material, it would undoubtedly be a case where the negligence was that of a fellow employee or coservant with the plaintiff, for which the master would not be liable." *Richards* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 231.

[4] See, for example, *Hoppin* v. *Worcester* (1885) 140 Mass. 222, 2 N. E. 779; *Vincent* v. *Manderstock* (1898) 30 App. Div. 308, 51 N. Y. Supp. 494; *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697; *Griffiths* v. *New Jersey & N. Y. R. Co.* (1894) 8 Misc. 3, 28 N. Y. Supp. 75, Affirming (1893) 5 Misc. 320, 25 N. Y. Supp. 812; *Perigo* v. *Indianapolis Brewing Co.* (1899) 21 Ind. App. 338, 52 N. E. 462. In all these cases the plaintiffs and their fellow servants were carpenters and had themselves erected or modified the scaffold which fell.

[5] It has been laid down that, where the workmen of whom the plaintiff was one, although the construction of the appliance was no part of their business, undertook, without objection, to construct it, and did this so carelessly that it was insecure, the plaintiff was debarred from recovery on the ground that he, as well as his colaborers, was guilty of negligence. *Hogan* v. *Field* (1887) 44 Hun, 72.

[6] In *Beesley* v. *F. W. Wheeler & Co.* (1894) 103 Mich. 196, 27 L. R. A. 253, 61 N. W. 658, it was held that riveters working on a ship could not recover for the negligence of the carpenters in constructing a scaffold. The court reasoned thus: "Here the defendant was engaged in the enterprise of building a ship. Artisans of various kinds were employed to do their respective shares of the work. The building of stagings, the erection of derricks, and the raising of materials were parts of the necessary work, incident to, and simultaneous with, and in fact a part of, the building of the ship. Stagings were for temporary use, and indispensable. All was under the charge of one superintendent, who directed the different gangs through their respective foreman. There is nothing to indicate a contract to provide a safe scaffold to work upon, or an assumption of that duty by the master, and the case seems to be clearly within the rule of *Killea* v. *Faron* (1878) 125 Mass. 485, which it closely resembles, and of *Hoar* v. *Merritt* (1886) 62 Mich. 386, 29 N. W. 15 (see below). The duty was one which was left to those engaged in the construction of the ship. It is believed that this does no violence to the rule of safe place. The case is different from those where the master furnishes a permanent place to work, as in a ship or factory. A master's duty in such a case is to make and keep the place reasonably safe; but that rule would apply as to those working in, but not necessarily as to those constructing, the factory. Such employees would not be fellow servants with each other, for the enterprises would not be the same. The service of one would be the erection of the completed factory; that of the other its use for the purpose for which it was designed. But here the scaffold builder and the riveter are engaged in the com-

Nor is any larger measure of liability imposed on the master merely for the reason that the appliance which proved defective had been constructed by another set of servants for their own use, and afterwards incorporated with the appliance which the injured servant and his co-laborers constructed for their own purposes.[7] The fact that the delinquent and injured servants were engaged in different kinds of work may, however, be material as tending to show that the undertaking of the master was to furnish the instrumentality in a completed condition.[8]

c. Completion of appliance before plaintiff entered the employment.—The established doctrine is that, wherever the circumstances were otherwise such that the injured servant could not have recovered if he had entered the defendant's service before the defective appliance was completed, his position is not in any way improved by the mere fact that he began work after such structure was completed.[9]

mon service of building a ship. The work of both goes along together, and it seems to us that the case is clearly within the rule of *Priestley* v. *Fowler*, 1837) 3 Mees & W. 1, Murph. & H. 305, 1 Jur. 987, and kindred cases."

A lumber company is not liable where a knotty plank negligently selected by a servant piling lumber to serve as a step for persons having occasion to mount the pile gives way under a scaler and measurer. *Fraser* v. *Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785.

See also *Killea* v. *Faxon* (1878) 125 Mass. 485, cited in subs. (*a*), *supra*.

[7] *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860.

An action has been held not maintainable where a scaffold, carelessly constructed by carpenters for their own use from suitable materials furnished by the master, is subsequently used by painters working on the same building, and falls, injuring one of them. *Hoar* v. *Merritt* (1886) 62 Mich. 386, 29 N. W. 15.

[8] See § 614, *supra*, and also the cases cited in § 620, *infra*.

[9] In *Lambert* v. *Mississquoi Pulp Co.* (1900) 72 Vt. 282, 47 Atl. 1085, the court, in discussing the effect of evidence that the workman had come upon the job after a defective scaffold had been built, said: "It is true that the plaintiff sustained no relations to the defendants or their workmen while the staging was being built, and that as far as his service, considered individually, was concerned, he went to work upon it as a place prepared for his use. But the plaintiff's service involved no use of the staging that was independent of the work of construction, and it had been prepared, not by the master as something which he undertook to provide for the plaintiff, but by his workmen as a part of the general work which they had undertaken to do, and upon which plaintiff entered. We think that in associating himself with these workmen for the completion of the building by the use of the staging already erected, the plaintiff assumed the risks which attached to the workmen generally. The test of the master's liability is not whether the servant came before or after the staging was built, but the relation which the structure sustained to the relative duties of master and servant."

An employer "owes one who is about to enter his service no duty to inspect all the work which has been done by his servants previously, and which ordinarily may be intrusted to them without liability to their fellow servants for their negligence." *O'Connor* v. *Rich* (1895) 164 Mass. 560, 42 N. E. 111, where the servant was injured by the fall of a scaffold erected by his fellow workmen a few days before he entered the service, from suitable materials supplied by the master.

See also *Arkerson* v. *Dennison* (1875) 117 Mass. 407; *Olsen* v. *Nixon* (1898) 61 N. J. L. 671, 40 Atl. 694; *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697. In this last case the judges, while not differing in opinion as to the general principle, disagreed as

The only peremptory inference which can be drawn from such a circumstance, coupled with the servant's ignorance of the defective construction, is that the servant was not guilty of contributory negli-

to the propriety of applying it under the circumstances in evidence. The reasoning which led the majority to the conclusion that the servant could not recover was as follows: "Great stress is laid in this case upon the fact that the plaintiff was employed to do the carpenter work after the timbers or sleepers upon which the planks were to be put had been placed in position by the carpenters employed by the defendant to do this work; but it seems to me that that fact is not at all material. The question is not so much as to whether the particular neglect or negligence which selected this improper piece of timber and placed it in this position was the negligence of a fellow servant, as it is whether it was the duty of the master, as master, to furnish these carpenters, employed by him to do carpenter work, which work involved the placing of these timbers in the position in which they were placed, a completed structure or scaffold for the purpose of doing the work. . . . Suppose one of these planks which he used in this way had broken and the injury had resulted therefrom,—it is clear that the master would not have been liable. Upon what principle then can he be said to be liable because one of the timbers that the plaintiff used to rest the planks upon was insufficient for the purpose? Is it because the timbers had been placed in the position in which they were when the plaintiff used them by some men in the employ of the defendant who, when the accident happened, were the plaintiff's fellow workmen? It seems to me clear that no liability of the defendant could be predicated upon such a distinction. Upon what principle can it be said that this plaintiff was not as much bound to examine these particular timbers which had been placed in this position by others as he was bound to examine the planks upon which he stood, and which he shifted as the necessities of the work required? Both the planks and the timbers were materials furnished by the master for the use of his men. An examination of the timbers would have disclosed this knot which it is alleged was the cause of the plank's breaking. It was not the master's duty to examine each timber before it was put in place by the carpenters, nor did he assume that task. If the master furnished for his workmen proper timbers for the purpose—and it is conceded that these timbers were proper if they had been of ordinary strength and without knots—and employed competent men to put the timber in place, he had performed his duty to the men who used them. It seems to me that this is expressly within the principle established by the cases before cited."

The following passage from the dissenting opinion is well worth quoting as an extremely able exposition of the other possible theory of the evidence: "If, with the latter, he and his fellow servants, as a detail of their own work, had undertaken to construct the scaffold, and had selected improper, where they might have chosen proper materials, the defendant would not be liable for injuries resulting from such defective construction. Here, however, the scaffold was erected ten days before the accident and one week before the plaintiff went to work upon it; and the plaintiff was directed by the defendant's foreman to get on this scaffold to do the ceiling work. The scaffold was about 10 or 11 feet above the floor at the wall and about 7 feet above the floor in front, and, unless properly constructed, was necessarily a dangerous place for the plaintiff and the other carpenters to work. That the knot in the sleeper made it dangerous to use in the construction of the scaffold was fairly to be inferred; and it is undisputed that the plaintiff had no part in the selection of the defective sleeper. When he went to work he found the scaffold already erected; and, having been ordered by the foreman to go to work thereon, he was justified in assuming that the master had discharged the duty which rested upon him of supplying a safe scaffold. I do not think this inference is in any way weakened by the fact appearing that the scaffold was actually constructed by the other carpenters who had preceded the plaintiff upon the work. If the plaintiff had assisted in its construction, or had been present and working at the time it was erected, a different question would be presented. Where, however, as here, the plaintiff, under what must be regarded as the master's instructions, went to work upon the scaf-

gence.[10] Evidence of this character, however, like that adverted to in the last subsection, may tend to show the actual character of the master's undertaking in regard to the defective instrumentality.

617. When the delinquency is deemed not to be in respect to the details of the work.— The limits of the doctrines discussed in the preceding sections of this subtitle will be more clearly apprehended if we contrast the situations reviewed with those in which the servant has been held entitled to recover, *viz.*:

1. Where the instrumentality which caused the injury was furnished by the master himself.[1]

2. Where there was an implied undertaking on the master's part to supply that instrumentality in a completed condition. See also § 567, note 7, subd. (e), *ante*, and compare subds. 5, 6, *infra*.[2]

fold already erected, he had a right to assume that the master had discharged the duty of supplying a safe scaffold. If the accident, instead of occurring on this armory, had occurred subsequently on another building which the defendant was engaged in constructing, and to and upon which he had furnished for the use of the workmen this defective scaffold, I do not think, as against a workman who had no previous knowledge of how or by whom the scaffold was constructed, that the master could claim, as matter of law, that he was relieved from responsibility, because, as a matter of fact, at some previous time the scaffold had been constructed by workmen in his employ. I can see no distinction in principle between the position of the plaintiff, who came upon the building after the scaffold was erected, with no knowledge of its prior history or hand in its construction, as connected with this armory, and his position as affected by a defective scaffold furnished in another building."

[10] *Hogan* v. *Smith* (1891) 125 N. Y. 774, 26 N. E. 742.

[1] Where, in unloading a vessel in a ship yard, an iron hook was fastened by the owner of the yard to the wharf, to hold a rope and tackle used for the work, running from the ship to the wharf, the hook must be considered an appliance used in the business, for reasonable care in maintaining the security of which the owner of the yard, for whom the work was done, was responsible to his employees. *Olsen* v. *Starin* (1899) 43 App. Div. 422, 60 N. Y. Supp. 134.

See also *Colton* v. *Richards* (1878) 123 Mass. 484, where the effect of a personal superintendence by the master is adverted to.

[2] A scaffold which is in the nature of an appliance furnished to the workmen to enable them to put in place the steel superstructure of a bridge is not within the scope of the doctrine that the master is not liable for the unsafety of a structure the erection of which is part of the work to be done. *F. C. Austin Mfg. Co.* v. *Johnson* (1898) 32 C. C. A. 309, 60 U. S. App. 661, 89 Fed. 677. The court said: "On part of the company it is claimed that the scaffold was of such a character that it comes within the exception to the general rule, which relieves the master from liability for stagings or scaffoldings erected by laborers who are to work thereon, and wherein it is held that the master's duty is performed if suitable materials are furnished for the erection of the scaffold. This exception originated in cases wherein a servant, such as a bricklayer, mason, carpenter, or the like, undertakes the performance of some work, like the erection of a wall, shingling a roof, or painting a house, which of necessity requires the construction of a scaffold or staging upon which the workmen may stand when engaged at work, and wherein it is customary for the master to furnish the materials, and the mechanics to actually construct therefrom the staging necessary for the work. In this class of cases the workmen will know the extent of the burden to which the staging will be subjected, and they are at liberty make the same as strong as they deem necessary. The method of the construction of the scaffold is under

their control, and they have the necessary knowledge of the strain it will be subjected to when in use to enable them by the use of due care on their own part to safely construct the same; and, under such circumstances, if the scaffold proves to be insufficient, it will be due to the lack of proper care on part of the workmen, assuming that the master has exercised due care in furnishing safe materials for the construction of the staging. In such cases the master is relieved from responsibility, not because the place where the workmen are employed is a scaffold simply, but because the master did not in fact undertake to furnish the scaffold for the use of the workmen when in his employ. The liability of the master cannot be determined simply by showing that the place where the workmen were engaged in his service was a scaffold, but it must depend upon the nature of the scaffold, the purposes it is to subserve, whether it could be properly left to the workmen to determine and control the method of its erection, and whether they did in fact control its erection, or whether the master had charge thereof. In the case at bar the scaffold was intended, not only as a place whereon the workmen were to stand, but as a support upon which was to be placed the entire superstructure of the bridge during the course of its erection. If it should fall through faulty construction, it might cause the entire or partial destruction of the steel work furnished by the company, and the company would be compelled to make good all damages thus caused. It is clear that such workmen as the defendant in error could not be expected to know the strain that would be placed upon this scaffold in the erection of the steel superstructure. It is equally clear that it would not have been open to the defendant in error to exercise any control over the method in which the scaffold was erected or the material used in its construction. The purpose for which this scaffold was to be used renders inapplicable the reasons upon which the rule is based,—that ordinarily the master is not responsible for the safety of stagings which the workmen put up as aids in carrying out the particular work they are employed to perform. The use to which it was intended to subject this structure, in that there would be placed thereon not only the dead weight of the material composing the bridge, but also the strain, caused by placing the different parts in proper position, clearly shows that the erection of the staging was not a matter that could be safely left to the control of ordinary laborers, but required skilled control by persons who from experience would know what strain would be placed on the staging, and the evidence shows that in its erection the defendant in error exercised no control or judgment, but on the contrary it was erected solely under the direction of Charles Kniffer, who, as a skilled expert, had been sent out by the company to erect the bridge and settle for it with the county authorities. Furthermore, it clearly appears that the scaffold, as constructed, was in the nature of an appliance furnished to the workmen to enable them to put in place the steel superstructure. The floor beams, side braces, trusses, and other parts of the bridge proper were carried out on the scaffold, put in place, and bolted together."

The failure to brace the heads of a falsework erected to sustain a heavy "traveler" used in building a bridge results in a structural defect, for which the employer is responsible. *Beattie* v. *Edge Moor Bridge Works* (1901) 109 Fed. 233. To same effect, see *Parsley* v. *Edge Moor Bridge Works* (1901) 168 N. Y. 589, 60 N. E. 1119, Affirming (1900) 56 App. Div. 71, 67 N. Y. Supp. 719 (involving essentially the same facts with the additional feature that the piles of the falsework were too short).

A servant who is set to work in a chamber of a mine after it has already been timbered may recover for injuries caused by the fall of the roof, if the defective conditions could have been discovered by a timely inspection. *Western Coal & Min. Co.* v. *Ingraham* (1895) 17 C. C. A. 71, 36 U. S. App. 1, 70 Fed. 219.

In *Tomaselli* v. *John Griffiths Cycle Corp.* (1896) 9 App. Div. 127, 128, 41 N. Y. Supp. 51, plaintiff, after he had been in defendant's employ a day and a half, was called to assist about the raising of a heavy box, containing material manufactured by defendant, from the basement of the building to the sidewalk above. The elevator by which this material was usually hoisted was out of repair, and the shipping clerk, having the matter in charge, directed and assisted about providing a temporary hoisting apparatus for raising the box in the elevator shaft. This, when complete, consisted of a piece of iron laid across the space and resting upon the

combing of the elevator shaft on either side. The tackle to hoist was a block pulley, which was attached to the iron, and a chain run through the pulleys, which the men pulled upon in hoisting the box. Plaintiff had nothing to do with fixing this apparatus, although he saw the iron and knew generally what it was. While the box was being hoisted, the iron broke and plaintiff was precipitated into the cellar. The court said: "It is quite evident from this testimony that the construction of the tackle, by means of which the box was to be raised, was not a detail of the work which plaintiff was required or expected to perform, but was an appliance by means of which he performed the labor required of him. The obligation was, therefore, imposed upon the defendant to exercise reasonable care and prudence in the selection of this appliance, and to see that it was reasonably suitable and safe for the purpose to which it was applied. This duty was primary and could not be delegated to a servant, so as to shield the master from liability for damage occasioned through an omission of the servant to properly discharge it."

A servant ordered by the master to perform work as a machinist in underground trenches opened and prepared for him has a right to assume that the place has been made reasonably safe by the master, through other and competent servants employed by him, and does not assume the risk of neglect of the latter to brace or protect the sides of the trenches. *Kranz* v. *Long Island R. Co.* (1890) 123 N. Y. 1, 25 N. E. 206. Contrast cases cited in § 612a, note 1, subd. (c), *supra*.

Men comprising a crew of workmen exclusively engaged in putting up such staging and scaffolding as is needed for the use of workmen engaged in the general business of a shipbuilding company are not fellow servants with men engaged in the general work of the company. *Sims* v. *American Steel-Barge Co.* (1894) 56 Minn. 68, 57 N. W. 322 (distinguishing the cases in which the furnishing and preparation of a structure is part of the work which the employees are hired to perform).

A master is liable for defects in a ladder made at his carpenter's shop and issued for the use of the masons in his employ. *Flanigan* v. *Guggenheim Smelting Co.* (1899) 63 N. J. L. 647, 44 Atl. 762 (same distinction relied on).

In *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697, the court instanced the case of painters employed to paint the outside of a building, who are required to work upon a completed scaffold built for that purpose, which is lowered or raised as the work progresses, and said: "It is quite obvious that it is the duty of the master to furnish such an appliance; and where the men must rely upon the care of the master or those employed by him in putting together a proper structure necessary for the men to use in the performance of the work upon which they are employed, and where any negligence in the selection of the materials or the proper use of those materials, in constructing the completed scaffold, would expose the men to serious danger, neglect in the performance of that duty will render the master liable."

In *Corson* v. *Coal Hill Coal Co.* (1897) 101 Iowa, 224, 70 N. W. 185, in sustaining an instruction to the effect that the owner of a coal mine having a sloping entry, through which the coal is brought to the surface, owes to an employee riding in the cars through such entry the duty of exercising reasonable care to have the roof of the entry sufficiently propped so that rock will not fall on the track, the court said: "The rule of the instruction applies to a case where a place is furnished for the servant to do his work, and the keeping of the place in repair is not incidental to the work to be performed. . . . The undisputed facts of this case bring it within the latter rule, so far as concerns the duties of the parties. The duties of the plaintiff had no concern with the preparation or looking after the entry. It was the general passageway to and from the mine,—a completed work; a place in which work was to be done, in no way connected with its construction or preservation. It was a place for such work as the plaintiff was doing, and furnished by the employer. This holding is not against that in *Fosbury* v. *Phillips Fuel Co.* (1894) 93 Iowa, 54, 61 N. W. 400. That case was expressly determined on the rule as to the negligence of a fellow servant. As the work of riding the trip was disconnected from duties as to the roof of the entry in which plaintiff was riding, it was defendant's duty, through a competent person, to look after its safety. The case, as now presented, does not involve a question as to the negligence of a fellow servant."

Where a fireman, while working in

the boiler room of the defendant, fell into a hole that had been dug and left open in front of the boiler by the defendant's employees, who were making a foundation there for an "economizer," leaving the hole uncovered or the excavation in an unsafe condition, it was held to be the negligence of the master. *Frye* v. *Bath Gas & Electric Co.* (1900) 94 Me. 17, 46 Atl. 801 (operation of digging the holes said to be connected with and a part of the plant itself).

Where a permanent tunnel is under construction, as fast as completed the finished part becomes an "appliance or means furnished by the master by which the remaining work is to be prosecuted." *Hanley* v. *California Bridge & Constr. Co.* (1899) 127 Cal. 232, 47 L. R. A. 597, 59 Pac. 577, holding that, as there was evidence that a tunnel had been driven in about 18 feet, and that it was about 8 feet wide and from 9 to 10 feet high; that a rock which fell and injured a workman was about 10 feet from the mouth; that the tunnel had passed the place where the rock was three or four days, it would be assumed, on a motion for nonsuit, that the tunnel was shown to have been completed at the point in question, so that it was his employer's duty to see that it was reasonably safe, though there was some unexplained evidence that the side of the tunnel opposite this point had been blasted, which might possibly imply that it was not entirely completed there.

A finding by the jury that it was a part of the employer's duty to put up a timber to which was fastened a coal bucket used for conveying coal from a bin into a loading chute is sustained by evidence that in all other chutes belonging to the employer a permanent boom was used instead of such timber, that a person specially employed to do mechanical work was directed to put up the timber, and that such timber was not included in the appliances usually put up by the employees. *Jaruck* v. *Manitowoc Coal & Dock Co.* (1897) 97 Wis. 537, 73 N. W. 62.

In *Manning* v. *Hogan* (1879) 78 N. Y. 615, the evidence was that it was a particular branch of mechanical occupation to put up a scaffold like the one in question (*i. e.*, for doing the plaster work in a building): that the persons employed were not of that occupation; and that it was built of insufficient material, both in quality and quantity. It was held "that the question of negligence in building the scaffold was for the jury; that it was not sufficient that there was enough of suitable material provided to build the scaffold. It needed that there should be skill and judgment in the use thereof." But the case is not fully reported, and it may also be regarded as having turned upon the failure of the master to employ competent servants—the construction placed upon it in *Beesley* v. *P. W. Hoeber & Co.* (1894) 103 Mich. 196, 27 L. R. A. 266, 61 N. W. 658.

Another doubtful case is *Green* v. *Banta* (1882) 16 Jones & S. 156, which, while it asserted the existence of a duty of furnishing a safe scaffold, does not state whether such duty arose by express contract, by necessary implication from the peculiar facts, or upon the broad ground that a scaffold builder and a plasterer are, under no circumstances, fellow servants. But probably this decision is to be explained in the same way as the one last cited.

In *McMahon* v. *McHale* (1899) 174 Mass. 320, 54 N. E. 854, the master was held liable for defects in a derrick on the ground that it "was a piece of machinery, part of the fitting up of a stoneyard, . . . rather than an appliance to be put together and set up and moved from place to place by workmen who were using it."

"Where, however, there were furnished to the plaintiff and his coemployees materials with which to construct this scaffold, which were not proper for the purpose, and which made the scaffold, when constructed, an unsafe and improper appliance for the doing of the work, . . . if the master employed a person to act in his place to furnish such material, the negligence of such person so appointed to act for the master in the discharge of the duty which he owed to his employees was the negligence of the master, for which the master was responsible." *Richard* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 324.

Compare also the rule that the furnishing of side stakes for retaining the load of a railway car is not a part of the operation of loading, such stakes being a part of the equipment of the car. See § 567, note 7, *ante*.

Whether or not it is the duty of the master to construct an appliance to be used by the servant is in each particular case a mixed question of law and fact for the jury. *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

3. Where suitable material was not furnished for the preparation of that instrumentality.[3]

4. Where the servants were not left free as to the selection of the materials from which that instrumentality was prepared.

Some cases embodying the doctrine that the fact of an injury having been caused by negligence in respect to a detail of the work will not preclude recovery, if the master or his representative prescribed the manner in which the operation in question was to be performed, are collected in chapter XLII., subtitle C, *post*.

5. Where liability is imposed because of the permanent character of that instrumentality.[5]

Instructions assuming that the duty of furnishing suitable agencies for the performance of the work rests, as a matter of course, on the employer, are erroneous, where the facts are consistent with the hypothesis that the furnishing of such agencies was a matter left to be done in the execution of the work, and as a part of it. *Robinson* v. *Blake Mfg. Co.* (1887) 143 Mass. 529, 10 N. E. 314. The court said: "A person is employed to do a piece of work himself, with the understanding that he shall procure such means, materials, or implements as he finds to be needed, and if he enters upon the execution of the work and procures insufficient or defective means, materials, or implements, it might be found that the master did not assume any responsibility to such servant for their sufficiency or quality, even though he was to pay for them. Nor is the case necessarily different if the person so employed is authorized to engage others to help him do the work, as well as to procure means and appliances. If, for example, the work to be done should include the moving or raising of a heavy article, which could be done with the use of a simple fulcrum and lever, and the employer's foreman, in charge of the work, should be left to provide them at the place where the work was to be done, and he should take a common stone for the fulcrum and a piece of scantling or a rail from a neighboring fence for the lever, and the stone should roll, or the lever break, and one of the men engaged in the work should be hurt thereby, a jury would naturally find that such selection of materials and appliances was a part of the work to be done, and not within the implied duty and undertaking of the employer."

[3] A city is not, as matter of law, free from liability for personal injuries to a workman, caused by the caving in of a trench in which he was digging, although there were materials 2 miles away which the foreman had authority to use to shore up the sides and make the trench safe, since the jury might properly find that they were practically inaccessible on account of the distance, as in such case the negligence is that of the city, and not merely of a fellow servant in failing to use the materials at his command. *Fitzsimmons* v. *Taunton* (1893) 160 Mass. 223, 35 N. E. 549. "On this view of the facts," said the court, "the plaintiff's intestate [workman] was set to work in a place of danger without the precautions being taken for his safety which his employer was bound to see taken."

An employer who erects a wooden falsework for the purpose of supporting the materials and parts of a bridge during the process of its erection is bound to furnish timber of sufficient strength to bear the weight to which the falsework will be subjected. *Lafayette Bridge Co.* v. *Olsen* (1901) 54 L. R. A. 33, 47 C. C. A. 367, 108 Fed. 335.

[5] "If the implement, appliance, or structure is permanent in its character, the duty of exercising a reasonable degree of care in its selection and maintenance is one from which the master can not escape. Whereas, if it be portable, its erection, location, and operation may be, and generally are, regarded as mere details of the work, which pertain to the employee." *Yaw* v. *Whitmore* (1899) 16 App. Div. 422, 61 N. Y. Supp. 73. Affirmed in (1901) 60 N. E. 1123. There a derrick, consisting of a mast 10 inches square and 40 feet long, with a boom of same dimensions, was firmly attached to the ground by planks, in which a metal plate had been imbedded, and which were weighted down with heavy stones

6. Where liability was imposed on the ground that the operation was not one of the transitory class.[6]

D. Negligence of coservants whose duty it is to keep the instrumentalities in proper condition, when not imputed to the master.

618. Theory that a master is never liable for negligence in regard to inspection and repairs.— One view for which there is a considerable body of judicial authority is simply that a master is liable for the negligence of the agents by whom the instrumentalities were originally supplied, but not for the negligence of the agents to whom he has deputed the function of seeing that they continue to satisfy the legal standard of safety. Such a conception has the merit of simplicity,

The derrick remained in this place nearly five months, and until the completion of the work for which it was used. Held, that it was a permanent structure, within the rule that a master must use reasonable care in providing his servant with suitable appliances and in keeping them in repair.

In *Cunningham* v. *Sicilian Asphalt Paving Co.* (1900) 49 App. Div. 380, 63 N. Y. Supp. 357, the defendant was held liable for defects in a platform regularly used by laborers for standing on while they were unloading cars. The fact that the planks were loose and movable was denied to be material. The structure was said to be "permanent in its nature," and distinguished from an "ordinary 'appliance' relating to an isolated job or a transient undertaking."

Plaintiff was taken by defendant's foreman from outside the grain elevator, where he was accustomed to work, to a place within, comparatively dark, and, being instructed to step on a raised platform, walk to a bin, and ascertain if it was open, started to do so, when the platform collapsed, and one of his legs was crushed in a hopper beneath. The platform was constructed nearly nine years previously, and until a few weeks before, its sole use was to enable workmen, on removing the cover, to watch the movement of grain through the conductor. Since then, temporary bins were constructed on that floor, and, to open them, it was necessary to step on the hopper boxes. No inspection was ever made of the condition of the box, and the only evidence in that regard was that the foreman had stood thereon two minutes before the accident. Held, that defendant was guilty of negligence. *Berry* v. *Ithaca Storage Co.* (1900) 50 App. Div. 590, 64 N. Y. Supp. 292.

One of a number of chains furnished for use as required is regarded, when it is applied to the purpose for which it was designed, as a permanent instrumentality, and not one of those small things which go through a rapid course of wearing out and replacement, as to which the rule is that it may be left to the judgment of the workmen when one of them is to be discarded. The making of a link for such a chain, therefore, is not one of those merely transitory adjustments which the master is under no personal obligation to see carefully performed. *Haskell* v. *Cape Ann Anchor Works* (1901) 178 Mass. 485, 59 N. E. 1113.

"An employer is not, as matter of law, free from liability caused by the fall of shafting which had been attached to the ceiling by the carpenter the day before, on the theory that the putting up of such shafting belongs to the 'transitory class,' for which the employer is not responsible beyond furnishing a choice of proper materials or instrumentalities." *Copithorne* v. *Hardy* (1899) 173 Mass. 400, 53 N. E. 915.

The insertion of a new link in a chain is not a mere transitory adjustment of the instrumentality, and the master is answerable for the negligence of a servant in using old, instead of new, iron for the operation. *Haskell* v. *Cape Ann Anchor Works* (1901) 178 Mass. 485, 59 N. E. 1113.

but is regarded by the writer, for reasons already explained, to be wholly illogical. See § 531, *ante*.

The decisions which are either avowedly based on the distinction thus taken, or which can only be supported by assuming it to be impliedly adopted, are collected in the note below. It should be observed, however, that some of the American cases have been expressly overruled, while others have been greatly qualified by later rulings in the same jurisdiction, which reflect more or less strongly the influence of the theory that the duty of maintenance, no less than the duty of supply, is absolute. Whenever there has been a merely partial recognition of this theory, the situation is probably due to the fact that the courts have been unable to break away altogether from existing precedents, which date from a period at which the character of the negligent act had not yet assumed its present importance as a differentiating element.[1]

[1] *United Kingdom.* — A master has been held not liable for the negligence of an employee appointed to examine materials (*Ormond* v. *Holland* [1858] El. Bl. & El. 102); nor of a chief engineer who allowed defective tackle to be used (*Searle* v. *Lindsay* [1861] 11 C. B. N. S. 429, 8 Jur. N. S. 746, 31 L. J. C. P. N. S. 106, 10 Week. Rep. 89, 5 L. T. N. S. 427); nor of an "underlooker" in a mine, whose duty it was to keep the workings in safe condition (*Hall* v. *Johnson* [1865] 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 13 Week. Rep. 411).

In *Webb* v. *Rennie* (1865) 4 Fost. & F. 608, Cockburn, Ch. J., charged the jury as follows: "In the case of a manufacturer employing machinery which might be attended with danger to the persons employed about it, a danger which might be greatly aggravated by the machinery not being in proper condition,—as, for instance, in the case of the boiler of a steam engine bursting, as it would be more likely to do if in an improper condition,—the master manufacturer might have no means of personally knowing its condition himself, and, the question being whether he had used reasonable care and diligence to ascertain it, all that could be reasonably expected of him would be that he should employ some competent person from time to time to examine it. The master must either ascertain the state of the machinery or apparatus himself, or employ some competent person to do so; and if he did employ such a person, and a workman was injured in consequence of that person's neglect of his duty in that respect, the master would not be liable to one of his servants for such negligence of a fellow servant in the particular matter."

In *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 39, it was held that a mine owner was not liable for injuries, due to an explosion of fire damp, which resulted from the faulty construction of a temporary scaffold by the manager of the pit. For a full review of this case see §§ 529, 531, *ante*. A similar ruling had previously been made in *Wright* v. *Roxburgh* (1864) 2 Sc. Sess. Cas. 3d series, 748.

Negligence in allowing structures to fall into a state of decay and to remain in that state was regarded as the act of mere employees, in *Ulen* v. *New Gas Co.* (1876) L. R. 1 Exch. Div. 251, 45 L. J. Exch. N. S. 668, 34 L. T. N. S. 541.

British colonies. — An injury caused by the failure of brakes to work properly, so that a train runs down two trackmen, is conclusively presumed to have been due to the negligence of one of the trainmen, where the evidence is that an examination at the last inspecting station had not disclosed any defects, that the defects which prevented the brakes from working were of the most obvious character, capable of being remedied merely by tightening a bolt and taking up a rod, and that shortly before the accident the train had been easily kept under control upon a gradi-

619. Theory that the liability of the master extends on the subject-matter of the inspection or repairs neglected.—(See also § 583, note 5,

ent as steep as the one where the injury was received. *Plant* v. *Grand Trunk R. Co.* (1867) 27 U. C. Q. B. 78.

A "running" foreman whose duty it is to look after the condition of locomotives is not a vice principal. *Brown* v. *Board of Works* (1882) 2 Vict. L. Rep. 414 (dissenting, Higginbotham, J.).

In the event of a master's not personally superintending the repairs of his machinery, the limit of his duty is to select competent persons for this purpose, and to furnish them with all adequate materials required for the work. *Baird* v. *Dunn* (1895) 33 N. B. 156.

Alabama.—In a very recent Alabama case it was laid down that the common-law duty resting upon an employer of maintaining ways and appliances reasonably safe for the employees' use may be delegated to competent agents; and that a complaint which avers negligence in respect of such maintenance to have been that of a person in the same common service, who is intrusted by the employer with the duty of maintenance, does not show a breach of such common-law duty, when there is no averment of negligence in the selection of such person. *Woodward Iron Co.* v. *Cook* (1899) 124 Ala. 349, 27 So. 455 (employee intrusted with the duty of seeing that a tram track in a mine is in proper condition held to be a fellow servant with an employee engaged in spragging the wheels of the tram cars, for the purpose of checking their speed on the track).

This rule said to have been established by *Mobile & O. R. Co.* v. *Thomas* (1868) 42 Ala. 672; *Mobile & M. R. Co.* v. *Smith* (1877) 59 Ala. 245; *Alabama G. S. R. Co.* v. *Carroll* (1893) 97 Ala. 126, 18 L. R. A. 433, 11 So. 803.

In *Smoot* v. *Mobile & M. R. Co.* (1880) 67 Ala. 13 (negligence in inspecting loading of cars) the court said: "When such appliances have been furnished,—when diligence has been observed in procuring them,—the use of them is necessarily intrusted to the servants of a railroad company, as is their care and inspection, and the repair of them, and determining when the use must be abandoned, until repairs are made. This duty may be intrusted to those operating the appliances, or confided to other servants having no other duty than that of inspection or of repair. However this may be, the several servants are in the same circle of employment—derive duty and compensation from the same source, and are laboring for a common purpose. They are fellow servants, and the master cannot be made answerable to the one, for the negligence of the other. . . . Knowledge of the defective condition of the car, a want of prudence in its use, is traceable only to fellow servants of the appellee, whose care and diligence he is presumed to have consented to risk; whatever of guards against the use of defective cars were reasonable, so far as the evidence shows, and to which it could justly be expected the appellant would resort, were adopted."

Indiana.—A master mechanic was denied to be a vice principal in *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615, but this decision is no longer good law in Indiana. See later cases cited in § 568, *ante*, especially *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

Louisiana.—An engine-driver and an employee whose duty it was to keep locomotives in repair were held to be fellow servants in *Hubgh* v. *New Orleans & C. R. Co.* (1851) 6 La. Ann. 496, 54 Am. Dec. 565. This is one of the cases which antedate the formulation of the rule as to a general class of non-delegable duties, and which do not advert to it. The decision was a simple application of the doctrine of common employment.

Maine.—In *Beaulieu* v. *Portland Co.* (1860) 48 Me. 291, it was regarded as well settled that the responsibility of a master is restricted to the employment of competent servants and the provision of adequate appliances. But the doctrine of non-delegable duties has since been adopted. *Shanny* v. *Androscoggin Mills* (1876) 66 Me. 420.

Maryland.—A master mechanic of a railway was denied to be a vice principal in *Shauck* v. *Northern C. R. Co.* (1866) 25 Md. 462; *Cumberland & P. R. Co.* v. *State use of Moran* (1875) 44 Md. 283. The distinction between absolute and delegable duties was not discussed by the court, the nonliability being referred to the conception that the plaintiff, a train hand, and the delinquent, were in the same general service.

In *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143, a railway company was held not to be lia-

ante.)—According to another theory, which is a compromise between the doctrine applied in the cases just cited and that which declares the duty of maintenance to be non-delegable (see § 568, *ante*), the question is whether the omission was the efficient cause of the accident and of the injury to the plaintiff. If it was, he might maintain this action."

In *Cooper* v. *Hamilton Mfg. Co.* (1867) 14 Allen, 193, it was laid down that, although a master was required to use proper care in order to see that his floors were of sufficient strength to support any machine which it was necessary to move over or upon them, "the nature of this care which they are bound to use was such that the defendants [they] might have performed their legal duty by employing suitable persons of competent skill and experience, whose business it was to keep the floors in such condition as to repairs that they were fit and safe for use for any of the purposes for which it might become necessary to appropriate them," and that "if they were diligent and careful to this extent, and any want of repair had not existed for so long a time as to show absolute negligence on the part of the defendants [master], then the accident would have been attributable to the negligence of an agent or servant in the service of a common employer with the plaintiff."

The fact that water failed to run from a hose during a fire is prima facie attributable to the negligence of the servants in not keeping it in proper order or in putting it in operation, and does not constitute evidence sufficient to justify holding defendant responsible for injuries caused by a fire. *Jones* v. *Granite Mills* (1878) 126 Mass. 84, 30 Am. Rep. 661.

In the next section we shall see how far these decisions have been qualified by the more recent ones. See also § 560, *ante*.

Mississippi.—In *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258, and *Hoard* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178, it was held that servants engaged in repairing a railroad or its appurtenances are not, in order to hold the company responsible to an employee, representative of the company. In the latter case the reasoning of the court was as follows: "A railroad company is bound, in the original construction of its road and appurtenances, to make it reasonably secure for the safe transportation of trains upon it, and also to keep the track in repair. In

ble for injuries to a brakeman resulting from a defective brake, which it was the duty of fellow servants to keep in repair. The theory that the character of the act determines whether the negligence is that of a vice principal was not noticed. The case followed was *Searle* v. *Lindsay* (1861) 11 C. B. N. S. 429, 8 Jur. N. S. 746, 31 L. J. C. P. N. S. 106, 10 Week. Rep. 89, 5 L. T. N. S. 427 (see *supra*).

In *State use of Hamelin* v. *Malster* (1881) 57 Md. 287, the master was held to be liable only for the negligence of an employee to whom is intrusted the selection of subordinates and the procuring of instrumentalities.

That the duty of repair is delegable is also, in part at least, the foundation of the decision in *Yates* v. *McCullough Iron Co.* (1888) 69 Md. 370, 16 Atl. 280. See *note* to *O'Neil* v. *Great Northern R. Co.* (1900; Minn.) 51 L. R. A. 567.

Massachusetts.—In *King* v. *Boston & W. R. Corp.* (1851) 9 Cush. 112, it was held that keeping a railway in proper repair is "the work of servants or laborers, as much as any other part of the business of the corporation," and that the company was not liable for the negligence of the repairers.

In *Seaver* v. *Boston & M. R. Co.* (1860) 14 Gray, 466, a servant of a railroad company was held unable to recover for an injury caused solely by the breaking of an axle, where the failure to discover the flaw resulted from the negligence of the employee, whose duty it was to examine the cars and other running apparatus of the road and to keep them in proper repair. In this case the distinction between furnishing and maintenance is distinctly drawn, the instruction approved being that "the corporation, in conveying the plaintiff in their cars, acting through their agent, whose duty it was to provide and keep in use safe and suitable engines and tenders on the road, were bound to use due and reasonable care in providing and using on the road engines and tenders suitably constructed with all the appliances and safeguards necessary to render them safe; and if the omission to provide a safety beam to the tender at the time of the accident constituted a want of due and reasonable care, which rendered the tender unsafe, and such

lion whether an employee engaged in inspecting or repairing instrumentalities is a vice principal or a mere servant depends upon the na-

order to discharge the latter duty the corporation must employ suitable persons and supply them with needful material to make repairs; and should also, through its agent or agents, have a supervision over the road. In order to hold the company responsible to an employee (as, a conductor on its train) for injuries sustained because of the road or its appurtenances being out of repair, it must be shown that the company is in default in its duty, either by the selection of incompetent servants or an insufficient number to do the work, or failure to furnish proper material, or that the company had notice of the bad condition of the road, or is chargeable with negligence for not knowing." The corporation will have done all that could be reasonably required of it, when it has exercised circumspection and prudence in appointing employees, to observe the road and make the repairs, and when it has put at their disposal suitable material for the work, and caused suitable supervision to be had over these.

Missouri.—The ruling in *McDermott* v. *Pacific R. Co.* (1860) 30 Mo. 115, that the negligence of a superintendent in allowing a bridge to get into bad repair was not imputable to the employer, is no longer law in this state. See cases cited in § 568, *ante*.

New Jersey.—In *Essex County Electric Co.* v. *Kelly* (1894) 57 N. J. L. 100, 29 Atl. 427, it was said: "It is a matter of judicial disagreement whether a master can discharge the duty . . . [of examining and ascertaining whether appliances have become unfit or unsafe from wear and tear or otherwise], and the similar duty of keeping tools and appliances in repair, by selecting and employing competent persons to make inspections and repairs. In our courts it is held that the master's duty may be thus discharged." The court cited *Rogers Locomotive & Mach. Works* v. *Hand* (1888) 50 N. J. L. 464, 14 Atl. 766, and *Harrison* v. *Central R. Co.* (1865) 31 N. J. L. 293. In the latter of these cases, where the plaintiff was injured by the fall of a bridge, the court remarked: "From the relation between the company and their brakeman, the legal consequence seems to have been deduced by the pleader that the former, with regard to the latter, was bound to keep the bridge in a safe condition. This is not a true statement of the obligation of the company. It was not near so absolute; for if the bridge was insecure from a secret defect which the company was not able to discern by the exercise of reasonable diligence and skill, no responsibility would have fallen on the defendant on account of its defective state. If, as was stated on the argument, the company, in point of fact, directed its agents, who were possessed of competent skill, to examine at stated periods the bridge in question, and such agents reported to the company that the structure was in a secure condition, and no circumstances existed which were calculated to impair a reasonable confidence in such report, I think it is plain, upon the principles of law above propounded, that even if the agents making such report acted carelessly in the discharge of their duties, or even falsely reported their conclusions to the company, that under such a state of facts the plaintiff could not sustain this suit. To warrant a recovery in this case in favor of the employee who is here represented by the plaintiff, the fault which forms the basis of the action must be that of the company, and not simply the negligence of a fellow servant."

A master is not liable for injuries to a workman in a tunnel, caused by the negligence of a laborer whose duty it is to deliver on the surface at the shaft, or there use or keep in repair, the instrumentalities provided for the safe transportation of the workmen. *McAndrews* v. *Burns* (1876) 39 N. J. L. 117.

But see the later New Jersey cases cited in this note, *infra*.

New York.—In *Chapman* v. *Erie R. Co.* (1873) 1 Thomp. & C. 526, the opinion, after quoting the headnote in *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468, to the effect that the only ground of liability which the law recognizes is that which arises from the personal negligence of the master, proceeded to criticize the case as follows: "The rule as thus stated is obviously of small consequence as a protection to the servants or employees of a corporation, when it is considered that a corporation acts entirely through officers and agents, and there can be no other personal negli-

ture of the defects which were left undiscovered or unremedied owing to his remissness. It is admitted that the decisions in which it has

gence committed by or imputed to it, except the negligence of such officer or agent; and when it is held also that all the agents and employees of a corporation are fellow servants of a common master, it is difficult to see why, under such rules, corporations are not virtually absolved from all the common law liability of a master to take care of his servants, and protect them from unjust and unreasonable danger and injuries resulting from the negligence of others. But the recent case of *Laning* v. *New York C. R. Co.* (1872) 49 N. Y. 531, 10 Am. Rep. 417, shows that the present court of appeals is receding from this extreme ground. This case asserts a sounder and more reasonable rule. Judge Folger, who gives the opinion of the court, says: 'The duty of the master to his servants is to use reasonable care to provide and employ none but competent and skilful servants, and to discharge from his service, on notice thereof, any who fail to continue such.'" This criticism, however, appears to be based on a misapprehension of the true purport of the earlier case, which merely decides that, in the absence of testimony going to prove negligence in the construction of a bridge, or in the selection of the servants employed to supervise and test it, or in the performance of their duties by these servants, the injured servant must fail in his action unless he shows that the managing officers of the corporation had notice, actual or constructive, of the defective condition of the bridge. In other words, there are several states of facts upon which an employer may be charged with personal negligence, and if the evidence is inconsistent with the theory that he was negligent in certain specified ways, the servant must fall back upon some other theory. Under the circumstances in *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468, where the testimony showed that due care had been exercised by the directors themselves in seeing that sound structures and competent supervising agents had been provided, and that these agents themselves had not been guilty of negligence in the premises, there was no theory to fall back upon, except one based upon the hypothesis that the directors had knowledge of the decayed condition of the bridge through some other avenue of information than the supervising agents appointed by them; and with any such hypothesis the evidence was quite inconsistent. That the case really goes no further than this, so far as the actual decision is concerned, is quite apparent from the opinion. But it must be admitted that, by citing with approval the ruling in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30, the court showed a disposition to countenance that much more sweeping doctrine under which a master is not liable, even for the negligence of a servant to whom he deputes one or more of the duties which the law imposes on him for the benefit of all persons in his employment. The extent of the liability of a master for the negligent act of a competent servant is, however, a very different question from that raised in *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468, and the approval of the English case may, for this reason, be regarded as quite supererogatory. Except in so far as the broad principle of *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30, may be supposed to have been adopted by the court in *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468, it cannot be said that, as was suggested in *Chapman* v. *Erie R. Co.* (1873) 1 Thomp. & C. 526, the court of appeals has changed its ground in *Laning* v. *New York C. R. Co.* (1872) 49 N. Y. 531, 10 Am. Rep. 417, for there the master was held liable for the reason that personal negligence was shown by the retention of an incompetent servant —a species of negligence which was negatived by the testimony in *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468.

In *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573 (Church, Ch. J., and Rapallo, J., dissenting), it was held that an employer is not liable for the negligence of a carpenter employed to examine and make repairs in the building in which his business is carried on. The majority of the court cited with approval *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. It seems to be impossible to reconcile the ruling with the other decisions of the same court, referred to in § 568, *ante*.

Ohio.—In this state a car inspector is held to be a fellow servant of the trainmen. *Little Miami R. Co.* v. *Fitz*

patrick (1884) 42 Ohio St. 318; *Lake Shore & M. S. R. Co.* v. *Lamphere* (1894) 9 Ohio C. C. 263, both following *Columbus & X. R. Co.* v. *Webb* (1861) 12 Ohio St. 475, which was itself based upon *Ormond* v. *Holland* (1858) El. Bl. & El. 102, one of the rulings in which the decision of the House of Lords in *Wilson* v. *Merry* was anticipated. See *supra*.

Pennsylvania.—In *Remisch* v. *Roberts* (1891) 143 Pa. 1, 21 Atl. 998, the court approved of an instruction in which the jury were told, among other things, that the defendant was not liable for an accident caused by a defect of which he knew, or ought to have known, provided he had a person in his employ whose duty it was to keep the appliances in good condition. But there was no testimony showing that the employer, or any agent of his having control, had any knowledge of the defect, and the case was ultimately made to turn on the facts that the state of the appliance was as open to the observation of the plaintiff as of the defendant, and that the proximate cause of the accident was the negligence of the plaintiff's fellow servants in selecting an unsound appliance, when they had the opportunity of selecting one that was in good condition.

A car inspector was held to be a fellow servant of a brakeman in *Philadelphia & R. R. Co.* v. *Hughes* (1888) 119 Pa. 301, 13 Atl. 286, the court said: "If, however, the company employ competent and skilful persons for the purpose of inspection, and afford them reasonable opportunities and facilities for the work, under proper instructions, the company will not ordinarily be liable for the negligent performance of the work by their employees, to a fellow employee, unless the company knew, or by ordinary diligence ought to have known, of the defective manner in which the inspection was conducted. We are clearly of opinion, too, that a brakeman and a car inspector are in the same circle of appointment: they co-operate in the same business, and the former knows that the employment of the latter is one of the incidents of their common service. But while the performance of the duty of inspection must necessarily be committed in detail to the employees, the general regulation is in the hands of the company, and it is the duty of the company to provide suitable persons, in sufficient numbers at proper places, with reasonable opportunities to accomplish the work."

But see the decisions of this court cited in the next section.

Tennessee.—In *Nashville, C. & St. L. R. Co.* v. *Foster* (1882) 10 Lea, 351, the court followed *Mobile & O. R. Co.* v. *Thomas* (1868) 42 Ala. 672, to the point that a car inspector and brakeman were fellow servants. See *supra*.

A master has also been held not liable for a failure to retemper knives of nail machines after being heated for the purpose of sharpening them, if the omission was that of a fellow servant. *Knoxville Iron Co.* v. *Dobson* (1881) 7 Lea, 367 (discussing charge: no opinion expressed as to whether the act was that of a fellow servant. Turney, J., dissented, holding that a servant having such a duty to perform was not a fellow servant of a feeder of the machine).

Vermont.—In *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473, a decision which, as may be surmised from the citations of counsel, was based upon the English decisions which preceded and anticipated the ruling in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30, it was held that an engineer injured through the negligence of a master mechanic, whose duty it is to see that the engines are kept in repair, could not recover damages from the common employer. The court argued thus: "It is insisted that there is 'an implied warranty on the part of the principal of the soundness of the machinery which he puts into the hands of his servants, so far as any unsoundness therein may be discovered by the exercise of proper care and diligence.' This rule is undoubtedly correct, as we have already seen, and as is shown by the authorities cited in support of it. But this is true only of the state and condition of the machinery at the time it is put into the hands of the servant. The principal does not warrant that the servants shall faithfully discharge their duty in keeping the machinery in its original safe condition. To establish this principle would be to abrogate the rule and make the principal the warrantor of the faithfulness of all the servants." But this decision is practically overruled by *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590, holding that a railroad company is liable for injuries caused by a defective condition of its track, which would have been known to the company's bridge builder and road master if proper inspection had been exercised. In the latter case the court remarked that,

been attempted to give effect to this theory are incongruous and inconsistent.[1]

The fundamental principle upon which the courts rely is indicated by the statement that "one line of distinction between vice principals and employees is in the duty in one instance to supply or maintain instrumentalities of the service, and in the other of using the instrumentalities supplied."[2] This distinction is predicated to some ex-

when the previous decision was rendered, "the liability of the master was held to be dependent upon whether the servant whose negligence caused the injury and the servant injured were fellow servants in a common employment or work," and proceeded thus: "Making this the test for determining the master's liability, and the reasoning and conclusions of the late Chief Justice Pierpoint are unanswerable. But this test, while determinative in a great number of cases, as we have seen, has been abandoned both in England and in this country, and in lieu thereof the master's liability has been made to rest upon whether the negligence arose in the performance of a duty, for the careful discharge of which he became responsible when he assumed the relation of master to the injured servant. On the principles which we think furnish the true ground upon which the master's liability rests, and on the American application of them, the charge of the county court in the particulars to which exceptions were taken contains no error. The American doctrine holding the master liable for the negligence of his servant while discharging a duty which the master owes to a general workman is more consonant with reason and the general safety of the traveling public than the English doctrine announced in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30."

[1] See the remarks of the court in *Nord Deutscher Lloyd S. S. Co.* v. *Ingebregsten* (1894) 57 N. J. L. 402, 31 Atl. 619.

Contrast the cases tabulated in note 4, subds. (a)–(f), *infra*, with those reviewed in §§ 568, 570, 581–584, *ante*.

[2] *Neutz* v. *Jackson Hill Coal & Coke Co.* (1894) 139 Ind. 411, 38 N. E. 324, 39 N. E. 147.

"On this topic a rational distinction would seem to be that when the employee's duty to inspect or repair the apparatus is incidental to his duty to use the apparatus in the common employment, then he is not intrusted with the master's duty to his fellow servant, and the master is not responsible to his fellow servant for his fault; but that, if the master has cast a duty of inspection or repair upon an employee who is not engaged in using the apparatus in a common employment with his fellow servant, then that employee in that duty represents the master, and the master is chargeable with his default." *Nord Deutscher Lloyd S. S. Co.* v. *Ingebregsten* (1894) 57 N. J. L. 402, 31 Atl. 619. It was considered that the distinction was noticeable in *McCulloch* v. *Ross* (1876) 39 N. J. L. 117; *Smith* v. *Oxford Iron Co.* (1880) 42 N. J. L. 467, 36 Am. Rep. 535; *Collyer* v. *Pennsylvania R. Co.* (1886) 49 N. J. L. 59, 6 Atl. 437; *Ross* v. *Walker* (1891) 139 Pa. 42, 21 Atl. 157, 159; *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574; *Daley* v. *Boston & A. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690, and many other cases.

In *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574, we find the following elaborate statement of the relations existing between servants repairing or inspecting, and servants using, instrumentalities. "It is obvious that difficult questions arise in cases of this kind in determining the implied obligations of the respective parties under peculiar circumstances. In many kinds of business the condition of a machine as to safety is constantly changing with the use of it, and it is safe or unsafe at a given moment according as it is properly or improperly used and managed by the servant who operates it. Moreover, certain kinds of repairs can be conveniently and properly made, under direction and supervision, by servants regularly employed in the business. In such cases both parties to the contract of service must be presumed to have contemplated that, to a certain extent, fellow servants would be employed by the master to do work in keeping the machinery safe. Work negligently done within that field, if an accident should happen from it, would seem at

teul upon the fact that a smaller amount of technical skill and knowledge is, in most cases, required for what are termed by the court or-

first to introduce a conflict between the obligation of the master to hold himself liable for want of due care in keeping his machinery safe, and the obligation of the servant not to claim damages resulting from negligence of a fellow servant. It becomes necessary, therefore, to consider the rights of the parties in such cases. The application in each particular case, of any general rules which may be laid down, will involve a consideration of two questions of fact: First, what is the nature and character of the business, and the usual and proper general method of conducting it? Secondly, in such a business, what is reasonably necessary to be done on the part of the master to secure for the use of the workmen machinery and appliances which will always be reasonably safe? First, there is that class of cases in which the condition of a machine as to safety is constantly changing with its use, so as to require from the persons tending it, as a part of the ordinary use of it, reconstruction or readjustment of parts, as they become worn out or displaced, from materials or new parts supplied by the master for that purpose. Such work is a part of the regular business of the servant in using the machine, and not of the master in maintaining it. Negligence in doing it is, as to all other employees, negligence of a fellow servant. So far as the condition of machinery depends upon this kind of attention, the master does his duty if he employs competent and suitable persons, and supplies them with everything needed for their work. A second class of cases includes those in which repair or reconstruction of a machine is necessary, of such a kind as is commonly done, or may properly be done, under the direction of the master, by servants engaged in the general business. Both parties to the contract must be presumed to have contemplated that such work would be done by fellow servants of the employee, and he must therefore be held to have assumed all risks from their negligence in doing it. But this, it must be remembered, is a part of that work, for the results of which, in the completed machine, the master agrees to hold himself responsible, so far as good results can be secured by his exercise of proper care. And so he is bound to bring to this department of the business, either in his own person or by an agent, such intelligence, skill, and experience as is reasonably to be required in one to whom, in an important particular, the safety of others is intrusted, and he is bound also to be reasonably diligent and careful in the use of his faculties. One who represents him in this field is not acting as a fellow servant with his other employees, within the meaning of the rule which we are considering, but is his agent or servant, for whose care and diligence he is accountable. There may be still a third class of cases, in which a machine is of such a kind, and the nature of the business in which it is used is such, that the parties could never reasonably have contemplated that any servants employed in the business would build or reconstruct it. A proprietor might buy such a machine, or send an agent or servant to buy it. In either case the purchase would be in the line of the master's duty, and he would be liable for the consequences of negligence in making it. He might hire privileges and men in a machine shop in a distant city and build it there. His servants in that work would not be fellow servants with an employee engaged in an entirely different business. And under the doctrine of *respondeat superior* he would be held liable for the consequences of their negligence. If he saw fit to construct or reconstruct it, in the same way, in or near the building in which it was to be used, the result would be the same. Upon our hypothesis it would be inconsistent with his implied contract to employ fellow servants of his employee in this work, and he therefore could not relieve himself from his general obligation as to the safety of his machinery by setting up that his servants in the construction or reconstruction were fellow servants with his employees in the business in which it was to be used."

Another passage relating to the first class of cases adverted to in the above extract occurs in the opinion in *Rice* v. *King Philip Mills* (1887) 144 Mass. 229, 59 Am. Rep. 80, 11 N. E. 101. "It is the duty of the master to exercise due care in employing competent servants, in providing suitable machines, and in keeping them in proper repair, and the master cannot wholly escape responsibility by delegating these duties to a

servant. If this could be done, a master might escape all responsibility by employing a competent superintendent to perform all these duties. But there are defects in machinery which are of such a character that the master has been held to perform his duty if he furnishes suitable materials, and employs competent servants, and instructs them to keep the machinery in repair, although the servants neglect to make the repairs, or make them in an improper manner. The master must exercise a reasonable supervision over the manner in which his business is done; but the repairs which machines properly constructed require to keep them in running order may be intrusted to competent servants. They are regarded as incidental to the use of the machines, because they are such as machines in substantially good repair must, from time to time, need."

In a somewhat earlier case it was laid down that servants intrusted with the making of such ordinary repairs as the use of a machine requires to keep it in order from day to day are not vice principals. *McGee* v. *Boston Cordage Co.* (1885) 139 Mass. 445, 1 N. E. 745.

In *Monmouth Min. & Mfg. Co.* v. *Erling* (1891) 148 Ill. 521, 36 N. E. 117, the rule laid in *Moynihan* v. *Hills Co. supra*, was approved.

The rule as formulated in a Pennsylvania case is that, where the conditions from which the servant's injury resulted were produced by the ordinary use of the appliance, and not by any defect in the substance, size, or adjustment of the part of the appliance which caused the injury, and the master maintains a thorough and adequate system of constant inspection, and the defect was not known to any of the persons engaged in that inspection, the master is not liable. *Wonsch* v. *Pennsylvania R. Co.* (1892) 150 Pa. 598, 17 L. R. A. 450, 25 Atl. 31.

In *Cregan* v. *Marston* (1891) 126 N. Y. 568, 27 N. E. 952, the court, in discussing the charge of the trial judge that it was the duty of the master to the servants to watch the use of the defective rope by them and its changes of condition, that the engineer was his agent and deputy for such purpose, and that the negligence of the engineer, if it existed, was that of the master, said: "The doctrine at once renders inexplainable all the line of cases in which some defect in a machine has occurred from its use, and the master has been held freed from responsibility if the machine furnished was originally safe, and he neither knew nor ought to have known of the existence of the defect, to it puts the duty of daily watch and discovery on him, and so requires no notice or complaint or lapse of time to put him in default. I think the doctrine asserted was an extension of the master's duty beyond its natural and proper limits. Probably the existing rule was founded upon the truth that certain things essential to the safety of the servants must necessarily, in the management of the business, emanate from the master and remain in his absolute control, and so the servants should not be responsible to one another for defects which they could not repair, for lack both of authority and means. The servants cannot furnish the machines. That is the master's right and duty. But the servant who uses them can and should keep them in order for their proper and safe daily use, when furnished with the necessary means of so doing and when perfectly capable of correcting the defect. It is undoubtedly true, as we have often said, that it is the duty of the master to keep a machine or appliance in order and that he cannot delegate the duty so as to escape responsibility. But that is a general rule and has its qualifications and limitations. One of those is that it is not the master's duty to repair defect arising in the daily use of the appliance, for which proper and suitable materials are supplied, and which may easily be remedied by the workmen, and are not of a permanent character, or requiring the help of skilled mechanics. . . . The cases cited and their doctrine appear to be founded upon what is determined to be the implied contract relation between the master and servant. Their mutual duties grow out of that relation, and change and vary as it is changed or varied by the facts which indicate and measure it. Where those facts show that in the understanding of both parties a class of ordinary repairs are to be made by the servants with materials furnished by the master for that express purpose; that they and he regard it as a detail of their own work; that it is something entirely within their capacity, and not dependent upon the skill of a special expert; and that the necessity springs from their daily use of the appliance, occurs at different and unknown periods in their service, and is open to their observation in the absence of the

dinary repairs that for those of a more permanent character.[3] This conception is possible the essential rationale of the doctrine laid down in Arkansas, that the boundary line between liability and nonliability is to be drawn with reference to the distinction between the higher officials exercising a general supervision over the instrumentalities, with a view to keeping them in proper condition, and the subordinate employees by whom incidental repairs are carried out. See note 1, subd. (b), *infra*. In the subjoined note are tabulated, under headings adapted to facilitate comparison and contrast with former sections of this chapter, a number of cases showing what repairs the courts regard as permanent or ordinary.[4]

master,—the inference is inevitable that the contract relation between the parties makes it a duty of the servants and a detail of their work to correct the defect, when it arises, with the materials furnished."

The master's duty is fully performed when he "supplies adequate machinery, with all the appliances necessary and desirable for adaptation to some particular purpose, even though the same becomes temporarily impaired by reason of constant use, when the impairment is of such a character as to be easily and readily remedied by the servant, a part of whose duty it is to attend to such matters." *Yore* v. *Whitmore* (1899) 40 App. Div. 422, 61 N. Y. Supp. 731.

The failure to make slight repairs in an instrumentality is the negligence of a mere servant, where proper materials have been furnished. *O'Connor* v. *Pennsylvania R. Co.* (1900) 48 App. Div. 244, 62 N. Y. Supp. 723 (metal strip at end of gang-plank wore loose, so that it projected above the surface of the plank).

[3] "In many kinds of service the care and keeping of tools and machinery in a condition of safety require merely the attention and repairs occasioned by ordinary use and wear, and are properly a part of the regular business of the servant engaged in the use of such tools and machinery. In such cases the duty of the employer is performed by furnishing safe tools and machinery and the means of making needed repairs, and the duty of making repairs may be intrusted to servants, and any neglect in the performance of this service is the negligence of a servant. *McGee* v. *Boston Cordage Co.* (1885) 139 Mass. 445, 1 N. E. 745. But in cases where skill and practical knowledge are required in keeping machinery in a reasonable condition as to safety, beyond what is needed in operating it, it is the duty of the employer to supply the necessary due diligence, skill, and experience in the care and inspection of the machinery to protect the servant from injury; and for any failure to exercise proper care and skill the employer is accountable." *Jaques* v. *Great Falls Mfg. Co.* (1891) 66 N. H. 482, 13 L. R. A. 824, 20 Atl. 552.

See also the quotations from *Cregan* v. *Marston* (1891) 126 N. Y. 568, 27 N. E. 952, note 2, *supra*, and from *Smith* v. *Potter* (1881) 46 Mich. 258, 41 Am. Rep. 161, 9 N. W. 273, in note 4, subd. (c), *infra*.

[4] (a) *Inspection and repair of railway tracks.*—In *Michigan C. R. Co.* v. *Austin* (1879) 40 Mich. 247, a railway company was held not liable for the failure of trackmen in not removing ashes and cinders, the decision being afterwards said, in *Ballhoff* v. *Michigan C. R. Co.* (1895) 106 Mich. 606, 65 N. W. 592, to rest on the ground that the condition of unsafety was temporary, resulting from an omission, which pertained merely to the operation of the road, where trackmen were held to be vice principals as regards their failure to level the track. To the same effect is *Dickerson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585, where it was said that the daily repair of tracks by section men is not a discharge of a non-delegable duty.

(b) *Inspection and repair of rolling stock.*—The virtual effect of a decision in the circuit court of appeals is to make an engineer a fellow servant of his fireman as regards the inspection of the engine between the regular inspecting stations. *Texas & P. R. Co.* v. *Patton* (1894) 9 C. C. A. 487, 23 U. S. App. 319, 61 Fed. 259. But it is not

620. Master liable where the delinquent servant was engaged in a different class of work.—One material limitation to which the doc

apparent how such a doctrine can be reconciled with the Federal decisions cited in § 581, *ante*, especially *Chesapeake, O. & S. W. R. Co.* v. *Wiseman* (1895) 11 C. C. A. 547, 31 U. S. App. 1, 67 Fed. 569.

Where plaintiff, a head end brakeman, while standing on a car in the performance of his duties, was thrown to the ground by reason of the breaking of a link connecting the engine with the car on which he stood, causing the train to stop with a jerk, it was held to be error to instruct that it was the duty of defendant "to keep them [the links] in such condition that they should be proper and sufficient for work to be done by them," and "to prevent the use of unsuitable and dangerous links," since defendant's whole duty was performed when it furnished a sufficient supply of suitable links. *Hiller* v. *New York, N. H. & H. R. Co.* (1900) 175 Mass. 303, 56 N. E. 282.

A railroad company is not liable for injuries to a conductor from the turning of a loose step upon the engine, where the engineer was furnished with proper tools for its repair, and the company had no knowledge, actual or constructive, of its condition. *Miller* v. *Chicago & G. T. R. Co.* (1892) 90 Mich. 230, 51 N. W. 370.

A railway company is not liable for the failure of a fellow servant to set apart for repairs a disabled car, as it was his duty to do. *Dodge* v. *Boston & A. R. Co.* (1892) 155 Mass. 448, 29 N. E. 1086.

In *McDonald* v. *Michigan C. R. Co.* (1895) 108 Mich. 7, 65 N. W. 597, it was held that a railroad company, which imposes on its engineers the duty of inspecting their engines, and provides no other method of inspection, to keep them in a reasonably safe condition, is liable to one of its brakemen for an injury received through the failure of the engine to respond promptly to the air brake, which defect was known to the engineer, who continued to use the engine after knowing of the defect, whether such conduct be considered as a complete neglect of the master's duty of inspection, or the illegal imposition of such duty upon a fellow servant. The court said: "Such inspection, in the ordinary operation of the road, is the act of a fellow servant, as between the engineer and brakeman, and, as between them, does not constitute the engineer a representative of the master. . . . But if the company makes no other provision for inspection, and chooses to rely upon the reports of its men, deferring repairs until breaks occur, or until the operators, in due course of business, report defects, we must either say that it has neglected the duty of inspection altogether, or that it has imposed one of its duties upon its operatives, and that it does not fall within the limits of fellow service; or that it may avoid the duty which the law imposes by invoking the rule of fellow servants."

It has been laid down that, although a car inspector may not be a fellow servant of a brakeman, yet an instruction which treats all "servants whose duty it is to examine the cars" as not fellow servants of the brakeman is erroneous. Such an instruction is broad enough to cover the negligence not only of the car inspectors at the various car shops, but also that of conductors and other trainmen who have a like duty to perform, while in charge of the train. *Chicago & A. R. Co.* v. *Bragonier* (1882) 11 Ill. App. 516. This case was reversed on appeal ([1886] 119 Ill. 51, 7 N. E. 655), but on the altogether different ground that the brakeman was guilty of contributory negligence in not making such an inspection as he should have done.

In *St. Louis, I. M. & S. R. Co.* v. *Rice* (1888) 51 Ark. 467, 4 L. R. A. 173, 11 S. W. 699, the court said: "While we recognize the liability of the railway company for the wilful or negligent default of its chief inspectors and those deputed to supervise the condemnation of unsuitable tools, rolling stock, etc., we cannot assent to the proposition that every yard inspector on the line of railroad is a vice principal." The function of the yard inspector was to inspect cars on their arrival, make trifling repairs, and mark them unfit for use whenever they were seriously damaged.

This case was followed in *St. Louis, I. M. & S. R. Co.* v. *Brown* (1890) 67 Ark. 295, 54 S. W. 865, where a fireman was injured by the negligence of a switchman in putting a defective link in a car.

In *St. Louis, I. M. & S. R. Co.* v. *Gaines* (1885) 46 Ark. 555, a car in-

trine thus laid down is subject is exemplified in the cases which proceed upon the theory that, where the duty of inspecting and repairing appliances is cast upon an employee not actually engaged in the work

spector was held to be a fellow servant of a brakeman on the ground that he was not in charge of a separate department, and that his duties did not require special mechanical skill.

In another case it was said that the rule as to the furnishing of appliances and maintaining them in repair is limited in its operation to the agents who are employed to look after and see that these things are done. "We do not mean," said the court, "to determine that this rule would extend to every subaltern who hammers on an engine in the course of repairs; but when the company appoints an agent for a particular purpose, his acts in the line of his specialty are the acts of the company." *St. Louis I. M. & S. R. Co.* v. *Harper* (1884) 44 Ark. 524.

It has also been laid down that where the relation sustained by a car inspector to car repairers is merely that of a foreman directing their labors, he is not a vice principal. *Fordyce* v. *Briney* (1893) 58 Ark. 206, 24 S. W. 250.

The negligence of an engineer in running an engine without a headlight, instead of obeying rules requiring him to examine the engine, and, in case of defects, to take it to the repair shop, the consequence being that a flagman at a crossing was killed, is that of a fellow servant. *McDonald* v. *New York C. & H. R. R. Co.* (1892) 63 Hun, 587, 18 N. Y. Supp. 609.

A mining company is not liable for the negligence of its foreman in failing to see that the bumpers of a car were in proper repair. *Voshefsken* v. *Hillside Coal & I. Co.* (1897) 21 App. Div. 168, 47 N. Y. Supp. 386. Here, however, the master's nonliability seems to be asserted in terms too broad, as the court speaks of the fact of the coservice of the injured and delinquent servants as sufficient to prevent recovery.

(c) *Inspection of rolling stock belonging to other companies.*—An inspector of foreign railway cars is a fellow servant of a brakeman engaged in operating them. *Mackin* v. *Boston & A. R. Co.* (1883) 135 Mass. 201, 46 Am. Rep. 456; *Smith* v. *Potter* (1881) 46 Mich. 258, 41 Am. Rep. 161, 9 N. W. 273; *Mexican C. R. Co.* v. *Shean* (1891; Tex.) 18 S. W. 151, Following *ton, H. & S. A. R. Co.* v. *Fare* 73 Tex. 86, 11 S. W. 136; *Kelly* v. *Abbot* (1885) 63 Wis. 307, 309, 53 Am. Rep. 292, 23 N. W. 890.

The special consideration relied on by the court in the Massachusetts case above cited, that a system of inspection may be adequate, even though it does not provide for the examination of foreign cars at the points where they are taken into the trains of the employer, is not supported by any satisfactory reasons. The assertion that there is no duty in the premises, because the servant knows such a system to be in operation and therefore assumes the risks incident to it, is a mere *petitio principii*. The question still remains, whether the circumstances are appropriate for the application of the doctrine of assumed risks. The present writer is strongly of the opinion that this question should be answered in the negative. In the first place, the conclusion of the court that the risks of the system were, as a matter of law, assumed, seems to be justifiable only on the hypothesis—not by any means self-evident—that the servant's comprehension of those risks was a peremptory inference, either from the plaintiff's opportunities of informing himself with the manner in which his own employers carried on their business, or from the generality of the usage which prevails among railway companies to omit the inspection of foreign cars at receiving stations. The omission to advert to these special elements, and to determine their precise significance in relation to the evidence, is of itself a serious flaw in the reasoning of the court. But that reasoning is also deficient in a still more important respect,—that no attempt is made to determine how far the doctrine of assumption of risks ought to be allowed to qualify the operation of the theory of non delegable duties. As already remarked, that theory has been worked out in Massachusetts in a form somewhat different from that which it has taken in other states. But, under any form which it can take, it seems to be essentially incompatible with the acceptance of a doctrine which declares that the servant's knowledge of the general system adopted for the conduct of a department of the business disables him from maintaining damages [illegible] caused by some particular

defect in the instrumentalities, which is not discovered owing to that system. To hold that the servant assumes the risks of the various abnormal sporadic conditions which may possibly be superadded temporarily to his environment, owing to the known imperfections of the employer's arrangements, is a doctrine which it not only extremely harsh, but which would tend to nullify completely the theory of absolute duties in its relation to perils, in the face of which the servant is unusually helpless, and against which he is therefore, in fairness, entitled to the fullest measure of protection which the law can afford. Compare § 279, *ante*.

In *Smith* v. *Potter* (1881) 46 Mich. 258, 41 Am. Rep. 161, 9 N. W. 273, the court argued thus: "The work done is to be done at all hours and at every place where there are railroad connections with other roads. It is not a duty of management or general supervision, but a task for which nothing is required but fidelity and mechanical knowledge of a comparatively limited kind. It is such work as would seldom be delegated to an officer of extensive responsibilities, who has other interests to look after. But whatever be its quality, it was in this case not claimed to have been placed in wrong hands. Nothing more could be asked of the employer." "There is no difference in the nature of the danger, or in the quality of the inspector's employment, between the case of shifting cars belonging to other roads and cars belonging to the same road. Defects in both lead to the same results, and the methods of examining both are identical. Where a car has been damaged by some injury which has escaped notice, it cannot fairly be said that employers ignorant of it, who have taken all the usual and reasonable precautions against it, are any more to blame in the one case than in the other." This decision was subsequently explained as having been based on the ground that the delinquent's duty was not one of management or general supervision, as in the case before the court. *Van Dusen* v. *Letellier* (1889) 78 Mich. 492, 44 N. W. 572 (deck in mill yard not repaired). For other criticisms, see subd. (f), *infra*.

In *Cincinnati, H. & D. R. Co.* v. *McMullen* (1889) 117 Ind. 439, 20 N. E. 287, the court inclined to the view that inspectors of foreign cars were fellow servants of the brakeman, the view being taken that "it is not the duty of the company to furnish appliances and instrumentalities, but to make proper inspection and give notice of defects if any are found, and that this duty is performed by the employment of a sufficient number of competent and skilful inspectors, who are subjected to proper rules and instructions." The defective car in this case belonged to the defendant, and the suggestion as to foreign cars was definitely determined not to embody the true rule in *Louisville, N. A. & C. R. Co.* v. *Bates* (1897) 146 Ind. 564, 45 N. E. 108.

In an intermediate case it was held that a mining company fulfils its duty to its servants as to inspection of cars furnished it for temporary use, by supplying competent and skilful inspectors subjected to proper instructions; and the negligence of noninspection in such case is not that of vice principals. *Neatz* v. *Jackson Hill Coal & Coke Co.* (1891) 139 Ind. 411, 38 N. E. 324, Rehearing Denied in (1894) 139 Ind. 418, 39 N. E. 147. The court said: "In the present case the inspectors and the appellant occupied a relation to the appellee, in all respects identical with that occupied by the inspectors and brakemen of railway companies handling cars of other companies in the course of the master's business. The cars came, not as instruments of the service supplied by the master, but as incidents of its business, and from the dependence of the master upon those not in any manner connected with such business or subject to the master's control. If the defects had been in the original construction of the cars, it could not be said that such defects were chargeable to the negligence of the appellee; nor can it be said with greater reason that the ill repair was from the fault of the appellee, or that a duty rested upon the appellee to make the repairs. The extent of the appellee's control over the cars was in the use of them for loading coal, and it was not responsible to the appellant, or anyone else, for their sufficiency as a means of transportation. The failure to inspect, to set brakes, or to block the wheels when the first car was removed was negligence in the use, and not in the supplying of instrumentalities. One line of distinction between vice principals and coemployees is in the duty, in one instance, to supply or maintain instrumentalities of the service, and in the other of using the instrumentalities supplied. Negligence in the first, though that of a servant, is the master's negli-

gence, while in the second the negligence is that of a fellow servant. This distinction keeps in view the proposition that where the master himself participates in the use, and the negligence is his own, he may not be said to be a fellow servant."

This decision was explained in *Louisville, N. A. & C. R. Co.* v. *Bates* (1897) 146 Ind. 561, 45 N. E. 808, as being based on the theory that as the defective car had been merely delivered to a coal company to be loaded with coal, the liability of the bailee was essentially different from that of railway companies which receive foreign cars to be forwarded.

(d) *Inspection and repair of other kinds of machinery.*—A servant cannot recover who is injured while cleaning a cordage machine by the pushing in of a movable board which was insecurely fastened, the nut which held the button not being tightened. *Smith* v. *Lowell Mfg. Co.* (1878) 124 Mass. 114.

A servant employed on a slubber machine in a cotton mill, whose duty it was to see that the machine was kept running, to take off the full bobbins and put on others, to notify the overseer if she knew that there was anything wrong about the machine, and to see that it was kept clean, and the person whose business it was to keep the machine in repair were fellow servants. *Rice* v. *King Philip Mills* (1887) 144 Mass. 229, 59 Am. Rep. 80, 11 N. E. 101.

The mending of a belt used in transmitting power to machinery and which is frequently broken is not the duty of the master. *Rozelle* v. *Rose* (1896) 5 App. Div. 132, 39 N. Y. Supp. 363.

An employer is not liable for the death of an employee caused by the breaking of a belt on a machine in charge of a fellow servant, to whom the employer delegated the duty of inspection, and to whom other belts were supplied, especially if the deceased knew that the belt in use was unsafe. *Hartley* v. *Cooper* (1893) 6 Misc. 263, 26 N. Y. Supp. 763.

Where the cover of a steam chest was loose because the nuts were not tightly screwed on the bolts, and steam thereby escaped, causing an accident to plaintiff, a bridgeman engaged in coupling the engine with a car, the engineer having all the tools necessary to tighten the bolts, plaintiff cannot recover. *Keegan* v. *New York C. & H. R. R. Co.* (1899) 45 App. Div. 629, 64 N. Y. Supp. 595.

A warehouseman is not liable for the death of a fireman in his employ, caused by the failure to test hydrostatically a tubular boiler after removing and replacing the caps, where it is part of the ordinary duty of the engineer to make such test. *Bell* v. *Consolidated Gas, Electric Light, H. & P. Co.* (1899) 36 App. Div. 242, 56 N. Y. Supp. 780. On the second appeal ([1901] 62 N. Y. Supp. 921), this ruling was indorsed, though with some intimation of a doubt as to its correctness.

In *Schulz* v. *Rohe* (1893) 119 N. Y. 132, 23 N. E. 420, it was held that, even if it should be assumed that the foreman in charge of a factory was the master's *alter ego* (a point which was not determined), there was no liability for an injury caused by the neglect of the machinist employed for such duties, to execute certain repairs in a machine at the time when he had promised to do so.

The fact that defendants had furnished an extra bucket to be used in case of an emergency did not render the employees negligent in using the defective bucket, since the buckets and their repair were committed to the care of the engineer, who acted in that capacity as a vice principal. *Horton* v. *Zwierzykonski* (1901) 192 Ill. 328, 61 N. E. 413. Affirming (1899) 91 Ill. App. 362.

(e) *Inspection incidental to the details of blasting work.*—The danger from "missed shots" being temporary and incident to the work of drilling in a mine, which plaintiff was employed to perform, it is not the duty of the employer to make inspections for "missed shots" after each explosion. *Browne* v. *King* (1900) 40 C. C. A. 545, 100 Fed. 561.

The failure of a foreman to inspect cartridge holes to ascertain whether any charges remained unexploded is that of a mere coservant. *Vanenso* v. *Cataract Constr. Co.* (1895) 87 Hun, 519, 34 N. Y. Supp. 273.

(f) *Inspection of loads on railway cars.*—(See also § 610, note 1, subd. (c), *supra*.) The inspection of a railway car by a station agent or other employee with a view to seeing that the load is properly arranged and adjusted is, as regards the trainmen, the act of a fellow servant merely.

In *Barnes* v. *New York, L. E. & W. R. Co.* (1889) 113 N. Y. 251, 4 L. R. A. 151, 21 N. E. 50, the court said: "We think the defendant had fulfilled its duty to the servants in its employ when it furnished a perfectly safe car and

appliances, and when it also provided a system of inspection of cars, and proper persons to inspect them after they were loaded and before they were to be taken away. The failure to inspect, or, if inspection were made, the failure to rectify the improper loading by which the brake was rendered useless, was not the failure of the master to fulfil his duty to his servant, but it was the negligence of a coservant in carrying out the orders of the master. The master is not an insurer that all his servants shall perform their duty, and he performs his duty to the servant in this regard in providing a system of inspection and intrusting its performance to competent hands. If, thereafter, such servants are guilty of negligence, the master is not responsible therefor to a coservant. We do not see that the question is in any way altered by the fact that the car was loaded by the servants of the owner of the lumber which was placed upon it. Whoever loaded it, the master had provided for an inspection of the car before it was to be taken away, and if the inspection were neglected, it was still the same neglect of a servant of the defendant to do that which he ought to have done, and such neglect was not that of the master in fulfilling any of the duties which he owed as master to his servants. It cannot, we think, be properly contended that the master fails to provide a car which is a safe and proper one, or that he fails to provide one with proper appliances, because, through the negligent manner in which the car is loaded, the appliance is, on that account only, made useless for the purpose for which it was intended." Ruger, Ch. J., and Andrews and Danforth, JJ., dissented, the latter on the ground that when the car was furnished to deceased it was loaded, not an empty, car, and at that moment the movement of the brake was obstructed, so that therefore the car was imperfect and unfit for use.

This case was followed in *Ford* v. *Lake Shore & M. S. R. Co.* (1889) 117 N. Y. 638, 22 N. E. 946, where the employees who had loaded cars were held to be fellow servants of a switchman who was injured by a piece of timber which fell from one of them, owing to the failure to secure the load with the side stakes furnished. Danforth, J., dissented on the ground that the evidence showed that there were no brackets provided for the reception of stakes, and that the defect was therefore structural. Ruger, Ch. J., and Andrews, J., concurred in this view.

On a subsequent appeal ([1891] 124 N. Y. 493, 12 L. R. A. 454, 26 N. E. 1101), the plaintiff was permitted to recover on the ground that the company had not established proper rules prescribing the manner in which cars should be loaded with lumber,—a theory not discussed at the first trial.

To the same effect, see *Bailey* v. *Delaware & H. Canal Co.* (1898) 27 App. Div. 305, 50 N. Y. Supp. 87; *Jarman* v. *Chicago & G. T. R. Co.* (1893) 98 Mich. 135, 57 N. W. 32 (fireman of another train injured by a projecting limb of a tree on a flat car); *Lellis* v. *Michigan C. R. Co.* (1900) 124 Mich. 37, 82 N. W. 828 (piece of timber fell off and injured a switchman); *Dewey* v. *Detroit, G. H. & M. R. Co.* (1893) 97 Mich. 329, 22 L. R. A. 292, 56 N. W. 756, Reversing on Rehearing (1893) 97 Mich. 343, 14 L. R. A. 342, 52 N. W. 942 (McGrath, J., dissenting). At the first hearing of the last-mentioned case the majority had taken the ground that the duty of inspection went to the extent contended for by the plaintiff, and that *Smith* v. *Potter* (1881) 46 Mich. 258, 41 Am. Rep. 161, 9 N. W. 273 (subd. (c), *supra*, holding that a car inspector and a brakeman were fellow servants, had been overruled by *Irvine* v. *Flint & P. M. R. Co.* (1891) 89 Mich. 419, 50 N. W. 1008, where it was held that it is as much the duty of a railway company to see that the cars are so loaded that brakemen will have reasonably safe access to the brakes, as it is to see that proper appliances are provided. The further statement that an inspector provided in pursuance of the obligation would be a fellow servant was thought to be erroneous. Other cases relied upon by the majority of the judges were *Van Dusen* v. *Letellier* (1889) 78 Mich. 492, 11 N. W. 572, *supra*, and *Morton* v. *Detroit, B. C. & L. R. Co.* (1890) 81 Mich. 423, 16 N. W. 111, where the duty to inspect the parts of cars was held to be nonassignable. The minority drew a distinction between the duty of furnishing a safe place and safe machinery and the duty of seeing that the appliances are properly used, and considered that the duty of seeing that a car is properly loaded came under the latter head. "The injury," said Montgomery, J. (see p. 347 of the report), "resulted, not from any fault in the appliances used, but because, in making use of suitable cars and machinery, a fellow servant neglected his duty." The view of the minority prevailed upon the subsequent hearing of the case. The court said (see p. 333 of

the report): "The real point in controversy here is whether the duty of a master is to be extended so that he may be made liable for the neglect of a car inspector in not observing that a car is improperly loaded when it is to be put into the train for transportation. There is no complaint here about the car itself. It was proper in construction, and a safe car for use in that service. Upon the first argument of the case in this court the real point in controversy was not so fully pointed out and considered as upon the reargument, and the case was regarded as very similar in principle to *Smith* v. *Potter* (1881) 46 Mich. 258, 41 Am. Rep. 161, 9 N. W. 273, which Mr. Justice McGrath considered as virtually overruled by the later cases cited above. There is, however, a broad distinction between *Smith* v. *Potter* and the present case. In the former case, the injury complained of was received by reason of a defect in the framework of the car itself, while here the accident is attributable to improper loading. In the later decisions the doctrine of *Smith* v. *Potter* has been doubted, and the rule broadly stated that the master must furnish to the servant a safe place to work, and safe appliances to work with. . . . But in regard to the proper loading of cars, quite a different rule must necessarily prevail. The master must undoubtedly exercise care in the selection of inspectors to see that cars are not improperly loaded or overburdened, so that they are dangerous to employees, but after this has been done, it cannot be claimed that the master is to be held responsible for the faithful performance of the inspectors' duty. Any other rule than this would make railroad companies insurers of the lives and limbs of employees. In the present case the projection of the lumber over the end of the car was as apparent to the brakeman, if he had taken the precaution to make observation, as to an inspector. It requires no special skill or training to ascertain the fact. The duties of a brakeman are known to be dangerous, and when one enters such service he must be held to have assumed the risks of the employment. He must exercise care himself in going between moving cars to make couplings."

The opinion at the first hearing, which was thus reversed, was written by McGrath, J., who also composed an elaborate dissenting opinion after the second hearing. Some extracts from the latter may, with advantage, be given to indicate the arguments adduced to support the view which was finally rejected. The learned judge said: "The duty of inspecting the car itself, and that of the inspection of its condition with its load upon it, have a common origin. Both spring from the duty of protection which the master owes to the servant. There is no ground for saying that one of these duties may be delegated so as to relieve the master from all liability, and that the other may not; nor is there reason in saying that the person who inspects the car itself, its appliances and instrumentalities, with reference to the safety of those engaged in its transportation, is not a fellow servant, while he who inspects the loaded car for a like purpose, and to see whether it affords proper facilities for the performance of the duties which must necessarily be performed in its transportation, is a fellow servant. In the present case both duties were delegated to the same person, both are performed with reference to the same end, and the person to whom delegated must be held, in the performance of each, to occupy the same relation to plaintiff and defendant. It certainly cannot be said that, with reference to stationed machinery, belting, shafting, and gearing, the master must, at his peril, provide the necessary guards and coverings, and arrange the surroundings so as to render the place reasonably safe, yet, as to a train of cars, between which a brakeman is required in the ordinary discharge of his duties to go while one section is being driven against a standing section or car, so loaded as to render the position of the brakeman one of greatly increased hazard to life or limb, the master may, in case of injury, escape liability. The employment is, at best, a dangerous one. It is as essential to the protection of the brakeman that these spaces be kept clear as that the spaces be provided. This danger can be guarded against. As is said by Mr. Justice Long, in *Palmer* v. *Michigan C. R. Co.* (1891) 87 Mich. 290, 49 N. W. 613: 'In all cases where the danger can be readily guarded against, the employer is in duty bound to protect the employee at his peril.'"

Where a hand car, as originally furnished, is in proper condition for use, an accident happening afterwards because of its defective condition must be due to the negligence of the workmen using the car, and these are the fellow

which the plaintiff is doing, such employee is a vice principal.[1] But this circumstance is not conclusive in the servant's favor under the circumstances involved in the cases discussed in subtitle C, *supra* (see § 616, note 6), and is possibly not one which is invariably of a differentiating quality as in the present instance.

621. Negligence in failing to replace an unsound by a sound appliance, when master not liable for.—The result of the general principles discussed in §§ 590, 603, *supra*, is that the master cannot be held liable, where the substitution of a sound for an unsound appliance is susceptible of being effected by merely selecting another instrumentality from a stock furnished by the master. In other words, the quality of the operation through which the substitution is carried out determines the quality of the whole transaction, as being the discharge of the functions of a mere servant.[1]

servants of their foreman. *Reynolds* v. *Kneeland* (1892) 63 Hun, 283, 17 N. Y. Supp. 895.

[1] *Nord Deutscher Lloyd S. S. Co.* v. *Ingebregsten* (1894) 57 N. J. L. 400, 31 Atl. 619; *Judson* v. *Olcan* (1889) 116 N. Y. 655, 22 N. E. 555.

In *Woods* v. *Long Island R. Co.* (1896) 11 App. Div. 16, 42 N. Y. Supp. 140, the court, after citing several cases, said: "Tested by these authorities, I think that the controlling consideration in the solution of the question before us must be the method in which the operation and business of the railroad was conducted. If it were part of the duty of the train hands to make the adjustment of the brake rods, then I should say that the car furnished in this case was not defective, and that the failure to properly adjust the rod was the negligence of a fellow servant in the conduct of the work. But if the duty of the train hands was only to operate the brakes, and the duty of adjusting them was imposed on another department, which repaired them and constructed or repaired the appliances of the road generally, then I should say that the car, as furnished, was a defective appliance. If it was the course of business that the car should be furnished with brakes in condition for use by the train hands, I cannot see why the improper adjustment of the parts would not make the appliance defective in the same sense and to the same extent as if some part of the appliance was defective in character, or was wanting. In the case before us the evidence as to the operation of the railroad in these respects is meager. But there was no evidence given on the trial, nor was there any claim made on the argument that the train hands had any duty with regard to the adjustment of the brake rods. The rules of the company would seem to negative such a claim, for the rules require the conductors to report at their trains and inspect the signals and brakes, to see that they are in proper order, but no duty is devolved upon them of remedying any defects. It further appears that it is the duty of the inspectors in the yards to inspect these appliances, and to see that they are repaired or put in proper order. We are therefore of the opinion that the character of the car, as an appliance, must be determined as of the time when it was furnished to the train hands, and that any failure on the part of mechanics or employees up to that time must be deemed neglect in the master's duty of furnishing a safe appliance, and not as that of a fellow servant in the conduct of the work."

The improper adjustment of a brake rod constitutes a defective appliance, and not a mere neglect or failure in detail, within the rule relating to the liability of the master for defects in appliances, where it was the duty of inspectors to make the adjustment, and not the duty of the train employees. *Woods* v. *Long Island R. Co.* (1896) 11 App. Div. 16, 42 N. Y. Supp. 140.

See also *Daley* v. *Boston & L. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690 cited in § 570, *ante*.

[1] "A master employing a servant to keep tools in repair or replace them

622. All employees engaged in repairing regarded as coservants of each other.— In the cases so far reviewed, the injured servant him-

with others is not liable for injury to a coservant through using a tool after it had become dull on account of the neglect of the servant to replace it with another. *Webber* v. *Piper* (1888) 109 N. Y. 496, 17 N. E. 216. The court said: "The master's duty was performed when he furnished suitable saws and the means and conveniences for keeping them sharp and properly set. The saw, though dull, was not defective in any legal sense, and the negligence, if any, was that of Myers, whose duty in sharpening and setting the saws was that of a fellow servant. A contrary rule might carry us to the extent of saying that, where the master furnished sufficient and adequate machinery, . . . but its running became dangerous to the operative, unless well oiled, he was liable for the neglect or omission of that servant. There are many matters of detail in the management of safe and adequate machinery, which must be intrusted to the operatives, and as to which the master owes no duty except the employment of competent workmen, and we deem this a case of that character. The line of division between the duty of the master to furnish and maintain safe and adequate machinery and that of the operative to manage and handle it with prudence and care, is difficult to define by any general description, but it is quite obvious when each case, as it arises, comes under consideration. In the one before us the neglect, if any, was in a detail of the management of the machinery. A master builder might furnish proper tools to his workmen, but it would not be his duty to sharpen every chisel as it became dull, or set every saw when that need arose. The appellant relies upon the case of *Kain* v. *Smith* (1882) 89 N. Y. 375. If, in that case, the master had furnished another jigger, perfect in all respects, and safe and adequate for use, and the neglect had been that the foreman used the old one which had become unsafe, when he might have used the new one, a very different case would have been presented. Here the master supplied saws enough and the means of sharpening and resetting, and if the servants neglected to avail themselves of the means of safety provided, the master was not in fault, for the saw was not defective, but merely dull from use. Its ordinary efficiency was impaired, but it had not thereby become a defective or dangerous machine."

In *Cregan* v. *Marston* (1891) 126 N. Y. 568, 27 N. E. 952, Reversing (1890) 32 N. Y. S. R. 913, 10 N. Y. Supp. 681, it was held that a master was not liable for the failure of an engineer in charge of hoisting machinery, to replace old ropes with new ones out of a stock which was kept on hand.

An employer is not liable for an injury sustained by an employee while working near a derrick managed by a fellow servant, because of the breaking of a rope, where a new rope was there, ready for use if the workmen chose to use it, and also a tackle which could have been used instead of the single rope, if desired. *McKinnon* v. *Norcross* (1889) 148 Mass. 533, 3 L. R. A. 320, 20 N. E. 183. The court said: "Properly to use pulleys, blocks, ropes, and other ordinary tools and appliances which have been furnished by a master to the workmen employed upon a derrick is a part of the duty of the workmen. It is incidental to the management and use of the derrick."

To the same effect, see *Conway* v. *New York C. & H. R. R. Co.* (1895) 13 Misc. 53, 34 N. Y. Supp. 113, Reversing (1890) 11 Misc. 641, 32 N. Y. Supp. 921; *Daley* v. *Boston & A. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690; *Johnson* v. *Boston Tow-Boat Co.* (1883) 135 Mass. 209, 46 Am. Rep. 458, in all of which a sufficient stock of rope was kept on hand by the master, and a new one might have been obtained at any time. In the last-mentioned of these cases Colt, J., thus undertakes to reconcile the decision with the doctrine laid down in *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598: "It was incidental to the use of the apparatus,—a part of its contemplated use,—that the rope should be occasionally renewed; and when the defendant had furnished the means for that renewal, and employed Moore to make the renewal whenever needed, it employed him as a servant, and not as an agent or deputy. When a master has furnished suitable structures, means, and appliances for the prosecution of a business, all persons employed by him in carrying on the business by use of the means furnished, including those who use the means directly in the

self had nothing to do with the work of repairing. Another principle equally fatal to an injured servant's right to maintain the action comes into play where both he and the delinquent coservant were engaged in the work of repairing. Under such circumstances it is held that, being engaged in the same kind of work, they assume the risks of one another's negligence.[1]

prosecution of the business, those who maintain them in a condition to be used, and those who adapt them to use by new appliances and adaptations incidental to their use, are fellow servants in the general employment and business. One employed in the care, supervision, and keeping in ordinary repair of the means and appliances used in a business is engaged in the common service."

An employer is not liable for an injury to an employee, as for failure to furnish safe tools and appliances, because the bar used when one of the employees was injured was more liable to turn than that generally used, where the accident was due to the use of it without blocks, which were available at any time. *Hathaway* v. *Illinois C. R. Co.* (1894) 92 Iowa, 337, 60 N. W. 651.

There can be no recovery where a fellow servant selected a defective wheel for the purpose of replacing one which formed part of an appliance for conveying loads along an overhead wire. *Byrne* v. *Eastmans Co.* (1898) 27 App. Div. 270, 50 N. Y. Supp. 457.

The failure of an engineer, who by the rules of the company is required to keep his engine, including the head lamp, in order, to replace a short wick by one of suitable length from a supply furnished by the company at a convenient place, is not negligence which is imputable to the master. *Simpson* v. *Central Vermont R. Co.* (1896) 5 App. Div. 614, 39 N. Y. Supp. 464.

[1] In *Murphy* v. *Boston & A. R. Co.* (1882) 88 N. Y. 146, 42 Am. Rep. 240, it was held that a railway company was not liable for the death of a mechanic in its repair shop, where the cause of the disaster was the explosion of a boiler, due to the negligent failure of his coemployees at the last stage of the repairs to discover and repair defects in the boiler which had been overlooked at a previous stage of the repairs by other employees. The court said: "We think this case is not within the principle which holds the master responsible for unsafe machinery furnished for the use of the servant. The case of *Fuller* v. *Jewett* (1880) 80 N. Y. 46, 36 Am. Rep. 575, is a distinct authority for the proposition that, if this locomotive had been sent out from the shop, and afterwards exploded while in use on the defendant's road, injuring the engineer or other servants of the defendant, the company would have been responsible. The negligence of the boiler makers in the case supposed would be regarded as the negligence of the master. The risk of the negligence of the repairers and machinists would not be considered one of the risks which a servant in whose hands the machine was subsequently placed for use had assumed. The placing of the locomotive on the road for use would be an assurance that it was fit and safe; and an engineer or other servant employed on the train could not be supposed to have known the condition of the locomotive, or whether the men employed to make repairs were competent, or the manner in which the work had been done. In this case Murphy was not, we think, a servant, in whose hands the locomotive was placed by the defendant for use, within the principle of *Fuller* v. *Jewett*, and like cases. The locomotive was sent to the repair shop in order that it might be made fit for use. The mechanics in the repair shop, including the intestate, were employed for the purpose of repairing defective locomotives. The intestate and his colaborers in the shop were engaged in the same department of service, worked under the same control, and in the case in question the boiler makers and the other mechanics were employed to effect the same object, *viz.*, the reparation of the 'Sacramento.' It is true that the work was done in successive stages, and different parts of the work were intrusted to different persons. The refitting of the valve and its adjustment to the required pressure were the last things to be done. This work was, however, as necessary in fitting the locomotive for use as the work of the boiler makers or machinists. The intestate had an opportunity to inform himself of the competency of his coservants in

This principle, however, is held not to be controlling in a case where a brakeman who is required by a rule to inspect the brakes of his train at every station where the train stops is injured by the negligence of one of the regular inspectors at a terminal point. For reasons explained in the note below, it is considered that, by reason of the difference between the duty of inspection resting on the trainmen, and that imposed on the car inspectors, the two classes are not fellow servants within the doctrine which exempts the master from liability.[2]

the shop. He doubtless supposed that the boiler makers had performed their duty; unfortunately, they had neglected it. But we think the risk of their negligence was one of the risks he assumed, as incident to his employment in the common service. It would be too close a construction to hold that the repairs were completed when his work commenced, and that the setting of the valve was an independent and disconnected service in respect to a machine put into his hands by the company for use. This claim of the plaintiff's counsel would make the master responsible to each successive employee engaged on the repairs for any negligence of a coemployee whose work was prior in point of time, although done in effecting the common purpose in which all were engaged. This would, we think, be extending the liability of the master further than is warranted by the adjudged cases."

To the same effect are the following cases:

A servant in a shop who has repaired a chain used in raising locomotive driving wheels, and another servant who, in so using the chain, is injured by its breaking at the link which had been repaired, are fellow servants. *Rogers Locomotive & Mach. Works* v. *Hand* (1888) 50 N. J. L. 464, 14 Atl. 766.

Plaintiff's intestate, a timekeeper at defendant's paper mill, was killed by the bursting of a tee in a steam pipe, occasioned by the action of the superintendent of the mill in opening a valve while testing some new steam pipes. The superintendent was a millwright and had general charge of defendant's machinery. Held, that the [illegible] the superintendent in opening [illegible] was, as matter of law, the act of a coservant, and not of the defendant. *Wait* v. *C. R. Remington & Son Co.* (1900) 53 App. Div. 592, 65 N. Y. Supp. 1116 (injuries inflicted while the work of inspection is in progress were distinguished from those due to conditions resulting from a faulty inspection).

The wife of a section man cannot recover from a railroad company for the death of her husband, who was swept from defendant's tracks into a river by a landslide, where the slide was caused by the failure of the crew, of which her husband was a member, to properly drain a bluff overhanging the track, where such duty was imposed on them by the rules of the company, as such failure is the negligence of fellow servants. *Shirens* v. *Northern P. R. Co.* (1899) 38 C. C. A. 151, 97 Fed. 255.

That all servants engaged in repairing a railroad track are in a common employment, see also *Wellman* v. *Oregon Short Line & U. N. R. Co.* (1892) 21 Or. 530, 28 Pac. 625.

A foreman of a gang of car repairers in assisting in making repairs acts as their fellow servant. *Holtz* v. *Great Northern R. Co.* (1897) 69 Minn. 524, 72 N. W. 805.

See also *Atchison, T. & S. F. R. Co.* v. *Meyers* (1896) 22 C. C. A. 288, 46 U. S. App. 226, 76 Fed. 443, the effect of which is stated in § 610, note 1, subd. (a), *supra*.

A switchman employed to shift cars in a railroad yard according to directions upon a card furnished him by the yard despatcher, whose duty it was to order sent to the repair shop all cars marked as out of repair by the car inspector, is a fellow servant of such inspector. *Gibson* v. *Northern C. R. Co.* (1880) 22 Hun, 289.

An engineer engaged in repairing the machinery upon a coal dock is a fellow servant with a laborer at work repairing a chute connected with such dock. *Porter* v. *Silver Creek & M. Coal Co.* (1893) 84 Wis. 418, 54 N. W. 1019 (sudden starting of engine drew a cable taut, so that it caught plaintiff). Distinguishing *Luebke* v. *Chicago, M. & St. P. R. Co.* (1883) 59 Wis. 127, 48 Am. Rep. 483, 17 N. W. 870.

See also § 498, note 1, subd. (m), *ante*.

[2] In *Eaton* v. *New York C. & H. R. R.*

Co. (1900) 163 N. Y. 391, 57 N. E. 609, Reversing 14 App. Div. 20, 43 N. Y. Supp. 556, the court argued thus: "We may concede that the question whether a faulty act or omission complained of is negligence in the discharge of the duty of the master, as such, or is in a detail of the work, may depend on the manner in which the work is carried on. We may also assume, for the argument, that it was within the power of the defendant to have so conducted its business as to have made its trainmen both brakemen and car inspectors; but the question remains whether it did so in this case, and whether such is the effect and object of the rule promulgated. The question is not without interest to the defendant in other cases than that before us. If the same servant is to discharge the duties of separate positions, he must have the necessary qualification for each, to be a competent fellow servant. If a brakeman is to act as car inspector, he must have the expert skill and knowledge which a jury might find was necessary to discharge the duties of the latter position, and the defendant might find itself very much circumscribed in its appointment of trainmen. We think it quite plain that the defendant never intended to blend, nor has blended, the two distinct positions of brakeman and inspector. It appears that, as a matter of fact, it has assumed to inspect cars at its terminus by servants especially designated for that purpose. The rule promulgated by the company must have a reasonable construction. It imposed on the trainman the obligation of examination of the appliances which their service compelled them to use, both for their own protection and the protection of the property of the master and the persons of their fellow servants. The examination, however, was not necessarily to be that of an expert inspector, but such as the ordinary knowledge of brakemen and the time allowed for the purpose, consistent with their other duties, would enable them to make."

CHAPTER XXXIII.

LIABILITY OF THE MASTER CONSIDERED WITH REFERENCE TO THE QUESTION WHETHER THE INJURED PERSON WAS A SERVANT IN RESPECT TO THE WORK IN HAND.

623. Introductory.

A. LIABILITY AS DEPENDENT UPON THE TEMPORARY SUSPENSION OR INTERMISSION OF THE RELATION OF MASTER AND SERVANT.

624. Servants carried on vehicles belonging to their employer.

a. Servants traveling in the performance of their contract assume known risks.

b. Negligence of coservants operating the vehicles; when deemed to be a risk assumed.

c. Rationale of these cases.

d. Assumption of the risk of the negligence of servants not operating trains.

e. When servants traveling on their employers' vehicles are deemed to be passengers.

f. Master's obligations inure to benefit of servant traveling in course of his employment.

625. Servants in various other situations.

625a. Temporary intermission of relation of master and servant, never produced by the servant's neglect of his duties.

B. LIABILITY AS DEPENDENT UPON THE QUESTION WHETHER THE ACT FROM WHICH THE INJURY RESULTED WAS OR WAS NOT AUTHORIZED.

626. Presence of servant at the place where the accident occurred.

a. Circumstances under which recovery has been allowed.

b. Circumstances under which recovery has been denied.

c. Right of recovery considered with reference to the culpable or nonculpable quality of the servant's conduct.

627. Servant's use of the given instrumentality.

628. Servant's use of the given instrumentality in a certain manner.

629. Servant's unauthorized performance of certain work; generally.

630. Right of action where the injured person was not in the service of the defendant for any purpose.

631. Volunteers subject to same burdens as servants.

632. Persons not deemed to be subject to the disabilities of volunteers.

633. Right of action where servants undertake new duties.

634. Same subject continued.

635. Performance of unauthorized duties, considered as being indicative of negligence.

636. Minority as an element.

The decisions by which the meaning of the phrase, "in the course

of his employment," as used in the English workmen's compensation act of 1897, is construed, may usefully be compared with those cited in this chapter. See § 768, *post*.

Other decisions bearing upon the same subject will be found in the sections in which the Wisconsin statutes are reviewed. See § 764, note 8, and § 765, *post*.

623. Introductory.—The extent of the defendant's liability often turns upon the answer to the question whether the injured person was acting, at the time when his injury was received, in the capacity of a servant, and was therefore entitled to the rights and subject to the disabilities which the law infers when the existence of a contract of employment is established. Unless this question is answered in the affirmative, it is manifest that, on the one hand, he cannot hold his master liable for the nonperformance of the various obligations which are treated as implied incidents of the contract, and that, on the other hand, the defense of assumption of risks, at all events in so far as it rests upon the theory of a hypothetical agreement, is not available to the master. The latter result involves the important corollary that, under the circumstances supposed, a plaintiff will be able to recover for the negligence of a fellow workman to whom he bears a relation which would have admittedly let in the defense of common employment if he had been injured while actively engaged in the performance of his duties.[1] See also cases cited in § 624 subsecs. *b, c, d*, and § 631, *infra*.

An analysis of the cases which deal with the question whether the injured person was a servant acting in the course of his employment shows that, broadly speaking, they may be divided into two classes. In one of these the controlling issue presented for determination is simply whether the relation of master and servant was or was not suspended or intermitted at the time when the injury was received. In the other the essential consideration upon which the right of action hinges is that the injured person was or was not authorized to be in that particular position which he was occupying at the time of the

[1] *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837. In order that this defense may be available, the accident must have "happened whilst the servant was employed about his master's business." Archibald, J., in *Lovell* v. *Howell* (1876) L. R. 1 C. P. Div. 161, 169, 45 L. J. C. P. N. S. 387, 34 L. T. N. S. 183, 24 Week. Rep. 672. "In whatever else they may differ, these cases all agree upon one principle, and that is, that if the plaintiff is not, at the time of the accident, engaged in the actual service of the company, or in some way connected with such service, the company is liable for the negligence of its employees." *State use of Abell* v. *Western Maryland R. Co.* (1884) 63 Md. 433,

accident, or to engage in that particular work which he was then doing. These two classes will be considered in separate subtitles.

It should be remarked with respect to the latter class, that it has been deemed advisable, for convenience' sake, to analyze in the present chapter certain cases involving facts which, in a strictly logical point of view, indicate that they should rather be reviewed in that part of the third volume of this treatise in which the general question of the existence of the relation of master and servant is dealt with: the cases, namely, in which the injured person was one who had, without authority, undertaken to do work for the benefit of a person to whom he was a stranger. See §§ 630, 631, *infra*. The inclusion of these cases in the present chapter is reasonably justified by the consideration that they illustrate the limits of an employer's liability in one particular direction, and that the rights of action possessed by persons injured under the circumstances adverted to have been discussed almost entirely with reference to the points of similarity or difference between their position and that of servants.

It would seem that, on the whole, the evidential conditions which must be established in order to enable the injured person to claim the privileges of a servant ought to be identical with those which, if they are shown to have existed, will prevent him from recovering where the proximate cause of the accident was the negligence of a coservant. In at least one case this theoretic identity has been recognized in the argument of the court.[2] But a collation of the cases cited in the following sections indicates that it has not always been borne in mind by the courts, and that the drift of judicial opinion has been rather in the direction of giving the evidence a construction unfavorable to the servant.

A. Liability as dependent upon the temporary suspension or intermission of the relation of master and servant.

624. Servants carried on vehicles belonging to their employer.—

[2] In *Ewald* v. *Chicago & N. W. R. Co.* (1888) 70 Wis. 427, 5 Am. St. Rep. 178, 36 N. W. 12, the court, in speaking of the pathway on which the servant received his injury, said: "There was, by virtue of the same contract, a corresponding duty of the company to keep that passageway open for the plaintiff, for he had a right to be there as an employee of the company working in the roundhouse. If the company violated that duty, to the plaintiff's injury, by its own act or primary negligence, its liability to respond in damages is absolute and unquestionable; but if the plaintiff has this benefit or advantage by reason of his relation to the company, as an employee, he must also suffer the disadvantage, if it be such, of being remediless against the company, if his injury in that relation was caused by the negligence of his coemployees or fellow servants."

a. Servants traveling in the performance of their contract assume known risks.—A servant who, at the time of the accident in suit, was being transported on a railway car or other vehicle furnished for the purpose of facilitating the performance of his work, is deemed to have been injured in the course of his employment, and therefore cannot recover if the injury was the result of a risk known to and appreciated by him. See, generally, chapter XXII., *ante*.[1]

b. Negligence of coservants operating the vehicles; when deemed to be a risk assumed.—The general principle stated in the preceding subsection has been exemplified in a large number of cases in which it has been held that the negligence of the servants operating the vehicle in which the injured servant was being transported was one of the risks assumed by him. Under such circumstances, he cannot recover on the theory that he was in the position of a stranger, as having ceased, for the time being, to be actively employed in his master's business.

Upon this ground it has been held that no action was maintainable in a case where a laundress was injured by the negligence of the driver of a carriage in which she was being carried to her place of work;[2] or in a case where a miner who, while on the lift by which he was lowered to and raised from the place of work below ground, was injured by the negligence of the engineer who operated the hoisting apparatus.[3] But most of the applications of the doctrine are fur

[1] In a case where a burning bridge gave way under a train, the possibility of such accident was held to have been accepted, as one of the ordinary risks of his employment, by a civil engineer who knew there was no watchman at the bridge, and who, at the time when the injury was received, was traveling on duty for the company, upon a pass exempting the company from liability for injuries to person or property. Under such circumstances, he occupied the position of an employee, and not that of a passenger upon the train upon which he was carried. *Texas & P. R. Co.* v. *Smith* (1895) 31 L. R. A. 321, 11 C. C. A. 509, 30 U. S. App. 176, 67 Fed. 524.

[2] *McGuirk* v. *Shattuck* (1893) 160 Mass. 45, 39 Am. St. Rep. 454, 35 N. E. 110.

[3] *Bartonshill Coal Co.* v. *McGuire* (1858) 3 Macq. H. L. Cas. 300, 4 Jur. N. S. 773. Lord Chelmsford, in the course of his opinion, said: "It appears to me that the deceased and Shearer were engaged in one common operation,—that of getting coals from the pit. The miners could not perform their part unless they were lowered to their work, nor could the end of their common labor be attained unless the coal which they got was raised to the pit's mouth; and, of course, at the close of their day's labor the workmen must be lifted out of the mine. Every person who engages in such an employment must have been perfectly aware that all this was incident to it, and that the service was necessarily accompanied with the danger that the person intrusted with the machinery might be occasionally negligent and fail in his duty. The lord advocate put the case of a master undertaking to convey his workmen to their place of work in the morning, and to bring them home in the evening, as being similar to the present one of lowering the workmen to their work, and taking them up when it is over. And he asked whether it could be doubted that if something were deducted out of the workmen's wages for their conveyance to and from their work, the master would be liable? My Lords, in the latter case supposed, it may be

nished by the decisions relating to railway servants who, being engaged in the construction or repair of the permanent way and its appurtenances, or in other duties along the line, were injured while traveling on a train operated by other servants of the defendant. The liability of such employees to recover has been affirmed, both where the accident occurred while they were journeying between two points at which work was to be done,[1] and where it occurred while they were being transported from the place where they resided to the place where they worked.[2] But the operation of the general rule is not

very probable that the master would be liable for damages to the workmen by the negligence of his servants in the course of the journey, because he has for that purpose converted himself into a carrier for hire. And so it may be, if the employer in Gibson's case had entered into an express contract with the miners to bring them into and raise them from the mine, he might have put on the master's relation of master for this duty, and undertaken that of a contractor. But we are here dealing with no such special and precise cases, but with an engagement in a service subject to all the necessary incidents to it, and, as essential to and forming a part of that service, subject to the very act through the negligent performance of which by one of the servants engaged in the common work the death has been occasioned."

[1] An employee engaged at two different gas works operated by a railway company for its own use, and traveling over the line in the ordinary course of his duty from one set of works to the other, without paying fare and receiving a special sum for his extra expenses, travels as a servant, not as a passenger. *Rhodes* v. *London, C. & D. R. Co.* (1871) Q. B. D.) cited in 2 Wood Ry. Law, p. 1212, and in a note to 2 B. 139.

See also the following cases: *Louisville & N. R. Co.* v. *Stetler* (1901) 51 C. C. A. 696, 48 C. C. A. 149, 108 Fed. 621, affirming (1900) 102 Fed. 421 (engineer supervising water supply on a division of a railway was held to be the coservant of the engineer of a detached engine on which, while engaged in his duties, he was traveling in accordance with the terms of a pass which allowed him to do so); *Bonnaffon* v. *Pennsylvania R. Co.* (1900) 197 Pa. 384, 47 Atl. 359 (track layer injured by collision between construction and freight trains); *St. Louis & S. F. R. Co.* v. *Lentz* (1874) 72 Ill. 256 (shoveler on gravel train injured by collision while being conveyed from place of loading to that of unloading); *Beem* v. *Chicago & N. W. R. Co.* (1883) 58 Wis. 525, 17 N. W. 420 (laborer hurt through sudden starting of train which was about to start for the place of unloading); *Copper* v. *Louisville, N. & St. L. R. Co.* (1885) 101 Ind. 305, 2 N. E. 719 (one employed to do work on the permanent way of a railroad, whether for the repair of tunnels, relaying of ties, ballasting the track, or construction of tunnels, held to be a coservant of the servants in charge of a train in which he was conveyed from one part of the line to another); *Knahtla* v. *Oregon Short Line & U. N. R. Co.* (1891) 21 Or. 136, 27 Pac. 91 (section hand under directions of road master, and traveling on conductor's train to make repairs wherever needed, is engaged in furthering the same general object as the conductor); *Knuble* v. *Junction R. Co.* (1877) 33 Ohio St. 150 (laborer on gravel train killed by negligence of engineer); *McFarlane* v. *Glover* (1881) 5 Ont. Rep. 302 (foreman of lumber yard, coservant of laborer who is injured while being conveyed on a car from one part of the yard to another).

[2] *Tracey* v. *Midland R. Co.* (1866) L. R. 1 C. P. 291, 12 Jur. N. S. 691 (plate layer injured while being conveyed, under the terms of his engagement, to the place where he lived, on a work train, the cause of the accident being a collision between that train and another); *Prather* v. *Richmond & D. R. Co.* (1888) 80 Ga. 427, 12 Am. St. Rep. 263, 9 S. E. 530; *Livingston* v. *Bowen Dean Lumber Co.* (1893) 93 Ga. 53, 19 S. E. 21 (track repairer here was employed by a lumber company); *Toledo, W. & W. R. Co.* v. *Durkin* (1875) 76 Ill. 395 (laborer on gravel train while being conveyed to his home was killed by a derailment); *Hand* v. *Terre Haute & I. R. Co.* (1884) 111 Ill. 202, 53 Am. Rep. 616 (head

confined to cases of the above type. The character of the train on which the servant was being transported is immaterial, provided it was being used as a means of conveyance to take him, in the course of the performance of his contract, to or from the place where his duties called him.[6]

blacksmith injured while traveling with wrecking crew); *Madison & I. R. Co.* v. *Bacon* (1855) 6 Ind. 205 (not stated in what capacity plaintiff's decedent was employed); *Ohio & N. R. Co.* v. *Tindall* (1859) 13 Ind. 366 (train derailed by running against an ox between the places of loading and discharging gravel); *Gilman* v. *Eastern R. Corp.* (1865) 10 Allen, 233, 87 Am. Dec. 635 (carpenter employed as car repairer held to be fellow servant of switchman); *Searer* v. *Boston & M. R. Co.* (1860) 14 Gray, 466 (carpenter employed at specified daily wages, with the privilege of being carried gratuitously to and from his place of work, is deemed to be a servant while he is upon the train); *Cassidy* v. *Maine C. R. Co.* (1884) 76 Me. 488 (laborer injured in obeying a negligent order by the conductor of a work train to jump from a moving train on to a station platform); *Sullivan* v. *Toledo, W. & W. R. Co.* (1877) 58 Ind. 26 (a demurrer sustained to a complaint alleging negligence in failing to notify the conductor of the other train of the approach of the gravel train, the court saying that there was nothing in the averments to take the case out of the general rule); *Gillshannon* v. *Stony Brook R. Corp.* (1852) 10 Cush. 228 (derailment through collision with hand car); *Ryan* v. *Cumberland Valley R. Co.* (1854) 23 Pa. 384 (dumping of one of the cars which had been left unhooked threw plaintiff out); *Wright* v. *Northampton & H. R. Co.* (1898) 122 N. C. 852, 29 S. E. 100 (section master injured while riding to his sleeping place); *Gulf, W. T. & P. R. Co.* v. *Ryan* (1888) 69 Tex. 665, 7 S. W. 83 (roadmaster injured); *Dallas* v. *Gulf, C. & S. F. R. Co.* (1881) 61 Tex. 196 (servant who was engaged in the duty of looking after the ties which were being used for the construction of a new track, and at various times had done other construction work, was injured by the derailment of a construction train while he was returning after the execution of an errand); *Galveston, H. & S. A. R. Co.* v. *Crispe* (1891) 81 Tex. 517, 17 S. W. 47 (instructions as to running the train violated); *Rowland* v. *Wilcau-kee, L. S. & W. R. Co.* (1882) 51 Wis. 226, 11 N. W. 529 (derailment caused by conductor's trying to clear away a snow bank by the momentum of the train alone, shoveler on a snow plow train injured); *Way* v. *Ontario & Q. R. Co.* (1885) 10 Ont. Rep. 70 (plaintiff was taking supplies to places where they were needed along the line); *Carney* v. *Caraquet R. Co.* (1890) 29 N. B. 425 (section hand injured by negligence of conductor in going on a bridge known to be unsafe); see also the cases cited in the next subsection.

In *McGill* v. *Southern P. Co.* (1893 Ariz.) 33 Pac. 821, it was held, on the authority of *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, that a conductor of a work train was not a fellow servant of a section foreman conveyed thereon to his place of work. On a rehearing this ruling was reversed (1896; 44 Pac. 302), the court holding that as the conductor did not have any control over the foreman, the principle of the *Ross Case* (§§ 532, *et seq.*, *ante*) had been wrongly applied, and that, as the relative positions of the servants showed that a constant association was contemplated, they were in a common employment.

In *Fitzpatrick* v. *New Albany & S. R. Co.* (1856) 7 Ind. 436, it was held that an agreement by which a laborer was to be regularly conveyed to and from his work involved an implied engagement to carry him as safely and securely as if he really had been a passenger in the ordinary sense of the term. The case relied upon was *Gillenwater* v. *Madison & I. R. Co.* (1854) 5 Ind. 339, 61 Am. Dec. 101. But the essence of this ruling was a difference of departments, not the fact that the servant was a passenger. Of course, where common employment is negatived by a difference of department, the question whether the servant was traveling as such becomes immaterial. These early Indiana decisions are virtually, if not explicitly, overruled by those by the same court cited above, as well as discredited by the great weight of authority.

[6] *Hutchinson* v. *York, N. & B. R. Co.*

The general principle established by the authorities already cited is, of course, equally applicable, whatever the nature of the vehicle may be which is used for the transportation of the railway servant.[7]

c. Rationale of these cases.—The decisions reviewed in the preceding subsection are referable to the conception that the master retains the right to control the servant while he is on the vehicle, and that this right, although ordinarily dormant during the period of transporta-

(1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837, where it was held that the personal representative of a servant killed in a collision while he was traveling on a passenger train in the discharge of his duty could not recover.

See also *Unaville* v. *Cleveland & T. R. Co.* (1860) 11 Ohio St. 417 (passenger train); *Ross* v. *New York C. & H. R. R. Co.* (1875) 5 Hun, 188 (engineer supervising the laying of track, injured by the negligence of the conductor of a passenger train); *Ionmore* v. *New York, N. H. & H. R. Co.* (1899) 24 R. I. 152, 46 L. R. A. 730, 79 Am. St. Rep. 812, 44 Atl. 592 (employee, after his day's work was done, took gratuitous passage on a freight train to a point near his home).

A railway hand ordered to quit work before the usual hour, and to take a train to carry him to a point where he is to be paid, is in the service of the company at the time when he is boarding the train. *O'Brien* v. *Boston & A. R. Co.* (1885) 138 Mass. 387, 52 Am. Rep. 279.

See also *Vick* v. *New York C. & H. R. R. Co.* (1884) 95 N. Y. 267, 47 Am. Rep. 36 (next subsection).

If there is no direct proof in a case of this type, that the contract of hiring provided for the servant's transportation free of charge, an implied stipulation to that effect will usually be inferred. *Ross* v. *New York C. & H. R. R. Co.* (1875) 5 Hun, 188. Affirmed (1878) 74 N. Y. 617 (assistant surveyor killed while traveling from his home to the place of work). See also the comments on this case in *Vick* v. *New York C. & H. R. R. Co.* (1884) 95 N. Y. 267, 47 Am. Rep. 36.

Nor does it make any difference, for the purposes of the defense of common employment, whether the accident was occasioned by the negligence of the servants guiding the train in which the deceased was, or of those guiding the other train, or of both. *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837; *Sullivan* v. *Toledo, W. & W. R. Co.* (1877) 58 Ind. 26. That a road master and the engineer of a train other than that on which the road master is carried are co-servants was conceded in *Holland* v. *Southern P. Co.* (1893) 100 Cal. 240, 34 Pac. 666.

The fact that an employee was received and treated as such by the conductor will not give him the rights of a passenger. *Texas & P. R. Co.* v. *Scott* (1885) 64 Tex. 549 (held that jury should have been charged to this effect, and that the capacity in which the plaintiff traveled should have been submitted to them).

By § 2083 of the Georgia Code, all employees except those who may be able to control the men engaged in the running of trains are placed on the footing of passengers, as to injuries arising from the negligence of the latter class of employees. A track raiser is entitled to the benefit of this provision. *Atlanta & R. Air Line R. Co.* v. *Ayers* (1874) 53 Ga. 12.

[7] Injury to a member of a railroad gang while riding on a hand car, caused by neglect of a fellow servant, does not make the master liable to him, where there is no proof of any contract to carry him safely on such car, further than it can be inferred from the use of the car in going to and from the place of labor. *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

A bridge builder and repairer employed by a railroad company, and furnished with cars in which he and his assistants and tools are transported to places along the line of the road where his services are required, the usual custom being to attach his cars to some regular train, is a fellow servant with the employees in charge of such trains, not only while he is engaged in the work of building or repairing bridges, but also while being so moved in his cars from place to place in the discharge of his

lion, is susceptible of being at any moment called into active exercise.[8] Under such circumstances the servant is regarded as being in

regular duties. *Tomlinson* v. *Chicago, R. & Q. R. Co.* (1899) 38 C. C. A. 148, 97 Fed. 252.

[8] In two of the cases cited it was observed that the servants were transported, not as passengers, but in the course of the performance of their contract. *Tunney* v. *Midland R. Co.* (1866) L. R. 1 C. P. 291, 12 Jur. N. S. 691; *Gillshannon* v. *Stony Brook R. Corp.* (1852) 10 Cush. 228.

In *Manville* v. *Cleveland & T. R. Co.* (1860) 11 Ohio St. 417, the court, accepting the suggestion of counsel that the true test to determine whether the plaintiff was in the employ of the defendant at the time of the injury was the fact of its being his duty and part of his employment to be upon the train at the time the injury was received, held the plaintiff not to be a passenger, where the evidence was to the effect that he was employed by the month to render service generally on a railroad, in the capacity of baggage master or conductor of passenger trains and gravel trains, at such times and places along the road as directed; that he was ordered to go to F. and there take charge of a gravel train at that place on the following day; that he took passage on a passenger train for F., but passed by F. to T., and while returning the next day by the same train towards F., to take charge of the gravel train, was injured by the carelessness of the servants on the passenger train. There was held to be nothing in the record tending to show that even his passing on to T. was inconsistent with the relation the plaintiff sustained as employee. The privilege of necessary visits to his family or home, in the immediate vicinity, when not interfering with his duties to his employers, might or might not have been expressed in the contract; or it might have been implied, or conceded on the part of the company to its employees. And even if the plaintiff had passed on to T. in disobedience of orders and without the knowledge or consent of his employer, the duty was still incumbent on him as an employee to present himself at F. on the day appointed, and to that end take passage on the train in which he was injured.

Still more explicit is the language of the court in *Lick* v. *New York C. & H. R. R. Co.* (1884) 95 N. Y. 267, 47 Am. Rep. 36. In that case, by an arrangement made between the employees of whom the plaintiff's intestate was one, and the defendant company, they were to be taken from Rochester to Buffalo every Monday morning, and brought back every Saturday evening, after finishing the week's work. They traveled in a passenger car called a shop car, in which other persons who paid fares were permitted to ride. No fare was required of the men thus employed and transported, but by agreement a deduction was made from their wages, at an amount fixed per hour, being the same as when at work, for the time they were upon the train, their wages beginning when they reached the shops at Buffalo, and ending when they left them. It was held that no action could be maintained for the death of the plaintiff's intestate, caused by the collision of his own train with another. The court said: "The essence of the contract was that the deceased should work for the defendant as foreman of the tin shop, and in consideration thereof it should pay him a price fixed per hour, and should transport him from his residence to the place where the work was to be done, and back again, upon its railroad, without charge. At the time of the accident the deceased was in the shop car of the defendant, on his way to the place where he was to perform services. As his transportation was a part of the contract, he was there by virtue thereof as an employee. His services had then commenced under the contract; he paid no fare as an ordinary passenger would have done, but was being transported under the provisions of the contract. Under these circumstances the deceased was, at the time of the accident, in the car under the terms of the contract made for the rendition of his services, and not as a passenger. It was essential that he should be in the car at the time and place of the accident to enable him to discharge the duties of service for which he had entered. Further than this he would not have been required at the time, and his traveling on this occasion was in the capacity of an employee, and not as a passenger. If two separate contracts had been intended to have been made, one for the services of the deceased and the other for his transportation, it is fair to assume that the amount allowed for his wages would

the exercise of a mere permissive privilege connected with his contract."

have been increased sufficiently to pay his fare as a passenger. Clearly, such could not have been the intention, as the contract made was a single one, which related only to the services of the deceased and the compensation he was to receive for the same. It was part of this contract of service that he was to be carried to and from the place of his work every week on the defendant's railroad, and on a train which was usually provided for that purpose. The right to go and return being inseparable from the contract to do the work, it is not obvious that any valid ground exists for claiming that the deceased was a passenger and paid his own fare. . . . As to the position that, because his hours of labor had not commenced at the time of the accident, the deceased was to be regarded as a passenger, it is a complete answer to say that his conveyance to and from his work was incident to his employment, and was part of the contract of service under which he was engaged. This remark will also apply to the position of the respondent's counsel that traveling to the shop where work was to be done was not the beginning of service, but an act done to obtain the service. If it was a part of the contract, then obviously it cannot be said that the deceased gave a portion of his wages as the price of transportation, independent of his contract. He was as much under the control of the defendant when traveling as any other employee who was transported by virtue of a contract with the company for his services, which contract provided for the right to go and come upon the defendant's cars to and from the place where he was required to work. Although he had no particular duty to discharge while traveling, yet the traveling of the deceased was not as a passenger, but as an employee under the contract of service between him and the defendant. . . . If the master's negligence is a matter extraneous to his specific employment, or if the injury be received at a time when the servant is not engaged in his duties, then the servant occupies the position or status of a stranger. But this rule has no application when by the terms of the contract, expressed or implied, it appears that traveling on the cars constitutes a part and portion of the contract of service. In such a case, we think, the person injured must be regarded as a servant or employee, and the company, in whose employment he is at the time engaged, is not responsible for the injury."

" In *Gillshannon* v. *Stony Brook R. Corp.* (1852) 10 Cush. 228, it was urged that the plaintiff was not in the employment of the defendants at the time the injury was received, or that he might properly be considered as a passenger, and the defendants, as respects him, were carriers for hire. But the court said: "In no view of the case can this action be maintained. If the plaintiff was, by the contract of service, to be carried by the defendants to the place for his labor, then the injury was received while engaged in the service for which he was employed, and so falls within the ordinary cases of servants sustaining an injury from the negligence of other servants. If it be not properly inferable from the evidence that the contract between the parties actually embraced this transportation to the place of labor, it leaves the case to stand as a permissive privilege granted to the plaintiff, of which he availed himself, to facilitate his labors and service, and is equally connected with it and the relation of master and servant, and therefore furnishes no ground for maintaining this action."

Compare the ruling that, where an employee of a railroad company, after his day's work was done, took gratuitous passage on a freight train from the place of his work to a point near his home, and while riding on said train received injuries resulting in his death, the gratuitous carriage of such employee was a privilege incidental to his contract of service, and accorded to him merely by reason of that contract, and did not make him a passenger. *Iommone* v. *New York, N. H. & H. R. Co.* (1899) 21 R. I. 152, 46 L. R. A. 730, 79 Am. St. Rep. 812, 44 Atl. 592.

The conception of the transportation being a privilege conferred for the purpose of facilitating the work was also adopted in *Wright* v. *Northampton & H. R. Co.* (1898) 122 N. C. 852, 29 S. E. 100.

The theory of a permissive privilege incidental to the contract has received what is, to say the least, an extreme application in *Huggins* v. *Hannibal & St*

A simple and intelligible consideration upon which this theory of the situation may be justified is that, in most instances, the work would be seriously retarded, or even impossible of performance, unless the train was used as a means of transportation. The train becomes, from this standpoint, one of the instrumentalities furnished for the more efficient performance of his duties, and in using it he is carrying out his contract just as clearly as when he is using any other piece of machinery for the same purpose.[19]

R. R. Co. (1863) 36 Mo. 418, where recovery was denied in the case of a servant who had been off duty for some days, who was traveling on a private errand, and who was not immediately engaged in the business of the company. It was held that, when proof was furnished that he had previously been hired as a brakeman, was still on the pay roll, and had not been paid off at the time he was killed, these circumstances became quite immaterial. The court said: "The conductor, knowing him only as an employee, was not bound to inquire into his particular errand; and though informed by a casual conversation with him, in the baggage car, that he was looking for some temporary employment, so as not to lose time, he might still be justified in treating him as an employee who had the privilege of free passage on the trains as such. Under such circumstances, it was his business, if he claimed to be a passenger, to engage or take a seat in a passenger coach as such, or, at least, in some way to make it known to the conductor that he claimed to be traveling in the character of a passenger. . . . On the morning of the accident, he signaled the train to stop and take him up, as it passed where he was; he took his place in the baggage car among other employees; he appears to have treated himself as an employee; and he was received by the conductor as an employee who was passing from one point to another on the road, in the usual manner. He engaged no passage, took no seat in any passenger car, paid no fare, and evidently did not expect to pay any, and none was exacted from him. He did not claim to be a passenger, nor was he considered otherwise than as an employee by the conductor." This case is an especially strong one, as it was in evidence that the deceased, although hired by the month, was not paid for the days on which he did no work. On the whole, it seems to be of very dubious soundness, and certainly cannot be reconciled with the rulings cited in subsec. *c*, *infra*. The *Doyle Case* (1894) 162 Mass. 66, 25 L. R. A. 157, 44 Am. St. Rep. 335, 37 N. E. 770, there mentioned, may, we think, fairly be construed as qualifying the remarks on the *Gillshannon Case* (1852) 10 Cush. 228. The *Higgins Case* is also opposed to the ruling in *Baltimore & O. R. Co.* v. *State* (1870) 33 Md. 542 (8 625, note 2, *infra*), and in fact seems to have no support except such as it may be deemed to derive from *Kansas P. R. Co.* v. *Salmon* (1873) 11 Kan. 83, where, among the reasons why an engineer going back to his work was held not to be a passenger, the following were enumerated: "He bought no ticket, paid no fare, nor offered to buy any ticket or pay any fare. . . . He did not at any time claim to be a passenger, or act as such. He did not go into a passenger car, nor upon a passenger train, . . . but went into a caboose car attached to a freight train . . . where other servants and employees of the company rode, and from which passengers and all other persons except employees of the company, were [to his knowledge] excluded. . . . He was going from his home to the place of his employment, as was his custom for the purpose of performing the duties of his employment, and rode in the caboose car on a freight train, and paid no fare, according to custom, usage, understanding, and agreement of the parties." In that case, however, the ruling was expressly based on the theory that the plaintiff was traveling "for the purpose of performing the duties of his employment," and, however questionable an inference this may be, considering the evidence, the circumstance thus relied on manifestly differentiates the case from the one in Missouri, which lays no stress upon any such factor, and may be regarded as bringing it into the same category as the New York ruling above referred to.

[19] In *Ryan* v. *Cumberland Valley R.*

Apart from these general grounds for inferring that the master's control is not suspended while the servant is being conveyed, the special circumstances of the case may sometimes point to the same conclusion.[11]

d. Assumption of the risk of the negligence of servants not operating trains.—As the availability of the defense of common employment in cases of the type here under review depends simply upon the answer to the question whether there was any break in the continuity of the relationship of master and servant during the journey, it is obvious that an employee cannot recover, under the circumstances supposed, for an injury which was caused by the negligence of any

Co. (1854) 23 Pa. 384, we find the court reasoning thus: "The nature of the case requires the admission that it was the understanding of the parties that the hands were to ride on the gravel train to and from their work, and at their work, and the plaintiff is entitled to use this fact as a part of his case. He cannot, however, use it as presenting the whole of the relation between him and the defendants. He was not a mere passenger on the defendants' cars; because his travel upon them was really an incident of a different relation, that of a servant; and this is the character in which we must regard him here. He was no more a passenger than is the coachman, or wagoner, or carter, who is in the employment of another. He was simply a servant, with the privilege of riding, as part of his business, in the gravel train, which was one of the instruments of his work. He could not and does not sue on a contract as a passenger, for that was not his relation; but he does sue on his true relation, as a servant injured by the carelessness of his fellow servants."

[11] In *Russell* v. *Hudson River R. Co.* (1858) 17 N. Y. 134, Reversing (1855) 5 Duer. 39, where by an arrangement between the plaintiff and the defendants he was to be taken home to the city upon the gravel train at night, it was urged that his day's work was completed when the last load of gravel was deposited; that he was under no further obligation to do anything for the company; that carrying him home was a service to be performed by the company, in consideration of the labor previously done, and constituted a part of his wages; and that it was entirely optional with him to avail himself of this service or not. This contention did not prevail, the court saying: "It is not, I think, entirely clear, that the defendants would not have had a right, under their agreement with the plaintiff, to insist upon his returning to the city at night. The gravel train could not be properly managed by the engineer alone. Men were required to act as brakemen in case of accident. It appears that some of the same men who worked in the gravel pit also manned the brakes. A portion of the hands employed lived in the city, and the defendants may have relied upon them to work the brakes, in case of necessity, upon the return of the train, and may have taken this into consideration in agreeing to bring them home at night. But, conceding that the plaintiff was not bound to return even if the defendants insisted upon it, it does not follow that while actually returning to the city with the train he was not the servant of the company. If he was a mere passenger he was not bound to do anything to facilitate the return of the train. If an emergency arose requiring the use of the brakes, he might refuse to raise his hand. If an obstruction was met with upon the track, he might fold his arms until the company removed it; and what he might do in this respect, every other hand returning to the city under similar circumstances might also do. Such could not, I think, have been the true relation between the parties. The plaintiff was employed by the defendants as a day laborer. His was to be taken up at the city where he lived, in the morning, and set down there at night; and he should, I think, be regarded as having been, during the entire interval, the servant of the company, and bound as such to render aid, if necessary, in promoting the passage of the train both to and from the city. This is decisive of the case."

fellow employee, not a trainhand, for whose defaults the master would not have been responsible if the injured person had, at the time of the accident, been actively engaged in the performance of his duties.[12]

c. When servants traveling on their employers' vehicles are deemed to be passengers.—Both on principle and authority, it is clear that the defense of common employment is not available to the master where the injured person was traveling entirely for his own purposes, and the right of the master to exact the performance of services was not merely dormant, but wholly suspended.[31]

[12] In *Moss* v. *Johnson* (1859) 22 Ill. 633, it was held that no ground of action was shown by a complaint alleging that a carpenter, while being conveyed to his work on a construction train, was injured owing to the misjoinder of two rails. It should be observed, however, with regard to the facts in this case, that none of the qualifications of the doctrine of coservice arising out of the theory of nonassignable duties are noticed, or were, so far as can be seen, present to the mind of the court; and the ruling in the form in which it was made can scarcely be correct in view of the later decisions, and is certainly not in harmony with the present doctrine in Illinois itself. But, setting aside this point, the case is manifestly one which takes for granted the rule stated in the text.

[13] In *State use of Abell* v. *Western Maryland R. Co.* (1881) 63 Md. 433, a brakeman hired from day to day, and not paid for Sunday unless he actually worked, who was killed on Sunday, by the negligence of the trainmen, while traveling on a conductor's pass to visit his family, with the permission of the company, was held entitled to recover. He was declared not to be discharging any part of his contract, having been expressly released from the contract of service for the time being.

In *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784, an engineer absent from duty without leave, and traveling on another train with the permission of the conductor, was allowed to recover. See, however, *Higgins* v. *Hannibal & St. J. R. Co.* (1865) 36 Mo. 418, note 9, *supra*.

A railroad employee having a monthly ticket given him, which is good for more rides than are necessary in attending to his work, with the express privilege of using them for his own private interest or pleasure, is not, when passing over the road entirely for his own business or pleasure, "in the employment" of the company, within Mass. Pub. Stat. chap. 112, § 212, creating a liability for injury to a passenger. *Doyle* v. *Fitchburg R. Co.* (1891) 162 Mass. 66, 25 L. R. A. 157, 44 Am. St. Rep. 335, 37 N. E. 770 (collision occurred through the negligence of the engineer). The court pointed out that such a ticket is not mere gratuity, but furnishes part of the consideration by which he was induced to enter the company's service, and said: "A person may at one time be an employee when passing over a railroad, and at another time, in passing over the same road, be a passenger, though continuing all the while, in a popular sense, to be in the employment of the railroad company." "The defendant was not transporting him to or from the place of his daily labor pursuant to the arrangement which existed between them. It had no control or authority over him. He was not traveling on any service for it. His time was his own, and the defendant was not paying him for it, and he could use it as he saw fit, and he was passing over the road entirely for his own business or pleasure. So long as he was working from day to day for the defendant it might be said, in a popular sense, that he was in its employment. But we do not think that is the sense in which the words are used in the statute." On the second appeal, the court reiterated its opinions that the ticket was not a gratuity. It was conceded by counsel that the plaintiff was a passenger. (1896) 166 Mass. 492, 33 L. R. A. 844, 55 Am. St. Rep. 417, 44 N. E. 611. This decision was lately followed in *Dickson* v. *West End Street R. Co.* (1901) 177 Mass. 365, 52 L. R. A. 326, 59 N. E. 60, where an action was held

There is one Pennsylvania decision holding that a mechanic employed by a railway company to work upon the road at a distance from his home, who is, by agreement, carried to and fro in the trains of his employers without paying any fare, the understanding being that this transportation is a part of his wages, may recover if he suffers injury, while on the road, from the negligence of a fellow servant. The differentiating factors relied on by the court were that the deduction from his wages made him a paying passenger; that his duties had been completed before he boarded the train; and that he was not carried merely for the convenience of his employers and

to be maintainable by a motorman who, while going home to his dinner, was injured by the negligence of the motorman of the car on which he was traveling; such use of the car being permissible under a rule of the defendant company, which provided that employees might ride on the cars at any time free of charge. Discussing the position of the plaintiff, the court said: "At the time of the accident he did not stand in the relation of a servant to the defendant. His time was his own, and he owed the defendant no duties until the time arrived for resuming his work. It was no part of his duty to the defendant, as a servant, to take the car on which he was riding, and go to a particular place for his dinner. He might go where he pleased and when he pleased, during the interval before coming back to his work. This case is different in this particular from cases in which the plaintiff was riding in the line of his duty in the course of his employment. . . . His rights were the same as if, after finishing his day's service, he had taken a car in the evening to visit a friend, or to do any business of his own. The fact that he had been in the defendant's service during the day would not make him a fellow servant with the motorman while riding in the evening under the rule, any more than if he had been a policeman or a newsdealer."

It has been held that a railroad employee working upon a bridge is a passenger while riding on a railroad train to his home after his day's work is done, where his contract entitles him to free transportation, and he is not under any obligation to ride, or engaged in any service for the company while so riding. *McNulty* v. *Pennsylvania R. Co.* (1897) 182 Pa. 479, 38 L. R. A. 376, 61 Am. St Rep. 721, 38 Atl. 521.

Where a night watchman and ticket taker was being carried, according to custom, to his regular place of work without payment of fare, it was held that, as he was not on the train in the line of his duty, he was a passenger, and that, on proof of injuries received while he was being so carried, negligence would be inferred from the collision which occasioned them. *Chattanooga Rapid Transit Co.* v. *Lemmle* (1900) 105 Tenn. 460, 51 L. R. A. 886, 58 S. W. 861.

In Washington it has been decided, after an elaborate review of the authorities, that a man employed to lay track for a street car company, with transportation to and from work as part consideration, and who has no duties to perform in connection with the operation of the car on which he rides, and whose contract does not require him to ride on any particular car or on any car, is not a fellow servant of the employees operating the car at the time of an injury received by him while so riding. *Peterson* v. *Seattle Traction Co.* (1900) 23 Wash. 615, 53 L. R. A. 586, 63 Pac. 539 (1901) 23 Wash. 613, 53 L. R. A. 596, 65 Pac. 513. The rationale of this ruling was that such an employee ceases to be in the employ of the company after his day's work is concluded, and that he is neither under the control of the company's agents nor required to perform any services. On rehearing (1901) 23 Wash. 613, 53 L. R. A. 596, 65 Pac. 513, the court modified this judgment to the extent of holding that, as defendant alleged that plaintiff was not a passenger, but was riding on a free pass ticket, which contained a condition that plaintiff should assume all risk while using it, and also denied that the ticket was furnished plaintiff as a part of his compensation, the exclusion of testimony that the ticket contained such a condition and that plaintiff signed it was er-

without any contract of carriage.[14] This ruling embodies, as the present writer ventures to think, a doctrine which is more in harmony with the common-law conception of the effects of the existence or absence of a specific consideration for the transportation than a New York case in which substantially the same facts were presented, and in which the Pennsylvania doctrine was expressly disapproved.[15] The hypothesis that a servant who submits to a reduction of his wages in consideration of being carried acquires no additional rights, as compared with a servant whose right to be carried cannot be put higher than a mere "permissive privilege" (see subsec. *b*, *supra*), seems to be quite anomalous. Whether in any particular instance a special bargain has been made which exempts the servant from the operation of the doctrine of common employment must be determined with reference to the terms of the contract.[16]

The doctrine which declares that a railway company owes a higher degree of care to its passengers than to its employees inures to the benefit of a servant who is traveling on a train without any reference to the performance of his contract.[17]

Whether a servant who is shown by the evidence not to have been

roneous. It was laid down that, if a servant's transportation constitutes a portion of the consideration for his services, he becomes a passenger for hire, just the same as anybody else who parts with anything of value for transportation; while, if the consideration for his services is independent of his transportation, and his transportation is a mere gratuity bestowed upon him by his employer, he stands like anyone else traveling on a free pass so conditioned, notwithstanding his employer would not probably have bestowed the transportation if the recipient had not been in his employ.

In a case where deceased was a section foreman, but was injured after working hours while on a crossing, it was declared that the company's duty towards him was the same as towards a stranger, and that for this reason it could not avail itself of the rule that an employer is not liable for an injury received by an employee through the misconduct of a fellow servant. *Sullivan* v. *New York, N. H. & H. R. Co.* (1900) 73 Conn. 203, 47 Atl. 131 (no warning signal given when a train was approaching).

[14] *O'Donnell* v. *Allegheny Valley R. Co.* (1868) 59 Pa. 239, 98 Am. Dec. 336.

[15] *Vick* v. *New York C. & H. R. R. Co.* (1884) 95 N. Y. 267, 47 Am. Rep. 36 (see note 8, *supra*).

[16] A statement of claim showing that the plaintiff was injured while engaged in traveling on a train to take supplies to certain places is none the less insufficient because it avers that he was received on the train "to be safely carried on it." This does not necessarily mean that the company had made a special bargain with him which would give him the rights of an ordinary passenger. *Ray* v. *Ontario & Q. R. Co.* (1885) 10 Ont. Rep. 70 (servant's action held to be barred by the defense of common employment).

[17] A station agent riding to his home on a passenger train of his employer, by permission of the conductor, five hours after his labors of the day had ceased, was a passenger, and did not take the risks attending the operation of the train with the coach, instead of the engine, in front. *Louisville & N. R. Co.* v. *Scott* (1900) 22 Ky. L. Rep. 30, 56 L. R. A. 381, 56 S. W. 674. The court remarked that "his services were distinct from that of operating the train," and rejected the doctrine contended for that "where an employee in another department of the service is permitted to ride on the train of his employer from his home to the place of his employment, or

in the course of his employment when the injury was received, but who was traveling on an employee's pass which declared him to have waived his right of action for the negligence of the company's agents, is entitled to recover, will depend upon the doctrine held by the court as to the binding character of such stipulations.[18]

For other cases bearing upon the duty owed by employers to servants traveling as passengers, see § 626, notes 4, 5, *infra*.

f. Master's obligations inure to benefit of servant traveling in course of his employment.— In a few cases the doctrine that the obligations of a master to servants traveling in the line of their duty on vehicles owned by him are not different either in kind or degree from the obligations to which he is subject with regard to servants who are actively engaged in work has been asserted for the servant's advantage.[19] But in the great majority of instances, that doctrine is relied upon for the purpose of establishing the nonliability of the defendant, either on the ground that he was entitled to avail himself of the defense of a contractual assumption of the risks, or on the ground that he was not required to exercise for the protection of the injured person that high degree of care which a carrier is bound to exercise in conveying passengers. See the preceding subsections, and (as to the latter point) § 17, *ante*.

625. Servants in various other situations.—Some of the cases under

on his return from his employment to his home, the status of passenger does not exist, but he is regarded as being an employee, taking such risks as employees in charge of the train would take."

[18] See, generally, Shearm. & Redf. Neg. § 505.

In a recent case decided by one of the Federal courts of appeals the plaintiff, being in the employment of defendant, a railroad company, changed to a different employment, still with defendant, and, in connection with the change, stipulated for free transportation to Boston from the city where he was to be employed, not in connection with his work, but for his own convenience. On one of these trips, made for his own purposes, and while not at work or going to or from his work, he was injured by the derailing of the car in which he was riding. It was held that he was in the position of a passenger at the time when he was injured, having given for his passage a valuable consideration, and that, under the circumstances, public policy did not permit the enforcement of the stipulations indorsed on the pass, although he freely assented to them. *Whitney* v. *New York, N. H. & H. R. Co.* (1900) 50 L. R. A. 615, 43 C. C. A. 19, 102 Fed. 850.

See also *Peterson* v. *Seattle Traction Co.* (1900) 23 Wash. 615, 53 L. R. A. 586, 63 Pac. 539, on rehearing (1901) 23 Wash. 613, 53 L. R. A. 596, 65 Pac. 543, the effect of which is stated in note 13, *supra*.

[19] That the duty of the defendant company to furnish a reasonably safe plant inured to the benefit of a laborer who was injured while traveling on a street car from the place where his work was done to his home was taken for granted in *Pendergast* v. *Union R. Co.* (1896) 10 App. Div. 207, 41 N. Y. Supp. 927.

The mere fact that a railroad employee, under a mistake for which he is not responsible, leaves his place of work before the arrival of the last train of cars which it is his duty to unload, does not relieve the company from responsibility for his death while returning at the request of the conductor of a train which he is to unload, on the ground that he is not in the employ of the company. *Rombough* v. *Balch* (1900) 27 Ont. App. Rep. 32.

this head have turned upon the question whether the defendant was or was not subject to the obligations of a master with regard to the injured person. The cases do not, like those cited in the preceding section, embody any secondary principles which are of general application, but represent simply the conclusion of the courts that, under the evidence introduced, the relation of master and servant did or did not exist at the time when the injury was received.[1]

[1] (a) *Liability affirmed.* — Although asleep upon a side track, in a car provided for that purpose, the foreman of a bridge gang, who is liable to be called at any moment to go out with his gang upon the road, is on duty so far as to be at the time a fellow servant with the men operating a freight train, whose negligence causes his injury. *St. Louis, A. & T. R. Co.* v. *Welch* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529.

A railroad employee working by the day in a bridge gang, and living in a car provided by the company, may recover for an injury which he sustained in a collision after his day's work was performed, and while he was in his car engaged with his own affairs, as in such case his employment does not terminate with his day's labor. *International & G. N. R. Co.* v. *Ryon* (1891) 82 Tex. 505, 18 S. W. 219, following the last cited case.

An employee upon a railroad construction train is not out of the line of his duty simply because he chooses to remain upon the car during the noon hour. *Evansville & R. R. Co.* v. *Maddux* (1893) 134 Ind. 571, 33 N. E. 345, Rehearing Denied in (1893) 134 Ind. 585, 34 N. E. 511 (demurrer properly sustained to an answer relying on the fact that the accident happened at that time).

Where a workman in a grain elevator stayed on the premises during the time allowed him for his dinner, and within that time was injured while executing an order to assist in opening a ventilator which was defective, it was held that his employer was liable. *Broderick* v. *Detroit Union R. Station & Depot Co.* (1885) 56 Mich. 261, 56 Am. Rep. 382, 22 N. W. 802. The court said: "It does not follow that, because plaintiff was given an intermission from work of an hour and a half for dinner, he ceased during that time to be the servant of defendant. If during that time he had in his care or custody any of his master's property requiring his attention and oversight, or if called upon to perform work by the master or by one having authority to command his service, the relation would still exist, arising in the one case from the duty to properly care for the property of the master, and in the other from the duty to perform the service."

The relation of master and servant between a railroad company and one of its section hands continues during a period of thirty minutes allowed to such employee in which to eat his dinner, where, under the circumstances attending the employment, that time is too short to allow him to leave the premises for that purpose. The eating of the meal is regarded as an incident of the service. *Cleveland, C. C. & St. L. R. Co.* v. *Martin* (1895) 13 Ind. App. 485, 41 N. E. 1051 (boiler exploded).

(The two last mentioned cases are referred to under another aspect in § 626, note 3, *post*.)

A boy who is sent by his master to warm himself at a stove does not cease to be in his service, and is as much entitled, under these circumstances, to hold the master liable for any injury which may result from his not having been instructed in regard to the dangers incident to the position as if he had been actually at work in the neighborhood of the stove. *Wallace* v. *Standard Oil Co.* (1895) 66 Fed. 260 (where the boy's clothes were saturated with inflammable oils and caught fire).

An employee who, while engaged outside a sugar factory, very early on a cold morning, receives permission to go inside to warm himself, and falls into a cistern of boiling water when attempting to enter one of the doors, is not, as a matter of law, out of the line of his employment. *Parkinson Sugar Co.* v. *Riley* (1893) 50 Kan. 401, 34 Am. St. Rep. 123, 31 Pac. 1090.

In *Powers* v. *Calcasieu Sugar Co.* (1896) 48 La. Ann. 483, 19 So. 455, recovery was allowed on the grounds explained in the following extract from the opinion: "We have given attention to the insistence that when the accident

occurred there was no contract relation between plaintiff and defendant. He was being shown the work to be done; hence it is argued he was entitled to no protection against the danger he encountered. He was in charge of defendant's manager at the time, to be shown the work he was to perform. It seems to us he was within the shelter of the responsibility of the master or proprietor to those lawfully on his premises in his service. If not actually in that service, the plaintiff, at the time of the accident was, on the invitation of the master, being conducted to that portion of the premises where it was proposed to employ him. The case is, we think, with the plaintiff on the issue of responsibility."

A master is not relieved from liability for injuries to a servant in the course of his employment, by the fact that he had directed such servant to quit work at a time before the accident happened. *McElhagott* v. *Randolph* (1891) 61 Conn. 157, 29 Am. St. Rep. 181, 22 Atl. 1094.

In a case where the plaintiff was injured by unfenced machinery, it was held that, although he had finished his day's work, and was changing his clothes, at the time of the accident, preparatory to going home, the relation of master and servant still existed between them. *Holmes* v. *Tholoway* (1900) 107 Wis. 246, 83 N. W. 351.

A servant whose duties are not so exacting as to prevent his leaving the premises occasionally without detriment to the employer, and who is permitted to absent himself in this manner, is deemed to be in the employment as long as he is actually on the premises, and is entitled to recover for any injury which he may there receive, although at the time of the accident he may have started on a journey to a neighboring town to attend to some private business of his own. *Peters* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 18 Am. St. Rep. 441, 44 N. W. 270 (run over by cars while crossing a track).

The responsibility of a mine owner for the safety of his workmen continues as long as they are in the mine. He is bound to bring them up safely, even though they may have quitted their work while down below; and their right of recovery is not affected by the fact that the jury have found that they had no lawful excuse or proper cause for abandoning the employment. *Bowden* v. *Stewart* (Sess. 2 Macq. H. L. Cas. 30).

(b) *Incidental acts.*—A direction by a section foreman to a section hand to notice the track closely any time he is going over the road, going or coming to or home, and to let him know if anything is wrong, is not an order to go on the track for such a purpose after the end of his day's work at laying rails, on his way home, so as to render the company liable for his death, which occurs at such time. *Baker* v. *Chicago, R. I. & P. R. Co.* (1895) 95 Iowa, 103, 63 N. W. 607 (struck by train).

A servant not working overtime, injured while alighting from his master's wagon by reason of a defect therein, where he has been driven for his own accommodation after hours by a fellow servant, to a point near his house has no claim against his master. *Wood* v. *Weber* (1891) 11 Ill. App. 336 (instruction based on theory that duty as of a master to a servant was owed to plaintiff held erroneous).

A track repairer engaged in repairing the tracks in a freight yard is not entitled to special protection which he might not be entitled to when engaged in other business about the yard, on the ground that his work is not completed until he returns his tools to the tool house, but he is entitled, in going to the tool house from the place where he has been repairing a track, only to the same protection and care on the part of the railroad company as he is entitled to when moving about the yard performing his ordinary daily business. Such an employee, therefore, assumes all the risks created by the frequent passage of trains. *Crowe* v. *New York C. & H. R. R. Co.* (1893) 70 Hun, 37, 23 N. Y. Supp. 1109.

Where, under the rules of the company, servants have no right to claim compensation when disabled by sickness or any other cause, and any allowance they make to them in such case is to be regarded "as a gratuity only," a conductor who, after having had his leg badly crushed in a collision, has been taken to a hotel and placed in charge of a physician, occupies the position of a stranger, not of an employee, and the company is not liable for the defaults of the physician who attends upon him during a subsequent journey which he makes along the line. *Baltimore & O. R. Co.* v. *State* (1874) 41 Md. 268.

In other cases the legal consequence of the conclusion drawn as to the existence or nonexistence of the relation was that the defense of common employment was or was not available to the master.[2]

[2](a) *Defense not available.*—A trackman who, after completing his day's work and laying aside his tools, walks to his place of residence along a section of track other than that which is under his own supervision, is not, during that walk, in the service of the company, and may recover if he is run down by a train through the negligence of the men operating it. *Baltimore & O. R. Co.* v. *State* (1870) 33 Md. 542.

A laborer in the carpenter shop of a railway company, while he is walking to or from his work over its tracks, is in its employment in such a sense as to be unable to recover damages for an injury caused by the negligent operation of an engine, except in states where the engineer is deemed to be in a different branch of the service. See *Ryan* v. *Chicago & N. W. R. Co.* (1871) 60 Ill. 171, 14 Am. Rep. 32.

Recovery may be had where the injured person had finished his day's work, and when he was injured by the negligent act of a coemployee was walking along a public street in the immediate vicinity of his master's premises. *Baird* v. *Pettit* (1872) 70 Pa. 477 (where a draftsman in a locomotive factory, who, after the day's work was over, left the building in the dark, and fell over a pile of dirt thrown on the public footwalk by a carpenter in his employer's service, was held to be in the position of a stranger so far as regarded his right of action.

In *Savannah, F. & W. R. Co.* v. *Flannagan* (1889) 82 Ga. 579, 14 Am. St. Rep. 183, 9 S. E. 471, a railway servant who, while walking home along a public thoroughfare close to the track, stepped on to it for a moment to avoid a wagon, and was struck by a train, was held to be in the position of a stranger as regards his rights of action. But the doctrine of common employment was not actually involved here, that defense having been abolished in Georgia as to railway servants. See chapter XXXIX., *post.*

In *Northwestern Union Packet Co.* v. *McCue* (1873) 17 Wall. 508, 21 L. ed. 705, a man standing on a wharf was hired by the mate of a steamer which it was desired to get under way as soon as possible, and which was short of hands, to assist in loading some goods which were near the wharf. He had not been in the service of the boat generally, though he had been occasionally employed in this sort of work. He assisted in loading the goods,—an employment which continued about two hours and a half. He was then told to go to "the office," which was on the boat, and get paid. He did so, and then set off to go ashore. While crossing the gang plank in going ashore, the boat hands pulled the plank recklessly in and from under his feet, and he was thrown against the dock, injured, and died from the injuries. In an action by his administratrix for the injuries done to him, the declaration alleging that he had been paid and discharged, and that after this, and when he was no longer in any way a servant of the owners of the boat, he was injured, the defense set up was that he had remained in the service of the boat till he got completely ashore, and that injuries having been done to him by his fellow servants, the owners of the boat (the common master of all the servants) were not liable. It was held not erroneous to leave it to the jury to say whether the relation of master and servant had or had not ceased at the time of the accident. Disenssing the contention that it was the province of the court, and not the jury, to determine the point of time at which the service was ended, the court said: "One of the theories on which the suit was prosecuted was that McCue's special employment had ceased when he was injured. This theory was resisted by the defense, and the court, not taking upon itself to determine as an absolute proposition when the employment terminated, left it to the jury to find how the fact was. This ruling, in our opinion, was correct. It was for the jury to say, from the nature of the employment, the manner of engaging the hands, the usual mode of transacting such a business, and the other circumstances of the case, whether the service had or had not ceased at the time of the accident. The point was submitted fairly to the jury, with no more comments than the evidence justified. It was argued by the plaintiff in error that the employment of necessity terminated on the land, because it was there McCue was engaged to do the work, and he had the right to be provided with the proper means of

625a. Temporary intermission of relation of master and servant never produced by the servant's neglect of his duties.—As a servant cannot take advantage of his own wrong, he cannot recover on the theory

reaching it from the boat. On the contrary, the defendant in error contended the special service ceased when McCue had finished his work and was paid off; that after this he was not subject to the control or direction of the officers of the boat, but at liberty to stay on the boat or go off as he pleased. The jury took this latter view of the relation of the parties, and we cannot say that they did not decide correctly. At any rate, their decision on a question of fact is not subject to review in this court. The defense at the best was a narrow one, and in our opinion more technical than just."

A person on the list of "spare men" who reports every morning at his employer's office, and is then at liberty to leave at once if there is no opening for him, is not a coservant of the regular employees during the time he remains on the premises on the chance of being set to work. *Conlon* v. *Glasgow* (1899) 1 Sc. Sess. Cas. 5th series, 869.

A man employed as a laborer by the day in a section gang is not in the employment of the company on any days except those on which he is actually at work. *Cincinnati, N. O. & T. P. R. Co.* v. *Conley* (1892) 14 Ky. L. Rep. 568, 20 S. W. 816 (run over by cars running on down grade without a light).

(b) *Defense available.*—Several cases proceed upon the theory that a railway servant, while he is walking along or across the tracks of his employers to reach or return from his place of work, is in the service of the company in such a sense as to be unable to recover for injuries received through the negligence of any fellow servants who would be held to be in common employment with him if he were actively engaged in his duties. This doctrine is put upon grounds quite analogous to those which are adduced to support the similar doctrine which has been discussed in the preceding section. The privilege of passage over the master's premises is said to be "an essential part and ingredient of the plaintiff's contract of employment, and incidental to it, as much as any means and facilities for his labor," furnished at the place of work itself. *Ewald* v. *Chicago & N. W. R. Co.* (1888) 70 Wis. 420, 5 Am. St. Rep. 178, 36 N. W. 12. There an engine wiper who was on his way to his work, and while crossing the track on a path used by the employees of the company, was jammed between cars which had been left apart for the employees to pass between, was held to be, at the time of the injury, in the employ of defendant and a fellow servant of the trainmen in charge of the cars. The court said: "As to what may be the law when an employee of a railroad company is not actually employed, or at any intervals of actual labor, or going to or from his labor his own way and independently of the company, or under other circumstances, is immaterial to this case. The authorities may be in great conflict on that question; but we are not aware that they are in conflict on the question presented by the facts of this case. Here we have a private pathway over the grounds of the company, granted and allowed to the plaintiff and other employees of the company, who worked in the roundhouse, by usage, custom, and consent, for their ingress and egress to and from their work, kept open across the track of the road, and which had been worn and used by himself and others for long time prior to the injury; and that in order to reach the roundhouse it was necessary for him to go upon said pathway, and to cross the track of the company at that place. It was the means, and only means, of entrance and exit to and from their work, furnished by the company, and the plaintiff and others had a right to its free and uninterrupted use, as they always had; and it was because they were employees of the company in the roundhouse that the had such right and privilege. . . . Our present concern is, Was he, when injured, an employee of the company? The peculiar facts of this case which make him such appear to involve precisely the same principle as that class of cases where the plaintiff was being carried on his way from and to his place of labor by the railroad company, by consent, custom, or contract, and was injured by the negligence of other employees of the company."

In *Boldt* v. *New York C. R. Co.* (1858) 18 N. Y. 432 (trackman injured by trainmen), the court said: "He was in the defendant's employment and doing that which was essential to en-

that by reason of the fact that he was neglecting [illegible] duties, and was therefore not in the line of his employment at the [illegible] moment of the accident, he was not subject to the operation of the doctrine of common employment.[1]

B. Liability as dependent upon the question whether the act from which the injury resulted was or was not authorized.

626. Presence of servant at the place where the accident occurred.— *a. Circumstances under which recovery has been allowed.*— If at the time of the accident the injured servant was actively engaged in the performance of the functions assigned to him, the mere fact that he had no connection with the defective instrumentality which caused the insecurity of the place of work will, of course, not prevent him from maintaining an action.[1] Numerous cases in which this principle is taken for

abling him to discharge his particular duty, *viz.*, going to the spot where it was to be performed; and he was, moreover, going on the track where, except as the servant of the company, he had no right to be. He was there as the employee of the company, and because he was such an employee."

In *Olson* v. *Andrews* (1897) 168 Mass. 261, 47 N. E. 90, a servant using a bridge under repair, for the purpose of getting back to his work from his boarding house, was held to be a fellow servant with the engineer in charge of a derrick car used in the work of repairing.

A day laborer assumed the risks of the negligence of a fellow servant, although when called upon to do the work in which he was injured he had completed his day's stint, where there was no agreement excusing him from continuing work during the entire number of hours called for in his contract. *Kehoe* v. *Allen* (1892) 92 Mich. 464, 31 Am. St. Rep. 608, 52 N. W. 740.

The fact that a servant was working overtime will not exempt him from the operation of the doctrine of coservice, provided he was in the line of his employment. *Ibid.*

A servant cannot recover in a case where, although his duty did not call him to his master's premises at the time, he had been in the habit of going occasionally to see what he would have to do in the course of the ensuing night, and the evidence was that he was injured by the fellow servant's negligence while proceeding to the office in connection with a summons from the manager. *Lovell* v. *Howell* (1876) L. R. 1 C. P. Div. 161, 45 L. J. C. P. N. S. 387, 34 L. T. N. S. 183, 24 Week. Rep. 672.

[1] In *Evans* v. *Atlantic & P. R. Co.* (1876) 62 Mo. 49, it was contended that the plaintiff, who, as station agent, was especially entrusted with the duty of attending to freight trains, and of seeing that they were loaded and unloaded and properly secured on the side track or switches, was entitled, at the time when he was run over by a locomotive, to be regarded as a member of the general public, and to recover on the ground that the bell had not been rung, as required by statute. The court declared this proposition to be too monstrous a proposition to be conceded, and that the evidence showed that he was not merely the fellow servants of the train hands, but had entire control over them.

The general principle that one person cannot by his own wrongful act acquire a right of action against another is recognized, in another connection, in Baron Bramwell's argument in the *Dry Case* (1857) 1 Hurlst. & N. 773, 26 L. J. Exch. N. S. 171, 3 Jur. N. S. 595, as quoted in § 631, note 5, *infra*.

[1] *Egan* v. *Dry Dock, E. B. & B. R. Co.*

granted are cited in the first volume of this treatise. But it is not necessary to show, as a condition precedent to recovery, that he was on duty when the injury was received. In so far as his rights are dependent upon the position which he was occupying at the time of the event complained of, a good cause of action is made out as soon as it is proved that, although he may not have been actively engaged in the performance of any duty, the position in question was one which he was authorized to occupy.[2] This rule inures to the servant's

(1896) 12 App. Div. 556, 42 N. Y. Supp. 188 (boiler exploded and injured a man whose duty it was to hitch up and unhitch teams). The court said: "The boiler was neither an appliance furnished by the defendant for the plaintiff to use in his work, nor was it a tool in which he had any interest whatever. As to him, the obligation the law imposed upon the defendant with regard to this boiler arose out of its duty to furnish him a safe place in which to do his work. His employment kept him in the building in which the boiler was situated, and, while it did not call upon him to work at the boiler or do any work which was connected with it, he was still required to be so near the place where the boiler was that, if the boiler was not safe to use, it necessarily was dangerous for him to be in the place where his duty called him to be. As the defendant saw fit to keep the boiler so near the stables that an explosion caused by a defect in it was liable to injure the plaintiff, as well as any other person whose duty called him to be within the limits liable to be affected by such an explosion, it was clearly within the place where the plaintiff was called upon to work, and its presence there imposed upon the defendant the duty of taking care that it was in reasonably safe condition."

To a detective who, with the permission of the proper officials, is conveyed over the road on a hand car, the company owes the obligation of using reasonable care that the car is in a condition fit for the purposes of carriage, and also of seeing to it that the car is used with due care by those intrusted with its management. This obligation is owed, whether the relation between the company and the detective is that of master and servant, or carrier and passenger. *Pool* v. *Chicago, M. & St. P. R. Co.* (1881) 53 Wis. 657, 11 N. W. 15.

A verdict for the defendant should not be directed in any case where there is evidence which fairly tends to show that a servant was traveling as a passenger on a railway car, under a license given by an agent of the company who had sufficient authority in the premises. *Bryant* v. *Chicago, St. P. M. & O. R. Co.* (1895) 4 C. C. A. 146, 12 U. S. App. 115, 53 Fed. 997, Reversing *Davis* v. *Chicago, St. P. M. & O. R. Co.* (1891) 45 Fed. 543. (Bryant was the administrator of Davis, who died while the appeal was pending.) See further, as to this case, this note, subsec. *b, infra*.

Where a conductor allows a servant to remain on a freight train which is allowed to carry passengers, after discovering that he is on the train, he becomes entitled to the rights of a passenger, although he may, in the first instance, have boarded the train without leave. *Sherman* v. *Hannibal & St. J. R. Co.* (1880) 72 Mo. 62, 37 Am. Rep. 423, citing *Wilton* v. *Middlesex R. Co.* (1871) 107 Mass. 108, 9 Am. Rep. 11.

A railroad company is liable for the death of an employee killed while crossing a trestle which he was tacitly licensed to cross, where those in charge of the engine failed to look out for his presence and guard against colliding with him,—especially where they failed to use reasonable care after discovering his presence, or were hindered from seeing him by steam from a defective steam chest upon the engine. *Hammill* v. *Louisville & N. R. Co.* (1892) 93 Ky. 343, 20 S. W. 263.

A servant who ordinarily has supervision of cars only when they are on the side track, but who, with the knowledge of the conductor and the station agent, goes on the main track to finish sealing a car on the conductor's demand of the station agent, is not a trespasser. *De Walt* v. *Houston, E. & W. T. R. Co.* (1900) 22 Tex. Civ. App. 403, 55 S. W. 534.

Where a section hand employed by a railroad company in handling wood

advantage where the matters upon which he was engaged were not immediately connected with the actual performance of the work un

boarded a train about noon to go some distance down the track to dinner which was the usual mode of going to dinner, adopted at the instance and request of the foreman in charge, in order to get back to their work in proper time, he was not in the position of a trespasser, and the company was bound to use ordinary care for his safety. *Boss* v. *Northern P. R. Co.* (1888) 5 Dak. 308, 40 N. W. 590 (struck by switch stand too close to track; error to direct verdict for defendant).

In a jurisdiction where the doctrine of common employment has been abrogated by statute, so far as regards persons engaged in the operation of railways, it has been held that a good cause of action is shown by a complaint which alleges substantially that a member of a bridge gang was injured by the negligent operation of the two hand cars by which, in accordance with an agreement, he and his fellow workmen were being transported from a certain station to the place of their day's labor. *Wallin* v. *Eastern R. Co.* (1901) 83 Minn. 149, 54 L. R. A. 481, 86 N. W. 76.

A requested instruction in an action by a conductor against a railroad company for personal injuries, that if the plaintiff's position on the locomotive contributed to his injury, and he had no business engagements thereon connected with his duty as conductor, the jury shall find for defendant, is properly refused, where the train consisted of the engine and one flat car only, and the plaintiff testified that he was in the cab, which was his usual place when attending to the discharge of his duties with such train, and there is no evidence tending to prove that that was not his proper place. *Geary* v. *Kansas City, O. & S. R. Co.* (1897) 138 Mo. 251, 60 Am. St. Rep. 555, 39 S. W. 774.

A declaration is not demurrable which alleges that the plaintiff was struck by an engine while he was walking across the tracks of the defendant railway company to its roundhouse, where he was employed, which course was necessarily taken to reach the place of his employment, and that such use of the tracks was known to and sanctioned by the defendant, who, through its servants, negligently ran an engine and car upon the plaintiff, injuring him. *Savannah, F. & W. R. Co.* v. *Chaney* (1897) 102 Ga. 814, 30 S. E. 437 (demurrer sustained on first appeal [1897] 101 Ga. 429, 28 S. E. 1001, on the ground that it did not appear that the plaintiff was obliged to walk on the track owing to the necessities of his work, nor that the company sanctioned this practice).

Whether or not the plaintiff, a section hand, injured while walking on the track, was a trespasser, is in each instance a question of fact, and it was erroneous for the court to give instructions framed on the assumption that he was a trespasser. *Kinsman* v. *Chicago & N. W. R. Co.* (1899) 85 Ill. App. 138.

In a case where the plaintiff was injured in an elevator accident, and it was shown that, according to the rules of the building, the elevator stopped running at 12:30 P. M.; that he was injured at about 12; and that it was necessary for the operator to use the elevator in the very work which was being done, and that he had habitually used it for such purposes, the court objected the contention that, when the accident happened, plaintiff and the operator were not acting within the scope of their employment, but were using the elevator without authority and for their own convenience, as being without merit. *Nutzmann* v. *Germania Life Ins. Co.* (1901) 82 Minn. 116, 84 N. W. 730; First Appeal (1900) 78 Minn. 501, 81 N. W. 518.

A chambermaid in a hotel, who with the consent, approval, or direction of the housekeeper or manager, who has power to employ and discharge chambermaids, uses the elevator in passing from one story to another in the performance of her duties, is not a mere volunteer who assumes the risk of the method of transit, unless she knows or has reason to believe that the housekeeper or manager has no right to allow her to use the elevator. *The Oriental* v. *Barclay* (1897) 16 Tex. Civ. App. 193, 41 S. W. 117; *Oriental Investment Co.* v. *Sims* (1897) 17 Tex. Civ. App. 692, 41 S. W. 130.

An instruction that, if one voluntarily went upon an elevator without his duty calling him there, or being directed to go by his employers, for the purpose of assisting another, he could not recover for an injury sustained by the fall of the elevator,—is misleading when it is undisputed that he was acting in the line

dertaken by him, and even where those matters were of a merely personal and private nature.[3]

of his duty. *Union Show Case Co.* v. *Blindauer* (1898) 75 Ill. App. 358. Affirmed in (1898) 175 Ill. 325, 51 N. E. 709.

An employee of an electric light company, killed on the roof of a house by contact with a live wire, was in the discharge of his duty while standing or moving in a space where he could readily answer the calls of his foreman, or render the assistance required by him, although he had taken two or three steps away. *Gremmis* v. *Louisville Electric Light Co.* (1899) 20 Ky. L. Rep. 1293, 49 S. W. 184.

Where a jointer in a stove factory went into the engine house to get oil and a whetstone, and was killed by an explosion of the boiler, between 6 and 6:20 in the morning, and the hours of work began at 6:30, it was held to be for the jury to say whether he had arrived at a reasonable time, the evidence being that he lived about a mile away, and was in the habit of using his time, between his arrival and the starting of the work, in oiling and getting ready the machine on which he worked. The jury was held to have been rightly instructed that the plaintiff would not have been in the line of his duty if he had come an hour or two before his time. *Walbert* v. *Troxler* (1893) 156 Pa. 112, 27 Atl. 65.

Where a master had provided several ways of approach to a building for the use of his servants, an instruction that, unless forbidden to do so, his servants might leave by any one of them which was most convenient, and if, in so doing, a servant was injured by the negligence of the master to keep it in a reasonably safe condition, the master was liable for the injury, was proper. *Rizaka* v. *Victor Mfg. Co.* (1900) 58 S. C. 369, 36 S. E. 700.

An employee who received an injury by falling into an open well dug by the employer on his premises near a tent where employees were boarded and lodged was in the course of his employment, when he was proceeding to a town near by, under direction of his employer, to find lodging. *Indiana Pipe Line & Ref. Co.* v. *Neusbaum* (1899) 21 Ind. App. 361, 52 N. E. 471. The court contrasted the cases in which a servant takes a certain route for his own convenience or pleasure.

A complaint alleging that the plaintiff, a blacksmith's helper, was injured by a piece of sheet iron which tepped over on him when he went into the bin where the scraps of iron were kept, to be used as they might be required, is not demurrable for the reason that there is no averment that the bin was a place provided for the defendant's servants to work in. *Baltimore & O. S. W. R. Co.* v. *Spalding* (1898) 21 Ind. App. 323, 52 N. E. 449.

[3] "The master's duty to furnish the servant a safe place in which to work extends to such portions of the premises as the master knows or ought to know his servants are accustomed to use in the performance of the work for which they are employed." *Edwards* v. *Tilton Mills* (1900) 70 N. H. 574, 50 Atl. 102. Action held maintainable where plaintiff struck his leg against a shipper rod, while walking along a passageway between two machines in a mill, which had for a long time been used, with defendant's assent, by its servants generally, though the injured employee had never before used it.

A brakeman who is sleeping in the caboose of another train before going out with his own train is within the scope of his employment, where he does so by the permission of the trainmaster. *Olson* v. *Minneapolis & St. L. R. Co.* (1899) 76 Minn. 149, 47 L. R. A. 796, 78 N. W. 975.

An employee who has [illegible] mitted the service of a railway [illegible] and who has rightfully entered a [illegible] car on the stopping of the train to which it is attached, is entitled to a reasonable time for the transaction of his business before the train is started, and to a proper warning of the purpose to start the train, to enable him to leave the car in safety. *New York, P. & N. R. Co.* v. *Coalbourn* (1888) 69 Md. 369, 1 L. R. A. 541, 9 Am. St. Rep. 439, 16 Atl. 208.

A workman who stays upon his employer's premises, and eats his dinner, during the period when work is suspended in the middle of the day, is not a trespasser. *Broderick* v. *Detroit Union R. Station & Depot Co.* (1885) 56 Mich. 261, 56 Am. Rep. 382, 22 N. W. 802.

The eating of his midday meal by an employee is not ordinarily an incident of his service, but will become such

there the injury in suit was received while the servant was traveling on a vehicle belonging to his master, and it is shown that he was authorized to travel in this manner, his right to maintain an action is not defeated by the mere fact that he was paying nothing for the privilege. This doctrine is applicable whether the servant was traveling in the course of his employment,[1] or for the purpose of transacting some private affair.[2]

where the master allows so short a time for this purpose that the employee must eat it on or in the immediate vicinity of the place of his work. There is then an implied invitation to remain on the master's premises, and he can recover damages, if injured, owing to the defective condition of the appliances, while he is eating the meal in a building which the employees have been using in pursuance of a long established custom. *Cleveland, C., C. & St. L. R. Co.* v. *Martin* (1895) 13 Ind. App. 485, 41 N. E. 1051.

In the last case it was held that to support a judgment against a railroad company for negligently causing the death of one of its section hands by the explosion of a boiler in one of its pump houses while he was eating his dinner there during the thirty minutes allowed for that purpose, the special findings of the jury must, notwithstanding the time allowed was too short to allow him to leave the company's premises, show that he was, at the time of the accident, in the particular pump house by express or implied invitation of the company.

A person employed in a laundry does not become a mere volunteer without the protection of a statute entitling an employee to recover for injuries arising from a defect in the arrangement of machinery, in standing on a bench to open a window for the purpose of letting steam and hot air escape, so as to prevent her recovery, for her hair being caught by an unguarded revolving horizontal shaft passing through the room near the ceiling and in front of the window. *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117.

Where miners were accustomed, with the knowledge and implied consent of the owner, to use the passages or entries in the mine as a place for congregating or passing to and fro during the hours of recreation, damages may be recovered for the death of one of them, which was caused by the negligence of the mine owner in extending along such an entry an electric wire, which is dangerous to the life of those who come in contact therewith, without properly insulating or inclosing the same, or giving notice of the danger to the miners, who would, as he should have seen, be likely to be brought into contact with it. *Thsworth* v. *Methamey* (1900) 51 L. R. A. 389, 44 C. C. A. 481, 104 Fed. 119.

A vessel is liable to a stevedore for injuries from falling through unguarded holes in a deck upon which he went to strip and leave his clothes before going to work in the hold, unless the evidence shows that he wandered to an improper distance from the hatch where he was to work. *The Illinois* (1894) 63 Fed. 161. In the same case it was also held down that the fact that the stevedore had also another purpose will not prevent his recovery for injuries from so falling.

A workman who, according to the custom of his employer, is being transported to the place of his work, is not a trespasser. *Denver & R. P. Rapid Transit Co.* v. *Dwyer* (1894) 20 Colo. 132, 36 Pac. 1106; *Rosenbaum* v. *St. Paul & D. R. Co.* (1888) 38 Minn. 173, 8 Am. St. Rep. 653, 36 N. W. 447 (injury caused by defective track).

One who had been working as a surveyor's assistant until he left the company's employ, about two weeks before the accident, for the reason that his wages were not paid, had the rights of a passenger when he boarded a passing train to proceed to a place where he was to purchase provisions. *Ohio & M. R. Co.* v. *Muhling* (1861) 30 Ill. 9, 81 Am. Dec. 336. The court remarked that he was "liable to no greater burdens, nor entitled to more privileges, than any other passenger similarly situated."

Other cases in which recovery was allowed where the employees were being transported gratuitously on trains by the conductor's permission are *State use of Abell* v. *Western Maryland R. Co.* (1884) 63 Md. 433; *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784, citing *Philadelphia & R. R. Co.* v. *Derby* (1852) 14 How. 468.

If the defendant relies upon the plea that he was not bound to anticipate the presence of the injured person at the particular place where the accident occurred, for the reason that he would not have been at that place if a statute or ordinance had been duly observed by himself and his coemployees, the action will, of course, not be barred, unless it appears that the enactment in question was applicable to such a situation as that which is disclosed by the evidence.[6]

b. Circumstances under which recovery has been denied. In a Scotch case it is intimated that the mere fact of the plaintiff's being out of his proper place at the time of the accident, contrary to the rules of work, does not prevent his recovering for injuries caused by defective machinery.[7] This may possibly be the correct doctrine applicable to cases in which the defense of contributory negligence is relied upon. (See subsec. *c, infra.*) But if the statement is intended to define the extent of the employer's obligations, it embodies a theory which is opposed to the general current of authority, which is in favor of the principle that "a master's duty in respect to furnishing his servants a safe place in which to work extends to such parts of his premises only as he has prepared for their occupancy while doing his work, and to such other parts as he knows or ought to know they are accustomed to use while doing it."[8] The application of this

14 L. ed. 502 (where, however, the traveler was a stockholder, not a servant).

See also the cases cited in § 624, subsecs. *d* and *e*, *supra*.

[6] Where a railway company had put in evidence a city ordinance prohibiting it from using the crossing where plaintiff's intestate was injured for the storage of cars, and from permitting loaded and unloaded cars to stand thereon, it was held that the court properly instructed the jury that defendant could not plead its obligation thereunder as a defense to an action by one of its employees who, while engaged in coupling cars, was injured by reason of its failure to keep the crossing in repair. *Herrick* v. *Quigley* (1900) 41 C. C. A. 291, 101 Fed. 187.

[7] *Whitelaw* v. *Moffat* (1849) 12 Scots. Cas. 2d series, 434.

[8] *Morrison* v. *Burgess Sulphite Fiber Co.* (1900) 70 N. H. 406, 85 Am. St. Rep. 634, 47 Atl. 412.

The duty of an employer to provide a safe place of work is limited to the premises where the employee is required, for the purposes of his employment, to be. *Donnelly* v. *Chase* (1898) 119 Cal. 637, 63 Am. St. Rep. 153, 52 Pac. 33.

An employer is not called upon to so construct every part of his premises as to prevent the possibility of accident. *McCann* v. *Atlantic Mills* (1890) 20 R. I. 566, 40 Atl. 500.

An employer is under no duty to make all parts of his premises safe for a servant to ramble through in the dark, even if he is at work in a place where there is no danger. *Chicago & A. Smelting & Ref. Co.* v. *Collins* (1892) 43 Ill. App. 478.

Where plaintiff's deceased husband was injured by the falling of a sliding door in the store of the defendant, owing to the careless manner in which it had been opened by the men in charge of it, it was held that a verdict for the plaintiff should be set aside, it appearing that defendant had exercised reasonable care and skill in the selection of its servants, that the door was constructed with ordinary skill, and if the deceased was lawfully in the vicinity of the building in the course of his employment, he was a fellow servant with the men whose negligence inflicted the injury; or if he was a trespasser, or present by sufferance, the defendant owed no duty except to refrain from acts wilfully injurious. *Collyer* v. *Pennsylvania R. Co.* (1886) 49 N. J. L. 59, 6 Atl. 437.

principle has frequently prevented recovery in cases where the injury proximately resulted from the fact that the injured servant was occupying the dangerous position merely for his own convenience and accommodation. Under such circumstances his legal rights are no greater than those of a licensee.[9] The same principle is equally

[9] No action can be maintained where an employee, while off duty, goes from a passenger car to the engine, to which neither necessity nor duty calls him, and, while attempting to return to the car while the train is in rapid motion round a curve, falls on the track. *McDaniel* v. *Highland Ave. & Belt R. Co.* (1891) 90 Ala. 64, 8 So. 41.

An instruction in an action for personal injuries to a brakeman while riding on the pilot of the engine, that, if the jury believe he was not required or "permitted" to ride on the pilot in the discharge of the duties of his service, they will find for defendant, is not objectionable. *San Antonio & A. P. R. Co.* v. *Beam* (1899; Tex. Civ. App.) 50 S. W. 411.

To take a passenger coach without the knowledge of his superior, and have it drawn by a switch engine for the convenience of himself and his fellow servant, while not on duty, over a portion of the road, is not within the implied authority of a yard master, so as to give those servants the rights of passengers. Under such circumstances, the fact that the master mechanic has paid the engineer for the extra time spent in running the train cannot be construed as a ratification or adoption of the yard master's act. *Chicago, St. P. M. & O. R. Co.* v. *Bryant* (1895) 13 C. C. A. 249, 27 U. S. App. 681, 65 Fed. 969. On the first appeal ([1893] 4 C. C. A. 146, 12 U. S. App. 115, 53 Fed. 997) the case was held to be for the jury on the ground that one who is being conveyed on a vehicle which belongs to a common carrier, and is ostensibly designed for the transportation of passengers, is presumably on that vehicle by the invitation of an employee who has authority to bind the carrier by such invitation, and that, in the absence of countervailing circumstances to rebut this presumption, there was some evidence in the record proper for the consideration of the jury on the issue whether the injured person was a passenger or not. See note 2, *supra*.

A former employee riding on a freight train by the invitation of the conductor is presumed to know that such an invitation is not within the scope of his employment, and that he is therefore not traveling as a passenger. *Powers* v. *Boston & M. R. Co.* (1891) 153 Mass. 188, 26 N. E. 446.

A railroad company cannot be held liable for the death of an employee sent to a particular place on business, who, for his own convenience and pleasure, delays his return until after midnight, when he takes passage on a freight train while he could have returned earlier in the evening on a passenger train, on the ground that the injury was caused by the company's negligently retaining in its employ an incompetent coemployee. *West* v. *New York C. & H. R. R. Co.* (1897) 17 App. Div. 116, 45 N. Y. Supp. 93. The court said: "If the deceased had taken passage on the passenger train he would not have come to his death by reason of the negligence of a drunken employee. Was he at liberty to impose upon the company a greater risk and responsibility than it would otherwise have assumed? If the employee loses sight of the purposes for which he was sent, *viz.*, to attend to a particular business, departs from the line of his duty, and, for his own convenience and pleasure, delays his return until after midnight, and then takes a mode of conveyance that is not considered as safe as the one which he might have taken in a reasonable time after performing his duties, and sustains injuries by the act of a brakeman, can the company be charged with liability upon the ground that the latter was a 'coemployee' and the company was negligent in retaining him in its employ? Is he at liberty, under such circumstances, to create such brakeman employee *pro hac vice*? Surely the company ought not to be charged, by implication, with notice of his presence on this train. It was not by any act of the company that he was obliged to be on this train, and he was not being employed as a car inspector or repairer because of any exigency of the service demanding or requiring it. It was not by reason of any necessity or exigency of the business that he was riding on the freight train. There is no pretense

whatever that his work detained him until it was too late to take the passenger train at 8:12 P. M. He was not, therefore, put in a position where he was called upon to ride upon a freight train in order to return home in time for work on the following day."

A brakeman who, in accordance with a prevailing custom, leaves his working clothes upon a caboose, although he knows that such car will probably not be attached to the next outgoing train to which he is assigned, has license to visit the caboose to obtain his clothing; but where he is injured by a switch stand, while alighting from a moving train on which he has gone in search of his apparel he is not acting within the license, or in the line of his duty, and cannot recover for the injuries sustained. *Olson* v. *Minneapolis & St. L. R. Co.*, (1899) 76 Minn. 149, 48 L. R. A. 796, 78 N. W. 975.

In moving its engines and cars in its own yard, a railway company is not bound "to take special precautions or give special warnings to avoid injuring any unauthorized person who may, for his own convenience, go therein, until the presence of such person in a situation of danger has been discovered." *Louisville & N. R. Co.* v. *Hocker* (1901) 23 Ky. L. Rep. 982, 64 S. W. 638, 65 S. W. 119 (recovery denied where a telegraph despatcher, instead of going to the closet, stepped behind a car to urinate).

A railroad company is not liable for the death of an employee who, for purposes of his own, goes behind cars standing upon a spur track, without the knowledge of any superior employees, and is struck by such cars in consequence of a train entering a side track and coming in contact with them, although the warning given by the foreman is in English, and such employee does not understand the English language. *Gaylack* v. *Michigan C. R. Co.* (1895) 11 Ohio C. C. 59.

No recovery can be had where plaintiff, in going to get his coat, which he had left at a place unnecessarily remote from the place of work, fell down hatchway. *Kennedy* v. *Chase* (1898) 119 Cal. 637, 63 Am. St. Rep. 153, 52 Pac. 33.

A master is not liable for injuries to a servant who, in the dark, attempts to reach the place where he left his lunch, by crossing an unknown and unlighted portion of the building, and in so doing falls into an unguarded kettle filled with molten lead. *Chicago & I. Smelting & Ref. Co.* v. *Collins* (1892) 43 Ill. App. 478.

A servant who falls into a cistern not entirely fenced round, while he is searching for a pail of water cannot recover. *Hetzann* v. *Atlanta Mills* (1898) 20 R. I. 566, 40 Atl. 500.

In a case where a laborer, after loading ice from a wharf upon a vessel, went on board for the gratification of his curiosity, and there fell down an open hatchway and broke his leg, it was held that, as his work had been completely finished, he was not even a licensee, but was a mere trespasser. *Sweezy* v. *Nickerson* (1876) 120 Mass. 306, 21 Am. Rep. 514.

A coal miner who, during the noon hour, while not engaged in work, goes to a different part of the mine for the purpose of visiting with another miner, is not, while so absent, engaged in the line of his duty so as to impose upon the employer the duty of a master to see that the entry through which he passes from and to the part of the mine where he is employed is kept in a safe condition for his passage. *Ellsworth* v. *Metheney* (1900) 51 L. R. A. 389, 44 C. C. A. 484, 104 Fed. 119.

Where an employee of the owner of a mine, having a few moments' leisure, went into another room in the mine to see some fellow workmen, and was killed by the falling in of the roof, it was held that his administrator had no cause of action, although the owner acquiesced in a custom among the miners to visit each other when not actively engaged. The position taken by the court was that the implied licenses thus accorded to the miners did not authorize them to frequent dangerous places at the risk of their employer. *Wright* v. *Rawson* (1879) 52 Iowa, 329, 35 Am. Rep. 275, 3 N. W. 106.

No action is maintainable where a servant is injured by the fall of a rock while he is in a passage made solely for securing a circulation of air in the mine where he is working. *Lenk* v. *Kansas & T. Coal Co.* (1899) 80 Mo. App. 374.

Where an employee follows the invitation of a fellow servant to take a certain exit from a building where he is employed, which is not intended to be used as an exit for persons engaged in the employment in which plaintiff is engaged, and plaintiff is injured, he cannot recover therefor from his master. *Swift* v. *McInerny* (1900) 90 Ill. App. 294.

The question whether a narrow space close to cogwheels, into which an employee other than the engineer oils, receiving injury from the wheels, is an unsafe place for an employee to provide for workmen is not involved, where the space is not intended for workmen, but is separated, because of its danger, from the rest of the building by a barred fence 5 feet high, within which no one has occasion to go except the engineer when oiling machinery. *Casey v. Pennsylvania Asphalt Paving Co.* (1901) 198 Pa. 348, 47 Atl. 1128.

In *Stover Mfg. Co. v. Wilhite* (1901) 89 Ill. App. 532, it was held error to instruct a jury that the master was bound to provide a reasonably safe place of work, where the evidence was that the plaintiff's intestate was killed by the fall of an elevator under which he was passing, though his duties did not require him to do so.

Employees who, under a mere implied license, ride upon an elevator known to them to be intended only for carrying goods, do so at their own risk. *Wise v. Tekerman* (1892) 76 Md. 375, 25 Atl. 424. The court said: "There is no doubt that where an elevator is erected in a factory or warehouse, and is intended to be used only for the purpose of carrying and transferring goods and materials from one part of the building to another, and the employees in the establishment, familiar with the construction and operation of the elevator, and the purpose of its construction, ride thereon under a mere implied license, for their own pleasure or convenience, they must be taken to accept whatever risk that may be incident to such construction and operation; and, in such case they can only require of the defendant the use of ordinary care, either in the construction or operation of the machine. *O'Brien v. Western Steel Co.* (1889) 100 Mo. 182, 18 Am. St. Rep. 536, 13 S. W. 402; *Patterson v. Heacock* (1888) 148 Mass. 91, 12 Am. St. Rep. 523, 19 N. E. 15. But an elevator is in many respects a dangerous machine, and though it may be primarily intended only as a freight elevator, yet if the employees, in the course of their employment, are authorized or directed to use the elevator as means of personal transportation, the employer, controlling the operation of the elevator, is required to exercise great care and caution both in the construction and operation of the machine, so as to render it as free from danger as careful foresight and precaution may reasonably dictate."

An employee [illegible] at the invitation of a coemployee [illegible] for his own pleasure and convenience, rides upon an elevator intended only for freight, does so at his own risk. *Hockmann v. Hoss Laundering Co.* (1893) 4 Misc. 150, 23 N. Y. Supp. 787.

An employee whose duties did not require him to approach an elevator which was constructed and operated with due care, and of whose use he was fully apprised, cannot recover for injuries received by falling into the elevator well. *Atlanta Cotton Mills v. Ogier* (1902) 116 Ill. App. 634.

An employer is not charged with the act of an employee intrusted with the duty of constructing a freight elevator, in inviting a coemployee to ride on the elevator, instead of going by the stairway provided for the use of employees. Such coemployee accepts the invitation at his own risk. *Stover v. Peters Box & Lumber Co.* (1898) 151 Ind. 642, 50 N. E. 877. Rehearing denied in (1898) 151 Ind. 662, 52 N. E. 599.

The following extract from the dissenting opinion of Crawford, J., in *Atlanta Cotton Factory Co. v. Speed* (1882) 69 Ga. 137, 47 Am. Rep. 750 states what the present writer conceives to be the correct doctrine as established by the decisions. In the opinion of the majority the evidence in that case was viewed from a standpoint essentially different from that taken by the learned judge. But probably the abstract correctness of the doctrine enunciated would not have been disputed by his associates, if they had deemed that doctrine to be controlling under the circumstances. "This charge, to my mind, is erroneous because it actually lays down the law to be that anyone who was in the basement or the cloth room rightfully might go at will through the entire factory, either in light or darkness, whether dangerous or safe, and, if hurt, could recover damages therefor, provided he or she exercised care and caution in passing through such other portions thereof. The corporation, whilst completing its machinery or conveniences might allow visitors or operatives in some, and yet not in all, parts of their building. To be invited into the cellar basement, or cloth room by one authorized to do so makes it lawful to be in those rooms and in the house; yet it cannot be that such invitation gives the right to every part of it and into places where no one is invited and none expected. If, therefore, one should go

applicable w[illegible]e the injured servant was actually engaged in the performance [illegible] his duties.[10] But this predicament is more commonly consid[illegible]ed from the point of view exemplified in the next subsection.

c. *Right of recovery considered with reference to the culpable or nonculpable quality of the servant's conduct.* In some cases of the type now under consider[illegible]ti[illegible], the theory of the defense has been, not that the master owed no [illegible]uty to the servant [illegible] the ep[illegible], but that the servant was himself guilty of a want of p[illegible]e[illegible] in being at the place where he was when the accident occurred. Whether this plea is available to the master is a question for the jury where the evidence leaves room for doubt as to the quality of the servant's conduct.[11] But the servant will be pronounced negligent as a mat-

from a place of perfect safety where he has been invited, to a place of danger where he is not invited, and a casualty befall him, he certainly should not be allowed to recover his damages by showing that ordinary care and caution on his part in such place would not have prevented his injuries. [illegible] hold that being at a place where he had neither business nor an invitation, and where his presence was not anticipated, and therefore his protection not provided for, his risk was his own, and not that of the corporation. It would make, to my mind, as clear a case of *damnum absque injuria* as is to be found in the books. And such is the case."

In *Lumsden* v. *Russell* (1856) 18 Sc. Sess. Cas. 2d series, 468, it was held that a father could not recover for the death of his son, a young child not regularly in the employment, whom he had sent on an errand which he should have performed himself.

[10] A car inspector who is directed to carry an iron casting which has fallen from a car to a designated engine is not in the line of his duty, where he lays it down in a dangerous place, and subsequently returns to get it and carry it to the designated place. *East St. Louis Connecting R. Co.* v. *Craven* (1894) 52 Ill. App. 415 (casting left between tracks where there was not sufficient space to stand).

A switchman cannot recover for injuries received while [illegible]ttempting to get upon the front of a [illegible]ngine at what is called the pilot, when it is not his duty to get up there. *Grant* v. *Union P. R. Co.* (1891) 45 Fed. 673 (in charge to jury).

[11] *Aylock* v. *Champagne Lumber Co.* (1899) 33 C. C. A. 269, 13 U. S. App. 519, 90 Fed. 774.

Where it was the duty of the crew of a freight train to place it in proper position for unloading stones from the cars by means of derricks operated by an independent contractor, an action for the death of a brakeman killed by the fall of those derricks cannot be defeated on the ground that he was negligent in being on the car just ahead of the one which was being unloaded. *Gulf, C. & S. F. R. Co.* v. *Delaney* (1900) 22 Tex. Civ. App. 427, 55 S. W. 538.

An employee of a steam mill company, who went to the mill to inquire in respect to his work, was not guilty of contributory negligence which will prevent his recovery for injuries received by a portion of the machinery which became detached and struck him, because of his remaining in the mill longer than was strictly necessary for the purpose of his visit, and stepping a few feet out of his way to speak to the manager about something that attracted his attention in respect to the machinery. *Denham* v. *Trinity County Lumber Co.* (1889) 73 Tex. 78, 11 S. W. 151.

If the injury was received while the servant was passing from one part of the premises to another with a view to the subsequent performance of some duty, he is entitled to recover under any circumstances which would constitute a cause of action if he had actually been at work; and he is not chargeable with contributory negligence because at the precise moment when the accident occurred he happened to be exchanging a remark with a fellow employee with re-

ter of law, if an inference of culpability is the only one which can reasonably be drawn from the evidence.[12]

For other cases dealing with this predicament, see § 337, *ante*, and § 635, *post*.

627. Servant's use of the given instrumentality.— The duty of an employee to exercise reasonable care in seeing that any given instrumentality is in a proper condition to be used is owed only to such servants as are required, permitted, or in the course of the business expected, to make use of that instrumentality.[1] Any injuries which the instrumentality may cause to servants to whom that description is not applicable are regarded as events which the employer is not bound to anticipate, and which, for this reason, do not charge him with any liability.[2] See, generally, §§ 142–146, *ante*. Compare

gard to a matter of common interest to the master and himself,—such as the operation of a certain piece of machinery. *Moore* v. *W. R. Pickering Lumber Co.* (1901) 105 La. 504, 29 So. 990 (employee in sawmill injured by a flying piece of a belt which broke during such a conversation).

An employee in a mine is not, as matter of law, guilty of contributory negligence in leaving his work on hearing the noise of a cave-in of the mine, in order to ascertain the locality and magnitude. *Frank* v. *Bullion Beck & C. Min. Co.* (1899) 19 Utah, 35, 56 Pac. 419.

Recovery by an employee in a mine injured by an explosion of dynamite improperly thawed by an open fire without proper appliances is not defeated by his having left a safe place of employment and gone to such fire to warm himself, where the fire was built to allow the employees to warm themselves, as well as for such thawing, and the hands, including such employee, had several times on the same day gone there, to the knowledge of and without objection by the foreman. *Bertha Zinc Co.* v. *Martin* (1895) 93 Va. 791, 22 S. E. 869.

It is not error to refuse an instruction that a brakeman was guilty of negligence, if, when ordered to deliver a message to the engineer, he stayed from his post longer than necessary, where an instruction has been given that defendant was not liable for injuries received by the brakeman, owing to his being at a location on the train not within the scope of his duty. *Norfolk & W. R. Co.* v. *Warpole* (1899) 97 Va. 594, 34 S. E. 462.

[12] An intelligent boy nearly fifteen years old whose duties do not require him to go anywhere near an unguarded shaft with a collar upon it making 150 revolutions a minute, and who has been warned of the danger, is guilty of such contributory negligence in coming in contact with it as will prevent a recovery for his death. *Monforton* v. *Detroit Pressed Brick Co.* (1897) 113 Mich. 39, 71 N. W. 586.

An answer which relies upon unconsciousness resulting from defendant's negligence as an excuse for a servant's contributory negligence in being out of place when injured is, in the absence of evidence to support such plea, an admission of contributory negligence. *Lenk* v. *Kansas & T. Coal Co.* (1899) 80 Mo. App. 374.

A "tankman" on a railway who is injured by the derailment of the engine on which he was riding, without the permission of the conductor and in violation of a rule of the company, cannot recover damages, although he had been in the habit of riding on the engine, and at the point where he mounted it, there was a difficulty in getting into the caboose, where he ought to have been. *Martin* v. *Kansas City, M. & B. R. Co.* (1900) 77 Miss. 720, 27 So. 646.

[1] *McGill* v. *Maine & N. H. Granite Co.* (1899) 70 N. H. 125, 85 Am. St. Rep. 618, 46 Atl. 684.

[2] An employee about eighteen years of age, who for two years had worked in paper mills, cannot recover for the accidental loss of two of his fingers severed by a fan revolving in a drum near which he was at work cleaning a screen attached to a hopper, where his duties did not require him to touch the drum.

also the cases collected in §§ 26, 27, 342, *ante*, and those cited in the preceding section.

628. Servant's use of the given instrumentality in a certain manner. —In § 26, *ante*, it has been shown that a master's obligations in respect to furnishing instrumentalities are limited to seeing that they are reasonably safe for the performance of the functions for which they are designed. A few additional authorities in which this principle is recognized are cited below.[1] Compare also § 342, *ante*, where the cases have been collected which illustrate the circumstances under which negligence is inferred from the use of appliances for a purpose other than that for which they were designed.

629. Servant's unauthorized performance of certain work; generally. —In numerous cases the plea set up has been that, at the time of the accident in suit, the injured person was doing work which he had not been authorized by the defendant or his agent to undertake. If such unauthorized action is established, it is manifest that, in respect to the work thus done, the relation of master and servant did not exist between the person for whom it was done and the person who was doing it, and that the former did not owe to the latter any of those special duties which are deemed to be incidental to that relation.[1] The workman under the supposed circumstance occupies a

Schiefelbein v. *Badger Paper Co.* (1898) 101 Wis. 402, 77 N. W. 742.

Where the accident arose entirely from plaintiff's use of the trimmer-saw, and such use was not in the line of his employment, no inquiry can be made into the general management of the mill, or the particular management of the slab-cars, whatever negligence there may have been in furnishing a poor slab-car, or in requiring the plaintiff to use it. *Lindstrand* v. *Delta Lumber Co.* (1887) 65 Mich. 254, 32 N. W. 427.

Where railway employees, without the actual consent of the company's officers, but with their knowledge, have been accustomed to use a switch engine to carry them from the roundhouse to their meals, it is for the jury to say whether on such an occasion the engine is engaged in the company's business. *Reilly* v. *Hannibal & St. J. R. Co.* (1887) 94 Mo. 600, 7 S. W. 407 (minor injured by negligent operation of engine).

[1] An employer is not liable for injuries received by a servant in taking off a towel from the projecting end of a shaft upon which he had hung it solely for his own convenience, where his service was not connected with such shaft in any manner. The court refused to ascribe any differentiating significance to the fact that the injuries were due to its defective condition. *Kauffman* v. *Maier* (1892) 94 Cal. 269, 18 L. R. A. 124, 29 Pac. 481.

A finding to the effect that the plaintiff, who was injured by catching his clothes on the collar of a revolving shaft, while climbing over a cross beam, had no orders to do this for the purpose for which he did it, and that there was no necessity to put himself into the dangerous position, entitles the defendant to judgment. *Thorsen* v. *Babcock* (1888) 68 Mich. 523, 36 N. W. 723.

In an action for the death of a yard foreman alleged to have occurred while in discharge of his duties in coupling cars, it is competent to show the habit, custom, and duty of employees in making couplings, in the absence of a rule prescribing the method of coupling cars. It cannot be affirmed, as a matter of law, that the use of his own hands is outside the line of his duty, since this might have been requisite for the expeditious performance of his work. *Louisville & N. R. Co.* v. *York* (1900) 128 Ala. 305, 30 So. 676.

[1] See cases cited in the notes to the following sections.

position which is virtually, if not precisely, that of a trespasser or licensee, and has probably no right of action, except in cases where he has been wantonly injured by the defendant or his servants.[2]

630. Right of action where the injured person was not in the service of the defendant for any purpose.—A portion of the cases which deal with the applicability of the general principles stated in the preceding section relate to work done for persons who, prior to the time when they undertook that work, were strangers as regards the defendant. It is to such persons that the term "volunteer" is usually, but not exclusively, applied.[1] The essence of the defense in this instance is simply that a person cannot be subjected, without his own consent or that of his agent, to the obligations which the law has attached to the contract of hiring.[2] The decisions collected in the

[1] *Rhodes* v. *Georgia R. & Bkg. Co.* (1889) 84 Ga. 320, 20 Am. St. Rep. 362, 10 S. E. 922.

A railway company is not required to use care to anticipate and discover the peril of a person who enters upon its premises and voluntarily assists in its work, but only to use care after the peril is discovered. *Kentucky C. R. Co.* v. *Gastineau* (1885) 83 Ky. 119.

A boy who, at the request of the conductor of a train, assists in coupling cars, is entitled to recover if the servants of the company, after discovering that he has placed himself in a position of danger, fail to exercise reasonable care to preserve him from injury. *Evarts* v. *St. Paul, M. & M. R. Co.* (1894) 56 Minn. 141, 22 L. R. A. 863, 45 Am. St. Rep. 460, 57 N. W. 459.

An employer is not liable for injuries to a boy employee received in attempting to shift a belt running upon a revolving shaft, not in the performance of any duty owing to the employer, but merely for the purpose of demonstrating to other boys his ability to do so. *Pfeffer* v. *Stein* (1898) 26 App. Div. 535, 50 N. Y. Supp. 516.

Where plaintiff, employed as carpenter in a mill at defendant's stone quarry, was standing in front of a truck for the purpose of seeing whether stone with which the truck was loaded was properly sawed, when the truck, without notice to him, was moved, causing injury to his foot, he must be regarded as a mere volunteer, unless he was performing a regular duty, or was acting under special order of the foreman. Unless such was the case the company owed him no duty to keep a lookout. It was therefore error to instruct the jury that, if he was acting without an order from the foreman, they should find for the defendant unless they believed that the servant in charge of the truck knew, "or by the exercise of ordinary care might have known," of plaintiff's peril. The words between the quotation marks should have been omitted. *Bowling Green Stone Co.* v. *Capshaw* (1901) 23 Ky. L. Rep. 945, 64 S. W. 507.

See also the argument of Bramwell, B., in the *Degg Case* (1857) 1 Hurlst. & N. 773, 26 L. J. Exch. N. S. 171, 3 Jur. N. S. 395, as quoted in § 631, note 5, *infra*.

[1] By Lord Herschell a volunteer has been defined as, "A person who is not under any paid contract of service may nevertheless have put himself under the control of an employer to act in the capacity of servant, so as to be regarded as such." *Johnson* v. *Lindsay* [1891] A. C. 371, per Lord Herschell, 15 L. J. Q. B. N. S. 90, 65 L. T. N. S. 97, 40 Week. Rep. 405, 55 J. P. 644. But this remark can scarcely be deemed to carry an exclusive significance, or construed as a statement of his opinion that the term was not applicable to persons in the position of those discussed in the following section.

[2] "It is natural justice that one man should not be held liable for the act of another without his participation, his privity, or his authority." *Flower* v. *Pennsylvania R. Co.* (1872) 69 Pa. 210, 8 Am. Rep. 251.

In *Wisham* v. *Rickards* (1899) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532, the court, in comment-

note below will indicate sufficiently the varieties of phraseology in which the availability of this defense has been asserted, and the circumstances under which it has been declared or denied, to be a bar to the action.[3]

ing on the case of *Potter* v. *Faulkner* (1861) 1 Best & S. 800, 31 L. J. Q. B. N. S. 30, 8 Jur. N. S. 259, 5 L. T. N. S. 455, 10 Week. Rep. 93, cited in § 631, note 5, *infra*, remarked: "It will be perceived that the court considered the plaintiff to be a volunteer, notwithstanding he intervened only at the request of the defendant's servant. Now, while it may seem a little strained to call such a person a mere volunteer, the reason given for the nonliability of the master is more substantial,—to wit, that the plaintiff's act in associating himself with the defendant's servant in the performance of the work was done without the knowledge or consent of the master, and therefore he could acquire no better position than that of the servant with whom he associated himself."

The relation of master and servant and the duties and obligations which result from the existence of that relation cannot be created by a direction issuing from an unauthorized agent of the employer. *Nashville & C. R. Co.* v. *McDaniel* (1883) 12 Lea. 386.

One who undertakes to assist an employee at the latter's request, does not thereby "place himself within the protection of the company so that it is bound to anticipate and ascertain if he has placed himself in danger," unless the employee has express authority from the company to make the request, or occupies such a position toward the company and the act to be done that the authority can be fairly implied. *Kentucky C. R. Co.* v. *Gastineau* (1885) 83 Ky. 119.

[3] (a) *Liability denied.*—An employee whose duty it is to look after stock killed by trains and to look after any litigation has no authority to command a bridge watchman who is traveling to attend court, to help in clearing an obstruction from a tunnel. *Nashville & C. R. Co.* v. *McDaniel* (1883) 12 Lea. 386.

A passenger who, at the request of the conductor, goes upon the top of the car to help to give signals, when there is no real necessity for it, cannot recover if he is injured because of so doing. Under such circumstances the compliance with the request is merely a matter of accommodation. *Atchison, T. & S. F. R. Co.* v. *Lindley* (1889) 42 Kan. 714, 6 L. R. A. 646, 16 Am. St. Rep. 515, 22 Pac. 703.

Unless some exigency arises, an engineer has no authority, by virtue of his position as such, to employ a brakeman for the company; and, if he engages a person to assist him in the management of the train for his own convenience, such person, by reason of such employment, does not become the servant of the company. *Wickelson* v. *New East Tintic R. Co.* (1900) 23 Utah, 42, 64 Pac. 463 (injury caused by unblocked guard-rail).

Recovery was refused where plaintiff's own evidence showed that he put himself under the orders of the conductor, to work his way, instead of paying for it as a passenger, and that he was injured in obeying orders from a brakeman, without any express instructions from the conductor. *Sparks* v. *East Tennessee, V. & G. R. Co.* (1888) 82 Ga. 156, 8 S. E. 424.

The right of action has been denied where the injury was received by a man who voluntarily undertook to carry a message from a telegraph operator to the employees in charge of a train, and the evidence showed that he was a person in the service of the station agent, who assisted him in the business which he did in addition to his railway work, as agent for an express company; but there was no proof that the railway company had authorized the station agent to hire him, or had even paid him any wages, or that any of its officers knew that he had been thus employed. *Chicago & E. I. R. Co.* v. *Argo* (1898) 82 Ill. App. 667.

Where an engineer for his own convenience engages a person to assist him in the management of the train, the fact that the company knew of such employment and acquiesced therein, or that its agents saw such person working about the train on the day he was injured, does not entitle him to recover on the ground that he was a servant of the company, since the mere fact that an officer of a railway company sees a person engaged about its trains casts no duty on the company to take affirmative action, nor does mere silence amount to

631. Volunteers subject to same burdens as servants.— It is manifest from the foregoing section that the nonexistence of any duty to safeguard persons who belong to the category of volunteers is in every case a sufficient reason for denying their right to sue the party who was the owner of the instrumentality which inflicted the injury, or the employer of the workmen whose carelessness caused that injury. But in a large proportion of the cases which involve accidents to such persons the inability to recover may be, and often has been, referred

ratification of the employment. *Mickelson* v. *New East Tintic R. Co.* (1900) 23 Utah, 42, 64 Pac. 163.

See also cases cited in § 631, *infra*.

(b) *Liability affirmed.*—An employee injured while complying with the orders of one as to whose authority to give such orders there was some evidence cannot be said, as a matter of law, to have been improperly at work. *Patnode* v. *Warren Cotton Mills* (1892) 157 Mass. 283, 32 N. E. 161.

A conductor has implied authority to hire a man to take the place of a brakeman who has fallen ill while the train is on the road. *Georgia P. R. Co.* v. *Propst* (1887) 83 Ala. 518, 3 So. 764. The court said: "The conductor testified that he had no authority from the superintendent or from the defendant to engage or utilize the services of the plaintiff in the capacity of brakeman. Express authority for this purpose was not necessary. The circumstances themselves, about which there is no conflict of testimony, gave him the authority. In such an emergency, there must be discretion and authority somewhere, to supply the place of disabled or missing servants; and no one could exercise this power so well or so prudently as the conductor in charge of the train."

Where two brakemen are necessary for the safe operation of a train, the conductor has authority to hire a substitute for one who is laid off for a week's rest. *Sloan* v. *Central Iowa R. Co.* (1883) 62 Iowa, 728, 16 N. W. 331.

A conductor of a train who has only two brakemen to assist him has implied authority to hire a substitute, where one of them leaves his work temporarily while the train is making its regular round trip, and it is necessary for the safety of the passengers to have two brakemen. *Fox* v. *Chicago, St. P. & K. C. R. Co.* (1892) 86 Iowa, 368, 17 L. R. A. 289, 53 N. W. 259. In this case it was held that the mere fact that the train may have been safely operated for some distance with a single brakeman, thus showing that it is physically possible to operate it without the second brakeman, will not justify overruling the finding of a jury that the substitute was required for its proper operation.

A brakeman whose services are accepted by the yard master is not a trespasser on trains which he helps to make up. He is therefore entitled to be indemnified for an injury caused by a defective brake. *Central Trust Co.* v. *Texas & St. L. R. Co.* (1887) 32 Fed. 118.

In an action against a railway company for personal injuries, the plaintiff testified that defendant's train despatcher, to whom he had applied for a position as brakeman, had told him he should have the next place that was open, and that in the meantime he should assist the station agent at the station where he lived as he had been doing before; that thereafter he did assist said agent by doing various things under his direction, and said agent gave him a switch key so that he could open and close switches; that on the day of the accident the agent's regular assistant was absent, and the agent requested plaintiff to "help him out;" and that he was injured while riding to a switch for the purpose of closing it, which was a part of the work of the regular assistant. There was also testimony tending to show that the station agent had authority to employ a helper in the absence of any of the regular force. Held sufficient to sustain a finding by the jury that the plaintiff was at the time in the employ of the defendant. *Button* v. *Chicago, M. & St. P. R. Co.* (1894) 87 Wis. 63, 57 N. W. 1110.

A passer-by who complied with the request of the defendant's manager to assist his servants in moving a heavy weight was held not to be a volunteer in *Little* v. *Neilson* (1855) 17 Sc. Sess. Cas. 2d series, 310.

A person indirectly in the employ of

to the conception that, as they have, of their own free will, undertaken to do the work of servants, they may fairly be put upon the same footing as servants, and required to bear the burdens to which that position subjects those who occupy it by virtue of a contract of hiring.

One result of regarding the rights of a volunteer from this standpoint is seen in the doctrine that any rules which may have been framed for the conduct of the business in which he has chosen to participate are binding upon him under the same circumstances as they would be binding upon a regularly employed servant.[1] Another re-

a manufacturing company by contract with the superintendent, and receiving compensation in proportion to the amount of work done, may be treated as an employee of the company, and is entitled to the protection arising from the relation of master and servant. *Rumwell* v. *Dilworth P. & Co.* (1886) 111 Pa. 343, 2 Atl. 355, 363.

A person assisting in work at the request of the defendant's foreman is not in the position of a mere trespasser or volunteer, even though he does not expect any compensation for the work done. He is therefore entitled to the same protection as any of the regularly employed servants of the defendant. *Johnson* v. *Ashland Water Co.* (1888) 71 Wis. 553, 5 Am. St. Rep. 213, 37 N. W. 823. On a subsequent appeal, however, it was held that he could not recover, for the reason that the foreman was his fellow-servant. (1890) 77 Wis. 51, 45 N. W. 807.

Evidence tending to show that the plaintiff was employed by and was working under the directions of a foreman who was superintending the operation of the mine where the injury was received, and that the defendant was owning and operating the mine, is sufficient to make it a question for the jury to determine whether the relation of master and servant existed between the defendant and plaintiff. *Consolidated Coal Co.* v. *Bruce* (1894) 150 Ill. 454, 37 N. E. 912.

A car inspector has the right to call temporarily to his assistance his minor son, for the purpose of doing merely mechanical acts under his guidance. Under such circumstances the boy is not, as regards a company other than the one employing his father, a trespasser in such a sense as to preclude him from recovering for injuries received through the careless management of cars by its agents. *Pennsylvania Co.* v. *Gallagher* (1884) 40 Ohio St. 637, 48 Am. Rep. 689. The court said: "In the business of repairing the broken car, Daniel Gallagher was authorized to bring to his aid any instrument or agency necessary to the proper performance of his work. He availed himself of the necessary temporary assistance of his son, as he used other instrumentalities under his control. He did not delegate to another a charge committed to himself personally, because of his acknowledged skill and fitness, but directed his son to render assistance which was merely mechanical, and under the supervising guidance and control of the father's mind and will. Presumptively, Daniel Gallagher did not exceed his powers in calling upon his son for temporary assistance; and, though a contingency might have been possible in which the Baltimore & Ohio Railroad Company might have raised a question as to the son's right to recover of it, in an action for injuries received through his father's carelessness such possible contingency would not excuse a want of due care on the part of the Pennsylvania Company. Charles Gallagher was not a trespasser, nor wrongfully on the premises where he was injured. And we cannot reach the conclusion that he bore such a relation to the Baltimore & Ohio Railroad Company that, while rendering needed assistance to that company, in compliance with the directions of its agent with such implied authority, he was placed beyond the pale of protection against the carelessness of the plaintiff in error."

See also cases cited in § 632, *infra*.

[1] In *Pelm* v. *Louisville & N. R. Co.* (1895) 17 Ky. L. Rep. 1004, 33 S. W. 396, it was held that one who has volunteered under an arrangement with a station agent to assist the latter in per-

sult is that a volunteer is deemed to assume all the risks, ordinary as well as extraordinary, which are incident to the work undertaken by him.[2] The most frequent illustrations of this doctrine, as applied to the assumption of ordinary risks, are to be found in those cases which proceed upon the theory that the rule by which an employer is relieved from responsibility to a servant injured by the negligence of a fellow servant, in the course of their common employment, applies to the case of a person who is injured while voluntarily assisting the servants in their work.[3] The position of the person under

forming his duties, and has done so for eighteen months, is bound to the same observance of the company's rules as is required of the agent.

[2] "It is also well settled that a person who, without any employment, voluntarily undertakes to perform service for another, or to assist the servants of another in the service of the master, either at the request or without the request of such servants, who have no authority to employ other servants, stands in the relation of a servant for the time being, and is to be regarded as assuming all the risks incident to the business." *Meltaire Street R. Co.* v. *Bolton* (1885) 43 Ohio St. 224, 54 Am. Rep. 803, 1 N. E. 333.

A person not in the employ of the company, who complies with a request of a watchman to signal a train to stop, voluntarily assumes the service and risks, if he signals, and cannot recover against the company for injuries suffered in doing so. *Blair* v. *Grand Rapids & I. R. Co.* (1886) 60 Mich. 124, 26 N. W. 855.

A bystander who attempts to assist in the switching of cars of a construction train, at the request of the head brakeman left in charge of the switching while the conductor is temporarily absent attending to his usual duties at the station, is a mere volunteer and assumes all the risks incident to the situation. The head brakeman of such a train has no implied authority to employ additional men, even though the existing force of hands is insufficient for the work. *Church* v. *Chicago, M. & St. P. R. Co.* (1892) 50 Minn. 18, 16 L. R. A. 861, 52 N. W. 647 (injury caused by defective car).

The last-mentioned case was cited with approval in *Evarts* v. *St. Paul, M. & M. R. Co.* (1894) 56 Minn. 141, 22 L. R. A. 663, 45 Am. St. Rep. 460, 57 N. W. 459. But the decision turned upon the question whether the volunteer had been wilfully or wantonly injured after his dangerous position was discovered. See § 629, note 2, *supra*.

[3] *Degg* v. *Midland R. Co.* (1857) 1 Hurlst. & N. 773, 3 Jur. N. S. 395, 26 L. J. Exch. N. S. 171. The position of the court will be apparent from the following extract from the opinion of Bramwell: "The facts stated by the declaration and the plea demurred to may be thus summed up. The defendants were possessed of a railway and carriages and engines; their servants were at work on the railway in their service with those carriages and engines; the deceased voluntarily assisted some of them in their work; other of the defendants' servants were negligent about their work; and by reason thereof the deceased was killed; the defendants' servants were persons competent to do the work; the defendants did not authorize the negligence. We are of opinion that, under these circumstances, the action is not maintainable. The cases show that if the deceased had been a servant of the defendants, and injured under such circumstances as occurred here, no action would be maintainable; and it might be enough for us to say that those cases govern this, for it seems impossible to suppose that the deceased, by volunteering his services, can have any greater rights or impose any greater duty on the defendants than would have existed had he been a hired servant. But we were pressed by an expression to be found in those cases, to the effect that 'a servant undertakes, as between him and the master, to run all ordinary risks of the service, including the negligence of a fellow servant' (*Wiggett* v. *Fox* (1856) 11 Exch. 832, 25 L. J. Exch. N. S. 188, 2 Jur. N. S. 955), and it was said there was no such undertaking here. But in truth there is as much in the one case as in the other; the consideration may not be as obvious, but it is as competent for a man to

taking work which he was not authorized to undertake is in nowise strengthened by the fact that his intervention therein was induced by the order of his own superior.[4]

agree, and as reasonable to hold that he does agree, that, if allowed to assist in the work, though not paid, he will take care of himself from the negligence of his fellow workmen, as it would be if he were paid for his services."

"Nor do we give force to the argument that places the plaintiff's service in the duty of the inspector, outside of those which he assumed as a carpenter. He made no objection to the service, had, a dozen times before, as he himself states, undertaken it as incident to his employment, and voluntarily. He therefore stands upon the same footing as if this service was within the scope of his agreement. One who volunteers to act with other employees becomes one himself, so far as to introduce between them the same rule of legal responsibility." *Kirk* v. *Atlanta & C. Air-Line R. Co.* (1886) 94 N. C. 625, 55 Am. Rep. 621.

"A volunteer can have no greater right than those servants have who are engaged in the service in which he joins," since "he makes himself one of a class who, as against their masters, have no right of recovery for each other's negligence." *Wischam* v. *Richards* (1890) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532.

The doctrine that the rule as to co-service is a bar to an action by a volunteer, for the reason that a stranger cannot, by offering his assistance, impose upon the person to whom such assistance is given any greater liability than that to which he is subject with regard to the servants hired by him, is also recognized in *Potter* v. *Faulkner* (1861) 1 Best & S. 800, 8 Jur. N. S. 259, 31 L. J. Q. B. N. S. 30, 10 Week. Rep. 93, 5 L. T. N. S. 455 (see note 5, *infra*); *Barstow* v. *Old Colony R. Co.* (1887) 143 Mass. 535, 10 N. E. 255; *Osborne* v. *Knox & L. R. Co.* (1877) 68 Me. 49, 28 Am. Rep. 16; *Wanton* v. *Texas & P. R. Co.* (1885) 63 Tex. 77, 51 Am. Rep. 637; and the cases cited in the following notes.

cannot recover, although he was obeying the order of his own superior, given at the request of the foreman of the manufacturer for more help, as in such case the service was not a part of his duties, and his superior had no authority to order him to perform it. *Wischam* v. *Richards* (1890) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532. Commenting on the conclusion of the court below, that the plaintiff could not be regarded as a volunteer, but was rather one engaged in the performance of a duty, the court said: "At first blush this seems very forcible and quite reasonable, and it had much weight with the writer until a thorough study of the subject, and of the authorities, led him to a different view. As I regard the matter, the cases teach us that it is not because the associated servant is a volunteer that he is denied redress for the negligence of a fellow servant, but because it is the well-established law of the relation between the servants whom he joins, and their master, that there is no such liability on the part of the master. Hence, by joining them in their common service, he becomes, as to the master, one of them, with the same rights and duties as to the master, but with no higher rights as against him. Certainly, without his consent, he cannot reasonably be subjected to a greater obligation, by the act of one of his servants in engaging the service of another, than he is under to that servant. If this be so, as was held in the cases cited, how does it matter in what manner the request of the defendant's servant was communicated to the plaintiff? Let it be that it came in the form of an order from his own superior, and that he was in duty bound to obey the order. It was still only done at the request of the defendant's servant, and the question we have to decide is the liability of the master. We have seen that his liability cannot be increased, without his consent, by the act of his servant, and it is that reason which is fundamental in the discussion which demonstrates his freedom from obligation for his servant's act. But if this is the determining reason of the argument, it is just as applicable where the servant's request is communicated through, or made the basis of, an order by a third person to

[4] In a case already cited, it was held that a servant of a factory owner, injured while assisting in unloading machinery which it was the duty of the manufacturer to deliver, is a volunteer and hence a fellow servant with the employees of the latter, against whom he

A person suing for injuries received in the performance of work undertaken by him as a volunteer is placed in this dilemma,—that, if the evidence shows that he was not authorized to perform, as a servant, the work in question, the party for whom the work was done owed him no obligations as a master; while, on the other hand, if his claim to be put on the footing of a servant is admitted the doctrine of common employment operates as a bar to his recovery.[5]

the plaintiff. It is very plain, for that is decided, that if Wiegner, who was Wischam's superior, had himself joined the service at the request of Harvey, and been injured, he could not have recovered. How then, can he confer upon Wischam, who is at best only his representative, a right of action against Rickards which he did not possess himself? We cannot see. It may be true that Wischam was subject to a duty to obey Wiegner, but that was no duty to the defendant; it was no duty to which the defendant had any relation whatever, and it is only the defendant's obligation that is in question here. We cannot think, therefore, that the defendant's liability was in any manner increased, by the fact that Harvey's request for assistance was answered by Wischam's joining in the service in consequence of an order from his superior. It was still only a participation by Wischam in an associated service, the law of which excludes him from compensation to be recovered from the master for the negligence of his associates."

[5] In *Degg* v. *Midland R. Co.* (1857) 1 Hurlst. & N. 773, 26 L. J. Exch. N. S. 171, 3 Jur. N. S. 395, Bramwell, B., after laying down the doctrine that the action was barred by the doctrine of common employment (see note 2, *supra*), proceeded thus: "But we were also told that there was and could be no agreement; that Degg was a wrongdoer, and therefore the action was maintainable. It certainly would be strange that the case should be better if he were a wrongdoer than if he had not been. We are of opinion that this argument cannot be supported. We desire not to be understood as laying down any general proposition that a wrongdoer never can maintain an action. If a man commits a trespass to land, the occupier is not justified in shooting him, and probably if the occupier were sporting or firing at a mark on his land, and saw a trespasser, and fired carelessly and hurt him, an action would lie. Nor do we desire to give any opinion on the cases cited of *Bird* v. *Holbrook* (1828) 4 Bing. 628, 1 Moore & P. 607; and *Lynch* v. *Nurdin* (1841) 1 Q. B. 29, 4 Perry & D. 672, 5 Jur. 797. But it is obvious, and a truism, to say that a wrongdoer cannot, any more than one who is not a wrongdoer, maintain an action unless he has a right to complain of the act causing the injury, and complain thereof against the person he has made defendant in the action. Now, it may be that, had the mischief here resulted from the personal act of the master, he knowing that the deceased was there, the master would have been liable; and that, as the defendants' servants knew the deceased was on the railway, and because they knew that they were guilty of a wrong to him, they are liable to an action: but on what reason or principle should the defendants be? If a servant is driving his master in a carriage, and a person gets up behind, and, the servant knowing it, drives carelessly and injures that person, the servant may be liable, but why the master? The law, for reasons of supposed convenience, more than on principle, makes a master liable in certain cases for the acts of his servants—not only in cases in the nature of contract, which depend on different considerations, but in cases independent of contract,—such as negligent driving in the public streets, when damage is thereby done. This is a responsibility the law has put on them: there is a duty on them to take care that their servants do no damage to others by negligence in their work for their master, or to compensate the sufferer where such damage is done. The public interest may require this for the public benefit; but why should a wrongdoer have power to create such a responsibility and such a duty? No reason can be assigned. Some acts are absolutely and intrinsically wrong, where they directly and necessarily do an injury,—as a blow: others only so from their probable consequences. There is no absolute or intrinsic negligence; it is always relative to some circumstances of time,

The latter alternative arises where the injured person was an emergency assistant hired by an employee who had, under such circumstances, authority to engage him, although ordinarily he was not

place, or person. It is not negligent or wrong for a man to fire at a mark in his own grounds at a distance from others, or to ride very rapidly in his own park; but it is wrong so to fire near to, and so to ride on, the public highway; and though the quality of the act is not altered, it is wrong in whoever does it, and so far it is as though it were intrinsically wrong. So, the act of firing or riding fast in an inclosure becomes wrong if the person doing it sees that there is someone near, whom it may damage. But the act is wrong in him only for the personal reason that he knows of its danger: it would not be wrong in anyone else who did not know that. Now, for a wilful act intrinsically wrong by a servant the master is not liable. By a parity of reason he ought not to be where the act, not wrong in itself, is only so for reasons personal to the servant, and his wilful disregard of them. The master's liability ought to be limited to that which he may anticipate and guard against, namely, the middle class of cases we have put. However this may be, it seems to us there can be no action except in respect of a duty infringed, and that no man, by his wrongful act, can impose a duty: and as a direction by the master to drive furiously, or in the way called carelessly, in his park would not be wrong in the master, it cannot be made so by a trespasser getting there and being hurt; so that *quoad* the master it is *damnum absque injuria;* and if not a wrong in the master, when expressly ordered, it cannot be, if done by the servant against his orders. The defendants might, if they had thought fit, have directed their servants to move and propel trucks against other trucks without any notice or precaution,—in short, to do what the plaintiff complains of: and if their servants chose to work on those terms, although it might be a wasteful way of using their engines and carriages, no one could say it was wrongful; then the deceased cannot make it so by coming there himself. Upon these grounds, then, whether he is considered a wrongdoer or not, we are of opinion the action cannot be maintained, and that the plea is good."

In *Potter* v. *Faulkner* (1861) 1 Best & S. 800, 31 L. J. Q. B. N. S. 30, 8 Jur. N. S. 259, 5 L. T. N. S. 455, 10 Week. Rep. 93, the defendant's porters were lowering bales of cotton from the defendant's warehouse, and his carter was receiving them into his lorry (small wagon). The plaintiff, who was waiting with a lorry to receive a load of cotton for his master, at the request of the defendant's carter assisted him, and in consequence of the negligence of the defendant's porters a bale of cotton fell upon and injured him. It was held that the defendant was not liable to an action. Ex. Ch., J., said: "The plaintiff intervened to assist the servant who was in the cart, and, so far as the master was concerned, was a volunteer upon the occasion, and was injured by what was found to be negligence in the defendant's servants in the warehouse. The question is, Can the plaintiff, under the circumstances, sue the master for the negligence of his servants? This is the case of one who volunteers to associate himself with the defendant's servant in the performance of his work, and that without the consent or even the knowledge of the master. Such an one cannot stand in a better position than those with whom he associates himself, in respect of their master's liability; he can impose no greater obligation upon the master than that to which he was subject in respect of a servant in his actual employ; and it is clear law that the master would not have been liable if the servant below had been injured by the negligence of the servants above. As between master and servant, the duty of the master is to take due care to employ other servants of competent skill and ordinary carefulness: when he has done that, he has done his duty as between himself and his servants, and we are of opinion that the liability contended for by the plaintiff does not attach to an employer."

In *Flower* v. *Pennsylvania R. Co.* (1871) 69 Pa. 210, 8 Am. Rep. 251, while a locomotive was at a water station, the fireman asked a boy ten years old, who was standing there, to turn on the water. Whilst he was climbing on the tender to put in the hose, the remainder of the train came down with the ordinary force and struck the car attached to the engine; the jar threw the boy under the wheels and he was

invested with any such power;[6] or where the services, although voluntarily offered in the first instance, were accepted by the master's agent.[7]

632. Persons not deemed to be subject to the disabilities of volunteers.—The rule discussed in the preceding section is subject to the important qualification that, where one who has an interest in the work to be performed, and for his own convenience, or to facilitate or expedite his own work or that of his employer, assists the servants of another, at their request or with their consent, he is not thereby deprived of his right to be protected against the carelessness of the other's servants.[1] It will be observed that the essential ground upon

killed. In an action by the parents for his death, it was held that the company was not liable. Agnew, J., in delivering the opinion, said: "The true point of this case is that, in climbing the side of the tender or engine at the request of the fireman, to perform the fireman's duty, the son of the plaintiff did not come within the protection of the company. To recover, the company must have come under a duty to him which made his protection necessary. Viewing him as an employee at the request of the fireman, the relation itself would destroy his right of action. *Caldwell* v. *Brown* (1856) 53 Pa. 453; *Weger* v. *Pennsylvania R. Co.* (1867) 55 Pa. 460; *Cumberland Valley R. Co.* v. *Myers* (1867) 55 Pa. 288. Had the fireman himself fallen, in place of the boy, he could have had no remedy. It does not seem to be reasonable that his request to the boy to take his place, without any authority, general or special, can elevate the boy to a higher position than his own, and create a liability where none would attach had he performed the service himself."

Commenting on this case in *Wiscbam* v. *Rickards* (1890) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532, the court said: "The very important proposition declared in this case is that the servant of the company cannot impose a higher liability upon it than it was under to himself, by any act of his, and that the person rendering assistance in the service of the company, at the request of its servant, can have no other or different remedy against the company than the servant himself had. It seems to be a reasonable doctrine, founded in sound principles."

Where a casual passer by, at the request of an employee, gets on a car and applies brakes thereto, and is injured by the negligence of coemployees, he is not entitled to recover from the company. If the request was made by an employee having authority to employ him, he is in no better position than any other servant injured by the negligence of his coservants. If the request was made without authority, he is a mere interloper, to whom the company owes no duty either as a servant, passenger, or traveler. *Everhart* v. *Terre Haute & I. R. Co.* (1881) 78 Ind. 292, 41 Am. Rep. 567.

Whether, in rendering assistance in repairing a machine at the request of the foreman, the servant injured was acting within the scope of his employment or not is immaterial, so far as regards the application of the rule as to coservice to the duty and obligations of the employer, which are the same towards a volunteer as towards a servant acting within his employment. *Stevens* v. *Chamberlain* (1900) 51 L. R. A. 513, 40 C. C. A. 421, 100 Fed. 378.

[6] *Mathis* v. *Rochester R. Co.* (1899) 41 App. Div. 66, 58 N. Y. Supp. 210. An assistant in this case held to be a fellow servant of the employee who hired him.

A complaint alleging that it became necessary for the employees in charge of one of defendant's freight trains to call in assistance to operate it, which they had the right and power to do, and that plaintiff was injured in complying with a request of one of those employees to give such assistance, does not show that he was not a mere volunteer. *Watson* v. *Texas & P. R. Co.* (1885) 63 Tex. 577, 51 Am. Rep. 637.

dence tended to show
charge of the gravel t
men working for J. to
ing the earth out of the cars, and that, while they were so engaged, a broken car, unevenly loaded, tipped over and fell upon one of them, the plaintiff's decedent. Discussing the contention of the defendant that it was the duty of the servants of the railroad company to dump J.'s earth out of the cars, that they had no authority to employ J.'s men to [illegible] them, that the men were trespassers attempting to do so, and that, in assisting the railroad company [illegible] no duty, as under obligation to protect them against the negligence of its servants the court said: "The distinction running through the cases is this—that where a volunteer, that is one who has no interest in the work, undertakes to assist the servant of another, he does so at his own risk. In such a case the maxim of *respondeat superior* does not apply. But where one has an interest in the work, as a consignee or the servant of [illegible] or in any other capacity requests or with the consent of the master's servants undertakes to assist, he does not do so at his own risk, and if injured by their negligence is responsible. In such a case the maxim of *respondeat superior* does apply. [illegible] turn is the [illegible] of interest. In one case the party injured is a mere intruder, an officious meddler. In the other, he is in the regular pursuit of business, and entitled to the protection as anyone whose business with the master exposes him to injury from the careless[illegible] servants."

If the injured person is not a volunteer, but engaged at the request or with the permission of the railroad company in a transaction of interest as well to himself or his master as to the railroad company, he is entitled to the same protection against the negligence of the company's servants as if he were at the time attending to his own private affairs. Though performing a service beneficial to both, he is doing so in his own behalf, and not as a servant of the company. *Lawson v. Sabine & E. T. R. Co.* (1888) 65 Tex. 577, 57 Am. Rep. 606 (employee of mill company shipping lumber by railway company held not to be fellow servant of trainmen in helping to couple cars, so as to expedite the discharge of the lumber).

A passenger on a street railroad who assists, at the request of the driver in unmuring the car on a siding, which is necessary for the continuance of the journey, may recover for injuries inflicted by the negligence of the company's servants. *Wilmington Street R. Co. v. Belton* (1885) 43 Ohio St. 224, 54 Am. Rep. 803, 1 N. E. 333. The court, after laying down the rule as to the disabilities of volunteers (see § 634, note 2, *supra*), proceeded thus: "But it does not follow that, under all the circumstances, a person who assists the servants of another in the discharge of their duties, without employment by the master, is to be regarded as voluntarily assuming the relation of a fellow servant or the risks pertaining to that relation. To illustrate: suppose a servant in driving his master's team on the highway founders in such a manner as to prevent the use of the highway by others for the time being. Another person who is thus impeded in the use of the road assists the servant, either with or without request, to remove the impediment to travel from the highway. Such other person does not thereby become the fellow servant of the driver. Indeed, in no just sense has he voluntarily entered the service of the master. And the rule of law first above stated does not apply to the case supposed, and therefore it was not error in the court of common pleas to refuse it. . . . The plaintiff . . . was not a mere volunteer, within the meaning of the rule of law contended for by the plaintiff in error; but as a passenger on the northbound car was interested in having it driven to its destination. To this end it was necessary to pass the southbound car. This could only be accomplished by pushing the northbound car back upon the siding. In doing this, although it may not have been absolutely necessary for the passenger to assist the driver, it was a

those words.[3] The same general consideration, viewed from a different standpoint, is presumably the basis of the decision that a passer-by who is casually appealed to by a workman for information respecting a thing which the latter is doing in a public thoroughfare is not to be considered a volunteer assistant, so as to exonerate the workman's master from responsibility for an injury resulting to the former from the workman's negligent mode of doing the work.[4] Whether the rule itself or the qualification is to determine the liability of the defendant in any particular case depends upon the fact in evidence.[5]

prudent and reasonable act justified by the circumstances of the case,—not a wrongful interference and intermeddling with business in which he had no concern. It was not, in fact or in law, an assumption of risk from the carelessness of the defendant or any of its servants."

In *Louisville & N. R. Co.* v. *Ward* (1897) 98 Tenn. 123, 38 S. W. 727, where it was held that a man engaged by a shipper of goods to load them on cars did not become a volunteer, when complying with the request of a brakeman to assist in placing the cars in a more convenient situation, the court reasoned as follows: "It is earnestly insisted, however, that the rule of liability cannot exist unless there was a necessity on the part of the railroad to have the services of the plaintiff; and that, if the business was that of the railroad, and it had sufficient force to perform it, then the plaintiff must be considered a volunteer and intermeddler. But none of the cases holding the company liable proceed upon this ground, but upon the more satisfactory one, whether the plaintiff is to be regarded in such cases as expediting and forwarding his own business, or that of the railroad company, either as an accommodation or as a necessary help. In other words, was he engaged in his own business or that of the railroad? If the former, the road is liable if there is negligence; if the latter, it is not, because the negligence is that of a fellow servant: and this is equally so whether his aid is necessary to the road's performance of its duty or not. The emergency or necessity which will authorize him to aid the railroad, and protect him in so doing, is one that arises in his own business, and not in that of the railroad company."

A person who, with the station master's consent, assists in the shunting of a car on which goods for him have been brought, is not a mere volunteer, but is on the premises for the lawful purpose of assisting in the landing of the goods, and may recover if he is injured by the negligence of the company's servants. *Wright* v. *London & N. W. R. Co.* (1875) L. R. 10 Q. B. 298.

Where the putting of a heater in a distillery was the joint undertaking of the distillery company and the maker of the heater, the distillery company is liable to one of its servants, who assisted in the work by direction of its foreman, for an injury resulting from the breaking of a defective rope furnished for the work. *Old Times Distillery Co.* v. *Zehnder* (1899) 21 Ky. L. Rep. 753, 52 S. W. 1051.

[3] See language used by the court in *Wischam* v. *Rickards* (1890) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532; *Metairie Street R. Co.* v. *Bolton* (1885) 43 Ohio St. 224, 54 Am. Rep. 803, 1 N. E. 333; *Texas & P. R. Co.* v. *Sabine & E. T. R. Co.* (1886) 65 Tex. 377, 57 Am. Rep. 606.

[4] *Cleveland* v. *Spier* (1864) 16 C. B. N. S. 399.

[5] In *Wischam* v. *Rickards* (1890) 136 Pa. 109, 10 L. R. A. 97, 20 Am. St. Rep. 900, 20 Atl. 532, the facts of which are stated in the last section, the contention of plaintiff's counsel that the injured person was acting in his master's interest was thus rejected: "The plaintiff did become one of the servants of the defendant, to assist in the defendant's act of delivering the wheel. He was so acting in response to the request of one of the defendant's servants; he had a right or interest in the wheel or its delivery, and what he did was done on behalf of the defendant and in connection with the defendant's servants. The delivery was not completed, but was going on when the accident occurred.

633. Right of action where servants undertake new duties.—Cases determined upon principles identical with, or closely analogous to, those discussed in the preceding sections are those in which the injury was received by a person who, at the time when the accident occurred, was already in the employ of the defendant, but who is alleged to have gone outside the proper scope of his employment, without being directed to do so either by the master or by an agent who was authorized to transfer him to the new sphere of duty. The rule applicable to such circumstances has been formulated as follows: "If an employee quits the work assigned to him by his employer, and voluntarily undertakes to do work about which he had no duties to perform by virtue of the contractual relation existing between him and his employer, then, while such condition exists, the duty growing out of that relation of using care for his safety does not rest upon the employer."[1] In other words, a servant who voluntarily and without directions from the master, and without his acquiescence, goes into hazardous work which is not embraced in the contract of hiring, may be regarded as putting himself beyond the protection of his master's implied undertaking.[2] Numerous decisions exemplifying this rule are collected in the subjoined note.[3]

and the delivery was the act of the defendant. The participation of the plaintiff was not that of an owner receiving his own goods, but was that of a servant assisting the servants of the defendant; and this circumstance brings it within the rule of nonliability. The distinction is refined, but it seems to be substantial, and we feel constrained to recognize it and enforce it."

A messenger boy in a telegraph office, who, while traveling on a train, voluntarily performs a service as switchman, at the request of the foreman of the yard, is not forwarding his own private interest, but places himself thereby in the position of a fellow servant of the foreman and the engineer of the train. *Texas & N. O. R. Co.* v. *Skinner* (1893) 4 Tex. Civ. App. 661, 23 S. W. 1091.

[1] *Southern R. Co.* v. *Guyton* (1898) 122 Ala. 231, 25 So. 34.

A servant "could not voluntarily do an act which he was not required to do, and charge the master with responsibility for the resulting injury."—especially where the dangers incident to the work undertaken were obvious. *McCue* v. *National Starch Mfg. Co.* (1894) 142 N. Y. 106, 36 N. E. 809.

Where a servant, merely to oblige a fellow servant, volunteers to do work which the master did not employ or require him to do, and which he did not undertake to do, there can be no recovery, even if the machinery by which he was injured was in a defective condition. *Quaid* when work the relation of master and servant does not exist. *Knox* v. *Stephens* (1870) 1 Viet. L. Rep. (L.) 102.

A servant who attempts to perform work outside the scope of his employment, without or contrary to the orders of the master, assumes his own risk, and cannot recover for injuries caused by defective machinery. *Ray* v. *Diamond State Steel Co.* (1900) 2 Penn. (Del.) 525, 47 Atl. 1017 (in charge to jury).

A servant who, in disregard of the master's instructions, but in compliance with those of a vice principal, does work outside of and more hazardous than his regular employment, assumes the risk, notwithstanding that, prior to the special instructions of the master to him, a general instruction that all employees were to look to the vice principal had been given. *Indiana Natural & Illuminating Gas Co.* v. *Marshall* (1898) 22 Ind. App. 121, 52 N. E. 232.

[3] (a) *Recovery denied.*—Where a sec-

634. Same subject continued.— The scope of a servant's duties in relation to the rule illustrated by the cases cited in the last section

tion man is taken off his section to perform a service for his foreman individually, the company cannot be held liable unless its course of conduct was such as to furnish a reasonable ground for his believing that the foreman had authority to engage him in such employment. *Hurst* v. *Chicago, R. I. & P. R. Co.* (1878) 49 Iowa, 76, disapproving instructions which made the company liable in any event for injuries caused by defects in the hand car on which the plaintiff was traveling, if the services required of him were apparently in the line of his employment.

A switchman injured in coupling cars at the request of the engineer cannot recover. *Bradley* v. *Nashville, C. & St. L. R. Co.* (1884) 14 Lea, 374.

A railway employee who "stakes off" cars, without any directions from an agent of his employer, and merely at the request of a fellow servant, cannot recover. *Watts* v. *Hart* (1893) 7 Wash. 178, 34 Pac. 423, 771.

The fact that a brakeman has received directions to comply with the instructions of the engineer will only justify his obedience to such instructions in so far as they relate to matters which are within his proper duty as a brakeman, and does not warrant his complying with an order to pass from his post on the last car to the front end of the train, while it is in motion, for the purpose of getting off in time to shift the points and mount the train while it is still moving. *Sutherland* v. *Mookland R. Co.* (1857) 19 Sc. Sess. Cas. 2d series, 1004. [The American practitioner should remember that the cars with reference to which this ruling was made were not constructed like those used in the United States, with a view to trains being traversed from end to end, while in motion.]

An employee injured in loading rails on a moving car cannot recover for an injury caused by his attempting to straighten a rail after it was put on the car, where the evidence is that this was a duty not required of him by his employer. *Cleveland, C. C. & St. L. R. Co.* v. *Carr* (1901) 95 Ill. App. 576.

Where a freight conductor, on being informed by the road superintendent that the culverts on each side of a trestle situated a short distance beyond the station where the intelligence was given were probably in a dangerous condition, owing to a heavy fall of rain, detached the engine and proceeded to examine the structures, it was held that, in view of the emergency and of the fact that he was exercising such ordinary care as was necessary for the safe movement of the train, his action was not outside the scope of his employment, and that he was therefore entitled to recover for injuries resulting from the collapse of the trestle (about the condition of which nothing had been said by the superintendent) while the engine was crossing it to reach the second culvert. *Terre Haute & I. R. Co.* v. *Fowler* (1900) 154 Ind. 682, 48 L. R. A. 531, 56 N. E. 228.

Where the evidence shows that the injured servant left a place where he was in no danger, in order to stop a runaway car passing on a side track, and closed a switch left open to prevent car running onto the main track; that, while in pursuit of the car on the main track he was run over by a second runaway car; and that he had no duty to perform about such car or its operation, and acted without request or direction,— no recovery can be had, though such car ran away because of a defective brake, since the proximate cause of injury was the servant's voluntary act. *Wetzell* v. *Maine & N. H. Granite Co.* (1899) 70 N. H. 125, 85 Am. St. Rep. 618, 46 Atl. 684.

No action can be maintained for an injury received by a servant while he was making certain repairs which it was no part of his duty to make, the evidence being that he had commenced the performance of the work of his own free will, upon the suggestion of a fellow workman, after he had asked and obtained the consent of his own immediate superior. Under such circumstances, he was declared to be only a volunteer, and to stand in no better position than a stranger would have done, who should have offered and been permitted to make the same repairs. *Walker* v. *Merchants' Mfg. Co.* (1890) 150 Mass. 362, 5 L. R. A. 792, 23 N. E. 100.

Where a weaver complied with the request of the "loom fixer" to assist him in adjusting a belt, it was held that the risks of the work undertaken were assumed by the weaver, as there was no evidence that the machinery or belting

is defined by what he was employed to perform, and by what, with the knowledge and approval of his employer, he actually did per-

was defective, or that the "loom fixer" had any authority to permit or require plaintiff to assist him. *Parent* v. *Nashua Mfg. Co.* (1900) 70 N. H. 199, 47 Atl. 261.

Recovery was denied under the same circumstances in *Martin* v. *Highland Park Mfg. Co.* (1901) 128 N. C. 264, 83 Am. St. Rep. 671, 38 S. E. 876.

Recovery has been denied where the plaintiff asked his foreman to adjust a belt which communicated power to a machine, and tried to do this himself, when the foreman refused his request, saying that he had no time, and that, if plaintiff wanted it, he could put the belt on himself. *Thompson* v. *Cary Mfg. Co.* (1901) 62 App. Div. 279, 70 N. Y. Supp. 1086.

No cause of action is stated by a complaint which alleges that plaintiff was a machinist in the employ of defendant, and while in the engine room he placed his hand on the latchet of the engine, at the request of the engineer, while the latter was making a wedge fastening, and that in so doing his hand was badly hurt, and charges negligence of defendant in furnishing defective appliances, and in not stopping the engine for repairs, but which contains no averment that defendant required plaintiff to make any repairs while the engine was in operation, or that the engineer was his superior officer, with power to direct his services. *Branham* v. *Camden Cotton Mill* (1901) 61 S. C. 491, 39 S. E. 708.

An employer is not liable for an injury to a servant, received while making repairs upon the machinery used by him, because of its failure to instruct him as to the danger attending such work, where it was not the duty of the servant to make the repairs, but merely to report the fact that repairs were needed, to a machinist in the same building. *McCue* v. *National Starch Mfg. Co.* (1894) 142 N. Y. 106, 36 N. E. 809.

Where an elevator tender, instead of reporting the existence of a defect in the elevator to the employee charged with keeping it in repair, exposes himself to danger in putting it to rights, he cannot recover. *Degnan* v. *Jordan* (1895) 164 Mass. 84, 41 N. E. 117.

A servant injured while attempting to put a belt on a line shafting cannot recover therefor if the act was out of the line of his employment, and undertaken without the order or consent of the employer. *Chadosky* v. *Hoopes & T. Co.* (1894) 1 Marv. (Del.) 273, 40 Atl. 1127 (in charge to jury).

Where plaintiff went outside the scope of her duties, and without any request or direction by the superintendent volunteered to assist him in ascertaining the cause of the defective condition of the machine which she operated, she cannot recover for injuries received while she was so doing. *Allen* v. *Hixson* (1900) 111 Ga. 460, 36 S. E. 810 (plaintiff took hold of unwrapped cloth for the purpose of showing the condition of the machine, and had her hand drawn into the machine as a result of a sudden jolt). This decision, however, seems to be a very dubious application of the general rule, as the superintendent was standing by the employee, and it would seem to have been at least a question for the jury whether his acquiescence should not have been regarded as being the legal equivalent of an antecedent order.

A coal miner who accepts the invitation or obeys the order of another not authorized to command him, and voluntarily places himself in a dangerous position in aiding the latter in performing a service which it was not his duty to perform, cannot maintain an action against the coal company for an injury sustained by him while performing such act. *Knox* v. *Pioneer Coal Co.* (1891) 90 Tenn. 546, 18 S. W. 255 (piece of slate fell on plaintiff).

(b) *Recovery allowed.*—The fact that a servant engages in the performance of special duties different from those for which he was employed does not make him a volunteer, where he was acting under the orders of a superior who was authorized to call for his services under the circumstances. *Blackman* v. *Thomson-Houston Electric Co.* (1897) 102 Ga. 64, 29 S. E. 120.

A fireman who, while looking from the cab to see if a journal had become heated and was smoking, was struck by a leaning telegraph pole but 4 inches distant from the locomotive, is deemed to have received his injuries within the line of his duty. *Renthan* v. *New York C. & H. R. R. Co.* (1897) 24 App. Div. 303, 48 N. Y. Supp. 503.

A special conductor in charge of certain cars in a train, who, at the request of the regular conductor, undertakes to uncouple and divide the train, takes upon himself the risk of the act which he thus undertakes to perform; but if, after he has performed it and resumed his proper position relative to the train, the car on which he is standing is suddenly jerked forward by the negligence of the engineer, he may be entitled to recover for the injuries thereby caused to him. *Cumberland Valley R. Co.* v. *Myers* (1867) 55 Pa. 288.

Where the yard master of a railroad company has authority to employ necessary assistants in his department, a person working therein as a brakeman with his permission or by his direction is a servant of the company, the same as the paid employees, and not a trespasser. *Central Trust Co.* v. *Texas & St. L. R. Co.* (1887) 32 Fed. 148.

Where a conductor on a freight train, who had been such for seven years, and who was a brakeman a number of years before that, attempted to make a coupling of a car when his train was several minutes late and the brakeman had made three unsuccessful attempts to make the coupling, and was run over and killed while so engaged, the railroad company is not relieved from liability on the ground that he was not authorized to couple cars. *Sidy* v. *Southern P. Co.* (1890) 6 Utah, 319, 23 Pac. 751. In the Supreme Court of the United States (1894) 152 U. S. 145, 38 L. ed. 391, 14 Sup. Ct. Rep. 530) recovery was denied on the grounds of assumption of obvious risk and contributory negligence in coupling where there was a defective frog. The above point was not noticed.

A telegraph operator in the employ of a railroad company does not, by going on a the railroad track to stop a train which has failed to obey his signal, in order to avoid a collision, become a trespasser, so as to lose his right to have the company exercise the utmost care for his safety. *Illinois C. R. Co.* v. *Mahon* (1896) 17 Ky. L. Rep. 1200 34 S. W. 16.

A submission to the jury of the question whether the plaintiff was working within the scope of his employment is warranted by evidence to the effect that, having had no experience in milling, he was placed at the rear of a planer, and directed to receive the planed boards as they came through; that the planer was supplied with a blower pipe, through which the shavings were brought; that in consequence of this pipe being defective the shavings were packed beneath the machine, and obstructed its operations; that he was given no directions as to his duties, and understood that he was to clean away the shavings; that in doing this, while the machine was in operation, he lost his hand by its coming in contact with the knives of the machine; and that, according to the testimony of plaintiff's brother, who had charge of the machine and who was an experienced workman, the man who took away the boards was required to keep the shavings away. *Bennett* v. *Warren* (1901) 70 N. H. 564, 49 Atl. 105. In this case it was held not to be error for the court to charge that defendant would not be responsible for any orders given by plaintiff's brother in regard to plaintiff's duties, if plaintiff was doing an act not a part of his duty when injured, but that the question was whether plaintiff was acting within the scope of his employment when he was injured, and, if not, defendant was not liable, though plaintiff's brother directed him to do the act.

A machinery company which puts up a wringer in a laundry, and subsequently sends an engineer to make changes therein, is liable to an employee of the laundry, who, while complying with the request of such engineer to assist him in making the changes, is injured by a failure to properly secure the wringer for the work required of it. *Troy Laundry Mach. Co.* v. *Brady* (1895) 66 Ill. App. 379.

A man employed in the press room of a newspaper, who during the few days he has been at work has been assisting to set up a new printing machine, cannot be said, as a matter of law, to have acted as a mere volunteer in complying with the request for assistance made by another workman who is operating one of the machines already in use, where the evidence is that the same foreman had charge of all the servants in the room and it does not appear that there was any distinct line drawn between the departments of those engaged in setting up the machines and those engaged in operating them. *Voyer* v. *Dispatch Printing Co.* (1895) 62 Minn. 393, 64 N. W. 1138.

When there is evidence that servants used an elevator as they had occasion; that there was no one to take charge of it; that the belt by which it was operated was liable to come off, the various employees were in the habit of

form, rather than by the mere verbal designation of his position.[1] The question whether the injured person was acting in the course of his employment is for the jury, where the evidence is conflicting,[2] or where a difference of opinion may reasonably be entertained with

putting it on, and that there were no rules of the employer forbidding or regulating the putting on of the belt,—it cannot be said, as a matter of law, that an employee injured while putting on the belt in the usual manner was acting negligently and without the scope of his employment, and that the employer was free from negligence. *Daley* v. *American Printing Co.* (1891) 152 Mass. 581, 26 N. E. 135.

An employee charged to keep a machine running and to tie in a bolt if it fell out was injured in the line of his duty, if he was hurt while attempting to secure the bolt as instructed. *Greenville Oil & Cotton Co.* v. *Harkey* (1899) 20 Tex. Civ. App. 225, 48 S. W. 1005.

Closing one of the large doors of a pier left open during the day is in the line of duty of a night watchman employed to prevent pilfering by river thieves, and recovery may be had for his death, resulting from injuries sustained by him while attempting to close the door, on account of its defective condition. *Upton* v. *Bartlett* (1891) 37 N. Y. S. R. 193, 13 N. Y. Supp. 151.

A workman who eats his dinner, according to his usual custom, upon his master's premises during the noon day intermission of work, is not a trespasser, as he has an implied permission to stay there. Under such circumstances, if he is called upon to resume labor before the regular period of intermission has expired, it is his duty to do so, and whatever he does in compliance with such a request is not voluntary on his part, as being outside the scope of his employment. *Broderick* v. *Detroit Union R. Station & Depot Co.* (1885) 56 Mich. 261, 56 Am. Rep. 382, 22 N. W. 802.

Where an employee in a sawmill, while on his way to discharge a duty which he had been ordered to perform, in passing along one of the open thoroughfares of the mill, stopped to exchange a remark with a fellow employee concerning the operation of the machinery, and was injured by the breaking of a belt, such action on his part was not inconsistent with the proper discharge of his duty, and he was not precluded from recovery on the ground that he was not engaged in the discharge of any work. *Moore* v. *W. B. Pickering Lumber Co.* (1901) 105 La. 504, 29 So. 990.

The chief of a fire company composed wholly of railroad employees, and which has been voluntarily organized for the protection of the railroad property, but which is not under the control of the railroad company, although the latter furnishes the apparatus and allows the firemen to drill during work hours without deducting any time, and also allows the chief an hour once a week without deduction to inspect its premises,—owes the duty to the company to aid in extinguishing a fire, and in doing so acts as its employee and not as a mere volunteer who must assume all the risks of such action. *Collins* v. *Cincinnati, N. O. & T. P. R. Co.* (1892) 13 Ky. L. Rep. 670, 18 S. W. 11.

That the foreman of one gang of section men, under whose direction a member of another gang was working at the time he received an injury, supposed the latter was a mere volunteer with reference to the particular work, does not affect the master's liability, where he in fact was directed by his own foreman to work under the direction of the other foreman. *Southern R. Co.* v. *Guyton* (1898) 122 Ala. 231, 25 So. 34.

Where it was a part of plaintiff's duty to wheel sand to a sand sifter, the contention that he was not entitled to recover, because he would not have been injured had he remained at work under the stage, where he had been placed at work by the defendant, and that he was under no obligation to sift sand at the request of the mortar man, was held not to be sustainable, where one of the members of defendant corporation was present, and made no objection to his doing the work requested. *Witkowski* v. *George W. Carter & Sons Co.* (1901) 60 App. Div. 577, 70 N. Y. Supp. 232.

[1] *Rumwell* v. *Dilworth, P. & Co.* (1885) 111 Pa. 343, 2 Atl. 355, 363.

[2] *Southern R. Co.* v. *Guyton* (1898) 122 Ala. 231, 25 So. 34.

regard to the proper inference to be drawn from the testimony.[1] Otherwise that question is decided as one of law by the court.[2]

Any evidence which has a bearing upon the actual scope of the servant's duties is admissible.[3] One of the most important circumstances to be considered is whether the servant had ever, upon any other occasion, engaged in work similar to that which he was doing when the injury was received. If the conditions under which such work had previously been performed were such as to warrant the inference that the enlargement of his regular functions had been acquiesced in to the extent shown, a court will, in most instances, decline to say, as a matter of law, that the servant was injured outside the proper scope of his employment.[4] The acquiescence upon which

[1] Whether an engineer of a pump engine in a mine was acting beyond the range and scope of his employment when killed by the sudden descent of tram cars, which were being pulled up the tramway on the mining slope ahead of him, is a question for the jury, where he was obliged to go to and from his work along the slope, and was charged with the duty of looking after water pipes extending along the slope through its entire length, and at the moment of the accident he was wanted at the mouth of the mine by the foreman. *Whatley* v. *Zenida Coal Co.* (1899) 122 Ala. 118, 26 So. 124.

[2] See cases cited in notes 3, subd. (a), to last section, and 6, *infra*.

[3] In an action by a brakeman against the company for injuries while coupling cars, a printed rule of the company, describing the duties and authority of conductors in the management of trains, was admissible to show that the plaintiff was acting under the lawful authority of the defendant at the time of the injury. *Louisville, N. A. & C. R. Co.* v. *Fearley* (1886) 110 Ind. 18, 9 N. E. 594.

In a case where it is a matter of dispute whether the plaintiff was in the line of his duty in attempting to adjust a belt which operated an elevator, it is error to exclude evidence to the effect that the belt was frequently off the pulley, that there was no one specially charged with the duty of putting it on, and that everyone using the elevator had to put the belt on. *Daley* v. *American Printing Co.* (1889) 150 Mass. 77, 22 N. E. 439.

[4] An employee in a mill, who has at previous times assisted in repairing machinery, injured while replacing a chain on a wheel in response, and in good faith, to the call of the operator of the machine and to prevent the suspension of the work of forty men, in the absence of the persons whose regular duty it is to replace the chain, is acting within the scope of his employment, and not as a mere volunteer. *Mullin* v. *Northern Mill Co.* (1893) 53 Minn. 29, 55 N. W. 1115.

The question whether one employed to wash bottles in the basement of a building, who was killed while carrying a load of bottles on an elevator, was acting under the orders of one having authority to so direct him, is for [illegible] where the foreman gave the order three employees generally, of whom the injured servant was one, without specifying which one was to obey him, and he had done such work before and had not been forbidden to do it. *Dallemand* v. *Saalfeldt* (1898) 175 Ill. 310, 48 L. R. A. 753, 67 Am. St. Rep. 214, 51 N. E. 645, Affirming 73 Ill. App. 151.

The fact that the injured employee was engaged in other than his regular work at the time of injury cannot destroy the employer's liability for such injury, when it is shown that work other than the regular assigned duties was customary among employees of such employer. *East Line & R. River R. Co.* v. *Scott* (1887) 68 Tex. 694, 5 S. W. 501 (man engaged to watch pile-driving engine at night; was ordered to go out and help to operate it, and was injured by an explosion of the boiler).

An employee required to remove work from a mangle as it comes through, who is directed by her employer as he sees her standing idle, to assist in putting wet clothes through the machine, is not

the right of action in this point of view depends will of course be inferred only where it appears that the fact of the servant's having discharged the additional duties was known to the master or his agent *ad hanc vicem*.[3]

635. Performance of unauthorized duties, considered as being indicative of negligence.— (Compare § 626 subd. *c*, *supra*). In several cases involving circumstances similar to those reviewed in the last two sections the courts, instead of making the right of recovery turn upon the question whether the defendant did or did not owe any duties as a master to the injured person, have determined that right with reference to the conception that the injured person was or was not guilty of contributory negligence in undertaking the work upon which he was engaged at the time of the accident.[1]

a volunteer in subsequently putting dry clothes through the machine while the one employed for that purpose is absent. *Fitzhenry* v. *Lamson* (1897) 19 App. Div. 54, 45 N. Y. Supp. 875.

[3] In *Goff* v. *Chippewa River & M. R. Co.* (1893) 86 Wis. 237, 56 N. W. 465, the court, in holding that a neglect of the duty to furnish a safe place of work could not be relied upon as a ground of action, where the servant, without the knowledge, authority, privity, or consent of his employer, and of his own volition, occupied an unsafe and dangerous place, even though the same service had been performed at other times by other employees for the employer in the same place, said: "The employer is responsible only for his express or implied direction to an employee to work in an unsafe or dangerous place. The work of the employer is to be under his own control, and under the responsibility which the law places upon him; and it is for him or his lawful agent to give such orders or directions as he may judge discreet in respect to the place where his employees shall work, having in view their skill, prudence, and experience. He or his rightful agent may assume the risk in any given case; but the employee cannot, of his own mere mandamized motion, take the risk, and hold the employer responsible for disastrous consequences. The liability does not exist unless the employer or his agent knows, or has good reason to believe, that the employee is serving him in a dangerous place or position; for without such knowledge the duty of warning or protecting the employee does not arise and will not exist, for the plain reason that the liability is not absolute, but relative, and is founded solely on the employer's negligence, which cannot be affirmed without knowledge or notice of duty in the particular instance, such as would warn the employer and afford him a fair opportunity to discharge it."

In a case where a "station helper" was merely shown to have handled a little of the baggage on the trains now and then, it was held that he could not recover for injuries caused by a defective hand-hold on a baggage car. The court was of opinion that the acts done were not of such a "continuous, definite, and prominent character" as to imply that the agents of the defendant on the train (conductor and train master) had notice of the same, and accepted the service. *Wagen* v. *Minneapolis & St. L. R. Co.* (1900) 80 Minn. 92, 82 N. W. 1107.

[1] (a) *Recovery denied.*—An employee whose duties did not require him to adjust belts was guilty of contributory negligence which will prevent recovery for his death by being caught by a belt which came off the pulley, but was left in a safe position, when it was placed in an unsafe position by his attempting to adjust it, and he failed to stand back when warned so to do by the person whose duty it was to adjust the belt. *Frechery* v. *St. Paul Plow Works* (1892) 48 Minn. 99, 50 N. W. 1026.

Recovery has been denied where a boy of fourteen, employed to operate a foot machine in a tinware factory, voluntarily left his place and went to another part of the establishment to adjust a belt, and while thus engaged received fatal injuries. *Daly* v. *H. Haller Mfg. Co.* (1896) 48 La. Ann. 214, 19 So. 116.

Some of the decisions rendered upon this basis would seem to embody the doctrine that the culpability of the servant becomes an inference of law, as soon as it has been shown that he was not authorized to do the work on which he was engaged when the injury was received. It may be conceded that such an inference is proper, where the departure from the ordinary course of his employment exposed the servant to obvious peril of an abnormal nature, or where that departure constituted an infraction of specific prohibitory directions. But, as a matter of ultimate analysis, it seems scarcely permissible to say that, without regard to the particular circumstances involved, negligence must always be a legal conclusion from evidence which shows that at the time of the accident the servant was engaged upon an unauthorized piece of work. The practitioner would at all events do wisely to avoid this possibly disputable issue, and found his plea upon the more certain ground furnished by the doctrine that in the case supposed the master does not, as a master, owe the servant any duties.

An employee engaged in running an elevator, who was not competent to determine the cause of the failure of the car to operate, or to apply the remedy, was guilty of contributory negligence where, in the belief that such failure was due to the loosening of the cable and that the car was suspended by the safety "dogs," when in fact it was caught on a projecting bolt, he undertook to adjust the cable, exposing himself to inevitable injury if the car descended, without calling upon skilled men whom he knew were provided by the employer for such emergencies, and who would have instantly discovered the difficulty. *Nelson* v. *Sanford Mills* (1896) 89 Me. 219, 36 Atl. 79.

A railroad company is not liable for the death of a freight conductor who, unnecessarily and without any emergency, undertook to perform the duty of a brakeman, and, with knowledge that one of the cars had no bumper or drawhead and was fastened to the next car with a chain, went between the cars for the purpose of unchaining or uncoupling them, and was caught between the cars as the train started. *Whitton* v. *South Carolina & G. R. Co.* (1899) 106 Ga. 796, 32 S. E. 857.

Other cases exemplifying a like point of view are *Honor* v. *Albrighton* (1880) 93 Pa. 475 (plaintiff went on an errand wholly outside the servants' line of duty, at the call of a coservant); *Sears* v. *Central R. & Bkg. Co.* (1875) 53 Ga. 630 (conductor of freight train negligent if he couples or uncouples cars, except in case of a pressing emergency of the existence of which the jury must judge); *Central R. & Bkg. Co.* v. *Jones* (1895) 96 Ga. 769, 22 S. E. 273 (servant undertook to operate a defective machine outside the scope of his regular employment when there was no emergency to justify it); *Alabama G. S. R. Co.* v. *Hall* (1894) 105 Ala. 599, 17 So. 176 (brakeman voluntarily and without orders from anyone having authority over him undertook to perform the duties of a fireman).

See also *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181 (*arguendo*, p. 198); *Daley* v. *American Printing Co.* (1891) 152 Mass. 581, 26 N. E. 135.

The inference of negligence is, of course, conclusive, where the change of duties was in direct violation of orders. *Brown* v. *Byroads* (1874) 47 Ind. 135 (catcher in stave factory undertook to act as sawyer, and was struck by piece of a band-wheel which broke). See, generally, § 363, *ante*.

(b) *Recovery allowed.*—The mere fact that a railroad employee required by the terms of his contract of employment to couple and uncouple cars when necessary, or when ordered to do so by the conductor, has exchanged employment with another employee with whom he has often worked as a fellow servant in the same general line of employment without the expression of dissatisfaction

636. Minority as an element.— Several decisions embody the doctrine that in regard to the inability of volunteers to maintain an action against the persons for whom they did the work in question, there is no distinction between adults and minors.[1] For the purposes of this doctrine it is assumed that, in cases where the injury is alleged to have been received while the servant was engaged in work undertaken *proprio motu*, or in compliance with the unauthorized request of an employee of the defendant, the controlling question is simply whether the defendant owed such complainant any of those duties imposed by the law upon employers for the benefit of their servants, and not whether such complainant was a trespasser, or negligent. In this point of view it is clear that the fact of the complainants being of immature age is a wholly immaterial element.[2]

On the other hand the doctrine applicable to young persons has

on the part of superior officers, does not render him guilty of contributory negligence in undertaking to uncouple a car in discharge of the duty of such other employee, although in doing so he disobeys the express order of the conductor. *Hudson* v. *Charleston, C. & C. R. Co.* (1893) 55 Fed. 248.

The fact that an express messenger upon a train was, at the request of the superintendent of the road, acting as a brakeman at the time of the accident by which he was injured, is not necessarily such negligence on his part as will prevent his recovery for the injury. *Chamberlain* v. *Milwaukee & M. R. Co.* (1860) 11 Wis. 239.

[1] No action can be maintained for the death of a boy who was killed while attempting to climb onto the tender of an engine for the purpose of performing a service at the request of the fireman. *Flower* v. *Pennsylvania R. Co.* (1871) 69 Pa. 210, 8 Am. Rep. 251.

The relation of master and servant did not exist between a lumber company and a lad who, at the request of the company's engineer, assisted in loading upon the engine ties to be taken to a break in the company's tramway, and, for amusement, rode in the engineer's cab to the break, and at the latter's request threw a few sticks of wood into the furnace of the engine. The company was accordingly held not to be liable for injuries to him due to the defective condition of the steps of the cab. *Holmes* v. *Cromwell & S. Lumber Co.* (1899) 51 La. Ann. 352, 25 So. 265.

A railroad company is not liable for an injury to a boy fifteen years of age, suffered while he was acting as brakeman upon the invitation of the conductor of the train. A conductor has no authority to hire train hands, except in an emergency. *Hot Springs R. Co.* v. *Dial* (1893) 58 Ark. 318, 24 S. W. 500.

The failure of an employer to station a watchman to prevent volunteers from helping to push street cars over a trench excavated under the track in which a servant is at work is not such negligence as renders him liable for injuries to the servant from the fall upon him of a boy who was so volunteering. *Craven* v. *Mayers* (1896) 165 Mass. 271, 42 N. E. 1131.

A girl who was hired to do household work, and undertook to operate a straw cutter, cannot recover. *McMahon* v. *O'Donnell* (1891) 32 Neb. 27, 48 N. W. 821.

The master was held not liable where a boy thirteen years of age undertook *proprio motu* to remove a tin cup from a machine in which it had stuck, and was injured by the starting of the machine. *Gillen* v. *Rowley* (1890) 134 Pa. 209, 19 Atl. 504.

An inexperienced boy of sixteen who, at the request of a fellow workman not authorized to call others to his assistance, leaves his regular work of marking, assorting and weighing certain bales of cotton, and undertakes to clean out a gin stand, cannot recover for injuries resulting from his hand being caught in the gin saw. *Werner* v. *Trautwein* (1901) 25 Tex. Civ. App. 668, 61 S. W. 447.

[2] *Flower* v. *Pennsylvania R. Co.* (1871) 69 Pa. 210, 8 Am. Rep. 251.

been stated in the qualified form that a minor volunteer cannot recover from the negligence of the defendant's servants, where he is of sufficient age and capacity to know the distinction between good and evil in the particular instance, and to protect himself.[3] The rationale of the doctrine thus enunciated is that a child without discretion, although a trespasser, occupies with relation to the company a position similar to that of an adult who is not a trespasser, save that a greater degree of caution should be exercised as to the former by reason of his helplessness.[4]

Of these two antagonistic doctrines the former is manifestly the more logical. The essential ground upon which the inability of volunteers to recover really rests is that no one can be subjected to the contractual obligations of a master without his express or implied consent. See § 630, *supra*. This being the situation, it is impossible to admit that the capacity of a volunteer to understand the danger of the work undertaken by him can even be a relevant or material factor in the inquiry. Under certain circumstances, no doubt a minor volunteer may recover, although an adult would have been without a remedy. But it seems clear that this differentiated responsibility can never be deduced from the mere fact that the injured person was too young to understand the risk to which he was exposing himself, and that it can be predicated only upon some positive breach of duty, as inferred from the omission of the defendant to take such precautions, whether by way of prevention or warning, as may have been obligatory, in view of his actual or constructive knowledge of the likelihood that the minor would attempt to perform the work in question.

[3] *Rhodes* v. *Georgia R. & Bkg. Co.* (1889) 84 Ga. 320, 20 Am. St. Rep. 362, 10 S. E. 922.

A boy of eleven, who has never had any relation with the owner or employees of a brig, does not become a fellow servant of the latter by gratuitously attempting to release the stern hawser in an emergency, at the request of the employees, while the brig is being towed out of the harbor. *Geibel* v. *Elwell* (1897) 19 App. Div. 285, 46 N. Y. Supp. 76 (no cases are cited, and it is not very apparent what is the precise rationale or scope of the decision).

[4] *Kentucky C. R. Co.* v. *Gastineau* (1885) 83 Ky. 119 (disapproving *Flower* v. *Pennsylvania R. Co.* (1877) 69 Pa. 210, 8 Am. Rep. 251, *supra*). The court laid it down that it was for the jury to say whether a boy of about fourteen, killed while uncoupling cars, had discretion enough to appreciate the danger and guard against it; and that the jury should have been instructed that if, by reason of his age, the injured person lacked such discretion and knowledge of the danger, and if the company, by the exercise of ordinary care by its employees, might have become aware of and prevented the accident, it was bound to exercise that care and guard against the injury.

No recovery can be had where a boy of seventeen was killed owing to the fall of a piano which he was assisting to carry at the request of a brakeman. The risk of being injured by the negligence of the other men engaged in the work is deemed to have been within his comprehension. *Cincinnati, N. O. & T. P. R. Co.* v. *Finnell* (1900) 108 Ky. 135, 57 L. R. A. 266, 55 S. W. 902.

CHAPTER XXXIV.

EFFECT OF GENERAL STATUTES UPON THE EXTENT OF A MASTER'S LIABILITY.

637. When employees are within the purview of such statutes.
638. Effect of such statutes considered with relation to the doctrine of common employment.

As to statutes shifting the burden of proof, see chapter XLII., subd. B, *post*.

637. When employees are within the purview of such statutes.—In cases which turn upon the right of a servant to take advantage of a general statute which affects the obligations of that class of individuals or corporations to which his employer belongs, the first question to be determined is whether, considering the language in which the statute is couched, and the particular mischief which it is designed to remedy, or the peculiar advantage which it is designed to confer, the intention of the legislature was that servants as well as strangers should fall within its purview. A number of decisions showing the conclusion of the courts as to various enactments of this description are tabulated below.[1]

[1](a) *Statutes prescribing certain precautions in regard to the operation of railways.*—The statutes which declare railway companies to be liable for the damage done by the running of trains, or prescribe the observance of certain precautions in regard to the operation of trains, are not deemed to be applicable to railways which are under construction. Thus, under §§ 1166, 1167 of the Tennessee Code, by which it is provided that "when any person, animal, or other obstruction appears upon the road the alarm whistle shall be sounded, the brakes put down, and every possible means employed to stop the train and prevent an accident;" and that "every railroad company that fails to observe these precautions or cause them to be observed by its agents and servants shall be responsible for all damages to persons or property occasioned by or resulting from any accident or collision that may occur,"—it has been held that the servant of a contractor, who, while riding on the pilot of an engine, is injured by its collision with a stationary car while the road is still under construction, cannot recover. *Griggs* v. *Houston* (1881) 104 U. S. 553, 26 L. ed. 840 (engine, on the pilot of which the servant of a contractor was riding, collided with a car standing on the track).

Under another statute of this type (Ga. Code, § 2979), it has been held that a railway company was not liable to the servant of a contractor, who was injured by the fall of a trestle over which a car was being drawn while the road was being graded. *Central R. & Bkg. Co.* v. *Grant* (1872) 46 Ga. 417.

The various statutes requiring a bell to be rung or a whistle to be blown on railway trains when they are within a certain distance from a public crossing are considered to be enacted for the benefit of such members of the public as may be using the crossing, and not

638. Effect of such statutes considered with relation to the doctrine of common employment.—In cases where it has been determined or

of the railway employees themselves. Thus, it has been held that § 1111 of the Alabama Code of 1886, which is to this effect, has no application to the case of employees on the top of cars which are passing under a low overhead bridge. *Louisville & N. R. Co.* v. *Hall* (1888) 87 Ala. 708, 4 L. R. A. 710, 13 Am. St. Rep. 81, 6 So. 277; *Louisville & N. R. Co.* v. *Markee* (1893) 103 Ala. 160, 49 Am. St. Rep. 21, 15 So. 511.

Nor does a provision of this tenor create a duty in favor of a watchman stationed to look out for the trains and guard the public. *Ruane* v. *Lake Shore & M. S. R. Co.* (1896) 64 Ill. App. 359.

That such a statute is not enacted for the protection of employees was also held down in *Union P. R. Co.* v. *Elliott* (1893) 54 Neb. 299, 74 N. W. 627.

The fact that the point at which the injured person was crossing the track when the accident occurred was within that distance from a public crossing at which the signal should have been sounded will not enable him to recover. *Evans* v. *Atlantic & P. R. Co.* (1876) 62 Mo. 49 (a decision upon Mo. Gen. Stat. 1865, chap. 63, § 38).

The absence of a flagman required by a city ordinance to be provided for each street crossing was held not to be a failure of duty on the part of the railroad company to its employees, such an ordinance being passed to save the public traveling along the streets from injury from passing trains. *Kansas City, Ft. S. & M. R. Co.* v. *Kirkson* (1891) 9 C. C. A. 321, 22 U. S. App. 94, 60 Fed. 999.

To the same effect, see *Bohlnick* v. *Pacific R. Co.* (1869) 43 Mo. 187, where the court, referring to the Missouri act cited above, said: "It is obvious that the enactment of the law was intended primarily for the protection of the traveling public and passengers. At a public crossing or street, frequented by travelers and persons engaged in business, the danger of collision and accident is constant and recurring, without a signal warning them of the approach of the train. Not only is danger to be apprehended to those who may happen to be on the track, but the lives of the passengers are also jeopardized. The law, in a previous part of the section, subjects the company to a penalty for omission of duty in ringing the bell; but, lest that might be deemed exclusive, it also makes it responsible in damages at the suit of any person injured. There is a strong and peculiar reason why this precaution of giving a signal should be observed as regards passengers and the traveling public, but it is not apparent when it comes to be applied to the servants of the road. There is nothing to show that from their business and occupation they are in greater hazard at a public crossing than at a private crossing or anywhere else on the track. That the draftsman of the law used the word 'person' in the sense that it should apply to the classes above referred to, and without any intention of changing the common law construction, can scarcely be questioned. In this view of the law we are strengthened by the different phraseology used in the 2d section of the act relating to damages, and on which *Schultz* v. *Pacific R. Co.* (1863) 36 Mo. 13, was based. That section provides that 'whenever any person shall die from any injury resulting from or occasioned by the negligence, misfeasance, or criminal intent of any officer, agent, servant, or employee, whilst running, conducting, or managing any locomotive, car, or train of cars, etc., it shall be responsible to the representatives of the deceased.' Both acts were passed by the same legislature. They show clearly that the law as it existed was understood by that body; that in one case a modification was intended to be made, and in the other not. If it had been intended that the 38th section should change the law, so as to allow persons to sue who had been previously barred, words of similar import to those used in the damage act would have been employed."

A railway servant who is himself responsible for the nonobservance of statutory precautions is, of course, precluded from recovering damages for injuries resulting from such nonobservance. *East Tennessee, J. & G. R. Co.* v. *Rush* (1885) 15 Lea, 145. A decision was rendered with regard to §§ 1166 *et seq.* of the Tennessee Code, quoted *supra*. The court said: "This last clause, it seems to me, strikes the true note. The statute was intended for the benefit of the general public, not for the servants of the company, and clearly not for a servant whose negligence caused, or contributed to cause, the acci-

conceded that the given statute is one which inures to the benefit of servants of the class to which the injured person belongs, a second

dent. The legislature surely never intended that a railroad company, by a mere noncompliance with certain precautionary forms made obligatory as to strangers, whether their observance would have prevented the act or not, should become liable to an employee whose plain dereliction of duty caused the accident. In such a case, to use the language of Judge McFarland in *Louisville & N. R. Co.* v. *Robertson* (1872) 9 Heisk. 276, the liability of the company to its agent for injuries resulting from the misconduct or negligence of that agent must be determined, not by statute, but by common-law principles."

On the other hand, it has been held that railroad employees are entitled to the same protection as other persons in crossing railroad tracks within the city limits in the performance of their duties, under a city ordinance requiring a bell on the engine to be rung continuously while a train is within the city limits. *Illinois C. R. Co.* v. *Gilbert* (1895) 157 Ill. 354, 41 N. E. 724. Affirming (1894) 51 Ill. App. 404; *Gulf, C. & S. F. R. Co.* v. *Calvert* (1895) 11 Tex. Civ. App. 297, 32 S. W. 216.

A track repairer injured while working at a place where there were many tracks, by a train backing upon him without its bell ringing or having a man stationed on the car farthest from the engine, as required by a city ordinance, may recover for his injuries. *Kelly* v. *Union R. & Transit Co.* (1888) 95 Mo. 279, 8 S. W. 420.

A railway servant who is run over a train while engaged in his duties is as much entitled as any stranger to hold his employer responsible for injuries caused by such employer's violation of an ordinance fixing the limits of the speed at which trains can run within city limits. *Bluedorn* v. *Missouri P. R. Co.* (1891) 108 Mo. 439, 32 Am. St. Rep. 615, 18 S. W. 1103.

A trackman is entitled to rely on the company's performance of its statutory duty not to run its train at any greater speed than 6 miles an hour. *Schn* *Chicago & N. W. R.* (1878) 44 Wis. 639.

The violation of an ordinance lating speed and signals of trains . not a risk assumed by a railroad employee, but obedience to the ordinance is n duty owing by the railroad company to its employees. *Pittsburgh, C. C. & St. L. R. Co.* v. *Moore* (1891) 132 Ind. 345, 44 L. R. A. 638, 31 N. E. 950.

In *Dick* v. *Indianapolis, C. & L. R. Co.* (1882) 38 Ohio St. 389, it was thought unnecessary to consider whether the act of 1872 (69 Ohio Laws, 69) by which railroad companies were made liable in damages for injuries occasioned by a failure of the engineer to sound the whistle and ring the bell at a public crossing on the same level with its tracks was for the protection of travelers on the public way only, or extended to persons working upon the track, and held that, even in the absence of such a statute, it was the duty of the company to make and enforce reasonable rules and regulations to guard against danger at such crossings and in dangerous places.

A railway servant who sues on the ground that a train was negligently operated by the engineer within the meaning of a statute, and seeks to sustain the charge of negligence by showing that the train was run over an unsafe piece of track, cannot recover unless it is proved that the engineer knew, or ought to have known, of the unsafe condition of the track. *Wolfenson* v. *Missouri P. R. Co.* (1893) 51 Mo. App. 161. (action on Mo. Rev. Stat. 1879, § 2121, Mo. Rev. Stat. 1889, § 1425).

(b) *Statutes requiring the blocking of frogs, etc., on railway tracks.*—The Canadian railway act (51 Vict. chap. 29, § 289), by which any person injured by violation of the act is entitled to recover damages, inures to the benefit of railway employees in such a sense that they may recover for an injury caused by a frog not blocked as required by § 262. *Le Roy* v. *Canadian P. R. Co.* (1890) 17 Ont. App. Rep. 293.

The consideration which was emphasized by the three judges who delivered opinions was that a provision such as that relating to the packing of frogs must have been intended primarily to afford protection to employees, as being the very persons who usually sustain injury from the omission of such a precaution. The American decisions relied upon by defendant's counsel were distinguished on the ground that their actual effect was merely that general statutes could not be construed as abrogating the defense of common employ-

question will sometimes present itself for settlement, *viz.*, whether in view of the terminology of its provisions, and the circumstances

ment (see next section), while in the case under review the default was that of the company itself in regard to the non-delegable duty of seeing that the track was properly constructed before trains were run over it. Hagarty, C. J., O., intimated that a different conclusion might possibly have been arrived at if the frog had been duly packed at the time when the road was put in operation, and had not been repacked owing to a fellow servant's neglect. The other judges did not express any opinion on this particular question. See generally, as to the point thus adverted to, §§ 565, 569, *ante*.

(c) *Statutes regarding railway fences and cattle guards.*—Both reason and authority sustain the doctrine that, in the absence of provisions showing a different intention on the part of the legislature, a statute requiring railway companies to fence their tracks should be construed as inuring to the benefit of the employees of those companies.

In Wisconsin, employees of a railway company are regarded as being within the purview of a statute declaring all such companies to be liable to "persons" generally for injuries caused by the want of a fence. Wis. Laws 1881, chap. 193. *Quackenbush* v. *Wisconsin & M. R. Co.* (1885) 62 Wis. 411, 22 N. W. 549. The court did not argue the question at length, but merely remarked that "no good reason was perceived" why servants should be an exception.

In a case decided a few years later the New York court of appeals took the ground that the duty to fence, under a statute, is one which exists as to all the world; and held that, where a brakeman is injured by the collision of his train with an animal which has come upon the track through a defective fence, the company is liable for the damages, under the New York general railroad act of 1850, § 44. *Donnegan* v. *Erhardt* (1890) 119 N. Y. 468, 7 L. R. A. 527, 23 N. E. 1051, Disapproving *Langlois* v. *Buffalo & R. R. Co.* (1854) 19 Barb. 364, so far as it holds a different doctrine.

These two decisions were cited with approval and followed in *Atchison, T. & S. F. R. Co.* v. *Reesman* (1894) 9 C. C. A. 20, 19 U. S. App. 596, 23 L. R. A. 768, 60 Fed. 379 where the following rule was formulated: "If, through a failure of the railroad company to erect and maintain a sufficient fence as required by the statute, an animal gets onto the track, whereby a train is derailed, and an employee on that train is injured by such derailment, the latter is entitled to maintain his action for damages against the company." The court said: "It is doubtless true that, where a right is given by statute, only those to whom the right is in terms given can avail themselves of its benefits; but it does not follow that, when a duty is so imposed, a violation of that duty exposes the wrongdoer to liability to no person other than those specifically named in the statute. On the contrary, it is not unreasonable to say that every party who suffers injury by reason of the violation of any duty is entitled to recover for such injuries. At any rate, it is clear that the fact that certain classes of persons were intended to be primarily protected by the discharge of a statutory duty will not necessarily prevent others, neither named nor intended as primary beneficiaries, from maintaining an action to recover for injuries caused by the violation of such legislative command. It may well be said that, though primarily intended for the benefit of one class, it was also intended for the protection of all who need such protection. In this case a technical argument might be made from the mere language of the section. It provides that the corporation shall be liable in double the amount of all damages, not only for those 'done by its agents, engines, or cars to horses, cattle,' etc., but also for those done 'by reason of any horses, cattle,' etc., 'escaping' from such contiguous fields. As the presence of the steer on the track was the cause of the derailing of the train, and as that steer escaped from the adjoining field through the defective fence, it may plausibly be argued that the recovery in this case comes within the express language of the statute as being for damages done by reason of the escape of the steer from the adjoining field through the defective fence. But we do not care to rest our conclusions upon this technical construction. The purpose of fence laws of this character is not solely the protection of proprietors of adjoining fields. It is also to secure safety to trains. That there should be no obstruction on the track is a matter

under which the injury was received, the master can avail himself of the defense of common employment. The general principle de-

of the utmost importance to those who are called upon to ride on railroad trains. Whether that obstruction be a log placed by some wrongdoer, or an animal straying on the track, the danger to the trains and those who are traveling thereon is the same. To prevent such obstruction being one of the purposes of the statute, any one whose business calls him to be on a train has a right to complain of the company, if it fails to comply with this statutory duty."

In Missouri a like doctrine prevails. *Dickson* v. *Omaha & St. L. R. Co.* (1891) 124 Mo. 140, 25 L. R. A. 320, 46 Am. St. Rep. 429, 27 S. W. 476. The court said: "We are taught by common experience that cattle and other animals, unless restrained, will stray upon the track of railroads and cause serious and dangerous obstructions to the operation of trains thereon, thereby imperiling the lives, not only of persons carried, but, to a greater degree, of each employe engaged in the duty of managing them. We can see no reason why, at common law, the railroad company would not as well be required to use reasonable care to prevent such obstructions, as to see that the ties and rails are sound, and the roadbed secure. I can conceive of no more adequate method that could be adopted by a railroad corporation for keeping domestic animals off the track of its road than that of inclosing it by fences. So it has been held that if the want of a proper fence makes a railway unsafe, and an accident happens to a passenger in consequence, the company are responsible to him, although they are under no obligation to the adjacent landowner. *Buxton* v. *North Eastern R. Co.* (1868) L. R. 3 Q. B. 549, 37 L. J. Q. B. N. S. 258, 18 L. T. N. S. 795, 16 Week. Rep. 1124, 9 Best & S. 824. It is true that the statute requiring railroad corporations to fence their tracks only in express terms gives to the owners of cattle or other animals killed or injured in consequence of a neglect to perform this duty a right of action, yet it has been held in this state that the law was designed likewise for the protection and safety of the traveling public. *Briggs* v. *St. Louis & S. F. R. Co.* (1892) 111 Mo. 173, 20 S. W. 32, and cases cited."

Similarly in Illinois it is held that a railroad engineer killed by the derailing of his train by collision with a cow which strayed upon the track at a place where there was no fence is within the protection of Hurd's (Ill.) Stat. chap. 114, § 62, imposing on railroad companies an absolute duty to erect and maintain fences along their rights of way, and providing that if such fences are not made and kept in good repair the companies shall be liable for the damage to stock on the road. *Terre Haute & I. R. Co.* v. *Williams* (1898) 172 Ill. 379, 64 Am. St. Rep. 44, 50 N. E. 116, Affirming (1897) 69 Ill. App. 392. In the court of appeals the general principle was relied upon that "whenever a duty arises, whether upon common-law or statutory grounds, an action will lie for a breach thereof in favor of any one injured by reason of such breach, though if a mere right is conferred by a statute, only those to whom it is specially given may avail themselves thereof." The reasoning of the supreme court was as follows: "It is true that the statute contains a provision that, if such fences or cattle guards are not made or kept in good repair, such railroad corporation shall be liable for all damages which may be done by the agents, engines, or cars of such corporation, to cattle, horses, sheep, [illegible] other stock thereon; but this [illegible] cannot be held to exclude all [illegible] duty which may arise from a [illegible] the railroad company to fence [illegible] cattle guards, as required by [illegible] may be that the statute was primarily intended for the benefit of the owners of stock when their stock was killed on the railroad track, but, at the same time, the statute was doubtless intended for the benefit of all classes of persons who might need protection. The person whose business requires that he should take passage as a passenger on a train has a deeper interest in having the track protected from obstructions of every character than the owner of stock. So, also, the employee of a railroad train has a deep interest. The lives of the passenger and employee are alike at stake when the railroad is not properly protected from obstructions which are likely to be upon the track where it is not properly fenced. It is, therefore, unreasonable to suppose that the legislature would provide a law for the pro-

ducible from the authorities cited below would seem be this, that an intention on the part of the legislature to preclude him from

tection of property, and make no provision whatever for the protection of life."

This decision disposes of the doubt expressed in *Wabash R. Co.* v. *Brown* (1878) 2 Ill. App. 516, as to the right of a servant to sue under this statute.

Another authority for the same doctrine is *Fleming* v. *St. Paul & D. R. Co.* (1880) 27 Minn. 111, 6 N. W. 448; but the action was held to be barred by the servant's knowledge of the want of fences, and consequent assumption of the resulting risk. The statute there construed (Minn. Rev. Stat. 1878, chap. 34, § 55) declared that railroad companies which failed to erect and maintain fences and cattle guards should be liable for all damages sustained by any person in consequence of such failure.

On the other hand, it has been held that the Virginia Code, § 1258, enacting that every railway company shall erect "on both sides of its roadbed, through all inclosed land or lots, lawful fences . . . and shall keep the same in proper repair, and with which the owners of adjoining lands may connect their fences at such places as they may deem proper," relates only to the protection of stock, and does not impose any additional liability as to passengers or employees. *Venesom* v. *Norfolk & W. R. Co.* (1896) 81 Fed. 133. Affirmed in (1897) 35 L. R. A. 135, 23 C. C. A. 659, 42 U. S. App. 282, 78 Fed. 94. Train was derailed by cattle straying on the track. The court said: "Had the legislature intended to provide an additional liability on railroad companies for injuries to persons brought about by the failure of such companies to construct fences at the places designated in said statute, it would certainly, concerning a matter of such universal importance, have used apt and unequivocal language. Indeed, we think it quite clear from a careful study of the legislation in question—from an examination of the original act, its title, and the recitals in the first section thereof, in the nature of a preamble—that the legislature did not intend to make any change in the common law other than that relating to the compensation to the owners of the stock killed or injured on the tracks of railroads not fenced as required by said statute; and to hold otherwise we must give to the words used a meaning quite different from that usually accorded them. It is evident that the railroad company is only required to fence along its lines when the same pass through inclosed land, dividing it, or leaving part of such land of one owner on both sides of the roadbed. In such cases, the owner having already inclosed his land by lawful fences around its exterior limits, and finding his property, by virtue of the roadbed, virtually thrown open to the commons, his stock liable to stray away or be injured, or the stock of others to enter upon his premises and do him damage, the legislature says to him that the railroad company shall erect and keep in repair lawful fences along its line through his land, except that it shall not be required so to do along that part of its road located within the corporate limits of a city or town, or within an unincorporated town for the distance of one quarter of a mile either way from the company's depot, nor at a place where there is a cut or embankment with sides sufficiently steep to prevent the passage of stock, nor at any place if the company has compensated the owner of the adjoining inclosed land through which the railroad runs for making and keeping in repair said fencing. And so it follows, as we understand the said statute, that a railroad company can fully comply with the law, and yet, in fact, not construct a single panel of fence along its entire line. Surely this could not be if the legislative intent was to protect the public, the passenger, and employee, as well as to guard the stock and property on the inclosed land through which the road passes. If the public and those on the trains as passengers and others were to have additional safety provided for it and thereby the enactment, why was it that the fencing was not required along the entire line? Why was one mile of the line to be fenced, provided the owner of the land through which it passed did not contract to dispense with it, and the next ten miles permitted to be without a fence for the reason that the land through which such part of the line passed was not inclosed. The inference is quite irresistible that the legislative mind was not considering the general public, and that it did not contemplate greater safety for passengers and em-

relying upon that plea will not be inferred unless such intention is explicitly declared.[1]

ployees. If the legislative intent was to change the common law in the manner referred to, as claimed by the plaintiff in error, the language employed was extremely unfortunate, and the actual result attained the most lamentable failure that has come to our attention in the history of legislative effort." The New York and Missouri cases above cited were distinguished as being decided with reference to statutes of a radically different tenor.

For reasons analogous to those relied upon in the decision last cited, it has been held that the omission of a railway company to construct cattle guards in accordance with a statute requiring the company to fence both sides of its track for the protection of inclosures cannot be imputed to it as negligence by an employee injured by the derailment of a train, consequent upon its collision with trespassing cattle. *Ward* v. *Bonner* (1891) 80 Tex. 168, 15 S. W. 805.

(d) *Statutes requiring notice of blasts to be given.*—Maine Rev. Stat. chap. 17, §§ 23, 24, requiring that seasonable notice of a blast shall be given so that all persons or teams approaching shall have time to retire to a safe distance, is not applicable as between workmen in quarries. *Hare* v. *McIntire* (1890) 82 Me. 240, 8 L. R. A. 450, 17 Am. St. Rep. 476, 19 Atl. 453.

(e) *Acts imposing liability upon municipal corporations for injuries caused by defects in streets.*—Under the South Carolina act of 1892 (21 Stat. at L. 91, Rev. Stat. § 1582), which provides that "any person who may receive bodily injury . . . by reason of defect or mismanagement of anything under the control of the corporation . . . may recover . . . damages," an action may be maintained by an employee engaged in repairing the streets, who is injured through the negligent management of a steam roller by the engineer in charge of it. *Barksdale* v. *Laurens* (1900) 58 S. C. 413, 36 S. E. 661. The court considered that, as the action was wholly statutory, it was unnecessary to consider whether the doctrine of coservice was applicable.

A statute giving an action against a town to "any" person injured by an obstruction, inures to the benefit of a foreman or other member of a civic fire brigade. *Coots* v. *Detroit* (1889) 75 Mich. 628, 5 L. R. A. 315, 43 N. W. 17. The court said: "Our statute giving damages to any person injured by reason of streets and highways not being in good repair, or in a condition reasonably safe and fit for travel, through the negligence of the city or township, makes also no exception of persons or their occupations; and there is no reason in the law or in good sense why an engine driver in the employ of the fire department, whether in or out of the line of his employment at the time of the injury, should suffer such injury without redress or recompense under the statute from and by reason of the city's negligence in the care of its streets, than should any other citizen. A fireman takes, like every other employee, certain risks by reason of his employment. He may be injured by his fellow firemen, by falling walls or building, or by a score of accidents that are liable to happen at a fire, or going to or from one. But the injury he receives from the negligence of the city in the care of the streets through which his employment takes him is no more one of the risks he voluntarily takes in his employment than would be an injury that he might receive from the negligence or wrong of some one of his fellow citizens of Detroit, as he was passing along the street. If this hole in the street, for instance, had been an excavation made by some abutting lot owner on the street, and negligently left open, is there any sound reason why the plaintiff could not have recovered from such lot owner damages for his injuries, if such injuries were occasioned through no fault of plaintiff? The answer is obvious. The fact that plaintiff was a fireman would weigh no more in such case than if he was an express-wagon driver or of any other occupation."

To the same effect see *Palmer* v. *Portsmouth* (1861) 43 N. H. 265. The court did not see any reason why an exception should be made in the case of a servant.

[1](a) *Damage acts.*—In one or two early decisions the position was taken that the damage acts, by which the personal representatives of a decedent whose death was due to a tort are enabled to recover damages from the delinquent party, created a right of action which could not be defeated by showing that

the decedent was a fellow servant of the culpable party, and therefore could not have maintained the action himself if he had survived. *The Highland Light* (1867) Chase Dec. 150, Fed. Cas. No. 6,477; *Schultz* v. *Pacific R. Co.* (1865) 36 Mo. 13. See this note, *infra*.

But it is now settled by a great preponderance of authority that this defense is available to the master in any case in which, if death had not resulted from the injury, it would have barred an action by the injured person himself. It is difficult to understand how any other theory can ever have met with favor. The English act from which all the legislation in the United States is copied was passed simply for the purpose of remedying the anomalous situation which resulted from permitting the common-law maxim, *Actio personalis cum persona moritur*, to shield the culpable party in the very cases in which the damage done by him is most serious, and the propriety of requiring him to pay compensation is most apparent. The act gives no new cause of action to the relatives, but only a right in substitution for the right of action which the deceased would have had if he had survived. *Read* v. *Great Eastern R. Co.* (1868) L. R. 3 Q. B. 555, 9 Best & S. 714, 37 L. J. Q. B. N. S. 278, 18 L. T. N. S. 822, 16 Week. Rep. 1040. Approved in *Griffiths* v. *Dudley* (1882) L. R. 9 Q. B. Div. 357, 51 L. J. Q. B. N. S. 543, 47 L. T. N. S. 10, 30 Week. Rep. 797, 46 J. P. 711. The obvious and natural inference, therefore, is that the legislatures, in passing these acts, merely intended to put certain persons in the shoes of the decedent, so far as the right of action is concerned, and to leave the question whether there is any specific bar to the action to be decided by the principles which would have been controlling if the injured person had survived, and was himself suing for an indemnity.

The effect of such a statute in this point of view was elaborately discussed in *Proctor* v. *Hannibal & St. J. R. Co.* (1876) 64 Mo. 112, where the court overruled *Schultz* v. *Pacific R. Co.* (1865) 36 Mo. 13 (see this note, *supra*), and adopted the opinion of two out of five judges in *Connor* v. *Chicago, R. I. & P. R. Co.* (1875) 59 Mo. 285. The contention of the plaintiff was that under § 2 of the Missouri damage act, providing that if a servant shall die from an injury resulting from, or occasioned by, the negligence of any officer, agent, or servant, whilst running, conducting, or managing any locomotive, car, or train of cars, his representative may sue and recover $5,000 of the master, the action of such servant, if he had survived the injury, would have been barred by the defense of coservice. "This conclusion," said Norton, J., "is reached from the language used in the act,—'when any person shall die,' etc. It is true that these words, in their literal signification, are comprehensive enough to include a servant or employee, and to these terms their plain and natural import should be given, unless absurd consequences follow, and inconsistencies in the act are brought to light by such meaning. Adopting the construction insisted upon by plaintiff, a servant injured by a fellow servant while operating a locomotive or train of cars, although he may be maimed, mangled, and disfigured, and may suffer for an indefinite period of time the most excruciating tortures, can have no action against the master or employer; yet if he die, his representative may recover of the employer $5,000. Under the view of plaintiff the right to sue is not a transmitted right, but an original right, arising or appearing for the first time at the instant of the death of him or her through whom the right is derived. The very face of the 2d section is at war with any other idea than that the right to sue was intended to be a transmitted right, and not an original right. This is shown by the character of the parties authorized to sue. They must be, first, either the husband or wife of the deceased; second, if there be no husband or wife, or he or she fails to sue in six months after the death, then the minor child or children of the deceased; third, if such deceased be a minor and unmarried, then by the father and mother; or, if either be dead, then the survivor. It manifestly appears from these provisions,—for they apply to the injuries alluded to in § 3 as well as to those in § 2,—that it must have been in the mind and intention of the legislature only to confer upon the above classes of persons the right to sue in cases where the husband, wife, or child could have sued had not death been the result of the injury. If the suit is instituted by the husband for the death of the wife, he would be required to allege and approve the fact that at the time the injury was received, occasioning the death, he was her husband, before he would be entitled to recover. This

would be the initial and necessary step in the case, for he might prove by a thousand witnesses the death and the occasion of it, yet it would avail him nothing unless the relationship of husband and wife was established. If the words 'any person' in the act are to be construed as including servants, then the inconsistent if not absurd conclusion follows that although under the common law rule the master has committed no wrong against the servant, has violated no law and done nothing which imposes upon him a legal liability to answer in damages in action brought by the servant himself, yet upon his death a cause of action which never before had an existence is at once developed and brought to light, and is lodged in the representatives of the deceased. Not only is the above conclusion involved in the construction contended for by plaintiff, but also the further conclusion that the party receiving the injury, if he lives, say one year, may himself sue and recover, for the injury inflicted upon him, damages in any amount which the jury trying the case may give under the facts of the case; and if death afterwards ensues from the injury, his representatives may sue under § 2 of the statute, and recover an additional sum of $5,000, thus holding the party liable in two actions to two different parties for the same wrong. . . . This reading of the section also conclusively refutes the interpretation or meaning given by plaintiff to the words 'any person' in the 1st clause of the 2d section. According to the plaintiff's interpretation of these words, the representatives of a servant, injured by the negligence of a fellow servant, while engaged in running and operating the road, without fault of the master, could sue and recover against the master $5,000, although the servant, had he lived, could not have sued at all for the injury; yet the representative of the servant whose death was occasioned by defective track or defective machinery could not sue for and recover anything under the 2d section, although the servant, had he lived, could have sued the master, and have recovered any damage which he may have sustained by reason of an injury inflicted upon him in consequence of a defective road or defective machinery used in operating it. It seems to us to be a manifest misinterpretation of the 2d section to construe it so as to say that the legislature in the 1st clause intended to give the representatives of a servant who would have had no cause of action had he lived, a right to sue and recover $5,000, and in the 2d clause of the same section denied to the representative of a servant who would have had a cause of action had he lived the right to sue and recover damages under that section. And the fact that, in the 2d clause of this section, the legislature, by not extending the right, did deny the right of the representative of a servant dying from an injury received from a defective road or machinery to sue and recover under that section, is conclusive proof that they did not intend to include under the term 'any person' a fellow servant injured by the negligence of a fellow servant, without fault of the master."

Henry, J., dissented in an elaborate opinion: the theory of the majority of the court, that the 3d section was the key to the meaning of the 2d, was, he considered, erroneous, as the 2d section was penal in its character, while the 3d was compensative and merely preserved common-law rights of action. As regards the argumentation *ad absurdum* (see above),—that under the plaintiff's construction of the act a servant, however seriously injured, could recover no damages, while if he died his representatives could recover $5,000,—he considered that there was no valid reason for asserting that, because the legislature may have thought it best that the common-law rule should remain in force as respects the servant himself, it should be concluded that the legislature did not intend that his representatives should have a right of action, when the language of the law was broad enough to give it. Another point made by the learned judge was that as the decision in the *Schultz Case* had been recognized as the law of the land for about ten years, it should be left to the legislature to say whether a new enactment should be passed, establishing another rule.

Other cases in which the same doctrine has been adopted are *Chapman* v. *Reynolds* (1896) 23 C. C. A. 166, 33 U. S. App. 686, 77 Fed. 274; *Lutz* v. *Atlantic & P. R. Co.* (1892) 6 N. M. 496, 16 L. R. A. 819, 30 Pac. 942.

In *Hood* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178, counsel argued that the words "any person" included employees. The court decided against the plaintiff on general grounds, without any express comment as to this contention.

It is, of course, not disputed that, under any statute which permits the maintenance of an action for a death resulting from negligence, a personal representative of a servant who was killed can recover damages if the delinquent employee was, by virtue of the common-law doctrines prevalent in the particular jurisdiction where the accident occurred, not a fellow servant of the decedent. *Sullivan* v. *Missouri P. R. Co.* (1888) 97 Mo. 113, 10 S. W. 852 (applying the above doctrine between a trackwalker and a trainman; or where the negligence which caused the death was that of an employee of whose incompetency the defendant had notice. *Galveston, H. & S. A. R. Co.* v. *Davis* (1898; Tex. Civ. App.) 45 S. W. 956. (1898) 92 Tex. 372, 48 S. W. 570.

(b) *Acts imposing liability on tort feasors generally.*—Under § 1382 of the Code of Napoleon, providing that every act which causes damages subjects him by whose default it happened to repair it, an employer cannot be held liable for an injury caused by a coservant of the plaintiff unless the delinquent was unfit for his work. *Hubgh* v. *New Orleans & C. R. Co.* (1851) 6 La. Ann. 496, 54 Am. Dec. 565.

(c) *Acts imposing liability for injuries caused by the negligence of common carriers.*—(See also subd. (f), *infra*.) Upon grounds very similar to those which have been deemed conclusive where the effect of the damage acts has been in question, the courts have determined that a statute which, in general language, requires a railway company or other common carrier to answer for the negligence of their agents in the operation of trains, etc., does not preclude them from relying on the plea that the delinquent was a coservant of the injured person.

By Mass. Pub. Stat. chap. 112, § 212, it is provided that, when the life of a passenger, or of a person being in the exercise of due diligence, and not a passenger nor in the employment of such corporation, is lost "by reason of the negligence or carelessness of a corporation operating a railroad or street railway, or of the unfitness or gross negligence or carelessness of its servants or agents while engaged in its business," certain damages might be recovered by indictment to the use of certain persons named. This provision was amended by the Statute of 1883, chap. 243, by adding the words "and if an employee of such corporation, being in the exercise of due care, is killed under such circumstances as would have entitled the deceased to maintain an action for damages against such corporation if death had not resulted, the corporation shall be liable in the same manner, and to the same extent, as it would have been if the deceased had not been an employee." In an action under this statute for the death of an employee, no recovery can be had if the only negligence shown is that of the fellow servants of the person injured. The court said: "If the plaintiff's intestate had survived, he could not have maintained an action for his injury. The purpose of the statute is to permit the administrator to maintain an action for the death when the intestate could have maintained an action if he had recovered, and not otherwise. When his action would have been defeated by the defense of common employment if he had sued, the action of his administrator will be barred in the same way in a suit brought on account of his death. This seems the only reasonable interpretation of the statute."

The transfer of freight by a railroad company from a vessel to its car is a railroad operation, within the words of this statute. *Daley* v. *Boston & A. R. Co.* (1883) 147 Mass. 102, 16 N. E. 690.

Mere failure of an engineer to stop a train at a distance, on seeing men at work on the track trying to remove a telegraph pole, without evidence that he saw that the pole extended on the track, is not such "gross negligence" as will give a right of action for the death of one of the men, under this statute. *Chisholm* v. *Old Colony R. Co.* (1893) 159 Mass. 3, 33 N. E. 927.

In *Atchison, T. & S. F. R. Co.* v. *Farrar* (1883) 6 Colo. 498, the statute under discussion provided that "whenever any person shall die from any injury resulting from, or occasioned by, the negligence, unskilfulness, or criminal act of any officer, . . . while running . . . any locomotive, car, or train of cars, . . . and when any passenger shall die from any injury resulting from, or occasioned by, any defect or insufficiency in any railroad or any part thereof, or in any locomotive or car," the employer of the delinquent "shall forfeit and pay for every person and passenger so injured the sum of not exceeding $5,000, and not less than $3,000." The court said: "The act contains four other sections, but there is nothing therein giving a right of action for such injuries to the employee

himself, if he survive the same. The position of appellee and the district court, therefore, is, that the legislature intended to say that the common law rule depriving the employee injured, himself, of any remedy, unless his case be covered by one of the exceptions, shall remain in force; but that, if he die from the injury, a right of action in favor of some third person shall spring into existence; that, though he be rendered a helpless cripple and invalid, and a burden and expense to his friends, through the negligence of a coemployee, still he shall have no right of action against his employer, while, if he be instantly killed, his widow or heirs may recover $5,000 from such employer. The legislature had the power to create this distinction, but their intent to do so should appear clearly from the context of the act itself; for, if there be doubt about it, and the statute will bear in other reasonable interpretation, one which is not in conflict with the common law, the latter should be adopted. The 1st section above quoted may be divided, with reference to the individual injured, into parts: First, where any person dies from an injury caused by the negligence, unskilfulness, or criminal intent of an officer, servant, or employee; and secondly, where the death of a passenger is occasioned by a defect or insufficiency of a railroad, locomotive, car, stage-coach, or other public conveyance. It would not be contended that the word 'passenger' includes employees, although they are upon the defective car or conveyance and receive fatal injuries through such defect. Why should the legislature discriminate between the two causes of death? Why should they say that a right of action shall be given to the widow when death results from the negligence of a fellow servant, but deny the same when it is due to defects in the car or conveyance upon which the servant is compelled to ride? The employer or master is no more at fault in one case than in the other. His responsibility and liability are, in law, no greater in the choosing of competent and careful servants than they are in the selection and purchase of safe machinery and appliances."

By the Mississippi Anno. Code of 1892, § 3557 it is provided that "every railroad company shall be liable for all damages which may be sustained by any person in consequence of the neglect or mismanagement of any of its agents, engineers, or clerks, or for the mismanagement of its engines; but for injury to any passenger upon any freight train not being intended for both passengers and freight, the company shall not be liable except for the gross negligence or carelessness of its servants." This provision is not applicable to employees. *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258.

In *Curl* v. *Bangor & P. Canal & R. Co.* (1857) 43 Me. 269, it was argued that the common law had been modified by Me. Rev. Stat. chap. 81, § 21, providing that "every railroad corporation shall be liable for all damages sustained by any person in consequence of any neglect of the provisions of the foregoing section, or of any other neglect of any of their servants, or by any mismanagement of their engines, in an action on the case by the person sustaining such damages." This contention did not prevail. "The general purpose of this statute," said the court, "seems to be to fix and establish the rights and obligations of railroad corporations as between themselves and third persons not their servants, and the language relied on in the section cited has reference to the liabilities of such corporations for the neglects of their agents or servants. Notwithstanding its literal construction might entitle a negligent servant to recover for injuries sustained through his own fault, or any servant to recover for injuries occasioned by the fault of a fellow servant, still such a construction is wholly inadmissible. Statutes, unless plainly to be otherwise construed, should receive a construction not in derogation of the common law. Considering the general design of this statute, we are of opinion that it was not the intention of the legislature to change the nature of, or the incidents connected with, any contracts between such corporations and their servants. If such had been the intention, we think it would have been more plainly or directly expressed. The words, any person, in that section of the statute relied on, must be limited in their application to such persons as were not the servants of the corporation, and who may have sustained damages without any contributing fault on their part; thus leaving such servants, who are presumed to have arranged their compensation with their eyes open, and to have assumed the relation with all its ordinary dangers and risks without any remedy against the corporation for such injuries as may be incident to the service they have engaged to perform."

It has also been held that employees

are not within the purview of the Maine statute which declares that when the life of a person is lost through the carelessness of a railroad corporation or its servants, compensation shall be made to the heirs of the deceased. *State* v. *Maine C. R. Co.* (1872) 60 Me. 490. "It is certain," said the court, "that the act of 1855, which is the basis of the existing law, did not apply to the employees of the corporation. The 1st section of the act applied only to passengers. The 2d section of the act applied to persons other than passengers, but expressly excluded the employees of the road. In the Revised Statutes, these several provisions are crowded into one section of only seven lines, and the language employed is more general. But there is nothing to lead us to believe that a change of the law was intended. Our conclusion, therefore, is that the existing statute is not applicable to the employees of the road. To hold otherwise would endanger the safety of travelers. Their safety requires that the persons in charge of a train of cars should be regarded as a unit; that each should feel responsible not only for his own conduct, but also for the conduct of all the others. They should be made to feel that it is their duty not only to be watchful of themselves, but to be watchful of each other. And this end will be best secured by making them the insurers of their own safety."

The Kansas act of March 2, 1870, providing that all railroads "shall be liable for all damages done to persons or property when done in consequence of any neglect on the part of the railroad companies" is applicable only where a railroad company, as a company, has been negligent; and has no application to a case where the negligence of an employee produces injury to a coemployee. *Kansas P. R. Co.* v. *Salmon* (1873) 11 Kan. 83.

The death of a steamboat employee on a steamboat, caused by the negligence of a fellow servant, is held not to be within R. I. Pub. Stat. chap. 204, § 15, making common carriers by steamboat liable for loss of life of "any person, whether a passenger or not, in the care of" such common carrier, caused by its negligence or that of its servants. *Miller* v. *Caffin* (1895) 19 R. I. 164, 36 Atl. 6.

(d) *Acts requiring warning signals on railway trains.*—The larger part of the cases which deal with the scope of statutes providing that warning signals shall be given when trains are approaching crossings have been determined without any direct reference to the availability of the defense of common employment. See § 637, note 1, subd. (a), *supra*. In some of the cases referred to, as the conclusion was that the statute under discussion was not applicable at all to the servants, the investigation never reached the stage at which it might have become necessary to consider the question whether that defense was a bar to the action. In the remainder of those cases,—those in which servants were held to be entitled to take advantage of the statute,—the courts seem to have tacitly proceeded upon the theory that the duty imposed was nondelegable.

But in some cases where a statute of this description was under discussion it has been expressly laid down that the mere fact that the railway company is declared to be liable to "any person" for a breach of the duty so imposed does not operate so as to supersede the general rule of law which exempts an employer from liability to his own servants for the fault of their fellow servants. *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322 (a decision with reference to a statute of W. Va. 1873, chap. 88, § 31). The court cited *O'Donnell* v. *Providence & W. R. Co.* (1859) 6 R. I. 211; *Hartu* v. *Central R. Co.* (1870) 42 N. Y. 468, as authorities for the doctrine that the main, if not the sole, object of the statute was to protect travelers on the highway, but suggested that it might, perhaps, include passengers on the trains, or strangers who were not trespassers on the line of the road.

See, however, *Cameron* v. *Walker* (1898) 25 Sc. Sess. Cas. 4th series, 409, cited under the following section.

(e) *Statutes defining liability of railway companies in connection with the procuring of rights of way.*—The Iowa act of 1853, "granting to railroad companies the right of way" provided (§ 14) that every railroad corporation shall be liable for all damages sustained by any person in consequence of any neglect of the provisions of this act, or of any other neglect of their agents, or of any mismanagement of their engineers. It was held that this section did not cover damages accruing to a servant from the neglect of locomotive engineers after the road was built. Such a construction was deemed to be precluded because, first, no such object was indicated by the title; second, to ascribe to the law

such an effect would render it partial, and not uniform, in its application. *Sullivan* v. *Mississippi & M. R. Co.* (1860) 11 Iowa, 421.

(f) *Kentucky statute imposing liability for wilful neglect.*—Under 2 Ky. Rev. Stat. 510 (act of March 10, 1851), a right of action was given to the personal representative of an employee injured by the wilful neglect of the agents of a railroad company. The "wilful neglect" here mentioned is the creature of statute, and applies only in cases where death results from the injury. *Craddock* v. *Louisville & N. R. Co.* (1891) 13 Ky. L. Rep. 18, 16 S. W. 125.

The phrase has been said to imply "a reckless indifference to the safety of the public, or an intentional failure to perform a manifest duty." *Collins* v. *Cincinnati, N. O. & T. P. R. Co.* (1892) 13 Ky. L. Rep. 670, 18 S. W. 11, denying recovery in case where an employee was injured by the explosion of a gas tank, and the plaintiff sought to bring the case within the statute by contending that wilful neglect was indicated by evidence showing that a tar roof had been used instead of a slate or iron one on a gas house; that there was no vent in it for the escape of leaking gas; and that gas tanks which were 90 feet outside the gas building, with a fire wall between them and the fires under the gas retorts, were too near those fires.

The statute has no application to an action against a steamboat owner for damages, where an employee on the steamboat was shot and killed by another employee. *Morgan* v. *Thompson* (1884) 82 Ky. 383, following *Spring* v. *Gibson* (1876) 12 Bush, 172, where it was laid down that the statute gives no right to the personal representative to maintain an action when the killing is malicious and intentional.

This statute has now been repealed by § 241 of the Kentucky Constitution, providing that "whenever the death of a person shall result from an injury inflicted by negligence or wrongful act, then, in every such case, damages may be recovered for such death from the corporations and persons so causing the same."

This provision does not give a right of action for the death of a servant, caused by the negligence of a fellow servant of equal grade, in the same field of labor. *Linck* v. *Louisville & N. R. Co.* (1899) 107 Ky. 370, 54 S. W. 184. But it improves the position of a servant to this extent, that, whereas no action could be maintained before the change in the law for the negligence of a superior fellow servant unless that negligence was wilful, recovery may now be had for the death of a servant, caused by the ordinary negligence of such a fellow servant. *Southern R. Co.* v. *Barr* (1900) 21 Ky. L. Rep. 1615, 55 S. W. 900; *Linck* v. *Louisville & N. R. Co.* (1899) 107 Ky. 370, 54 S. W. 184.

It has been held in a late case that the instructions in an action against a railroad company for personal injuries to an employee should not make any reference to wilful negligence. *Louisville & N. R. Co.* v. *Foard* (1898) 104 Ky. 456, 47 S. W. 342.

For a general review of the Kentucky cases regarding coservice, see § 549, *ante*.

CHAPTER XXXV.

STATUTES ENACTED EXPRESSLY FOR THE BENEFIT OF SERVANTS — INTRODUCTORY CHAPTER.

A. CONSTRUCTION AND EFFECT OF SUCH STATUTES.

639. On what footing these statutes are construed.

640. Employer not responsible for unauthorized acts of statutory vice principal.

641. When the statutory right of action accrues and is terminated.

642. Necessity of proving knowledge on the defendant's part.

B. CONSTITUTIONALITY.

643. Statutes entirely abrogating the doctrine of common employment with respect to all employers.

644. Statutes modifying the doctrine of common employment in regard to all private corporations.

645. Statutes abrogating or modifying the doctrine of common employment with respect to all the servants of railroad companies.

a. Georgia.

b. Missouri.

c. North Carolina.

d. Ohio.

e. Texas.

f. Utah.

g. Wisconsin.

646. Statutes abrogating the doctrine of common employment with respect to railway servants engaged in the operation of the road.

647. Statutes imposing special duties upon various classes of employers.

a. Street car companies.

b. Operators of mines.

648. Statutes restricting the defenses open to employers.

C. DEFENSES AVAILABLE IN ACTIONS UNDER STATUTES.

649. Generally.

650. Assumption of risks.

a. Ordinary risks assumed.

b. Possibility of future negligence on the part of statutory vice principal, not a risk assumed.

c. Extraordinary risks; how far assumed, in the absence of express provisions on the subject.

d. Effect of express provisions with regard to assumption of extraordinary risks.

651. Contributory negligence.

a. Generally.

b. Availability of the defense, as dependent on the provisions of the statute sued upon.

c. Availability of defense inferred from language of statute.

d. Knowledge of risk, how far negligence is inferable from.

652. Limits of the doctrine that contributory negligence is a bar to an action.
652a. *Volenti non fit injuria.*

As to the conflict of laws in cases where a statute affecting the liability of an employer is an element, see chapter XLVI., *post*.

As to the necessity of showing that the breach of the statute, which is the gravamen of the complaint, was the proximate cause of the injury in suit, see chapter XLII., and § 667, *post*.

A. Construction and effect of such statutes.

639. On what footing these statutes are construed.—What general canon of construction shall be applied in determining the effect of statutes of the class reviewed in this and the following chapters will depend upon whether their meaning is to be defined with reference to the consideration that they augment the common-law liability of employers, or with reference to the consideration that they are of a remedial character.

As regards statutes of the class which includes the English employers' liability act and those copied from it, it is scarcely possible to say that any fixed principle of construction has been generally and definitely adopted. But on the whole the tendency seems to be in the direction of treating them as enactments of a remedial character, and construing them in a sense favorable to the servant.[1]

It has been laid down that the Massachusetts employers' liability act of 1887 (see chapter XXXVII., *post*) should be construed liberally in favor of employees.[2] It has also been held that the Illinois statutes which provide for the health and safety of persons employed in mines are to be liberally construed.[3]

In some states the principle upon which statutes affecting the liability of employers are construed is settled by a special provision expressly declaring that the rule by which statutes in derogation of the

[1] In *Walsh* v. *Whiteley* (1888) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38, Lord Esher recognized that there had always been two schools of thought with regard to cases of injuries to servants, the one proceeding upon the theory that enactments with regard to masters and workmen should be construed as strictly as possible, the other taking the position that in construing such statutes the fact that a master and his servants are not on an equal footing should be taken into account, and that a liberal construction was appropriate. The learned judge declared himself to be an adherent of the latter school.

[2] *Rygate* v. *Mechanics' Mills* (1889) 150 Mass. 190, 5 L. R. A. 667, 22 N. E. 766, per Holmes, J.

[3] *Beard* v. *Skeldon* (1885) 113 Ill. 584; *Carterville Coal Co.* v. *Abbott* (1898) 81 Ill. App. 279.

common law are to be strictly construed shall not be applicable to certain statutes.[4]

640. Employer not responsible for unauthorized acts of statutory vice principal.— The effect of many of the statutes reviewed in the preceding chapters is to convert into vice principals employees who, under common-law doctrines, would be regarded as fellow servants of the persons for whose benefit the statutes have been enacted. This alteration in the status of such employees does not affect the operation of the principle that a master is not liable for the acts of a servant which are entirely outside the scope of his functions as a servant, and therefore unauthorized. In other words, it is not deemed to have been the intention of the legislature to create, in favor of injured employees, a liability more extensive than that which they would incur to strangers under a similar showing of facts.[1]

641. When the statutory right of action accrues and is terminated.— On the one hand the liability of an employer is determined by the law as it was at the time the injury was received, and is not affected by a statute passed while the servant's action is pending.[1] On the other hand the repeal of an act does not affect the right of action for an injury received while it was in force.[2]

[4] See, for example, Tex. Rev. Stat. Gen. Prov. § 2; provision applied in *Turner* v. *Cross* (1892) 83 Tex. 218, 15 L. R. A. 262, 18 S. W. 578.

[1] Under the Iowa act (chapter XXXIX., *post*), a railroad company is not liable for an injury to a section hand from being thrown off a hand car in consequence of another employee's wilfully striking, while engaged in a political discussion, a third employee, who, in attempting to avoid the blow, pushed the former off the car. *Kincade* v. *Chicago, U. & St. P. R. Co.* (1899) 107 Iowa, 682, 78 N. W. 698.

Under the Wisconsin act (chapter XXXIX., *post*), a railway company is not liable for the death of an employee through the negligence of a superintendent, of which he was guilty while he was assisting such employee outside of his duties. *Hartford* v. *Northern P. R. Co.* (1895) 91 Wis. 374, 64 N. W. 1033.

Under the Missouri act (chapter XXXVIII., *post*), a railway company is not liable for the negligence of an engine wiper, who undertakes to operate an engine, and runs over a coservant. By the words "agents or servants" in the statute are meant coemployees acting in the course of their employment. *Boquette* v. *St. Louis, I. M. & S. R. Co.* (1900) 86 Mo. App. 601.

Under the Texas act (chapter XXXVIII, *post*), the negligence of a fireman in jumping from a rapidly moving train upon a section hand standing several feet from the track cannot be imputed to the railroad company in the absence of anything to show that the fireman was acting within the scope of his employment. *Jackson* v. *Galveston, H. & S. A. R. Co.* (1896) 14 Tex. Civ. App. 385, 37 S. W. 786.

For another affirmation of the doctrine in the text, see *Southern Cotton Oil Co.* v. *De Vond* (1894; Tex. Civ. App.) 25 S. W. 43.

[2] *Blood* v. *St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 41 Am. St. Rep. 83, 22 S. W. 1089.

But where the statute in question is merely declaratory of common law principles so far as regards the obligations which it imposes on the employer, it is not prejudicial error for the trial judge to read its provisions to the jury as being part of the law applicable to the case. *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774.

[3] *International & G. N. R. Co.* v. *Cul*

The cases in which certain acts were declared to take effect immediately are noticed in the sections in which those acts are dealt with.

642. Necessity of proving knowledge on the defendant's part.—In all cases where the establishment of an employer's statutory liability depends upon its being proved that he was guilty of negligence in the premises, the general rule of the common law is applicable that culpability cannot be inferred, unless it is shown that the defendant had actual or constructive knowledge of the conditions for which it is sought to make him responsible.[1] See chapters VII., VIII., *ante*. This prerequisite to the maintenance of the action is covered by the express terms of the English employers' liability act of 1880, and the statutes copied therefrom. See § 674, *post*.

pper (1897; Tex. Civ. App.) 38 S. W. 818.

[1] In a California case it was contended that the provision of § 1970 of the Civil Code of that state, which exempts an employer from liability for the negligence of the fellow servant of the plaintiff, unless he has failed to use ordinary care "in the selection" of such servant, did not apply to cases in which negligence in retaining only was shown; but the court declined to accept this view, remarking that, if necessary, it would not hesitate to construe the employer's acts, under such circumstances, as constituting a new selection of the negligent employee, but that this was not requisite, because § 1971 declared generally that the employee must "in all cases indemnify his employee for losses caused by his want of ordinary care," and that such want might be shown as well by the retention of an unfit employee after knowledge of the fact, as by a failure to use due diligence at the time of his selection. *Gier* v. *Los Angeles Consol. Electric R. Co.* (1895) 108 Cal. 129, 41 Pac. 22.

With regard to the similar provision of Dak. Civ. Code, § 1131, it has been held to be culpable negligence on the part of a railroad company to allow machinery to remain out of repair, when its condition is brought to the notice of an officer [here a yard master] whose knowledge is imputed to the company, or might have been ascertained, upon proper inspection, by its agent charged with the duty of keeping them in repair. *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590.

Where there is no reason but the lapse of time for supposing that repairs are needed in a structure, the failure to repair does not constitute "wilful neglect" within the purview of a statute (Ky. Gen. Stat. chap. 57, § 3) giving the widow, etc., of one killed by such negligence a right to recover punitive damages. *Reinder* v. *Black & P. Coal Co.* (1890) 12 Ky. L. Rep. 30, 13 S. W. 719.

Under the same statute, the fact that a car by which a brakeman was killed while coupling it with another was improperly loaded by reason of the fact that lumber projected over the end so as to interfere with the space necessary for coupling, or even the fact that the conductor knew that the car was improperly loaded, does not of itself show wilful neglect; but to constitute such neglect it must appear that the conductor or other person in charge of the train knew, or by the use of ordinary care could have known, that the car was so improperly loaded as to imperil the life of the servant or employee. *Louisville & N. R. Co.* v. *Brice* (1886) 84 Ky. 298, 1 S. W. 483.

Under the Missouri act of March 23, 1881, §§ 14, 16, giving a right of action for an injury caused by the "wilful failure" of the owner, etc., of a coal mine to keep a supply of timber for props, and send it down, when required, it is a condition of recovery that defendant had notice that the timber and props were required, and, with such notice, neglected and refused to supply them. *Leslie* v. *Rich Hill Coal Min. Co.* (1892) 110 Mo. 31, 19 S. W. 308.

In an action under a damage act by the representative of a deceased servant,

Mutatis mutandis, a similar principle, is controlling where it is sought to establish negligence in regard to some detail of the work on the part of an employee whom a statute has converted into a vice principal. Such negligence is not inferable, unless the employee is proved to have had knowledge, actual or constructive, of the existence of the conditions which rendered the act in question dangerous to the complainant.[2] See, generally, chapter X, *ante*.

B. Constitutionality.

643. Statutes entirely abrogating the doctrine of common employment with respect to all employers.— The subject of the Colorado statute (set out in chapter XXXIX., *post*) is sufficiently expressed by the title "An Act Concerning Damages Sustained by Agents, Servants, and Employees," within the meaning of Colo. Const. art. 5, § 21, providing that the subject of an act shall be clearly expressed in its title.[1]

644. Statutes modifying the doctrine of common employment in regard to all private corporations.— The clause in the Indiana statute (chapter XXXVII., *post*) by which a railway servant is enabled to recover as if he were a stranger, when the injury is caused by the negligence of locomotive engineers or trainmen, etc., whether the employee was acting in obedience to some superior at the time, or on his own initiative, is not in conflict with the equality clauses of the Federal and state Constitutions, as an unreasonable discrimination against railroad companies, subjecting them to liability to a class of employees with respect to which other employers are not made liable.[1]

there can be no recovery unless knowledge is brought home to the defendant. *Elliott* v. *St. Louis & I. M. R. Co.* (1878) 67 Mo. 272.

See also § 801, note 2, *post*.

[2] *Connell* v. *Surrey Dock Co.* (1887; Q. B. D.) 3 Times L. Rep. 630; *Booker* v. *Hess* (1887; Q. B. D.) 3 Times L. R. 618; *Kelly* v. *Davidson* (1900) 31 Ont. Rep. 521; *Caldwell* v. *Mills* (1893) 24 Ont. Rep. 462.

[1] *Colorado Mill & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28. Affirming (1898) 12 Colo. App. 277, 55 Pac. 736.

[1] In *Indianapolis Union R. Co.* v. *Houlihan* (1901) 157 Ind. 494, 54 L. R. A. 787, 60 N. E. 943, the court said: "It is competent for the legislature in the exercise of the police power to take steps for the protection of the lives and limbs of all persons who may be exposed to dangerous agencies in the hands of others. The powerful forces in railroading that are under the direction or control of those in charge of any signal, telegraph office, switch yard, shop, roundhouse, locomotive engine, or train upon a railway' were proper to be selected as sources of unusual danger which should be guarded against; the object to be accomplished was to incite railroad companies to use the utmost diligence in the selection and supervision of their servants who are put in charge of these dangerous agencies, so that fewer lives and limbs of those who are entitled to claim the protection of our laws would be sacrificed. The legislature evidently considered that stran-

also been deemed that the subsequent clause in the same section, which has the effect of making a [illegible] liable to an employee injured by the negligent act of a fellow servant, is not unconstitutional as being a denial to such [illegible] of the equal protection of the laws.[2]

645. Statutes abrogating or modifying the doctrine of common employment with respect to all the servants of railroad companies.—*a. Georgia.*—The validity of the Georgia [illegible] (see chapter XXXIX., *post*) has been impugned on the ground [illegible] is class legislation. But this objection has been declared to be [illegible] for the reasons that the law dealt with "persons engaged [illegible] hazardous and dangerous occupation, standing in peculiar relations [illegible] principal, their fellow employees, and to the public,"[1] and that it is applicable to all railway companies alike.[2] In spite of the disclaimer in the passage

gers and employees (the attorney and the ticket seller, for example) who were not fellow servants of those in charge of the agencies named were sufficiently protected by the railroad companies' existing liability to them for the negligent operation of those dangerous agencies. The legislature evidently determined to protect all persons who were not already protected from the negligent use of particular instruments. The classification is made on the basis of the peculiar hazards in railroading, relates directly to the object to be accomplished, and applies equally to all employees within the class. To separate railroading from other business was not an unconstitutional discrimination, because the dangers (the basis of the classification) do not arise from the same sources; but the claim that a classification not made on the basis of the dangerous agencies employed in the business, but founded on the question whether the employee, who was injured without his fault by a fellow-servant's negligent use of a dangerous agency, was acting at the time on his own initiative in the line of his duty, or under the orders of a superior, is the only constitutional classification, is unwarranted. A train is wrecked through the negligence of the engineer; two brakemen are injured without fault on their part, one acting at the time in obedience to the conductor's orders, the other acting on his own initiative, within the line of his duty; there should be and there is no constitutional limitation upon the legislature's exercise of the police power by which a law may not be enacted to protect both brakemen [illegible] ly from the negligence of the engineer."

[1] *Tullis* v. *Lake Erie & W. R. Co.* (1899) 175 U. S. 348, 44 L. ed. 192, 20 Sup. Ct. Rep. 136. The contention of defendant's counsel was that the decisions sustaining the statutes of Kansas, Iowa, and Ohio (see chapter XXXIX., *post*) were not in point, as the Indiana statute classified railroad companies arbitrarily by name, and not with regard to the business in which they were engaged.

[1] In *Georgia R. & Bkg. Co.* v. *Oaks* (1874) 52 Ga. 410, the court said: "The legislation does not relate to the railroad companies because they are such, but because of the peculiar and special nature of their business. The law for this reason gives them special privileges,—they are specially protected from trespassers, their employees are exempted from various public duties, etc., etc. It might, with just as much force, be said that laws as to carriers, brokers, warehousemen, mechanics, laborers, etc., etc., vary the general laws by special legislation. The law is general, it applies to all railroad companies, and to all employees engaged in running trains."

[2] In *Georgia R. Co.* v. *Ivey* (1881) 73 Ga. 499, the court said: "It would be more special and less general, if applicable only to those engaged in running the trains. It is a general law embracing in its terms all railroads and their employees. Nor is it a special law affecting private rights, which varied a general law without the free consent in writing of all persons to be affected

cited in note 2, the second of the reasons thus assigned for upholding the act would seem to place this court in a real antagonism with those whose rulings are reviewed in the next section. The contention that the statute is repugnant to the 14th Amendment of the United States Constitution has also been rejected.[3]

b. Missouri.—It has been held that the Missouri act (see chapter XXXVIII., *post*) does not deny the equal protection of the law, since there is no evasion of the rule of equality, where all companies are subject to the same duties and liabilities under similar circumstances; that it does not deprive railway companies of property without due process of law; and that it is not class legislation.[4]

c. North Carolina.—The North Carolina act (chapter XXXIX. *post*) does not violate art. 1, § 7, of the state Constitution, which forbids the conferring of an "exclusive privilege upon any set of men," since it applies to a well-defined class, and operates equally as to all within that class.[5]

d. Ohio.—The Ohio act of 1890 (see chapter XXXVIII., *post*) has been held by one of the Federal courts of appeals not to be in contravention of the constitutional provision requiring all laws of a general nature to have a uniform operation throughout the state.[6]

e. Texas.—With regard to the employer's liability act of this state (see chapter XXXVIII., *post*) it has been held that the legislature has the right to declare what employees shall for the future be deemed

thereby,' in the sense of this language in our Constitution. It would be so if it affected one railroad company without such consent, and left out all others. But this affects all railroad companies and their employees. It might as well be said that a law affecting all lawyers or doctors was special legislation, if it regulated their treatment of clerks or students differently from that of common or unprofessional people. The cases cited from the Iowa reports are not in point. The Constitution and statutes there are unlike ours. If that court had so construed statutes like ours, we should differ with them with all deference to their judgment; but they do not collide, we think, with what we decide on our Constitution and our statutes."

[3] *Georgia R. & Bkg. Co.* v. *Hilley* (1892) 90 Ga. 571, 16 S. E. 939. Following *Missouri P. R. Co.* v. *Mackey* (1888) 127 U. S. 205, 32 L. ed. 107, 8 Sup. Ct. Rep. 1167.

[4] *Powell* v. *Sherwood* (1901) 162 Mo. 605, 63 S. W. 485. In a later case it was expressly held that the act does violate the equality clause of the Federal Constitution, although it does not confine such liability to acts performed in the operation of the road, but extends it to risks similar to those incurred by the employees of persons or corporations engaged in other lines of work. *Callahan* v. *St. Louis Merchants' Bridge Terminal R. Co.* (1902) 170 Mo. 473, 60 L. R. A. 249, 71 S. W. 208.

[5] *Hancock* v. *Norfolk & W. R. Co.* (1899) 124 N. C. 222, 32 S. E. 679, approving the Federal decisions as to the Kansas and Iowa statutes.

[6] In *Peirce* v. *Van Dusen* (1897) 24 C. C. A. 280, 47 U. S. App. 339, 78 Fed. 693, the court said: "As it applies to all railroad corporations operating railroads within the state, it is, within the meaning of the state Constitution, general in its nature; and as it applies to all of a given class of railroad employees it operates uniformly throughout the state."

fellow servants;[7] that the subject of the act is sufficiently expressed in the title;[8] and that, as it affects all classes of railway corporations alike, it is not unconstitutional as denying railroads the equal protection of the law.[9]

f. Utah.—In this state (for the statute, see chapter XXXVIII., *post*) it has been held that the legislature has, unquestionably, authority to make the common master liable to one of his employees or servants for all damages to him caused by the negligence of another of his servants, while the latter is acting about the business or labor which he is authorized to do, regardless of the fact that such servants would, under the general rule, be regarded as fellow servants.[10]

g. Wisconsin.—The Wisconsin act of 1875, chap. 173 (see chapter XXXIX., *post*), was declared, prior to its repeal, not to be repugnant to the constitutional principle which prohibits unequal and partial legislation on general subjects.[11]

646. Statutes abrogating the doctrine of common employment with respect to railway servants engaged in the operation of the road.—The statutes of Iowa, Kansas, and Minnesota are couched in substantially identical words (see chapter XXXIX., *post*), and may be considered together.

The contention that they are in conflict with the 14th Amendment of the United States Constitution, because they deprive railway companies of the equal protection of the laws, has been held not to be

[7] *Galveston, H. & S. A. R. Co.* v. *Worthy* (1894: Tex. Civ. App.) 27 S. W. 426.

[8] *Gulf, C. & S. F. R. Co.* v. *Calvert* (1895) 11 Tex. Civ. App. 297, 32 S. W. 246.

[9] *Galveston, H. & S. A. R. Co.* v. *Gibson* (1899: Tex. Civ. App.) 54 S. W. 77.

[10] *Dryburg* v. *Mercur Gold Min. & Mill. Co.* (1898) 18 Utah, 410, 55 Pac. 367.

[11] *Ditberner* v. *Chicago, M. & St. P. R. Co.* (1879) 47 Wis. 138, 2 N. W. 69, disapproving the doctrine implied in the Iowa decisions (see § 646, *post*), that the statute of that state was valid only because the recovery was limited to cases where the injuries were caused by the negligent operation of railways. The court said: "It is conceded that the act would be a valid exercise of legislative power were its provisions restricted to cases of injury caused by the negligent operation of railways. But it assumed that the statute is not so restricted; that by its terms it seeks to make a railway company liable for an injury to an employee caused by the negligence of another employee, although the negligent act may have no connection with the operation of the railway of the company. The argument is that, because the same liability is not imposed upon other corporations, the statute is void within the rule of *Durkee* v. *Janesville* (1871) 28 Wis. 464, 9 Am. Rep. 500. . . . The case of *Atty. Gen.* v. *Chicago & N. W. R. Co.* (1879) 35 Wis. 425, decides the question under consideration adversely to the position maintained by the learned counsel for the railway company. It was held in those cases that a statute which limited the rates to be charged by railway companies for fares and freights was a valid enactment, although such limitations were not imposed upon other common carriers, whether corporate or individual. The statute was held to be a proper exercise by the legislature of the power granted to it by the Constitution to alter or repeal the charters of those corporations. Const. art. II. § 1. The same principle is involved in this case. If the legislature can impose limitations and restrictions upon railway companies

tenable.[1] Nor are they repugnant to that amendment which prohibits the taking of property without due process of law.[2]

not imposed upon other common carriers, whether corporate or otherwise, it may in like manner impose liabilities upon such companies from which other common carriers and other corporations are exempt."

[1] In *Missouri P. R. Co.* v. *Mackey* (1887) 127 U. S. 205, 32 L. ed. 107, 8 Sup. Ct. Rep. 1161, the court said, in discussing this objection to the Kansas law of 1874: "It seems to rest upon the theory that legislation which is special in its character is necessarily within the constitutional inhibition; but nothing can be further from the fact. The greater part of all legislation is special, either in the objects sought to be attained by it, or in the extent of its application. Laws for the improvement of municipalities, the opening and widening of particular streets, the introduction of water and gas, and other arrangements for the safety and convenience of their inhabitants, and laws for the irrigation and drainage of particular lands, for the construction of levees and the bridging of navigable rivers, are instances of this kind. Such legislation does not infringe upon the clause of the 14th Amendment requiring equal protection of the laws, because it is special in its character; if in conflict at all with that clause, it must be on other grounds. And when legislation applies to particular bodies or associations, imposing upon them additional liabilities, it is not open to the objection that it denies to them the equal protection of the laws, if all persons brought under its influence are treated alike under the same conditions. A law giving to mechanics a lien on buildings constructed or repaired by them, for the amount of their work, and a law requiring railroad corporations to erect and maintain fences along their roads, separating them from land of adjoining proprietors, so as to keep cattle off their tracks, are instances of this kind. Such legislation is not obnoxious to the last clause of the 14th Amendment, if all persons subject to it are treated alike under similar circumstances and conditions, in respect both of the privileges conferred and the liabilities imposed. It is conceded that corporations are persons within the meaning of the amendment. *Santa Clara County* v. *Southern P. R. Co.* (1885) 118 U. S. 394, 30 L. ed. 118, 6 Sup. Ct. Rep. 1132; *Pembina Consol. Silver Min. & Mill. Co.* v. *Pennsylvania* (1887) 125 U. S. 187, 31 L. ed. 653, 21 Inters. Com. Rep. 24, 8 Sup. Ct. Rep. 737. But the hazardous character of the business of operating a railway would seem to call for special legislation with respect to railroad corporations, having for its object the protection of their employees as well as the safety of the public. The business of other corporations is not subject to similar danger to their employees, and no objections, therefore, can be made to the legislation on the ground of its making an unjust discrimination. It meets a particular necessity, and all railroad corporations are, without distinction, made subject to the same liabilities. As said by the court below, it is simply a question of legislative discretion whether the same liabilities shall be applied to carriers by canal and stage coaches and to persons and corporations using steam in manufactories." The decision of the state court in (1885) 33 Kan. 298, 6 Pac. 291, was accordingly affirmed. To the same effect, see *Missouri P. R. Co.* v. *Haley* (1881) 25 Kan. 35; *Atchison, T. & S. F. R. Co.* v. *Kochler* (1887) 37 Kan. 463, 15 Pac. 567.

The doctrine thus laid down was treated as the law of the case in a decision with regard to the Minnesota act *Minneapolis & St. L. R. Co.* v. *Herrick* (1887) 127 U. S. 210, 32 L. ed. 109, 8 Sup. Ct. Rep. 1176, Affirming (1883) 31 Minn. 11, 47 Am. Rep. 771, 16 N. W. 413.

The same objection to the validity of the Iowa act was raised in *Buckle* v. *Central Iowa R. Co.* (1884) 64 Iowa, 603, 21 N. W. 103, and was thus disposed of: "The argument, briefly stated, is that under the statute railroad corporations are subjected to penalties and liabilities which other persons and corporations engaged in a like business are not subjected to. That the business of operating a railway is peculiarly hazardous to employees engaged in the operation of the road must be admitted. Counsel have not called our attention to any business which is equally hazardous, and as the statute is applicable to all corporations or persons engaged in operating railroads, it seems to us it does not discriminate in favor of or against any one. . . . The provisions of section 30 of article 3 of the

order to save the Iowa and Minnesota acts from the imputation ing repugnant to the constitutional provision which prohibits class legislation, it has been deemed necessary to hold that although the words employed by the legislature are perfectly general, they should be construed as being applicable only to servants engaged in the actual operation of the road.[5]

Constitution of the state and the 14th Amendment to the Constitution of the United States are quite similar, if not in spirit identical, in so far as either can be said to prohibit the legislature from conferring excessive privileges on any person or imposing penalties upon any corporation which are not shared by others under like circumstances."

In *Missouri P. R. Co.* v. *Mackey* (1887) 127 U. S. 205, 32 L. ed. 107, 8 Sup. Ct. Rep. 1161, the court said: "The contention of the company, as we understand it, is that that law [*i. e.*, of Kansas] imposes upon railroad companies a liability not previously existing, in the enforcement of which their property may be taken; and thus authorizes, in such cases, the taking of property without due process of law, in violation of the 14th Amendment. The plain answer to this contention is that the liability imposed by the law of 1874 arises only for injuries subsequently committed; it has no application to past injuries, and it cannot be successfully contended that the state may not prescribe the liabilities under which corporations created by its laws shall conduct their business in the future, where no limitation is placed upon its power in this respect by their charters. Legislation to this effect is found in the statute books of every state. The hard-ship or injustice of the law of Kansas of 1874, if there be any, must be relieved by legislative enactment. The only question for our examination, as the law of 1874 is presented to us in this case, is whether it is in conflict with clauses of the 14th Amendment. The supposed hardship and injustice consist in imputing liability to the company, where no personal wrong or negligence is chargeable to it or to its directors. But the same hardship and injustice, if there be any, exist when the company, without any wrong or negligence on its part, is charged for injuries to passengers. Whatever care and precaution may be taken in conducting its business or in selecting its servants, if injury happen to the passengers from the negligence or incompetency of the servants, responsibility therefor at once attaches to it. The utmost care on its part will not relieve it from liability, if the passenger injured be himself free from contributory negligence. The law of 1874 extends this doctrine and fixes a like liability upon railroad companies, where injuries are subsequently suffered by employees, though it may be by the negligence or incompetency of a fellow servant in the same general employment and acting under the same immediate direction. That its passage was within the competency of the legislature we have no doubt."

In *Deutsch* v. *Mississippi & M. R. Co.* (1866) 20 Iowa, 338, and *Voy* v. *Dubuque & S. C. R. Co.* (1866) 20 Iowa, 347, it was held that the law was not repugnant to art. 3, § 30, of the Constitution, which requires that "all laws shall be general and of uniform operation throughout the state." The ground of the decisions was that "the same liability is extended by the act upon the same terms to all in the same situation."

In *Doppe* v. *Chicago, R. I. & P. R. Co.* (1872) 36 Iowa, 52, the court said: "If the statute should be so construed as to apply to all persons in the employ of railroad corporations without regard to the business they were employed in, then it would be a clear case of class legislation, and would not apply upon the same terms to all in the same situation, and hence would be unconstitutional, and manifestly so. To illustrate: Suppose a railroad company employ several persons to cut the timber on its right of way where it is about to extend its road, and the land owner employs a like number of persons to cut the timber on a strip of equal length alongside such right of way. If one of each set of employees shall be injured by the negligence of a coemployee, and the employee of the railroad company can, under the statute, maintain an action against his employer, and the other cannot, then it is clear that the law does not apply upon the same terms to all in the same situation. The law, then, would not

647. Statutes imposing special duties upon various classes of employees.—*a. Street car companies.*—The Minnesota law of 1893, chap. 53, requiring street railway companies to provide inclosures at the front of their cars to protect the employees operating them from the inclemency of the weather during the winter season, has been held not to be invalid on any of the following grounds: (1) That it is not an exercise of the police power of the state; (2) that it is class-

have uniform operation, but would be violative of the Constitution, just as much as a law that should prescribe under the same circumstances different liabilities for merchants, for mechanics, and for laborers. The manifest purpose of the statute was to give its benefits to employees engaged in the hazardous business of operating railroads. When thus limited it is constitutional; when extended further it becomes unconstitutional."

These decisions were cited with approval in *Foley* v. *Chicago, R. I. & P. R. Co.* (1884) 64 Iowa, 644, 21 N. W. 124.

In *Nichols* v. *Walter* (1887) 37 Minn. 264, 33 N. W. 800, it was laid down that in order to exempt a statute from the imputation of being class legislation, the distinctions which it creates must be based upon some apparent natural reason—some reason suggested by necessity, by such a difference in the situation and circumstances of the subjects placed in different classes as suggests the necessity or propriety of different legislation with respect to them.

Applying this test in *Lavallee* v. *St. Paul, M. & M. R. Co.* (1889) 40 Minn. 249, 41 N. W. 974, the court said: "It is impossible to avoid the conclusion that the statute, if construed as appellant claims it ought to be, would be class legislation, not applying upon the same terms to all in the same situation, nor having any apparent natural reason for any distinction. The frequency and magnitude of the dangers to which those employed in operating railroads are exposed; the difficulty, sometimes impossibility, of escaping from them with any amount of care, when they come; the fact that a great number of men are employed, co-operating in the same work, so that no one of them can know all the others, their competency, skill, and care, so that he may be said to voluntarily assume the risk arising from the want of skill or care by any one of the number,—are a sufficient reason for applying a rule of liability on the part of the employer to the employee so employed, different from that ordinarily applied between master and servant. But no just reason can be suggested why such difference should be founded, not on the character of the employment, nor of the dangers to which those employed are exposed, but on the character only of the employer. We can see why the employer's liability should be greater when the business is that of operating a railroad, but cannot see why one individual or corporation should be held to a rule of liability different from that applied to another, when the employment and its hazards are precisely the same."

Other decisions to the same effect are *Pierce* v. *Central Iowa R. Co.* (1887) 73 Iowa, 140, 34 N. W. 783; *Rauborn* v. *Central Iowa R. Co.* (1888) 71 Iowa, 637, 35 N. W. 606, 38 N. W. 520.

In *Johnson* v. *St. Paul & D. R. Co.* (1890) 43 Minn. 222, 8 L. R. A. 419, 45 N. W. 156, the court argued as follows: "If a distinction is to be made as to the liability of employers to their employees, it must be based upon a difference in the nature of the employment, and not of the employers. One rule of liability cannot be established for railway companies, merely as such, and another rule for other employers, under like circumstances and conditions, unless upon the theory suggested in *Missouri P. R. Co.* v. *Mackey* (1887) 127 U. S. 205, 32 L. ed. 107, 8 Sup. Ct. Rep. 1161, that the state may 'prescribe the liabilities under which corporations created by its laws shall conduct their business in the future, where no limitation is placed upon its power in this respect by their charters.'—a proposition which, as thus broadly stated, that court, in view of its later utterances, could hardly have intended to announce. . . . Hence, most courts, as, notably, in Iowa and Kansas, have held that similar statutes, although general in their terms, embrace only 'the peculiar hazards of railroading.' But, when we come to examine the adjudicated cases,

legislation; (3) that it impairs the obligation of a contract; (4) that it interferes with the liberty of contract between street railway companies and their employees; (5) that it imposes an excessive fine.[1]

we confess we are unable to discover any definite, consistent, or logical rule which the courts have applied in determining whether, upon the facts of a particular case, it fell within or without the statute. In some cases it has been held that the statute applied, because the duty of the employees required them to ride upon the cars to the place of work, although the injury was not sustained while thus riding, and was not caused by, or in any manner connected with, the operation of the road. Such a position seems to us wholly illogical. Other cases have been held within the statute because the work being performed was necessary to the use and operation of the road, although the injury sustained was not caused by, or connected with, such use and operation. This, we think, is equally illogical. In fact, the proposition is so broad and definite as to bring within the act all employees, regardless of the nature of their employment; for the work of all, even clerks in offices, is, in a sense, necessary to the use and operation of the road. Therefore, after mature consideration, our conclusion is that, if any limitation is to be placed by the courts upon the application of this statute (and on constitutional grounds there must be), the only one which will furnish any definite or logical rule is to hold that it only applies to those employees who are exposed to the peculiar hazards incident to the use and operation of railroads, and whose injuries are the result of such dangers."

[1] In *State* v. *Smith* (1894) 58 Minn. 35, 25 L. R. A. 759, 59 N. W. 545, the court said: "What are called 'trailing cars' are excluded from this requirement, so that it applies only to cars on which the motive power is operated or controlled. The law was passed with reference to the fact that the man operating or controlling the motive power of such cars was required to stand where his person was almost wholly exposed to cold, storm, and wind, having but little protection except such as the clothing affords. . . . It is stipulated as a fact, what everybody knows,—that electric cars are run at a rate of speed of from 4 to 15 miles an hour, and at an average rate of between 8 and 9 miles an hour. Anyone acquainted with the extreme cold of much of the weather in this climate between the 1st of November and the 1st of April, and who knows, as everybody does, that the motorman on an electric car is obliged to stand in one place, always on the alert, his whole attention given to the means of controlling the motive power and the brake, and to looking out ahead, and unable, with due regard to his duties, to give attention to protecting himself from the cold, must appreciate that, when going at the rate of 8 or 9 miles an hour, perhaps against a head wind, and with the mercury below zero, the position of the motorman is one not merely of discomfort, but of actual danger to health, and sometimes to life, and the tendency of which is to disable him to some extent to perform his duties in the way that care to safety of his passengers and of travelers on the streets requires.

"It has never been questioned that the police power of the state extends to regulating the use of dangerous machinery, with a view to protecting, not only others, but those who are employed to use it; and if it be conceded, as it must be, that the state may intervene by regulations in such a case, we do not see why it may not in such a case as this. The act is within the police power. When a subject is within that power, the extent to which it shall be exercised and the regulations to effect the desired end are generally wholly in the discretion of the legislature. The legislature might in this case have required the use of the prescribed inclosure only at such times when the cold reached a certain degree, or when storms prevailed, but it was thought fit to make sure of the result aimed at by covering the time of year when extreme cold and bitter storms may occur at any time; and that was within its exclusive province.

"The objection that this is class legislation is based on the fact that the act is confined to street cars propelled by cable, steam, or electricity, and does not include street cars drawn by mules and horses, or carriages or wagons; and it is assumed that here is an attempt at purely arbitrary classification for the purpose of the act. The evil sought to be remedied does not exist in case of the slowly going mule or horse car, or carriage or wagon, to the same degree as in

It has been declared that the Missouri act of March 5, 1897, requiring every electric street car to be provided during the winter with a screen for the protection of the motorman, and declaring a penalty for violation of the act, is a valid exercise of the police power, since the state has an interest in the health of its citizens and the safety of the passengers on such cars; and that it infringes neither the 14th Amendment of the United States Constitution, nor art. 2, § 30, of the Missouri Constitution, providing that no person shall be deprived of liberty or property without due process of law.[2]

b. Operators of mines.—The clause in Pa. act March 3, 1871, requiring a signal system, cage covering, and brakes, as a provision for the safety of persons employed in coal mines, is within the police power of the state.[3]

The provision in Ill. Rev. Stat. 1874, §§ 1, 2, p. 704, requiring the operators of a coal mine or colliery employing ten or more men to have made an accurate map of the workings, is a proper exercise

the case of cable, electric, or steam cars. But where an evil exists in a variety of cases, it is a sufficient ground for classification in legislating, so as to include some and exclude others, that in the former the evil can be remedied, while in the latter it cannot be. The man in control of the cable, electric, or steam railway car may be boxed in without impairing his power of control in the slightest degree; but to box in the driver of a horse or mule car, or of a stagecoach or carriage or wagon, separating him from his animals, while, of course, it could be done, would bring about greater evils than those sought to be remedied. The difference in this respect between cars included in this act and those not included is such as to justify difference in legislating.

"The claim that the act impairs the obligation of a contract is based on the fact that in each case the railway company had a contract with the city, made before the passage of the act, in which the former bound itself to run cars of 'the best modern style and construction' and this act requires something in addition thereto. We need only say that, where parties contract on matters within the police power of the state, they do so subject to the exercise of that power whenever the legislature chooses to exercise it. If one contract with the state or a municipal corporation, acting under authority of the state, even if it were conceded that the legislature can, by contract or by giving authority to make a contract, bind the state not to exercise the police power, the legislative intent to do so would have to appear unmistakably. There is nothing to suggest such intent in the charter of either city. What we have said on the third point made by appellants applies with equal force to the fourth.

"The act imposes a fine of not less than $50 nor more than $[illegible] for a violation of the law, and makes each [illegible] that cars shall be run without complying with the law a separate offense. A fine of from $50 to $100 could not be called excessive. It is true the party may, by repeatedly committing the offense, add up a large aggregate of fines; so might the offender against any other law, the law against larceny or embezzlement, or any other; but that would not make the punishment excessive."

State v. *Whitaker* (1901) 160 Mo. 59, 60 S. W. 1068. In this case it was held that the title of the act, "An Act Requiring Persons, Associations and Corporations Owning or Operating Street Cars to Provide for the Well-Being and Protection of Employés" (Acts 1897, p. 102), sufficiently indicates the subject matter to be a requirement that electric street cars be equipped with screens for protection of motormen and the imposition of a penalty for operation of such cars without the screen.

[3] *Com. ex rel. Wilbur* v. [illegible] (1871) 8 Phila. 534.

of the police power, and not unconstitutional as being merely arbitrary, having no tendency to protect health or life, and compelling land owners to expend money for the mere convenience of their neighbors.[4]

The subject matter of the Montana statute (Laws 1897, p. 215), by which it is declared to be unlawful for any corporation to sink or work through any vertical shaft where running cages are used, to a greater depth than 300 feet, unless such shaft shall be provided with an iron-bonneted safety cage, is sufficiently expressed in its title, *viz.*, "An Act to Amend Section 775 of Title X. of the Penal Code of the State of Montana, to Have the Cages in All Mines Cased in."[5]

The Missouri act of 1894 (Mo. Laws, p. 182), amending Rev. Stat. 1889, § 7074, by which $10,000 damages may be recovered for the death of a miner killed by the negligence of his employer, the sum recoverable by the general damage act being only $5,000, is not unconstitutional, as it is a general law applicable to all persons of a certain class.[6]

648. Statutes restricting the defenses open to employers.—A statute making void a contract by a corporation for its release or relief from liability to an employee for negligence of a fellow servant is not unconstitutional.[1]

A statute which excludes the defense of contributory negligence, and imposes an absolute liability on railway companies for injuries received by any person in consequence of their failure to fence their roads, is not unconstitutional. Such a liability is merely a penalty for failure to conform to a regulation considered by the legislature to be essential for the protection of life and property.[2]

C. Defenses available in actions under statutes.

649. Generally.—The general theory upon which the courts have proceeded is that, in the absence of language evincing a contrary intention on the part of the legislature, a statute which so far changes the common law as to impose upon a master duties to which he had not been before subject, or to render him liable for the negligence of certain classes of servants resulting in injury to other servants whose right of action would, if common-law doctrines were applied, be

[4] *Daniels* v. *Hilgard* (1875) 77 Ill. 610.

[5] *State* v. *Anaconda Copper Min. Co.* (1900) 23 Mont. 498, 59 Pac. 851.

Fisher v. *Central Lead Co.* (1900) 156 Mo. 479, 56 S. W. 1107.

[1] *Pittsburgh, C. C. & St. L. R. Co.* v. *Montgomery* (1898) 152 Ind. 1, 49 N. E. 782.

Quackenbush v. *Wisconsin & M. R. Co.* (1885) 62 Wis. 411, 22 N. W. 519.

barred by the rule as to fellow employees, should not be construed in such a sense as to preclude the master from availing himself of any of those defenses which, as explained in § 255, *ante*, are based upon the fact that the injured person adopted a certain course of conduct with a full appreciation, actual or constructive, of the risk from which his injury eventually resulted. The extent to which this theory inures to the benefit of the master will be shown in the remaining sections of this subtitle.

650. Assumption of risks.—*a. Ordinary risks assumed.*—In some instances the statutory provisions which are considered in this and the following chapters operate so as to convert what would be an ordinary risk under the common law into an extraordinary one. But unless this be their effect, they are not deemed to change in any way the rule that a servant assumes all the ordinary risks which are manifestly incident to the employment. This proposition of course amounts merely to an assertion, in a form applicable to the circumstances, of the general principle that proof of negligence on the employer's part is a prerequisite to the establishment of the servant's right to maintain an action.[1]

[1] Under the Massachusetts act of 1887 (chapter XXXVII., *post*), it has been held, on the ground that the risk was an ordinary one, that the servant could not recover for injuries caused by the permanent construction of a building. *Hoard* v. *Blackstone Mfg. Co.* (1900) 177 Mass. 69, 58 N. E. 180. Nor for injuries caused by an imperfectly insulated wire belonging to another company, which used the same poles as the servants' own employers. *Chisholm* v. *New England Teleph. & Teleg. Co.* (1900) 176 Mass. 125, 57 N. E. 383.

For the same reason it has been held, with reference to the Wisconsin act of 1893 (chapter XXXIX., *post*), that a railway servant could not recover, where his hand was caught while coupling cars, owing to their being suddenly moved. *Andrews* v. *Chicago, M. & St. P. R. Co.* (1897) 96 Wis. 348, 71 N. W. 372.

In other cases the right of action for an injury resulting from a mere accident has been denied. *Hunter* v. *Kansas City & M. R. & Bridge Co.* (1898) 29 C. C. A. 206, 54 U. S. App. 653, 85 Fed. 379; *Hamilton* v. *Chicago, R. I. & P. R. Co.* (1894) 93 Iowa, 46, 61 N. W. 415.

Under a contract by a minor of sufficient discretion to comprehend the dangers of the employment, made with his father's assent, both father and son assume all the risks incident to the service, and neither can recover against the employer for any injury resulting from negligence of a coemployee in and about the common service. This doctrine is not modified by Ala. Code § 2588, or by the employees' act (Ala. Code, §§ 2590-2593; chapter XXXIX., *post*). *Lovell* v. *De Bardelaben Coal & I. Co.* (1889) 90 Ala. 13, 7 So. 756. The court said: "The question must be determined on the terms of that act (*i. e.*, employees' itself, and without reference to § 2588 of the Code (recovery for injuries causing death of minor), or any other statute. It relates to a class of cases in which, before, no cause of action existed,—to a class of injuries the damages for which, at common law, and under our statutes, had been bartered away before they accrued. The statute was one of enlargement purely. No existing right was curtailed, limited, or taken away. The only limitations in the act were upon causes of action created by the act, and having no existence outside of it. Giving its limitations the fullest interpretation, the broadest significance, they do not trench upon any right a father, who has consented to his minor son's entering an employ-

b. Possibility of future negligence on the part of statutory vice principal, not a risk assumed.—The possibility that an employee for whose acts and defaults a master is declared by a statute to be liable may at some future time be guilty of negligence in the discharge of his duties is not one of those risks which is undertaken by a servant who is within the protection of the statute. A different doctrine would manifestly have the effect to render such a statute ineffectual for the purpose for which it was framed.[2]

c. Extraordinary risks; how far assumed, in the absence of express provisions on the subject.—The inference that the injured servant assumed the risk in question will not be drawn in the case of an infraction of a statutory duty, any more than in the case of a common-law duty, where the evidence is not conclusive as to his ap-

ment in which he is injured by a co-employee, has to sue the employer for such injury, since he never had that right. In creating this new cause of action, it was, therefore, not only entirely competent for the legislature to confine it, in cases where the injury produced death, to the personal representative; but, in doing so, no existing right to sue was taken away from the parents. If the minor's employment was against the will of the father, he could maintain the action before the 'employees' act,' and afterwards, though not under it. If, with his consent, as in this case, he could sue neither before or after, nor under or without the statute, if we are to give any force whatever to § 2591, which designates the only person who may sue under the act, where the injury results in death, and particularly and peremptorily makes provision for the disposition of the recovery, which can only be carried out by the personal representative. Why the lawmakers engrafted this limitation on the prosecution of the cause of action, created by the act, is not for us to inquire; it is wholly immaterial. It provides for all servants and employees,—infants, as well as adults. Had either class been omitted, that class would have been without remedy for the negligence of coservants. Neither class was omitted, either in giving the remedy, or in requiring suit, in case of death, to be brought by the personal representative. To avoid judicial legislation, we must and do hold that the father, under the averments of this complaint, has no standing in court to recover damages for the death of his minor son, resulting from the negligence of fellow servants. *Stewart* v. *Louisville & N. R. Co.* (1887) 85 Ala. 493, 4 So. 373."

[2] *Davis* v. *New York, N. H. & H. R. Co.* (1893) 159 Mass. 532, 34 N. E. 1070, per Holmes, J.; *Murphy* v. *City Coal Co.* (1898) 172 Mass. 324, 52 N. E. 503; *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 115; *St. Louis, I. M. & S. R. Co.* v. *Toohey* (1899) 67 Ark. 209, 54 S. W. 577; *Georgia R. & Bkg. Co.* v. *Rhodes* (1876) 56 Ga. 645.

In *Woodward Iron Co.* v. *Andrews* (1896) 114 Ala. 243, 21 So. 440, the court argued thus: "One theory of defense under these counts is that the plaintiff must be held to have assumed the risks incident to Neal's negligence by remaining on the hand car when Neal caused it to be run into this dangerous place. This idea is unsound. To sustain it would be to emasculate the employer's liability act in respect of its second, third, and fifth clauses, and to rehabilitate the common-law doctrine of fellow servants as applicable to the cases provided for in those clauses, when the clear purpose of the act is to destroy the defense of assumption of risk by the injured employee in the several cases stated in the counts referred to. An employee in such cases may be guilty of such contributory negligence as will bar his recovery, but he does not assume the risks incident to the negligence of a superintendent, or of a person to whose orders he was bound to conform and did conform, or of a person in charge and control of a locomotive engine, car, etc."

In *Hall* v. *Chicago, R. & N. R. Co.* (1891) 46 Minn. 439, 49 N. W. 239, the

precaution of that risk.[1] See § 271, *ante*. Nor should the court take the case from the jury, where it is a reasonable inference that the action of the servant in subjecting himself to the given risk was neither entirely voluntary, nor accompanied by a full comprehension of that risk.[4] But if that appreciation is established, the inability of the servant to recover becomes a peremptory conclusion of law, unless the terms of the statute are such as to preclude the court from declaring the action to be barred on this ground.[5]

court refused to accept the contention of the defendant's counsel, that a servant assumes all the risks resulting from the negligence of other employees in violating the company's rules.

[3] *Peterson* v. *Johnson-Wentworth Co.* (1897) 70 Minn. 538, 73 N. W. 510 (unguarded machinery).

[4] Where a boy twelve years old, employed as a messenger, is placed at work by his master in the factory of the latter, in violation of Laws 1897, chap. 415, § 70, the act of the child in working therein is not, as a matter of law, a waiver of the protection of the statute. *Murino* v. *Lehmaier* (1901) 62 App. Div. 43, 70 N. Y. Supp. 790.

[5] (a) *General employers' liability acts.*—The doctrine in the text has frequently been held to be a bar to an action under the Massachusetts act of 1887 (chapter XXXVII., *post*). *O'Maley* v. *South Boston Gaslight Co.* (1893) 158 Mass. 135, 47 L. R. A. 161, 32 N. E. 1119; *Fisk* v. *Fitchburg R. Co.* (1893) 158 Mass. 238, 33 N. E. 510; *Gleason* v. *New York & N. E. R. Co.* (1893) 159 Mass. 68, 34 N. E. 79; *Doyle* v. *Lawrence Mfg. Co.* (1893) 159 Mass. 378, 34 N. E. 458; *Kleinest* v. *Knudsen* (1895) 160 Mass. 230, 35 N. E. 458; *Cassady* v. *Boston & A. R. Co.* (1895) 164 Mass. 170, 41 N. E. 129; *O'Connor* v. *Whittall* (1897) 169 Mass. 563, 18 N. E. 840; *Dacey* v. *New York, N. H. & H. R. Co.* (1897) 168 Mass. 479, 47 N. E. 418; *McPhee* v. *Scully* (1895) 163 Mass. 216, 39 N. E. 1007; *Cunningham* v. *Lynn & B. Street R. Co.* (1898) 170 Mass. 298, 49 N. E. 449; *Corrigan* v. *Washburn & M. Mfg. Co.* (1898) 170 Mass. 79, 48 N. E. 1079; *French* v. *Columbia Spinning Co.* (1897) 169 Mass. 531, 48 N. E. 269; *McCauley* v. *Springfield Street R. Co.* (1897) 169 Mass. 301, 47 N. E. 1006; *Flaherty* v. *Norwood Engineering Co.* (1898) 172 Mass. 134, 51 N. E. 463; *Ford* v. *Mt. Tom Sulphite Pulp Co.* (1899) 172 Mass. 544, 48 L. R. A. 95, 52 N. E. 1065; *Demers* v. *Mershall* (1899) 172 Mass. 548, 52 N. E. 1066; *Swallow* v. *Kellogg* (1897) 169 Mass. 514, 48 N. E. 622; *Tenanty* v. *Boston Mfg. Co.* (1898) 170 Mass. 323, 49 N. E. 654.

The servant was declared to have assumed the risk, in several decisions under the Alabama employers' liability act. But the language and reasoning of the court show that the defense really meant was contributory negligence. The decisions referred to are therefore collected in §§ 651, 652, *infra*.

It may also be mentioned here that a father who consents to the employment of his minor son in a dangerous service cannot recover in an action under the Texas statutes for the death of his son, resulting from his inexperience and the failure of the employer to instruct him regarding the dangers incident to the employment. *Missouri, K. & T. R. Co.* v. *Evans* (1897) 16 Tex. Civ. App. 68, 41 S. W. 80.

(b) *Acts imposing specific duties.*—On the ground that the risks in question were appreciated, and therefore assumed, the action was held not to be maintainable in the following cases: *Collins* v. *Patten & S. R. Co.* (1899) 94 Me. 80, 44 Atl. 361 (blocking of frog); *Girard* v. *Michigan C. R. Co.* (1890) 83 Mich. 564, 11 L. R. A. 402, 47 N. W. 837 (unblocked frog); *Fleming* v. *St. Paul & D. R. Co.* (1880) 27 Minn. 111, 6 N. W. 448 (railway not fenced); *Sweeney* v. *Central P. R. Co.* (1880) 57 Cal. 15 (railway not fenced); *Fitzgerald* v. *New York C. & H. R. R. Co.* (1891) 59 Hun. 225, 12 N. Y. Supp. 932 (no warning signals near a low bridge); *Abbot* v. *McCadden* (1892) 81 Wis. 563, 29 Am. St. Rep. 910, 51 N. W. 1079 (servant knew of custom of running trams at an unlawful rate of speed); *Thompson* v. *Johnston Bros. Co.* (1893) 86 Wis. 582, 57 N. W. 298 (unguarded machinery); *Williams* v. *Chicago Lumber Co.* (1901) 110 Wis. 578, 86 N. W. 157 (unguarded gears); *Debaker* v. *Hal*

The intention of the legislature to deprive employers of the benefit of this defense in so far as its rests upon the conception of an implied contract has been inferred in the case of a statute in which it is expressly declared that, under the circumstances specified, the servant shall have the same right to compensation and remedies as if he were not in the service of the defendant.[a]

ing (1900) 107 Wis. 218, 83 N. W. 60 (unfenced machinery); *Kimball v. Ubsa Paper Co.* (1900) 51 Misc. 538, 42 N. Y. Supp. 597 (unguarded machinery); *Anderson v. C. A. Nelson Lumber Co.* (1899) 67 Minn. 79, 69 N. W. 640 (unguarded machinery); *E. S. Heaton Coupler Co. v. Clarke* (1897) 25 C. C. A. 220, 51 U. S. App. 71, 79 Fed. 900 (unguarded machinery); *Wheeler v. Cottrell Lithographic Co.* (1902) 171 N. Y. 631, 30 N. E. 236 (unguarded machinery); *Manzi v. Friedl* (1898) 33 App. Div. 217, 53 N. Y. Supp. 482 (employee permitted to go on an elevator cradle while in motion); *Nichols v. Rebus* (1896) 3 App. Div. 582, 38 N. Y. Supp. 214 (elevator not covered); *Speer v. Osage Coal & Min. Co.* (1895) 58 Mo. 68 (no fence at entrance of mine); *Babbit v. Brazil Block Coal Co.* (1901) 25 Ind. App. 654, 58 N. E. 856 (uncovered cage in mine); *Island Coal Co. v. Sherwood* (1899) 153 Ind. 699, 53 N. E. 1135 (mining act); *Powell v. Ishpeming Iron & Steel Co.* (1897) 98 Wis. 35, 73 N. W. 573.

The owner of a coal mine is not liable for an injury to an employee, caused by a fall of top coal from the roof of the mine at the place where he was at work, where he was an experienced miner, and had thoroughly tested the roof shortly before the fall and believed it to be perfectly safe, although Ind. Rev. Stat. 1894, § 7472, makes it the duty of the mining boss to examine every working place in the mine as often as every alternate day, and see that the same is properly secured by props or timber, and that safety is in all respects assured. *Island Coal Co. v. Greenwood* (1898) 151 Ind. 176, 50 N. E. 36.

Compare also cases cited in § 651, note 4, *infra*.

(c) *Municipal ordinances.*—On the ground that the servant understood the risk caused by the violation of a municipal ordinance, recovery was denied in the following cases: *Browne v. Siscel, C. & Co.* (1901) 191 Ill. 226, 60 N. E. 815, Affirming (1900) 90 Ill. App. 49; *Swift & Co. v. Fue* (1896) 66 Ill. App. 651 (guarding of machinery); *Martin v. Chicago, R. I. & P. R. Co.* (1901) 87 N. W. 651 (the speed of trains); *Hann v. L. Wolff Mfg. Co.* (1901) 91 Ill. App. 122 (unguarded machinery); *Chicago Packing & Provision Co. v. Robin* (1892) 47 Ill. App. 610.

[a] In *Weblin v. Ballard* (1886) L. R. 17 Q. B. Div. 122, 55 L. J. Q. B. N. S. 25, 54 L. T. N. S. 532, 34 Week. Rep. 65, 50 J. P. 597, it was ruled that the Employers' liability act of 1880 (compare XXXIII. *post*) had taken away the common-law defense that the servant assumed the risks of his employment. This view was adopted by all the Lords Justices in *Thomas v. Quartermaine* (1887) L. R. 18 Q. B. Div. 685, 56 L. J. Q. B. N. S. 340, 57 L. T. N. S. 537, 35 Week. Rep. 555, 51 J. P. 516. Lord Esher stated his views as follows: "The first thing to consider is, What is the true construction of the employers' liability act 1880? It has been suggested that this act has only the effect of doing away with the doctrine of the immunity of the master from damage arising from the negligence of another servant in the common employment of the master. To my mind it is clear that the statute has taken away from the master another defense. It was, no doubt, held that a servant could not sue a master for injuries arising from the negligence of a fellow servant, but it was also held that a man who went into any employment undertook to take all the ordinary risks incident thereto, unless they were concealed or were known to the master, and not to the servant. It seems to me clear that the act has taken away that defense from the master. I can see no difference between contracting to take a risk upon oneself and undertaking an employment to which risk attaches. No one ever suggested that there could be such a contract in the case of any person other than a servant, so that when a servant is put on a footing with other persons that defense of the master is gone. The case is reduced, therefore, to a personal action, founded on negligence."

It has also been held, quite recently, that the defense of assumption of risks is not available to a master who is sued for noncompliance with a statutory duty, for a breach of which a penalty has been imposed. The position taken was that, if he were allowed to protect himself by this defense under such circumstances, he would be enabled virtually to nullify a penal statute, and that a doctrine leading to such a result was contrary to public policy.[7]

d. Effect of express provisions with regard to assumption of extraordinary risks.—The effect of such a provision as that which is found in § 2 of the North Carolina act of 1897 (chapter XXXIX. *post*) is manifestly to deprive the employee altogether of the benefit of a defense which presupposes that an agreement, whether it be express or implied, to waive the right of action for an injury resulting from the negligence of the master himself, or his agent, is valid and binding upon a servant.[8]

In cases where the statute provides that an assumption of the risk shall not be inferred from the servant's continuance of work,[9] or that knowledge by an employee of the unsafe character of an appliance shall be no defense to an action for injuries caused thereby,[10] the intention of the legislature to exclude altogether the defense of assumption of the risk would seem to be not an unreasonable inference. But the decisions upon this subject are not entirely consistent.[11]

In some of the employers' liability acts discussed in chapter

The supreme court of Massachusetts has arrived at a different conclusion with regard to the effect of the similar statute of that state. See note 5, subd. (a), *supra*.

[7] *Nasmore* v. *Cleveland, C. C. & St. L. R. Co.* (1899) 48 L. R. A. 68, 37 C. C. A. 499, 96 Fed. 298. Another decision to the same effect is *Boyd* v. *Brazil Block Coal Co.* (1898; Ind. App.) 50 N. E. 368 (violation of mining act). But it seems to be inconsistent with the Indiana cases cited in note 5, subd. (b), *supra*.

[8] It has been laid down that the doctrine of assumption of risks "has no application, where the law requires the adoption of new devices to save life or limb (as, self-couplers), and the employee, either ignorant of that fact, or expecting daily compliance with the law, continues in service with the appliances formerly in use." *Greenlee* v. *South. R. Co.* (1898) 122 N. C. 977, 41 L. R. A. 399, 65 Am. St. Rep. 734, 30 S. E. 115 (no self couplers); *Coley* v. *North Carolina R. Co.* (1901) 128 N. C. 531, 57 L. R. A. 817, 39 S. E. 43 (no hand holds on tender).

[9] As, by § 8 of the act of Congress of March 2, 1893 (27 Stat. at L. 532, chap. 196, U. S. Comp. Stat. 1901, p. 3174), which (§ 4) declares it to be "unlawful for any railroad company to use any car in interstate commerce that is not provided with secure grab irons or hand holds in the ends and sides of each car for greater security to men in coupling and uncoupling cars."

[10] As under the Constitutions of Mississippi and South Carolina. See chapter XXXVIII. *post*.

One of the Federal courts of appeals has held that the meaning of such a provision is that the knowledge of the defect in question is a circumstance which the jury should be directed to consider in determining whether the servant was guilty of contributory negligence in intending to assume the risk of handling the appliance. *Cleveland, C. C. & St. L. R. Co.* v. *Baker* (1899) [illegible]

XXXVIII., clauses are inserted which change the common law doctrine of assumption of risks to the extent of making the availability of that defense a question for the jury, even though it may be shown clearly that he fully appreciated the given risk.[12]

651. Contributory negligence.—*a. Generally.*- The doctrine established by the great weight of authority is that a servant who is seeking indemnity for injuries alleged to have resulted from a breach of a statutory duty or from the negligence of a statutory vice principal cannot recover, if the evidence shows that he was himself wanting in ordinary care, and that he contributed by the carelessness to the injuries complained of.

b. Availability of the defense, as dependent on the provisions of

908, 63 U. S. App. 553, 91 Fed. 221, construing the statute referred to in note 9, *supra*.

The provision in the South Carolina Constitution (chapter XXXVIII., *post*) applies to an action by a section master for personal injuries by failure of the company to furnish a sufficient number of persons to perform the work. *Bodie* v. *Charleston & W. C. R. Co.* (1901) 61 S. C. 408, 39 S. E. 715.

Under this provision a motion for a nonsuit on the ground that undisputed evidence showed that a brakeman suing a railroad for injuries resulting from defective mechanism or the defects complained of before using such mechanism, and thereby assumed the risk, is properly denied, since the Constitution meant that such prior knowledge of defects would not defeat the action. *Youngblood* v. *South Carolina & G. R. Co.* (1901) 60 S. C. 9, 85 Am. St. Rep. 824, 38 S. E. 232.

A requested charge in an action for injuries to a servant, that "knowledge, by an employee injured, of the defective or unsafe character or condition of any machinery, ways, or appliances, shall be no defense to an action for injury caused thereby,—such as injury resulting from a defective switch, coupler, or other appliance in use by railroad companies," was properly granted, since, except the last clause, which is illustrative and applicable to the case, it is in the language of § 15 of the Constitution. *Ibid.*

A requested instruction in an action for injuries to a servant, that a servant assumes all risks, except those arising from unsafe or defective machinery and keeping the same in repair, could not be complained of, as failing to state that risks from obvious defects in machinery were assumed, in the absence of a request to charge on the specific proposition, since the general proposition of law was correctly stated. *Ibid.*

[12] *New York*.—(See chapter XXXVII. subtitle V, *post*).

Ontario.—55 Vict. chap. 30 (Ont. Rev. Stat. 1897, chap. 160), § 6, cl. 3. (See chapter XXXVII. subtitle V, *post*.) That this provision, so far as regards its effect upon the servant's right of action, embodied the doctrine finally established in *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 10 Week. Rep. 392, 55 J. P. 660, was pointed out in *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117. But it should be remembered that the English case referred to was concerned, not with the availability of the defense of a contractual assumption of risks, but with the meaning and effect of the maxim, *Volenti non fit injuria*. See § 377, *ante*, and § 652a, *infra*.

In one case it was held that a verdict for the servant will not be set aside where, although he knew that the defect which caused the injury had not been remedied at the time he returned to work, after an interval, he did not appreciate the nature and extent of the risk. *Haight* v. *Wortman & W. Mfg. Co.* (1894) 24 Ont. Rep. 618. The contention of the counsel that the statutory provision only applied to cases in which the plaintiff had continued to work without any intermission was rejected.

British Columbia.—In this Province the legislature has used the same language as that found in the Ontario statute. Acts of 1891, chap. 10 (B. C. Rev. Stat. 1897), § 6.

the statute sued upon.—In some instances this conclusion necessarily follows from the language of the statute itself, the absence of contributory negligence being explicitly declared to be a condition precedent to recovery.[1]

c. Availability of defense inferred from language of statute.—In

[1] A provision to this effect is inserted in the employers' liability acts of the following states:

Florida—(See chapter XXXIX., *post.*) The Florida statute of June 7, 1877, § 3741, having been adopted from the Code of Georgia, the construction placed upon that Code by the courts of the latter state has been followed in Florida. (See next subdivision.) An employee of a railway company, therefore, cannot recover for an injury caused by the fault of a coemployee, unless he was himself entirely free from negligence. *Daral* v. *Hunt* (1894) 34 Fla. 85, 15 So. 876.

The provisions in the first section of the act relating to the apportionment of damages have no application to such cases. *Florida C. & P. R. Co.* v. *Mooney* (1898) 40 Fla. 17, 24 So. 118.

Georgia—(See chapter XXXIX., *post.*) It is declared by the Civil Code that an employee of a railway company may recover for an injury caused by the negligence of a coemployee, and "without fault or negligence on the part of the person injured."

Construing this provision in connection with that which declares, with respect to strangers, that "no person shall recover damage from a railroad company for injury to himself or his property, where the same is done by his consent, or is caused by his own negligence," and that "if the complainant and the agents of the company are both at fault the former may recover, but the damages shall be diminished by the jury in proportion to the amount of default attributable to him," the supreme court has held that the only distinction between an injured employee and other persons is that the employee must be wholly blameless to authorize a recovery, while others may recover though partly at fault. *Thompson* v. *Central R. & Bkg. Co.* (1875) 54 Ga. 509.

That the injured employee cannot recover unless he was wholly free from fault was also declared in the following cases: *Rowland* v. *Cowan* (1866) 35 Ga. 105; *Atlanta & R. Air Line R. Co.* v. *Ayers* (1874) 53 Ga. 12; *Sears* v. *Central R. & Bkg. Co.* (1875) 53 Ga. 630; *Campbell* v. *Atlanta & R. Air Line R. Co.* (1874) 51 Ga. 488 (1876) 56 Ga. 586; *Marsh* v. *South Carolina R. Co.* (1876) 56 Ga. 274; *Georgia R. & Bkg. Co.* v. *Goldwire* (1876) 56 Ga. 196; *Central R. & Bkg. Co.* v. *Ivey* (1877) 58 Ga. 185, (1878) 61 Ga. 500; *Central R. & Bkg. Co.* v. *Sears* (1877) 59 Ga. 136, (1878) 61 Ga. 279; *Central R. Co.* v. *Mitchell* (1879) 63 Ga. 173; *Central R. & Bkg. Co.* v. *Henderson* (1882) 69 Ga. 715; *Mehaffy* v. *Georgia R. Co.* (1878) 60 Ga. 119; *East Tennessee, V. & G. R. Co.* v. *Maloy* (1886) 77 Ga. 237, 2 S. E. 941; *Central R. & Bkg. Co.* v. *Lanier* (1889) 83 Ga. 587, 10 S. E. 279; *Countryman* v. *East Tennessee, V. & G. R. Co.* (1892) 89 Ga. 835, 16 S. E. 84; *Georgia R. & Bkg. Co.* v. *Hicks* (1894) 95 Ga. 301, 22 S. E. 612; *Baker* v. *Western & A. R. Co.* (1882) 68 Ga. 699.

To entitle an injured employee to recover, he must have been free from negligence immediately, remotely, directly or indirectly contributing to the injury. *Walker* v. *Atlanta & W. P. R. Co.* (1899) 103 Ga. 820, 30 S. E. 503.

This rule does not mean that, in order to entitle him to recover, the employee must have been absolved by reason of the discharge of duties wholly disconnected with the catastrophe, but merely that he must be faultless in respect to something which contributed to produce the catastrophe. "If he immediately or remotely, directly or indirectly, caused it or any part of it, or contributed to it at all, then he cannot recover, but though he had been at fault about something wholly disconnected with the transaction, or was at the time at fault about a matter that had nothing to do with the catastrophe, then he may recover." *Central R. Co.* v. *Mitchell* (1879) 63 Ga. 173. See generally §§ 323, 321, *ante.*

As the Code makes no distinction between the different classes or grades of employees, it is error for a court to give an instruction which would permit a plaintiff to recover, although negligent, provided his injury was caused by his obedience to an order of a superior officer to whose authority he was subject.

other instances the same inference has been drawn from the fact that the servant is given a right of action for an injury "caused" or "occasioned" by an abnormally dangerous condition of the plant, or by the negligence of certain classes of coemployees. Evidence which shows that the servant was guilty of contributory negligence necessarily implies that the negligence complained of was not the proximate cause of the accident.[2]

But in order to let in this defense, it is not necessary that the

and by whom he was liable to be discharged for disobedience. *Western & A. R. Co.* v. *Adams* (1875) 55 Ga. 279.

In the trial of an action against a railway company for the homicide of an employee, resulting from an act in which deceased participated, a charge so worded as to convey to the jury the idea that they would be authorized to find for the plaintiff solely on account of the defendant's negligence, without regard to the question of the exercise of ordinary care by the deceased in getting into a dangerous position, is erroneous. *Western & A. R. Co.* v. *Jackson* 1901) 113 Ga. 355, 38 S. E. 820.

Indiana — (See chapter XXXVII., *post.*) Under this act it has been laid down that an employee of a corporation is not relieved from the obligation of using that degree of care which is required by the common law. *Whitcomb* v. *Standard Oil Co.* (1899) 153 Ind. 513, 55 N. E. 440.

Recovery has been denied on the ground of the servant's failure to use such care, in *Dixon* v. *Western U. Telg. Co.* (1895) 68 Fed. 630; *American Car Co.* v. *Jackson* (1900) 24 Ind. App. 390, 56 N. E. 862.

Massachusetts — (See chapter XXXVII., *post.*) Contributory negligence has been held to be a bar to the action in the following cases: *Shea* v. *Boston & W. R. Co.* (1891) 154 Mass. 31, 27 N. E. 672; *Cunningham* v. *Lunn & B. Street R. Co.* (1898) 170 Mass. 298, 49 N. E. 440; *Doherty* v. *Norwood Engineering Co.* 1898) 172 Mass. 134, 51 N. E. 463; *Scallan* v. *Kellogg* (1897) 169 Mass. 511, 48 N. E. 622; *Gustafsen* v. *Washburn & M. Mfg. Co.* (1891) 153 Mass. 468, 27 N. E. 179; *Knight* v. *Overman Wheel Co.* (1899) 171 Mass. 455, 51 N. E. 890.

Minnesota — (See chapter XXXIX., *post.*) The qualification of the company's liability by the insertion of the words, "without contributory negligence on his part," is not intended to change the rule of evidence or burden of proof. This proviso was added from motives of caution, that it might not be supposed that the declared liability of the master was intended to be absolute, and without regard to any negligence of the complainant contributing to the result. The language recited simply preserves, as an express limitation of the declared liability, the recognized principle of the common law as to the effect of contributory negligence.

Texas — Act of 1897. (See chapter XXXIX., *post.*)

Wisconsin — (See chapter XXXIX., *post.*)

[2] (a) *Employers' liability acts.*— The construction mentioned in the text was that which has been put upon the English employers' liability act of 1880 (chapter XXXVII., *post*). *Martin* v. *Connah's Q. & H. Ry. Co.* (1885) 33 Week. Rep. 216. Other English and Colonial cases in which the inability of a negligent servant to recover under that act or one of those copied from it has been recognized, though not always with explicit reference to its terminology, are *Thomas* v. *Quartermaine* (1887) L. R. 18 Q. B. Div. 685, 56 L. J. Q. B. N. S. 340, 57 L. T. N. S. 527, 35 Week. Rep. 555, 51 J. P. 516; *Ilen* v. *Liverpool Welsh Channel Co.* (1886; Q. B. D.) 2 Times L. R. 547; *Ayres* v. *Bull* (1889) 5 Times L. R. 202; *Bunker* v. *Midland R. Co.* (1883) 47 L. T. N. S. 476, 31 Week. Rep. 231; *M'Shane* v. *Barter* (1890; Q. B. D.) 7 Times L. R. 58; *Stuart* v. *Evans* (1883) 49 L. T. N. S. 138, 31 Week. Rep. 706; *M'Coy* v. *Waterford S. S. Co.* (1886) Ir. Rep. 18 C. L. 159; *Tennant* v. *Rudolph* (1895) 22 Ont. App. Rep. 250; *O'Brien* v. *Sanford* (1892) 22 Ont. Rep. 137; *Patterson* v. *Stevens* (1890) 11 New So. Wales L. R. (L.) 83; *Eureka Ext. Co.* v. *Allen* (1883) 9 Vict. L. R. (L.) 341; *Davidson* v. *Wright* (1887) 13 Vict. L. R. (L.) 351 (error not to submit question of contributory negligence to jury.

statute relied upon should contain words which, either expressly or by implication, make the absence of contributory negligence a prerequisite to success in the action. A large number of cases have been decided upon the theory that, in the absence of language indicative of a contrary intention, a statute which deprives an employee, either wholly or partially, of the protection afforded by the doctrine of common employment, or which subjects him to a new duty for the benefit of his servants, does not preclude him from availing himself of the plea that the injured person was himself negligent, and that his negligence was a proximate cause of his injury.[3]

where plaintiff's own evidence shows that he ought to have observed the defect which caused his injury).

That contributory negligence is a bar to an action under the Alabama statute, which is couched in the same words as those just mentioned (see chapter XXXVII., *post*), has been frequently held. *Anniston Pipe Works* v. *Dickey* (1890) 93 Ala. 418, 9 So. 720; *Hissong* v. *Richmond & D. R. Co.* (1890) 91 Ala. 514, 8 So. 776; *Birmingham Furnace & Mfg. Co.* v. *Gross* (1892) 97 Ala. 220, 12 So. 36; *Wilson* v. *Louisville & N. R. Co.* (1887) 85 Ala. 269, 4 So. 701; *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 200, 10 So. 145; *Southern R. Co.* v. *Harbin* (1900) 110 Ga. 808, 36 S. E. 218 (a decision as to an accident which occurred in Alabama).

See also cases cited in note 4, *infra*.

(b) *Statutes imposing specific duties.* — In a case where one of the mining acts was being construed, it was held that the injury was not "occasioned" by a breach of its provisions, where there had been contributory negligence on the plaintiff's part. But such cases are usually decided with reference to the more general principle exemplified by the authorities cited in the next note. *Spica* v. *Osage Coal & Min. Co.* (1885) 88 Mo. 68.

[3](a) *Statutes declaratory of common-law principles.*—It has been held that the Minnesota act set out in chapter XXXVI., *post*, does not change the rule as to contributory negligence. *Lundberg* v. *Sherlin-Carpenter Co.* (1897) 68 Minn. 135, 70 N. W. 1078; *Soutar* v. *Minneapolis International Electric Co.* (1897) 68 Minn. 18, 70 N. W. 796; *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774.

(b) *Statutes affecting the operation of the doctrine of common employment.* —The rule in the text has been applied under several of the statutes reviewed in chapter XXXIX., *post*. *Hoben* v. *Burlington & M. River R. Co.* (1866) 20 Iowa, 562; *Way* v. *Illinois C. R. Co.* (1875) 40 Iowa, 341; *Kansas P. R. Co* v. *Pearcy* (1885) 34 Kan. 472, 8 Pac. 780; *Chicago, K. & N. R. Co.* v. *Brown* (1890) 44 Kan. 384, 24 Pac. 497 (fact that servant's negligence was slight, held to be immaterial); *Hancock* v. *Norfolk & W. R. Co.* (1899) 124 N. C. 222, 32 S. E. 679; *Nelson* v. *New Orleans & N. E. R. Co.* (1900) 40 C. C. A. 673, 100 Fed. 731 (Missouri act).

(c) *Statute imposing specific duties.* —In the following decisions with reference to statutes of the type reviewed in chapter XLI., *post*, contributory negligence has been held to be a good plea: *Farquhar* v. *Alabama & V. R. Co.* (1900) 78 Miss. 193, 28 So. 850 (trains run at unlawful speed); *Lake Erie & W. R. Co.* v. *Craig* (1896) 19 C. C. A. 631, 37 U. S. App. 654, 73 Fed. 642 (unblocked frog); *Grand* v. *Michigan C. R. Co.* (1890) 83 Mich. 564, 11 L. R. A. 402, 47 N. W. 837 (unblocked frog); *Holum* v. *Chicago, M. & St. P. R. Co.* (1890) 80 Wis. 299, 50 N. W. 99 (unblocked frog); *Finlay* v. *Miscampbell* (1890) 20 Ont. Rep. 29 (unguarded opening in floor); *Headford* v. *McClary Mfg. Co.* (1893) 23 Ont. Rep. 335 (unguarded opening); *Clarke* v. *Holmes* (1862) 7 Hurlst. & N. 937, 31 L. J. Exch. N. S. 356, 8 Jur. N. S. 992, 10 Week. Rep. 405 (unguarded machinery); *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87 (unguarded machinery), per Vaughan Williams, L. J. (p. 419); *Pringle* v. *Grosvenor* (1894) 21 Sc. Sess. Cas. 4th series, 532 (unguarded machinery); *E. S. Higgins Carpet Co.* v. *O'Keefe* (1897) 25 C. C. A. 220, 51 U. S. App. 74, 79 Fed. 900 (unguarded machinery); *Thompson* v. *Edward P. Allis*

d. Knowledge of risk, how far negligence is inferable from.—Whether the mere fact of the servant's knowledge of the danger caused by that particular breach of a statutory duty to which his injury was attributable will render him chargeable, as a matter of law, with negligence, is a question the answer to which has been in some instances determined partially, at least, by the phraseology of the provision imposing the duty infringed. [illegible] the whole it may be said that the

Co. (1895) 89 Wis. 523, 62 N. W. 527 (unguarded machinery). Following *Curry* v. *Chicago & N. W. R. Co.* (1878) 43 Wis. 665 (fence statute), and Distinguishing *Quackenbush* v. *Wisconsin & M. R. Co.* (1885) 62 Wis. 411, 22 N. W. 519, on the ground that the statute there construed created an absolute liability for injuries occasioned, "in whole or in part," by the failure to fence: *Helmke* v. *Thilmany* (1900) 107 Wis. 216, 83 N. W. 360 (unguarded machinery); *Anderson* v. *C. A. Nelson Lumber Co.* (1896) 67 Minn. 79, 69 N. W. 630 (unguarded machinery); *Wabash, St. L. & P. R. Co.* v. *Thompson* (1884) 15 Ill. App. 117 (unguarded machinery); *Rogers* v. *Hamilton Cotton Co.* (1893) 23 Ont. Rep. 425 (unguarded machinery); *Reynolds* v. *Lindman* (1871) 32 Iowa, 146 (unboxed tumbling rod on threshing machine); *Keenan* v. *Edison Electric Illuminating Co.* (1893) 159 Mass. 379, 34 N. E. 366 (no automatic gates to elevator); *Guenther* v. *Lockhart* (1891) 40 N. Y. S. R. 942, 16 N. Y. Supp. 717 (no automatic doors on elevator); *Christner* v. *Cumberland & E. L. Coal Co.* (1891) 146 Pa. 67, 23 Atl. 221 (uncertificated mining boss employed); *Adams* v. *Kansas & T. Coal Co.* (1900) 85 Mo. App. 486 (mining act; provision as to props); *Victor Coal Co.* v. *Muir* (1894) 20 Colo. 320, 26 L. R. A. 435, 46 Am. St. Rep. 299, 38 Pac. 378 (mining act; provision as to props); *Graham* v. *Newburg Orrel Coal & Coke Co.* (1893) 38 W. Va. 273, 18 S. E. 584 (mining act); *Krause* v. *Morgan* (1895) 53 Ohio St. 26, 40 N. E. 886 (failure to keep mine free from gas); *Queen* v. *Ohio Coal & L. Co.* (1895) 95 Tenn. 158, 30 L. R. A. 82, 49 Am. St. Rep. 935, 32 S. W. 460 (employment of boy under twelve in a coal mine).

Although the Pennsylvania act, April 18, 1877 (Pub. Laws, 56, § 6), requires a traveling way at the bottom of the shaft for miners to pass, yet if a miner fails to look and listen before stepping under a descending cage, he cannot recover. *Arnould* v. *Rockhill Iron & Coal Co.* (1896) 135 Pa. 1, 19 Atl. 797.

A statute requiring railway companies to construct safe crossings and cattleguards, and declaring them to be liable for all damages caused by their neglect or refusal to do so, and providing that in order that the injured party may recover it is only necessary for him to prove such neglect or refusal, does not by implication exclude any defense which would ordinarily be available. Such a provision merely affects the burden of proof. *Ford* v. *Chicago, R. I. & P. R. Co.* (1891) 91 Iowa, 179, 24 L. R. A. 657, 59 N. W. 5.

Where plaintiff was injured by a fall of part of the roof of a coal mine in which he was employed, and he had no control over the roof of the mine, and had been directed not to remove any slate therefrom, he was not guilty of contributory negligence for failing to prop the roofs, under McClain's (Iowa) Code, § 2463, making it a misdemeanor for a miner to fail to prop the roofs and entries under his control in the mine where he is working. The statute has no application to such a case. *Taylor* v. *Star Coal Co.* (1899) 110 Iowa, 40, 81 N. W. 249.

An instruction that the question of contributory negligence is not in the case is erroneous, where, although it is proved that the defendant company had violated a statute requiring that all its own cars should have ladders at the ends, and not at the sides, the evidence is also susceptible of the inference that the plaintiff was negligent in trying to mount the train at night while it was moving at a dangerous rate of speed. *Kilpatrick* v. *Grand Trunk R. Co.* (1900) 72 Vt. 263, 47 Atl. 827.

In the following cases the defense was held to be a bar to an action for injuries caused by a breach of a municipal ordinance: *Chicago Packing & Provision Co.* v. *Rohan* (1892) 47 Ill. App. 640

evidential significance of this element in each jurisdiction depends upon the doctrine which is applied in common-law actions.[4]

It has already been mentioned in this section that some statutes expressly provide that the servant's knowledge shall not of itself be sufficient to prevent recovery. The effect of such a provision is manifestly to preclude a court from declaring, as a matter of law, that the servant was negligent, unless something more is shown than his knowledge of the abnormal conditions which caused his injury.[5]

(servant, owing to want of "proper safeguards," fell into vat containing a hot liquid): *Pitrowsky* v. *J. B. Reedy Elevator Mfg. Co.* (1894) 54 Ill. App. 253 (plaintiff injured by revolving shaft which should have been covered): *Swift & Co.* v. *Fae* (1896) 66 Ill. App. 651 (same point).

[4] In the earlier decisions regarding the Alabama employers' liability act (chapter XXXVII., *post*), the position was taken that, provided the employer knew of the defect which caused the injury complained of, the servant did not forfeit his right of action under the statute merely because he continued to work with knowledge of that defect. *Mobile & B. R. Co.* v. *Holborn* (1887) 84 Ala. 133, 4 So. 146; *Highland Ave. & Belt R. Co.* v. *Walters* (1890) 91 Ala. 435, 8 So. 357. The theory propounded in the latter case was that this doctrine was a proper implication from the provision in the last paragraph of § 2590 of the Code of 1886, pronouncing the master not to be liable if the servant knew of a defect and failed to notify the master thereof in a reasonable time. It was, however, recognized in the latter case that he could not recover if the injury was so imminent and impending that a prudent man would not have continued in the service under like circumstances.

In another case the court again recognized the principle that, if the known danger to be encountered is so imminent that a reasonable and prudent man would not venture upon it, he is not free from negligence if he continues in the employment. *Louisville & N. R. Co.* v. *Orr* (1890) 91 Ala. 518, 8 So. 360.

In a somewhat earlier case the obligation of the servant to quit the employment within a reasonable time, if the master fails to remedy a defect of which he has been notified by the servant, had also been affirmed. *Columbus & W. R. Co.* v. *Bradford* (1888) 86 Ala. 574, 6 So. 90.

The qualified doctrine thus formulated was explicitly discarded in *Birmingham R. & Electric Co.* v. *Allen* (1894) 99 Ala. 359, 20 L. R. A. 157, 13 So. 8, where it was laid down that the statute has left unchanged the rule that a servant's knowledge of a risk precludes recovery for an injury caused by it. To the same effect, see *Louisville & N. R. Co.* v. *Stutts* (1891) 105 Ala. 368, 3 Am. St. Rep. 127, 17 So. 29 (engineer lost control of his engine while switching cars on a high and short trestle, the consequence being that the engine was precipitated over the end of the trestle, danger held to be a proximate): *Louisville & N. R. Co.* v. *Barnes* (1894) 101 Ala. 508, 16 So. 547 (dangerously overhead bridge about which servant had been warned).

The mere fact that, when an accident occurred to a minor, he was at a place where his duties did not require him to be, will not necessarily preclude him from recovering. In such a case charges which ignore the fact of the intestate's tender age and childish instincts, and that he was put to work not only in a dangerous place, but in proximity to other dangers, are erroneous, and properly refused. *Tuscaloosa Coal, Coke & I. Co.* v. *Enslen* (1900) 129 Ala. 336, 30 So. 590.

In the following cases the plaintiff's knowledge was held not to be conclusive proof of negligence: *Stuart* v. *Lee* (1883) 79 L. T. N. S. 138, 31 Week. Rep. 706 (employers' liability act of 1880): *Durant* v. *Lexington Coal M. Co.* (1888) 97 Mo. 62, 10 S. W. 48 (mining act): *Eureka Ext. Co.* v. *Allen* (1883) 9 Viet. L. Rep. (L.) 311 (regulation of mines statute of 1877).

[5] So held in actions under the provisions of the South Carolina and Mississippi Constitutions (chapter XXXVII., *post*). *Yonaghead* v. *South Carolina R. Co.* (1900) 60 S. C. 9, 56 Am. St. Rep. 824, 38 S. E. 232: *Welch* v. *Alabama & V. R. Co.* (1892) 70 Miss. 20

A statute which expressly declares that the action of a servant injured by a breach of its provisions is not barred by the defense of an assumption of the risk manifestly does not prevent the master from relying on the defense of contributory negligence.[6]

As to the effect of a promise to remedy defects, see chapter XXII., *ante*.

652. Limits of the doctrine that contributory negligence is a bar to an action.—Contributory negligence is in many cases held to be no defense to an action for a breach of a statute which amounts to a wilful, wanton, or intentional wrong.[1] But in order to bring a case within the scope of this principle something more than the mere

11 So. 723; *Buckner* v. *Richmond & D. R. Co.* (1895) 72 Miss. 873, 18 So. 449; *Illinois C. R. Co.* v. *Bowles* (1894) 71 Miss. 1003, 15 So. 138.

[6] *Cleveland, C. C. & St. L. R. Co.* v. *Baker* (1899) 33 C. C. A. 468, 63 U. S. App. 553, 91 Fed. 224 (decision as to the act of Congress respecting the use of grab irons on railway cars, see § 650, note 9, *supra*).

[1] *Louisville & N. R. Co.* v. *York* (1900) 128 Ala. 305, 30 So. 676.

In Illinois the position has been taken that the effect of the provision in the mining act by which owners and operators are declared to be liable for a "wilful violation" of the duties which it imposes on them is that an injured servant may recover, even though he may have been guilty of contributory negligence. *Bartlett Coal & Min. Co.* v. *Roach* (1873) 68 Ill. 174; *Litchfield Coal Co.* v. *Taylor* (1876) 81 Ill. 590; *Catlett* v. *Young* (1892) 143 Ill. 74, 32 N. E. 447 (a ruling under the act of 1872); *Carterville Coal Co.* v. *Abbott* (1899) 181 Ill. 495, 55 N. E. 131, Affirming (1899) 81 Ill. App. 279; *Odin Coal Co.* v. *Denman* (1900) 185 Ill. 413, 76 Am. St. Rep. 45, 57 N. E. 192, Affirming (1899) 84 Ill. App. 190; *Western Anthracite Coal & Coke Co.* v. *Bearer* (1901) 192 Ill. 333, 61 N. E. 335, Affirming (1901) 95 Ill. App. 95; *Pawnee Coal Co.* v. *Royce* (1900) 184 Ill. 402, 56 N. E. 621, Reversing (1898) 79 Ill. App. 469; *Illinois Fuel Co.* v. *Parsons* (1890) 38 Ill. App. 182; *Girard Coal Co.* v. *Wiggins* (1893) 52 Ill. App. 69.

But this view has been rejected by the courts of other states in which the mining acts contain substantially similar provisions. See *Spiro* v. *Osage Coal & Min. Co.* (1885) 88 Mo. 68; *Victor Coal Co.* v. *Muir* (1894) 20 Colo. 320, 26 L. R. A. 435, 46 Am. St. Rep. 299, 38 Pac. 378; *Krause* v. *Morgan* (1895) 52 Ohio St. 662, 44 N. E. 1140; *Bodell* v. *Brazil Block Coal Co.* (1900) 25 Ind. App. 654, 58 N. E. 856.

In actions under the Kentucky statute of 1854 (now repealed—see § 638, note 1, subd. (f), *ante*), which provided that punitive damages might be recovered where the life of one person had been lost owing to the "wilful neglect" of another, a servant who was merely lacking in ordinary care was held not to be precluded from recovery. *Louisville, C. & L. R. Co.* v. *Mahony* (1870) 7 Bush, 235 (Citing *Louisville & N. R. Co.* v. *Yandell* [1856] 17 B. Mon. 586; *Louisville & N. R. Co.* v. *Sieking's* [1868] 5 Bush, 1, 96 Am. Dec. 320; *Louisville & N. R. Co.* v. *Collins* [1865] 2 Duv. 114, 87 Am. Dec. 486; *Louisville & N. R. Co.* v. *Robinson* [1868] 4 Bush, 507; *Louisville & N. R. Co.* v. *Filbern* [1869] 6 Bush, 574, 99 Am. Dec. 690); *Derby* v. *Kentucky C. R. Co.* (1887) 9 Ky. L. Rep. 153, 4 S. W. 303; *Needham* v. *Louisville & N. R. Co.* (1887) 85 Ky. 423, 3 S. W. 797, 11 S. W. 306; *Owen* v. *Louisville & N. R. Co.* (1888) 87 Ky. 626, 9 S. W. 698; *Newport News & M. Valley Co.* v. *Deutzel* (1890) 91 Ky. 42, 14 S. W. 958; *Louisville & N. R. Co.* v. *Hurst* (1892) 14 Ky. L. Rep. 632, 20 S. W. 817.

The fact that he was himself guilty of wilful negligence was deemed to be a good defense. But an employee of a railroad company, in the discharge of whose duty of taking the numbers of cars upon a side track it is customary, convenient, and necessary to stand upon the main track, is not guilty of wilful negligence in so standing while taking such numbers, after the passage of an engine which has been detached from a train for the purpose of hauling such cars,

breach of a duty imposed by a statute or municipal ordinance must be shown.[2]

In Tennessee it has been held that a statute requiring railroad companies to have some person keeping a lookout continually on locomotives, and providing that a company which fails to have this precaution observed "shall be responsible for all damages to persons or property, occasioned by, or resulting from, any accident or collision that may occur," precludes a company from pleading contributory negligence, though it may be considered in mitigation of damages.[3]

In one case the position was taken that, where the abnormal conditions are the result of a breach of a statutory duty, a servant is entitled to presume that the company will proceed to perform its duty without any unnecessary delay, and is, therefore, not necessarily negligent in continuing to work.[4]

In an action by a government inspector for a breach of the English factory act, which provides that the whole or any part of the fine inflicted may be applied for the benefit of the injured person, it was held that the fact of the injury's having been occasioned by the act of the plaintiff in taking up a forbidden position would not prevent recovery.[5]

652a. Volenti non fit injuria.— In §§ 376, 377, *ante*, it has been shown that, in all the decisions, it is assumed that, where a servant is suing under the English employers' liability act of 1880, or any

without looking out for the cars forming such train. *Louisville & N. R. Co.* v. *Pott* (1891) 92 Ky. 30, 17 S. W. 185.

[2] *Brown* v. *Siegel, C. & Co.* (1901) 191 Ill. 226, 60 N. E. 815. Affirming (1900) 90 Ill. App. 49, where contributory negligence was held to be a good defense to an action for injuries caused by noncompliance with an ordinance.

The statement in the text is also supported by the language used in *Girard Coal Co.* v. *Wiggins* (1893) 52 Ill. App. 69.

[3] *Nashville & C. R. Co.* v. *Smith* (1871) 6 Heisk. 174; *Chattanooga R. Co.* v. *Walker* (1872) 11 Heisk. 383; *Nashville & C. R. Co.* v. *Norelin* (1878) 1 Lea, 523.

In Illinois it is conceded that wilful negligence on the part of the injured person himself is a bar to an action. *Litchfield Coal Co.* v. *Taylor* (1876) 81 Ill. 590.

In *Victor Coal Co.* v. *Muir* (1894) 20 Colo. 320, 26 L. R. A. 435, 46 Am. St. Rep. 299, 38 Pac. 378, the decision was that wilful negligence on the part of the plaintiff in disregarding his own statutory duties debarred him from recovery, and the court does not make it altogether plain whether any lesser degree of negligence would have defeated the action.

[4] *Quackenbush* v. *Wisconsin & M. R. Co.* (1885) 62 Wis. 411, 22 N. W. 519.

The theory propounded in this case has not, so far as the writer knows, been relied upon elsewhere. The correctness of the decision, at all events as an embodiment of a general rule, may well be doubted.

[5] *Blenkinsop* v. *Ogden* [1898] 1 Q. B. 783, 67 L. J. Q. B. N. S. 537, 78 L. T. N. S. 554, 46 Week. Rep. 542. Assuming that the conduct of the servant here adverted to was culpable, this decision creates a somewhat curious situation, since it seems to enable a servant, by the indirect means of a government prosecution, to obtain compensation, under circumstances which would preclude recovery if he were to seek indemnity in a civil action. See cases cited in note 3, subd. (c), *supra*.

of the statutes modeled thereon, the maxim is available as a defense, and that the only essential point upon which a conflict of opinion exists is the extent of the power of a court to declare the servant to have been *volens* in regard to the risk in question.

As regards the operation of the maxim in cases where the master has violated a statute which prescribes certain specific precautions and safeguards in the construction, arrangement, or use of particular instrumentalities, the authorities, as they stand, exhibit a somewhat curious conflict of opinion. In one English case it was held that the servant was not necessarily debarred from recovering by the fact that he knew of the danger created by the breach of a legislative obligation of this description.[1] By none of the judges who took part in that decision was it intimated that the master was altogether precluded from relying upon the maxim. In fact it is clear that they fully recognized his right to avail himself of this defense, provided the evidence was adequate to establish voluntary action on the servant's part. But a subsequent statement of two members of the court of appeal,[2] to the effect that, where a person has a statutory right to protection, the defendant does not discharge his legal obligations by merely affecting the plaintiff with knowledge of a danger, which, but for the former's breach of duty, would not have existed, was soon afterwards construed by two judges in the Queen's Bench Division as being an affirmation of the doctrine that the maxim does not apply at all, if the injury resulted from the breach of a specific statutory obligation. By one of those judges this doctrine was considered to be sustainable upon grounds of public policy, which is concerned in the discouragement of agreements between two persons, the effect of which is that one of them shall be at liberty to break a law enacted for the protection of the other.[3] This exclusion of the maxim as an element in such cases is certainly not justified either by the statement relied upon, nor by the decision with reference to which that

[1] *Britton* v. *Great Western Cotton Co.* (1872) L. R. 7 Exch. 130, 41 L. J. Exch. N. S. 99, 27 L. T. N. S. 125, 20 Week. Rep. 525. (See § 377, note (2), *ante*.)

[2] *Thomas* v. *Quartermaine* (1887) L. R. 18 Q. B. Div. 685, 56 L. J. Q. B. N. S. 340, 57 L. T. N. S. 537, 35 Week. Rep. 555, 51 J. P. 516 (Bowen and Fry, LL. J. J.).

[3] In *Baddeley* v. *Granville* (1887) L. R. 19 Q. B. Div. 423, 56 L. J. Q. B. N. S. 501, 57 L. T. N. S. 268, 36 Week. Rep. 63, 51 J. P. 822. Wills, J., said: "If the supposed agreement between the deceased [servant] and the defendant [his master], in consequence of which the principle of *Volenti non fit injuria* is sought to be applied, comes to this—that the master employs the servant on the terms that the latter shall waive the breach by the master of an obligation imposed on him by statute, and shall connive at his disregard of the statutory obligation imposed on him for the benefit of others as well as of himself,—such an agreement would be in violation of public policy and ought not to be listened to."

statement was made.[4] The suggested construction of the expressions used by the court of appeal is singularly forced, and is, moreover, quite inconsistent with the general tenor of the opinions delivered. The consequence of adopting that construction is that the court must be assumed to have taken the position that, while the master is entitled to avail himself of the maxim as a defense if the suit is brought under a general employers' liability act, he is, so far as the effect of the maxim is concerned, absolutely liable, if the servant is claiming damages under an act imposing some specific duty. Such a distinction would be purely arbitrary, so far as can be seen, and cannot reasonably be deduced from the language used by the lords justices.

Some New York cases embody a doctrine similar to that which has just been criticised. But it is now fully settled in that state that the maxim is a defense to an action for a breach of a specific statutory duty.[5]

[4] The case cited by the court of appeal as an illustration of this theory was *Clarke* v. *Holmes* (1862) 7 Hurlst. & N. 937, 31 L. J. Exch. N. S. 356, 8 Jur. N. S. 992, 10 Week. Rep. 505, which, according to Bowen, L. J., had been so explained in subsequent decisions. These are not cited by name; but one of those referred to is apparently *Indermaur* v. *Dames* (1866) L. R. 1 C. P. 274, 287, 35 L. J. C. P. N. S. 184, 12 Jur. N. S. 432, 14 L. T. N. S. 484, 14 Week. Rep. 586, 1 Harr. & R. 243. It seems to be fairly open to question, however, whether the actual rationale of the ruling in *Clarke* v. *Holmes* is not simply that the promise of the master to remedy the defective conditions prevented the inference that would otherwise have been drawn from the servant's continuance of work. See chapter XXII., *ante*. And in any event it was certainly not intended to propound the doctrine that the servant's knowledge of the master's breach of duty, and the risks to which that breach exposes him, cannot, under any circumstances, operate as a bar to his claim.

[5] The subject was exhaustively discussed in a case in which the supreme court held that an employee does not waive the noncompliance by his employer with N. Y. Laws 1892, chap. 673, requiring machinery to be properly guarded, by continuing in the employment with knowledge of the unprotected condition. *Simpson* v. *New York Rubber Co.* (1894) 80 Hun, 415, 30 N. Y. Supp. 339 (dissenting, Brown, P. J.). In delivering the prevailing opinion, Judge Cullen referred to the common law rule that a servant assumes the risks of his employment, even though the appliances are not the best and safest of their kind, and proceeded as follows: But the question presented in this case is a different one. The statute has enacted that certain safeguards shall be had for the security of employees of the factory. The failure to provide these statutory safeguards is criminal. It is doubtless true that parties can waive statutory provisions for their benefit, and can even make laws for themselves which the courts are bound to administer, provided there is no question of public policy involved. (*Re New York, L. & W. R. Co.* [1885] 98 N. Y. 447; *Scutomis* v. *Landon* [1893] 140 N. Y. 463, 37 Am. St. Rep. 569, 35 N. E. 650.) But is there no question of public policy involved here? To our mind there is, and that public policy should induce us to hold, unless a contrary doctrine is settled by authority, that this statutory protection cannot be waived. Our notion of government has confined state interference with the freedom of individual action within narrow limits, but such interference has never been wholly prohibited. Experience has shown that in some matters persons must be protected from their own imprudence. If there were to be considered only the interest of the individual in his personal security the statute would be unnecessary. The end sought to be accomplished could equally well be secured by contract between

In Indiana the doctrine has quite recently been propounded that the defense based upon the maxim is not available, as a matter of law, where the injury was caused by the violation of a specific statutory duty.[6]

That the maxim, considered as an embodiment of the principle that a plaintiff is debarred from recovery if his own negligence contributed to his injury (see § 371, *ante*), constitutes a valid defense, even where

the employer and the employee. The matter has always been a subject of contract,—that is, no law has ever forbidden employees making the guarding of machinery a condition of their service. Yet such contracts are unknown. If, therefore, assent can dispense with the statutory protection, the subject, for practical purposes, is left in the same condition as it was before the enactment of the statute. . . . The doctrine of waiver or contributory negligence under this statute is but the equivalent of the contention "*in pari delicto*" under the usury statute, a claim always repudiated by the courts.

It was conceded that the view of the court was different from that adopted in *Freeman* v. *Glens Falls Paper Mill Co.* (1893) 70 Hun, 530, 24 N. Y. Supp. 403, and that this case had been affirmed, without opinion, by the court of appeals (1893) 142 N. Y. 639, 37 N. E. 567; but the position was taken that, as the effect of this affirmance was to make the higher court responsible only for the point decided, and not a guarantor of all the reasons given or opinions advanced (*Rogers* v. *Decker* [1892] 131 N. Y. 490, 30 N. E. 571), and the case in question was not based on the statute, it could not be said that the ruling as to waiver of the statutory provision had received the approval of the court. The force of this particular argument, which is, at best, rather unconvincing, was soon afterwards greatly weakened by the fact that the court of appeals has affirmed another judgment of the supreme court, in which precisely the same view was adopted as in the *Freeman Case* (*White* v. *Wittemann Lithographic Co.* [1892] 131 N. Y. 631, 30 N. E. 236), though, as no opinion was filed, it was still possible to reason, as with regard to the *Freeman Case*, that the question was not really passed on.

In *Knisley* v. *Pratt* (1894) 75 Hun, 323, 26 N. Y. Supp. 1010, another case in which it was held that the servant does not assume the risks arising from the breach of the employer's statutory duty, the court reconciled its view with the judgment of the court of appeals in the *White Case* by advancing the theory that Judge Earl's opinion showed that the true reason why the charge, to the effect that the servant assumed the risks, was not held to be reversible error was that it was apparent from the evidence that, even if the master had performed his statutory duty, the accident would not have been prevented.

The desperate efforts of the supreme court to reconcile its views with those of the court of appeals were at length brought to a close by a decision of the latter court, in which it held, reversing the judgment in the case last cited, that the maxim was available as a defense where the servant had entered and remained in an employment knowing that his master had not complied with the provisions of the factory act (Laws 1890, p. 756, chap. 398, § 12), requiring the guarding of cogwheels ([1896] 148 N. Y. 372, 32 L. R. A. 367, 42 N. E. 986).

This decision was followed in *Graves* v. *Brewer* (1896) 4 App. Div. 327, 38 N. Y. Supp. 566 (same statute); *Horton* v. *Vulcan Iron Works* (1897) 13 App. Div. 508, 43 N. Y. Supp. 699 (act requiring set screws in shafts to be guarded); *DeYoung* v. *Irving* (1896) 5 App. Div. 499, 38 N. Y. Supp. 1089 (clause forbidding cleaning of machinery in motion by women under twenty-one years of age).

[6] *Monteith* v. *Kokomo Wood Enameling Co.* (1902; Ind.) 58 L. R. A. 944, 64 N. E. 610 (unguarded machinery), holding that in such an action an averment of the want of knowledge was unnecessary.

To same effect, see *Boyd* v. *Brazil Block Coal Co.* (1898; Ind. App.) 50 N. E. 368 (breach of a provision of the mining act; citing with approval *Baddeley* v. *Granville* [1887] L. R. 19 Q. B. Div. 423, 56 L. J. Q. B. N. S. 501, 57

the duty violated is statutory, has for a long time been an established doctrine in England.[7]

L. T. N. S. 268, 38 Week. Rep. 63, 54 J. P. 822, note 3, *supra*).

[7] *Cowan* v. *Worth* (1856) 5 El. & Bl. 849, 25 L. J. Q. B. N. S. 121, 2 Jur. N. S. 116 (person lawfully on the premises of another, who wrongfully set machinery in motion, was held unable to take advantage of a statute requiring such machinery to be fenced).

CHAPTER XXXVI.

STATUTES DECLARATORY OF COMMON LAW DOCTRINES.

A. Minnesota.
652b. Text of statute.
653. Effect of this statute.
B. California and Dakota.
653½. Text of statutes.
653½. Effect of these statutes.
C. Georgia.

A. Minnesota.

652b. Text of statute.—Gen. Laws 1895, chap. 173. An Act Defining the Duties of Masters and Employers to Employees in Certain Cases: Be it Enacted by the Legislature of the State of Minnesota:

Sec. 1. Every master or employer in this state shall use reasonable care to provide the person or persons in his employ with reasonably safe, suitable, and sufficient tools, implements, and instrumentalities with which to do the master's work, and also use reasonable care to provide a reasonably safe and suitable place for his servants to perform the duties assigned to them by the master.

It shall also be the master's duty to use reasonable care to establish safe and suitable rules and regulations or methods for the performance of the work required of his servants, and to direct and supervise the performance of the work in a reasonably safe and prudent manner.

Sec. 2. Whenever a master or employer delegates to anyone the performance of his duties, which he, as master or employer, owes to his servants, or any part or portion of such duties, the person so delegated, while so acting for his master or employer, shall be considered the vice principal and representative of the master.

Sec. 3. This act shall take effect and be in force from and after its passage.

Approved April 23, 1895.

653. Effect of this statute.—This statute is merely declaratory of the common law.[1] In an action under it, just as in an action at common law, the nature of the duties or services an employee performs, and not his rank or his authority over other employees, determines whether he is a vice principal or fellow servant.[2]

[1] *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774.

[2] *Lundberg* v. *Sherlin-Carpenter Co.* (1897) 68 Minn. 135, 70 N. W. 1078.

B. California and Dakota.

653½. Text of statutes.—By the Civil Codes of California and Dakota it is provided as follows:

An employer is not bound to indemnify his employee for losses suffered by the latter in consequence of the ordinary risks of the business in which he is employed, nor in consequence of the negligence of another person employed by the same employer in the same general business, unless he has neglected to use ordinary care in the selection of the culpable employee. Cal. Civil Code, § 1970; Dak. Civil Code, § 1130; S. D. Civil Code § 4942; N. D. Civil Code, § 4096.

An employer must in all cases indemnify his employee for losses caused by the former's want of ordinary care. Cal. Civil Code, § 1971, Dak. Civil Code, § 1131 S. D. Civil Code, § 4943; N. D. Civil Code, § 4097.

653¾. Effect of these statutes.— In construing these provisions the courts have proceeded upon the theory that it was the intention of the legislatures to frame an enactment which should embody certain common-law principles assumed to have been previously adopted.[1] Accordingly, we find decisions illustrating the principle that there can be no recovery where the delinquent and injured servants were engaged in the same kind of work;[2] that coservice is not necessarily

[1] In California it has been explicitly laid down that the statute has not changed the rule as to common employment which prevailed prior to its enactment. *Congrave* v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175. The case of *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184 (see § 532, *ante*), was cited by plaintiff's counsel, but was not followed because of the language used in the statute.

The Civil Code of Dakota was declared by the territorial court to have simply enacted into a statute the common-law doctrine. *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, [illegible] A. 363, 41 N. W. 758; *Herbert* v. *Southern P. R. Co.* (1882) 3 Dak. 3[illegible] W. 349. That this is also the view taken by the Supreme Court of the United States is shown by the following language used in the judgment rendered on the appeal of the latter case: "We do not perceive that the provision of the 6th section of the Civil Code of Dakota, that in the territory 'there is no common law in any case where the law is declared by the Codes,' at all affects the question before us. There cannot be two rules of law on the same subject contradicting each other. Therefore, where the Code declares the law, there can be no occasion to look further; but where the Code is silent, the common law prevails. What constitutes the 'same general business' is not defined by the Code, but may be explained by adjudged cases. The declaration by the Code of a general rule which is conformable to existing law does not prevent the courts from looking to those cases for explanation any more than it prevents them from looking into the dictionary for the meaning of words." *Northern P. R. Co.* v. *Herbert* (1885) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590. The defense of coservice is an affirmative defense, and the burden is on the defendant to establish it. *Bjerman* v. *Scotia Redwood Co.* (1894) 104 Cal. [illegible], 38 Pac. 451 (instruction held erroneous, which told the jury that the burden was on the plaintiff to prove that the injury was caused by the negligence of the defendant, and not by any one else, or by a fellow servant of the plaintiff).

[2] *Long* v. *Coronado R. Co.* (1892) 96 Cal. 269, 31 Pac. 170 (conductor injured by negligence of engineer on the same train); *Brown* v. *Central P. R. Co.* (1887) 72 Cal. 523, 14 Pac. 138 (conductor injured by negligence of brakeman); *Vizelich* v. *Southern P. R. Co.* (1899) 126 Cal. 587, 59 Pac. 129 (brakeman injured by negligence of another brakeman); *Kocern* v. *Providence Gold*

negatived by the fact that the delinquent and the injured servants were engaged in different kinds of work;[3] that, if the delinquent and injured servants were engaged in essentially dissimilar kinds of work, the case does not fall within the purview of the statute;[4] that vice principalship is not predicable merely on the ground that the delinquent servant exercised control over the injured one,[5] even though

Silver Min. Co. (1880) 70 Cal. 392, 11 Pac. 710 (miner injured by negligence of a fellow workman).

[3] A conductor and track walker are both coservants of a laborer employed to remove snow, etc., from the track. *Fagundes* v. *Central P. R. Co.* (1889) 79 Cal. 97, 3 L. R. A. 821, 21 Pac. 437 (track walker, by interfering with a switch, and conductor, by not being sufficiently on the alert, caused a collision between two trains).

The operator of an elevator is a coservant of a carpenter engaged in repairing the shaft. *Mann* v. *O'Sullivan* (1899) 126 Cal. 61, 77 Am. St. Rep. 149, 58 Pac. 375 (carpenter injured by the starting of the elevator without warning).

The engineer of a regular train and a road master on a construction train are coservants. *Holland* v. *Southern P. Co.* (1893) 100 Cal. 240, 34 Pac. 666 (engineer ran train too fast).

An engineer of a mining company's hoisting machinery is a coservant of a miner injured while being hoisted. *Tregatha* v. *Buchanan Gold Min. & Mill. Co.* (1892) 96 Cal. 491, 28 Pac. 571, 31 Pac. 561.

[4] In *Northern P. R. Co.* v. *Herbert* (1885) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590, the court stated its opinion as follows: "We do not consider that the first of these sections changes the law previously existing as to the exemption of an employer from responsibility for injuries committed by a servant to a fellow servant in the same general business, or identifies the business of providing safe machinery and keeping it in repair with the business of handling and moving it. The two kinds of business are as distinct as the making and repairing of a carriage is from the running of it. They are, as stated in the case decided by the supreme court of Massachusetts, from which we have cited above, separate and independent departments of service, though the same person may, by turns, render service in each. The person engaged in the former represents the employer, and in that business is not a fellow servant with one engaged in the latter. The words 'same general business' in the section have reference to the general business of the department of service in which the employee is engaged, and do not embrace business of every kind which may have some relation to the affairs of the employer, or even be necessary for their successful management. If any other construction were adopted there would, under the section, be no such thing as separate departments of service in the business of railroad companies; for whatever would tend to aid in the transportation of persons and property would come under the designation of its general business."

The decision there was that a brakeman injured by reason of defective, worn out, and broken brakes, which an employee of the railroad company was charged with the duty of keeping in repair, could maintain an action against the railroad company, without regard to the company's negligence in the selection of the employee charged with the duty of keeping the brakes in repair. (Bradley, Matthews, Gray, and Blatchford, JJ., diss.)

[5] *Brown* v. *Central P. R. Co.* (1887) 72 Cal. 523, 14 Pac. 138 (conductor); *Daves* v. *Southern P. Co.* (1893) 98 Cal. 19, 35 Am. St. Rep. 133, 32 Pac. 708 (section foreman); *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, 41 N. W. 758 (section foreman); *Noyes* v. *Hood* (1889) 102 Cal. 389, 36 Pac. 768 (foreman of farm); *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559 (superintendent of construction of a bridge); *Catlan* v. *Bull* (1896) 113 Cal. 595, 45 Pac. 1017 (foreman of construction); *Stephens* v. *Doe* (1887) 73 Cal. 26, 14 Pac. 378 (foreman of mine); *Donovan* v. *Ferris* (1900) 128 Cal. 48, 79 Am. St. Rep. 25, 60 Pac. 519 (foreman of work of blasting a tunnel, there being also a general superintendent); *Vivoe* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803 (foreman of silver room in smelting works); *Fisk* v. *Central P. R.*

the exercise of control may have been accompanied by the power of hiring and discharging.[6]

The supreme court of California seems to have recognized in some cases the doctrine that an employee who exercises a discretionary authority and discharges such functions as are ordinarily intrusted to a manager, as that term is commonly understood, is a vice principal.[7] That the character of the act which caused the injury is a test of the relation which exists between a delinquent and an injured servant is also recognized in actions under the statute.[8] But both the doctrine

Co. (1887) 72 Cal. 38, 1 Am. St. Rep. 22, 13 Pac. 144 (foreman of boiler shop); *Burns* v. *Sennett* (1893) 99 Cal. 363, 33 Pac. 916 (foreman of gang of stevedores); *McDonald* v. *Hazeltine* (1878) 53 Cal. 35 (foreman of gang of longshoremen); *Livingston* v. *Kodiak Packing Co.* (1894) 103 Cal. 258, 37 Pac. 149 (mate of vessel).

In *Northern P. R. Co.* v. *Hogan* (1894) 11 C. C. A. 51, 27 U. S. App. 184, 63 Fed. 102 (conductor held not to be a vice principal), the court considered itself bound to reject the doctrine of *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, and defer to the authority of the state court in *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222.

[6] *Stevens* v. *San Francisco & N. P. R. Co.* (1893) 100 Cal. 554, 35 Pac. 165.

[7] *McLean* v. *Blue Point Gravel Min. Co.* (1876) 53 Cal. 255 (foreman of the entire work of a mine did not notify a miner that a blast was about to be fired); *Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20 (superintendent of mine caused injury to miner by his failure to furnish safe appliances); *Brown* v. *Sennett* (1885) 68 Cal. 225, 58 Am. Rep. 8, 9 Pac. 74 (stevedore's foreman, to whom was delegated the entire management of the work of unloading a vessel, "with full discretion to control and supervise it," failed to signal for the stoppage of an overhauled bucket which was swinging dangerously, and finally discharged its load on a workman in the hold).

The last cited case was criticised in *Comyare* v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175, as being hard to reconcile with other rulings, particularly with *Collier* v. *Steinhart* (1875) 51 Cal. 116 (see note 9, *infra*). It was also suggested that *Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20, went no further than to decide that the duty of providing suitable appliances is non-delegable. The decision thus explained may doubtless stand on this footing, but the report seems to show that it was rather based on the theory that the delinquent represented the master by virtue of his official position, as superintendent. At all events the decision in *McLean* v. *Blue Point Gravel Min. Co.* (1876) 51 Cal. 255, is a clear recognition of the doctrine that a superintendent in full control of an industrial concern is a vice principal as to all matters affecting the safety of his subordinates, whether those matters do or do not involve the discharge of a non-delegable duty. And such is also the effect of *Ryan* v. *Los Angeles Ice & Cold Storage Co.* (1896) 112 Cal. 241, 32 L. R. A. 524, 44 Pac. 471, where the defendant was held liable for the negligence of the engineer of a refrigerating machine who, while in sole charge while the general manager was absent, allowed inexperienced men to do work for which they were unfitted.

[8] A carpenter employed to construct a scaffold for the bricklayers engaged on a building in course of construction was held to be a vice principal, "even though his work promoted the erection of the building." *McNamara* v. *Macdonough* (1894) 102 Cal. 575, 36 Pac. 911.

A nonsuit is erroneous where the evidence tends to show that the injury was due to the giving way of loose planks on which a servant had to stand while he was working near a revolving shaft. *Mullin* v. *California Horseshoe Co.* (1894) 105 Cal. 77, 38 Pac. 535.

As against positive allegations that the acts and omissions complained of were by the defendant it cannot be presumed, for the purposes of a demurrer that they were those of a fellow servant of the injured person. *Beaucy* v. *Central P. R. Co.* (1885) 68 Cal. 171, 8 Pac. 808 (held to be error to sustain demurrer to a complaint alleging a breach

that a general manager is a vice principal and the doctrine that the selection of fit servants is a non-delegable duty seem to be rejected in one decision."

C. Georgia.

See chapter xxxix., subd. B, *post*.

of duty on the defendant's part to show a right signal for the guidance of the plaintiff, an engineer; two judges dissented).

A materialman and train despatcher who employs and discharges the men and directs the movements of the trains on a line under construction is a vice principal. *McKune* v. *California Southern R. Co.* (1885) 66 Cal. 302, 5 Pac. 482.

On the other hand, the temporary adjustment of the several parts of a hoisting apparatus used in unloading a ship is not a personal duty of the master. *Burns* v. *Scandrett* (1893) 99 Cal. 363, 33 Pac. 916. Nor is the detail of giving a laborer in a quarry warning that a blast is about to be fired. *Donovan* v. *Ferris* (1900) 128 Cal. 48, 79 Am. St. Rep. 25, 60 Pac. 519.

"*Collier* v. *Steinhart* (1875) 51 Cal. 116, where a complaint was held demurrable, which alleged that the defendant did not use ordinary skill in selecting the negligent servant, but which also recited facts showing that such servant was employed by the defendant's superintendent, and contained no averment that such superintendent had been negligently selected. This ruling seems inconsistent with the others, cited above, in which the master was held liable.

CHAPTER XXXVII.

ENGLISH EMPLOYERS' LIABILITY ACT OF 1880 AND THE AMERICAN CANADIAN, AND AUSTRALIAN STATUTES MODELED THEREON.

653a. Introductory.

A. TEXT OF THE STATUTES.

654. England.
655. Alabama.
656. Massachusetts.
657. Colorado.
658. Indiana.
659. New York.
660. Ontario and other Canadian provinces.
660a. Australian statutes.

B. EFFECT OF THE STATUTES AS A WHOLE.

661. Generally.
662. Modified operation of these acts in the case of servants of municipal corporations.
663. Employers' liability acts: whether strictly or liberally construed.
664. Concurrent rights of action under the statutes and at common law.
665. Liability of infants under the statutes.

C. LIABILITY FOR DEFECTS IN THE WAYS, ETC.

666. Effect of the statutory provisions as to defects; generally.
667. Master not liable unless the defect alleged was the proximate cause of the injury.
668. What instrumentalities are covered by the terms "ways," etc.
a. Two or more descriptive terms used in combination.
b. "Ways."
c. "Works."
d. "Machinery."
e. "Plant."
669. Significance of the qualifying phrase "connected with or used in the business of" the employer.
a. Instrumentalities temporarily used by the defendant's servant in the transaction of his business.
b. Structures, etc., in course of erection or demolition.
c. Instrumentalities not yet brought into use, or disused.
670. What constitutes a defect.
671. Specific examples of defects.
a. Defects in the condition of the ways.
b. Defects in the condition of the works.
c. Defects in the condition of the machinery.
d. Defects in the condition of the plant.
672. Conditions not amounting to defects.
673. Defective system; employer liable for.

674. "Not discovered or remedied, owing to the negligence," etc.
a. Generally.
b. "Not discovered."
c. "Not remedied."
d. "Person intrusted with the duty," etc.
675. Abnormal conditions resulting from the use of the machines; how far regarded as defects.
676. Defects in temporary appliances constructed by the servants themselves not deemed to be chargeable to the employer.
677. Duty of servant to report defects.
a. Statutory and common-law doctrines compared.
b. Position of a servant who fails to report a defect.
c. Position of a servant who has reported a defect.

D. LIABILITY FOR THE NEGLIGENCE OF EMPLOYEES EXERCISING SUPERINTENDENCE.

678. Introductory.
679. Conditions precedent to recovery: generally.
680. What employees are superintendents under the English, New York, Massachusetts, and Colorado acts.
a. General remarks.
b. Employees held to be vice principals.
c. Employees for whose negligence the master is not liable.
681. — under the Alabama act.
682. — under the Canadian and Australian acts.
683. Employees controlling machinery: status of.
684. Master liable though injured servant was not under the control of the negligent employee.
685. Deputy superintendents: liability for negligence of.
686. Necessity of proving that the injurious act was negligent.
687. Acts constituting negligence in the exercise of superintendence.
688. Acts done by superintendents while participating in the work: liability of master for.

E. LIABILITY FOR INJURIES CAUSED BY THE NEGLIGENCE OF A PERSON TO WHOSE ORDERS THE INJURED SERVANT WAS BOUND TO CONFORM.

689. Introductory.
690. Conditions precedent to recovery.
691. To what superior servants the subsection is applicable.
692. Temporary substitutes for regular foreman, status of.
693. To what orders a servant is bound to conform.
694. When a servant is deemed to have acted under orders.
695. Necessity of establishing a causal connection between the order and the injury.
696. Necessity of showing negligence on the part of the superior servant.

F. LIABILITY FOR INJURIES CAUSED BY ACTS OR OMISSIONS DONE OR MADE IN OBEDIENCE TO RULES.

698. Introductory.
699. Necessity of proving negligence in respect to the rules, etc., or to particular instructions.
700. "In obedience to the rules."
701. "Delegated with the authority of the employer."

G. Liability for negligence of certain specified railway employees.
702. Generally.
703. Persons having "the charge or control of signal points."
704. Person in "charge of control of a locomotive engine."
a. What is an engine under the statute.
b. What employees are deemed to be in "charge or control" of engines.
705. Persons having "charge or control of a train."
a. What constitutes a train, generally.
b. How many cars constitute a train.
c. What employees are deemed to have "charge or control" of a train: conductors.
d. Employees other than conductors.
706. Person having "charge or control of a car."
706a. Person having "charge of a signal."
707. On a "railway" or "railroad."

H. Service of notice on the employer.
708. Notice a condition precedent to the maintenance of an action under the statute.
709. Notice not essential to recovery if facts constitute a cause of action at common law.
710. Notice must be given in writing.
711. Service of the notice.
a. Service on corporations.
b. Service through the postoffice.
c. Service in case of death.
d. Excuses for failing to serve the notice.
712. Sufficiency of the particulars contained in the notice.
a. Generally.
b. Inaccuracies which do not invalidate a notice.

I. Death of employer or injured employee; how the right of action is affected by.
713. Scope of this subtitle.
714. Death of employer: effect of.
715. Death of plaintiff: pending action abated by.
716. Suits by executors or administrators.

J. Persons entitled to sue under the acts.
717. General remarks.
718. Servants temporarily under the control of the defendant.
719. Volunteers.
720. Persons who have permanently or temporarily ceased to be in the employment of the defendant.
721. Independent contractors.
721a. Servants of independent contractors.
722. Railway servant.
723. Workmen.
a. Domestic or menial servant.
b. Laborer.
c. Servant in husbandry.
d. Journeyman.

e. Artificer.
f. Handicraftsman.
g. Miner.
h. Persons "otherwise engaged in manual labor."
i. "Working under a contract with an employer."
724. Seamen.
725. Servants working in government departments.

K. Damages recoverable.
726. Damages recoverable where the injured servant is himself the plaintiff.
727. Damages recoverable by the personal representatives of an injured servant.

L. Trial practice.
728. Scope of subtitle.
729. Within what period the action must be brought.
730. Service of summons; waiver of irregularity in.
731. Joinder of employer and negligent coemployee as parties defendant
732. Institution of distinct suits at common law and under these acts.
733. Joinder of causes of action under the different provisions of these acts.
734. Joinder of causes of action under these acts and at common law.
734a. Joinder of causes of action under these acts and other statutes.
735. Election between different counts.
736. Former recovery in action under another statute or at common law.
737. Complaint.
a. Relation of employer and employed.
b. Necessity of alleging that negligence was committed by a statutory vice principal.
c. —and by such a vice principal while acting in the line of his duty.
d. Sufficiency of the allegation of negligence.
e. Notice of injury.
f. Necessity of alleging absence of contributory negligence.
738. Sufficiency of the plea.
739. Instructions to jury.
740. Provinces of court and jury.
741. Removal of actions to higher courts.
741a. Appointment of assessors.
742. Questions which may be reviewed on appeal.

653a. Introductory.—In this chapter it is proposed to review the decisions construing the English employers' liability act of 1880, and the American, Canadian, and Australian statutes in which the language of that act has been followed more or less closely.

A. Text of the statutes.

654. England.—The dissatisfaction which the doctrine of common employment, as applied in the earlier English decisions, has naturally

provoked among those classes of the community who suffered most severely from its operation, was at last brought to a head by the famous case of *Wilson* v. *Merry*.[1] After several years of vigorous agitation, both in and out of Parliament, a select committee of the House of Commons, which made a careful investigation of the subject, declared in favor of a modification of the law. One of the recommendations was embodied in the following passage of the report, submitted in 1877: "Your committee are of opinion that in cases such as these,—that is, where the actual employers cannot personally discharge the duties of masters, or where they deliberately abdicate their functions and delegate them to agents,—the acts or defaults of the agents who thus discharge the duties and fulfil the functions of masters should be considered as the personal acts or defaults of the principals and employers, and should impose the same liability on such principals and employers as they would have been subject to had they been acting personally in the conduct of the business, notwithstanding that such agents are technically in the employment of the principals." It was also suggested that the doctrine of common employment should be narrowed so as to be applicable only to those cases where each servant "is an observer of the conduct of the other, can give notice of any misconduct, incapacity, or neglect of duty, and leave the service if the common employer will not take such precaution and employ such agents as the safety of the whole party may require."[2] Proposals of a much more radical nature were put forward in the draft report submitted by Mr. Lowe.[3]

A bill framed on the lines thus suggested was introduced into Parliament in 1879, but withdrawn at the close of the session. It was reintroduced in 1880, and after a reference to a select committee, and a good deal of discussion, which bore fruit in various amendments, was finally passed. The text of the act, which came into operation on January 1, 1881, is as follows:

Sec. 1. Where, after the commencement of this act, personal injury is caused a workman:

Subs. 1. By reason of any defect in the condition of ways, works, machinery or plant, connected with or used in the business of the employer; or

Subs. 2. By reason of the negligence of any person in the service of the employer, who has any superintendence intrusted to him whilst in the exercise of such superintendence; or

[1] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

[2] For the decisions of the American courts which have adopted this principle independently of statutes, see §§ 500 *et seq.*, *ante*.

[3] A good deal of useful information on this and other matters connected with the history of the events which preceded the passage of the act in its final form will be found in Mr Fell's Pamphlet on Employers' Liability.

Subs. 3. By reason of the negligence of any person in the service of the employer, to whose orders or directions the workman, at the time of the injury, was bound to conform, and did conform, where such injury resulted from his having so conformed; or

Subs. 4. By reason of the act or omission of any person in the service of the employer, done or made in obedience to the rules or by laws of the employer, or in obedience to particular instructions given by any person delegated with the authority of the employer in that behalf; or

Subs. 5. By reason of the negligence of any person in the service of the employer, who has the charge or control of any signal points, locomotive engine, or train upon a railway,—the workman, or, in case the injury results in death, the legal personal representatives of the workman, and any persons entitled in case of death, shall have the same right of compensation and remedies against the employer as if the workman had not been a workman of nor in the service of the employer, nor engaged in his work.

Sec. 2. A workman shall not be entitled under this act to any right of compensation or remedy against the employer in any of the following cases, that is to say:

Subs. 1. Under subsection 1 of section 1, unless the defect therein mentioned arose from, or had not been discovered or remedied owing to, the negligence of the employer, or of some person in the service of the employer, and intrusted by him with the duty of seeing that the ways, works, machinery, or plant were in proper condition;

Subs. 2. Under subsection 4 of section 1, unless the injury resulted from some impropriety or defect in the rules, by-laws, or instructions therein mentioned; provided that where a rule or by-law has been approved or has been accepted as a proper rule or by-law by one of Her Majesty's Principal Secretaries of State, or by the Board of Trade, or any other department of the government, under or by virtue of any act of Parliament, it shall not be deemed, for the purposes of this act, to be an improper or defective rule or by-law;

Subs. 3. In any case where the workman knew of the defect or negligence which caused his injury, and failed within a reasonable time to give, or cause to be given, information thereof to the employer or some person superior to himself in the service of the employer, unless he was aware that the employer or such superior already knew of the said defect or negligence.

Sec. 3. The amount of compensation recoverable under this act shall not exceed such sum as may be found to be equivalent to the estimated earnings, during the three years preceding the injury, of a person in the same grade, employed during those years in the like employment and in the district in which the workman is employed at the time of the injury.

Sec. 4. An action for the recovery under this act of compensation for an injury shall not be maintainable unless notice that injury has been sustained is given within six weeks, and the action is commenced within six months from the occurrence of the accident causing the injury, or, in case of death, within twelve months from the time of death; provided, always, that in case of death the want of such notice shall be no bar to the maintenance of such action, if the judge shall be of opinion that there was reasonable excuse for such want of notice.[4]

[4] Under the interpretation act (52 & 53 Vict.) chap. 63, § 3, a "month" means a calendar month.

Sec. 5. There shall be deducted from any compensation awarded to any workman, or representatives of a workman, or persons claiming by, under, or through a workman in respect of any cause of action arising under this act, any penalty or part of a penalty which may have been paid in pursuance of any other act of Parliament to such workman, representatives, or persons in respect of the same cause of action; and where an action has been brought under this act by any workman, or the representatives of any workman, or any persons claiming by, under, or through such workman, for compensation in respect of any cause of action arising under this act, and payment has not previously been made of any penalty or part of a penalty under any other act of Parliament in respect of the same cause of action, such workman, representatives, or person shall not be entitled thereafter to receive any penalty or part of a penalty under any other act of Parliament, in respect of the same cause of action.

Sec. 6, subs. 1. Every action for recovery of compensation under this act shall be brought in a county court, but may, upon the application of either plaintiff or defendant, be removed into a superior court in like manner and upon the same conditions as an action commenced in a county court may by law be removed;

Subs. 2. Upon the trial of any such action in a county court before the judge without a jury, one or more assessors may be appointed for the purpose of ascertaining the amount of compensation;

Subs. 3. For the purpose of regulating the conditions and mode of appointment and remuneration of such assessors, and all matters of procedure relating to their duties, and also for the purpose of consolidating any actions under this act in a county court, and otherwise preventing multiplicity of such actions, rules and regulations may be made, varied, and repealed from time to time, in the same manner as rules and regulations for regulating the practice and procedure in other actions in county courts.

"County court" shall, with respect to Scotland, mean the "sheriff's court," and shall, with respect to Ireland, mean the "civil bill court."

In Scotland any action under this act may be removed to the court of session at the instance of either party, in the manner provided by and subject to the conditions prescribed by section 9 of the sheriff courts (Scotland) act 1877.

In Scotland the sheriff may conjoin actions arising out of the same occurrence or cause of action, though at the instance of different parties and in respect of different injuries.

Sec. 7. Notice in respect of an injury under this act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury and the date at which it was sustained, and shall be served on the employer, or, if there is more than one employer, upon one of such employers.

The notice may be served by delivering the same to or at the residence or place of business of the person on whom it is to be served.

The notice may also be served by post, by a registered letter addressed to the person on whom it is to be served, at his last known place of residence or place of business, and, if served by post, shall be deemed to have been served at the time when a letter containing the same would be delivered in the ordinary course of post; and in proving the service of such notice, it shall be sufficient to prove that the notice was properly addressed and registered.

Where the employer is a body of persons corporate or unincorporate, the notice shall be served by delivering the same at, or by sending it by post in a registered letter addressed to, the office, or, if there be more than one office, any one of the offices, of such body.

A notice under this section shall not be deemed invalid by reason of any defect or inaccuracy therein, unless the judge who tries the action arising from the injury mentioned in the notice shall be of opinion that the defendant in the action is prejudiced in his defense by such defect or inaccuracy, and that the defect or inaccuracy was for the purpose of misleading.

Sec. 8. For the purposes of this act, unless the context otherwise requires,—

The expression "person who has superintendence intrusted to him" means a person whose sole or principal duty is that of superintendence, and who is not ordinarily engaged in manual labor;

The expression "employer" includes a body of persons corporate or unincorporate;

The expression "workman" means a railway servant, and any person to whom the employers and workmen act of 1875 applies.

Sec. 9. This act shall not come into operation until the first day of January, 1881, which date is in this act referred to as the commencement of this act.

Sec. 10. This act may be cited as the employers' liability act 1880, and shall continue in force till the thirty-first day of December, 1887, and to the end of the then next session of Parliament, and no longer, unless Parliament shall otherwise determine; and all actions commenced under this act before that period shall be continued as if the said act had not expired.

By successive renewals, this act has been kept in force up to the present time; but since 1897 it has subsisted side by side with the much more drastic workmen's compensation act, and its amendment of 1900. See chapter XL., *post*. Its inadequacy as a piece of remedial legislation, designed mainly for the redress of the grievances of the poorest and most illiterate members of the community, has long been notorious.[5] But it has certainly mitigated some of the harshest and most objectionable features of the common law. That its repeal will not be long postponed may be reasonably conjectured from the tendencies of social and economic development in England at the present conjecture. Its abrogations, however, will not destroy the practical interest which it possesses for the lawyers of the American states which legislated on the same lines; for under a familiar principle of statutory construction, the decisions of the English judges with regard to its provisions are, in those states, of something more than a merely persuasive authority.[6]

[5] See Pollock, Torts, pp. 90, 91 and the same author's Essays in Jurisprudence (1882) chap. 5. The Report of a Select Committee of the House of Commons on Amending Bills 1886 (192), may also be consulted.

The preface to Mr. Beven's work on Employers' Liability, 2d. ed., contains some suggestive remarks on the over-refinements in which some judges have been too apt to indulge in construing the act.

[6] In *Ryalls v. Mechanics' Mills* (1889) 150 Mass. 190, 5 L. R. A. 667, 22 N. E. 766, it was remarked that, as the Massachusetts statute was a close copy of that of England, the court could not deal with it quite on the same footing as if the legislature had framed it in their own language, used for the first time, but "must assume that they were content with the expounded meaning of the words which they adopted."

In *Mobile & B. R. Co. v. Holborn*

The text of the various statutes in which the language of this act has been more or less closely copied is set out in the ensuing sections.

655. Alabama.—Laws 1884-85, p. 115, Civil Code 1886, § 2590 (Civil Code, 1896, chap. 3, § 1749): **Liability of Master or Employer to Servant or Employee for Injuries.**—When a personal injury is received by a servant or employee in the service or business of the master or employer, the master or employer is liable to answer in damages to such servant or employee as if he were a stranger and not engaged in such service or employment, in the cases following:

(1) When the injury is caused by reason of any defect in the condition of the ways, works, machinery, or plant connected with, or used in the business of, the master or employer;

(2) When the injury is caused by reason of the negligence of any person in the service or employment of the master or employer, who has any superintendence intrusted to him, whilst in the exercise of such superintendence;

(3) When such injury is caused by reason of the negligence of any person in the service or employment of the master or employer, to whose orders or directions the servant or employee, at the time of the injury, was bound to conform, and did conform, if such injuries resulted from his having so conformed;

(4) When such injury is caused by reason of the act or omission of any person in the service or employment of the master or employer, done or made in obedience to the rules and regulations or by laws of the master or employer, or in obedience to particular instructions given by any person delegated with the authority of the master or employer in that behalf;

(5) When such injury is caused by reason of the negligence of any person in the service or employment of the master or employer, who has the charge or control of any signal points, locomotive engine, switch, car, or train upon a railway, or of any part of the track of a railway.

But the master or employer is not liable under this section if the servant or employee knew of the defect or negligence causing the injury, and failed in a reasonable time to give information thereof to the master or employer, or to some person superior to himself engaged in the service or employment of the master or employer, unless he was aware that the master or employer, or such superior already knew of such defect or negligence; nor is the master or employer liable under subdivision 1, unless the defect therein mentioned arose from, or had not been discovered or remedied owing to, the negligence of the master or employer.

(1887) 84 Ala. 133, 4 So. 146, the court said: "Our statute, as far as it goes, is a substantial copy of the English act entitled the 'employers' liability act,' some of the provisions of which had previously received a judicial construction. Its enactment by the legislature, in substantially the same language, is persuasive of a legislative adoption of that construction."

In another case the same court, speaking of the construction placed upon the English statute by English judges, said: "In view of the source whence our statute came, this judicial construction is, of course, entitled to very great weight and influence with this court—an influence even beyond that which in ordinary cases the ability and learning of those courts command." *Kansas City, M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88.

That the Colorado act was "presumably adopted with the construction given to it by the courts of Massachusetts" see *Colorado Mill & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28. This is, of course, equivalent, for practical purposes, to acknowledging the authority of the English decisions to which the courts of Massachusetts defer.

or of some person in the service of the master or employer, and intrusted by him with the duty of seeing that the ways, works, machinery, or plant, were in proper condition.

Sec. 2591 (1751). Personal Representatives may Sue if Injury Results in Death:—If such injury results in the death of the servant or employee, his personal representative is entitled to maintain an action therefor, and the damages recovered are not subject to the payment of debts or liabilities, but shall be distributed according to the statute of distributions.

Sec. 2592 (1759). Damages Exempt:—Damages recovered by the servant or employee, of and from the master or employer, are not subject to the payment of debts, or any legal liabilities incurred by him.

Sec. 2593. Liability of Personal Representative and Sureties:—The personal representative and the sureties on his bond are liable to the parties in interest for the due and legal distribution of all damages recovered by such representative under section 2588, or section 2589, or section 2591, but are subject to all remedies which may be pursued against such representative and sureties for the due administration of personal assets.

656. Massachusetts.—Laws 1887, chap. 270, § 1.—Where, after the passage of this act, personal injury is caused to an employee, who is himself in the exercise of due care and diligence at the time:

Subs. 1. By reason of any defect in the condition of the ways, works, or machinery connected with or used in the business of the employer, which arose from, or had not been discovered or remedied owing to, the negligence of the employer, or of any person in the service of the employer and intrusted by him with the duty of seeing that the ways, works, or machinery were in proper condition; or

Subs. 2. By reason of the negligence of any person in the service of the employer, intrusted with and exercising superintendence, whose sole or principal duty is that of superintendence; [or, in the absence of such superintendent, of any person acting as superintendent with the authority and consent of such employer]. The bracketed words were inserted by Mass. Stat. 1894, chap. 499, § 1.

Subs. 3. By reason of the negligence of any person in the service of the employer, who has the charge or control of any signal, switch, locomotive engine, or train upon a railroad, the employee or, in case the injury results in death, the legal representatives of such employee, shall have the same right of compensation and remedies against the employer as if the employee had not been an employee of, nor in the service of the employer, nor engaged in its work.

The following provision was added to this section by Mass. Stat. 1892, chap. 260:—And in case such death is not instantaneous, or is preceded by conscious suffering, said legal representatives may, in the action brought under this section, except as hereinafter provided, also recover damages for such death. The total damages awarded hereunder, both for said death and said injury, shall not exceed $5,000, and shall be apportioned by the jury between the legal representatives and the persons, if any, entitled under the succeeding section of this act, to bring an action for instantaneous death. If there are no such persons, then no damages for such death shall be recovered, and the damages, so far as the same are awarded for said death, shall be assessed with reference to the degree of culpability of the employer herein, or the persons for whose negligence he is made liable.

Another addition to this section was made by the Laws of 1893, chap. 259, to

MICROCOPY RESOLUTION TEST CHART

(ANSI and ISO TEST CHART No. 2)

this effect:—A car in use by or in the possession of a railroad company shall be considered a part of the ways, works, or machinery of the company using or having the same in possession, within the meaning of this act, whether such car is owned by it or by some other company or person.

Sec. 2. Where an employee is instantly killed, or dies without conscious suffering, as the result of the negligence of an employer or of the negligence of any person for whose negligence the employer is liable under the provisions of this act, the widow of the deceased, or, in case there is no widow, the next of kin, provided that such next of kin were at the time of the death of such employee dependent upon the wages of such employee for support, may maintain an action for damages therefor, and may recover in the same manner, to the same extent, as if the death of the deceased had not been instantaneous, or as if the deceased had consciously suffered.

Sec. 3. The amount of compensation receivable under this act in cases of personal injury shall not exceed the sum of $4,000. In case of death, compensation in lieu thereof may be recovered in not less than $500 and not more than $5,000, to be assessed with reference to the degree of culpability of the employer herein, or the person for whose negligence he is made liable; and no action for the recovery of compensation for injury or death under this act shall be maintained, unless notice of the time, place, and cause of the injury is given to the employer within thirty days, and the action is commenced within one year, from the occurrence of the accident causing the injury or death.

In 1888 the following words were inserted here:—The notice required by this section shall be in writing, signed by the person injured or by someone in his behalf; but if, from physical or mental incapacity, it is impossible for the person injured to give the notice within the time provided in said section, he may give the same within ten days after such incapacity is removed; and in case of his death without having given the notice, and without having been, for ten days, at any time after his injury, of sufficient capacity to give the notice, his executor or administrator may give such notice within thirty days after his appointment. Mass. Pub. Stat. chap. 155, § 1, March 22, 1888.

But no notice given under the provisions of this section shall be deemed to be invalid or insufficient solely by reason of any inaccuracy in stating the time, place, or cause of the injury; provided it is shown that there was no intention to mislead, and that the party entitled to notice was not in fact misled thereby.

By Mass. Stat. 1892, chap. 260, § 2, it was enacted that the following words should precede the first sentence of the above section: "Except in actions brought by personal representatives under section 1 of this act, to recover damages for both the injury and death of an employee;" and that, after the word "death" in the third line, there should be inserted the words: "which follows instantaneously, or without conscious suffering."

Sec. 4. Whenever an employer enters into a contract, either written or verbal, with an independent contractor to do part of such employer's work, or whenever such contractor enters into a contract with a subcontractor to do all or any part of the work comprised in such contractor's contract with the employer, such contract or subcontract shall not bar the liability of the employer for injuries to the employees of such contractor or subcontractor, by reason of any defect in the condition of the ways, works, machinery, or plant, if they are the property of the employer, or furnished by him, and if such defect arose or had not been discov-

ered or remedied through the negligence of the employer or of some person intrusted by him with the duty of seeing that they were in proper condition.

Sec. 5. An employee or his legal representatives shall not be entitled under this act to any right of compensation or remedy against his employer in any case where such employee knew of the defect or negligence which caused the injury, and failed within a reasonable time to give, or cause to be given, information thereof to the employer, or to some person superior to himself in the service of the employer, who had intrusted to him some general superintendence.

Sec. 6. Any employer who shall have contributed to an insurance fund created and maintained for the mutual purposes of indemnifying an employee for personal injuries for which compensation may be recovered under this act, or to any relief society formed under chapter 244 of the acts of the year 1882, as authorized by chapter 125 of the acts of the year 1886, may prove, in mitigation of the damages recoverable by an employee under this act, such proportion of the pecuniary benefit which has been received by such employee from any such fund or society on account of such contribution of said employer, as the contribution of such employer to such fund or society bears to the whole contribution thereto.

Sec. 7. This act shall not apply to injuries caused to domestic servants or farm laborers, by other fellow employees, and shall take effect on the first day of September, 1887.

The various amendments and additions which, as above indicated, had been from time to time inserted in this act, were incorporated in the consolidated statute cited as Rev. Laws, 1902, chap. 106; and as the text of some of the sections not affected by these alterations was also modified to some extent by the same statute, it has been deemed advisable to set it out in full.

Rev. Laws 1902, chap. 106:—Sec. 71. If personal injury is caused to an employee who, at the time of the injury, is in the exercise of due care, by reason of:

First. A defect in the condition of the ways, works, or machinery connected with or used in the business of the employer, which arose from, or had not been discovered or remedied in consequence of, the negligence of the employer, or of a person in his service who had been intrusted by him with the duty of seeing that the ways, works, or machinery were in the proper condition; or,

Second. The negligence of a person in the service of the employer, who was intrusted with and was exercising superintendence, and whose sole or principal duty was that of superintendence, or, in the absence of such superintendent, of a person acting as superintendent with the authority or consent of such employer; or

Third. The negligence of a person in the service of the employer, who was in charge or control of a signal, switch, locomotive engine, or train upon a railroad,—the employee or his legal representatives shall, subject to the provisions of the eight following sections, have the same rights to compensation and of action against the employer as if he had not been an employee, nor in the service, nor engaged in the work, of the employer.

A car which is in use by, or which is in possession of, a railroad corporation shall be considered as a part of the ways, works, or machinery of the corporation which uses or has it in possession, within the meaning of clause 1 of this section.

whether it is owned by such corporation or by some other company or person. One or more cars which are in motion, whether attached to an engine or not, shall constitute a train within the meaning of clause 3 of this section, and whoever, as a part of his duty for the time being, physically controls or directs the movements of a signal, switch, locomotive engine or train, shall be deemed to be a person in charge or control of a signal, switch, locomotive engine, or train within the meaning of said clause.

Sec. 72. If the injury described in the preceding section results in the death of the employee, and such death is not instantaneous, or is preceded by conscious suffering, and if there is any person who would have been entitled to bring an action under the provisions of the following section, the legal representatives of said employee may, in the action brought under the provisions of the preceding section, recover damages for the death, in addition to those for the injury.

Sec. 73. If, as the result of the negligence of an employer himself, or of a person for whose negligence an employer is liable under the provisions of section 71, an employee is instantly killed, or dies without conscious suffering, his widow, or, if he leaves no widow, his next of kin, who at the time of his death were dependent upon his wages for support, shall have a right of action for damages against the employer.

Sec. 74. If, under the provisions of either of the two preceding sections, damages are awarded for the death, they shall be assessed with reference to the degree of culpability of the employer or of the person for whose negligence the employer is liable.

The amount of damages which may be awarded in an action under the provisions of section 71 for a personal injury to an employee, in which no damages for his death are awarded under the provisions of section 72, shall not exceed $4,000.

The amount of damages which may be awarded in such action, if damages for his death are awarded under the provisions of section 72, shall not exceed $5,000 for both the injury and the death, and shall be apportioned by the jury between the legal representatives of the employee and the persons who would have been entitled, under the provisions of section 73, to bring an action for his death if it had been instantaneous or without conscious suffering.

The amount of damages which may be awarded in an action brought under the provisions of section 73 shall not be less than $500 nor more than $5,000.

Sec. 75. No action for the recovery of damages for injury or death under the provisions of sections 71 to 74, inclusive, shall be maintained unless notice of the time, place, and cause of the injury is given to the employer within sixty days, and the action is commenced within one year, after the accident which causes the injury or death. Such notice shall be in writing, signed by the person injured or by a person in his behalf; but if, from physical or mental incapacity, it is impossible for the person injured to give the notice within the time provided in this section, he may give it within ten days after such incapacity has been removed; and if he dies without having given the notice and without having been, for ten days, at any time after his injury, of sufficient capacity to give it, his executor or administrator may give such notice within sixty days after his appointment. A notice given under the provisions of this section shall not be held invalid or insufficient solely by reason of an inaccuracy in stating the time, place, or cause of the injury, if it is shown that there was no intention to mislead, and that the employer was not in fact misled thereby. The provisions of section 22 of chapter 51 shall apply to notices under the provisions of this section.

Sec. 76. If an employer enters into a contract, written or verbal, with an independent contractor to do part of such employer's work, or if such contractor enters into a contract with a subcontractor to do all or any part of the work comprised in such contractor's contract with the employer, such contract or subcontract shall not bar the liability of the employer for injuries to the employees of such contractor or subcontractor, caused by any defect in the condition of the ways, works, machinery, or plant, if they are the property of the employer or are furnished by him, and if such defect arose, or had not been discovered or remedied, through the negligence of the employer, or of some person intrusted by him with the duty of seeing that they were in proper condition.

Sec. 77. An employee or his legal representatives shall not be entitled under the provisions of sections 71 to 74, inclusive, to any right of action for damages against his employer, if such employee knew of the defect or negligence which caused the injury, and failed within a reasonable time to give, or cause to be given, information thereof to the employer, or to some person superior to himself in the service of the employer, who was intrusted with general superintendence.

Sec. 78. An employer who shall have contributed to an insurance fund created and maintained for the mutual purpose of indemnifying an employee for personal injuries for which compensation may be recovered under the provisions of sections 71 to 74, inclusive, or to any relief society formed under the provisions of sections 17, 18, and 19 of chapter 125, may prove, in mitigation of the damages recoverable by an employee under the provisions of said sections, such proportion of the pecuniary benefit which has been received by such employee from any such fund or society on account of such contribution of said employer, as the contribution of such employer to such fund or society bears to the whole contribution thereto.

Sec. 79. The provisions of the eight preceding sections shall not apply to injuries caused to domestic servants or farm laborers by fellow employees.

657. Colorado.—Laws 1893, chap. 77 (Mill's Anno. Stat. Supp. 1891–1896, § 1511a):—Sec. 1. Where, after the passage of this act, personal injury is caused to an employee, who is himself in the exercise of due care and diligence at the time:

(1) By reason of any defect in the condition of the ways, works, or machinery connected with or used in the business of the employer, which arose from, or had not been discovered or remedied owing to, the negligence of the employer, or of any person in the service of the employer, and intrusted by him with the duty of seeing that the ways, works, and machinery were in proper condition; or

(2) By reason of the negligence of any person in the service of the employer, intrusted with exercising superintendence, whose sole or principal duty is that of superintendence;

(3) By reason of the negligence of any person in the service of the employer, who has the charge or control of any switch, signal, locomotive engine, or train upon a railroad, the employee, or in case the injury results in death, the parties entitled by law to sue and recover for such damages, shall have the same right of compensation and remedy against the employer as if the employee had not been an employee of, or in the service of, the employer or engaged in his or its works.

Sec. 2 (1511b). The amount of compensation recoverable under this act, in case of a personal injury resulting solely from the negligence of a coemployee, shall not exceed the sum of $5,000. No action for the recovery of compensation for injury

or death under this act shall be maintained unless written notice of the time, place, and cause of the injury is given to the employer within sixty days, and the action is commenced within two years, from the occurrence of the accident causing the injury or death. But no notice given under the provisions of this section shall be deemed invalid or insufficient solely by reason of any inaccuracy in stating the time, place, or cause of injury: Provided, It is shown that there was no intention to mislead, and that the party entitled to notice was not in fact misled thereby.

Sec. 3. (1511c). Whenever an employer enters into a contract, either written or verbal, with an independent contractor, to do part of such employer's work, or whenever such contractor enters into a contract with a subcontractor to do all or a part of the work comprised in such contract or contracts with the employer, such contract or subcontract shall not bar the liability of the employer for injuries to the employees of such contractor or subcontractor, by reason of any defect in the condition of the ways, works, machinery, or plant, if they are the property of the employer or furnished by him, and if such defect arose or had not been discovered or remedied through the negligence of the employer or of some person intrusted by him with the duty of seeing that they were in proper condition.

Sec. 4 (1511d). An employee, or those entitled by law to sue and recover under the provisions of this act, shall not be entitled under this act to any right of compensation or remedy against his employer in any case where such employee knew of the defect or negligence which caused the injury, and failed within a reasonable time to give or cause to be given information thereof to the employer, or to some person superior to himself in the service of his employer, who had intrusted to him some general superintendence.

Sec. 5. (1511e). If the injury sustained by the employee is clearly the result of the negligence, carelessness, or misconduct of a coemployee, the coemployee shall be equally liable under the provisions of this act with the employer, and may be made a party defendant in all actions brought to recover damages for such injury. Upon the trial of such action the court may submit to and require the jury to find a special verdict upon the question as to whether the employer or his vice principal was or was not guilty of negligence proximately causing the injury complained of; or whether such injury resulted solely from the negligence of the coemployee; and in case the jury by their special verdict find that the injury was solely the result of the negligence of the employer or vice principal, then and in that case the jury shall assess the full amount of plaintiff's damages against the employer, and the suit shall be dismissed as against the employee; but in case the jury by their special verdict find that the injury resulted solely from the negligence of the coemployee, the jury may assess damages both against the employer and the employee.

Approved April 8, 1893.

This act is now superseded to some extent by the statute set out in chapter XXXIX., *post*.

658. Indiana.—Acts 1893, chap. 130, p. 294; 3 Rev. Stat. 1894, §§ 7083-7087; Horner's Rev. Stat. 1897, §§ 5206-5210; Burns's Rev. Stat. 1901, §§ 7083-7087;

Rev. Stat. § 7083. Liability for Personal Injuries:—1. That every railroad or other corporation, except municipal, operating in this state, shall be liable in damages for personal injury suffered by any employee while in its service, the employee so injured being in the exercise of due care and diligence, in the following cases:

First. When such injury is suffered by reason of any defect in the condition of ways, works, plant, tools, and machinery connected with or in use in the business of such corporation, when such defect was the result of negligence on the part of the corporation, or some person intrusted by it with the duty of keeping such way, works, plant, tools, or machinery in proper condition;

Second. Where such injury resulted from the negligence of any person in the service of such corporation, to whose order or direction the injured employee at the time of the injury was bound to conform, and did conform;

Third. Where such injury resulted from the act or omission of any person done or made in obedience to any rule, regulation, or by-law of such corporation, or in obedience to the particular instructions given by any person delegated with the authority of the corporation in that behalf;

Fourth. Where such injury was caused by the negligence of any person in the service of such corporation, who has charge of any signal, telegraph office, switch yard, shop, roundhouse, locomotive engine, or train upon a railway, or where such injury was caused by the negligence of any person, coemployee, or fellow servant engaged in the same common service in any of the several departments of the service of any such corporation, the said person, coemployee, or fellow servant at the time acting in the place and performing the duty of the corporation in that behalf, and the person so injured, obeying or conforming to the order of some superior at the time of such injury, having authority to direct; but nothing herein shall be construed to abridge the liability of the corporation under existing laws.

Sec. 7084. When Damages not Recoverable:—2. Neither an employee nor his legal representative shall be entitled under this act to any right of compensation or remedy against the corporation in any case where the injury results from obedience to any order which subjects the employee to palpable danger; nor where the injury was caused by the incompetency of the coemployee, and such incompetency was known to the employee injured, or such injured employee, in the exercise of reasonable care, might have discovered such incompetency; unless the employee so injured gave or caused to be given information thereof to the corporation or to some superior intrusted with the general superintendence of such coemployee, and such corporation failed or refused to discharge such incompetent employee within a reasonable time, or failed or refused within a reasonable time to investigate the alleged incompetency of the coemployee or superior, and discharge him if found incompetent.

Repealed by act 1894, chap. 64.

Sec. 7085. Measure of Damages:—3. The measure of damages recoverable under this act shall be commensurate with the injury sustained, unless death results from such injury, when, in such case, the action shall survive and be governed in all respects by the law now in force as to such actions: Provided, That where any such person recovers a judgment against a railroad or other corporation, and such corporation takes an appeal, and pending such appeal the injured person dies, and the judgment rendered in the court below be thereafter reversed, the right of action of such person shall survive to his legal representative.

Sec. 7086. Contracts of Release Void:—5. All contracts made by railroads or other corporations with their employees, or rules or regulations adopted by any corporation, releasing or relieving it from liability to any employee having a right of action under the provisions of this act, are hereby declared null and void. The provisions of this act, however, shall not apply to any injuries sustained before it takes effect; nor shall it affect in any manner any suit or legal proceedings pending at the time it takes effect.

In effect March 4, 1893.

659. New York.—An Act to Extend and Regulate the Liability of Employers to Make Compensation for Personal Injuries Suffered by Employees.—Laws 1902 chap. 600:—Sec. 1. Where, after this act takes effect, personal injury is caused to an employee who is himself in the exercise of due care and diligence at the time,

1. By reason of any defect in the condition of the ways, works, or machinery connected with or used in the business of the employer, which arose from or had not been discovered or remedied owing to the negligence of the employer or of any person in the service of the employer and intrusted by him with the duty of seeing that the ways, works, or machinery were in proper condition;

2. By reason of the negligence of any person in the service of the employer intrusted with and exercising superintendence, whose sole or principal duty is that of superintendence, or, in the absence of such superintendent, of any person acting as superintendent with the authority or consent of such employer, the employee, or in case the injury results in death, the executor or administrator of a deceased employee who has left him surviving a husband, wife, or next of kin shall have the same right of compensation and remedies against the employer as if the employee had not been an employee of, nor in the service of, the employer nor engaged in his work. The provisions of law relating to actions for causing death by negligence, so far as the same are consistent with this act, shall apply to an action brought by an executor or administrator of a deceased employee suing under the provisions of this act.

Sec. 2. No action for recovery of compensation for injury or death under this act shall be maintained unless notice of the time, place, and cause of the injury is given to the employer within 120 days and the action is commenced within one year after the occurrence of the accident causing the injury or death. The notice required by this section shall be in writing and signed by the person i[illegible] by someone in his behalf; but if, from physical or mental incapacity, possible for the person injured to give notice within the time provid[illegible] section, he may give the same within ten days after such incapacity i[illegible] In case of his death without having given such notice, his executor or trator may give such notice with[illegible]n sixty days after his appointment; but no notice under the provisions of this section shall be deemed to be invalid or insufficient solely by reason of any inaccuracy in stating the time, place, or cause of the injury, if it be shown that there was no intention to mislead and that the party entitled to notice was not in fact misled thereby. The notice required by this section shall be served on the employer, or if there is more than one employer, upon one of such employers, and may be served by delivering the same to or at the residence or place of business of the person on whom it is to be served. The notice may be served by post, by letter addressed to the person on whom it is to be served, at his last known place of residence or place of business, and if served by post shall be deemed to have been served at the time when the letter contain-

ing the same would be delivered in the ordinary course of the post. When the employer is a corporation, notice shall be served by delivering the same or by sending it by post, addressed to the office or principal place of business of such corporation.

Sec. 3. An employee, by entering upon or continuing in the service of the employer, shall be presumed to have assented to the necessary risks of the occupation or employment, and no [illegible]. The necessary risks of the occupation or employment shall, in all cases arising after this act takes effect, be considered as including those risks, and those only, inherent in the nature of the business, which remain after the employer has exercised due care in providing for the safety of his employees, and has complied with the laws affecting or regulating such business or occupation for the greater safety of such employees. In an action maintained for the recovery of damages for personal injuries to an employee received after this act takes effect, owing to any cause for which the employer would otherwise be liable, the fact that the employee continued in the service of the employer in the same place and course of employment after the discovery by such employee, or after he had been informed of, the danger of personal injury therefrom, shall not, as a matter of law, be considered as an assent by such employee to the existence or continuance of such risks of personal injury therefrom, or as negligence contributing to such injury. The question whether the employee understood and assumed the risk of such injury, or was guilty of contributory negligence, by his continuance in the same place and course of employment with knowledge of the risk of injury, shall be one of fact, subject to the usual powers of the court in a proper case to set aside a verdict rendered contrary to the evidence. An employee, or his legal representative, shall not be entitled under this act to any right of compensation or remedy against the employer in any case where such employee knew of the defect or negligence which caused the injury, and failed, within a reasonable time, to give, or cause to be given, information thereof to the employer, or to some person superior to himself in the service of the employer, who had intrusted to him some general superintendence, unless it shall appear on the trial that such defect or negligence was known to such employer, or superior person, prior to such injuries to the employee.

Sec. 4. An employer who shall have contributed to an insurance fund created and maintained for the mutual purpose of indemnifying an employee for personal injuries, for which compensation may be recovered under this act, or to any relief society or benefit fund created under the laws of this state, may prove in mitigation of damages recoverable by an employee under this act such proportion of the pecuniary benefit which has been received by such employee from such fund or society on account of such contribution of employer, as the contribution of such employer to such fund or society bears to the whole contribution thereto.

Sec. 5. Every existing right of action for negligence or to recover damages for injuries resulting in death is continued, and nothing in this act contained shall be construed as limiting any such right of action; nor shall the failure to give the notice provided for in section 2 of this act be a bar to the maintenance of a suit upon any such existing right of action.

Sec. 6. This act shall take effect July 1, 1902.

660. Ontario and other Canadian provinces.—The English act has

naturally been followed very closely in all the colonies which have adopted a similar statute.

In Newfoundland the original act is followed word for word.

In Ontario the legislatures, while preserving the provisions of that act in the essential features, have made some important additions. As the statutes of these colonies are virtually identical, it will be sufficient to give the text of that of Ontario, so far as it is of general interest.

The statute at present in force is 55 Vict. chap. 30 (Ont. Rev. Stat. 1897, chap. 160). In this is incorporated, with some unimportant verbal variations, the provisions of the earlier act, 49 Vict. chap. 28 (Ont. Rev. Stat. 1887, chap. 141). Several new sections are also added.

Any of the alterations which it seems advisable to note are mentioned.

Sec. 1. This act may be known and cited as "the workingmen's compensation for injuries act." 55 Vict. chap. 30, § 1.

Sec. 2. Where the following words occur in this act, they shall be construed in the manner hereinafter mentioned, unless a contrary intention appears:

Subs. 1. "Superintendence" shall be construed as meaning such general superintendence over workmen as is exercised by a foreman, or person in a like position to a foreman, whether the person exercising superintendence is or is not ordinarily engaged in manual labor.

Subs. 2. "Employer" shall include a body of persons corporate or unincorporate, and also the legal personal representatives of a deceased employer, and the person liable to pay compensation under section 4 of this act. 55 Vict. chap. 30, § 2 subs. 1, 2.

[Subsecs. 1 and 2 are altered from the earlier act, but not so as to affect the extent of the master's liability.]

Subs. 3. "Workman" does not include a domestic or menial servant, or servant in husbandry, gardening, or fruit growing, where the personal injury caused to any such servant has been occasioned by or has arisen from or in the usual course of his work or employment as a domestic or menial servant, or as a servant in husbandry, gardening, or fruit-growing; but, save as aforesaid, means any railway servant and any person who, being a laborer, servant, journeyman, artificer, handicraftsman, miner, or otherwise engaged in manual labor, whether under the age of twenty-one years or above that age, has entered into or works under a contract with an employer, whether the contract is made before or after the passing of this act, is expressed or implied, oral or in writing, and is a contract of service or a contract personally to execute any work or labor. 56 Vict. chap. 26 § 1.

Subs. 4. "Packing" shall mean a packing of wood or metal, or some other equally substantial and solid material, of not less than 2 inches in thickness, and which, where filled in, shall extend to within 1½ inches of the crown of the rail-

in use on any railway, shall be neatly fitted so as to come against the web of such rails, and shall be well and solidly fastened to the ties on which such rails are laid.

Subs. 5. "Railway servant" shall mean and include a railway servant, tramway servant, and street railway servant. 55 Vict. chap. 30, § 2, subs. 4, 5.

Sec. 3. Where personal injury is caused to a workman:

Subs. 1. By reason of any defect in the condition or arrangement of the ways, works, machinery, plant, buildings, or premises connected with, intended for, or used in, the business of the employer; or

Subs. 2. By reason of the negligence of any person in the service of the employer, who has any superintendence intrusted to him, whilst in the exercise of such superintendence; or

[See § 2, subs. 1.]

Subs. 3. By reason of the negligence of any person in the service of the employer, to whose orders or directions the workman at the time of the injury was bound to conform and did conform, where such injury resulted from his having so conformed; or

Subs. 4. By reason of the act or omission of any person in the service of the employer, done or made in obedience to the rules or by-laws of the employer, or in obedience to particular instructions given by the employer or by any person delegated with the authority of the employer in that behalf; or

Subs. 5. By reason of the negligence of any person in the service of the employer, who has the charge or control of any points, signal, locomotive engine, machine, or train upon a railway, tramway, or street railway,—the workman, or, in case the injury results in death, the legal personal representatives of the workman, and any persons entitled in case of death, shall have the same right of compensation and remedies against the employer as if the workman had not been a workman of, nor in the service of, the employer, nor engaged in his work. 55 Vict. chap. 30, § 3.

Sec. 4, subs. 1. Where the execution of any work is being carried into effect under any contract, and

(a) The person for whom the work, or any part thereof, is done, owns or supplies any ways, works, machinery, plant, buildings or premises used for the purpose of executing the work; and

[This provision is not inserted in the Manitoba act.]

(b) By reason of any defect in the condition or arrangement of such ways, works, machinery, plant, buildings, or premises, personal injury is caused to any workman employed by the contractor or by any subcontractor; and

(c) The defect or the failure to discover or remedy the defect arose from the negligence of the person for whom the work or any part thereof is done, or of some person being in his service and intrusted by him with the duty of seeing that such condition or arrangement is proper,—the person for whom the work, or that part of the work, is done, shall be liable to pay compensation for the injury as if the workman had been employed by him, and for that purpose shall be deemed to be the employer of the workman within the meaning of this act: Provided, always, That any such contractor or subcontractor shall be liable to pay compensation for the injury as if this section had not been enacted, so, however that double compensation shall not be recoverable for the same injury.

Nothing corresponding to this provision is found in the English act. It should be compared with section 4 of the Massachusetts act.

Subs. 2. Nothing in this section contained shall affect any rights or liabilities of the person for whom the work is done and the contractor and subcontractor (if any), as between themselves. 55 Vict. chap. 30, § 4.

Sec. 5. Where, within this Province, personal injury is caused to a workman employed on or about any railway:

Subs. 1. By reason of the lower beams or members of the superstructure of any highway or other overhead bridge, or any other erection or structure over said railway, not being of a sufficient height from the surface of the rails to admit of an open and clear headway of at least 7 feet between the top of the highest freight cars then running on such railway, and the bottom of such lower beams or members; or,

Subs. 2. By reason of the space between the rails in any railway frog, extending from the point of such frog backward to where the heads of such rails are not less than 5 inches apart, not being filled in with packing; or,

Subs. 3. By reason of the space between any wing rail and any railway frog and between any guard rail and any other rail fixed and used alongside thereof as aforesaid, and between all wing rails where no other rail intervenes (save only where the space between the heads of any such wing rail and railway frog as aforesaid, or between the heads of any such guard rail and any other rail fixed and used alongside thereof as aforesaid, or between the heads of any such wing rails where no other rail intervenes as aforesaid, is either less than 1⅛ of an inch or more than 5 inches in width) not being at all times during every month of April, May, June, July, August, September, October, and November, filled in with packing,—such injury shall be deemed and taken to have been caused by reason of a defect within the meaning of clause numbered 1 of section 3 of this act: but nothing in this section contained shall be taken or construed, as in any respect, or for any purpose, restricting the meaning of the said clause. 55 Vict. chap. 30, § 5; 60 Vict. chap. 15, Schedule A (57).

[The above provisions are not found in Rev. Stat. 1887, and are peculiar to this Canadian statute, and the two others which are copied from it.]

Sec. 6. A workman, or his legal representatives, or any person entitled in case of his death, shall not be entitled under this act to any right of compensation or remedy against the employer in any of the following cases: that is to say:

Subs. 1. Under clause 1 of section 3, unless the defect therein mentioned arose from, or had not been discovered or remedied owing to, the negligence of the employer or of some person intrusted by him with the duty of seeing that the condition or arrangement of the ways, works, machinery, plant, building, or premises are proper;

Subs. 2. Under clause 4 of section 3, unless the injury resulted from some impropriety or defect in the rules, by-laws, or instructions therein mentioned: Provided, That where a rule or by-law has been approved, or has been accepted as a proper rule or by-law, either by the lieutenant-governor in council, or under and pursuant to any provision in that behalf of any act of the Legislature of Ontario or of the Parliament of Canada, it shall not be deemed for the purposes of this act to be an improper or defective rule or by-law;

Subs. 3. In any case where the workman knew of the defect or negligence which caused his injury, and failed without reasonable excuse to give, or cause to be given within a reasonable time, information thereof to the employer or some

person superior to himself in the service of his employer, unless he was aware that the employer or such superior already knew of the said defect or negligence: Provided, however, That such workman shall not, by reason only of his continuing in the employment of the employer with knowledge of the defect, negligence, act, or omission, which caused his injury, be deemed to have voluntarily incurred the risk of the injury. 55 Vict. chap. 30, § 6; 60 Vict. chap. 14, § 85.

Sec. 7. The amount of compensation recoverable under this act shall not exceed either such sum as may be found to be equivalent to the estimated earnings during the three years preceding the injury, of a person in the same grade, employed during those years in the like employment within this province, or the sum of $1,500, whichever is larger; and such compensation shall not be subject to any deduction or abatement, by reason of any account or in respect of any matter or thing whatsoever, save such as is specially provided for in section 12 of this act. 55 Vict. chap. 30, § 7.

Sec. 8. When in any action under this act compensation is awarded in the case of the death of a workman, for an injury sustained by him in the course of his employment, the amount recovered, after deducting the costs not recovered from the defendant, may, if the court or judge before whom the action is tried otherwise directs, be divided between the wife or husband, parent and child of the deceased in such shares as the court or judge, with or without assessors, as the case may be, or, if the action is tried by a jury, as the jury may determine. 55 Vict. chap. 30, § 8.

Sec. 9. Subject to the provisions of sections 13 and 14, an action for the recovery, under this act, of compensation for an injury, shall not be maintainable against the employer of the workman, unless notice that injury has been sustained is given within twelve weeks and the action is commenced within six months[1] from the occurrence of the accident causing the injury, or in case of death within twelve months from the time of death: Provided, always, That in case of death the want of such notice shall be no bar to the maintenance of such action, if the judge shall be of opinion that there was reasonable excuse for such want of notice. 55 Vict. chap. 30, § 9.

Sec. 10. No contract or agreement made or entered into by a workman shall be a bar or constitute any defense to an action for the recovery under this act of compensation for any injury,

Subs. 1. Unless for such workman entering into or making such contract or agreement there was other consideration than that of his being taken into or continued in the employment of the defendant; nor

Subs. 2. Unless such other consideration was, in the opinion of the court or judge before whom such action is tried, adequate and adequate; nor

Subs. 3. Unless, in the opinion of the court or judge, such contract or agreement, in view of such other consideration, was not, on the part of the workman, improvident, but was just and reasonable; and the burden of proof in respect of such other consideration, and of the same being ample and adequate, as aforesaid, and that the contract was just and reasonable and was not improvident, as aforesaid, shall, in all cases, rest upon the defendant: Provided, always, That, notwithstanding anything in this section contained, no contract or agreement whatsoever, made or entered into by a workman, shall be a bar or constitute any defense to an action for the recovery under this act of compensation for any injury happening

[1] Under the interpretation act (Ont. subs. 15, a "month" means a calendar month.

or caused by reason of any of the matters mentioned in section 5 of this act. 55 Vict. chap. 30, § 10.

Sec. 11. Notwithstanding anything contained in this act, an action under section 3, 4, or 5 shall lie against the legal personal representatives of a deceased employer. 55 Vict. chap. 30, § 11.

Sec. 12. There shall be deducted from any compensation awarded to any workman, or representatives of a workman, or persons claiming by, under, or through a workman in respect of any cause of action arising under this act, any penalty or damages, or part of a penalty or damages, which may, in pursuance of any other act, either of the Parliament of Canada or of the legislature of Ontario, have been paid to such workman, representatives, or persons in respect of the same cause of action: and where an action has been brought under this act by any workman, or the representatives of any workman, or any persons claiming by, under, or through such workman, for compensation in respect of any cause of action arising under this act, and payment has not previously been made of any penalty or damages, or part of a penalty or damages under any such act, either of the said Parliament or of the said legislature, in respect of the same cause of action, such workman, representatives, or persons shall not, so far as the said legislature has power so to enact, be entitled thereafter to receive in respect of the same cause of action, any such penalty or damages, or part of a penalty or damages, under any such last-mentioned act. 55 Vict. chap. 30, § 12.

Sec. 13, subs. 1. Notice in respect of an injury under this act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury and the date at which it was sustained, and shall be served on the employer, or, if there is more than one employer, upon one of such employers.

Subs. 2. The notice may be served by delivering the same to or at the residence or place of business of the person on whom it is to be served;

Subs. 3. The notice may also be served by post, by a registered letter addressed to the person on whom it is to be served, at his last known place of residence or place of business, and if served by post shall be deemed to have been served at the time when a letter containing the same would be delivered in the ordinary course of post; and in proving the service of such notice it shall be sufficient to prove that the notice was properly addressed and registered;

Subs. 4. Where the employer is a body of persons corporate or unincorporate the notice shall be served by delivering the same at, or by sending it by post in a registered letter addressed to, the office, or, if there be more than one office, any one of the offices of such body;

Subs. 5. The want or insufficiency of the notice required by this section, or by section 9 of this act, shall not be a bar to the maintenance of an action for the recovery of compensation for the injury, if the court or judge before whom such action is tried, or, in case of appeal, if the court hearing the appeal is of opinion that there was reasonable excuse for such want or insufficiency, and that the defendant has not been thereby prejudiced in his defense.

Subs. 6. A notice under this section shall be deemed sufficient if in the form or to the effect following:—

To A. B., of (*here insert employer's address*) or To the Company (*or as the case may be*).

Take notice, that on the day of 18 , C. D., of (*insert address of injured person*) a workman in your employment sustained personal injury (*add*, of

which he died, *if such be the case*), and that such injury was caused by (*state shortly the cause of injury, e. g.*, the fall of a beam).

(Date.)

Yours, etc.,
X. Y.

55 Vict. chap. 30, § 13.

Sec. 14. If the defendant in any action against an employer for compensation for an injury sustained by a workman in the course of his employment intends to rely for a defense on the want of notice or the insufficiency of notice, or on the ground that he was not the employer of the workman injured, he shall, not less than seven days before the hearing of the action, or such other time as may be fixed by the rules regulating the practice of the court in which the action is brought, give notice to the plaintiff of his intention to rely on that defense; and the court may, in its discretion, and upon such terms and conditions as may be just in that behalf, order and allow an adjournment of the case for the purpose of enabling such notice to be given; and, subject to any such terms and conditions, any notice given pursuant to and in compliance with the order in that behalf, shall, as to any such action and for all purposes thereof, be held to be a notice given pursuant to and in conformity with sections 9 and 13 of this act. 55 Vict. chap. 30, § 14.

Sec. 15. In an action brought under this act, the particulars of demand or statement of claim shall state in ordinary language the cause of the injury, and the date at which it was sustained, and the amount of compensation claimed; and where the action is brought by more than one plaintiff, the amount of compensation claimed by each plaintiff; and where the injury of which the plaintiff complains shall have arisen by reason of the negligence, act, or omission of any person in the service of the defendant, the particulars shall give the name and description of such person. 55 Vict. chap. 30, § 15.

Sec. 16. (End of act deals merely with the appointment of assessors to ascertain the proper amount of compensation, and with other details of local practice.)

The Manitoba workmen's compensation act 1893, and that of British Columbia 1801, are couched in virtually the same phraseology as the Ontario statute.

660a. Australian statutes.— The Australian statutes are those specified in the subjoined list. They are not copied verbatim from the original English act, but the changes are of much less importance than those made by the legislature of Ontario, and it will be unnecessary to reproduce any of them in this volume.

New South Wales. Employers' liability act 1886 (50 Vict. No. 8). This, with its amendment as enacted in 1893 (56 Vict. No. 6), was superseded by the present act of 1897 (61 Vict. No. 28).

Victoria. Employers' and employees' act 1890, No. 1087, pt. III. [amended in 1891, No. 1219].

Queensland. Employers' liability act 1886.

South Australia. Employers' liability act 1884, No. 325.

New Zealand. 46 Vict. No. 20.

B. Effect of the statutes as a whole.

661. Generally.—Speaking of the English act, Lord Justice Fry remarked: "The statute is one which has created considerable difficulty in many cases, and I must observe that it appears to me to be a piece of legislation which does not carry into effect any one simple idea, but is, on the contrary, a compromise, so to speak, between two contending schemes of legislation or lines of thought on the subject of the liability of a master to an employee. Every word of it represents the result of a conflict or struggle of thought, and therefore the statute must be considered with great care, having reference to the particular words used in each portion of it."[1]

According to Lord Watson, "the main, although not the sole, object of the act of 1880 was to place masters who do not, upon the same footing of responsibility with those who do, personally superintend their works and workmen, by making them answerable for the negligence of those persons to whom they intrust the duty of superintendence, as if it were their own. In effecting that object the Legislature has found it expedient in many instances to enact what were acknowledged principles of the common law."[2]

The effect of the provision that the injured "employee shall have the same right of compensation and remedies against the employer as if the employee had not been an employee of, nor in the service of, the employer, nor engaged in its work," is simply that, in the cases specified, the defense of common employment with the person through whose negligence the injury was caused is taken away.[3] According

[2] *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392. See also, to same effect, the extract from the opinion of Field, J., in *Griffiths* v. *Dudley* (1882) L. R. 9 Q. B. Div. 357, 51 L. J. Q. B. N. S. 543, 4 J. P. 711, 47 L. T. N. S. 10, 30 Week. Rep. 797, note 3, *infra*.

[3] *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128. "The scope and operation of the statute is to make the employer answerable in damages for an injury caused by his own negligence, or the negligence of a coemployee of the same or superior grade, in the enumerated classes of cases." *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145.

"The only effect of the statute is to take away a plea which might exclude an action based upon the common law, in the event of the wrong complained of having been done by a fellow workman." *Morrison* v. *Baird* (1882) 10 Sc. Sess. Cas. 4th series, 271.

"The employers' liability act," observed Field, J., "was passed to obviate the injustice to workmen that employers should escape liability where persons having superintendence and control in the employment were guilty of negligence causing injury to the workmen. The employer was, before the passing of the act, clearly liable where he himself was guilty of negligence. It is also clear now that for the negligence of a fellow workman not coming within any of the classes of persons specified in the act the employer is not liable. But before the passing of the act, *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App.

to circumstances, therefore, the right of an employee to maintain an action under this statute may be greater or may be less than at common law.[4]

Proof that the injury was due to the carelessness of any servant not belonging to the classes specially designated is a bar to the action.[5] And although the negligent servant may belong to one of those classes, it is clear that, under the general principles of the law of agency, the employer cannot be held responsible for his negligence unless the act in question was one which was within the scope of his authority.[6]

662. Modified operation of these acts in the case of servants of municipal corporations.—Although the series of acts now under review inure

Cas. 326, 19 L. T. N. S. 30, had decided that where the injury was caused through the negligence of a superior person in the employment, the workmen could recover no damages from their common employer. The object of the act was to get rid of the inference arising from the fact of common employment with respect to injuries caused by any persons belonging to the specified classes." *Griffiths* v. *Dudley* (1882) L. R. 9 Q. B. Div. 357, 51 L. J. Q. B. N. S. 543, 47 L. T. N. S. 10, 30 Week. Rep. 797, 4 J. P. 711.

Since these acts confer upon a servant the same rights of action as a stranger, wherever the injury was caused by the negligence of any of the employees for whose delinquencies the employer is required to answer, a master is liable for the wanton, wilful, or intentional misconduct of such an employee. *Southern R. Co.* v. *Moore* (1901) 128 Ala. 434, 29 So. 659; *Louisville & N. R. Co.* v. *York* (1901) 128 Ala. 305, 30 So. 676.

[5] *Thyng* v. *Fitchburg R. Co.* (1892) 156 Mass. 13, 32 Am. St. Rep. 425, 30 N. E. 169 (brakeman injured by negligence of employees engaged in making up a train, held not entitled to recover).

"The burden of proof in such a case as this is upon the plaintiffs to show that the negligence was that of a fellow workman for whose negligence the employers are made liable by the statute." *Gibbs* v. *Great Western R. Co.* (1884) L. R. 12 Q. B. Div. (C. A.) 208, 32 Week. Rep. 329, per Brett, M. R.

"To entitle plaintiff to recover by virtue of the statute, he must both aver and prove a case coming within one of the enumerated classes of cases." *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145.

[6] A railroad company is not liable for injuries to an employee engaged in cleaning an engine of which the engineer is at the time in sole charge, by the blowing out of the packing of a valve, due to the act of a hostler who gets upon the engine and opens the throttle for the purpose of moving it. *Louisville & N. R. Co.* v. *Richardson* (1893) 100 Ala. 232, 14 So. 208 (deemed to be the act of a mere trespasser).

The foreman of a contractor is acting within the scope of his duties when he orders the workmen to attend some ten minutes before the regular hours of work to clear the ground of certain obstructions, which the employees of the principal employer are in the habit of leaving over night, and are such that the contract work cannot go forward unless they are removed. *Sweeney* v. *McGilvray* (1886) 14 Sc. Sess. Cas. 4th series, 105.

Where one has served a municipal corporation in the capacity of superintendent of certain work carried on by said city, and the municipal authorities have accepted such service and received the benefit of his skill and labor, the municipal corporation cannot avoid its responsibility for injuries resulting from his negligence in the doing of work within the scope of the service he was rendering, by denying the legality of his appointment. *Sheffield* v. *Harris* (1893) 101 Ala. 564, 14 So. 357.

See also § 674, note 12, *infra*, § 685, note 2, *infra*, § 687, note 1, subd. (b), *ad finem*, *infra*, § 691, note 2, *infra*.

Compare also § 537, *ante*, for the rule applied in common-law actions.

to the benefit of employees of municipal corporations, they do not operate so as to override the familiar principle that "no private action, unless authorized by express statute, can be maintained against a city for a neglect of a public duty imposed on it by law for the benefit of the public, and from the performance of which the corporation receives no profit or advantage." [1]

663. Employers' liability acts: whether strictly or liberally construed.—(See also § 639, *ante*.) In one of the earlier cases dealing with the English act of 1880, it was considered by Brett, M. R., that, this statute "having been passed for the benefit of workmen," it was the duty of the court "not to construe it strictly as against workmen, but in furtherance of the benefit which it was intended by Parliament should be given to them, and, therefore, as largely as reason enables one, to construe it in their favor and for the furtherance of the object of the act." [1] The same view was expressed a few years later by the same eminent judge, who had in the meantime become Lord Esher, though there was, as he observes in the following passage, a difference of judicial opinion on the subject.[2]

[1] *Pettingell* v. *Chelsea* (1894) 161 Mass. 368, 24 L. R. A. 426, 37 N. E. 380, where the court, on the authority of *Hill* v. *Boston* (1877) 122 Mass. 344, 23 Am. Rep. 332, held that a city is not liable to a lineman on its fire-signal system, for negligence in respect to the condition of a pole which breaks and injures him.

[1] *Gibbs* v. *Great Western R. Co.* (1884) L. R. 12 Q. B. Div. 208, 32 Week. Rep. 329.

[2] "There have always been, I think, two schools of thought in relation to cases of this kind,—that is to say, cases of injury happening to workmen while in the employment of their masters. The view of one school has been that, in order to prevent injustice to masters, the construction of these enactments relating to masters and workmen should be narrowed, and that they should be construed as strictly as possible. The view of the other school is that masters and workmen are not really on an equal footing; that if there is danger in the employment it does not exist with regard to the master, but only in the case of the workman; and the workman is not on an equal footing because he must run the risk or give up his employment. These two schools of thought may easily be traced in the cases on the subject of masters and workmen. When the subject was investigated before a committee of the House of Commons, before the act was passed, conflicting views were presented to the committee, one being that the then existing law of master and servant, with regard to the liabilities of the master, was a just and right law, the other being that the law on the subject had been laid down by the judges on wrong principles and was unfair to the workmen, and that it ought to be altered; and it was upon these conflicting views that this legislation took place. The title of the employers' liability act 1880, itself indicates that it was passed in favor of the workmen. Its object clearly was to alter the law in favor of the workmen and to extend the liabilities of masters. Since the passing of the statute it appears to me that the same conflict of views which existed previously has still been in operation. Some judges have construed the act as narrowly as possible, with a view to preventing what they conceived to be injustice to masters. Other judges have considered that the act, having been passed to extend the liabilities of masters in favor of workmen, ought to be construed liberally in favor of the workmen. I myself have always belonged to the latter school. I think that those who belonged to the former school have approached the enactment with too much timidity, and on the other hand, have been too bold in interfering with

In the United States a theory of construction has been applied which appears to be virtually the same as that which has been adopted by the English judges."

664. Concurrent rights of action under the statutes and at common law.—(Compare § 661, *supra*, and § 730, *infra*.) A servant is not precluded by the provisions of any of these statutes from recovering damages in a common-law action, if the circumstances are such as would have enabled him to maintain an action before it was passed.[1]

the verdicts of juries. I must say I thought it was well settled by the House of Lords that the verdicts of juries ought not to be interfered with, except upon the strongest grounds." *Walsh* v. *Whiteley* (1888) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38.

See also the language used by Wright, J., in *Brannigan* v. *Robinson* [1899] 1 Q. B. 344, 61 L. J. Q. B. N. S. 202, 66 L. T. N. S. 647, 56 J. P. 328.

[2] Thus the supreme court of Alabama has declared that, as the statute of that state is in derogation of the common law, the inference is that its terms clearly import the changes intended, and that their operation will not be enlarged by construction further than may be necessary to effectuate the nearest ends. But it goes on to say: "Notwithstanding, a narrow and restrictive view of the act should not be taken. In its construction the court should consider its objects, have regard to the intentions of the legislature, and take a broad view of its provisions, commensurate with the proposed purposes. The doctrine that prevailed prior to its passage had been carried to an extent which met with disfavor; and the tendency of the legislation has been, in many of the states, to abrogate as to particular corporations, or to modify as to all masters or employers, the rules which had governed their nonliability." *Mobile & B. R. Co.* v. *Holborn* (1887) 84 Ala. 133, 4 So. 146.

Similarly, one of the Federal courts of appeals, in discussing the Ohio act of April 2, 1890 (see chapter XXXVIII., *post*), has remarked that, although it is in derogation of the common law, it is "a remedial statute," and that, as it is of that nature, a servant "is entitled to invoke a construction that will give effect to the intention of the lawmaker." *Hornsby* v. *Eddy* (1893) 5 C. C. A. 560, 12 U. S. App. 404, 56 Fed. 461.

[1] In *Ryalls* v. *Mechanics Mills* (1889) 5 L. R. A. 667, 150 Mass. 190, 22 N. E. 766, Holmes, J., after saying that the court would not undertake to decide, until it was necessary, whether § 1, cl. 1, of the Massachusetts act had not an operation in excluding the defense of implied assumption of risk, when the defect, although manifest, was still properly attributable to the negligence of the master or of a person intrusted by him, nor whether the act would apply to cases in which, under the earlier decisions in that state, negligence in making small repairs, needed from day to day, might still be attributed to a fellow servant, proceeded thus: "If the act does apply to such cases, there is the stronger reason for saying that its only purpose is to extend the common-law liability to the previously excluded cases. And if the object is to make a rule which will reach extremes not touched by the common law, the fact that this is done by a new and broader rule, the terms of which necessarily are wide enough to include the narrower common-law principle, does not show an intention to prejudice rights which the statute was not needed to create. Whether or not an action could be maintained under the statute in a case where there is a common-law remedy, as assumed in a passage which we have quoted concerning the English act, we need not decide. If the facts warrant a recovery at common law, it is not likely that any plaintiff will wish to rely upon the statute, although, when it is uncertain how the facts will turn out, it may be necessary and proper to join a count on the statute with one on the common-law liability."

Clark v. *Merchants & M. Trans.* (1890) 151 Mass. 352, 24 N. E. [illegible]; *Colorado Mill. & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28.

A plaintiff who is required to elect between a common-law and a statutory count, and, as a consequence of electing

This rule of construction is of considerable importance in view of the requirements as to notice, etc., which must be complied with by a servant who wishes to avail himself of the right of action conferred by the statute on which he relies.

665. Liability of infants under the statutes.—So far as the present writer knows, there is no reported case which bears directly or indirectly upon the important question, whether an infant can be made responsible as an "employer" under these acts. Mr. Ruegg (Employers' Liability Act, p. 118) has expressed the opinion that the new responsibilities imposed by the English statute do not extend to an infant. The reason advanced by this learned author is that a suit to recover damages from him for the negligence of one of the agents specified in the act could not be maintained without recognizing the validity of the contract which defines the relations between him and that agent. His conclusion, therefore, is that the case falls within the scope of the general principle that an infant, although he is liable for his torts, cannot be sued for a wrong, where the cause of action is in substance *ex contractu*, or so directly connected with the contract that the action would be an indirect way of enforcing the contract.[1]

There would, however, seem to be good grounds for arguing that an agreement for the hire of another person to assist in carrying on a business belongs to the beneficial class, and is therefore binding upon the infant employer as long as the services continue to be performed.[2] If this be the correct doctrine he must, it would seem, be responsible for the nonperformance of any of the obligations which are either implied as incidents of the contract, irrespective of statute, or which are imposed by the legislature upon all those who enter into the contract.

C. Liability for defects in the ways, etc.

English act of 1880, § 1, subs. 1, § 2, subs. 1.
Alabama act: Code, § 2590, subs. 1.
Massachusetts act of 1887, § 1, subs. 1.

to stand on the latter, is nonsuited, cannot have the nonsuit set aside on the ground that he was prejudiced by being required to make such election, where the evidence shows that in a common-law action the defenses of common employment and assumption of risks would both have been open to the master. *May v. Whittier Mach. Co.* (1891) 154 Mass. 29, 27 N. E. 768.

A policy by which an assurance company agrees to indemnify an employer for "all sums which such employer shall become liable for, under or by virtue of the employers' liability act of 1880," does not render it liable for damages recovered in a common-law action, even though the circumstances were such that the employer might have been held liable under the act also. *Morrison v. Scottish Employers' Co.* (1888) 16 Sc. Sess. Cas. 4th series, 212.

[1] See Pollock, Torts, p. *74.

[2] See Pollock, Contr. p. *66.

Colorado act of 1893, § 1, subs. 1.

Indiana act: Rev Stat. 1894, § 7083, subs. 1.

Ontario act: Rev. Stat. 1897, § 3, subs. 1, § 6, subs. 1.

666. Effect of the statutory provisions as to defects; generally.— The effect of these provisions, as a whole, is to give, under the circumstances specified, a statutory sanction to a doctrine which, so far as the common law is concerned, has been greatly restricted in England and the English Colonies by the well-known case of *Wilson* v. *Merry*,[1] but which has been fully developed and is applied in all the American states—the doctrine, namely, that the master is absolutely responsible for the proper discharge of certain duties, whether he undertakes to perform them in person, or employs an agent to perform them in his stead. See chapter XXXI., *ante*. In other words, the injured servant is given a right to recover damages in the cases enumerated, although the abnormal conditions which caused his injury may have been created or suffered to continue through the negligence of a fellow servant.[2] Hence, in order to establish the allegations of a complaint framed on the theory that the master is liable under this section, it is not necessary to show that he was himself negligent.[3]

So far as regards the character of the actual physical conditions which warrant the inference of culpability on the part of the immediate actor, whether he be the master himself or an employee, the evidential prerequisites to establishing a right to indemnity are essentially the same under the statutes as at common law. See §§ 670–673, *infra*.

667. Master not liable unless defect alleged was the proximate cause of the injury.— Under the general principles of the law of negligence (see § 804, *post*), as well as by the express terms of the statutes, the injured servant cannot maintain an action unless he shows that the defect alleged was the proximate cause of his injury.[1] Thus, he cannot recover if his injuries are due to an occurrence which was a mere accident,[2] nor if the negligence of a fellow-servant in the use of the de-

[1] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. As to the precise effect of this decision, see §§ 529, 531, 568, 569, *ante*.

[2] See the remarks of the court in *Ashley* v. *Hart* (1888) 147 Mass. 573, 1 L. R. A. 355, 18 N. E. 416.

[3] *Lynch* v. *Allyn* (1893) 160 Mass. 248, 35 N. E. 550. There the action was for personal injuries occasioned to the plaintiff by the falling upon him of a bank of earth, which he was engaged in undermining by direction of the defendant's superintendent. Held, that the defendant was not entitled to a ruling that "the plaintiff cannot recover under the second count of his declaration, as there was no evidence that there was any negligence on the part of the defendant."

[1] *Southern R. Co.* v. *Guyton* (1898) 122 Ala. 231, 25 So. 34.

[2] *McManus* v. *Hay* (1882) 9 Sc. Sess. Cas. 4th series, 125.

A freight brakeman cannot recover for personal injuries alleged to have

fective appliance was the actual, efficient cause of the injury,[3] nor if the defect in question would not have caused any injury, if he had not himself been guilty of negligence in dealing with the defective appliance.[4]

But proof that a defect for the existence of which the master was responsible was the sole proximate cause of the injury is not a condition precedent to recovery. It is only requisite to show that it was one of the efficient causes.[5]

668. What instrumentalities are covered by the terms "ways," etc.—The words used to designate the instrumentalities for the defects of which the master is made responsible are not precisely the same in the statutes now under discussion. In all of them the terms "ways, works, and machinery" are found. But the expression "plant," which occurs in the English act, as well as in those of the various British colonies and of Alabama, is omitted in the statutes of Massachusetts and Colorado. The list of instrumentalities enumerated in the English act is enlarged in the Ontario act by the addition of the words "buildings and premises," and in the Indiana act by the addition of the word "tools." That these variations of phraseology imply corresponding differences in the total extent of the master's liability cannot be affirmed in view of the decisions as they stand, though possibly some case may hereafter arise in which they may be found material.

a. Two or more descriptive terms used in combination.—In the cases where the court in affirming or denying the defendant's liability has coupled together two or more of the instrumentalities specified in the statute under review, it is impossible to say with certainty to which

been caused by defects in a brake which he was trying to let loose, causing the brake to stick or be retarded in its revolutions, and throwing him from the top of a box car, in the absence of proof that the brake was defective, or that his falling was not due to his slipping or to some other cause wholly unconnected with any defect of the brake. *Louisville & N. R. Co.* v. *Binion* (1893) 98 Ala. 570, 14 So. 619.

In *Hamilton* v. *Grocsbeck* (1891) 18 Ont. App. 437, Affirming (1889) 19 Ont. Rep. 76, the court of appeal held the action not maintainable for the reason that the proximate cause of the injury was not the unguarded condition of the saw by which the plaintiff was hurt, but the fact that he tripped over a pile of staves.

[3] The fact that a defect existed and that the plaintiff had to be assigned to the work of remedying it is not the proximate cause of an injury received by him in consequence of a fellow servant negligently setting machinery in motion while plaintiff is engaged in the work. *Mackay* v. *Watson* (1897) 24 Sc. Sess. Cas. 4th series, 383.

[4] A defect in the machinery is not the cause of an injury received by a workman in consequence of his using it in an unsafe manner, when he knew how to use it with safety to himself. *Warton* v. *Connah's Quay Alkali Co.* (1885) 33 Week. Rep. 216, where the plaintiff knew that a car brake was bent and did not see that it was in its proper position before signaling to the engineer to move the car. See also *Mulligan* v. *M'Alpine* (1888) 15 Sc. Sess. Cas. 4th series, 780, as stated in § 673, note 4, *infra*.

[5] A plaintiff is entitled to retain a verdict in his favor where the jury find that the injury was caused by a defect

designation it was intended to refer the instrumentality which caused the injury.[1]

b. "Ways."—In its ordinary sense this term may be regarded as embracing any part of the master's premises over which the servants pass, on foot or otherwise, from one point to another.[2] To constitute a "way" within the purview of the act, it is not necessary that it should be marked out by metes and bounds or by habitual user.[3]

in the plant, and also by the negligence of a fellow servant. *Bean* v. *Harper* (1892) 18 Vict. L. Rep. (L.) 388. For common law cases to the same effect, see §§ 815, 816, *post*.

[1] A defect in the "ways, works, machinery, or plant," enumerated in the Alabama statute, has been held to exist where the supply pipe of a water tank extended over a railroad track so as to knock a brakeman off the top of a freight car. *East Tennessee, V. & G. R. Co.* v. *Thompson* (1891) 94 Ala. 636, 10 So. 280.

In an Alabama case it has been held that a rope used for lowering timber in the construction of a trestle along a railroad track, by means of which heavy timbers are put into their places, is in no sense a part of the ways, works, machinery, or plant of a railroad company. *Southern R. Co.* v. *Moore* (1901) 128 Ala. 434, 29 So. 659. The court seems to have assumed that the authority of the two cases cited in subs. *d, infra*, declaring such an appliance not to be "machinery," was conclusive against the right of the servant to maintain the action. But there is no apparent reason why the rope in question should not be regarded as a part of the "plant."

The shorter formula "ways, works, and machinery," which occurs in the Massachusetts statute, has been construed in several cases. It includes a truck used by a railroad company as a part of the appliances of the repair shop, consisting of axles, wheels, and a frame, all fastened together and fitted to the tracks. *Gunn* v. *New York, N. H. & H. R. Co.* (1898) 171 Mass. 417, 50 N. E. 1031.

A temporary staging erected by the side of a woodpile, to enable the workmen to place wood thereon and pile it higher, and which is taken down and put up from time to time in different places, and intended to be used from four days to a week at a time in each place, is a part of the owner's ways, works, and machinery while in use at a particular place. *Premlible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675 (held to be competent for the jury to find this).

A temporary derrick at a stone yard, erected to move stones from cars to where stonecutters, who had nothing to do with setting it up, could use them, is a part of the "ways, works, and machinery" connected with the yard. *McMahon* v. *McHale* (1899) 174 Mass. 320, 54 N. E. 854 (considered to be a part of the fitting of the stone yard rather than an appliance to be put together and set up and moved from place to place by the workmen who were using it. See § 676, *infra*).

Loaded freight cars received from other lines form a part of the "works and machinery" of the receiving company. *Bowers* v. *Connecticut River R. Co.* (1894) 162 Mass. 312, 38 N. E. 508.

[2] "The course which a workman would in ordinary circumstances take in order to go from one part of a shop where a part of the business is done, to another part where business is done, when the business of the employer requires him to do so, must be regarded as a 'way.'" *Willetts* v. *Watt* (C. A.) [1892] 2 Q. B. 92, 61 L. J. Q. B. N. S. 540, per Lord Esher. Compare the statement that the word applies to such places as a workman or servant is called upon to pass over in the performance of his duty. *Caldwell* v. *Mills* (1893) 24 Ont. Rep. 462, holding that a plank put down to serve as a fulcrum for a lever, if it is placed in such a position that servants have to pass over it in the course of their duties, is a "way." For specific instances of "defects" in what were conceded to be "ways," see § 671, subd. (a), *infra*.

This word does not cover a pile of boards. *Campbell* v. *Dearborn* (1900) 175 Mass. 183, 55 N. E. 1042.

[3] In *Willetts* v. *Watt* (C. A.) [1892] 2 Q. B. Div. 92, 61 L. J. Q. B. N. S. 540, Fry, L. J., said (p. 99): "In de

In a more technical sense the term signifies a path or track, which is specially constructed for the purpose of drawing or propelling with greater facility certain kinds of appliances which are used, and certain kinds of substances or manufactured articles which are handled, by the servants in the course of their work.[4]

The "ways" with which the cases deal are usually horizontal or sloping. But presumably the term also covers such instrumentalities as the vertical shaft of a mine or of an elevator.[5]

c. "*Works.*"—In one well-known case this word seems to be regarded as connotative of the same idea as "system."[6] For other cases indicative of its significance, see § 669, subds. *b*, *c*, *infra*.

d. "*Machinery.*"—The term "machine" has been defined as "every mechanical device or combination of mechanical powers and devices to perform some function, and produce a certain effect or result."[7] Nor

terminlng what is a 'way,' we should, I think, look to the fact that workmen have to go through places where sometimes there is an open space, while at other times what was an open space is covered with stores or other things used in the business. We should consider, further, the case of an open yard, where the whole or only a small part might be used at any time, according as there were a great many or only a few workmen going through it. I think that these and other considerations show that we should answer in the negative the question whether metes and bounds are necessary to a 'way' under the statute. There are many ways which persons have a right to use that are not defined by any physical boundary, and to hold that such a boundary is necessary would be to withdraw from the protection given by the statute a large number of places used by workmen in which the mischief at which the statute was aimed might arise. For the purpose of this case, I should say that wherever there is a large space connected with or used in the business of the employer, over which the workmen pass in the course of their employment, when that space is for the time being vacant, and is so used, it is a 'way' within the meaning of the statute."

[4] The most familiar instance of such a way is a railway track. See *Kansas City M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88; *Louisville & N. R. Co.* v. *Bouldin* (1895) 110 Ala. 185, 20 So. 325; *McQuade* v. *Dixon* (1887) 14 Sc. Sess. Cas. 4th series, 1039.

A roadway of iron plates, along which loads are conveyed in a car, was held to be a way in *McGiffin* v. *Palmers Shipbuilding & Iron Co.* (1882) L. R. 10 Q. B. Div. 5, 52 L. J. Q. B. N. S. 25, 47 L. T. N. S. 346, 31 Week. Rep. 118, 47 J. P. 70. Doubtless the term would also be held to include the ways in a shipbuilding yard or the skids used for the transfer of heavy articles, such as logs, barrels, etc., or the posts between which the hammer of a pile-driver moves up and down.

[5] In *Pegram* v. *Dixon* (1886) 55 L. J. Q. B. N. S. 447, 54 J. P. 198, it was apparently assumed that a lift-well in a building under construction becomes a "way" when workmen place ladders in it for the purpose of obtaining access to the upper floors.

[6] *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 167, 55 J. P. 660, 40 Week. Rep. 392. There Lord Watson, in commenting on the finding of the jury that the manner in which the apparatus in question was used betokened negligence, first referred to the method adopted as being a "defective system" (p. 353), and in a later passage of his opinion (p. 354) remarked that the evidence brought the case within the operation of the rule that a dangerous arrangement of machinery and tackle constitutes a "defect" in the condition of the works.

[7] *Corning* v. *Burden* (1853) 15 How. 267, 14 L. ed. 690 (patent case).

Such a definition obviously excludes such an appliance as a hammer, disconnected from other mechanical appliances and operated only by muscular strength. *Georgia P. R. Co.* v. *Brooks* (1887) 84

does this word include a steel bar used to align the track on a railway bridge.[8]

For specific examples of appliances viewed as "machinery," the point actually involved being whether there was a "defect," see § 671, subd. b, *infra*.

c. "Plant."—(See also under § 669, *infra*.) This term includes "whatever apparatus is used by a business man for carrying on his business—not his stock in trade which he buys or makes for sale, but all goods and chattels, fixed or movable, live or dead, which he keeps for permanent employment in his business."[9] For examples of defective instrumentalities assumed to come within this definition, see § 671, subd. d, *infra*.

669. Significance of the qualifying phrase, "connected with or used in the business of" the employer.—*a. Instrumentalities temporarily used by the defendant's servants in the transaction of his business.*—The mere fact that the defendant did not own the defective instrumentality which caused the injury will not protect him if, as a matter of fact, it was being used in his business at the time of the accident.[1] Whether there was such use within the meaning of the statutes is determined with reference to various considerations.

Ala. 138, 4 So. 239 (scale flying from an iron rail when struck by a hammer wielded by a fellow servant injured plaintiff). It would seem that, if the rail was in such a condition as to render such an accident probable, the defendant should have been held liable as for a defect in the "plant" or in the "works."

[8] *Clements* v. *Alabama G. S. R. Co.* (1900) 127 Ala. 166, 28 So. 643. The reason assigned was that the bar was "disconnected from any other mechanical appliances, and operated by muscular strength directly applied." Apparently the action might have been maintained both in this case and the other Alabama decision cited in note 7, *supra*, if the pleader had alleged the existence of defects in the "plant."

[9] *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647, 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 281, per Lord Esher, who thus disposed of the contention that a horse was not a part of the "plant:" "It is suggested that nothing that is animate can be plant; that is, that living creatures can in no sense be considered plant. Why not? In many businesses, horses and carts, wagons, or drays, seem to me to form the most material part of the plant. They are the materials or instruments which the employer must use for the purpose of carrying on his business, and without which he could not carry it on at all. The principal part of the business of a wharfinger is conveying goods from the wharf to the houses or shops or warehouses of the consignees; and for this purpose he must use horses and carts or wagons. They are all necessary for carrying on of the business. It cannot for a moment be contended that the carts and wagons are not 'plant.' Can it be said that the horses, without which the carts and wagons would be useless, are not?"

To same effect, see *Haston* v. *Edinburgh Tramway Co.* (1887) 14 Sc. Sess. Cas. 4th series, 621; *Fraser* v. *Hood* (1897) 15 Sc. Sess. Cas. 4th series, 178.

[1] *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128; *Engel* v. *New York, P. & B. R. Co.* (1893) 160 Mass. 260, 22 L. R. A. 283, 35 N. E. 547; *Louisville & N. R. Co.* v. *Davis* (1899) 91 Ala. 487, 8 So. 552; *Trask* v. *Old Colony R. Co.* (1892) 156 Mass. 298, 31 N. E. 6.

In some cases the essential question is whether or not he himself or his agent had, at the time when the injury was received, adopted the instrumentality as a part of the plant by means of which the plaintiff was expected to perform his duties. If such adoption is shown, he is considered to have assumed, as regards this temporary addition to his plant, a liability which, it would seem, is of precisely the same character and extent as that to which he is subject as regards his own property.[2] Manifestly, no adoption within the meaning of this doctrine can be inferred, where the plaintiff or his fellow workmen took and made use of the defective instrumentality without any authority, either express or implied, from the employer himself or his agent. Under such circumstances no liability can be predicated from the fact that there was a defect, and that a proper inspection would have disclosed it.[3]

The rationale of other decisions is that the words of the provision now under discussion imply that "the defect must be one which the employer has a right to remedy if he does discover it, and of a kind which it is possible to charge a servant with the duty of setting right."[4] A corollary of this doctrine is that, unless there is something

[2] Lack of ventilation of the hold of a vessel belonging to a navigation company, in which coal is shipped by contractors to supply coal to a railway at another port where such contractors have to unload the coal, in consequence of which one of their employees is injured by an explosion of gas accumulating in the hold, is a defect in the plant of such contractors. *Carter* v. *Clarke* (1898) 78 L. T. N. S. 76.

It has been laid down, without qualification, that a defect in a cart hired temporarily to carry a load is not a defect in the plant. *Allmarch* v. *Walker* (1885; Q. B. D.) 78 L. T. Journ. 391. But this ruling seems to be inconsistent with the one last cited, and to be unjustifiable on general principles. The report is so meager that it is impossible to say precisely what the standpoint of the court may have been.

[3] A verdict for the plaintiff has been set aside where the injury was caused by the giving way of a ladder which the workmen themselves had taken and used simply because they found it lying on the premises where they were sent to work, and which had not been borrowed, so as to become a part of the plant, by any person having authority to make it a part of such plant. *Jones* v. *Burford* (1884; Q. B. D.) 1 Times L. R. 137.

A complaint of which the gravamen is that the plant was defective is not sustained by evidence showing that the plaintiff, a painter in the employ of a firm of contractors doing work on a government building, asked his foreman for a ladder; that, being referred by the foreman to the government official in charge of the work, he was told he might have a ladder belonging to the government; and that the ladder which he thus obtained leave to use was so defective that it broke under him. *Perry* v. *Brass* (1889; Q. B. D.) . Times L. R. 253. The court relied mainly on the fact that the ladder did not belong to the defendants, but Denman, J., also laid stress on the fact that their foreman knew nothing about it. The correctness of this decision under the particular facts in evidence seems somewhat dubious, as it may fairly be argued that the permission of a foreman to use whatever appliance a designated person may supply should have the effect of making the appliance actually selected a part of the plant.

[4] *Engel* v. *New York, P. & B. R. Co.* (1893) 160 Mass. 260, 22 L. R. A. 283, 35 N. E. 547, holding that a railroad track owned, maintained, and repaired by a manufacturing company, and used by a railroad company only under a

to put him on inquiry, a master is not under any active duty of inspection with regard to an instrumentality not under his control.[5]

license or invitation to deliver freight under a contract, is not a part of the railroad company's "ways." In delivering the opinion of the majority of the court, Holmes, J., said: "We think that neither the language of the statute nor good sense would permit us to hold an employer liable under the act for defects which he cannot help, in a place out of his control, to which his employees once in a while may be called for a few minutes."

A railroad company that only goes upon the track of another under a license to take cars therefrom, and which has no control over it, is not liable for an injury to an employee caused by its defective character. *Trask* v. *Old Colony R. Co.* (1892) 156 Mass. 298, 31 N. E. 6.

An employee of a gas company hired to remove gas pipe from a trench dug by authority of the city has no right to expect his employer to shore the sides of the trench or make it safer than it was, for he must be taken to know that his employer had no control over it. *Hughes* v. *Malden & M. Gaslight Co.* (1897) 168 Mass. 395, 47 N. E. 125.

The location of the tracks of a street car company being determined by the municipal authorities, it cannot be charged with failure to provide a safe place for its conductor, for the reason that there is a tree close to the side of the car, unless it is shown that the company had a right to remove the tree. *Hall* v. *Wakefield & S. Street R. Co.* (1901) 178 Mass. 98, 59 N. E. 668.

The want of a fence at the top of a declivity at one side of a public street used by the employer as an approach to his place of business is not a defect for which he can be held liable. *Stride* v. *Diamond Glass Co.* (1895) 26 Ont. Rep. 270 (Following *Engel* v. *New York, P. & B. R. Co.* [1893] 160 Mass. 260, 22 L. R. A. 283, 35 N. E. 547). Discussing the question whether the defective condition of a public street which was used by the employer in connection with his business was a defect in a "way used in the business," within the meaning of the Ontario employers' liability act, § 3, subs. 1, Boyd, C., said: "Light is thrown upon the scope of these words by § 6, subs. 1, which provides that the workman shall not be able to recover unless the defect arose from, or had not been remedied owing to the negligence of, the employer. That means some defect on his premises, or on a place over which he had control, that could be made right by the employer. Such is not the case in regard to a public street upon which the employer had no right to construct a fence or barrier as is here suggested. One part of the street is higher than the other, but it is the business of the corporation of the city to deal with the alleged defect in the interests of the public, or be exposed to action by injured persons."

A coal master is not liable to a servant for injuries caused by defects in wagons sent by a railway company to be loaded with coal for carriage, and left at the pit in charge of his servants. Such wagons are not a part of the coal master's plant, and even if they are, he is not, under such circumstances, under the duty of inspecting them before allowing the servants to use them. *Robinson* v. *Watson* (1892) 20 Sc. Sess. Cas. 4th series 144.

An auctioneer selling goods on the premises of a stranger is not responsible to his servants for the sufficiency of the appliances for bringing forward and removing the goods which are to be sold. *Nelson* v. *Scott* (1892) 19 Sc. Sess. Cas. 4th series, 425.

[5] The failure of a gas company to ask how long a trench dug by the city has been dug, and to tell its employee the length of time, before sending such employee into same to remove gas pipe therefrom, does not render it liable for an injury the employee caused by the caving-in the trench. *Hughes* v. *Malden & M. Gaslight Co.* (1897) 168 Mass. 395, 47 N. E. 125. "He," said the court, "had a right to expect that, if the defendant knew of any danger which the plaintiff did not know and ought not to be assumed to know, it would inform him. But no such knowledge on the part of the defendant was shown. It does not appear to have known anything except what was visible to the eye, or to have been able or bound to infer from what was visible anything which the plaintiff with his experience was not equally able to infer. What more could it have done? There is no reason to suppose that inspection would have disclosed anything beyond the visi

The cases involving the liability of a railway company for defects in a car received from another road have been made to turn upon the question whether they were loaded or empty. Loaded cars, it is said, form a part of the works and machinery of the receiving company, inasmuch as it is not bound to use them in its train if, on inspection, they are found to be unsafe.[6] But an isolated empty car on its way to be returned to its owner is a part of the ways, works, or machinery connected with or used in the business of a railroad company which received it loaded.[7] It is, however, not apparent why the right of rejection which undoubtedly exists in this instance as well as in the former should not create a similar obligation. The distinction taken and its rationale are, it is submitted, unsatisfactory. In Massachusetts it is no longer of importance since § 1 of the act was amended, as shown in § 656, *supra*.

In one case the principle is applied that a "defect" within the meaning of these statutes exists, where the physical conditions resulting from a use to which the servant's employer permits a stranger to put his premises are of such a nature that negligence would have been a warrantable inference if they had been created by the act of the employer himself or his agent.[8]

ble facts, and therefore it is not necessary to consider whether the duty of inspection existing with regard to cars received from connecting lines to be forwarded on a railroad would be held to exist in such a case as this."

In the absence of any allegation of particular circumstances which would impose the duty of inspecting the fittings of a ship in which a stevedore or other person has contracted to do work, defendant's servant cannot maintain an action against him for an injury caused by defects in these fittings. *Simpson* v. *Paton* (1896) 23 Sc. Sess. Cas. 4th series, 590.

In *McLachlan* v. *S. S. Pevcrel Co* (1896) 23 Sc. Sess. Cas. 4th series, 753, a complaint based on existence of duty to inspect was held to be demurrable. Lord Young dissented on the ground that the stevedore was not wholly exempt from the duty of supervision, and declined to assent to the proposition that there would be no liability if things are wrong, and by proper supervision without requiring anything out of the way on his part, he would have discovered that they were in that condition. See also *Robinson* v. *Watson* (1892) 20 Sc. Sess. Cas. 4th series, 144, as stated in note 4, *supra*.

[6] *Bowers* v. *Connecticut River R. Co* (1894) 162 Mass. 312, 38 N. E. 508 settling this point, which was left undecided in the next case cited.

[7] In *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128, the court said: "By the terms 'ways, works, or machinery connected with or used in the business of the employer,' we understand something in the place, or means, appliances, or instrumentalities provided by the employer for doing or carrying on the work which is to be done. The use of other words may not make the meaning clearer, but it would seem that there must be a defect in something which can in some sense be said to be provided by the employer."

[8] *New York, N. H. & H. R. Co.* v. *O'Leary* (1899) 35 C. C. A. 562, 93 Fed. 737, where a railway company which permitted a guy to be stretched by a third person across its tracks, at a point where the volume of business required great diligence and care as to the condition of the track, was held liable for an injury to an employee, caused by failure to see that the guy was placed at a particular height to avoid such injury. (The statute construed was that of Massachusetts.)

As the decisions holding a master not to be liable for an injury due to a defect in an instrumentality belonging to another person may be regarded as being in their essence merely declarations that the wrong party was being sued, there would, at first sight, seem to be no serious practical objection to such an application of the general principle that responsibility is a juridical incident of the power of control, and does not exist apart from such power. But the extremely nebulous condition of the law defining the nature and extent of a stranger's liability to the servants of one with whom he has business relations, involving the use of, or contact with, his property,[9] renders it wholly unwarrantable to assume that, in all the cases in which the defendant will be absolved for the reason that he had no control over the defective instrumentality, the plaintiff will be able to maintain an action against the actual owner of that instrumentality. It is manifest, therefore, that the employment of this test to determine the applicability of these statutes will sometimes result in leaving the injured servant entirely remediless. Under these circumstances, the doctrine that the possession or nonpossession of the power of control is the main differentiating factor in cases in which the existence or absence of authority to use the defective instrumentality is not involved, as one of the determinant elements, deserves to be somewhat closely scrutinized.

It is submitted that the clause in question may, upon a perfectly reasonable construction, be made to comprehend instrumentalities over which the employer has no control. The opposite contention would doubtless be irresistible if the failure to "remedy" defects were mentioned as the sole ground of liability. But the declaration of an alternative liability for the negligent failure to "discover" defects seems to be hardly susceptible of any other interpretation than that it was intended to extend the employer's responsibility beyond the cases in which the right to apply a remedy may be predicated. Such a declaration may fairly be regarded as a recognition of the principle that the application of a remedy is neither the only duty which the law implies, nor the only method by which the master can free himself from the imputation of negligence. On the one hand, where it is in his power to apply a remedy to the defect thus actually or constructively known to him, it may conceivably be, and in fact frequently is, his duty to warn his servants as to the existence of the defect, or to discontinue the use of the defective instrumentality until it has been restored to a safe condition. On the other hand, where it is not in his power to apply a

[9] See the article contributed by the present writer to the Law Quarterly Review (vol. XVI., pp. 168 *et seq.*), and the Canada Law Journal (vol. XXXVI., pp. 178 *et seq.*), and his note published in 46 L. R. A. pp. 33 *et seq.*

remedy, the duties of warning or discontinuance become imperative, and by performing them he fully discharges his obligations to his servants. It is clear, therefore, that there are certain obligations to which he may be subject in respect to instrumentalities which are out of his control, and that the negligence which consists in the failure to discover a defect cannot be dissociated from the negligence which consists in the breach of those obligations, for the reason that they arise as soon as the defect is known, and that it is presumed to be known wherever it would have been known if due care had been exercised. It is submitted, therefore, that the balance of probability is in favor of the inference that the Legislature intended to create a responsibility for injuries due to instrumentalities not controlled by the master, provided they are "connected with his business," and that, upon the true construction of the statute, the absence of the power of control merely affects the extent of that responsibility.[10]

The Ontario case in which the master was held not to be liable under the statute for the want of a fence on a public street which was used

[10] Some of the unsatisfactory consequences of the doctrine that the statute does not apply to cases where there is no power of control are pointed out in the dissenting opinion of Knowlton, J., in *Engel* v. *New York, P. & B. R. Co.* (1893) 160 Mass. 260, 22 L. R. A. 283, 35 N. E. 547: "The employee finds a track of this kind, used like other side tracks belonging to the corporation, adapted to the convenient transaction of its freighting business. Ordinarily he has no means of knowing whether the track is owned and maintained by the railroad corporation or by the manufacturer whose freight is brought over it. All he can see or know is that it is connected with and used in the business of the corporation in delivering freight. Whether an additional price is paid for the transportation of its cars or of the cars of other railroads over that track, he does not know, nor is it important for him to know. It is a place specially fitted for the work of his employer, on which his employer sets him at work, and in which the employer presumably has rights for the time being. It ought to make no difference under the statute how the employer procures the ways, works, or machinery connected with and used in his business, or by what kind of title he holds them. So long as they are connected with his business and used in it, it is his duty to have them safe, so that his employees may not be unnecessarily exposed to danger. If another owns and furnishes them, and agrees to keep them safe, it is his duty, as between him and his employee, to see that the owner properly does what he agrees to do. It is a general rule of the common law that a railroad corporation is liable for an injury to a passenger, or for loss of freight arising from a defect in a track of another corporation over which it runs its cars, as if it owned the track. As between the two corporations, the only duty to maintain the track in repair under their contract may be upon the owner of the road: but as between the first mentioned corporation and a passenger or owner of freight, it is the duty of the carrier to have the track safe, whether it owns it or hires it. . . . The duty of a railroad corporation to furnish for its employees safe tracks, cars, locomotive engines, and other machinery, tools, and appliances with which its business is to be carried on, is similar in kind to its duty to passengers in these respects, although the degree of care required is less. In either case, its duty is the same when the tracks, cars, and engines are hired, or used under a license from others as when they are owned by the employer. . . . The doctrine contended for by the defendant, as I understand it, comes to this,—if a manufacturer, instead of owning the ways, works, and machinery necessary

as an approach to the master's place of business[11] seems to have been improperly referred to the analogy of the other cases cited in this section. The true ground upon which a servant is precluded from maintaining an action against his master under the circumstances there in evidence is that which was alluded to in the opinion, *viz.*, so far as regards his right of recovery for injuries which are due simply to the manner in which streets are laid out, graded, and protected, he is in the same position as any other member of the public. His remedy, if any, must be sought from the municipal body which is responsible for the creation and continuance of those conditions.

b. Structures, etc., in course of erection or demolition.—According to the most recent of the English authorities, these statutes should be so construed as to enable a servant of a contractor to recover for injuries due to the abnormally dangerous conditions of the building itself which is in course of erection or demolition by that contractor himself. The broad principle relied upon was that premises which are in the possession of a person for the purposes of his business are to be regarded as the "works" of such person so long as he is carrying on his business there.[12] The contention that the case of *Howe* v. *Finch* (see following subsection) was a controlling precedent against the plaintiff was easily disposed of on the ground that the employer who was sued there was the owner, not the builder of the premises. But, singularly enough, no reference was made to the cases cited in

to be used in his business, arranges with another person who owns a manufacturing establishment to furnish it for his use and to keep it constantly in good condition, and if one of his employees is instantly killed by a defect negligently suffered to be in the ways, works, or machinery which he is using under this arrangement, he will not be liable under the statute, because the ways, works, and machinery are not his. The owner will not be liable under the statute for he is a stranger to the manufacturing business carried on there, and the person killed is not his employee. Neither the employer nor the owner of the establishment will be liable at the common law, for the common law permits no recovery for a death resulting from negligence. The widow and children of the deceased employee will therefore be left remediless. It seems to me that such a construction of the statute tends to defeat the purpose of the legislature."

[11] See note 4, *supra*.

[12] *Brannigan* v. *Robinson* [1892] 1 Q. B. 344, 61 L. J. Q. B. N. S. 202, 66 L. T. N. S. 647, 56 J. P. 328 (house was being pulled down). The doctrine of this case is in harmony with two other English decisions, though this particular point was not directly raised. In *Moore* v. *Gimson* (1889) 58 L. J. Q. B. N. S. 169, an insecure wall left standing on premises where there had been a fire seems to be regarded as a part of the works of a party who took a contract for the reinstatement of the building destroyed. The case was decided against the plaintiff on the ground that there was no knowledge, actual or constructive, of the conditions. Compare *Booker* v. *Higgs* (1887) 3 Times L. R. 618, where a wall fell on the servant of a person who, as incident to certain work on the premises, was making a hole through it.

It has been held in Ontario that a railway used by contractors engaged in constructing an extension of the line is a part of their plant while the work is going on. *Rombough* v. *Balch* (1900) 27 Ont. App. Rep. 32.

the subjoined note, which are not distinguishable on this ground, and are directly opposed to the conclusion arrived at. The conflict of authority thus disclosed can now be adjusted in England only by a decision of the court of appeal.[13]

In Massachusetts the servant's right to maintain an action under such circumstances has been uniformly denied.[14]

c. Instrumentalities not yet brought into use, or disused.—The

[13] In one case it was held that no action lay for an injury caused by the negligence of a coservant in throwing rubbish down a lift-well of a building under construction, through which, by means of ladders, the workmen were obliged to get access to the upper floors, this result not being affected by the fact that the master had not taken precautions to prevent such accident by warning the workmen to cease throwing things down, when it became necessary to use the well as a passage for the workmen. *Pegram* v. *Dixon* (1886) 55 L. J. Q. B. N. S. 447, 51 J. P. 198, Reversing 2 Times L. R. 603.

In another, a contractor was held not to be liable for maintaining an unusually large well-hole in the staircase of a building under construction, through which a brick fell on the plaintiff from an upper story. *Conway* v. *Clemence* (1885; Q. B. D.) 2 Times L. R. 80.

In another, a contractor for the brickwork of an unfinished house was held not liable for injuries caused by the collapse of a staircase erected shortly before by another contractor as the permanent staircase of the house, as he was entitled to rely on the sufficiency of the structure without examination. *McInulty* v. *Primrose* (1897) 24 Sc. Sess. Cas. 4th series, 442.

[14] It is held that contractors by setting a servant to work on the premises of a third person where there are movable steps leading into a cellar, going down which the servant was injured, cannot be said to adopt the steps as a way used in their business. *Regan* v. *Donoran* (1893) 159 Mass. 1, 33 N. E. 702 (injury was caused by the steps falling).

A servant of a contractor engaged in grading the land of a third person cannot recover on the theory that the liability of a bank of earth to fall, when undermined, unless it is properly shored up, is a "defect" within the statute, the descriptive words being applicable to "ways, etc., of a permanent character, such as are connected with or used in an employer's business." *Lynch* v. *Allyn* (1893) 160 Mass. 248, 35 N. E. 550.

A building in process of construction is not "ways, works, or machinery connected with or used in the business" of a subcontractor helping to build it, so as to render a hole cut in the floor by another subcontractor a defect in "ways, works, and machinery." *Beique* v. *Hosmer* (1897) 169 Mass. 541, 48 N. E. 338.

A plumber is not liable to an employee injured by the fall of ladders and stagings leading from one floor to another of a building in process of construction, where he neither constructed, managed, nor controlled such ladders and stagings. *Adey* v. *Tucker* (1901) 179 Mass. 190, 60 N. E. 484.

In *Lynch* v. *Allyn* (1893) 160 Mass. 248, 35 N. E. 550, the court remarked that there is a conflict between *Brannigan* v. *Robinson* [1892] 1 Q. B. 344, 61 L. J. Q. B. N. S. 202, 66 L. T. N. S. 647, 56 J. P. 328, and *Howe* v. *Finch* (1886) L. R. 17 Q. B. Div. 187, 34 Week. Rep. 593, 51 J. P. 276. But this is not necessarily so. It is quite possible, without any inconsistency, to take the view that a wall is a part of the works of the person who has it under his control for the purpose of erecting it, and at the same time not a portion of the works of the person who intends to use it in his business when it is completed. It would be going too far to say that an instrumentality can never be a part of the works of two separate employers at the same time, but the mere statement of the situation presented by cases of this type shows that the user by the owner of the structure and the user by the contractor for its erection are successive, and mutually exclusive. It is, therefore, possible, to say the least, that the legal quality of the structure may be different according as regard be had to the servants of the owner or to the servants of the contractor.

words of the statute are declared to be applicable only to ways, etc., which are "existing and completed," and not to those which are partly finished, and not yet used for the purposes of the employer's business.[15] On the analogy of the case which established this doctrine it was subsequently held by the King's bench division that no action lies for an injury caused by a defect in a machine which had at the time of the accident been discarded, as unfit for use, and was then being removed from the premises.[16] This decision, however, was reversed by the court of appeal on the ground that there was evidence from which it was warrantable for a judge sitting as a jury to draw the inference that the machine was connected with the defendant's business when the accident occurred.[17] It is manifest that this ruling throws considerable doubt upon the correctness of many of the cases cited in the last two subsections.

670. What constitutes a defect.—Wherever an instrumentality is "not in a proper condition for the purpose for which it was applied," there is a "defect" in its condition within the meaning of the act.[1] If the whole arrangement of a machine is defective for the purpose for which it is applied, there is a defect so as to bring it within the act, although each part may be sufficient.[2] It follows, therefore, that,

[15] *Howe* v. *Finch* (1886) L. R. 17 Q. B. Div. 187, 34 Week. Rep. 593, 51 J. P. 276 (where a wall in course of erection fell on a plumber in the defendant's employ).

[16] *Thompson* v. *City Glass Bottle Co.* [1901] 2 K. B. 483, 17 Times L. R. 594 (a portion of the machine fell on the plaintiff).

[17] *Thompson* v. *City Glass Bottle Co.* [1902] 1 K. B. 233, [1901] Weekly Notes, 228.

[1] Lord Coleridge in *Heske* v. *Samuelson* (1883) L. R. 12 Q. B. Div. 30, 53 L. J. Q. B. N. S. 45, 49 L. T. N. S. 474 (approved in *Cripps* v. *Judge* [1884; C. A.] L. R. 13 Q. B. Div. 583, 53 L. J. Q. B. N. S. 517, 51 L. T. N. S. 182, 33 Week. Rep. 35, 49 J. P. 100).

Lindley, L. J., in *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647, said: "I take 'defect' to include anything which renders the plant, etc., unfit for the use for which it is intended, when used in a reasonable way and with reasonable care."

The word "defect" implies an imperfect, a deficiency in something essential to the proper use of the apparatus for the purpose for which it is to be used. *Hamilton* v. *Grousbeck* (1890) 19 Ont. Rep. 73.

Compare also the passage from the majority opinion in *Walsh* v. *Whiteley* (1888; C. A.) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38, as quoted in § 672 note 1, *infra*.

"A defect in the condition of the way, or works, or machinery, or plant . . . means, I should be inclined to say, such a state of things that the power and quality of the subject to which the word 'condition' is applied are for the time being altered in such a manner as to interfere with their use. For instance, if the way is made to be muddy by water, or if it is made slippery by ice, in either of these cases I should say that the way itself is not defective, but the condition of the way, by reason of the water which is incorporated with it, or from its being in a freezing state, is affected." Per Stephen, J., in *McGiffin* v. *Palmer's Shipbuilding & Iron Co.* (1882) L. R. 10 Q. B. Div. 5, 52 L. J. Q. B. N. S. 25, 47 L. T. N. S. 346, 31 Week. Rep. 118, 47 J. P. 70.

[2] *Cripps* v. *Judge* (1884; C. A.) L. R. 13 Q. B. Div. 583, 53 L. J. Q. B. N. S. 517, 51 L. T. N. S. 182, 33 Week. Rep. 35, 49 J. P. 100, per Brett, M. R.

whenever there is such unsuitableness for the work intended to be done and actually done, the liability contemplated by the statute arises, although the appliance is perfect of its kind and in good repair and suitable for other kinds of work. In such a case the employer is in fault because he has furnished appliances for a use for which they are unsuitable and in effect in so ordering and carrying on his work that, without fault on the part of an ordinary workman, the natural consequences will be that the appliance will be used for purposes for which it is unsuitable.[3]

A defect importing negligence on the master's part may properly be found to exist where the appliance in question was so constructed or arranged that it was likely to cause undue hazard to a person exercising that degree of care which might be expected, whether regard be had to the special circumstances under which the appliance was to be put into operation,[4] or to the age, skill, and experience of the particular employee who was to operate it.[5]

The fact that the instrumentality which caused the injury was less safe than one which was used by a large proportion, or by the majority, of other employers in the same business, is probably regarded by all courts as an element which entitles the servant to go to the jury on the

The words "defect in the arrangement" (used only in the acts of Ontario, Manitoba, and British Columbia) mean the element of danger arising from the position and collocation of machinery in itself perfectly sound and well fitted for the purpose for which it is to be used. *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117, per Osler, J. A. (p. 121).

In one case it was intimated, but not definitely determined, that appliances may be defective in respect to adaptability, as well as for inherent flaws. *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586.

[3] *Geloneck* v. *Dean Steam Pump Co.* (1896) 165 Mass. 202, 43 N. E. 85.

Whether an appliance was properly constructed in reference to the use for which it was intended is usually a question for the jury. *Prendible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675.

[4] A sliding door intended to be closed in case of fire is defective unless it can be manipulated with reasonable safety by persons who would naturally be acting as hurriedly as would be the case under such circumstances. *Johnson* v. *Mitchell* (1885; Sc. Sess. Cas.) 22 Sc. L. R. 698.

[5] This seems to be the actual scope which should be ascribed to the decision in *Morgan* v. *Hutchins* (1890; C. A.) 59 L. J. Q. B. N. S. 197, 38 Week. Rep. 412, in order to prevent its clashing with *Walsh* v. *Whiteley* (1888; C. A.) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38, § 672, note 1, *infra*, to which, according to the statement of the court, there was no intention of running counter. A child was held entitled to maintain an action for an injury caused by uncovered machinery. The broad ground was taken that the statute applies where a machine is "defective with regard to the safety of the workmen," even though it is effective for the purpose for which it is used. The master of the rolls, who, since the decision in *Walsh* v. *Whiteley*, had been created Lord Esher said: "The argument in the present case is that there is no defect in machinery if the machine in question is in itself a proper one for the work it is to perform. It must be carried to this length, that if the machine contains a secret defect which causes danger to the workman, but which does not affect the purposes for which it is to be used, then this is not a defect within the meaning of the act. Now, this leather-pressing

question whether it was defective.[6] (As to the effect of evidence that the employer had satisfied the standard fixed by common usage, see § 672, *infra*.)

In Ontario it is held that the effect of the provisions in the factories acts, by which the failure to take certain specified precautions is made a penal offense, is that, although an injury due to noncompliance with one of these provisions does not constitute a cause of action under the statute itself, such noncompliance is evidence which it is competent to consider as tending to show negligence on the defendant's part, in an action brought under the workmen's compensation act.[7] Considering the extreme improbability that any jury will absolve an employer who has been guilty of a breach of the statute, it is manifest that, for practical purposes, the consequence of such a rule is to place ser-

machine cannot be worked without workmen; without labor it is useless as a machine. Surely this fact of itself is something that has to do with the condition of the machine. If its condition be such that the workman cannot do his part with safety, is that, or is it not, a defect in the condition of a machine the working of which is a necessary performance? It seems to me that unless we hold the defect complained of here to be one within the subsection in question, the act might as well have never been passed."

[6] As, where a common round stick without any holes in it was furnished to be used as a lever for tipping a large ladel of molten metal, the evidence being that it was not safe, and that another kind of device was customary in large foundries like that of the defendant. *Flaherty* v. *Norwood Engineering Co.* (1898) 172 Mass. 134, 51 N. E. 463.

Whether a piece of iron piping is a proper material to use as a buffer to protect the head of a bolt which is being driven is a question for the jury, where the evidence is that for several years copper hammers have been made for such work, and that piping is the least desirable of the metals used, because it is so brittle that chips are apt to fly off from it and injure the person holding it. *Littlefield* v. *Edward P. Ellis Co.* (1900) 177 Mass. 151, 58 N. E. 692.

A railroad company operating passenger and freight trains on a dummy line having regular stations and section foremen and traversing a large section of country is under the same duties as are obligatory on other lines in respect to its employees as to providing locks for its switches, and adopting and using other appliances and safeguards which are in use and deemed necessary by well-regulated railroads of the ordinary character. *Birmingham R. & Electric Co.* v. *Baylor* (1893) 101 Ala. 488, 13 So. 793. Following *Birmingham R. & Electric Co.* v. *Allen* (1892) 99 Ala. 359, 20 L. R. A. 457, 13 So. 8.

In an action for injuries caused by the falling of a derrick, evidence that, if it had been fitted with a wire rope or iron rod to hold the guy plate and goose neck down, it would not have fallen, and that such an appliance was in common use, is admissible. *McMahon* v. *McHale* (1899) 174 Mass. 320, 54 N. E. 854.

[7] *O'Connor* v. *Hamilton Bridge Co.* (1894) 25 Ont. Rep. 12, Affirmed in 21 Ont. App. Rep. 596, 24 Can. S. C. 598; *Thompson* v. *Wright* (1892) 22 Ont. Rep. 127; *Rodgers* v. *Hamilton Cotton Co.* (1893) 23 Ont. Rep. 425; *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117; *Godwin* v. *Newcombe* (1901; C. A.) 1 Ont. L. Rep. 525. In all these cases the propriety of declining to interfere with the verdicts of juries based on the theory that the maintenance of unguarded machinery is negligence was recognized.

In *Hamilton* v. *Grocsbeck* (1889) 19 Ont. Rep. 76, the lower court seems to have been of opinion that an unguarded saw was not a defect. If it was intended to lay this down as a matter of law, the doctrine is clearly contrary to that of the decisions just cited. The court of appeal ([1891] 18 Ont. App. 437) declined to consider whether the want of a guard was or was not a defect.

vants in a position not materially different from that which they would hold if the theory had been adopted that damages may be recovered by anyone injured by the violation of a penal act. The doctrine thus adopted is, moreover, inconsistent, as is shown in § 799, note 2, *post*, with that which was applied in a recent decision by the English court of appeal.

The statute is equally applicable, [illegible] the defect was in the original construction of the machine, [illegible]e from its not being kept up to the obligatory standard of safety.[8] The fact that an appliance comes up to the legal standard of safety when it is in its normal condition will not excuse the master if that condition has been so changed as to render it unsafe, and the change is due to the act of an agent who is intrusted with the duty of seeing that it is in proper condition.[9]

In a leading English case Lord Watson remarked that he saw "no reason to doubt that an arrangement of machinery and tackle which, although reasonably safe for those engaged in working it, is nevertheless dangerous to workmen employed in another department of the business, constitutes a defect in the condition of the works within the meaning of the subsection."[10]

A servant who is a mere licensee or trespasser in respect to the locality where he received the injury complained of cannot, it is manifest, recover damages, even though the conditions which caused the injury may have constituted a defect as to other employees.[11] Compare § 626, *b*, *ante*. A double reason for his inability to sue will, of course, exist where the servant's presence at the spot where he was injured was not merely unauthorized, but negligent as well.[12]

[8] See the passage quoted from the majority opinion in *Walsh* v. *Whiteley* (1888; C. A.) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38, § 672, note 1, *infra*.

In *Heske* v. *Samuelson* (1883) L. R. 12 Q. B. Div. 30, 53 L. J. Q. B. N. S. 45, 49 L. T. N. S. 474, Stephen, J., in commenting on the theory of the county judge that a defect arising from the original construction of a machine was not a defect in the condition of the machinery, said: "The argument for the defendants comes to this, that, if the employer has a machine, one part of which is weaker than it ought to be, there is a defect in its condition; but if the whole machine is too weak for the purpose for which it is applied there is no such defect. Could it be said that if a windlass, fit only for raising a bucket, is used to draw up a number of men, that there is no defect in the condition of the machinery? The condition of the machine must be a condition with relation to the purpose for which it is applied."

[9] *Tate* v. *Latham* [1897; C. A.] 1 Q. B. 502, 66 L. J. Q. B. N. S. 349, 75 L. T. N. S. 694, 45 Week. Rep. 400.

[10] *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392.

[11] As, where a servant who left a dockyard by a path which was not the regular exit, and which the servants were merely permitted to use, fell into a pit *Pritchard* v. *Lang* (1889; Q. B. D.) 5 Times L. R. 639, following *Bolch* v. *Smith* (1862) 7 Hurlst. & N. 736, 31 L. J. Exch. N. S. 201, 8 Jur. N. S. 197, 10 Week. Rep. 387, as to the general principle.

[12] An unguarded elevator opening is

671. Specific examples of defects.—*a. Defects in the condition of the ways.*—This phrase embraces only those inherent imperfections which render the ways themselves less fit for the use for which they are intended.[1] See § 670, *supra*. That the master is not liable for casual obstructions arising from the use of his ways, see § 672, *infra*.

b. Defects in the condition of the works.—Very few decisions specifically referable to this rather vague term are found in the reports, except the cases discussed in § 669, *b*, *supra*, in which the liability of masters for the condition of the premises of another person upon which they have contracted to do something is in question.[2] See also the

not a "defect in the condition of the way," as regards a workman required to pass, through a passage 12 feet wide, well lighted, and with which he is well acquainted, where it is upon the opposite side of the passage from that on which such workman should pass, and he turns out of his way to look at repairs in progress upon the elevator. *Headford* v. *McClary Mfg. Co.* (1894) 21 Ont. App. Rep. 164, Affirmed (1895) 24 Can. S. C. 291.

[1] Plaintiff's servants injured by the following defects have been held entitled to go to the jury:

A loose plank extending over a hole at a place which the servant has to pass, and so laid as to tip up when he steps on it. *Bromley Cavendish Spinning Co.* (1886; C. A.) 2 Times L. R. 881.

The unsafe adjustment of a plank in a temporary staging across which materials are to be carried. *Giles* v. *Thames Ironworks & Shipbuilding Co.* (1885; Q. B. D.) 1 Times L. R. 469.

A plank 8 inches wide and 30 feet from the ground, furnished as a means for a servant to reach and repair a defective steam pipe. *United States Rolling-Stock Co.* v. *Weir* (1892) 96 Ala. 396, 11 So. 436 (complaint averring insufficiency, not demurrable).

A plank of insufficient strength to sustain the weight of the men who have to walk along it. *Caldwell* v. *Mills* (1893) 24 Ont. Rep. 462.

A defective track on a railway. *Coughlan* v. *Cambridge* (1896) 166 Mass. 268, 44 N. E. 218.

A defective railway switch. *Birmingham R. & Electric R. Co.* v. *Allen* (1892) 99 Ala. 359, 20 L. R. A. 457, 13 So. 8.

An open ditch across the track along which the plaintiff had to pull a car. *Gustafsen* v. *Washburn & M. Mfg. Co.* (1891) 153 Mass. 468, 27 N. E. 179.

An unprotected aperture in a staircase which the workman has to use in the course of his employment. *Wood* v. *Dorrall* (1886; Q. B. D.) 2 Times L. R. 550.

The narrowing of the space between the wall of a passageway in a mine, and cars passing therein, so as to cause the cars to pass dangerously near to the wall. *McNamara* v. *Logan* (1893) 100 Ala. 187, 14 So. 175.

An overhead bridge on a railway, so low as to endanger trainmen on the roofs of cars. *Louisville & N. R. Co.* v. *Banks* (1894) 104 Ala. 508, 16 So. 547.

The roof of an adit in a mine so defectively timbered as to allow a large stone to fall on a miner. *McMullen* v. *Newhouse Coal Co.* (1896) 23 Sc. Sess. Cas. 4th series, 759.

A rock on the roof in a tunnel, which is so loose that it may fall at any moment. *Tutwiler Coal, Coke & I. Co.* v. *Ensley* (1901) 129 Ala. 336, 30 So. 600.

The master's liability is a question for the jury where the evidence is conflicting as to whether a gudgeon pin used to fasten the arms of a derrick to a mast was large enough for safety. *Richmond & D. R. Co.* v. *Weems* (1892) 97 Ala. 270, 12 So. 186.

[2] In *Thomas* v. *Quartermaine* (1886) L. R. 17 Q. B. Div. 417 (1887; C. A.) L. R. 18 Q. B. Div. 685, 56 L. J. Q. B. N. S. 346, 57 L. T. N. S. 537, 35 Week. Rep. 555, 51 J. P. 516, a boiling vat and a cooling vat were placed in the same room in the defendant's brewery. A passage only 3 feet wide in one part ran between them, the rim of the cooling vat rising 16 inches above the passage. Underneath the barley vat was a board which the plaintiff had occasion to use. To draw it out he had to give it a jer' and it came away so suddenly that h. fell back into the cooling vat.

remark of Lord Watson, quoted in the last section. For some cases in which the term occurs in conjunction with others descriptive of various kinds of instrumentalities, see § 668, *a*, *supra*.

c. Defects in the condition of the machinery.—The cases cited below indicate sufficiently the kind of abnormal conditions which may properly be found by a jury to fall within this description.[3]

d. Defects in the condition of the plant.—As the term "plant" carries the very extensive meaning explained in § 668, subs. *c*, *supra*, the cases involving it cover a great variety of appliances. Some

In the divisional court, Wills, J., said that he could see no evidence of any defect. But in the court of appeal it was considered that the finding of the trial judge sitting as a jury, that there was a defect in the condition of the works, must be allowed to stand, as there was some evidence to support his conclusion. (See pp. 687 and 703 of the report.)

A roof which proved too weak to support the snow which was allowed to accumulate on it seems to be treated in a Massachusetts case as a defect in the "works;" but the point actually decided was merely that an allegation of defective conditions was sustained by proof that the weight of snow was one of the causes of the fall. *Dolan* v. *Alley* (1891) 153 Mass. 380, 26 N. E. 989.

The failure to furnish suitable appliances to fasten the stones of a coping was held to be proof of defective condition, in *Gibson* v. *Sullivan* (1895) 164 Mass. 557, 42 N. E. 110 (stones fell on plaintiff).

[3] Defects in a locomotive, which produce sudden, unnecessary movements of the cars. *Highland Ave. & Belt R. Co.* v. *Miller* (1898) 120 Ala. 535, 24 So. 955.

Defective pressure causing a hydraulic crane to work erratically. *Bacon* v. *Daces* (1887; Q. B. D.) 3 Times L. R. 557.

A band which is constantly slipping off a shaft, thus creating a necessity for a frequent readjustment. *Baxter* v. *Wyman* (1888; Q. B. D.) 4 Times L. R. 255.

A belt which is liable to slip off of a pulley. *Ellis* v. *Pierce* (1898) 172 Mass. 220, 51 N. E. 974.

Defective appliances for controlling the speed of a push car which collided with the plaintiff, knocking him down a high trestle. *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969.

A part of a machine in a paper mill, so constructed that the rags, etc., which are fed to it, are apt to catch, the result being a frequently recurring necessity to remove them. *Paley* v. *Garnett* (1885) L. R. 16 Q. B. Div. 52, 34 Week. Rep. 295, 50 J. P. 469.

The absence of a guard to a circular saw provided by the owner of a saw mill, but improperly removed by the sawyer for his own purposes. *Tate* v. *Latham* (1897; C. A.) 1 Q. B. 502, 66 L. J. Q. B. N. S. 349, 75 L. T. N. S. 694, 45 Week. Rep. 400.

The want of a fence to protect employees from moving machinery. *Wallace* v. *Cutler Paper Mills Co.* (1892) 19 Sc. Sess. Cas. 4th series, 915 (denying that this result was affected by the fact that the danger was a palpable one).

A loom in which the shuttles are neither so fixed as not to be constantly flying out, nor protected by proper guards. *Smith* v. *Harrison* (1889; Q. B. D.) 5 Times L. R. 406.

Unguarded machinery which is operated by children. *Morgan* v. *Hutchins* (1890; C. A.) 59 L. J. Q. B. N. S. 197, 38 Week. Rep. 412.

Unfenced machinery in a jurisdiction where a penalty is imposed by a factories act for not having machinery guarded may properly be found to import negligence. See § 670, note 2, *supra*. In the most recent case in which this doctrine was applied it was held that the absence of a guard is a defect, if the machinery is thereby rendered dangerous to the workmen using it, even if the machinery is in itself well constructed and suitable for the purpose for which it was designed. *Godwin* v. *Newcombe* (1901; C. A.) 1 Ont. L. Rep. 525.

Evidence that an injury received by a weaver in a cotton mill while he was assisting an inexperienced hand, in consequence of the shuttle flying out of the

of them might presumably be referred to the instrumentalities discussed in the preceding sections.[4]

672. Conditions not amounting to defects.—The mere fact that a machine is dangerous to manipulate, unless the servant takes certain precautions which any intelligent man would see to be appropriate under the circumstances, will not warrant a finding that the machine is defective within the meaning of the act. There can be no recovery

loom, was caused by a bolt breaking when the shuttle came in contact v it, is fit to go to the jury upon the qu stion of negligence. *Canadian Coloured Cotton Mills* v. *Talbot* (1897) 27 Can. S. C. 198.

At the trial of an action against a railroad corporation for the death of an employee, caused by the falling upon him of a locomotive which had been placed on a truck in the repair shop, it is competent for the jury to find that, although the iron was sound where the wheel of the truck broke, yc by reason of its long use and the inc. ase in the weight of engines, the truck had become unsuitable for the use to which it was put, and that, if the wheel had been of proper strength, it would have withstood the strain caused by meeting the obstruction on the rail. *Dunn* v. *New York, N. H. & H. R. Co.* (1898) 171 Mass. 417, 50 N. E. 1031.

[4]The following defects have been held to come under the head of "defects in plant:"

Th want of ventilation for the hold of a coal ship, the result being that gas accumulated and exploded when the hatches were removed and the men engaged to unload the coal entered the hold with their lanterns. *Carter* v. *Clarke* (1896; Q. B. D.) 14 Times L. R. 172, 78 L. T. N. S. 76.

A horse intended for a particular kind of work, and so vicious as to be unfit for that work. *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647, 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 283.

A vicious horse. *Fraser* v. *Hood* (1887) 15 Sc. Sess. Cas. 4th series, 178.

A horse that is constantly falling. *Haston* v. *Edinburgh Tramway Co.* (1887) 14 Sc. Sess. Cas. 4th series, 621.

The lack of some means either to prevent loose bodies from falling upon men working below, or to protect those men from any of the bodies which may fall. *Heske* v. *Samuelson* (1883) L. R. 12 Q. B. Div. 30, 53 L. J. Q. B. N. S. 45, 49 L. T. N. S. 474 (piece of coal fell from a lift, the sides of which were not fenced, on to an unroofed platform).

A ladder which, by the direction of the defendant, is used to support a scaffold, and, not being strong enough for the purpose, breaks under the weight of a servant. *Cripps* v. *Judge* (188) L. R. 13 Q. B Div. 583, 53 L. J. Q. B. N. S. 517, 51 L. T. N. S. 182, 33 Week. Rep. 35, 49 J. P. 100.

A bolt so weakened by constant strains that it breaks. *Iricin* v. *Dennystoun* (1885; Ct. of Sess.) 22 Sc. L. R. 379.

A sliding door to be used in case of fire, without any provision for protecting the hands of an employee from being crushed when it is pulled to. *Johnson* v. *Mitchell* (1885; Sc. Sess. Cas.) 22 Sc. L. R. 698.

An inflammable brattice cloth allowed to stand in a place where sparks frequently fall on it. *Thomas* v. *Great Western Colliery Co.* (1894; C. A.) 10 Times L. R. 244.

Car buffers of different heights, overlapping in coupling so as to afford no protection to the person making the coupling. *Bond* v. *Toronto R. Co.* (1895) 22 Ont. App. Rep. 78. Affirmed (without opinion) in (1895) 24 Can. S. C. 715 (construing the phrase "defect in the arrangement of the plant," which occurs in the Ontario act).

A switch not provided with a lock, nor securely guarded in any other way. *Rombough* v. *Balch* (1900) 27 Ont. App. Rep. 32.

Insufficient number of scrapers supplied for cleaning out a brick pressing machine. *Race* v. *Harrison* (1893; C. A.) 10 Times L. R. 92, per Kay, L. J.

The failure to supply a boy with proper materials for the cleaning of machinery. *Thompson* v. *Wright* (1892) 22 Ont. Rep. 127.

The inadequate manning of cars which are "kicked" on to a side track, the result being that their speed cannot be controlled and they come into collision

unless the defect is one which implies negligence on the part of the master, or the agents for whose defaults he is answerable.[1]

with other cars. *Louisville & N. R. Co. v. Davis* (1890) 91 Ala. 487, 9 So. 552.

[1] In *Walsh* v. *Whiteley* (1888; C. A.) 1. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 588, 36 Week. Rep. 870, 53 J. P. 38, the trial judge left it to the jury to say whether there was a defect in the condition of the machine where there was evidence that the accident would not have happened if the disc of the wheel of a carding machine had been solid, and instructed them that, to be defective, a machine must be such as a reasonable, careful, experienced man, reasonably careful of the safety of his workmen, would not use. The jury found that there was a defect, but the court of appeal held that the evidence did not warrant this conclusion. The following passage shows the position taken by the majority of the court (Lindley and Lopes, L.J.J.): "To determine the meaning of the words 'defect in the condition of the machinery,' we must look, not only at § 1, subs. 1, but also at § 2, subs. 1. Reading these sections and subsections together, we think there must be a defect implying negligence in the employer. The negligence of the employer appears to be a necessary element without which the workman is not to be entitled to any compensation or remedy. It must be a defect in the condition of the machine, having regard to the use to which it is to be applied, or to the mode in which it is to be used. It may be a defect either in the original construction of the machine, or a defect arising from its not being kept up to the mark; but it is essential that there should be evidence of negligence of the employer or some person in his service intrusted with the duty of seeing that the machine is in proper condition. It must be a defect in the original construction or subsequent condition of the machine, rendering it unfit for the purposes to which it is applied when used with reasonable care and caution, and a defect arising from the negligence of the employer. What evidence is there of this? Is there any evidence of the machine being defective even in the abstract? It was perfect in all respects. It was not impaired by use. It had been properly kept up to the mark. The only suggestion is that the wheel which might have been solid had holes in it, and that, if the wheel had been solid, the plaintiff could not have put his thumb where he did, and the accident would not have happened. It is also suggested that the wheel was too close to the table and that, had the wheel and table been further apart the accident would not have happened. There was, however, no evidence worth mentioning of improper construction in this respect. But the plaintiff had used the same kind of machine for thirteen years, and had sustained no injury. It is to our minds clear that he would have suffered no injury on the present occasion if he had used proper care and caution. In these circumstances we can see no evidence of any defect in the condition of the machine, even apart from negligence of the employer. It may be that a solid wheel would have been safer, but it would be placing an intolerable burden on employers to hold that they are to adopt every fresh improvement in machinery. We do not believe that such was the intention of the legislature; nor do we think it was intended to relieve workmen from the exercise of that care and caution without which most machines is dangerous. But, in our opinion, the defect in the condition of the machinery must be such as to show negligence on the part of the employer. It seems to us that in this case there is not a particle of evidence of any defect arising from the negligence of the employer. It was a machine generally used, used by the plaintiff for thirteen years without any complaint or mischief arising, perfect and unimpaired, and never thought by the plaintiff himself to be unsafe. It is said there is evidence of the machine being dangerous. So are most machines, so is even an ordinary shar knife, unless used with care, but that does not make it defective in its condition, nor does it imply negligence in the employer if an accident happens." Q. B. D. 371, 377.

The following passage from the dissenting opinion of Lord Esher, shows the theory adopted by that eminent judge: "Remembering that this is a statute passed to extend the liability of the employer in favor of workmen and for their greater safety, I do not think that, in considering what is a defective machine, we can confine that consideration to the question of the purpose for

Accordingly, under the statute as at common law (see § 35, *ante*), an employer is not bound to provide the very best machinery that can possibly be invented. It is enough if he provides that which is reasonably sufficient for the purpose.[2]

which it is used. The defect contemplated by the act is not, in my opinion, a defect with reference to the purpose for which the machine is employed, but a defect with reference to the safety of the workmen using it; and that defect may be either in the original construction of the machine or in the use to which the machine is put. Upon the findings of the jury and the true construction of the enactment, I am of the opinion that the case is brought within the statute."

The general language of the decision is somewhat qualified by *Morgan* v. *Hutchins* (1890; C. A.) 59 L. J. Q. B. N. S. 197, 38 Week. Rep. 412. (See § 670, note 6, *ante*.) There Lord Esher, referring to the earlier case, made the following remarks: "I think it was assumed by the whole court that, if the machine were dangerous to a workman without any fault of his own, it came within the act. The only doubt that existed in the minds of two of the members of the court was whether the defect had arisen from the negligence of the employer."

The general rule has been enunciated, that machinery is not defective which is fit and proper for the purpose for which it is designed, and there is a reasonable mode, known to the injured servant, in which he could have operated it. *Yeoman* v. *Dublin Distillery Co.* (1893) 32 L. R. Ir. 309.

Recovery has been denied in a case where it was apparent that the only danger to which the plaintiff was subjected arose from the fact that the machine in question was not stopped by him before he attempted to do the work on which he was engaged when the accident occurred. *Sutton* v. *Stead* (1887; Q. B. D.) 3 Times L. R. 499.

[2] *Robins* v. *Cubitt* (1881) 46 L. T. N. S. 535, per Lopes, J.

Want of reasonable care is not established by evidence which merely shows that a particular safety catch of a different pattern from that on the defendant's elevator had been used ten years before by others. *Black* v. *Ontario Wheel Co.* (1890) 19 Ont. Rep. 578.

The rule, "An employer is not bound to provide against every possible danger, or to supply in all cases the safest and most approved appliances," was applied in *Mitchell* v. *Patullo* (1885) 23 Sc. L. R. 207. There the folding doors of a shed on a farm flapped in a horse's face, so that he backed a wagon, and crushed the plaintiff. Held, that the farmer was not in fault for having failed to provide sliding doors.

A defect in apparatus for hoisting ice is not shown by the fact that a gin wheel was hung so low that the employee's hand was drawn into it and injured by failure to stop the rope soon enough, where it does not appear that it could have been hung any higher in the building, and proper arrangements were made for stopping the rope if the engineer had observed it. *Carbury* v. *Downing* (1891) 154 Mass. 248, 28 N. E. 162. There the plaintiff did not suggest that the means employed to stop the engine were not sufficient, or that any other should have been provided, but contended that the means for indicating to the engineer the time for stopping the engine, *viz.*, a mark upon the rope, were not sufficient. It was held that the jury could not properly have found that this was an insecure mode of indicating to the engineer when the ice arrived at the top of the run, and that the engine ought to have been inside the building, where the engineer could see the ice and the upper gin wheel, and decide in that way when the engine should be stopped.

A servant cannot recover, as for a "defect," where he is injured by the fall of a bar which was used for fastening flap-doors in a floor, and which, instead of being secured by a chain or otherwise, so as to prevent its falling, was left loose. *Pooley* v. *Hicks* (1889) 5 Times L. R. 353.

A drawbar on the car of another railway company, which is of a different height from those on the defendant's own cars, is not a defect. *Ellsbury* v. *New York, N. H. & H. R. Co.* (1899) 172 Mass. 130, 70 Am. St. Rep. 248, 51 N. E. 415.

It is not, as matter of law, the duty of persons operating coal mines to cut a manway, different and separate from the slope through which coal is brought to the surface, for the ingress

Culpability is negatived by proof that the instrumentalities furnished were the same in character and quality as those commonly used under similar circumstances by persons carrying on the same business as the defendant.[3] Compare § 44, *ante*. But in order to be conclusive

and egress of their employees. *Whatley* v. *Zonida Coal Co.* (1899) 122 Ala. 118, 26 So. 124.

A covered bridge on a railway, which is high enough to give sufficient space for a brakeman to walk in safety along the center line of roof of a car, is not defective. *Schlaff* v. *Louisville & N. R. Co.* (1893) 100 Ala. 377, 14 So. 105.

A conductor on a street railway assumes the risks arising from the possibility of an occasional jolt of the car, and cannot recover if he is thrown off by such a movement, while he is on the bumper, engaged in replacing the trolley on the wire. *McCauley* v. *Springfield Street R. Co.* (1897) 169 Mass. 301, 47 N. E. 1006.

Structures placed so close to a railway track that trainmen are in danger of coming into collision with them do not constitute a defect. *Dacey* v. *New York, N. H. & H. R. Co.* (1897) 168 Mass. 479, 47 N. E. 418.

[3] An open hook without a catch, to which a bucket is attached for raising and lowering loads, cannot be held to be a defect, where the plaintiff's evidence is that such a hook was always used in work of a similar kind, and no proof is given of the occurrence of any previous accident. *Claxton* v. *Mowlem* (1888; C. A.) 4 Times L. R. 756.

The failure of an ironmaster to fence in about 10 feet of the lower end of a shaft through which ore was raised to a furnace gangway will not render him liable for injuries to a workman struck by a piece of the ore which fell through the opening, if it is shown that it was usual in the trade to leave so much of these shafts unfenced. *Murray* v. *Merry* (1890) 17 Sc. Sess. Cas. 4th series, 815.

No negligence can be inferred where a scaffold alleged to be defective was the ordinary kind of scaffold used by masons, and as strong as they are usually made. *Thompson* v. *Dick* (1892) 19 Sc. Sess. Cas. 4th series, 804.

A trap door without a railing, such as is commonly maintained in factories is not a "defect." *Moore* v. *Ross* (1890) 17 Sc. Sess. Cas. 4th series, 796.

A projecting set screw in a shaft, being a common device for the purpose for which it is used, is not of itself a defect. *Donahue* v. *Washburn & M. Mfg. Co.* (1897) 169 Mass. 374, 48 N. E. 842; *Demers* v. *Marshall* (1899) 172 Mass. 548, 52 N. E. 1066, (1901) 59 N. E. 454; *Ford* v. *Mt. Tom Sulphite Pulp Co.* (1899) 172 Mass. 544, 52 N. E. 1065. In the last case recovery was denied though the screw had been placed on the shaft after the servant entered the employment.

Nor is a key-way with sharp edges in a shaft a defect. *Connelly* v. *Hamilton Woolen Co.* (1895) 163 Mass. 151, 39 N. E. 787.

An engineer employed in fitting up the boilers in a steamer in course of construction cannot recover for injuries caused by falling into an open manhole, while threading his way between decks in a dim light, on the theory that the master was bound to protect the manhole. *Forsyth* v. *Ramage* (1880) 18 Sc. Sess. Cas. 4th series, 21. In a later case the court explained that this decision was based upon the ground that the risk in question was an ordinary one incidental to the work undertaken, and disclaimed the intention of laying down any such general rule as that a workman on a ship in course of construction cannot recover for injuries due to the dangers of the place of work. *Jamieson* v. *Russell* (1892) 19 Sc. Sess. Cas. 4th series, 898, where the representative of an employee killed by falling into an open tank was allowed to recover for the reason that the tank was usually covered and lighted, and that neither of these precautions had been observed on the occasion when the accident occurred.

A workman injured through the slipping of some planks out of the loop in a hempen rope by means of which they are being lowered to the bottom of a trench cannot recover on the ground that a wire rope should have been used, where it appears that hempen ropes were ordinarily used for such a purpose. *Pack* v. *Hayward* (1889; Q. B. D.) 5 Times L. R. 233.

In the case of a machine of a simple character the plaintiff is not entitled to go to trial merely upon averment that the machine was dangerous and that it was usual to fence such machines. *Cam-*

in the master's favor, as a matter of law, the usage appealed to must be, in a reasonable sense, a general one. Evidence which merely goes to show that he conformed to the practice of a few well-regulated concerns of the same description as his own will not justify a court in pronouncing him to be free from culpability.[4] Compare § 53, *ante*. On the other hand, if usage is the controlling factor in the case, a jury will not be permitted to find him guilty of negligence where it is apparent that there is no uniform usage in regard to the subject-matter.[5]

As regards the effect thus ascribed to the general usage of employers, it is needless to remind the reader that, in common-law actions, many courts apply the doctrine that evidence of conformity to such usage is a circumstance which merely tends to show that the defendant exercised reasonable care, and not one which is conclusive in his favor. See § 50, *ante*.[6]

The statute is not construed so as to make him an insurer of his servants' safety to such an extent that he is bound to have his machinery so constructed and arranged as to provide for the contingency that one of the men whose duty it is to attend to it may, by negligently absenting himself from his post, cause it to operate in such a manner as to injure another servant.[7]

ron v. *Walker* (1898) 25 Sc. Sess. Cas. 4th series, 409, following *Milligan* v. *Muir* (1891) 19 Sc. Sess. Cas. 4th series, 18.

As to unfenced machinery, see also § 671, subs. c, *supra*, and the majority opinion in *Walsh* v. *Whiteley* (1888; C. A.) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38, as quoted in note 1.

[4] *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586 (charge held erroneous, which proposed as a standard test the custom of eight railway companies to use ratchet jackscrews for holding up the body of a derailed car); *Richmond & D. R. Co.* v. *Weems* (1892) 97 Ala. 270, 12 So. 186 (charge held erroneous which assumed the usage of five railway companies to be a decisive test).

[5] Failure to provide a temporary scaffold or platform around a "bleeder" used for the escape of gas above an iron furnace, on which the master mechanic could stand to repair the bleeder, does not constitute a defect in the ways, etc., where such scaffold was sometimes used in furnaces, but repairs were also made by means of a ladder. *Birmingham Furnace & Mfg. Co.* v. *Gross* (1892) 97 Ala. 220, 12 So. 36.

[6] This doctrine is thus set forth in a somewhat extreme form by Lord Esher in his dissenting opinion in a case already cited: "If there was a defect in the machine so as to make it dangerous to workmen using it, it would be no answer to say that, though the master used a machine that was dangerous to his workmen, no one up to that time had invented a better one, and that it was the best machine theretofore manufactured. The true question seems to me to be whether the machine is dangerous, and whether a careful consideration would show it to be dangerous to the workman using it. I am prepared to say that, if a careful consideration would show a master that the machine was dangerous to the workman using it, even although that machine could not be improved upon, it is negligence on the part of the master to use for his profit a machine which is dangerous to his workmen, and, if he does use it, he can only do so upon the terms of being liable to pay compensation to the workman if he is thereby injured." *Walsh* v. *Whiteley* (1888) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38.

[7] *Robins* v. *Cubitt* (1881) 46 L. T. N. S. 535.

An accident attributable to what is merely a condition of the materials on which the employees were working, and necessarily incident to the business in which they were engaged, does not constitute a cause of action.[8]

An appliance is not defective simply because an accident results from its being subjected to an unexpectedly severe strain.[9]

673. Defective system; employer liable for.—Under the various employers' liability acts, as is also the case at common law (see chapter xv., *ante*), the master is "no less responsible to his workmen for personal injuries occasioned by a defective system of using machinery, than for injuries caused by a defect in the machinery itself." In other words, "a master is responsible, in point of law, not only for a defect on his part in providing good and sufficient apparatus, but also for his failure to see that the apparatus is properly used."[1]

[8] *Welch* v. *Grace* (1897) 167 Mass. 590, 46 N. E. 387, where the court rejected the contention that the death of an employee, due to subsequent explosion of a misspent blast which, owing to the character of the rock in which it had been placed, failed to explode in the first instance, should be deemed to be caused by a defect in the "ways, works, or machinery" of the employer.

The slippery condition of a ladder at the bottom of a shaft in a coal mine is not a "defect." *O'Neill* v. *Wilson* (1858) 20 Sc. Sess. Cas. 2d series, 427.

[9] As, where a scaffold swings so violently, after a gutter which is being wrenched from the side of a building comes off with unexpected ease, that the servant engaged in the work is thrown down. *McLean* v. *Cole* (1899) 175 Mass. 5, 55 N. E. 458.

[1] Lord Watson in *Smith* v. *Baker* (1891) A. C. 325 (p. 353), 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392, where a verdict was allowed to stand which found negligence in the system, where the plaintiff was injured by the fall of a stone from a crane which worked over his head intermittently, while he was engaged in drilling, and was thus prevented from being on his guard to avoid danger when, in the course of the work, the stones lifted by the crane were swung round over his head.

The absence in hoisting machinery of a sufficient safeguard against such a probable occurrence as a slip in the management of the machinery is a defect in the system. *Stanton* v. *Scrutton* (1893: Q. B. D.) 9 Times L. R. 236, 62 L. J. Q. B. N. S. 405, 5 Reports, 244.

A master cannot be held liable as for a defective system, where the evidence is that the plaintiff, a boy, was injured by the sudden starting of a brick press while he was cleaning out the under part with his hands during a temporary stoppage of the machinery, but it is also shown that he had been warned not to use his hands for this purpose. *Race* v. *Harrison* (1893) 9 Times L. R. 567, 10 Times L. R. 92.

One who has contracted to take down a building which has been gutted by fire cannot be held to have adopted an improper method of doing the work, where he arranges to remove one of the walls piecemeal by means of a scaffold constructed alongside the wall of the adjacent house. Hence, a workman injured by the fall of the former wall against the latter cannot recover on the theory that the omission to shore the wall to be demolished was negligence, inasmuch as the process of shoring would have been fully as dangerous as that of erecting a scaffold. *McManus* v. *Greenwood* (1885: Q. B. D.) 52 L. T. Journ. 160. The court of appeal reversed the judgment of the divisional court, (1886) 2 Times L. R. 603. But the question whether the method of demolition adopted was defective was not discussed, the reversal being put upon the ground that defendant, although he knew that there was imminent danger of the collapse of the wall, and that the workmen were ignorant of the conditions, did not give them any warning.

A servant injured by an explosion of gunpowder is not entitled to go to the jury on the question whether the system of work was defective, where the com-

In many instances, it will be observed, the adoption of a defective system virtually resolves itself into negligence in the exercise of superintendence. Under such circumstances a default of this kind may be referred either to the category which is covered by this provision of the act, or to that which is discussed in the next subtitle.

674. "Not discovered or remedied, owing to the negligence," etc.—*a. Generally.*—The qualifying declaration in this statute, by which liability is excluded unless negligence can be predicated of the failure to discover and remedy the defect which caused the injury, merely embodies, so far as the employer himself is concerned, the common-law doctrine that negligence cannot be imputed to a person who is not shown to have had actual or constructive knowledge of the abnormally dangerous conditions from which the injury resulted. See chapter x., *ante*.[1] The imposition of liability for the defaults of the class of

plaint merely alleges that the powder was stored in a magazine five minutes' distance from the work, in small barrels; that, when it was desired to fire a charge, a barrel was carried from the store and opened at the place of work; and that while the plaintiff was firing a charge a gust of wind carried a piece of fuse to a barrel from which powder had been taken, thus causing the powder to explode and injure him. Such allegations indicate rather the occurrence of an accident through the carelessness of the servant himself in not covering the barrel while the charge was being fired. *Mulligan* v. *M'Alpine* (1888) 15 Sc. Sess. 4th series, 789.

. ver may be found liable on the f a negligent arrangement of . where he places a steam crank in such a position that live cinders from the boiler furnace may fall at a place where workmen are putting in blasts of gunpowder, and fails to provide some means for intercepting those cinders. *Grant* v. *Drysdale* (1883) 10 Sc. Sess. Cas. 4th series, 1159.

This principle was, strangely enough, quite lost sight of in a case which recently came before the Ontario court of appeal. *Sim* v. *Dominion Fish Co.* [1901] 2 O . L. Rep. 69. There it was correctly .ded that the plaintiff was entitled to recover at common law upon a special finding that the master had made no provision for the inspection of appliances like that which caused the injury. But in the course of his opinion Chief Justice Armour took occasion to observe that, if the right of recovery had depended upon the employers' liability act, it would have been necessary to send the case back to another jury to determine whether some employee superior to the plaintiff was aware that the appliances were defective. It is manifest that this theory as to the effect of the verdict is erroneous. The declaration of the jury that the defendant had made no proper provision for the inspection of the appliances in question was clearly tantamount to a declaration that his system was defective in this regard. The finding, therefore, was expressive of a fact which implied personal negligence on the part of the master himself, and it was wholly unnecessary to ascertain whether the particular defect which caused the injury was known to a superior employee.

[1] The converse proposition which is implied in this doctrine *viz.*, that a master is culpably negligent if he permits the continuance of abnormally dangerous conditions which, by the exercise of due care, he might have ascertained—suggests a reason for doubting the correctness of the decision of the Ontario court of appeal, which is criticised on another ground in the preceding section. *Sim* v. *Dominion Fish Co.* [1901] 2 Ont. L. Rep. 69. It seems not unreasonable to say that, for the purposes of sustaining the judgment, a court of review would have been warranted in construing the finding of the jury, that the defendant had made no provision for a proper inspection, as being equivalent to a declaration by the jury that the defect in question would have been discovered if such an inspection had been made. This would be tantamount to

agents designated by this clause may be regarded as being, for practical purposes, a legislative adoption of that doctrine of non-delegable duties which has been evolved, independently of statutes, in most of the American states. See chapter XXXI., *ante*.

b. "*Not discovered.*"—Whether the gravamen of the servant's complaint be the default of the master himself or of his agents in failing to discover a defect, the existence or absence of culpability is tested by considerations of precisely the same kind as those which are applied in common-law actions. The servant cannot succeed in his action where neither the employer himself nor his representative within the meaning of this subsection had knowledge, actual or constructive, of the existence of the defect which caused the injury,[2] nor where there was no reason to apprehend the particular casualty which occurred.[3]

On the other hand, the servant is entitled to recover if the master himself, or an employee who was discharging the functions indicated by the cases which are cited in subdivision *d* of this section, might by the exercise of proper care have discovered the defect in question.[4]

saying that the master ought to have known of the defect, and was therefore as culpable as if he had actually known of it and failed to remedy it. If this view be correct, the finding virtually attributed personal negligence to the master, and there was clearly no necessity to obtain the opinion of the jury upon the question whether the defect was known to a superior employee.

[2] *Groves* v. *Fuller* (1888; Q. B. D.) 4 Times L. R. 474 (plaintiff nonsuited); *Walsh* v. *Whiteley* (1888) L. R. 21 Q. B. Div. 371, 57 L. J. Q. B. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38; *Morgan* v. *Hutchins* (1890) 59 L. J. Q. B. N. S. 197, 38 Week. Rep. 412; *Griffiths* v. *London & St. K. Docks Co.* (1884) L. R. 13 Q. B. Div. 259, 53 L. J. Q. B. N. S. 504, 51 L. T. N. S. 533, 33 Week. Rep. 35, 49 J. P. 100, per Fry, L. J., followed in *Rudd* v. *Bell* (1887) 13 Ont. Rep. 47; *Black* v. *Ontario Wheel Co.* (1890) 19 Ont. Rep. 578; *Louisville & N. R. Co.* v. *Campbell* (1893) 97 Ala. 147, 12 So. 574; *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128; *Wilson* v. *Louisville & N. R. Co.* (1887) 85 Ala. 269, 4 So. 701.

The mere fact that a stick which broke while being used as a lever was old and had been long in use will not justify a finding that the employer ought to have known the stick to be defective. *Allen* v. *G. W. & F. Smith Iron Co.* (1894) 160 Mass. 557, 36 N. E. 581.

Under the original Massachusetts act the common-law rule established by *Mackin* v. *Boston & A. R. Co.* (1885) 135 Mass. 201, 46 Am. Rep. 456, that a railway company was not liable for the negligence of its car inspectors, was declared not to have been changed in regard to foreign cars received merely for forwarding. *Thyng* v. *Fitchburg R. Co.* (1892) 156 Mass. 13, 32 Am. St. Rep. 425, 30 N. E. 169. Compare also *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128. But this decision is no longer a correct statement of the law since the passage of the amendatory act of 1893, chap. 359, declaring that the mere fact of a car being in possession of a railroad company makes it a part of its "ways, works, or machinery." See § 656, *supra*.

[3] *Booker* v. *Higgs* (1887; Q. B. D.) 3 Times L. R. 618. Recovery denied for lack of positive evidence on this point in a case where a laborer was injured by the fall of a bank of earth which he has been ordered by the foreman to excavate by entering a hole in a wall against which the earth lay.

[4] *Walsh* v. *Whiteley* (1888) L. R. 21 Q. B. Div. 371, 57 L. J. Q. P. N. S. 586, 36 Week. Rep. 876, 53 J. P. 38.

Evidence that the defect might have been discovered if the instrumentality had been examined by a skilled person will justify a verdict for the servant. *Thomas* v. *Great Western Colliery*

The mere fact that no accident has happened for several years does not prove that the master ought not to have known there was danger. "Long immunity from accident does not prove absence of carelessness. It may only prove long-continued habitual negligence."[5]

In determining the question whether the instrumentality ought to have been inspected by the defendant or his agents, the fact that it was furnished by a competent contractor, or that an express statement as to its condition had been made by such a contractor, under circumstances in which it was apparently justifiable to rely upon his opinion, is in England deemed to be conclusive against the inference of negligence.[6]

c. "*Not remedied.*"—A remedy of a "defect in the condition of the machinery" does not mean putting the machinery in perfect condition for working purposes, but the removal of the source of danger to employees, which may be done by a temporary device, as well as by permanent repairs.[7]

Co. (1894; C. A.) 10 Times L. R. 244. *Fraser* v. *Fraser* (1882) 9 Sc. Sess. Cas. 4th series, 896 (rope broke).

A judgment for the plaintiff will not be disturbed where he was injured by the breaking of a bolt not shown to have any latent defect, and the evidence was that, although it had been subjected to usage which tended to diminish its strength, its strength had not been tested, as it should have been, with reasonable frequency. *Irwin* v. *Dennystown* (1885; Sc. Sess. Cas.) 22 Sc. L. R. 379.

The fact that the machinery which caused the accident was changed after it occurred is admissible as evidence that the master knew the machinery to be defective. *Dodd* v. *Dunton* (1890) 16 Viet. L. Rep. (L.) 531.

Evidence that defects in a truck had existed for several weeks prior to the accident is relevant on the question of negligence. *Kansas City, M. & B. R. Co.* v. *Webb* (1892) 97 Ala. 157, 11 So. 888. (See, generally, § 132, *ante*.)

A finding that a foreman should have seen that a plank which gave way was cross-grained and knotty, and consequently unsafe to walk upon in the position in which it was placed, will not be disturbed. *Calcxell* v. *Mills* (1893) 24 Ont. Rep. 462.

Where employees were injured by the falling of a derrick, evidence that it was set up so as to allow a vertical play of the goose neck and guy plate of 4 inches, and that the usual play of such parts in similar derricks was but ¼ of an inch, is competent to show that, by the exercise of ordinary care, the employers could have ascertained that it needed better adjustment for safety. *McMahon* v. *McHale* (1899) 174 Mass. 320, 54 N. E. 854.

[5] *Thomas* v. *Great Western Colliery Co.* (1894; C. A.) 10 Times L. R. 244, reversing decision of divisional court.

[6] A master is not liable for injuries caused by the fall of a staging which only the day before had been erected by a contractor. He is not, under such circumstances, bound to inspect the staging himself or to employ anyone specially to inspect it. *Kiddle* v. *Lovett* (1885) L. R. 16 Q. B. Div. 605, 34 Week. Rep. 518, per Denman, J. (sitting without a jury). The master had paid a sum of money to the servant, and was suing the contractor to recover the amount. It was held that he could not maintain the action.

No negligence is proved where a foreman, relying upon the assurance of a contractor engaged in reinstating a building which had been partially destroyed by fire, that one of the walls had been safely shored up, sends his subordinates back to work near it, after having withdrawn them when he noticed the unsafe condition of the gable. *Moore* v. *Gimson* (1889; Q. B. D.) 5 Times L. R. 177, 58 L. J. Q. B. N. S. 169.

[7] *Willey* v. *Boston Electric Light Co.* (1897) 168 Mass. 40, 37 L. R. A. 723, 46 N. E. 395. Defendant had argued

The failure to stop a machine which is not working properly is a failure to "remedy" its defects.[8]

Negligence cannot be inferred where a defect came to the knowledge of the master or superior so short a time before the accident that there was not sufficient time to remedy it.[9]

When the danger is not constantly present, but recurs at intervals, the defect may be cured by giving the workmen timely warning of its approach.[10]

The master cannot avail himself of the defense that the defect or obstruction by which an employee was injured was due to the act of a stranger, where it was not remedied or removed within a reasonable time after notice.[11]

d. "Person intrusted with the duty," etc.—To bring an employee within this description there should be evidence showing that he was charged with the specific duty of keeping the defective instrumentality in proper condition.[12] But it is not necessary to show that he was discharging the functions of a superintendent.[13]

that it was not liable because the defect could not have been permanently remedied before the accident.

[8] *Bacon* v. *Dawes* (1887; Q. B. D.) 3 Times L. R. 557.

[9] *Seaboard Mfg. Co.* v. *Woodson* (1891) 94 Ala. 143, 10 So. 87.

[10] *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392. Lord Watson said (p. 354) "The employer may, in such cases, protect himself either by removing the source of danger, or by making provision for due notice being given. Should he adopt the latter course, he will still be exposed to liability if injury results from failure to give warning through the negligence of himself or of his superintendent."

[11] *Highland Ave. & Belt R. Co.* v. *Walters* (1890) 91 Ala. 435, 8 So. 357.

[12] The employer has been held liable for the negligence of the following agents:

An assistant road master whose duty it is to inspect cars and have them run upon the repair track when they are found to require repairs. *Louisville & N. R. Co.* v. *Davis* (1890) 91 Ala. 487, 8 So. 552.

A supervisor and section foreman in a case where there was a defect in a switch. *Kansas City, M. & B. R. Co.* v. *Webb* (1892) 97 Ala. 157, 11 So. 888; *Alabama G. S. R. Co* v. *Davis* (1898) 119 Ala. 572, 24 So. 862.

A lineman sent out to search for and remedy a defective insulation on an electric wire. *Willey* v. *Boston Electric Light Co.* (1897) 168 Mass. 40, 37 L. R. A. 723, 46 N. E. 395.

A carpenter who understands and looks after machinery, although subject to the orders of a superintendent who is also a salesman. *Copithorne* v. *Hardy* (1899) 173 Mass. 400, 53 N. E. 915.

An employee in charge of the stables of a street car company, one of whose horses was in an unfit condition to be worked. *Huston* v. *Edinburgh Tramway Co.* (1887) 14 Sc. Sess. Cas. 4th series, 621.

A "fireman" of a mine whose duty it is to inspect the workings before the miners go to work, and report as to the state of the ventilation. *Corker* v. *Worsley Coal Co.* (1885; Q. B. D.) 1 Times L. R. 515.

In *Canadian Colored Cotton Mills* v. *Talbot* (1897) 27 Can. S. C. 198, it was held that evidence showing that an employee called a "loom-fixer," whose duty it was to examine a loom, after being notified that something was wrong with it, had failed to make an examination, justified submitting the case to the jury.

[13] *Copithorne* v. *Hardy* (1899) 173 Mass. 400, 53 N. E. 915, where the master was held liable for the negligence of one who attended, under the superintendent's orders, to the adjustment of machinery.

The negligence of a superior employee not charged with that duty, who attempts, at the request of a servant who is using an appliance, to remedy a defect therein, is not imputed to the master.[14] Nor is the clause applicable to an employee whose duty it is, under a rule of his master, to examine for his own security the appliances which he uses.[15] Still less is the master liable for the negligence of a mere laborer working under or with others, even though it may be a part of his duty at some particular moment in the progress of the work to look after and attend to certain instrumentalities.[16]

Negligence on the part of the employer in respect to providing machinery, or seeing that it is in proper condition, cannot be predicated from the fact that fellow servants of the injured person used an appliance, without any authority, for a purpose for which it was neither suited nor furnished.[17]

675. Abnormal conditions resulting from the use of the machines: how far regarded as defects.— Injuries resulting from these abnormal conditions which, in all kinds of industrial work, are temporarily created by the user of the appliances furnished by the master, are not considered to be caused by "defects" within the meaning of these statutes. "The absolute obligation of an employer to see that due care is used to provide safe appliances for his workmen is not extended to all the passing risks which arise from short-lived causes."[1] Especially

[14] *Thomas* v. *Bellamy* (1900) 126 Ala. 253, 28 So. 707. Compare § 661, note 6, *supra*.

[15] *Memphis & C. R. Co.* v. *Graham* (1891) 91 Ala. 545, 10 So. 283 (conductor and brakeman denied to be "persons intrusted," etc.).

[16] *O'Connor* v. *Neal* (1891) 153 Mass. 281, 26 N. E. 857, where the court refused to hold the master liable for the negligence of a painter's assistant, who aid[ed] his principal in moving from place to place the planks and barrels from which a temporary scaffold was constructed, and adjusted one of the barrels so carelessly that the scaffold collapsed.

[17] *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586.

[1] *Whittaker* v. *Bent* (1897) 167 Mass. 588, 46 N. E. 121, denying recovery for an injury resulting from the temporary dampness of moulds used in an iron foundry, which can be ascertained only at the moment when they are set up, the reason assigned being that the moulds were small and numerous, the danger transitory, and any further inspection than that of employees setting them up impracticable.

The absence of stanchions on the sides of a trolley is not a "defect," where the placing of such stanchions is the duty of the servants who put on the load. *Corcoran* v. *East Surrey Ironworks Co.* (1888; Q. B. D.) 5 Times L. R. 103, 58 L. J. Q. B. N. S. 115.

The liability of a bank of earth which an employer is engaged in leveling for the purpose of grading the land of a third person, and upon which laborers are at work, to fall when undermined, if not properly shored up, is not a "defect in the ways," etc. *Lynch* v. *Ulyn* (1893) 160 Mass. 248, 35 N. E. 550.

A defect in the "ways" is not predicable, unless there is some alteration in the permanent condition of the way itself. Obstacles lying on or near the way, which do not in any degree alter the fitness for the purpose for which it is generally employed, and cannot be said to be incorporated with it, are not within the purview of this provision. *McGiffin* v. *Palmers Shipbuilding & Iron Co.* (1882) L. R. 10 Q. B. Div. 5, 52 L. J. Q. B. N. S. 25, 47 L. T. N. S. 346, 31 Week. Rep. 118, 47 J. P. 70, denying recovery where a car on which

is this rule applicable when the abnormal conditions would not have existed if the plaintiff himself had done his duty.[2] In cases of this class the only ground on which the master can be held liable is that he was guilty of negligence in not warning his servants of the increased risk to which they would, for the time being, be exposed.[3]

The temporary nature of the abnormal conditions complained of will not, however, protect the master if they amounted to a structural alteration of the appliance in question, and that alteration was made by the employee in charge of it.[4] *A fortiori*, where such a structural

a workman was conveying heavy iron balls struck against a piece of a substance used for lining the furnaces, which had been negligently placed projecting into the roadway on which the car ran, the result being that one of the balls fell on him.

The words "ways, works, and machinery" do not cover a pile of lumber in the yard of a lumber dealer. *Campbell* v. *Dearborn* (1900) 175 Mass. 183, 55 N. E. 1042.

To the same effect see the following cases, where the abnormal conditions were of the nature mentioned in the memorandum of the facts appended to the citations. *Willetts* v. *Watt* (C. A.) [1892] 2 Q. B. 92, 61 L. J. Q. B. N. S. 540 (temporary removal of the cover of a catch pit lying in the line of a path along which servants had to pass in the course of their duties); *May* v. *Whittier Mach. Co.* (1891) 154 Mass. 29, 27 N. E. 768 (employee stumbled over some small pieces of wood which had been piled against the back of a planing machine near which he had to pass, and was hurt by his hand coming in contact with the machine); *Kansas City, M. & B. R. Co.* v. *Burton* (1892) 97 Ala. 240, 12 So. 88 (car left standing on a railway track), overruling on this point *Highland Ave. & Belt R. Co.* v. *Walters* (1890) 91 Ala. 435, 8 So. 357; *Louisville & N. R. Co.* v. *Bouldin* (1895) 110 Ala. 185, 20 So. 325 (oil box standing near the track, which came in contact with plaintiff's foot while he was standing on the pilot of an engine, and threw him off); *Carroll* v. *Willcutt* (1895) 163 Mass. 221, 39 N. E. 1016 (presence of a ledge stone on a scaffolding).

Both on the principle applied in these cases, and also on the ground that the accident was an unexpected one, it has been held that a master could not be held liable under the statute for an injury due to a railway tie with a projecting spike in it, which had been taken up with a view to repairing it, and placed by the side of the road, where the cause of the injury was the fact that a horse which the plaintiff was leading was frightened and backing against him, knocked him down upon the tie. *McQuade* v. *Dixon* (1887) 14 Sc. Sess. Cas. 4th series, 1039.

Whether the proximate cause of the injury was the negligence of a fellow servant in regard to the mer[illegible] of appliances of the work is pr[illegible] question for the jury. *Knight* v. [illegible]*erman Wheel Co.* (1899) 174 Mass. 455, 54 N. E. 890.

[2] A verdict for the plaintiff should be set aside, where his own evidence shows that, if the machine had been properly attended to by himself, the accident would not have happened. *Kay* v. *Briggs* (1889; Q. B. D.) 5 Times L. R. 233.

An employer is not liable for the death of an employee while laying pipe in the bottom of a sewer trench in process of construction by the employer, through the caving in of the walls of the trench, due to insufficient shoring and bracing, where such employee was himself intrusted with superintendence of the shoring and bracing, and paid higher wages because of it. *Conroy* v. *Clinton* (1893) 158 Mass. 318, 33 N. E. 525. This particular situation, however, would seem to be more appropriately referred to the conception of an inability to recover, predicated from the contributory negligence of the injured person.

[3] *Willetts* v. *Watt* (C. A.) [1892] 2 Q. B. 92, 61 L. J. Q. B. N. S. 540.

[4] See *Tate* v. *Latham* (C. A.) [1897] 1 Q. B. 502, 66 L. J. Q. B. N. S. 349, 75 L. T. N. S. 694, holding the absence of the guard of a saw to be a "defect," where it had been temporarily removed by the sawyer. This decision practically overrules the *dictum* of Fry, L. J., that the defects contemplated by the statute are those of a "chronic character."

alteration was intended to be permanent the servant will not be excluded from the benefits of the statute simply for the reason that the new arrangements were only completed the day before the accident.[5] Moreover, it would seem that conditions which, in the first instance, are merely temporary in their nature, will, if they are allowed to become permanent, be assimilated, for the purposes of these statutes, to defects inherent in the substance of the instrumentalities themselves.[6]

When the master keeps a readily accessible stock of simple appliances, he is not bound under the statute, any more than at common law, to see that a servant asks for a new one when that which he has been using is worn out.[7]

The decisions just cited suggest that the temporary or permanent nature of the defect is not the true differentiating factor in this class of cases, and that the essential questions are rather (1) whether the abnormal conditions were mere incidents in the progress of the work, or structural; and (2), supposing them to be of the latter description, whether they were brought about by the act or volition of the employee who was in charge of the instrumentality to which the injury was due.

Willetts v. *Watt* (1892) 2 Q. B. 92. In the report in 61 L. J. Q. B. N. S. 510, the phrase used is "somewhat chronic." It was pointed out in the more recent of these cases by Bruce, J. (divisional court), that this theory of the Lord Justice is not necessary to sustain the conclusion arrived at. That conclusion, indeed, might well be put upon the ground that no negligence was established, as the catch pit into which the plaintiff fell had been opened to allow work to be done, and was left unfenced because it was not possible to do the work while a fence surrounded it.

[5] *Copithorne* v. *Hardy* (1899) 173 Mass. 30, 53 N. E. 915 (shaft attached to the ceiling of a room by brackets and screws, held not to produce conditions belonging to that transitory class for which the employer is not responsible beyond furnishing a choice of proper materials or instrumentalities).

[6] This seems to be the rationale of a Scotch case in which it has been held that a manhole at the side of a railway in a mine, so obstructed with rubbish that a miner is unable to use it as a refuge when cars are approaching is a "defect in the ways." *Ferris* v. *Cowdenbeath* (1897) 24 Sc. Sess. Cas. 4th series, 615.

[7] There can be no recovery for the death of an employee, caused by the breaking of a wooden lever by which a fellow workman was helping to raise a heavy iron door on its hinges, causing the door to swing down and strike an iron lever held by deceased, driving it into his abdomen, in the absence of any evidence that the broken stick was defective, or, if so, that the defect could have been discovered. *Allen* v. *G. W. & F. Smith Iron Co.* (1891) 160 Mass. 557, 36 N. E. 581. The court said: "The whole matter was in the hands of the deceased. He was the person in immediate charge of the furnace. If a new stick was needed, it was his business to know it. The primary duty rested on him; not on the superior officer. Again, if a new stick had been needed, it could have been obtained of the carpenter by the deceased at any time. The defendant kept a stock of lumber of the proper size on hand, and the deceased only had to ask for what he wanted. If such a stick can be said to be part of the works or machinery, the defendant's duty to the deceased did not require it to see that he called for a proper one. It was enough that it had proper ones within convenient reach."

One of a number of chains furnished for use as required is regarded, when it is applied to the purpose for which it

676. Defects in temporary appliances constructed by the servants themselves not deemed to be chargeable to the employer.—A special application of the principle exemplified in the preceding section is the doctrine enforced in several American cases, that there can be no recovery under this provision of the statute, where the injury was the direct result of the negligent manner in which the servants themselves constructed a temporary appliance from adequate and suitable materials furnished by the master.[1] This rule is the counterpart of the doctrine which, in common-law actions, prevents recovery under similar circumstances (see chapter XXX., subtitle C, *ante*), and is subject to the same qualification as that doctrine, *viz.*, that it does not protect the master, if the defective appliance was one which he was

was designed, as a permanent instrumentality, and not one of those small things which go through a rapid course of wearing out and replacement, as to which the rule is that it may be left to the judgment of the workmen when one of them is to be discarded. The making of a link for such a chain, therefore, is not one of those merely transitory adjustments which the master is under no personal obligation to see carefully performed. *Haskell* v. *Cape Ann Anchor Works* (1901) 178 Mass. 485, 59 N. E. 1113.

[1] The action has been held not maintainable where the cause of the injury was one of the following appliances:

Two ladders selected by employees from a supply furnished by the employer, and fastened together for use in painting a building. *McKay* v. *Hand* (1897) 168 Mass. 270, 47 N. E. 104. The court said: "From the description of the ladder which broke, it is difficult to see from the evidence that the defendant was negligent in keeping it among his lot of ladders and in permitting it to be used; and if the sole negligence was that the ladders were fastened together and improperly placed against the house, that was the fault of the plaintiff and his fellow workman, and it was known to and appreciated by the plaintiff at the time. A ladder may be a sound light ladder of sufficient strength to be used by itself, but not suitable to be made the butt of two ladders fastened together."

A temporary staging put up for the purpose of erecting a building. *Burns* v. *Washburn* (1894) 160 Mass. 457, 36 N. E. 199.

A temporary staging put up by workmen themselves who are slating a roof. *Reynolds* v. *Barnard* (1897) 168 Mass. 226, 46 N. E. 703.

A temporary staging used by painters in painting the walls of a building. *Adasken* v. *Gilbert* (1896) 165 Mass. 443, 43 N. E. 199.

The master cannot be held liable as for a defect, where a scaffold falls, owing to the fact that a barrel by which it was supported was placed upon some rubbish of an accidental or temporary character, on the floor of the room where the plaintiff was at work. *O'Connor* v. *Veal* (1891) 153 Mass. 281, 26 N. E. 857.

The employers' liability for injuries sustained by the giving way of a part of a staging is not established where the evidence does not tend to show that they furnished the staging as a completed structure, or that they assumed to exercise any control or supervision as to how it should be built or kept or adapted for work, or that they failed to furnish a sufficient quantity of suitable materials, or that they employed incompetent workmen, but does show that the staging in use in the building had been in the care of the workmen themselves for several months. *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528.

The gravamen of a declaration showing that the plaintiff, a journeyman painter, was injured owing to the negligence of another painter in failing to fasten properly his end of the hanging scaffold on which they were working, is the negligence of a fellow servant in handling or using an appliance, and therefore no cause of action under the statute is alleged. *Ashley* v. *Hart* (1888) 147 Mass. 573, 1 L. R. A. 353, 18 N. E. 416.

bound to furnish in a com[illegible]ted condition.[2] From the case cited it would appear that the servant has the burden of proving the existence of such an obligation, whenever the appliance was one which was of an essentially temporary description, and was intended to be used only for the particular piece of work then in progress.

Another possible qualification of the rule is that the master might be held responsible if the temporary appliance was one constructed by a superintending employee, unless it should be held that proof of negligence on the part of such employee would not sustain an allegation of injury caused by a "defect," and that, under the circumstances supposed, the complaint must be based on the words of the provision in the following subsection of the act. In the absence of any direct authority on the point, all that can be said is that, in any case where it may be uncertain whether the master can be held liable simply on the ground of the existence of a defect, it would be well to insert an alternative count averring negligence in the exercise of superintendence.

677. Duty of servant to report defects.—*a. Statutory and common-law doctrines compared.*— In a case decided a few years after the passage of the English act, it was laid down by Smith, J., that the defense which is based upon the fact that the servant failed to communicate his knowledge of the defect to the employer or his representative is a new one, given by the statute.[1] According to Lord Watson, also, the provision now under discussion puts the employer in a more favorable position than that which he occupied under the common law.[2] The view of that distinguished judge has been adopted by the supreme court of Canada.[3] A similar doctrine seems to prevail in Alabama.[4]

[1] See *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528.

[2] *Weblin* v. *Ballard* (1886) L. R. 17 Q. B. Div. 122, 55 L. J. Q. B. N. S. 395, 54 L. T. N. S. 532, 34 Week. Rep. 455, 50 J. P. 597.

[3] See *Smith* v. *Baker* [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392, where, in the course of his comments on the clause, he remarked: "I think the object and effect of the enactment is to relieve the employer of liability for injuries occasioned by defects which were neither known to him nor to his delegates down to the time when the injury was done. At common law his ignorance would not have barred the workman's claim, as he was bound to see that his machinery and works were free from defect, and so far the provision operates in favor of the employer."

[1] *Webster* v. *Pabst* (1892) 21 Can. S. C. 580. It is perhaps not amiss to introduce here a few remarks as to the singularly unsatisfactory character of the expositions of principles in this case, more particularly when it is considered with reference to the special findings which are set out in the record. The answers of the jury to three of the questions propounded by the trial judge were to this effect: (1) That the plaintiff had complained of the defect to the person who appeared to be the proper person to receive a complaint; (2) that the defendant did not know of the defect; (3) that the member of the defendant firm who was himself acting as manager ought to have been cognizant of the defect.

In view of the first of these findings it is not apparent why the effect of the failure of the servant to notify the mas-

But with all deference to these authorities, it seems open to doubt whether the theory thus propounded is correct. There is, it is true, no English decision which in terms lays down the rule that a servant who learns of a defect is bound to communicate his knowledge to his master, and that his failure to give such information constitutes a breach of a specific duty which of itself is enough to prevent his recovering for any injury which he may thereafter receive, owing to the existence of the defect. But the reason for the lack of direct authority on the point is sufficiently obvious. In all the cases decided under common-law doctrines up to the time when Lord Watson delivered this opinion, the circumstances were necessarily such as to bring them within the scope of the principle by virtue of which the servant's action was absolutely barred whenever it was shown that he went on working with a full appreciation of a risk resulting from the master's negligence. The natural result was that, although the failure of the servant to report or complain of a defect was mentioned in some of

ter of the defect should have been regarded as a material question in the case. There is no intimation that the evidence was insufficient to warrant the conclusion arrived at by the jury, nor that the notification was inadequate to charge the master with knowledge, for the reason that it was made to a mere fellow servant. So far as the report shows, it may have been made to the manager of the concern, who, as was stated in the third finding, was one of the partners in the defendant firm. But, even if we assume that the first finding could not be treated as an element in the case for some reason, evidential or doctrinal, which is not disclosed, there still remains the difficulty that the jury also declared that this managing partner "ought to have been cognizant" of the defect. That this finding was, so far as defendant's liability was concerned, equivalent to the first finding, is indisputable, both on principle and authority. See *Mellors* v. *Shaw* (1861) 1 Best & S. 437, 30 L. J. Q. B. N. S. 333, 7 Jur. N. S. 845, 9 Week. Rep. 748, where Blackburn, J., remarked, during the argument of counsel, that an allegation that an instrumentality was known by the defendant to be in an unsafe condition is established by proof that he "ought to have known" that it was in that condition. Other English cases which declare or assume that liability on the master's part is negatived by his ignorance of the defect only where it appears that such ignorance was excusable are *Wecus* v. *Mathieson* (1864) 4 Macq. H. L. Cas. 215; *Feltham* v. *England* (1866) L. R. 2 Q. B. 33, 36 L. J. Q. B. N. S. 14, 15 Week. Rep. 151, 7 Best & S. 676; *Paterson* v. *Wallace* (1854) 1 Macq. H. L. Cas. 748; *Roberts* v. *Smith* (1857) 2 Hurlst. & N. 213, 26 L. J. Exch. N. S. 319, 3 Jur. N. S. 469; *Webb* v. *Rennie* (1865) 4 Fost. & F. 608. For the American decisions to the same effect see § 125, *ante*. In view of this doctrine the finding in question manifestly puts the master in the same position as if notice of the defect had actually been given by the servant, and rendered it a mere matter of supererogation to inquire whether or not he was relieved from liability by the servant's failure to give notice. The defendant firm was plainly answerable on the simple ground that one of its members had been personally negligent in not remedying a defect of which he had constructive knowledge. See *Mellors* v. *Shaw* (1861) 1 Best & S. 437, 30 L. J. Q. B. N. S. 333, 7 Jur. N. S. 845, 9 Week. Rep. 748; *Ashworth* v. *Stanwix* (1861) 3 El. & El. 701, 30 L. J. Q. B. N. S. 183, 7 Jur. N. S. 467, 4 L. T. N. S. 85.

Thus far we have been discussing the case on the assumption that the court, in deciding that a judgment for the plaintiff should not be set aside for the mere reason that the defendant "had no notice" of the defect, used the phrase in the sense of "had received no notification from the servant." This is the construction put upon the decision in the

the cases,[5] this fact was never treated as a material element in the case, the master's defense being regarded as complete without any reference to the question whether the servant had communicated his knowledge. In none of these cases was the evidential significance of the servant's silence considered in any other point of view than as a circumstance tending to show his acquiescence in the conditions,—that is to say, as a circumstance corroborating a presumption, already absolute, that the risks in question had been accepted. Such being the state of the authorities, the mere fact that the existence of a duty on the servant's part to notify his master of a defect was never affirmed cannot fairly be adduced as a ground for denying that there was such a duty. When subjected to the test of general principles, the correctness of Lord Watson's theory seems to be equally disputable. It is impossible to adopt it without accepting the conclusion, that, if a jury has in a common-law action found that the servant was guilty of contributory negligence in failing to give notice of the defect which caused his injury, and it is clear that the verdict was based on the hypothesis that there was a legal duty incumbent on the servant to give the notice, a court of review would be constrained to set the verdict aside. Such a proposition seems too preposterous to entertain. The extreme improbability of such a verdict's even being rendered may be readily conceded; but this practical consideration is immaterial in a discussion of the abstract point of law which is involved.

The general effect of the American decisions in this connection is

reporter's headnote, and the reliance placed by Strong, J., upon the passage from Lord Watson's opinion, where this is undoubtedly the import of the words, shows that the court intended, at all events, to assert the doctrine that the servant did not forfeit his right of action by not giving notice of a defect which was known to him. But it may be desirable to advert, in passing, to the ambiguity of phrase "had no notice," which, so far as the words themselves are concerned, may also be taken to mean "had no actual knowledge." The significance of this fact when considered with reference to the substance of the findings above referred to is obvious. Such a construction of the phrase would render Mr. Justice Strong's remarks applicable to the second of those findings, and upon this circumstance, taken in connection with the further circumstance, already commented upon, that the findings as to the complaint made by the servant, and the master's possession of constructive knowledge of the defect were not deemed to be conclusive in the servant's favor a plausible argument might be based, that the court also intended to stand sponsor for the doctrine that it is the existence or absence of actual knowledge that determines whether the master is or is not liable. Such a doctrine, as is very plainly shown by the English cases cited above, would be erroneous. But the inquiry is not worth pursuing in the present connection. We have merely drawn attention to the point as being one of the obscure aspects of a case which, to say the very least, is neither a model of lucid statement nor a favorable exemplification of the manner in which a court of review should deal with the special findings of a jury in actions of this sort.

[4] See *Mobile & B. R. Co.* v. *Holborn* (1887) 84 Ala. 133, 4 So. 146.

[5] For example, *Skipp* v. *Eastern Counties R. Co.* (1853) 9 Exch. 223, 3 C. L. Rep. 185, 23 L. J. Exch. N. S. 23.

inconclusive for the same reason as that which has been adverted to in commenting on the English cases. The failure to report a defect is usually treated merely as a cumulative ground for denying the servant's right of recovery, and not as the breach of a specific duty.[6]

Inasmuch as a servant frequently finds himself relegated to his common-law rights owing to his failure to give due notice that the injury was sustained, or to bring the action within the statutory period, the true doctrine on this subject is still a question of more than theoretical interest in England and her colonies, where it has not yet been determined how far the doctrine enunciated in *Smith* v. *Baker*[7] may, when the question arises, be held to have modified, in common-law cases, the theory of the older decisions, that the servant's acceptance of a risk is to be inferred, as matter of law, from his continuance of work with a knowledge of its existence. See § 280, *ante*. In Massachusetts it seems to be immaterial, in this point of view, whether the action is brought at common law or under the statute, as the English doctrine that the servant's assumption of risks is a question for the jury where the statute is relied upon has been definitely repudiated in recent decisions.[8]

b. Position of a servant who fails to report a defect.—In an action brought under a statute which merely declares that the servant cannot recover unless he reports the defect, it is clear that, if he fails to make the report, and goes on working without knowing that the master is aware of the defect, he cannot recover for any injuries which he may thereafter receive by reason of its existence.[9] The doctrine laid down

[6] See, for example, the language used in *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914; *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 224, 25 L. ed. 612, 617; *McQueen* v. *Central Branch Union P. R. Co.* (1883) 30 Kan. 691, 1 Pac. 139; *Pollich* v. *Sellers* (1890) 42 La. Ann. 623, 7 So. 786.

[7] [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392. It is significant that in this case Lord Watson was prepared to hold that, apart from the act of 1880, the plaintiff's remedy was not necessarily taken away by the mere fact that, in the knowledge of the risk and after remonstrance, he continued to work.

[8] *O'Maley* v. *South Boston Gaslight Co.* (1893) 158 Mass. 135, 47 L. R. A. 161, 32 N. E. 1119; *Davis* v. *Forbes* (1898) 171 Mass. 548, 47 L. R. A. 170, 51 N. E. 20. See § 376, *ante*.

[9] *Mobile & B. R. Co.* v. *Holborn* (1887) 84 Ala. 133, 4 So. 146 (where the defense given by this clause was described as a special one given by the statute); *Thomas* v. *Bellamy* (1900) 126 Ala. 253, 28 So. 707.

In *Columbus & W. R. Co.* v. *Bradford* (1888) 86 Ala. 574, 6 So. 90, the effect of the Alabama act was thus explained: "The existing law was supposed to fall short of the attainment of justice, in that, and only in that, no action was allowed for the negligence of a certain class of persons. The statutory purpose was to charge the master for the negligence of this class of persons in his employment, in the same manner, under like conditions, and to the same extent as he was before charged for his own negligence, or that of superior employees. In the effectuation of this purpose, it became necessary to go further than a mere declaration of liability for the negligence of the fellow servants of

in *Smith* v. *Baker*,[10] is presumably not applicable under such circumstances, though the writer is not aware of any case in which the point has been discussed. In Ontario and British Columbia the position of the servant is more favorable, the legislature having expressly enacted that the servant is not debarred from recovery merely by reason of his having continued to work with knowledge of the risk. In view of the extreme unlikelihood that any jury will, even in a case of this description, pronounce the risk to have been assumed by the plaintiff, it will be apparent that the practical effect of this provision is to render almost nugatory the protection afforded to the master by the clause which makes it the duty of the servant to give notice.

By the express words of the statutes a servant is not bound to give information of a defect where he knows that it has already been discovered to the master.[11]

c. Position of a servant who has reported a defect.—The rights of action acquired by a servant who duly reports a defect in compliance with the statute, and then goes on working, depend largely upon the significance attributed the maxim, *Volenti non fit injuria*. A full discussion of the meaning and effect of this maxim will be found in chapter XXI., *ante;* but it is necessary to state in the present connection the result of the decisions, in so far as they have a direct bearing upon the provision now under review.

In an oft-cited case Lord Esher expressed the opinion that the effect of this provision was that the servant was always entitled to recover if he gave information of the defect.[12] Bowen, L. J., did not refer specifically to this point, but the theory upon which he and Fry, L. J., proceeded in giving judgment against the plaintiff, *viz.*, that the maxim was, under the circumstances, a bar to the action, necessarily implies a disapproval of the doctrine that the right of recovery became absolute as soon as the servant had made a complaint to the proper person.

In another case decided in the same year Lord Esher remarked that

the plaintiff, and to guard against a construction of that declaration which would give to the employees redress for the fault of their coemployees, to which they would not have been entitled for that of the employer, or of a superior servant of the common master. To this end—to preserve to the master the same defense against the negligence of his servant as he had against the consequences of his own carelessness—the legislature declared that he should not be liable if the complaining employee knew of the defect or negligence which caused the injury, and, not being aware that the fact was already known to the master, or some person superior in authority, failed to communicate his knowledge to the employer or superior employee."

[10] [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392.

[11] *Truman* v. *Rudolph* (1895) 22 Ont. App. Rep. 250.

[12] *Thomas* v. *Quartermaine* (1887) L. R. 18 Q. B. Div. 685 (p. 689), 56 L. J. Q. B. N. S. 340, 57 L. T. N. S. 537, 35 Week. Rep. 555, 51 J. P. 516.

it was very difficult to give a sensible construction to the provision, and enunciated a view somewhat different from that intimated in the earlier case, holding the meaning of the words to be that, if the servant did give notice, and the defect was not remedied, he might recover unless he was brought clearly within the maxim.[13] The plaintiff's action was held by the majority of the court to be maintainable, and the fact that Fry, L. J., who had concurred with the views of Bowen, L. J., in *Thomas* v. *Quartermaine*, agreed in the judgment and that he did not give any intimation that his views had undergone a change since the earlier case was decided, shows that he did not intend to go to the length of holding that the servant had done everything that was required to give him an indefeasible right of action when he had given notice of the defect. The subsequent decision of the House of Lords in *Smith* v. *Baker*[14] also falls short of the extreme theory suggested by Lord Esher in *Thomas* v. *Quartermaine*, as it simply decides that the servant does not forfeit his right of action merely because he goes on working after remonstrating against the manner in which the master's appliances are used.[15]

In Alabama it has been held that, in order to fulfil his statutory duty as to the reporting of a defect a servant must notify either the master himself or the employee who has specific function it is to see that the instrumentality in question is in proper condition. It is not sufficient to notify a superior employee who is not intrusted with that function.[16] The rule is possibly more favorable to the servant in Ontario, though the point has not been directly raised in any case that has come to the writer's notice.[17]

[13] *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647 (p. 656), 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 281.

[14] [1891] A. C. 325, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, 40 Week. Rep. 392.

[15] The testimony on the record was that one of the plaintiff's fellow workers had, in his hearing, complained to the foreman of the danger of slinging stones over their heads with the crane, and that he himself had told the crane driver that this was not safe. But in the various opinions delivered, these facts were referred to merely as evidence tending to show that the servant was fully aware of the risks he was running. The question whether the servant, by giving notice of the abnormal danger, acquires an absolute right to recover damages for such injuries as he may thereafter sustain from the existence of those conditions, was not discussed.

[16] *Thomas* v. *Bellamy* (1900) 126 Ala. 253, 28 So. 707.

[17] In *Sim* v. *Dominion Fish Co.* (1901) 2 Ont. L. Rep. 69, Armour, C. J. O., said that if the servant's right of action had depended on the statute it would have been necessary to send the case to a jury in order to determine whether a superior employee knew of the defect,—a remark which may perhaps be construed as an intimation that a notification to any superior employee would have been sufficient.

D. Liability for the negligence of employees exercising superintendence.

678. Introductory.—The provision of the employers' liability acts which will be discussed in this subtitle is that which gives a servant the right to recover damages for an injury caused "by reason of the negligence of any person in the service of the employer who has any superintendence intrusted to him, while in the exercise of such superintendence." On referring to the text of these statutes in subtitle A, *supra,* it will be found that these words constitute § 1, subs. 2, of the original English act, and also of the acts in force in Newfoundland, New South Wales, Victoria, Queensland, South Australia, New Zealand, and Alabama, and § 3, subs. 2 of the acts of Ontario, British Columbia and Manitoba.

A clause of the same tenor is found in the acts of Massachusetts, New York, and Colorado, an action being declared to be maintainable for an injury caused "by reason of the negligence of any person in the service of the employer, intrusted with and exercising superintendence, whose sole or principal duty is that of superintendence." By Mass. Stat. 1894, chap. 499, § 1, the following words were added to this clause; "or, in the absence of such superintendent, of any person acting as superintendent with the authority or consent of such employer." The recently enacted New York act also embraces this provision.

The Indiana act, which in other respects follows the English one very closely, contains no provision expressly relating to superintending employees.

By § 8 of the English and Newfoundland acts it is declared that the expression, "person who has superintendence intrusted to him," means "a person whose sole or principal duty is that of superintendence, and who is not ordinarily engaged in manual labor." The corresponding provision in the acts of Ontario, British Columbia, and Manitoba is § 2, subs. 1, and runs as follows: "'Superintendence' shall be construed as meaning such general superintendence over workmen as is exercised by a foreman, or person in a like position to a foreman, whether the person exercising superintendence is or is not ordinarily engaged in manual labor." There is no supplementary definition clause in the acts of Alabama, Massachusetts, New York, and Colorado, but the effect of the main provision in the two latter acts is evidently to give the servant a right of recovery for the negligence of agents performing functions not materially different from those

contemplated by the framers of other statutes. See further §§ 680-685, *infra*, as to the persons who are deemed to be "exercising superintendence" within the meaning of each section of the statutes.

679. Conditions precedent to recovery; generally.— In order to recover under the provisions declaring employers to be liable for the defaults of servants exercising superintendence the plaintiff must establish these facts:

(1) That the servant was a "superintendent" within the meaning of the acts. (2) That the act which was the immediate cause of the injury was negligent. (3) That the act was done in the exercise of the controlling functions of the superintendent.

These evidential prerequisites to the maintenance of the action will be discussed seriatim in the following sections.

680. What employees are superintendents under the English, New York, Massachusetts, and Colorado acts.—*a. General remarks.*— The phraseology employed to define the class of persons for whose negligence the master is responsible is, it will be observed, not quite the same in these statutes. They all define a "superintendent" as an employee whose "sole or principal duty is that of superintendence." But the Massachusetts, New York, and Colorado acts omit the words which specifically exclude liability for the negligence of an employee who is "ordinarily engaged in manual labour." This complementary clause seems to possess little, if any, real significance, and to be, for practical purposes nothing but the negative expression of a conception which is adequately defined by that which precedes it. In view of the usual system upon which industrial establishments are conducted, it may be regarded as a necessary implication that an employee whose principal duty is that of superintendence is never "ordinarily engaged in manual labour." And the converse of this proposition also holds.

b. Employees held to be vice principals.—That the negligent employee was "exercising superintendence" within the [illegible] these statutes is obviously a warrantable deduction for a jury, whenever the evidence indicates that the authority wielded by him was sufficiently extensive to place him in the category of common-law vice principals as that term was understood in England before the judgment of the House of Lords in *Wilson* v. *Merry*,[1] abrogated the doctrine that masters are liable for the negligence of managing agents, and as it is still understood in all, or nearly all, the American states which stand outside the list of those in which the doctrine obtains that any superior

[1] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

servant represents the master in so far as he may be performing the function of giving orders.[2] The applicability of these provisions to all employees who are intrusted with the full control of the whole of an establishment, or one considerable department thereof, has never, it is believed, been disputed, and is taken for granted in several of the cases in which the actual questions discussed were whether the act which caused the injury was negligent, and, if so, whether the negligence was in the exercise of superintendence or in the performance of some other function.[3] See §§ 686 688, *infra*.

As regards the lower grades of employees, it may be said that, so far as any general principle can be extracted from the decisions, a court will not disturb a finding that the delinquent employee was exercising superintendence, if the evidence tends to show that he was in full charge of some specific piece of work, and invested with a discretionary power to determine the manner in which the general instructions of the employer or of some higher official should be carried out.[4] In such cases the inference that the descriptive words of the statute are applicable is sometimes corroborated by specific testimony which tends to show that the superior servant did not work, and was not expected to work, with his hands.[5] But it does not appear that the absence of such testimony is of itself a sufficient reason for denying the plaintiff's right to recover. Compare § 688, *infra*.

[1] A complete review of the cases showing the position of the courts of England, the colonies, and the United States with respect to the representative character of controlling employers will be found in chapter XXVIII., *ante*.

[2] Testimony showing the acts of one alleged to be superintendent of defendant's foundry, in putting persons out of the shop, and what he said while doing so, is admissible as tending to show whether or not he was acting as superintendent. *McCabe* v. *Shields* (1900) 175 Mass. 438, 56 N. E. 699.

[3] A stevedore's foreman superintending a subdivision of the work of unloading a ship may properly be found to be a vice principal. *Wright* v. *Wallis* (1885) C. A.) 3 Times L. R. 779.

Evidence that the delinquent was a section foreman who had immediate charge and superintendence of a gang of five men engaged in handling freight, and that it was his duty to take receipts, check the freight into the cars, and see that it was loaded into the right cars, warrants a finding that his principal duty was that of superintendence. *Mahoney* v. *New York & N. E. R. Co.* (1894) 160 Mass. 573, 36 N. E. 588.

A foreman of a section gang upon a railroad, not at work himself, but looking on and seeing that the work is done, and, in addition to the performance of other functions, giving warning of the approach of trains to the section men, may be properly found to be a vice principal. *Davis* v. *New York, N. H. & H. R. Co.* (1893) 159 Mass. 532, 34 N. E. 1070, Distinguishing *Shepard* v. *Boston & M. R. Co.* (1893) 158 Mass. 174, 33 N. E. 508, where it was laid down in unqualified terms that a section foreman is not a person intrusted with and exercising superintendence, so as to render the railroad company liable for personal injuries to a section hand, occasioned by negligence in running a hand car on which the gang is riding.

A stable foreman was assumed to be a superintendent, in *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647, 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 281.

[4] See, for example, *McPhee* v. *Scully* (1895) 163 Mass. 216, 39 N. E. 1007,

It is also well settled that, if the existence of the other elements of liability is made out, a court will not say, as matter of law, that the plaintiff must fail in his action because the negligent employee did a certain amount of manual labor in connection with the work which he supervised. That fact is not conclusive upon the question whether his principal duty was that of superintendence.[6] See also § 688, *infra*.

The fact that a foreman is paid higher wages than the ordinary laborers is a circumstance to be considered in connection with other

where the delinquent was the foreman of a gang of men employed on a pile driver, with authority to employ and dismiss men, who frequently had charge of the work, and who gave all the directions which were given at the time the injury was received.

[6] "If you have a person whose sole or principal duty is to superintend the work of others, the master will be liable for injuries to those who act in obedience to his orders, even though such superintendent should himself casually do manual labor." Smith, J., in *Kellard* v. *Rooke* (1887) L. R. 19 Q. B. Div. 585, 588.

See also *Crowley* v. *Cutting* (1896) 165 Mass. 436, 43 N. E. 197 (superintendent of quarry sometimes helped to attach the dogs by means of which heavy stones were hoisted); *Reynolds* v. *Barnard* (1897) 168 Mass. 226, 46 N. E. 703 (superior servant here was a foreman of slaters); *McCabe* v. *Shields* (1900) 175 Mass 438, 56 N. E. 699 (superior servant who participated in the work, and, in the absence of the employer, gave directions).

It is error to nonsuit a plaintiff, where the evidence is that an employee denominated a "walking superintendent or foreman" gave the negligent order from which the injury resulted, although it was also proved that he helped his subordinates to perform the work to which his order related. The jury should be asked whether he was one of those persons whose duty it was not to work himself, but to see that others work. *Ray* v. *Wallis* (1887: C. A.) 51 J. P. 519, Affirming (1886: Q. B. D.) 3 Times L. R. 777.

In *Prendible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675, it appeared that a staging which fell was erected in the yard of the defendant's sawmill, by the side of a wood pile, for the purpose of enabling the workmen to pile the wood higher. There was evidence for the plaintiff that the staging was built by C., who was in the defendant's employ, assisted by a member of the piling gang; that no one gave any orders to this gang except C.; that he was the foreman of the gang; that he sometimes worked with his hands; but worked when he pleased, and did whatever work he pleased; that when he was working he was overseeing the men and giving them directions; that he placed the men at work whenever he saw fit; and that he hired workmen at different times, upon their application to him for work. Two of the defendant's witnesses testified that C. had general authority over the gang of workmen. Held, that the jury would be warranted in finding that C.'s principal duty was that of superintendence.

Whether A., employed by the defendant as foreman of its yard but who at times worked with his own hands, is one whose "principal duty is that of superintendence," is a question for the jury, where the plaintiff was injured by the falling upon him of a large iron pump which, loaded upon a truck, he with others was moving from one place to another in the defendant's works, in accordance with A.'s directions. *Gibbeneck* v. *Dean Steam Pump Co.* (1896) 165 Mass. 202, 43 N. E. 85.

The testimony of an employee that it took most of his time telling the other employees what to do and giving them their work, and that during the whole day he kept run of the men, and kept them at work, and told them what to do and what not to do, justifies a finding by the jury that his principal duty was that of superintendence, notwithstanding his later testimony that he worked about three quarters of the time with his own hands, and that during that time he was bossing the men. *Riou* v. *Rockport Granite Co.* (1898) 171 Mass. 162, 50 N. E. 525.

evidence upon the question whether his sole or principal duty is that of superintendence.[7]

c. Employees for whose negligence the master is not liable.—The courts have taken the position that something more than the mere exercise of control is necessary to constitute an employee a superintendent within the statute. This provision, in other words, is not construed as being declaratory of the "superior servant" doctrine, which prevails, under the common law, in some jurisdictions. See chapter XXVIII., subtitle D., *ante*. This conception of the meaning of the statute is doubtless warranted by the fact that cases of the mere exercise of control have been provided for by the succeeding subsection of the statute. But it seems to be fairly open to question whether some of the decisions cited below have not construed the facts with undue rigor to the plaintiff's disadvantage. The result of the view thus taken is that the master is not responsible for the negligence of an employee who habitually participates in the work done by his subordinates, and whose authority over them is limited to giving directions in respect to that work.[8]

[7] *O'Brien* v. *Look* (1898) 171 Mass. 36, 50 N. E. 458, where the servant was allowed to recover upon evidence showing that the delinquent, besides receiving higher wages, employed and discharged men, and that he had seventeen or eighteen men working under him and subject to his orders as to the time of beginning and quitting work, and as to the manner of its performance.

[8] It has been held that no action can be maintained for the negligence of the following employees:

A workman who was being assisted by another in the simple operation of unloading a cart. *Allmarch* v. *Walker* (1885; Q. B. D.) 78 L. T. Journ. 391.

A man ordinarily engaged in manual labor, although he in fact superintended his fellow workmen as a "ganger" or "gang foreman." *Hall* v. *North Eastern R. Co.* (1885; Q. B. D.) 1 Times L. R. 359 (new trial ordered to determine whether an employee in charge of a body of men engaged in loading cars was a superintendent or ordinarily engaged in manual labor).

A foreman who worked "at getting out lumber and piling it up, and in operating saws." *O'Brien* v. *Rideout* (1894) 161 Mass. 170, 36 N. E. 792 (plaintiff was a common laborer put to work at a saw).

One employed as a common painter, receiving the same pay and doing the same work as the other men on the job. *Adasken* v. *Gilbert* (1896) 165 Mass. 443, 43 N. E. 199.

The testimony of the foreman of gang of slaters, called by the employer, that he worked with his hands nine tenths of the time, is not conclusive as to that fact as bearing upon the question whether the witness's principal duty was that of superintendence, but presents a question for the jury, although the fact, if proved, takes the case out of the statute. *Reynolds* v. *Barnard* (1897) 168 Mass. 226, 46 N. E. 703.

Evidence that a person employed by another as superintendent of the blasting of a ledge of rock by means of dynamite exploded in drill holes by electricity worked with his own hands in attending to the fire under the steam boiler, in sharpening all the tools used by the workmen, in charging the drill holes and in clearing them out, and in other acts of manual labor, which occupied the most of his time, will not warrant a finding that his "principal duty is that of superintendence." *O'Neil* v. *O'Leary* (1895) 164 Mass. 387, 41 N. E. 662.

In *Cushman* v. *Chase* (1892) 156 Mass. 342, 31 N. E. 4, the delinquent employee was the engineer of the engine by means of which a hoisting apparatus, used for transferring a ship's cargo to a lighter, was operated. His station was on the lighter, and the hold

681. — under the Alabama act.— As the master is by this act made liable for the negligence of employees who have "any superintendence intrusted to them," and these very general words are not qualified by any limiting or explanatory expressions, the inference would seem to be that the legislature intended to create a larger class of vice principals than that which is constituted by the acts commented upon in the last section. But how much wider the responsibility of the master really is cannot be determined with any degree of precision from the decisions, as they stand. The only case in which it seems impossible to avoid the conclusion that the result would have been different if the action had been brought under the acts just mentioned is one in which it was held that a railroad company must answer for injuries to a brakeman resulting from the negligence of an engineer in running the engine.[1] Under those acts, of course, an action may be maintained for such an injury, if the declaration is based on the subsection expressly declaring engineers to be vice principals. But in view of the decisions cited in the last section, by which the master's liability for the negligence of an employee operating a piece of machinery is de-

of the vessel was out of his sight. There were four men in the hold whose work was to collect the bundles of laths into heaps, around which they put a rope. When the fall was lowered the hook was attached to the rope, and a signal given to the stageman, who signaled to the engineer to raise or lower as the work in the hold required. The engineer employed the men in the first instance, and set them at work. He went into the hold on several occasions, for a few moments at a time, and showed them how to adjust the rope around the bundles of laths. He discharged and employed men. The unloading of the vessel took two or three days, and the men were paid by the defendant in person, who was there several times for a little while on each occasion. The engineer did no manual labor, except the running of the engine. "Upon the facts," said the court, "it might be competent to find that the engineer was to some extent a superintendent. The employment and discharge of workmen, setting them at work, and showing them how to do work, are acts consistent with superintendency. But these acts in connection with the evidence that his station was on the lighter, and his work there the continuous labor of running the engine in accordance with orders transmitted to him from others, show that neither his sole nor principal duty was that of superintendence."

A finding that a direction given as to the disposal of goods was an act of superintendence is not warranted, where the injured servant testifies that the delinquent used to give orders to some twelve or thirteen persons in the room where the goods were, but subsequently qualifies this statement by saying "When anybody gave what I call orders with respect to the load or weight, it was to tell where the load was to go, and that was all there was of it." *Sullivan* v. *Thorndike Co.* (1899) 175 Mass. 41, 55 N. E. 472 (holding an instruction to be correct by which the jury were told that, if the delinquent had the right to say to the plaintiff, "Take these goods upstairs," and it was the duty of the injured servant to obey this direction that would be a superintendence; but that, if the delinquent merely pointed out where the goods were to go, that would not be a superintendence).

In an English case it was laid down by Smith, J., *arguendo*, that a "ganger, the foreman of a gang of laborers, who is working with his hands all the day is not a vice principal." *Kellard* v. *Rooke* (1887) L. R. 19 Q. B. Div. 585, 588.

[1] *Louisville & N. R. Co.* v. *Mothershed* (1893) 97 Ala. 261, 12 So. 714.

nied (see note 8), it is difficult to draw any other inference than that this ruling indicates a real difference between the scope of the Alabama and of the other acts. It must be admitted, however, that the real scope of this case, considered as one which illustrates an application of a general principle, and not as one which was determined with reference to the special facts involved, is rendered quite obscure by two later cases. In one of these an operator of a steam crane was treated as the representative of the master in respect to controlling its movements.[2] In another, recovery was refused for an injury received by a mechanic engaged in repairing a stationary engine, owing to the negligence of the engineer in starting the engine while the work was going on.[3] As will be seen when we recur to the second of these cases, in a later section (688), the essential and ultimate ground upon which the decision proceeded was that the negligent act, being a manual one, was not done in the exercise of superintendence. This element, however, though it was not specifically referred to, was clearly present in the other cases, and cannot legitimately be adduced as a differentiating factor. To obtain a ground upon which these cases can be reconciled, it seems necessary to have recourse to the theory relied upon in a still later decision, that, as to certain operations, a locomotive engineer exercises both control and superintendence, while as to others he exercises merely control, and that a railway company is liable only for negligence in respect to operations of the former description.[4] But this is a refinement of doctrine for which it seems difficult to find a warrant in the ordinary meanings of the words thus opposed to each other. Superintendence cannot, it is submitted, be exercised without at the same time exercising control.[5]

[1] *Anniston Pipe Works* v. *Dickey* (1890) 93 Ala. 418, 9 So. 720.

[2] *Dantzler* v. *De Bardeleben Coal & I. Co.* (1893) 101 Ala. 309, 22 L. R. A. 361, 14 So. 10. The court said: "Whether . . . there may possibly be a case of superintendency purely of machinery, or not, it is most clear to us that Gould's position involved no such case, dissociated from consideration of the fact that he had a helper, whose duties are shown in the evidence. Whether he had any superintendence intrusted to him, in view of this consideration, is a question not necessary to be decided in this case. If any such superintendency existed in that connection, it was not a general superintendency over the helper and the machines, not a general power of having the machines operated as he directed by the hand of the helper, but only a special superintendence to direct the helper to assist him, Gould, in the manual labor of operating them."

[3] *Culver* v. *Alabama Midland R. Co.* (1895) 108 Ala. 330, 18 So. 827, holding, in an action by a fireman, that it was error to direct a verdict for the defendant, where the injury was caused by the negligence of a railway engineer in not seeing that the coal on the tender was loaded properly by the gang assigned to the work.

[4] *Chicago, R. I. & P. R. Co.* v. *Ross* (1897) 112 Fed. 851, 50 C. C. A. 615, 56 L. R. A. 203.

[5] The definition of the word "superintend," in the Century Dictionary, is "to direct the cause and oversee the details of (some work, etc.); regulate with authority; manage."

In the other decisions in this state, the conclusion arrived at is not affected by the omission of the qualifying words inserted in the English, Massachusetts, Colorado, and New York acts. Employers have been held to be answerable for the defaults of all superior servants, whatever their rank, who are invested with discretionary powers as respects the choice of the means by which the particular work in hand shall be executed."

682. — under the Canadian and Australian acts.— The precise significance of the express declaration in the Ontario, British Columbia, and Manitoba acts that the master is responsible, whether the person exercising superintendence is or is not ordinarily engaged in manual labor (see § 678, *supra*), has not yet been determined. But the words preceding the clause certainly contemplate something different from that informal superintendence which is often exercised by one member of a gang of men who are sent, without any regularly appointed foreman, to do some particular piece of work.[1]

The Australian acts employ virtually the same phraseology, and must therefore receive the same construction, as the English act.

683. Employees controlling machinery; status of.— The superintendence contemplated by the statutes is that which is exercised over other

[a] Actions have been held maintainable where the negligent persons were the following employees:

The superintendent of a mine. *Drennen* v. *Smith* (1896) 115 Ala. 390, 22 So. 442; *Bessemer Land & Improv. Co.* v. *Campbell* (1898) 121 Ala. 50, 77 Am. St. Rep. 17, 25 So. 793.

The superintendent of an iron company's business. *Woodward Iron Co.* v. *Andrews* (1896) 114 Ala. 243, 21 So. 440.

A yardmaster, superior to all other railroad employees present, who peremptorily takes the place of the engineer and is running an engine at the time a car is derailed, or is present directing and controlling the engineer. *Louisville & N. R. Co.* v. *Mothershed* (1893) 97 Ala. 261, 12 So. 714.

A yardmaster while engaged in making up trains. *Kansas City, M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 98; *Louisville & N. R. Co.* v. *Bouldin* (1898) 121 Ala. 197, 25 So. 903. First appeal (1895) 110 Ala. 185, 20 So. 325; *Highland Ave & Belt R. Co.* v. *Dusenberry* (1893) 98 Ala. 239, 13 So. 308; *Richmond & D. R. Co.* v. *Hammond* (1890) 93 Ala. 181, 9 So. 577; *Alabama Mineral R. Co.* v. *Jones* (1896) 114 Ala. 519, 62 Am. St. Rep. 124, 21 So. 507.

A conductor. *Alabama Midland R. Co.* v. *McDonald* (1895) 112 Ala. 216, 20 So. 472; *Georgia P. R. Co.* v. *Propst* (1887) 83 Ala. 518, 3 So. 764.

The superintendent of a pile driver. *Southern R. Co.* v. *Shields* (1898) 121 Ala. 460, 77 Am. St. Rep. 66, 25 So. 811.

A superintendent or foreman employed by a street railway company. *North Birmingham Street R. Co.* v. *Wright* (1901) 130 Ala. 419, 30 So. 360.

The superintendent of a manufacturing company. *Decatur Car Wheel & Mfg. Co.* v. *Mehaffey* (1901) 128 Ala. 242, 29 So. 646.

The superintendent of a wrecking crew. *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586.

[1] The fact that one of a small gang of workmen possessed more experience than the rest, and took upon himself to give directions as to the manner of executing a general order of their regular foreman with regard to a certain piece of work, is not of itself sufficient to show that he was exercising superintendence. *Garland* v. *Toronto* (1896) 23 Ont. App. Rep. 238. Reversing (1895) 27 Ont. Rep. 154. Compare the cases cited under § 680, subd. c, *supra*.

men, not over inanimate appliances.[1] So far as regards most of the jurisdictions, therefore, with which we are now concerned, it is clearly settled that a master cannot be held liable, as for negligence in the exercise of superintendence, where the culpable person was an employee whose duty was essentially the operation of a piece of machinery, though in so doing he necessarily exercised some control over other employees who were affected by its movements.[2] The Alabama decisions which point, in some measure at least, to a different theory, are discussed in § 681, *supra*. Still less is the master liable where the negligent employee merely controlled the movements of machinery, in the sense that it was his duty to inform the employee actually operating it at what precise moment it was to be started or stopped.[3]

An employee whose usual work is merely to operate a machine is not made a vice principal by the fact that it is his duty, when the machine gets out of order, to notify the employee who does the repairs to put it in order.[4]

684. Master liable though injured servant was not under the control of the negligent employee.— The mere fact that the "superintendence" was not exercised over the person hurt will not prevent him from recovering.[1]

Kansas City, M. & B. R. Co. v. *Burton* (1893) 97 Ala. 240, 12 So. 88. See further, as to this case, § 737, *infra*.

[2] *Farnham* v. *New Bank Coal Co.* (1896) 23 Sc. Sess. Cas. 4th series, 722 (denying recovery where the negligence was that of the engineer of a hoisting cage in a mine).

A person in charge of the lever by which a steam hammer is worked, and whose duty it is to raise or let fall the hammer at the word of command, is not "superintendent." *Hannon* v. *Hudson* (——) 7 W. N. (New So. Wales) 105.

See also § 680, note 8, *supra*, where two other cases to the same effect are cited.

[3] No superintendence is exercised by a workman whose duty it is to guide by means of a guy rope the beam of a crane used for lowering sacks of wheat into a ship's hold, and to give direction when the chain-tail is to be lowered or hoisted. *Shaffers* v. *General Steam Nav. Co.* (1883) L. R. 10 Q. B. Div. 356, 52 L. J. Q. B. N. S. 260, 48 L. T. N. S. 228, 31 Week. Rep. 656, 47 J. P. 327.

Nor by a brakeman engaged in loading a barge, whose duty is to give signals to the drawer of the crane when to raise and lower the bucket. *Claxton* v. *Hoadley* (1888; C. A.) 4 Times L. R. 756.

[4] *Roseback* v. *Etna Mills* (1893) 158 Mass. 379, 33 N. E. 577.

[1] *Ray* v. *Wallis* (1887; C. A.) 51 J. P. 519. It has been held by Donovan, J., in a nisi prius case, that the statute is applicable wherever there is a common master, though the injured servant is employed in a department distinct from that controlled by the negligent servant. *Kearney* v. *Nicholls* (1880) 76 L. T. Journ. 63 (machinist killed owing to negligence of person superintending structural alterations on a mill).

In *Kansas City M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88, the court reasoned thus: "We are unable to agree with counsel that 'the superintendence which comes within the contemplation of the statute shall be a superintendence over the person who complains of the negligence of the person intrusted with it.' The remedy for negligence of superior in the control of inferior employees whereby injury results to the latter is given by subsec. 3. Under subsec. 2, it is manifest, we think, the liability of the defendant is in no sense dependent upon the relations existing in the service between the negli-

685. Deputy superintendents; liability for negligence of.— In two of the reported cases the servant's right to recover for the negligence of an employee who was temporarily acting as foreman was denied on the ground that the evidence did not warrant a finding that his service principal duty was that of superintendence.[1] These decisions are unsatisfactory in this respect, that they do not deal with the question which is obviously involved in the facts in evidence, *viz.*, whether the spirit, if not the letter, of the statutes does not require the conclusion that any employee exercising superintendence for a definite period, as the deputy of the person regularly discharging that function, should be regarded as a representative of the master. On general principles, of course the master could not be held liable unless the delegation of superintendence was authorized, but, assuming this point to be settled in the plaintiff's favor, it is submitted that, in cases of this type, the inquiry is concerned solely with the relations of the parties during the period of deputed superintendence, and that, as to that period, the deputy may justifiably be said to be exercising duties of superintendence, whatever may be his functions at other times.

So far as Massachusetts is concerned, this is now the law by virtue of the clauses added in 1891 to the original statute. See § 6, *supra*.[2]

gent and the injured person. If the former has superintendence intrusted to him, and is negligent in the exercise of it to the injury of any 'servant or employee in the service or business of the master,' whatever be the relation *inter se* of the servants, the master is made liable therefor by the very terms of the statute. If a yard master charged with the duty of keeping the tracks clear should negligently obstruct a track, and in consequence the president of the company should be injured in the service of the employer, the corporation, it cannot be doubted that the latter would have to respond in damages."

[1] *Kellard* v. *Rooke* (1887) L. R. 19 Q. B. Div. 585, (1888) L. R. 21 Q. B. Div. 367, 4 Times L. R. 709, 57 L. J. Q. B. N. S. 599, 36 Week. Rep. 875, 52 J. P. 820. There the theory upon which the court proceeded was that the very fact of the negligent person being merely a temporary superintendent acting as such during the absence of the defendant, who usually directed the work, showed conclusively that he was ordinarily engaged in manual labor.

In *Dowd* v. *Boston & A. R. Co.* (1894) 162 Mass. 185, 38 N. E. 440, the evidence was that under the general superintendent there was a foreman who hired men and exercised superintendence more or less, in the superintendent's absence of that part of the work where the negligent employee was engaged, and that the negligent employee received orders from the superintendent or this foreman in regard to his own work and that of the men working with him, and gave these men directions about the work in the absence of the superintendent. The negligent employee was doing the same kind of work and receiving the same wages as his fellow laborers.

[2] Under this amendment a master has been held liable for the negligence of an employee in a small foundry who, when his master was not present, directed the men as to their work, but also participated in that work himself. *McCabe* v. *Shields* (1900) 175 Mass. 138, 56 N. E. 899.

Where the defendant's general superintendent intrusted to a subordinate the duty of supervising the work of lowering a heavy shaft, and did not take charge of the work himself, and was not present when the injury was received, the jury is warranted in finding that the employee who directed the work, acting as superintendent with the au

686. Necessity of proving that the injurious act was negligent.— In cases where it is established or conceded that the person whose act or omission was the immediate cause of the injury complained of was a "superintendent" within the meaning of the statutes, and that such an act or omission was one pertaining to the exercise of superintendence, the plaintiff will still fail in his action unless he can show that the act or omission constituted a breach of duty. In the subjoined note are collected a number of rulings upon the simple question whether there was or was not negligence. Other cases involving similar groups of facts, but actually turning upon the question whether the employee alleged to be the defendant's representative was exercising superintendence, are cited in the following sections.[1]

In order to hold an employer for positive acts of negligence on the

thority and consent of the defendant and in the absence of the defendant's superintendent. *Knight* v. *Overman Wheel Co*, (1899) 174 Mass. 455, 54 N. E. 890.

[1] (a) *Master not exempt from liability as matter of law.*— A superintendent may properly be found negligent in absenting himself from the place of work, and delegating his duties to another, when operations of peculiar difficulty and danger are to be carried out. *Cook* v. *Stark* (1886) 14 Sc. Sess. Cas. 4th series, 1.

Where the evidence leaves it uncertain whether it was the duty of the superintendent of a mine to stop or continue the running of a suction fan when a fire is discovered in the mine, and also how much time elapsed after the fire began before he learned where it was, and whether or not he acted promptly, and there is also testimony tending to show that the fan was stopped once and then started again, it is for the jury to say whether the superintendent was reasonably careful in seeing that the fan was not started again, even if it was properly stopped in the first instance, although a large number of people were congregated round the mouth of the mine, and it is not clear who started the fan for the second time. *Dreamon* v. *Smith* (1895) 115 Ala. 396, 22 So. 112.

The question as to whether an injury to an employee from the explosion of dynamite in a conduit was due to the negligence of the superintendent of the contractor while exercising superintendence is for the jury upon evidence that the latter knew on the Saturday before the accident that a hole loaded with dynamite had not been fired, and that on Monday following he directed the plaintiff to drill a new hole which pointed towards the loaded hole, and the explosion resulted from contact with the dynamite in drilling the new hole. *Dean* v. *Smith* (1897) 168 Mass. 569, 48 N. E. 619.

The question as to whether a superintendent was guilty of negligence, while exercising superintendence, in directing dynamite to be put into a hole while the rock was heated by a recent explosion, is for the jury upon evidence that, under such circumstances, an explosion was likely or liable to occur, and the explosion which followed and caused the death of the deceased was the result of such direction. *Green* v. *Smith* (1897) 168 Mass. 485, 48 N. E. 621.

Cotton waste in a chimney belonging to defendant company caught fire, and its superintendent sent a man up the chimney to put it out; and in doing so the man threw down two planks which were burning, which act the superintendent approved. Afterwards a second fire broke out, and the superintendent ordered plaintiff's husband and other to assist in putting it out, and the same man was sent up the chimney and threw down a burning plank, as at the former fires, and just as it was thrown, without warning, plaintiff's husband stepped inside the chimney and was instantly killed by the plank. Held that the fact that the employee who was sent up the chimney failed to give deceased warning of the danger from planks being thrown down did not necessarily show negligence of a fellow servant, since the jury might have found that the fellow servant did all that he should have done, and that it was the

part of his superintendent, if these facts relate to a matter in regard to which the employer has no duty to perform, it should be made clear.

duty of the superintendent to give de-ceased warning. *Cote* v. *Lawrence Mfg. Co.* (1901) 178 Mass. 295, 59 N. E. 656.

Where the complaint alleges negligence on the part of defendant's superintendent, or one exercising superintendence, it is proper to admit evidence of statements to defendant's foreman, and in his presence, of the dangerous character of the trench and the need of bracing. *Bartolomeo* v. *McKnight* (1901) 178 Mass. 242, 59 N. E. 801.

The fact that it suited the convenience of the consignee of the cargo of a car left standing in dangerous proximity to an adjacent track to unload it at that place will not relieve the railway company from liability for the negligence of the yard master in leaving it in that position, the consequence being that a switchman on the adjacent track was injured by collision with the car. *Kansas City, M. & B. R. Co.* v. *Burton* (1895) 97 Ala. 240, 12 So. 88.

Allowing an oil box in a railway yard to be so near the track as to catch the foot of a switchman, casually allowed to slightly protrude beyond the end of the footboard of an engine on which he is riding, is negligence in the person whose duty it is to keep the tracks in the yard free from obstructions. *Louisville & N. R. Co.* v. *Bouldin* (1898) 121 Ala. 197, 25 So. 903, Reiterating opinion expressed in first appeal in (1895) 110 Ala. 185, 20 So. 325.

The question as to negligence by a superintendent in failing to take any precaution to protect an employee while in an elevator well picking up paper is for the jury, whether the superintendent did or did not promise to look out for him, where the circumstances warrant an inference that he knew that such employee or some other employee would have to go into the well. *Scullane* v. *Kellogg* (1897) 169 Mass. 544, 48 N. E. 622.

An employer is answerable for the negligence of a superintendent in stationing a laborer underneath a large overhanging rock which was known to be likely to fall. *Collins* v. *Greenfield* (1898) 172 Mass. 78, 51 N. E. 454.

(b) *Cases in which negligence cannot be inferred.*— Negligence in regard to the piling of planks, some of which fell on plaintiff, cannot be inferred simply from the fact that the foreman had directed him to lower the stack, especially where he and his witness admit that they did not observe anything unsafe in the appearance of the stack. *Connell* v. *Surrey Dock Co.* (1887; Q. B. D.) 3 Times L. R. 630.

A servant injured by the falling of bales of hay in a shed cannot recover on the ground of negligence of the superintendent, in the absence of evidence that he had anything to do with piling the hay, or that he appointed the particular place at which the servant was to work at the time of the injury, or that he knew or ought to have known that the hay was liable to fall. *Fitzgerald* v. *Boston & A. R. Co.* (1892) 156 Mass. 293, 31 N. E. 7.

The mere fact that a ledge stone is left two or three days on a staging used in the construction of a building, projecting to such an extent that it is liable to fall if it is hit or the staging jarred, does not show that the foreman was negligent in exercising superintendence, where he had no occasion to visit that part of the work while the stone was there, and did not have actual knowledge that it was there, and the amount the stone projected could not be seen from below. *Carroll* v. *Willcutt* (1895) 163 Mass. 221, 39 N. E. 1016.

Where the evidence shows that while plaintiff was working in an elevator well, with a lighted lantern between his feet, shoveling a ground product of bone, rock, and slaughter-house refuse defendant's superintendent started some machinery, which caused a current of air to carry the dust from such product to the flame of plaintiff's lantern, causing an explosion which injured plaintiff, he cannot recover where it does not also appear that such superintendent knew, or ought to have known, that the dust was inflammable, or that it was a matter of common knowledge that it was inflammable. *O'Reilly* v. *Bowker Fertilizer Co.* (1899) 174 Mass. 202, 54 N. E. 534.

Negligence cannot be predicated of the act of a foreman in failing to examine personally a shaky wall which he had requested a contractor,—an expert at such matters,—to shore up. *Moore* v. *Gibson* (1889; Q. B. D.) 5 Times L. R. 177, 58 L. J. Q. B. N. S. 169.

A foreman has no reason to expect that an employee will, without any an-

ly to appear that the employer has undertaken to do by his superintendent that which he was not called upon to do. An act done volun-

thority remove a stay from a scaffold erected in the course of building operations, and cannot be held liable for failing to discover such removal, and to see that other employees suffer no injury from the dangerous conditions thus created. *Kelly* v. *Davidson* (1900) 31 Ont. Rep. 524.

An averment that defendant's foreman did not keep closed a trap door by which goods were raised and lowered between two floors of a laundry does not show negligence on his part. *Moore* v. *Ross* (1890) 17 Sc. Sess. Cas. 4th series, 796.

An employee who, while rolling a cotton bale, was struck by another bale thrown down from a pile by a fellow servant, cannot recover for the injury sustained, although the defendant's superintendent previously told the fellow servant to "throw down cotton." Such a direction is construed, in respect to the master's liability, as being merely an order to throw the cotton in a proper way and in a proper place. *Gonin* v. *Wampanoag Mills* (1898) 172 Mass. 222, 51 N. E. 1078.

The foreman of a switching gang in a railroad yard, whose duty it is to direct on which track a train shall be put while it is being made, is not negligent as to an employee engaged in making up a train at one end of the yard, in failing to give special warning or notice as to cars at the other end of the yard on the same track, where the custom of the yard to switch cars in at both ends of the siding on the same track is well known. *Caron* v. *Boston & A. R. Co.* (1895) 164 Mass. 523, 42 N. E. 112.

An operator of a steam crane is not chargeable with reckless indifference to consequences, in swinging back the crane in the usual manner, because of the presence of other employees in the way, when he knows that such employees are aware of the operation and are instructed to get out of the way of the crane, and they have always previously done so. *Anniston Pipe Works* v. *Dickey* (1890) 93 Ala. 418, 9 So. 720.

There is no obligation on the part of the general superintendent of a building to oversee every detail of the work. Hence his employer cannot be held liable on the theory that he was negligent in omitting to instruct masons accustomed to build their own scaffolds as to the way in which the work should be done, or to be present when any particular scaffold was being erected. *Burns* v. *Washburn* (1894) 160 Mass. 457, 36 N. E. 109.

The master is not responsible for the death of a workman killed, while hoisting planks to an upper story, by the fall through a hole in the floor of a heavy truck which a fellow workman was using, with the roller upwards, to land the planks, but which he had neglected to block, though means for so doing were very simple and always at hand. *O'Keefe* v. *Bromell* (1892) 156 Mass. 131, 30 N. E. 479. The court said: "When placed upon the floor with the roller down, the instrument could be easily moved about with a load resting upon a plank. When placed with the plank down, the instrument was intended to remain stationary, and beams or planks could then be moved by resting them upon the roller and moving them while so supported. The truck was in use by the latter method when the accident occurred. It was a movable tool, designed and adapted for various uses, and in different places about the building. It was complete and in good order, and only dangerous, as any heavy object is dangerous, if carelessly allowed to fall from above upon a person below. When used for certain purposes, for which it was, among others, designed, it would have a tendency to be displaced by the motion of the articles put upon it, to facilitate the motion of which its roller was designed and adapted to be used while the truck was stationary. If so used at the edge of an open well, it might fall into the well: to prevent this, it could be fastened to the floor on which it rested, or blocked with a cleat. But when used as a vehicle on which to transport articles by its own motion, fastening or blocking would wholly prevent its use. The absence, therefore, of any appliance for blocking or fastening, did not make it a defective tool or machine. Like a barrow, an inclined plane, a roller, a screw, or blocking timber, and many other utensils used in building, it was to be often moved about, and the means of avoiding danger in its use varied constantly with its situation and the work. It was a common and well-known tool, and the duty of using it in a safe man

tarily by the superintendent in that field, without the direction or approval of the employer, would not be an act of superintendence.[2]

687. Acts constituting negligence in the exercise of superintendence. — An analysis of the decisions shows that negligence in the exercise of superintendence is deemed to have been committed if the superintendent has been guilty of any of the various breaches of duty specified below. The authorities are arranged under headings designed to facilitate comparison with chapter XXIX., *ante*, in which the official acts of common-law vice principals are classified. It will be observed that the acts there reviewed cover practically the same range of incidents as those which import liability under this subsection of the statutes.[1]

ner was the duty of the ordinary workmen who handled and used it, rather than a duty of the employer or a duty of superintendence. The means of blocking or fastening it when necessary were of the simplest, and always at hand, being only nails and bits of wood suitable for cleats. It was not the duty of the employer, but of the ordinary workmen, to see that they were used. The omission to use them was not negligence of a superintendent, or want of superintendence, but mere negligence of fellow workmen in the use of a familiar, simple, and complete tool well adapted to the work for which it was then in use, and for other work."

A superintendent in charge of the running of trains over a single track of a double-track road during a snow blockade, who ordered a west-bound train to proceed to a certain station on the east-bound track, was not negligent in failing to direct the switchman at such station to open the switch leading from the east-bound to the west-bound track, or so to set the signals as to indicate that it was closed, notwithstanding that a snow plow was on the east-bound track a short distance west of the switch, as he might assume that the switch would be rightly set, or, if not, that the signal would indicate that fact to the trainmen. *Fairman* v. *Boston & L. R. Co.* (1897) 169 Mass. 170, 47 N. E. 613.

It has been laid down that the mere fact that a foreman sees a workman doing a piece of work in an unusual manner, and does not interfere, is not a ground for holding the master liable for the consequences of what the workman does. *Milligan* v. *Muir* (1891) 19 Sc. Sess. Cas. 4th series, 18. But this statement cannot be accepted without some qualification as it may clearly be a duty pertaining to superintendency to see that an improper method of doing work is corrected. See next section.

[2] *Shea* v. *Wellington* (1895) 163 Mass. 370, 40 N. E. 173, holding that an employee in a quarry could not recover from the owner for the negligence of the superintendent in failing to tell him of a defective exploder given him by such superintendent for use, the reason assigned being that, no duty could be predicated to inspect the exploders, as they had been purchased from a reputable manufacturer.

[1] (a) *The adoption of an improper method of doing the work in hand.* — The master's liability is for the jury under the following circumstances: Where a staging fell under the injured servant in consequence of the superintendent having ordered a whole cartload of wood to be put on the staging, the usual custom being to put only half a load of wood on it at one time. *Prendible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675.

Where the superintendent of a pile driving gang directed one of the gang to stop a car on which the pile driver was placed, by laying a crowbar on the tracks in front of the car while it was being drawn down a slight incline, a distance of about 5 feet, by attaching a rope to a heavy pile and setting the pile driver in operation, instead of moving the car to the proper place by means of crowbars, which was the customary mode *Southern R. Co.* v. *Shields* (1898) 121 Ala. 460, 77 Am. St. Rep. 66, 25 So. 811.

Where a foreman failed to have a bank which was being undermined properly shored up. *Lynch* v. *Allyn* (1893) 160 Mass. 248, 35 N. E. 550.

When the alleged act or omission was one which prima facie indicates a breach of the duty of a mere servant, the plaintiff cannot, in

Where a foreman of a quarry undertook to have an unusually large stone hoisted without drilling holes in it so that it might be more securely held by the points of the dogs. *Crowley* v. *Cutting* (1896) 165 Mass. 436, 43 N. E. 197.

Where a superintendent failed to give proper instructions as to the method of putting into the shears a heavy gate which was to be cut up preparatory to being melted. *Madden* v. *Hamilton Iron Forging Co.* (1889) 18 Ont. Rep. 55.

Where a superintendent who was experienced in transporting timbers upon a gear of a given make, and knew that the road over which it was to be carried was rough and uneven, loaded a timber with its narrow sides at the top and bottom and directed the employees to get on and hold it down. *Gagnon* v. *Seaconnet Mills* (1896) 165 Mass. 221, 43 N. E. 82.

Where an engineer allowed or directed coal to be loaded in the tender of his engine in such a manner as to be dangerous to his fireman. *Culver* v. *Alabama Midland R. Co.* (1895) 108 Ala. 330, 18 So. 827.

Where the superintendent of a quarry instructs a laborer to unload an unexploded hole, and stands by him for several minutes while he is undertaking to do the work with an iron scraper. *Grimaldi* v. *Lane* (1901) 177 Mass. 565, 59 N. E. 451.

If a superintendent knew, or had reason to know, that there was danger of the caving of a trench, and had no materials for bracing it, and no power to procure them, it was negligence to allow the digging to go on before the necessary materials were procured. For such negligence of a superintendent, the principal is answerable, and cannot escape liability by showing that it was by his own act, and not by the fault of the superintendent, that suitable materials were wanting. *Connolly* v. *Waltham* (1892) 156 Mass. 368, 31 N. E. 302.

The risk that the plaintiff's employer —a quarryman—or his superintendent, will negligently attempt to remove a charge of gunpowder by drilling into a hole that has been charged, before ascertaining that the charge has exploded, is not one of the risks of his employment which the plaintiff assumes. *Malcolm* v. *Fuller* (1890) 152 Mass. 160 25 N. E. 83, distinguishing common-law rule as exemplified by *Keaney* v. *Shaw* (1882) 133 Mass. 501.

In an action for injuries occasioned by the falling upon plaintiff of a large iron pump which, loaded upon a truck, he with others was moving from one part of the defendant's works to another, evidence as to other appliances which were at hand, and other methods which might have been used to move the pump, is admissible upon the question whether the defendant's superintendent was at fault in causing it to be moved as he did. *Gilonecki* v. *Dean Steam Pump Co.* (1896) 165 Mass. 202, 43 N. E. 85.

In *Knight* v. *Overman Wheel Co.* (1899) 171 Mass. 155, 54 N. E. 890, a heavy shaft which was being lowered slipped in the hitch of the chain fall by which it was lowered, and struck the plaintiff. It was held that it could not be said, as a matter of law, that there was no negligence of an employee for whose acts the master was responsible, inasmuch as there was evidence from which it might be inferred that the superintendent failed to see that the shaft was evenly balanced on each side of the chain fall by which it was supported, and that, although the hitch which proved defective had been made by one of the workmen, the superintendent had afterwards seen it and made no objection to it, and was thus guilty of a breach of duty in not seeing that everything was right.

In *Bessemer Land & Improv. Co.* v. *Campbell* (1898) 121 Ala. 50, 25 So. 793, the plaintiff's decedent was suffocated in a mine in which a fire had broken out. It was held that the owners might properly be held liable on the theory, first, that it was the duty of the superintendent of a mine in which a fire started, while employees were in the mine, to telegraph for and have appliances for flooding the mine sent by express, if the lives of the employees could not properly be saved by any other method, and, secondly, that the fact of the superintendent's having consulted the operatives as to the expediency of bratticing up the mine, and that in their opinion it was the best thing to be done, did not relieve the operator of the mine from liability for the death of an employee resulting from such action where

any event, recover under this provision of the statute, unless he show that the person answerable for the conditions complained of was a

another course, by which his life could have been saved, should have been pursued in the exercise of due care and diligence. Third, that the proprietor of the mine should not be relieved from liability for the death of the employee on the ground that, because of the supersensitiveness of the superintendent's nerves, he failed to use proper means to save the employee's life.

(5) *The giving of improper directions with respect to particular details of the work.*—A foreman may be guilty of negligence in giving an order to hoist a pile while the fall is caught on the checking guard. *McPhee* v. *Scully* (1895) 163 Mass. 216, 39 N. E. 1007.

An order to clean machinery in motion may be found to be a negligent one. *Yarley* v. *Osborn* (1894; Q. B. D.) 10 Times L. R. 388.

Evidence that the superintendent of a street railway company gave an order to the motorman of a derailed car, which placed him in a dangerous position if a car should come forward on the other track, and that while the motorman was in this position he gave an order to the motorman of a car on the other track standing 6 or 8 feet from the end of the derailed car to come ahead,—is sufficient to warrant a finding that the superintendent was guilty of negligence contributing to the injuries of the motorman, who was caught between the guard rails of the two cars. *O'Brien* v. *West End Street R. Co.* (1899) 173 Mass. 105, 53 N. E. 149.

A complaint is not demurrable which alleges that a section hand was killed through the negligence of his foreman in charge of hand cars, in permitting such cars to be run at a rapid and reckless rate of speed in such close and reckless proximity to each other that they collided. *Highland Ave. & Belt R. Co.* v. *Dusenberry* (1893) 98 Ala. 239, 13 So. 308.

A section foreman is not, as matter of law, free from negligence in giving a signal for two hand cars moving close together rapidly over a trestle of a river bridge to check their speed at the same time, where a section hand on the rear car, understanding the signal properly, applies the brake in the customary way, but the rear car is not stopped before a collision with the front car. *Alabama Mineral R. Co.* v. *Jones* (1896) 114 Ala. 519, 62 Am. St. Rep. 121, 21 So. 507, holding that an instruction based on the theory that the act of the section hand absolves the defendant from responsibility is properly refused. On the second appeal of this case (121 Ala. 113, 25 So. 814), it was held that the giving of the signals simultaneously was not negligence, as a matter of law.

For the purposes of legal liability it is clear that the following defaults in respect to the direction of work must be placed on the same footing as specific orders:

Allowing a subordinate to do something which ought not to have been done. *Bessemer Land & Improv. Co.* v. *Campbell* (1898) 121 Ala. 50, 25 So. 79. (where the fan in a mine which was on fire was stopped by one of the servants. See further, as to this case, subd. (a) *supra*.

The omission to give an order which should have been given. *Crowley* v. *Cutting* (1896) 165 Mass. 436, 43 N. E. 197 (where the foreman of a quarry did not see that holes were drilled for the dogs which were to hold an unusually heavy stone while it was being hoisted).

The failure to countermand an order when due care requires that it should not be executed. *Caragnaro* v. *Clark* (1898) 171 Mass. 359, 50 N. E. 542 (where the superintendent saw that an employee, not being aware that an order was given, was about to place himself in such a position that the execution of the order would imperil his safety).

The right of recovery under this head is of course conditional upon proof that the order was within the scope of the superintendent's authority. See an unreported and somewhat peculiar case mentioned in Ruegg on Employers' Liability Act, 5th ed. p. 34, where, in an action alleging negligence, the evidence was that a master stevedore's foreman, not being satisfied with the way a laborer was doing his work in the hold of a ship, said to a man near him: "Get hold of a block of wood and chuck it down on his —— head." The order was obeyed, and the laborer's skull was fractured. A divisional court held that there could be no recovery.

(c) *Failure to furnish proper appliances.*—A judgment awarding damages to a boy injured while cleaning out a brick-pressing machine with his hands

should not be set aside, where the evidence tended to show that "scrapers" for doing this work were not furnished in sufficient number by the foreman. *Race* v. *Harrison* (1893; C. A.) 10 Times L. R. 92, Reversing (1893) 9 Times L. R. 567.

A sufficient cause of action is stated by an averment that a person to whom the defendant had intrusted superintendence "negligently caused or allowed the use of means or appliances in or about attempting to get said car on said rails, which would likely cause or allow said car to fall," and by an averment that such a person negligently "caused or allowed the attempt to get said car upon said rails without proper appliances." *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586. In that case, where the negligence complained of was that of the superintendent in charge of such work in using jack screws to support the car which was being lifted, it was also held that an instruction which predicated nonculpability if jack screws were suitable appliances to use, and thus took from the jury the question of whether there was negligent superintendence in omitting the use of supports in addition to the jack screws, was erroneous, and properly refused.

The fact that a stable foreman knew of the unfitness of a horse, and nevertheless took no steps to prevent it from being used, tends to show negligence on his part. *Yarmouth* v. *France* (1887) 19 Q. B. D. 647, 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 283.

Where one of the counts alleges that the defective condition of a brake "was not remedied or discovered, owing to the negligence of the defendant, or of some person in his employ intrusted with and exercising superintendence, or whose sole or principal duty was superintendence," it is error to exclude testimony going to show that no inspection was made of a foreign car which came from a certain line. Such evidence, if it is offered merely for the purpose of showing a single omission of duty, is incompetent for the reason that the car inspectors are the fellow servants of the trainmen. But it has a tendency to show under what rules, instructions, and superintendence the inspectors were acting, and that these were insufficient to provide proper inspection. *Coffee* v. *New York, N. H. & H. R. Co.* (1891) 155 Mass. 21, 28 N. E. 1128.

(d) *Employing servants not competent for the work to be done.*—The foreman employed on a pile driver may be guilty of negligence in allowing a workman apparently drunk to handle a fall liable to become caught on the choking guard which holds the driving hammer in place, while another workman is engaged in swinging the pile to its place. *McPhee* v. *Scully* (1895) 163 Mass. 216, 39 N. E. 1007.

Since a general manager exercises superintendence in choosing incompetent workmen, the master is liable for an injury caused by their incompetence, whether the manager was present or not while the work was being done. *Behm* v. *McDougall* (1892) 14 Australian Law Times (Victoria) 47.

(e) *Allowing abnormally dangerous conditions to exist in the place of work.*—Negligence may properly be found on the principle of *res ipsa loquitur* (see opinion of Kay, L. J.), where a manager of a colliery allowed an inflammable brattice cloth to stand within 2 feet of a winding engine having a wooden brake, which, as he must have known, frequently emitted sparks. *Thomas* v. *Great Western Colliery Co.* (1894; C. A.) 10 Times L. R. 244, Reversing judgment of Divisional Court.

For one having superintendence of railway tracks and cars in a railway yard to direct or allow a car to be placed too near another track, or, upon its being there without his fault, to suffer it to remain, is negligence while in the exercise of his superintendence. *Kansas City, M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88.

In *McCauley* v. *Norcross* (1892) 155 Mass. 584, 30 N. E. 461, the evidence was that 3½ feet from an open hole in a floor a few iron beams were placed; that they had been there for two or three days, and that the defendant's superintendent, being on crutches, and walking about the floor upon which the beams were placed, in order to pass between a pile of planks and these beams, pushed one of the beams with his foot so that it swung around on the other beams and fell down through the hole [illegible] to the plaintiff. The court said: "Upon these facts, the jury might find that the iron beams were negligently so placed and left that one of them would be liable, from a slight inadvertent push of the foot of a passerby, to fall through the hole. Being left in this condition for two or three days, the jury might infer a lack of due and proper superintendence. Allowing such things to be negli-

gently left for so long a time in a position where they were likely or liable to be toppled over, and one of them to fall through the hole in the floor, would warrant a finding of negligence on the part of the superintendent in exercising superintendence."

(f) *Failure to give instructions under circumstances which indicate the propriety of doing so.*—Evidence warranting the inference that there was, under the circumstances, an obligation to give the plaintiff instructions regarding the manner in which his work ought to be done, and that his injury was caused by his foreman's failure to give those instructions, is sufficient to sustain a verdict in his favor. *Race* v. *Harcison* (1893; C. A.) 10 Times L. R. 92, Reversing 9 Times L. R. 567. See also *Madden* v. *Hamilton Iron Forging Co.* (1889) 18 Ont. Rep. 55, cited in subd. (*a*), *supra*.

(g) *Failure to warn a servant as to the existence of an abnormal danger.*—The failure to notify the second of two relays of workmen engaged in replacing a marine engine, that the crank shaft had been disconnected during the first shift, the result being that the shaft swung round and crushed one of the men in the second relay, is negligence in the exercise of superintendence. *Aitken* v. *Newport Slipway Dry Docks Co.* (1887; Q. B. D.) 3 Times L. R. 527.

A workman who is struck by a bundle of iron which is being unloaded from a ship, in consequence of his foreman's omitting to warn him to stand out of the way, is entitled to recover on the ground that the negligence was committed in the exercise of superintendence. *Wright* v. *Wallis* (1885; C. A.) 3 Times L. R. 779. Lord Esher said: "An argument has been addressed to the court which amounts to this,—that if you order a man to stand in a certain place, and then throw something at him, and injure him, the injury is not caused by his conforming to the order, but solely by the subsequent act. If these refinements are to be introduced into real life, real life cannot go on as it does. The order to stand there, and the throwing down of the iron, were all part of the same occurrence."

A section man engaged upon a railroad track does not take the risk that a foreman stationed to give him warning of the approach of trains will be negligent in the discharge of that duty. *Davis* v. *New York, N. H. & H. R. Co.* (1893) 159 Mass. 532, 34 N. E. 1070.

A dock company is liable for injuries received owing to the negligence of a foreman in not informing the plaintiff that a piece of the machinery which he was employed to repair had been so loosened that there was a risk of it falling. *Aitken* v. *Newport Slipway Dry Docks Co.* (1887; Q. B. D.) 3 Times L. R. 527.

A charge that the risk of a heavy shaft slipping out of the hitch of the chain fall by which it was being lowered was a transitory risk, of which defendant was not required to notify a servant who was struck by it, is properly refused. The risk is not one incident to, and ordinarily to be expected to occur in, the prosecution of the work in which deceased was engaged. *Knight* v. *Overman Wheel Co.* (1899) 171 Mass. 55, 54 N. E. 891.

The facts in evidence may sometimes suggest the existence of this duty as an alternative obligation which ought to be discharged in the event of the servant's environment not being made as safe as it would have been if some other duty had been adequately performed. If an inexperienced workman, while engaged in undermining a bank of earth, is injured by the falling of the bank upon him during the temporary absence of his employer's superintendent, whose duty it is to watch the bank and to warn him of the danger of its falling, it is a question for the jury whether it was not negligence in the superintendent to allow the plaintiff to work under the bank without shoring up the top of it, or stationing someone to give warning. *Lund* v. *Tyng* (1893) 160 Mass. 248, 35 N. E. 550.

A superintendent of a street railway was not bound to anticipate that the engineer of a dummy engine hauling a material train on the road just before its conversion into a trolley line would hear a noise of rattling and knocking rods underneath his seat in the cab, or that, if he did hear such a noise, he would protrude his person so far out of the window as to be struck by a trolley pole 2 feet distant, one of several which had just been erected; since, if the disorder was slight and immaterial, looking at it was unnecessary, while if it was serious and material, looking at it would not remedy it, and in either case the most natural thing for the engineer to do would be to stop his engine, alight and examine it from the ground. The superintendent therefore was not guilty of negligence in failing to warn the en

foreman or superintendent.[2] Whether proof of that fact will enable him to maintain the action depends upon the principles discussed in the following section. On the other hand, if the evidence tends to show that the accident was caused by a breach of what the jury may properly find to be a duty pertaining to superintendence, and one of the counts of the declaration is based upon the words of the subsection, the master is not entitled to a ruling that, as there was no evidence of the negligence of the defendant, the plaintiff cannot recover under this count.[3]

688. Acts done by superintendents while participating in the work; liability of master for.— The intention of the legislature that the master shall be answerable for the negligence of superintending employees only when it is committed in the exercise of superintendence is somewhat less explicitly stated in the statutes of Massachusetts, New York, and Colorado than in those of England, Alabama, and the British colonies. But it is well settled that, under the former statutes, no less than under the latter, the fact that a person is engaged in superintendence does not make his employer liable for every act which he does while so engaged.[1] On the other hand, all the courts are

ance as to the position of the posts. *North Birmingham Street R. Co.* v. *Wright* (1901) 130 Ala. 419, 30 So. 360.

(h) *The violation of rules promulgated by the master.*—In so far as specific rules define the course to be pursued in regard to matters pertaining to the duty of superintendence, it is clearly not open to dispute that their violation may properly be found to be negligence for which the master is responsible. Hence, a verdict against a railway company will not be disturbed where the injury was due to the omission of a foreman of track repairers in a yard to set a lookout to warn them of the approach of trains, such duty being imposed on him by the company's rules. *Duthie* v. *Caledonian R. Co.* (1898) 24 Sc. Sess. Cas. 4th series, 934, 35 Sc. L. R. 726.

Nor where the injury resulted from a collision between a hand car and a work train, caused by the failure of a section foreman to give the signals required by the rules of the road. *Richmond & D. R. Co.* v. *Hammond* (1890) 93 Ala. 181, 9 So. 577.

Nor where the evidence is that in violation of a rule that the engineer should slow up, and, if necessary, stop his engine before reaching a switch, to ascertain whether it is properly set, the person running the engine pushed the cars over the switch at a rapid rate when the switch was improperly set, and caused a derailment and the injury complained of. *Louisville & N. R. Co.* v. *Hotheshed* (1893) 97 Ala. 261, 12 So. 711.

It would seem, however, that if the injurious act was one which, under the principles developed in the next section, would not be considered as having been done in the exercise of superintendence, the mere fact that the act constituted a breach of some rule ought not to affect the master with responsibility. But no case has been found in which this precise situation was presented.

[2] *Trimble* v. *Whitin Mach. Works* (1898) 172 Mass. 150, 51 N. E. 463 (want of gang plank caused injury to a workman helping to place a machine in a car).

An unqualified direction to find for the plaintiff if certain dynamite which exploded had been "carelessly left buried by the defendant, or its servants or agents in the discharge of their duty," is erroneous. *Sheffield* v. *Harris* (1893) 101 Ala. 564, 14 So. 357.

[3] *Lynch* v. *Allyn* (1893) 160 Mass. 248, 35 N. E. 550.

[1] *Joseph* v. *George C. Whitney Co.* (1900) 177 Mass. 176, per Holmes, J. See also the cases cited in the following notes.

agreed that the action is not barred simply by proof that the default of the superintendent was committed while he was assisting the plaintiff in manual labor.[2] A collation of the authorities, however, discloses considerable divergence of opinion as to the theory upon which the boundary line is to be drawn between the acts for which the master is and is not responsible.

Some cases present little or no difficulty. Thus, there is clearly no ground upon which the master can be held liable for a merely manual act done by an employee whose characteristic functions are not those of a superintendent at all.[3] Compare § 680, subd. *c*, *supra*. Again it is obvious that, wherever the duties of an employee are susceptible of a definite segregation into two specific classes, so that it is possible to say that the duties in one class are those of a superintendent, while the duties in the other class are those of a mere servant who is engaged in manual labor or discharging some function which is characteristic of, and customarily intrusted to, subordinate workmen, the exercise of superintendence cannot, without doing violence to the express ends of the statute, be predicated as to what is done in performing the latter class of duties.[4] The position taken is that, "when a person is em-

[2] *Kansas City, M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88; *Ray* v. *Wallis* (1887; C. A.) 51 J. P. 519, Affirming (1886) 3 Times L. R. 777; and the cases cited in note (6), *infra*.

[3] The starting of a table used for the transfer of cars in a street-car barn by a car shifter whose duty was to get cars ready for the conductors and motormen was not an act of superintendency as to a conductor who was injured by the table. *Whelton* v. *West End Street R. Co.* (1899) 172 Mass. 555, 52 N. E. 1072.

[4] In *Kellard* v. *Rooke* (1887) L. R. 10 Q. B. Div. 585, where an employee alleged to have been intrusted with superintendency habitually engaged in the manual labor of hauling and throwing bales of wool into a ship's hold, and the injury was caused by one of these bales falling upon the plaintiff, it was held that, assuming this to be the situation, it could not be said to come to anything more than this,—that an employee who was a superintendent for some purposes, and who was also an ordinary working man engaged in the work in which the plaintiff was likewise engaged, was guilty of negligence whereby his fellow workman was injured, and that the negligence, having been committed whilst he was in the exercise of the manual labor in which he was engaged, was not in the exercise of superintendence.

In *Cashman* v. *Chase* (1892) 156 Mass. 342, 31 N. E. 4, where it was held that the act of an engineer of a hoisting apparatus in improperly raising the fall when ordered to lower it was not an act of superintendence, for the reason that in operating the engine he was doing the work of a laborer, acting upon the directions of others, and not directing them, the court said: "The negligence for which the statute makes the employer liable is that of a person 'intrusted with and exercising superintendence.' The employer is not answerable for the negligence of a person intrusted with superintendence, who at the time, and in doing the act complained of, is not exercising superintendence, but is engaged in mere manual labor,—the duty of a common workman. The law recognizes that the employee may have two duties; that he may be a superintendent for some purpose, and also an ordinary workman; and that if negligent in the latter capacity the employer is not answerable. . . . Unless the act itself [illegible]nce of direction or of oversight, tend[illegible] to control others and to vary their [illegible]ction or action because of his direction, it cannot fairly be said to be one in the doing of which the person

ployed to work with his hands, as well as to exercise superintendence . . . the line must be drawn somewhere between what are acts of superintendence and what are acts of manual labor, or all that he does must be regarded as superintendence or as manual labor, which manifestly would be unjust." [5]

intrusted with superintendence is in the exercise of superintendence. For the negligence of such a person in doing the mere work of an ordinary workman, in which there is no exercise of superintendence, the employer is not made responsible by the statute."

In *Flynn* v. *Boston Electric Light Co.* (1898) 171 Mass. 395, 50 N. E. 937, a verdict for the defendant was sustained where the foreman of a gang of linemen used to labor as an ordinary workman, and caused the injury while he was helping to pull back an electric wire which caught the branch of a tree which the plaintiff was cutting, and broke it off, allowing him to fall.

Negligence in the exercise of superintendence intrusted to an employee is not predicable in the case of an engineer whose duty it is personally to operate an engine, although he usually has a helper, where the evidence is that, in the absence of the helper, by the negligence of the engineer in starting the engine, or in failing to prevent a third person from starting it, a person engaged in repairing the engine was killed. *Dantzler* v. *De Bardeleben Coal & I. Co.* (1893) 101 Ala. 309, 22 L. R. A. 361, 14 So. 10. The court said: "It being his duty personally to perform—not merely direct—this labor, and his right only to have the other man help him to perform it, his relation to the machinery being primarily that of a laborer, it cannot be said that he was in the exercise of any superintendence while he was discharging this primal duty of a manual laborer. His superintendence, if any he had, extended only to his actual direction of the helper, and ceased whenever he did any act in person and in the line of his duty as the engineer in charge of these machines. . . . The evidence in this case is without conflict to the effect that when the engine moved or was set in motion Gould's helper was not even on the premises, and that, if the engine was started by Gould, it was the direct negligent act of a manual laborer, not in any sense done in the exercise of superintendence, conceding that at any time superintendence was intrusted to him. This leaves the case outside of subsec. 2 of § 2590 (of the Code). The death of McKay, on this hypothesis, was not caused by the negligence of a person to whom superintendence was intrusted, 'while in the exercise of such superintendence.' On the other hand, had the jury concluded that Gould did not start the engine, but that it was set in motion by some third person in consequence of his failure to prevent outside interference, the result must have been the same. On this hypothesis Gould was a mere watchman, for whose negligence the company was not responsible to his fellow servant. McKay. Roberts & W. Liability of Employers for Injuries to Workmen, 260. In no possible aspect of the evidence was the plaintiff entitled to recover. The affirmative charge for defendant was properly given."

The negligence of a conductor of a freight train while engaged in unloading freight, causing an injury to a brakeman assisting him, is that of a fellow servant. *Louisville, N. A. & C. R. Co.* v. *Southwick* (1896) 16 Ind. App. 186, 44 N. E. 263.

A foreman is a fellow servant with the employees under him, where both are engaged in throwing rails upon a car. *Louisville, N. A. & C. R. Co.* v. *Isom* (1894) 10 Ind. App. 691, 38 N. E. 423.

Riou v. *Rockport Granite Co.* (1898) 171 Mass. 162, 50 N. E. 525. There it was held that the act of an employee in a quarry whose principal duty was that of superintendent, in placing a can of powder preparatory to blasting where it was hit by a swinging tag rope attached to a derrick, was not an act of superintendence. The court said: "If the work of blasting was in some sense in the nature of superintendence, the mere act of fetching and putting down a can of powder preparatory to blasting could hardly be described as an act of superintendence, or as anything more than an act of manual labor on the part of Labelle. There was nothing in it involving any control over or direction to or oversight of any other workman, or requiring any skill, or distinguishing it from any other act of manual labor."

But the solution of that class of cases in which the injury is due to the negligence of a superintendent in regard to a manual act casually done for the purpose of expediting the work is less easy.

The conception underlying some of the decisions is that these incidental digressions into the functions of a mere servant do not carry him outside the scope of his duties of superintendency. This doctrine has the merit of avoiding the logical incongruity involved in the hypothesis that the judicial effect of the same physical event may be different according as it resulted from the personal negligence of the superintendent himself, or the negligence of a subordinate in carrying out his orders.[6]

Another conception is that a superintendent who, during however brief a period, engages in manual labor, is prima facie deemed to have abdicated his functions of superintendence, and to be acting *ad hoc vicem* in the capacity of a mere workman.[7] An extreme application

[6] In *Osborne* v. *Jackson* (1883) L. R. 11 Q. B. Div. 619, 48 L. T. N. S. 842, recovery was allowed where the injury was caused by the negligence of a foreman in handling a plank, the other end of which was held by the plaintiff. The foreman took the plank, and, in effect, directed the plaintiff to take it when he could not do so safely, and thus thrust on him a duty he could not safely perform. The court said: "If Thomas [the foreman] had directed another to do what he did himself, he would surely have been negligent in the exercise of superintendence." Denman, J., distinguished *Shaffers* v. *General Steam Nav. Co.* (1883) L. R. 10 Q. B. Div. 356, 52 L. J. Q. B. N. S. 260, 48 L. T. N. S. 228, 31 Week. Rep. 556, 47 J. P. 327, on the ground that the negligent person there had two duties, and was not negligent in his duty of superintendence so as to cause the accident, while in the case before him the foreman was generally superintending the work on which the plaintiff was employed.

It has also been laid down by the English court of appeal that the mere fact that a superintendent undertakes to do some manual work himself does not preclude the inference that, while doing such work, he is exercising superintendence. *Kay* v. *Wallis* (1887; C. A.) 51 J. P. 519 (walking foreman of a stevedore pushed some planks which he had given orders to lower, and knocked plaintiff off a platform).

The act of a foreman of stevedores who, by way of pushing on the work, takes hold of a case which is being lowered into the hold of a ship, and impatiently "casts" it over to one side, the result being that it falls and injures a servant, is done by him as superintendent, and not as a mere servant temporarily engaging in manual labor. *Donnelly* v. *Spencer* (1898) 1 Sc. Sess. Cas. 5th series, 1109, 36 Sc. L. R. 876. In this case it was suggested that a foreman is not to be regarded as having exchanged his functions of superintendent for those of a mere servant engaged in manual labor, unless he engages in such labor some "appreciable length of time."

A conductor undertaking to make a coupling between two cars, which, if not made properly, will affect the safety of a brakeman who has been ordered to make a coupling between two other cars, is apparently assumed to be acting as a superintendent in. *Alabama Midland R. Co.* v. *McDonald* (1905) 142 Ala. 216, 20 So. 472. But the decision was put upon the ground that no negligence was established.

[7] It is not an act of superintendence to push a heavy beam with the foot so that it falls through a hole in the floor. *McCauley* v. *Norcross* (1892) 155 Mass. 584, 30 N. E. 464.

The act of a person whose principal duty was that of superintendence, in permitting himself or another laborer to be in the neighborhood of a third laborer with a crowbar in his hands, can not be found to be negligent superintendence merely because the event showed

of this doctrine is found in a case which seems to embody the principle that an act which is deemed to have been done as a mere servant, for the reason that it is manual, communicates its quality, as an act of that character, to acts incidentally connected with it, which would otherwise have been regarded as pertaining to superintendence.' The conclusion thus arrived at, though in a sense logical, seems to ignore the essential rationale of the theory of differentiation which the court professes to be applying. It is submitted that, if the mere doing of a manual act implies *ad hanc vicem* a temporary devestiture of the functions of superintendence, the discharge of one of those functions, even when it is intimately associated with the manual act in question, should be regarded as involving *pro tanto* the resumption of these functions. Under any other theory, it is clear, the master will enjoy all the advantages, and be subject to none of the drawbacks, of the doctrine that the applicability of the statute is to be tested solely by the character of the functions in regard to which negligence is alleged.

The severe doctrine adopted in the cases just cited is qualified to the extent of allowing the servant to recover when the manual act in question was so connected with a plan or order coming from him in

that it was possible to harm the latter employee by negligently handling or dropping the bar. *Fleming* v. *Elston* (1898) 171 Mass. 187, 50 N. E. 531.

A street railway company is not liable for injuries to a servant due to negligence of the superintendent of its paint shop, where at the time of the injury the superintendent was acting as motorman. *Brittain* v. *West End Street R. Co.* (1897) 168 Mass. 10, 46 N. E. 111.

In *Whittaker* v. *Bent* (1897) 167 Mass. 588, 46 N. E. 121, it was held that a superintendent of an iron foundry does not exercise superintendence in setting up molds and inspecting them with reference to their condition as to dampness, or in assuring an employee that they are all right, where such acts are mere matters of detail and of recurring necessity. According to the plaintiff's testimony he asked the superintendent if the molds were all right, and received the answer, "Yes, go ahead, Bob." It was argued that, assuming the superintendent not to have acted as such in setting up the mold, he did exercise superintendence in what he said to the plaintiff, according to a distinction pointed out in *Kalleck* v. *Deering* (1894) 161 Mass. 469, 470, 42 Am. St. Rep. 421, 37 N. E. 450. But the court said: "We think that the answer, 'Yes, go ahead,' was not the direction of a superior, but merely the assurance, in a customary colloquial form, of the fellow workman who had inspected the mold that all was safe. A doubt might be raised as to the effect of a previous statement by the plaintiff to it the foreman gave him a ladle of iron to pour, which looks at first like a direction to do what the foreman ought to have known to be dangerous. But it appears from the context that it means only that the foreman that morning was doing the manual work of filling the ladles, and handed one to the plaintiff. It was part of the plaintiff's regular business to pour."

In a later case it was laid down that "the employer is not made answerable by the statute for acts of superintendence negligently performed in his service by an ordinary workman, or by one who is both workman and superintendent, in making declarations which may be interpreted either as orders of a superintendent or as assurances of a fellow workman, if in fact they are merely such assurances." *Carapezzo* v. *Clark* (1898) 171 Mass. 367, 50 N. E. 542.

the exercise of his authority as to show that the plan was ill conceived or the order negligent.[9] But this qualification is not construed as involving the conclusion that every act done by a superintendent, even to help in carrying out an order which he himself has given, should be regarded as part of his superintendency.[10] *A fortiori* is the master not liable where the act of the superintendent has no proper connection with his duties. "The question whether the connection is close enough is," as has been observed by Chief Justice Holmes, "one of degree, and naturally different people will draw the line at different points."[11]

[9] *Joseph* v. *George C. Whitney Co.* (1900) 177 Mass. 176, 58 N. E. 639, per Holmes, Ch. J. The authority for this proposition, cited by the learned judge, was *Gilson* v. *Look* (1898) 171 Mass. 36, 50 N. E. 458, where it was held that the manual labor of a superintendent who directed the method of lowering the fore and after into its socket, in unwinding a rope from the drumhead, cannot be separated from his duty as superintendent, so as to relieve the master from liability for injury to a servant, resulting from the superintendent's negligence in unwinding the rope when it was in a wet condition.

In *McCabe* v. *Shields* (1900) 175 Mass. 438, 56 N. E. 699, the acting superintendent in a foundry directed the plaintiff to use a mold for a casting, in which he had made a perforation with a rusty piece of iron. The evidence tended to show that, when the molten iron came in contact with the rust in the mold left there by the iron used in perforating it, it caused an explosion resulting in plaintiff's injury. It was held that the superintendent in placing the dangerous mold in plaintiff's hands, and directing him to use it, acted as a superintendent, but whether the act of perforation itself was one of superintendence was not decided.

In *Malcolm* v. *Fuller* (1890) 152 Mass. 160, 25 N. E. 83, it was held that, as a foreman of a quarry was exercising superintendence in determining, after the firing of a blast, that the tamping should be cleared out of a drill-hole by drilling, a servant injured by an explosion while the work was being done might recover, regardless of the fact that the superintendent himself struck the drill.

In *Crowley* v. *Cutting* (1896) 165 Mass. 436, 43 N. E. 197, where a stone which was being hoisted slipped out of the dogs which held it, for the reason that no holes had been drilled to receive them, a verdict for a servant injured by the fall of the stone was upheld, although the superintendent adjusted one of the dogs himself.

In *Ray* v. *Wallis* (1887: C. A.) 5 T. L. R. 519, the court mentioned, as an additional reason for holding the defendant liable, the fact that the manual work was connected with an order previously given, but the decision was independent of this factor.

[10] *Joseph* v. *George C. Whitney Co.* (1900) 177 Mass. 176, 58 N. E. 639.

[11] *Joseph* v. *George C. Whitney Co.* (1900) 177 Mass. 176, 58 N. E. 639. There the plaintiff was at work on an embossing machine which was not running, and had his hands between its jaws, when another workman called the superintendent, who leaned over between plaintiff's machine and another to give directions to the second workman, and accidentally touched the shipper, thereby starting plaintiff's machine, and causing the injury. Held, that plaintiff could not recover. "The precise place," it was said in the opinion of the court, "in which Meyer, the superintendent, should be while giving his directions, the way in which he should stand or sit, and his care in managing his body in the place he selected, were too much the accident of his independent personality, and too remote from the act of giving the orders, for us to charge the defendant with the consequences of his neglect in that regard. The matter may be stated in a different form. If the motion of Meyer which caused the injury be regarded as part of an act of superintendence, the fact that he was superintending was in no way a necessary element in producing the injury. But we are of opinion that by a true construction of the statute the superintendence must contribute as

The cases cited in this section should be compared with the common-law decisions reviewed in §§ 544–547, *ante*.

E. Liability for injuries caused by the negligence of a person to whose orders the injured servant was bound to conform.

689. Introductory.— In section 1, subs. 3, of the English act, it is provided that a servant shall have a right of action against his employer, whenever injury is caused to a workman "by reason of the negligence of any person in the service of the employer, to whose orders or directions the workman, at the time of the injury, was bound to conform, and did conform, where such injury resulted from his having so conformed." This provision is inserted verbatim in the Canadian and Australian Acts. The statutes of Alabama and Indiana include a clause of essentially the same purport, but no provision of this tenor is found in those of Massachusetts, New York, or Colorado.

This subsection may be regarded as being, broadly speaking, declaratory of the "superior servant doctrine" (see chapter XXVIII., subtitle D, *ante*), which, as we have had occasion to remark in § 680, subd. c, *supra*, is not embodied in the preceding subsection of the act. The decisions based upon that doctrine, however, have not, so far as appears, influenced the courts to any extent in their construction of this provision. The specific language used by the legislatures has alone been considered on ascertaining the extent of the master's statutory liability, and it is therefore merely from the standpoint of comparative jurisprudence that the decisions which apply the doctrine in question are of any interest or utility in the present connection.

690. Conditions precedent to recovery.— The establishment of the following propositions is an essential prerequisite to the maintenance of an action under this provision:

such, and that when, as here, it had nothing to do with the injury *qua* superintendence, the case is not within the act."

Even if a superintendent traveling on a street car as a passenger is a superintendent to the extent of having his eye on the way in which the car is managed, his superintendence, as such, does not contribute to an injury received by the conductor through striking against a tree close to the track in consequence of his having to step round the superintendent while he is standing on the running board. *Hall* v. *Wakefield & S. Street R. Co.* (1901) 178 Mass. 98, 59 N. E. 668.

On the other hand, it has been held that a jury is justified in finding that a superintendent in general control of the entire work of digging a new [illegible] was engaged in an act of superintendence in walking along the bank, and in stopping to look down at the work, in the course of which he precipitated a fall of the bank. *McCoy* v. *Westborough* (1899) 172 Mass. 504, 52 N. E. 1064. See also *McCauley* v. *Norcross* (1892) 155 Mass. 584, 30 N. E. 464, the facts of which are stated under § 687, note 1, subd. (f), *supra*.

(1) That the directing employee was invested by the master with authority to give orders which the injured employee was bound to obey.

(2) That the particular order given was one within the scope of the authority thus conferred on the directing employee.

(3) That the act of the injured employee which led to his receiving the injury was done in compliance with an order actually or impliedly given.

(4) That there was a casual connection between the giving of the order and the injury received.

(5) That the directing employee was wanting in due care either with respect to the order itself or with respect to some duty in the performance of which he represented the master.

These constituents of the plaintiff's right of action will be discussed in the following sections.

691. To what superior servants the subsection is applicable.—As the fact that the injury resulted from conformity to an order is the sole prerequisite to recovery under this provision, it would seem to be applicable to any employee who is authorized to give an order in respect to the subject-matter, whether he is or is not a superintendent or foreman, as that term is commonly understood. And on the whole this is the effect of the decisions on which the question has been directly raised, though, in reference to the facts involved, it can scarcely be said that they are entirely consistent.[1]

[1] Recovery has been allowed for the negligence of the following employees:

A carman under whose directions the plaintiff was unloading a van. *Millward* v. *Midland R. Co.* (1884) L. R. 14 Q. B. Div. 68, 54 L. J. Q. B. N. S. 202, 52 L. T. N. S. 255, 33 Week. Rep. 366, 49 J. P. 453.

An employee who was sent with a small gang of men to construct an elevator, and who was the only person on the premises authorized to give orders about the work. *Wild* v. *Waygood* [1892: C. A.] 1 Q. B. 783, 61 L. J. Q. B. N. S. 391, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389.

A machineman in a foundry who directed the workmen as to what they were to do, although he could not discharge them, and could only enforce his directions by an appeal to the foreman of the works. *Dolan* v. *Anderson* (1885) 12 Sc. Sess. Cas. 4th series, 804, 22 Sc. L. R. 529.

A complaint is not demurrable which in effect alleges that the injury was due to the negligence of the employer in appointing an incompetent person to superintend a work requiring such special skill as the pulling down of a building. *Flynn* v. *McGhee* (1891) 18 Sc. Sess. Cas. 4th series, 555.

But in *Hooper* v. *Holme* (1897) 13 Times L. R. 6, Affirming 12 Times L. R. 537, the defendant was held not to be liable for the negligence of a mere foreman of a small gang consisting of two masons and two mason's labourers, told off to do some repairs on a railway viaduct. In the division Court this decision was put by Mathews, J., upon the ground that, to make an employer liable there must be someone who had authority to give orders. That is, who had a mandate from the employer. It may be that the decision in the court of appeal was really intended to rest upon the hypothesis that there was, as a matter of fact, no "mandate" from the employer. Or the theory of the ruling may be, in part at least, that there was no proof of any order influencing the per-

Under any theory it is clear that the master cannot be held liable for the negligence of an employee who has not been authorized, either expressly or by implication, to give orders in respect to the subject-matter.[2]

This section is applicable only to employees who are intrusted with the function of giving directions which are orders in the legitimate and ordinary acceptation of that term. An employee who merely tells another that the time has arrived for setting in motion a machine which they are both engaged in operating is not a representative of the master.[3]

off's action. See § 691, *infra*, where the case is referred to. Unless these special reasons be regarded as the rationale of the conclusion arrived at, the effect of the decision, when taken in connection with that in *Wild* v. *Waygood* [1892] A. C. 1 Q. B. 783, 61 L. J. Q. B. N. S. 301, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389, seems to amount to little more than this—that the employee who is thus, in a sense, placed in charge of a small gang of this description, is presumed not to be one of those to which this provision of the statute is applicable, but that this presumption may be rebutted by showing that, as a matter of fact, he was authorized to give orders. It would appear, however, that there is really some difference of opinion among English judges in regard to the applicability of this section of the statute to such employees, for we find Smith, J., remarking *obiter*, in an earlier case, that the master is not liable for the negligence of "a mere foreman of a gang of laborers." *Kellard* v. *Rooke* (1887) L. R. 19 Q. B. Div. 585, 588. Hawkins, J., expressed no definite opinion in that case; nor did the justices of appeal (L. R. 21 Q. B. Div. 367, 57 L. J. Q. B. N. S. 599, 36 Week. Rep. 875, 52 J. P. 820).

In an action for injuries resulting in plaintiff's death an instruction that if the jury found that the decedent, while in the defendant's employ, was directed by the conductor in charge of defendant's train to set the brake on a car, it was intestate's duty to obey such direction, using due caution, is not erroneous, where the evidence clearly showed that intestate was under the conductor in charge of the train and subject to his orders at the time. *Hunt* v. *Conner* (1901) 26 Ind. App. 41, 59 N. E. 50.

A., where a fellow workman directed the plaintiff to take a load of iron stanchions on a trolley with the sides un- protected *Corcoran* v. *East Surrey Ironworks Co.* (1888) Q. B. D. 5 Times L. R. 103, 58 L. J. Q. B. N. S. 115.

In *Brown* v. *Furness* (1896) 23 Sc. Sess. Cas. 4th series, 892, the judges doubted whether a workman who calls other servants to his assistance and directs them as to the loading of a heavy piece of machinery onto a truck is within this section; but this seems to be, beyond all question, a case in which there was no mandate from the employer.

The conductor of a railroad freight train has a right to employ a person to perform the necessary duties of a brakeman or trainman suddenly becoming ill or otherwise unable to fill his place; and a person receiving personal injuries while so temporarily employed will be treated as an employee of the company in an action for damages for such injuries; but not if plaintiff was merely a bystander, and ordered by the conductor to connect the coupling, but was under no obligation or agreement to obey the order. *Georgia P. R. Co.* v. *Propst* (1887) 83 Ala. 518, 3 So. 761, where it was held that a night watchman about a station, who had voluntarily taken passage on a freight train to a place where he took his meals, could not recover for injuries received in complying with the conductor's order or request to couple two cars.

This case was followed in a later one, where it was held that a mere direction by a conductor to turn a switch, given to an occasional employee of the company, who boarded the train of his own accord, while off duty, did not render the company liable to an injury sustained by such employee while complying with the direction. *Hubbard* v. *Highland Ave. & Belt R. Co.* (1890) 90 Ala. 64, 8 So. 41.

In *Howard* v. *Bryant* (1888) 58 L. T. Q. B. N. S. 179, 16 L. T. N. S.

Where both the complainant and the negligent employee occupied positions which implied the possession of a power to control other employees, the master's liability must, of course, be determined with reference to the question, whether, as a matter of fact, the complainant was subject to the directions of the negligent employee.[4]

Whether the defendant can be held liable under this provision for the negligence of an intermediate employer depends upon whether that employer is an independent contractor or a person who, with his workmen, has entered into the service of the defendant and is subject to his control.[5]

692. Temporary substitutes for regular foremen, status of.—It seems to be laid down as an unqualified principle in an Indiana case that, in the absence of specific evidence of authority to appoint a substitute, a court will presume that a superintendent or foreman exceeds his powers in temporarily delegating his functions of control to one of his subordinates, and that for this reason a workman who is injured by conforming to the orders of the delegate cannot recover damages from the master.[1] This doctrine seems to be a much more dubious application of the maxim, *Delegatus non potest delegare*, than the decisions which deny the servants' right to recover for injuries caused by the defaults of a temporary superintendent. See § 685, *supra*. The only condition precedent to recovery under this provision of the statutes is that the plaintiff shall have been bound to conform to the orders of the negligent fellow employee. The essential question, therefore, in such cases seems to be, not whether the delegation of powers was authorized, but whether employers, as a class, would accept, as a valid excuse for disobedience to the orders of the substituted foreman, the plea that he was not a legally appointed deputy. If this question

152, 53 J. P. 359, 5 Times L. R. 136. Lord Coleridge said: "I do not think that such a communication as this as to starting a machine, from one workman to another, is an order or direction within the meaning of the words of the subsection, which are more applicable in my view to a man in a superior position, and do not apply to fellow workmen, who are not in the least in a position of superiority to each other, or amenable even to the suggestions of one another." Compare the common-law decisions to the effect that employees whose functions are to give signals are not performing a non-delegable duty. See § 607, *ante*.

[4] A man charged with the operation of the furnaces in a foundry cannot properly be held a person to whose orders a master mechanic is bound to conform where the evidence is that each is supreme and of equal degree in his peculiar department. *Birmingham Furnace & Mfg. Co.* v. *Gross* (1892) 97 Ala. 220, 12 So. 36.

[5] A mine owner has been held answerable for the negligence of the employer of "bulty" men, i. e., men who joined together to get out coal at so much a ton, the evidence showing that the defendant had the right to discharge such employees. *Brown* v. *Butterley Coal Co.* (1885; Q. B. D.) 2 Times L. R. 159, 53 L. T. N. S. 964, 50 J. P. 230.

[1] *Hodges* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 52 N. E. 391, 54 N. E. 383.

must, as seems inevitable, be answered in the negative, the theory of the court in this case is clearly erroneous, for the proposition that disobedience to such orders will, in the large majority of cases at least, draw down upon a servant the displeasure of the employer, and even expose him to imminent risk of dismissal, may reasonably be said to involve the proposition that conformity to the orders is obligatory upon him. It is true that, if a servant was really justified in disobeying an order of a deputy foreman, the master would not be justified in dismissing him because the order was disobeyed, and it may therefore be urged that the law cannot test the existence or absence of a duty with reference to any other assumption than that the master will act as he ought to act in the premises. To this reasoning there is, it may be conceded, no direct answer, but its effect would seem to be adequately countervailed by the practical consideration that it is neither fair to the servants themselves, nor conducive to the interests of the master, to lay down a rule which would impose upon subordinates the duty of inquiring, in each particular instance of the appointment of a deputy by a foreman, whether or not the appointment has actually been authorized by the master. Such a rule is open to the very same objections as those which have been deemed conclusive against the theory that a master is exempt from responsibility if the order to which the plaintiff conformed was one which the directing employee was expressly forbidden to give. See next section. The most rational principle, it is submitted, which can be laid down for the solution of such cases is that subordinates are entitled to regard themselves as being bound to comply with an order of an employee temporarily acting as foreman, unless the delegation of authority has, to their knowledge, been expressly prohibited by the master, or the order which they are required to execute is manifestly beyond the scope even of the authority conferred upon the regular foreman himself.

693. To what orders a servant is bound to conform.—(See also the preceding section, *ad finem*, and § 695, *infra*.) All the powers which are reasonably incidental to the exercise of his general power are deemed to have been impliedly conferred upon a supervising employee.[1]

Where injury is caused to a workman by reason of his conforming to a negligent order of an employee whose orders he was bound to obey, the master is liable, although the order was to do something ex-

[1] If the coupling of cars in a certain way will save time, a conductor is authorized to direct them to be coupled in that way. *Grand Trunk R. Co.* v. *Beemer* (1894) 23 Can. S. C. 422, per King, J. This point was not noticed by the other members of the court, nor by the lower courts ([1893] 23 Ont. Reps. 136 [1893] 20 Ont. App. Rep. 528).

pressly forbidden by the employer's rules.[2] But an exception to the application of a familiar principle of the law of agency to actions brought under the statute is admitted to exist wherever the forbidden order was one which the plaintiff knew to be outside the scope of the authority of the directing employee.[3]

694. When a servant is deemed to have acted under orders.—To entitle an injured servant to maintain an action it is not necessary to prove that an order was given by means of words. An order within the meaning of the statutes may be implied from circumstances, and it is primarily a question for the jury whether it shall be so implied.[1] Among the circumstances which may justifiably furnish a basis for the inference that the plaintiff was acting under orders is the customary course of proceeding on previous occasions when similar work was to be done.[2]

[2] *Morley* v. *Osborn* (1894: Q. B. D.) 10 Times L. R. 388, where Cave, J., said: "The legislature did not intend to leave it to the workman to go into the question whether the order given was right, if it was an order he was bound to obey, but intended that in every case in which a superior had given an order which an inferior would be bound to obey, the master would be liable for the consequences."

[3] In *Bunker* v. *Midland R. Co.* (1883) 47 L. T. N. S. 476, 31 Week. Rep. 231, the plaintiff, a van guard in the service of the defendants, was at the time of the accident under the age of fifteen, and was aware that there was a rule of the company that no van guard under the age of fifteen was ever to drive a van. The defendant's foreman ordered him, the plaintiff, to drive a van load of fish to market, and said he would be paid extra money for so doing. The boy did drive the van, and in consequence was thrown down from his seat and seriously injured. Held, that he was properly nonsuited, on the ground that, as he was not obliged to obey the order so given, the foreman was not a person to whose orders in regard to the subject matter he was bound to conform, and that the true cause of the accident was his own contributory negligence.

[1] *Millward* v. *Midland R. Co.* (1884) L. R. 14 Q. B. Div. 68, 54 L. J. Q. B. N. S. 202, 52 L. T. N. S. 255, 33 Week. Rep. 366, 49 J. P. 453, per Day, J. (p. 70).

According to Rigby, L. J., in *Reynolds* v. *Holloway* (1898) 14 Times L. R. 351, one, at least, of the grounds of the decision in *Hooper* v. *Holme* (1897) 13 Times L. R. 6, where the plaintiff was injured while mixing cement in a place where he was liable to be struck by passing trains, was that an order could not be implied from the fact that the foreman of the gang was himself doing similar work in an equally dangerous place. See further as to this case § 691 note 1, *supra*.

An express order to go between an engine and a car to uncouple them will be implied from a special order to uncouple at a time and under circumstances when it was necessary to go between them to conform to the special order. *Toledo & O. R. Co.* v. *Goode* (1891) 94 Ala. 199, 10 So. 145.

[2] *Millward* v. *Midland R. Co.* (1884) L. R. 14 Q. B. Div. 68, 54 L. J. Q. B. N. S. 202, 52 L. T. N. S. 255, 33 Week. Rep. 366, 49 J. P. 453. There the plaintiff was not expressly ordered to do the work in the manner which resulted in injury to him, but he testified that he did it in that manner without orders because he had done so on previous occasions, and that his superior saw what he was doing and made no objection. The contention of defendant's counsel that the act did not apply because no direct order was given at the time the injury was received did not prevail. Day, J., said: "Surely the order need not be by express words. The jury might think that an order was implied from the circumstances." Mathew, J., said: "The plaintiff was doing what, according to his evidence, it was the ordinary course for him to do—unloading similar goods. Is it necessary

Where the injury resulted from the adoption of some particular method of doing the work assigned to the plaintiff, the master is responsible if that method was specifically designated by the superior servant in giving his order.[3] In the absence of specific directions, a general direction is deemed to authorize the doing of a thing in the manner reasonably proper for doing it.[4]

A servant is deemed to have been injured by conforming to an order, where, in carrying out a general direction, he uses the means which, to a person possessing his limited knowledge of the conditions, it might seem reasonable to adopt under the circumstances, though an expert would have adopted a different method.[5]

695. Necessity of establishing a causal connection between the order and the injury.—To entitle a plaintiff to recover under this provision he must, in fact, have conformed to the order of the negligent coemployee in respect to the particular act which he was doing at the time when he was injured.[1] Hence, an action in which the plaintiff seeks to recover on the theory that he was injured by conforming to an order to take up the position which he occupied at the time of the accident is not maintainable, where the only possible inferences from the evidence are either that no such order was given at all or that the order actually given was to stand away from that position;[2] nor where the

in order that the subsection may apply, that an order should be verbally given to a man to do what it is the ordinary course of his duty to do every day in the week?"

This case was followed in *Cox* v. *Hamilton Sewer Pipe Co.* (1887) 14 Ont. Rep. 300, where it was laid down that recovery is not dependent upon proof of the giving of a specific order at the time of the accident, general prior orders being sufficient.

A verdict for the plaintiff will not be disturbed where the evidence was that he lost his hand while taking some stuff out of a mixing machine while it was in motion, and that his foreman had taught him to do this, and it was the usual method of doing the work. *Holloway* v. *Greenwich Inlaid Linoleum Co.* (1898; C. A.) 14 Times L. R. 291.

[1] *Weegar* v. *Grand Trunk R. Co.* (1893) 23 Ont. Rep. 436. Affirmed in (1893) 20 Ont. App. Rep. 528 (no opinion) (1894) 23 Can. S. C. 422 (conductor told a brakeman to arrange the coupling apparatus in a certain way for the purpose of coupling an engine to a car, and then signaled for the engine to back up before he had accomplished whether or not the coupling had been completed).

In a case where there is evidence going to show that the accident was caused by that form of negligence which consists in ordering one man to do work which cannot be safely done unless two are assigned to it, it is a misdirection to tell the jury that there was a "special" order within the act, and a verdict for the defendant rendered after such a charge will be set aside. *Barber* v. *Burt* (1894; Q. B. D.) 10 Times L. R. 383.

[4] *Hodges* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 52 N. E. 391, 54 N. E. 383.

[5] *Kellard* v. *Rooke* (1888) L. R. 21 Q. B. Div. 367, 57 L. J. Q. B. N. S. 599, 36 Week. Rep. 875, 52 J. P. 820 (plaintiff struck by a bale, while standing under the hatchway of a ship).

superior servant, although he had authority to direct the plaintiff to perform the duty which brought him to the place where he was injured, had no authority to send him to that place rather than to any other.[3]

It is not enough to prove that there was negligence in a servant of the defendant which caused the injury, nor that that negligence was the negligence of the person to whose orders the plaintiff was bound to conform. It must be proved that the injury arose, not alone from the negligence of such a person, but also from his having conformed

[3] One employed to work at a machine in a shed, who is subject to directions from a carpenter as to what work he shall do, but in no other respect, who while working overtime in the evening is injured by the negligence of the carpenter, who was stacking timber in the shed, in which it was not safe for them both to work at the same time, cannot recover against the employer. *Snowden* v. *Baynes* (1890) L. R. 24 Q. B. Div. 568, Affirmed in (1890) L. R. 25 Q. B. Div. 163. In the divisional court, Wills, J., argued thus: "It seems to us that there is no connection between his doing that piece of work rather than any other, and the accident. Sellick [the carpenter] had no authority to send him to any other place to work, or to exercise any discretion, or give any orders as to where he should to go to do the work. Whatever work Sellick had told him to do, he would have been in the same place, so that it was in no sense the exercise by Sellick of an authority vested in him and exercised by him that brought the plaintiff into what ultimately proved to be a place of danger. We think the order which is contemplated by this subsection must be one which is really that of the person in the position of Sellick, and which is the direct offspring of some choice or exercise of judgment and will on his part; if not, it is not his order at all. Sellick had authority to say, 'You shall do this bit of work or that bit of work,' but not 'You shall do it at this place or that place.' The choice of place rested with someone else. So far as the evidence goes upon this point, the shed in question was the plaintiff's regular place of work, and it has not been suggested that either he had any choice, or Sellick any control, in respect of the place where the work should be done. . . . We think it right, however, to point out that, besides the broad distinction we have already dealt with, there is one obvious difference (whether affecting the right of action or not), between a case in which the circumstances of danger are brought about by the performance on the part of the person injured of acts the direct result of obedience to an order then and there given, and which then expose him to immediate risk if the person giving the order be careless, and a case in which obedience to the order is accompanied by no circumstance of present risk from the negligence of the person giving the order, and in which if the mere fact that obedience to the order involves the presence of the workman in a spot where he is afterwards endangered by the act of the person giving the order is sufficient to give a right of action, the liability may flow from an order given a week or a month before the accident happened. In such a case it is obvious that such an order might amount to very little more than the mere selection of a particular workman to be employed upon a particular job, and it is difficult to suppose that such a case could be within the act." In the court of appeal Lord Esher thus tersely stated his view: "Unless the plaintiff can show that Sellick had authority to tell him where he was to work and at what time, he cannot succeed in his action. I cannot see any evidence of such an authority. The evidence shows that the only authority of Sellick was to tell the plaintiff what work he was to do. There is no evidence that Sellick had any authority to tell the plaintiff to work overtime, or that under his agreement with the defendant the plaintiff was bound to work overtime if Sellick told him to do so. There is, therefore, no evidence of any order given to the plaintiff by Sellick which led to the accident." Fry, L. J., based his judgment on the ground that "the accident arose from the plaintiff's working overtime by his own voluntary act."

to the order.[4] If the only negligence charged is that which inheres in the order itself, the two ingredients of the right of action thus specified will, in the nature of the case, be merged in the single question, whether the injury was the consequence, in a legal sense, of the servant's obedience to the order. This question is one partly of fact and partly of law and is determined by the same tests as those ordinarily employed for the solution of similar problems.[5] See chapter XLII., *post*.

But if the alleged breach of duty was in respect to something done or omitted after the servant had complied with an order which was not an improper one considering the circumstances under which it was given, the analysis of the causation is less simple. In a case involving this situation, it has been held by the English court of appeal that the servant is not required to prove that the injury resulted from his conformity to orders, as its *causa causans*, but merely that such conformity was the *causa sine qua non* of the injury. That this doctrine is subject to some limitation, and that it does not render the master liable for all subsequent delinquencies of the directing employee, is apparent from the opinions of the lord justices. But neither this nor any other reported decision indicates with any clearness the principle upon which the line is to be drawn between the acts for which the master is or is not responsible.[6]

[4] *Wild* v. *Waygood* (1892) 1 Q. B. 783, 61 L. J. Q. B. N. S. 391, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389, per Lord Herschell. In the same case Lindley, J., expressed his views as follows: "Negligence must be proved. But something more must be proved, and when you come to examine the section you must prove this much more,—that the negligence was that of a person in the employ of the defendant, to whose orders the plaintiff was bound to conform; and, secondly, that the injury to the plaintiff resulted from his having conformed to those orders. The whole, I think, comes to this,—that the injury must be the result of negligence of the person giving those orders and of the plaintiff conforming to those orders. It will not do to prove one of these things only: the injury must be the result of the two, and if the two are so connected together as to cause the injury, then it appears to me that the case comes within this section."

[5] The order of a foreman to be quick is not the "cause" of an injury received by a workman through stumbling over some loose bricks, and falling under a car, where the expression was not used in such a manner as to imply that extraordinary diligence was to be used, but merely in the ordinary sense of a direction to proceed with his work. *Wetton* v. *Connah's Quay Alkali Co.* (1898) Q. B. D.) 33 Week. Rep. 216.

See also *Harris* v. *Tinn* (1889) Q. B. D.) 5 Times L. R. 221, the facts of which are stated in the following section.

Where an injury was received by a brakeman in consequence of a fellow brakeman's having given to another brakeman a wrong signal, which was finally transmitted to the engineer by the conductor, it was held that the cause of the injury was the negligence of the first brakeman who gave the signal, and that there could be no recovery under this provision of the statute. *Grand Rapids & I. R. Co.* v. *Pettit* (1901) 27 Ind. App. 129, 60 N. E. 1009.

[6] In the case referred to (*Wild* v. *Waygood* [1892; C. A.] 1 Q. B. 783, 61 L. J. Q. B. N. S. 391, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389), the plaintiff was held entitled to recover for an injury resulting from the negligence of his foreman in starting an ele-

In Alabama the view is taken that the injured servant cannot recover unless the superior servant was negligent in giving the direc-

vator, while he was standing, in compliance with the foreman's directions, on a plank extending across the elevator shaft. Lord Herschell said: "Now, in this case it appears to me,—and I do not propose to lay down any general rule upon the subject,—that it is quite clear the injury did result from the plaintiff having conformed to an order, when he was told to go to a place which was, and must have been known to be, a dangerous place, if the person who told him to go there was guilty of negligence. That person having been guilty of negligence, created the danger, and caused the injury, it seems to me the case is within the very terms of the act. It is not necessary to endeavor in the present case to determine or lay down any general rule as to the construction of this section, beyond this,—that I am quite clear it is not limited to an injury arising from an order, which order is negligent in itself. That is one contention put before us. I think the words in the act of Parliament are conclusive against any such construction. It would be limiting it far beyond what the words either require or will admit of. That is all I lay down as regards the construction of the section, beyond this,—that I do not think it essential to show that the conformity to the order was what has been called the *causa causans* of the injury. The negligence must be proved, and if you prove the negligence, then it is sufficient if, in addition to proving that, you also prove that the injury resulted, not from the negligence alone, but from the negligence and the conforming to the order." Kay, L. J., discussing the three possible constructions that might be put on the section said: "The first point that has been urged before us is that it only means an injury from conforming to a negligent order—the negligence being in the order itself. The second is that it means anything that may occur while conforming to an order; and the third is that it means only such direct or indirect results as are closely connected with the order that has been given. I think the first construction argued for is inadmissible. The section clearly shows that it is not confined to an injury caused by a negligent order, but that it must be caused by the negligence of the person giving the order, and must result from conforming to the order given. I do not think that it would be the proper construction of that subsection; I think it would be much too narrow to say that it refers merely to negligence in giving the order. Then I think the second construction would also be much too wide. To say that it includes every case of negligence after an order has been given which the workman was bound to conform to at the time would make it extend to a case where the order was a general order to assist the person who gave it in certain work, and which might be given days or weeks before; and the accident might result from the negligent act of that person while the workman was assisting him. I am not prepared at present to say that the construction of the subsection is so wide as that. It seems to me the third construction is the most reasonable construction of the section—that it relates to negligence which has an intimate connection with the conforming of the workman to an order given him at the time of the injury, and to which he was conforming at the time of the injury. . . . The negligence was really a combination of those two things. If the workman had not been on the plank, there would have been no negligence in pulling the string. It was because the workman was then at the moment, conforming to the order given to him by Duplea, that the pulling of the string by Duplea was an act of negligence. Therefore, the injury may be said to have resulted from conforming to the order, the act being done to Duplea whilst the workman was conforming to his order."

This decision overrules *Howard* v. *Bennett* (1888; Q. B. D.) 58 L. J. Q. B. N. S. 129, 60 L. T. N. S. 152, 53 J. P. 359, 5 Times L. R. 136, in so far as it was based on the proposition that conformity to orders was not the cause of an injury which resulted from the premature starting of a machine, while the plaintiff's hands were in a dangerous position, in which he had placed them while in the act of complying with the order. In criticising the theory of Lord Coleridge in the earlier case, that the injury resulted, not from the directions, but from the machine being set off too soon and at too great a speed, Lord Herschell said: "I most respectfully express my dissent from the ve-

tions which were conformed to.[7] That this construction of the words of the statute is opposed to the weight of authority is apparent from the decisions already cited. The case in which it was adopted antedates *Wild* v. *Waygood* (see note 1, *supra*), and it may be questioned whether a different theory would not have commended itself to the court if the arguments upon which that decision was based had been before it.

In one Indiana case the court proceeded upon the principle that an injury due to negligence of the superior servant, which was committed subsequently to the giving of the order, did not constitute a cause for action, the reason assigned being that under such circumstances the injury did not result from conforming to his orders, but from the subsequent act or omission.[8] But this doctrine has been qualified by later decisions. One of these permits recovery where the direct cause of the injury was something done or omitted by the plaintiff's fellow servants in compliance with a second order.[9] In another the action

of the lord chief justice there indicated. Of course, it may be that the person who started the machine was not a person to whose orders the plaintiff was bound to conform; but supposing the plaintiff was bound to conform, and that the person to whose orders he was bound to conform in working a machine tells him to put his hand in a certain part of the machine and then negligently starts it while the man's hand is there, I own I cannot agree that in that case the injury which is caused by the negligent starting of the machine in such circumstances is not an injury which results from conforming to the order given. The order given was to put his hand in a certain part of the machine, which is a part where his hand will be in immediate danger if the machine is started; and, his hand being there, the negligence consists in starting the machine whilst his hand is there. Under such circumstances as those, there seems to me the most immediate and intimate connection that one can conceive between the negligence which caused the injury and the conforming to the order, because it is in truth one element of the negligence that he was conforming to the order at the time. Therefore, with great respect to the learned chief justice, I am unable to concur in the view that the conformity with the order must be in that sense the *causa causans* of the injury." But the denial of the right to recover in the earlier case was probably justifiable on the other ground assigned, *viz.*, that the negligent employee was not a person to whose orders the plaintiff was bound to conform, within the meaning of the statute. See § 691, *supra*.

It is an error to take the case from the jury, where the evidence is that the plaintiff, while at work in the sweat box of a sewer pipe company and engaged in placing clay in the press, was injured by the act of the employee in charge of the press in causing the plunger to come down before the plaintiff had given the word. *Cox* v. *Hamilton Sewer Pipe Co.* (1887) 14 Ont. Rep. 300, adopting the general principle that the servant may recover without showing that the order was a negligent one.

[7] This is one of the four prerequisites to the maintenance of the action mentioned in *Mobile & O. R. Co.* v. *George* (1891) 91 Ala. 199, 10 So. 145.

It has been held, on the ground that it was perfectly proper to order the plaintiff to cut down a tree in which another had lodged, that the failure of the superior servant to inform the subordinate when it had become unsafe for him to further chop on the tree did not authorize a recovery from the employer. *Postal Telegraph Cable Co.* v. *Halsey* (1896) 115 Ala. 193, 22 So. 851.

[8] *Hodges* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 52 N. E. 391, 54 N. E. 383.

[9] In *Louisville, N. A. & C. R. Co.* v. *Wagner* (1899) 153 Ind. 120, 53 N. E. 927, the plaintiff assumed a dangerous position in obedience to his foreman's

was held maintainable where the injury was due to the negligence of a superintendent in bringing a naked lantern close to a place where gas was escaping, and where the plaintiff was working by his orders. The court of appeals declined to accept the contention that the statutory provision was not applicable for the reason that the injury occurred long after the order had been given and obeyed, and as a result of the negligent handling of the lantern.[10] If the supreme court should ultimately adopt the doctrine of this last case, the law in this state will, it seems, be virtually the same as it is in England, and the *Hodges Case* (see note 8, *supra*), which, strange to say, is not referred to in the later opinions, would be discredited.

It is clear that, under any theory of the effect of this provision, no action can be maintained where the evidence indicates that the efficient cause of the injury was a mere accident,[11] or an act of negligence committed, while the plaintiff was executing a proper order, by a coemployee to whose directions he was not subject.[12]

696. Necessity of showing negligence on the part of the superior servant.—As pointed out in the preceding section, the negligence for which the master is required to answer under this provision of the statutes may be either in regard to the order to which the plaintiff conformed, or in regard to some subsequent act or omission of the directing employee. In either case the question is simply as to what would have been the conduct of a prudent person under the given circumstances.[1]

orders, and was injured in consequence of his fellow workmen obeying the foreman's orders to let loose a truck. The court said: "The order to loose the truck was the proximate cause of plaintiff's injury. And it was both directing the plaintiff into a dangerous situation, that he was thus bound to enter, and then ordering the truck turned loose upon him without warning, that constitutes the actionable wrong."

[10] *Indianapolis Gas Co.* v. *Shumack* (1899) 23 Ind. App. 87, 54 N. E. 414.

[11] *Harris* v. *Tinn* (1889; Q. B. D.) 5 Times L. R. 221; *McManus* v. *Hay* (1882) 9 Sc. Sess. Cas. 4th series, 425.

[12] *Elliott* v. *Tempest* (1888; Q. B. D.) 5 Times L. R. 154.

A railroad company is not liable where a brakeman, who assumed a position between cars separated from each other, for the purpose of coupling them, after the conductor should have made a coupling between the first car and the cars attached to the engine, is injured by reason of the failure of the conductor to make the first coupling, as he had stated he would do, if that failure was not due to negligence or recklessness but to the speed at which the engine came back against the first car. *Alabama Midland R. Co.* v. *McDonald* (1896) 112 Ala. 216, 20 So. 472. The court said that an action possibly lay for the negligence of the engineer under subs. 4 of the act. See following subtitle.

[1] *(a) Negligence in regard to the order itself.*—In the absence of something in the context to qualify the statement, it is a misdirection to tell the jury that, if they were of opinion that the delinquent superintendent thought the conditions were such as to render it safe to give the order in question, he would not be guilty of negligence. The real test is: What would a sensible man have done under the circumstances? *Nash* v. *Dinsmore S. S. Co.* (1891; C. A.) 7 Times L. R. 597.

In *Hooper* v. *Holme* (1896; C. A.) 12 Times L. R. 6, Affirming 12 Times L. R.

Construing the subsequent provision of the Indiana act, which corresponds to section 1, subs. 5, of the English act, the supreme court of that state has held that, as it merely particularizes other and different classes of employees for whose negligence the master is to be responsible, the scope of the subsection now under review is in no way limited by the restrictive phrase which, in the Indiana act, declares the recovery of the plaintiff to be conditional upon proof that the negligent per

537, it was assumed that putting a laborer to work on a railway viaduct without setting a look-out to warn him as to the approach of trains was negligence.

A verdict for the plaintiff will not be disturbed where the evidence is that the servant was a "ganger" who knew nothing about pulling down houses; that he was ordered by his foreman to save a certain partition; that while engaged in this work the joists supporting the ceiling came down with the roof and killed him; and that the foreman had not examined the joists to see how they were fixed. *Reynolds* v. *Holloway* (1898; C. A.) 14 Times L. R. 551.

No negligence is established by evidence showing merely that the foreman ordered the plaintiff to go into a hole which had been broken through a wall for the purpose of excavating a cellar, and that, while he was picking at the wall above him, it gave way and allowed the earth behind it to fall on him. *Baker* v. *Higgs* (1887; Q. B. D.) 3 Times L. R. 618.

The mere fact that the plaintiff's foreman had ordered him to lower a stack of planks before the time when it fell on him will not justify the inference that it was top-heavy at the time the order was given, and that its condition was known to the foreman, especially when the plaintiff and his witness admitted that they had observed nothing unsafe in the stack. *Connell* v. *Sutcen Shipway Commercial Dry Dock Co.* (1887; Q. B. D.) 3 Times L. R. 630.

The plaintiff obeyed an order to insert a bar of iron under a flat piece of iron on which a roll of iron was laid, and lift the roll so as to get it into a furnace lengthwise. While it was being lifted, it fell off the piece of iron on which it lay, in consequence of its not being properly scotched, and, striking the bar, threw the plaintiff backwards. Held, that the mere fact that the roll of iron fell was not sufficient evidence of negligence to submit to the jury, and that, for aught that appeared, the accident might have occurred owing to the manner in which the lifting was done by himself and his coworkers. *Harris* v. *Tins* (1889; Q. B. D.) 5 Times L. R. 221.

A foreman of one set of artisans working on a building is not negligent in sending them, without making an inspection, to work on a scaffold, built by a competent mechanic for the use of another set. *Kettlecell* v. *Paterson* (1886) 24 Sc. L. R. 85.

The plaintiff, who operated a machine in defendant's factory, was ordered by the superintendent to start the machine. The superintendent had reason to know that plaintiff might understand the order as a command to see if the machine was all right, by resuming work. She so understood it, and was justified in such understanding. While starting the machine, in the exercise of due care, plaintiff's hand was thrown from its usual place by the unusual shaking of the machine and injured. Held, that under the circumstances, the order of the superintendent was negligent, and plaintiff might recover. *Eaves* v. *Atlantic Novelty Mfg. Co.* (1900) 176 Mass. 369, 57 N. E. 669.

To prescribe an improper method of unloading heavy articles from a vehicle is negligence. *Hilcard* v. *Midland R. Co.* (1884) L. R. 14 Q. B. Div. 68, 51 L. J. Q. B. N. S. 202, 52 L. T. N. S. 255, 33 Week. Rep. 366, 19 J. P. 453 (iron window frames were left standing unsecured on a van).

No negligence is predicable of the omission of a foreman to instruct a boy sent to perform hazardous work, where he understands how to do that work and what danger it involves. *Worthington* v. *Goforth* (1899) 121 Ala. 656, 26 So. 551. For another illustrative decision, see *Martin* v. *Connah's Quay Alkali Co.* (1885; Q. B. D.) 33 Week. Rep. 216, referred to in the preceding section, note 5.

In an action by a switchman for damages for injuries sustained by being thrown from a car by the sudden jerk

son was "performing a duty of the corporation."[2] As this subsection declares in the most general terms that the master is to be liable for the "negligence" of any employee of the class designated, there would seem to be no room for the controversy which has arisen with respect to the construction of the subsection dealing with superintendence, *viz.*, whether the manual acts of a superior servant are among those for which the master is responsible. See § 688, *supra*. The few authorities which bear upon the subject are of a negative complexion; but the implication in favor of the workman's right to recover for an injury caused by such an action is as strong as it can be without a direct ruling on the point. In *Wild* v. *Waygood* (see § 695, *supra*), the point that the action could not be maintained because of the character of the negligent act was one so obviously suggested by evidence, that, if it had been considered an open one, it would almost certainly have been adverted to by one or other of the eminent judges and counsel who took part in the discussion of the facts. In one Indiana case the action was held not to be maintainable, where the evidence showed the infliction of an injury through the negligence of the plaintiff's superior in handling a heavy piece of machinery.[3] The true rationale of this decision, however, is not the character of the act constituting the negligence, but the theory that there was no causal connection between the order and the injury. See § 695, note 8, *supra*. In a still later case in the court of appeals of the same state, the

ing or checking of the car, alleged to have been caused by the negligence of the switching crew foreman or the engineer of the switch engine, an instruction that, "although the jury may believe from the evidence that said car was suddenly stopped, and that the speed of said car was suddenly checked, and that said car was otherwise jarred at the time plaintiff was injured, yet they must find for the defendant unless they further believe from the evidence that said sudden stopping of said car, or the sudden checking of said car, caused an unusual shaking or jarring of said car," correctly states the law, and should be given at the request of defendant. *Louisville & N. R. Co.* v. *Smith* (1901) 129 Ala. 553, 30 So. 571.

(*b*) *Negligence in regard to subsequent acts or omissions.*—See *Wild* v. *Waygood* [1892] 1 Q. B. 783, 61 L. J. Q. B. N. S. 391, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389, as stated in the preceding section, and also the cases referred to in § 697, *infra*.

[2] In *Louisville, N. A. & C. R. Co.* v. *Wagner* (1899) 153 Ind. 120, 53 N. E. 927, the court said: "Both subdivisions are equally parts of the same section and relate to the same subject-matter. Each subdivision specifies different employees, but in common they distinguish employees of a superior rank,—employees clothed with responsibility and authority of the employer,—and both must be governed by the same rules of interpretation. The section must be construed as a whole."

The fact that the injury was caused by the foreman's negligently approaching with a naked light a place where gas was escaping will not prevent a servant from recovering under section 1, subs. 2, although such an act is not in the performance of a duty of the corporation under subs. 4. *Indianapolis Gas Co.* v. *Shumack* (1899) 23 Ind. App. 87, 54 N. E. 414.

Hodges v. *Standard Wheel Co.* (1899) 153 Ind. 680, 52 N. E. 391, 54 N. E. 383. One of the grounds of the decision, *viz.*, that the directing employee was a duly appointed delegate, has been already noticed. See § 692, *supra*.

negligence was again in respect to a manual act, but it was not suggested that this was a sufficient reason for refusing to allow the action to be maintained.

F. Liability for injuries caused by acts or omissions done or made in obedience to rules.

698. Introductory.— In section 1, subs. 4, of the English act it is provided that a servant shall have a right of action against his employer, whenever he is injured "by reason of the act or omission of any person in the service of the employer done or made in obedience to the rules or by-laws of the employer, or in obedience to particular instructions given by any person delegated with the authority of the employer in that behalf." This clause has been inserted in the statutes of Alabama and Indiana, and in those of the English colonies; but it is not found in those of Massachusetts, New York, or Colorado.

The effect of this provision, as a whole, is indicated by the following passage from the opinion of Fry, L. J., in an English case: "There are four questions which must be asked, every one of which must be answered in the affirmative before the plaintiff can substantiate his case. The first question is this: Was there personal injury caused by the plaintiff? The second is, Was there injury caused by reason of an act or omission of any employee of the defendant? The third question is, Was the act or omission done or made in obedience either to a rule or a by-law of the employer, or to particular instructions given by a delegate of the employer? Why Parliament so framed the section it may be a little difficult to understand; why the particular instructions of the employer should not be referred to, but only the rules or by-laws of the employer and the instructions of a delegate of the employer, is not, on the surface, very easy to see. No doubt the legislature had some good reason for so enacting. The fourth question is whether the injury resulted from some impropriety or defect in the rules, by-laws, or instructions. It must not only be the result of impropriety or defect in the rules, by-laws, or instructions, but it must be an act or omission done or made in obedience to them, or one of them."[1]

699. Necessity of proving negligence in respect to the rules, etc., or to particular instructions.— By section 2, subs. 2, of the English act, and the corresponding provisions of the colonial acts, it is expressly declared that the workman shall not be entitled to compensation "un-

[1] *Indianapolis C. Co.* v. *Shumack* (1899) 23 Ind. App. 87, 54 N. E. 414. [1] *Whatley* v. *Holloway* (1899; Q. B. D.) 62 L. T. N. S. 639, 54 J. P. 645

less the injury resulted from some impropriety or defect in the rule, by-laws, or instructions."[1] This proviso is not inserted in the American statutes; but it is clear, both on principle and authority, that this noninsertion cannot be construed as having the effect of overruling the general rule that proof of negligence in respect to the subject-matter is a condition precedent to recovery in actions against the employer. The intention of the legislatures is assumed to be that no liability can be predicated, unless the defendant is shown to have been culpable either in promulgating the rule in question, or in failing to promulgate a rule to meet the requirements of the case.[2]

700. "In obedience to the rules."— The effect of these words is to

[1] A jury is justified in finding an impropriety, etc., where a man is placed in charge of an engine, and at the same time employed in other operations which may involve risk to life or limb. *Whatley* v. *Holloway* (1890; Q. B. D.) 62 L. T. N. S. 639, 54 J. P. 645, per Fry, L. J.

[2] In *Dixon* v. *Western U. Teleg. Co.* (1895) 68 Fed. 630, it was insisted by plaintiff's counsel that this clause in the Indiana statute gives a right of action to an employee who has, without his fault, sustained an injury, arising from the performance of any service rendered in obedience to the rules, etc., without regard to the question of negligence or want of care of the corporation or its foreman. His argument was that the subsection was to be construed as if the employer had been declared liable where the injury "resulted from the act or omission of the person injured or any other person, done or made, etc." Discussing the contention, the court said: "The phrase 'where such injury resulted from the act or omission of any person' is broad enough to embrace the injured person. The expression 'any person,' in its usual and ordinary sense, is inclusive and embraces every employee. This clause of the statute is not free from ambiguity. While the language employed is capable of a construction as broad as is contended for, it will not be given such construction, if to do so would lead to absurd or unjust consequences. . . . The construction contended for would make every corporation, except municipal, an insurer of the safety of its employees from injury in all cases where they were injured without their fault, while acting in obedience to the rules or instructions of their employer. It would subject the industries of the state to hazards and burdens of new and dangerous proportions. Its mischiefs would prove far-reaching, and its injustice would be great. No corporation could safely conduct its business if it were required to become an absolute insurer of the safety of its employees. No principles of justice or sound policy can be invoked in support of a construction which would condemn the employer to compensate an employee for an injury for which the employer was in no wise in fault. The statute is susceptible of a construction which does no violence to the language employed, and which will protect the just rights of the employee, and at the same time hold the employer to respond in damages for injuries resulting from its fault or negligence, or from the fault or negligence of any person delegated with authority to represent it. The true construction of the clause requires the words 'any person' to be limited so as not to include the person injured. Thus construed, the clause would read: 'Where such injury resulted from the act or omission of any person (except the person injured) done or made: (1) In obedience to any rule, regulation, or by-law of such corporation; or (2) in obedience to the particular instruction given by any person delegated with the authority of the corporation in that behalf.' This construction makes the statute harmonious, and gives effect to every word and member of it. Under this construction, the effect of this clause is to prevent the corporation from setting up the defense that the injury to the plaintiff was caused by the act or omission of a coemployee, when such coemployee was acting in obedience to the rules, regulations, or by-laws of the corporation, or in obedience to the particular instructions given by any person delegated with the authority of

relieve the master from liability wherever the rules, etc., were not in themselves improper or defective, and the actual cause of the injury was the imprudent manner in which a coservant of the plaintiff carried them out.[1]

That an injury was "caused by reason of an act or omission" of a coemployee, "done or made in obedience to particular instructions, etc.," cannot be held where it appears that the plaintiff, while engaged in carrying out his directions, not improper in themselves, was injured by a subsequent breach of duty on the part of the directing employee.[2]

701. "Delegated with the authority of the employer."—The employees to whom these words are considered to be applicable are persons occupying the position of managers, whom the employer deputes in his stead to do or to abstain from doing what he would do or abstain from doing in the premises.[1]

G. Liability for Negligence of Certain Specified Railway Employees.

702. Generally.—The English employers' liability act of 1880, and

the corporation in that behalf. In my opinion this clause of the statute ought to receive no broader construction."

[1] Where it is the duty of an employee to draw away the wood which has been cut by a saw and also to attend to the engine which operates the saw, a jury is not justified in finding that the employer's instructions not to neglect the engine required him to abandon his other duty without giving notice to a workman who fed the wood to the saw. *Whatley* v. *Holloway* (1890; Q. B. D.) 62 L. T. N. S. 639, 6 Times L. R. 160. Affirmed in (C. A.) 6 Times L. R. 353. Mathew, J., pointed out that what was done by the delinquent employee was not done in obedience to the instructions, but in consequence of disobedience to them.

An averment that the plaintiff was injured by a fellow servant's disobedience to a rule of the master will not enable him to recover under this clause, since its effect is to make the master liable in precisely the opposite case, viz., where the act or omission of the fellow servant is done in obedience to the master's rules. *Laughran* v. *Brewer* (1896) 113 Ala. 509, 21 So. 415.

In *Baltimore & O. S. W. R. Co.* v. *Little* (1897) 149 Ind. 167, 48 N. E. 862, also, the contention that the true construction of this provision is that if any duty is enjoined by rule, etc., upon a servant, and the duty is omitted, the corporation is liable for resulting injury, was rejected. The court said: "If this was the proper construction of the specification, there would be little requirement for other provisions of the act than those of the third subdivision, since it would strike down the fellow servant rule in its entirety wherever the act or omission is in the line of duty. It would make the corporation liable for the act or omission of a servant, whether negligent or not, and whether the duty negligently performed or negligently omitted may have been enjoined by the general rules, etc., of the corporation, or is in obedience to particular instructions from one 'delegated with authority in that behalf.' Such was not the intention of the legislature."

[2] *Postal Cable Teleg. Co.* v. *Hulsey* (1896) 115 Ala. 193, 22 So. 854 (complaint held demurrable which showed that the plaintiff would not have been hurt if his foreman had notified him when it was no longer safe to remain in the neighborhood of a tree which he had been ordered to chop down). This case, under another of its aspects, is noticed in § 695, note 7, *supra*.

[1] *Claxton* v. *Mowlem* (1888; C. A.) 4 Times L. R. 756.

all the colonial and American statutes which are modeled upon similar lines, contain provisions for the especial benefit of railway servants. But on referring to the text of the statutes in subtitle A, *supra*, it will be seen that there is some diversity in the language employed by the various legislatures.

It will be observed that the virtual effect of these provisions is to abolish the master's immunity for railway accidents in all, or nearly all, instances in which the injury was caused by the negligence of subordinate agents engaged in directing the movements of the rolling stock. Taken in connection with the preceding subsections, they supplement a railway servant's right of action in such a manner that the act, as a whole, may be regarded as being, for practical purposes, the equivalent, so far as such servants are concerned, of the statutes of those American states in which the doctrine of coservice is declared to be no defense in cases where the injury was caused by the negligence in the operation of a railway.[1]

The language used in these clauses of the acts which enable a servant to recover for an injury received while he was conforming to the orders of a superior (see subtitle E, *supra*) does not, in any degree limit the liability imposed upon the employer by the provisions discussed in the present subtitle.[2]

703. Persons having "the charge or control of signal points."— The only English case in which these words have been discussed discloses so much diversity of opinion as to their import that the decision, except as a determination that there is no right of action for the negligence of the particular employee who caused the injury, is not of much service as a precedent.[3]

[1] Iowa, Kansas, Minnesota. See chapter XXXIX, *post*.

[2] *Indianapolis Union R. Co.* v. *Houlihan* (1904) 157 Ind. 494, 54 L. R. A. 787, 60 N. E. 943.

[3] *Gibbs* v. *Great Western R. Co.* (1884; C. A.) L. R. 12 Q. B. Div. 208, 53 L. J. Q. B. N. S. 543, 50 L. T. N. S. 7, 32 Week. Rep. 329, 48 J. P. 230. Affirming (1883) L. R. 11 Q. B. Div. 22, 48 L. T. N. S. 640, 31 Week. Rep. 722. There it was held that the defendant could not be held responsible where the evidence showed that it was the duty of one Fisher, the employee whose act was the immediate cause of the injury, to clean, oil, and adjust the points and wires of a locking apparatus at various places along a portion of the line, and to do slight repairs; that for these purposes he was, with several other men, subject to the orders of an inspector in the same department, who was responsible for the proper condition of the points and locking gear, which were moved and worked by men in the signal boxes; and that Fisher, having taken the cover off some points and locking gear in order to oil them, negligently left it projecting over the metals of the line, and so injured a fellow workman.

In the divisional court, Mathew, J., said: "I find a difficulty in ascertaining what was precisely meant by the general language used in subs. 5, but upon the best interpretation I can give, I think the legislature had in contemplation the negligence of some person having charge or control of the points for the purposes of traffic and of movement. As Fisher did not answer that description, but was merely employed to

The Alabama and Massachusetts cases, so far as they go, seem to make the railway company liable for the negligence of all employees who for any space of time, however short, have the power to adjust a switch for the purpose of traffic.[2] Negatively, therefore, these cases are authority against the theory propounded in the English case by Brett, M. R., that the statute contemplates a "general charge." Further doubt is thrown upon the correctness of that theory, if we consider the context of the provision. The most natural construction of the words describing the other employees who are declared to be vice principals in respect to particular functions is that the legislature had in view the employees who actually operate the instrumentalities specified. If this conception be the true one, it is clear that the maxim, *Noscitur a sociis*, furnishes a strong reason against limiting the application of the phrase now under discussion to employees who have a general charge of points. Upon the whole, therefore, it is sub

oil, clean, and adjust that which was moved by some other thing in the charge and control of some other person. I am of opinion that there was no evidence to bring the case within the provisions of subs. 5." Field, J., doubted whether the words "charge or control" are intended to mean different things.

In the court of appeal, Brett, M. R., expressed his views as follows: "I cannot think that there is any color for saying he had the control of the points, and the only question is whether he is a person who had the charge of them within the meaning of the statute. I think that to be such a person he should be one who has the general charge of the points, and not one who merely has the charge of them at some particular moment. Now what evidence is there that Fisher was a person who had such general charge? It is true that he himself said he had the charge, but to act upon such evidence would be to make him the judge of the law and not the witness of facts. The plaintiffs were bound to show by evidence what were the duties of this man, when it would be for the court to say whether, having such duties, he was a person who had the charge of the points as intended by the statute. Fisher himself, when cross-examined, said what his duties were. 'My duties are,' he said, 'to clean and oil the locking bars and apparatus. I had several places to go to; I worked under Inspector Saunders.' The meaning of working under Saunders is that Saunders might order him at any moment to go to such and such a place and oil the bars and apparatus there, or told to go to the place he had intended to go to for the purpose of oiling the bars. The evidence which was given showed, I think, that Fisher was only a little above a laborer, that he had to do menial work on what he was told to look to, and that he was not a person who had the charge of those things upon which he had to do such work under such circumstances." Bowen, L. J., thought it was "sufficient to say that Fisher was only, at the most, employed to do certain work on and in respect of the points, under the order of somebody else."

Engineers and conductors provided with keys to a switch, with the duty of opening and fastening which no one is especially charged, for the purpose of using the spur track attached to enable trains to pass each other, are in charge of the switch *ad hanc vicem*. *Birmingham R. & Electric Co.* v. *Baylor* (1893) 101 Ala. 488, 13 So. 793.

A railroad company is liable for negligence of a tower man, whose duty it was to move switches by levers in a tower on signals from the men on the tracks below, in throwing a different switch than that directed by a signal, an approaching train being thus caused to run on a wrong track, and collide with a switchman who gave the signal. *Welch* v. *New York, N. H. & H. R. Co.* (1900) 176 Mass. 393, 57 N. E. 668. The court declined to hold that the fact that the negligent employee received di

mitted that the nonliability of the employer in the *Gibbs Case* (see note 1, *supra*) may be more properly referred to the theory announced by Mathew, J., *viz.*, that the statutes are intended to cover only cases in which the control of the points is exercised in regulating the movements of cars.[3]

704. Person in "charge or control of a locomotive engine."—*a. What is an engine under the statute.*—The word "engine" is construed as meaning a "machine used to move trains."[1] An engine of an essentially stationary type is not brought within the purview of the statute by the fact that, together with the machinery operated by it, it is mounted upon a truck, and its power can be applied so as to move that truck along a set of rails to some other part of the employer's premises.[2]

b. What employees are deemed to be in "charge or control" of engines.—It is not disputed that this description is applicable to the

rections from the other servants took him out of the category of vice principals.

See also *Coughlan* v. *Cambridge* (1896) 166 Mass. 268, 44 N. E. 218.

[2] In Indiana it has been held that an employee in charge of a switch is not a person "who has charge of any signal, telegraph office, switch yard," since the section is to be read as punctuated, and no comma is to be inserted between "switch" and "yard." *Baltimore & O. S. W. R. Co.* v. *Little* (1897) 149 Ind. 667, 48 N. E. 862. These particular words occur only in the statute of that state, and their construction is, therefore, not at present a matter of practical interest in any other jurisdiction. But the writer ventures, in passing, to express his strong doubt whether this rule is correct. In the first place the expression is not in common use. The only authority cited by the court is 5 Rapalje & Mack's Digest of Railway Law, p. 60, where one of the divisions of subjects is entitled "Switch Yards." The expression is also found, though not very frequently, in the reports. See, for example, *Hurst* v. *Kansas City, P. & G. R. Co.* (1901) 163 Mo. 309, 85 Am. St. Rep. 539, 63 S. W. 695; *Illinois C. R. Co.* v. *Cozby* (1898) 174 Ill. 109, 50 N. E. 1011; *Fay* v. *Chicago, St. P. M. & O. R. Co.* (1898) 72 Minn. 192, 15 N. W. 15; *Williams* v. *Louisville & N. R. Co.* (1901) 23 Ky. L. Rep. 1124, 64 S. W. 738; *Walker* v. *Atlanta & W. P. R. Co.* (1898) 103 Ga. 820, 30 S. E. 503. But it is omitted in the Century, Standard, and the other dictionaries to which the writer has access. It seems very improbable that an expression which, as this omission indicates, is far from being a familar one, should have been used in a statute of this character. But the most fatal objection to the theory of the court is that, in all the acts of a tenor similar to that of Indiana, "switches" are specifically mentioned, and that it is therefore more likely that the Indiana legislators intended to add "yards" to the list of the specified parts of the plant, than that they intended to omit one which is expressly mentioned in the other acts, and substitute another word which, as this very decision shows, is construed as absolving a railway company from liability for a class of accidents which are peculiarly [illegible] and in which the victim is peculiarly helpless.

[1] *Murphy* v. *Wilson* (1883) 52 L. J. Q. B. N. S. 524, 48 L. T. N. S. 788, 47 J. P. 565, 48 J. P. 24.

A person in charge of a stationary engine operating a tramway on a mining slope is not in "charge of an engine" on a "track of a railway," and is therefore merely a fellow servant with the engineer of a pump engine located in the mine. *Whatley* v. *Zenida Coal Co.* (1898) 122 Ala. 118, 26 So. 124 (demurrer sustained to count alleging negligence of such an engineer).

[2] *Murphy* v. *Wilson* (1883) 52 L. J. Q. B. N. S. 524, 48 L. T. N. S. 788, 47 J. P. 565, 48 J. P. 24 (truck supporting a steam-crane ran over plaintiff's hand while he was grasping a rail to steady himself in pulling at a stone).

employees who actually operate the locomotive engines which move trains. It is a question of fact who was in charge of an engine at any particular time,[3] and whether the act alleged as the cause of the injury amounted to a breach of a duty imposed on the person answering this description.[4]

[3] *Louisville & N. R. Co.* v. *Richardson* (1893) 100 Ala. 232, 14 So. 209.

An engineer who is in the employment of a railway company, and in charge of an engine which is at the time running upon the company's tracks, is *prima facie* in the discharge of his duties as engineer, and in a complaint based on this subsection it is not necessary to aver that the engineer was in the discharge of the duties imposed by his employment, when the injury was inflicted. *Woodward Iron Co.* v. *Herndon* (1896) 114 Ala. 191, 21 So. 430.

A complaint is good, where it states that the engineer, while in the service of the company in charge of a locomotive, negligently injured the plaintiff, at a time when both were acting in the line of duty as employees of the company. *Pittsburgh, C. C. & St. L. R. Co.* v. *Montgomery* (1898) 152 Ind. 1, 71 Am. St. Rep. 301, 49 N. E. 582.

[4] Evidence that a trackman was run down by a train and that the engineer did not whistle, as the rules required him to do when passing trackmen, is sufficient to require the submission of the question of the master's negligence to the jury. *Barker* v. *London & N. W. R. Co.* (1891) 8 Times L. R. 31.

The blowing of a whistle by the engineer of a railroad train 50 yards or more before reaching a place where the track is obscured by dense smoke for 250 or 300 yards is not, as matter of law, a sufficient exercise of care as to other employees who may be coming on the track in a hand car from the opposite direction. *Woodward Iron Co.* v. *Herndon* (1896) 114 Ala. 191, 21 So. 430.

For an engineer to run a railway train at a rapid rate of speed at a place where the statute does not regulate and prescribe the rate is not negligence *per se*. Whether or not such running is negligence, so as to render the company liable for the death of a brakeman who fell from the top of the train, depends upon the particular conditions and circumstances. *Perdue* v. *Louisville & N. R. Co.* (1893) 100 Ala. 535, 14 So. 366.

Evidence that the plaintiff, a switchman, was struck, while walking close to a track, by an engine which was moving at an excessive rate of speed and without sounding the bell, will justify a verdict against the company. *Canada Southern R. Co.* v. *Jackson* (1890) 17 Can. S. C. 316.

It is not error to admit in evidence a rule from a railroad company's book of rules providing that "a lamp swung across the track is the signal to stop," where the issue involved is whether the engineer was negligent in failing to perceive upon the track an employee who had fallen down and became unconscious by reason of sickness. *Helton* v. *Alabama Midland R. Co.* (1893) 97 Ala. 275, 12 So. 276.

In an action brought in Kentucky for injuries received in Alabama, recovery may be had for the killing of a railroad employee by the negligence of those in charge of a locomotive, although the negligence was neither "gross" nor "wilful," as it must be to make the action sustainable in the former state. *Louisville & N. R. Co.* v. *Graham* (1896) 98 Ky. 688, 34 S. W. 229.

A railroad engineer is not negligent towards a switchman on a switch engine, so as to charge the company with liability for injuries to the latter, in running by an oil box, near the track, but far enough away to permit the engine to pass safely, unless he knows or has reason to believe that the switchman is in such a position that he may be injured in passing such box. *Louisville & N. R. Co.* v. *Bouldin* (1895) 110 Ala. 185, 20 So. 325.

An engineer who propels a train with such force and violence against standing cars as to injure a brakeman attempting to make a coupling between such cars and another car on the other side thereof is guilty of negligence, although he may not have known that the brakeman was between the cars. *Alabama Midland R. Co.* v. *McDonald* (1895) 112 Ala. 216, 20 So. 472.

Whether a "running" or "flying" switch is or is not to be regarded as negligence *per se*, a railway company can not successfully assail the propriety of a verdict which finds that it is not negligence to switch cars at a speed of

705. Person having "charge or control of a train."— *a. What constitutes a train, generally.* —The view of the supreme court of Massachusetts is that the word "train" was used by the legislature in the ordinary sense which it bore at the time when the employers' liability act was passed in that state, and that this subsection is therefore only applicable where the train is one which is operated by steam.[1] In the case cited it was held that an action could not be maintained for an injury caused by the management of a street railway car operated by electricity in the usual manner. This doctrine seems to the present writer to be of very dubious correctness, in so far as it is based on the theory that a train must be propelled by steam to be within the meaning of the statute. In some respects the peculiar dangers to which railway employees are exposed from moving cars are essentially the same, whether the motive power be steam or electricity, and an injury of the kind which was denied to be actionable is, therefore, within the spirit, if not the letter, of the statute. And once it is conceded that the statute covers trains operated by electricity, the further result would

or 16 miles an hour onto a repair track. *Louisville & N. R. Co.* v. *Davis* (1890) 91 Ala. 487, 8 So. 552.

Compare *Devin* v. *Boston & A. R. Co.* (1893) 159 Mass. 348, 34 N. E. 539, where one of the alternative theories suggested by the evidence was that cars had been "kicked" at too great a speed by the engineer, and the case was held to be one for the jury.

The conduct of an engineer in applying the air brake and bringing the train to a sudden stop without giving any signal or warning does not necessarily constitute actionable negligence on the part of the company as to an employee injured by being thrown off from a flat car by such stoppage. *Cooper* v. *Wabash R. Co.* (1894) 11 Ind. App. 211, 38 N. E. 823.

No recovery can be had for the death of a fireman caused by an explosion due to the want of sufficient water in the boiler, where the evidence is that, although the company held the driver responsible as regards the engine, it was the fireman's duty to attend to the water supply. *Brunell* v. *Canadian P. R. Co.* (1888) 15 Ont. Rep. 375.

A railroad employee may recover for injuries caused by sudden unnecessary movements of cars, due to the negligence of the engineer in the handling of a train. *Highland Ave. & Belt R. Co.* v. *Wilbur* (1898) 120 Ala. 535, 24 So. 955.

A complaint in an action by a telegraph operator, which charges that in attempting to cross a railway track at a time when his duties required him to do so, he was struck by a train moving 20 miles per hour, which gave no warning of its approach; that he was unable to see its approach, on account of high weeds; and that the engineer of the train knew of his duty to cross the track at the time,—charges actionable negligence, though the statutory duty of the engineer to whistle and ring his bell on approaching a crossing and to stop his engine might not be applicable. *Indianapolis Union R. Co.* v. *Hoalahan* (1901) 157 Ind. 494, 54 L. R. A. 787, 60 N. E. 43.

[1] *Fallon* v. *West End Street R. Co.* (1898) 171 Mass. 249, 50 N. E. 536. The court qualified its opinion by suggesting that "possibly a railroad, where the motive power has been changed in part or altogether from steam to electricity, or some other mechanical agency, but which retains in other respects the characteristics of a steam railroad, would come within the purview of the act."

In this connection it may be remarked that in Alabama it has been held that an electric railroad is within the purview of a statute applicable to steam railroads. *Louisville & N. R. Co.* v. *Anchors* (1896) 114 Ala. 492, 62 Am. St. Rep. 116, 22 So. 279.

appear to follow, that it can make no difference, as regards the master's liability, whether the motive power is transmitted by wire from some central point or generated or stored in an engine traveling with the train. This view receives some support from an English case which embodies the principle, that, if the other elements of a "train" are present, the employer is liable for injuries caused by its being carelessly transferred from one point to another, whether the motive power be fixed or movable.[2] In the course of his opinion Cave, J., emphasized the fact that the danger of putting cars in motion without proper warning is equally great, however they are moved, and upon whatever part of the line.

b. How many cars constitute a train. In a recent case Lord Halsbury doubted very much whether the applicability of the word "train" depends upon "the number of carriages or the number of vehicles going upon wheels which the locomotive was taking along the railway." He thought the legislature intended a "very wide scope" to be given to the language used, and that, "speaking in a general way, the legislature meant that a locomotive engine by itself, or anything that was drawn along a railway, or was in course of being drawn along a railway by that locomotive engine" should be included in the word.[3] The actual extent of the decision cited is that several temporarily detached cars constitute a "train," but, as there is nothing in the opinions of the other law lords to indicate that they were inclined to put a less liberal construction upon the statute than the lord chancellor, his theory of its meaning may perhaps be regarded as the one judicially accepted in England.

In a Massachusetts case involving facts closely analogous to those under review by the House of Lords, a similar conclusion was arrived at, the statutory word being held applicable to a number of cars coupled together, forming one connected whole and moving from one point to another upon a railroad, in the ordinary course of its traffic under an impetus imparted to them by a locomotive which shortly before the accident had been detached.[4] That this court is prepared to accept, if it has not already accepted, a construction of the statute not less favorable to the servant than that adopted by Lord Halsbury, is also inferable from two other decisions holding that a locomotive

[2] *Cox* v. *Great Western R. Co.* (1882) L. R. 9 Q. B. Div. 106, 30 Week. Rep. 816, 47 J. P. 116, where the jury were held to be warranted in finding that an employee whose duty it is to apply the hydraulic power by which a capstan is made to haul freight cars coupled together is "a person in charge of a train upon a railway."

[3] *McCord* v. *Cammell* [1896] H. L. E.] A. C. 57, 65 L. J. Q. B. N. S. 202, 73 L. T. N. S. 634, 60 J. P. 180.

[4] *Curran* v. *Boston & A. R. Co.* (1895) 164 Mass. 523, 42 N. E. 112.

and a single car connected together and run upon a railroad constitute a "train."[5]

c. What employees are deemed to have "charge or control" of a train; conductors.—A conductor is the employee to whom the statutory description is most obviously applicable, and it is not disputed that a railway company is prima facie responsible for his negligence.[6] This presumption may be rebutted by showing that, at the time the injury was received, he was not, as a matter of fact, in control of the train in question. It cannot be said, as a matter of law, that a conductor is not in charge of a train during a temporary absence therefrom.[7] Nor can any cessation of his controlling functions be predicated from the mere fact that the portion of the train which caused the injury had been detached from the engine and the other cars at the time when plaintiff was hurt.[8]

The conductor of a switch engine which is drawing several cars under his direction may properly be found to be, for the time being, in charge of a train consisting of the engine and cars.[9] But such a con-

[5] *Dacey* v. *Old Colony R. Co.* (1891) 153 Mass. 112, 26 N. E. 437. Followed in *Shea* v. *New York, N. H. & H. R. Co.* (1899) 173 Mass. 177, 53 N. E. 396.

[6] In *Chicago & E. I. R. Co.* v. *Richards* (1901) 28 Ind. App. 46, 61 N. E. 18, it was held that a complaint was not demurrable, which alleged in substance that a brakeman, while climbing up to the top of a car, was struck by another car which had been negligently left by the conductor of another train on an adjoining side track at a place where the two tracks were only 5 feet apart, and, owing to the transverse slope on which the side track was laid, the stationary car leaned over towards the other track.

[7] *Donahoe* v. *Old Colony R. Co.* (1891) 153 Mass. 356, 26 N. E. 867. There the conductor left his train at a certain station and allowed it to proceed to the next station without him. A brakeman had occasion to make a coupling while the conductor was still absent from his post, and was injured by a defective drawbar, of the condition of which the conductor had failed to notify him. It was held that the jury was justified in finding that the conductor was in charge of the train when the injury was received, since nothing was done that was contrary to his orders, or not reasonably to be expected. It was also contended, without success, that the omission of the conductor to warn the plaintiff with regard to the defective drawbar was not negligent, for the reason that the movements of the train and the coupling and uncoupling of cars were wholly under his direction, and that a brakeman was not expected to uncouple cars without his orders. The court said, that when the conductor left the train and permitted it to proceed without him, it might properly be interred by a jury that he expected and permitted such things to be done as were necessary in the management of the train until he should rejoin it, without a specific order from himself for each particular act; and, if so, the omission in question might properly be found to have been negligence on his part.

[8] *Devine* v. *Boston & A. R. Co.* (1893) 159 Mass. 348, 34 N. E. 539. There two cars which had been "kicked" ran against a post at the end of a stub switch. It was held that, on the evidence, the jury might properly find that the conductor was the person who gave the stop motion for the cars, and that taking into account the speed at which they were moving, he was negligent in not giving the motion sooner than he did.

[9] *Dacey* v. *Old Colony R. Co.* (1891) 153 Mass. 112, 26 N. E. 437. There it was held that, in view of the use to which a freight yard is put in making up trains and receiving cars from incoming trains, and the danger attendant on moving cars and making up trains in the nighttime, when a car is

ductor is not deemed to be in charge of a train when he merely has to make up. His duties are ended as soon as the cars are connected so as to compose a train, and he never has charge of those cars as a train.[10]

d. Employees other than conductors. It has been laid down by the supreme court of Massachusetts that by the words, "'any person . . . who has the charge or control' of a train' is meant a person who, for the time being at least, has immediate authority to direct the movements and management of the train as a whole, and of the men engaged upon it."[11] A railway company, therefore, is responsible for the negligence either of an engineer or of a brakeman, if, as a matter of fact, either of them was in charge of the train.[12] But the mere fact that a brakeman has been put in such a position that for the moment he physically controls and directs its movements under the eye of his superior does not of itself constitute him a person who has charge of or control of the train.[13]

standing so near the point where tracks come together, that the space between it and the adjoining track is unusually narrow, a court cannot say, as a matter of law, that it was not a negligent act to leave the car in such a position.

[9] In *Thyng* v. *Fitchburg R. Co.* (1892) 156 Mass. 13, 32 Am. St. Rep. 425, 30 N. E. 169, the court said: "The statute, in referring to a 'signal, switch, locomotive engine, or train,' seems chiefly to contemplate the danger from a locomotive engine or train as a moving body, and to provide against the negligence of those who, either wholly or in part, control its movements. The charge or control is of that whose character is rapid and forceful motion. It refers to the train or locomotive engine as a whole, and not to the individual parts which make up the train or engine. The statute might have been made to include those who have charge of the construction of the engine or cars or who inspect them. Neglect of their duties would be likely to cause an accident to the train while in motion. But the legislature in this part of the statute has gone no further than to include those whose duties relate to the charge of a locomotive engine or the train when complete."

In another case it was doubted whether a switching foreman who merely designated the track on which is to be shunted a part of the cars of a train which is controlled by a conductor could be said to have had "charge or control" of the train. *Caron* v. *Boston & A. R. Co.* (1895) 164 Mass. 523, 42 N. E. 112. In view of the earlier decision, it is hard to see why the court should have felt any doubt on this point.

[10] *Caron* v. *Boston & A. R. Co.* (1895) 164 Mass. 523, 42 N. E. 112.

[11] *Shea* v. *New York, N. H. & H. R. Co.* (1899) 173 Mass. 177, 53 N. E. 396, holding it warrantable to find negligence, where the evidence was that the engine with a car attached was pushed while the plaintiff was in the car, and a brakeman was standing on the front platform, against other cars with such force as to break the platforms of the cars and throw the employee from his seat.

The engineer of a railroad train must be regarded as the person in charge, for the purpose of giving signals or slackening speed at the approach of danger, although for most purposes the conductor has control of the train. *Davis* v. *New York, N. H. & H. R. Co.* (1893) 159 Mass. 532, 34 N. E. 1070. Followed in *Fairman* v. *Boston & A. R. Co.* (1897) 169 Mass. 170, 47 N. E. 613.

See also *Baltimore & O. S. W. R. Co.* v. *Peterson* (1901) 156 Ind. 364, 59 N. E. 1044, where it was held proper to refuse an instruction that, if the persons in charge of a train were fellow servants of the injured person, or track repairer, he could not recover.

[12] *Caron* v. *Boston & A. R. Co.* (1895) 164 Mass. 523, 42 N. E. 112, where it was denied that the statute was applica

The English doctrine would seem to be virtually the same as that established by the Massachusetts decisions, the House of Lords having held that the case was for the jury where some detached cars were left by the engineer on a steep gradient, and, being inadequately blocked, ran away and struck the plaintiff.[14] The members of the court were unanimous in declaring that the action could be maintained upon the theory that the engine driver was in charge of the train when it stopped at the point where the runaway cars were left, and that he did not cease to be in charge of it because some of the carriages were uncoupled from one another and from the engine, in order that they might be separately dealt with in operations all directed to one end, namely, the discharging of the freight.[15] It was also considered that there was another and independent ground which rendered it proper

ble to a brakeman whose duty it was to take charge of a train of cars which was being shunted onto a siding under the supervision of the conductor. The court said: "If 'control' is one thing and 'charge' is another, then, inasmuch as to some extent every brakeman upon a train would have 'control' of it, every employee injured by an accident resulting from the carelessness of a brakeman would have a right of action against the corporation which employed him, and the defense of common employment as to brakemen would be done away with, even though the brakeman might be acting under an immediate superior. The statute is to be fairly construed, and, while it removes the defense of common employment in some cases, it does not extinguish it altogether, and we do not think that the legislature intended that it should be abolished in all cases where injuries were sustained by the carelessness of a brakeman. If it had, it would have used language more truly descriptive of a brakeman's usual occupation than the words, 'any person in the service of the employer who has the charge or control of any . . . train upon a railroad.' It is the charge or control of which the statute speaks, and not a charge or control, and it is the charge or control of the train as a connected whole which is meant . . . *Thyng* v. *Fitchburg R. Co.* (1891) 156 Mass. 13, 32 Am. St. Rep. 425, 30 N. E. 169."

[14] *McCord* v. *Cammell* [1896] A. C. 57, 65 L. J. Q. B. N. S. 202, 73 L. T. N. S. 634, 60 J. P. 180.

[15] The following passage from Lord Herschell's opinion (p. 66) sufficiently indicates the reasoning upon which this conclusion was based: "When he removed, or before he removed, the engine from the train, unless he wanted the rest of the train to follow, or was content that it should follow, it was absolutely essential that something should be done to detach that part of the train, and to make it stationary, while the rest of the train went on. That was a dealing with the train under his charge; and it seems to me that it was his duty to take care that all that was necessary for the operation with which he was concerned, namely, conveying these carriages severally and successively to the place where their contents were to be discharged, was done. It was not necessarily his duty to do it himself. If that duty had been left to some other servant of the company, and if he had every reason to believe that the duty was being properly performed, then it might well be that there could not be said to be negligence on his part,—he would have discharged the obligation resting upon him by seeing that the work was being done by the person whose duty it was, in that sense, to do it. But in the present case there is evidence that he knew the method which was being employed to sprag the wheels; there is evidence that he knew that it was a method which on previous occasions had proved ineffectual: there was the evidence of witnesses who were called before the jury that the use of this slag at all was an improper method,—that the proper method was to use wood. Under these circumstances it seems to me impossible, when once the conclusion is arrived at that he was in charge of the train, to say there was no evidence of negligence upon his part."

Lord Watson took the ground that the

to send the case to the jury, *viz.*, that the evidence adduced in behalf of the plaintiff went to show that the foreman was negligent in regard to the blocking of the cars after they had been detached. The words "any person having charge or control of the train" did not, it was said, necessarily point to one person who was in charge of the whole train. Different duties in connection with different parts of the train might be assigned to different persons, and, in that case, each and all of those persons were charged with the conduct of the train; and if any one of them was negligent in his own department, that would constitute negligence, bringing the case within the terms of the subsection.[16] This case also lays down the doctrine that the question, who was in charge of a train, is to be determined, as between two or more employees, by considering what duty was violated by the act which caused the injury.

The statutory words are applicable only to cases in which the control exercised over the train is direct. They do not render a railway company liable for the negligence of an employee who has control of a switch, or of a station agent who merely transmits orders to the man in charge of a train.[17]

disengaging of the cars from the engine and securing them in order that they might remain stationary until the engine returned to take them up, was an act done in the conduct of the train with which that engine started, and that, if that act was negligently done (which was a matter for the jury to determine), the plaintiff was entitled to recover if the person guilty of negligence had at the time "charge or control of the train."

Lord Davey agreed in thinking that the engine driver was "in charge of the train," and remained "in charge of the train" till the duties with which he was entrusted were fully completed; he considered it a strange thing to say that, when the engine driver who was thus in charge of the train left three fourths of it in an exposed and dangerous position, and it turned out that insufficient precautions had been taken to secure the safety of that portion which was so left behind, there was no evidence to go to the jury of negligence on the part of the "person in charge of the train."

[16] At p. 66 of the Law Reports the following passage is found in the opinion of Lord Watson: — "It is plain that Hopper was the person who insufficiently secotched the wagon which ran down the incline and killed the deceased; but it may be that, although he was the direct cause of the accident, the engine driver was also negligent in his duty, if he was charged with that duty. And I think, if that view were taken, he knew quite well the kind of sprag that was being used, and had reason to know that, although for some purposes sufficient, the use of it was attended with danger. On the other hand, if the duty of spragging was properly delegated to Hopper, he was, to that extent, in charge of the train, and was negligent. But on whichever of these alternatives negligence be found, whether it be fixed on the engine driver or upon the fireman, I think it follows that such person is also fixed in the position of the 'person having control of the train.' It has been suggested by one of the learned judges in the court of appeal that, the duty having been committed to a great many persons, any one of whom might have performed it, therefore the person actually performing it was not 'in charge.' To my mind these considerations are very immaterial. I think the statute points directly to the person having 'the charge or control of the train' as being that person who, at the time when the negligent act is committed, has the duty cast upon him of performing that act with reasonable care."

[17] *Fairman* v. *Boston & A. R. Co.* (1897) 169 Mass. 170, 47 N. E. 613.

706. Person having "charge or control of a car."— It is held that the word "car," which is found only in the Alabama act, is not confined to those cars which are intended to be hauled by locomotives, but is applicable to hand cars also.[1] The question whether an employee actually had charge or control of such a car can very rarely cause any doubt, and, as a matter of fact, the only points discussed, apart from those of mere pleading, have been whether an employee conceded to be in charge of a car was negligent in handling it.[2]

706a. Person having "charge of a signal."— These words, which occur in the Indiana statute, are applicable to a brakeman who is sent out to set torpedoes as a stop signal for an approaching train.[1]

707. On a "railway" or "railroad."—In England it has been held that the word "railway" is used in its popular sense, *viz.*, as meaning a way upon which trains pass by means of rails, and is not confined to railways belonging to those companies which are subject to the provisions of the railway regulation acts. Accordingly, this subsection applies to a temporary railway laid down by a contractor for the purpose of the construction of works.[1] A similar conclusion has been arrived at in Massachusetts, where a servant has been allowed to recover for

See also *Devine* v. *Boston & A. R. Co.* (1893) 159 Mass. 348, 34 N. E. 539, where the company's nonliability for the negligence of a switchman seems to be assumed in the opinion.

[1] *Kansas City, M. & B. R. Co.* v. *Crocker* (1892) 95 Ala. 412, 11 So. 262.

[2] The inference of negligence has been held to be "sure and certain," where a foreman in charge of a hand car, with knowledge that the operators are at times in the habit of turning loose the lever on a down grade and standing without support, suddenly applies the brakes on such a grade without notice to the operators and without looking to see whether they are holding to the lever. *Kansas City, M. & B. R. Co.* v. *Crocker* (1891) 95 Ala. 412, 11 So. 262.

The foreman of a hand car is, as matter of law, guilty of negligence in entering at full speed a place on the track obscured by dense smoke, without sending a flagman ahead to ascertain if any train is on the track, in accordance with a custom regulating the running of hand cars through smoke. *Woodward Iron Co.* v. *Andrews* (1896) 114 Ala. 343, 21 So. 440.

A railway company is liable for an injury received by a laborer on a railroad in jumping from a hand car to avoid a collision occasioned by the failure of a foreman to give signals required by the rules of the road. *Richmond & D. R. Co.* v. *Hammond* (1896) 93 Ala. 181, 9 So. 577.

A jury is properly directed to find for the plaintiff if they find from the evidence that a foreman ran two cars close together at a high rate of speed on a trestle; that, without warning to the men on the rear car, he signaled to those on the front car to slacken speed; that one of the employees on the rear car seeing the signal, applied the brake on that car so suddenly that the lever was jerked out of the hands of the plaintiff's decedent, and that when the cars came into collision immediately afterwards he was thrown to the ground. The facts thus set forth show negligence on the foreman's part and exclude the hypothesis of contributory negligence. *Jones* v. *Alabama Mineral R. Co.* (1894) 107 Ala. 400, 18 So. 30, Second Appeal (1896) 114 Ala. 519, 62 Am. St. Rep. 121, 21 So. 507.

[1] *Coxen* v. *Ray* (1901) 47 C. C. A. 352, 108 Fed. 320 (signals not set in the manner required by the rules).

[1] *Doughty* v. *Firbank* (1883) L. R. 10 Q. B. Div. 358, 52 L. J. Q. B. N. S. 480, 48 L. T. N. S. 530, 48 J. P. 55 (driver injured by a collision).

an injury received on a short railway track intended for temporary use by a city in transporting gravel.[2] A dummy railroad has been held to be within the Alabama act.[3]

The location of the rails is not material, so long as the injury was caused by a moving engine or car. Thus, cars are on a "railway" while they are being moved on the lines in a freight shed with a view to their being loaded or unloaded.[4] On the other hand, an engineer is not in charge of an engine "on a railroad" while it is stalled in a roundhouse for repairs.[5]

It has never been directly decided that the English employers' liability act is inapplicable to street railways. But that such a doctrine will be applied would seem to be not improbable, in view of the fact that it has been expressly declared that a tramway does not come within the purview of a statute relating to the taxation of railways.[6] It may be conceded that the distinction thus drawn between "railways" and "tramways" is not without plausibility in a country where the words are habitually differentiated, both in everyday conversation and in legislation.[7] But in the United States common usage, so far as it has any bearing upon the question, is an element which militates against, rather than supports, the theory that the terms "railway" and "railroad" do not comprehend those lines which are constructed along streets and highways. These words are constantly employed in a generic and very comprehensive sense, the word "tramway" being very rarely used.[8] It may be observed, however, that the Texas and Minnesota acts which define the liability of railway companies to their employees have been held not to be applicable to street-railway companies. See § 749, *post*.

[5] *Perry* v. *Old Colony R. Co.* (1895) 164 Mass. 296, 41 N. E. 289 (machinist making repairs was injured by the engineer's blowing down the engine into the ashpit in which the machinist was).

[6] *Swansea Improvements & Tramways Co.* v. *Swansea Urban Sanitary Authority* [1892] 1 Q. B. 357, 61 L. J. M. C. N. S. 124, 66 L. T. N. S. 119, 40 Week. Rep. 283, 56 J. P. 248. In the course of his opinion, Wills, J., remarked that "tramways are something essentially different from railways" and that "no ordinary person has any difficulty in distinguishing between the two."

[7] See the tramways act 1870 (33 & 34 Vict. chap. 78), and the notice of accidents act 1894 (57 & 58 Vict. chap. 28). In the latter of these the schedule specifies separately "railway, tramroad, and tramway."

[8] The fact that the decision in the Alabama case cited in § 704, note 1, *supra*, was put upon the consideration that the stationary engine in question was not "on a railway," and not upon the ground that the tramway was not a "railway," may possibly be regarded as indicating that neither court nor counsel deemed the latter theory to be sustainable. But it would, of course, be unwarrantable to lay much stress upon a negative argument of this character. This circumstance furnishes another reason for doubting the correctness of the Massachusetts decision cited in § 705, note 1, *supra*. But the strongest

II. Service of notice on the employer.

708. Notice a condition precedent to the maintenance of an actio under the statute.—Nearly all the acts with which we are now co cerned provide that the employer shall be served before the expiratio of a specified period with notice that the employee in question has su tained an injury.[1] Compliance with the statutory requirement is condition precedent to the plaintiff's right to avail himself of th remedial rights conferred by the legislature. This rule the cour have construed strictly, for the reason that the manifest object of in serting the provisions as to notice was to insure that the master shoul have a sufficient opportunity to prepare his case. See § 712, subd. a *infra*. No action can be maintained where the notice is not serve until after the writ is made, although it was left at the defendant' house on the day the writ is dated.[2]

It has also been held that the provision in the English (§ 4) an colonial acts, by which it is declared that the want of notice shall be n bar to the maintenance of the action if the trial judge shall be of opin ion that there was a reasonable excuse for such want of notice, applie only where due notice has not been given, and not where no notice a all has been given. It does not empower the trial judge to proceed with the case on the ground that the writ and declaration gave the de fendant notice, and that he had also actual notice because his manage saw the accident or saw the plaintiff immediately after the accident.

argument against the propriety of a construction of the act which would have the effect of excluding street railways from its purview is to be found in the consideration mentioned in the section just referred to, that some, at least, of the risks which servants encounter while working on such railways, are similar in kind to those which are incurred by the employees of steam railways of the ordinary type. In view of this fact, it is submitted that the former class of servants should not be deprived of the benefits of remedial legislation which may, without any unreasonable straining of its terms, be made to comprehend them.

Another case bearing on the subject discussed in the foregoing remarks will be found in § 722, note 2, *infra*.

[1] England, Newfoundland, and Australian Colonies, § 1; Ontario, §§ 9, 13; British Columbia, § 9; Manitoba, § 7; Alabama Code, § 2590; Massachusetts, § 3; Colorado, § 2; New York, § 2.

The Manitoba act of 1893, as at first passed, contained the same provision with regard to notice as that of Ontario from which it was copied. But by 58 and 59 Vict. chap. 48, § 2, the original act was amended by providing simply that the action could be brought at any time within two years after the occurrence of the accident. In this Province therefore, the requirement as to notice has been abrogated altogether. Soon after the passage of this amendment it was held not to have any such retrospective operation as would extend the time for bringing in a case, where the injury had been received before the amending act had been passed. *Dixon* v. *Winnipeg Electric Street R. Co.* (1897) 11 Manitoba L. Rep. 528.

The Acts of Alabama and Indiana contain no provision as to notice.

[2] *Veginan* v. *Morse* (1893) 160 Mass. 143, 35 N. E. 451.

[3] *Thompson* v. *Southern R. Co.* (1894) 15 New So. Wales L. R. (L.) 162. On a subsequent hearing of the case (15 L. R. [L.] 166) it was further held that,

709. Notice not essential to recovery if facts constitute a cause of action at common law.—As these statutes do not deprive an injured servant of his common-law rights of action, it follows that, if the circumstances alleged are such as will enable him to sue either at common law or under the statutes, he cannot be thrown out of court by proof that he has not complied with the statutory requirement as to notice, unless he insists on relying upon the statute alone.[1] But an action at common law cannot be converted into one under the statute simply because it has been discovered that the notice required by the statute had been given within the prescribed period by a former agent of the plaintiff, who had died before the common-law action was instituted.[2]

If the servant is relegated to his common-law rights alone, by reason of the fact that the proper statutory notice was not given, his ability to recover will depend upon the doctrines applied in the jurisdiction where the cause of action arose.[3]

710. Notice must be given in writing.—That the notice is not valid unless it is given in writing was held, in a case decided the year after the English act came into force, to be a necessary inference from the provisions (§ 7) that notice of the injury shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury and the date, and shall be served on the employer, and may be served by delivery or by post.[1] "In the second of the two cases cited, it was contended that an adequate notice might be made out from a reference to a document other than that which had been relied upon as satisfying the statutory requirements, but which had been found to be insufficient. Lord Coleridge thought that the question thus raised should be answered in a sense unfavorable to the servant. Brett, L. J., and Holker, L. J., declined to express a definite opinion, but they seem—especially the former—to have been strongly inclined to adopt the contrary view. All the members of the

where an application of the plaintiff to proceed notwithstanding that he gave no notice, has been refused, he cannot turn round fifteen months after the accident and make another application to proceed, on the ground that a letter sent by his attorney after the expiration of the statutory period constituted a valid notice under the circumstances.

[2] *Clark* v. *Adam* (1885) 12 Sc. Sess. Cas. 4th series, 1092.

[3] In a Canadian case where the servant failed to satisfy the statutory requirements, it was held that the action could not be maintained, as the jury had found that there was no defect in the machinery, nor in the system used in operating it. *Dixon* v. *Winnipeg Electric Street R. Co.* (1[illegible]) 11 Manitoba L. Rep. 528.

[1] *Royle* v. *Jenkins* (1[illegible]) L. R. 8 Q. B. Div. 116, 51 L. J. Q. B. N. S. 112, 30 Week. Rep. 324; *Keen* v. *Millwall Dock Co.* (1882; C. A.) L. R. 8 Q. B. Div. 482, 51 L. J. Q. B. N. S. 277, 30 Week. Rep. 503, 46 J. P. 435, 46 L. T. N. S. 472, note 2, *infra*.

court were agreed in holding that, whether such a reference was or was not permissible, a notice otherwise defective could not be eked out by a reference to a verbal statement previously made by the injured servant to an agent of the master. It was accordingly held that there was no notice in compliance with the act where a workman, on the day he had been injured, made a verbal report of such injury to his employer's inspector, who took down the details in writing and sent them to the employer's superintendent, and the workman's solicitor afterwards wrote a letter to the employer, stating that he was instructed by such workman to apply for compensation for injuries received on the employer's premises, and ending with the words, "particulars of which have already been communicated to your superintendent."[2]

The acts of Massachusetts and Colorado expressly provide that the notice shall be in writing. The requirement in the former act, that the notice is to be "signed by the person injured, or someone in his behalf," is satisfied by a notice signed by a firm of attorneys, as attorneys for the injured employee. In the absence of direct evidence to the contrary it will be presumed that they were authorized to sign it.

711. Service of the notice.—*a. Service on corporations.*—Where the defendant is a corporation, the notice may be served on its general superintendent at the place where suit is brought, or, during his ab-

[2] *Keen* v. *Millwall Dock Co.* (1882: C. A.) L. R. 8 Q. B. Div. 482, 51 L. J. Q. B. N. S. 277, 30 Week. Rep. 503, 46 J. P. 435, 46 L. T. N. S. 472. As regards the point left undetermined in this case, Lord Coleridge based his opinion on the words of the act which, as he considered, "described the notice as one and single, containing in it the incidents which the statute has required it to contain as a condition precedent to maintaining the action." The following passage from the opinion of Brett, L. J., shows that arguments of no small weight may be adduced for the other doctrine. "It seems, therefore, to me that a notice might be available even if it should be defective in any of the matters required to be stated, as, for instance, if it did not in terms name the day when the injury was sustained, but showed it by reference; so, also, if it did not describe the cause of the injury with sufficient particularity, but still did not describe it so as to mislead. I agree that, as a general rule, the notice must be given in one notice, but I am not prepared to say that it would be fatal if it were contained in more than one notice. Suppose, for example, a person in his letter written on one day should describe fully the injury he had sustained, but should leave out his address, and he should the next day send a letter stating that, 'in the letter I wrote yesterday I omitted to give you my address, and I now give it.' If both these letters were written in time, and both served on the employer, I am not prepared to say that the last might not be taken to incorporate the first, and therefore, though not an accurate, but an informal, notice, it might be considered a notice within the meaning of the statute. If in the present case the letter of Mr. Bradley had referred to a written report, and to the date and particulars there given of the injury, I should not at this stage have said that there had not been a notice within the act, but should have desired a rule in order that the matter might be more fully discussed."

[3] *Dolan* v. *Alley* (1891) 153 Mass. 380, 26 N. E. 989 (construing amendment added by Mass. Stat. 1888, chap. 155).

ence, on any of the subordinate officials in his office. Anyone who appears to be such an official is a proper person to receive the notice.[1]

b. Service through the postoffice.—A notice is not given as the statute requires, unless it is actually received, or, if sent through the postoffice, should have been received in the ordinary course of delivery, within the period limited.[2] Service under the English act is sufficient where the letter giving the notice actually reaches the master, though it is not registered. The provision as to registration merely means that, when that formality is gone through, the burden of proving that the letter never reached its destination is thrown upon the master.[3]

It would seem that, if an agent sends the notice, he must register the letter containing it, or run the risk of being called to account by his principal, if the latter suffers damage from its not being registered.[4]

c. Service in case of death.—Where suit is brought under section 2 of the Massachusetts act, the notice may be given by the widow.[5] The amendment added to that act by Laws 1888, chap. 155, provides for the service of notice, in case of the death of the injured person, by his executor or administrator.[6] The construction placed upon this provision is that, where the action is brought under section 2 of the act, the widow may give the notice, the position taken being that, as the action there specified is not maintainable by the executor or administrator, it cannot be implied that one or other should be appointed merely for the purpose of giving the notice.[7]

d. Excuses for failing to serve the notice.—Under the English and colonial statutes the want of notice is not fatal to the right of action if there was a "reasonable excuse" for the failure to serve it. Want

[1] *Shea* v. *New York, N. H. & H. R. Co.* (1899) 173 Mass. 177, 53 N. E. 395.

A notice of an injury to a brakeman, given to a freight agent or to the attorney of the company by which he was employed, which had made no objection to the receipt of like notices for five years, is a sufficient compliance with the statute. *De Forge* v. *New York, N. H. & H. R. Co.* (1901) 178 Mass. 59, 86 Am. St. Rep. 464, 59 N. E. 669.

[6] See *Daly* v. *New Jersey Steel & I. Co.* (1891) 155 Mass. 1, 29 N. E. 507; *Jones* v. *Boston & A. R. Co.* (1892) 157 Mass. 51, 31 N. E. 727.

[7] *Gustafsen* v. *Washburn & M. Mfg. Co.* (1891) 153 Mass. 468, 27 N. E. 179.

of notice has been excused on the ground that the widow of the deceased man was in an advanced state of pregnancy, and so excited in mind that the doctor ordered that she should not be consulted on the subject[8] on the ground that the plaintiff had been a long time in the hospital, and was not in a fit state to proceed with the action;[9] and on the ground that negotiations for a settlement between the widow of the injured employee and the employer were commenced within six weeks after the accident, and letters of administration were not granted to her till nearly eight months after the accident.[10]

On the other hand, it is clear that the plaintiff's ignorance of the fact that it was necessary to give the notice does not constitute a reasonable excuse within the meaning of the proviso.[11] It has been held in Scotland that no action can be maintained, although the party bringing the suit alleges that he was an old man and illiterate, and that it was not known whether the deceased would survive and bring suit himself.[12] This ruling is certainly a harsh one, even if the servant's injury was so severe that there was merely a chance of his recovery.

In another Scotch case where the action was brought by the widow of the employee, her forgetfulness, caused by the grief of mind which she had felt since the accident, was held not to be a reasonable excuse for omitting to send a notice.[13] Considering the remedial character of the act, this decision also seems to be scarcely commendable. It is submitted that in construing this provision a court should not refuse to recognize the fact that violent grief sometimes produces a temporary incapacity to attend to the ordinary affairs of life.

The amendment to the Massachusetts act (Laws of 1888, chap. 155, § 1) declares that employees are excused from giving notice within the thirty days prescribed in the original statute, whenever from "physical or mental incapacity" it is impossible for them to give the notice within that time. Whether an employee is entitled to claim the benefit of this provision is a question of fact to be determined according to the evidence introduced.[14]

[14] In a recent case, where the servant had died from the effects of the injury, the widow of the decedent testified that he was in bed almost two months after the accident; that during most of this

712. Sufficiency of the particulars contained in the notice.—*a. Generally.*—A writing set up as a notice will not be construed with technical strictness, but its contents should at all events show that it is intended as the basis of a claim against the defendant, and that the information is given on behalf of the person who brings the suit.[1] Any notice is sufficient which contains such particulars as will give the employer substantial notice of what has occurred, and thus put him in a position to make such inquiries as will enable him to come to trial prepared to meet the plaintiff's case.[2]

A plaintiff is not bound to ascertain and inform the defendant of all the causes to which the defect which occasioned the injury is attributed. The notice satisfies the statute if it states a cause which actually existed under such circumstances as would render the defendant responsible.[3] The mere fact that a notice alleges different causes for the injury does not render it defective, if each of those causes is adequately stated.[4] The provision that the plaintiff shall state the "cause of the injury" is not to be construed as a requirement that he shall state the "cause of action."[5] Nor will a notice be declared insufficient merely for the reason that, as the evidence adduced at the trial shows, the proximate cause of the injury was not stated

time he knew her and talked to her, and that a good deal of the time he was conscious and knew what he was doing. The decedent's son also testified that he saw his father almost every day after the accident, and that he was conscious nearly all the time. It was held that there was no valid excuse for the failure to serve the notice. *Ledwidge* v. *Hathaway* (1898) 170 Mass. 348, 49 N. E. 656.

An instruction with reference to this provision, which stated that an employee was not excused unless he was both "mentally and physically disabled," has been held correct. *Cogan* v. *Burnham* (1900) 175 Mass. 391, 56 N. E. 585. But *quære*, considering that the disjunctive "or" is used in the statute.

A letter from plaintiff's solicitors stating that they had been instructed to commence an action without delay, and describing the injury, was held sufficient in *Cox* v. *Hamilton Sewer Pipe Co.* (1887) 14 Ont. Rep. 300.

A notice that, at the time and place named, the servant was instantly killed by the falling of a derrick upon him, on account of its being improperly fastened, sufficiently states the cause of injury. *Brick* v. *Bosworth* (1894) 162 Mass. 331, 39 N. E. 36.

A notice to a railroad company that a brakeman on a certain day was injured on the railroad, within "one hundred yards northerly" of a station named, by being caught between a car and a locomotive engine "by reason of a broken drawbar" upon the car, which permitted the tender of the engine to run up against the end of the car and crush his leg, is sufficient notice of the time, place, and cause of the injury. *Donahoe* v. *Old Colony R. Co.* (1891) 153 Mass. 356, 26 N. E. 868.

Dolan v. *Hoy* (1891) 153 Mass. 380, 26 N. E. 989.

[3] *Coughlan* v. *Cambridge* (1896) 166 Mass. 268, 44 N. E. 218.

[5] *Clarkson* v. *Musgrave* (1882) L. R. 9 Q. B. Div. 386, 51 L. J. Q. B. N. S. 525, 31 Week. Rep. 47, per Field, J. (p. 390).

with legal precision.[6] Still less will it be necessary to set forth what is called in one of the cases the "cause of the cause" of the injury.[7]

In the English and colonial acts, the intention of the legislature that the sufficiency of the notice shall be ascertained in accordance with extremely liberal canons of construction is unmistakably indicated by the provision that the statement shall be made in "ordinary language." This phrase is assumed to have reference to the fact that these acts were passed for the special benefit of persons in a humble sphere of life, and not possessed of much knowledge. The claimant "is to use his own untutored language."[8]

The words just mentioned are not inserted in the American acts, but there is nothing in the reports to indicate that its absence has been regarded as a reason for applying a stricter rule of construction than that adopted by the English courts.

b. Inaccuracies which do not invalidate a notice. — The language of the provisions by which it is secured that a plaintiff shall not be put out of court simply because his notice was inaccurate in some particulars is, it will be observed, not quite the same in all the statutes. By those of England and of the colonies the validity of the notice is made to depend upon the question whether the defendant was prejudiced by the inaccuracies complained of, and it is expressly declared that this question is to be determined by the trial judge. In those of Massachusetts and Colorado there is merely a categorical statement that certain specified inaccuracies shall not invalidate the notice, unless they were intended and actually did mislead the defendant; and in the absence of any designation of the tribunal which is to determine this question, the inference has necessarily been drawn that, like other

[6] *Clarkson* v. *Musgrave* (1882) L. R. 9 Q. B. Div. 386, 51 L. J. Q. B. N. S. 525, 31 Week. Rep. 47, where a notice was held sufficient which stated that the plaintiff, a child, was injured in consequence of the defendant's negligence in leaving a certain hoist in their warehouse unprotected, whereby the plaintiff had her foot caught in the casement of the said hoist, although the evidence showed that the accident was proximately caused by the negligence of the plaintiff's mistress in allowing her to go into the hoist by herself.

[7] In an action for an injury to an employee by the falling of a bank of earth owing to the negligence of the employer's superintendent, a notice to the employer, setting forth the cause of the injury to be "the falling of a bank of earth," is sufficient, although not referring to the superintendent or his conduct. *Lynch* v. *Allen* (1893) 160 Mass. 248, 35 N. E. 550.

[8] Cave, J., in *Stone* v. *Hyde* (1882) L. R. 9 Q. B. Div. 76, 51 L. J. Q. B. N. S. 452, 46 L. T. N. S. 421, 30 Week. Rep. 816, 46 J. P. 788. In the same case Mathew, J., remarked, "When we consider that the object of the legislature in passing this act was to confer a benefit on the working classes, I think it would be unreasonable and unjust, and contrary to the spirit and intention of the act, to require these notices to be framed with all the particularity of a statement of claim.

Compare the statement of Field, J., in *Clarkson* v. *Musgrave* (1882) L. R. 9 Q. B. Div. 386, 51 L. J. Q. B. N. S. 525, 31 Week. Rep. 47, that "The statute was intended for the use of unlearned persons, for whom it was meant to provide a cheap and speedy remedy."

questions of fact, it is primarily for the jury. But the practical results of each of these provisions appear to be virtually identical, when measured by the circumstances disclosed in cases where the actions have been allowed to proceed.

If the validity of the notice has been declared, either expressly by a specific finding, or impliedly by a verdict for the plaintiff, a judgment in his favor will not be set aside, unless the conclusion thus reached was manifestly unwarrantable.[3]

There seems to be only one reported decision bearing upon the question how far a court of review will go in overriding the action of a trial judge who has denied recovery for the reason that the notice was

[3] A letter from the plaintiff's solicitor which merely gave the date of the injury, and stated that the plaintiff was and had for some time past been under treatment at a hospital "for injury to his leg," has been held to be a valid notice. *Stone* v. *Hyde* (1882) L. R. 9 Q. B. Div. 76, 51 L. J. Q. B. N. S. 452, 46 L. T. N. S. 421, 30 Week. Rep. 816, 46 J. P. 788.

In *Carter* v. *Drysdale* (1883) L. R. 12 Q. B. Div. 91, 53 L. J. Q. B. N. S. 557, 32 Week. Rep. 171, a finding that the defendant was not prejudiced was declared to be warrantable, where the notice itself omitted the date of the injury but the plaintiff's solicitor had sent a letter in which that particular was stated. Lord Coleridge remarked that he did not see how, under these circumstances, any other conclusion was possible than that no prejudice was shown.

In *Hearn* v. *Phillips* (1885; Q. B. D.) 1 Times L. R. 475, the plaintiff, having been injured while in the employ of one "G. F. Van Camp," had served notice on "E. Van Camp," who carried on business at the same place. The county court judge found that the notice had been duly served, and having amended the inaccuracy in the initials, allowed the trial to proceed, holding that the employer was not thereby prejudiced in his defense. Held, that a judgment in the plaintiff's favor ought not to be set aside.

The omission of the plaintiff's name and address, and a wrong date, are defects which are not fatal to the validity of the notice, if the trial judge can still say that, as a matter of fact, the defendant was not prejudiced in his defense by these inaccuracies, and that they were not for the purpose of misleading. *Previsi* v. *Gatti* (1888; Q. B. D.) 58 L. T. N. S. 762, 4 Times L. R. 187, Distinguishing *Keen* v. *Millwall Dock Co.* (1882) L. R. 8 Q. B. Div. 482, 51 L. J. Q. B. N. S. 277, 30 Week. Rep. 503, 46 J. P. 135, 46 L. T. N. S. 472, on the ground that the absence of prejudice to the defendant was not a factor in that case, nor made the subject of any argument, the plaintiff being held to have been rightly nonsuited simply for the reason that the notice was insufficient.

The following letter from the wife of the injured servant is sufficiently specific: "I find I will need some more money, and will you please oblige me with ten shillings. It is now five weeks since Adam got his accident. His jaw is so badly smashed that he will never be the same man again. Adam has been advised to get damages from you." *Thompson* v. *Robertson* (1884) 12 Sc. Sess. Cas. 4th series, 121.

A jury is justified in finding that there was no intention to mislead, and that in fact the defendant was not misled, by a notice of the death of an employee, stating that deceased was killed by a stone being precipitated against him from defendant's derrick as a result of the negligence of defendant or of some person for whose negligence he was liable, and that the notice was therefore sufficient although the negligence was in failing to warn him of the raising of the stone. *Beauregard* v. *Webb Granite & Constr. Co.* (1893) 160 Mass. 201, 35 N. E. 555.

In Scotland, where the issues are adjusted by a different court from that which tries the case, the question whether the excuse for not sending the notice was reasonable may be decided by the former court, or in its discretion postponed for the decision of the trial court. *Trail* v. *Kilman* (1887) 15 Sc. Sess. Cas. 4th series 4.

insufficient to satisfy the statute, and the rationale of that decision is somewhat obscure.[10]

I. Death of Employer or Injured Employee; How the Right of Action is Affected by.

713. Scope of this subtitle.— It is not proposed in this subtitle to do more than state the result of the cases which have been decided with express relation to one or other of the acts now under discussion. For a more complete collection of cases dealing with the effect of death upon the right of action for personal injuries, the reader must consult the general treatises on the subject.[1]

714. Death of employer; effect of.—In England it has been held that the maxim, *Actio personalis cum persona moritur*, which operates as a bar to an action at common law against the executors of the culpable party also precludes recovery in an action brought by a servant under the statute.[1] The same doctrine would doubtless be applied in any American or colonial jurisdiction, unless it is otherwise provided by the act itself, as is the case in Ontario (§ 11), and in British Columbia (§ 15).

715. Death of plaintiff; pending action abated by.—If a plaintiff dies after an action under the statute is commenced, but before judgment, the action already commenced abates. The death may give a right of action under the damage act, but this is a different action and must be prosecuted separately.[1]

716. Suits by executors or administrators.—Nearly all the statutes now under consideration expressly provide that the right of action given by them may be enforced by the "personal representatives" of a servant who dies as a result of the injury in suit.[1]

[10] In *Beckett* v. *Manchester* (1888; Q. B. D.) 52 J. P. 346, a nonsuit was set aside on the ground that the want of a name and address is not fatal to the notice, if the defendants are not taken by surprise in consequence of the defect. So far as the position of the court can be understood from the very meager report of the case, absence of prejudice seems to have been viewed as a legal inference from the mere fact that the defendant came into court. But, in view of the decisions cited above, this seems not to be maintainable as an unqualified proposition. The report probably omits to mention the factor which was really regarded as decisive.

[1] In Roberts & Wallace, Liability of Employers, pp. 380 *et seq.*, will be found an excellent summary of the English cases. A full review of the English decisions under Lord Campbell's act is given in Beven's Employers' Liability, 2d ed. pp. 84 *et seq.*, and chap. VI. of the same author's work on Negligence, (Vol. I, p. 208.) See also Rnegg on Employers' Liability Act, p. 125. In Shearm. & Redf. Neg. §§ 124 *et seq.*, the American decisions are collected.

[1] England, Newfoundland and Aus-

By Mass. Pub. Stat. chap. 112, § 212, as amended by Stat. 1883, chap. 243, a right of action is given to an administrator in any case where the intestate could have sued, but recovery is not allowed for the negligence of a fellow servant. In a later case than the one cited in note 4, *infra*, it was argued that the combined effect of this provision and of § 2 of the employers' liability act (see *infra*) was to give an action to the administrator, free from the defense arising out of the relation of fellow servants, in a case where death had resulted without conscious suffering, and where there is no widow nor dependent next of kin. But this contention did not prevail.[2]

Under the Alabama Code, it has been held not to be necessary to aver in the complaint that the injured servant left any heirs at law surviving him, though the damages recovered are to be distributed according to the statute of distribution.[3]

In most of the statutes no special provision is made for a suit by a widow as distinguished from other personal representatives; but in Massachusetts, section 2 of the act gives a widow or dependent next of kin the right to sue in the special case where the employee is instantly killed or dies without conscious suffering. Under this provision the right of recovery exists only under such circumstances as would have created a liability in favor of the employee if he had survived.[4] The effect of sections 1 and 2 of the act is, therefore, simply this—that, if death is not instantaneous, and there is conscious suffering, the action must be brought by the person injured, or his executor or administrator, while, if there is instantaneous death, or death not

tralian Colonies, § 1; Ontario, § 3, subs. 5; British Columbia, § 15; Alabama Code, § 2591; Massachusetts, § 1, subs. 3, §§ 2, 3; Colorado, § 1, subs. 3; New York, § 1.

[2] *Clark* v. *New York, P. & N. R. Co.* (1893) 160 Mass. 39, 35 N. E. 104. Some remarks on the inaptness of the phraseology used in § 3 will be found at the end of the opinion of the court.

[3] *Columbus & W. R. Co.* v. *Bradford* (1888) 86 Ala. 574, 6 So. 90.

[4] In *Ducy* v. *Old Colony R. Co.* (1891) 153 Mass. 112, 26 N. E. 437, the court said: "The provisions of this section would be inconsistent with those of the statute of 1883, chap. 243 (see note 2, *supra*), if that were held to include cases where the deceased might have maintained an action under the employers' liability act if death had not resulted. It could not have been intended that, where an employee is instantly killed or dies without conscious suffering, the widow or next of kin shall have a right of action for the death under the employers' liability act, and that the administrator also, by virtue of the same statute, shall be enabled to maintain an action for the death which could not otherwise be maintained under the statute of 1883. We are of opinion that the statute of 1887, chap. 270, cannot be invoked to relieve a case brought under the statute of 1883, chap. 243, from the defense that the injury was caused by the negligence of a fellow servant. Section 2 of the first mentioned statute, which gives a remedy to the widow or next of kin, instead of to the administrator, where death results without conscious suffering, must be held to be exclusive as to the cases of death where the aid of the statute is invoked."

preceded by conscious suffering, the action must be brought by the widow or next of kin.[5]

The phraseology of the various acts as to suits by personal representatives differs considerably; but presumably the doctrine laid down in Massachusetts is universally applicable, *viz.*, that there is only one cause of action under them. Hence they do not give the administrator of an employee a right of action against an employer for causing the employee's death, in addition to the right as legal representative to recover damages accruing to the intestate in his lifetime.[6]

The phraseology of the damage act which happens to be in force in the particular jurisdiction where the injury occurs determines what parties shall be deemed "personal representatives" for the purposes of the employers' liability act in that jurisdiction. If the damage act provides that the action must be brought by the executors or administrators of the deceased person, the wife of a servant who has been killed in the course of his employment cannot bring a suit in her own name under an employers' liability act.[7]

It has been decided with reference to the employers' liability act

[5] *Gustafson* v. *Washburn & M. Mfg. Co.* (1891) 153 Mass. 468, 27 N. E. 179. If the deceased left a brother and a sister, and the latter alone was dependent on him, the action should be brought in her name alone. *Daly* v. *New Jersey Steel & I. Co.* (1891) 155 Mass. 1, 29 N. E. 507.

To be "dependent" within the meaning of the statute, the next of kin need not be one of the class of persons whom the deceased was legally bound to support. Dependence, if proved as a fact, is sufficient. *Hodnett* v. *Boston & L. R. Co.* (1892) 156 Mass. 86, 30 N. E. 224. Compare the decisions with regard to the English workmen's compensation act of 1897, in § 787, *post*.

Whether the deceased died without "conscious suffering" is a question primarily for the jury. See *Maher* v. *Boston & L. R. Co.* (1893) 158 Mass. 36, 32 N. E. 956; and *Mears* v. *Boston & W. R. Co.* (1895) 163 Mass. 150, 39 N. E. 997, for cases involving evidence deemed to be sufficient to justify the inference of death without such suffering.

[6] *Ramsdell* v. *New York & N. E. R. Co.* (1890) 151 Mass. 245, 7 L. R. A. 154, 23 N. E. 1103. After quoting the provision in question, the court said: "This plainly authorizes an executor or administrator to proceed in the right of his testator or intestate, and recover all damages which the deceased person suffered to the time of his death. It does not purport to make the death a substantive cause of action. It gives only the right of compensation and remedies and it gives them to the employee, or to his legal representative in case of his death. It implies that his representatives are merely to succeed to his rights and remedies. But the law recognizes no 'right of compensation' for the death of a person, and gives to a deceased person no remedies founded on his death." These considerations are of general applicability and therefore independent of the following additional argument by which the court went on to fortify its position: "If this clause (§ 1, subs. 3) gave a right of action for the death of an employee as an extension to his representatives of a right which under one or two statutes belongs to the representatives of others who are not employees, it would necessarily include the right where death is instantaneous. But manifestly that was not intended. The next section of the statute (2) deals expressly with such cases in a different way. It is quite apparent that clause 3 of § 1 gives the legal representatives of a deceased employee merely a right to recover the damages to which he was entitled at the time of his death."

[7] *Pearson* v. *Canadian P. R. Co.* (1898) 12 Manitoba L. Rep. 112.

of Colorado that the provision which relates to suits by personal representatives cannot be construed as having abrogated by implication the right of action which is given to those representatives by the damage act of that state.[8]

J. Persons entitled to sue under the acts.

717. General remarks.—The cases which turn upon the question whether the injured person is entitled to maintain an action under these statutes against the party whom he seeks to hold responsible fall into three categories:

(1) Those in which the right of action is made to depend upon principles applicable to statutory and common-law actions alike.

(2) Those in which the right depends entirely upon the specific terms of the acts themselves.

(3) Those in which the right depends upon the answer to the question, how far common-law principles are affected by these or other acts which modify the relations between masters and servants.

718. Servants temporarily under the control of the defendant.—Whether the plaintiff, although regularly working for another person, was, at the time of the accident, under the control of the defendant in such a sense as to be an employee *ad hanc vicem*, and therefore entitled to hold the defendant accountable under the statute, is determined by tests similar to those which are applied in actions at common law.[1] The predicament thus indicated is discussed at length in vol. III.

[8] *Colorado Mill. & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28, Affirming (1898) 12 Colo. App. 277, 55 Pac. 736.

[1] One sent by a firm of contractors to assist their workman in constructing an elevator which they have contracted to erect in a building, whose wages the owners have promised to pay, may properly be found to be a servant of such owners. *Wild* v. *Waygood* [1892] 1 Q. B. 783, 61 L. J. Q. B. N. S. 391, 66 L. T. N. S. 309, 40 Week. Rep. 501, 56 J. P. 389. Lord Herschell, commenting on the contention that the plaintiff was not working under any contract with the defendants, and therefore was not a workman within the meaning of the act, and capable of suing under it, said: "The only effect of that objection, if it prevailed, would be this,—that there would be no question as to the defendant's liability; but the action should have been one brought at common law, and not brought under the employers' liability act. But I think that in this case there is evidence that the plaintiff was a workman employed by the defendants. Duplea had requested Horton's foreman that he should have furnished to him a man for the purpose of doing the work in connection with the lift. It was not work which Horton had to do, but work which the defendants had to do. There is evidence that Duplea needed and obtained assistance for the work he had to do, and his employers recognized it as being rendered on their behalf and asked to have an account sent in for the work the man had done, so that they might pay his wages during the time he was so engaged. It is enough to say that there was evidence which it was impossible to

719. Volunteers.—(Compare §§ 629–635, *ante.*) A mere volunteer as regards the service under performance is not entitled to the benefits of those acts.[1]

720. Persons who have permanently or temporarily ceased to be in the employment of the defendant.—(Compare §§ 624, 625, *ante.*) If the plaintiff, though he may at some previous time have worked for the defendant, was not actually in his service at the time when the injury was received, it is clear that he cannot sue under these statutes.

721. Independent contractors.—(See also § 723, subd. 2, *infra.*) These acts have no application to a man who is conducting his own business. Under such circumstances the fault, if any, is imputable to himself.[1]

721a. Servants of independent contractors.—Under the English, colonial, and Alabama statutes, which contain no special provision modifying the general rule of law on the subject, it is clear that the servants hired by a contractor or sub-contractor cannot sue the principal.

withdraw from the jury that the plaintiff was in the service of the defendants within the meaning of this act."

[1] *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117, where, however, the court refused to say that this doctrine barred recovery in the case of a female employee whose hair was caught in an uncovered revolving shaft, while she was on a bench endeavoring to open a window for ventilation purposes.

A brakeman who is traveling as a passenger on a train, and is not under the control of the conductor for the purpose of the performance of the duties characteristic of his position, cannot recover for injuries received in coupling a car in compliance with the directions of the conductor. Such a direction is entirely unauthorized, and fastens no liability on the company. *Georgia P. R. Co.* v. *Propst* (1887) 83 Ala. 518, 3 So. 764. There the court held demurrable a count which began thus: "When on a trip down defendant's said road, . . . plaintiff, being aboard defendant's train, . . . was then and there ordered by the conductor or foreman of said railway company, employed to manage or superintend the business affairs of said company on the aforesaid train, and whilst in the exercise of his superintendence, to couple a freight car to others attached." It was declared that there was nothing in this count which showed that the plaintiff was acting as brakeman, or had been requested to do so.

A servant who is injured while attempting to repair defective machinery cannot recover under these statutes, if work thus undertaken was outside the scope of his regular duties. *Wellman* v. *Merchants' Mfg. Co.* (1890) 150 Mass. 362, 5 L. R. A. 792, 23 N. E. 100.

[1] By the rules of a mine workmen, upon their discharge, were not entitled to receive their wages until they had returned their tools. A miner who was discharged on a Saturday, but had no opportunity to go down for his tools on that day, went down on Monday and was injured by an explosion of gas due to inadequate ventilation. Held, that at the time of the injury he was acting in the employment of the mine owner. *Cowler* v. *Moresby Coal Co.* (1885, Q. B. D.) 1 Times L. R. 575.

In *Lovell* v. *Charrington*, reported in the Law Times Newspaper, March, 1882 (see also Roberts & Wallace on Liability of Employers, 3d ed. p. 230), the plaintiff had been occasionally employed by the defendant as a trolleyman, but on the day in question, he arrived too late, and was told that he was out of employment for that day. While leaving the premises he was injured owing to a defect herein. Held, that he was not a "workman" within the statutory definition.

[1] *Bruce* v. *Barclay* (1890) 17 Sc. Sess. Cas. 4th series, 811.

employer unless there is evidence to show that the control which he exercised over them was the same in kind and degree as that exercised by a master.[1] Similarly, the servant of a subcontractor cannot recover in a suit against the principal contractor.[2]

Under the acts of Massachusetts, Ontario, and British Columbia, the principal employer is made liable to servants of contractors or subcontractors for defects in the condition of the ways furnished by him for the purpose of executing the work contracted for. Whether the instrumentality which caused the injury was one of those to which this provision applies is a question of fact in each instance.[3]

722. Railway servant.—It has been suggested that this term, which is employed in the English act for the purpose of designating one of the specific classes of persons to which the provisions are applicable, should be understood as referring only to servants engaged in the conduct and management of railways, and not as embracing servants hired to do work in connection with a collateral undertaking carried on by a railway company as an adjunct to its proper business of carriage by land,—*e. g.*, the keeping of a hotel, or the operation of a

[1] The miners who take service under the middlemen known in England as "butty" men are liable to dismissal by the principal employer, and are therefore regarded as his servants in such a sense as to be entitled to the benefits of the employers' liability act of 1880. *Brown* v. *Butterley Coal Co.* (1885) 53 L. T. N. S. 964, 50 J. P. 230.

See also *Milligan* v. *Muir* (1891) 19 Sc. Sess. Cas. 4th series, 870, where the general rule in the text was applied.

Whether the immediate employer of the plaintiff was an independent contractor or in the service of the defendant is a question for the jury, where the evidence is that such employer took work from the defendant; that he hired the plaintiff as well as other boys, and paid them their wages; that the plaintiff went to work when the company wanted him; and that the company repaired the machinery used, whenever it was out of order. *Masters* v. *Jones* (1894: Q. B. D.) 10 Times L. R. 403.

See also the cases cited in § 723, note 52, *infra*.

[2] *Nicolson* v. *MacAndrew* (1888) 15 Sc. Sess. Cas. 4th series, 854.

[3] A workman employed by a subcontractor to do work outside the mill cannot recover from the owner of the mill, where he passes through the mill to get a drink of water, and in returning goes out of his way to assist a mill hand and falls through an unguarded hole in the floor. *Finlay* v. *Miscampbell* (1890) 20 Ont. Rep. 29.

In *Toomey* v. *Donovan* (1893) 158 Mass. 232, 33 N. E. 396, the case was held to be for the jury, where the evidence was that the defendant had given to another person charge of a certain room in his factory under an agreement by which the defendant was to furnish the machinery and materials, and the contractor was to hire and pay the men; that the defendant was to pay for the repairs; that the contractor had the right to order the repairs to be made; that the defendant had the right to inspect the machines, and was often in the room; and that the injury was received owing to a defect in one of the machines by one of the men in the employ of the contractor. In this case the contractor was also the person intrusted by the defendant with the duty of seeing that the machine was in proper condition, under § 1, subs. 1, of the statute. It was held that the relation which he occupied as contractor would not relieve the defendant from liability for his negligence in the discharge of this duty.

line of steamboats.[1] Such a doctrine would limit the benefit of the acts in a manner analogous to the decisions under the acts of Iowa, Kansas and Minnesota, which, it is held, abolish the defense of *cosservice* only in cases where the injuries were received in the actual operation of a railway. But, so far as the writer knows, there has not been any judicial expression of opinion as to the point just raised.

In an English case referred to again in § 723, subd. h, *infra*, it was held that a driver of a tram car could not sue under the act, as being a workman engaged in "manual labor."[2] The possibility of his recovering as a "railway servant" was not discussed, and it seems to have been assumed both by the court and counsel that this description was not applicable to an employee of a street railway company. The reasons for adopting such a construction of the act are undoubtedly stronger in England than in the United States. See § 707, *supra*. But it remains to be seen whether, even in the former country, the courts will, when the point is directly raised, go to the length of holding that the benefits of a remedial statute must be denied to a class of employees who can only be excluded from its purview by dint of attaching a somewhat narrow and technical meaning to the word "railway."

In the Ontario, Manitoba, and British Columbia acts it is expressly declared that the term "railway servant" includes "tramway and street railway servant."

It has been held that an employee working on a railway controlled by the Canadian Dominion government may recover under the provisions of an employers' liability act passed by the legislature of the Province in which the injury was received.[3]

All persons in the employment of railway companies, whatever may be their rank, are within the purview of the act.[4]

723. Workmen.— By sec. 10 of the English act it is declared that the expression "workman" means "any person to whom the employers and workmen act of 1875 applies." The words of the act thus referred to, so far as they are material in this connection, are as follows:

"The expression 'workman' does not include a domestic or menial servant, but, save as aforesaid, means any person who, being a laborer, servant in husbandry,

[1] Roberts & Wallace on Liability of Employers, 3d ed. p. 231.

[2] *Cook* v. *North Metropolitan Tramways Co.* (1887) L. R. 18 Q. B. Div. 683, 56 L. J. Q. B. N. S. 309, 56 L. T. N. S. 448, 57 L. T. N. S. 476, 35 Week. Rep. 577, 51 J. P. 630.

[3] *Canada Southern R. Co.* v. *Jackson* (1890) 17 Can. S. C. 316.

[4] A superintendent drowned while engaged in investigating the condition of a well was held entitled to recover in *Pearson* v. *Canadian P. R. Co.* (1898) 12 Manitoba L. Rep. 112.

journeyman, artificer, handicraftsman, miner, or otherwise engaged in manual labor, whether under the age of twenty-one years or above that age, has entered into or works under a contract with an employer, whether the contract be made before or after the passing of this act, be express or implied, oral or in writing, and be a contract of service or a contract personally to execute any work or labor."

This section has been incorporated, with some important changes, in the colonial acts mentioned in §§ 660, 660a, *supra*.

The meaning of the words by which the various kinds of workmen are designated, and of the more general phrases with which the provision concludes, is to be ascertained not only from the decisions upon the employers' liability act itself, and the employers and workmen act to which it refers, but also from the cases in which other statutes which make use of a similar terminology have been construed.[1] Some common-law cases are also serviceable for purposes of definition.

a. Domestic or menial servant.—(See also subs. *b*, note 2, *infra*.)—According to a text-book of repute, domestic or menial servants are "those persons who e main duty is to do actual bodily work as servants for the personal comfort, convenience, or luxury of the master, his family, or his guests, and who, for this purpose, become part of the master's residential or quasi-residential establishment."[2]

Whether or not a servant is a domestic or menial servant is primarily a question of fact for the jury.[3]

In this connection, however, it is not amiss to recall the remark of Erle, J., that "it is a matter of common knowledge that words in one act of Parliament may have a meaning which they would not have in another." *Wilson* v. *Zulueta* (1849) 14 Q. B. 405, 19 L. J. Q. B. N. S. 49, 14 Jur. 366.

[2] Roberts & Wallace on Liability of Employers, 3d ed. p. 214. This definition was recently mentioned with marked approval by Collins, J., in *Pearce* v. *Lansdown* (1893) 62 L. J. Q. B. N. S. 441, 69 L. T. N. S. 316, 57 J. P. 760, where a potman in a public house was held to discharge duties which were substantially of a menial nature.

In actions where the question involved was whether the rule was applicable, that domestic servants are only entitled to a month's warning when the contract of hiring is termi it has been held that the phrase "menial servants" includes a huntsman hired to take charge of a pack of foxhounds (*Nicoll* v. *Greaves* [1861] 17 C. B. N. S. 27, 33 L. J. C. P. N. S. 209, 10 Jur. N. S. 919, 10 L. T. N. S. 531, 12 Week. Rep. 961); and a head gardener living in a cottage situated on his master's property (*Nairbin* v. *Elliott* [1835] 2 Comp. M. & R. 51, 1 Gale, 72, 5 Tyrw. 709, 4 L. J. Exch. N. S. 155); but not a governess (*Todd* v. *Kench* [1854] 8 Exch. 151, 22 L. J. C. P. N. S. 1, 17 Jur. 119); nor the boy keeper of a large hotel (*Dunbar* v. *Lamb* [1876] Ir. Rep. 10 C. L. 188); nor an employee who combines the functions of a steward and gardener (*Cooper* v. *Burke* [1861] 12 Ir. C. L. Rep. 194).

The statement of Ellis's one that the word "menial" is derived from *mania* (this class of servants being conceived of as *infra sanam*, also from the ante-Johnsonian period of philology, and is one of the many absurdities of that sort which are still allowed to disfigure legal treatises. The word is really derived, according to the best modern authorities, from the Saxon *maine*, *mesne*, that is, a household, or family. See Collins, L., in *Pearce* v. *Lansdowne*, *supra*, and Skeat's Etymological Dict., *sub voc.*

Pearce v. *Lansdown* (1893) 62 L. J. Q. B. N. S. 441, 69 L. T. N. S. 316, 57 J. P. 760, per Williams, J.

b. Laborer.—(See also note 9, *infra.*)—The generic word "laborer" denotes a man who digs and does other work of that kind with his hands.[4] In one sense every man who works or labors may be called a "laborer;" but the word, as used in the statute, has a more restricted meaning, being applicable only to a person whose work is essentially manual. It does not embrace an omnibus conductor,[5] nor the caretaker of goods seized under a fi. fa.,[6] nor a carpenter, nor a bailiff, nor the clerk of a parish.[7]

In one case it was remarked that artificers, handicraftsmen, miners, etc., do not necessarily or properly fall under the denomination of "laborers."[8] But this distinction is not material in the present connection.

The word "laborer" in the special provision of the stamp act by which agreements for the hire of a "laborer" are admissible in evidence, even if they are unstamped, is not confined to a mere hedger and ditcher.[9]

c. Servant in husbandry.—This description applies to a dairymaid, who, by her contract, is to assist in harvesting, if so required,[10] to a servant engaged by a farmer to act as "kitchen-woman and byre woman,"[11] to a wagoner,[12] and to a "man employed to dig the ground,"[13] but not to a person engaged by a farmer to weigh out the food for the cattle, to set the men to work, and in all things to carry out the orders given to him.[14]

"Servants in husbandry" are expressly excluded from the benefits of the Ontario, Manitoba, and British Columbia acts. See section 2, subs. 3.[15]

[14] *Davies* v. *Berwick* (1861) 3 El. & El. 549. Crompton, J., pointed out that his chief duty was to keep the general accounts belonging to the farm, and this fact indicated that his position was rather that of a steward than that of a "servant."

[15] Under this provision it is for the jury to say whether the plaintiff was a

The Massachusetts act also excludes "farm laborers."

d. Journeyman.—In a treatise of authority the following definition of the word "journeyman" is suggested: "One who, being neither a foreman nor an apprentice, and working not on his own account for the public, but under a master, works with his hands in an occupation of a constructive kind, requiring skilled knowledge, which skilled knowledge he possesses."[16] Etymologically considered, a "journeyman" is one who is employed by the day, but that is not the sense in which the term is ordinarily used, for, in most of the trades in which journeymen are employed,—as, for an instance, in the business of butchers, bakers, and tailors,—they are hired and paid by the week.[17]

e. Artificer.—(See also subs. *i*, notes 46, 49–51, *infra*.) An "artificer," according to Brett, M. R., is a "skilled workman"[18] The word has been held applicable to a framework knitter who manufactured stockings,[19] and to the stoker of a steamer.[20] It is not confined to occupations of which the essence is "manual labor," but embraces such workmen as a calico pattern-designer, engaged to serve for a term of years;[21] and the overseer of a printing office;[22] or the superintendent of looms in a factory, whose time is divided between the supervision and manual labor.[23]

f. Handicraftsman.—(See also subs. *i*, notes 46, 49, *infra*.) The meaning of the word "handicraftsman" is essentially the same as that of the word "artificer,"—that is to say, he is a "skilled workman."[24]

g. Miner.—By section 7, subs. 2, of the recent English workmen's

servant in husbandry and was engaged in the usual course of his work, when the evidence is that a farmer had not engaged him to do any particular kind of work, but that he was first put at mason work, and then at digging the drain which caved in and thus caused the injury complained of. *Reid* v. *Barnes* (1894) 25 Ont. Rep. 223.

[24] Brett, M. R., in *Morgan* v. *London General Omnibus Co.* (1884), as reported in 53 L. J. Q. B. N. S. 352, 51 L. T. N. S. 213, 32 Week. Rep. 759, 48 J. P. 503.

A hairdresser is not a "handicraftsman" *Reg.* v. *Justices of Louth* (1900)

compensation act of 1897 the word "mine," as used therein, means a mine to which the coal mines regulation act of 1887, or the metalliferous mines regulation act of 1872, applies. In the absence of any express declaration in the employers and workmen act of 1875, it is reasonable to suppose that the same rule of construction thus indicated would be followed in determining whether a workman was a "miner" for the purposes of the employers' liability act.[25]

With respect to the distinction between "mines" and "quarries" it has been held that workers in underground quarries of slate are entitled to the protection provided for miners under the metalliferous mines act.[26] For some purposes it is clear that a surface quarry is not a "mine."[27] But the question whether a workman employed in such a quarry is or is not a "miner" is not material in the present connection. Quarrymen of all descriptions are at all events within the purview of the general clause, "otherwise engaged in manual labor."[28]

h. Persons "otherwise engaged in manual labor."—Conformably to a familiar principle of statutory construction, this general phrase is held to refer to labor *ejusdem generis* with the specific kinds previously mentioned.[29]

There is some difficulty in defining the line beyond which a person will fail to come within the definition of a "workman" as defined by

2 Ir. Rep. 714. As to this case, see also subs. *H, infra.*

By § 4 of the workshops regulation act 1867 (30 Vict. chap. 146, since repealed by 41 Vict. chap. 16, sch. pt. 6, it was declared that "handicraft" shall mean any manual labor exercised by way of trade or for purposes of gain, in or incidental to the making of any article, or part of an article, or in or incidental to the altering, repairing, ornamenting, finishing, or otherwise adapting for sale any article." This definition has been held to include an employee engaged in making straw plait, *Beadon* v. *Perrott* (1871) L. R. 6 Q. B. 718, 10 L. J. M. C. N. S. 200, 19 Week. Rep. 1144 (breach of act in employing a child under eight years of age).

[25] The word "workmen" in the employers' liability act of Victoria (Australia) is, by an express provision, not applicable to any person coming under div. 1, part 3, of the mines act of 1890.

[26] *See* v. *Evans* (1875) 23 Week. Rep. 739; *Jones* v. *Cwmamman Slate Co.* (1879) 41 L. T. N. S. 576, L. R. 5 Exch. div. 81, 49 L. J. Exch. N. S. 110, 28 Week. Rep. 377, 44 J. P. 168.

In a case where a horse was under construction it was held that the expression "mines" did not comprise "quarries," and it was said that a quarry is distinguished from a mine as being "a place upon or above or not under ground." Turner, L. J., in *Bell* v. *Watson* (1886) L. R. 1 Ch. 303, 35 L. J. Ch. N. S. 337, 12 Jur. N. S. 263, 14 L. T. N. S. 115, 14 Week. Rep. 470.

[27] *See Devonshire* v. *Rawlinson* (1861) 28 J. P. 72 (case under stat. 4 Geo. IV. chap. 34, § 3, in which a servant's wages were forfeited for absence from work).

Day, J., in *Morgan* v. *London General Omnibus Co.* (1883) L. R. 12 Q. B. Div. 201, 50 L. T. N. S. 687, 32 Week. Rep. 116. In the court of appeal (1884) 53 L. J. Q. B. N. S. 352, 51 L. T. N. S. 213, 32 Week. Rep. 759, 48 J. P. 503 Brett, M. R. said that this phrase meant "any person engaged in the same way as all the others are engaged, although they do not go by the same names."

To the same effect, see remarks of Smith, L. J., in *Cook* v. *North Metropolitan Tramways Co.* (1887) L. R. 18 Q. B. Div. 683, 56 L. J. Q. B. N. S. 209, 56 L. T. N. S. 448, 57 L. T. N. S. 470, 35 Week. Rep. 577, 51 J. P. 630.

this clause. In some cases the true conclusion will be indicated by the fact that the legislature has used the word "labor," not "work." Various occupations may be said to involve "manual work," and not manual labor.[40]

In other cases a "satisfactory distinction may be drawn between those whose labor is continuous and requires no application of thought, and those whose labor requires the application of a certain amount of thought and skill."[41] But the most generally serviceable test is furnished by the doctrine that the essential question to be answered in each instance is whether the duties performed by the servant were mainly mental or mainly physical, and that the act applies only where his duties belong to the latter category."[42] This doctrine involves the corollary that the mere use of the hands in matters incidental to a man's employment does not constitute him a manual laborer within the meaning of the act.[43] Following out this conception the courts have held that an action cannot be maintained under the act of 1880 "by a person employed by a firm of manufacturers "to assist the firm, as a practical working mechanic, in developing ideas they, the firm, might wish to carry out, and to himself originate and carry out ideas and inventions suitable to the business of such firm;"[44] nor by an omnibus conductor;"[45] nor by a driver of a tram car;[46] nor by a grocer's-

[40] *Cook* v. *North Metropolitan Tramways Co.* (1887) L. R. 18 Q. B. Div. 683, 56 L. J. Q. B. N. S. 309, 56 L. T. N. S. 448, 57 L. T. N. S. 156, 35 Week. Rep. 577, 51 J. P. 630, per Smith, J., who illustrates the distinction by reference to the case of a person engaged in telegraphing or in writing

A "hairdresser" has been held not to be a "workman" on the ground that although he is a "handicraftsman," he is not engaged in "manual labor." *Rex* v. *Justices of Louth* [1900] 2 Ir. Rep. 714.

[41] Grantham, J., in *Cook* v. *North Metropolitan Tramways Co.* (1887) L. R. 18 Q. B. Div. 683, 56 L. J. Q. B. N. S. 309, 56 L. T. N. S. 448, 57 L. T. N. S. 156, 35 Week. Rep. 577, 51 J. P. 630.

[42] Pollock, B., in *Hunt* v. *Great North-ern R. Co.* [1891] 1 Q. B. 601, 60 L. J. Q. B. N. S. 216, 64 L. T. N. S. 418, 55 J. P. 470.

[43] *Bound* v. *Lawrence* [1892] C. A.] 1 Q. B. 226, 61 L. J. M. C. N. S. 21, 65 L. T. N. S. 844, 40 Week. Rep. 1, 56 J. P. 118. (Reversing decision of Q. B. D.). "It is difficult," said Fry, L. J., "to imagine any work done by man so purely intellectual as to require no kind of work with the hands; and the converse is equally true, that there can hardly be work with the hands that requires no intellectual effort. If, then, the words 'manual labor' are to have the full significance which could be put on them, they would be extended to every kind of employment. That cannot be the true meaning of the statute, but some more confined interpretation must be arrived at. I agree that this must be done by looking to the nature of the substantial employment, and not to matters that are incidental and accessory."

[44] *Jackson* v. *Hill* (1881) L. R. 13 Q. B. Div. 618, 49 J. P. 118.

[45] *Morgan* v. *London General Omnibus Co.* (1884) C. A.) L. R. 13 Q. B. Div. 832, 53 L. J. Q. B. N. S. 372, 51 L. T. N. S. 213, 32 Week. Rep. 759, 48 J. P. 503, Affirming (1883) L. R. 12 Q. B. Div. 201, 50 L. T. N. S. 687, 32 Week. Rep. 116 (Disapproving *Wilson* v. *Glasgow Tramways Co.* [1881] 5 Sc. Sess. Ca. 4th series, 981, where it was held by Lords Moncrieff and Gifford, with some expression of doubt, that a tramway conductor was within the act). "A conductor," said Brett, M. R., "does not lift the passengers into and out of the omnibus. It is true that he may help to change the horses; but his real and sub-

assistant;[37] nor by a waiter at a restaurant;[38] nor by a skilled engineer in charge of the machinery of a ferryboat.[39] In line with these decisions is one to the effect that a guard of a goods train, whose main duty is to guard and conduct the train and marshal the cars, but who is also required to assist at times in coupling and uncoupling the cars and unloading, is not entitled to the benefits of the truck acts.[40]

On the other hand the phrase has been held to embrace a man in the service of a wharfinger, whose duties were to drive a horse and trolley and load and unload the trolley;[41] a man engaged as "potter, printer, overlooker, and mixer;"[42] and a stevedore working on a ship attached to a wharf.[43]

stantial business is to invite persons to enter the omnibus and to take and keep for his employers the money paid by the passengers as their fares; in fact, he earns the wages becoming due to him through the confidence reposed in his honesty."

[36] *Cook* v. *North Metropolitan Tramways Co.* (1887) L. R. 18 Q. B. Div. 683, 56 L. J. Q. B. N. S. 309, 56 L. T. N. S. 448, 57 L. T. N. S. 476, 35 Week. Rep. 577, 51 J. P. 630, 1 Times L. R. 523. "I cannot see," said Smith, J., "the distinction between driving and other occupations which involve no manual labor, though they do involve manual work. Had the legislature intended to include coachmen, they would have included them among the specific instances."

[37] In *Bound* v. *Lawrence* [1892; C. A.] 1 Q. B. 226, 61 L. J. M. C. N. S. 21, 65 L. T. N. S. 844, 40 Week. Rep. 1, 56 J. P. 118, Lord Esher, M. R., said: "It appears that the appellant was employed as a grocer's assistant in a shop, and his business was to take orders from the customers and to carry them out. In doing this he may have to show goods, and if the customers take away the goods he has to make up the parcels. In doing this he has to use his hands, and the question is whether that makes him a manual laborer. There can be no manual labor without the user of the hands; but it does not at all follow that every user of the hands is manual labor, so as to make the person who does it a manual laborer. Now, the principal part of the appellant's employment is selling to the customers across the counter. That is his substantial employment, and if he has to do other things which involve physical exertion, we must see whether that is not incidental to his real employment. In this case I cannot doubt that that is so. The findings of fact seem to me to negative the idea that the work described was any part of his real and substantial employment." Brett, M. R., also lays stress upon the fact that, in the occupation of the appellant, the knowledge and skill required in selling the goods to customers was more important than the manual work that he did, and that the latter was an incident of his employment.

[41] In *Yarmouth* v. *France* (1887) L. R. 19 Q. B. Div. 647, 57 L. J. Q. B. N. S. 7, 36 Week. Rep. 281, Lord Esher said (p. 651): "He is a man who drives a horse and trolley for a wharfinger. We must take into account what his ordinary duty was. He has to load and unload the trolley. That is manual labor. His duty may be compared to that of a lighterman who conducts a barge or lighter up and down the river. The driving the horse and the trolley and the navigating the lighter form the easiest part of the work; his real labor, that which tests his muscles and his sinews, is the loading and unloading of the trolley or the lighter."

[42] *Grainger* v. *Aynsley* (1880) L. R. 6 Q. B. Div. 182, 50 L. J. M. C. N. S. 48, 43 L. T. N. S. 608, 29 Week. Rep. 242, 45 J. P. 142.

[43] *Hallen* v. *King* (1896) 17 New So. Wales L. R. (L.) 13.

The mere fact that the employee, for the sake of speed and convenience, hired a certain number of assistants, whom he paid himself, will not take him out of the class of persons "engaged in manual labor."[44]

A person whose occupation is one of which the essence is manual labor is entitled to recover under the act if he is injured while performing a duty or work incidental to that occupation, even though the duty does not directly involve manual labor.[45]

i. "*Working . . . der a contract with an employer.*"—The contract of employment to which this phrase points is, as the subject-matter of the act indicates, one of service as distinguished from one which is entered into with an "independent contractor." Accordingly, although the work in which the employee was engaged, whose rights or liabilities are in question, may have been of such a character as to bring him prima facie within one of the descriptive terms used for the purpose of defining the word "workman," yet he cannot sue under the act, if it appears that his agreement merely bound him to produce certain specified results, and did not place him under his employer's control with respect to the means by which, or the manner in which, those results were to be attained.[46]

If his agreement is essentially one of this nature, he is not converted into a servant by participating in the manual labor by which the agreement is performed.[47] One of the ordinary characteristics of such agreement is that the contractor is free to perform his contract either in person or by deputy. In several cases, therefore, the existence or absence of an obligation on the part of the employee in question to do the stipulated work himself has been treated as the appro-

[44] *Granger* v. *Aynsley* (1880) L. R. 6 Q. B. Div. 182, 50 L. J. M. C. N. S. 48, 43 L. T. N. S. 608, 29 Week. Rep. 242, 45 J. P. 142.

[45] *Holland* v. *Stockton Coal Co.* (1898) 19 New So. Wales L. R. (L.) 109, where it was held error to nonsuit a plaintiff whose husband, a man ordinarily working as coal-hewer in a mine, was suffocated by gas, while engaged, as one of an exploring party, in locating the origin of the gas.

[46] *Sleeman* v. *Barrett* (1864) 2 Hurlst. & C. 934, 33 L. J. Exch. N. S. 153, 10 Jur. N. S. 476, 9 L. T. N. S. 834, 12 Week. Rep. 411, where it was held that the word did not include "butty colliers," i. e., men working in partnership, who contract for digging coal by the day, the ton, or the piece, according to the nature of the work, and employing others to assist them, for whose wages they are responsible.

See, however, *Bowers* v. *Lovekin* (1856) 25 L. J. Q. B. N. S. 371, 6 El. & Bl. 584, 2 Jur. N. S. 1187, cited in note 52, *infra*.

A person who contracts to weave certain pieces of silk goods for another at certain prices is not an "artificer or handicraft-man" or "other person" within Geo. IV., chap. 34, § 3. *Hardy* v. *Ryle* (1829) 9 Barn. & C. 603, 4 Mann. & R. 295, 7 L. J. M. C. 118.

[47] *Riley* v. *Warden* (1848) 2 Exch. 59, 18 L. J. Exch. N. S. 120; *Ingram* v. *Barnes* (1857) 7 El. & Bl. 115, 26 L. J. Q. B. N. S. 82, 3 Jur. N. S. 156. In both these cases the plaintiff was denied to be a "laborer" within the meaning of the truck acts.

priate criterion for determining whether he was entitled to the benefits or subject to the burdens of statutes regulating the contract of employment.[48]

If the agreement is essentially one for personal services, the employee is not removed into the category of "independent contractors" by the fact that he was left free to employ assistants and did employ them;[49] nor by the fact that he was to be paid by the piece,[50] or with

[48] In *Riley* v. *Warden* (1848) 2 Exch. 59, 18 L. J. Exch. N. S. 120, Parke, B., laid it down that a "labourer," within the meaning of the truck acts, is one who has entered into a contract to give his personal services and to receive payment in wages. See also to the same effect, *Weaver* v. *Floyd* (1852) 21 L. J. Q. B. N. S. 151, 16 Jur. 280; *Sharman* v. *Sanders* (1853) 13 C. B. 166, 22 L. J. C. P. N. S. 86, 3 Car. & K. 298, 17 Jur. N. S. 765.

Under these acts a laboring man who enters into a contract to make as many bricks as the contractee requires, such contractee supplying the materials and paying so much a thousand for the finished bricks, is not a workman, since there is no contract binding him to do the work personally. *Stuart* v. *Evans* (1883) 49 L. T. N. S. 138, 31 Week. Rep. 706.

In the employers' liability act of New South Wales, the intention of the legislature is indicated with more precision than in the English and Canadian statutes, as its provisions are expressly declared to be applicable to "those who enter into a contract of service or a contract personally to execute any work or labor." It has been held that a contract, to fall within this description, must be a contract to serve personally or to serve for some period, or to do some particular work, and that no action can be maintained by a man who, being the owner of two carts, went, when it suited him, to the brick-kiln of the defendant and conveyed bricks to different places on the defendant's premises, not being bound to do the work, but being entitled to receive a specified sum of money if he thought fit to do it. *Lobb* v. *Amos* (1886) 7 New South Wales L. R. (L.) 92.

See also *McElroy* v. *Australian Forge & Engineering Co.* (1899) 24 Vict. L. Rep. 353, where it was laid down that the employers and employees act of Victoria is not applicable to persons entering into a contract which can be performed by deputy.

[49] *Weaver* v. *Floyd* (1852) 21 L. J. Q. B. N. S. 151, 16 Jur. 280 (workman held to be "artificer"); *Bowers* v. *Loveless* (1856) 25 L. J. Q. B. N. S. 371, 6 El. & Bl. 584, 2 Jur. N. S. 1187 (see next note); *Lowther* v. *Radnor* (1806) 8 East, 113 (see next note); *Whitehead* v. *Armitage* (1861) 13 Week. Rep. 141; *Pillar* v. *Llanvi Coal & I. Co.* (1866) 35 L. J. C. P. N. S. 291, L. R. 4 C. P. 752, 20 L. T. N. S. 923, 17 Week. Rep. 112.

Iron riveters paid at a fixed price per ton, with liberty to employ other workmen of inferior skill to themselves, have been held to be "handicraftsmen" within the Stat. 4 Geo. IV., chap. 34, § 3. *Lawrence* v. *Todd* (1863) 32 L. J. M. C. N. S. 238, 14 C. B. N. S. 551, 10 Jur. N. S. 178, 8 L. T. N. S. 505, 11 Week. Rep. 835 (convicted for absence from work).

[50] In *Bowers* v. *Loveless* (1856) 25 L. J. Q. B. N. S. 371, 6 El. & Bl. 584, 2 Jur. N. S. 1187, "butty-men" were held to be entitled to the benefits of the truck acts. The evidence was that they bound themselves to do the work personally. Contrast *Sherman* v. *Barrett* (1864) 2 Hurlst. & C. 931, 33 L. J. Exch. N. S. 153, 10 Jur. N. S. 476, 9 L. T. N. S. 834, 12 Week. Rep. 411, cited in note 47, *supra*.

So also a working tailor engaged to make clothes, each garment to be paid for according to a price list, has been held to be an artificer within the masters and servants act, 4 Geo. IV. chap. 34, § 3. *Ex parte Gordon* (1855) 25 L. J. M. C. N. S. 12, 1 Jur. N. S. 983 (convicted for failure to finish a piece of work which he had begun).

One who digs a well at so much a rood has been held to be a "labourer" within the meaning of 2 Geo. II., chap. 19. *Lowther* v. *Radnor* (1806) 8 East 113.

See also *Lawrence* v. *Todd* (1863) 32 L. J. M. C. N. S. 238, 14 C. B. N. S. 551, 10 Jur. N. S. 178, 8 L. T. N. S. 505, 11 Week. Rep. 835, cited in last note.

reference to the amount of the sales of the article which he was manufacturing.[51]

The phrase in the employers and workmen act which is now under discussion cannot be construed as giving the servants of an independent contractor a right of action for personal injuries against the principal employer.[52]

724. Seamen.—Seamen were expressly excepted from the scope of the employers and workmen act of 1875. This provision, though repealed for other purposes by the merchant seamen act of 1880, was, for the purposes of definition, kept alive by section 11 of that act. Seamen are therefore still excluded in England from the advantages of the employers' liability act.[1]

If a plaintiff relies upon the theory that his functions were partly those of a seaman and partly what may be called nonmaritime, he

[51] A stuff presser or stuff finisher of Italian goods, working at weekly wages and a commission, besides superintending other servants, was held liable, as an "artificer," for an unlawful breach of contract under Stat. Geo. IV., chap. 31, § 3. *Whitehead* v. *Armitage* (1861) 13 Week. Rep. 114.

[52] One E. entered into a contract with the owners of a colliery to sink a shaft in their coal mine. By the contract, E. (who was therein called the "contractor") was to provide such sinkers, etc., as might be necessary for the execution of the work, and was to be paid a certain sum per fathom sunk. E. employed and paid the sinkers, he himself acting as "chargeman" in charge of the sinking operations. One of the sinkers, while engaged upon the work, was killed by a block of wood falling upon him. Held, that E. was an independent contractor, and that the deceased was not a "workman" who had "entered into or worked under a contract" with the colliery owners as his employers. Held, also, that the control given by the coal mines regulation act 1887, and by the special rules of the mine, to the manager over all persons in the mine, did not make E. and the sinkers employed by him "workmen" in the employment of the colliery owners. *Marrow* v. *Flinshy & B. M. Coal & Fire Brick Co.* [1898; C. A.] 2 Q. B. 588, 67 L. J. Q. B. N. S. 976.

The owners of a colliery entered into an agreement with a contractor by which the latter contracted to sink and wall a shaft in the colliery. One of the men employed upon the work by the contractor and paid by him was fatally injured by an explosion of gas in the mine. The deceased had, in common with all the men employed by the contractor, signed the "record book" kept by the colliery owners, by which, in consideration of being employed at the mine, he became bound to observe the regulations and conditions laid down for the safety of the mine and for the guidance of the persons employed there. Held, that the signature of the conditions by the deceased did not create a contract of service between himself and the colliery owners; that the deceased was therefore not a "workman" who had "entered into or worked under a contract" with the colliery owners as his employers. *Fitzpatrick* v. *Evans* [1901] 1 K. B. 756. Affirmed in [1902; C. A.] 1 K. B. 505.

[1] A bill introduced in 1893 to repeal the act of 1880, and, *inter alia*, to give seamen the benefit of the substituted enactment, failed to pass into law. See Kay, Shipmasters & Seamen, 2d ed. § 866.

In New South Wales it has been held that the phrase "otherwise engaged in manual labor" must be construed as being applicable only to persons *ejusdem generis* with those specifically mentioned, and that it only embraces persons working on land. *Hanson* v. *Australasian Steam Nav. Co.* (1881) 5 New So. Wales L. R. (L.) 117. But by the act of 56 Vict. No. 6, seamen are now entitled to sue under the statute.

cannot recover unless he proves expressly and distinctly that he actually had an employment separate from that of a seaman.[2]

The word "seaman" applies only to the crews of sea-going ships. An action will therefore lie for the death of the fireman of a canal boat who was drowned by its capsizing.[3] This rule has been altered to some extent by express enactment in some of the British colonies.

725. Servants working in government departments.— According to Mr. Beven (1 Neg. 873), the definition of "workman" in the employers and workmen act does not include Crown servants for the two reasons:

First, the rights of the Crown are not affected by any act in which the Crown is not specially named.[1]

Secondly, the Crown is not liable for torts committed by its servants.[2] This rule, as it would seem, still prevails in most of the British colonies; but it has been abrogated wholly or partially in some of them.[3]

K. Damages recoverable.

726. Damages recoverable where the injured servant is himself the plaintiff.—The provisions specifying the amount recoverable by an injured servant do not give a measure of damages, but merely fix a limit beyond which the jury cannot award compensation.[1] Within that limit the measure of damages is left to be determined upon the ordinary principles which regulate the assessment of the indemnity in actions for personal injuries.

[1] *Hanrahan* v. *Limerick S. S. Co.* (1886) Ir. L. R. 18 C. L. 135 (holding, on the ground that there was no such proof furnished, that a mate of a steamer could not recover for injuries received while he was superintending the loading of a cargo).

[2] *Oakes* v. *Monkland Iron Co.* (1884) 11 Sc. Sess. Cas. 4th series, 579.

[2] *Sutton* v. *Johnstone* (1787) 1 T. R. 493; *Byron* v. *Denman* (1848) 2 Exch. 167; *Raleigh* v. *Goschen* [1898] 1 Ch. 73, 67 L. J. Ch. N. S. 59, 77 L. T. N. S. 429, 46 Week. Rep. 90.

[3] The New Zealand employers' liability act is expressly made applicable to Crown servants.

In Canada by virtue of the Dominion act (50 & 51 Vict. ch. 16) employees engaged on any "public work" can recover for the negligence of any officer or servant of the Crown if the circumstances were such that he could have recovered in an action against a private employer. *Queen* v. *Filion* (1895) 24 Can. S. C. 482. Following *Quebec* v. *Queen* (1894) 24 Can. S. C. 420, where it was laid down that the effect of the Dominion statute (50 & 51 Vict. chap. 16, § 16, par. (c)) was to confer upon the exchequer court, in all cases of claim against the government, arising out of the death of or injury to any person through the negligence of its servants on any railway or other public work of the Dominion, the same jurisdiction as is exercised in like cases by the ordinary courts over public companies. Apparently, this statute operates so as to give a government servant a right to take advantage of any employers' liability act which may be in force in the Province where the injury was received, if he was engaged on a railway or other public work.

[1] *Borlick* v. *Head* (1885) 34 Week.

Under the English and some of the colonial acts the maximum amount which can be awarded is a variable quantity, dependent upon the earning capacity of the supposed injured person.[2] The American acts simply declare that the damages shall not exceed a certain sum.

A mixture of these two methods is adopted in the Ontario and British Columbia acts, the servant having the privilege of recovering either a fixed sum or one computed on the basis of earnings, whichever may be the larger. The precise amount recoverable within the limit thus fixed is determined (except in so far as it may be affected by the special provisions in some of the acts respecting deductions) with reference to the principles which regulate the measure of damages in all actions for personal injuries. An extended discussion of the subject would therefore be out of place in this article.

Where the plaintiff is entitled to damages at common law, as well as under the statute, the amount of the indemnity recoverable is not restricted to the sum fixed by that act.[3]

727. Damages recoverable by the personal representatives of an injured servant.— The various clauses in these statutes by which a right of action is given to the representatives of a deceased servant have been treated as an expression of the intention of the legislatures that the provisions of the damage acts and the decisions in which they have been construed are to be regarded as controlling upon the questions of the assessment of damages in cases where death results from the accident in suit.

In England the right of action given to relatives of a deceased person by the earlier act is not a right given to them *quâ* relatives to recover damages as a *solatium* for the distress which may be occasioned to them by the death; nor is it a right transmitted to them by the deceased, to recover damages for the loss or for the personal pain and suffering which he endured. It is a right given to the parties named

Rep. 102, 53 L. T. N. S. 909, 50 J. P. 327.

[2] The plaintiff is entitled to prove as damages loss of wages in respect both of his employment with the defendants, and also in respect of certain overtime labor under another employer, where the total amount which he can thus recover is less than the amount he might have been awarded in respect of his estimated earnings for three years in the defendant's service. *Borlick* v. *Head* (1885) 34 Week. Rep. 102, 53 L. T. N. S. 909, 50 J. P. 327, 2 Times L. R. 103.

An apprentice cannot, under this section, be awarded more than the sum to which his wages at the time of the accident would amount in three years. The damages cannot be augmented by construing the word "earnings" as including the computed value of the tuition he was receiving. That word means money or things capable of being turned into money by accurate estimation. *Noel* v. *Redruth Foundry Co.* [1896] 1 Q. B. 453, 65 L. J. Q. B. N. S. 330, 74 L. T. N. S. 196, 44 Week. Rep. 407, 12 Times L. R. 248.

[3] *O'Connor* v. *Hamilton Bridge Co.* (1894) 25 Ont. Rep. 12.

in the statute, to recover damages for the death of their relative, when and only when, the death has caused such parties a pecuniary loss and to the extent only of such pecuniary loss.[1]

The colonial acts are expressed in the same terms and therefore construed in the same manner as that of England.[2]

In Alabama, Colorado, and Indiana, the measure of damages is limited to the pecuniary injury sustained by the persons to whose benefit the recovery inures. Exemplary or vindictive damages cannot be recovered, nor can anything be allowed on account of the pain and suffering of the deceased, the grief and distress of his family, or the loss of his society.[3]

In Massachusetts the representatives of the deceased servant may recover damages for all the damage accruing to him before death, including his mental and physical sufferings.[4]

L. Trial practice.

728. Scope of subtitle.— In this subtitle it is proposed merely to collect, under appropriate headings, the cases in which various points of pleading and procedure have been determined in actions brought under the statutes. It would be out of place to attempt, in the present connection, to develop fully the general rules which these cases illustrate. For a more complete discussion of the subjects touched upon, the reader is referred to the various treatises on trial practice.[5] Other illustrative cases are collected in chapter XLV., *post*.

729. Within what period the action must be brought.— In all the acts reviewed in this chapter, except those of Alabama and [illegible] there are express provisions of which the effect is that the servant's right to maintain the statutory suit is conditional upon being instituted within a specified period.

It has been held with regard to the English act that the time limit is absolute, and that a servant's action is barred even where his excuse

See, generally, Sutherland, Damages, §§ 1263 *et seq.*; Shearm. & Redf. Neg. §§ 137, 466.

[4] See Shearm. & Redf. Neg. § 767*a*.

[5] So far as the English procedure is concerned, the works of Mr. Beven, Mr. Ruegg, and Messrs. Roberts & Wallace on employers' liability, will supply lawyers in other jurisdictions with all the information that they are likely to require.

tor not taking proceedings is that, between the time of giving notice of the injury and the expiration of the period within which the statute prescribes that the action must be brought, he was in a lunatic asylum, in consequence of the impairment of his faculties by the accident.[1] If this decision is good law it discloses a very shameful defect in the statute.

730. Service of summons; waiver of irregularity in.—An employee waives an irregularity in the service of the summons (in the case cited it was served several days too late) by appearing and cross-examining the plaintiff.[1]

731. Joinder of employer and negligent coemployee as parties defendant.— In an action brought under these statutes for an injury caused by the culpable act of any of the employees for whose negligence the employer is declared liable, that act obviously constitutes a breach both of a duty owed by the employer and of a duty owed by the employee himself. The injured person, therefore, may maintain an action against the employer and the delinquent employee jointly.[1]

732. Institution of distinct suits at common law and under these acts. —By the express terms of the English act (§ 6), a statutory action must, in the first instance, be commenced in a county court. But, as the common-law rights of a servant are not affected by the act, the institution of such an action will not debar him from bringing another action at common law, either in the county court or the high court. If actions are brought in different courts one will be stayed. If both are brought in a county court, they will be consolidated and tried together.[1]

733. Joinder of causes of action under the different provisions of these acts.— If the plaintiff intends to rely upon several distinct causes of action,—as, a breach of common-law duty, and the negligence of one or more of the persons for whom the employer is by these acts rendered responsible,—the facts must be alleged in separate counts.[1] A complaint is demurrable, if in one of the counts it sets forth two separate causes of action, one under each of two distinct provisions of one of these acts.[2] This rule, however, is subject to the qualification

[1] *Johnston* v. *Shaw* (1883) 21 Sc. L. R. 246.

[1] *Dunn* v. *Butler* (1885; Q. B. D.) 1 Times L. R. 476.

[1] *Charman* v. *Lake Erie & W. R. Co.* (1900) 105 Fed. 449 (removal of cause from the state to the Federal court was denied on this ground).

[2] *Clements* v. *Alabama G. S. R. Co.* (1899) 127 Ala. 166, 28 So. 643; *Highland Ave. & Belt R. Co.* v. *Dunseberry* (1891) 94 Ala. 413, 10 So. 274; *Rut*

that several distinct "defects" may be alleged in the same count,[3] and that, if the injury resulted from the concurrent operation of two or more of the particular kinds of negligence covered by separate subdivisions of the acts, there may be an averment to that effect in one count; the plaintiff then has the burden of establishing the several allegations of negligence.[4]

734. Joinder of causes of action under these acts and at common law — In England it has been customary to join common-law and statutory causes of action in the same suit, and in spite of one judicial intimation adverse to this rule of procedure, its propriety may, perhaps, be regarded as being now no longer open to controversy.[1]

In Scotland, also, this joinder is permitted.[2]

In Massachusetts the propriety of such a joinder has never, so far as the writer knows, been questioned, and a large number of cases might be cited in which the complainant has included counts setting forth claims both under the statute and at common law.[3] A similar remark is applicable to the Alabama course of practice.[4]

See also §§ 849, 850, *post*.

734a. Joinder of causes of action under these acts and other statutes — It has been held by the English court of appeal that the causes of action for the death of several employees in favor of their respective

[1] In *Munday* v. *Thames Ironworks & Shipbuilding Co.* (1882) L. R. 10 Q. B. Div. 59, 52 L. J. Q. B. N. S. 119, 47 L. T. N. S. 351, Manisty, J., expressed a doubt whether a statutory action instituted in a county court and removed to a superior court could be consolidated with one instituted, prior to the removal, in the superior court. But this *dictum* is inconsistent with the case of *Larbey* v. *Greenwood* (reported only in the Times newspaper, July 23, 1885), where the action in the county court was removed in order that a common-law claim might be added to it. Mr. Ruegg, who refers to this decision (Employer's Liability Act, p. 141, note), states that the same course has been followed in other cases. See also *Marrow* v. *Flimby & B. M. Coal & Fire Brick Co.* (1898) 2 Q. B. 588, 67 L. J. Q. B. N. S. 976, 79 L. T. N. S. 397, where there was both a common-law and a statutory claim, and no objection to this joinder was raised.

For the general rule as to the joinder of alternative causes of action under the judicature act, see *Bagot* v. *East* (1877) L. R. 7 Ch. Div. 1, 47 L. J. Ch. N. S. 225, 37 L. T. N. S. 369, 26 Week. Rep. 66.

[2] *Morrison* v. *Baird* (1882) 10 Sc. Sess. Cas. 4th series, 271; *Goudie* v. *Paul* (1894) 22 Sc. Sess. Cas. 4th series, 1; *Duthie* v. *Caledonia R. Co.* (1898) 35 Sc. L. R. 726; *Murray* v. *Cunningham* (1890) 17 Sc. Sess. Cas. 4th series, 815; *McColl* v. *Eadie* (1891) 18 Sc. Sess. Cas. 4th series, 507.

[3] It will be sufficient to mention, as examples, the following: *Demers* v. *Marshall* (1899) 172 Mass. 548, 52 N. E. 1066; *Ford* v. *Mt. Tom Sulphite Pulp Co.* (1899) 172 Mass. 544, 48 L. R. A. 96, 52 N. E. 1065; *Hall* v. *Wakefield & S. Street R. Co.* (1901) 178 Mass. 98, 59 N. E. 668; *Hughes* v. *Malden & M. Gaslight Co.* (1897) 168 Mass. 395, 47 N. E. 125.

[4] For examples of the joinder of common-law and statutory counts, see *Clements* v. *Alabama G. S. R. Co.* (1899)

relatives, under Lord Campbell's act and the employers' liability act, are several, and cannot be joined in one action.[1] But such a joinder is now permitted under order 3, rule 1a of the county court rules, which was added in consequence of this decision.

735. Election between different counts.— It has not yet been definitely determined in Massachusetts, whether, in a case where the liability of the defendant is stated in several counts, some under the statute and some at common law, the plaintiff can be compelled to elect upon which counts he will go to the jury.[1] But probably an election cannot be compelled when the counts are all under the statute.[2]

736. Former recovery in action under another statute or at common law.—A plaintiff to whom compensation has been awarded under the English act of 1897, reviewed in chapter XL., *post*, cannot recover damages for the same injury under the employers' liability act of 1880.[1]

A judgment in favor of a defendant railway company in an action under the employers' liability act is a bar to a subsequent action against it at common law for the same injury, but not to an action under a statute which declares such companies to be liable under certain specified circumstances.[2]

737. Complaint.— In this section it is proposed to consider merely the formal requisites of the complaint. Its sufficiency, in so far as that depends upon the correctness of the rule of substantive law which it embodies, has necessarily been determined as an incident of the discussion of the various doctrinal points investigated in preceding subtitles of this chapter.

Some of the decisions to be cited possibly apply a stricter standard of technical correctness than would be deemed necessary in a portion of the jurisdictions in which the more liberal of the modern systems of pleading have been adopted. But even to practitioners who have

[2] *Clare* v. *New York & N. E. R. Co.* (1898) 172 N. 211, 51 N. E. 1083.

to draw complaints with reference to those systems such decisions will afford some instruction and guidance.

a. Relation of employer and employed.—The relation of employer must exist, and must be set forth in the complaint, to enable the injured person to sue under these statutes.[1]

b. Necessity of alleging that negligence was committed by a statutory vice principal.—A complaint is demurrable unless the allegations show that the misconduct which is the basis of the claim was that of one of the particular employees for whose fault the employer is made responsible by the statutes.[2] A count which charges negligence, in the alternative, either to the master or his vice principal, must aver facts importing the master's liability both for his own and his vice principal's negligence.[3]

c. [illegible] and by such a vice principal while acting in the line of his

[1] *Nicholson* v. *MacAndrew* (1888) 15 Sc. Sess. Cas. 4th series, 854; *Sweeney* v. *Duncan* (1892) 19 Sc. Sess. Cas. 4th series, 870; *Coughlin* v. *Boston Tow-Boat Co.* (1890) 151 Mass. 92, 23 N. E. 721. In the last-cited case the court held that, upon a general demurrer not pointing out any specific defect, a complaint was good which alleged that the defendant was the owner of and had the management and control of a certain vessel on a certain day, that the plaintiff was then and there at work on said vessel as a laborer, shoveling coal and discharging the cargo, and that he was then and there in the employ of one W., a stevedore then doing the work of discharging the said cargo of said vessel.

[2] A count in an action for injuries caused by "defects" is bad, unless it contains an allegation of negligence either in the employer or someone intrusted, etc. *Davies* v. *Dyer* (1890) 11 New So. Wales L. R. (L.) 431.

Averments that a person named was in the employment of the defendant, that he had superintendence intrusted to him, that he was negligent while in the exercise of such superintendence, and that he was the defendant's superintendent,—clearly show that the superintendence which he had was intrusted to him by the defendant. *Bessemer Land & Improv Co.* v. *Campbell* (1898) 121 Ala. 50, 77 Am. St. Rep. 17, 25 So. 793.

In one Scotch case it was laid down that the complaint in an action for injuries caused by the negligence of an employee exercising superintendence must contain a distinct averment showing the duties discharged by the superior servant, and that he was not ordinarily engaged in manual labor. *Hood* v. *Ross* (1890) 17 Sc. Sess. Cas. 4th series, 796. But in a later one it was held that a complaint is not demurrable which shows that the negligent servant managed the defendant's estates while he was absent, although it does not aver in terms that he was not ordinarily engaged in manual labor. *Wood* v. *Price* (1893) 20 Sc. Sess. Cas. 4th series, 381.

Allegations that the injury occurred on the defendant's road on which it was at the time operating hand cars, and on one of defendant's hand cars, on which intestate, as an employee of defendant, was at the time engaged in the duties of his employment, and that one H. was the foreman in charge of said car, are sufficient to show that H. was at the time the foreman of the defendant. *Highland Ave. & Belt R. Co.* v. *Dasenberry* (1893) 98 Ala. 210, 13 So. 308.

A complaint alleging facts which show that the cause of the injury was the negligence of a fellow servant in respect to the details of the work is demurrable. *Ashley* v. *Hart* (1888) 147 Mass. 578, 1 L. R. A. 385, 18 N. E. 416.

For this reason a complaint by a section hand for injuries caused by being struck by a hand car, "being operated recklessly, wantonly, and with gross negligence by defendant or its agent at that time," is bad. *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969. See also note 5, *infra*.

[3] *Louisville & N. R. Co.* v. *Boulden* (1895) 110 Ala. 185, 20 So. 325.

duty.—A specific allegation that a statutory vice principal was in the discharge of the duties imposed upon him by his employment, when the injury was inflicted, is not necessary.[4]

d. Sufficiency of the allegation of negligence. As regards the sufficiency of the complaint in respect to its statement of the breach of duty relied upon as a cause of action, the general rule is that it is good against a demurrer, when, and only when, it follows, either literally or substantially, the words of the particular provision with reference to which the allegations were framed.[5]

[4] This rule was laid down in a case where the court relied upon the consideration that an engineer who is in the employment of a railway company, and in charge of an engine which is at the time running upon the company's tracks, is prima facie in the discharge of his duties as engineer. *Woodward Iron Co.* v. *Herndon* (1896) 114 Ala. 191, 21 So. 430.

A complaint is good, where it states that the engineer, while in the service of the company, in charge of a locomotive, negligently injured the plaintiff, at a time when both were acting in the line of duty as employees of the company. *Pittsburgh, C. C. & St. L. R. Co.* v. *Montgomery* (1898) 152 Ind. 1, 71 Am. St. Rep. 301, 49 N. E. 582.

Injury caused by "defects in the ways," etc.—A complaint which states generally the facts, and alleges that they constitute a defect in the ways, etc., is not demurrable. *Louisville & N. R. Co.* v. *Pearson* (1893) 97 Ala. 211, 12 So. 176; *Willey* v. *Boston Electric Light Co.* (1897) 168 Mass. 10, 37 L. R. A. 723, 46 N. E. 395.

A complaint which alleges that the injury was caused by "defects, etc.," and concludes with "viz., the said hand car was out of plumb," and "was so improperly adjusted that it was likely to jump or be thrown from the track," has been held sufficiently specific, as against a demurrer, in its description of the defects. *Southern R. Co.* v. *Guyton* (1898) 122 Ala. 231, 25 So. 34.

It is not necessary to state the nature of the duties discharged by the person intrusted with the duty of seeing that the ways, etc., were in good condition. *Louisville & N. R. Co.* v. *Orr* (1891) 91 Ala. 602, 10 So. 167.

A complaint in an action to recover for an injury caused by defects in the ways, works, machinery, or plant of the defendant is demurrable, where it does not indicate by name or identify in some other way the appliance or appliances on the defective quality of which the plaintiff relies. *Louisville & N. R. Co.* v. *Jones* (1900) 130 Ala. 456, 30 So. 586. Or where the defect to which the alleged injury was due is not specified. *Whatley* v. *Zonida Coal Co.* (1898) 122 Ala. 118, 26 So. 124.

In *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145, it was held that an averment that "defendant negligently used in its business a steam engine or locomotive which was out of order, so that it could not be stopped promptly," could not be regarded as equivalent of the statutory language. The court said: "The engine may have been negligently used in the business, and yet the defect complained of not have arisen from, or been discovered and remedied owing to, the negligence of defendant, or of some person intrusted with the duty of seeing that the works and machinery were in proper condition. The adverb 'negligently,' as employed in the count, qualifies the manner in which the engine was used, and, fairly construed, does not relate to the origin of the defect, or to the failure to discover and remedy it; and even when taken in connection with the subsequent averment that plaintiff was injured on account of 'the negligently defective condition of the engine' is not the equivalent of an averment that the defect arose from, or was not discovered and remedied owing to, the negligence of defendant, or of any person in its employment."

To the same effect see *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969, where a complaint for injuries caused by being struck by a hand car which was not "properly fixed so as to control it," was held demurrable for the omission of the same allegation.

A declaration which first sets forth the manner in which the accident occurred, and then alleges that the "de

It is error to sustain a demurrer to a complaint the averments of which substantially follow the language of the statute, but it is error

fendant corporation by its servants and agents was negligent, and was guilty of a breach of duty towards the plaintiff," does not allege any defect. *Darvin* v. *Kitson Mach. Co.* (1893) 159 Mass. 17, 34 N. E. 89.

It has been held that a count of the complaint which alleges that there was a defect in the condition of the ways, works, machinery, or plant connected with or used in the business of the defendant, in that the "appliances used by defendant in or about attempting to get said car upon said rails were not proper and sufficient for that purpose," is subject to demurrer. *Louisville & N. R. Co.* v. *Jones* (1900) 130 Ala. 456, 30 So. 586. The court took the position that, in order to escape condemnation by such an averment, the defendant would have to show that the things used were not only proper, but sufficient, to effect the purpose. But if they are proper to use as an auxiliary, the mere fact that they are insufficient to accomplish the whole undertaking does not show that they ought not to be used. Supposing there was such insufficiency, —it might imply negligence in the superintendent of the work,—but it did not charge the employer with negligence in furnishing the appliances.

The complaint should state that the "defect arose from, or had not been remedied owing to, the negligence of the employer, etc." *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145; *Seaboard Mfg. Co.* v. *Woodson* (1891) 94 Ala. 143, 10 So. 87; *Birmingham R. & Electric Co.* v. *Baylor* (1895) 101 Ala. 488, 13 So. 793.

In one Alabama case it was held to be unnecessary to allege that a reasonable time within which to remedy the defect had elapsed when the accident occurred. *Conrad* v. *Gray* (1895) 109 Ala. 130, 19 So. 398. This ruling seems to be essentially inconsistent with an earlier decision, in which a complaint was held to be demurrable which merely alleges that the defect "was known to the superior officers of plaintiff and known to defendant." It is consistent with such an allegation that the defect may have become known so short a time before the accident that there was no opportunity to remedy it. *Seaboard Mfg. Co.* v. *Woodson* (1891) 94 Ala. 143, 10 So. 87.

In an action under the Alabama [illegible] the complaint alleged that the [illegible] and company failed to provide [illegible] pliances, and also that it omitted to keep them in repair, and the last clause was followed by the words "and knowingly allowed the same to remain out of repair." The court held that the word "knowingly" should be construed as applying only to the failure of the defendant to keep the appliances in repair, and that, as the allegation of failure to provide appliances rendered the complaint sufficient, and thus raised the question of the defendant's knowledge, it could be objected, on a verdict for the plaintiff, that, having unnecessarily alleged knowledge, he was bound to prove it. *Louisville & N. R. Co.* v. *Coulton* (1888) 86 Ala. 129, 5 So. 458. The argument here seems to [illegible] body a [illegible] of the *onus* of proof which [illegible] ry to the weight of authority, as indicated in § 674, subd. a, *supra*, as well as to the manifest sense of the phrase now under discussion.

Negligence of person intrusted with superintendence.—A general averment of the negligence of the person intrusted with superintendence is enough. An averment of specific negligence is not requisite. Thus, a complaint in an action for negligently causing the death of an employee in a mine, alleging that defendant's superintendent negligently failed to take due and proper precautions to prevent a fire which had started in the mine from causing the suffocation or asphyxiation and death of plaintiff's intestate,—sufficiently alleges the negligence of the superintendent. *Bessemer Land & Improv. Co.* v. *Campbell* (1898) 121 Ala. 50, 77 Am. St. [illegible] 25 So. 793.

A count in the complaint of a minor employee which avers that his employment was of a dangerous nature; that he was young and inexperienced, and mentally and physically immature; that these facts were well known to defendant's foreman who had control of the work in which plaintiff was employed, and of the car upon which plaintiff was riding in the discharge of his duties at the time of the injury complained of; and that defendant negligently failed, by itself, its said foreman, or anyone else, to give plaintiff any warning of the danger of his employment, or to instruct

without prejudice, if an amendment which specifies the particular facts relied upon as being indicative of negligence, but imposes no

him as to the safest method of discharging his duties,—states a good cause of action, when it is further averred that such negligence resulted in the injury of the plaintiff. *Alabama Mineral R. Co.* v. *Harcus* (1900) 128 Ala. 355, 30 So. 679.

A count in a complaint alleging that the defendant's superintendent, knowing that to give slack to the rope to which a certain bar of iron was attached would probably cause said bar to strike upon or against a scaffold on which the plaintiff's intestate was standing and cause the same to swing or oscillate, negligently ordered the persons in charge of the pulley by which said bar of iron was being hoisted to give slack to the rope, which they did, and because thereof said bar was thrown or struck against said scaffold, causing the same to swing, and by reason thereof caused plaintiff's intestate to fall off the scaffold to the ground, inflicting the injuries complained of, is sufficient and demurrable, since it is not averred therein that the order given was unnecessary, or that a reasonable and probable result of the swinging of the scaffold was to throw the deceased off, or that the superintendent had any knowledge that such would be the probable or reasonable result of the giving of said order. *Decatur Car Wheel & Mfg. Co.* v. *Mehaffey* (1900) 128 Ala. 242, 29 So. 646. In this case it was also held that where, in addition to the averments just set forth, it is also averred that the superintendent, well knowing at the time that the slacking of the rope would cause the iron to hit against the scaffold, and cause it to move and swing, and "thereby have a tendency to throw the plaintiff's intestate off of said scaffold," and thus endanger him, as there was no other person on the scaffold to assist in receiving the iron, etc., gave an order, and by reason thereof the iron struck the scaffold, causing it to swing, and the plaintiff to fall off, said count sufficiently states a cause of action.

In *Kansas City, M. & B. R. Co.* v. *Burton* (1893) 97 Ala. 240, 12 So. 88, the principle that the "superintendence" contemplated by these acts is that which is exercised over men, not over inanimate appliances (see § 683, *ante*), was held not to involve the consequence that a complaint was bad in which the allegation was, substantially, that some inorganic appliance was left, by the orders of a superior employee, in such a position as to endanger unduly servants engaged in the work assigned to the injured person. There an action was brought for an injury caused by a railway car which was left too close to the track adjacent to that on which it stood. The court said: "The superintendence averred has relation to more than the track of the defendant, and the car left dangerously close thereto. The averment is that the yard master, by whom we understand to be intended a person charged with the control of the tracks and cars in the yard of a railroad, was intrusted with superintendence in the placing and position of cars in the yard, and hence, necessarily and obviously the performance of his duties involved the movement of cars and, in consequence, the control and direction of men and appliances necessary to such movement as was requisite to place the cars in safe and proper positions. The essence of the averment, therefore, is that the yard master had intrusted to him superintendence of the men and appliances used in the placing of this particular car, and that whilst in the exercise of that superintendence, he negligently permitted and suffered the car to be placed so near to an adjacent track, with a passing train on which plaintiff was discharging his duties as switchman, as that it collided with the person of the plaintiff, and produced the injuries complained of."

For other examples of complaints in which negligence was affirmed or denied to be predicable as to the acts of superintendent, see also *Moore* v. *Gimson* (1890) 17 Sc. Sess. Cas. 4th series, 796 (§ 686, note 1, *supra*); *Highland Ave. & Belt R. Co.* v. *Dusenberry* (1893) 98 Ala. 239, 13 So. 308 (§ 687, note 2, *supra*).

Injury caused by negligence of person to whose orders the servant was bound to conform.—A complaint is sufficient to take the case to the jury, when it alleges in substance that the injury was caused by the negligence of the defendants, or of their foreman, specially averred to be a person to whose orders the injured servant was bound to conform, in causing such servant to work in a drain from 7 to 10 feet in depth, without sufficiently propping the sides, the result being that the sides collapsed

additional burden on the plaintiff, is filed, and a demurrer to it over ruled.[6]

A complaint alleging injuries from a defective system is sufficiently specific without a distinct averment to show how and in what manner this system was directly authorized by the defendant.[7]

In a treatise of high authority it is said to be necessary, under the English rules of practice, that, in every case, except where the negligence relied on is the employer's personal negligence alone, the particu-

and fell upon him. *M'Coll* v. *Eadie* (1891) 18 Sc. Sess. Cas. 4th series, 597.

A count in a complaint, which avers that plaintiff received the injury, while in the discharge of his duties as an employee of defendant, by reason of the negligence of the defendant's section boss, who ordered or permitted the car from which the plaintiff fell or was thrown, and by which plaintiff was run over, to be run at a dangerous and reckless rate of speed, thereby producing the injuries complained of, states a good cause of action. *Alabama Mineral R. Co.* v. *Marcus* (1900) 128 Ala. 355, 30 So. 679.

It is not necessary to specify the nature of the duties discharged by the person to whose orders the plaintiff was bound to conform. *Louisville & N. R. Co.* v. *Orr* (1891) 94 Ala. 602, 10 So. 167.

Nor is it necessary to state in what particulars respects the order given was negligent. *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145.

A complaint which does not show that the plaintiff was bound to conform to the order in question, that the injury resulted from his having so conformed, and that the order was negligent, is demurrable. *Postal Telg. Cable Co.* v. *Pulsey* (1896) 115 Ala. 193, 22 So. 854.

Injury caused by obedience to rules, etc.—A count framed under the provision as to injuries caused by obedience to rules is bad unless it contains an allegation that the injury resulted from some impropriety or defect in the rules, etc. *Davies* v. *Dyer* (1890) 11 New So. Wales L. R. (L.) 431.

Injuries caused by negligence of various railway employees.—An averment in a count of a complaint in an action by a brakeman against a railroad company, that he was shaken or jolted from the car and his injuries were caused by the negligence of the engineer in allowing his car and engine to be suddenly and violently shocked, is a sufficient allegation of negligence. *Highland Ave. & Belt R. Co.* v. *Miller* (1898) 120 Ala. 535, 24 So. 955. In the same case it was held that the complaint in such an action need not aver that the shock or jerk which caused him to fall from the car was of more than usual violence or greater than was ordinarily incident to the starting and movement of cars, where in the first count it is charged to have been caused by reason of a defect in the engine, and in the third count by the negligence of the engineer.

In an action to recover for the negligence of a person "in charge of an engine," it has been held sufficient to aver that the injuries were inflicted "by reason of defendants' negligence," the position being taken that for the purpose of pleading, there is no distinction between the "negligence of a railway company" and the negligence of an "engineer." *Indianapolis Union R. Co.* v. *Houlihan* (1901) 157 Ind. 494, 54 L. R. A. 787, 60 N. E. 943.

A count in a complaint, which avers that the injury was received while the plaintiff's intestate was rightfully in discharge of the duties of his employment by the negligence of a fellow servant in charge of an engine, which was so carelessly handled as to produce the injury, is sufficiently certain and definite, and states a good cause of action. *Louisville & N. R. Co.* v. *York* (1900) 128 Ala. 305, 30 So. 676.

A complaint in an action to recover for an injury alleged to be due to the negligence of an employee in "charge of a car . . . upon a railway" is bad, if it fails to aver that such employee was in charge of the car in question, and that it was on a railway. *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969.

[6] *Laughran* v. *Brewer* (1896) 113 Ala. 509, 21 So. 415.

[7] *Henderson* v. *Watson* (1892) 19 Sc. Sess. Cas. 4th series, 954.

ulars of the claim should give both the name and the description of the persons in the employer's service who are alleged to have been negligent.[8] The decisions as to this point in Alabama are curiously inconsistent.[9] In Massachusetts the name of a negligent superintendent is immaterial.[10]

e. Notice of injury. In any jurisdiction where the giving of notice of the injury is made a condition precedent to the plaintiff's right to sue under one of these statutes (see § 708, *supra*) a complaint is demurrable, unless it alleges that notice of the injury was given.[11] It is sufficient to allege that the plaintiff "duly" gave notice.[12]

f. Necessity of alleging absence of contributory negligence.—See § 858, *post*.

[8] Ruegg, Employers' Liability Act, p. 122. In the appendix of this work, the learned author gives a number of forms of particulars of demand which have been actually used in statutory suits.

[9] In one case it was held that a complaint is not demurrable for the reason that it does not designate the name or position of the person intrusted with the duty of seeing that the ways, etc., are in proper condition. *McNamara* v. *Logan* (1893) 100 Ala. 187, 14 So. 175. Defendant's counsel cited *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145, where it was suggested, *arguendo*, but not expressly determined, that good pleading required "the name of the person to whose orders the employee was bound to conform, to be stated, so as to give the defendant notice thereof, and present an issuable fact whether such person was in the service or employment of defendant, or whether plaintiff was bound to conform to his orders. This case was distinguished by the court on the ground that, even supposing that the suggestion embodied the proper rule as to pleading under the subsection dealt with, *viz.*, that relating to conformity to orders, it did not follow that the same strictness should be required in a declaration alleging an injury from defects.

But in a later case, it was laid down, on the authority of the very decision so distinguished, that the name of the person "intrusted with the duty, etc.," must be averred, or the plaintiff must allege that he was ignorant thereof. *Louisville & N. R. Co.* v. *Bouldin* (1895) 110 Ala. 185, 20 So. 325. To the same effect is *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969. The ruling in *McNamara* v. *Logan* (1893) 100 Ala. 187, 14 So. 175, *supra*, was, strangely enough, not referred to in either of these later cases.

The conflict of authorities is rendered still more perplexing by another decision, which overrules *Louisville & N. R. Co.* v. *Bouldin* (1895) 110 Ala. 185, 20 So. 325, and lays it down that the name of the person intrusted with superintendence must be averred. *Woodward Iron Co.* v. *Herndon* (1896) 114 Ala. 191, 21 So. 430.

In other cases, moreover, it is laid down that the name of a negligent employee having "charge or control" of a train, etc., must be alleged, or it must be stated that such name was unknown to the plaintiff. *Southern R. Co.* v. *Cunningham* (1895) 112 Ala. 498, 20 So. 630; *Central R. Co.* v. *Lamb* (1899) 124 Ala. 172, 26 So. 969.

The upshot of these rulings, therefore, is simply the establishment of the extremely technical and arbitrary distinction, that if the negligent employee belongs to one of two particular classes of statutory vice principals, his name must be averred, while, if he belongs to the other of those classes, such an averment is unnecessary.

A railroad employee cannot recover from the company, under a count of the complaint alleging that the name of the person guilty of the alleged negligence was unknown to him, where such allegation is disproved by the undisputed evidence. *Alabama G. S. R. Co.* v. *Davis* (1898) 119 Ala. 572, 24 So. 862.

[10] *Woodbury* v. *Post* (1893) 158 Mass. 140, 33 N. E. 86.

[11] *Dick* v. *Boston & A. R. Co.* (1881) 131 Mass. 516.

[12] *Stoffe* v. *Old Colony R. Co.* (1892) 156 Mass. 262, 30 N. E. 1137.

738. Sufficiency of the plea.— A plea stating that, if there was fault, it was that of a fellow servant, has been held sufficiently specific to go to trial upon.[1]

A plea which avers that the plaintiff "knew, or by the use of ordinary care could have known, of said defect" has been held demurrable for the reason that these statutes provide that the employer shall not be liable when the servant knows —not when he might or should have known— of the defect, and fails to give information thereof.[2]

739. Instructions to jury.— To ask a jury in general words whether there was any defect by reason of which the accident happened, or any negligence on the part of an employee having superintendence, is not a proper way of submitting the case to them.[1]

If one charge is first given at the request of the plaintiff, and then another is given at the request of the defendant, eliminating from the case the count of the complaint on which the first charge is based, the most that can be said of the first charge is that it was abstract — an infirmity not demanding a reversal.[2]

740. Provinces of court and jury.— (See generally § 865, *post*) Whether the acts of omission or commission covered by the various sections of these statutes show an absence of due care is a question for the jury, whenever the evidence is such that reasonable men may differ as to the proper inference to be drawn from it.[1] A verdict for the plaintiff, therefore, should not be set aside where there was any evidence to support the cause of action alleged.[2] But an examination of the facts in the cases decided under the statutes shows that they have exercised with considerable freedom their power of controlling the action of juries.

The question whether the material substances constituting the instrumentality which was the immediate cause of the injury were among those covered by the statutes is also one for the jury, where the proper inference from the facts is a matter of doubt, or the facts themselves are a subject of controversy.[3] But a court is almost always warranted in reviewing a verdict for the plaintiff which involves the determination of this question, for the elements of uncertainty

[3] *Prendible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675

which render the finding of a jury conclusive are seldom present. See cases cited *supra* in §§ 668-670, 676.

It is also for the jury in the first instance to say whether the negligent employee was a superintendent (see §§ 680 682, *supra*), or a person to whose orders the plaintiff was bound to conform (see § 691, *supra*), or a person delegated with the authority of the employer to make rules or to give particular instructions (see § 701, *supra*), or a person in charge of one of the various appliances specified in the provision relating to negligence in the operation of railways (see §§ 703 707, *supra*). But in this connection again the control of the jury over the result is often merely nominal.

As to the functions of court and jury in determining whether inaccuracies in the notice were prejudicial to the defendant, see § 712, *supra*.

741. Removal of actions to higher courts.— To induce a judge of the English supreme court to grant a writ of certiorari to remove an action from the county court, something more is necessary than an affidavit which merely alleges in substance that the sufficiency of the notice, and other questions upon which the liability of the defendant depends, are of considerable complexity and legal difficulty. Special circumstances such as are not likely to arise in cases of this type, but which may arise in exceptional instances, must be averred in order to justify a removal. Under any other doctrine the intention of the legislature that the county court should be the regular tribunal for the trial of these actions might be frustrated in the great majority of cases.[1]

As to the power of removal generally under the judicature acts and its amendments, and the county court acts, see Rnegg, Employers' Liability Act, pp. 138 *et seq.*

741a. Appointment of assessors.— Notwithstanding that the English act merely provides that assessors may be appointed "for the purpose of ascertaining the amount of compensation," Mr. Rnegg (Employ-

[1] *Munday* v. *Thames Iron-works & Shipping Co.* (1882) 47 L. T. N. S. 351, L. R. 10 Q. B. Div. 59, 52 L. J. Q. B. N. S. 119. See also *M'Evoy* v. *Waterford S. S. Co.* (1885) Ir. L. R. 16 C. L. 291.

In *Queen* v. *London Court Judge* (1885; C. A.) L. R. 14 Q. B. Div. 905, 54 L. J. Q. B. N. S. 330, 52 L. T. N. S. 537, 33 Week. Rep. 700. Affirming (1884) L. R. 12 Q. B. Div. 818, 54 L. J. Q. B. N. S. 301, 33 Week. Rep. 521, 49 J. P. 407, it was held that § 39 of the county courts act 1856, providing for a stay of the proceedings on certain conditions, was intended to apply to actions which could be brought either in one of the superior courts or a county court, and was therefore not applicable to an action brought under the employers' liability act, since by § 6 of that act the action must be brought in the county court.

ers' Liability Act, p. 127) thinks that it was really intended that the assessors should serve the same purpose as assessors in county court actions generally; that is to say, they are to give such advice and assistance as persons of skill and experience in the matter to which the action or matter relates are qualified to give. If this conjecture is well-founded the same construction would be placed on the similar language of the Canadian and Australian acts. But so far as judicial authority goes, the point is apparently still an open one.

742. Questions which may be reviewed on appeal.— In England an appeal from a county court to the high court is only allowed on questions of law. See Rnegg. Employers' Liability Act, p. 117. It is a condition precedent to the right of appeal that the question on which it is desired to appeal should have been raised before the county court judge;[1] and that it should have been raised at or immediately after the appeal.[2]

As the American statutes contain no specific provisions affecting the procedure on appeal, the actions under them are in this respect governed by the same rules as actions at common law.

CHAPTER XXXVIII.

STATUTES OF ARKANSAS, MISSISSIPPI, MISSOURI, MONTANA, OHIO, SOUTH CAROLINA, TEXAS, UTAH.

743. Scope of chapter.

A. ARKANSAS.

743a. Text of statute, § 1.

744. Effect of this section.

744a. Text of statute, § 2.

745. Effect of this section.

B. MISSISSIPPI.

745a. Text of Constitution and statutes.

745b. Provisions construed.

a. Superior servants.

b. Servants in different departments.

C. MISSOURI.

746. Text of statute, §1.

746a. Effect of this section.

746aa. Text of statute, §§ 2-4.

D. MONTANA.

746b. Text of statute.

747. Effect of this statute.

E. OHIO.

747a. Text of statute §§ 1, 2.

747b. Effect of these sections.

747c. Text of statute, § 3.

748. Effect of this section.

F. SOUTH CAROLINA.

748a. Text of Constitution.

748b. Effect of this provision.

G. TEXAS.

749. Statutes as to railway service.

749a. Construction of this provision

749b. Text of statutes as to vice principals.

750. What employees are vice principals under this section.

750a. Text of statutes as to common service

751. Who are fellow servants under this section.

751a. Other provisions of Texas statute.

H. UTAH.

751b. Text of statute.

752. Construction of this provision.

743. Scope of chapter.— Another group of statutes which embody

provisions of a similar character, and which may, therefore, be appropriately reviewed together, comprises the enactments by which the doctrine of common employment, as it is applied in the majority of jurisdictions, has been modified in the states specified above. These enactments render applicable to corporations generally, or to railway companies, either one or the other of two theories which, as already explained, have been adopted, independently of statute, in several jurisdictions (see §§ 500–506, and 521–524, *ante*),—the theories, namely, that all superior employees are vice principals as regards their subordinates, and that coservice is not a bar to an action for injuries caused by the negligence of an employee in a different department.

A. Arkansas.

743a. Text of statute, § 1.—Laws of 1893, chap. 46, p. 68; Sandels' & H. Dig. chap. 130, §§ 6218, 6219.

The contents of this statute are as follows:

An Act Defining and Regulating Contracts:—**Sec. 1. That all persons engaged** in the service of railway corporations, foreign or domestic, doing business in this state, who are intrusted by such corporation with the authority of superintendence, control or command of other persons in the employ or service of such corporation, and who have the authority to direct any other employee in the performance of any duty of such employee, are vice principals of such corporation, and are not fellow servants with such employee.

744. Effect of this section.—Railway companies have been held liable for injuries received by a subordinate owing to the negligence of a foreman of a section gang;[1] and of an engine foreman who controlled a crew engaged in switching and moving cars in a yard, and who had no power to employ the men, but only reported them for negligence or refusal to do their work.[2]

A white man associated with colored laborers in the employment of a railroad company in setting a post is not made a vice principal because such laborers regard him as a boss, or because he assumes some sort of control without authority from the company.[3]

[1] *St. Louis, I. M. & S. R. Co.* v. *Rickman* (1898) 65 Ark. 138, 45 S. W. 56, holding the foreman to be guilty of negligence in failing to order the removal of a hand car from the track until it was too late to prevent its being struck by an approaching train, and in failing to warn the section men who were attempting to remove it, of the approach of the train.

[2] *St. Louis, I. M. & S. R. Co.* v. *Tuohey* (1899) 67 Ark. 209, 77 Am. St. Rep. 109, 54 S. W. 377.

[3] *Hunter* v. *Kansas City & M. R. &*

744a. Text of statute, § 2.—Sec. 2. That all persons who are engaged in the common service of such railway corporations, and who, while so engaged, are working together to a common purpose, of same grade, neither of such persons being intrusted by such corporations with any superintendence or control over their fellow employees are fellow servants with each other: Provided, nothing herein contained shall be so construed as to make employees of such corporation in the service of such corporation fellow servants with other employees of such corporation engaged in any other department or service of such corporation. Employees who do not come within the provisions of this section shall not be considered fellow servants.

745. Effect of this section.— A fireman and engineer on the same

Bridge Co. (1898) 29 C. C. A. 206, 54 U. S. App. 853, 85 Fed. 379. The court said: "We have, under this evidence, the case of three men working together in the common purpose of setting a post in a hole prepared to receive it. That Snowden received larger pay than Hunter, or that in some respects his work was not the same as that done by his associates, does not determine that he was a vice principal. The determining question under this statute is whether he was intrusted by the corporation with the authority of superintendence, control or command of those with whom he was associated in the service of the company, or with authority to direct these other employees in the performance of their duty to the common master. When, as in this case, it is shown that several persons are associated together and working together to a common purpose in the same department, they are presumed, under the 2d section of the Arkansas statute, to be fellow servants, and the burden is upon him who claims that a different relation existed, to establish that one was a vice principal. . . . That Hunter should regard Snowden as a 'boss,' or that he assumed to have some sort of control over those associated with him, will not make him the representative of the corporation. The authority [of a vice principal] to control and direct others must be an authority 'intrusted by such corporation' to him. His authority may, of course, be implied from the very nature of the duties imposed upon him, but he is not a vice principal merely because his higher character, greater intelligence, superior race, or natural habit of command caused him to assume an authority not intrusted to him by the common master, or to be regarded and treated with a respect due to his personal qualities rather than to his delegated power of control by those associated with him. . . . The mere fact that this common carpenter using the gauge and level should in their use have occasion to 'direct' that his fellow laborers should elevate or lower a post or should move it a few inches, more or less, nearer or further from the line of the track, did not vest him with such 'authority to direct' as was contemplated by the 1st section of this act, any more than would be the case if one of the other three were to throw a few spadesful more or less of earth into the hole, or to use more or less strokes of the rammer in tamping the earth around the post, or any other common direction like that. If Snowden should, in adjusting his gauge or using his level, have committed some error of judgment which was detected by one of the other three colaborers, and he should say to Snowden, 'Put your level here,' or 'your gauge here,' he would be in as much authority to give directions about the common work as Snowden would; and it is not such natural, incidental, and necessary 'direction' and 'control' as must occur whenever two or more work together to which this statute refers, but that kind of master-like command which involved the element of superior will and authority far more than Snowden had in this case."

The fact that the employee alleged to be a vice principal slipped, the result being that the post which was being set up fell on and injured a laborer, was also held not to be negligence, where the slipping was due to the character of the ground on which he was obliged to stand, and all the precautions necessary to the seeming exigencies of the situation were observed. *Hunter* v. *Kansas City & M. R. & Bridge Co.* (1898) 29

engine are fellow servants of the "same grade," where neither is exercising superintendence or control over the other.[1]

The foreman of a switching crew and a switchman of another crew are in different departments, and are not fellow servants.[2] The inspector in a roundhouse, who is subject to the authority of the mechanical department of the railroad company, is not a fellow servant of a fireman while on the road, who is subject to the authority of the transportation department.[3] The members of two different switching crews are not fellow servants.[4]

Sec. 3. No contract between the employer and employee, based upon the contingency of the injury or death of the employee, limiting the liability of the employer under this act, or fixing damages to be recovered, shall be valid and binding.

B. Mississippi.

745a. Text of Constitution and statutes.—Const. 1890, art. 7, § 193. This constitutional provision, which, with the exception of the last sentence, was re-enacted very nearly in the same words in the Code of 1892, § 3559, and in Laws of 1896, chap. 87, runs as follows:

Every employee of any railroad corporation (by chapter 87 of the Laws of 1896, this provision was amended so as to make it applicable to employees of all corporations)[1] shall have the same rights and remedies for an injury suffered by him from the act or omission of the corporation or its employees, as are allowed by law to other persons not employees, where the injury results from the negligence of a superior agent or officer, or of a person having the right to control or direct the services of the party injured; and also when the injury results from the negligence of a fellow servant engaged in another department of labor from that of the party injured, or of a fellow servant on another train of cars, or one engaged about a different piece of work. Knowledge by an employee injured of the defective or unsafe character or condition of any machinery, ways, or appliances shall not be a defense to an action for injury caused thereby, except as to conductors or engineers in charge of dangerous or unsafe cars or engines voluntarily operated by them. Where death results from any injury to an employee the legal or personal representative of the person injured shall have the same rights and remedies as are allowed by law to such representatives of other persons.[2] Any contract or agreement, express or implied, made by any employee

C. C. A. 206, 54 U. S. App. 653, 85 Fed. 379.

[1] *Kansas City, Ft. S. & M. R. Co.* v. *Becker* (1897) 63 Ark. 477, 39 S. W. 358.

[2] *St. Louis, I. M. & S. R. Co.* v. *McCain* (1900) 67 Ark. 377, 55 S. W. 165.

[3] *Kansas City, Ft. S. & M. R. Co.* v. *Becker* (1899) 67 Ark. 1, 46 L. R. A. 814, 77 Am. St. Rep. 78, 53 S. W. 406.

[4] *St. Louis, I. M. & S. R. Co.* v. *McCain* (1900) 67 Ark. 377, 55 S. W. 165 (negligence inferable where cars are kicked at night down a transfer track at a high rate of speed, without any attempt to ascertain whether the track is clear).

[1] See *Brooks* v. *Mississippi Cotton Oil Co.* (1899) 76 Miss. 874, 25 So. 479, where an instruction ignoring this change was held erroneous.

[2] As the effect of this sentence was

to waive the benefit of this section shall be null and void, and this section shall not be construed to deprive any employee of a corporation or his legal or personal representative, of any right or remedy that he now has by the law of the land. The legislature may extend the remedies herein provided for to any other class of employees.

By the Laws of 1898, chap. 66, the act of 1896 was amended by adding a section to the effect that pending suits should not be affected by any of its provisions.

745b. Provisions construed.— *a. Superior servants.*—The constitutional provision is not applicable, unless the delinquent servant is superior to the other in such a sense that the former can exercise a discretion and judgment in controlling the actions of the latter.[1]

A railroad engineer is not a superior agent, officer, or person having the right to control or direct the services of a brakeman on the train.[2]

The engineer of a switch engine is not a superior agent or officer of the railway company as to a yard master.[3]

The "tender" of a railway drawbridge is a fellow servant of a section hand, as he is not a superior officer in charge of work.[4]

b. Servants in different departments.—A fireman on a locomotive engine and a telegraph operator are engaged in different departments and about a different piece of work.[5]

that the statute did not inure to the benefit of parent, child, husband, or wife (see *Illinois C. R. Co.* v. *Hunter* [1892] 70 Miss. 471, 12 So. 482), it was amended thus by the Laws of 1896, chap. 87: Where death ensues from an injury to an employee an action may be brought in the name of the widow of such employee for the death of her husband, or by the husband for the death of his wife, or by the parent for the death of a child, or in the name of the child for the death of an only parent, for such damages as may be suffered by them respectively, by reason of such death, the damages to be for the use of such widow, husband, or child, except that in case the widow should have children the damages shall be distributed as personal property of the husband. The legal or personal representative of the person injured shall have the same rights and remedies as are allowed by law to such representatives of other persons. In every such action the jury may give such damages as shall be fair and just with reference to the injury resulting from such death to the persons suing.

[1] *Fencick* v. *Illinois C. R. Co.* (1900) 10 C. C. A. 369, 100 Fed. 247, denying recovery where one member of a switching crew, whose business it was to distribute cars on the various tracks in the yard, to make up the trains, was injured by the negligence of another member of the crew whom the yard master had appointed foreman for the night of the accident, and to whom he gave the switch list, the evidence being that such foreman merely called out the track on which a car was to be switched, as fixed by usage or by the switch list, and had no authority to command the switchman to pursue any particular line of action, and that he was of the same rank in the service as the others of the crew, and neither employed nor had power to discharge them.

[2] *Evans* v. *Louisville, N. O. & T. R. Co.* (1893) 70 Miss. 527, 12 So. 581.

[3] *Farquhar* v. *Alabama & V. R. Co.* (1900) 78 Miss. 193, 28 So. 850.

[4] *Illinois C. R. Co.* v. *Bishop* (1899) 76 Miss. 758, 25 So. 867. So far as the report shows, the question of a difference of department was not raised.

[5] *Illinois C. R. Co.* v. *Hunter* (1892) 70 Miss. 471, 12 So. 482.

A telegraph operator and a fireman are engaged "about a different piece of work," in such a sense that they are not coservants.[6]

Laws of 1897, chap. 96; Rev. Stat. 1899, § 2873. As to the constitutionality of this statute, see § 615, subd. b, *ante*.

C. Missouri.

746. Text of statute, § 1.— The contents of Mo. Rev. Stat. 1899, § 2873, are as follows:

An Act to Define the Liabilities of Railroad Corporations in Relation to Damages Sustained by Their Employees, and to Define who are Fellow Servants, and who are not Fellow Servants, and to Prohibit Contracts Limiting Liability under this act.

Sec. 1. Liability of railroad corporations for damages to agents or servants—contributory negligence a defense.—That every railroad corporation owning or operating a railroad in this state shall be liable for all damages sustained by any agent or servant thereof while engaged in the work of operating such railroad, by reason of the negligence of any other agent or servant thereof: Provided, That it may be shown in defense that the person injured was guilty of negligence contributing as a proximate cause to produce the injuries.

746a. Effect of this section.—This statute is *in pari materia* with Rev. Stat. 1889, § 2666, defining the term "railroad corporations," and both statutes must be construed together.[1]

All employees whose functions are directly connected with the running of trains are, of course, covered by the words "engaged in the operation of such railroad."[2] But the phrase is not applicable to such employees alone. To bring a servant within the statute it is merely necessary that he should be "engaged in some service that is necessary to the movement of trains."[3]

746aa. Text of statute, §§ 2-4.—See. 2. Vice principals defined. That all persons engaged in the service of any such railroad corporation doing business

[6] *Illinois C. R. Co.* v. *Hunter* (1892) 70 Miss. 471, 12 So. 482.

[1] *Powell* v. *Sherwood* (1901) 162 Mo. 605, 63 S. W. 485.

[2] In a case where an extra freight train was dispatched, with orders to look out between two specified points for a work train which on that section of the road had the right of way, except as to regular trains, it was held (1) that the failure of the train dispatcher to notify the operators of the work train of the approach of the freight, so that flags could have been set, constituted negligence; (2) that the persons operating the freight train were guilty of negligence in omitting to send a flagman to locate the work train; and that, as the cars of the work train were being pushed before the engine, the failure to post a flagman on the hind car to warn the engineer of approaching danger, as required by the rules of the company, constituted negligence. *Kinard* v. *Omaha, K. C. & E. R. Co.* (1901) 164 Mo. 270, 64 S. W. 124.

[3] *Stubbs* v. *Omaha K. C. & E. R.* (1900) 85 Mo. App. 192, holding that an employee engaged in replacing old rails by new ones could recover for the negligence of a coemployee engaged in the same work.

in this state, who are intrusted by such corporation with the authority of superintendence, control, or command of other persons in the employ or service of such corporation, or with the authority to direct any other servant in the performance of any duty of such servant, or with the duty of inspection or other duty owing by the master to the servant, are vice principals of such corporation, and are not fellow servants with such employees.

Sec. 3. Fellow servants defined.—That all persons who are engaged in the common service of such railroad corporation, and who, while so engaged, are working together at the same time and place, to a common purpose of same grade, neither of such persons being intrusted by such corporation with any superintendence or control over their fellow employees, are fellow servants with each other: Provided, That nothing herein contained shall be so construed as to make any agent or servant of such corporation in the service of such corporation a fellow servant with any other agent or servant of such corporation engaged in any other department or service of such corporation.

Sec. 4. Contracts limiting liability declared invalid.—No contract made between any railroad corporation and any of its agents or servants, based upon the contingency of the injury or death of any agent or servant, limiting the liability of such railroad corporation for any damages under the provisions of this act, shall be valid or binding, but all such contracts or agreements shall be null and void.

Approved February 9, 1897.

D. Montana.

746b. Text of statute.— By a territorial act originally passed in 1873, it was provided as follows:

In every case the liability of the corporation to a servant or employee acting under the orders of his superior shall be the same in cases of injury sustained by default or wrongful act of his superior, or to an employee not appointed or controlled by him, as if such servant or employee were a passenger. See also Rev. Stat. 1879, § 31, p. 471; Comp Stat. 1887, chap. 35, § 697; Mont. Code 1895, § 905.

747. Effect of this statute.— Under this provision a railway company was held liable for the negligence of an engine hostler, resulting in injury to his helper;[1] and damages were recovered against a mining company for the negligence of one who employed and discharged employees in a mine, supplied materials and implements for its development, and had full control of the property, employees, tools, and materials, and complete charge of the management and development of the mine, no other officer or agent being present at the mine.[2]

It was also laid down that the effect of the provision was to give a cause of action against the employer for the wrongful act of any su-

[1] *Wastl* v. *Montana Union R. Co.* (1895) 16 Mont. 484, 41 Pac. 273 (accumulation of *débris* allowed in a tunnel prevented the escape of a miner).

perior servant, whether or not he exercised any control over the injured person before or at the time of the accident.[3]

But as the statute imposed a greater burden upon domestic, than upon foreign companies, it was declared to have been annulled by art. 15, § 11, of the Constitution, which enacts that no company formed under the laws of any other country, state, or territory, shall exercise within the state of Montana any greater rights or privileges than those possessed by corporations of the same or similar character created under the laws of Montana.[4]

E. Ohio.

747a. Text of statute, §§ 1, 2.— Act of April 2, 1890; 87 Ohio Laws, p. 149; Bates's Anno. Stat. 1787–1902, §§ 3365–20–22.

The contents of this statute are as follows:

Certain Regulations for Protection of Railroad Employees.

Sec. 1. Be it enacted by the general assembly of the State of Ohio, That it shall be unlawful for any railroad or railway corporation or company owning an operating, or operating, or that may hereafter own or operate, a railroad in whole or in part in this state, to adopt or promulgate any rule or regulation for the government of its servants or employees, or make or enter into any contract or agreement with any person engaged in or about to engage in its service, in which, or by the terms of which, such employee in any manner, directly or indirectly, promises or agrees to hold such corporation or company harmless on account of any injury he may receive by reason of any accident to, breakage, defect, or insufficiency in the cars or machinery and attachments thereto belonging, upon any cars so owned and operated, or being run and operated, by such corporation or company, being defective; and any such rule, regulation, contract, or agreement shall be of no effect. It shall be unlawful for any corporation to compel or require, directly or indirectly, an employee to join any company association whatsoever, or to withhold any part of an employee's wages or his salary for the payment of dues or assessments in any society or organization whatsoever, or demand or require either as a condition precedent to securing employment or being employed; and such railroad or railway company shall not discharge any employee because he refuses or neglects to become a member of any society or organization. And if any employee is discharged, he may, at any time within ten days after receiving a notice of his discharge, demand the reason of said discharge, and said railway or railroad company thereupon shall furnish said reason to said discharged employee in

[3] *Northern P. R. Co.* v. *Muse* (1894) 11 C. C. A. 63, 27 U. S. App. 238, 63 Fed. 114 (railway company held liable to a fireman of one train for the negligence of the conductor of another train in leaving a switch open), Reversing (1893) 57 Fed. 283, and approving construction given to the statute by Shiras, J., in *Ragsdale* v. *Northern P. R. Co.* (1890) 42 Fed. 383.

[4] *Criswell* v. *Montana C. R. Co.* (1896) 18 Mont. 167, 33 L. R. A. 554, 44 Pac. 525 (conductor held not to be a vice principal), Reversing (1895) 17 Mont. 189, 42 Pac. 767. The view of the court was that the Constitution was "self-executing as a prohibition, but not as an affirmative imposition upon, or securement to, foreign companies of the rights or privileges only accorded by state laws to domestic companies."

writing. And no railroad company, insurance society or association, or other person shall demand, accept, require, or enter into any contract, agreement, or stipulation with any person about to enter or in the employ of any railroad company, whereby such person stipulates or agrees to surrender or waive any right to damages against any railroad company, thereafter arising for personal injury or death, or whereby he agrees to surrender or waive, in case he asserts the same, any other right whatsoever; and all such stipulation and agreements shall be void. And every corporation, association, or person violating, or aiding or abetting in the violation of, this section shall for each offense forfeit and pay to the person wronged or deprived of his rights hereunder the sum not less than fifty dollars ($50) nor more than five hundred dollars ($500), to be recovered in a civil action.

Sec. 2. It shall be unlawful for any such corporation to knowingly or negligently use or operate any car or locomotive that is defective, or any car or locomotive upon which the machinery or attachments thereto belonging are in any manner defective. If the employee of any such corporation shall receive any injury by reason of any defect in any car or locomotive, or the machinery or attachments thereto belonging, owned and operated, or being run and operated, by such corporation, such corporation shall be deemed to have had knowledge of such defect before and at the time such injury is so sustained; and when the fact of such defect shall be made to appear in the trial of any action in the courts of this state, brought by such employee, or his legal representatives, against any railroad corporation for damages on account of such injuries so received, the same shall be prima facie evidence of negligence on the part of such corporation.

747b. Effect of these sections.— The operation of a flat car having no side or end boards or standards to prevent heavy stones which are loaded on it from falling off is not within the prohibition of this section.[1]

747c. Text of statute, § 3.—Sec. 3. That in all actions against the railroad company for personal injury to, or death resulting from personal injury of, any person, while in the employ of such company, arising from the negligence of such company or any of its officers or employees, it shall be held, in addition to the liability now existing by law, that every person in the employ of such company, actually having power or authority to direct or control any other employee of such company, is not the fellow servant, but superior, of such other employee; also that every person in the employ of such company, having charge or control of employees in any separate branch or department, shall be held to be the superior, and not fellow servant, of employees in any other branch or department who have no power to direct or control in the branch or department in which they are employed.

748. Effect of this section.—A chief inspector of cars, having other inspectors under him, is not a fellow servant of a brakeman.[1]

A train despatcher is a representative of the railroad company as regards a locomotive engineer, both at common law and under this

[1] *Toledo & O. C. R. Co.* v. *Beard Erick* (1894) 51 Ohio St. 146, 37 N. E. 128.
(1898) 20 Ohio C. C. 681.
[1] *Columbus, H. Valley & T. R. Co.* v.

statute. But telegraph operators are not vice principals as to train men under the statute, any more than they were prior to its enactment.[2]

[1] *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952. The court said: "In our opinion the telegraph operator has neither power nor authority to direct or control the engineer. He is only the medium through whom orders from the train dispatcher are communicated to the engineer and the conductor. He gives notice to the engineer and the conductor. He gives notice to the engineer of certain facts, from which the duty of the engineer arises, under the rules of the company. The conductor is in control of the train, and the engineer and the brakeman are his subordinates. Suppose that the conductor sends an order to the engineer by the brakeman. Does the brakeman thereby become a person actually having power or authority to direct or control the engineer? Manifestly not. When a switchman throws a switch, and signals to the engineer that he has done so, is he actually exercising power or authority to direct or control the engineer? Clearly not. The duty of the switchman, in such a case, is merely to give notice to the engineer of the condition of affairs upon which the engineer is required to act. And so the engineer's duty to act upon the signal from the telegraph operator does not come from any authority or power to control reposed in the telegraph operator. The authority or control is in the train dispatcher, who gives the order, not in [illegible] mere transmitter of it. When there [illegible] no order, but the telegraph oper[illegible] conveys by signal, to the engineer, [illegible]rmation as to the position of other [illegible]ns, or the condition of the track ahead, the operator is the mere register of the fact; a mere notifier; a mere giver of information, upon which the engineer, under the rules of the company, at once knows his duty, and acts accordingly. . . . There is much less ground for holding that a telegraph operator has any control or authority over an engineer or a conductor, than there is that the engineer has control or authority over a brakeman. The engineer exercises discretion to determine when the brakes shall be put on, and when not. Knowing that his signals are to be acted on by the brakeman, and having discretion to give them as he thinks it proper, in the running of the train, he may, with some plausibility be said to exercise actual power and authority over the brakeman, though under the decision of the supreme court of Ohio, as we have seen, this is not the proper view. But a telegraph operator in giving notice to an engineer of a train about to pass, has no discretion whatever. He gives the exact notice which the train dispatcher orders him to give, and no other. He exercises no discretion. He is a mere messenger boy. He is the vehicle by which the order is carried. But it is said that while this might otherwise be a reasonable and proper construction of the statute, there is a clause in section [illegible] which imposes upon the court the duty of giving to the words 'actually having power or authority to direct and control,' a meaning they do not usually have. . . . The argument is that because, by the decisions of the supreme court of Ohio previous to the passage of this act, where one employee actually had power or authority to direct or control another employee, the two were not fellow servants, and the master was liable for the negligence of the superior, therefore the court must now strain the meaning of the words 'actually having power or authority to direct or control,' so as to give them a wider effect than the then-prevailing rule of liability, and so satisfy the legislative intent expressed in the words, 'in addition to the liability now existing by law.' From this necessity for a strained construction, the court is urged to hold that mere mediums of communicating orders, mere signal givers, mere registers of facts, exercise actual power and authority to direct and control the persons to whom it is merely their duty to communicate information or orders issued by others. It is true that in the construction of a statute it is the duty of the court, when it can, to give effect and meaning to every clause and part of it. It is also true that, before the passage of the act, it was uniformly held by state courts of Ohio that any person in the employ of a railroad company or other master, actually having power or authority to direct or control any other employee of the same master, was his superior, and that the master was liable for injury to the inferior caused by the

An engineer in charge of a locomotive on a railroad train, having authority to direct or control a fireman in a branch or department of the service of the company separate from that of a brakeman on another train, is one of the employees covered by the descriptive words in the latter part of the section, and is, therefore, as to such brakeman, a vice principal.[3]

The negligence of a superior servant of a railroad company causing injury to an employee under his control renders the employee liable, although the negligence was in respect of the performance of work of the kind done by the injured person, and not in the performance of any duty imposed by law on the master personally.[4]

F. South Carolina.

748a. Text of Constitution.— Const. 1895, art. 9, § 15.

The contents of this constitutional provision are as follows:

Sec. 15. Every employee of any railroad corporation shall have the same rights

negligence of such superior. . . . But the words, 'in addition to the liability now existing by law,' can have no effect to pervert the ordinary meaning of language. Courts are not compelled to stultify themselves for the purpose of reconciling inexplicable inconsistencies of legislatures; nor, in this case, is it necessary for the court to do so. The second provision in section 3, namely, that the superior in one branch or department shall not be the fellow servant of a subordinate in another branch, does add to the liability of the railway companies under the decisions of the Ohio courts, as they were at the time of the passage of this act. . . . The words, 'in addition to the liability now existing by law,' therefore, may be given effect by referring them to this latter provision of the section. Taking the parts of the section together, it would seem that the first clause was introduced as merely declaratory of the law then existing, for the purpose of making fuller and clearer the meaning of the legislature with reference to the second clause. In commenting on the first clause, and the alleged implication in the statute that it increased the liability of railroad companies, Judge Bradbury, in delivering the opinion in *Cincinnati, H. & D. R. Co.* v. *Margrat* (1894) 51 Ohio St. 130, 37 N. E. 11 (see next note), said: 'The remedy was so complete, where the relation of superior and subordinate actually existed that the statute here could have little or no operation. Still, it may be said that the statute makes the rules of liability of certain and universal application, denying any exception to its operation, wherever the relation of subordinate and superior exist, and the subordinate is injured by the negligence of 'the superior while engaged in the common service.' There is no suggestion in this, by the court, that the words, 'actually having power and authority to direct and control,' do not describe a relation in which one is the 'superior' and the other the 'subordinate,' within the ordinary meaning of those terms. It seems too plain for further argument that the conductor and the engineer are not subordinates of the telegraph operator, within the statute."

[3] *Cincinnati, H. & D. R. Co.* v. *Margrat* (1894) 51 Ohio St. 130, 37 N. E. 11. Compare *Northern P. R. Co.* v. *Hase* (1894) 11 C. C. A. 63, 27 U. S. App. 238, 63 Fed. 114, decided under the Montana statute, § 746b, *supra*.

[4] *Peirce* v. *Van Dusen* (1897) 24 C. C. A. 280, 47 U. S. App. 339, 78 Fed. 693. The court said that, if a different construction were adopted, the Ohio statute would be deprived of all practical value and the manifest object of the legislature in passing it would be defeated.

As to the common-law doctrine under similar circumstances, see §§ 543–547, *ante*.

and remedies for any injury suffered by him from the acts or omission of the corporation or its employees as are allowed by law to other persons not employees when the injury results from the negligence of a superior agent or officer or of a person having a right to control or direct the services of a party injured, and also when the injury results from the negligence of a fellow servant engaged in another department of labor from that of the party injured, or of a fellow servant on another train of cars, or one engaged about a different piece of work. Knowledge by any employee injured of the defective or unsafe character or condition of any machinery, ways, or appliances shall be no defense to an action for injury caused thereby, except as to conductors or engineers in charge of dangerous cars or trains or engines voluntarily operated by them. When death ensues from any injury to employees, the legal or personal representatives of the person injured shall have the same right and remedies as are allowed by law to such representatives of other persons. Any contract or agreement, expressed or implied, made by any employee to waive the benefit of this section shall be null and void; and this section shall not be construed to deprive any employee of a corporation, or his legal or personal representative, of any remedy or right that he now has by the laws of the land. The general assembly may extend the remedies herein provided for to any other class of employees.

748b. Effect of this provision.— The right of a servant to recover under this provision is established by any evidence which justifies a jury in finding that the delinquent employee controlled the service of the person injured.[1] An instruction which, in effect, states this doctrine is proper.[2]

G. Texas.

749. Statutes as to railway service.—Laws 1891, chap. 24; Laws 1893, chap. 91; Laws 1897, chap. 6, p. 14. As to the constitutionality of this statute, see § 616, subd. e, *ante*. The several sections of the act by which the liability of railway companies in this state is at present defined are set out below. The second and third of those sections are virtually identical with two contained in the earlier statute, so far as their bearing upon the relations between the servant is concerned. But in the later revision there are, as will be seen, important alterations designed to extend the rights of injured servants with respect to the classes of employers who shall be deemed to be within the purview of this statute.[3]

An Act to Prescribe and Define the Liability of Persons, Receivers, or Corpo

[1] A member of a gang engaged in loading rails on flat cars may recover for injuries caused by the negligence of an employee who was charged with the duty of giving orders to the men when to take hold of rails, when to raise them, and when to throw them on the car. It is immaterial whether the "caller" is appointed by the foreman or selected by the workmen themselves. *Rutherford* v. *Southern R. Co.* (1899) 56 S. C. 446, 35 S. E. 156 (failure to countermand an order).

[2] *Bussey* v. *Charleston & W. C. R. C.* (1898) 52 S. C. 438, 30 S. E. 477.

[3] One of the alterations was intended to counteract the effect of a decision in which a street-railway company was held not to be a "railway corporation" within the meaning of the act of 1893

tions Operating Railroads or Street Railways, for Injuries to Their Servants and Employees, to Define who are Fellow Servants, and to Prohibit Contracts between Employer and Employee Based upon the Contingency of the Injury or Death of the Employee, Limiting the Liability of the Employer for Damages.

Sec. 1. Be it enacted by the Legislature of the State of Texas: That every person, receiver, or corporation operating a railroad or a street railway the line of which shall be situated in whole or in part in this state, shall be liable for all damages sustained by any servant or employee thereof while engaged in the work of operating the cars, locomotives, or trains of such person, receiver, or corporation, by reason of the negligence of any other servant or employee of such person, receiver, or corporation; and the fact that such servants or employees were fellow servants with each other shall not impair or destroy such liability.

749a. Construction of this provision.—This provision is virtually of the same tenor as the statutes of Iowa, Kansas, and Minnesota. See chapter XXXIX., *post*. It excludes the defense of coservice where the employee injured was a switchman employed in coupling cars, while a train was being made up in the yard,[1] or was a brakeman

Riley v. *Galveston City R. Co.* (1896) 13 Tex. Civ. App. 247, 35 S. W. 826 adopting the strong intimation to that effect in *Austin Rapid Transit R. Co.* v. *Otto* (1895) 88 Tex. 262, 31 S. W. 180. The court stated its reasons for this conclusion as follows: "The many and great dangers to life and limb to which the numerous persons engaged in operating railroads whose cars are moved by steam were exposed, and the many different departments of labor in which such operatives were employed, were doubtless the principal reasons which induced the legislature to modify the rule of law heretofore governing the relation of master and servant, and prescribing their reciprocal duties and liabilities. But these reasons for changing the law do not exist in respect to those engaged in operating street railways. The same article of the Revised Statutes which authorizes the creation of a private corporation for the construction and maintenance of a street railway authorizes also private corporations for the following purposes: For manufacturing or mining business; for the manufacture and supply of gas; for the supply of light or heat to the public by any means; for the building and navigation of steamboats, and the carriage of persons and property thereon; for the construction and maintenance of mills and gins. The employees of any one of these corporations are exposed to quite as great and as many risks as are the employees of street railways, and yet the legislature has not thought it necessary to make any change in the law for their protection. These considerations are persuasive, if not conclusive, that the intention of the legislature in passing the fellow-servants act was not to include street railways within its provisions, and that the words 'any railway corporation' in the 1st section of the act, should be restricted to the usual and popular import of that term, and that the act should be held not to embrace railways constructed and maintained upon streets and other highways in and contiguous to cities and towns for carrying persons."

Another alteration overrode the effect of a decision denying the applicability of the statute where a line was in the hands of a receiver. *Campbell* v. *Cook* (1894) 86 Tex. 630, 40 Am. St. Rep. 878, 26 S. W. 486.

It has been held that, as the only material difference between the acts of 1891 and of 1893 was that the scope of the law was extended so as to embrace railway corporations operated by a receiver, manager, or any other person, the result of the repeal of the former act and the re-enactment of the provisions as to fellow servants is determined by the rule of construction that, when one statute is repealed by another which is substantially of the same tenor, the binding force of the earlier one is neither destroyed nor interrupted. *San Antonio & A. P. R. Co.* v. *Kelley* (1895) 11 Tex. Civ. App. 569, 32 S. W. 847.

[1] *Missouri, K. & T. R. Co.* v. *Baker* (1900; Tex. Civ. App.) 58 S. W. 964.

coupling cars.[2] But section men engaged in loading a car are not "operating" it in such a sense that one of them may recover for injuries caused by another's negligence.[3]

749b. Text of statutes as to vice principals.—Sec. 2. All persons engaged in the service of any person, receiver, or corporation, controlling or operating a railroad or street railway the line of which shall be situated in whole or in part in this state, who are intrusted by such person, receiver, or corporation with the authority of superintendence, control, or command of other servants or employees of such person, receiver, or corporation, or with the authority to direct any other employee in the performance of any duty of such employee, are vice principals of such person, receiver, or corporation, and are not fellow servants with their coemployees.

In the act of 1891 (entitled "An Act to Define Who are Fellow Servants and Who are not Fellow Servants"), chap. 24, § 1; Sayles's Civ. Stat. Supp. 1888-1893, art. 2430f, this provision was worded as follows:

That all persons engaged in the service of any railroad corporations, foreign or domestic, doing business in this state, who are intrusted by such corporation with the authority of superintendence, control, or command of other persons in the employ or service of such corporation, or with the authority to direct any other employee in the performance of any duty of such employee, are vice principals of such corporation, and are not fellow servants with such employee.

In the act of 1893, § 1 (Rev. Stat. 1895, chap. 12b, art. 4560f), the phraseology was somewhat changed, and the provision assumed the following form:

All persons engaged in the service of any railway corporation, foreign or domestic, doing business in this state, or in the service of a receiver, manager, or of any person controlling or operating such corporation, who are intrusted by such corporation, receiver, or person in control thereof, with the authority of superintendence, control, or command of other persons in the employment of such corporation, or receiver, manager, or person in control of such corporation, or with the authority to direct any other employee in the performance of the duty of such employee, are vice principals of such corporation, receiver, manager, or person controlling the same, and are not fellow servants of such employee.

750. What employees are vice principals under this section.—This section, except in so far as it makes vice principalship depend solely upon the exercise of control, apart from the question whether the controlling employee possessed the power of discharge (see § 523, *ante*), is merely declaratory of the "superior servant" doctrine, which, as will be seen by referring to chapter XXVIII., subtitle D, *ante*, still prevails in Texas under the common law, in all cases in which the statute is not applicable.[1]

[2] *Missouri, K. & T. R. Co.* v. *Baker* (1900; Tex. Civ. App.) 58 S. W. 964.

[3] *Lawrence* v. *Texas C. R. Co.* (1901) 25 Tex. Civ. App. 293, 61 S. W. 342.

[1] The continuity of doctrine under the common law and the statute is indicated by the fact that the decisions under the common law, both in Texas and in other states where the superior servant doctrine is adopted, are sometimes cited as authorities in decisions construing the statute. Thus, the precedent relied upon in *Ft. Worth & D. C. R. Co.* v. *Peters* (1894) 7 Tex. Civ. App. 78, 25 S

The following employees have been held to be vice principals as regards the servants under their control:

A master mechanic in charge of a railway roundhouse;[2] a conductor;[3] a locomotive engineer, as to his fireman;[4] a yard master;[5]

W. 1077, is *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 16 Am. St. Rep. 867, 12 S. W. 835. Similarly, in *Texas C. R. Co.* v. *Frazier* (1896) 90 Tex. 33, 36 S. W. 432, the authority cited is *Pittsburgh, C. & St. L. R. Co.* v. *Ramsey* (1882) 37 Ohio St. 665.

An instruction in an action for the death of a railroad employee that if a designated person was intrusted with power to direct such employee and gave any direction as to the performance of the work which was an improper and unusual method of performing it, and it was attended with unusual danger and hazard, and it was negligence to so order, and such negligence, if any, directly caused the death of the employee, plaintiff is entitled to recover, is not objectionable as permitting a recovery if the performance of the work was attended with unusual danger and hazard, without reference to whether or not such danger and hazard were ordinarily incident to the character of the work. *Galveston, H. & S. A. R. Co.* v. *Bonnet* (1896; Tex. Civ. App.) 38 S. W. 813.

Where the evidence justifies the court in assuming that the culpable superior servant was a vice principal for the reason that he had the power of hiring and discharging, and in instructing the jury accordingly, the defendant cannot complain of the failure to submit to them the question whether he had such power. *Austin Rapid Transit R. Co.* v. *Grothe* (1895) 88 Tex. 262, 31 S. W. 196.

[2] *Missouri P. R. Co.* v. *Sasse* (1893; Tex. Civ. App.) 22 S. W. 187.

[3] *Culpepper* v. *International & G. N. R. Co.* (1897) 90 Tex. 627, 40 S. W. 386, Reversing on this point (1897; Tex. Civ. App.) 38 S. W. 818; *Galveston, H. & S. A. R. Co.* v. *Robinett* (1899; Tex. Civ. App.) 54 S. W. 263.

In an earlier case, it had been merely laid down that a conductor was a vice principal as to a brakeman, if it should be shown, as a matter of fact, that he had control over such brakeman, and that the question whether he was "in charge of a train" should have been submitted to the jury. *Moore* v. *Jones* (1897) 15 Tex. Civ. App. 391, 39 S. W. 593.

Where an engine of another railroad, at the request of the complainant, a conductor in the employ of the defendant, was fastened to the rear of his train to assist it, and signals were given by the conductor and the whistle of the other road's engine, which were answered by the starting up of the train, and afterwards, on a "slow-up signal" from the yard foreman, defendant's engineer applied the "emergency air," stopping the train so suddenly that an accident resulted to plaintiff, defendant's servant, the question of the negligence of defendant's engineer was for the jury. *Galveston, H. & S. A. R. Co.* v. *Adams* (1900; Tex. Civ. App.) 55 S. W. 803. Judgment Affirmed in (1900) 94 Tex. 100, 58 S. W. 831.

Where rules of a railroad require trains to be under the control of the conductor, and that no train shall leave a station without a signal from the conductor, the conductor and engineer are not fellow servants as to an injury received by the engineer because of starting his train pursuant to the conductor's orders, notwithstanding both receipted for orders commanding them to hold the train until others had passed, since the rules required all orders to be directed to those who were to execute them. *Galveston, H. & S. A. R. Co.* v. *Brown* (1900; Tex. Civ. App.) 59 S. W. 930. This judgment was reversed in (1901) 95 Tex. 2, 63 S. W. 305, but merely on the ground of contributory negligence in violating a rule.

Railroad employees in charge of a train are not required to use "all reasonable means in their power" to prevent injury to another employee, as it would be exacting too high a degree of care. *Houston, E. & W. T. R. Co.* v. *Hartnett* (1898; Tex. Civ. App.) 48 S. W. 773.

[4] *Houston & T. C. R. Co.* v. *Stuart* (1898; Tex. Civ. App.) 48 S. W. 799. Reversed, but not on this point, in (1899) 92 Tex. 540, 50 S. W. 333.

The question whether or not an engineer is a vice principal of a fireman, so as to render the company liable for the death of the latter from the negligence of the former, was held to be for the jury upon evidence that a rule of the company provides that the engineers are

a yard superintendent, as regards the foreman of yard engines engaged in switching cars about the yard;[6] a foreman of a switching crew;[7] a foreman of track repairers;[8] a foreman of construction work on a bridge.[9]

If the evidence clearly shows that the negligent employees had no actual control over the injured one, the latter cannot recover under the statute.[10]

A servant who merely gives signals is not considered to be a vice principal merely by reason of his discharge of that function.[11] Compare § 522a, *ante*.

in charge of their firemen, and shall report them if they refuse to obey their orders, and extrinsic testimony that the engineers under such rule had such control and direction as to change the relation of fellow servants. *Galveston, H. & S. A. R. Co.* v. *Ford* (1898; Tex. Civ. App.) 46 S. W. 77.

[5] As respects an engineer. *Texas & P. R. Co.* v. *Reed* (1895) 88 Tex. 439, 31 S. W. 1058, Affirming (1895; Tex. Civ. App.) 32 S. W. 118. As respects a brakeman. *International & G. N. R. Co.* v. *Sipole* (1895; Tex. Civ. App.) 29 S. W. 686; *Missouri, K. & T. R. Co.* v. *Hamilton* (1895; Tex. Civ. App.) 30 S. W. 679 (yard master failed to adjust properly a stick to be used to push a derailed car on to the track by force communicated from the engine through another car, the result being that the stick slipped and allowed the cars to come together and crush plaintiff).

[6] *Texas & N. O. R. Co.* v. *Tatman* (1895) 10 Tex. Civ. App. 434, 31 S. W. 333 (switch engine collided with a flat car left standing on the track, possibly by negligence of superintendent, and injured foreman).

[7] *Gulf, C. & S. F. R. Co* v. *Powell* (1901) 25 Tex. Civ. App. 91, 60 S. W. 979 (switch displaced); *Houston & T. C. R. Co.* v. *White* (1900) 23 Tex. Civ. App. 280, 56 S. W. 204 (train was started by foreman without notice, catching decedent between a derailed car and a platform, and was then negligently backed while he was in that predicament).

[8] *Sweeney* v. *Gulf, C. & S. F. R. Co.* (1892) 84 Tex. 433, 31 Am. St. Rep. 71, 19 S. W. 555; *Ft. Worth & D. C. R. Co.* v. *Peters* (1894) 7 Tex. Civ. App. 78, 25 S. W. 1077, Affirmed in (1894) 87 Tex. 222, 27 S. W. 257.

Evidence that defendant company's foreman threw a tie so far from a caboose as to strike a danger post and hit plaintiff, an employee, mashing his leg while he was endeavoring to get out of the way, was sufficient to support a verdict for damages in plaintiff's favor. *Galveston, H. & S. A. R. Co.* v. *Johnson* (1900; Tex. Civ. App.) 57 S. W. 64.

[9] *San Antonio & A. P. R. Co.* v. *McDonald* (1895; Tex. Civ. App.) 31 S. W. 72 (foreman failed to give servant notice of danger from swinging timber).

[10] An engineer of a freight train is not a vice principal of a head brakeman, where the rules of the company subject all the trainmen, including the engineer, to the order of the conductor, and require the engineer to obey the latter unless his orders are in violation of the rules of the company or involve risk, although it is customary for head brakemen, as a matter of convenience, to seek information as to their duties from the engineer, who has the same running orders as the conductor. *International & G. N. R. Co.* v. *Moore* (1897) 16 Tex. Civ. App. 51, 41 S. W. 70.

[11] *Texas C. R. Co.* v. *Frazier* (1896) 90 Tex. 33, 36 S. W. 432, Reversing (1896; Tex. Civ. App.) 34 S. W. 661 and holding that a rule of a company by which an engineer is intrusted with discretion to give signals notifying the brakeman to apply brakes, does not give the former "authority to direct" the latter in the performance of his duties. The court relied upon *Pittsburgh, C. & St. L. R. Co.* v. *Ranney* (1882) 37 Ohio St. 665, a common-law decision, and stated its views as follows: "The purpose of the statute was to impute to the master the negligence of an employee upon whom he has conferred authority or power to influence the action or volition of another employee in the performance of his duties. Under the common-law rule, as settled in the state before the statute, the negligence

Where one employee is normally in control of another, so as to be a vice principal under the statute, a rule of the railway company which empowers a subordinate to exercise an independent judgment when certain contingencies arise does not operate so as to render the two employees fellow servants during such period as the subordinate undertakes to act upon his own responsibility in the manner thus authorized.[12]

of an employee would not have been imputed to the master unless he had the power to employ and discharge, it being assumed that such power was necessary to subject the will of the latter to that of the former. The statute, however, is based upon the theory that the authority or power in one employee to superintend, control, or command, or direct another employee in the performance of his duties, as effectually influences and subjects to the former the will of the latter as does the power to employ and discharge. But it was not the purpose of the statute to impute to the master the negligence of an employee upon whom he had conferred no such power, but had merely imposed the duty, in certain contingencies arising in the course of his employment, of giving a signal whereby another employee would know that the occasion had arisen for him to perform some duty imposed upon him by the rules governing his employment, leaving such employee free to perform such duty in his own way under such rules. In such a case there is no subjection of the will of one to that of the other. . . . We are of the opinion that the signal given by the engineer for brakes was a mere notice to the brakeman, Frazier, that the occasion had arisen for him to perform a duty imposed upon him by the rules; that the fact that the engineer was intrusted by the company with the discretion of determining when the brakes should be applied, and to signal therefor, did not give him any 'authority of superintendence, control, or command,' or 'authority to direct' Frazier in the performance of his duties; that Frazier, in attempting to set brakes in the performance of his duties, was governed and controlled by the direction and command of the rules, and not of the engineer; and that, therefore, under the statute, they were 'in the same grade of employment,' and fellow servants."

shows that under the rules of the defendant company the conductor had general superintendence over the movements of the train, and command of all the employees engaged in its operation; but it also tended to show that, when the safety of the train became involved, the engineer was no longer subject to the absolute control of the conductor, but was empowered to act upon his own judgment. The written rule of the company as to the authority of these employees was read in evidence, and is as follows: 'All trains will be run under the direction of conductors, except when their directions conflict with rules, or involve risks, in which case the engineer will be held equally responsible.' The contention seems to be that whenever a risk became involved, and the engineer saw proper to stop his train in order to avoid it, for the reason that he was not then subject to the control of the conductor, they became fellow servants, and so remained as long as that state of affairs continued to exist. But, as we have previously intimated, we are of the opinion that this position cannot be maintained. Merely because, by reason of the engineer's superior technical knowledge and skill in operating the machinery, it was not deemed advisable to empower the conductor to direct the action of the engineer in certain contingencies, it does not follow that the latter was not under the general superintendence and control of the former. The exception emphasizes the rule. Conceding that, in case of danger, the engineer has power to stop the train, does the conductor cease to have a general superintendence over the train in case he sees proper to exercise that power? The conductor's authority is not abrogated, but merely restricted for the occasion. . . . The mere fact that upon the happening of some contingency the engineer may act independently of the conductor does not, for the occasion, change the general relation of subordination existing between them. The conductor still has the general con

[12] In *Culpepper v. International & G. N. R. Co.* (1897) 90 Tex. 627, 40 S. W. 386 the court said: "The testimony

A superior employee does not cease to be a vice principal within the meaning of the statute, while he is performing the duties of a mere servant.[13]

750a. Text of statutes as to common service.—Sec. 3. All persons who are engaged in the common service of such person, receiver, or corporation, controlling or operating a railroad or street railway, and who, while so employed, are in the same grade of employment and are doing the same character of work or service and are working together at the same time and place and at the same piece of work and to a common purpose, are fellow servants with each other. Employees who do not come within the provisions of this section shall not be considered fellow servants.

The corresponding section (2) in the act of 1891 runs as follows: That all persons who are engaged in the common service of such railway corporations, and who, while so engaged, are working together at the same time and place to a common purpose, of same grade, neither of such persons being intrusted by such corporations with any superintendence or control over their fellow employees, are fellow servants with each other: Provided, That nothing herein contained shall be so construed so as to make employees of such corporation, in the service of such corporation, fellow servants with other employees of such corporation, engaged in any other department or service of such corporation. Employees who do not come within the provisions of this section shall not be considered fellow servants.

Section 2 of the act of 1893 (Rev. Stat. 1895, chap. 12b, art. 4560g) is slightly different: All persons who are engaged in the common service of such railway corporation, receiver, manager, or person in control thereof, and who, while so employed, are in the same grade of employment and are working together at the same time and place, and to a common purpose, neither of such persons being intrusted by such corporation, receiver, manager, or person in control thereof, with any superintendence or control over their fellow employees, or with the authority to direct any other employee in the performance of any duty of such employee, are fellow servants with each other: Provided, That nothing herein contained shall be so construed as to make employees of such corporation, receiver, manager, or person in control thereof, fellow servants with other employees engaged in any other department or service of such corporation, receiver, manager, or person in control thereof. Employees who do not come within the provisions of this chapter shall not be considered fellow servants.

trol, subject, for the time, to the engineer's power to act upon his own judgment during the emergency. As soon as the danger is obviated, the power of the conductor again comes into play. To hold that, because the conductor may temporarily be deprived of the power to control his subordinate, the rule of the statute is not to apply, would be, in our opinion, to confine its operation within limits which the legislature did not intend to prescribe."

[13] *Texas & P. R. Co.* v. *Reed* (1895) 88 Tex. 139, 31 S. W. 1058, Affirming (1895; Tex. Civ. App.) 32 S. W. 118 (company held liable for the failure of yard master to signal engineer to moderate speed of car which was about to be kicked on to main track, the consequence being that brakeman could not stop it, and was injured by its collision with a stationary car): *Sweeney* v. *Gulf, C. & S. F. R. Co.* (1892) 84 Tex. 433, 31 Am. St. Rep. 71, 19 S. W. 555 (foreman threw switch prematurely, while hand car was passing over it, and the car was derailed).

The same rule prevailed in Texas under the common law. See § 546, *ante*.

751. Who are fellow servants under this section.—The general effect of this section has been thus explained by the supreme court:

"The distinctive characteristics prescribed by the statute as essential to be found concurring and common to two or more employees in order to constitute them fellow servants are: First, they must be 'engaged in the common service.' As here used, 'service' means the thing or work being performed for the employer at the time of the accident, and out of which it grew, and 'common' means that which pertains equally to the employees sought to be held fellow servants; and therefore 'common service' means the particular thing or work being performed for the employer, at the time of the accident, and out of which it grew, jointly by the employees sought to be held fellow servants. . . . Second, they must be 'in the same grade of employment.' Grade means the rank or relative positions occupied by the employees while 'engaged in the common service.' This definition, however, gives us no certain means of determining whether given employees are in the same or different grades, for it furnishes no test by which their respective ranks or relative positions 'in the common service' can be ascertained. In the absence of a statutory test the grade would have depended upon the test which might have been adopted by the courts,—such as authority one over another, order of promotion, skill in the service, compensation received, etc. We are of the opinion that the legislature anticipated and settled this difficulty in the construction of the word 'grade' by the use of the clause, 'neither of such persons being intrusted with any superintendence or control over their fellow employees,' etc., as explanatory of what was meant by the clause 'in the same grade,' thus adopting the most natural test of grade in the construction of the statute,—authority one over the other while 'engaged in the common service.' Probably the most serious difficulty in arriving at the conclusion that one clause was intended as merely explanatory of the other is the fact that the explanatory clause does not immediately follow the one it explains; but this objection is removed, when we consider that, in the original section, as enacted in 1891, the qualifying clause immediately follows the words 'same grade,' and was evidently intended to explain their meaning. We do not think there was any intention to change the construction of the statute by changing the position of these clauses, and expressing the words 'of employment,' which were clearly implied in said original section. . . . Third, they must be 'working together at the same time and place.' While 'at' indicates nearness in time and place, it does not demand an exact coincidence as to either, but only

that it shall be sufficiently so to afford the employees a reasonable opportunity of observing the conduct of each other, with a view of guarding themselves against injury therefrom. . . . Fourth, they must be working 'to a common purpose.' By this is meant that the acts required of each in the performance of his duties at the time of the accident must be in furtherance of 'the common service.' . . . When these four distinguishing characteristics are found concurring and common to two or more employees, they must be held fellow servants under the statute; otherwise, not."[1]

According to the court of appeals, these statutes show an intention on the part of the legislature to adopt substantially the doctrine of those decisions which proceed upon the theory that employees are not in the same department, and in a common employment, unless they are subject to the same immediate supervision and control.[2] The same court also considers that the statutes abrogate the common-law rule

[1] *Gulf, C. & S. F. R. Co.* v. *Warner* (1896) 89 Tex. 475, 35 S. W. 364, holding that a switchman is a fellow servant with a switch engineer where the latter has no authority or control over the former and they are members of a switching crew, although they belong to different departments, are employed and discharged by different persons, and the duties of the engineer require skilled labor while those of the switchman do not.

In *San Antonio & A. P. R. Co.* v. *Bowles* (1895; Tex. Civ. App.) 30 S. W. 89, the court, in holding that an engineer and a brakeman upon a railway train are not engaged in the same grade of service, and for that reason are not fellow servants, said: "The duties of the former are much more important and are not different from those of the latter, and their successful performance requires special knowledge and training not necessary to perform the services usually rendered by a brakeman. It is true that the second section of the statute above quoted is awkwardly constructed. Nevertheless, we think the words 'of the same grade,' as used in said section, refer to the common service designated in a previous part of the same section. This is the only construction that will give the phrase just quoted a reasonable and practical meaning." This decision was modified on rehearing in (1895; Tex. Civ. App.) 30 S. W. 727, but not in respect to the point here ruled.

[2] For this reason it was held that an engineer running a train on a railroad under the supervision of the train master at one place is not a fellow servant with a yard engineer in charge of a switch engine under the supervision of the yard master at another place. *San Antonio & A. P. R. Co.* v. *Harder* (1895) 11 Tex. Civ. App. 197, 33 S. W. 373. The court said: "The servant having control of others is first declared to stand in the relation of master to those under him, and then, in defining the relation of other employees to each other, it is provided that, in order to be fellow servants, they must be in the common service, in the same department, of the same grade, working together at the same time and place, and to a common purpose. The servants subjected to the control of different superiors are thus treated as being in separate departments and different services. When we consider that many authorities, including some of the later opinions of our supreme court, had expressed the view that sound reason for the existence of the rule as to fellow servants could only be found in cases where the employees were so situated with reference to each other as to be enabled to exercise over the conduct of each other that watchfulness regarded as essential to the efficiency of the service and the safety of the public, we see that the legislature has adopted that view, and intended to enforce it, in the provisions referred to."

that all employees of the same grade over the whole line are fellow servants, as a matter of law.[3]

Servants may be in the same department, according to the system of nomenclature adopted by the railway company itself, and yet in different departments within the meaning of the statute. The company's liability is determined by the relations which the employees actually bear to each other, and not by the mere names that are given by it to the different branches of the service.[4]

The subjoined rulings will show the construction which has been put upon the statute in actions for the negligence of various employees.[5]

[3] *Galveston, H. & S. A. R. Co.* v. *Worthy* (1895; Tex. Civ. App.) 32 S. W. 557, reiterating opinion in (1894; Tex. Civ. App.) 27 S. W. 426 (reversed on another point by the supreme court), that there was no error in refusing to instruct the jury that the engineer on a through freight train is not, as a matter of law, a fellow servant with the engineer and brakeman of a local freight train operated by the same company, where the evidence showed that the delinquent and injured servants were at no time on the day of the death closer to each other than 20 miles,—the one being in charge of one train, the other of another, the one running a gravel train, the other a local freight.

[4] *San Antonio & A. P. R. Co.* v. *Harding* (1895) 11 Tex. Civ. App. 497, 33 S. W. 373, denying that the two engineers concerned (see note 2, *supra*) were coservants, although they were both in the "motive power department," and so, in a sense, in the same department.

[5] (a) *Recovery allowed on the ground that there was no coservice.* A locomotive engineer is not a fellow servant with the train dispatchers and telegraph operators giving orders for the movement of his train. *Hogan* v. *Missouri, K. & T. R. Co.* (1895) 88 Tex. 679, 32 S. W. 1035.

A brakeman and an engineer belonging to different crews operating different trains on the same division of a railroad are not fellow servants. *Houston & T. C. R. Co.* v. *Patterson* (1899) 20 Tex. Civ. App. 255, 48 S. W. 747, Reiterating Opinion in (1897; Tex. Civ. App.) 40 S. W. 442.

An engineer in charge of a road engine in a railroad yard, temporarily, for the purpose of taking out a train, is not a fellow servant of the foreman and members of the yard crew. *Missouri, K. & T. R. Co.* v. *Whitlock* (1897) 16 Tex. Civ. App. 176, 41 S. W. 407.

A brakeman on a train which has been made up and is about ready to leave the yard and start on its regular trip is not a fellow servant with employees in charge of a switch engine which is not at the time engaged in any service or performing any act in reference to such train. *Patterson* v. *Houston & T. C. R. Co.* (1897; Tex. Civ. App.) 40 S. W. 442.

A switchman on one engine is not a fellow servant of a switchman on another engine. *Galveston, H. & S. A. R. Co.* v. *Masterson* (1893; Tex. Civ. App.) 51 S. W. 1091.

An engineer in charge of an engine doing switch work is not a fellow servant with a fireman on another engine also employed in doing switch work in the same yard, where the crews of the two engines are not working together. *Masterson* v. *Galveston, H. & S. A. R. Co.* (1897; Tex. Civ. App.) 42 S. W. 1001, Writ of Error Denied in (1898) 91 Tex. 383, 43 S. W. 875.

Yard crews are not coservants of train crews. *Gulf, C. & S. F. R. Co.* v. *Williams* (1897; Tex. Civ. App.) 39 S. W. 967; *Houston, E. & W. T. R. Co.* v. *Powell* (1897; Tex. Civ. App.) 41 S. W. 695 (train run at speed exceeding that permitted by ordinance); *International & G. N. R. Co.* v. *Johnson* (1900) 23 Tex. Civ. App. 160, 55 S. W. 772 (brakeman injured by negligence of switchman).

Employees of a railroad company operating a train are not fellow servants with track repairers. *Southern P. Co.* v. *Ryan* (1895; Tex. Civ. App.) 29 S. W. 527; *DeWalt* v. *Houston, E. & W. T. R. Co.* (1900) 22 Tex. Civ. App. 403, 55 S. W. 534.

A car repairer who, at the time of the collision in which he was injured, was

A servant who, after a temporary transfer to another place of work, is injured, after resuming his original duties, by conditions created

on a car, under orders to go to the scene of a wreck to repair cars, is not a fellow servant of either a "hostler" employed to run locomotives to and from a roundhouse, nor of a switchman whose negligence caused the injury. *San Antonio & A. P. R. Co.* v. *Keller* (1895) 11 Tex. Civ. App. 569, 32 S. W. 847.

A night crew engaged in loading railroad ties from a stack on cars on one railroad track are not fellow servants with another crew engaged during the daytime in unloading ties from cars on another track on the opposite side of the stack, and placing them on the stack. *Texas & N. O. R. Co.* v. *Echols* (1897) 17 Tex. Civ. App. 677, 41 S. W. 488 (stack put up by night crew fell).

Trainmen are not fellow servants of laborers engaged in unloading cars. Accordingly, in a case where a servant alleged that a train was backed with such force against a car which he was unloading that he was thrown down and injured, the case is properly submitted to the jury, where, although no witness testified in express terms that the jar or jolt caused by the collision of the two cars was unusual, or that it was caused by imperfect appliances, it was shown that the noise of the impact between the two cars was unusually loud, and that the collision was sufficiently violent to throw plaintiff down upon the floor of the car. *Texas & P. R. Co.* v. *Abernathy* (1900; Tex. Civ. App.) 58 S. W. 175.

An allegation of a pleading that lumber was improperly loaded on a car, or, if properly loaded, was negligently permitted by the servants of the railway to become improperly and unsafely loaded, may authorize the submission of the question of negligence of the railway company in running its train at too high a rate of speed, in a suit to recover for causing the death of a section hand by lumber falling from the car. *Houston & T. C. R. Co.* v. *Speake* (1899; Tex. Civ. App.) 51 S. W. 509.

A brakeman is not a fellow servant of an employee of the railroad company engaged in painting a coal house. *Missouri, K. & T. R.* v. *Collins* (1898) 15 Tex. Civ. App. [illegible] 39 S. W. 150.

A station agent [illegible] not a fellow servant of the members [illegible] a train crew employed at the station in coupling cars to their train. *Gulf, C. & S. F. R. Co.* v. *Calvert* (1895) 11 Tex. Civ. App. 297, 32 S. W. 246.

An engine wiper subject to the control of the foreman of the roundhouse is not a fellow servant of employees of the yard master, although it was in the line of duty of both sets of employees to take coal from the car. *Houston & T. C. R. Co.* v. *Talley* (1896) 15 Tex. Civ. App. 115, 39 S. W. 206.

A section hand returning from work to the tool house to place his tools therein was not a fellow servant with other section men engaged in carrying tools to the tool house on a hand car because doing the same character of work, since the means employed in doing the work differentiated its character; nor was he a fellow servant because working at the same piece of work, since he was carrying his tools without their aid. *Long* v. *Chicago, R. I. & T. R. Co.* (1900) 94 Tex. 53, 57 S. W. 802.

Employees of an inside and of an outside foreman of a roundhouse are not coservants. *Texas & P. R. Co.* v. *Scruggs* (1900) 23 Tex. Civ. App. 712, 58 S. W. 186.

An employee of a railroad company while riding in his employer's car from one place to another in obedience to orders is not a fellow servant with the engineer of the train. *Galveston, H. & S. A. R. Co.* v. *Norris* (1894; Tex. Civ. App.) 29 S. W. 950; *Galveston, H. & S. A. R. Co.* v. *Crawford* (1894; Tex. Civ. App.) 29 S. W. 958; *Galveston, H. & S. A. R. Co.* v. *Leonard* (1894; Tex. Civ. App.) 29 S. W. 955.

Brakemen in the employ of a railway company, who are sent on a train to a certain place, are not fellow servants with the engineer in charge of the engine attached thereto, where they are not operating the train, although they are getting their regular pay and are subject to be ordered to take charge thereof. *Galveston, H. & S. A. R. Co.* v. *Waldo* (1894; Tex. Civ. App.) 26 S. W. 1004.

Members of a bridge gang transported with the material used by them from one point to another as their work demands are not fellow servants of the conductor in charge of the train, where he has nothing to do with the loading and unloading of the cars or the work

during his absence by his former associates, and left unremedied through their negligence, is precluded by the statute from recovering.[6]

The mere fact that the negligent and the injured servants are both exercising superintendence over other men will not prevent their being fellow servants within the meaning of the statute.[7]

of building bridges. *Missouri, K. & T. R. Co.* v. *Hines* (1897; Tex. Civ. App.) 39 S. W. 152, holding that the result was not changed by the fact that the conductor was at the time trying to stop one of the gang from injuring the back of the car.

(b) *Recovery denied on the ground of coservice.*—Railroad employees engaged in switching cars are fellow servants with a car repairer who is injured by the failure of the former to give proper notice before running cars on the repair track on which such repairer is engaged in repairing a car. *Texas & P. R. Co.* v. *Campbell* (1894) 6 S. W. 1104; *Campbell* v. *Texas & P. R. Co.* (1897) 16 Tex. Civ. App. 665, 39 S. W. 1105.

The fact that a train parts into two sections, leaving the conductor upon the rear one, does not create between him and the engineer the same relations as exist between the conductors of different trains, and thus destroy the relation of coservice. *Moore* v. *Jones* (1897) 15 Tex. Civ. App. 391, 39 S. W. 593.

A boiler washer and a hostler employed by, and working under, a roundhouse foreman are fellow servants. *Missouri, K. & T. R. Co.* v. *Whitaker* (1895) 11 Tex. Civ. App. 668, 33 S. W. 716.

A member of a gang engaged in repairing a bridge is a fellow servant with a brakeman of the train which hauls him over the road, partly for the purpose of doing his work. *Dustin & N. W. R. Co.* v. *Beatty* (1894) 6 Tex. Civ. App. 650, 24 S. W. 934. See, however, cases cited at the end of the preceding subdivision of this note.

[6] *Allen* v. *Galveston, H. & S. A. R. Co.* (1896) 14 Tex. Civ. App. 3 et. 37 S. W. 171 (plaintiff was injured by the slipping of a plank, which had not been fastened when it was first laid, and was still in that condition when he returned to his former work).

[7] *Texas & N. O. R. Co.* v. *Tatman* (1895) 10 Tex. Civ. App. 434, 31 S. W. 333. There it was held that the foremen of two yard engines engaged in the same yard for shifting and switching cars are fellow servants. The court said: "The proper construction of the statute is, we think, that a servant intrusted with superintendence and control over another is not a fellow servant with such other; but he may, nevertheless, be a fellow servant with employees over whom he has no such superintendence or control. Where there is no such superintendence or control by one over the other, the question depends upon other provisions of the act. The first section of the act furnishes the rule, where there is superintendence or command, providing that the superior is not a fellow servant with his subordinate, but is a vice principal of the corporation. He stands in the relation of vice principal of the corporation only to those who are under him. The second section of the act provides affirmatively what employees are to be considered fellow servants, excluding all who do not come within the definition. They are defined to be 'all persons who are engaged in the common service of such railway company, and who, while so engaged, are working together at the same time and place to a common purpose, of same grade.' All not thus defined are declared not to be fellow servants. And of those who might otherwise fall within the definition given, the statute excludes those intrusted with superintendence or control over their fellow employees. As to these the rule is declared by the first section, and the second section does not alter that rule, but simply excludes those subject to it from the definition given of fellow servants. The second section also excludes from its definition of fellow servants, employees of the railway corporation engaged in different departments or service of such corporation. Tatman and Holzinger were in the same department of service, and the proviso of the statute just referred to does not apply to them. . . . The question then is, whether or not Holzinger and Tatman were working together at the same time and place, and to a common purpose. It is conceded that they were of the same grade. Both were engaged in moving cars about the yards. Holzinger and his crew were making up a train, and were moving the cars from the main line to the

751a. C[illegible] provisions of Texas statute.—Sec. 4. No contract made between the employer and employee, based on the contingency of injury or death of the employee, limiting the liability of the employer under this act, or fixing damages to be recovered, shall be valid or binding. (This provision is the same as that of sec. 3 in each of the earlier acts.)

Sec. 5. Nothing in this act shall be held to impair or diminish the defense of contributory negligence when the injury of the servant or employee is caused proximately by his own contributory negligence.

Sec. 6. The short duration of the special session of the legislature, and the fact that the existing fellow-servant law is inadequate to accomplish its purposes, and the fact that a large portion of our citizens have no adequate remedy for personal injuries sustained, create an emergency; and an imperative public necessity exists that the constitutional rule requiring bills to be read on three several days be, and the same is, hereby suspended, and that this act take effect and be in force from and after its passage; and it is so enacted.

Approved June 18, 1907.

H. Utah.

751b. Text of statute.—The contents of Rev. Stat. chap. 3, § 358, are as follows:

Sec. 1342. Who are vice principals. All persons engaged in the service of any person, firm, or corporation, foreign or domestic, doing business in this state, who are intrusted by such person, firm, or corporation, as employer, with the authority of superintendence, control, or command of other persons in the employ or service of such employer, or with the authority to direct any other employee in the performance of any duties of such employee, are vice principals of such employer and are not fellow servants.

Sec. 1343. Who are fellow servants. All persons who are engaged in the service of such employer, and who, while so engaged, are in the same grade of service and are working together at the same time and place and to a common purpose neither of such persons being intrusted by such employer with any superintendence or control over his fellow employees, are fellow servants with each other. Provided, That nothing herein contained shall be so construed as to make the employees of such employer fellow servants with other employees engaged in any other department of service of such employer. Employees who do not come within the provisions of this section shall not be considered fellow servants.

switch, when the key of a drawhead broke and the drawhead pulled out, and some of the cars were left standing on the main track, and some of them, with the engine, on the switch track. They had thus been standing for two or three minutes when the collision occurred. Holzinger and his crew were waiting for the car repairer to replace the key, which work, the evidence shows, required only a few minutes. Tatman was also moving cars, intending to pass through the switch to the same siding that was being used by Holzinger. We think they come within the definition given by the statute of those to whom the rules established by the courts as to the liability of the master to his servant for negligence of a fellow servant are still to apply. Each of them being required to do the same kind of work, in the same yard, and at all parts of the yard, and it being, therefore, necessary for each to observe and take cognizance of the movements of the other, both the language and reason of the statute make them fellow servants."

752. Construction of this provision.—Whether or not a workman engaged in the lower tunnel of a mine was a fellow servant of one engaged in the upper tunnel, about 12 feet above, was held to be a question for the jury upon evidence that neither was ordinarily in sight or hearing of the other.[1]

As to the constitutionality of this statute, see § 645, *f*, *ante*.

[1] *Dryburg* v. *Mercur Gold Min. & Mill Co.* (1898) 18 Utah, 110, 55 Pac. 367, declaring it to be gross negligence to remove the waste supporting one upright of a ladder used by workmen in passing from the upper to the lower level of a mine, where it was dark, and the changed condition was not observable to one attempting to pass from the upper level.

753. Scope of chapter.—Another group of statutes which may be conveniently dealt with in the same chapter is composed of those by which all employers, without distinction, or, as is the effect of most of the enactments, railway companies only, have been, either entirely or in regard to certain classes of injuries, deprived of the protection afforded by the defense of common employment.

A. Colorado.

753a. Text of the statute.—Sess. Laws 1901, chap. 67. The contents of this statute are as follows:

An Act to Give a Right of Action against an Employer for Injuries or Death Resulting to His Agents, Employees, or Servants, either from the Employer's Negligence or from the Negligence of Some of His Other Employees, Servants, or Agents, and to Repeal All Acts and Parts of Acts in Conflict Herewith.

Sec. 1. That every corporation, company, or individual who may employ agents, servants, or employees, such agents, servants, or employees being in the exercise of due care, shall be liable to respond in damages for injuries or death sustained by any such agent, employee, or servant, resulting from the carelessness, omission of duty, or negligence of such employer, or which may have resulted from the carelessness, omission of duty, or negligence of any other agent, servant, or employee of the said employer, in the same manner and to the same extent as if the carelessness, omission of duty, or negligence causing the injury or death was that of the employer.

Sec. 2. All acts and parts of acts in conflict herewith are hereby repealed: Provided, however, that this act shall not be construed to repeal or change the existing laws relating to the right of the person injured, or, in case of death, the right of the husband or wife or other relatives of a deceased person to maintain action against the employer.

As to the earlier employers' liability act of this state, see chapter XVII., *ante*.

754. **Effect of this statute.**—This simple and straightforward enactment places the state of Colorado in the honorable position of being the first of the countries in which the common law prevails, to abrogate a doctrine which, as the writer has endeavored to show in an earlier section (475), does not rest upon any satisfactory basis, logical, social, or economic, and which, by relegating the injured person to his action against a coemployee who is [illegible] irresponsible, leaves him, in the great majority of instances, without any prospect whatever of obtaining an adequate indemnity.

B. Florida.

754a. Text of the statute.—Laws 1897, chap. 3744. The contents of this statute are as follows:

Sec. 1. That no person shall recover damages from a railroad company for injury to himself or his property, when the same is done by his consent or is caused by his own negligence. If the complainant and the agents of the company are both at fault the former may recover: but the damages shall be diminished by the jury trying the case, in proportion to the amount of default attributable to him.

Sec. 2. If the person injured is himself an employee of the company, and the damage was caused by another employee and without fault or negligence on the

part of the person injured, his employment by the company shall be no bar to recovery; and no contract which restricts such liability shall be legal or binding.

755. Effect of this section.—In one case it was held that the rights of any servant whose injury was received before this act came into force were governed by the common-law doctrine that a master was not liable to a servant for injuries from the negligence of a coservant in a common work or in the same general employment.[1]

The effect of the provision as to contributory negligence is stated in § 652, *ante*.

C. Georgia.

756. Statute as to railway service.—As to the constitutionality of the statute reviewed below, see § 645, subd. *a*, *ante*.

In 1855 Laws, p. 155, the doctrine of common employment was abrogated as regards servants of railroad companies by the following provision:

Railroad companies are common carriers, and liable as such. As such companies necessarily leave many employees who cannot possibly control those who should exercise care and diligence in the running of trains, such companies shall be liable to such employees as to passengers for injuries arising from the want of such care and diligence.[2]

This provision was subsequently incorporated in the Code of 1860, § 2057; of 1873, § 2057; of 1882, § 2083; of 1895, § 2297.

In view of the industrial conditions which prevailed in Georgia at the date when the act was first passed, the fact that this should have been the earliest of such statutes in any common-law jurisdiction is, as Mr. McKinney observes in his work on Fellow Servants (p. 232), somewhat remarkable.

Under this provision a railroad company is liable for injuries to the person of an employee by the negligence or misconduct of other employees of the company, whether such injuries are connected with

[1] *Parrish* v. *Pensacola & A. R. Co.* (1891) 28 Fla. 251, 9 So. 696, there recovery was denied in a case where the act had come into force while the appeal was pending.

[2] The act of 1856, being only applicable to railroad companies, was held not to confer any rights on employees working on the Western & Atlantic Railroad, which belonged to the state. *Walker* v. *Spullock* (1857) 23 Ga. 436. But the benefits of its provisions were extended to these employees by the act of April, 1863, p. 182. See *Cannon* v. *Barbour* (1866) 34 Ga. 422.

Nor does this provision apply to a case where the injury in suit was received by a laborer in the employ of an independent contractor, owing to the negligent operation of cars furnished to such contractor by the railway company, and entirely under his control. *Central R. & Bkg. Co.* v. *Grant* (1872) 46 Ga. 417.

The act of 1869 repealing the 3d section of the act of 1856, did not repeal

the running of trains or otherwise.[2] The statute has, therefore, extended the liability of railroad companies further than has been done in Iowa, Kansas, and Minnesota. See subtitles D, E, and F of this chapter.

§§ 2054 and 2980 of the Code of 1863, embodying the act of 1855. *Georgia R. & Bkg. Co.* v. *Oaks* (1874) 52 Ga. 410. That act had been repealed or superseded by the act of 1860 adopting the Code, as well as by the adoption of the Code by the Constitution of 1868. *East Tennessee, V. & G. R. Co.* v. *Duggan* (1874) 51 Ga. 212.

Thompson v. *Central R. & Bkg. Co.* (1875) 54 Ga. 509.

The doctrine thus established was reaffirmed in *Georgia R. Co.* v. *Ivey* (1881) 73 Ga. 499 (injury received in shops). The court thus disposed of the contention that the doctrine of *stare decisis* did not bear on the case: "A construction of a statute in reference to the legal status of all employees of railroad companies, in their relations to other employees and to the corporations, was given in that case [*i. e.* the *Thompson Case*] by a unanimous bench, and became settled law; it entered into every contract between master and servant; it fixed the liability of the master for the default of a coemployee in case of some by the servant hurt; it took railroad companies without the ordinary rule of the liability of the master to his servant; it made the corporation, on the one hand, more careful to employ competent fellow servants, and the injured servant more cautious in his own acts so as to be free of all fault himself; and thus the master when he contracted with employees, and the employee when he engaged to work with his master, the railroad corporation, contracted with each other in the light of this law as construed by this court."

Later cases in which the same doctrine was again applied are these: *Georgia R. & Bkg. Co.* v. *Brown* (1890) 86 Ga. 320, 12 S. E. 812 (piece of timber fell on foot of servant working in shop); *Georgia R. & Bkg. Co.* v. *Hicks* (1894) 95 Ga. 301, 22 S. E. 613 (injury received in putting a line of gas pipe on the ceiling of a car shop); *Georgia R. & Bkg. Co.* v. *Miller* (1892) 90 Ga. 571, 16 S. E. 939 (holding that a charge to the effect that the plaintiff could not recover unless his injuries were connected with the running of trains had been properly refused).

A railroad company is liable for the death of a yardmaster who was under the orders of the superintendent, and who, without fault on his own part and in obedience to the directions of such superintendent, to break into a gasroom to extinguish a fire, was killed by the walls falling in upon him, where the superintendent knew or ought to have known of the danger in which he was placed. *Augusta Factory* v. *Hill* (1889) 83 Ga. 709, 10 S. E. 450.

The questions whether the kicking of a hand car following another, by one sitting upon the forward car, to prevent it from running into the latter, was such an act of negligence as would render the railroad company liable for injury to a fellow servant by the subsequent derailing of the car, and whether the injured person himself put in motion the chain of events which led to the injury by the manner in which he ran the cars, and whether the kicking of such car was sufficient to account for the derailment of the front car,—are for the jury where there is evidence each way. *Smith* v. *Southern R. Co.* (1896) 75 Fed. 103 (verdict for defendant upheld).

A nonsuit is erroneous where there is evidence tending to show that the injury was caused by the negligence of a fellow servant, although there may be some testimony tending to show that when the plaintiff was hurt he was a vice principal of the defendant company. *Chandler* v. *Southern R. Co.* (1901) 113 Ga. 130, 38 S. E. 305.

There is no error in refusing to charge that a railroad employee is prevented from recovering from his employer for an injury because the negligence of a coemployee was the sole cause thereof. *Georgia R. & Bkg. Co.* v. *Cosby* (1895) 97 Ga. 299, 22 S. E. 912.

Where a rule of the company enjoins upon a coemployee of the plaintiff the performance of a particular duty, such coemployee is bound to exercise ordinary care in the discharge of that duty. It is not cause for reversal that the court charged the jury that, if such coemployee failed to exercise ordinary care in discharging such duty, they "ought to find the defendant company negligent in

It has also been held that the benefit of the provision is not restricted to employees who cannot control those whose function it is to operate trains.[3]

By the Code of 1873 it was further provided as follows:

Sec. 3033. A railroad company shall be liable for any damage done to persons, stock, or other property by the running of the locomotives, or cars, or other machinery of such company, or for damages done by any person in the employment and service of such company, unless the company shall make it appear that their agents have exercised all ordinary and reasonable care and diligence—the presumption in all cases being against the company. The same provision is found in Code of 1882, § 3033, and in Code of 1895, § 2321.

Sec. 3036. If the person injured is himself an employee of the company, and the damage was caused by another employee, and without fault or negligence on the part of the person injured, his employment by the company shall be no bar to the recovery. The same provision is found in the Code of 1882, § 3036, and in Code of 1895, § 2323.[4]

757. Effect of these sections.— Under § 3033 alone, an employee of a railroad company would not be entitled to recover damages for an injury sustained by him, caused by the negligence of other employees of the company. Without §§ 2083 and 3036, he would be under the common-law rule, and could not maintain an action.[1] But the effect of these three sections, when construed together, is that, when the plaintiff shows that the injury was inflicted through the negligence of a fellow servant engaged in and about the common employment, and without fault on the part of the former, the burden is cast upon the company of showing only that its servants exercised ordinary and reasonable care. An instruction to the jury which imposes upon the

that regard." *Western & A. R. Co.* v. *Bussey* (1894) 95 Ga. 584, 23 S. E. 207.

In a suit against a railroad on account of the homicide of an employee, an allegation that the company did the negligent or careless act which caused the homicide, or omitted the diligence which would have prevented it, is sufficient, and is equivalent to an allegation that the coemployees of the deceased were guilty of such negligence. *Central R. Co.* v. *Crosby* (1885) 74 Ga. 737, 58 Am. Rep. 463.

When construed in connection with this provision as to railways, § 2971 of the Code, which gives a widow an action for the homicide of her husband, precludes recovery for a death caused by the negligence of a fellow servant, unless the homicide amounted to a crime in the delinquent servant, either murder or manslaughter of some grade. *Daly* v. *Stoddard* (1880) 66 Ga. 145.

[3] *Georgia R. & Bkg. Co.* v. *Goldsmith* (1876) 56 Ga. 196, negativing the theory that trainmen were not within the purview of the statute, as they can control the conductor and engineer by reporting them for neglect of duty.

[4] This section was not repealed by the act of 1869 repealing the act of 1856. The act of 1856 had been repealed or superseded by the act of 1860 adopting the Code, as well as by the adoption of the Code by the Constitution of 1868. *East Tennessee, V. & G. R. Co.* v. *Daggon* (1874) 51 Ga. 212.

[1] *Campbell* v. *Atlanta & R. Air Line R. Co.* (1873) 53 Ga. 188.

A charge with reference to this section, that the company is liable for damage "to" any person in the employment of the company, is erroneous. *Western & A. R. Co.* v. *Vandiver* (1890) 85 Ga. 670, 11 S. E. 781.

defendant the superadded duty of showing how the casualty occurred is erroneous.[2]

The effect of the clause as to the absence of contributory negligence is discussed in § 652, *ante*.

758. Provision declaratory of the doctrine of common employment.—The doctrine of common employment is embodied in the following provision:

> The principal is not liable to one agent for injuries arising from the negligence or misconduct of other agents about the same work. Code of 1873, § 2202; Code of 1882, § 2202; Code of 1895 § 3030.

In the Code of 1895, § 2610, the following provision was also added:

> Except in case of railroad companies, the master is not liable to one servant for injuries arising from the negligence or misconduct of other servants about the same business.

These provisions operate as an explicit declaration of what is obviously a matter of necessary inference from the others already commented on in the preceding sections, *viz.*, that the common-law rule as to coservice is applied in Georgia in all cases except those in which a railroad employee is injured. The particular form under which that rule prevails in this state has already been considered in former chapters. See chapter XXVII., subtitle B, and the summary in § 549, *ante*.[1]

[2] *Georgia R. & Bkg. Co.* v. *Hicks* (1894) 95 Ga. 301, 22 S. E. 613.

A charge to the effect that, under this section, the onus of proving that ordinary care was exercised is upon the railway company when a person in its employ is injured by the negligence of a coservant, is erroneous. *Western & A. R. Co.* v. *Vandiver* (1890) 85 Ga. 470, 11 S. E. 781, laying it down that the presumption is not against a railway company when the servant injured is connected with the act which caused the injury unless he shows his freedom from fault.

[1] The statute is not applicable to a lumber company operating cars on a track for the purposes mainly of its own business; and even though it does on some occasions transport passengers and freight for hire, it is not a railway company, within the purview of that statute, so as to render it liable to a track repairer who is injured by a movement of the locomotive at a time and upon an occasion when it is in no sense engaged in transacting business as a public carrier. *Ellington* v. *Beaver Dam Lumber Co.* (1893) 93 Ga. 53, 19 S. E. 21; *White* v. *Kennon* (1889) 83 Ga. 313, 9 S. E. 1082; *Railey* v. *Garbutt* (1900) 112 Ga. 288, 37 S. E. 360 (woodcutter injured by negligence of engineer).

No recovery can be had where an operative in a cotton factory is injured by the negligence of a workman having charge of two others in the picker room. *McGovern* v. *Columbus Mfg. Co.* (1887) 80 Ga. 227, 5 S. E. 492.

A servant whose duties were to stand on a scaffold used in the construction of a building, and receive and detach timbers from the derrick when they were sufficiently elevated for the use intended, was a fellow servant of one who stood on the ground and operated the derrick, where the evidence shows that they were under one common employment and received orders from another as superintendent of the entire construction, although it may also be proved that the person who operated the derrick was invested with authority to

D. Iowa.

758a. Statutory provisions.—As to the constitutionality of the statute reviewed below, see § 646, *ante*. By Laws 1862, chap. 169, § 7, it was provided as follows:

"Every railroad company shall be liable for all damages sustained by any person in consequence of any neglect of the agents, or by any mismanagement of the engineer or other employee of the corporation, to any person sustaining such damage."

This act was superseded by chapter 65, § 1, of the Laws of 1872, to the following effect:

Every corporation and person owning or operating a railroad in this state shall be liable for all damages sustained by any person in consequence of the wilful wrongs, whether of commission or omission, of their agents and employees, when such wilful wrongs are in any manner connected with the use and operation of any railroad so owned or operated, on or about which they shall be employed.

By the Code of 1873, § 1307, this provision was modified so as to read thus:

Every corporation operating a railway shall be liable for all damages sustained by any person, including employees of such corporation, in consequence of the neglect of agents, or by any mismanagement of the engineers or other employees of the corporation, and in consequence of the wilful wrongs, whether of commission or omission, of such agents, engineers, or other employees, when such wrongs are in any manner connected with the use and operation of any railway on or about which they shall be employed; and no contract which restricts such liability shall be legal or binding. Same provision in McClain's Anno. Code, § 2002, and Code of 1897, § 2071.

A construction company which is engaged in building a railway, and is for that purpose running gravel trains, is operating a railway within the meaning of the statute.[1]

direct how and when the elevation of the timbers should be made. *Gunn* v. *Willingham* (1900) 111 Ga. 427, 36 S. E. 804.

A mason and a carpenter working on the same building are coservants. *Keith* v. *Walker Iron & Coal Co.* (1888) 81 Ga. 49, 12 Am. St. Rep. 296, 7 S. E. 866.

It has been held with special reference to § 2610 of the Code of 1895, that the master is not liable to one servant for injuries arising from the negligence of another servant about the same business, though they may be employed in different departments of business, and so far removed from each other that one can in no degree control or influence the conduct of the other. *Brush Electric Light & P. Co.* v. *Wells* (1900) 110 Ga. 192, 35 S. E. 365 (engineer of power house of electric company held to be fellow servant of lineman).

Another recent ruling is that a complaint averring that plaintiff's husband was a night watchman in the employ of defendant, who was operating a saw mill, and was killed by the explosion of a boiler used in running the mill, which was occasioned by negligence of an engineer having charge of the boiler, fails to state a cause of action. *McCosker* v. *Holton & D. Lumber Co.* (1900) 110 Ga. 328, 35 S. E. 369.

[1] *McKnight* v. *Iowa & M. R. Constr. Co.* (1876) 43 Iowa, 406.

But it does not enure to the benefit of the employees of independent contractors engaged in constructing a railway, where the injury complained of was caused by the acts of servants of the railway company.[2]

759. What injuries are within the purview of the statute.— The class of acts for which railroad companies were rendered liable by the act of 1862 is held to have been narrowed by the amendment of the law in 1873. The words "such wrongs," in the limiting clause of the second act, are deemed not to relate alone to the wilful wrongs spoken of in the preceding clause, but also to the mismanagement and negligence spoken of in a preceding clause.[1] Under this construction the liability of the companies, which, by the unrestricted terms of the act of 1862, extended to any negligence whatever which their employees might commit in the course of their employment, is now limited to "such damages as are occasioned by the negligence or mismanagement or wilful wrongs of its employees which are connected with the use and operation of the railroad on or about which they are employed." [2] In the case cited it was argued that the employment of the plaintiff was entire, and that, as part of his service related to the business of operating the road, he had his remedy under the statute, even though the injury was not sustained while in the performance of that particular part of the service. The court, in rejecting this theory, said: "The subsequent legislation has established a new rule as to the class of acts for which the companies are liable. So that to entitle an employee now to recover against the company for injuries which he has sustained in consequence of the negligence, or mismanagement, or wilfulness of a coemployee, he must show (1) that he belonged to the class of employees to whom the statute affords a remedy, and (2) that the act which occasioned the injury was of the class of acts for which a remedy is given."

To bring a case within the statute it is not necessary to show that the injured person was actually engaged in the operaton of the road. Its provisions take effect wherever it appears that the injury was caused by the operation of the road.[3]

[1] Voy v. *Dubuque & S. C. R. Co.* (1866) 20 Iowa, 347.

[2] *Foley* v. *Chicago, R. I. & P. R. Co.* (1884) 64 Iowa, 644, 21 N. W. 124.

[3] *Malone* v. *Burlington, C. R. & N. R. Co.* (1884) 65 Iowa, 417, 54 Am. Rep. 11, 21 N. W. 756.

[4] *Pierce* v. *Central Iowa R. Co.* (1887) 73 Iowa, 140, 34 N. W. 783. The court said: "The statute is not construed to mean that actions can be maintained by trainmen only, or by men whose employment is such as pertains to the running of trains. . . . There is language in some of the cases which seems to imply that the statute embraces only those who are engaged in the actual operation of a railroad in running the trains. But that the right of action is not thus limited is apparent. Track men, switch tenders, and others whose duty requires them to be upon the track are more or less exposed to the hazards of the business of railroading, and such

The subjoined note indicates the classes of employees who are, and those who are not, deemed to be entitled to recover under this broad construction of the statute.[4]

employees, when injured by the use or operation of the road and by the negligence of coemployees, are as plainly within the provisions of the statutes as those whose duty requires them to assist in the running of trains. We think the proper test in determining the question is, Does the duty of the employee require him to perform service which exposes him to a hazard peculiar to the business of using and operating a railroad? If it does, and if, while in the line of his duty, he by the negligence of a coemployee receives an injury from a passing train or from other appliances used in the use and operation of the road, he may recover." *Pyne* v. *Chicago, B. & Q. R. Co.* (1880) 54 Iowa, 223, 37 Am. Rep. 198, 6 N. W. 281.

"The cases are all grounded upon the view that the statute applies when the employment and the wrong are connected with the handling of railroad machinery moved upon railroad tracks." *Larson* v. *Illinois C. R. Co.* (1894) 91 Iowa, 81, 58 N. W. 1076.

A railroad company, therefore, is held liable whenever the injured person was one who was "exposed by the nature of his employment to the peculiar hazards" incident to the operation of railways (*Butler* v. *Chicago, B. & Q. R. Co.* [1893] 87 Iowa, 206, 54 N. W. 208); or who was, by the nature of his employment, exposed to the hazards incident to moving trains, even though he may not have been engaged in operating them (*Smith* v. *Hameston & S. R. Co.* [1889] 78 Iowa, 583, 43 N. W. 545); or who, "in the performance of the duties of his employment was necessarily exposed to all of the ordinary risks and dangers which arise from the operation of the trains" (*Handelan* v. *Burlington, C. R. & N. R. Co.* [1887] 72 Iowa, 709, 32 N. W. 4).

[4](a) *Employees held to be within the statute.*—That the statute is applicable to members of train crews is, of course, beyond dispute. The essential questions in cases where such employees are injured are merely whether the coservant was, as matter of fact, negligent, and whether the injured servant was himself in fault.

Whether, under the circumstances, the conductor of a train was negligent in applying the brake when he did, whereby a brakeman engaged in cutting the train while running slack was injured, was held to be a question for the jury in *Dunlavy* v. *Chicago, R. I. & P. R. Co.* (1885) 66 Iowa, 435, 23 N. W. 911.

A rule by which conductors are "cautioned as to flying switches," and directed to "avoid such switching even if it increases their work," is advisory merely, and does not forbid such switches. The fact, therefore, that a conductor orders a brakeman to make such a switch is not such negligence as will render the company liable for injuries to the latter. *Youll* v. *Sioux City & P. R. Co.* (1885) 66 Iowa, 346, 23 N. W. 736.

Where detached cars are following a short distance behind a train, a conductor and brakeman are negligent in not soon discovering the detachment and in not being on top of the cars. *Farley* v. *Chicago, R. I. & P. R. Co.* (1881) 56 Iowa, 337, 9 N. W. 230.

The facts that a freight train standing at a station started while the conductor was attending to business inside of the station, supposing the brakes to have been sufficiently set, he himself not having set the brakes; and that the cars collided with other detached cars, killing a brakeman thereon,—do not show negligence on the conductor's part. *Brady* v. *Burlington, C. R. & N. R. Co.* (1887) 72 Iowa, 53, 33 N. W. 380.

A verdict for the plaintiff is justified by evidence showing that he was employed on a construction train and in the discharge of his duty walked to the rear of the train while it was in motion, that, when within 5 feet of the last car in front of the caboose the latter was uncoupled by the conductor, and that at a signal the engineer caused a sudden jerk which threw the plaintiff from the car, and he was run over. *Jones* v. *Keokuk & D. M. R. Co.* (1881) 56 Iowa, 546, 9 N. W. 884.

Negligence of which a locomotive fireman, injured by falling from the engine as cars attached to it came in contact with standing cars, may complain, cannot be predicated of the act of a trainman in giving a signal indicating a longer distance to the point of coupling than should have been indicated, where the signals were only designed to indicate in a general way the distance to be traversed before reaching the coupling

point, and the trainman did not know, and had no reason to expect, that the fireman was in a place of danger. *Kelsey* v. *Chicago & N. W. R. Co.* (1898) 106 Iowa, 253, 76 N. W. 670.

The fact that a brakeman's foot was caught in a rail so that he could not escape, as he otherwise might have done, from a car which was driven over him, will not excuse the company, if the manner in which the cars were moved betokened negligence irrespective of the brakeman's actual condition, whether he was free to get out of the way or not. *Burns* v. *Chicago, R. I. & P. R. Co.* (1882) 58 Iowa, 150, 12 N. W. 222.

A delay by trackmen of a little over twenty minutes after the commencement of a storm, in inspecting the track as required by a rule of the company in case of a storm, does not constitute negligence which will support an action for injuries to an employee, caused by the engine catching up a limb which had been blown upon the track. *Cox* v. *Chicago & N. W. R. Co.* (1897) 102 Iowa, 711, 72 N. W. 301.

Employees in charge of an engine have the right to assume that a switchman who has attempted to mount on the front footboard for the purpose of making a switch has succeeded in doing so, where he is hidden from their view by the boiler; and they are not required to stop the engine to ascertain whether or not he has done so. *Ferguson* v. *Chicago, M. & St. P. R. Co.* (1897) 100 Iowa, 733, 69 N. W. 1026.

Employees operating a switch engine, whose duty it is to be on the lookout for employees on or near the tracks, and to warn them of the approach of the engine by ringing the bell or blowing the whistle or in some other manner, are not, as matter of law, free from negligence toward an employee walking along the track in the course of his duty, where no signal of any kind is given of the approach of such engine. *McLeod* v. *Chicago & N. W. R. Co.* 1897) 101 Iowa, 139, 73 N. W. 614.

Recovery has been allowed where the injury was received by the following employees engaged in working on or near the track under the circumstances indicated:

A foreman of a bridge gang whose duty it was to set out a slow flag on the approach of a train, if the condition of the track over the bridge required it. *Keathley* v. *Illinois C. R. Co.* (1897) 103 Iowa, 282, 72 N. W. 545 (freight car left the track and fell on plaintiff).

One employed to carry water to railroad employees working near the approach of a bridge, and to perform such other services as the foreman shall direct, the injury being caused by the negligent running of a train at a dangerous speed across the bridge, which is untinished and insecure. *Keathley* v. *Illinois C. R. Co.* (1895) 94 Iowa, 685, 63 N. W. 560.

A car inspector whose duty required him to go under all cars. *Canoa* v. *Chicago, M. & St. P. R. Co.* (1897) 101 Iowa, 613, 70 N. W. 755.

Men employed to remove ashes, etc., from locomotives, to supply them with water and sand and to couple locomotive tanks forming a necessary part of a train, so that they could be moved to their proper place for train service. *Ruther* v. *Chicago, R. & Q. R. Co.* (1893) 87 Iowa, 206, 54 N. W. 208 (injury received while coupling the tanks).

A person employed in a railway car shop, who, while on a ladder leaning against one of the cars in a train, was injured by the negligence of employees in charge of the train in moving it without notice. *Perea* v. *Central Iowa R. Co.* (1887) 73 Iowa, 140, 34 N. W. 783.

One whose duty it was to operate a turntable. *Malone* v. *Burlington, C. R. & N. R. Co.* (1884) 65 Iowa, 117, 54 Am. Rep. 11, 21 N. W. 756 (remarks in the opinion; for actual decision, see subd. 4b), *supra*.

A detective injured, while in the discharge of his duty, by the negligence of an engineer. *Pyne* v. *Chicago, R. & Q. R. Co.* (1880) 54 Iowa, 223, 37 Am. Rep. 198, 6 N. W. 281 (complaint held not demurrable which alleged that he set out to walk along the track to a house in compliance with the orders of the defendant's agent, and, being prostrated by sunstroke, was run over while in a state of insensibility).

A laborer working in connection with a construction train, who, although he was engaged exclusively in shoveling gravel and had nothing to do with the management of the train, was shoveling gravel from the train and was therefore not less dependent for his safety upon the skill and fidelity of those who were managing it, than if part of the management devolved upon himself. *McKnight* v. *Iowa & M. R. Constr. Co.* (1876) 43 Iowa, 406 (injury caused by sudden starting of train).

An employee whose duty it was to assist in loading and unloading gravel cars, and to perform any other service required of him in or about such work and to ride to and fro on the gr-

cars. *Handelan* v. *Burlington, C. R. & N. R. Co.* (1887) 72 Iowa, 709, 32 N. W. 4.

A laborer who was engaged in shoveling earth on flat cars which carried it to a place where it was used in making an embankment, and who sometimes went with the train to unload the earth, and at other times remained behind while the train was absent, and helped to undermine the bank which was being excavated. *Deppe* v. *Chicago, R. I. & P. R. Co.* (1872) 36 Iowa, 52 (bank fell on the plaintiff). "It is true," that the court, the plaintiff "was not injured while, or by, operating the train; but neither the act itself nor the constitutional limitation requires us to put this very narrow construction upon it. The plaintiff was employed for the discharge of a duty which exposed him to the perils and hazards of the business of railroads; and although the injuries did not arise from such hazards, they can not be separated from the employment. If the plaintiff had been employed exclusively for shoveling or loading the dirt he could not recover, although he might have ridden to and from his work on the cars." This decision was declared to be correct in *Malone* v. *Burlington, C. R. & N. R. Co.* (1884) 65 Iowa, 417, 54 Am. Rep. 11, 21 N. W. 756, though it was pointed out that some of the expressions used in the opinion were no longer authoritative under the later act.

A laborer employed in the working of a ditching machine on a railroad, which was operated by moving along the track the train of which it formed a part. *Nelson* v. *Chicago, M. & St. P. R. Co.* (1887) 73 Iowa, 576, 35 N. W. 611 (plaintiff was struck by the crank of a windlass used to lower the scoop bucket). The court said: "The ditching machine is altogether unlike a steam shoveler, or a dredge worked by a stationary engine. It was propelled by a moving engine upon the track of the road. It is true, the plaintiff was not injured by contact with the wheels of a car or engine; but this was not necessary in order to entitle him to recover, because it is equally true that, if the car had not been in motion at the time, it would have been useless to raise or lower the bucket or shovel. It was the movement of the train that made it necessary to lower the rear end of the bucket. It was not necessary, to maintain the action, that the plaintiff should be an employee engaged in the actual movement of the train, as an engineer, brakeman, or conductor. It is sufficient if he was one of the crew necessary for the performance of the work intended to be done by the train and its machinery and appliances."

The foreman of a crew working a pile-driver car. *Houser* v. *Chicago, R. I. & P. R. Co.* (1882) 60 Iowa, 230, 3 Am. Rep. 65, 14 N. W. 778. The injury in this case was caused by the fall of a gin pole, so that the decision seems of doubtful correctness. See authorities cited, *infra*.

One of two employees engaged in filling tenders with coal from cars upon an adjoining track, the injury being caused by the negligence of the other employee in pushing into the coal car a plank extending from the coal car to the tender and used in filling the tender after the work had been completed and the engine was about to start. *Keegan* v. *Chicago, R. & Q. R. Co.* (1898) 104 Iowa, 54, 73 N. W. 676.

A person employed to travel on a train, and to remove snow and ice at various points from the track of the railway, is entitled to recover for injuries resulting from the negligence of the employees of the road, although the train was not in motion at the time of the accident, and he was not then engaged in the duties required of him. *Smith* v. *Hamilton & S. R. Co.* (1880) 58 Iowa, 583, 43 N. W. 545.

In a case where a workman engaged in taking down a bridge was injured while traveling on the train which was transporting the timbers to the place where they were to be deposited, it was held that the case was properly left to the jury, with instructions to the effect that, if the plaintiff was employed for the purpose of taking down and moving the bridge, and in doing this work a train was used on defendant's road upon which plaintiff, in the course of his employment and in obedience to the requirements of his superior, was riding at the time he sustained the injury, he was engaged in operating the road, and that if the negligence of the defendant and the care of the plaintiff were found the defendant was liable under the statute. The court said that the purpose for which the train was operated could not relieve the defendant from liability if the injury was sustained in its operation. *Schroeder* v. *Chicago, R. I. & P. R. Co.* (1877) 47 Iowa, 375. First Appeal (1875) 41 Iowa, 344.

Recovery has been allowed where an accident occurred to a section man while he was engaged in track repairing

Hadee v. *Sioux City & P. R. Co.* [1894] 92 Iowa, 226, 60 N. W. 537 [section foreman, after stepping on the track after the first section of a train had passed, was struck down by the second section, the approach of which he had no reason to expect]); and while he was trying to remove a hand car from the track (*Brands* v. *Chicago, R. I. & P. R. Co.* [1873] 36 Iowa, 372); and while he was traveling on freight cars loaded with material for ballasting, which was to be unloaded at a specified place (*Rayburn* v. *Central Iowa R. Co.* [1888] 74 Iowa, 637, 35 N. W. 606, 38 N. W. 529 [plaintiff while getting on a car was thrown off by sudden jerk]); and while he was traveling on a hand car (*Smith* v. *Chicago G. W. R. Co.* [1890; Iowa] 80 N. W. 658 [collision with another hand car]; *Larson* v. *Illinois C. R. Co.* [1894] 91 Iowa, 81, 58 N. W. 1076 [similar accident]).

In the last cited case the court said: "It is true . . . that running hand cars is not attended with the same degree of danger that attends the running of engines and trains of cars; yet instances of serious accidents in that service are numerous. They are not so noticeable as other railroad accidents, because fewer persons are exposed and the casualties are less. It is probable that, if the introduction of railroads had brought no greater perils than attend the movements of hand cars, the rule of the common law would not have been changed. It has been changed, and we think, so as to include such a case as that stated in plaintiff's petition."

An employee who received an injury while riding on a small and overcrowded hand car, owing partly to the company's failure to provide the hand car with appliances for removing snow from the rails and a proper brake and foot rests, and partly to the negligent construction of the cattle guard, is within the statute. *Chicago, M. & St. P. R. Co.* v. *Ivtery* (1890) 137 U. S. 507, 34 L. ed. 747, 11 Sup. Ct. Rep. 129. The court said: "The plaintiff was upon a moving car propelled by hand power. The movement of the car, its speed, the position of the plaintiff upon it, and the duties he had to discharge in that position, were under the direction of the foreman, who was upon the same car. The injury was directly connected with the use and operation of the railway, in whose common service the foreman and the plaintiff were, and they were coemployees. . . . The railway was being used and operated in the movement of the hand car, quite as much as if the latter had been a train of cars drawn by a locomotive. If a single locomotive be on its way to its engine house, after leaving a train which it has drawn, or if it be summoned to go alone for service to a point more or less distant, and, in either case, by the negligence of one employee upon it, another employee is injured, the injury takes place in the use and operation of the railway, under § 1307, quite as much as if it takes place while the locomotive is drawing a train of cars. This we understand to be the manifest purport and effect of the decisions of the supreme court of Iowa on the subject, as well as obviously the proper interpretation of the statute."

A jury may properly find a foreman in charge of a hand car guilty of negligence where, upon the car's coming up behind another traveling much more slowly, he gave the signal to slacken speed, by motion merely, and not by speaking to the brakeman to the end that there might be no misunderstanding. *Lombard* v. *Chicago, R. I. & P. R. Co.* (1877) 47 Iowa, 494.

Although section hands incur more than ordinary danger where they are taken over a road in a hand car when a train is overdue, their safety is not of such paramount importance that a section boss must necessarily be pronounced guilty of negligence, if he has exposed them to that danger. *Campbell* v. *Chicago, R. I. & P. R. Co.* (1876) 45 Iowa, 76, disapproving instructions which implied that such a course was negligent if it involved "more than ordinary danger."

An engineer of a special train was not guilty of negligence in running down a hand car proceeding in the same direction and operated by employees whose backs were toward the train, where he gave all the signals that diligence required, appreciating the fact that a strong wind then blowing might prevent his signals from being heard and used every appliance and effort at his command to stop the train as soon as he had reason to believe that his signals had not been heard. *Nelling* v. *Chicago, St. P. & K. C. R. Co.* (1895) 98 Iowa, 534, 63 N. W. 568. On the second appeal the rule was laid down that a railroad engineer has a right to assume that a section man will perform his duty in watching for trains, and is under no obligation "to check his train on seeing him and another section man

An injured employee is none the less entitled to the benefit of the statute, for the reason that the person by whose negligence he was injured was under his control.[5]

on a hand car on the track, until it is reasonably apparent that they are not likely to clear the track in time." *Welling* v. *Chicago, St. P. & K. C. R. Co.* (1896) 98 Iowa, 559, 67 N. W. 404.

A railroad company is not liable for an injury to an employee caused by the starting of a hand car by a fellow servant while the former's hand was in a dangerous position, when no one knew of its position, and the car was started without directions from the foreman. *Hamilton* v. *Chicago, R. I. & P. R. Co.* (1894) 93 Iowa, 66, 61 N. W. 415.

(b) *Employees not deemed to be within the statute.* — A section hand injured while loading timber on a car. *Smith* v. *Burlington, C. R. & N. R. Co.* (1882) 59 Iowa, 73, 12 N. W. 763.

A car repairer who, although he was at times required to take passage upon the caboose of a freight train, or in a passenger car, to ride to his work, was not required to engage in his employment at points where these were moving trains. *Fales* v. *Chicago, R. I. & P. R. Co.* (1884) 64 Iowa, 644, 21 N. W. 124 (injury caused by the fall of a car which was being elevated by jack-screws), distinguishing *Doppe* v. *Chicago, R. I. & P. R. Co.* (1872) 36 Iowa, 52 (see above), on the ground that in that latter case part of plaintiff's duties were peculiar to the operation of a railroad, he being one of the force necessary to make the crew of a construction train. Special stress was laid on the *dictum* in that case that, if the plaintiff "had been employed exclusively in shoveling or loading the dirt he could not recover, although he might have ridden to and fro from his work on the cars."

A member of a construction gang, whose duties required him to go and ride upon, and to work upon and about, cars and tracks. *Watson* v. *Chicago, R. I. & P. R. Co.* (1885) 68 Iowa, 22, 25 N. W. 911 (plaintiff was injured by a heavy stone thrown by a coemployee while the gang were raising ties).

One employed in a railway coal house, where the injury resulted from the negligence of a coemployee while coal was being loaded on a car. *Luce* v. *Chicago, St. P. M. & O. R. Co.* (1885) 67 Iowa, 75, 24 N. W. 600.

An employee handling a derrick used in coaling an engine. *Reddington* v. *Chicago, M. & St. P. R. Co.* (1899) 106 Iowa, 96, 78 N. W. 800, Reversing on Rehearing (1898) 75 N. W. 679. Distinguishing *Hixson* v. *Chicago, R. & Q. R. Co.* (1898) 106 Iowa, 51, 75 N. W. 676.

One whose sole duty is to elevate coal to the platform convenient for delivering it to the tenders of the engines. *Strokle* v. *Chicago, M. & St. P. R. Co.* (1886) 70 Iowa, 555, 59 Am. Rep. 91, 31 N. W. 63 (steps leading to platform gave way).

Workmen employed in the machine shops. *Potter* v. *Chicago, R. I. & P. R. Co.* (1877) 46 Iowa, 399.

A sweeper in a roundhouse injured by falling into a hole which he alleged was negligently left uncovered by other employees. *Hanson* v. *Red River R. & N. R. Co.* (1884) 64 Iowa, 240, 20 N. W. 169.

One engaged in wiping locomotive engines, opening and closing doors of the engine house, and removing snow from a turntable and the tracks. *Walters* v. *Burlington, C. R. & N. R. Co.* (1884) 65 Iowa, 417, 54 Am. Rep. 11, 21 N. W. 756 (where recovery was denied for an injury received, not in working the turntable, but in closing the doors).

Where an employee, while preparing to couple cars, was caught by the foot between the guard rail and one of the rails of the track, and, being unable to extricate himself, made outcries which were heard by a fellow brakeman who caused the train to be stopped, but not in time to prevent such employee from being run over, judgment upon a verdict for plaintiff was reversed, there being nothing whatever to show negligence on the part of defendant's employees. *Yard* v. *Central Iowa R. Co.* (1886) 69 Iowa, 327, 21 N. W. 587, 29 N. W. 755.

[5] In *Honsee* v. *Chicago, R. I. & P. R. Co.* (1882) 60 Iowa, 230, 46 Am. Rep. 65, 14 N. W. 778, where the foreman of a bridge gang was the plaintiff, the court said: "The statute authorizes recovery by employees for the negligence of other employees is very broad and general in its terms. It makes no distinction as to the character of the employment, or the station or grade of the employee. If we should hold that

An instruction to the effect that a railway company is bound, under the statute, to see that extraordinary diligence and care are exercised by coemployees is erroneous.[6]

It has been held that a complaint in an action on this statute should state that the negligence of an employee is relied on as the cause of action, and also what employee was negligent. In the case cited, the court refused to discuss whether allegations charging a railroad company with negligence could be supported by evidence of the negligence of a coemployee.[7]

E. Kansas.

759a. Statutory provisions.—As to the constitutionality of the statute reviewed below, see § 647, *ante*. The statute as first enacted in this state ran thus:

Every railroad company organized or doing business in this state shall be liable for damages done to any employee of such company, in consequence of any negligence of its agents, or by any misunderstanding of its engineers or other employees, to any person sustaining such damage. (Stat. 1874, chap. 93, § 1.)

The provision now in force (Gen. Stat. 1889, ¶ 1251; Gen. Stat. 1897, chap. 70, § 15) is substantially the same:

Every railroad company organized or doing business in this state shall be liable for all damages done to any employee of such company in consequence of any negligence of its agents, or by any mismanagement of its engineers or other employees, to any person sustaining such damage.

The operation of this statute is confined strictly to railroad corporations. A partnership of private persons engaged in constructing a road is not within its purview, although it is operating cars and trains in the prosecution of its work, having servants and employees at work upon the road and in charge of the trains.[1]

760. What injuries are within the scope of the statute.— The Kansas statute is couched in language very similar to that found in the first Iowa act, upon which it is avowedly based. In Kansas, therefore, the

the foreman of a gang of bridge builders is not a coemployee with the men working under his direction, and thus by construction limit the language of the statute, it would lead to all manner of distinctions which would be extremely difficult of application. We would be called upon to determine whether a conductor under whose orders the brakeman performs his duty, a section foreman whose duty it is to direct the men under his charge, and who, as we understand, employs his men and discharges them at will, and other employees who have the direction and supervision of men under them, come within the provisions of the statute."

liability of railway companies is determined upon principles simila to those discussed in the preceding subtitle, employees being held en titled or not, according as their work was or was not "directly con nected with the operation of the road." [1]

But in the absence of any amending act similar to that of Iowa, th provisions of the Kansas statute are deemed to be applicable to vari ous classes of employees, who under the decisions rendered with ref erence to the more recent legislation in the sister state, would not b entitled to recover. The Iowa doctrine which confines the benefit o the act to cases where the delinquent and injured employees, or eithe of them, were engaged in the use and operation of a railroad, is re jected in Kansas.[2]

The cases collected in the subjoined note indicate the employee who are and who are not, entitled to claim the benefit of the statute.

[1] *Chicago, R. I. & P. R. Co.* v. *Stahley* (1894) 11 C. C. A. 88, 27 U. S. App. 157, 62 Fed. 363; *Chicago, K. & W. R. Co.* v. *Pontius* (1894) 157 U. S. 209, 39 L. ed. 675, 15 Sup. Ct. Rep. 585; *Atchison, T. & S. F. R. Co.* v. *Koehler* (1887) 37 Kan. 463, 15 Pac. 567.

[2] *Union P. R. Co.* v. *Harris* (1885) 33 Kan. 416, 6 Pac. 571.

[3] (a) *Employees within the statute.*—

A brakeman thrown from a moving car by the engineer's suddenly stopping the engine and car with a violent jerk, without signal or necessity, when the car was moving at about 6 miles an hour and was about 400 feet away from the stationary part of the train to which it was to be coupled under signals from the brakeman. *Kansas City, Ft. S. & M. R. Co.* v. *Murray* (1895) 55 Kan. 336, 40 Pac. 646.

An employee who, while engaged in ditching along the track, was struck by a piece of coal from the tender of a passing engine on which it had been piled to a dangerous height. *Croll* v. *Atchison, T. & S. F. R. Co.* (1896) 57 Kan. 548, 46 Pac. 972. Reversing (1896) 3 Kan. App. 242, 45 Pac. 112.

A section man injured, while traveling on a hand car, by a collision with another car. *Union Trust Co.* v. *Thomason* (1881) 25 Kan. 1.

A section band upon whom a colaborer let a rail fall. *Union P. R. Co.* v. *Harris* (1885) 33 Kan. 416, 6 Pac. 571.

A section man injured while unloading ties from a car for the purpose of repairing a railroad track, by the negligence of a coemployee in turning the tie before the former has secured a good hold, and pulling it so as to strike h *Atchison, T. & S. F. R. Co.* v. *Brassfie* (1893) 51 Kan. 167, 32 Pac. 814.

One employed on the track and in th yard to assist in loading rails, who particular duty it was to assist in pla ing the rails on the car after they we lowered from the pile by another set employees, the injury being due to th negligence of the latter employees lowering a rail before plaintiff had suf eient time to get out of the way afte being duly warned. *Atchison, T. & F. R. Co.* v. *Koehler* (1887) 37 Kan 463, 15 Pac. 567.

An employee upon a constructio train, whose business was to carry wa ter for the trainmen and to gather an put up tools, and who, while riding up on the train, was directed to pick u a tool on the rear flat car, and in at tempting to do so was thrown off b the reversing of the engine without signal. *Missouri P. R. Co.* v. *Hal* (1881) 25 Kan. 35 (negligence on par of engineer was denied, as engine wa reversed to prevent a collision with cat tle).

An employee in a roundhouse, em ployed in putting an engine into condi tion for immediate use. *Chicago, R. & P. R. Co.* v. *Stahley* (1894) 11 C. C A. 88, 27 U. S. App. 157, 62 Fed. 36

A fireman on a switching engine, wh was injured by a collision with anothe switching engine while he was shove ing coal into the engine. *Missouri P R. Co.* v. *Mackey* (1885) 33 Kan. 29 6 Pac. 291.

An employee whose general employ ment was as a bridge carpenter, but wh

F. Minnesota.

760a. Statutory provisions.—By Laws of 1887, chap. 13, and Gen. Stat. 1894, § 2701, it is enacted as follows:

An Act To Define the Liabilities of Railroad Companies in Relation to Damages Sustained by Their Employees.

Negligence of coemployees; liability of company. Every railroad corporation owning or operating a railroad in this state shall be liable for all damages sustained by any agent or servant thereof by reason of the negligence of any other agent or servant thereof, without contributory negligence on his part, when sustained with in this state; and no contract, rule, or regulation between such

received injuries by reason of the negligence of a coemployee while engaged in loading timbers on a car for transportation over the road. *Chicago, K. & W. R. Co.* v. *Pontius* (1893) 52 Kan. 264, 34 Pac. 739, Affirmed in (1895) 157 U. S. 209, 39 L. ed. 675, 15 Sup. Ct. Rep. 585.

The engineer in charge of a switch engine is not, as matter of law, free from negligence in failing to observe that a push car which he sees in front of him at a sufficient distance to stop the engine before reaching it is so close to the track as to collide with an employee riding on the engine. *Atchison, T. & S. F. R. Co.* v. *Slattery* (1896) 57 Kan. 499, 46 Pac. 941.

A freight engineer who approaches a work train in plain view in front of him, so near and at such a rate of speed that it is necessary to make a sudden and violent application of the air brakes to prevent a collision, whereby a brakeman is thrown from the top of a car and killed, is guilty of negligence. *Atchison, T. & S. F. R. Co.* v. *Carter* (1898) 60 Kan. 65, 55 Pac. 279.

A railway company is not liable for personal injuries sustained by a fireman on a motor or dummy, through the alleged negligence of the engineer in failing to keep a proper lookout for obstructions upon or near the track, unless the obstruction is there for a sufficient length of time to enable the engineer in the exercise of reasonable care to know of it, and stop the motor before reaching it. That it is there at the precise moment of the collision is insufficient. *Telle* v. *Leavenworth Rapid Transit R. Co.* (1893) 50 Kan. 455, 31 Pac. 1076 (for general principle here applied, see chapter X., *ante*).

An engineer was negligent in failing to stop a train in time to prevent a collision with a hand car upon the track, where he had time to do so after it was reasonably apparent to him that the car could not be moved from the track by workmen who were engaged in such an attempt. *Walker* v. *Shelton* (1898) 59 Kan. 774, 52 Pac. 441.

The foreman of a crew of section men who takes one end of a rail upon his shoulder to relieve a section man who has been carrying it, and gives the word to throw it down before the latter has stepped to a place of safety, by reason of which he is injured, is guilty of negligence which will render the company liable to the latter. *Atchison, T. & S. F. R. Co.* v. *Vincent* (1896) 56 Kan. 344, 43 Pac. 251 (service necessary to the use and operation of the road).

A section hand who, while in the performance of his duties, took a hand car off the track to allow a train to pass, and while standing near it and in sight of the engineer was struck in the eye by steam and water thrown from the passing engine, was held to have a cause of action. *Atchison, T. & S. F. R. Co.* v. *Thul* (1884) 32 Kan. 255, 49 Am. Rep. 484, 4 Pac. 352.

The act of a railroad employee in throwing the forward end of a plank from a car in motion before the signal to throw had been given, and before the employee holding the rear end had thrown the same, was gross negligence. *Riley* v. *Grand Island Receivers* (1897) 72 Mo. App. 280 (decision as to Kansas statute).

Where a section of a train has been shunted on to a track, those in the management of the train must use reasonable diligence to see that it has gone sufficiently far to be cleared by any other cars which may afterwards be shunted on to an adjoining track; and if the second section strikes, the company is liable for any injury which may be caused by the collision to an

corporation and any agent or servant shall impair or diminish such liabili
Provided, that nothing in this act shall be so construed as to render any railro
company liable for damages sustained by any employee, agent, or servant wh
engaged in the construction of a new road, or any part thereof, not open to pu
travel or use.

This statute is not applicable to street railways, although they m
be operated by cable.[1]

employee on the first section. *Atchison, T. & S. F. R. Co.* v. *Butler* (1896) 56 Kan. 433, 43 Pac. 767.

A railway company is not liable to an employee injured through the act of a coemployee who, while they were jointly lifting out of its place the fire box of a locomotive, suddenly, without warning, dropped his end of the box and injured the former, because some ashes fell into his eyes, causing intense pain. *Union P. R. Co.* v. *Mahaffy* (1896) 4 Kan. App. 88, 46 Pac. 187.

(b) *Employees not within the statute.*—A stone mason employed by a railroad company in setting curbing around a depot and office building, who is injured by the fall of a curbstone left standing in an insecure position by a coemployee, is not within the protection of the act. *Missouri, K. & T. R. Co.* v. *Medaris* (1899) 60 Kan. 151, 55 Pac. 875 (not "a peculiar peril incident to the operation of the railroad").

[1] *Funk* v. *St. Paul City R. Co.* (1895) 61 Minn. 435, 29 L. R. A. 208, 52 Am. St. Rep. 608, 63 N. W. 1099. Mitchell, J., in a concurring opinion, said: "In its original literal sense the word 'railroad' means a road with rails laid on it, upon which the wheels of carriages or vehicles run. In this sense it would, of course, include street railroads. But according to common popular usage the word 'railroad,' without any qualifying or explanatory prefix, is generally understood as referring exclusively to ordinary commercial railroads, used for the transportation of both passengers and freight; and whenever street railroads are referred to the word 'street' is prefixed. This is also the general legislative use of the words. In all the legislation of this state I have found no act (unless this be an exception) in which the word 'railroad' or 'railway,' standing alone, was not evidently intended to apply exclusively to ordinary commercial railroads. Neither have I found an act (unless this be an exception) which had reference to street railroads in which the word 'street' was not prefixed. I do not claim that th
might not be a law enacted where
would be evident from its subject-m
ter and object that the word 'railro
was intended to include street railroa
But in my opinion this is clearly
such a case. The occasion for enact
this law was the peculiar risks incid
to the operation of railroads, and
pecially those resulting from the ne
gence of fellow servants. The rem
sought to be attained was better prot
tion to railroad employees from th
peculiar hazards. The peculiar con
tions which were considered to requ
peculiar legislation for the protection
employees engaged in the operation
railroads are too familiar to requ
repetition. Generally, it may be sta
that the most cogent ones were
high rate of speed at which trains
run; the great momentum acquired
long and heavy trains, where an ac
dent to one car is liable to wreck
entire train; the peculiar dangers in
dent to the operation of freight trai
that the roads are often built up
high embankments or trestles where
accident would be peculiarly dangero
the danger of collisions, owing to
fact that numerous trains are opera
over the same tracks; the vast numb
of employees of different grades and
gaged in different lines of work, ma
of whom are necessarily personally
known to the others. The mere fa
that steam was used as a motive pow
was not, in and of itself, either the
casion or the justification for the
actment of a law establishing for r
road companies a special rule of l
hility for the negligence of their se
ants. If one of these companies was
substitute electricity for steam as
motive power, it would still be subj
to the provisions of the act. In
case of street railways, whatever be
motive power, the peculiar conditio
above referred to either do not ex
at all, or, at most, only in a very mo
fied degree. This is a fact of such co
mon knowledge that it need not be m

To bring a railroad company within the act it is not necessary that it should own, but only that it should be "operating," a railroad in the state.[2]

Work done by a railroad company in constructing a yard to be used in connection with a line already open to the public is not construction of a new road within the proviso with which the statute concludes.[3]

761. What injuries are within the purview of the statute.— To enable a servant to claim the benefit of this statute it is not necessary that the injury should have been received through negligence in the operation of trains, or in the moving of detached cars. Recovery is allowed wherever the injured person was engaged in work which exposed him to some element of hazard or condition of danger peculiar to the repair and operation of railroads. The scope and effect of the statute, therefore, are virtually the same as that which has been enacted in Kansas.[1]

than stated. The question is not whether the legislature had the power to place street railroads in the same class with ordinary commercial railroads, but whether they have in fact done so. The difference in conditions affecting the risks to which employees are exposed is sufficiently substantial to authorize the legislature to make the law applicable to ordinary commercial railroads alone, and furnishes, in my judgment, ample reason for concluding that they so intended, and that they used the word 'railroad' in its ordinary popular sense, and in the sense in which they themselves had generally used it in other statutes."

To the same effect, see *Lundquist* v. *Duluth Street R. Co.* (1896) 65 Minn. 387, 67 N. W. 1006.

[2] *Moran* v. *Eastern R. Co.* (1892) 48 Minn. 46, 50 N. W. 930 (defendant was operating a line composed of the tracks of several companies).

[3] *Moran* v. *Eastern R. Co.* (1892) 48 Minn. 46, 50 N. W. 930.

[1] (a) *Employees within the statute.*— A section hand injured, while at work on the road, by the negligence of an engineer in operating his engine. *Smith* v. *St. Paul & D. . Co.* (1890) 44 Minn. 17, 46 N. W. 149.

A car cleaner engaged inside a passenger coach, and injured by the kicking against it of another coach at a dangerous and unusual speed through the negligence of a switching crew. *Mitchell* v. *Northern P. R. Co.* (1895) 70 Fed. 15.

An engine wiper in a roundhouse, injured while assisting in coaling an engine, by the negligence of a coemployee in moving the same. *Mikkelson* v. *Truesdale* (1895) 63 Minn. 137, 65 N. W. 260.

A wiper in a roundhouse, injured by the negligence of his fellow servants while engaged in straightening a wire cable used to pull a plow in unloading gravel from flat cars in repairing the road. *Nichols* v. *Chicago, M. & St. P. R. Co.* (1895) 60 Minn. 319, 62 N. W. 386. The court said: "It is claimed by respondent that the use of a cable is not peculiar to the railroad business; that cables are used in operating elevators and mines, in transmitting power in factories, and in many ways, and that, therefore, the statute does not apply. The test is not whether the conditions are in any respect parallel to those to be found in some other kind of business, or whether the appliances are in any respect similar to those used in some other kind of business. If there is any element of hazard or condition of danger which contributed to the injury, and which is peculiar to the railroad business, the statute applies. There certainly are such elements and conditions in this case."

An employee whose duty it was to step from a high platform on to stock cars as they drew up opposite the platform, and pull bundles of hay from the platform on the top of the cars, and who was thrown to the ground and in-

G. North Carolina.

761a. Statutory provisions.—By Private Laws 1897, chap. 56, p. 83, titled, An Act to Prescribe the Liabilities of Railroads in Certain Cases, it provided as follows:

Sec. 1. That any servant or employee of any railroad company operating this state, who shall suffer injury to his person, or the personal representative any such servant or employee who shall have suffered death, in the course of services or employment with said company by the negligence, carelessness, incompetency of any other servant, employee, or agent of the company, or by a

jured by stepping from the platform on to the top of a car moving without his knowledge, at an unsafe rate of speed, in obedience to the order of the conductor. *Leier* v. *Minnesota Belt-Line R. & Transfer Co.* (1895) 63 Minn. 203, 65 N. W. 269.

The danger incident to great and extraordinary haste in which the work of replacing ties is performed in order to avoid danger to trains is peculiar to the "railroad business," within the construction placed upon the statute; and a section man injured under such circumstances by the dropping of a rail by a fellow servant is within the protection of the statute. *Blomquist* v. *Great Northern R. Co.* (1896) 65 Minn. 69, 67 N. W. 804.

It is negligence in an engineer to drive a locomotive against a car to which it is to be coupled, with an extraordinary sudden impulse. *McKnight* v. *Chicago, M. & St. P. R. Co.* (1890) 44 Minn. 141, 46 N. W. 294.

A railway company is liable for injuries to a section man on a hand car under the direction of the foreman, sustained by the negligence of the foreman in not stopping the car and having it taken off the track when he knew that a train was following, that fact being unknown to the section man. *Slette* v. *Great Northern R. Co.* (1893) 53 Minn. 341, 55 N. W. 137.

A swingman on top of freight car next the engine, whose special duty it is to look out for signals from the rear end of the train, and watch so as to avoid accidents in case the train breaks in two, does not, as matter of law, exercise reasonable care where he fails, while setting a brake, to observe a signal from the conductor at the rear end of the train after a break occurs, repeated several times, for the engineer to go ahead, as a result of which a brakeman is injured while attempting to uncouple the engine. *Wood* v. *Chicago, St. P. M. & O. R. Co.* (1896) 66 Minn. 49, 68 W. 462.

Evidence which shows that an engineer, on receiving from the conductor a signal to stop after the train had passed the mile board, adopted the usual course for a station stop, except that he put on a little more air than usual, does not show that the engineer was guilty of negligence in making an unduly sudden stop. *Crane* v. *Chicago, M. & P. R. Co.* (1901) 83 Minn. 278, 86 W. 328.

Whether or not the work was being executed under such circumstances to expose the plaintiff to the peculiar hazards of railroad service is a question for the jury, where the evidence shows that, while at work with a number of others clearing away a wrecked train, he entered a car, and was handing out the contents to others on the top of the car; that, owing either to their number or the removal of the contents from within, the roof sagged down on him, and that the road master had given directions as to the manner of executing his orders, but had repeatedly told the men to hurry the work. *Krueger* v. *Great Northern R. Co.* (1901) 83 Minn. 385, 86 N. W. 413.

The conduct of a switching crew in using the main track of a railroad for switching purposes at the time a passenger train is due, and in plain violation of the rules of the company, is gross negligence, almost wanton and criminal, which renders the company liable for injuries to the engineer of the passenger train resulting therefrom. *Hall* v. *Chicago, B. & N. R. Co.* (1891) 46 Minn. 439, 49 N. W. 239.

Whether an engineer in charge of a second locomotive was guilty of negligence in failing to heed a signal to shut off steam is for the jury, where the testimony shows that such signal was given after the leading locomotive left the rails, but the engineer in charge of the

defect in the machinery, ways, or appliances of the company, shall be entitled to maintain an action against such company.

Sec. 2. That any contract or agreement, expressed or implied, made by any employee of said company to waive the benefit of the aforesaid section, shall be null and void.

761aa. Burden of proof.— This statute is a public law, of which the court will take notice without its being pleaded, although it has been improperly published among the private acts.[1]

762. Effect of statute.— As the defense of common employment by this statute is wholly abolished, so far as railways are concerned, the question whether the delinquent servant was or was not in control of

second engine testifies that he did not hear it. *McGrath* v. *Great Northern R. Co.* (1899) 76 Minn. 146, 78 N. W. 972.

Negligence is predicable from evidence which shows that, after the forward part of a train had been uncoupled and moved some distance away from the rear section, the engineer, finding that the forward section was stalled, backed down again without ringing a bell or sounding a whistle, and crushed to death the brakeman, who, after uncoupling the two sections of the train, was proceeding to do some work on the coupler. *Hooper* v. *Great Northern R. Co.* (1900) 80 Minn. 400, 83 N. W. 440.

An engineer who is about to back a train on to a side track for the purpose of having attached to it some loaded cars, and observes that there is another car further on which is only partially loaded, is bound to know that there may be someone working on the latter car, and is therefore negligent if he propels the train with such force that the coupling is missed and the loaded cars driven against one partially loaded, the result being that a person engaged in loading that car is killed. *Jacobson* v. *St. Paul & D. R. Co.* (1889) 41 Minn. 206, 42 N. W. 932.

The statute is applicable to injuries caused by the operation of a hand car, as well as those caused by the operation of trains. *Steffenson* v. *Chicago, M. & St. P. R. Co.* (1891) 45 Minn. 355, 11 L. R. A. 271, 47 N. W. 1068 (action held maintainable where an employee was thrown off a moving hand car by the carelessness of a coservant); *Benson* v. *Chicago, St. P. M. & O. R. Co.* (1899) 75 Minn. 163, 74 Am. St. Rep. 4[illegible] 77 N. W. 798 (collision between hand cars).

Compare decisions under the Iowa act, § 759, note 1, subd. (a), *ante*.

Railroad employees are not, as matter of law, free from negligence in running a hand car at a high rate of speed on a down grade and slippery track, only 60 feet behind another hand car, where the usual distance at which hand cars are kept apart is 510 feet. *Christianson* v. *Chicago, St. P. M. & O. R. Co.* (1896) 67 Minn. 94, 69 N. W. 640.

(b) *Employees not within the statute.*—One of a crew of men engaged in repairing a bridge, who is injured by the negligence of a fellow servant in leaving the draw unfastened. *Johnson* v. *St. Paul & D. R. Co.* (1890) 43 Minn. 222, 8 L. R. A. 419, 45 N. W. 156.

One of a crew of section men injured, while engaged in loading railroad iron upon a flat car, by a rail negligently allowed by the others to fall upon his arm. *Pearson* v. *Chicago, M. & St. P. R. Co.* (1891) 47 Minn. 9, 49 N. W. 302.

A servant injured, while putting a hose on an engine tender, then standing still, by the falling of loose coal dislodged by another servant standing on the tender to receive the hose. *Weisel* v. *Eastern R. Co.* (1900) 79 Minn. 215, 82 N. W. 576.

An employee injured by a bolt driven through the bottom of a car which he was assisting to repair. *Holtz* v. *Great Northern R. Co.* (1897) 69 Minn. 524, 72 N. W. 805.

A boiler maker's assistant injured by the negligence of a coservant in letting fall the smokestack of a locomotive which was being removed. *Lavallee* v. *St. Paul, M. & M. R. Co.* (1889) 40 Minn. 249, 41 N. W. 974.

[1] *Hancock* v. *Norfolk & W. R. Co.* (1899) 124 N. C. 222, 32 S. E. [illegible] 0.

the injured one has ceased to be material in North Carolina.[1] (S summary in § 549, *ante*, for common-law rule in this state.)

This statute has been declared to be inapplicable to an accide which occurred before its enactment.[2]

II. Wisconsin.

763. Statutory provisions.—In 1875 the following provision w enacted:

Every railroad corporation shall be liable for all damages sustained by a agent or servant thereof by reason of the negligence of any other agent or serv thereof, without contributory negligence on his part, when sustained within t state, or when such agent or servant is a resident of, and his contract of empl ment was made in, this state; and no contract, rule, or regulation between a such corporation and any agent or servant shall impair or dimini liability.

This act was repealed by Wis. Laws 1880, chap. 232. From th date common-law doctrines were applied until another statute of t following tenor was enacted:

Wis. Laws 1889, chap. 438, § 1816a (Sanborn & Berryman's Anno. Stat. 18 § 1816a).

Liability for injuries to employees. § 1. Every railroad corporation doi business in this state shall be liable for damages sustained by any employ thereof within this state, without contributing negligence on his part, when suc damage is caused by the negligence of any train despatcher, telegraph operato superintendent, yardmaster, conductor, or engineer, or of any other employee wh has charge or control of any stationary signal, target point, block, or switch.

Sec. 2. This act shall take effect and be in force from and after its publicatio Approved April 10, 1889.

The act of 1889 was modified by Laws of 1893, chap. 220, entitle An Act To Define the Liability of Railroad Companies in Relatio to Damages sustained by their employees.

Sec. 1. Every railroad or railway company operating any railroad or railway the line of which shall be, in whole or in part, within this state, shall be liabl for all damages sustained within this state by any employee of such company without contributory negligence on his part: First, when such injury is caused by any defect in any locomotive, engine, car, rail, track, machinery, or appliance

[1] *Kinney* v. *North Carolina R. Co.* (1898) 122 N. C. 961, 30 S. E. 313.

Collision between two passenger trains in broad daylight, one of which was running at a high rate of speed, the other having slowed up when the former was seen approaching, is of itself evidence of negligence, in an action by the engineer of the latter train for personal injuries sustained in the collision. *Kinney* v. *North Carolina R. Co.* (1898) 122 N. C. 961, 30 S. E. 313.

[2] *Rittenhouse* v. *Wilmington Street R. Co.* (1897) 120 N. C. 544, 26 S. E. 92

required by said company to be used by its employees in and about the business of such employment, when such defect could have been discovered by such company by reasonable and proper care, tests, or inspection; and proof of such defect shall be presumptive evidence of knowledge thereof on the part of such company; second, While any such employee is so engaged in operating, running, riding upon, or switching passenger, freight, or other trains, engines or cars, and while engaged in the performance of his duty as such employee, and which such injury shall have been caused by the carelessness or negligence of any other employee, officer or agent of such company in the discharge of, or for failure to discharge, his duties as such.

No contract, receipt, rule, or regulation between any employee and a railroad corporation shall exempt such corporation from the full liability imposed by this section.

Sec. 2. Chapter 438 of the Laws of 1889 is hereby repealed.

Sec. 3. No action or cause of action now existing shall be affected by this act.

Sec. 4. No contract, receipt, rule, or regulation between any employee and a railroad company shall exempt such corporation from the full liability imposed by this act.

Sec. 5. This act shall take effect and be in force from and after its passage and publication.

Approved April 17, 1893.

764. Effect of these statutes.—So much of the phraseology in the last two statutes is identical that the decisions relating to both may be conveniently reviewed together.

The word "superintendent" covers a foreman f a switching crew;[1] but not a foreman of a repair shop.[2]

Negligence of a brakeman when told to accompany a passenger car kicked rapidly into a railroad yard in the dark, in riding on the rear instead of the front of the car, so that he gave no warning to a yard workman who was struck, renders the employer liable.[3]

A railway company is liable where an engineer is negligent in the manageme[illegible] ngine.[4]

[1] Negligen[illegible] ible where, after being warne[illegible] is about to be chained on a [illegible]ack, such a foreman deliberat[illegible]ders a train to be backed against the cars standing on such track. *Pier* v. *Chicago, M. & St. P. R. Co.* (1896) 94 Wis. 357, 68 N. W. 464.

[2] *Hartford* v. *Northern P. R. Co.* (1895) 91 Wis. 374, 64 N. W. 1033.

[3] *Promer* v. *Milwaukee, L. S. & W. R. Co.* (1895) 90 Wis. 215, 48 Am. St. Rep. 905, 63 N. W. 90.

[4] As, where a brakeman, while making a coupling, is injured by the engineer's negligently and without notice increasing the speed of the train when the brakeman has given no signal and is in a position of extreme danger. *Krause* v. *Chicago, M. & St. P. R. Co.* (1892) 82 Wis. 568, 52 N. W. 755.

Where it is conceded that an engineer was not guilty of negligence in understanding a conductor's signal to mean that all the cars were to be cut off, he cannot be found guilty of negligence in giving his attention to the brakeman at the tender, who was cutting off all the cars, and in failing to see the signals of plaintiff, who was injured by the speed of the train being increased while he was endeavoring to cut off one car at the other end. *Despins* v. *Chicago, M. & St. P. R. Co.* (1899) 105 Wis. 69, 81 N. W. 493.

A railway engineer who, without re-

One employed as yardmaster, though not to be regarded as in that capacity when switching cars in or out of a spur track leading to a quarry, was in "charge or control" of the "switch" to the spur track where it was his duty to open and close switches and follow the switch engine from yard to yard, taking cars in and out from the quarry, and he had a key for the purpose of opening and closing switches.

The provision for the benefit of employees "engaged in operating" etc., "trains," etc., covers a case where a freight handler, while assisting to separate by hand one freight car from others, was injured by the negligence of other employees in running a train against such freight cars;[6] but not a case where a warehouseman in the employ of a railway company was injured, while engaged in sealing a car, by the negligence of the trainmen in suddenly moving it without warning;[7] nor a case where an injury was sustained by a car repairer through the negligence of a switchman in causing a car to be kicked against the stationary car under repair;[8] nor a case where a railway conductor, standing by a car for the purpose of watching a switch as

ceiving any notice from his fireman of his intention to go under the engine to clean out the ash pan, such as the well-understood custom among engineers and firemen requires shall be given, blows off the engine while the fireman is so at work under it and scalds him, is not guilty of negligence in so doing. *Crane v. Chicago, M. & St. P. R. Co.* (1896) 93 Wis. 187, 67 N. W. 1152.

[5] *Albrecht v. Milwaukee & S. R. Co.* (1896) 94 Wis. 397, 69 N. W. 63.

[6] *Lau v. Chicago, M. & St. P. R. Co.* (1897) 95 Wis. 69, 69 N. W. 997. The court said: "The test in any given case is, Was the person injured employed in one of the branches of the railway service covered by the act, at the time of the injury? If so, he is entitled to its benefits, whether such service was the principal kind of work to be performed by him under his contract of employment, or a mere incident to his general duties. As in cases where an employee is injured by the negligence of another whose general employment is that of a vice principal, and such other is temporarily doing the work of an employee, the right of the injured party is governed by the nature of the service in which such other is engaged at the time of such injury; so here, whether the deceased, had he lived, would have been entitled to the benefits of the act in question, depends wholly upon whether he was doing the kind of service specified in the act, at the time of the injury. If he was, whether such service required him to assist in running the car at a distance of three car lengths or a greater distance, or whether by the power of a locomotive, or by some other means, makes no difference. While actually engaged in moving the car, he was within the extraordinary peril which the act was designed to protect employees against."

[7] *Hibbard v. Chicago, St. P. M. & O. R. Co.* (1897) 96 Wis. 413, 71 N. W. 807.

[8] *Smith v. Chicago, M. & St. P. R. Co.* (1895) 91 Wis. 503, 63 N. W. 183. The court considered it quite clear that, whether the intent of the legislature should be ascertained by the principle that statutes in derogation of the common law are to be strictly construed, or by the principle that remedial laws are to be liberally construed, the words, "while engaged in the performance of his duties as such employee," referred to the words, "while operating, running, riding upon, or switching passenger or freight or other trains, engines, or cars," and that the object of this part of the law was plainly to give a right of action to the class of employees engaged in operating and moving trains, engines, and cars, while actually so engaged.

closing the car door when it was unloaded, was struck and injured by a bundle negligently thrown from the car by coemployees.[9]

Track repairers, while riding on hand cars from the place where they are working to their boarding cars, are not "engaged in the discharge of their duties" within the meaning of the statute.[10]

An action may be maintained, under this statute, by the administrator of a deceased railroad employee who was killed while operating cars, etc., through the negligence of another employee or agent of the company, provided the circumstances were such that the deceased, if he had lived, could have maintained an action for his injuries under the statute.[11]

764a. Later legislation.— The liability of railway companies was still further enlarged by the following provision in Laws of 1898, § 1816:

Liability for injuries to employees. Every railroad company operating any railroad which is, in whole or in part, within this state, shall be liable for all damages sustained within the same by any of its employees without contributory negligence on his part:

1. When such injury is caused by a defect in any locomotive, engine, car, rail, track, machinery, or appliance required by said company to be used by its employees in and about the business of their employment, if such defect could have been discovered by such company by reasonable and proper care, tests, or inspection; and proof of such defect shall be presumptive evidence of knowledge thereof on the part of such company.

765. Effect of this provision.— Where the wages of workmen in a railway bridge gang cover the whole time during which they are absent from the place where they reside, they are "engaged in the performance of their duties" during the time spent in traveling to and from the place of work by train and hand car.[1]

Compare, generally, the decisions cited under §§ 624, 625, *ante*, and § 768, *post*.

Comp. Laws, p. 512, chap. 97, § 1) which has since been repealed, ran as follows:

Where any person in the employment of any railroad company in this territory may be killed by any locomotive, car, or other rolling stock, whether in the performance of his duty or otherwise, his widow or heirs may have the same right of action for damages against such company as if said person so killed were not in the employ of said company; any agreement he may have made, whether verbal or written, to hold such company harmless or free from an action for damages in the event of such killing, shall be null and void, and shall not be admitted as testimony in behalf of said company in any action for damages which may be brought against them; and any person in the employ of said company who may be injured by any locomotive, car, or other rolling stock of said company, or by other property of said company, shall have his action for damages against said company the same as if he were not in the employ of said company; and no agreement to the contrary shall be admitted as testimony in behalf of said company.

This act shall take effect from and after its passage.

The Wyoming Constitution provides (art. 10, § 4) that "any contract or agreement with any employee, waiving any right to recover damages for causing the death or injury of any employee, shall be void."

CHAPTER XL.

ENGLISH WORKMEN'S COMPENSATION ACT 1897.

766. Purpose and effect of the act; generally.

A. CIRCUMSTANCES UNDER WHICH COMPENSATION IS RECOVERABLE.

766a. Text of section 1.
767. "Accident" (sec. 1, subs. 1).
768. "Out of, and in the course of, the employment" (sec. 1, subs. 1).
769. Period of disablement (sec. 1, subs. 2, *a*).
770. Alternative remedies open to workmen (sec. 1, subs. 2, *b*).
771. "Serious and wilful misconduct" (sec. 1, subs. 2, *c*).
772. Arbitration (sec. 1, subs. 3).
773. Recovery in cases where nonliability apart from the act is established (sec. 1, subs. 4).
774. Application of fines imposed in other proceedings (sec. 1, subs. 5).
774a. Text of section 2.
775. Notice of the accident (sec. 2, subs. 1).
a. "Proceedings."
b. "Claim for compensation."
c. Excuses for not serving notice in time.
775a. Text of sections 3 and 4.
776. Liability to servants of contractors (sec. 4).
a. Generally.
b. "Undertakers."
c. "Work merely ancillary or incidental to."
776a. Text of section 5.
777. Proceedings under this section.
777a. Text of section 6.
778. Proceedings under section 6.

B. EMPLOYMENTS TO WHICH THE ACT IS APPLICABLE.

778a. Text of sections 7–10.
779. Scope and effect of these provisions; generally.
780. Meaning of the phrase "on or in or about," when used in connection with various kinds of concerns.
781. "On or in or about a building" which exceeds 30 feet in height.
a. Height of building.
b. "Being constructed or repaired."
c. What is a "scaffolding."
782. "On or in or about a building in which machinery driven by steam," etc.
783. Meaning of "railway."
783a. — of "factory."
a. "Dock, wharf, quay."

795. Review of weekly payments (par. 12).

D. ARBITRATION.
795a. Text of statutory provisions.
796. Effect of these provisions; generally.

E. ACT OF 1900.
797. Effect of this statute.

766. Purpose and effect of the act; generally.—The statute which is discussed in this chapter represents an entirely new departure in the law of employers' liability, as it enables a servant, under the circumstances which fall within its purview, to recover without establishing any negligence on the part of the defendant. The theory of the act is that, apart from any negligence or misconduct, a man employed in

certain dangerous employments shall in a certain sense, be insured against any accident that takes place in the course of his employment.[1]

In a practical point of view this statute is at present of no importance, except to residents in the United Kingdom. But it is well worthy of the attention of lawyers and statesmen of other countries, as being the earliest specimen of a type of legislation which will unquestionably become more and more common in future years. How far the constitutional limitations by which the statutory powers are circumscribed in the United States will assist employers in resisting such legislation is a question which remains to be settled. But in view of the existing relations between capital and labor, it can scarcely be doubted that strong efforts will be made before long to secure the enactment of statutes framed upon lines similar to that with which we are now concerned.

The number of cases in which the meaning of the provisions of the English act have been considered is already so extraordinarily large as fully to justify the remark of Lord Brampton that it is "so framed as to provoke, rather than minimize, litigation."[2] It bristles with obscurities, and is so extremely ill drawn that, during the few years of its existence it has been a target for more censure, and even ridicule, than has ever been leveled against any statute, within the same space of time.[3]

In view of the tentative nature of the act, and its merely local interest up to the present time,—whatever the future may bring forth,—it is not proposed in this chapter to do more than state the effect of the actual decisions of appellate courts with regard to the various provisions which have come under consideration. Anything beyond this would be out of place in a general treatise. For a more detailed analysis of the act, and a discussion of the procedure applicable to its administration, the reader is referred to the treatises compiled by Mr. Beven, by Mr. Minton-Senhouse, and by Messrs. Parsons and Bertram.

A. Circumstances under which compensation is recoverable.

766a. Text of section 1.—An Act to Amend the Law with Respect to Com-

[1] *Cooper* v. *Wright* [1902] A. C. 302, per Earl Halsbury, F. C.

[2] *Cooper* v. *Wright* [1902] A. C. 302.

[3] It is noteworthy that several members of the House of Lords have been especially severe in their comments upon the act, and that they have thus placed themselves in the curious predicament of criticising, as judges, a measure for which they are, as lawmakers, presumptively responsible. In the situation thus disclosed there is a touch of comedy which carries the thoughts to that amusing scene in the "Mikado," where Mr. Gilbert's official pluralist describes the embarrassing conflict of duties which results from the discharge of his manifold functions.

pensation to Workmen for Accidental Injuries Suffered in the Course of their Employment. [6th August 1897.] Be it enacted by the Queen's most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same, as follows:

Sec. 1. (1) If, in any employment to which this act applies, personal injury by accident arising out of and in the course of the employment is caused to a workman, his employer shall, subject as hereinafter mentioned, be liable to pay compensation in accordance with the first schedule of this act.

(2) Provided that:

(*a*) The employer shall not be liable under this act in respect of any injury which does not disable the workman, for a period of at least two weeks, from earning full wages at the work at which he was employed;

(*b*) When the injury was caused by the personal negligence or wilful act of the employer, or of some person for whose act or default the employer is responsible, nothing in this act shall affect any civil liability of the employer; but in that case the workman may, at his option, either claim compensation under this act, or take the same proceedings as were open to him before the commencement of this act; but the employer shall not be liable to pay compensation for injury to a workman by accident arising out of, and in the course of, the employment, both independently of and also under this act, and shall not be liable to any proceedings independently of this act, except in case of such personal negligence or wilful act as aforesaid;

(c) If it is proved that the injury to a workman is attributable to the serious and wilful misconduct of that workman, any compensation claimed in respect of that injury shall be disallowed.

(3) If any question arises in any proceedings under this act as to the liability to pay compensation under this act (including any question as to whether the employment is one to which this act applies), or as to the amount or duration of compensation under this act, the question, if not settled by agreement, shall, subject to the provisions of the first schedule to this act, be settled by arbitration, in accordance with the second schedule to this act.

(4) If, within the time hereinafter in this act limited for taking proceedings, an action is brought to recover damages independently of this act for injury caused by any accident, and it is determined in such action that the injury is one for which the employer is not liable in such action, but that he would have been liable to pay compensation under the provisions of this act, the action shall be dismissed; but the court in which the action is tried shall, if the plaintiff shall so choose, proceed to assess such compensation, and shall be at liberty to deduct from such compensation all the costs which, in its judgment, have been caused by the plaintiff bringing the action, instead of proceeding under this act.

In any proceeding under this subsection, when the court assesses the compensation it shall give a certificate of the compensation it has awarded, and the directions it has given as to the deduction for costs, and such certificate shall have the force and effect of an award under this act.

(5) Nothing in this act shall affect any proceeding for a fine under the enactments relating to mines or factories, or the application of any such fine, but if any such fine, or any part thereof, has been applied for the benefit of the person injured, the amount so applied shall be taken into account in estimating the compensation under this act.

767. "Accident" (sec. 1, subs. 1).—This word involves the idea of something fortuitous and unexpected.[1]

Where a workman suffers injury while doing his ordinary work in his ordinary way, and the primary and efficient cause of the injury is his diseased or impaired physical condition at the time, the injury is not caused by an "accident."[2]

On the other hand it is considered that an injury was caused by an "accident," whenever it was the result of some fortuitous and external event, although the consequences of the injury may be aggravated by plaintiff's physical condition at the time when he was hurt.[3]

768. "Out of, and in the course of, the employment" (sec. 1, subs. 1).—This phrase embraces only those accidents which happen to a servant while he is engaged in the discharge of some function or duty which he is authorized to undertake, and which is calculated to further, directly or indirectly, the master's business.[1]

[1] *Hensey* v. *White* [1900] 1 Q. B. 481, 81 L. T. N. S. 767.

A rupture caused by the effort of separating a plank from one to which it was stuck by ice formed during the preceding night may properly be found to have been caused by an "accident." *Timmins* v. *Leeds Forge Co.* [1899; C. A.] 16 Times L. R. 521, 83 L. T. N. S. 120.

A workman in normal health was engaged in the course of his duty in removing a beam from a loom. He was in the act of lifting the beam on to his shoulder, when, finding that it was not evenly balanced, he gave it an extra lift, or hitch up, and in so doing ruptured several fibres of the muscles of his back, which incapacitated him for work,—held, that he had sustained personal injury by "accident." *Boardman* v. *Scott* [1902; C. A.] 1 K. B. 43, 71 L. J. K. B. N. S. 1902.

Internal injuries resulting from an unusual strain in lifting heavier articles than those which the employee had previously been handling do not arise from an "accident." *Roper* v. *Greenwood* [1901] 83 L. T. N. S. 471.

Where a miner was employed in hewing coal, and while so employed a piece of coal worked itself into his knee, with the result that blood poisoning set in and caused his death, there was an injury resulting from an "accident." *Thompson* v. *Ashington Coal Co.* [1901; C. A.] 84 L. T. N. S. 412, 17 Times L. R. 345.

[2] *Hensey* v. *White* [1900; C. A.] 1 Q. B. 481, denying the right of recovery in a case where a workman who was inherently weak, internally ruptured a blood vessel when making an effort to start the wheel of a gas engine, which had become stiff from disuse.

A workman employed to make a steam pipe joint, who suffers injury through the red lead coming into contact with a finger which had previously been in a blistered condition, does not suffer injury by "accident." *Walker* v. *Lilleshall Co.* [1900; C. A.] 1 Q. B. 488, 81 L. T. N. S. 769.

[3] Where a workman in handling a hammer makes a mis-hit and strikes a "flatter" held by another workman, thus jarring his arm and producing a severe swelling, there is an "accident," although the swollen condition is declared by a doctor to have been due to gout brought on by the jar. *Lloyd* v. *Sugg* (1900) 1 Q. B. 486.

[1] (a) *Recovery has been allowed under the following circumstances.*—Where a carter in the employment of a railway company was injured while he was endeavoring to stop a horse which had suddenly started off, from some unexplained cause, with the cart. *Devine* v. *Caledonian R. Co.* (1899) 1 Sc. Sess. Cas. 5th series, 1105. 36 Sc. L. R. 877.

Where a miner, believing that a shot had missed fire, went forward to examine it, and was injured by the explosion of the charge. *McNicoll* v. *Speir's* (1899) 1 Sc. Sess. Cas. 5th series, 604, 36 Sc. L. R. 428.

Where a workman undertook to ascend by a hoist to a platform for the

If the act which caused the injury was within the scope of t servant's employment, the mere fact that he had been expressly f bidden to do that act will not necessarily be fatal to his claim.[2] It

purpose of obtaining a certain article which he required for his work. *Logue* v. *Fullerton* (1901) 3 Sc. Sess. Cas. 5th series, 1006, 38 Sc. L. R. 738.

Where an engineer was run down, when recrossing a track to reach his engine which he had left in order to ask a traffic regulator why he had been ordered to take it to a certain place. *Goodlet* v. *Caledonian R. Co.* (1902) 4 Sc. Sess. Cas. 5th series, 986, 39 Sc. L. R. 759.

Where an engineer who, after being relieved of duty when his engine was on a siding, walked along the track to a station, where he had to report himself as being off duty. *Todd* v. *Caledonian R. Co.* (1899) 1 Sc. Sess. Cas. 5th series, 1047, 36 Sc. L. R. 784.

Where the injury was received by a servant who was sitting near a fire warming himself, while he was waiting for the arrival of some trucks, the wheels of which it was his duty to oil. *Harrison* v. *Whittaker* (1899; C. A.) 16 Times L. R. 108.

In *Brown* v. *Scott* (1899) 2 W. C. C. 11, Times Newspaper June 12, 1899, the court of appeals (Williams, L. J., dissenting) allowed recovery to be had for an injury received by a boy who undertook to oil a machine while in motion, in compliance with the order of a fellow workman, who had no authority over him, but told him falsely that his foreman had given the direction thus conveyed to him. But this decision can scarcely be intended to embody any general principle.

(b) *Recovery has been denied under the following circumstances:*—Where an injury was received by a ticket collector while riding on the footboard of a train for his own pleasure, and not for any object of his employment. *Smith* v. *Lancashire & Y. R. Co.* [1899; C. A.] 1 Q. B. 141, 68 L. J. Q. B. N. S. 51. The court emphasized the point that, to render an employer liable to pay compensation, the accident must arise, not only "out of," but also "in the course of," the employment.

Where a girl engaged in passing sheaves undertook, in disobedience to an express prohibition, to step across the opening through which they were fed, merely for the purpose of speaking to a friend, and without any necessity ar ing out of the work. *Callaghan* *Maxwell* (1900) 2 Sc. Sess. Cas. series, 420, 37 Sc. L. R. 313.

Where an accident happened to workman while engaged at his wo through a tortious act of a fellow wo man, which had no relation whatever their employment. *Armitage* v. *Lan shire & Y. R. Co.* [1902; C. A.] 2 K. 178.

Where the injury was caused by plaintiff's fellow workmen, who at time were not engaged in their wo but were indulging in horse play. *P coner* v. *Londen & G. Shipbuilding* (1901) 3 Sc. Sess. Cas. 5th series, 5

Where a workman's foot was pier by the spikes on top of a railing wh he undertook to scale in order to en a church through a window, after fi ing that the door was locked. *Gib* v. *Wilson* (1901) 3 Sc. Sess. Cas. series, 661, 38 Sc. L. R. 450.

[2] Recovery has been allowed where carpenter, part of whose duty was sharpen his tools on a grindstone rot ed by machinery, had been forbidden touch the machinery, and was injur while endeavoring to replace the b which started the grindstone after had slipped. *Whitehead* v. *Rea* [1901; C. A.] 2 K. B. 48, 84 L. T. N. 514.

And where a workman employed the defendants to attend to a steam e gine within a shed, and to a mortar p outside the shed, worked by the ste engine and used to grind mortar for building, was caught in a revolvi shaft, as a result of his entering t shed by a door which he had been f bidden to use. *McNicholas* v. *Dunn* [1891] 1 Q. B. 773, 68 L. J. Q. B. S. 470, 80 L. T. N. S. 317, 47 We Rep. 500.

And where a collier leaving a mi induced a boy by a truck to wind hi up by a shaft which was used only f pulling up tools, and by which the m were prohibited to ascend, the boy b ing so startled when the collier reach the top that he let go. *Douglas* *United Mineral Min. Co.* (C. A.) Time Newspaper, February 20, 1900, 2 W. C. 15.

otherwise where the prohibited act was one which lay entirely outside the range of his functions.[3]

A workman's employment begins, in the ordinary course, when the time for work has arrived, and the locality has been reached at which the work is to be performed.[4] But recovery may be had for an accident occurring before the place of work was reached if, during the antecedent period within which it occurred, the servant was, as a matter of fact, under the master's control.[5]

Whether a servant whose active duties are finished for the day, but who is still on his employer's premises, is entitled to recover under the act, probably depends on the circumstances of the case. There seems to be no reason why a more rigorous standard should be applied under this act than under the common law, which, as has been shown in § 625, *ante,* treats a servant in many situations, as being still within the protection of his master, although he may not be actually at work.[6]

A servant does not cease to be in the course of his employment, merely because he is not actually engaged in doing what is specially prescribed to him, if, in the course of his employment, an emergency arises, and, without deserting his employment, he does what he thinks necessary for the purpose of advancing the work in which he is engaged in the interest of his master.[7]

[1] Where a person employed in a factory to do purely unskilled labor, and expressly forbidden to touch any of the machinery, was injured while attempting, in violation of such orders, to clean a machine. *Loure* v. *Pearson* [1899; C. A.] 1 Q. B. 261, 68 L. J. Q. B. N. S. 122.

[2] Where an employee of railroad contractors engaged in ballasting a railroad siding was run over by a train about seven minutes before the hour for commencing work, at a point several hundred yards from the work, as he was proceeding, in accordance with his employer's directions, along the main track, for the purpose of going to work, this was not an accident arising out of, and in the course of, his employment. *Holness* v. *Mackay* [1899; C. A.] 2 Q. B. 319, 68 L. J. Q. B. N. S. 724 (Romer, L. J., dissenting).

[3] As, where an engine cleaner who had been conveyed free of charge in his employer's train to the place where he was to do his work was run over while crossing the line to reach the shed where the engines were standing. *Holmes* v. *Great Northern R. Co.* [1900; C. A.] 2 Q. B. '09, 83 L. T. N. S. 44, distinguishing between the beginning of the employment and the beginning of work. Compare cases cited in § 624, *ante.*

[4] In a Scotch case recovery was denied where a workman who, after the conclusion of his day's work, was walking home along a private railway track belonging to his employer, was run over at a point about 230 yards from the place where he worked. *Caton* v. *Summerlee & Mossend Iron & Coal Co.* (1902) 4 Se. Sess. Cas. 5th series, 989.

[5] *Durham* v. *Brown* (1898) 1 Se. Sess. Cas. 5th series, 279, 36 Se. L. R. 190.

In *Rees* v. *Thomas* [1899; C. A.] 1 Q. B. 1015, 68 L. J. Q. B. N. S. 539, recovery was allowed where a fireman employed in a coal mine was, in the course of his duty, carrying a report of the state of the mine from the pit's mouth to the office, and the horse drawing the tramway truck in which he was riding ran away, and in endeavoring to stop it he fell and was killed. *Loure* v. *Pearson* [1899; C. A.] 1 Q. B. 261, 68 L. J. Q. B. N. S. 122 (see note 3, *supra*), was distinguished on the ground that the act there which was done outside

A servant does not cease to be in the course of his employment cause he takes a wrong or dangerous method of doing what migh done safely.[8]

The burden of proving that an accident arose out of, and in course of, the workman's employment lies on the plaintiff.[9]

The cases cited in this section should be compared with those co ered in chapter XXXIII., *ante*.

769. Period of disablement (sec. 1, subs. 2, a).—A workman w work consisted partly of superintendence and partly of the ad ment of certain machines was held to have been disabled from "e ing full wages at the work at which he was employed," within meaning of this subsection, where, although it was shown that the accident he continued to work for the same employer at the s wages, it was also proved that he was unable to attend to the ad ment of machines; that he could do no work except that of sup tendence; and that he would have been unable to earn the same w if he had had to take service under another employer.[1]

770. Alternative remedies open to workmen (sec. 1, subs. 2, b This provision does not prevent a workman from maintaining a mon-law suit, after it has been determined that his case was not which came within the purview of the act.[1]

An election to take under the act is evidenced by receipts for we payments, some of which were worded "in full satisfaction of am due to me under the act."[2]

771. "Serious and wilful misconduct" (sec. 1, subs. 2, c).—The tion whether the servant is or is not debarred from recovery on ground of "serious and wilful misconduct" ceases to be of any portance, when it is apparent from the circumstances that the acci

the scope of the servant's employment was not done in any emergency.

A laborer injured while giving assistance to a machine man, in replacing some loose belting while the machine was in motion, was held entitled to recover in *Menzies* v. *McQuibban* (1900) 2 Sc. Sess. Cas. 5th series, 732, 37 Sc. L. R. 526.

[8] *Durham* v. *Brown* (1898) 1 Sc. Sess. Cas. 5th series, 279, 36 Sc. L. R. 190, per Lord McLaren. A fatal accident to a workman will be deemed to have occurred in the course of his employment, notwithstanding that at the time when it occurred he was going from one place of his employment to another by a forbidden route, which was more dangerous than another route which was available to him. *McNicholas* v. *D* [1899; C. A.] 1 Q. B. 773, 68 L. J. N. S. 470, 47 Week. Rep. 500.

[9] *McNicholas* v. *Dawson*, 68 L. J. N. S. 470 [1899] 1 Q. B. 773, 80 N. S. 317, 47 Week. Rep. 500.

[1] *Chandler* v. *Smith* [1899; C. Q. B. 506, 68 L. J. Q. B. N. S. 90 L. T. N. S. 317, Followed in *Fre* v. *Macfarlane* (1900) 2 Sc. Sess. 5th series, 832, 37 Sc. L. R. 599; *Northern of Scotland R. Co.* v. *F* (1900) 3 Sc. Sess. Cas. 5th series, 38 Sc. L. R. 653.

[1] *Beckley* v. *Scott* (1902) 2 Ir. 504

[2] *Little* v. *MacLellan* (1900) 2 Sc. Cas. 5th series, 387.

did not arise out of, or in the course of, his employment.[1] But if the workman brings himself within the act by showing that the accident arose out of, and in the course of, his employment, his case can only be met by the employer by showing that the injury to the workman is attributable to his serious and wilful misconduct.[2]

The judicial conception of what constitutes "serious and wilful misconduct" can scarcely be said to have, as yet, assumed a definite form. But, so far as can be judged from the comparatively few decisions which bear upon the subject, the phrase implies something nearly, if not quite, the same as that "wilful misconduct" which was explained by the court of appeals in a case involving the liability of a carrier for damage to goods. "There must be the doing of something which the person doing it knows will cause risk or injury, or the doing of an unusual thing with reference to the matter in hand, either in spite of warning, or without care, regardless whether it will or will not cause injury."[3]

772. Arbitration (sec. 1. subs. 3).—In order that this subsection

[1] *Lowe* v. *Pearson* [1899; C. A.] 1 Q. B. 261, 68 L. J. Q. B. N. S. 122.

[2] *McNicholas* v. *Dawson* [1899] 1 Q. B. 773, 68 L. J. Q. B. N. S. 470, 80 L. T. N. S. 317, 47 Week. Rep. 500, per Collins, L. J.

[3] Cotton, L. J., in *Lewis* v. *Great Western R. Co.* (1877) L. R. 3 Q. B. Div. 195, 47 L. J. Q. B. N. S. 131, 37 L. T. N. S. 774, 26 Week. Rep. 255. The language used by the other lords justices is to a similar effect.

A finding in favor of a servant will not be pronounced erroneous, as a matter of law, where a rule made under the coal mines regulation act of 1887 was violated by a workman employed in a coal mine. *Rumboll* v. *Nunnery Colliery Co.* [1899; C. A.] 80 L. T. N. S. 42. Nor where a miner failed to inform himself as to the contents of a rule,—especially where the evidence shows that it was not generally observed. *McNicoll* v. *Speirs* (1899) 1 Sc. Sess. Cas. 5th series, 604, 36 Sc. L. R. 428. Nor where an engineer, after leaving his engine, walked along the track to a station where he had to report himself off duty. *Todd* v. *Caledonian R. Co.* (1899) 1 Sc. Sess. Cas. 5th series, 1047, 36 Sc. L. R. 784. Nor where a watchman, stationed at a certain point to warn approaching trains of a landslide, went along the line for about 300 yards. *Glasgow & S. W. P. Co.* v. *Laidlaw* (1900) 2 Sc. Sess. Cas. 5th series, 708, 37 Sc. L. R. 593. Nor where a boy of nineteen, in contravention of an express order, put his hand across a circular saw to pick up an uncut screw which had fallen from its place. *Reeks* v. *Kynock* [1901; C. A.] 18 Times L. R. 34. Nor where a servant used a hoist to ascend to a platform, in contravention of a prohibitory notice, but the trial judge did not find that he knew of the prohibition. *McArthur* v. *McQueen* (1901) 3 Sc. Sess. Cas. 5th series, 1006. Nor where a miner failed to get into a manhole in the main haulage road of the mine, after he had been warned by a fellow workman that a train of cars was approaching. *John* v. *Albion Coal Co.* [1901; C. A.] 18 Times L. R. 27.

On the other hand no recovery can be had where a girl engaged in passing sheaves on a threshing machine undertook, in disobedience to an express prohibition, to step across the opening through which they were fed to the machine, merely for the purpose of speaking to a friend, and without any necessity arising out of the work. *Callaghan* v. *Maxwell* (1900) 2 Sc. Sess. Cas. 5th series, 420, 37 Sc. L. R. 313. Nor where a miner infringed a rule forbidding him to carry a naked light on his cap while carrying cartridges not inclosed in a case. *Dailly* v. *Watson* (1900) 2 Sc. Sess. Cas. 5th series, 1044, 37 Sc. L. R. 782. Nor where the servant cleaned machinery in motion, such an act being forbidden by a rule known to him. *Guthrie* v. *Boase Spinning Co.* (1901) 3 Sc. Sess. Cas. 5th series, 769, 38 Sc. L. R. 483.

may apply, it must be shown that a question has arisen and that it has not been settled by agreement.[1] Where a question as to the amount or duration of compensation has been settled by agreement, there is no room for arbitration. The workman's proper course is to get a memorandum of agreement recorded.[2]

773. Recovery in cases where nonliability apart from the act is established (sec. 1, subs. 4).— This subsection is applicable where it is found that no cause of action at common law and under the act of 1880 was stated by the averments of the complaint.[1]

Where a workman who has failed in an action to recover damages is desirous of having compensation for his injury assessed under the act, he must follow the procedure prescribed by this subsection, and must apply, then and there, to the judge trying the action, for an assessment of compensation; he cannot at a subsequent date initiate independent proceedings against his employer by a request for arbitration under the act.[2]

774. Application of fines imposed on other proceedings (sec. 1, subs. 5).— The enactments here referred to are the coal mines regulation act 1887; the metalliferous mines regulation act 1872; and the factory and workshop act 1901.

774a. Text of section 2.—Sec. 2.—(1) Proceedings for the recovery under this act of compensation for an injury shall not be maintainable unless notice of the accident has been given as soon as practicable after the happening thereof, and before the workman has voluntarily left the employment in which he was injured, and unless the claim for compensation with respect to such accident has been made within six months from the occurrence of the accident causing the injury, or, in case of death, within six months from the time of death: Provided, always, That the want of, or any defect or inaccuracy in, such notice shall not be a bar to the maintenance of such proceedings, if it is found in the proceedings for settling the claim that the employer is not prejudiced in his defense by the want, defect, or inaccuracy, or that such want, defect, or inaccuracy was occasioned by mistake or other reasonable cause.

[1] *Field* v. *Longden* [1902] 1 K. B. 47. There a workman, having been incapacitated for work by an accident arising out of, and in the course of, his employment, his employers had, since the second week after the accident, paid to him, by way of compensation, weekly payments of the full amount mentioned in schedule I., § 1 (b) (see subtitle C. *infra*), and promised to continue to do so during the period of his incapacity; but the workman, nevertheless, filed a request for arbitration in the county court, and the county court judge made an award for compensation in his favor. It was held, that, under the subsection it was a condition precedent to the jurisdiction of the county court judge that a question should have arisen as to the liability to pay, or as to the amount or duration of compensation under the act, and that, no such question having arisen, the county court judge had no jurisdiction to make an award.

[2] *Dunlop* v. *Rankin* (1901) 4 Sc. Sess. Cas. 5th series, 203, 39 Sc. L. R. 146.

[1] *Henderson* v. *Glasgow* (1900) 2 Sc. Sess. Cas. 5th series, 1127, 37 Sc. L. R. 857.

[2] *Edwards* v. *Godfrey* [1899] 2 Q. B. 333, 68 L. J. Q. B. N. S. 666, 80 L. T. N. S. 672.

(2) Notice in respect of an injury under this act shall give the name and address of the person injured, and shall state in ordinary language the cause of the injury and the date at which it was sustained, and shall be served on the employer, or, if there is more than one employer, upon one of such employers.

(3) The notice may be served by delivering the same to or at the residence or place of business of the person on whom it is to be served.

(4) The notice may also be served by post, by a registered letter addressed to the person on whom it is to be served, at his last known place of residence or place of business, and if served by post shall be deemed to have been served at the time when the letter containing the same would have been delivered in the ordinary course of post; and in proving the service of such notice it shall be sufficient to prove that the notice was properly addressed and registered.

(5) Where the employer is a body of persons corporate or unincorporate, the notice may also be served by delivering the same at, or by sending it by post in a registered letter addressed to the employer at the office, or, if there be more than one office, any one of the offices of such body.

775. Notice of the accident (sec. 2, subs. 1).— *a. "Proceedings."*— This word is used in a "sense different from that which would describe legal procedure ordinarily."[1] It signifies a claim for compensation, and a refusal of such compensation.[2] A notice of injury, not followed by a claim for compensation, is not a "proceeding."[3]

b. "Claim for compensation."—This phrase means, not the intiation of proceedings before the tribunal by which the compensation is to be assessed, but a notice of a claim for compensation, sent to the workman's employer.[4] A request for arbitration is a sufficient "claim for compensation."[5]

c. Excuses for not serving notice in time.—The provision which requires the claim for compensation to be made within six months of the occurrence of the accident causing the injury is not necessarily an absolute bar to proceedings for the assessment of compensation, commenced after six months by an injured workman; and the county court judge or other arbitrator has jurisdiction to inquire whether

[1] Lord Halsbury in *Powell* v. *Main Colliery Co.* [1900] A. C. 366.

[2] *Powell* v. *Main Colliery Co.* [1900] 2 Q. B. 145, per Romer, L. J., whose conclusions were adopted by the House of Lords.

[3] *Perry* v. *Clements* (1901) 17 Times L. R. 525, 49 Week. Rep. 669.

[4] *Powell* v. *Main Colliery Co.* [1900] A. C. 366, holding that the proceedings were in time where a workman sent to his employers, within six months, a notice of the accident, and also a notice stating that he claimed a certain amount as compensation for the injury, and then, more than six months after the accident, filed a request for arbitration in the county court. The decision of the court of appeal ([1900] 2 Q. B. 145) was reversed.

A letter was written by the agent of a deceased servant's father to the employer to the following effect: "I am instructed by his father to intimate that he holds you liable for compensation. This notice is given in terms of the statute." Held, that the letter was not a claim for compensation, but merely notice of an intention to make a claim. *Bennett* v. *Wordie* (1899) 1 Sc. Sess. Cas. 5th series, 855, 36 Sc. L. R. 643.

[5] *Wright* v. *Baynall* [1900] 2 Q. B.

there are any circumstances in the case to debar the employer fr raising that defense.[6]

The *onus* lies on the workman to show that the employer has n been prejudiced by the former's failure to give due notice of the cident.[7]

775a. Text of sections 3 and 4.—Sec. 3.—(1) If the registrar of frien societies, after taking steps to ascertain the views of the employer and workm certifies that any scheme of compensation, benefit, or insurance for the workm of an employer in any employment, whether or not such scheme includes oth employers and their workmen, is, on the whole, not less favorable to the gene l y of workmen and their dependents than the provisions of this act, the e ployer may, until the certificate is revoked, contract with any of those workm that the provisions of the scheme shall be substituted for the provisions of th act, and thereupon the employer shall be liable only in accordance with t scheme; but, save as aforesaid, this act shall apply, notwithstanding any contra to the contrary made after the commencement of this act.

(2) The registrar may give a certificate, to expire at the end of a limited perio not less than five years.

(3) No scheme shall be so certified which contains an obligation upon t workmen to join the scheme as a condition of their hiring.

(4) If complaint is made to the registrar of friendly societies, by or on beha of the workmen of any employer, that the provisions of any scheme are no long on the whole, so favorable to the general body of workmen of such employer a their dependents as the provisions of this act, or that the provisions of su scheme are being violated, or that the scheme is not being fairly administered, that satisfactory reasons exist for revoking the certificate, the registrar sha examine into the complaint, and, if satisfied that good cause exists for such co plaint, shall, unless the cause of complaint is removed, revoke the certificate.

(5) When a certificate is revoked or expires, any moneys or securities held f

240, 82 T. N. S. 346; *Fraser* v. *Great North of Scotland R. Co.* (1897) 3 Sc. Sess. Cas. 5th series, 908, 38 Sc. L. R. 333.

[6] An agreement arrived at between the parties shortly after the accident, that there is a statutory liability on the employer to pay compensation, the amount of compensation being left open for future settlement, is evidence upon which the judge or arbitrator may properly find that the employer is estopped from setting up the defense that the request for arbitration was not filed within six months of the accident. Having allowed the six months to expire while the negotiations were still proceeding, the employer cannot then turn round and say t he time for claiming compensation ne by. *Wright* v. *Bagnall* [1900] 2 . 240, 82 L. T. N. S. 346.

But the mere fact that the employer has made weekly payments to a workman is not such evidence of an admission of liability and of an agreement pay compensation as will enable t workman to commence proceedings u der the act after the expiration of s months from the accident, where the e ployer took a receipt which stated th the money was received on account compensation which might be or becom due to the workman under the act. *Re dall* v. *Hill's Dry Docks & Engineeri Co.* [1900] 2 Q. B. 245. Distinguishi *Wright* v. *Bagnall* [1900] 2 Q. . 24 82 L. T. N. S. 346, *supra*.

A trial judge is in error if he di misses the action, when he has dete mined that there was no good excu for the want of notice. He is still boun to inquire whether the defendant wa as a matter of fact, prejudiced. *McLa* v. *Carse* (1899) 1 Sc. Sess. Cas. 5 series, 878.

[7] *Shearer* v. *Miller* (1899) 2 Sc. Ses Cas. 5th series, 114, 37 Sc. L. R. 80.

the purpose of the scheme shall be distributed as may be arranged between the employer and workmen, or as may be determined by the registrar of friendly societies in the event of a difference of opinion.

(6) Whenever a scheme has been certified as aforesaid, it shall be the duty of the employer to answer all such inquiries and to furnish all such accounts in regard to the scheme as may be made or required by the registrar of friendly societies.

(7) The chief registrar of friendly societies shall include in his annual report the particulars of the proceedings of the registrar under this act.

Sec. 4. Where, in an employment to which this act applies, the undertakers, as hereinafter defined, contract with any person for the execution by or under such contractor of any work, and the undertakers would, if such work were executed by workmen immediately employed by them, be liable to pay compensation under this act to those workmen in respect of any accident arising out of, and in the course of, their employment, the undertakers shall be liable to pay to any workmen employed in the execution of the work any compensation which is payable to the workmen (whether under this act, or in respect of personal negligence or wilful act independently of this act) by such contractor, or would be so payable if such contractor were an employer to whom this act applies: Provided, That the undertakers shall be entitled to be indemnified by any other person who would have been liable independently of this section.

This section shall not apply to any contract with any person for the execution by or under such contractor of any work which is merely ancillary or incidental to, and is no part of, or process in, the trade or business carried on by such undertakers respectively.

776. Liability to servants of contractors (sec. 4).—*a. Generally.*—This section "contemplates the case of persons who, being undertakers in respect to a particular class of business, substitute for themselves a contractor to do some part of that business, and provides that the workmen of such a contractor shall have the same rights against such persons as they would have if they were employed by them."[1]

b. "Undertakers."—The meaning of this phrase is discussed in § 786, *infra*.

c. "Work merely ancillary or incidental to."—Whether the employer is exempt from liability under this provision is determined in each instance as a question of fact. The decisions, as will be seen by the subjoined note, are not consistent.[2]

[1] Collins, L. J. *Wrigley* v. *Bagley* [1901] 1 K. B. 78, 84 L. T. N. S. 415.

[2] The following operations have been held to be "merely ancillary" to the business of the defendant:

The erection of a station building for a railway company by a contractor. *Pearce* v. *London & S. W. R. Co.* [1900; C. A.] 2 Q. B. 100.

The work of putting a new driving wheel into a steam engine belonging to a cotton factory, where such work is done under contract by a firm of engineers. *Wrigley* v. *Bagley* [1901; C. A.] 1 K. B. 780, 84 L. T. N. S. 415, Affirmed in [1902] A. C. 299.

The fixing of an iron roof by a subcontractor for a builder, the evidence showing that this was no part of the latter's business. *Bush* v. *Hawes* [1902; C. A.] 1 K. B. 216, 71 L. J. K. B. N. S. 58.

The erection by a contractor of coal-hauling machinery at the power station

776a. Text of section 5.—Sec. 5. (1) Where any employer becomes liable under this act to pay compensation in respect of any accident, and is entitled to any sum from insurers in respect of the amount due to a workman under such liability, then in the event of the employer becoming bankrupt, or making a composition or arrangement with his creditors, or if the employer is a company of the company having commenced to be wound up, such workman shall have a first charge upon the sum aforesaid for the amount so due, and the judge of the county court may direct the insurers to pay such sum into the Postoffice Savings Bank in the name of the registrar of such court, and order the same to be invested or applied in accordance with the provisions of the first schedule hereto with reference to the investment in the Postoffice Savings Bank of any sum allotted as compensation; and those provisions shall apply accordingly.

(2) In the application of this section to Scotland, the words "have a first charge upon" shall mean "be preferentially entitled to."

777. Proceedings under this section.—An appeal lies to a divisional court from an order of a county court judge, giving a workman a charge upon moneys due from an insurer to the employer.[1]

777a. Text of section 6.—Sec. 6. Where the injury for which compensation is payable under this act was caused under circumstances creating a legal liability in some person other than the employer, to pay damages in respect thereof, the workman may, at his option, proceed, either at law against that person to recover damages, or against his employer for compensation under this act, but not against both; and if compensation be paid under this act, the employer shall be entitled to be indemnified by the said other person.

of an electric railway company. *Brennan* v. *Dublin United Tramways Co.* (1900) 2 Ir. Rep. 241.

The erection by a contractor of a retaining wall to protect the track of a railway. *Dundee & Arbroath Joint R. Co.* v. *Carlin* (1901) 3 Sc. Sess. Cas. 5th series, 843, 38 Sc. L. R. 635 (servant run over by train).

The work of a man employed by a window cleaning company, who was injured while cleaning the windows of the defendant, a firm of tailors. *Dempster* v. *Hunter* (1902) 4 Sc. Sess. Cas. 5th series, 580, 39 Sc. L. R. 395.

Work done by a subcontractor for a firm of building contractors, who habitually made contracts for the demolition of old buildings on the site of which new ones were to be constructed. *Knight* v. *Cubitt* [1902] 1 K. B. 31.

The following operations have been held not to be "merely ancillary" to the business of the defendant:

The erection of signals for a new railway siding by a contractor. *Burns* v. *North British R. Co.* (1900) 2 Sc. Sess. Cas. 5th series, 629, 37 Sc. L. R. 448 (workman was run over).

Work done in the course of his employment by a servant of a contractor for the collection and delivery of goods conveyed by a railway for a third party. *Greenhill* v. *Caledonian R. Co.* (1900) 2 Sc. Sess. Cas. 5th series, 733, 37 Sc. L. R. 524 (servant injured while transferring a barrel from a lorry to a goods train).

Carting work done by the servant of a firm of contractors, who were under contract to do all the carting work in connection with a factory. *Brew* v. *Grant* (1900) 2 Sc. Sess. Cas. 5th series, 470, 37 Sc. L. R. 328 (factory owner held liable).

Work done by a carter in the employ of a railway company, while he was engaged in transporting the goods of the defendants, a firm of sausage makers, to a station on the railway. *Cooper* v. *McGovern* (1902) 4 Sc. Sess. Cas. 5th series, 249. This decision is almost certainly erroneous.

[1] *Knowleton* v. *Northern Employers' Mut. Indemnity Co.* [1902] 1 K. B. 880, 18 Times L. R. 504; *Morris* v. *Northern Employers' Mut. Indemnity Co.* [1902] 2 K. B. 165.

778. Proceedings under section 6.—Where both the "undertakers" and a contractor with them are made respondents to a claim for compensation under the act, and the contractor is found liable to pay compensation, a claim for indemnity cannot be made in the arbitration by the undertakers against the contractor under rule 23 (2) of the workmen's compensation rules 1898, unless the notice prescribed by rule 19 has been given.[1]

B. Employments to which the Act is Applicable.

778a. Text of sections 7-10.—Sec. 7.—(1) This act shall apply only to employment by the undertakers as hereinafter defined, on or in or about a railway, factory, mine, quarry, or engineering work, and to employment by the undertakers as hereinafter defined, on in or about any building which exceeds 30 feet in height and is either being constructed or repaired by means of a scaffolding, or being demolished, or on which machinery driven by steam, water, or other mechanical power, is being used for the purpose of the construction, repair, or demolition thereof.

(2) In this act "railway" means the railway of any railway company to which the regulation of railways act 1873, applies, and includes a light railway made under the light railways act 1896; and "railway" and "railway company" have the same meaning as in the said acts of 1873 and 1896; "factory" has the same meaning as in the factory and workshop acts 1878 to 1891, and also includes any dock, wharf, quay, warehouse, machinery, or plant, to which any provision of the factory acts is applied by the factory and workshop act 1895, and every laundry worked by steam, water, or other mechanical power; "mine" means a mine to which the coal mines regulation act 1887, or the metalliferous mines regulation act 1872, applies; "quarry" means a quarry under the quarries act 1894; "engineering work" means any work of construction or alteration or repair of a railroad, harbor, dock, canal, or sewer, and includes any other work for the construction, alteration, or repair of which machinery driven by steam, water or other mechanical power is used; "undertakers" in the case of a railway means the railway company; in the case of a factory, quarry, or laundry means the occupier thereof, within the meaning of the factory and workshop acts 1878 to 1895; in the case of a mine means the owner thereof within the meaning of the coal mines regulation act 1887, or the metalliferous mines regulation act 1872, as the case may be; in the case of an engineering work, means the person undertaking the construction, alteration, or repair; and in the case of a building means the persons undertaking the construction, repair, or demolition; "employer" includes any body of persons, corporate or unincorporate, and the legal personal representative of a deceased employer; "workman" includes every person who is engaged in an employment to which this act applies, whether by way of manual labor or otherwise, and whether his agreement is one of service or apprenticeship or otherwise, and is expressed or implied, is oral or in writing. Any reference to a workman who has been injured shall, where the workman is dead, include a reference to his legal personal representative, or to his dependents, or other person to whom compensation is

[1] *Appleby* v. *Horseley Co.* [1899] 2 Q. B. 521, 80 L. T. N. S. 853, 68 L. J. Q. B. N. S. 892.

payable; "dependents" means (*a*) in England and Ireland, such members of the workman's family specified in the fatal accidents act 1846, as were wholly or in part dependent upon the earnings of the workman at the time of his death; and (*b*) in Scotland, such of the persons entitled according to the law of Scotland to sue the employer for damages or solatium in respect of the death of the workman as were wholly or in part dependent upon the earnings of the workman at the time of his death.

(3) A workman employed in a factory which is a shipbuilding yard shall not be excluded from this act by reason only that the accident arose outside the yard in the course of his work upon a vessel in any dock, river, or tidal water near the yard.

Sec. 8.—(1) This act shall not apply to persons in the naval or military service of the Crown, but otherwise shall apply to any employment by or under the Crown to which this act would apply if the employer were a private person.

(2) The treasury may, by warrant laid before Parliament, modify for the purposes of this act their warrant made under section one of the superannuation act 1887, and notwithstanding anything in that act, or any such warrant, may frame a scheme with a view to its being certified by the registrar of friendly societies under this act.

Sec. 9. Any contract existing at the commencement of this act, whereby a workman relinquishes any right to compensation from the employer for personal injury arising out of and in the course of his employment, shall not, for the purposes of this act, be deemed to continue after the time at which the workman's contract of service would determine, if notice of the determination thereof were given at the commencement of this act.

Sec. 10. (1) This act shall come into operation on the 1st day of July, 1898.

(2) This act may be cited as the workmen's compensation act 1897.

779.—Scope and effect of these provisions; generally.—From the provisions above set out it will be seen that the right of the servant to recover compensation under the act is made to depend, in the majority of instances, upon two distinct tests, *viz.* (1) physical contiguity with respect to the locality in which one or other of certain specific classes of business are carried on; and (2) the character of the operations in which the servant is engaged. In any case in which the former of these tests is controlling, the essential subject of inquiry is the import of the phrase "on or in or about." The applicability of the latter test is a question which hinges upon the connotation of the various terms used to designate the various kinds of business which fall within the purview of the act.

780. Meaning of the phrase "on or in or about," when used in connection with various kinds of concerns.—In the subjoined note is stated the effect of the cases which turn directly upon the question whether the conditions of physical contiguity implied by the phrase "on or in or about" existed at the time of the accident, with regard

to certain localities in which one or other of the various kinds of business which are covered by the act was carried on.[1]

[1](a) ***On or in or about a railway.***—(See also § 783, *infra.*) The conditions contemplated by these words do not exist where a carter in the employ of a contractor for the cartage of goods to and from a station of the company is injured owing to the fact that, after his day's work is finished, his horse bolts just outside the gate of the station and dashes into a shop 315 yards distant. *Bathgate* v. *Caledonian R. Co.* (1901) 4 Sc. Sess. Cas. 5th series, 313, 39 Sc. L. R. 246.

Nor can any compensation be recovered under the act, where the conductor of a freight train met with an accident about ¾ of a mile from the main line of a railway, from which a private siding belonging to a trading company diverged. *Brodie* v. *North British R. Co.* (1900) 3 Sc. Sess. Cas. 5th series, 75, 38 Sc. L. R. 38. With respect to this case it should be observed that the siding itself was not a "railway" for the purposes of the act, as it was not one to which the regulation of railways act 1873, referred to in section 7, subs. 2, was applicable. See § 783, *infra.*

In England the accepted doctrine is that no part of the premises of a railway company can be regarded as being "used for purposes of public traffic," within the meaning of the regulation of railways act, unless some one of the processes directly connected with the operation of the trains are conducted thereon. This doctrine is assumed to involve the consequence that no recovery can be had under the compensation act where the accident occurs in a railway refreshment room, to which the only entrance for the public is from the station platform. *Milner* v. *Great Northern R. Co.* [1900; C. A.] 1 Q. B. 795, 82 L. T. N. S. 187.

But another view prevails in Scotland, several claims having been allowed to recover where the accident occurred in a smithy within the area of a yard, where the horses used by a railway company for collecting and delivering goods were shod. *Caledonian R. Co.* v. *Breslin* (1900) 2 Sc. Sess. Cas. 5th series, 1158, 37 Sc. L. R. 308. And also where the claimant was a carter whose business it was to deliver to consignees goods received at one of the stations of his employers, a railway company. *Devine* v. *Caledonian R. Co.* (1899) 1 Sc. Sess. Cas. 5th series, 1105, 36 Sc. L. R. 877.

Of these two theories the latter would seem to be the preferable one. The English decision ignores the plain and liberal meaning of the words "on or in or about," and fastens on them a restricted significance which is not justified by any of the phraseology employed in the act itself.

(b) "*On, in, or about a factory.*"—Recovery has been allowed where an employee was injured while loading a cart belonging to the owners of the factory, standing in a street close to the entrance to the factory yard, in a place where it was usually loaded. *Powell* v. *Brown* [1899; C. A.] 1 Q. B. 157, 68 L. J. Q. B. N. S. 151, 79 L. T. N. S. 631, 47 Week. Rep. 145. And where a workman employed as a quay laborer at a wharf was injured on the street outside the wharf shed, while engaged in removing girders to the side of a steamer. *Strain* v. *Sloan* (1901) 3 Sc. Sess. Cas. 5th series, 663, 38 Sc. L. R. 475. And where a car driver of a cable railway company was injured, while oiling his car in the car shed, 374 feet distant from a machine room adjoining the shed in which grips and other parts of the cars were repaired. *Mooney* v. *Edinburgh & D. Tramways Co.* (1901) 4 Sc. Sess. Cas. 5th series, 390, 38 Sc. L. R. 260.

Recovery has been disallowed where a carter, employed by the occupiers of a factory to cart goods to and from the factory, was injured when he was about a mile and a half distant from the factory. *Lowth* v. *Ibbotson* [1899] 1 Q. B. 1003, 80 L. T. N. S. 341, 68 L. J. Q. B. N. S. 465. And where a laborer, whose duty it was to fetch water in a cart from a brook at some distance along the main road, for the use of a factory, was injured while returning with the cart, at a spot about 110 to 160 yards distant from the engine and mortar-mill, owing to the horse running away. *Fenn* v. *Miller* [1900] 1 Q. B. 788, 82 L. T. N. S. 284. And where a cart used to carry timber from a factory upset about 2 miles away from the factory, and injured an employee. *Bell* v. *Whitton* (1899) 1 Sc. Sess. Cas. 5th series, 942. And where the workman was injured in the employment of a firm of ship repairers, while repairing a ship in a public dock at a distance from his employer's factory of 550 yards in a direct line, and about a mile by road. *Barclay*

781. "On or in or about a building" which exceeds 30 feet in height.—*a. Height of building.*—In an arbitration before the county cou under this act, the question whether a building "exceeds 30 feet i height," within the meaning of this section, is a question of fact to b determined by the county court judge, having regard to the particula circumstances existing at the time of the accident to the workman.[1]

v. *M'Kinnon* (1901) 3 Sc. Sess. Cas. 5th series, 436, 38 Sc. L. R. 321, Affirmed in [1901] A. C. 269.

The expression "employment by the undertakers . . . on or in or about a . . . factory" means employment by the undertakers on, in, or about their own factory. A workman, therefore, who is sent by his employers on their business to the factory of a third party, and is there injured by accident, is not entitled to compensation under the act. *Francis* v. *Turner Bros.* [1900] 1 Q. B. 478.

In a case where a railway car or was injured while taking goods from a factory to a dray, in which they were to be conveyed to the station of a railway which had contracted for the conveyance of the goods for a lump sum, including both collection and delivery, it was held that the owners of the factory were "undertakers," and that the accident occurred while the carter was employed "in or about" the factory. *McGovern* v. Cooper (1901) 4 Sc. Sess. Cas. 5th series, 249. But this decision seems to be wholly anomalous and unsound.

It has been held that a workman employed on board a ship lying in dock is not employed "on or in or about" a dock, and is therefore not employed "on or in or about" a factory, whether the dock itself is or is not a "factory" within the meaning of that word, as defined in the act. (See § 783a, *infra.*) *Flowers* v. *Chambers* [1899; C. A.] 2 Q. B. 142, 80 L. T. N. S. 834, 68 L. J. Q. B. N. S. 648. But this case was overruled in *Raine* v. *Jobson* [1901] A. C. 404.

(c) *On or in or about a mine.*—Recovery has been allowed where a servant was injured while engaged in blasting boulders, for the purpose of forming a road to be used in the operation of a mine which was being opened a few yards away. *Ellison* v. *Longden* (1901; C. A.) 18 Times L. R. 48. And where a brakeman in the service of a colliery company was injured while coupling cars on a siding belonging to the company. *Monaghan* v. *United Collieries* (1900) 3 Sc. Sess. Cas. 5th series, 14 38 Sc. L. R. 92.

Recovery has been disallowed whe an engine driver in the employ of co liery owners was killed about ¾ of mile from the pit mouth of the collier while his engine was drawing a co train to the depot where the coal wa stored. *Turnbull* v. *Lambton Colliera Co.* (1900; C. A.) 82 L. T. N. S. 58 16 Times L. R. 329. And where an in jury was received by a workman, wh after the conclusion of his day's wor was walking home along a private ra way belonging to his employer, and wa run over at a point about 230 yard from the place where he worked. *Cato* v. *Summerlee & M. Iron & Coal Co* (1902) 4 Sc. Sess. Cas. 5th series, 969.

(d) *On or in or about "engineering work."*—These words are not descriptiv of an accident which occurred to a work man while he was engaged in unloadin from a hopper, about 1½ miles out a sea, mud dredged from a harbor, not withstanding that he was at times em ployed on the dredger. *Chambers* v *Whitehaven Harbour Comrs.* [1899; C A.] 2 Q. B. 132, 68 L. J. Q. B. N. S 740, 80 L. T. N. S. 586, 47 Week. Rep 533.

[1] *McGrath* v. *Neill* [1902; C. A.] K. B. 211, 71 L. J. K. B. N. S. 5 approving a finding that the buildin was over 30 feet in height, where th judge took the lowest part of the foo ings as the level from which to estimat the height, and there was no evidenc to show that, at the time, anything mor than the footings had been covered in.

An accident to a workman employe on, in, or about a building in the cours of construction, which does not at the time exceed 30 feet in height, although it is intended that when completed it shall exceed such height, is not within the act. *Billings* v. *Halloway* [1899; C. A.] 1 Q. B. 70, 68 L. J. Q. B. N. S 16, 79 L. T. N. S. 396.

A finding that the employment of the workman was upon a building exceeding 30 feet in height, being demolished, is

The distance from the ground to the top of the roof, and not the distance from the ground to the top of the walls, is to be considered in determining whether a building is more than 30 feet high, within the act.[2]

b. 'Being constructed or repaired."—These words do not confine the employment to the construction or repair of the building as a whole. "Construction" here includes a case where the building has been constructed and believed to be complete, but, having been afterwards thought to be faulty and unstable, is being strengthened by the addition of stays or supports.[3]

The word "repair" includes painting, whitewashing, and dubbing the ceiling and walls of the interior of a building, where the painting and whitewashing is a portion of the work necessary to finish the building.[4]

On the ground that the buildings in question came within the descriptive words, "being constructed by a scaffolding," recovery has

justifiable, where the evidence shows that, although the building had been reduced to less than 30 feet, the party-wall between the building and the adjoining one remained intact at the time of the accident, and was more than 30 feet in height. *Knight* v. *Cubitt* [1902] 1 K. B. 31, 71 L. J. K. B. N. S. 65.

The conditions indicated by this phrase are satisfied where the height of the building, without including the foundation, is more than 30 feet. *Halstead* v. *Thomson* (1901) 3 Sc. Sess. Cas. 5th series, 668, 38 Sc. L. R. 473.

Internal communication between a building over 30 feet high and an adjoining building less than that height, coupled with the fact that the same business is carried on in both buildings, is not evidence to justify a finding that the lower building is a part of the higher, and that a workman injured while engaged in demolishing the lower building is employed on the demolition of a building exceeding 30 feet in height. *Rixson* v. *Pritchard* [1900] 1 Q. B. 800, 82 L. T. N. S. 186.

[2] *Hoddinott* v. *Newton* (1899; C. A.) 68 L. J. Q. B. N. S. 495, [1899] 1 Q. B. 1018, Affirmed as to this point in [1901] A. C. 49.

[3] In *Hoddinott* v. *Newton* [1901] A. C. 49, 84 L. T. N. S. 1, Reversing [1899; C. A.] 1 Q. B. 1018, 68 L. J. Q. B. N. S. 495, Lord Macnaghten said: "Construction, repair, demolition,—these three operations cover, I think, every varying phase in the life of a building, from its beginning to its end." Lord Morris said: "In my opinion, when you realize what the entity called the building is, all operations on it must be either constructing, or repairing, or demolishing, —alteration in its construction is, in my opinion, constructing. . . . In my opinion, whether completed or not completed, if work of the nature of construction goes on, that is constructing; if work in the nature of repair, that is repairing; and there is no room for any third operation of so-called alteration as distinct from constructing or repairing." Lords Shand and Lindley dissented from the judgment of the majority.

[4] *Reddy* v. *Broderick* (1901) 2 Ir. Rep. 328.

A large amount of whitewashing work was being done upon a school building more than 30 feet high, by means of a scaffolding, and a workman employed upon the work was killed owing to the collapse of the scaffolding. Held, that the building was "being repaired" by means of a scaffolding. *Dredge* v. *Conway* [1901] 2 K. B. 42, 84 L. T. N. S. 345.

The court stated that the effect of the decision in *Hoddinott* v. *Newton* [1901] A. C. 49, 84 L. T. N. S. 1, *supra*, was to overrule the earlier ruling (*Wood* v. *Walsh* [1899] 1 Q. B. 1009, 80 L. T. N. S. 345, 68 L. J. Q. B. N. S. 492) that the ordinary outside painting of a building is not "repair" within the meaning of the act.

been allowed in a case where, at the time of the accident, the component parts of the scaffolding were lying on the ground ready for use, but the scaffolding itself had not been erected;[5] and in a case where the building itself had been completed, but the scaffolding was still standing.[6]

c. What is a "scaffolding."—It is now definitely settled that the word "scaffolding" is not restricted to those permanent external structures to which the word is most commonly applied, but also embraces an internal staging, arranged by means of planks and trestles and without poles.[7] Whether a mere temporary staging of this kind is a scaffolding is a mixed question of law and fact. When the facts are ascertained it is a question of law, upon which a court of review is not only entitled, but bound, to express an opinion.[8]

The cases dealing with the question whether a ladder is a "scaffolding" within the meaning of the act are so strangely conflicting that it is difficult to predict in what manner this point will finally be settled. In two of those cases it has been held to be a conclusion of law that a ladder used in the ordinary way is not embraced in the word "scaf-

[5] *Halstead* v. *Thomson* (1901) 3 Sc. Sess. Cas. 5th series, 668, 38 Sc. L. R. 473. The special consideration on which the court relied was that "the scaffolding was regularly used from time to time by all the tradesmen engaged in the work during the construction of the building, both prior and subsequently to the accident."

[6] A builder erected a scaffolding for the purpose of raising building materials from a lower level to the higher level on which the building which he was constructing stood. After the building was complete, and while it was in actual use, a workman was injured as he was removing gear from this scaffolding. Held, that the workman was employed on a building which was "being constructed" by means of a scaffolding. *Frid* v. *Fenton* (1900; C. A.) 82 L. T. N. S. 193.

[7] *Hoddinott* v. *Newton* [1901] A. C. 49, 84 L. T. N. S. 1, Reversing [1899] 1 Q. B. 1018, 68 L. J. Q. B. N. S. 495.

[8] *Hoddinott* v. *Newton* [1901] A. C. 49, 84 L. T. N. S. 1, per Lord Macnaghten.

A new house more than 30 feet high had been roofed in, and workmen employed by the builder were plastering the walls and ceilings inside the house, for which purpose trestles and boards were being used. One of the men, while standing on the floor of the top landing plastering the wall, fell down the well of the staircase, there being no railing, and was killed. At that time other workmen were at work plastering some of the rooms, and were standing on boards placed across trestles 4 feet high, in order to enable them to reach the ceilings and upper part of the walls. It was held that there was evidence to justify a finding of the county judge that such arrangement of trestles and boards was a "scaffolding." *Maude* v. *Brook* [1900] 1 Q. B. 575. Collins, L. J., dissented, being of opinion that the word "scaffolding" ought to be construed in its ordinary popular meaning, taken in connection with its context, and that it meant some structure of planks and supports capable of being used for the construction or repair of a building over 30 feet in height.

A new house more than 30 feet high had been roofed in and the external scaffolding removed. The applicant was engaged in plastering the walls and ceiling in one of the rooms, and in order to reach his work was standing on a structure of trestles, with boards on them. While at work in this manner he met with an accident, for which he claimed compensation. An arbitrator appointed by a county court judge decided that the structure was not a scaffolding, and refused to make an award of compensation, but referred the matter to the

folding."[9] In another, a finding that a "crawling board" used in the repair of a roof was "scaffolding" was held not to be an improper one.[10] In a third the court of appeals refused to disturb a finding to the effect that a ladder placed so that one end rested on the ground and the other against the parapet of a house was not a "scaolding."[11] The question whether or not an arrangement of a plank and ladder is a scaffolding is deemed to be a question of fact.[12] The result of the decisions, as a whole, is manifestly to bring within the purview of the act some classes of structures which are assuredly not scaffolds in the sense in which that term is ordinarily employed, when it is applied to a contrivance for facilitating the erection of buildings. The question whether the interpretation thus adopted is correct is now practically closed in the only country in which the meaning of the provision is, as yet, a matter of any moment. But it would certainly seem to be not improbable, to say the least, that the legislature really intended to confine the statutory right of compensation to cases in which the cause of the accident is a scaffolding which is of such a height and in such a situation that the workmen on it are exposed to the danger of falling about 30 feet or over. The present mode of interpreting the act involves the curious result that a plasterer who, when working in a house exceeding 30 feet in height, falls from a low, temporary platform, erected in a room where the floor is completely finished, and where he is in no greater danger than if he were on a similar platform in a completed house, may recover compensation, while on the other

court judge, who reversed the decision of the arbitrator and awarded the compensation provisionally settled by the arbitrator. On appeal it was held that the question whether the structure was a scaffolding or not was a question for the arbitrator, and that his finding was not open to review. *Ferguson* v. *Grece*, [1901] 1 K. B. 25.

The word "scaffolding" includes an internal staging formed by planks resting on the step of a ladder and upon one of the roof principals in the center of a room. *Reddy* v. *Broderick* (1901: C. A.) 2 Ir. Rep. 328.

[8] *Wood* v. *Walsh* [1899] 1 Q. B. 1009, 68 L. J. Q. B. N. S. 492; *M'Donald* v. *Hobbs* (1899) 2 Sc. Sess. Cas. 5th series, 3, 36 Sc. L. R. 393.

[10] *Veazey* v. *Chattle* [1902] 1 K. B. 494 (Stirling, L. J., dissenting). The crawling board, a contrivance ordinarily used in the repair of roofs, consisting of a wooden plank about 18 to 20 feet long and 10 inches wide, across which were nailed transverse pieces of wood to give support to the man while working upon it; on the under side at one end was fastened a cross-piece of wood, which fitted over the ridge of the roof and kept the board in position. At the time of the accident the workman was on the roof fixing the crawling board, while the lower end of the board was being steadied by an assistant standing on the ladder.

[11] *Marshall* v. *Radforth* [1902] 2 K. B. 175.

See also *Veazey* v. *Chattle* [1902] 1 K. B. 494, 85 L. T. N. S. 74, where Collins remarked: "A ladder might be—at any rate I cannot say that it could not be—a scaffolding; and it would make no difference whether it were high above ground or on the roof of a house, or whether it were resting on the ground."

[12] *Wood* v. *Walsh* [1899] 1 Q. B. 1009, 80 L. T. N. S. 345, 68 L. J. Q. B. N. S. 492

hand, no compensation is recoverable by a servant who, while working on a house of less than 30 feet in height, falls from a platform resting on the ground, which subjects him to precisely the same amount of peril. It is, no doubt, true that the construction of the act has disclosed other anomalies of the same description. But in this instance the courts appear to have gone out of their way to create one.

782. "On or in or about a building in which machinery driven by steam," etc.— The act applies to employment in or about a building "in which machinery driven by steam, water, or other mechanical power is being used for the purpose of the construction, repair, or demolition thereof," although the building does not exceed 30 feet in height.[1]

783. Meaning of "railway."—See also § 780, note 1, subd. (a), *supra*.) Private railways, not being "used for purposes of public traffic," are not covered by the compensation act, although they may be connected with a public railway.[1]

783a. — of "factory."— In order to render intelligible the decisions which bear upon the meaning of this word as used in the compensation act, it will be necessary to set out *in extenso* two of the sections of the factory acts which are referred to.

Factory Act 1878, § 93. The expression "nontextile factory" in this act means (1) any works, warehouses, furnaces, mills, foundries, or places named in part one of the fourth schedule of this act; (2) also any premises or places named in part two of the said schedule, wherein, or within the close or curtilage or precincts of which, steam, water, or other mechanical power is used in aid of the manufacturing process carried on there; (3) also any premises wherein, or within the close or curtilage or precincts of which, any manual labor is exercised by way of trade or for purposes of gain in, or incidental to, the following purposes, or any of them; that is to say,—(*a*) in or incidental to the making of any article or of part of any article, or (*b*) in or incidental to the altering, repairing, ornamenting, or finishing of any article, or (*c*) in or incidental to the adapting for sale of any article, and wherein, or within the close or curtilage or precincts of which, steam, water, or other mechanical power is used in aid of the manufacturing process carried on there.

The expression "factory" in this act means textile factory and nontextile factory, or either of such descriptions of factories.

The expression "workshop" in this act means (1) any premises or places named in part two of the fourth schedule to this act, which are not a factory within the

[1] *Mellor* v. *Tomkinson* [1895]; C. A.] 1 Q. B. 374, 68 L. J. Q. B. N. S. 214, 79 L. T. N. S. 715; *Murnin* v. *Calderwood* (1899) 1 Sc. Sess. Cas. 5th series, 862, 36 Sc. L. R. 648.

[1] The word "railway" is not applicable to a siding in a dockyard, constructed merely as an adjunct to the ordinary business of the proprietors of the dockyard. *London & I. Docks Co.* v. *Midland & G. E. R. Co.* (1902; Q. B. D.) 18 Times L. R. 171, (C. A.) 19 Times L. R. 325. Nor to a private siding belonging to a trading company which does business with the railway company. *Brodie* v. *North British R. Co.* (1900) 3 Sc. Sess. Cas. 5th series, 75, 38 Sc. L. R. 38.

meaning of this act; (2) also any premises, room, or place, not being a factory within the meaning of this act, in which premises, room, or place, or within the close or curtilage or precincts of which premises, any manual labor is exercised by way of trade, or for purposes of gain in, or incidental to, the following purpose or any of them; that is to say,—(*a*) in or incidental to the making of any article or of part of any article, or (*b*) in or incidental to the altering, repairing, ornamenting, or finishing of any article, or (*c*) in or incidental to the adapting for sale of any article, and to which or over which premises, room, or place the employer of the persons working therein has the right of access or control.

A part of a factory or workshop may, for the purposes of this act, be taken to be a separate factory or workshop; and a place solely used as a dwelling shall not be deemed to form part of the factory or workshop for the purposes of this act.

Where a place situate within the close, curtilage, or precincts forming a factory or workshop is solely used for some purpose other than the manufacturing process or handicraft carried on in the factory or workshop, such place shall not be deemed to form part of that factory or workshop for the purposes of this act, but shall, if otherwise it would be a factory or workshop, be deemed to be a separate factory or workshop, and be regulated accordingly.

Any premises or place shall not be excluded from the definition of a factory or workshop by reason only that such premises or place are or is in the open air.

Factory Act 1895, § 23. (1) The following provisions, namely, (i) section 82 of the principal act, (ii) the provisions of the factory acts with respect to accidents, (iii) section 68 of the principal act, with respect to the powers of inspectors, (iv) sections 8 to 12 of the act of 1891, with respect to special rules for dangerous employment, and (v) the provisions of this act, with respect to the power to make orders as to dangerous machines, shall have effect as if (*a*) every dock, wharf, quay, and warehouse, and, so far as relates to the process of loading or unloading therefrom or thereto, all machinery and plant used in that process; and (*b*) any premises on which machinery worked by steam, water, or other mechanical power, is temporarily used for the purpose of the construction of a building or any structural work in connection with a building, were included in the word factory, and the purpose for which the machinery is used were a manufacturing process; and as if the person who, by himself, his agents, or workmen, temporarily uses any such machinery for the before-mentioned purpose were the occupier of said premises; and for the purpose of the enforcement of those sections the person having the actual use or occupation of a dock, wharf, quay, or warehouse, or of any premises within the same or forming part thereof, and the person using any such machinery, shall be deemed to be the occupier of a factory.

(2) The provisions of this act with respect to notice of accidents and the formal investigation of accidents shall have effect as if—(*a*) any building which exceeds 30 feet in height, and which is being constructed or repaired by means of scaffolding; and (*b*) any building which exceeds 30 feet in height, and in which more than twenty persons, not being domestic servants, are employed for wages were included in the word "factory;" and as if, in the first case, the employer of the persons engaged in such construction or repair, and, in the second case, the occupier of the building, were the occupier of a factory.

These provisions are now incorporated, with some additions, in the factory and workshop act 1901.

a. "Dock, wharf, quay."—The combined effect of the act of 1897

and the factory acts is that every dock, wharf, or quay is deemed to be a "factory," within the meaning of the former act, whether steam power was or was not being used in the work in which the servant claiming compensation was engaged.[1]

A floating structure carrying cranes for loading and unloading ships, which is moored in a river 500 feet from the shore by chains fastened to piles driven into the bed of the river, but is not connected with the shore except by boats, is a "wharf."[2]

Whether a space not immediately contiguous to the area appropriated to the ships themselves is embraced under one or other of the terms "dock, wharf, or quay" is determined as a question of fact, with reference to the elements of distance, the intervention of barriers, and the uses to which the space was put.[3]

It is now settled that a ship lying in a dock is to be regarded as a "factory" for the purposes of enabling a servant to recover under the act, whether the dock is a wet one,[4] or a dry one.[5]

[1] *Raine* v. *Jobson* (1901) A. C. 404. In that case the respondents admitted that the construction of the act specified in the text was the correct one, and the admission was referred to by the Lord Chancellor as being "very frank and proper."

The decision of the House of Lords discredits the earlier judgment of the court of appeal to the effect that a wharf on which no machinery is used is not a factory within the act. *Hall* v. *Snowden* [1899; C. A.] 2 Q. B. 136, 68 L. J. Q. B. N. S. 645, 80 L. T. N. S. 554.

The doctrine of the House of Lords has been also applied in Scotland. *Strain* v. *Sloan* (1901) 38 Sc. L. R. 475, 3 Sc. Sess. Cas. 5th series, 663.

[2] *Ellis* v. *Cory* [1902] 1 K. B. 38, 71 L. J. K. B. N. S. 72.

[3] An accident happened to a workman, while engaged in removing timber from a stack upon a piece of land which was within the ambit of a system of docks belonging to a railway company, and which had been let by the company to timber merchants for the storage of timber. This piece of land was about 40 yards from the water of the dock. Between it and the water ran the lines of a dock railway or tramway, but it was not separated from the adjoining wharf or quay space by any fence or other physical barrier. Timber had sometimes been landed from the before-mentioned dock and brought to the said piece of land, but during the year 1900 all the timber stacked thereon had been landed from other docks forming part of the dock system, more or less remote, and brought to the said piece of land by rail. Held that there was evidence to support the finding that the place where the accident happened was a "factory," as being a "dock, wharf, or quay," and that the court was bound by such finding. *Kent* v. *Harrison* [1902; C. A.] 2 K. B. 1

For the purpose of unloading timber from timber ships a dock board provided quay or wharf space inland for 1 yards from the water's edge; at the further end of this space was a fence, with gates at intervals, behind which came a series of yards leased by the dock board to different timber merchants for storing their timber, the whole being the property of the dock board, and separated by a wall from the surrounding property. A workman employed by a firm of carters was killed while moving a log of timber in one of the yards leased to a firm of timber merchants. Held, that the word "wharf" must be construed in its ordinary and popular signification of a place contiguous to water, over which goods pass in the process of loading and unloading; that the yard where the accident happened was not a wharf within the meaning of the sections; and that the employment of the deceased was therefore not one to which the compensation act applied. *Haddock* v. *Humphrey* [1900] 1 Q. B. 609, 82 L. T. N. S. 72 (Rigby, L. J. dissenting).

[4] *Cattermole* v. *Atlantic Transport*

b. "Premises wherein steam, water, or other mechanical power is used."—In view of these descriptive words (factory act 1878, § 93, subs. 3), it has been held that a yard in which stones are dressed by manual labor, and in which there is an engine house in which the workmen's tools are sharpened, is a "factory."[6] But as machinery actuated by hand power is not within this description, the user of such machinery does not constitute the premises in which it is employed a "factory."[7] Nor can the words quoted at the beginning of this subsection be so construed as to bring within the category of "factories" a threshing machine and traction engine, which at the time of the accident, were in transit to a place where they were to be used for threshing, the engine being connected with the machine for no purpose but that of haulage.[8]

c. "Machinery or plant."—These words, as used in the factory act 1895, § 23, have been held not to be applicable to gangway doors through which cargo is taken into or discharged from a ship;[9] nor to a staging outside a ship, on which the servant was standing to screw up the iron doors of a ship after the loading was completed.[10]

The effect of the clause in § 23 (1) (i) (b), of the factory act of

Co. [1902; C. A.] 1 K. B. 204; *Bartell* v. *Gray* [1902; C. A.] 1 K. B. 225.

The case of *Flowers* v. *Chambers* [1899; C. A.] 2 Q. B. 142, 68 L. J. Q. B. N. S. 648, 80 L. T. N. S. 834, 47 Week. Rep. 513, in which it was held that a workman injured on a ship within a dock was not within the purview of the act, was overruled by the House of Lords in *Raine* v. *Jobson* [1901] A. C. 404. See next note. The effect of that decision is also to destroy the authority of the following cases, in which *Flowers* v. *Chambers* [1899; C. A.] 2 Q. B. 142, 80 L. T. N. S. 834, 68 L. J. Q. B. N. S. 648, was followed; *Holness* v. *MacKay* (1898; C. A.) 15 Times L. R. 351, [1899] 2 Q. B. 319, 68 L. J. Q. B. N. S. 724; *Durrie* v. *Warren* (1898; C. A.) 15 Times L. R. 365; *Low* v. *Abernethy* (1900) 2 Sc. Sess. Cas. 5th series, 722; *Jackson* v. *Rodgers* (1900) 2 Sc. Sess. Cas. 5th series, 533 (where the court emphasized the fact that the fitting of the engines in a steamer, the work in which the servant was engaged, was being done without the aid of any steam power); *Laing* v. *Young* (1900) 3 Sc. Sess. Cas. 5th series, 31 (act held not to be applicable to a lighter fitted with machinery, the property of and worked by stevedores, which was employed in raising goods from the hold to the deck of a vessel, moored between the lighter and the quay); *Healy* v. *Macgregor* (1900) 2 Sc. Sess. Cas. 5th series, 634, 37 Sc. L. R. 454 (act held not to be applicable where the work of loading or unloading a ship is done by servants on board her, and by means of her own machinery); *Aberdeen Steam Trawling & Fishing Co.* v. *Peters* (1899) 1 Sc. Sess. Cas. 5th series, 786 (act held not to be applicable to the work of loading or unloading machinery which forms part of the apparatus of a ship lying in a dock); *Aberdeen Steam Trawling Co.* v. *Kemp*, Cited in Rueg, Employers' Liability, 4th ed. p. 211, note (x).

[6] In *Raine* v. *Jobson* [1901] A. C. 404. Reversing the decision of the court of appeal, compensation was held to be recoverable where one of a gang of ship repairers fell from the gangway connecting the ship with the quay.

[6] *Petrie* v. *Weir* (1900) 2 Sc. Sess. Cas. 5th series, 1041, 37 Sc. L. R. 795.

[9] *Medd* v. *McIver* (1898; C. A.) 15 Times L. R. 364.

[10] *Durrie* v. *Warren* (1898, C. A.) 15 Times L. R. 365.

1895, to the effect that the provisions of this act with respect to th power of the inspector to make orders as to dangerous machines sh have effect as if "any premises on which machinery worked by steam water, or other mechanical power, is temporarily used for the purpo of the construction of a building, . . . were included in the wor factory, has been held to be that an engine shed and room containin a steam engine connected with a mortar pan for mixing mortar for us on a building near at hand is a "factory" within the meaning of th compensation act.[11]

d. "Premises wherein . . . any manual labor is exercised . . . for purposes of gain."—Construing these words (factory act 187 § 93, subs. 3) the Scotch court of session has held that the refuse di patch works of a city, where the saleable parts of the city refuse ar separated from the unsaleable part by processes in which steam powe is used, is a "factory."[12] But a workman, who was employed by farmer on his farm to drive a movable steam engine, for the purpo of working a mill for grinding meal intended to be used for food fo stock on the farm, and not for sale, is not employed on, in, or abou a "factory."[13]

e. "Machinery used in the process of loading or unloading."— These words (factory act 1895, § 23, subs. 1) import either a landing of something from a ship, or a loading on the ship from the land. They are not applicable to a steam winch on a ship's deck, which i being used for the purpose of loading goods from a lighter.[15]

f. "Bleaching or dyeing works."—The effect of section 93, sub (1) of the act of 1878, when construed in connection with schedu IV., part I., § 2, is that premises in which the processes of hooking lapping, making up, and packing cloth are carried on, are a "factory," even if none of those processes are carried on as incidental to bleach ing and dyeing.[16]

[13] *Nash* v. *Hollinshead* [1901; C. A.] 1 K. B. 700.

[14] Where a ship was unloading in a dock by means of a crane on the quay hired by her owners, and a workman employed by them in unloading her was killed by the explosion of a case of percussion caps which he was placing in a basket attached to the chain of a crane for the purpose of its being hoisted out of the ship onto the quay, it was held that the accident arose out of, and in the course of, the workman's employment on or about machinery used in the process of unloading to a quay within the meaning of the act of 1897. *Wood ham* v. *Atlantic Transport Co.* [1899 C. A.] 1 Q. B. 15, 68 L. J. Q. B. N. S 17, 79 L. T. N. S. 395.

This decision was followed in another where a workman was killed while en gaged in making up sets of bags to be hoisted from the hold of a ship by means of a crane operated by a man on the quay. *Lawson* v. *Atlantic Trans port Co.* (1900; C. A.) 82 L. T. N. S. 77

[15] *Hennessey* v. *McCabe* [1900] 1 Q. B 491, 81 L. T. N. S. 575.

[16] *Rogers* v. *Manchester Packing Co*

g. "Shipbuilding yard."—The fact that repairs are being done to a ship does not make the dock a "shipbuilding yard" within the meaning of the factory act 1878, schedule IV., part II. (21). Under such circumstances, therefore, the dock is not a "factory" within the meaning of section 7 of the compensation act.[17]

784. — of "engineering work."— These descriptive words have been held applicable to the employment of the driver of a water cart used to sprinkle a newly laid surface before it is rolled by a steam roller;[1] and to work which includes the hoisting of iron girders by means of a steam winch to the top of a building to which a new story is being added.[2] It may be that they also embrace work on a steam dredger.[3] But they do not cover pulleys worked by a winch;[4] nor the operation of lifting an air compresser by means of a hydraulic jack, for the purpose of taking it away on a truck after it had been purchased from the party who had used it in building a bridge.[5]

785. — of "mine."— The provision in the coal mines regulation act 1887, § 75, to the effect that "in this act, unless the context otherwise requires, 'mine' includes . . . all the shafts, levels, planes, works, tramways, and sidings, both below ground and above ground, in and adjacent to and belonging to the mine," cannot be construed in such a sense as to enable an engine driver to recover for an injury received while he was operating his engine on his employers' private railway about ¾ of a mile from the pit mouth. The words "adjacent to and belonging to the mine" mean "physically adjacent to and belonging to the mine itself," and not merely belonging to the owner.[1]

Road work done as a necessary preliminary to the operation of a mine has been held to be a "mine" within the act, although no mine in actual operation may exist.[2]

A tramway laid along a public road is a "railroad" within the definition of "engineering work."[3]

The word "railroad" is used in the same comprehensive sense as

[1898] 1 Q. B. 344, 67 L. J. Q. B. N. S. 310, 78 L. T. N. S. 17.

[2] *Ellison* v. *Longden* (1901) 18 Times L. R. 48.

[3] *Fletcher* v. *London United Tramways* [1902; C. A.] 2 K. B. 269.

the word "railway" and is not restricted to the permanent way merely.[4]

786. — of "undertakers." — *a. In the case of a factory.*—An "undertaker" in relation to a factory is a person who occupies, and conducts his business upon, the premises where those processes are conducted which constitute the place of work or "factory" within the meaning of the act.[1] Accordingly a person who, for the time being, has the actual use of a "dock, wharf, or quay," as those terms are construed (see § 783a, subd. a, *supra*), is liable as an "undertaker" for an injury received by one of his workmen, while engaged in any of the operations with a view to which the use of the premises has been obtained.[2] As a ship in a dock is deemed to be a "factory" (see § 783a, *supra*), an employer who is doing work on such a ship is also an "undertaker."[3]

To render the employer an "undertaker" it is not necessary that

[4] *Pullick* v. *Evans* (1901; C. A.) 84 L. T. N. S. 413, holding that, where a workman was accidentally injured in the course of his employment on the construction of a signal box on a new line of railway, his employment was on, in, or about a work of construction of a "railroad."

[1] See the judgment of Smith, L. J., in *Francis* v. *Turner Bros.* [1900] 1 Q. B. 480, where it was laid down that, in the definition of "undertakers" in the compensation act, the meaning of the word "occupier" is not affected by the sense in which that word is used in section 23 of the factory act 1895.

[2] Where the owners of a ship moored alongside of a quay, who acted as their own stevedores, had the use of the portion of the quay alongside of which their ship lay, for the purpose of unloading the ship's cargo onto the quay, and a workman employed by them was killed through an accident arising out of, and in the course of, his employment on the quay, the ship owners are liable as "undertakers." *Merrill* v. *Wilson* [1901; C. A.] 1 K. B. 35; *Hainsborough* v. *Ralli* (1901; C. A.) 18 Times L. R. 21.

Persons who are in the actual use or occupation of a dock (or, *semble*, of a berth in a dock), and employ workmen in cleaning or repairing a ship in the dock, are "undertakers" within the meaning of the act, and liable to pay compensation to a workman injured in the course of his employment. *Raine* v. *Jobson* (1901) A. C. 404.

A person using machinery, the property of another party, in the process of loading a ship from a quay, is an "undertaker." *Carrington* v. *Bannister* [1901; C. A.] 1 K. B. 20, holding that in section 23 of the factory act of 1895 the expression "such machinery," as last used in the latter part of the section, refers to the "machinery and plant" mentioned previously in clause (a), and not to the "machinery" mentioned in clause (b).

[3] Stevedores were loading a vessel in a dock by means of machinery. The cargo had been put into the hold, and the men employed by the stevedores were "finishing off" by slinging the beams across the hatchway. The machinery having become entangled, one of the workmen went to disentangle it, was caught by it, and injured so that he died. Under these circumstances it was held by the House of Lords (Lord Lindley dissenting) that the stevedores were occupying a "factory," namely, the machinery, within the meaning of the act, and that the deceased was injured in the course of his employment in loading from the wharf, the process of loading not being complete till the hatchway was secured, within the meaning of those acts. *Stuart* v. *Nixon* [1901] A. C. 79.

A shipbuilding firm which has sent a newly-launched ship to a public dock to have the engines for which it had contracted with another firm erected and fitted are "undertakers." *Jackson* v. *Rodger* (1899) 1 Sc. Sess. Cas. 5th series, 1053, 36 Sc. L. R. 851, 37 Sc. L. R. 390.

his possession of the premises should be exclusive. All that is requisite is that he should be in possession so far as may be necessary for the purpose of doing the work in hand.[4]

It has been held that an employer is not liable, as an "undertaker," for injuries received by one of his servants in the factory of another person, while he was engaged in removing a portion of the plant which was to be transferred to the defendant's own factory.[5] But, manifestly, it is not easy to define precisely the boundary line between the circumstances which call for the application of the principle thus exemplified and that which controls cases of the type mentioned in the preceding paragraph.

b. In the case of engineering work.— Where it is the usual practice of a firm of builders to enter into contracts for pulling down and rebuilding, but they invariably sublet the work of pulling down, they are "undertakers" as regards the servants of the subcontractors.[6] The owner of a building who contracts with someone to execute repairs on the building, and does not engage in the work himself, is not an "undertaker."[7] But a building contractor who is erecting a tene-

[4] A firm of employers contracted to do the painting and plumbing on a ship lying in a dock, and sent workmen on board to do the work. Some of the crew were in charge of the ship for the owners, but the firm were in possession of the ship so far as was necessary for the work that they had contracted to do. One of the workmen was injured by an accident in the course of his employment. Held, that the possession of the shipowners, for a purpose not inconsistent with the possession of the employers, did not prevent the latter from having the "actual use or occupation" of the ship within the meaning of the factory and workshop act 1895, § 23, subd. (b). *Bartell* v. *Gray* [1902; C. A.] 1 K. B. 225, 18 Times L. R. 70.

A similar doctrine is embodied in *Jackson* v. *Rodger* (1899) 1 Sc. Sess. Cas. 5th series, 1053. But in other Scotch decisions a different view was taken. In one of these the mere fact that a steamship was lying in a dock while a workman employed by a firm of engineers was engaged in repairing the boilers was held not to make the firm "occupiers" of the dock. *Low* v. *Abernethy* (1900) 2 Sc. Sess. Cas. 5th series, 722, 37 Sc. L. R. 506.

In another, shipping agents who had contracted with the owners of a vessel lying at a dock to load her were denied to be "occupiers of the dock. *Bruce* v. *Henry* (1900) 2 Sc. Sess. Cas. 5th series, 717, 37 Sc. L. R. 511.

[5] *Francis* v. *Turner* [1900] 1 Q. B. 478. With this decision may be compared three Scotch cases. In one of these a firm of engineers making a preliminary run for the purpose of testing machinery in a building belonging to a cold storage company were denied to be "occupiers." *Purves* v. *Sterne* (1900) 2 Sc. Sess. Cas. 5th series, 887, 37 Sc. L. R. 696.

In another it was held that the term "occupiers" was not applicable to the place where a laborer in the employ of a coal dealer, who was under contract to deliver coal to the steamers of a packet company, fell into the water, while he was waiting for the arrival of a steamer on which some coal was to be shipped. *Stewart* v. *Dungavril* (1902) 4 Sc. Sess. Cas. 5th series, 425, 39 Sc. L. R. 302.

In another it was held that an iron founder was not liable to the widow of a workman, who was killed by falling from a scaffold while he was doing some work in a soap factory to which he had been sent for that purpose. *Malcolm* v. *M'Millan* (1900) 2 Sc. Sess. Cas. 5th series, 525, 37 Sc. L. R. 383.

[6] *Knight* v. *Cubitt* [1902; C. A.] 1 K. B. 31, 71 L. J. K. B. N. S. 65.

[7] *M'Gregor* v. *Dunsken* (1899) 1 Sc

ment for himself is deemed to be within that description in such a sense as to be liable to a servant of one of the trading firms with whom he had contracted for particular parts of the work which are not being executed by his own workmen.[8]

The word "undertaker" is not restricted to persons who contract for the construction of a building as a whole. Hence, where a building over 30 feet high is being constructed by means of a scaffolding, and the work of construction is carried on by several persons, not acting jointly, but each of them contracting with the building owner for the construction of a separate substantial part of the building, each of them is an "undertaker," and is liable to compensate the workmen employed by him for personal injury sustained by them in the course of their employment. Every workman employed by the undertaker upon the building is within the act, whatever may be the nature of his own particular work.[9]

A firm of engineers who have sold a hay-cutting machine are "undertakers" as regards one of their workmen, who is injured while its operation is being tested.[10]

It was at first held that a subcontractor for engineering work is not an "undertaker" within the meaning of the compensation act.[11] But this view has now been pronounced erroneous by the House of Lords.[12]

An employer who, under a contract with a firm engaged in building operations on their own premises, supplies the labor for the brick work,—the workmen so supplied, although paid by him, being under the control, while at work, of the foreman of the building owners,—is not an "undertaker."[13]

787. — of "workman." — *a. Contractors.*—It is not disputed that recovery under the act cannot be had if the facts show that the injured person was an independent contractor.[1] Compare the decisions cited in § 723, subd. *i, ante.*

Sess. Cas. 5th series, 536, 36 Sc. L. R. 393 (Lord Young dissenting.)

[8] *Stalker* v. *Wallace* (1900) 2 Sc. Sess. Cas. 5th series, 1162, 37 Sc. L. R. 898.

[9] *Mason* v. *Dean* [1900: C. A.] 1 Q. B. 770.

[10] *Reid* v. *Fleming* (1901) 3 Sc. Sess. Cas. 5th series, 1000, 38 Sc. L. R. 720.

[11] *Cass* v. *Butler* [1900] 1 Q. B. 777; *Cooper* v. *Davenport* (1898; C. A.) 16 Times L. R. 266.

[12] *Cooper* v. *Crane* [1902] A. C. 302, holding that a person contracting to erect a building is entitled to be indemnified by a subcontractor for the amount for which he is liable to a workman employed by the latter. See section 1, subs. 4 of the act.

[13] *Percival* v. *Garner* [1900: C. A.] 2 Q. B. 406, holding that the persons from whom recovery should have been sought were the firm of contractors.

[1] A contractor for a lump sum, whose tender is for labor and tools, but who is not to supply any materials, is not within the act. *Simmons* v. *Faulds* (1901; C. A.) 17 Times L. R. 352.

See also *M'Gregor* v. *Dansken* (1899) 1 Sc. Sess. Cas. 5th series, 536, 36 Sc. L. R. 393, a case of a small contractor.

b. Seamen.—The compensation act does not "deal with the relation between shipowners and sailors, when engaged in their ordinary occupation of sailing upon the seas."[2] Compare § 724, *ante*. But this doctrine does not involve the consequence that the mere fact of the accidents having happened in or upon a ship prevents the injured workman from claiming compensation under the act. His right of recovery must be tested with reference to the circumstances attending the accident.[3]

787a. — of "dependents."— *a. In England and Ireland.*—At p. 197 of his treatise on Accidents to Workmen, Mr. Minton-Senhouse remarks that the word "'dependent' probably means, dependent for the ordinary necessaries of life for a person of that class and position," and this definition has been approved by high judicial authority.[1] The term does not signify a person who merely derived a benefit from the earnings of the injured workman.[2]

A father earning wages may be "in part dependent" upon the earnings of his child, within the meaning of the act; and there is evidence upon which the father may be found to be, in fact, so dependent, and to be entitled to compensation for the death of the child, where it is proved that the child contributed to the family wages fund, and that the father received the contribution and spent it in main-

On the other hand a finding that the injured person was n "workman" is justifiable, where he was employed in a quarry under an agreement that he should be paid so much for every ton he got out, and the tools were found for him, and he used to hire and discharge the men who worked under him. *Evans* v. *Penrylt Dinas Silica Brick Co.* (1901; C. A.) 18 Times L. R. 58. And where he was one of n squad of mechanics who were paid by the piece, for work on a vessel under construction, but were bound to work continuously all the working hours recognized in the yard, were supervised generally by the foreman of the employer, and were subject to printed rules and regulations "to be observed by the workmen in the employment" of shipbuilders. *M'Cready* v. *Dunlop* (1900) 2 Sc. Sess. Cas. 5th series, 1027, 37 Sc. L. R. 779.

[2] Lord Halsbury in *Raine* v. *Jobson* [1901] A. C. 404. In an Irish case it was held that an able-bodied seaman, working at the hoisting of a ship's boat by means of a crane on the quay alongside his ship, is merely carrying out the normal duties of a seaman, and is therefore not engaged in an employment to which the act applies. *O'Hanlon* v. *Dundalk & N. Steam Packet Co.* (1899) 33 Ir. L. T. R. 36.

[3] An ordinary laborer employed for the purpose of doing anything that is to be done on a ship lying in a dock is not without the scope of the act. *Raine* v. *Jobson* [1901] A. C. 404. Nor is a man working on a dredger, which went 2 miles out to sea for the purpose of being emptied. *Chambers* v. *Whitehaven Harbour Comrs.* [1899] 2 Q. B. 132.

[1] Romer, L. J., in *Simmons* v. *White Bros.* [1899] 1 Q. B. 1007, 68 L. J. Q. B. N. S. 507, and Lord Shand in *Main Colliery Co.* v. *Davies* [1900] A. C. 358. In the latter case Lords Halsbury and Davey expressed the opinion that the question of dependency was to be decided without respect to the standard of living in the neighborhood or the class to which the family belong; that the act sets up no such standard; and that the actual means of living and expenditure need alone be regarded. Lord Shand did not agree with this view.

[2] *Simmons* v. *White* (1899; C. A.) 80 L. T. N. S. 344.

taining himself and his family.[3] Similarly it is held there may be a "dependency" for the purposes of the act, although the claimant is able to maintain himself and family without the assistance of the deceased.[4]

In the case of the death of a workman, leaving dependents, the test by which to determine whether they were wholly dependent on his earnings at the time of his death, within the meaning of the act, is whether money which the workman was earning at the time of his death was the sole source to which they could look for maintenance at that time. Accordingly the fact that money came to them on the death of the workman cannot be taken into consideration.[5]

b. In Scotland.—The mother of a deceased workman, whose parents were in part dependent on him, is not entitled to sue, where the father is alive.[6]

Grandchildren are entitled to claim compensation for the death of their grandfather, in cases where their father is dead.[7]

An illegitimate child has no right to sue the employer of his deceased mother.[8]

A woman living separate from a husband who only contributed a small sum to her support, the rest of her sustenance being obtained from relatives, and occasional employment, may claim compensation for his death.[9]

The fact that the father of the deceased was assisting a crippled relative does not show, as a matter of law, that he was not "partially dependent" on his son's earnings.[10]

788. "Shipbuilding yard" (sec. 7, subs. 3).—The question whether a dock 2 miles from a shipbuilding yard was "near" it was held to be a question of fact, not of law.[1] In the case cited the court agreed with the finding of the arbitrator in favor of the servant, as having been injured "near" the yard.

[3] *Main Colliery Co.* v. *Davies* [1900] 10 A. C. 358. This decision embodies a doctrine similar to that adopted in an earlier case, in which it was held that a finding of "dependency" was sufficiently supported by evidence that the parents of an employee fourteen years old, who was killed, had received his weekly wages for five weeks before his death, and handed over to him such pocket money as they thought right. *Simmons* v. *White Bros.* (1899; C. A.) 68 L. J. Q. B. N. S. 507, (1899) 1 Q. B. 1005.

C. Compensation recoverable under the act.

788a. Text of statutory provisions.—First Schedule. Scale and Conditions of Compensation. (1) The amount of compensation under this Act shall be: (a) where death results from the injury—

(i) if the workman leaves any dependents wholly dependent upon his earnings at the time of his death, a sum equal to his earnings in the employment of the same employer during the three years next preceding the injury, or the sum of £150, whichever of those sums is the larger, but not exceeding in any case £300: Provided, That the amount of any weekly payments made under this act shall be deducted from such sum, and if the period of the workman's employment by the said employer has been less than the said three years, then the amount of his earnings during the said three years shall be deemed to be 156 times his average weekly earnings during the period of his actual employment under the said employer;

(ii) if the workman does not leave any such dependents, but leaves any dependents in part dependent upon his earnings at the time of his death, such sum, not exceeding in any case the amount payable under the foregoing provisions, as may be agreed upon, or, in default of agreement, may be determined, on arbitration under this act, to be reasonable and proportionate to the injury to the said dependents and

(iii) if he leaves no dependents, the reasonable expenses of his medical attendance and burial, not exceeding £10.

(b) Where total or partial incapacity for work results from the injury, a weekly payment during the incapacity after the second week, not exceeding 50 per cent of his average weekly earnings during the previous twelve months, if he has been so long employed, but if not, then for any less period during which he has been in the employment of the same employer, such weekly payment not to exceed £1.

(2) In fixing the amount of the weekly payment, regard shall be had to the difference between the amount of the average weekly earnings of the workman before the accident, and the average amount which he is able to earn after the accident, and to any payment, not wages, which he may receive from the employer in respect of his injury e period of his incapacity.

(3) Where a workman has g c of an accident, he shall, if so required by the employer, submit himself for examination by a duly qualified medical practitioner, provided and paid by the employer, and if he refuses to submit himself to such examination, or in any way obstructs the same, his right to compensation and any proceeding under this act in relation to compensation, shall be suspended until such examination takes place.

(4) The payment shall, in case of death be made to the legal personal representative of the workman, or, if he has no legal personal representative, to or for the benefits of his dependents, or, if he leaves no dependents, to the person to whom the expenses are due; and if made to the legal personal representative shall be paid by him to or for the benefit of the dependents or other person entitled thereto under this act.

(5) Any question as to who is a dependent, or as to the amount payable to each dependent, shall, in default of agreement, be settled by arbitration under this act.

(6) The sum allotted as compensation to a dependent may be invested or other

wise applied for the benefit of the person entitled thereto, as agreed, or as ordered by the committee or other arbitrator.

(7) Any sum which is agreed or is ordered by the committee or arbitrator to be invested may be invested in whole or in part in the Postoffice Savings Bank in the registrar of the county court in his name as registrar.

(8) Any sum to be so invested may be invested in the purchase of an annuity from the National Debt Commissioners through the Postoffice Savings Bank, or may be accepted by the Postmaster-General as a deposit in the name of the registrar as such, and the provisions of any statute or regulations respecting the limits of deposits in savings banks, and the declaration to be made by a depositor, shall not apply to such sums.

(9) No part of any money invested in the name of the registrar of any county court in the Postoffice Savings Bank under this act shall be paid out, except upon authority addressed to the Postmaster-General by the treasury or by the judge of the county court.

(10) Any person deriving any benefit from any moneys invested in the Postoffice Saving Bank under the provisions of this act may, nevertheless, open an account in a postoffice savings bank or in any other savings bank in his own name, without being liable to any penalties imposed by any statute or regulation in respect of the opening of accounts in two savings banks, or of two accounts in the same savings bank.

(11) Any workman receiving weekly payments under this act shall, if so required by the employer, or by any person by whom the employer is entitled, under this act to be indemnified, from time to time submit himself for examination by a duly qualified medical practitioner, provided and paid by the employer, or such other person; but if the workman objects to an examination by that medical practitioner, or is dissatisfied by the certificate of such practitioner upon his condition, when communicated to him, he may submit himself for examination by one of the medical practitioners appointed for the purposes of this act, as mentioned in the second schedule to this act, and the certificate of that medical practitioner as to the condition of the workman at the time of the examination shall be given to the employer and workman, and shall be conclusive evidence of that condition. If the workman refuses to submit himself to such examination, or in any way obstructs the same, his right to such weekly payments shall be suspended until such examination has taken place.

(12) Any weekly payment may be reviewed at the request either of the employer or of the workman, and on such review may be ended, diminished, or increased, subject to the maximum above provided; and the amount of payment shall, in default of agreement, be settled by arbitration under this act.

(13) Where any weekly payment has been continued for not less than six months, the liability therefor may, on the application by or on behalf of the employer, be redeemed by the payment of a lump sum, to be settled, in default of agreement, by arbitration under this act, and such lump sum may be ordered by the committee or arbitrator to be invested or otherwise applied as above mentioned.

(14) A weekly payment, or a sum paid by way of redemption thereof, shall not be capable of being assigned, charged, or attached, and shall not pass to any other person by operation of law, nor shall any claim be set off against the same.

(15) Where a scheme certified under this act provides for payment of compensation by a friendly society, the provisions of the proviso to the first subsection

section 8, section 16, and section 41 of the friendly societies act 1896, shall not apply to such society in respect of such scheme.

(16) In the application of this schedule to Scotland the expression "registrar of the county court" means "sheriff clerk of the county," and "judge of the county court" means "sheriff."

(17) In the application of this act to Ireland the provisions of the county officers and courts (Ireland) act 1877, with respect to money deposited in the Postoffice Savings Bank under that act shall apply to money invested in the Post-office Savings Bank under this act.

789. Amount recoverable in case of death, by persons wholly dependent on workman's earnings (par. 1, a, i).—The effect of this provision, as a whole, is that, where death results from the injury, and the workman leaves dependents who were wholly dependent on his earnings, the amount of compensation is to be a sum equal to his earnings in the employment of the same employer during the three years next preceding the injury, or, where the employment has been less than the three years, a sum equal to 156 times his average weekly earnings during the period of his actual employment. But in neither case is the compensation to exceed £300 or be less than £150. The maximum and minimum amounts of compensation which are specified apply to the whole provision,—not merely to the first branch of it, but also to the second.[1]

Where a workman dies some months after an award of a weekly sum has been made, his dependents are entitled to claim, as compensation, three years' wages, after giving credit for the payments already made.[2]

It has been held that where the sole dependent of a deceased workman dies after having served notice of the accident, but before any claim for compensation has been made, the right to recover compensation does not pass to the personal representative of the dependent.[3]

The death may be the result of the injury within the meaning of this paragraph of the act, even though, in fact, it may not be the natural or probable consequence thereof.[4]

790. — by persons partially dependent on the workman's earnings.—There can be no claim under the act by a person in part dependent on a workman at the time of his death, if there is in existence a person who is wholly dependent.[1]

[2] In *Irons* v. *Davis* [1899; C. A.] 2 Q. B. 330, 68 L. J. Q. B. N. S. 873, 80 L. T. 673, 47 Week. Rep. 616, a workman lost the top joint of his left thumb, and was consequently incapacitated for work for a certain period. Subsequently he was taken back again into the service of the same master at the same rate of wages as before the accident, but upon a different kind of work. The county court judge awarded him compensation for the period during which he was incapacitated for work, and also half a crown a week for life. Upon appeal it was held that there was no evidence justifying the award of half a crown a week for life.

In *Pomphrey* v. *Southwark Press* [1901] 1 K. B. 86, 83 L. T. N. S. 468, an apprentice sustained an injury to his right hand which prevented his working as a skilled artisan, and the indenture of apprenticeship was canceled. He obtained, in proceedings under the act, an award of a weekly payment based on his wages for the previous year. He afterwards resumed work at weekly wages higher than his wages at the time of the accident, but less than those that would be ordinarily paid to a workman employed on the same class of w
since the injury he had sustained
fected his ability to earn full wa
The county court judge dismissed
application by the employers for th
view and termination of the weekly
ment, on the ground that the work
was earning less, by a sum equal to
amount of the weekly payment awar
than if he had had the use of his
hand. On appeal it was held that
a review of a weekly payment made
award under the act, the test to
applied is the difference between
amount of the average earnings be
the accident and the average amo
which the workman is able to earn a
the accident; that in the absence of
dence of advantages incidental to
employment, and capable of being
praised at a money value, the earni
before the accident must be determi
by the wages received: that the co
court judge was therefore wrong in
fusing to review the weekly paym
but that the weekly payment should
continued at a nominal amount,
order to preserve the right of the a
cant to make any further applica
that might become necessary.

Sess. Cas. 5th series, 832, 37 Sc. L
599.

necessarily forfeited because he refused to accept an offer of his employer to give him work at wages equal to his former earnings.[4]

The words "if he has been so long employed" do not import employment in the same class or kind of employment, but employment by the same employer.[5]

The clause which provides that, in fixing the amount of a weekly payment, regard is to be had to the difference between the average weekly earnings of the workman before the accident, and the average amount which he is able to earn after the accident, does not operate so as necessarily to cut down the maximum rate of compensation allowed by this paragraph of the schedule.[6] A workman engaged at a weekly salary, who has received compensation under the act, in respect to partial incapacity resulting from an injury, is not entitled to claim his wages during the time for which he has been incapacitated.[7]

792. Average weekly earnings.— *a. Generally.* — The "average weekly earnings" of the workman constitute the basis of computation for the assessment of the amount recoverable, both in cases where there is a fatal accident after a period of employment amounting to less than three years, and also in cases where total or partial incapacity results from the injury. This phrase has been defined as the total amount actually earned by the workman during his employment, divided by the number of weeks during which, or during part of which, he was employed.[1]

The only proper basis for the assessment of the amount of compensation with reference to the average weekly earnings of the workman is to consider the period of actual employment under his own employer, and the sum actually recovered by him from that employer. An arbitrator is not entitled to take into consideration what the workmen might possibly earn in the employment of other employers.[2]

[6] In *Bartlett* v. *Tutton* [1902: C. A.] 1 K. B. 72, 71 L. J. K. B. N. S. 52, a workman employed as a casual dock laborer to work for a day met with an accident in the course of his employment. He was paid 3s. 3d. for the work done by him up to the time of the accident, being at the rate of so much an hour for the number of hours he had worked. There was no evidence that the workman had ever before, or would again, work for the employers. An award in the workman's favor for 50 per cent of 18s.,—which the judge found to be the average weekly earnings of an ordinary casual dock laborer in the port

In computing the average weekly earnings for a year or more
total amount of the year's earnings should be divided by 52, and
by any less number, obtained by excluding the weeks when he was
at work."

In a Scotch case, where death ultimately resulted from injuries
ceived during the workman's first week of employment, but he l
continued to work during a second week, it was held that the ea
ings of the second week might be taken into account in calculating
amount recoverable.[4]

*b. Period of employment necessary to furnish basis for compu
tion of average weekly earnings.*—The English court of appeal l
down the rule that in order to obtain the benefit of the act a workm
must have been, for at least two weeks, in the employment of the e
ployer in whose service he has sustained the injury for which he se
compensation.[5] But the decisions cited were reversed by the Ho
of Lords,[6] and the correct doctrine was declared to be that the ri
to compensation given by section 1 of the act is not restricted
schedule I. to employments by the week, or for weekly wages, or
two weeks at least, and that employment by the day for one or m
days is within the act. It was remarked that the word "average"
the expression "average weekly earnings" is used loosely and ina
rately in the schedule, and that the words in section 1 "in accorda
with the first schedule to this act" are not intended to limit or res
the right of the workman to receive compensation, or the obligat
upon the employer to pay it, but denote the manner and mode
which the payment is to be carried into effect. The effect of this d
sion is that the right to compensation does not depend on the lengt
service, but merely on the fact that the workman was injured wh
in the employment of the "undertaker" through an accident aris
out of the employment.[7]

There is a conflict between the English and Scotch courts with

of Bristol (where the workman worked), taking one week with another throughout the year,—was held to be erroneous, as there were materials before the arbitrator upon which it was possible for him to find the weekly earnings of the workman in the employment of the defendant.

[3] *Keast* v. *Barron Hematite Steel Co.* (1898; C. A.) 15 Times L. R. 141. To the same effect is a Scotch ruling to the effect that, in computing the "average weekly earnings" of a laborer who had been employed for a varying number of hours on seventy-seven stated days at irregular intervals, during a period 105 weeks, the total amount of the e ings should be divided by the w number of weeks, without discar weeks in which there had been no ployment. *Small* v. *McCormick* (1 1 Sc. Sess. Cas. 5th series, 883, 36 L. R. 700.

[7] *Leonard* v. *Baird* (1901) 3 Sc. S

gard to the effect of the decision of the House of Lords upon the rights of a servant who is working under a weekly contract. The court of appeal has taken the position that where such a servant had worked less than two weeks before the accident, the average earnings are to be arrived at by taking the actual facts, and deducing therefrom a hypothetical sum which represents what the workman would have earned if he had had the opportunity of performing his duties during two complete weeks. The actual sum earned in a given fraction of a week is not treated as the week's earnings.[8] The same court has also held that, where the employment has extended over two calendar weeks, the amount actually earned should not be divided by two, so as to average the amount under two weeks' earnings.[9]

In Scotland, on the other hand, it has been held that the proper construction of the decision of the House of Lords is that the actual earnings for part of a week, if the period of work has been no longer, are to be taken as the earnings with reference to which the compensation is to be assessed.[10]

There is a difference of opinion as to the point that, in cases of casual and intermittent employment, the average weekly earnings are arrived at by taking the total amount earned, and dividing that sum by the number of weeks during which the employment lasted.[11]

Where a workman, after working one week, is injured so soon after the beginning of the following week that no right to any wages had then accrued, the sum earned in the first week represents his average weekly earnings.[12]

c. Trade and calendar weeks.—In an English case, where a servant worked for six consecutive days, beginning on Wednesday and ending on the following Tuesday, the work being done under a daily engagement, no notice on either side being necessary to terminate the connection, but where it was also shown that there was a custom in the trade to pay weekly wages, it was held that compensation was

Cas. 5th series, 890, 38 Sc. L. R. 649, holding that in a case where a servant was killed so soon after the employment that no right to any wages had accrued at the time of his death, a dependent was entitled to recover £150.

There is a sufficient basis for computing the "average weekly earnings," where a servant worked on the Friday in one week, and then during the following week until Thursday, when the accident occurred. *Cadzow Coal Co.* v. *Gaffney* (1900) 3 Sc. Sess. Cas. 5th series, 72, 38 Sc. L. R. 40. And where the servant was injured on the fifth day of his second week of work. *Russell* v. *McCluskey* (1900) 2 Sc. Sess. Cas. 5th series, 1312, 37 Sc. L. R. 931.

[8] *Ayres* v. *Buckeridge* [1902] 1 K. B. 57, 71 L. J. K. B. N. S. 28.

[9] This point was involved in the second and third of the cases cited in the last note.

[10] *McCue* v. *Barclay* (1902) 4 Sc. Sess. Cas. 5th series, 909; *Grewar* v. *Caledonian R. Co.* (1902) 4 Sc. Sess. Cas. 5th series, 895, 39 Sc. L. R. 687.

[11] *Williams* v. *Poulson* (1899; C. A.) 16 Times L. R. 42.

[12] *Nelson* v. *Kerr* (1901) 3 Sc. Sess. Cas. 5th series, 893, 38 Sc. L. R. 645.

properly awarded on the footing that the sum earned during the days represented his average weekly earnings. The court considered that it was immaterial, for the purposes of the computation, that the trade week of the employer ended on the Thursday night, and rejected the contention of the employer that, for this reason, the average weekly earnings were half of the amount actually received.[13] But another view prevails in Scotland, where it has been held that the week to be taken as the unit of division is not the calendar week, but the trade or pay week of the particular employment.[14]

If there is no trade week, the calendar week from Sunday to Saturday is to be taken as the week with reference to which the average earnings are to be estimated.[15]

d. Continuity of the employment.—The words "period of his actual employment under the said employer," as used in paragraph 1 (*a*) (*i*), are construed as denoting the period of continuous employment immediately preceding the accident; and that period alone is to be taken into account in computing the amount of compensation recoverable.[16] Any separate and distinct periods during which the servant may previously have worked are not intended to be taken into consideration.[17]

A temporary cessation of work does not necessarily break the continuity of the employment in such a manner as to exclude from the computation the period anterior to that cessation.[18] To bring about that consequence there must have been an actual interruption for the time being of the relation of master and servant. Whether there was

[13] *Watters* v. *Clover* (1901; C. A.) 18 Times L. R. 60.

[14] *Fleming* v. *Lockgelly Iron & Coal Co.* (1902) 4 Sc. Sess. Cas. 5th series, 890, 39 Sc. L. R. 684. The facts were that the claimant had been employed for three days in one week, and during the whole of the next two weeks, and on the Sunday of the fourth week. It was held that, in estimating his average weekly earnings, the total amount of his earnings must be divided by the number of calendar weeks, *i. e.*, four, over which his employment extended. The court explained that the special point thus ruled upon had not been raised in an earlier case, in which the system of computation followed was the same as in the English case just cited. *Peacock* v. *Viddrie & B. Coal Co.* (1902) 4 Sc. Sess. Cas. 5th series, 443, 39 Sc. L. R. 317.

[17] *Grewar* v. *Caledonian R. Co.* (19 4 Sc. Sess. Cas. 5th series, 895, 39 L. R. 687.

[18] There is no break in the workman's employment where he goes away on holiday. *Keast* v. *Barrow Hematite Steel Co.* (1898; C. A.) 15 Times L. 141, 63 J. P. 56.

In *Jones* v. *Ocean Coal Co.* [18 C. A.] 2 Q. B. 124, 68 L. J. Q. B. N. 731, while it was declared that, w the average of the weekly earn should not be reduced by taking account a part of the year during wh the relation of master and servant not exist, a different rule was appl ble where the relation continued, the men did not work simply beca there was nothing for them to do.

been such an interruption is to be determined from the evidence, as a question of fact.[19]

To enable a court to say that "a series of short periods [of work] could be taken together and treated as a continuous term, there must be some *nexus* to join them. There must be some contract, express or implied, which raises a reasonable expectation of continuity in the employment. In the absence of that *nexus*, casual engagements on noncontract days do not constitute one continuous employment, for they are not bound together."[20]

e. Deductions.—In one case the court of appeal approved of the course followed by an arbitrator, who disregarded a weekly deduction from the workman's wages which, under the employer's rules, was made on account of lamp oil supplied to him, and took the full amount

[19] A workman was in the employment of the defendants as a riveter at a weekly wage of £2, 10s., from the 27th of September, 1895, to the 16th of March, 1896, when he was injured by an accident which incapacitated him for eleven months, during which time he did not work, and earned no wages. In February, 1897, the defendants employed him as a time keeper at a weekly wage of £1, 10s., and he continued in such employment until the 27th of September, 1898, when he was killed by an accident. Held, that for the purpose of calculating the compensation payable, the period of the workman's employment by the defendants had been less than three years, and that his "average weekly earnings" must be calculated with reference only to the period between the time when he resumed work and the date of his death. *Appleby* v. *Horseley Co.* (C. A.) 68 L. J. Q. B. N. S. 892 [1899] 2 Q. B. 521, 80 L. T. N. S. 853.

A finding that the employment was not continuous was held justifiable in a case where the workman had been absent eleven weeks on account of sickness, although when he resumed work no fresh engagement was entered into. *Hewlett* v. *Hepburn* (1899; C. A.) 16 Times L. R. 56.

A period of six weeks during which the servant was disabled from work, owing to a previous accident, constitutes a break in the employment, and any compensation that may be due for a second injury received after resuming work must be ascertained with reference to the period which had elapsed between the resumption of work and the occurrence of the second accident, upon which the claim is based. *Gibb* v. *Dunlop* (1902) 4 Sc. Sess. Cas. 5th series, 971, 39 Sc. L. R. 750.

Such portion of the period of one year preceding the injury as occurred prior to a strike during which the injured workman was not employed, and after the termination of which he reentered the employment under a new agreement, is not to be considered. *Jones* v. *Ocean Coal Co.* [1899; C. A.] 2 Q. B. 124, 68 L. J. Q. B. N. S. 731.

[20] Collins, L. J., in *Hathaway* v. *Argus Printing Co.* [1901; C. A.] 1 K. B. 96, 83 L. T. N. S. 465. There a workman was under an agreement to work for his employers on the nights of Thursday and Friday in each week, for a period extending over two weeks, and at a fixed rate of wages for each night. During the rest of the week he worked, at times, for the same employers, when they had work to give him, and at other times for other firms carrying on a similar business to that of the employers. The workman was injured during the third week of his employment under the agreement, and an award was made in his favor, based on the weekly wages earned by him in respect of the two nights a week during which he worked under the agreement. On appeal it was held (1) that the employment for two nights a week was a continuous one, and that the earnings of those two nights were properly taken into account in determining the weekly payment to be made to the applicant; (2) that the amount received for casual work done for the same or different employers could not be taken into account in estimating the average weekly earnings of the applicant.

of his weekly wages as the basis of the award.[21] In another case some court intimated its opinion, but did not expressly decide, the value of the tuition given to an apprentice should not be taken to account in computing the amount of his "average weekly earnings."[22] In another it was held by the Scotch court of sessions that in estimating the average earnings of a servant who was paid according to his output, nothing is to be deducted in respect to the value of the services of his son, whom he employed as an assistant, without paying him anything.[23]

703. Medical examination after accident (par. 3).—The mere fact that an employer has made no objection to the commencement of proceedings, on the ground that no notice of the accident was given by the workman, does not warrant the inference of a waiver by the employer of his right to compel the workman to submit to a medical examination, nor justify the arbitrator in imposing terms upon the employer, as a condition of his obtaining an order that the workman shall be examined.[1]

The report of a medical practitioner appointed for the purpose of the act is conclusive upon the question whether the incapacity arising from the injury has ceased.[2]

704. Payment to dependents (par. 4).—Where an application for compensation under the workmen's compensation act 1897 is made by the legal personal representative of a deceased workman, on behalf of himself and other dependents of the workman, the county court judge or other arbitrator has jurisdiction under schedule I., pars. 4–6 to order so much of the compensation as is alloted to the dependents to be paid to the county court registrar for investment in his name on their behalf, and is not compelled to order it to be paid to the deceased's personal representative.[1]

705. Review of weekly payments (par. 12).— A weekly payment awarded as compensation to an injured workman can only be reviewed under the provision in cases where the circumstances have changed since the making of the award.[1]

When an application to review a weekly payment is brought before an arbitrator, he is not bound to treat the agreement for, or award

a weekly payment as enforceable up to the time of his decision, but has jurisdiction to inquire whether the incapacity had ceased when the application to review was made, or at any and what subsequent time before the hearing, and to make his award with reference to the date so determined.[2]

D. Arbitration.

795a. Text of statutory provisions.—Second Schedule. Arbitration. The following provisions shall apply for settling any matter which, under this act, is to be settled by arbitration:—

(1) If any committee, representative of an employer and his workmen, exist with power to settle matters under this act in the case of the employer and workmen, the matters shall, unless either party objects, by notice in writing sent to the other party before the committee meet to consider the matter, be settled by the arbitration of such committee, or be referred by them in their discretion to arbitration as hereinafter provided.

(2) If either party so objects, or there is no such committee, or the committee so refers the matter or fails to settle the matter within three months from the date of the claim, the matter shall be settled by a single arbitrator agreed on by the parties, or in the absence of agreement, by the county court judge, according to the procedure prescribed by rules of court: or if, in England, the Lord Chancellor so authorizes, according to the like procedure, by a single arbitrator appointed by such county court judge.

(3) Any arbitrator appointed by the county court judge shall, for the purposes of this act, have all the powers of a county court judge, and shall be paid for out of moneys to be provided by Parliament in accordance with regulations to be made by the treasury.

(4) The arbitration act 1889 shall not apply to any arbitration under this act: but an arbitrator may, if he thinks fit, submit any question of law for the decision of the county court judge, and the decision of the judge on any question of law, either on such submission, or in any case where he himself settles the matter under this act, shall be final, unless within the time and in accordance with the condition prescribed by rules of the supreme court either party appeals to the court of appeal; and the county court judge, or arbitrator appointed by him, shall, for the purpose of an arbitration under this act, have the same powers of procuring the attendance of witnesses and the production of documents as if the claim for compensation had been made by plaint in the county court.

(5) Rules of court may make provision for the appearance in any arbitration under this act of any party by some other person.

(6) The costs of and incident to the arbitration and proceedings connected therewith shall be in the discretion of the arbitrator. The costs, whether before an arbitrator or in the county court, shall not exceed the limit prescribed by rules of court, and shall be taxed in manner prescribed by those rules.

(7) In the case of the death or refusal or inability to act of an arbitrator, a judge of the high court at chambers may, on the application of any party, appoint a new arbitrator.

[1] *Morton* v. *Woodward* [1902; C. A.] 2 K. B. 276.

(8) Where the amount of compensation under this act shall have been ascertained, or any weekly payment varied, or any other matter decided, under this act, either by a committee or by an arbitrator or by agreement, a memorandum thereof shall be sent, in manner prescribed by rules of court, by the said committee or arbitrator, or by any party interested, to the registrar of the county court for the district in which any person entitled to such compensation resides, who shall, subject to such rules, on being satisfied as to its genuineness, record such memorandum in a special register, without fee, and thereupon the said memorandum shall for all purposes be enforceable as a county court judgment: Provided, That the county court judge may at any time rectify such register.

(9) Where any matter under this act is to be done in a county court, or by, to, or before the judge or registrar of a county court, then, unless the contrary intention appear, the same shall, subject to rules of court, be done in, or by, to, or before the judge or registrar of, the county court of the district in which all the parties concerned reside, or if they reside in different districts the district in which the accident out of which the said matter arose occurred, without prejudice to any transfer, in manner provided by rules of court.

(10) The duty of the county court judge under this act, or of an arbitrator appointed by him, shall, subject to rules of court, be part of the duties of the county court, and the officers of the court shall act accordingly; and rules of court may be made both for any purpose for which this act authorizes rules of court to be made, and also generally for carrying into effect this act so far as it affects the county court, or an arbitrator appointed by the judge of the county court, and proceedings in the county court or before such arbitrator; and such rules may, in England, be made by the five judges of the county courts appointed for the making of rules under section 164 of the county courts act 1888, and when allowed by the Lord Chancellor, as provided by that section, shall have full effect without any further consent.

(11) No court fee shall be payable by any party in respect of any proceedings under this act in the county court prior to the award.

(12) Any sum awarded as compensation shall be paid on the receipt of the person to whom it is payable under any agreement or award, and his solicitor or agent shall not be entitled to recover from him, or to claim a lien on, or deduct any amount for costs from, the said sum awarded, except such sum as may be awarded by the arbitrator or county court judge, on an application made by either party to determine the amount of costs to be paid to the said solicitor or agent, such sum to be awarded subject to taxation and to the scale of costs prescribed by rules of court.

(13) The secretary of state may appoint legally qualified medical practitioners for the purpose of this act, and any committee, arbitrator, or judge may, subject to regulations made by the secretary of state and the treasury, appoint any such practitioner to report on any matter which seems material to any question arising in the arbitration; and the expense of any such medical practitioner shall, subject to treasury regulations, be paid out of moneys to be provided by Parliament.

(14) In the application of this schedule to Scotland—(*a*) "sheriff" shall be substituted for "county court judge," "sheriff court" for "county court," "action" for "plaint," "sheriff clerk" for "registrar of the county court," and "act of sederunt" for "rules of court:" (*b*) any award or agreement as to compensation under this act may be competently recorded for execution in the books of council and session or sheriff court books, and shall be enforceable in like manner as a recorded decree arbitral; (*c*) any application to the sheriff a

arbitrator shall be heard, tried, and determined summarily in the manner provided by the 52d section of the sheriff courts (Scotland) act 1876, save only that parties may be represented by any person authorized in writing to appear for them, and subject to the declaration that it shall be competent to either party within the time and in accordance with the conditions prescribed by act of sederunt to require the sheriff to state a case on any question of law determined by him; and his decision thereon in such case may be submitted to either division of the court of session, who may hear and determine the same finally, and remit to the sheriff with instruction as to the judgment to be pronounced.

(15) Paragraphs 4 and 7 of this schedule shall not apply to Scotland.

(16) In the application of this schedule to Ireland the expression "county court judge" shall include the recorder of any city or town.

796. Effect of these provisions; generally.— In a general treatise upon the law of employers' liability it would be out of place to undertake to analyse such provisions as those which are set out above, or make any reference to the local rules of court which have been framed with reference to the administration of the act. The rights of injured servants from the standpoint of procedure are fully discussed in the English works mentioned in § 766, *supra*. But it will not be amiss to mention the substance of the few cases in which the effect of these provisions has been directly under consideration by courts of review.

A county court judge sitting to hear an application for compensation is acting as an arbitrator only, and has no jurisdiction to grant a new trial.[1]

An appeal will not lie to the court of appeal under par. (4), against the refusal of the county court judge to direct insurers to pay insurance money into the Post Office Savings Bank, in accordance with the provisions of subsection 1 of section 5 of the act.[2]

The memorandum of the compensation awarded by an arbitrator under the act, when recorded in the manner prescribed by paragraph (8), may be enforced by an order of committal under the debtors' act 1869, § 5.[3]

When a workman, resident in England, is injured by an accident occurring in England, but his employer resides in Scotland, proceedings for compensation under the act may be taken in the county court of the district in which the accident occurred, and service of the necessary notices may be effected by registered post.[4]

In cases within paragraph 14 (c) no appeal lies to the House of Lords from a decision of the Scotch court of session.[5]

An arbitrator, although he has no power to vary his award, is en-

[5] *Osborne* v. *Barclay* [1901] A. C. 269.

titled to deal with a subsequent claim by the dependents of a workman who has died from his injuries, after having been awarded weekly payments.[6]

The limitations of the powers of the court of appeal, as defined by paragraph (4), are indicated by the following remark of Smith, L. J. "In cases under this act, as in appeals generally from county courts, questions of fact are not the subject of appeal. The county court judge has found the facts and has relegated them to us, and we have to decide any question of law arising on them."[7]

E. Act of 1900.

An Act to Extend the Benefits of the Workingmen's Compensation Act 1897, to Workmen in Agriculture. Be it enacted by the Queen's most Excellent Majesty by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same as follows:

Sec. 1.—(1) From and after the commencement of this act, the workmen's compensation act 1897 shall apply to the employment of workmen in agriculture by any employer who habitually employs one or more workmen in such employment.

(2) Where any such employer agrees with a contractor for the execution by or under that contractor of any work in agriculture, section 4 of the workmen's compensation act 1897 shall apply in respect to any workmen employed on such work as if that employer were an undertaker within the meaning of that section. Provided That, where the contractor provides and uses machinery driven by mechanical power, for the purpose of threshing, ploughing, or other agricultural work, he, and he alone, shall be liable under this act to pay compensation to any workman employed by him on such work.

(3) Where any workman is employed by the same employer mainly in agricultural, but partly or occasionally in other, work, this act shall apply also to the employment of the workman in such other work.

The expression "agriculture" includes horticulture, forestry, and the use of land for any purpose of husbandry, inclusive of the keeping or breeding of live stock, poultry, or bees, and the growth of fruit and vegetables.

Sec. 2. This act may be cited as the workmen's compensation act 1900, and shall be read as one with the workmen's compensation act 1897, and that act and this act may be cited together as the workmen's compensation acts 1897 and 1900.

Sec. 3. This act shall come into operation on the 1st day of July, 1901.

797. Effect of this statute.—The meaning of these provisions has so far been very little considered by courts of review. The only reported decision by such a court seems to be one in which it was held that the work of a man hired by a saw miller to cut down trees and cart them to a saw mill is not "forestry."[1]

CHAPTER XLI.

STATUTES IMPOSING VARIOUS SPECIFIC DUTIES UPON EMPLOYERS.

799. Servant's right to sue for injuries caused by a breach of a statutory duty; generally.

800. Same subject continued: provision of special remedy for violation of duty: effect of.

801. Employe not rendered an insurer of his servant's safety by the imposition of a specific duty.

802. Construction of statutes imposing specific duties on employers.

The extent to which the imposition of a specific duty upon a master is regarded as creating a non-delegable duty is discussed in § 565, *ante*.

As to the statutory and constitutional provisions requiring railway companies to receive and forward foreign cars, see chapter XII., *ante*

As to the necessity of showing that the breach of duty alleged was the proximate cause of the injury, see chapter XLII., *post*.

As to the constitutionality of statutes imposing specific duties on employers, see § 617, *ante*.

799. Servant's right to sue for injuries caused by a breach of a statutory duty; generally.—The general rule which defines the extent of a servant's right to bring an action for injuries caused by the breach of a statutory duty has been thus stated in a recent English case: "It cannot be doubted that, where a statute provides for the performance by certain persons of a particular duty, and someone belonging to a class of persons for whose benefit and protection the statute imposes the duty is injured by failure to perform it, prima facie and if there be nothing to the contrary, an action by the person so injured will lie against the person who has so failed to perform the duty."[1]

By many courts it is held that a violation of such a statute constitutes negligence *per se*, as respects a person entitled to sue for its infringement.[2] It has also been held in numerous cases that fault is

[1] *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 415, 67 L. J. Q. B. N. S. 862, per Vaughan Williams, L. J. To the same effect see *Stainer* v. *Hall Mines* [1899] 6 B. C. 579.

[2] This principle is taken for granted in nearly all of the cases cited in § 802, *infra*, and is explicitly enunciated in the following, among others: *Krause* v. *Morgan* (1895) 53 Ohio St. 26, 40 N. E. 886 (violation of statute compelling mine owners to adopt safety appli-

predicable, as a matter of law, of the infringement of a municipal ordinance.[3] According to other authorities, on the other hand, the failure to comply with a statute or ordinance is merely evidence of culpability.[4]

ances for their employees); *Cincinnati, H. & D. R. Co.* v. *Van Horne* (1895) 16 C. C. A. 182, 37 U. S. App. 262, 69 Fed. 139 (blocking of frogs); *Craig* v. *Lake Erie & W. R. Co.* (1896) 35 Ohio L. J. 15 (blocking of frogs); *Schloff* v. *Louisville & N. R. Co.* (1893) 100 Ala. 377, 14 So. 105 (telltales on railways); *Winship Mach. Co.* v. *Burger* (1900) 110 Ga. 296, 35 S. E. 120 (machinery reasonably safe for operators to be furnished); *Morris* v. *Stanfield* (1898) 81 Ill. App. 264 (employment of child under prescribed age); *Bodell* v. *Brazil Block Coal Co.* (1900) 25 Ind. App. 654, 58 N. E. 856 (mining act); *Hochstettler* v. *Mosier Coal & Min. Co.* (1893) 8 Ind. App. 442, 35 N. E. 927 (mining act); *Keenan* v. *Edison Electric Illuminating Co.* (1893) 159 Mass. 379, 34 N. E. 366 (automatic gates to elevator shafts); *Lore* v. *American Mfg. Co.* (1901) 160 Mo. 608, 61 S. W. 678 (guarding of machinery); *Colliott* v. *American Mfg. Co.* (1897) 71 Mo. App. 163; *Greenlee* v. *Southern R. Co.* (1898) 122 N. C. 977, 41 L. R. A. 399, 65 Am. St. Rep. 734, 30 S. E. 115 (self-couplers on railway cars); *Graham* v. *Newburg Orrel Coal & Coke Co.* (1893) 38 W. Va. 273, 18 S. E. 584 (ventilation of mines); *Messenger* v. *Pate* (1876) 42 Iowa, 443 (fencing of machinery); *Kucera* v. *Merrill Lumber Co.* (1895) 91 Wis. 637, 65 N. W. 374 (fencing of machinery); *Kutchera* v. *Goodwillie* (1896) 93 Wis. 448, 67 N. W. 729 (fencing of machinery); *Queen* v. *Dayton Coal & I. Co.* (1895) 95 Tenn. 458, 30 L. R. A. 82, 49 Am. St. Rep. 935, 32 S. W. 460 (employment of boys under twelve in mines).

It was intimated, but not expressly decided, in a Scotch case, that a mine owner is liable if the plaintiff was injured by doing the incautious thing which the statutory rules forbid, and it appears that the rules had not been published as directed by the statute. *Gray* v. *Lawson* (1860) 22 Sc. Sess. Cas. 2d series, 710.

[3] This principle was applied for the benefit of servants in *Thompson* v. *Citizens' Street R. Co.* (1899) 152 Ind. 461, 53 N. E. 462; *Cincinnati, I. St. L. & C. R. Co.* v. *Long* (1887) 112 Ind. 166, 13 N. E. 659 (operation of trains); *Pittsburgh, C. C. & St. L. R. Co.* v. *Wom* (1898) 152 Ind. 345, 44 L. R. A. 65 53 N. E. 290 (operation of trains); *Ba timore & O. S. W. R. Co.* v. *Peterson* (1901) 156 Ind. 364, 59 N. E. 1044 (complaint held not demurrable which charged that injuries to a railroad employee were caused by the violation of a valid city ordinance making it the duty of persons in charge of a moving locomotive to ring a bell attached thereto, and providing that no train shall be run backward without a watchman on the rear thereof); *Central R. & Bkg. Co.* v. *Brantley* (1893) 93 Ga. 259, 20 S. E. 98 (ordinance limiting speed of locomotives in a railroad yard); *Tobey* v. *Burlington, C. R. & N. R. Co.* (1895) 94 Iowa, 256, 33 L. R. A. 496, 62 N. W. 761 (kicking cars at forbidden speed). As to this Iowa case, however, see note 4, *infra*.

In declaring the right of a person to recover for injuries caused by the breach of a municipal ordinance, the New York court of appeals speaks of "the axiomatic truth that every person while violating an express statute is a wrongdoer, and, as such, is *ex necessitate* negligent in the eye of the law; and that every innocent party whose person is injured by the act which constitutes the violation of the statute is entitled to a civil remedy for such injury notwithstanding any redress the public may also have." *Jetter* v. *New York & H. R. Co.* (1865) 2 Keyes, 154. This sentence was quoted with approval in *Freeman* v. *Glens Falls Paper Mill Co.* (1891) 61 Hun, 125, 15 N. Y. Supp. 657. See, however, the New York cases cited in the next note.

[4] See cases cited in Shearm. & Redf. Neg. § 13, note 12, and also *McCambl* v. *Staten Island Midland R. Co.* (1898) 32 App. Div. 346, 52 N. Y. Supp. 84 (municipal ordinance); *Pitcher* v. *New York C. & H. R. R. Co.* (1891) 127 N. Y. 678, 28 N. E. 136 (telltales on railways); *Harlin* v. *Kruhsh* (1898) 2 Misc. 402, 54 N. Y. Supp. 1093, Reversed in (1899) 26 Misc. 381, 56 N. Y. Supp. 275, but not as to this point; *Marino* v. *Lehmaier* (1901) 62 App. Div. 43, 70 N. Y. Supp. 790 (employment of child under legal age).

In one recent case in Illinois it was

That the former of these theories is the correct one can scarcely be doubted. A doctrine the essential effect of which is that the quality of an act which the legislature has prescribed or forbidden becomes an open question upon which juries are entitled to express an opinion would seem to be highly anomalous. The command or prohibition of a permanent body which represents an entire community ought, in any reasonable view, to be regarded as equivalent to a final judgment upon the subject-matter, which renders it both unnecessary and improper that this question should be submitted to a jury.[5] As thus determined, the actual liability of the delinquent party is precisely the same as that which results from considering the juridical situation from the standpoint which is indicated by the following remark of Rigby, L. J., in a case already cited: "Where an absolute duty is imposed upon a person by statute, it is not necessary, in order to make him liable for breach of that duty, to show negligence. Whether there can be negligence or not, he is responsible, *quacunque via*, for nonperformance of the duty."[6]

In any jurisdiction in which negligence is inferable, as a matter of

remarked that the "violation of a statute established for the protection of persons is prima facie evidence of negligence." *Jupiter Coal Min. Co.* v. *Mercer* (1899) 84 Ill. App. 96. In another the same rule was laid down with regard to the violation of a municipal ordinance which provided that every person owning or operating any freight elevator in any building within the city should employ a competent person to take charge of and operate the same, and prescribed a fine for a failure to comply with the provisions. *H. Channon Co.* v. *Hahn* (1901) 189 Ill. 28, 59 N. E. 522, Affirming (1900) 90 Ill. App. 256. And this seems to be the theory upon which the courts of this state proceed generally all, if not all, the cases [illegible] ing act, which are cited in § 802, note 1, *infra*. But one decision by the court of appeals, in which a breach of a statute was treated as negligence *per se*, has been cited in note 2, *supra*.

In Iowa the court, while holding that an instruction that the violation of the statute providing for ventilation of mines is negligence justifying a recovery was proper, in the absence of any exculpatory evidence, remarked that such an instruction would have been erroneous if evidence had been introduced which tended to show that the defendant was without fault. *Mosgrove* v. *Zimbleman Coal Co.* (1899) 110 Iowa, 169, 81 N. W. 227. The language thus used seems to indicate a point of view different from that which was adopted in *Tobey* v. *Burlington, C. R. & N. R. Co.* (1895) 94 Iowa, 256, 33 L. R. A. 496, 62 N. W. 761, cited in note 3, *supra*.

In § 670, note 7, *ante*, several Ontario cases have been cited which apply the doctrine that where a statutory obligation exists a noncompliance with it is evidence of negligence upon which it is competent for a jury to base a verdict against an employer. The authoritative weight of these rulings, however, is much impaired, if not destroyed, by the fact that, with one exception, they antedate *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87 (notes 1 and 3, *supra*), and that, in the single decision which is of later date than the English case, it was, so far as the report shows, entirely overlooked by the court. As to the other error involved in these decisions, see § 800, note 8, *infra*.

[5] See the language used by the court in *Tobey* v. *Burlington, C. R. & N. R. Co.* (1895) 94 Iowa, 256, 33 L. R. A. 496, 62 N. W. 761.

[6] *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 412, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87.

law, when an infringement of a definite statutory requirement is one established, it is not competent, in an action for injuries caused by such infringement, to introduce, for the purposes of exculpation, evidence that the arrangements prescribed would be dangerous and apt to cause accidents. The proper system to adopt is a matter to be decided by the legislature.[7] Nor can a witness be asked what was, in his opinion, a safe manner of affording the protection contemplated by the statute, and whether the method actually adopted by the defendant was prudent. The sole question to be determined is whether the duty created by the statute has been performed.[8]

An employer is liable to any employee injured by the breach of the statute, although he could not reasonably have anticipated that the accident would happen in the precise manner in which it actually did happen.[9]

Where the injury is a direct consequence of the violation of a penal statute, the only prerequisite to a conviction in a criminal prosecution is the submission of satisfactory evidence that the statute had been violated. But in a civil action, involving questions of negligence on the part both of the employer and employed, proof of a violation of the statute is not necessarily enough to entitle the servant to damages.[10]

800. Same subject continued; provision of special remedy for violation of duty; effect of.—According to a standard treatise the general rule is that, when a duty or obligation exists at common law, independently of the statute, a new remedy given by the statute is simply cumulative, and does not preclude the ordinary common-law remedy by way of action, unless there are express words to that effect.[1] In this instance, therefore, the determination of the question whether the common-law rights of the party suing have been superseded by the given statute "depends usually upon whether the statute is at variance with the common law, or is merely cumulative. The legislature could formulate a complete code of rules so particular and minute in their character as to cover all common-law rights with reference to any particular business, and in that event there would be a complete supe-

[7] *State* v. *Anaconda Copper Min. Co.* (1900) 23 Mont. 498, 59 Pac. 854.

[8] *Spira* v. *Osage Coal & Min. Co.* (1885) 88 Mo. 68.

[9] *Christianson* v. *Northwestern Compo-Board Co.* (1901) 83 Minn. 25, 85 N. W. 826.

[10] *Evans* v. *American Iron & Tube Co.* (1890) 42 Fed. 519, denying the right to recover where a child of less than twelve years, and therefore under the age at which he might lawfully be employed, was injured while voluntarily going about a factory, and thus exposing himself to dangerous machinery the character of which he was old enough to appreciate.

[1] Addison, Torts, p. 75, citing Comyn Digest, title *Action upon Statute* (C); *Chapman* v. *Pickersgill* (1762) 2 Wil. 145.

sedure. But unless that is done, all common-law rights not at variance with some provision of the enactment would continue in force."[2]

There is high authority for the unqualified doctrine that, "where a new duty or prohibition is created by statute, and the same act gives a remedy for the breach, by penalty or otherwise, for the benefit of the party grieved, he has no other." But in a very recent English case the rule is laid down in the more guarded form that the remedy prescribed by the statute is exclusive, where upon the purview of the whole act it appears that the remedy so given is intended to be a substitute for the right of action which would otherwise exist.[4] The inference that it was the intention of the legislature that the particular remedy designated should be the only one available is, it would seem,

[1] *Consolidated Coal Co.* v. *Bokamp* (1898) 75 Ill. App. 605, Affirmed in (1899) 181 Ill. 9, 54 N. E. 567. There it was held that the statutes of Illinois regulating coal mining, requiring owners of mines to keep on hand a supply of timbers, and to deliver the same to the workmen as required, to enable them to properly secure the workings for their own safety, do not supersede the requirement of the common law that a master shall furnish his servant a reasonably safe place to work. An action was declared to be maintainable, on this ground, by a workman driving cars over tracks in a mine entry, who had nothing to do with the propping of the roofs, the evidence being that the mine owner had been notified of the unsafe condition of the roof of the entry, and had assumed to repair it.

By § 43 of the act of Congress of February 28, 1871, entitled "An Act to Provide for the Better Security of Life on Board of Vessels Propelled in Whole or in Part by Steam, and for Other Purposes" (16 Stat. at L. 453, chap. 100, U. S. Comp. Stat. 1901, p. 3058), it is provided that the master and owner of any vessel, or either of them, and the vessel itself, shall be liable to any passenger for any damage sustained by him or his baggage from explosion, fire, collision, or other cause, if it happens through any failure or neglect to comply with the provisions of the law; and also that any person sustaining loss or injury through the carelessness, negligence, or wilful misconduct of any captain, mate, engineer, or pilot, or his neglect or refusal to obey the provisions of the law, may recover damages for such loss or injury from the captain, mate, engineer, or pilot causing such loss or injury. A shipowner sought to draw the inference from this section that a mariner on a vessel was precluded from a suit against the vessel for any injury done him, because an action against the vessel was given to passengers only for damage from fire, explosion, collision, or other cause arising from neglect or failure to comply with the law, and that he was remitted by the last clause of the section to an action against the captain, mate, or other officer who caused such injury. This argument did not prevail. The provisions of the act were considered to be cumulative, and not intended to interfere with the rights of sailors under the maritime law, or to deprive them of remedies given them by that law. *Brown* v. *The D. S. Cage* (1872) 1 Woods, 461, Fed. Cas. No. 2,002.

In some cases where the liability to a penalty is specified as one of the consequences of the violation of a statute, the legislature has inserted, *ex abundanti cautela*, a proviso that such statute shall not be construed so as to prohibit the bringing of an action for damages. See, for example, Mass. Pub. Stat. chap. 104, § 22 (as to the fencing of machinery).

[2] *Jones* v. *Stanstead, S. & C. R. Co.* (1872) L. R. 4 P. C. 98, 116, 41 L. J. P. C. N. S. 1, 26 L. T. N. S. 456, 20 Week. Rep. 417, 8 Moore P. C. C. N. S. 312 (infringement of statutory right to tolls). To the same effect see the remarks of Lord Campbell as quoted in note 8, *infra*.

[4] *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 412, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87, per Rigby, L. J.

peremptory and invariable wherever the statute in question stan outside the category of those which are enacted for the benefit or pr tection of a particular class of persons.[5] But if the statute is o which, like those under review in this chapter, belongs to that ca gory, the mere fact that a penalty is imposed for the infringement its provisions will not necessarily preclude a party who is specia injured by that infringement from maintaining an action for da ages.[6] Whether an indemnity can be recovered in such a proceedi is a question which is to be determined in each instance from a co sideration of the words used in the provision which has been viola and in any other parts of the statute which throw light upon the i

[5] In *Gorris* v. *Scott* (1874) L. R. 9 Exch. 125, 30 L. T. N. S. 431, 43 L. J. Exch. N. S. 92, 22 Week. Rep. 575, it was held that the fact that plaintiff's sheep were washed overboard by reason of the failure of the shipowner to provide the pens prescribed by the English contagious diseases (animals) act of 1869 would not give him a right of action for the damage thus caused. Discussing the contention of counsel that, under certain circumstances, if special damage results to anyone from the breach or violation of the statutory duty, there is then also a remedy for such damage by way of action for such breach of duty, Kelly, C. B., said: "That is true; but in cases only where, by the act of Parliament whose provisions are thus violated, a benefit is conferred upon the individual who suffers from the breach of duty. And if the protection or the benefit of the individual owner of the animals were the object and intention of the act of Parliament, then undoubtedly this action might be maintained: but nothing can be more plain, on looking at the act, than that such was not the object or intention of the legislature in passing it, but that the providing these pens and footholds was entirely for the protection of the animals themselves from unnecessary suffering during the voyage, and that any private individual benefit was not within the intention of the act at all."

These remarks of the chief baron were recently referred to with approval by Smith, L. J., in *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87 (see note 8, *infra*).

No action lies against a local board for personal injuries caused by its failure to keep a highway in proper repair in accordance with the provisions of the English public health act of 1875. *Cu ley* v. *Newmarket Local Board* [18 A. C. 345.

See also the opinions of the lo justices in *Atkinson* v. *Newcastle & Waterworks Co.* [1877] L. R. 2 Ex Div. 441, 46 L. J. Q. B. N. S. 775, L. T. N. S. 761, 25 Week. Rep. 794.

The following rule has been formul ed by Mr. Addison (Torts, p. 74 "Where no specific right is created a vested in the plaintiff for his own be fit and advantage, and no specific du in favor of the plaintiff has been i posed, but the statute merely prohibi a thing from being done, under a pe alty for doing it, an action for damag is not maintainable."

See, generally, the cases cited Shearm. & Redf. Neg. § 467.

In *Wilson* v. *Merry* (1868) L. R. H. L. Sc. App. Cas. 326, 341, 19 L. N. S. 30, Lord Chelmsford remark that the scope of the decision in *Cou* v. *Steel* (1854) 3 El. & Bl. 402, 2 C. Rep. 940, 23 L. J. Q. B. N. S. 121, Jur. 515, was merely that a person su fering damage from an omission of duty is not deprived of his remedy b cause the legislature has attached penalty to such omission.

tention of the legislature.[7] In view of the more recent decisions and expressions of judicial opinion in England, it seems to be impossible to state the situation more favorably than this for the servant, al-

In *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87, Vaughan Williams, L. J., said with reference to the factory act: "I have equally no doubt that, where in a statute of this kind a remedy is provided in cases of nonperformance of the statutory duty, that is a matter to be taken into consideration for the purpose of determining whether an action will lie for injury caused by nonperformance of that duty, or whether the legislature intended that there should be no other remedy than the statutory remedy; but it is by no means conclusive, or the only matter to be taken into consideration for that purpose. If it be found that the remedy so provided by the statute is to inure for the benefit of the person injured by the breach of the statutory duty, that is an additional matter which ought to be taken into consideration in dealing with the question whether the legislature intended the statutory remedy to be the only remedy. But again, the fact that the legislature has provided that that remedy shall inure, or inure in some circumstances shall inure, for the benefit of the person injured, is not conclusive of the question, and, although it may be a cogent and weighty consideration, other matters also have to be considered."

In *Detter* v. *New York & H. R. Co.* 1865) 2 Keyes, 154, the doctrine propounded in *Brown* v. *Buffalo & S. L. R. Co.* (1860) 22 N. Y. 191, that the penalty fixed by an ordinance as to running of cars was the only consequence which the law imposed for its violation, was declared to stand upon grounds too doubtful to justify its application to cases not strictly within it. That doctrine was explicitly discarded in *Massoth* v. *Delaware & H. Canal Co.* (1876) 64 N. Y. 524.

Where the duties imposed by statute are merely ministerial, the general rule is that an action will lie at the suit of the party aggrieved by them. *Pickering* v. *Jones* (1873) L. R. 8 C. P. 189, 509, 42 L. J. C. P. N. S. 217, 21 Week. Rep. 786, 29 L. T. N. S. 210, per Brett, J.

The mining act of Missouri (Rev. Stat. 1889) expressly declares that a servant may sue for injuries caused by a breach of its provisions. *Adams* v. *Kansas & T. Coal Co.* (1900) 85 Mo. App. 486. A similar clause is doubtless inserted in other enactments of this class.

[7] (a) *Action held maintainable.* In *Groves* v. *Wimborne* [1898] 1 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87, where a servant was allowed to recover for injuries caused by the defendant's noncompliance with the provisions of the English factory act with regard to the guarding of machinery, Smith, L. J., made the following remarks: "It is to be observed, in the first place, that under the provisions of § 82 not a penny of the fine necessarily goes to the person injured or his family. The provision is only that the whole or any part of it may be applied for the benefit of the injured person or his family, or otherwise, as a secretary of state determines. Again, if proceedings for the fine are taken before magistrates, upon what considerations are they to act in determining the amount of the fine? One matter to be considered, clearly, would be the character of the neglect to fence. This neglect would be either of a serious or of a venial character. Suppose that it was of the latter character, but a person was unfortunately killed or injured in consequence of it. What fine are the magistrates to impose? Are they to impose a fine of the same amount as if it were a flagrant case of neglect to fence? The first thing one would say that they would have to consider would be whether the offense was of a grave character or otherwise. It may be said that, in determining the amount of the fine, the character of the injury sustained by the workman would be considered, but I am not sure that that is the meaning of the section. It seems to me that the fine is inflicted by way of punishment of the employer for neglect of the duty imposed by the act and must be proportionate to the character of the offense. This consideration, and the fact that whatever penalty the magistrates inflict does not necessarily go to the injured workman or his family, lead me to the conclusion that it cannot have been the intention of the legislature that the provision which imposes upon the employer a fine

though one much discussed case has been supposed to embody a broad general proposition "that, wherever a statutory duty is created any person who can show that he has sustained injuries from the

as a punishment for neglect of his statutory duty should take away the prima facie right of the workman to be fully compensated for injury occasioned to him by that neglect. Another observation which makes the matter still clearer arises from the fact that, having regard to the provisions of § 87, it may not be the employer—presumably a person of means and capable of paying a substantial fine—who would have to pay the fine. Under that section the employer may be exempted from the penalty, and the fine may be imposed upon the actual offender, who may be a workman employed at weekly wages; and yet it is said that a fine payable by such a person is the only remedy given by the statute to the injured workman for breach by the occupier of the imperative statutory duty. I cannot read this statute in the manner in which it is sought to be read by the defendant."

Rigby, L. J., summed up his conclusions as follows: "Looking at the whole purview of the act, is it one of those acts by which the legislature renders a particular course of conduct imperative, and a deviation from it punishable by penalty, in the general interests of the public at large, but does not intend that an individual shall have a private right of action for injury occasioned to him by breach of its provisions? Or is it one of those acts in which the legislature, having created a new duty in the interests of a certain class of persons, and having provided a statutory remedy for breach of that duty, intends that that remedy shall be the only one available? It is, in my opinion, neither one nor the other."

See also the extract in note 7, *supra*, from the opinion of Vaughan Williams, L. J.

That there is a right of action for injuries caused by a breach of the provisions of the English factory act was taken for granted in the cases cited in § 802, note 1, *infra*.

That the American doctrine is to the same effect with regard to a[illegible] statutes enacted for the protection of servants is shown by the decisions cited in the last note, as well a[illegible]y many of those collected in § 80[illegible] *infra*. See especially those relating to mines. In none of them does it seem to have been seriously contended, much less decided, that [illegible] infliction of a penalty had the effect [illegible] precluding the injured servant [illegible] covering damages in an action for breach of the statutory duty.

In *Freeman* v. *Globe Pulp & Paper Co.* (1891) 61 Hun, 125, 15 N. Y. Supp. 857, it was taken for granted that a servant had a right of action for injuries caused by the failure of his master to comply with an ordinance which imposed a penalty for the omission to have automatically closing doors to elevator shafts.

As to the case of *Couch* v. *Steel*, [illegible] the following note.

(b) *Action held not maintainable.* The statute of 23 & 24 Vict. chap. 1[illegible] for the regulation and inspection of mines, specifies (§ 10) several rules to be observed by persons operating mines: one of these provisions is that an adequate amount of ventilation shall be constantly produced to such extent that the pits, etc., shall be in a fit state for working. By § 22 a penalty is imposed for a violation of any of these rules.

According to Lord Chelmsford—the other law lords declined to express an opinion on this point—this statute did not give a miner a right of action which he would not have had without it. In *Atkinson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 341, 19 L. T. N. S. 3[illegible] "The statutable duty," he remarked, "is no doubt, created absolutely for the purposes of the act; but it is a duty which, if unperformed, [illegible] only be enforced by the penalty. [illegible] this, for the protection of the pit[illegible] to be covered against the [illegible]er or occupier who causes the work [illegible]e done. It is individual sustains an injury in consequence of the work being imperfectly or improperly performed, a civil liability is not imposed upon the owner, if without the statutable obligation he would not have been liable." The reasoning of the court of exchequer chamber in *Gorris* v. *Pullen* (1864) 5 Best & S. 970, 34 L. J. Q. B. N. S. 265, 11 L. T. N. S. 5[illegible] 13 Week. Rep. 257, where an action was sustained against a house owner whose omission of a statutory duty for the nonperformance of which a penalty was imposed caused an injury to a mem[illegible]

performance of that duty can bring an action for damages against the person on whom the duty is imposed." [8]

of the public, was considered by him to be unsatisfactory.

As article 3053 of the Quebec factories act expressly declares that its provisions in nowise modify the responsibility of an employer to his employees under the civil laws of the province, those provisions are to be treated as other regulations, which merely subject employers to fine and imprisonment. See *Montreal Rolling Mills Co.* v. *Corcoran* (1896) 26 Can. S. C. 595.

A local building act required fire escapes on buildings where more than a certain number of operatives were employed, and imposed a penalty for a violation of the law, and also provided for an injunction. Held, that an operative employed in such a building having no fire escape could not maintain an action against the owner for an injury sustained because he was compelled to jump from the building. *Grant* v. *Sharpe Mill & Power Co.* (1884) 14 R. I. 380.

The doctrine embodied in several Ontario cases is that the provisions of the factories acts of that province (Ont. Rev. Stat. 1887, chap. 141; Ont. Rev. Stat. 1897, chap. 208) are penal merely, and do not confer any civil right of action. The theory propounded was that a person who is injured by a violation of the statutory provisions, and wishes to bring suit for damages, is relegated to his common law rights of action, and cannot avail himself of those provisions, except to the extent of adducing the defendant's failure to comply with them as a circumstance which tends to prove negligence on his part (§ 799, note 2, *supra*). See *Finlay* v. *Wisecompbell* (1890) 20 Ont. Rep. 29; *Headford* v. *McClary Mfg. Co.* (1893) 23 Ont. Rep. 335; *McCloherty* v. *Gale Mfg. Co.* (1892) 19 Ont. App. Rep. 117; *Roberts* v. *Hamilton Cotton Co.* (1893) 23 Ont. Rep. 425. The ruling of the English court of appeal in *Groves* v. *Wimborne* (1898) 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87 (see subd. (a), *supra*), would seem to have overthrown the authority of these decisions. That ruling virtually determines that a factory act framed on the same lines as the English one is not within the purview of the principle relied upon in the first named of the Ontario cases, *viz.*, that "where no specific right is created and vested in the plaintiff for his own benefit and advantage, and no specific duty in favor of the plaintiff has been imposed, but the statute merely prohibits a thing being done under a penalty for doing it, an action for damages is not maintainable." Addison, Torts, 8th ed. 40.

[8] This was the construction put by Lord Cairns in *Atkinson* v. *Newcastle & G. Waterworks Co.* (1877; C. A.) L. R. 2 Exch. Div. 441, 46 L. J. Q. B. N. S. 773, 36 L. T. N. S. 761, 25 Week. Rep. 791, upon the language used by the court of Queen's bench in *Couch* v. *Steel* (1854) 3 El. & Bl. 402, 2 C. L. Rep. 910, 23 L. J. Q. B. N. S. 121, 18 Jur. 515. Both he and the other lords justices had grave doubts about the correctness of the proposition thus enunciated. Those doubts were afterwards reiterated by Lord Herschell in *Cowley* v. *Newmarket Local Board* (1892) A. C. 345.

In *Couch* v. *Steel* it was held that a seaman who suffered injury by reason of the failure of his employer to furnish the supply of medicines prescribed by the English shipping act could recover damages, although a penalty was also imposed for nonperformance of the statutory duty. Lord Campbell, whose views were adopted by the rest of the court, expressed the opinion, in the first place, that the statutory provision in question was enacted for the benefit of individuals, and that, under these circumstances, the case fell within the scope of the general principle laid down in Comyn's Digest, title *Action upon Statute* (F), that, "in every case where a statute enacts or prohibits a thing for the benefit of a person, he shall have a remedy upon the same statute for the thing enacted for his advantage, or for the recompense of a wrong done to him contrary to the said law." Reliance was also placed upon the statute of Westm. 2 (1 Stat. 13th ed. 1) chap. 50, which gives a remedy by action on the case to all who are aggrieved by the neglect of any duty created by statute. See 2 Coke's Inst. 486. He then proceeded as follows: "Therefore, the simple enactment requiring the supply of medicines would have entitled the plaintiff to an action in the same manner as if the obligation had been imposed by the common law, or had been expressly in-

For a more complete discussion of the extent of the right of an aggrieved individual to sue for damages resulting from the infringement of a statute, in cases where a penalty is imposed for a breach, reader is referred to general treatises on the law of negligence.

cluded in the ship articles. However, § 18 of Stat. 7 & 8 Vict. chap. 112, which creates the duty also makes the party who ought to perform it liable to a penalty for nonperformance, to be recovered at the suit of any person, and to be applied in part to the informer, and the residue to the Seaman's Hospital Society. The penalty being annexed to the offense and only because of the act creating it, no action or other proceeding could be taken against the person making default, for the mere breach of the duty upon him by the act. The duty, from its nature, the duty would exist by the common law, and for a breach of it, except for some particular mode of punishment by a penalty prescribed by the act. As for the public wrong is concerned, the remedy but that prescribed by the act of Parliament. There is, however, beyond the public wrong, a special and particular damage sustained by the plaintiff by reason of the breach of duty by the defendant, for which he has no remedy unless an action on the case at his suit be maintainable; and the question is whether the penalty annexed to the offense concludes the plaintiff, who has sustained a special and particular damage, as well as the public, though no part of the penalty is payable to him.

"If the performance of a new duty created by act of Parliament is enforced by a penalty recoverable by the party aggrieved by the nonperformance, there is no other remedy than that given by the act, either for the public or the private wrong; but by the penalty given in the act now in question (Stats. 7 & 8 Vict. chap. 112), compensation for private special damage seems not to have been contemplated. The penalty is recoverable in case of a breach of the public duty, though no damage may actually have been sustained by anybody; and no authority has been cited to us, nor are we aware of any, in which it has been held that, in such a case as the present, the common-law right to maintain an action in respect of a special damage resulting from the breach of a public duty (whether such duty exists at common law or is created by statute) is taken away by reason of a penalty recoverable by a former being annexed as for the nonperformance of duty. . . . The case of cooke (1848) 11 Q. B. 731, B. N. S. 163, 12 Jur. 477, distinguishable from the present was, by the statute in that posed upon the defendant prohibited under a penalty cising the right of fishing to be had it at the common law not bound to perform any duty created by the act but to do that which but for the might have done. . . . Rooening v. Goodchild (1777) 2 W. 906, 3 Wils. 443, an action case was held to be maintainable a deputy postmaster for duty in not delivering a post required by Stat. 9 Anne though he was, by the liable to a penalty for delivering. The objection was taken, the court being of opinion that the duty was created by statute tion lay at common law. as in this, the penalty was by a common informer, and not party grieved.

"In the present case if had prescribed a particular which a person sustaining age by reason of a breach of the imposed by the statute was to compensation, undoubtedly only could be adopted; but 8 Vict. chap. 112, has not for compensation to a person special damage by reason of a the duty prescribed by the there any words taking away which the injured party would common law to maintain an special damages arising from the of a public duty; the penalty given the statute being applicable only to public wrong, and not the private age. . . . Upon principle, then, as upon authority, as far as we been able to find any upon the point, think the second count is maintainable and that the plaintiff's right, by common law, to maintain an action the case for special damage sustained by the breach of a public duty, is

801. Employer not rendered an insurer of his servant's safety by the imposition of a specific duty.— It has been laid down that statutes of the kind here under review do not operate so as to render the employer an insurer of his servant's safety in respect to the performance of the duty imposed by the statute;[1] and that his liability for a breach of such a duty is not absolute, but conditional upon his being chargeable with notice that the provisions of the statute have not been complied with.[2]

802. Construction of statutes imposing specific duties on employers.— In the subjoined note are collected the decisions in which the courts have construed various statutes providing for the safety and health of

[1] *Bourgo* v. *White* (1893) 159 Mass. 216, 34 N. E. 191; *Consolidated Coal Co.* v. *Scheller* (1891) 42 Ill. App. 619; *Colliatt* v. *American Mfg. Co.* (1897) 71 Mo. App. 163. In the last-cited case the court, in discussing a statute (Mo. Sess. Acts 1891, § 3, p. 160) which provided that "the belting, shafting, gearing, and drums in all manufacturing, mechanical, and other establishments in this state, when so placed as to be dangerous to persons employed therein or thereabout while engaged in their ordinary duties, shall be safely and securely guarded when possible," stated its conclusions as follows: "The . . . guards required are safe and secure . . . such guards as will protect the employee from contact with the machinery by the use of ordinary prudence and caution on his part. We do not think the purpose of the legislature was to make the master an insurer of the safety of the servant, but it was its evident purpose to increase the degree of care required by the common law. The guards he is required to provide are such as will protect the employee using ordinary care against all dangers that can be foreseen by ordinary human foresight; but the master is not required to guard against the negligence of the employee, nor against such dangers or accidents as no human knowledge or experience could anticipate."

[2] *Mulhern* v. *Lehigh Valley Coal Co.* (1894) 161 Pa. 270, 28 Atl. 1087 (decision as to Pennsylvania mine law of 1885, requiring that a person employed at an engine shall be a sober and competent person).

In a prosecution under 5 & 6 Vict. chap. 99, forbidding the employment of women in mines, it was testified that two women had been seen lowering parties into the pit. This was held to be insufficient evidence to charge the person operating the mine with knowledge of the breach of the statute, though a different conclusion would have been justifiable if it had appeared that what had occurred was habitual or customary. *Reg.* v. *Handley* (1874) 2 L. T. N. S. 827.

See, however, the North Carolina cases cited in § 832, note 5, *post*.

[1] . . . taken away by reason of the statute which creates the duty imposing a penalty recoverable by a common informer for neglect to perform it, though no special damage be sustained by anyone."

Besides intimating their disagreement, as already stated, with the general proposition mentioned in the text, the lords justices in the *Atkinson Case* (1877; C. A.) L. R. 2 Exch. Div. 441, 36 L. J. Q. B. N. S. 775, 36 L. T. N. S. 761, 25 Week. Rep. 794, cited above, expressed their inability to accept Lord Campbell's theory, that the act under discussion was passed for the benefit of individuals. Brett, L. J., also said that he entertained the strongest doubt as to the correctness of the rule enunciated in the passage quoted above, that, where a new duty is created by statute, and a penalty is imposed for its breach, which penalty is to go to the person injured by such breach, the penalty, however small and inadequate a compensation it may be, is in such a case to be regarded as indicating an intention on the part of the legislature that there should be no action by such person for damages, but that, where a similar duty is created, and a similar penalty imposed which is not to go to the person injured, then the intention is that he is to have a right of action."

servants by the imposition of specific duties upon their employe
Some of these statutes undoubtedly operate so as to enlarge the rig
of servants beyond any limits which could conceivably have been r
ognized if the liability of the employers had been left to be determi
by the application of common-law principles to the given groups
facts. As regards others, it may be said that they probably emb
a standard of duty which would have been ultimately fixed by me
of litigation, and that they have, therefore, merely anticipated
results of the slow process of forensic legislation.

A complete list of the statutes which affect the extent of the l
bility of employers, both those which have and those which have
been construed in this chapter, will be found on p. 2429, *post*.[1]

[1] (a) *Statutes imposing various duties on railway companies.*—The provisions of Hurd's Rev. Stat. (Ill.) chap. 114, § 90, that no railroad shall run a train "for the transportation of merchandise or other freight," without a sufficient brake attached to the rear car and a skilful brakeman in charge, unless the brakes are operated by power applied from the locomotive, has no application to the switching of loaded cars and the making up of trains in the yards of the railroad company. It refers only to trains running from one station to another. *Chicago & E. I. R. Co.* v. *Maloney* (1898) 77 Ill. App. 191. In this case it was also held that there was a practical compliance with this provision where the switchman in a railroad yard, who was stationed on the rear car, after opening a switch notified one employed to clean snow and ice from the tracks that the train was about to back, and to look out for it; and that the company was not liable where he failed to do so, and was run over.

Eight-wheeled gondola or flat cars are not excepted from S. C. Gen. Stat. § 1499, requiring brakes to be placed on every freight car other than four-wheeled freight cars. *Ueir* v. *Charleston & S. R. Co.* (1898) 55 S. C. 90, 32 S. E. 828.

A railroad company might use cars not equipped with automatic couplers prior to January 1, 1895, provided such cars were not first sent out for use in the state after the taking effect of Neb. Sess. Laws 1891, chap. 19, making it unlawful to put into use in the state any new cars or cars sent into the shop for general repairs, not equipped with such couplers. *Thompson* v. *Missouri P. R. Co.* (1897) 51 Neb. 527, 71 N. W. 61.

A railroad company is not negli
as to a brakeman in constructing a
tle guard several hundred feet fro
street, at a point where the ordi
rigid of way joined the railroad sta
grounds, which were crossed by s
street, under the Michigan statute
quiring railway companies to constr
cattle guards at highway crossings. *
ler* v. *Lake Shore & M. S. R. Co.* (18
108 Mich. 690, 66 N. W. 593.

Where a telltale is erected in acc
ance with a statute, but the comm
sioners who are to approve it have
acted, its suitableness is a question
the jury, and a court cannot say, a
matter of law, that a telltale with w
that do not come down as low as
under surface of the bridge is suita
Hardy v. *Boston & M. R. Co.* (1896)
N. H. 523, 41 Atl. 179.

Under Mass. Pub. Stat. chap.
§ 160, it is not necessary to main
a guard at a cornice of a roof ov
station platform which is 1 foot 5 in
from the nearest line of the outside r
since that provision requires such gu
only where some portion of such st
ture "crosses" the railroad. *Quinn*
New York, N. H. & H. R. Co. (19
175 Mass. 150, 55 N. E. 891.

In the following paragraphs the
fect of the cases in which the co
have construed various statutes req
ing that frogs, etc., should be bloc
is stated.

The power conferred upon the railw
committee by the railway act of the
minion of Canada (51 Vict. chap.
§ 262, subs. 4), to allow "such filling
be left out from the month of Decem
to the month of April in each year, b
months included," refers only to
duty prescribed by subs. 4, of filling
spaces between winged rails and railw

frogs and between guard and track rails, and not to the duty prescribed by subs. 3, of filling the spaces between and in front of railway frogs and crossings and between the fixed rails of switches where the spaces are less than 5 inches wide. *Grand Trunk R. Co.* v. *Washington* [1899; P. C.] A. C. 275, 68 L. J. P. C. N. S. 37, Affirming (1897) 28 Can. S. C. 184, Which Reversed (1897) 24 Ont. App. Rep. 183.

The duty imposed by the Michigan statute (Laws 1883, Act No. 174, § 22; 3 How. Anno. Stat. § 3397 [a]), is not fulfilled by the adoption of a method of blocking which the ordinary use of the road renders ineffectual in two or three days,—in this case by the wheel flange wearing down the blocking so far that it became practically useless. The alternative safe method suggested was to give the blocking a grooved or furrowed surface, so as to allow the flanges of the wheels to pass without interference. *Eastman* v. *Lake Shore & M. S. R. Co.* (1894) 101 Mich. 597, 60 N. W. 309.

Under Mich. Comp. Laws, § 6313, requiring railroad companies to block frogs, "it is the duty of the railroad companies to make the frogs as nearly safe as possible," and evidence that the blocking of a certain frog was old and worn by the flanges is sufficient to render the question of a company's negligence one for the jury. It is compliance with the statute, and not merely with the established practice, that is required. *Jones* v. *Flint & P. M. R. Co.* (1901) 127 Mich. 198, 86 N. W. 838.

By Ohio Rev. Stat. § 3365, it is provided that every railroad corporation operating in that state shall fill or block frogs, switches, and guard rails on its tracks, with the exception of guard rails on bridges, so as to prevent the feet of its employees from being caught therein. In a case where a servant was injured on a structure 18 feet high, by reason of defendant's failure to block the space between the main rail and the guard rail, it was held that the question whether such structure was a bridge, within the act, was a question for the jury. *Johns* v. *Cleveland, C. C. & St. L. R. Co.* (1900) 7 Ohio N. P. 592.

The word "employee," in the Ohio statute (Rev. Stat. 7th ed. § 9822; 85 Ohio Laws, March 23, 1888) means all those who, "by rightful authority of the company, are engaged in the business of walking over these frogs and guard rails," although employed and paid by another company. *Ulsh* v. *Wabash R. Co.* (1889) 41 Fed. 193.

(b) *Statutes requiring that dangerous machinery shall be guarded.—United Kingdom.*—By the factory workshop act 1878, § 5, subs. 3, it was provided as follows: "Every part of the mill gearing shall either be securely fenced, or be in such a position or of such construction as to be equally safe to every person employed in the factory as it would be if it were securely fenced." By the factory workshop act 1891, § 6, subs. 2, this provision was amended by inserting before the words "every part" the words "all dangerous parts of the machinery and."

In *Hindle* v. *Birtwistle* (1897) 1 Q. B. 192, 76 L. T. N. S. 159, the court of first instance in construing this provision proceeded on the theory that the manufacturer is only responsible for machinery which is in itself dangerous in the ordinary course of careful working. Referring to this expression of opinion, Wills, J., said: "He seems to think that no machinery can be said to be dangerous unless it is dangerous in itself, however carefully worked. I entirely disagree with such an interpretation, and think that it would limit most materially a very beneficial act of Parliament. It seems to me that machinery or parts of machinery is and are dangerous if, in the ordinary course of human affairs, danger may be reasonably anticipated from the use of them without protection. No doubt it would be impossible to say that because an accident had happened once therefore the machinery was dangerous. On the other hand, it is equally out of the question to say that machinery cannot be dangerous unless it is so in the course of careful working. In considering whether machinery is dangerous, the contingency of carelessness on the part of the workman in charge of it, and the frequency with which that contingency is likely to arise, are matters that must be taken into consideration. It is entirely a question of degree." It was accordingly held that shuttles of cotton looms which occasionally fly out from their bed under circumstances rendering them dangerous to any persons in the line of flight, because of negligence of the weaver in charge, or a foreign substance accidentally getting into the shuttle race, or defect in the yarn, though not in themselves defective, are within the purview of the provision, if any of the causes of their flying out are likely to occur with any degree of frequency.

This provision imposes a less stringent obligation than that imposed by

the subs. 2 of § 5, with regard to a "wheel race," which is required to be absolutely fenced. But where a servant is killed while oiling machinery, owing to the want of a hand rail to protect the pit in which it was sunk, a verdict for his widow will not be set aside, although the trial judge has omitted to ask the jury whether the pit was a "wheel race." Under such circumstances it is for the jury to say whether the absence of the railing implied negligence, and it cannot be inferred that the verdict would have been different if the proper question had been put. *Chapman* v. *Nitro-Phosphate Co.* (1885) 1 Times L. R. 493.

The injured servant is entitled to maintain the action, whether the breach of the statute was in not providing, or in not maintaining, a fence. *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87.

The requirement as to fencing is not limited to such machinery as supplies or conveys the motive power to the machines by which the industrial operations of the factory are immediately effected, but applies to all machinery in the factory. *Redgrave* v. *Lloyd* [1895] 1 Q. B. 876, 64 L. J. M. C. N. S. 155, 15 Reports, 403, 72 L. T. N. S. 565, 43 Week. Rep. 527, 18 Cox C. C. 149, 59 J. P. 293.

The provision as to fencing machinery is applicable, though the servant was not actually engaged in the performance of his duties at the time of the injury. *Kelly* v. *Globe Sugar Ref. Co.* (1893) 20 Sc. Sess. Cas. 4th series, 833.

An employer is guilty of a violation of the statute, if he maintains unguarded cogwheels in such a position that girls of twelve or thirteen years of age are required, in the course of their duties, to place their hands and dresses within about 8 or 9 inches of the wheels. *Gemmills* v. *Gourock Rope Work Co.* (1861) 23 Sc. Sess. Cas. 2d series, 425.

A complaint is not demurrable which alleges that the plaintiff, being obliged to stand upon an iron-bound table, slipped, and in trying to save himself thrust his hand into an uncovered pinion wheel. *Shields* v. *Murdock* (1893) 20 Sc. Sess. Cas. 4th series, 727.

Where a machine is worked by hand, there is no such danger as calls for fencing. *Millican* v. *Muir* (1891) 19 Sc. Sess. Cas. 4th series, 18.

The mere fact that there will be danger if reasonable care be not taken by the workmen does not show that it is a case in which fencing is obligatory. *Robb* v. *Bullock* (1892) 19 Sc. Sess. Cas. 4th series, 971.

The provision in the act of 7 Vic. chap. 15, § 21, was held to cover a case in which an employee had to enter a space between a fly wheel and a spur wheel for the purpose of oiling the latter. *Britton* v. *Great Western Cotton Co.* (1872) L. R. 7 Exch. 130, 41 L. J. Ex. N. S. 99, 27 L. T. N. S. 125, 20 W. Rep. 525.

British colonies.—Under the Quebec factories act an employer is liable for injuries to a girl employed in his factory whose hair is caught in a revolving shaft under the table at which she is at work, as she stoops to pick up a comb, where such shaft is not covered or otherwise guarded. *Bergeron* v. *Tooke* (1896) Rap. Jud. Quebec, 9 C. S. 506.

In construing the words "all belting, shafting, gearings, flywheels, drums and other moving parts of machinery" (Ont. Rev. Stat. 1887, chap. 208, s. 1, subs. 1), a divisional court was of opinion that the general clause covered only those parts of machinery which were of a similar nature to those enumerated specifically, and that the word "moving" was used in the transitive sense of "propelling," and was accordingly held not to be applicable to a saw. *Hamilton* v. *Groesbeck* (1890) 19 Ont. Rep. 76. This construction seems to have been approved by the court of appeal (18 Ont. App. Rep. 437), which, by holding that no negligence on the defendant's part was shown in leaving the saw unguarded, may be presumed to have proceeded on the theory that the plaintiff was relegated to his common-law right. Whether this narrow construction is correct would seem to be very disputable, to say the least. Some of the most dangerous parts of machines are those which do the actual work for which the machines are designed, and it is difficult to believe that it was not the intention of the legislature to include these within the purview of the act. To construe that act in such a sense that only the "propelling" parts would be covered by it would deprive it of at least one half of its beneficial operation. Clearly, however, there are some kinds of saws—e.g. the circular—which cannot be guarded without rendering them virtually useless, and a decision holding the act to be inapplicable to such saws might perhaps be sustained on the ground that, under such circumstances, the case was one which came within the purview of the

saving clause of the statute, which exempts employers from the obligation to guard machinery where it is not practicable to do so. Another strong reason for doubting the correctness of the construction placed in this case upon the word "moving" is that, in subs. 4 of § 5 of the English factories act of 1878, it is directed that "all fencing shall be constantly maintained in an efficient state while the parts required to be fenced are in motion or use." Considering that this statute is the one from which that of Ontario is copied, it seems a reasonable inference that, although these precise words are not found in the latter statute, the colonial legislature intended to enact a provision which would give servants a protection at least as complete as that which they derived from the English act.

By the amended factories act of Ontario (58 Viet. chap. 50, § 3, Ont. Rev. stat. 1897, chap. 20 (1) a), employers are required to fence "all dangerous parts" of machinery. This change entirely gets rid of the ambiguity of the earlier act.

The maintenance of unprotected spindles with a projecting set screw has in Canada been regarded as a breach of the act as it stood before this amendment. *O'Connor* v. *Hamilton Bridge Co.* (1894) 25 Ont. Rep. 12. Affirmed in (1894) 21 Ont. App. Rep. 596 (1895) 24 Can. S. C. 598.

Indiana.—A complaint in an action on Burns's Supp. 1897, § 7087h (Acts 1897, p. 101), which provides that machinery of every description shall be "properly guarded" in manufacturing establishments, is demurrable where its allegations are that plaintiff was required to hold down pieces of wood which were being run through a sticker; that while he was so doing his hand caught in the bit of the machine, the defendants having knowingly and negligently allowed the machine to become unsafe in that there was no guard around the knives and no rollers to hold the pieces of wood in the proper position, but they had to be held down by hand; and that they were negligent in suffering the machine to become out of repair and in allowing plaintiff to work about the machine, he being inexperienced, as they knew, and ignorant that guards were necessary. Such a complaint does not show that the injuries were due to the want of guards or rollers, or due to the fact that plaintiff was holding the timber, or that it was negligence to allow plaintiff to do so, or that guards were necessary to the safe operation of the machine. *Rietman* v. *Bangert* (1901) 26 Ind. App. 468, 59 N. E. 1080.

Michigan.—The failure of an employer to provide covering for cogwheels as required by 3 How. Anno. Stat. chap. 5, § 1997, will not render him liable for injury to a boy falling into such wheels in a scuffle, where the notice from the inspector, provided for by such statute, has not been given. *Borck* v. *Michigan Bolt & Nut Works* (1896) 111 Mich. 129, 69 N. W. 254.

Massachusetts.—An employer is not liable to criminal prosecution or to an action for injuries by an employee, under Mass. Pub. Stat. chap. 191, until he has received notice from an inspector, as required by § 32 of that chapter. *Foley* v. *Pettee Mach. Works* (1889) 149 Mass. 294, 4 L. R. A. 51, 21 N. E. 394.

Minnesota.—Whether it is "practicable," within the meaning of the Minnesota act, to fence a particular piece of machinery, is a question for the jury. *Peterson* v. *Johnson-Wentworth Co.* (1897) 70 Minn. 538, 73 N. W. 540.

Where the hood or blower to a revolving cylinder with knives, in a planing machine, was battered and worn so that it did not fit closely, and thereby a suction of air was created over a roller into the cylinder under the hood, and care was required to adjust it, it was held that the hood was not a proper protection to dangerous machinery. *Janoszeski* v. *Osgood & B. Mfg. Co.* (1900) 80 Minn. 393, 83 N. W. 389.

Missouri.—In an action for injuries founded on the act of April 20, 1891, declaring that all dangerous shafting and gearing in manufacturing establishments shall be "safely and securely guarded," it is not necessary that the complaint should refer to the title of the act, or aver that defendant's negligence was in violation of the act. It is sufficient if it states facts bringing the case within the statute. *Lore* v. *American Mfg. Co.* (1901) 160 Mo. 608, 61 S. W. 678.

In the same case it was held that an instruction that the employer does not guarantee or insure the employee against injury from machinery, but he discharges the measure of his duty if he provides such guards for the protection of the employees as a person of ordinary care would deem sufficient, was properly refused since such an instruction called for a less degree of care than that required by the statute. The plain

tiff was held entitled to recover, the evidence being to the effect that the rods protecting the gearing had become bent so as to produce an opening which the sheet iron within the rods did not guard, and that in passing around the machine in the discharge of her duty, she slipped on the floor, rendered slippery from the spraying of oil from the machinery, and her hand passed through the opening in the guard, and was crushed in the cog-wheels.

That this act does not make the employer an insurer of his servant's safety, see § 801 *supra*.

New York.—Failure to comply with N. Y. Laws 1886, chap. 409, § 8, as amended by 1892, chap. 673, § 8, requiring that all cogs, belting, shafting, etc., shall be "properly guarded," is prima facie evidence of negligence, in an action by an employe against his employer for injuries caused by coming in contact with cogs. *Harlin* v. *Krulish* (1898) 25 Misc. 402, 54 N. Y. Supp. 1093, Reversed in (1899) 26 Misc. 381, 56 N. Y. Supp. 275, but merely on the special ground that evidence showing that the defendant had no control over the machinery in question had been improperly excluded.

This statute does not require employers to fence every machine, but only those which, "in reasonable anticipation, may be a source of danger." *Byrne* v. *Nye & W. Carpet Co.* (1899) 46 App. Div. 479, 61 N. Y. Supp. 741, holding that the defendant was not bound to anticipate that a child would attempt to adjust material passing through a swiftly moving machine which was in no way connected with the child's work in another part of the factory.

It is error to rule, as a matter of law, that there was a noncompliance with this statute, where the evidence is that the injury was caused by a set screw projecting ⅛ of an inch from a shaft which was 15 feet above the floor and was reached by a ladder used only when necessary to oil the shaft bearing. *Glens Falls Portland Cement Co.* v. *Travelers' Ins. Co.* (1900) 162 N. Y. 399, 56 N. E. 897, Affirming (1896) 11 App. Div. 411, 42 N. Y. Supp. 285. The court said: "The necessity for the guard, and the character and description of the guard, must of necessity depend upon the situation, nature, and dangerous character of the machinery, and in each case becomes a question of fact. . . . The manifest purpose of the enactment was doubtless to give more force to the existing rule that masters should afford a reasonably safe place in which the servants are called upon to work."

Similarly, it has been held that shafting and set screws in a factory, etc., guarded 9 feet above the floor, are not within the provisions of this statute. *Glassheim* v. *New York Economic Printing Co.* (1895) 13 Misc. 174, 34 N. Y. Supp. 69.

The owner of a manufacturing establishment, who has provided a covering for machinery, sufficient to prevent the clothing of the employees from coming in contact therewith, is not liable under N. Y. Laws 1890, chap. 398, § 12, providing that all machinery "shall be properly guarded," for injuries occasioned by an employee's throwing her hair over her head as she is coiling it in such a manner that it flies under the back of the covering of the shafting. Such an accident is not one which could have been anticipated. *Cobb* v. *Welcher* (1894) 75 Hun, 28, 26 N. Y. Supp. 1058.

On the theory that no greater duty is imposed upon a manufacturer by N. Y. Laws 1885, chap. 560, § 6, providing that all cogs shall be properly guarded than devolves upon him under the common law, it has been held that the omission to provide guards does not create a liability for injuries to a servant where the cogs could not have been guarded in any manner that would have tended to make them safer for employees, without preventing their use. *Spaulding* v. *Tucker & C. Cordage Co.* (1895) 13 Misc. 398, 34 N. Y. Supp. 237. In this case a boy of seventeen employed on a rope walk near the cogs tripped, and in falling brought his hand into contact with them. The manner in which the cogs were guarded is not described.

These statutes were re-enacted, with a few modifications, in the labor laws of 1897 (N. Y. Laws 1897, chap. 415).

Pennsylvania.—In a case where a boy thirteen years old was employed as a slate picker in a coal breaker, and fell into a pair of rollers breaking coal, and was injured, the evidence showed that the master had covered the rollers with a box, in the top of which was an opening covered by a plank, and that the plank was displaced by a fellow servant of the boy at the time of the accident and had often been thus displaced before, with the boy's knowledge. It was held that the master had done his duty under the act of March 3, 1870, providing that all machinery where boys work shall be properly fenced off, and that

the boy could not maintain an action against the master. *Honor* v. *Albrighton* (1889) 93 Pa. 475.

Wisconsin.—In *Thompson* v. *Edward P. Allis Co.* (1895) 89 Wis. 528, 62 N. W. 527, it was argued that the provision in Sanborn & Berryman's Anno. stat. § 1638f (Rev. Stat. § 1636j) which declares that all belting, etc., so located as to be dangerous to employees when engaged in their ordinary duties shall be securely guarded or fenced so as to be safe for persons employed in any such place of employment, did not apply to an employee who was engaged in work upon the gears themselves, but merely to the case of other employees who in performing their duties are in danger of being caught by the gears, but who are not employed directly upon or about them. The court rejected this contention, and held that an older who, when injured, was feeling a shaft to see if it was hot, was entitled to recover.

The provision cited only requires the guarding of such machinery as is dangerous in an unguarded condition. The mere fact that it occasioned an injury to an employee does not of itself show that it came within this description. *Powalske* v. *Cream City Brick Co.* (1901) 110 Wis. 461, 86 N. W. 153.

Whether a set screw is "so located as to be dangerous to employees engaged in their ordinary duties," so as to require it to be covered or guarded, is a question for the jury. *Gunnard* v. *Knapp-Stout & Co. Co.* (1897) 95 Wis. 482, 70 N. W. 671.

It cannot be said, as matter of law, that negligence is inferable from the fact that a set screw on a paper winder projected $\frac{3}{16}$ of an inch above the surface of the collar. Whether such an arrangement was indicative of negligence is a question for the jury. *Kreider* v. *Wisconsin River Paper & Pulp Co.* (1901) 110 Wis. 645, 86 N. W. 662.

A master is not required to guard a shafting which is so located that an employee must necessarily go out of his ordinary course, or the course which he might be reasonably expected to take, in order to reach it. *Powalske* v. *Cream City Brick Co.* (1901) 110 Wis. 461, 86 N. W. 153, denying recovery where the employment of a servant did not bring him within the reach of danger from an unguarded shaft which was about 18 inches from his place of work, and where a movement directly towards the shaft was guarded against by a large pile of stones, and the only way to reach the shaft was by stepping out of his path and up on the pile of stones,—an act which was not required in his work.

An employer is not, as matter of law, free from negligence in leaving unguarded a constantly moving elevator chain and carrying chain at a point where the two meet on the surface of the floor and run over a sprocket-wheel projecting just above the surface of the floor, beside which an inexperienced employee seventeen years old is placed at work. *Klatt* v. *N. C. Foster Lumber Co.* (1897) 97 Wis. 641, 73 N. W. 563.

In a late case in which recovery was denied on the ground that the plaintiff fully appreciated and had assumed the risk, the court remarked that it was not yet settled in Wisconsin whether leaving gears uncovered constituted negligence under the act cited above. *Williams* v. *J. G. Wagner Co.* (1901) 110 Wis. 456, 86 N. W. 157.

(c) *Other statutory provisions relating to factories and workshops.*—Any place in which a part of the processes mentioned in the statutory definition of a certain kind of factory are carried on is a "factory" within the meaning of the statute, although the main process from which that particular description of factory receives its designation is carried on in a distinct establishment. Hence, premises in which the processes of hooking, lapping, making up, and packing cloth are carried on, are a factory within the English factory and workshop act of 1878, § 93, relating to the employment of young persons, even if none of such processes are carried on as incidental to bleaching or dyeing within the provision including bleaching and dyeing works,—that is to say, any premises in which such bleaching, dyeing, and the processes specified are carried on. *Rogers* v. *Manchester Packing Co.* [1898] 1 Q. B. 344, 67 L. J. Q. B. N. S. 310, 78 L. T. N. S. 17, 46 Week. Rep. 350, 62 J. P. 166, 18 Cox C. C. 698.

The factory and workshop act of 1883 (46 & 47 Vict. chap. 53), § 2, which declares that it shall be unlawful to carry on a white lead factory, unless it is certified by an inspector that the owner has complied with the directions of the act with regard to ventilation, etc., has been held not to be applicable to a factory in which a process was employed which was invented after the passage of the act, and produced an article which, although it presented the same appearance and was adapted for the same uses, differed in some essential respects from that previously manufactured,—especially in regard to the fact

of its being much less dangerous to the workmen. *Creery* v. *Hannay's Patents Co.* (1889) 16 Sc. Sess. Cas. 4th series, 993.

An underground place which for fifteen years has been used as a bakehouse does not cease to be so used while undergoing repairs and remaining unoccupied thereafter at the time of the taking effect of the English factory and workshop act 1895, § 27, subs. 3, prohibiting the use of a place under ground as a bakehouse "unless so used at the commencement of such act." The court took the position that, for the purposes of the act, trying to let the premises was equivalent to using them, and that there had been no interruption of use as a bakehouse, as the evidence showed that during a portion of the period during which the premises had remained unoccupied they had been under repair, and that during the whole of that period a notice to the effect that they were to let had constantly been exhibited.

A justice may be compelled by mandamus to hear a complaint against part of the owners of a mine who failed to provide a boiler with a proper steam gauge as required by 18 & 19 Vict., chap. 108, § 11, as the act renders any owner, agent, or viewer liable for neglect to observe the rules. *Queen* v. *Brown* (1857) 7 El. & Bl. 757, 26 L. J. M. C. N. S. 183, 3 Jur. N. S. 745.

A city ordinance requiring every vat with hot liquids to be surrounded with "proper safeguards" for preventing accident or injury to those employed at or near them requires some practical safeguard which, while affording reasonable security, does not unreasonably interfere with the work which must be performed. *Chicago Packing & Provision Co.* v. *Rohan* (1892) 47 Ill. App. 640, disapproving an instruction which left it to the jury to say whether a railing which had been provided was a proper safeguard, a matter as to which no evidence had been produced, and which could be settled only by an expert.

The duty of the owner of a manufacturing establishment to provide an inclosure for an elevator shaft, under N. Y. Laws 1887, chap. 462, § 8, amending N. Y. Laws 1886, chap. 409, arises only after the inspector has declared that in his opinion it is necessary to do so in order to protect the life or limbs of those employed in the establishment. *Bodin* v. *Vace* (1892) 28 Abb. N. C. 138, 18 N. Y. Supp. 106.

N. Y. Laws 1887, chap. 566, provides for protecting the opening of a hoistway in warehouses by a substantial railing, or with good and sufficient trap doors to be kept closed at all times except when in actual use. Under this provision it was held that where an employee, just after entering a building on a dark morning, fell into a hoistway which had been left open by a coemployee who had passed through a few minutes before, it was for the jury to say whether the protection required by the statute was given. *McCaulay* v. *Smith* (1892) 47 N. Y. S. R. 500, 19 N. Y. Supp. 991.

The Ontario factories act 1884, chap. 39, § 15, subs. 1, providing that unguarded dangerous places shall be securely guarded, is infringed where a vat on which workmen have to stand is inadequately covered. *Dean* v. *Ontario Cotton Mills Co.* (1887) 14 Ont. Rep. 119.

A depression in the floor of a mill, of the depth of the floor, made by an opening in the same at a place where the elevator passes up and down, the opening being closed by an automatic shaft, does not constitute a violation of Mass. Pub. Stat. chap. 104, § 14, declaring that all hoistways and elevators on every floor of a factory shall be protected by sufficient trap doors or self-closing hatches. *Hoard* v. *Blackstone Mfg. Co.* (1900) 177 Mass. 69, 58 N. E. 180.

A druggist's establishment in which the only part of the wares manufactured is that which is produced in a laboratory, the entire output being only about 2 per cent of the business, is not a "factory" within the meaning of a statute requiring fire escapes. *Hornischel* v. *Texas Drug Co.* (1901) 26 Tex. Civ. App. 1, 61 S. W. 419.

For a case in which the defendant was sued for breach of a statute requiring the construction of fire escapes (Wis. Laws 1895, chap. 355 Rev. Stat. 1898, § 4390), and was held not to be obliged to construct new fire escapes, for the reason that his factory was within the statutory exception as being "supplied with a reasonable fire escape" see *Dunlavey* v. *Racine Malleable & Wrought Iron Co.* (1901) 110 Wis. 391, 85 N. W. 1025.

A safe landing place is an essential part of an efficient fire escape. Hence evidence that a fire escape attached to a factory terminated above a chute extending into the basement of the building, so that persons attempting to descend landed in such chute, justifies a finding that the owners failed to provide a proper fire escape as required by the New York statute providing that

factories shall be provided with suitable and proper fire escapes connecting with each floor. *Johnson* v. *Steam Gauge & Lantern Co.* (1893) 72 Hun, 535, 25 N. Y. Supp. 689.

Negligence by the proprietor of a factory cannot be predicated of the fact that the windows leading to the fire escapes were screwed down, where such windows were light structures and could easily have been kicked out with as little delay as would be occasioned by raising them if unfastened, and propping them up. *Huda* v. *American Glucose Co.* (1895) 13 Misc. Rep. 657, 34 N. Y. 931.

In construing the Ontario factories act (Rev. Stat. 1887), § 15, subs. 4, providing for safety devices on elevators, the court has held that, even if the device furnished has neither been approved nor disapproved by the government inspector, the plaintiff cannot recover unless he shows that it was of such a pattern as to make the use of it unreasonable. *Black* v. *Ontario Wheel Co.* (1890) 19 Ont. Rep. 578.

A manufacturer making use of elevators is not compelled, under Mass. stat. 1882, chap. 208, amending Mass. Pub. Stat. chap. 104, § 14, providing that all elevators, cabs, or cars shall be provided with some suitable mechanical device to be approved by the state inspector of factories and public buildings, whereby the cabs or cars will be "securely held in the event of accident," to provide an arrangement that will surely and securely hold the car in every circumstance, but only some device, to be approved by the inspector, designed for the purpose of securely holding the cab in case of accident. *Bourgo* v. *White* (1893) 159 Mass. 216, 34 N. E. 191.

See also *H. Channon Co.* v. *Hahn* (1901) 189 Ill. 28, 59 N. E. 522, cited in § 799, note 4, *supra*.

(d) *Statutes regulating the operation of mines.*—As regards some of their provisions, the statutes which have been enacted for the regulation of mines in the United States and the other countries with which we are concerned in the present treatise are similar, or substantially identical. But it seems to be preferable, on the whole, to classify the cases with reference rather to territorial lines than to the subject matter. No provisions, of course, will be adverted to here except those which have a direct bearing upon the extent of the right of miners to recover damages for injuries received in the course of their employment.

United Kingdom.—The shaft of a lead mine, which is completed and has a tunnel driven from the bottom of it for the purpose of arriving at the ore, although no ore has yet been got out, is a "working shaft" within the meaning of the English metalliferous mines regulation act 1872, § 23, subs. 10; and the owners of the mine are liable to be convicted of an offense against that section, if the men employed in the mine are drawn up the shaft in a bucket unprovided with guides. *Foster* v. *North Hendre Min. Co.* [1891] 1 Q. B. 71, 60 L. J. M. C. N. S. 6, 63 L. T. N. S. 458, 17 Cox C. C. 216, 55 J. P. 103. The decision was based on the principle that the danger to the miners is the same whether the mine is productive or not.

Under 18 & 19 Vict., chap. 108, § 4, requiring ventilation constantly if a colliery "be worked," the suspension of actual work from Saturday to Monday will not suspend the requirements as to ventilation during that time. *Knowles* v. *Dickinson* (1860) 2 El. & El. 705, 29 L. J. M. C. N. S. 135, 6 Jur. N. S. 678, 8 Week. Rep. 411.

Under 23 & 24 Vict., chap. 151—an act for the regulation and inspection of mines.—so much of the mine must be kept ventilated as to render the working places safe. *Brough* v. *Homfray* (1868) 15 Mining Reg. 6, L. R. 3 Q. B. 771, 37 L. J. M. C. N. S. 177, 16 Week. Rep. 1123, 9 Best & S. 492.

The coal miners' regulation act 1887, general rules No. 15, provides as follows: "Every road on which persons travel underground, where the load is drawn by a horse or other animal, shall be provided, at intervals of not more than 50 yards, with sufficient manholes or with places of refuge; and every such place of refuge shall be of sufficient length, and at least 3 feet in width between the wagons running on the road and the side of such road." In a Scotch case it was held by Lord Macdonald (the other judges reserving their opinions on the point) that the mouths of the cross roads which led off the main level of a mine, and were within 50 yards of each other, were to be considered as "manholes" in the sense of the rule. *Hughes* v. *Clyde Coal Co.* (1891) 19 Sc. Sess. Cas. 4th series, 313.

As to the question whether the effect of the act of 23 & 24 Vict. chap. 151, § 10, with regard to the ventilation of coal mines, is or is not to make the operator of the mine absolutely responsible for failure to provide such ventila

tion, and thus exclude *pro tanto* the defense of coservice, see § 565, *ante*.

British colonies.—Rule 18, § 25, Inspection of metalliferous mines act (B. C. Rev. Stat. chap. 134), runs as follows: "Each winze or mill hole extending from one level or drift to another level or drift shall be protected at the top by a cover or guard rail." This provision does not compel a mine owner to cover an opening on an intermediate level. Martin, J., in *Staines* v. *Hall Mines* (1899) 6 B. C. 579.

Section 6, subs. 20, of the Victoria regulation of mines statute of 1877, declaring that no person in charge of steam machinery in connection with the working of any mine shall, unless relieved by a competent person for that purpose, absent himself or cease to supervise the machinery during the time it is used in working the mine, applies only in the case of machinery in connection with working of a mine, and not in a case where the enlpable party is a contractor engaged in erecting machinery. *Dunstan* v. *Stewart* (1880) 6 Viet. L. Rep. (L.) 175.

Illinois.—Under the mining act of this state the liability of the owner is conditioned upon proof that he has "wilfully violated" the statutory requirements. *Consolidated Coal Co.* v. *Carson* (1896) 66 Ill. App. 434. Mere noncompliance with these requirements does not constitute a "wilful violation" thereof. *Odin Coal Co.* v. *Deaman* (1900) 185 Ill. 413, 76 Am. St. Rep. 45, 57 N. E. 192. Affirming (1899) 84 Ill. App. 190; *Springside Coal Min. Co.* v. *Grogan* (1892) 53 Ill. App. 60 (instruction based on opposite theory held erroneous).

Instructions are defective unless they are such as to keep permanently before the jury the question whether the breach of the statutory requirement complained of was willful. *Hanley* v. *Dailey* (1883) 13 Ill. App. 391.

Where the report of an examination of defendant's mine did not show that all the conditions were safe, and plaintiff gave defendant notice of the dangerous condition of an entry, and was permitted to enter the mine to work, and was injured, there was evidence to support an instruction based on wilful violation of mining act, § 4, providing that all mines shall be examined every morning, and that no one shall be permitted to enter until the conditions are reported to be safe. *Pancake Coal Co.* v. *Royce* (1900) 184 Ill. 402, 56 N. E. 621, Reversing (1898) 79 Ill. App. 469.

Wilful violation is predicated when the owner is affected with notice that the requirements have not been complied with, and fails to remedy the defective conditions. *Bartlett Coal & Min. Co.* v. *Roach* (1873) 68 Ill. 174; *Jupiter Coal Min. Co.* v. *Mercer* (1899) 84 Ill. App. 96; *Girard Coal Co.* v. *Higgins* (1893) 52 Ill. App. 69.

In a case where a declaration alleged that plaintiff's intestate came to his death by defendant's wilful omission to comply with two sections of the act, it was held proper to refuse to allow officers of defendant to testify that they intended to comply with the statute in good faith, since the word "wilful," as employed in the declaration, did not charge wrongful intent, but only that the omissions were conscious acts of the mind, and did not result from mere inadvertence. *Odin Coal Co.* v. *Deaman* (1900) 185 Ill. 413, 76 Am. St. Rep. 45, 57 N. E. 192. Affirming (1899) 84 Ill. App. 190.

Negligence so gross as to amount to recklessness and indicate a willingness to subject others to a known and avoidable risk will support a charge of wilful wrong; but such a charge is not sustained by proof of a want merely of ordinary care. *Girard Coal Co.* v. *Higgins* (1893) 52 Ill. App. 69.

Whether there has been a wilful failure must be determined by the jury upon a consideration of all the facts and circumstances of the case. *Odin Coal Co.* v. *Deaman* (1899) 84 Ill. App. 190; *Muddy Valley Min. & Mfg. Co.* v. *Phillips* (1899) 39 Ill. App. 376.

Under Starr & C. Anno. Stat. 2d ed. chap. 93, § 4, which provides that mines in which men are employed shall be examined every morning to determine obstructions to roadways and other dangerous conditions, and § 14, giving a right of action to the widow and children of any person killed by the wilful violation or failure to comply with such law, where any injury happens contemporaneously with the continued violation of the statute, to a person within its protection, a verdict finding that the violation of the statute caused the injury will not be set aside unless there is an entire absence of proof. *Jupiter Coal Min. Co.* v. *Mercer* (1899) 84 Ill. App. 96.

A wilful violation of § 7 of [illegible] mining act, which forbids the owner [illegible] in charge of a hoisting engine [illegible] an experienced, competent, and [illegible] person, is established where the jury finds that an incompetent person was

employed and retained with knowledge of his incompetency. *Niantic Coal & Min. Co.* v. *Leonard* (1888) 126 Ill. 216, 19 N. E. 294.

The inference that a mine owner possessed that knowledge of the failure to comply with the statute which warrants the conclusion that he had wilfully violated it may properly be drawn where he was operating a coal mine, the original shaft of which was 200 feet in depth, and had failed to construct an additional or escapement shaft, in the manner required by 2 Starr & C. Anno. Stat. chap. 93, § 3, within a year after coal was mined for sale or use. *Carterville Coal Co.* v. *Abbott* (1898) 81 Ill. App. 279.

Evidence, in an action for death resulting from negligence, that the state mine inspector has never made complaint of the conditions surrounding the shaft of a mine, is not conclusive that such conditions were not the result of wilful violation of the law. *Odin Coal Co.* v. *Denman* (1899) 84 Ill. App. 190. Judgment Affirmed in (1900) 185 Ill. 113, 76 Am. St. Rep. 45, 57 N. E. 192.

Sections 4 and 6, Rev. Stat. 1874, and § 4 of the statute entitled "Health and Safety of Miners" (Sess. Laws 1883, p. 114), require the owners of mines to have the working places examined every morning in order to detect fire damp. This provision is applicable not only to an employee actually engaged in digging for coal, but also to an employee who, at the time of an explosion, was timbering a shaft. *Coal Run Coal Co.* v. *Jones* (1886) 19 Ill. App. 365. Reversed in (1886) 127 Ill. 379, 8 N. E. 865, 20 N. E. 81, but only on the ground that the breach of the statute did not contribute to the accident.

A mining company wilfully neglecting to prevent accumulation of gas, as required by the act of July 1, 1887, is liable for injuries to an employee caused thereby. *Muddy Valley Min. & Mfg. Co.* v. *Phillips* (1890) 39 Ill. App. 376.

Under Ill. Rev. Stat. 1874, chap. 93, § 9, as amended by act of May 11, 1877, the person whose duty it is to report accidents to the mine inspector is the person who has immediate personal charge of the mine or colliery. The owner and operator of the mine, or his agent, is not within the penalty unless he has personal charge of the mine. *Shell* v. *People* (1879) 93 Ill. 129.

Recovery has been allowed for injuries caused by a wilful violation of the provision (§ 7) requiring the owners of mines to provide safe hoisting apparatus, sufficient brakes, and sufficient light, and not to place an incompetent engineer or a boy under eighteen years of age in charge. *Consolidated Coal Co.* v. *Hackl* (1889) 130 Ill. 551, 22 N. E. 715. See also *Niantic Coal & Min. Co.* v. *Leonard* (1888) 126 Ill. 216, 19 N. E. 291.

The fact that the statute came into effect only a few days before the accident occurred is no excuse for a noncompliance with its provisions. If unable to carry out any of the statutory duties at once, the mine owner is bound to suspend operations until he has made the necessary preparation. *Bartlett Coal & Min. Co.* v. *Roach* (1873) 68 Ill. 174.

The operator of a coal mine, who, before permitting persons to enter such mine, causes it to be examined by a competent and duly authorized agent, who in good faith makes an examination to ascertain if there are any dangerous conditions which render it unsafe for men to work therein, and reports the mine to be in a safe condition, when in fact it is not, cannot be sued under that provision of the statute which relates to the inspection of mines (2 Starr & C. Anno. Stat. 2719, chap. 92, §§ 4, 14), though possibly recovery may be had in a common law action for negligence. *Himrod Coal Co.* v. *Schroath* (1900) 91 Ill. App. 231.

Section 6 of the act of 1879 enacts that there shall be provided for hoisting and lowering miners a cage covered with boiler iron and furnished with guides, a brake in every drum, and safety catches.

A pit boss in charge of a mine, whose duty it is to see that the hoisting apparatus satisfies the statutory requirements, cannot recover under this section from the mine owner for injuries caused by his failure to perform this duty. *Beaucoup Coal Co.* v. *Cooper* (1883) 12 Ill. App. 373.

Rev. Stat. 1874, chap. 93, § 14, requires that "every drum shall be provided with a sufficient brake to prevent accident in case of the giving out or breaking of machinery." The failure of the machinery to perform its proper office is a "giving out" within the meaning of the statute. *Beard* v. *Skeldon* (1885) 113 Ill. 584 (instruction to this effect approved), Affirming (1883) 13 Ill. App. 54.

The provision in Rev. Laws 1874, chap. 70, § 14, regarding the covering of hoisting cages, applies where a person was killed while upon the cage for the

purpose of being hoisted, by a lump of coal which fell down the shaft, the cage not being covered. *Litchfield Coal Co.* v. *Taylor* (1876) 81 Ill. 590.

A law requiring mine owners to provide hoisting machinery which will keep the miners safe "as far as possible" is not complied with where a valve of the hoisting engine of a mine cage is defective, to the knowledge of the officers of the company, so as to allow the steam to escape through it and start the engine automatically; and the mining company is liable for the death of a miner caused by such unexpected starting. *Consolidated Coal Co.* v. *Mæhl* (1888) 31 Ill. App. 252.

Hurd's Rev. Stat. (Ill.) 1889, chap. 93, § 6, provides that a sufficient light shall be furnished at the top of every shaft of a mine to insure the safety of persons getting on or off the cage. Section 8 requires that the top of every shaft shall be securely fenced by gates properly protecting such shaft. Section 14 provides that any injury arising from failure to comply with the provisions of the act shall give a cause of action. In a case where these provisions were construed, it was held that, where a mine owner had erected above the opening of a shaft an unincloscd framework of timber, supporting a structure called a "tipple house," to which the cage could be hoisted, and through which the day shift entered and left the shaft, but it was customary to let off the night shift at the surface of the ground, and plaintiff's intestate, being one of the night shift, and endeavoring to alight, fell into the shaft and was killed (it being dark at the surface, and there being then no fence there), it was proper to submit to the jury the questions whether the surface or the tipple house was the top of the shaft, within the meaning of § 8, and whether the proximate cause of the injury was the absence of a light. *Odin Coal Co.* v. *Denman* (1900) 185 Ill. 413, 76 Am. St. Rep. 45, 57 N. E. 192, Affirming (1899) 84 Ill. App. 190.

Rev. Stat. chap. 93, § 8, providing for signals, applies to all coal mines without reference to the motive power. *Sangamon Coal Min. Co.* v. *Wiggerhaus* (1887) 25 Ill. App. 77, (1887) 122 Ill. 279, 13 N. E. 648.

By Rev. Stat. chap. 93, § 16, it was enacted that the owners of coal mines should keep a sufficient supply of timber to be used as props, and send down such props when required.

A recovery may be had under this provision by a miner, the [illegible] which he is opening ha[illegible] dangerous roof, and he is [illegible] paid reason thereof, a price exceeding scale fixed by the union to which he longs. Such a person is a work within the meaning of the statute. *Olive & S. Coal Co.* v. *Herbeck* (1 190 Ill. 39, 60 N. E. 105, Affirm (1900) 92 Ill. App. 441.

A declaration averring a failure furnish props and prop the roof so t it should not fall does not show a vi tion of this provision. *Consolid Coal Co.* v. *Yung* (1887) 24 Ill. 255.

The implication from this provis that, where no timberman is emplo it is the duty of the miners, as a of their employment, to observe fully the roof under which the working from day to day, and set p wherever they seem to be needed. *solidated Coal Co.* v. *Scheller* (189 Ill. App. 619.

It is proper to refuse to direct a diet for the defendant, where it app that plaintiff's intestate had info the "pit boss" that a rock was hab fall and was dangerous, and that he dered props for it, which the boss p ised to send, but failed to send, and rock fell on plaintiff's intestate. *ern Anthracite Coal & Coke Co. Beaver* (1902) 192 Ill. 333, 61 N 335, Affirming (1900) 95 Ill. App. 9

Where the custom established by fendant was for miners to write blackboard placed near the mouth the shaft for the purpose, the num of props and caps desired, when wanted, and when furnished they sent down and delivered at the min room, and there was evidence that plaintiff had for three successive before his injury placed his order on board, and the props and caps were furnished to him, a trial judge was tified in instructing the jury that pl tiff had made a demand for such p and caps. *Donk Bros. Coal & Coke* v. *Peton* (1901) 192 Ill. 41, 61 N 330, Affirming (1900) 95 Ill. App.

The miner himself is the one to d mine the length and dimensions of props and cap pieces necessary to p erly secure his safety, and if he or props and cap pieces of one dimen and length, it is not a compliance the statute for the owner to furnish props which must be spliced or s before they can be used. *Western thracite Coal & Coke Co.* v. *Be*

(1901) 192 Ill. 333, 61 N. E. 335, Affirming (1900) 95 Ill. App. 95.

A miner cannot complain that the props supplied were not of the precise length that he wanted, unless he informed the defendant what lengths were required. *Sugar Creek Min. Co.* v. *Peterson* (1898) 177 Ill. 324, 52 N. E. 475, Reversing (1897) 75 Ill. App. 631.

In an action for negligently causing decedent's death by failing to furnish the timber, after several witnesses have testified that when timber was on hand it was kept at the bottom of the shaft, the question asked witnesses, whether there were props on hand at the bottom of the shaft at the time, is not erroneous, though the statute does not require them to be kept in any particular place. *Mt. Olive & S. Coal Co.* v. *Beabeacher* (1901) 190 Ill. 538, 60 N. E. 888, Affirming (1900) 92 Ill. App. 442.

Under the provision of the act of 1872 which requires that a "second escapement" shall be provided, it was held that liability attached, though the fire which occurred on the occasion when the need of the second escapement was experienced was accidental and implied no fault in the mine owner. *Wesley City Coal Co.* v. *Healer* (1876) 84 Ill. 126.

Section 3 of the act of 1877, prescribing the construction of escapements, and fixing a time within which they shall be constructed, is kept in force by the proviso in § 3 of the act of 1879, which repeals all the earlier act except those parts which are covered by the proviso. *Hamilton* v. *State* (1882) 102 Ill. 367.

Section 3 of the act of May 28, 1879, requiring the construction of escapements, is not intended for the benefit of the owners of mines, but was designed to protect the health and insure the safety of the persons employed in the mines. A court has no power under it to direct a mine owner to leave open the passages between his own mine and an adjoining one, so that an escapement constructed by him may serve for both mines. *Loose* v. *People* (1882) 11 Ill. App. 445.

Indiana.—Act June 3, 1891, § 9 Burns's Rev. Stat. 1894, § 7469; Horner's Rev. Stat. 1897, § 5480j), requires owners and operators of coal mines to cover the cages with ¼-inch boiler plate, for the safety of persons ascending and descending the shaft. Burns's Rev. Stat. 1890, § 7473 (Horner's Rev. Stat. 1897, § 5480n), authorizes an action against such an owner or operator for an injury resulting from a failure to comply with the act. Since the purpose of the act is to protect all persons working in coal mines, a miner employed at the bottom of a shaft to run cars into the cage is not prevented from recovering for an injury resulting from a violation of the statute by the fact that he was not ascending or descending. *Bond* v. *Rural Block Coal Co.* (1900) 25 Ind. App. 651, 58 N. E. 870.

Burns's Rev. Stat. 1901, § 7479, provides that the operator of a coal mine shall employ a competent mining boss to constantly watch over the airways, etc. Section 7472 requires such boss to visit and examine every working place in the mine at least every alternate day, and to examine roofs so that such places are properly secured by props, and that safety is assured. A complaint alleging that a boss appointed by an operator failed to examine the mine in which plaintiff worked, as required, and, unknown to plaintiff, the walls between the places where coal was mined became so thin that a charge of powder used in mining blew one out, and plaintiff was injured is not demurrable. *Cascade Block Coal Co.* v. *Wells* (1901) 29 Ind. App. 1, 61 N. E. 236.

Iowa.—By McClain's Iowa Code, §§ 2463, 2465, it is provided that, if any employee in a mine neglects or refuses to securely prop the roof of coal entries under his control, he shall be deemed guilty of a misdemeanor; it is made the duty of the agent, owner, or operator to keep on hand a sufficient supply of timber to be used as props, and send the same down to the workmen when required. This provision does not apply in the case of an injury to any employee injured in a sloping entry of a coal mine through which coal is brought to the surface, where such employee is not in control of the entry. This is not a case where the keeping of the place of work in repair is incidental to the labor which is to be performed. The duties of the laborer have no connection with the preparation of the entry, which is a completed piece of work as far as he is concerned. *Corson* v. *Coal Hill Coal Co.* (1897) 101 Iowa, 224, 70 N. W. 185.

A servant cannot recover under the provision requiring the furnishing of props, where there is no evidence that he called for any props which were not furnished. *Gibson* v. *Maple Grove Coal & Min. Co.* (1901) 115 Iowa, 74, 87 N. W. 736.

A jury is justified in finding that a

mine owner was guilty of an actionable breach of the provision (§ 2188) of the Iowa Code respecting the ventilation of mines, where the evidence tends to show that the room where the plaintiff worked was filled with poisonous gases to such an extent that to breathe it was dangerous to the health. *Wagstore* v. *Zumbleson Coal Co.* (1899) 110 Iowa, 169, 81 N. W. 227.

Iowa Laws 1880, chap. 202, § 13, which declares it to be a misdemeanor to ride upon a loaded car or wagon in a shaft or slope, does not apply to a servant who, as conductor, accompanies a train of cars which is being hauled out of the mine. The prohibition is aimed merely at intermeddlers. *Crabill* v. *Wapello Coal Co.* (1886) 68 Iowa, 751, 28 N. W. 56.

Kentucky.—The provision of Ky. Stat. § 2732, making it a misdemeanor for any person employed in a mine to intentionally or wilfully neglect or refuse to securely prop the roof of a working place under his control, and providing that any employee who neglects or refuses to obey an order by the superintendent of the mine in relation to the security of the bank where he is at work shall be liable to a fine, refers to persons actually engaged as miners in taking out coal and thereby removing the natural props of the roof, and has no application to an employee employed as track layer along the roadways of the mine, which are no more under his control than that of any other general employee; and his failure to prop the roof of such roadways is not such contributory negligence as will prevent a recovery for his death. *Ashland Coal & I. R. Co.* v. *Wallace* (1897) 101 Ky. 620, 13 S. W. 207, Denying Rehearing in (1897) 101 Ky. 644, 42 S. W. 744.

Missouri.—A mine owner, being by § 14 liable only for wilful violations of the statute, cannot be sued for a breach of § 16, respecting the supply of timber for props, unless he knew that the props were necessary. *Leslie* v. *Rich Hill Coal Min. Co.* (1892) 110 Mo. 31, 19 S. W. 308. Compare decisions on Illinois mining acts.

Under § 6 of the Missouri act of 1881, which provides that the owner, etc., of every coal mine shall provide a cage for lowering or hoisting the miners, and that the cage shall have a spring catch, the actual owner is liable for an injury caused by a breach of the statute as to the hoisting cage, although the person injured was in the employ of a contractor opening the mine. *Fell* v. *Rich Hill Coal Min. Co.* (1886) 24 Mo. Ap 216.

Under § 16, which provides that owner, etc., of a mine shall keep a su cient supply of timber to be cut props, and send down the props required, the owner is liable, the injured servant was employed by who had contracted with the own take out the coal at so much a t The only way in which the owner relieve himself of the duty is to trans the control and occupancy of the m by lease or other contract. *Les Rich Hill Coal Min. Co.* (1892) 110 31, 19 S. W. 308.

A miner's continuance of work a his demand for props has been re does not relieve the employer of re sibility for such accidents as may s quently be caused by a want of p ping, if there was no patent danger the demand was made out of reas caution merely. *Idams* v. *Kans T. Coal Co.* (1900) 85 Mo. App. 18

A person employed as cager at bottom of the shaft of a coal mine w is injured in the performance of duty by a lump of coal falling from top of the shaft into an uncovered is entitled to recover damages un the provisions of the Missouri act March 23, 1881, requiring the cage to covered "so as to keep safe, as far possible, persons descending into ascending out of said shaft," altho he may not be strictly within the ter of the clause. *Durant* v. *Lexi Coal Min. Co.* (1888) 97 Mo. 62, 1 W. 484.

New Mexico.—The operator of a m is required to use reasonable efforts secure the requisite ventilation for miners, under the act of Congress March 3, 1891, requiring operators provide adequate ventilation of not than a specified number of cubic fe air per minute for so many men, and force the same through the mine proper appliances. *Cerrillos Coal Co.* v. *Deserant* (1897) 9 N. M. 49, Pac. 807.

New York.—By Laws 1890, chap. 7 §§ 9, 10, and Laws 1897, chap. § 122, it is provided that the own and operators of mines shall cause th mines to be properly timbered, and roof and sides of each working pl thereof to be properly secured, and t no person be permitted to work in unsafe place and under dangerous terial except to make it secure. In action under this provision, a ver for the plaintiff was warranted by

ence that his intestate was killed by the fall of a pillar of tale while engaged defendant's mine; that defendant's managing agent had notice of the dangerous position of the pillar, and of its liability to fall, previous to the accident; that timbers had been procured for protecting it, which had not been used; and that water had accumulated on the upper side of the pillar, and, by seeping down between the crevices of the layers of tale, softened the greasy material, causing it to slide. *Tetherton v. United States Tube Co.* (1901) 165 N. Y. 665, 59 N. E. 1131, Affirming (1899) 41 App. Div. 613, 58 N. Y. Supp. 1.

Ohio.—By Rev. Stat. § 6371 (which is substantially copied from the act of April, 1872), it is made a criminal offense for a person employed in a mine to neglect or refuse to prop securely the roof and entries under his control. It is also provided that the owner . . . shall keep a supply of timber constantly on hand, and deliver the same to the working place of the miner; and it is declared that no miner shall be liable for accidents which occur in mines where this provision has not been complied with. All that is necessary to establish negligence under this section is to show that the timber was not delivered. The miner is not required to ask for it, or give notice to anyone. *Pittsburgh & W. Coal Co. v. Estivenard* (1895) 53 Ohio St. 43, 40 N. E. 725.

Pennsylvania.—The act of March 3, 1870, providing for the health and safety of persons employed in mines, and requiring inspection, etc., took effect immediately. *Com. v. Conyngham* (1870) 66 Pa. 99.

In an action to enforce the penalty provided by the section of the act of March 3, 1870, prohibiting the working of mines not having two shafts for every seam of coal worked, with a proviso that this shall not apply to opening a new mine or making communications between shafts, so long as not more than twenty persons are employed in such new mine, the operating of the first and third seams in a certain mine simultaneously with the opening of the fifth, which had but one outlet was held not to be unlawful, as the fifth seam was simply in preparation for working. *Haddock v. Com.* (1883) 102 Pa. 243.

The provision as to ventilation in the act of March 3, 1870, does not apply to an air shaft until a communication is formed between it and the mine, where such shaft is being constructed by an independent contractor, and the mine owner only supervises to see if it is according to contract. *Welsh v. Lehigh & W. Coal Co.* (1886; Pa.) 3 Cent. Rep. 386.

Under the act of 1870, requiring the mining boss to have main doors attended and guarded to prevent their being left open, he has no discretion. *Com. v. Reynolds*, 1 Kulp, 218.

A mining boss for each opening need not be employed under the act of June 30, 1885, requiring the employment of a competent boss since a coal mine means such territory, whether one or more drifts, as lies compactly adjacent, and in its working constitutes but a single operation. *Com. v. Wigton* (1886) 2 Pa. Dist. R. 51.

A mine owner is not relieved from compliance with the Pennsylvania statute by the fact that in a particular mine certain requirements are unnecessary. *Com. ex rel. Williams v. Kingston Coal Co.* (1891) 6 Kulp, 241.

Where an old mine has the statutory outlets and is then worked further several hundred feet along the seams, it becomes a new mine, and an outlet for ventilation and escape is required by the act of 1870. *Commonwealth ex rel. Williams v. Wilkesbarre Coal Co.* (1873) 15 Mining Rep. 31, 29 Phila. Leg. Int. 213.

A bucket 3 feet in diameter, 3 feet deep, and capable of holding four men, with no protector overhead and without a guard, swinging from side to side, and striking the sides and timber of the shaft when being raised or lowered, does not comply with the act of June 2, 1891, § 3, requiring a cage with the necessary buntings and guides, in the second opening of a shaft, with hand rails and efficient safety catches, and a sufficient cover overhead. *Com. v. Elk Hill Coal & I. Co.* (1898) 4 Lack. Legal News, 80.

In an action for death by negligence the question whether a manway required by the act of April 18, 1870, was sufficient, is one for the jury. *Cambria Iron Co. v. Shaffer* (1887; Pa.) 6 Cent. Rep. 608.

As to the status of foreman appointed under the Pennsylvania acts of 1870, 1877, and 1885, see § 520, note 1, subd. (o), *ante*.

Tennessee.—The provision in the act of 1881, chap. 170, § 7, that in no case shall a furnace be used inside a mine where the coal breaker and chute buildings are directly over and cover the top of the shaft, for purpose of producing a hot up-cast of air, is only applicable where the coal is taken out by a shaft,

and not where it is removed by a horizontal entry. *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387 (suffocation caused by the burning of the buildings at the entrance of the in-take).

(e) *Statutes relating to scaffoldings.*—By N. Y. Laws 1897, chap. 415, it is made the duty of the master to furnish safe and proper scaffoldings for employees to work upon.

Prior to the enactment of this statute a master was not liable for injuries to a mechanic resulting from a negligent use or selection from a proper supply furnished by the master, of material for a scaffold which it was the duty of such mechanic and his fellow mechanics to construct. *Banzhaf* v. *Ludwig* (1899) 28 Misc. 496, 59 N. Y. Supp. 535, Reversing (1899) 27 Misc. 821, 57 N. Y. Supp. 828 (see §§ 614 616, *ante*).

Its effect is to render a master responsible for a defective scaffold not sufficient to bear the burden placed upon it because of failure to brace the uprights, notwithstanding that he furnished sufficient and proper material and intrusted its construction to competent employees. *Stewart* v. *Ferguson* (1898) 34 App. Div. 515, 54 N. Y. Supp. 615, (1899) 44 App. Div. 58, 60 N. Y. Supp. 429. On a third appeal it was laid down that the collapse of a scaffold having thereon only the weight required for the purpose for which it was constructed was prima facie evidence of the employer's negligence. (1900) 52 App. Div. 317, 65 N. Y. Supp. 149.

An employer is not only bound to furnish a safe scaffold, but must maintain it in such condition during the work. *Healy* v. *Burke* (1901) 35 Misc. 254, 71 N. Y. Supp. 1027.

The statutory provision refers to a completed scaffold. *Pursley* v. *Edge Moor Bridge Works* (1901) 168 N. Y. 589, 60 N. E. 1119, Affirming (1900) 56 App. Div. 71, 67 N. Y. Supp. 719 (not applicable where a falsework fell while it was being constructed).

The question of whether or not a scaffolding was suitable, proper, and safe for the purpose for which it was intended, is for the jury. *McLaughlin* v. *Eidlitz* (1900) 50 App. Div. 518, 64 N. Y. Supp. 193.

The fact that the servant who erected the scaffold, and the servant who was injured, were both engaged in the same work for which the scaffolding was used, did not make them fellow servants so that the master was relieved from liability for such injuries. *Kuss* v. *Freid* (1900) 32 Misc. 628, 66 N. Y. S. 487.

(f) *Statutes regulating the employment of children.*—The occupiers of a spinning mill are liable to a fine under the English factory and workshop act 1878, § 3 providing therefor where a young person is employed contrary to its provisions, where a young person in their employ during the time allowed for a meal oils part of the machinery notwithstanding he does so contrary to orders and for his own amusement. *Prior* v. *Shaithwaite Spinning Co.* [1900] 1 Q. B. 881, 78 L. T. N. S. 532, 67 L. J. Q. B. N. S. 615, 46 Week. Rep. 488, 64 J. P. 358. The position was that the servant, in doing what he would have done if he had been acting under orders was "working" at a forbidden time within the meaning of the act.

A newspaper stall consisting of a board laid on trestles, at a country railway station, at which a boy is employed for a few hours daily, his principal place of employment being at the bookstall of the railway junction 2 miles distant, is not a "shop" within the shops act of 1892, and the notice required by § 4 of that act need not be exhibited upon it. *Smith* v. *Kyde* (1900) 1 K. B. 286, 71 L. J. K. B. N. S. 16.

Where a boy twelve years old, employed as a messenger, is directed by his master to work in the factory in violation of N. Y. Laws 1897, chap. 415, § 70, prohibiting the employment of children under fourteen years of age, and the child is injured, there is sufficient evidence of the master's negligence to take the case to the jury. *Wagner* v. *Lehmaier* (1901) 62 App. Div. 43, 70 N. Y. Supp. 790.

The owner of a factory is guilty of negligence in putting a girl whom he employs as a "full-timer," in contravention of the same act (§§ 11, 12, 96) to do such dangerous work as keeping a carding machine free from tow. He must respond in damages if she is injured in attempting to clean it while in motion, although she has been expressly directed not to do this. *Sharp* v. *Parkhead Spinning Co.* (1885) 12 Sc. Sess. Cas. 4th series, 574.

The employment of a child under twelve to work an elevator for the benefit of a manufacturing concern being made illegal by the factories act of Ontario (Ont. Rev. Stat. chap. 208, § 6, subsec. 1; § 2, subsec. 1; § 15, subsec. 4), it is held that the employer, besides being subject to the penalty provided, has to exercise more than ordinary precaution

for the well being and safeguarding of minors who have been taken into factory work contrary to the provision of the legislature. *O'Brien* v. *Sanford* (1892) 22 Ont. Rep. 137, per Boyd, Ch. The conclusion of the court was that the case should not be withdrawn from the jury, as there was evidence tending to show that the injured person,—a child under the statutory age of employment,—was not competent to manage an elevator, the construction of which was unusual if not dangerous.

The words "after due notice," in the Michigan statute prohibiting the employment of children under fourteen years of age without the written permission of the parent or guardian (3 How. Anno. Stat. § 1997, cl. 7), mean after notice by the inspector mentioned in the preceding section; and until such notice is given the statutory liability does not exist. *Borck* v. *Michigan Bolt & Nut Works* (1896) 111 Mich. 129, 69 N. W. 254.

The proprietors of a planing and saw mill are not prohibited from employing a child under fourteen years of age to work in the lumber yard from which the lumber for the mill is supplied, under N. Y. Laws 1889, chap. 560, providing that no child under fourteen years of age shall be employed in any manufacturing establishment, and N. Y. Laws 1892, chap. 673, defining "manufacturing establishments" to mean any mill, factory, or workshop where one or more persons are employed at labor. *Murphy* v. *Bennett* (1896) 11 App. Div. 298, 42 N. Y. Supp. 61.

A minor cannot recover in an action under N. Y. Laws 1876, chap. 122, "To Prevent and Punish Wrongs to Children," unless the master is guilty of some specific negligence. Hence, a master who hires a boy of fifteen to work at a stamping machine is not responsible for such personal injuries as he may receive after proper precautions have been taken and adequate instructions given. *Hayes* v. *Bush & D. Mfg. Co.* (1886) 102 N. Y. 648, 5 N. E. 784.

It has also been held that this act has no application to productive industries, or to a useful or necessary business or occupation. The meaning of the words "business" and "vocation," as used in the list of employments within the statutory prohibition, is held to be limited by the context and the general scope of the statute to employments which are either vicious in themselves, or which partake of the character of an amusement. *Hickey* v. *Taaffe* (1885) 99 N. Y. 204, 52 Am. Rep. 19, 1 N. E. 685, Reversing (1884) 32 Hun, 7, and overruling *Cooke* v. *Lalance Grosjean Mfg. Co.* (1884) 33 Hun, 351,—a second decision of the supreme court rendered while the appeal in the first one was still pending. The following passage sufficiently indicates the nature of the act and the reasoning relied upon by the court of appeals: "The first section declares that 'any person having the care, custody, or control of any child under the age of sixteen years, who shall exhibit, use, or employ . . . such child . . . in or for the vocation, occupation, service, or purpose of singing, playing on musical instruments, rope or wire walking, dancing, begging, or peddling, or as a gymnast, contortionist, rider, or, acrobat, in any place whatsoever; or for or in any obscene, indecent, or immoral purpose, exhibition, or practice whatsoever; or for or in any business, exhibition, or vocation injurious to the health or dangerous to the life or limb of such child; or who shall cause, procure, or encourage such child to engage therein,—shall be guilty of a misdemeanor.' The next section provides that 'every person who shall take, receive, hire, employ, use, exhibit, or have in custody any child under the age and for any of the purposes mentioned in the first section of this act, shall be guilty of a misdemeanor.' The fourth section is in these words: 'Whoever, having the care or custody of any child, shall wilfully cause or permit the life of such child to be endangered or the health of such child to be injured; or who shall wiltully cause or permit such child to be placed in such a situation that its life may be endangered or its health shall be likely to be injured, shall be guilty of a misdemeanor.' . . . The scope of the act cannot be broader than its title: 'To Prevent and Punish Wrongs to Children.' To that end it prohibits, first, their employment in certain specified avocations intended for the amusement of the public, and which, however unprofitable to them and dangerous to the actor, are at least in themselves innocent; second, in the most general terms, 'any purpose, exhibition, or practice' which is either obscene or has an indecent or immoral purpose; and, third, their employment 'for or in any business, exhibition, or vocation injurious to the health' or 'dangerous to the life or limb of such child.' Here are three clauses, the first implying a service or exhibition attractive to the spectator, because of personal skill or dexterity of the performer; the second,

practices which, tending to degrade and corrupt, are against good morals; the third, 'any business, exhibition, or vocation which is injurious or dangerous.' The word 'vocation' appears in the first clause, where its meaning is illustrated by an enumeration of pursuits literally within the mischief of the act; the word 'exhibition' fitly describes those pursuits, and, if they stood alone in the third clause, although preceded by the word 'any,' would, within well-settled rules of construction, embrace only things of the same kind or class as those with which they were first connected. The other word, 'business,' is, it is true, used for the first time. In general use it has a broader significance than either of the others and might include any a fair, however serious or trivial, in which volition entered. But here it used with words of limited meaning which have received in the same ac particular application, and, upon same principles of construction, must referred to things of the same kind those specified, and to which the o words are referred. (*Wakefield* v. *P* [1882] 90 N. Y. 218.)"

See also *Evans* v. *American Ice Tube Co.* (1890) 42 Fed. 519, cited § 799, note 10, *supra*; *Queen* v. *Ivy Coal & I. Co.* (1895) 95 Tenn. 45 L. R. A. 82, 49 Am. St. Rep. 935, W. 460, cited in §§ 799, note 2, and 800, note 7, *supra*.

CHAPTER XLII.

CAUSATION.

802a. Introductory.

A. General principles.

803. Necessity of proving that the negligence alleged was the cause of the injury.

804. —and also the proximate cause of the injury.

805. Provinces of court and jury.

B. Intervening causes.

806. Generally.

807. Operation of nonresponsible agencies.

808. Nonculpable acts of responsible actors.

809. Culpable acts of responsible actors: negligence of coservants.

810. Same subject continued: negligence of injured servant himself.

811. Master liable where his own negligence intervenes, as a proximate cause, between a delinquent coservant's negligence and the injury.

812. —or between the negligence of the plaintiff himself and the injury.

C. Concurrent causes.

813. Generally.

814. Master liable where his own antecedent negligence and a subsequent delinquency of a coservant are both efficient causes of the injury.

a. Generally.

b. Illustrative cases.

815. Master liable where he or his vice principal directed the details of the work.

For a general discussion of the subject of causation, see 1 Beven, Neg. pp. 93–116; Shearm. & Redf. Neg. §§ 25 *et seq.*; Cooley, Torts, pp. 68–79; Wharton, Neg. §§ 87–149.

As to the burden of proving that the negligence alleged was the proximate cause of the injury, see § 836, *post*.

802a. Introductory.—A considerable part of the preceding chapters has been devoted to an exposition of the various aspects of the question which first presents itself for determination in every case in which a servant is claiming compensation for an injury received in the course of his employment, *viz.*, whether the acts or omissions complained of were such as imported culpable negligence, either on the part of the employer himself, or on the part of some agent for whose

defaults he is responsible.[1] Under the general principles of the law of negligence, that question receives an affirmative or a negative answer, according as it is shown that, in the given instance, the employer did or did not owe the injured person a duty to prevent the existence of the conditions, or the occurrence of the event, to which the injury is alleged to be traceable.[2]

[1] Under the maritime law the principle that recovery is conditional upon its being proved that the injury resulted from the negligence of the employer or his representative is subject to the qualification that, where the action is *in rem*, the absence of negligence will not entirely absolve the ship from liability. Thus, a mariner who is injured in the service of a ship is entitled to be cured at the expense of the ship, though no one is in fault. *Brown* v. *The Readish Johnson* (1873) 1 Woods, 301, Fed. Cas. No. 1,992.

[2] "The ideas of negligence and duty are strictly correlative, and there is no such thing as negligence in the abstract. Negligence is simply neglect of some care which we are bound by law to exercise towards somebody." *Thomas* v. *Quartermaine* (1887) L. R. 18 Q. B. Div. 685, 56 L. J. Q. B. N. S. 340, 57 L. T. N. S. 537, 35 Week. Rep. 555, 51 J. P. 516, per Bowen, L. J.

"Actionable negligence exists from an omission to perform the duty of observing due care, according to the circumstances, to prevent injury to the person or property of one who has a right to expect the duty will be performed." *Caniff* v. *Blanchard Nav. Co.* (1887) 66 Mich. 638, 11 Am. St. Rep. 541, 33 N. W. 744.

Failure of a railroad company to ballast, storage or switch tracks is not negligence as respects a brakeman injured by having his foot caught between ties on such tracks, while attempting to make a coupling, since railroad tracks are not ballasted for the purpose of making them safe for brakemen to walk upon, but to make them firm and safe for the passage of trains. *Finnell* v. *Delaware, L. & W. R. Co.* (1892) 129 N. Y. 669, 29 N. E. 825.

The blocking of guard rails being intended only to prevent feet from being caught, the failure to block a guard rail will not render a railway company liable to a switchman who is thrown from a car and has his arm caught and crushed between the rail and the guard rail. *Rutledge* v. *Missouri P. R. Co.* (1892) 110 Mo. 312, 19 S. W. 38.

A rule of a railroad company that wild trains must run cautiously around curves and over grade crossings, lookout for trackmen, will be regarded as having been made with reference to the safety of the train, and not the trackmen, where there is evidence that trackmen had no other means of protection against wild trains except to take care of themselves. *Sullivan* v. *Fitchburg R. Co.* (1894) 161 Mass. 125, 36 N. E. 751.

A railroad company is not liable for the death of an employee by the throwing of cars through defects in its track while he was walking along the track on his way from his employment. *O'Donnell* v. *Duluth, S. S. & A. R. Co.* (1891) 89 Mich. 174, 50 N. W. 801.

A master is liable for injuries to a servant in the exercise of due care, from the negligent and improper performance of a duty which he voluntarily assumes, although he owed no obligation to the servant in respect thereto in the first instance. *Consolidated Coal Co.* v. *Scheiber* (1897) 167 Ill. 539, 47 N. E. 1052, Affirming (1896) 65 Ill. App. 30.

A mere error of judgment on the part of the master or of an employee for whose acts he is responsible will not create any actionable liability. *Moul* v. *Delaware & H. Canal Co.* (1891) 14 Pa. 532, 21 Atl. 733.

Still less can he be called to account for an occurrence which comes under the description of accident or casualty. *Unger* v. *Atlantic, M. & O. R. Co.* (1882) 4 Hughes, 192, 88 Fed. 773, (part of bridge got out of plumb and fell); *Hoosier* v. *Illinois C. R. Co.* (1854) 15 Ill. 550 (principle recognized in discussion of sufficiency of complaint); *Curtis* v. *Chicago & N. W. R. Co.* (1897) 95 Wis. 460, 70 N. W. 665 (switchman slipped or stumbled against the arm of a guard rail while coupling cars); *Johnson* v. *Galveston, H. & S. A. R. Co.* (1895) (Tex. Civ. App.) 30 S. W. 95 (employee fell off an engine as the result of his mistake of judgment as to the amount of force required to lift a drawbar); *Armour* v. *Ryan* (1895) 61 Ill. App. 315 (servant injured by striking his

In the present chapter it is proposed to discuss, so far as seems desirable for the purposes of this treatise, the second prerequisite to the maintenance of the action, that is to say, the establishment of the proposition that the negligence proved was the legal cause of the injury received. Not a few of the cases in which masters have been sued by their servants, and in which this point has been considered, are, in a real and essential sense, illustrative of the scope of some of the characteristic doctrines of the law of employers' liability. Other cases of this type do not, in anywise, involve those doctrines. In a strictly logical point of view, perhaps only the former class of decisions should be here discussed. But the decisions in the latter class are so useful from the practitioner's point of view that they cannot well be passed over.

finger against a hook, while attempting to hang meat upon another hook): *Buckley* v. *Gutta Percha & Rubber Mfg. Co.* (1889) 113 N. Y. 540, 21 N. E. 717 (master not liable for an injury to a boy twelve years old, whose hand was crushed in cogwheels, not because he did not know the cogs were dangerous, but because he slipped and fell by a mere accident, and instinctively threw out his hand to recover himself).

Either contributory negligence or pure accident is the legal cause of injuries sustained by a railway employee owing to the fall of a crowbar, which caught his foot and threw him upon the rails in front of a moving hand car, where it was his duty to properly place the implement on the car. *Freyermuth* v. *South Bound R. Co.* (1899) 107 Ga. 31, 32 S. E. 668.

A shipowner is not liable to a longshoreman precipitated into the water while wheeling freight on board a steamship along a platform shown to be in good order, where the injury was occasioned either by a swell from some passing vessel, or the omission of the workmen to change the fastenings as the tide fell. *Hudson* v. *Ocean S. S. Co* (1888) 110 N. Y. 625, 17 N. E. 312.

Prima facie a master is not liable for injuries caused to a servant by the unauthorized acts of strangers. *Bennett* v. *Long Island R. Co.* (1897) 21 App. Div. 25, 47 N. Y. Supp. 258 (stranger opened switch); *Reilly* v. *Parker* (1895) 11 Misc. 68, 31 N. Y. Supp. 1011 (persons not under master's control carried a heavy beam across a temporary structure and so caused it to fall on plaintiff); *Barnes* v. *Kansas City, Ft. S. & M. R. Co.* (1895) 129 Mo. 41, 31 S. W. 347 (obstruction placed on walk by contractor's servants); *Gulf, C. & S. F. R. Co.* v. *Wittig* (1896; Tex. Civ. App.) 35 S. W. 857 (unauthorized removal, by someone unknown, of a flag placed to guard a car on which repairers were at work); *Dalton* v. *Atlantic, M. & O. R. Co.* (1882) 4 Hughes, 180, Fed. Cas. No. 3,550 (brakeman swept off car by wire stretched across track by persons not under the defendant's control); *Wire* v. *East Louisiana R. Co.* (1901) 12 La. Ann. 385, 7 So. 473 (train derailed by plank laid across track by unknown person).

In *Godbois* v. *Chicago, M. & St. P. R. Co.* (1888) 75 Iowa, 530, 39 N. W. 871, an action for injuries received by a car repairer as a result of a collision of moving cars with the one on which he was at work, the court, while not denying the correctness of the general rule laid down in the above cases, held that the material question was whether the cars were moved in a proper manner and at a proper time, and as the fact that the cars were started in response to a signal given by a person not in the employ of the company had no legitimate bearing upon that question, it was error to instruct the jury that they might consider evidence showing that such a signal was given, as explanatory of the manner in which the cars were moved.

Where the proximate cause of the death of a car repairer was the unauthorized removal by some unknown person of a red flag used as a signal of danger, the question whether a flag of that color was a sufficient warning, or whether a flag of some other color would have been more suitable, are immaterial.

A. General principles.

803. Necessity of proving that the negligence alleged was the cau of the injury.— The servant must, in the first place, prove that h injury was caused by the alleged negligence.[1] There can be no re

Abel v. *Delaware & H. Canal Co.* (1890) 31 N. Y. S. R. 356, 10 N. Y. Supp. 154 (after the retrial ordered in 1886) 103 N. Y. 581, 57 Am. Rep. 773, 9 N. E. 325.

The rule exemplified in the cases just cited is, of course, subject to exception in cases where the master had notice, actual or constructive, of the dangerous conditions for which he was not originally responsible. See § 129, *antc.*

[1] "It is necessary for the plaintiff to establish, by evidence, circumstances from which it may fairly be inferred that there is a reasonable probability that the accident resulted from the want of some precaution which the defendants might and ought to have resorted to." Willes, J., in *Daniel* v. *Metropolitan R. Co.* (1868) L. R. 3 C. P. 216, 223, 591, 37 L. J. C. P. 280.

A master cannot be held liable for an injury to a servant, due to the combination and co-operation of a number of causes for no one of which he is liable. *Creswell* v. *Wilmington & N. R. Co.* (1899) 2 Penn. (Del.) 210, 43 Atl. 629, where the wrong was caused partly by the negligence of a fellow servant, and partly by conditions the risks of which the plaintiff understood.

A servant who shows that his injury was caused by the defective condition of a certain appliance is not bound to show specifically by what particular defect it was caused. *Mangum* v. *Bullion, B. & C. Min. Co.* (1897) 15 Utah, 534, 50 Pac. 834; *Norton Bros.* v. *Szepurak* (1897) 70 Ill. App. 686.

Allegations that a master was negligent in failing to cover and keep in repair a machine by which a servant's injuries were inflicted are insufficient to justify recovery, where there is no averment or showing that the injuries were caused by such negligence. *Lafayette Carpet Co.* v. *Stafford* (1900) 25 Ind. App. 187, 57 N. E. 944.

A petition in an action to recover for an injury resulting from the master's negligence in employing an incompetent servant is fatally defective, where it does not allege that such servant was careless or unskilful at the time of the accident, and that the carelessness or unskilfulness caused the injury co plained of. *Kersey* v. *Kansas City J. & C. B. R. Co.* (1883) 79 Mo. 362.

A charge embodying the principle the text is proper. *Wright* v. *New York C. R. Co.* (1858) 28 Barb. 80 firmed in (1862) 25 N. Y. 562.

It is error to give an instruct which permits the jury to infer that defendant was liable if it was guilt any negligence whatsoever, even tho the accident would have occurred wi out such negligence. *Hall* v. *Cop town & S. Valley R. Co.* (1888) 9 H 373, 3 N. Y. Supp. 584.

It is error to charge in effect t where an uninstructed, inexperie employee is set to work at a dang machine which he does not unders and uses ordinary care, a recovery follow. *Craven* v. *Smith* (1894 Wis. 119, 61 N. W. 317.

An instruction to the effect that master might be held liable simply on proof that he did not use ordin care is erroneous. *Guinard* v. *K Stout & Co. Co.* (1895) 90 Wis. 42 N. W. 625.

It is proper to refuse a charge to effect that the mere fact that an ployer engaged an unlicensed engi to manage a steam boiler, in viol of law, will render him liable to other employee injured by the explo of the boiler. *Birmingham* v. *P* (1892) 21 D. C. 209.

Where defendant's section foreman clared that the car by which plain was injured was unfit for use, and previous to the accident he had repe ed the road master to furnish anot an instruction which submitted the sue to the jury whether or not the left the track because of its defe condition was not objectionable as supported by the evidence. *Combs* v. *Omaha, K. C. & E. R. Co.* (1899 Mo. App. 175.

It is error to give an instru which contravenes the principle that master's failure to report an appli which he knew, or should have kn to be defective, and to notify the ant of its condition, is not actio negligence, unless it was the proxi

ery where the evidence, so far as any certain deductions can be drawn from it, tends to prove that the accident was not caused by the defect complained of.[2] The nonexistence of a legal connection between the negligence and the injury is predicable whenever, for aught that appears, the accident might have happened even if the defects in question had not existed, or if the precautions which were omitted had been taken.[3] The master cannot be held liable if his negligence was merely a condition, as opposed to the efficient cause of the injury.[4]

ause of the injury complained of. *Boelter* v. *Ross Lumber Co.* (1899) 103 Wis. 324, 79 N. W. 243.

An instruction that, if an employee violated a rule of his master, of which he had knowledge, and such violation caused the injury, and it was not contributed to by the negligence of the defendant in regard to certain appliances, then the employee could not recover, was erroneous, as not allowing him to recover, though the injury may have been contributed to by other negligence of defendant. *Texas & P. R. Co.* v. *Waupin* (1901) 26 Tex. Civ. App. 385, 63 S. W. 346.

An instruction in an action for the death of a railroad employee that if specified acts of the conductor in charge of the train constituted negligence the jury should find the company liable unless the deceased contributed to the injury by his own negligence, without requiring the negligence of the conductor to have occasioned the injury, is reversible error. *Gulf, C. & S. F. R. Co.* v. *Wilhelm* (1897) Tex. Civ. App. 39 S. W. 967.

In *Fordyce* v. *Yarborough* (1892) 1 Tex. Civ. App. 260, 21 S. W. 121, a charge was disapproved which failed to indicate that the liability of a railway company for its negligent omission to inform its servants of extra hazards to arise from the use of a car of an unusual and more than ordinarily dangerous construction depended on whether the injury was caused by that omission.

It is error to instruct the jury that they should find for the plaintiff if he was not provided with proper implements, and did not understand the danger of working with the implements furnished. *Hillsboro Oil Co.* v. *White* (1897) Tex. Civ. App. 41 S. W. 871.

Where two causes of an injury are assigned, it is error to give an instruction from which the jury may infer that the defendant is not liable, if it is proved that the plaintiff had full knowledge of the conditions which constituted one of those causes. *Galveston, H. & S. A. R. Co.* v. *Cowsill* (1901) 26 Tex. Civ. App. 160, 25 S. W. 486.

A special verdict which fails to show that the injury was caused by some act or omission in respect to which negligence was imputable to the defendant will not support a judgment for the plaintiff. *Phillips* v. *Rosona Oolitic Stone Co.* (1898) 19 Ind. App. 344, 49 N. E. 467.

Colvill v. *Hilton* (1887) 106 N. Y. 512, 13 N. E. 339.

[2] "The question is, Was it *causa sine qua non*, a cause which, had it not existed, the injury would not have taken place?" *Hawes* v. *Michigan C. R. Co.* (1884) 111 U. S. 228, 241, 28 L. ed. 410, 415, 4 Sup. Ct. Rep. 369.

A servant who seeks to recover on the ground that his injury was due to the careless driving of his master must show that the accident would not have happened but for some incident directly traceable to that cause. *Moffatt* v. *Bateman* (1869) L. R. 3 P. C. 115, 22 L. T. N. S. 140, 6 Moore P. C. C. N. S. 369.

[3] "The violation of a borough ordinance regulating the speed of electric cars is not the legal cause of an injury to a motorman, immediately caused by a tree falling upon the car as it passed under it, although but for such violation, the car would have been at another point." *Berry* v. *Sharp Mt. Notch* (1899) 191 Pa. 345, 43 Atl. 240. The court said: "That his head brought him to the place of the accident, was the merest chance, and a thing which no foresight could have predicted. The same thing might as readily have happened to a car running slowly, or it might have been that a high speed alone would have carried him beyond the tree to a place of safety."

In *Hope* v. *Tall River Coal Co.* (1896) 3 App. Div. 70, 38 N. Y. Supp. 1040,

In the note below are collected a number of cases showing the manner in which these general principles have been applied, either to the advantage, or to the disadvantage, of the servant. For other cases see the following sections.[5]

804— and also the proximate cause of the injury.— The servant's

the plaintiff's contention was that the track where he was coupling cars was rendered dangerous "upon the instant" by an unusually thick cloud of steam from a defective valve, and that this vapor from the defective valve was of such density, irrespective of the vapor from the relief valve, as to greatly impair his vision, and the jury, accepting this explanation, had then drawn the conclusion that the vapor was the immediate or proximate cause of the plaintiff getting his hand between the buffers. The court, however, said: "This vapor was not the cause of the accident, but was a condition under which it occurred, and that condition was wholly unexpected and not likely to be foreseen;" also that "the discharge of steam is a usual or necessary concomitant of the use of the engine; and a switchman must be expected to be enveloped in more or less steam, irrespective of any defect in the valves."

In a case where a railway servant, after unsuccessfully attempting to uncouple two cars by means of a lever which was out of order, tried to draw the coupling pin with his hand, and while walking between the moving cars caught his foot between the rail and an unblocked guard rail, an instruction submitting to the jury the question whether the defendant was negligent in leaving the space open and unblocked, and of such a width that an employee's foot might be caught and held by it long enough to sustain injury from a train in motion, was held not to be objectionable as omitting to mention defendant's negligence with regard to the lever. Under the circumstances that negligence was merely incidental to, and not the proximate cause of, the injury. *Trott* v. *Chicago, R. I. & P. R. Co.* (1901) 115 Iowa, 80, 86 N. W. 33.

Many other cases illustrating this phase of the subject are cited in the next note.

[5](a) *Breach of statutes and ordinances.*—On the ground that there was no evidence to connect the injury with the defendant's disregard of a statutory duty the action has been held not maintainable in cases where the statute violated was one which prohibited the employment of children under a certain age. *Kutcher* v. *Goodwillie* (1895) 93 W. 448, 67 N. W. 729; *White* v. *Witbeck Lithographic Co.* (1890) 58 Hun, 38, 12 N. Y. Supp. 188; *Evans* v. *American Tube & Tube Co.* (1890) 42 Fed. 5[illegible]; *Belles* v. *Jackson* (1892) 4 Pa. Dist. [illegible] 194. And in a case where the plaintiff relied on the Pennsylvania act of 1[illegible] (Pub. Laws, 217, §§ 15, 17), rendering mining companies liable for employing a mining boss who had no certificate of competency. *Chrastener* v. *Peabody & E. L. Coal Co.* (1892) 146 Pa. 67, 23 Atl. 221. And in a case where machinery was not fenced, in compliance with the provisions of a factory act, [illegible] v. *Burgess* (1897) 27 Can. S. C. 56[illegible] And in a case where a guard rail [illegible] not been blocked and filled, as required by statute. *Utley* v. *Wabash R. R.* (1889) 41 Fed. 193.

An employer is not rendered liable [illegible] injuries to an employee under sixteen from a properly guarded buzz saw, by failure to observe the New York statute (Laws 1886, chap. 409), requiring notice of the hours of labor required from employees under sixteen to be posted, with a list of such children, and affidavits as to their ages and dates of birth to be kept, and prohibiting the employment of children unable to read or write. *Stephen* v. *Stevens* (1894) [illegible] N. Y. S. R. 850, 21 N. Y. Supp. 721.

The failure of a contractor to comply with N. Y. Laws 1897, chap. 415, § 20, requiring contractors in constructing a building, the plans and specifications of which require the floors to be arched between the beams, to [illegible] the flooring as the building progresses, is not such negligence as will render him liable for an injury to an employee by a falling scaffold, where the open floors did not contribute to the injury. *Stewart* v. *Ferguson* (1898) 34 App. Div. 515, 54 N. Y. Supp. 615.

A recovery cannot be had for the death of plaintiff's intestate killed in a mine by the fall of a cloud of dirt on the ground that the defendant mine owner failed to examine the mine as required by Ill. Rev. Stat. chap. 93, § 14 before

must, in the second place, prove that the alleged breach of duty was the proximate cause of the injury. As will be seen by consulting the

the men began work, when a subsequent examination was made in good faith, prior to the accident, and its cause not discovered. *Missouri & I. Coal Co.* v. *Schwalb* (1898) 77 Ill. App. 593.

Under the act of July 1, 1872, providing for liability for wilful failure to provide two outlets to mines where more than fifteen miners are employed, the company is liable where the second shaft is not provided, and at an alarm of fire a miner fell down a shaft, in the effort to escape, for fear his outlet would be cut off, although if he had remained at his post there would have been no danger. *Wesley City Coal Co.* v. *Healer* (1876) 84 Ill. 126.

Evidence that at the place where gas exploded the miners had worked some two or three hours, with an open lamp, before the accident occurred, shows that the failure to examine the place with a safety lamp in the morning, as required by statute, in no manner contributed to the accident. *Coal Run Coal Co.* v. *Jones* (1886) 127 Ill. 379, 8 N. E. 865, 20 N. E. 89.

A requested instruction which in effect holds, as matter of law, that there was no causal connection between the accident to plaintiff and the omission of the defendant to provide automatic doors at an elevator well, as required by N. Y. Laws 1887, chap. 462, § 8, is properly refused where there is a theory having some support in the evidence, which embraces such a causal connection. *Simmons* v. *Peters* (1897) 20 App. Div. 251, 46 N. Y. Supp. 800.

Evidence that an employee was found dead near ungnarded wheels driven with great rapidity is sufficient to go to the jury on the question of the negligence of the employer in failing to guard the wheels, in accordance with the statute, although there is evidence that such employee had previously crossed the trench in which the wheels were situated on planks placed over it, had been cautioned not to do so, and that the planks were there at the time of the accident. *Kerrin* v. *Canadian Coloured Cotton Mills Co.* (1896) 28 Ont. Rep. 73. Affirmed in (1898) 25 Ont. App. Rep. 36.

See also note 4, *supra*.

(b) *Defective condition or arrangement of inorganic instrumentalities.*— The want of a "telltale" to warn train hands of the proximity of a low overhead bridge is not the cause of an injury received by a brakeman who is struck by the bridge, after climbing on to the car at a place which would have been between the bridge and the "telltale," if there had been a telltale. *Allen* v. *Boston & M. R. Co.* (1898) 69 N. H. 271, 39 Atl. 978.

The fact that a switch engine leaked steam so badly as to prevent the engineer from seeing a signal to stop made by a switchman, who had caught his foot in a frog, and who was run over and injured, cannot be found to be the proximate cause of the injury, if it appears that the cars were so close to the man when the signal was given that they could not have been stopped in time to prevent it, even if the signal had been seen and obeyed. *Hunt* v. *Kane* (1900) 40 C. C. A. 372, 100 Fed. 256.

A brakeman injured by reason of his foot becoming caught in a frog, while moving along with the train, attempting to couple cars, cannot recover on the ground that the drawheads of the cars were not perfectly matched and did not couple readily, since that was not the proximate cause of the injury. *Williams* v. *Central R. Co.* (1876) 43 Iowa, 396.

The different heights of couplings is not the cause of the crushing of plaintiff's hand, where it would have been crushed, even if the couplings had been exactly opposite each other. *Krause* v. *Chicago, M. & St. P. R. Co.* (1892) 82 Wis. 588, 52 N. W. 755.

The failure of a railroad company to furnish an employee with a coupling stick does not make it liable to him for injuries in attempting to draw a pin from a coupling, for which purpose the stick could not have been used. *Welch* v. *New York C. & H. R. R. Co.* (1892) 43 N. Y. S. R. 958, 17 N. Y. Supp. 312.

That the drawheads of two cars which a brakeman is trying to couple do not meet on the same level does not render the company liable for an injury to the brakeman caused by the drawheads striking against each other, and not by their passing one over the other. *Ekhall* v. *New England R. Co.* (1897) 18 App. Div. 216, 45 N. Y. Supp. 959.

In an action to recover for the death of a fireman, caused by the tender's leaving the track at a certain place, but not through the spreading of the rails, it is immaterial whether the rails were

treatises which deal with the law of negligence as a whole, the authorities are very far from being harmonious either with regard to the

properly spiked at other places, or at that place, since the object of spiking is to prevent the ties from spreading. *Kuhns* v. *Wisconsin, I. & N. R. Co.* (1887) 70 Iowa, 562, 31 N. W. 868.

The fact that a red lantern to be used in signaling trains in case of danger was not furnished a section hand who was sent to watch a cut and was run over by a train is immaterial in an action brought against the railroad company for his death, where the evidence does not show that any occasion existed for the use of a red light, or that the injury was received while the deceased was endeavoring to signal the train. *Wallbaum* v. *Newport News & Miss. Valley R. Co.* (1892) 14 Ky. L. Rep. 759, 20 S. W. 783.

Where a brakeman's clothes caught on a switch handle and threw him under a car, as he was attempting to board the caboose after having thrown a switch, but the switch, as constructed, had been used five years without previous accident, the natural inference from all the proofs was that the accident was the result of a misstep, and not liable to occur again. *Bates* v. *Georgia P. R. Co.* (1892) 96 Ala. 325, 11 So. 68.

Failure to provide a sufficient platform for plaintiff to stand on would not impute negligence to defendant, where the evidence failed to show that the width of the platform aided in producing the injury. *Yarraghath* v. *Stephens* (1899) 104 Wis. 343, 80 N. W. 443.

The failure to provide a safety valve and steam gauge is not the cause of an explosion, where there is no evidence to show that, under the circumstances, these appliances would have prevented the accident. *Green* v. *Lawrence Cement Co.* (1901) 57 App. Div. 264, 68 N. Y. Supp. 7.

The failure of an employer to furnish additional live rollers upon the bench of a slab saw, as promised, does not render him liable for an injury sustained by a workman, who, while trying to dislodge with a hook a slab too short to go over the rollers, slipped back into the saw slit when the hook gave way. *Olson* v. *Doherty Lumber Co.* (1899) 102 Wis. 264, 78 N. W. 572. The court said that the additional rollers would have moved timbers further down the roller bench, but would not have obviated the danger of a blockade's being formed, as the one in question was formed.

The failure of the master to supply an apparatus for stopping a machine, in order to prevent his servants being from being drawn between moving parts, will not render him liable to an injury received in this way, where sufficient time elapsed in the consummation of the injury is so short that it was apparatus had been supplied would have been no opportunity to use it. *Gordon* v. *Reynolds' Card Mfg. Co.* (1888) 47 Hun, 278.

A verdict in favor of a workman whose hand was caught in a running belt on which he was applying pressure with an iron rod is not sufficient the theory that the belt was loose and he was required to expose himself to danger where his act was not necessary to the operation of the machine, and the proximate cause of the injury was the striking of the rod from his hand by something on the surface of the pulley not its looseness. *Phillips* v. *Eureka Oolitic Stone Co.* (1898) 19 Ind. App. 341, 49 N. E. 467.

The fact that a ladder had cleats or grappling-irons on the top or spikes on the bottom will not make an employer liable for injury to an employee by the slipping of the ladder and its catching into a pulley and throwing him upon a belt, from which he struck upon the knives of a machine, while he was engaged in shifting to place a belt upon a pulley, and the work required such a strain upon the ladder as to cause it to move. *Lonergan* v. *Burlington Wire Mattress Co.* (1889) 79 Iowa, 415, 44 N. W. 693. The court said: "It does not appear that the structure of the ladder caused plaintiff to fall, but, rather, that the work he was doing required such a strain upon the ladder as to cause it to move, which threw defendant upon a belt. The fact that the accident resulted while plaintiff was using the ladder, and the nature of its structure, do not authorize the conclusion that it was negligence in defendant to furnish the ladder for plaintiff's use. There is no ground for the conclusion that, if the ladder had been differently constructed, the accident would not have happened."

In *Killman* v. *Robert Poland & Son Shipbuilding & M. R. Co.* (1900) 12

precise meaning of the phrase "proximate cause," or as to the circumstances under which this phrase is a correct description of the

A. 281, 102 Fed. 224, recovery was denied on the ground that the only defect in an eye bolt of which the master had notice had no causal relation to the injury.

In *The Harry Buschman* (1888) 33 Fed. 558, the slackness of the rudder ropes was held not to have been the cause of a seaman's being thrown over the wheel when a heavy sea struck the rudder.

See also *Western & A. R. Co.* v. *Essinger* (1895) 95 Ga. 734, 22 S. E. 580 (defects in plank crossing immaterial, since the employee did not lose his footing at the place where it was defective); *Wabash R. Co.* v. *Brown* (1878) 2 Ill. App. 516 (trainman injured by derailment of train which collided with cattle on the track, held unable to maintain an action on the ground that the fence was defective, unless it should be proved that the cattle came through the fence at the place where it was defective); *Limoski* v. *Susquehanna Coal Co.* (1893) 157 Pa. 153, 27 Atl. 576 (injury caused by caving in of the roof of a mine, through accumulated water, not actionable, when it is not shown that such water came from the accumulation of culm on the surface of the ground, or that the culm added was in any way the cause of the injury); *McClarnon* v. *Chicago, M. & St. P. R. Co.* (1891) 80 Wis. 277, 49 N. W. 963 (derailment of car not shown to have been caused by accumulation of ice and snow between the tracks).

In an action for personal injuries received by the plaintiff while at work upon a mule spinning machine alleged to be defective for want of a catch to hold the belt shipper there was evidence that at the time of the accident the machine was in charge of a machinist sent by a machine company to repair it, and the plaintiff was detailed to assist him; that in so doing the plaintiff stood between the roller beam and the carriage, which was drawn out and at rest; that the belt was still on the drawing-out pulley, and the spindles were revolving; that the machinist had occasion to stop the spindles, and took hold of the shipper to throw the belt on the loose pulley, but his hand was greasy and the shipper slipped from it and carried the belt beyond the loose pulley onto the drawing-in pulley; that thereupon the carriage was drawn in and the plaintiff injured; and that a catch previously provided to hold the shipper after the belt was thrown had disappeared. Held that the absence of the catch did not contribute in any way to cause the accident, and that the plaintiff was not entitled to go to the jury. The court said: "Swain lifted the shipper to stop the machine; it slipped from his hand, which was greasy, and threw the belt on to the drawing-in pulley, and caused the injury to the plaintiff. If there had been a catch,—and the absence of one is the only defect suggested,—it is impossible to see what good it would have done. It would not have rendered it unnecessary for Swain to take hold of the shipper, or have prevented the shipper from slipping out of his hand, and it was that which caused the accident." *Sullivan* v. *Hoosatta Mills* (1892) 155 Mass. 200, 29 N. E. 516.

A railway company which permits the brakes upon a freight car to be and remain out of order is liable for the death of a brakeman who, while applying the brakes in an effort to stop the train, was struck by an overhead bridge to which his back was turned, when if the brakes had been in good order the train would have been stopped before the bridge was reached. *Beard* v. *Chesapeake & O. R. Co.* (1893) 90 Va. 351, 18 S. E. 559.

Where a brakeman catches his foot in a tie, and an engine, defective in that it could not be quickly stopped, runs over his foot, a jury is justified in finding that the defect in the engine was the cause of the injury. *Bayes* v. *Syracuse, B. & N. Y. R. Co.* (1884) 31 Hun, 153.

A railway company is liable for injuries to a brakeman whose foot was caught, while he was uncoupling cars, by a brake-beam which hung only 3 inches from the rails when it should have hung at least 6 inches therefrom, where the accident would not have occurred if it had hung at the usual height. *Texas P. R. Co.* v. *White* (1891) 82 Tex. 513, 18 S. W. 178.

Where a servant is injured by the automatic starting of a machine, evidence that the injury could only have been caused by the shifting of a belt from the loose to the fixed pulley warrants a finding that a proper adjustment of the

relation between a given culpable act and the wrong complained o
But in a treatise like the present it would be out of place to dis-cu

pulleys and belt would have prevented such a catastrophe. *Donohue* v. *Drown* (1891) 154 Mass. 21, 27 N. E. 675.

(c) *Incompetency of fellow servant.*—No recovery can be had on the ground of the incompetency of a negligent fellow servant, where there is no sufficient evidence to connect the injury with the incompetency. *Baltimore Elevator Co.* v. *Neal* (1886) 65 Md. 438, 5 Atl. 338; *Snodgrass* v. *Carnegie Steel Co.* (1896) 173 Pa. 228, 33 Atl. 1104; *Kersey* v. *Kansas City, St. J. & C. B. R. Co.* (1883) 79 Mo. 362; *Harvey* v. *New York C. & H. R. R. Co.* (1882) 88 N. Y. 481 (momentary inattention, not incompetency, held to be cause of injury).

To enable a brakeman to recover for injuries on the ground that an incompetent fireman was temporarily left by the engineer in charge of the engine, it must be established that the fireman was so inexperienced as not to be fit for the position, that he mismanaged the engine, and that the mismanagement caused the injury. *Core* v. *Ohio River R. Co.* (1893) 38 W. Va. 456, 18 S. E. 596.

Where a collision in which a locomotive fireman is injured results from the failure of the engineer to see a signal, and not from the failure of a servant known by the company to be incompetent to give the proper signal, the company is not liable therefor. *Baird* v. *New York C. & H. R. R. Co.* (1901) 64 App. Div. 14, 71 N. Y. Supp. 734.

The incompetency of a fireman, as regards understanding and transmission of signals by a brakeman, while coupling, cannot be found to be the cause of the latter's being injured, where the uncontradicted evidence of the engineer is that no instructions were communicated to him. *Catlin* v. *Michigan C. R. Co.* (1887) 66 Mich. 358, 33 N. W. 515.

Where the evidence shows that the management of those parts of a hoisting apparatus from the operation of which the injury resulted were entirely under the control of the plaintiff himself, it is immaterial whether the coservant who was running the engine was competent or not. *Aiken* v. *Smith* (1892) 4 C. C. A. 654, 2 U. S. App. 618, 54 Fed. 896.

A railroad fireman cannot recover from the company for injuries received from a collision occurring because the engineer of the engine upon which he was employed placed it upon a switch too near the main track, on the ground that such engineer's vision was defective, where, within 350 feet, his vision was good. *Engelhardt* v. *Delaware, L. & W. R. Co.* (1894) 78 Hun, 588, 29 N. Y. Supp. 425.

A recovery cannot be had on the ground of the incompetency of the negligent coservant, if, notwithstanding the latter's lack of proper qualifications, he performed the operation in question carefully and prudently, and as skilfully as a competent employee of ordinary care and prudence would have performed it under the circumstances. *Galveston, H. & S. A. R. Co.* v. *Parr* (1897; Tex. Civ. App.) 40 S. W. 19; *Gulf, C. & S. F. R. Co.* v. *Schrab* (1892) 1 Tex. Civ. App. 573, 21 S. W. 706.

An employee may not recover of his employer for injuries received during his employment by reason of the negligence of a fellow servant, although it is shown that the employee was in the habit of becoming intoxicated, when it is not clearly shown that the employee was negligent, or that his intoxication had anything to do with the injury. *Welsh* v. *Pennsylvania R. Co.* (1899) 192 Pa. 69, 43 Atl. 402.

No action can be maintained on the theory that an intemperate employee was hired or retained in the employment, where he was neither intoxicated nor performing his duties negligently at the time of the accident. *East St. Louis Connecting R. Co.* v. *Shannon* (1893) 52 Ill. App. 420; *Cosgrove* v. *Pitman* (1894) 103 Cal. 268, 37 P. 232.

In *Engelhardt* v. *Delaware, L. & W. R. Co.* (1894) 78 Hun, 588, 29 N. Y. Supp. 425, recovery was denied on the ground that an engineer had not drank on the day of the accident, and that his drinking habit had not rendered him physically or mentally incompetent to discharge his duties when sober.

Evidence as to the intoxication of the foreman of a mine is inadmissible to show negligence on the part of the employer, where the intoxication is in no way connected with the accident complained of, even though such foreman's unfitness and incompetency are alleged in the complaint. *Miller* v. *Bullock Beck & C. Min. Co.* (1898) 18 Utah, 358, 55 Pac. 58.

A railroad company is not liable

this subject at length, and we shall merely collect in a note the decisions which have been rendered for or against the servant, with

injuries to a fireman caused by the rear portion of a train coming down upon and wrecking the forward portion, on the ground that the conductor of such train was a man of intemperate habits, where the conductor had no knowledge that the rear part of the train had been detached by the orders of the engineer, given without his direction and consent. His want of such knowledge was not negligence. *Campbell* v. *Wing* (1893) 5 Tex. Civ. App. 431, 24 S. W. 360.

The rule that, where the incompetency alleged is the excessive use of strong liquors, the plaintiff cannot recover unless he shows that the injury was caused by the intemperate habits of the negligent servant, is also recognized in *Pabst* v. *Delamater* (1885) 100 N. Y. 266, 3 N. E. 184 (fireman injured by act of conductor); *Crew* v. *St. Louis, K. & N. W. R. Co.* (1884) 20 Fed. 87; *Barrington* v. *New York C. & H. R. R. Co.* (1888) 19 N. Y. S. R. 20, 4 N. Y. Supp. 640; *Bonner* v. *Whitcomb* (1891) 80 Tex. 178, 15 S. W. 899.

In *Johnston* v. *Pittsburgh & W. R. Co.* (1886) 114 Pa. 443, 7 Atl. 184, where a brakeman was injured through the negligence of the conductor and engineer, and it was asserted that the conductor was sick and unfit to take out the train, and the engineer had been on continuous duty so that he was unfit for duty, liability was denied on the ground that it was not shown that the injury was due to their condition.

A railway company is not liable for an accident caused by a weakly servant's stepping into an open space between the ties of a bridge, and thus throwing the whole weight of a guard rail upon the injured person. Bodily strength would not have prevented such an accident. *Bonet* v. *Galveston, H. & S. A. R. Co.* (1895) 89 Tex. 72, 33 S. W. 334. This conclusion, however, would be justifiable only on the hypothesis that the excessive weight did not tend to make the servant more unsteady on his legs. The liability of the company, therefore, ought apparently to have been treated as a question for the jury.

The incompetency of an engineer may be found to be the cause of an injury caused by the excessive oscillation of his train, if the evidence shows that, at the time of the accident, it was running down grade at an undue speed. *Illinois C. R. Co.* v. *Jewell* (1867) 46 Ill. 99, 92 Am. Dec. 240. In *Coppins* v. *New York C. & H. R. R. Co.* (1890) 122 N. Y. 557, 19 Am. St. Rep. 523, 25 N. E. 915, it was urged that the neglect of the incompetent servant was not a proximate cause of the accident, the argument being that, inasmuch as the servant had left the switch open, but believed that he had closed and locked it, so that trains could pass west on the main track, it did not follow that, if he had remained in the yard, he would have again examined the track,—especially as it was in evidence that on some occasions he failed to signal the train which was derailed, because he was engaged elsewhere in the yard. The court, however, said: "We are of the opinion, however, that the jury were warranted in assuming that had Schram [the delinquent servant] remained in the yard, he would have complied with the rule and performed his duties in reference to signaling the train. . . . If he had remained in the yard his duty would have been to have examined the switches again before the passenger train arrived, and before his signal was displayed, to see that they were properly set. The presumption that he would have done so must prevail. Here was an accident caused by the failure of a servant to perform a particular duty, because of his absence from his post. We cannot assume that had he been at the yard, he would have neglected that which he was there to perform."

(d) *Insufficient number of servants.*—Failure of a railroad company to observe a custom to have a brakeman stationed on the rear of a train which is being backed, for the protection of employees on the track and to warn them of danger, does not render it liable for the death of an employee killed on the track, where the smoke was so dense at the time that such employee could not have been seen by a brakeman if one had been on the train. *Moore* v. *Great Northern R. Co.* (1897) 67 Minn. 394, 69 N. W. 1103.

A master is not liable to a servant injured upon an elevator for want of an employee to give signals to start, where the servant himself gave the signal to start, and the injury did not arise from the starting. *Riordan* v. *Ocean S. S.*

special reference to the question whether proximity, in the legal se of the word, was predicable in respect to the cause to which the a

Co. (1891) 124 N. Y. 655, 26 N. E. 1027.

No recovery can be had on the ground that an excessive number of duties were imposed upon the servant whose act was the immediate cause of the injury, where the evidence shows that the act or omission of the servant which caused the injury did not arise from any inability on his part to perform the work he was set to do, but was the result of inattention and carelessness. *Harvey* v. *New York C. & H. R. R. Co.* (1882) 88 N. Y. 481. There the delinquent servant had himself testified that he left the switch and went to the telegraph office, sat down on a box, and was sitting there engaged in a conversation with the operator when the train on which the deceased was a fireman passed him. "This," said the court, "proves that his failure to close the switch cannot be attributed to the fact that, at this instant of time, he was called to the discharge of some other and conflicting duty. Having sufficient time to properly adjust the switch, and knowing well how to operate it, he went away, leaving it open."

That a servant cannot recover unless the insufficient number of servants was the cause of his injury is also recognized in *Johnson* v. *Ashland Water Co.* (1888) 71 Wis. 553, 5 Am. St. Rep. 243, 37 N. W. 823.

(e) *Vicious animals.* — A plaintiff's injury cannot be attributed to any vicious habit or conduct of a mule, where it appears that he stopped the animal to release him from a coal car which was about to be allowed to drop down a grade by its own momentum, and before he had time to detach the stretcher the mule started, and the plaintiff was struck by, and thrown under, the car. The inference is that the animal started, not in order to run away, but because the car was still in motion, an occurrence which was likely to happen however gentle he might have been: or that, being in the habit of finding himself free within a certain time after stopping, he stepped forward in order to get out of the way of the car and allow it to drop down the grade. *Pittston Coal Co.* v. *McNulty* (1888) 120 Pa. 414, 14 Atl. 387.

(f) *Defective system.*—The failure of an employer to establish or enforce a regulation for the removal of scrap does not affect his liability for an injury to an employee at a time when scrap iron is shown to have been [illegible]ent. *Cunningham* v. *Bath Iron W[illegible]* (1899) 92 Me. 501, 43 Atl. 106.

Where a train running ahead of regular time comes into collision another, an employee injured by collision cannot recover damages on theory that the system of running tr was defective, unless the train's run ahead of its time is the direct cau the accident. *Relyea* v. *Kansas C Ft. S. & G. R. Co.* (1892) 112 Mo. 18 L. R. A. 817, 20 S. W. 480.

Failure of a railroad company to scribe a rule confining the giving of nals to some one person connected the making up or movement of a fre train will not render it liable to a br man injured by the starting of the t upon a signal given by another br man who supposed that the forem work of uncoupling cars had been c pleted, in the absence of anything show that the same mistake would have been made had the brakeman ing the signal been the only person thorized to signal. *Cole* v. *Rome, O. R. Co.* (1893) 72 Hun, 467, 25 N Supp. 276.

Where the locomotive of a fre train on a main track is unexpect set in motion and comes into colli with one standing on a side track c to the junction between the two tra thereby crushing to death the firema the latter who is engaged in oiling wheels, the want of a proper system signaling is not the efficient cause of accident, where it appears that the nal required by the rules of the comp was not, as a matter of fact, given, that the signal in obedience to w the locomotive was actually put in tion was misunderstood by the engi *Peaslee* v. *Fitchburg R. Co.* (1890) Mass. 155, 25 N. E. 71.

Where a special order of the comp prohibits the running of trains greater rate of speed than 20 miles hour at a given switch point, the c does not err in charging the jury follows: "If . . . [the engin was not running faster than 20 m per hour when he passed the switch, ought to find that he did not violate bulletin order mentioned, even tho

he ran faster than that a [illegible] further back on the track." [illegible] & A. R. Co. v. *Bussey* (1894) [illegible] 584, 23 N. E. 207.

Nor is it error in view of the existence of such an order, to refuse a request to charge that it was the duty of the engineer to "slacken" the speed of the train at such point,—the request leaving out of consideration the rate of speed at which the train in question was actually being run at such given point at the time the collision occurred which resulted in the injury complained of. *Ibid.*

Failure of an employer to make and promulgate rules for operating a machine does not render him liable for an accident to an employee from her hand being caught between revolving cylinders while cleaning the same, owing to the inherent danger of the work, and not to any action or failure to act on the part of her fellow servants, which proper rules might have prevented. *Delong* v. *Irving* (1896) 5 App. Div. 499, 38 N. Y. Supp. 1089.

A ship owner cannot be held liable on the theory that the master of the ship treated in an improper manner a seaman who was frost bitten, where there is no evidence to show that the treatment which it is declared that he should have adopted would have been effective. *Johnson* v. *Holmes* (1899) 173 Mass. 514, 53 N. E. 1000.

(g) *Failure to instruct or warn.*—Where an injury to a lamp trimmer of an electric light company was caused by the live wires of another company coming into contact with those which he had to handle, and not by the dampness of the latter, his employers cannot be held liable on the ground that they failed to instruct him as to the increased danger in working on pole lamps in wet weather. *Carr* v. *Manchester Electric Co.* (1900) 70 N. H. 308, 48 Atl. 286.

A minor servant cannot recover on the ground that he was not instructed as to the dangers of his employment, where the injury resulted from a mere accident, from which no amount of cautioning would have saved him. *Buckley* v. *Gutta Percha & Rubber Mfg. Co.* (1889) 113 N. Y. 540, 21 N. E. 717 (plaintiff slipped, and in making an instinctive movement to recover himself put his hand between revolving cog wheels).

The negligence of a master in putting a common laborer at work about a machine, without instructing him as to its operation, does not render him liable for an injury to the latter which does not result from his unskillfulness. *Arizona Lumber & Timber Co.* v. *Mooney* (1895; Ariz.) 42 Pac. 952.

The master is not at fault in failing to communicate a fact which is immaterial to the servant's safety, and which, if he had known it, would not have affected his action. *Henderson* v. *Williams* (1891) 66 N. H. 405, 23 Atl. 365, where the court held that a verdict for the plaintiff based on the theory that the defendant's superintendent was negligent in not informing him that an unexploded charge which he was ordered to drill out had a wet fuse could not be sustained, as there was no evidence going to show either that it was more dangerous to extract a charge which had failed to ignite on account of the wetness of the fuse than one which had failed to ignite owing to one of the several causes from which such an occurrence may result, or that the method of extracting the charge would have been at all different if the failure to explode had been due to some other cause than the wetness of the fuse.

A boy about fourteen years old, who was injured by coming into contact with uncovered cogwheels revolving alongside a narrow passage, through which his duties took him, is not entitled to have the jury charged as follows: "If no instruction was given the plaintiff as to the route in going to and from the machine at which he was injured, except 'to do as the other boy before him did,' and he did so and was injured, there was negligence on the defendant's part." It might have been that, though thus injured, he was injured by no negligence on the part of the defendant, but by negligence on his own part. *Sullivan* v. *India Mfg. Co.* (1873) 113 Mass. 396.

In all those cases in which the existence of a duty to instruct a servant is denied, on the ground that he appreciated the risk in question, it is possible to regard the evidence as being also indicative of the conclusion that, even if a breach of duty could be inferred, the want of instruction cannot be regarded as having contributed to an accident which, *ex hypothesi*, would not have been prevented by the giving of the instruction. The correlation of these points of view is noticeable in the course which the reasoning of the court takes in *Palmer* v. *Harrison* (1885) 57 Mich. 182, 23 N. W. 624, where it is in the first place declared that the danger was manifest, the inference drawn from this fact being that there was no negligence

dent was alleged to be due. Other decisions bearing upon this question are collected in the two succeeding subtitles of this chapter.[1]

on the defendant's part, and it is then observed, as an additional reason for denying recovery, that a warning would not have prevented the accident.

(g) *Negligence in regard to the details of the work.*—The improper action of a section foreman, in requiring a section man to hold a keg of beer while riding on a plank placed across a hand car, does not render the company liable for his death, where the accident was due to the fact that the plank was struck by the lever of a drawbridge which had been left in an upright position, the result being that the section man was thrown off the bridge. *Illinois C. R. Co.* v. *Bishop* (1899) 76 Miss. 758, 25 So. 867.

The speed of a train is immaterial upon the question of the liability of a railroad company to a switchman injured by its derailment, due to the presence of a horse upon the track, where the speed had nothing to do with causing the accident. *Bowes* v. *Hopkins* (1898) 28 C. C. A. 524, 56 U. S. App. 217, 84 Fed. 767.

Where defendant's tracks along the side of certain coke ovens were frequently covered by smoke, and plaintiff's intestate was killed while on a hand car, which proceeded along such track behind a train coming into such yard, and collided with a switch engine, which came onto the track after such incoming train had passed, the fact that on the side of the track on which the hand car was approaching there was a siding on which the switch engine might have been standing, and from which it might have gone onto the main track as soon as the incoming train passed, and gone immediately into the smoke, from which a collision would have resulted, will not warrant the direction of a verdict for the defendant, if it appears that the engine was not on the siding in question. *Woodward Iron Co.* v. *Herndon* (1901) 130 Ala. 364, 30 So. 370.

Where the complaint of a switchman alleges that his injury was due to the fact that two cars which he was coupling came together with excessive force, as a result of the failure of his foreman to repeat to the engineer the signal which he had given that the cars should approach slowly, and the evidence showed that the moving cars had been kicked on the track, the engine being detached, it was held to be error to refuse to charge that plaintiff could not recover, even though he gave the proper signal, which was negligently disregarded by the foreman, if the signal if it had been transmitted to the engineer, would not have prevented the accident. *Missouri, K. & T. R. Co.* v. *Baker* (1900; Tex. Civ. App.) 58 S. W. 964.

See also *Gould* v. *Chicago, B. & Q. R. Co.* (1885) 66 Iowa, 590, 24 N. W. 22, where the negligence of a conductor was held not to have been the proximate cause of the injury.

In an action by an employé for injuries alleged to have been occasioned while unloading certain boxes of cylinders from a push car, evidence that the boxes were improperly placed on the car by direction of the foreman, and that they could have been easily unloaded if properly placed on the car, and that the injury was occasioned while attempting to get them in position for unloading, which could have been readily done, without resort to a pry or lever if they had been properly placed, is sufficient to show that the improper placing of the boxes was the cause of the injury. *Devore* v. *St. Louis & S. F. R. Co.* (1900) 86 Mo. App. 429.

Negligence of a bridge gang in unloading timbers from a car, causing them to roll off and strike the conductor of the train in which such car is placed, without any contributory negligence on his part, is the cause of the injury. *Missouri, K. & T. R. Co.* v. *Hines* (1897; Tex. Civ. App.) 40 S. W. 152.

In an action for an injury to an employee while cutting down a tree, by which another tree is felled, by order of a foreman who promised to tell him when it became dangerous for him to chop, an instruction that if the jury believe that plaintiff received notice by the screeching of the tree that it was about to fall at the same time such superior did, and started to run immediately, the failure to receive notice from such superior cannot be said to have conduced to the injury, is properly refused, as omitting all inquiry whether such superior was negligent in not sooner discovering plaintiff's danger. *Postal Teleg. Cable Co.* v. *Hulsey* (1897) 115 Ala. 193, 22 So. 854.

[1] (a) *Liability denied.* The violation of the rules of a railroad company lim-

It is worthy of remark that the facts involved in cases like those just cited are sometimes such that, by a slight change in the point of view, they may be considered as bearing, not upon the question of

ating the rate of speed of trains under certain conditions does not constitute a ground of liability for injuries due to the fact that the limb of a tree fell across the track and caused a derailment, owing to its being caught up by the engine and thrust against the blocking and rails at a switch. *Cox* v. *Chicago & N. W. R. Co.* (1897) 102 Iowa, 711, 72 N. W. 301.

The circumstance of a conductor's losing his hold of a heavy box which he is helping the plaintiff to unload from a car, owing to his accidentally putting his foot through a hole in the floor of the car, is not the proximate cause of an injury which the plaintiff receives through the falling of the box. *Louisville, N. A. & C. R. Co.* v. *Southwick* (1896) 16 Ind. App. 486, 44 N. E. 263 (peculiar and unusual accident, not to have been anticipated).

The negligence of a railroad company in running a train at a prohibited rate of speed within the railroad yard is not deemed to be the proximate cause of the death of an employee who is run over by that train unless, under all the attending circumstances, ordinary prudence would have admonished those operating the train that such excess of speed would probably result in injury to someone in the yard. *Houston, E. & W. T. R. Co.* v. *Powell* (1897; Tex. Civ. App.) 41 S. W. 695.

The omission to comply with the provisions of a statute forbidding employers to hire a child under fourteen years of age in a factory, without receiving the written permission of the parent or guardian, is not the proximate cause of the child's being injured through falling upon uncovered cogs, while scuffling with another employee. *Borck* v. *Michigan Bolt & Nut Works* (1896) 111 Mich. 129, 69 N. W. 254 (construing 3 How. Anno. Stat. chap. 3, § 1997). See, however, *Iles* v. *Trewarn Welsh Flannel Co.* (1886; Q. B. Div.) 2 Times L. R. 547. Cited in subd. (b) of this note.

An altercation between a road master and a laborer under him, in which improper and unbecoming language is used, is not such negligence as will render the employer liable for an injury to another employee half an hour after the close of such altercation, caused by other employees, who heard the altercation, dropping one end of a steel rail without notice to the employee injured, who was helping to carry the other end. *Burlington & M. River R. Co.* v. *Budin* (1895) 6 Colo. App. 275, 40 Pac. 503 (mental perturbation lasting half an hour from such a cause, not a result reasonably to have been anticipated).

The failure of an employer to furnish competent employees does not render him liable for an injury to a fellow servant of such employees, who has not assumed the risk caused by such incompetency, unless he ought reasonably to have apprehended that the retention of the incompetent servant would probably imperil his coemployees. *Maitland* v. *Gilbert Paper Co.* (1897) 97 Wis. 476, 65 Am. St. Rep. 137, 72 N. W. 1124.

Negligence in respect to the employment of an unfit person cannot be predicated in a case where the injury was a "remote consequence of the evil use of his tongue" by a quick-tempered servant. *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655 (plaintiff strained himself in attempting to lift a heavy weight in compliance with an order given in violent and profane language).

Where an injury to a minor employee occurred from an accident which no human being could have thought of as possible to occur, resulting from an apparently safe act, it cannot be said that it arose from any lack of knowledge on his part, even though he received no instructions. *Hickey* v. *Taaffe* (1887) 105 N. Y. 26, 12 N. E. 286. There an employee's finger caught in the button hole of a collar, and was dragged between the rollers of a mangle before it could be extricated.

A master is not bound to give warning and instructions to a young and inexperienced servant concerning danger of the employment, where they are of such a nature as to render injury very improbable, and only come from negligence which the master has no reason to expect. *Siddall* v. *Pacific Mills* (1894) 162 Mass. 378, 38 N. E. 969.

Negligence in failing to instruct a boy seventeen years of age as to the danger of his work cannot be predicated of a case where he falls off a hand car in running it back to a switch to get out of the way of an approaching train,

from which, as it has been properly flagged, the men on the hand car are in no danger. If his fall was caused through his head being affected by his position, that is a result which the employer was not bound to anticipate. *Briggs* v. *Newport News & M. Valley Co.* (1894) 15 Ky. L. Rep. 618, 24 S. W. 1069.

In *Kerrigan* v. *Hart* (1886) 40 Hun, 389, a laborer shoveling dirt stood between the tail of his cart and the edge of a bank. Owing to a defect in a hook in the harness, the horse got his head cramped, which made him back, forcing the laborer over the bank. It was held that on no theory could the master be charged with liability, the court saying: "Assuming the hook was not properly made, it is clear that the defect was not the proximate cause of the injury. . . . No human foresight could anticipate that a horse would throw his head around so far as to catch his bridle upon this hook and back straight back and squeeze a man against a bank. That such a thing is possible is proved by the happening of the accident in this case, but that such a thing was probable or likely to occur is absurd."

In *Benfield* v. *Vacuum Oil Co.* (1894) 75 Hun, 209, 27 N. Y. Supp. 16, the plaintiff was injured by an explosion caused by the contact of the flame of his lamp with gas which escaped from a tank of paraffine oil when he opened it. The court, in commenting on the testimony of the plaintiff, that he had been in the habit, during the whole of his experience with the paraffine tanks, of doing the work assigned to him in the same way as on the night in question, and that no explosion had ever before ' remarked: "If this is true— d habitually raised the lid of k with his lantern in his hand, ing on his arm, and done so with y, then the inference is unavoidthat the conditions present on the night in question were materially different from those which usually prevailed, and the only reason for that difference which is suggested by the evidence is that the heat in the tank was greater than it ordinarily was when the lid was raised, and that this was caused by leaving the steam on longer than was proper, and that the tank was opened too soon after the steam was shut off. This conclusion, if it afforded the correct hypothesis to account for the unusual and, indeed, unprecedented explosion, is important in two respects as bearing upon the question of the defendant's liability; for, first, it tends show that the danger here encounte wns one not reasonably to have b apprehended by the defendant, and nnd, it demonstrates either that the n ligence of the fellow servant, the gineer, who devolved his own duty u plaintiff, or of the plaintiff himself who undertook the performance of t duty, or of both, contributed to occa the accident and to produce the inju complained of, nnd in either case th could be no recovery in this action."

See also *Hope* v. *Fall Brook Coal* (1896) 3 App. Div. 70, 38 N. Y. Sup 1040, cited in § 803, note 4, *supra*.

If the accident was caused by breaking of a shaft, nnd the de proved is the deficiency of a jour there can be no recovery, unless proof shows that the deficiency had tendency to cause the break, and th such tendency was sufficient to ch the master with notice. *Breen* v. *Louis Cooperage Co.* (1892) 50 Mo. A 202.

Where a railroad servant has been injured by a sudden subsidence of t track, it is error to refuse to subm to the jury the special question, "D the defendant have any reason to app hend such a sinking of the roadbed track thereon?"—where in a spec question actually asked there is nothi which is calculated to elicit a findi upon that issue. A question in answ to which it is found that the defend could by the exercise of ordinary c and prudence have discovered and paired the cause of the accident bef the accident occurred is not of its sufficient, inasmuch as it leaves the qu tion of proximity of cause untouch and still at large. *McGowan* v. *Chica & N. W. R. Co.* (1895) 91 Wis. 147, N. W. 891.

An affirmative answer to the questi whether the defendant was guilty negligence which caused the accident not a sufficient finding as to proxima cause, since it leaves undetermined t question whether the injury was natural and probable consequence of t negligence. *Maitland* v. *Gilbert Pa Co.* (1897) 97 Wis. 476, 65 Am. St. R 137, 72 N. W. 1124.

A special verdict in an action by servant for injuries alleged to have be caused by the master's negligence is n sufficient to support a judgment f plaintiff, unless there is a finding th the negligence of the master was t proximate cause of the injury. *Gro*

v. *Thomann* (1901) 110 Wis. 488, 86 N. W. 178.

A special verdict merely finding that the defendant ought to have anticipated the danger of a boy's getting his hand into the knives of a planer is insufficient to support a judgment in plaintiff's favor. It should also state whether the failure of the defendant to guard the machinery or to instruct the boy as to his duties and the dangers was the proximate cause of the danger. *Kneeen v. Merrill Lumber Co.* (1895) 91 Wis. 637, 65 N. W. 374; *Kutchera v. Goodrich* (1896) 93 Wis. 448, 67 N. W. 729.

(b) *Liability affirmed.*—Where a roadbed is softened by water at a certain place, it is a natural and probable consequence that it will sink suddenly if a car is run on to it, and that, if this happens, a brakeman's foot may slip. *Louisville & N. R. Co. v. Kemper* (1899) 153 Ind. 618, 53 N. E. 931.

A railroad company which has notice that the flanges of the wheels of a tender are so worn that there is danger of its running off the track is liable for injuries resulting from the wreck of a train which the evidence shows to have been caused by the derailment of the tender. *Illinois C. R. Co. v. Pirtle* (1893) 47 Ill. App. 498.

A defective brake is the proximate cause of the death of a fireman from collision with the car, where such car was blown from a siding upon the main track, and would not have moved had such brake been adequate. *France v. Rome, W. & O. R. Co.* (1898) 25 App. Div. 315, 49 N. Y. Supp. 566; Former Appeal (1895) 88 Hun, 318, 34 N. Y. Supp. 408.

The omission of a railroad company to have a hand-hold upon the top of a freight car is the proximate cause of an injury to an employee by being crushed against another car standing on a switch too near the main track, where he would have avoided the injury if such hold had been provided. *International & G. N. R. Co. v. Sipole* (1895; Tex. Civ. App.) 29 S. W. 686.

A complaint alleging that a car without air brakes was placed in the middle of a train, in which all the other cars were provided with such brakes, that the train was divided by the breaking of the coupling on that car, and that a brakeman was injured by a subsequent collision between the two sections, states a cause of action, as the proximate cause of the injury lay in segregating the automatic system, leaving the end of the train beyond the control of the engineer. *Crandall v. Great Northern R. Co.* (1901) 83 Minn. 190, 85 Am. St. Rep. 458, 86 N. W. 10.

The defective handle to a hand car, which broke and let a pole on working it fall from the car, in consequence of which he was run over by another hand car closely following, is the proximate cause of the injury. *Banks v. Wabash Western R. Co.* (1899) 10 Mo. App. 158.

If a structure erected by a brewing company is being used by its permission by an ice-machine company doing business on the same premises, it is a probable contingency that the employees of the ice-machine company will be obliged to work on or about the tank, and, if the structure is insufficient and unsafe, it is a consequence to be apprehended that the tank will fall, and in its fall carry down and injure those at work on or about it. *Consolidated Ice Mach. Co. v. Keefer* (1888) 26 Ill. App. 666.

Where the wall between places where coal was mined was blown down by a blast, the mine owners were held liable on the ground that such a result was one which the inspector, appointed in compliance with a statute, might reasonably have anticipated, with the knowledge of the conditions which he possessed. *Eureka Block Coal Co. v. Wells* (1901) 29 Ind. App. 1, 61 N. E. 236.

The negligence of a mine owner in permitting a slab of stone to remain in the roadway of the mine may be deemed a proximate cause of an injury to an employee who was kicked from the tail chain of a car by a mule and fell against the slab and rolled under the car, where he could have escaped the car if it had not been for the stone. *Pocono Coal Co. v. Royce* (1898) 79 Ill. App. 469.

That the absence of a guard to a jointer in a saw mill was the proximate cause of the injury complained of may be legitimately inferred from a finding that a board fell and struck the plaintiff's hand, and so caused his hand to strike the knives. *Godwin v. Newcomb* (1901; C. A.) 1 Ont. L. Rep. 525.

Where a sewing machine of standard make was found, after certain repairs had been made, to be loose in the needle bar, so that the needle would strike the side of the plate through which it passed, an accident that is to be anticipated is that the needle may break and that a fragment may strike the person of the operator. *Methe v. Walter* (1901) 31 Misc. 474, 70 N. Y. Supp. 335.

A master is liable for an injury caused by the contact of a young child

with machinery which had not been fenced as the factory act required, although the accident would not have happened if the plaintiff had not been playing with a companion. *Hes* v. *Abercarn Welsh Flannel Co.* (1886; Q. B. Div.) 2 Times L. R. 547. See, however, *Borek* v. *Michigan Bolt & Nut Works* (1896) 111 Mich. 129, 69 N. W. 254, cited in subd. (n) of this note.

A railroad company is chargeable with negligence towards an employee on account of the depletion of train crew, where the schedule under which the train is run renders it necessary for some of the members to absent themselves for meals, and this negligence is the proximate cause of any accident which may occur in consequence of the train's being under-manned, although the absence of the trainmen was a breach of the company's rules. *Pennsylvania Co.* v. *McCaffrey* (1894) 139 Ind. 430, 29 L. R. A. 104, 38 N. E. 67.

Sickness and paralysis are a natural and probable consequence of a master's negligence in sending a servant to work in a region where he will be exposed to snow storms, and compelled to sleep with insufficient covering and with nothing but damp pine branches between him and the wet or frozen ground. *Clifford* v. *Denver, S. P. & P. R. Co.* (1886) 9 Colo. 333, 12 Pac. 219.

Where a workman falls from a defective ladder negligently supplied by his employer, and strikes another workman, the injury received by the second workman is a natural and probable consequence of the master's negligence. *Ryan* v. *Miller* (1883) 12 Daly, 77.

Where the servant of a corporation does acts in obedience to its orders which are in violation of an injunction restraining such acts, or which amount to a trespass, and such servant has no notice of the injunction or the invalidity or wrongfulness of such acts, or of any liability or danger of arrest likely to be incurred in the performance thereof, and such liability and threatened danger are known to his principal, but concealed from him, the principal is bound to indemnify him for the dangers suffered by him as the natural result of his acts done in obedience to the orders of his superiors. *Guirney* v. *St. Paul, M. & M. R. Co.* (1890) 43 Minn. 496, 19 Am. St. Rep. 256, 46 N. W. 78.

Where a foreman pulled on one of the ropes holding a derrick and the stake to which the guy rope was tied was pulled up, letting the derrick fall, it was held proper to give an instruction that such foreman negligently pulled the rope, but that the defendant should not be liable unless, in the exercise of ordinary care, he ought reasonably to have foreseen that a pull on the rope in such a manner would cause the derrick to fall. *St. Louis S. W. R. Co.* v. *Smith* (1901; Tex. Civ. App.) 63 S. W. 1064. But this instruction could properly be held correct everywhere. See Shearm. & Redf. Neg. § 93, note 5.

A jury is justified in finding that the omission of a conductor to inform the brakeman of the fact that a coupling was broken was the proximate cause of an injury received by such brakeman while making a coupling with a car, though the conductor was no longer on the train when the accident occurred. *Donahoe* v. *Old Colony R. Co.* (1901) 175 Mass. 356, 26 N. E. 808. The argument by which the defendant undertook to support the theory, viz.: that it was not to be expected that the plaintiff would attempt to uncouple the car without specific order from the conductor, was thus disposed of by the court: "The jury were not bound to assume that the conductor expected the whole train to stop because he had temporarily left the train for the purpose stated. The jury might well find that what was done by the plaintiff and the other members of the train was done in the ordinary course under the circumstances, and that the injury to the plaintiff was a natural and proximate result of the omission to inform him of the broken drawbar. It was admitted at the trial that the plaintiff 'was injured in attempting to uncouple the cars from the engine, so that the engine might go and do something else.'"

The following decisions illustrate the rule that a defendant is not absolved merely because the actual result which ensued was unusual or unlikely, and the particular injury received was one which could not have been foreseen by him.

Where a brakeman was riding in the cab of an engine with a defective pilot, and the engine sank on a soft part of the track, and the pilot, striking against some gravel on the roadbed, threw up a stone and broke the cab window, it was held that an injury to the eye of the brakeman, due to a fragment of the window striking him, was a legal consequence of the abnormal conditions which existed. *Baker* v. *Great Northern R. Co.* (1901) 83 Minn. 181, 86 N. W.

In *Illinois C. R. Co.* v. *Cowles* (1895) 63 Ill. App. 165, an engine

proximate cause, but upon the preliminary issue of negligence *vel non*. Compare, generally, §§ 140-146, *ante*.[2]

who injured himself by a successful effort to reverse the lever of a defective engine furnished to him, in order to prevent a collision with a passenger train, was allowed to recover.

Where a piece of coal flew off of a passing train, and injured a section hand, who was standing near the track, it cannot be contended that the company was not liable because the injury was not such a result of defendant's negligence as might reasonably have been anticipated. *Gulf, C. & S. F. R. Co.* v. *Wood* (1901; Tex. Civ. App.) 63 S. W. 164.

The negligence of railroad employees in running a hand car at a high rate of speed on a down grade and a slippery track, only 60 feet behind another hand car, is the proximate cause of an injury to an employee on the foremost car caused by his falling off and being run over by the car in the rear. *Christianson* v. *Chicago, St. P. M. & O. R. Co.* (1896) 67 Minn. 94, 69 N. W. 640; former Appeal (1895) 61 Minn. 249, 63 N. W. 639.

Where one of the handles on the front end of the rear one of two cars which had come into contact while being propelled in the same direction was broken off, and because of its absence the other handle on the same end of that car caused the preceding car to be pushed laterally and derailed, it was held that, as the defective handle might have been the proximate cause of the injury, the company was responsible for the injury resulting from the derailment, though it may not have anticipated the particular injury which occurred. *Walters* v. *Eastern R. Co.* (1902) 83 Minn. 149, 54 L. R. A. 481, 86 N. W. 76.

[2] In *McGowan* v. *Chicago & N. W. R. Co.* (1895) 91 Wis. 147, 64 N. W. 891, where it was held error to refuse an instruction to the effect that the defendant was not liable for its failure to keep its track in repair, unless "a person of ordinary intelligence and prudence would have expected as the result therefrom that the injury in question would occur," the court said: "It was not enough to entitle plaintiff to recover to show that his injury was in fact the natural consequence of the act or omission of the defendant, but it must have appeared that under all the circumstances it might reasonably have been expected that such an injury would result. A mere failure to guard against a result which could not reasonably have been expected is not negligence. (*Atkinson* v. *Goodrich Transp. Co.* [1884] 60 Wis. 141, 156, 50 Am. Rep. 352, 18 N. W. 764.) The plaintiff was not entitled to recover merely because the injury he had received was in consequence of the defendant's track and roadbed having not been maintained and kept in repair. In order to warrant a recovery it must have appeared that its failure in this respect was the result of negligence on its part, and that a person of ordinary intelligence and prudence might have expected, as the result of such negligence, that such an injury would have occurred. It is only by proof of these indispensable facts that an unbroken connection between the wrongful act and the injury can be established, and so constitute a continuous succession of events so connected as to make a natural whole, and show that the defendant's negligence and the injury of the plaintiff stand in the relation of cause and effect. The gist of the action is negligence on the part of the defendant, and such relation of cause and effect could be established only by thus showing that the negligent act or omission of the defendant caused the injury and was its proximate cause."

In another case it was laid down that "negligence is the cause of an accident, in the legal sense, only when it is of such a character that men of ordinary prudence, judgment, and experience might reasonably, in the light of the attending circumstances, to have foreseen that it was likely to produce such an accident." *Rysdorp* v. *George Paukratz Brewing Co.* (1897) 95 Wis. 622, 70 N. W. 7.

In another case, where the ruling was that it is negligent for railway servants to permit a coupling pin to be upon the platform of a car in motion, without being secured in its place; and that if such pin falls on the wheels, throws it from the track, and an employee of the company standing without the limits of the track to let the train pass is injured thereby, the company is liable, the court argued as follows: "It may be true that the accident in the precise form and with the precise surrounding circumstances which resulted in plaintiff's injury, could not have been expected to happen from the

805. Provinces of court and jury.— Whether the breach of d
tablished in the given case was the proximate cause of the inju
mixed question of law and fact.[1] It is, therefore, primarily
the jury to determine under proper instructions.[2] A court s
undertake to settle it in any case where it involves the weigh
conflicting evidence, the balancing of probabilities, and the dr
of inferences.[3]

falling of the pin from the car upon the track. The reason of imagination is unable to determine just the effect of an obstruction upon the track of a railroad. The result may be unusual, unexpected, indeed, a surprise to the most experienced,—never before heard of by anyone—yet the act of putting the obstruction on the track is none the less negligent, for it threatens danger in many directions, and is liable to produce many familiar results which would cause injury. Now, surely, if it causes an injury in any way that may be expected,—if the result is [illegible] before been seen,—it cannot be said not to be negligent because the result was before unheard of, and not within the observation of anyone, or even not anticipated in the exercise of reason or imagination. The negligence in this case produced an effect never before observed. It cannot, therefore, be said that it was the exercise of care." *Doyle* v. *Chicago, St. P. & K. C. R. Co.* (1889) 77 Iowa, 507, 4 L. R. A. 420, 42 N. W. 535.

[1] *Aldrich* v. *Concord & M. R. Co.* (1892) 67 N. H. 280, 36 Atl. 252.

Co.* (1901) 23 Utah, 91, 63 Pac. 814; *Hayes* v. *Michigan C. R. Co.* (1881) 111 U. S. 228, 28 L. ed. 410, 4 Sup. Ct. Rep. 369.

[3] *Whitcher* v. *Boston & M. R. Co.* (1900) 70 N. H. 242, 46 Atl. 740. There a freight conductor, alighting from a moving train when there were 2 inches of sleet on the ground, struck his foot on some hard object, causing him to slip and fall. The exact spot where his foot touched the ground could not be determined, but a mark made on the rail to indicate the spot where he fell was found to be opposite four ties projecting a foot beyond the regulation ties, and far enough out so that one alighting from a train would step on them. Waybills which he held in his hand, and blood from his injuries, were found on and about the ties. There were [illegible] objects on which he could have s[illegible] The question whether the projecti[illegible] were the cause of the injury wa[illegible] to be for the jury.

Where a switch was left open by [illegible] known party, and a train ran into [illegible] is for the jury to say whether [illegible] of the company in unnecessarily p[illegible] the switch behind a water tank, s[illegible] the danger signal could not be [illegible] the train was within 60 feet [illegible] whereas it could have been plac[illegible] that it could be seen 600 or so[illegible] away, affording time for stopping [illegible] train, was a proximate cause of th[illegible] cident. *Young* v. *Syracuse, B[illegible] Y. R. Co.* (1899) 45 App. Div. 29[illegible] N. Y. Supp. 202.

A verdict will not be set aside w[illegible] finds that a defective switch w[illegible] causes a car loaded with lumber to [illegible] off the track, thereby weakening [illegible] cross-ties holding the lumber on the [illegible] was the proximate cause of an in[illegible] to an employee caused by the gi[illegible] way of the stakes and the fall of [illegible] lumber, while he was attempting to [illegible] the car back on the track. *Aldri[illegible] Concord & M. R. Co.* (1892) 67 N. [illegible] 280, 36 Atl. 252.

A switch engine wi[illegible] tub pilot [illegible] front and a tank and [illegible] pilot beam [illegible] had iron hand-holds 18 inches long [illegible] tached to each end of the base of [illegible] pilot, leaving a space 3½ feet over [illegible] main part of the pilot without a ha[illegible] hold. Plaintiff in stepping on the fo[illegible] board to make a coupling, stepped [illegible] air hose lying on the footboard, a[illegible] in putting out his hand to the drawh[illegible] the hand-hold being behind him, he l[illegible] his balance, and fell, and his leg w[illegible] cut off. It was held to be a possi[illegible] hypothesis that the injury would ha[illegible] been avoided if there had been a c[illegible] tinuous hand-hold. *White* v. *Burli[illegible] ton, C. R. & N. R. Co.* (1899) 109 Iow[illegible] 557, 80 N. W. 679.

In a case where plaintiff's intest[illegible] was engineer on the head engine of [illegible] train pulled by two engines throug[illegible]

On the other hand, if the court, upon a review of the whole ence, is of the opinion that reasonable men can come to only ... nclusion, the liability or nonliability of the master may be declared

row drifts, the head engine controlling the train by means of air brakes and governing the second engine by means of whistles, the testimony of one witness was to the effect that, 250 feet before reaching a switch, the head engine sounded the whistle for the second engine to shut off steam, left the track, and, on reaching the switch, followed the switch, and fell over on its side, killing the engineer and fireman, while the second engine followed the main track through off the rails. According to the testimony of one witness, the head ... not working when it reached ..., but the second one seemed to ... and the engineer was looking out of the window watching the snow. The brakes were found applied on the head engine. The whole distance traveled by the head engine after its trucks left the track was 525 feet. Held, that the evidence was sufficient to justify the jury in believing that the action of the second engineer in failing to shut off steam as soon as the whistle was sounded was the proximate cause of the accident. *McGrath* v. *Great Northern R. Co.* (1900) 80 Minn. 450, 83 N. W. 411.

A jury is warranted in finding that a brakeman's death was caused by his being crushed between two cars, where his death took place four months after the accident, and his wife testified that he had never recovered from the injury, while the physician who attended him in his last illness testified that he died of pneumonia, and the physician who attended him for the injury testified that, while it was a severe one, he had recovered about a month before his death. *Illinois C. R. Co.* v. *Harris* (Miss.) 29 So. 760.

Where an employee was proceeding to close the door of an elevator, as it was his duty to do, but was directed by the foreman to wait a moment, and the plaintiff, not observing that the door was open, backed through while engaged in his work, and fell down the shaft, it was held that the question whether the failure of the employee to act with promptness in closing the door was the negligence of a fellow servant, or of the defendant, as being caused by the command of the foreman, was a question for the jury. *H. Channon Co.* v. *Hahn* (1901) 189 Ill. 28, 59 N. E. ... affirming (1900) 90 Ill. App. 250.

Where a servant was injured by the fall of a derrick, due either to inherent weakness, improper ballasting, or violation of defendant's order not to hoist two loads at the same time on the same side of the derrick, the jury having found against the last cause, a verdict for the plaintiff is not against the evidence, where the testimony tended to show that there was no visible weakness in the derrick, but that the accident might have been caused by a change of ballast, for which defendant would be responsible. *Sherman* v. *J. W. Bishop Co.* (1901) 23 R. I. 6, 49 Atl. 30.

A jury is warranted in finding that the explosion of a steam cooker in a canning factory was due to the want of a safety valve between the cooker and the boiler from which the steam was admitted, where the evidence is that the cooker could withstand only one half the pressure of steam that could be safely kept up in the boiler, and that the gauge and thermometer by which the temperature and pressure of the cooker were regulated were not affected quickly enough to give an indication of danger, when steam was freely admitted from the boiler. *Empson Packing Co.* v. *Vaughn* (1899) 27 Colo. 66, 59 Pac. 749.

The question whether an explosion which occurred while a fireman was opening the blow-off cock of a boiler was at the joint of a "plunger union" joining the two portions of a pipe used in connection with the blow-off cock for the discharge of mud and water from the boiler is for the jury upon evidence tending to show that there had been some defect and leaking of water at the union a few days before the explosion, and that repairs had been made thereon, and that such a union was an unsafe and dangerous construction and liable to give way and cause an explosion, in the absence of evidence on the part of the owner to show the character of the explosion and what part of the pipe, if any, was broken. *Sullivan* v. *Union R. Co.* (1896) 7 App. Div. 238, 40 N. Y. Supp. 81.

Where a fire occurred in an upper room of a malt-grinding mill, and very shortly afterwards the fine dust ex

a matter of law.[4] This principle is manifestly taken for granted all the cases in which courts have declared the action to be, as ma ter of law, not maintainable. See notes to the last two sections.

B. Intervening causes.

806. Generally.— It frequently happens that the crucial questi upon which the proximity or remoteness of causation hinges whether or not the legal connection between the negligence alleg and the injury received was broken by some intervening occurren This question is an extremely complex and difficult one, and the tempts to solve it under various circumstances have produced a m titude of decisions which it is impossible to reconcile.[1] For the p

ploded in a room on the floor below, which was connected with the upper room by a chute, and it was shown that the safety appliance in the chute which the employer had provided to prevent the spread of fire was out of order, the jury was held to be warranted in finding that the explosion was due to the employer's neglect to perform his duty of keeping this appliance in order. *Wiedeman* v. *Everard* (1900) 56 App. Div. 358, 67 N. Y. Supp. 738.

In an action by a servant for injuries sustained in the operation of machinery, evidence that the shaft was at rest when plaintiff was called to sharpen the knives of the machine of which the shaft was a part, and while so doing the shaft was set in motion by the belt slipping from the dead pulley onto a live one, and plaintiff was thereby hurt, is sufficient to send to the jury the issue of the proximate cause of the injury. *Stalzer* v. *Jacob Dold Packing Co.* (1900) 84 Mo. App. 565.

The inference that defendant's neglect caused the injury to plaintiff for which suit is brought is justified by evidence that the front wheels of a car used in defendant's coal mine were of different sizes, and that the car jumped the main track for which the switch was set, to a side track on which the plaintiff was standing to be out of the way. *Southwestern Coal & Impror. Co.* v. *Rohr* (1897) 15 Tex. Civ. App. 404, 39 S. W. 1017.

In an action by a railway servant against a company other than that which employed him, the question whether negligence of defendant's flagman in giving, without cause, a signal to the engineer of a long train of empty cars to stop, in acting on which sig as it was the duty of the engineer to the cars were piled up and thrown o the adjoining track, into which pile t train on which plaintiff's testate engineer (belonging to, and operat like, the other train, by another th defendant), then coming along, and occasioned his death, was the pro mate cause of the accident, was held be for the jury. *Thomas* v. *Central Co.* (1900) 194 Pa. 511, 45 Atl. 344.

In an action by a brakeman agai an express company, it was held th the question, whether or not an inju received while he was standing in t door of a baggage car, from bei struck by a chute used to transfer ba gage from one train to another, as end came in contact with a car up another track, was the proximate res of allowing the end to project beyo the car, was for the jury. *Americ Exp. Co.* v. *Risley* (1899) 179 Ill. 2 53 N. E. 558, Affirming (1898) 77 App. 476.

See also *Pidgeon* v. *Long Island Co.* (1895) 87 Hun, 43, 33 N. Y. Sup 870, where it was held that the evide sustained the verdict of the jury th the want of repairs on a track caus a derailment.

[4] *McGill* v. *Maine & N. H. Granite* (1900) 70 N. H. 125, 85 Am. St. R 618, 46 Atl. 684.

[1] According to a recent case in t Federal court of appeals, "the indepe ent intervening cause that will preve a recovery on account of the act or om sion of a wrongdoer must be a cau which interrupts the natural sequen of events, turns aside their cour e, p vents the natural and probable res

poses of the present treatise, it will be unnecessary to do more than show the actual effect of the cases in which the liability of employers has been considered under this particular aspect. The general principles involved may be ascertained by consulting the standard works on the law of negligence.

The cases may be conveniently classified under three categories indicated by the headings of the following sections.

807. Operation of nonresponsible agencies.—The class of cases which presents the fewest difficulties is that which involves subsequent occurrences resulting from the operation of some nonresponsible agency. Under such circumstances the sole question to be determined is whether the result produced by the negligence was one which might reasonably have been anticipated.[1]

808. Nonculpable acts of responsible actors.—Another and less simple class of cases is that which turns upon the effect of a subsequent occurrence which was the result of the nonculpable act of a responsible actor, either the injured servant himself or another person. Considering that the ultimate test of liability is whether the consequences flowing from the negligence charged were such as might reasonably

of the original act or omission, and produces a different result, that could not have been reasonably anticipated." *Union P. R. Co.* v. *Callaghan* (1893) 6 C. C. A. 205, 12 U. S. App. 541, 56 Fed. 988. In the same case it is pointed out that "the proximate cause is not always, nor generally, the act or omission nearest in time or place to the effect it produces," and that, "in the sequence of events, there are often many remote or incidental causes nearer in point of time and place to the effect than the moving cause, and yet subordinate to, and often themselves influenced, if not produced, by it."

If the evidence is such as to warrant the inference that the legal connection was broken by an intervening cause, it is not sufficient merely to instruct a jury that "the proximate cause is the event or thing which causes the accident, not the thing without which it would not have happened." It should also be stated that the proximate cause of the injury is to be referred to the nearest responsible agency from which the accident followed, as a proximate result, and that, if there was any wrongful or negligent act in the chain of causation, producing the disaster, that wrongful or negligent act should be found to be the proximate cause of the accident, unless clearly too remote. *Pudsey* v. *Dominion Atlantic R. Co.* (1895) 27 N. S. 498.

[1] A railroad company is liable for personal injuries sustained by an employee who, while free from negligence and in his proper place, performing his duties as a servant of the company, was struck by the body of a trespasser who was killed by being thrown from the track by an engine, where the engineer saw the trespasser upon the track in time to stop before striking him, but carelessly, negligently, and recklessly allowed the train to run at a dangerous rate of speed, without giving any signal of its approach, or making any effort to check its speed. *Western & A. R. Co.* v. *Bailey* (1898) 105 Ga. 109, 31 S. E. 547.

Where defendant negligently cut an electric wire, and, because of the crossing of other electric wires, decedent, a lineman, received a shock resulting in his death, a finding that the cutting of the wires was the cause of the lineman's death was proper, though it operated through the consequent crossing of other wires. *Brought* v. *Southern New England Telephone Co.* (1899) 72 Conn. 617, 49 L. R. A. 404, 45 Atl. 435.

have been expected, the decisions under this head cannot easily be reconciled upon the facts.[1]

[1](a) *Liability denied.*—Negligence of the engineer of one railroad train in moving his engine towards the crossing of another railroad before a train on the crossing has entirely passed is not the proximate cause of an injury to a fireman on the former train resulting from the latter train suddenly and unexpectedly backing after having cleared the track. *Kansas City, M. & B. R. Co.* v. *Lackey* (1896) 114 Ala. 152, 21 So. 444.

Failure of the yard master to properly make up a train, and to inspect the cars and remedy the condition of the angle cock and the air hose of one of the cars, is too remote to furnish a ground of recovery against the company by a freight conductor, for injuries sustained in attempting to close a defective angle cock while rearranging the train and putting the air cars together, by the engine pushing the cars back against the one he was working upon. *St. Louis & S. F. R. Co.* v. *Nelson* (1899) 20 Tex. Civ. App. 536, 49 S. W. 710.

Where a switchman, acting under a sudden impulse, and in the mistaken belief that a switch is wrongly set for a train approaching on the main track, manipulates it so as to throw that train on a siding, thereby causing the death of an engineer, it is not error to refuse to submit to the jury the question whether the company was negligent in failing to adopt a rule requiring switches to be locked, and switchmen to be at their posts when trains were passing on the main track. *Burke* v. *Syracuse, B. & N. Y. R. Co.* (1893) 69 Hun 21, 23 N. Y. Supp. 458.

A declaration alleging that the master negligently erected a hoarding in a street, and left a machine in a position in which it was likely to cause danger to the workmen, and that a cart accidentally ran against the hoarding, and knocked down the machine against the plaintiff, does not show that the injury was the proximate result of the negligence specified. *Assop* v. *Yates* (1858) 2 Hurlst. & N. 768, 27 L. J. Exch. N. S. 156.

The fact that the hanger of a sliding door is defective and consequently difficult to move is not, in law, the proximate cause of an injury to the leg of an employee who, while moving it with the help of a coemployee, loses his balance and falls from a stool which he has mounted in order to be in a more advantageous position for pushing it, *ley* v. *American Exp. Co.* (1895) 8 352, 32 Atl. 965.

The fact that sawdust is allow accumulate upon a boiler is no proximate cause of an injury to a ant who, while climbing a ladder t purpose of removing the same, re reason of the defective condition ladder. *Lamotte* v. *Boyce* (1895) Mich. 545, 63 N. W. 517.

Sending an employee away and his work by a smaller and weaker is not the proximate cause of an i to another employee from the fal post which they were engaged in se where the post did not fall becau his lack of strength, but because o slipping of such employee through character of the ground on whic was obliged to stand. *Hunter* v. *K City & M. R. & Bridge Co.* (189 C. C. A. 206, 54 U. S. App. 653, 8 379.

No causal connection between the ligence charged and the injury is sh by a complaint in which the abne risks specified were that a passag only 19 inches in width was provide tween a crane and a deep moulding and that the pit was left uncovered which the injury was alleged to h been received, owing to the fact the plaintiff stumbled, while walk along the narrow passage, and, in endeavor to regain his balance, ca his hand in the wheels of the crane. court based its ruling on the theory t the stumbling was the proximate c of the accident; that, as the pas was not insufficient for the purpose which it was used, and was not enc bered or obstructed through the defe ant's fault, this stumbling must h been caused by pure accident or by n ligence on the plaintiff's part, and t it did not appear that the result wo have been different if the pit had b covered. The suggestion that, if t pit had been covered, the plaintiff wo not have grasped the crane for supp but would have allowed himself to f on the cover, was rejected as being m speculation, and not averment; but was declared that, if this had be averred, the complaint would still ha been bad. *Greer* v. *Turnbull* (1891) Sc. Sess. Cas. 4th series, 21.

Where a servant engaged in moving derrick across the uncovered girders

809. Culpable acts of responsible actors; negligence of coservants.—In a third class of cases the intervening occurrences, the effect of which is in question, resulted from the culpable acts of responsible actors. The negligent acts which the courts have considered from

the first floor of a building, after the master had promised to furnish more planks, fell into the cellar by reason of his foot slipping from the girder upon which he had placed it without apprehending any danger therefrom, it was held that no action could be maintained, since, under such circumstances, the fall was not caused by the insufficiency in the number of the planks, or a defect in the crowbar or the derrick, but simply by a miscalculation on his part as to his position, and his accidental slip from the girder. *Holloran* v. *Union Iron & Foundry Co.* (1896) 133 Mo. 470, 35 S. W. 260.

The violation of a municipal ordinance as to the speed of a street railway car, or as to the space required to be maintained between two cars driven in the same direction, did not render the company liable for an injury, which was due to the fact that a switchman, fearing a kick from the horses of an approaching car, stepped back suddenly, and, miscalculating the distance in his confusion, got too near the other track and was struck by a passing car. *Thompson* v. *Citizens' Street R. Co.* (1899) 152 Ind. 461, 53 N. E. 462.

(b) *Liability affirmed.*—Recovery has been allowed where the plaintiff, owing to an act of misjudgment, caused a heavy piece of machinery to fall upon himself. *Schultz* v. *Bear Creek Ref. Co.* (1897) 180 Pa. 272, 36 Atl. 739.

Where an engineer was obliged to reverse his engine, which was leaving the track because of the defective condition of the track, and was thereby injured, the neglect of the company to keep its track in repair was the proximate cause of the injury, and plaintiff may recover. *Knapp* v. *Sioux City & P. R. Co.* (1887) 71 Iowa, 41, 32 N. W. 18. Former Appeal (1884) 65 Iowa, 91, 50 Am. St. Rep. 1, 21 N. W. 198.

In *Finley* v. *Richmond & D. R. Co.* (1893) 59 Fed. 419, where defects in the engine brake and the reversing of the lever caused injury to a brakeman, while coupling, it was held that the engineer might have controlled the movements of his engine by means of the tender brake; but he was held to be justified in acting on the assumption that by using caution he might make the defective appliances work properly.

Where the evidence was that plaintiff's intestate, who was employed as switchman in defendant's yard, went in between two cars to make a coupling, and, having completed it, attempted to step out upon the planking in a highway crossing; that the planks were so uneven that his foot caught or slipped thereon, and he was thrown under the cars; that, as he slipped, he grasped the grab-iron, and endeavored to jump out from under the car, and was about to accomplish this, when his foot slipped into a hole between the ends of two ties, and he was run over by the cars and killed,—it was held the court properly left it to the jury to determine whether the condition of the plank at the crossing was the proximate cause of the injury. *Herrick* v. *Quigley* (1900) 41 C. C. A. 294, 101 Fed. 187. The court took the position that such evidence tended to show that the servant never recovered from the dangerous situation in which he had been placed by the defective planking.

A jury is warranted in finding that there was no interposition of any new and independent cause which would relieve the defendant company from liability for defects in its track, where the evidence tended to show that a train, while running down a grade, parted owing to those defects, and it was proved that a tank of gasoline was burst open by a subsequent collision between the two sections, and that the conductor, when he came forward with his lantern, was killed by an explosion. *Chicago G. W. R. Co.* v. *Price* (1899) 38 C. C. A. 239, 97 Fed. 423.

It is not negligence for a fellow servant to operate machinery on the assumption that it is in good condition. Hence the defective condition of the bumper of a freight car, and not the engineer's act, is the proximate cause of an injury due to the deadwoods meeting and crushing plaintiff, where the moving car was being backed at a rate of speed which would not have brought the deadwoods together if the bumper had been in order. *Goodrich* v. *New York C. & H. R. R. Co.* (1889) 116 N. Y. 398, 5 L.

this point of view have been either those of fellow servants or t
of the injured servant himself.

In a few decisions courts have recognized, more or less explic

R. A. 750, 15 Am. St. Rep. 410, 22 N. W. 397.

The servants of a mining company have the right to assume that a permanent platform built for their use upon one of the levels of the mine, and likely to be subjected to the strain caused by explosions in the shaft beneath it, will stand the test to which the ordinary operations of the mine subject it. Such ordinary operations cannot be regarded as constituting an intervening cause. *Smizel* v. *Odanah Iron Co.* (1898) 116 Mich. 149, 74 N. W. 488.

The fact that the immediate cause of a servant's coming into contact with machinery which should have been guarded was a slip or a stumble will not render the master's negligence a remote cause of the injury. *Lore* v. *American Mfg. Co.* (1901) 160 Mo. 608, 61 S. W. 678; *Swift & Co.* v. *Holoubek* (1900) 60 Neb. 784, 84 N. W. 249 (judgment reversed on rehearing [1901] 62 Neb. 31, 86 N. W. 900, but not on this point). See, however, the previous subdivision of this note, where some cases involving the similar circumstance of a slip are cited.

The fact that the surgeon who acted for the employ and amputated an injured employee's leg may have been mistaken as to the necessity of such amputation will not prevent a recovery against the employer, where the servant himself was guilty of no negligence in obtaining or submitting to the amputation. *St. Louis & S. F. R. Co.* v. *Doyle* (1894: Tex. Civ. App.) 25 S. W. 461.

A railway company's nonperformance of its duty to furnish an employee, who had been sent out to repair a wrecked car, with the means of transportation to some place where he could procure food and shelter, was held to be the proximate cause of a sickness contracted while he was walking by night, in extremely cold weather, to a village 9 miles distant. *Schumaker* v. *St. Paul & D. R. Co.* (1891) 46 Minn. 39, 12 L. R. A. 257, 48 N. W. 559. The court said: "There was no intervening independent cause of the injury, for all of the acts done by the plaintiff, in his effort to seek protection from the inclement and dangerous weather, were legitimate, and compelled by defendant's failure to reconvey him to the city. Had he remained at the caboose, and los hands or his feet, or, perhaps, his by freezing, no doubt could exist o defendant's liability. It must no permitted to escape the consequenc its wrong because the injuries we ceived in an effort to avoid the th ened danger, or because they diff form or seriousness from those w might have resulted had the pla made no such effort."

The employer is not allowed to e responsibility where the intervening which was the immediate cause o injury was done under the influenc mental perturbation induced by the gerous conditions complained of. pare §§ 358–361d, *ante*.

A railway company is not excus the fact that the plaintiff, an engi in his excitement jumped from his gine, when, had he remained upo he might, perhaps, have escaped in from a collision due to the negli of an incompetent switch-tender. *Tennessee, V. & G. R. Co.* v. *G* (1883) 12 Lea, 46.

It cannot be said, as matter of that the unlawful rate of speed at w an engine is running is not the p mate cause of an injury received laborer, who, in seeking to get o the way of an engine which comes h him suddenly, slips upon some snow ice near the track and is struck by engine. *Crowley* v. *Burlington, & N. R. Co.* (1885) 65 Iowa, 65 N. W. 467, 22 N. W. 918.

That a boy killed by a projecting in a stone quarry falling from above crushing him, in the excitement of moment lost his presence of mind, in an honest effort to save his life mistake pursued the course to los is no excuse for the negligence of foreman in not removing the rock w caused the disaster. *McMillan Mf Co.* v. *Black* (1890) 89 Tenn. 118 S. W. 479.

In an action against a railroad personal injuries, defendant's negli was the proximate cause of the inju if the fireman of one of defend trains, apprehensive of danger bec the train did not stop when signale do so, caused the injuries by jum from the engine against the plai while he was engaged in repairing

the principle that a master is not protected by the fact that the injury was immediately due to the negligence of a fellow servant, if the commission of that negligence might reasonably have been anticipated.[1] The difficulty of fixing the boundary between the area of

fendant's tracks. *Jackson* v. *Galveston, H. & S. A. R. Co.* (1897) 90 Tex. 372, 38 S. W. 745, Affirming (1896) 14 Tex. Civ. App. 685, 37 S. W. 785.

The fact that a fireman jumps from an engine in order to avoid the effects of a collision, which he sees to be impending, with an obstruction on the track, does not break the chain of causation between the injury and the negligence to which the obstruction was due. *Vetiraic* v. *Texas & P. R. Co.* (1898) 50 La. Ann. 466, 69 Am. St. Rep. 450, 23 So. 461.

A railway employee injured by falling from a car without fault on his part, while obeying the conductor's direction to run forward and give warning to prevent a collision that has become imminent because of the company's negligence, is not prevented from recovering therefor against the railway company, on the ground that such negligence is too remote. *Simmons* v. *East Tennessee, V. & G. R. Co.* (1893) 92 Ga. 653, 18 S. E. 999.

The failure to give proper warning of the approach of a train by sounding the whistle, as was required by a rule under the circumstances, is the proximate cause of an injury to a section hand which was immediately due to the fact that one of his coservants, in the excitement of the moment, let go his hold of a hand car which the gang were lifting off the track. *International & G. N. R. Co.* v. *Newburn* (1900; Tex. Civ. App.) 58 S. W. 542. Judgment Affirmed in (1901) 94 Tex. 310, 60 S. W. 429 (only points of practice discussed).

Where a servant was standing on a narrow space, oiling a lathe, and being startled by the foreman's suddenly setting the machine in motion without warning, made a sudden effort to escape from his dangerous position, and in doing so, stumbled so that his arm was thrown onto the knives, the question whether the foreman's negligence was the proximate cause of the injury was held to be for the jury. *Wellibon* v. *National Wheel Co.* (1901) 128 Mich. 1, 87 N. W. 75.

The fact that a winchman, as a result of the fright produced by the alarm raised when a seaman was caught in the fall of the winch owing to the want of a light, runs the machine faster, instead of stopping it, does not break the causal connection between the want of the light and the injury. *The Manhasset* (1893) 69 Fed. 843.

The act of an engineer of one company in jumping from his engine to escape a collision with a train negligently moved by another company does not break the chain of causation so as to exempt the second company from liability for such injuries as the locomotive, thus left uncontrolled, may inflict on other employees. *Nary* v. *New York, O. & W. R. Co.* (1890) 29 N. Y. S. R. 630, 9 N. Y. Supp. 153.

See, however, the case cited at the end of the previous subdivision of this note.

[1] In *McCauley* v. *Norcross* (1892) 155 Mass. 584, 30 N. E. 464, where it was held that placing heavy iron beams near an open hole in the floor, and leaving them there for two or three days in such a position that, on being pushed by a person desiring to pass, one of them toppled over and fell into the hole, is such evidence of negligence on the part of the master as will sustain a verdict in favor of a servant who was injured by the falling beam. The court said: "If the beams were so left that one of them would be liable, as a natural consequence, from some intervening cause or agency, to be so moved that it might fall though the floor, the fact that an intervening act or agency occurred, which directly produced the injurious result, would not necessarily exonerate the defendants from responsibility. Superintendence is necessary in order to guard against injuries from such intervening and inadvertent acts of careless persons as are likely to happen and ought to be guarded against. The question is whether the moving of a beam was so likely to occur that it ought to have been provided against by the superintendent. It might be found that the beams were negligently left near the hole in the floor, where they were likely or liable to be toppled over so that one of them might fall through the hole, and thus injure someone below, and that this was the proximate cause of the plain-

facts which would properly be covered by such a principle, a
which would be covered by the doctrine of common employm
sufficiently manifest. Stated with reference to the test supp
the conception of anticipation or nonanticipation, the practica
of that doctrine is simply that, whenever the negligence of a co
was the proximate, and not merely a concurrent, cause of the
(see § 814, *infra*),[2] the general rule applied in this class of
simply that the existence of abnormally dangerous conditions
from the negligence of the master or his representative will
title an injured servant to recover, where his injury was the
not of those conditions, but of the negligence of a coservant in
to the manner of performing the work,[3] that is to say, where the
promoting cause of the injury was the negligence of a fellow se

This way of putting the judicial situation shows that the
principle which declares that the chain of causation is not br
a negligent act which might reasonably have been anticipated"
be admitted into the law of employers' liability without gre
stricting the right of the defendant to rely on the doctrine as
servants. Indeed, it is quite evident, from a perusal of chapters
XXXII., *ante*, that the restriction thus indicated has never receiv
serious consideration in a multitude of cases in which it might
the evidence, have been treated as an element in the inquir
would seem, therefore, that the principle referred to at the beg
of this section is, for practical purposes, ignored in actions
vants against their masters, and that the se[illegible]ance of the ch

tiff's injury, although some careless person came along and toppled them over."

In an action by a railroad employee to recover for injuries sustained by the act of a coemployee who released a part of the track being repaired, so that it fell upon and crushed the plaintiff's foot, where recovery is sought because of exposure to peculiar hazard, the defendant is not entitled to the direction of a verdict on the ground that no connection is averred or shown between the fellow servant's negligence and the alleged extraordinary haste of the work, when evidence was admitted without objection from which the jury might infer that the expectation of an approaching train led to the negligent act of the fellow servant. *Anderson* v. *Great Northern R. Co.* (1898) 74 Minn. 132, 77 N. W. 240.

By an independent wrongful act which operates so as to break the chain of causation is meant one which was not induced by the act of the master, which did not so operate on the tions created by the master as t them to produce the injury. *N C. & St. L. R. Co.* v. *Perriguey* 138 Ind. 414, 34 N. E. 233, 37 N.

[2] A negligent act of a master, does not cause an injury to a or concur with the wrongful a fellow servant as a cause of the cannot be coupled with such w act, so as to be made the basis covery. *New York, C. & L. R. Perriguey* (1893) 138 Ind. 414, E. 233, 37 N. E. 976.

[4] *Trewatha* v. *Buchanan Gold Mill. Co.* (1892) 96 Cal. 495, 2 571, 31 Pac. 561 (disapproving el

[5] See, generally, Shearm. & Red §§ 34, 35; 1 Beven, Neg. pp. 98, 1

causation is almost invariably assumed to be a rigid inference of law, which takes effect as soon as it is shown that the injury proximately resulted from the negligence of a coservant. Numerous cases in which the propriety of this presumption was virtually taken for granted have been cited in the earlier chapters just mentioned. The decisions collected in the note below deal with evidence which directly raised the question whether the negligence of the master or the negligence of a coservant was the proximate cause of the injury. In many instances it is extremely difficult, not to say impossible, to reconcile these decisions, in view of the facts involved, with those in which the master has been held liable on the ground that his negligence was not a remote, but a concurrent, cause of the injury. There is, in fact, a considerable body of authorities which can scarcely be said to embody any other principle than that an action can never be maintained where a coservant's dereliction of duty operates upon, and renders actively mischievous, the physical conditions previously created by the master's antecedent breach of his obligations. Yet it is manifest that any such principle is directly antagonistic to that which is exemplified by the cases collected in § 814, *infra*. A judicial exposition of the diagnostic elements of each class of cases seems to be urgently needed.[6]

[6](a) *Liability denied.*—The plaintiff has been held unable to recover for injuries caused by the breaches of duty indicated by the headings of the following paragraphs:

Acts of employees for whose negligence the master is responsible.—The manner in which the fellow servants of a laborer engaged in construction work lifted the rail which injured him, and not the order of the superintendent, is the proximate cause of the injury, although, after the men had lifted a rail which produced an injury to a fellow servant, and had carried it forward to a car, and while there holding it, awaiting the word of command to lift it further and throw it on the car, the superintendent failed to give the word of command in such a way as to produce concert of action in the men, but, on the contrary, ordered them to get the rail on the car in any way they could, and hurried the men and used oaths, whereby they became confused and failed to act in concert. *Coyne* v. *Union P. R. Co.* (1890) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 282.

In *Northern P. R. Co.* v. *Paisley* (1897) 167 U. S. 48, 42 L. ed. 72, 17 Sup. Ct. Rep. 741, Reversing (1895) 15 C. C. A. 52, 29 U. S. App. 583, 67 Fed. 881, it was held that the negligence of a conductor of a "wild" train in violating rules regulating the running of trains, and not the negligence of the train dispatcher, was the proximate cause of a collision. The court considered that it would be mere conjecture to deduce from the fact that the train was "wild" the inference that the conductor was acting under the control of the train dispatcher.

The failure of a railroad company to give notices of the movements of trains to the employees upon other trains is not the proximate cause of a collision which would not have occurred but for the gross negligence of the engineer of one train in not keeping his engine within control, and of the crew of the other train in failing to place torpedoes upon the track in the rear of such train when it stopped, and station a flagman at a proper distance. *Little Rock & M. R. Co.* v. *Barry* (1898) 13 L. R. A. 347, 28 C. C. A. 644, 56 U. S. App. 37, 84 Fed. 944.

A train dispatcher's failure to notify the engineer of a regular train that a

810. Same subject continued; negligence of injured servant hin
—Viewed with reference to the test of anticipation or ne
ticipation, the essential significance of the doctrine as to contribu

special has the right of track does not render the railroad company liable for an injury to the engineer of the special, occasioned by a collision with the regular, which would not have occurred but for the violation by the engineer of the regular train of a rule regulating the speed at which the passing station should be approached. *Bryant* v. *New York C. & H. R. R. Co.* (1894) 81 Hun, 164, 30 N. Y. Supp. 737.

The proximate cause of the injuries received by a fireman in a rear-end collision with the train of another company, halted at night at an unusual place without display of signals, is the negligent act of such trainmen, and not the fact that the engineer of the locomotive on which the fireman was employed ran his engine at a higher rate of speed than the company's regulations authorized. *Smithson* v. *Chicago G. W. R. Co.* (1898) 71 Minn. 216, 73 N. W. 853.

Where a train dispatcher has issued instructions as to the operation of a train, which, if they had been observed by the conductor and engineer, would have prevented a collision with another train, the employees on the latter train cannot recover damages for injuries resulting from disobedience to those instructions. *Chicago, St. L. & N. O. R. Co.* v. *Doyle* (1883) 60 Miss. 977.

If the coemployees of a conductor killed by the collision of his train with another, in consequence of the negligence of an agent of the railway company, for whose acts it must answer, are also negligent, no action will lie against the company in favor of his representatives. *Chicago & N. W. R. Co.* v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 604 (instruction disapproved, which left it open to the jury to infer that proof of the negligence of the company's agent and the conductor's freedom from negligence would alone justify a verdict against the company).

The proximate cause of a collision being shown to be the negligence of a brakeman in failing to set the brakes and thereby prevent the cars running backwards, a recovery cannot be based on the negligence of the train master in running the two trains too close together, in the absence of any proof that they were dangerously near if proper care had been taken; nor on the g of negligence in insufficiently ma the train, it appearing that one could have set the brakes in time he done his duty. *Belger* v. *A City & Ft. S. & W. R. Co.* (1892 Mo. 86, 18 L. R. A. 817, 19 S. W

The negligence of an engineer sponding to a yard master's s back some cars, without first ing whether a switchman, who undertaken to couple two of th which were to be moved, was clea cars, breaks the causal connecti tween the signal and an injury by the switchman, owing to hi caught between the cars when they together a second time. *Chicago & P. R. Co.* v. *Touhy* (1887) App. 99.

That the superintendent of an tric railway company called to g sistance, for the purpose of re trolley car, the conductor and m in charge of another car, does not the company liable, where the la negligently failed to set the ha that the car ran down an incline collided with another car to the i of an employee. Such a call cannot construed as an order to leave t without adjusting the brakes. *H* v. *Carbon County Electric R. Co.* 191 Pa. 146, 43 Atl. 74.

Dangerous conditions in the pla work.—A brakeman employed lessee railway company cannot re against the lessor company for inj alleged to have been sustained coupling cars, by being crushed bet the train and a platform constructed the lessor so near to the track th man could not stand between where his own pleading shows that proximate cause of the injury was fact that the train was in motion that the negligence, if any, was the fellow servants who were also serv of the lessee company, for whose n gence the lessor would not be li *Evans* v. *Sabine & E. T. R. Co.* (Tex.) 18 S. W. 493.

The proximate cause of the injur the negligence of a fellow servant, w a collision of a switch engine wi train was caused by the negligence the brakeman in manipulating switch, and the water tank of the

negligence is that such negligence is never a contingency which the master is bound to take into account or look forward to as a possibility

gine, insufficiently secured to withstand the shock of the collision, was thereby thrown forward on to a brakeman riding on the engine. *Lisetich* v. *Southern P. Co.* (1899) 126 Cal. 587, 59 Pac. 129.

The failure of a fellow servant to block a car on a side track constructed on a gradient, and not the company's failure to provide a safety switch, is the proximate cause of a collision caused by the fact that the car, although the brakes were set, was set in motion by a strong wind and ran on to the main track. *Illinois C. R. Co.* v. *Woolley* (1900) 77 Miss. 927, 28 So. 26.

A municipal corporation is not liable to an employee engaged in wheeling dirt up a "run," for injuries sustained by a collision with other workmen, by which he was thrown from the run, such collision being caused by the stopping of another workman to replace a loose board at the end of the run, which had been placed there by a workman to prevent the jar resulting from rolling wheelbarrows off the end of the run to the ground. The negligence, if any, in permitting the board to be placed where it was, was not the proximate cause of the injury. *McGough* v. *Bates* (1899) 21 R. I. 213, 42 Atl. 873.

In *Allen* v. *New Gas Co.* (1876) L. R. 1 Exch. Div. 251, 45 L. J. Exch. N. S. 668, 34 L. T. N. S. 541, a company had on its premises gates which were safe when open and wedged up, but liable to fall when closed. The attention of the manager had been directed to the unsafe condition of the gates, and orders had been given, but not carried out, to remedy this. A workman in the employ of the company passed through the gates when open, but on his return one of them was closed, and shortly afterwards, while he was working near the gates, they fell on and injured him. There was no evidence to show how this happened, nor any evidence that the manager and other persons employed by the company were incompetent. Held, that the company was not liable, as the negligence, if any, which caused the accident was that of a fellow workman. "We think," said Huddleston, B. "that the mischief in this case arose from the conduct of the plaintiff's fellow workmen, as such, and not from the defendant's default, nor from the default of any manager or vice proprietor, and that, therefore, the defendants are not liable. The gates were dangerous when shut, not dangerous when against the wall and wedged up. Now, either some workman, as such, moved the gates, or the wind did so, and then the workman ought to have replaced them. It was, therefore, by the improper moving of the gates by a workman or by their being improperly left open by the workman that the mischief happened. The case is like this,—there is an unsafe ladder; it is shut up and not used; a workman takes it out and does not replace it, and then another workman uses it and is hurt; the master would not be liable."

In *Collier* v. *Pennsylvania R. Co.* (1886) 49 N. J. L. 59, 6 Atl. 438, where the plaintiff's claim was based on the theory that a heavy door was defectively constructed, the court, without discussing the question of concurrent negligence, refused to allow recovery for the reason that a fellow servant was negligent in handling the door.

The negligence of an employer in allowing a large hole to remain under the track of a railway, and not providing any light for it, is not the proximate cause of an injury which a servant receives through being caught in the hole while coupling cars against which the engineer has pushed back his locomotive without warning. *Robertson* v. *Linlithgow Co.* (1891) 18 Sc. Sess. Cas. 4th series, 1221.

Even on the assumption that an unduly rough roadbed on a half finished railway betokens negligence, which was denied, the company is not liable for an injury to one of its servants employed on a construction train, occasioned by the running of the train by the engineer at a reckless rate of speed. *Evansville & R. R. Co.* v. *Henderson* (1893) 134 Ind. 636, 33 N. E. 1021.

Where a log is thrown off a car by an excessive jolting upon a rough roadbed, and the car is consequently derailed, the inference from evidence that the jolting was aggravated by an undue rate of speed is that the negligence of the engineer was the efficient cause of the wreck, and none of the other trainmen can recover for injuries resulting therefrom. *Conger* v. *Flint & P. M. R. Co.* (1891) 86 Mich. 76, 48 N. W. 695.

In *Sammon* v. *New York & H. R. Co.*

to be provided against. Hence, the legal connection between wrongful act and the injury is invariably deemed to have been bro

(1875) 62 N. Y. 251, the defendant was held not liable for an accident which occurred, owing to the fact that an ill-fitting pin fell out of the lever of a switch while a train was passing, and allowed two cars to run onto wrong tracks. The court took the position that, as the switchman, when he found that the lever would not work properly, had neither resorted to use of a crowbar to move the rail, as he had been doing before the switch was put in, nor held the lever himself, nor signaled the train to stop, nor taken steps to have the hole enlarged, the accident was attributable to the switchman's negligence alone.

If the owner of a mine has negligently allowed fire-damp to accumulate, and it is ignited by a servant who goes into it with a lighted lamp, instead of a safety lamp, contrary to the owner's orders, and another servant is injured by an explosion, the latter has no remedy against the owner. *Burns* v. *Gaston Gas Coal Co.* (1885) 27 W. Va. 285, 55 Am. Rep. 304.

Where an employee in a mine, a shaft of which was divided by a framework of posts into two compartments, one of which was provided with a ladder for the use of the employees, was injured while ascending the ladder, by a timber negligently thrown into the shaft by a fellow employee, the mine owner is not liable, although the partition between the compartments may have been defectively constructed, or insufficient in other particulars. *Keyern* v. *Providence Gold & Silver Min. Co.* (1886) 70 Cal. 392, 11 Pac. 740.

Contractors engaged in laying a slope-retaining wall upon the bank of a canal are not liable for the death of an employee killed by the fall of a heavy stone from the bank above although they had told the teamster who unloaded the stone to put it as near the edge of the bank as he could without having it roll over. *Rhodes* v. *Lauer* (1898) 32 App. Div. 206, 53 N. Y. Supp. 162.

In *Hoffman* v. *Clough* (1889) 124 Pa. 505, 17 Atl. 19, the defendant asked the court to instruct the jury "that, if they believed that some coemployee of the plaintiff, without the knowledge of the defendant, had left the covering off the well and in a dangerous condition, and the plaintiff fell in, the defendant has not been guilty of negligence and t fore the plaintiff cannot recover." answer of the trial judge was a lows: "I decline to affirm that because I can easily conceive that an employee may contribute to th jury, yet, if there is negligence defendant, he would be respons The court said: "There are two tions to this answer. In the first when taken as a whol it is no sponsive to the point. Instead o claring the law applicable to the assumed, it dealt with other facts the learned judge regarded as con able, but which were not brought t attention, and which were inconsi with those embodied in the point. the next place, if regard be had to part of the answer which is respec it is clearly wrong. The general true that an employee cannot loo his employer for an injury resu from the negligence of a coemploy well settled."

Defects in railway rolling stock, chinery, etc.—Supposing the use car with an unusually short draw be negligence on the part of a rai (which was denied) a brakeman w injured while obeying the order o conductor to detach the car cannot cover, since the order is the negli of a coservant and the proximate of the injury. *Whitman* v. *Wisco & M. R. Co.* (1883) 58 Wis. 408, 1 W. 124.

A defective coupling which c the separation of a train is not the p imate cause of an injury afterward ceived by a brakeman through the l ing of the forward part of the t upon him while he was engaged in r edying the defect. *Course* v. *New L. E. & W. R. Co.* (1888) 17 N. Y. S 715, 2 N. Y. Supp. 312.

The defective condition of a draw on a freight car, allowing the deadwo to come together, will not render a r road company liable to a switchm whose arm is crushed between the de woods, where just before the accid his arm was thrown between them consequence of his having stumbled u a piece of coal left upon the tr through the negligence of fellow s ants. *Cincinnati, N. O. & T. P. R.* v. *Mealer* (1892) 1 C. C. A. 633, 6 U. App. 86, 50 Fed. 725.

whenever the evidence shows that the negligence of the injured servant himself was an efficient cause of the injury. The exertion of

A railroad brakeman cannot recover from his employer on the ground that the cars he was ordered to couple were of unequal height, even if the use of such cars be negligence, where the proximate cause of his injury was the negligent movement of the train by a fellow servant, while he was attempting to make the coupling. *Norfolk & W. R. Co.* v. *Brown* (1896) 91 Va. 668, 22 S. E. 496.

The negligence of a railroad company in furnishing a defective coupling pin causing the parting of a train, and in not furnishing proper means of communicating the fact between the engineer and rear brakeman, is not the proximate cause of a collision between the two parts of the train after running several miles, where it would not have occurred but for the failure of deceased, his fellow brakeman, or the engineer, to comply with the rules of the company prescribing the precautions to be observed, after he or they knew or ought to have known of the parting of the train. *Richmond & D. R. Co.* v. *Tribble* (1896) 97 Va. 495, 24 S. E. 278.

A railroad company is not liable to a fireman for injuries from a collision of trains caused by the engineer's disobedience to orders as to the speed at which a station should be approached, where, although one of the brakes was out of order, the evidence was that the train could have been stopped without the brakes on the cars, if the engineer had shut off steam at the point at which he should have done this. *Bull* v. *Mobile & M. R. Co.* (1880) 67 Ala. 206.

The negligence of section hands in placing a water cask on the front end of a hand car in such a position that a jolt due to the car's going out of repair throws it off, the consequence being that the car is upset, is the negligence of fellow servants, and not of the section boss, where the latter gave mere general direction to prepare to return to the section house with the working tools and water cask. The want of repairs is not the efficient cause of such an accident, as it is due to the intervention of a new and distinct cause. *Rose* v. *Gulf, C. & S. F. R. Co.* (1891; Tex.) 17 S. W. 785.

On the ground that the master is not liable for the defective condition of instrumentalities which are harmless until they are rendered active for mischief by the independent wrongful act of a

[illegible] injured [illegible] it was held that the negligence [illegible] company in not furnishing [illegible] lights is not the proximate [illegible] collision caused by the [illegible] the engineer in leaving the [illegible] siding out on the main track, in violation of [illegible] orders. *New York, L. E. & W. R. Co.* v. *Pennington* (1891) 129 Ind. 114, 34 N. E. 233, 37 N. E. 976. The court said: "The movement of the train under the management of Ferris [the engineer] was the independent wrongful act of a responsible person; such act of Ferris was not induced by the act of [illegible], nor did he act [illegible] of Ferris [illegible] of the appellant [illegible] to produce [illegible] ated, accompanied [illegible] cited, especially [illegible] the appellee [illegible] negligent [illegible] injury. [illegible] to the appellee [illegible] lision."

The p[illegible] of [illegible] ceived [illegible] by his [illegible] to w[illegible] which has [illegible] foreman's [illegible] tened, as [illegible] that the negligent [illegible] and if [illegible] that he [illegible] that the [illegible] [illegible] [illegible] *Kelly* curred [illegible] *C. N.* v. *[illegible]* 27[illegible] [illegible] A[illegible] the [illegible]'s in pu[illegible] the [illegible] in [illegible] ing [illegible] by [illegible] which [illegible] workman [illegible] against the common [illegible] *Philadelphia Iron* [illegible] *Davis* (1886) 111 P[illegible] [illegible] Rep. 305, 4 Atl. 513.

An employee [illegible] by [illegible] from piece of iron [illegible] to [illegible] in operation may [illegible] recover [illegible] his employer for the injury. The negligence in the case, if any, was that the foreman of the [illegible] prop[illegible] erly seeming the [illegible] *Pabst* v. *Parlish Mfg. Co.* (1889) 12 Pa. 387, 17 Atl. 621.

Where an engineer hoisted a bucket with plaintiff in it from a shaft, with

this rule is not qualified by any doctrine analogous to that which will be shown in the following sections, will often enable a s

such speed as to throw it against the shore, the court said that this was negligence, irrespective of whether the bucket contained a man or not, and that it was, therefore, immaterial that the machinery for passing hoisting signals from the miners to the engineer was out of order and failed to work. *Trewartha v. Buchanan Gold Min. & Mill. Co.* (1892) 96 Cal. 495, 28 Pac. 571, 31 Pac. 561.

Where a foreman of a stevedore, having full charge of the loading and unloading of a vessel, called the attention of the mate of the ship to the unsafe character of a sling furnished by the vessel, and used in lowering cotton, the fact that the man at the gangway, whose duty it was to warn the men below when the cotton was on its way, failed to do so, is not, in admiralty, matter in discharge of the liability of the vessel, but only in mitigation of damages. *The Plover* (1888) 34 Fed. 760.

If an employee continues to use machinery after he knows it is unsafe, the master is relieved from responsibility for damages resulting therefrom to his fellow employees. *Philadelphia Iron & Steel Co. v. Davis* (1886) 111 Pa. 597, 56 Am. Rep. 305, 4 Atl. 513.

A master cannot be held liable for an injury received by a servant through the act of a fellow servant in operating, without the master's knowledge and against his orders, worn out machinery which he had condemned as being unfit for service. *Dargin v. Munson* (1864) 9 Allen, 400, 85 Am. Dec. 770, where this illustration is given, *arguendo*, to indicate the dividing line between injuries attributable to the personal negligence of the master and the negligence of a fellow servant.

In *Groves v. Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, 79 L. T. N. S. 284, 47 Week. Rep. 87, Vaughan, L. J., argued as follows: "Suppose a case in which the master has provided the most perfect and efficient fencing for the machinery that could be, but some person on a particular occasion deliberately leaves the fencing off, or removes it. An obvious answer to an action against the master in such a case would be that the cause of the damage to the plaintiff was not the failure by the master to perform his statutory duty, but the particular action of someone else. I am not satisfied that, if it could be shown that it was a fellow ser the person injured whose conduct dealing with the fencing was t of the injury to the plaintiff. fense of common employment w apply."

No liability arises under March 3, 1870, Pamph. Laws viding for fencing off dangerous ery in mines), where proper was made and the fence wa by a coemployee. *Honor v.* (1880) 93 Pa. 475.

Unfitness of the delinquent A coupler run over by cars whi being switched on to a siding cover on the ground of the in of his foreman, where the evidence that the proximate cause of the was the carelessness of a fellow in prematurely cutting them off. *Coal Co. v. Keegan* (1897) 97 105, 51 U. S. App. 189, 82 Fed.

An employer cannot be held liable an injury to a servant, on the that it was due to the incompetency a fellow servant, where the fitness such servant to start machinery is legal to be the cause of the injury, the evidence is that the foreman st it, and that the servant was subsequently injured by having his arm caught certain cogwheels. *McGourty v.* (1894) 161 Mass. 51, 36 N. E. 682.

The negligence of a conductor in s ing his train in violation of a rule quiring him to await orders at a tion, and not his sickness, is the pro mate cause of a collision which re from the setting of the train. *Jo ston v. Pittsburgh & W. R. Co.* (18 144 Pa. 443, 7 Atl. 181.

A conductor's ignorance of the con of the road over which he was leading train is not shown to have had any b connection with an injury received his fireman in a collision with which escaped from a siding, where evidence is that they would not ha done this if a fellow servant of plaintiff had not violated a rule of company in leaving them on the sid without setting the brakes. *Cooper New York, O. & W. R. Co.* (1898) App. Div. 383, 49 N. Y. Supp. 18

Inadequate number of servants.— T insufficiency of the number of men on train will not render a railway compa liable, where a brakeman is injure through the carelessness of anothe

brakeman. *Hayes* v. *Western R. Corp.* (1849) 3 Cush. 270.

That the failure of a railway company to have the usual number of brakemen on a train at the time plaintiff, while making a coupling, was injured in consequence of a wagon's being left too near the track, was the proximate cause of the injury cannot be predicated of a case where it was in full view of the fireman, and he might, if he had chosen, have warned the plaintiff. *Connors* v. *Elmira, C. & N. R. Co.* (1895) 2 Hun. 339, 30 N. Y. Supp. 926.

A collision which would have been avoided if a conductor had been sent with the train will not render the company liable to a servant injured by the collision, where the immediate cause of the accident was the fact that the engineer attempted to run to a certain station contrary to instructions. *Gulf, C. & S. F. R. Co.* v. *Compton* (1899) 75 Tex. 667, 13 S. W. 667.

Defective regulations.—The failure of a railroad company to provide, in addition to the usual night signal of waving a lantern, a system of oral orders for starting trains, cannot be made a ground of action, where the evidence is that such an order was in fact given, and was not understood by the negligent servant. *Peaslee* v. *Fitchburg R. Co.* (1890) 152 Mass. 155, 25 N. E. 71.

The omission of a railroad company to make a rule prohibiting "running switches" cannot be regarded as the efficient cause of an injury to a brakeman, who, with a full knowledge of the movement of a car which is being side-tracked by this method, puts himself in front of it to arrange the couplings, and, catching his foot in a frog, is knocked down and run over. The injury under such circumstances is due to his own negligence. *Sheets* v. *Chicago & I. Coal R. Co.* (1894) 139 Ind. 682, 39 N. E. 154.

The death of a brakeman and baggage master by collision is caused by the negligence of the engineer, and not by an unsafe schedule or defective rules, where the engineer of the colliding train received an order to run two hours late, but the schedule of the train struck would interfere with such order, and the general rule requires following trains to run ten minutes behind the time of the train followed. The consideration relied upon was that it was the duty of the trainmen of the colliding train to look out for the train in advance, although there was no special order. *Kennelly* v. *Baltimore & O. R. Co.* (1895) 166 Pa. 60, 30 Atl. 1014.

(b) *Liability affirmed.*—The act of the fellow-servant was held not to have broken the chain of causation in the cases cited below:

Acts of employee for whose negligence the master is responsible.—Where an inexperienced workman attempts, in obedience to orders, to start an engine which has crossed upon the center, by prying it off with an iron bar, and is injured by the engine starting quickly under great pressure of steam, catching him on the bar and throwing him into the gearing, the proximate cause of the injury is his obedience to the order and direction of the person who gave the order, and not the act of another workman who had previously opened the throttle valve so as to give the full force of steam. *Cartsale Coal Co.* v. *Turk* (1893) 147 Ill. 120, 35 N. E. 467, Affirming (1893) 47 Ill. App. 332.

Where an engineer in charge of the second of two engines drawing a train was injured in a collision, in an action to recover for his injuries it is proper to instruct the jury that, though the engineer on the first engine of plaintiff's train was negligent in running past the block signal, he was entitled to recover if the proximate cause of the injury was the gross negligence of the train dispatcher in disobeying a rule that there should always be at least one station between those at which opposing trains received meeting orders. *Cincinnati, N. O. & T. P. R. Co.* v. *Roberts* (1901) 23 Ky. L. Rep. 264, 62 S. W. 901.

The premature loading of the second platform of a freight elevator under the direction of the master's representative, and not the giving of a signal by some coservant to start the elevator while the loading was in progress, is the proximate cause of an injury caused by the dropping of a part of the load upon a workman who had been sent to repair the guides of the elevator. *Wells* v. *Bourdages* (1899) 88 Ill. App. 473.

The act of the superintendent of a mill in starting machinery while an employee is engaged in oiling it is the proximate cause of the injury to such employee, rather than the starting by another employee of an independent portion of the machinery, which would not interfere with the oiling. *Huehlett* v. *Ozark Lumber Co.* (1893) 53 Mo. App. 87.

The proximate cause of an injury sustained by the fall of a beam is the negligence of the foreman who removed the props, and sent the injured employee into a position of danger, and not the

carelessness of a fellow servant who accidentally stepped on the beam and caused it to fall. *Kansas City Car & Foundry Co.* v. *Secrist* (1898) 59 Kan. 778, Appx. 54 Pac. 688.

The negligence of an engineer in running so rapidly that a brakeman is unable to get down and act as a flagman after setting brakes to control the movement of a portion of a train which has broken apart, while backing down to couple on to the detached portion, is not the proximate cause of injury to such brakeman in attempting to pass from one car to the other, by their separating through a defective coupling pin. *Terre Haute & I. R. Co.* v. *Mansberger* (1895) 12 C. C. A. 574, 24 U. S. App. 551, 65 Fed. 196. Rehearing Denied in (1895) 14 C. C. A. 506, 24 U. S. App. 687, 67 Fed. 67.

The act of an engineer, who left an engine in a dangerous position in charge of an inexperienced fireman, may justifiably be found by a jury to be the proximate cause both of an act of the fireman in putting the engine in motion, and of an injury to a conductor who was thrown off while endeavoring to stop the train. *Mexican Nat. R. Co.* v. *Mustte* (1893) 7 Tex. Civ. App. 169, 24 S. W. 520. Affirmed in (1894) 86 Tex. 708, 24 L. R. A. 642, 26 S. W. 1075.

Dangerous conditions in the place of work.—In an action by a railroad brakeman against the company for injuries from coming in contact with the chain of a derrick allowed to swing across the track, proof that, upon the completion of the derrick, the mechanic who constructed it, and whose authority or relation to the company is not further shown, explained to the station agent and others who expected to use it, the manner of its working and of fastening it when not in use, is not conclusive that the derrick was thereby placed by the company in the care of the station agent, so as to relieve the company from liability on the ground that the injury was caused by the negligence of a fellow servant. *Gates* v. *Chicago, M. & St. P. R. Co.* (1892) 2 S. D. 422, 50 N. W. 907.

The negligence of a fellow servant in placing an oil car in close proximity to the locomotive of a train is not a defense to actions against the company for the death of the fireman and engineer by the giving away of an embankment across a marsh, although the oil ran into the cab of the engine after the accident, and, in burning, destroyed their bodies. *Farmers' Loan & T. Co.* v. *Toledo, A. A. & N. M. R. Co.* (1895) 67 Fed. 73 (defective track held
been the sole cause of the derai

cause of the injury. It was literal
the *causa causans*. The immediate

to recover, although the negligence of a coemployee may have been a partial cause of the injury.[1]

In chapters XVII., XIX., *ante*, a large number of decisions have been collected in which the courts, assuming the correctness of the rule just stated, have discussed the question whether the act of the servant was or was not a negligent one. The cases cited below bear upon the question whether certain acts of the injured servant, which were admitted to be negligent, were the proximate cause of his injury.[2]

fect of its absence was to put the car in such condition that in case of collision of the rear its body must inevitably be impelled against the preceding car with a force to which it could offer no resistance. The death of the decedent was, therefore, caused by the omission of the defendant to place buffers where they belonged. For any useful or usual purpose the ones in question might as well have been placed on the top or at the side of the car as where they were."

Where a switchman while running to a switch was run over by cars making a "flying switch" on a dark night, and the evidence is that only one of them was provided with a brake in good working order, that there was no light on the front car, and that the company had promulgated no rules regarding "flying switches," the inference is that the company's omissions of duty in these respects, and not the negligence of the trainmen, were the proximate cause of the accident. *Chicago & A. R. R. Co.* v. *Taylor* (1873) 69 Ill. 469 (holding that the doctrine of common employment was not applicable to the facts).

Unfitness of the delinquent coservant. —A master is liable for an injury sustained by an employee because of the incompetence of a foreman who negligently directed machinery to be set in motion, although the accident was due to the direct act of a workman who started the machinery in obedience to the foreman's command. *O'Donnell* v. *American Sugar Ref. Co.* (1899) 41 App. Div. 307, 58 N. Y. Supp. 640.

The causal connection between the negligence of a road master in removing the brake rods of several cars, and leaving them heavily loaded with rails upon an inclined side track, where they are liable to be struck by other cars and set in motion, is not interrupted by the act of a conductor who, desiring to avert a derailment of the cars, opens a switch and allows them to get on the main line, where they come into collision with a train. *Breeding* v. *Wabash Western R. Co.* (1894) 124 Mo. 55, 24 S. W. 741. Affirmed in 27 S. W. 644.

[1] An instruction in an action by an employee for personal injuries that, although the plaintiff was negligent, he is not precluded from a recovery unless his negligence was "the" proximate cause of the injury, is erroneous, since the jury can infer from the use of the definite "the" that the plaintiff, though guilty of negligence which could be called "a" proximate cause of the injury, should not be barred unless his negligence was the sole cause of the injury. *Wastl* v. *Montana Union R. Co.* (1900) 24 Mont. 159, 61 Pac. 9.

[2] The negligence of the engineer of an extra train was held to be the proximate cause of his death, resulting from a collision with the rear end of a work train, where the evidence showed that he could and should have seen the signal made by a brakeman from the work train when 700 feet distant, within which distance he could have stopped, and that he was running in disregard of an order which required him to run slowly and carefully at the place of collision. *Beaumont* v. *Northern P. R. Co.* (1901) 48 C. C. A. 529, 109 Fed. 532.

The failure to give signals from a train to persons on a hand car on the track in front of the train, and of the foreman in charge of the car to warn those on board of the approach of the train, will not render the railroad company liable for injuries inflicted upon them, if they knew of the train's approach and reached the ground in time to get out of the way before the train struck the car. *Texas & P. R. Co.* v. *Pason* (1899) 34 C. C. A. 530, 92 Fed. 553.

A railroad engineer who on stopping his train in a cut failed to blow the whistle as required by the rules of the company as a signal to the brakemen to take position so as to prevent collision

811. Master liable where his own negligence intervenes, as a mate cause, between a delinquent coservant's negligence and the i
—The action is not barred by the defense of common e
ment, where the evidence shows that the master or his repres
might, by the exercise of reasonable care, have secured the in
person against the danger created by the negligence of the delin

with another train is guilty of such contributory negligence as will prevent a recovery for his death caused by such a collision, although the conductor subsequently failed in his duty to see that the brakeman went back to signal the approaching train. *Culp Jr* v. *International & G. N. R. Co.* (1897) 90 Tex. 627, 40 S. W. 388. Affirming (1897; Tex. Civ. App.) 38 S. W. 848.

A railroad employee who voluntarily places himself in front of moving cars while a kicking switch is being made cannot recover for injuries caused thereby, on the ground that the company had failed to make a rule prohibiting kicking switches unless absolutely necessary. *Sheets* v. *Chicago & L. Coal R. Co.* (1894) 139 Ind. 682, 39 N. E. 151.

Failure of a railroad company to give an employee at work on its tracks notice of the approach of a train, and the running of the train at a prohibited rate of speed, does not render the company liable for the death of such employee, where he at first got out of the way, and afterwards got in front of the engine when it was only a few feet distant. *East St. Louis Connecting R. Co.* v. *Eggman* (1895) 58 Ill. App. 69.

In *Gibson* v. *Oregon Short Line R. Co.* (1893) 23 Or. 493, 32 Pac. 295, it was contended that the rules to protect track walkers from the dangers of an approaching train, while in the discharge of their duties, were defective in not providing that the engines should whistle at frequent intervals before approaching bridges or trestles on which trackmen might be walking. It was held, however, upon the evidence disclosed by the record, that the injury was not owing either to the fact that the engine did not whistle, as required by the rules, or to the fact that the rules were defective in not requiring the engine to whistle at more frequent intervals, inasmuch as the plaintiff saw the approaching train half a mile ahead, and had ample time to retreat or step from the bridge to the cars, and there remain in safety until the train passed.

A servant cannot recover on the ground that the drawheads of tw
which he had to couple in the ya
a manufacturing company were
ferent heights, where the evidence
that the cause of the accident
he failed to withdraw his hand q
enough, after the coupling had b
cessfully made. *Dolan* v. *Rutl
Co.* (1901) 62 App. Div. 545, 71
Supp. 145.

Although contributory negligen
not predicable merely of the act
tempting to rescue an assistant fr
dangerous position in which he had
placed by reason of the defective
tion of a belt, yet a servant who re
an injury under such circumstance
not be allowed to recover, where
shown that the accident would not
happened but for the negligence of
employees in attempting to place
belt on a pulley without instruc
and without its being in the li
their duty. *Sann* v. *H. W. Johns
Co.* (1897) 16 App. Div. 252, 44 N
Supp. 641.

Where the evidence showed that
employee in a laundry was at work
an ironing machine which was op
by the pressure of her feet on a tre
throwing it into and out of g
control of the power operating the l
dry; that, in operating the machine
clothing being ironed became wrap
about the rollers of the machine;
that, while endeavoring to disengage
without removing her feet from
treadle, her hand was drawn between
rollers and burned, the pressure of
feet on the treadle of the machine w
held to be the cause of her injury, a
that she could not recover. *Doolittle
Pfaff* (1900) 92 Ill. App. 301.

An employee ordered by a foreman
assist a porter in loading boxes of gla
and injured by several boxes of gl
which the porter directed him to su
port falling upon him, cannot recov
of his employer on the ground that a
insufficient number of men were em
ployed to do the work, when there w
several employees handling boxes ne
by, and no request for assistance wa

observant. That is to say, the master's subsequent breach of duty i in law, regarded as the proximate cause of the injury, if he or his representative had actual or constructive notice of the abnormal peril introduced into the plaintiff's environment by the careless performance of the details of the work, and those precautions which a prudent man would have taken under the circumstances were omitted. See, generally, chapters X., XI., *ante*.) In this point of view the injured servant may recover on the ground that he was not warned of the

made by the plaintiff or by the porter. *Roberts* v. *Bache* (1893) 69 Hun, 255, 23 N. Y. Supp. 502.

It has been held that there was a failure to prove that the plaintiff's own heedlessness was not the cause of the injury, where the evidence was to the effect that the defendant's dye room contained four vats, each 4 feet long by 5 wide, and 2 feet 7 inches in height above a planking which circled the vat at the floor; that the planks were 8 to 10 inches wide, lying flatly on the floor, and leveled off from the vat; that there was an open frame, fitted with slats, in the vat, and a hoisting gear connected with it, by which the frame loaded with wool was lowered into and raised out of the hot dye; that to raise the frame up from the vat, two men (plaintiff and another) had to connect certain hooks and rings together in the gearing above the vat; and that, while they were leaning over the vat, on opposite sides of it, in an attempt to effect the coupling, the plaintiff slipped on the wet floor, fell into the vat, and was badly scalded. *Bessey* v. *Norichawanick Co.* (1900) 94 Me. 61, 46 Atl. 806.

The negligence of a master in failing to sufficiently caution a youth as to the proper method of operating a planer and in instructing him to operate it in a particularly hazardous manner does not render him liable for injuries to the latter while so employed, where he was guilty of contributory negligence in allowing his attention to be diverted to some girls who were passing. *Adams* v. *Clymer* (1893) 1 Marv. (Del.) 80, 36 Atl. 1104.

No recovery can be had under the English factory act of 1878 for the death of a child, caused by her own deliberate act in removing a board set up for the special purpose of guarding moving machinery, even though her employment under the circumstances was a violation of the act. Between such violation and such an accident there is no legal connection. *Morris* v. *Beaseley* (1895) 22 Sc. Sess. Cas. 4th series, 355.

The breach of a statutory provision prohibiting or regulating the employment of children will not render the master liable for an injury resulting from a risk which the child in question comprehended, and could have avoided, if he had exercised ordinary care. *Evans* v. *American Iron & Tube Co.* (1890) 42 Fed. 519.

The violation of the Michigan statute prohibiting the employment of children under fourteen years of age without the written permission of the parent or guardian will not make an employer liable for injuries to a child from falling into machinery of which he knew the danger, in a scuffle between him and another boy. *Burck* v. *Michigan Bolt & Nut Works* (1896) 111 Mich. 129, 69 N. W. 254.

The evidence tends to show that an employee properly latched the lever of a movable car used to convey molten slag from a furnace to a dump, where the lever remained in place while the car was drawn a distance of 20 rods upon a side over a rough track, and the construction of the appliance is such that it must dump instantly when the latch is released. *Forker* v. *Buffalo Furnace Co.* (1899) 41 App. Div. 84, 58 N. Y. Supp. 223, Appeal Dismissed in 160 N. Y. 665, 55 N. E. 1095.

No action can be maintained for a breach of a statute requiring mine owners to fence the tops of shafts securely, where it is shown that the servant's injury would not have been received if he had been paying proper attention to what he was doing. *Spica* v. *Osage Coal & Min. Co.* (1887) 88 Mo. 68.

The master's knowledge of the incompetency of the culpable servant is immaterial, where the efficient cause of the injury is the negligence of the plaintiff himself in voluntarily and knowingly exposing himself to the danger created by the act of the incompetent servant.

existence of the peril in question,[1] or on the ground that the physi conditions were not so altered as to remove that peril.[2]

Sheets v. *Chicago & I. Coal R. Co.* (1891) 139 Ind. 682, 39 N. E. 154, where a brakeman was killed in coupling cars which he knew to be moving at a dangerous rate of speed, and it was held that the master was not liable, although he knew that the engineer was unfit for his position.

[1] *Stoumbridge* v. *Brooklyn City R. Co.* (1896) 9 App. Div. 129, 41 N. Y. Supp. 128.

[2] "If a part of the road should become unsafe because of the neglect of such employees to make repairs, and should so continue for a length of time sufficient to induce the presumption that the company knew of it, or ought to have known of it, then it is negligent and careless, and is liable to other employees for injuries resulting therefrom." *Howd* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178.

Where it appears that an employee having general charge of the tracks of a railroad company had notice that an accident had previously occurred at the place where the plaintiff, a brakeman, was injured it is error to give instructions implying that the company is not liable on the ground that the neglect to repair the track was that of the section foreman, a fellow servant of the plaintiff. Such an instruction fails to take into account the possibility of the injury being due to the company's breach of its nondelegable duties of inspecting its track, and repairing it after notice that it is defective. *Anderson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585.

A railway company is liable if it has improperly suffered a deposit of sand to remain near the track, if the fact of its being there had been, or ought to have been, known to the corporate agents. *Robinson* v. *Houston & T. C. R. Co.* (1877) 46 Tex. 540 (conceded).

The fact that it was the plaintiff's fellow servants who erected a derrick so close to a railway track as to produce a dangerous obstruction if it fell will not excuse the company for injuries due to its falling, if it had suffered the apparatus to remain standing for an unreasonable length of time. *Holden* v. *Fitchburg R. Co.* (1880) 129 Mass. 268, 37 Am. Rep. 343.

A railway company may be held liable if a pile of ashes has been left so long on the track that the higher officials are chargeable with knowledge of conditions. *Hughes* v. *Boston & N. R. Co.* (1880) 27 Minn. 137, 6 N. 553 (evidence held not to justify inference of knowledge).

A railway company which once have known of the defective con of a plank crossing is not excused by fact that it has furnished the sec foreman with materials, and instru him to make repairs. *Pluber* v. *Shore & M. S. R. Co.* (1890) 121 M 212, 80 N. W. 23.

A railway company is liable for i ries caused by defects in a bridge, w it failed to repair after being not of their existence. *Mansfield Coa Coke Co.* v. *McEnery* (1879) 91 Pa. 36 Am. Rep. 662.

The fact that the improper adj ment of a brake rod, after loading a was due to the negligence of a coserv will not excuse the company w there was afterwards an ample op tunity for inspection. *Galveston, S. A. R. Co.* v. *Templeton* (1894) Tex. 42, 26 S. W. 1066.

A laborer injured by the fall steel ingot from a mass of such ing carelessly piled by his coservants, recover of the employer, if the e or his agents knew of the dangerous dition of the pile. *Nash* v. *Nashua & Steel Co.* (1882) 62 N. H. 406.

An employer whose duty to an ployee engaged in dressing stone in stoneyard requires him to place stone on a solid and steady surface, cure and safe to work upon and ab cannot escape liability for an injury the employee, caused by the falling on him of a stone next to that which he is working, negligently set on its edge, on the ground that omission occurred through the fault a fellow servant. *Bloodin* v. *Quarry Co.* (1894) 11 Ind. App. N. E. 812. It was considered that stone which was shown to have been securely placed and negligently suffe to remain in that condition, in c oxinity to where the appellant at work, was as much a part of place where such work was being as would have been a dangerous pit of which the plaintiff had not been prised."

In *The Frank and Willie* (1891) Fed. 494, the evidence showed that mate, after notice of the dangerous

812. — or between the negligence of the plaintiff himself and the injury.—The employer's liability cases which illustrate the rule that the negligence of the injured servant will not preclude him from recovery if the actual proximate cause of the injury was a subsequent

dition of a pile of lumber, which his own unskilfulness or negligence had brought about, and after complaint made at least an hour before the accident, refused to take the usual precautions to make the pile safe, and, in effect, required the libellant to continue work in this dangerous situation, the court said: "This was a breach of a duty owed by the ship and owners to the seaman, for which the ship and owners are liable. . . . The master was absent and the mate was not only temporarily in command, but, as mate, he was the officer having charge in unloading the cargo,—the representative of the ship and owners in the supervision of that work. His attention was specially called to the dangerous situation, its correction was requested, and the libellant was practically helpless. I do not hold the ship liable for the mate's mere negligence as a fellow workman in producing the dangerous situation, but for his refusal to remedy it when complaint was made, and the danger pointed out to him."

. . . negligence of a fellow servant in using insufficient material for, or in putting up, a scaffold from the falling of which a carpenter sustained injury, will not defeat a recovery, if the employer or his superior servant having charge of the construction of the scaffold was informed that it was not safe. *Davies* v. *Griffith* (1892) 27 Ohio L. J. 180.

In *Nereu* v. *Sears* (1892) 155 Mass. 303, 29 N. E. 472, it was held that one sued for personal injuries to a stone mason in his employ, caused by the explosion of dynamite left unexploded in a block of stone which plaintiff was dressing, is chargeable with knowledge of those facts as to the use of dynamite at his quarry which he either knew or ought to have known. His employment of competent quarrymen, and his furnishing them with proper means for preventing any dangers consequent on the use of dynamite, would not, it was said, justify him in relying on his actual want of knowledge that there had been carelessness at the quarry, as an excuse for furnishing a dangerous stone for the plaintiff's use, if, knowing all that had happened at the quarry, he would then have had reason to believe that unexploded cartridges might remain in the blocks removed therefrom. An instruction was, therefore, held correct which left the jury to say whether, considering the knowledge which the master had, or ought to have had, of what occurred at the quarry, each block should have been examined for dynamite when it was transported from the quarry or first appropriated for the work on which the plaintiff was engaged.

In *Coates* v. *Boston & M. R. Co.* (1891) 153 Mass. 297, 10 L. R. A. 769, 26 N. E. 861, the court, in commenting upon evidence that a jaw-strap had been gone for some time from which it might be inferred that the company knew of its absence, said: "We do not put our decision on the identification of master and servant, and a union of the knowledge of the corporation and the command of the conductor in one person, by a fiction. But we think the jury might have found, at least, this negligence on the part of the corporation,—that, knowing the condition of the car, it put a conductor there with men under him, having reasonable ground to anticipate that such orders would be given as were given, without warning either him or the men."

The fact that the floor of a mill has been in a dangerous condition for three hours by reason of grease left thereon by employees in the mill, is insufficient to charge the master with notice of the defect, so as to render him liable for failure to furnish safe premises. *Burke* v. *National India-Rubber Co.* (1893) 21 R. I. 446, 44 Atl. 397.

See also *Rogers* v. *Leyden* (1890) 127 Ind. 50, 26 N. E. 240 (failure after notice of conditions, to secure the roof of a mine, the unsafety of which was due to the negligence of the "mine boss"); *Lehigh Valley Coal Co.* v. *Warrick* (1898) 28 C. C. A. 540, 55 U. S. App. 637, 84 Fed. 866; *Walker* v. *Chicago & G. T. R. Co.* (1892) 90 Mich. 239, 51 N. W. 370; *Dodge* v. *Boston & A. R. Co.* (1892) 155 Mass. 148, 29 N. E. 1086; *Yaskow* v. *Gilbert* (1896) 165 Mass. 443, 43 N. E. 199; *White* v. *Eidlitz*

act of negligence on the part of the master himself or of an em
for whose defaults he was responsible, have been collected in
ante. The right to maintain the action under such circumst
established by evidence which warrants the conclusion that
in question was a culpable one, and that if it had not been com
the injury would not have been received.[1]

C. Concurrent causes.

813. Generally.— Where several causes concur to produce
results, any of them may be termed "proximate," provided it a
to have been an efficient cause.[1] The general rule applicable
cases illustrating this situation, except those in which the contri
negligence of the servant himself is involved (see § 810, *supr*

(1897) 19 App. Div. 256, 46 N. Y. Supp. 184; *Cowan* v. *Umbagog Pulp Co.* (1897) 91 Me. 26, 39 Atl. 310.

In *Bryant* v. *New York C. & H. R. R. Co.* (1891) 81 Hun. 154, 30 N. Y. Supp. 737, the material elements discussed were the engineer's violation of a rule as to speed at switches, and the company's knowledge of habitual violation of such rule, and failure to take appropriate precautions. The actual decision was that the company was not negligent.

A nonsuit is erroneous where plaintiff offered to prove that defendant knew of the insecurity of the place of work, caused by the coservant's negligence. *Wallin* v. *California Horseshoe Co.* (1894) 105 Cal. 77, 38 Pac. 535.

[1] Leaving a switch turned upon a track on which freight cars are standing, in the ordinary manner, does not render the railroad company liable for the death of a section hand, caused by his jumping off a "push car" while going down a steep grade to avoid running into the freight cars, where the switch is not ordinarily used by a push car. In the ordinary use of such a car it could make no difference upon which track the switch was turned, as it was commonly lifted from one track to another. *York* v. *Kansas City, C. & S. R. Co.* (1893) 117 Mo. 405, 22 S. W. 1081.

A railroad company is not liable for an injury to an employee who was guilty of contributory negligence, merely because other employees, not fellow servants, saw the former after he had placed himself in a perilous position, but not under such circumstances as necessarily to apprise them of t
that his position was perilous
souri, K. & T. R. Co. v. *Collins*

[1] *Young* v. *Syracuse, B. & N.*
(1899) 45 App. Div. 296, 61 N. Y.
202.

that, in order to establish the right of action, it is merely necessary to show that one of the co-operating causes of the injury was a culpable act or omission for which the master was responsible.[2] This rule holds good whether the other causes were also defaults for which he was responsible,[3] or were due to some event or some conditions for which he was not required to answer.[4]

[2] "If the injury is the result of the negligence of the defendant and of a third person, or if an inevitable accident or an inanimate thing has contributed with the negligence of the defendant, the plaintiff may recover if the negligence of the defendant was an efficient cause of the injury. *Pullman Palace Car Co.* v. *Leach* (1892) 143 Ill. 245, 18 L. R. A. 215, 32 N. E. 285.

"It is no defense in an action for a negligent injury that the negligence of a third person, or an inevitable accident, or an inanimate thing contributed to cause the injury of the plaintiff, if the negligence of the defendant was the efficient cause of the injury." *The Joseph B. Thomas* (1897) 81 Fed. 578. In this case it was expressly decided that the rule is the same in admiralty as it is at common law.

"If the negligence of the company contributed to, it must necessarily have been an immediate cause of, the accident, and it is no defense that another was likewise guilty of wrong." *Grand Trunk R. Co.* v. *Cummings* (1882) 106 U. S. 700, 27 L. ed. 266, 1 Sup. Ct. Rep. 493.

"One is liable for an injury caused by the concurring negligence of himself and another to the same extent as for one caused entirely by his own negligence." *St. Louis, I. M. & S. R. Co.* v. *Needham* (1895) 16 C. C. A. 457, 32 U. S. App. 635, 69 Fed. 823.

Where the evidence was sufficient to support a finding that the negligence alleged was a proximate cause of an injury to a servant, without which the injury could not have occurred, it was error not to submit the case to the jury, though another defect was also a proximate cause of such injury. *Scandell* v. *Columbia Constr. Co.* (1900) 50 App. Div. 512, 64 N. Y. Supp. 232.

In *Murtaugh* v. *New York C. & H. R. R. Co.* (1888) 49 Hun, 456, 3 N. Y. Supp. 483, the following charge was held to present the doctrine of concurrent causes erroneously: "If the accident was the joint result of the internal construction [of the wheel] and of its being out of true, the joint result of those two causes, then the fact that the company might not or would not be responsible for it because of its being out of true would not relieve the company from the liability with reference to the other. That is to say, if a result happens jointly from two causes, and the defendant is chargeable with one of those causes, then, so far as that point could be concerned, so far the defendant would be liable unless the plaintiff himself was chargeable with the other cause. . . . The vice of this charge," said the court, "rests in the fact that the jury were instructed that the defendant was liable to the plaintiff for any act of negligence, which, concurring with another act for which it was not liable, produced the plaintiff's injury, although the accident might have occurred without the negligence for which defendant was liable."

[3] Proof of the negligence of a railroad company in failing to furnish a reasonably safe truck, which is charged in the petition as negligence and as the proximate cause of injury to plaintiff, is sufficient without proof of other acts of negligence which are also alleged to have been proximate causes of the injury. *Galveston, H. & S. A. R. Co.* v. *Tutts* (1897; Tex. Civ. App.) 42 S. W. 255.

"That the jumping of a tender from the track was not due to the company's negligence does not exculpate it from the liability for damages for the death of a brakeman caused by the derailment of the train, where the train would not have been derailed but for the rotten cross-ties and the consequent spreading of the tracks. *Wright* v. *Southern R. Co.* (1898) 122 N. C. 959, 30 S. E. 318.

If the accident was caused by both a patent and a latent defect the plaintiff is entitled to recover. *Hanary* v. *Parbury* (1887) cited in Queensland Digest, col. 177.

Where the engine of another railroad was called on to assist defendant's train, as was customary, and the negligence of the other company co-operated

814. Master liable where his own antecedent negligence and a quent delinquency of a coservant are both efficient causes of the

—*a. Generally.*— The most numerous instances of the predic adverted to at the end of the last section are furnished by th

with that of defendant to cause an accident whereby defendant's servant sustained injuries, defendant was held to be severally liable for such injuries as a joint tortfeasor. *Galveston, H. & S. A. Ry. Co.* v. *Adams* (1900) Tex. Civ. App.) 55 S. W. 803, Affirmed in 94 Tex. 160, 58 S. W. 831 (this point not discussed).

The fact that a switch through which a train ran was displaced by a trespasser will not absolve the company, where it appears that the accident would not have happened if a light had been replaced at the switch when it was brought into use again after having been closed for a time. *Town* v. *Michigan C. R. Co.* (1890) 84 Mich. 214, 47 N. W. 665.

A railroad company is liable to an employee for injuries caused by the escape of a freight car from a side track onto the main track, whereby a collision occurred, if the car was negligently allowed to remain without sufficient braking or blocking, though some unknown person contributed to the accident by unbraking the car. *Galveston, H. & S. A. R. Co.* v. *Johnson* (1900) 24 Tex. Civ. App. 180, 58 S. W. 622, holding that an instruction exonerating the company from liability if the jury found that there had been interference by a third person had been properly refused.

The fact that elevator cables put in by an independent contractor were pulled out from their fastenings was not alone the proximate cause of an injury sustained by an employee by the fall of the car, where the safety device was in a defective condition, and refused to work; but both of such defects contributed proximately to the injury. *McGregor* v. *Reid, M. & Co.* (1899) 178 Ill. 464, 69 Am. St. Rep. 332, 53 N. E. 323, Reversing (1898) 76 Ill. App. 610.

Recovery was allowed where a third person moved an elevator car to a higher floor, and the gate of the shaft, being in bad repair, did not close, as it should have done, when the car began to ascend, the consequence being that the plaintiff, not knowing that the car had moved, fell into the shaft. *Larkin* v. *Washington Mills Co.* (1899) 45 App. Div. 6, 61 N. Y. Supp. 93.

In a case where a complaint alleged that plaintiff was injured by the rock from the roof of a mine defendant failed to furnish a safe place for plaintiff to work, ligently allowed the roof of the remain in an unsafe condition failed to properly brace it, and was liable to cave in unless supported, and the evidence the roof of the mine was in a dangerous condition, but the slate was immediately caused by tempt of a mining engineer to a small portion of the slate in plug for a sight, it was held limit plaintiff's right of recover showing that the roof fell from weight, and not in connection wi other cause. *Freeman* v. *Sand Coal Co.* (1901) 25 Mont. 191, 347. The instruction was held misleading on the ground that the plaint did not, by its own terms logical inference, exclude all cept gravity pulling down unsup material.

In the following cases the servan held entitled to recover, where the ter's negligence co-operated wit event falling within the category cidents: *Taylor* v. *Felsing* (1896 Ill. 331, 45 N. E. 161 (injury partly by failure to provide mea throwing machinery out of gear partly by accidental slip); *Ro Mayfield* (1891) 82 Tex. 234, 18 305 (defective culvert under a r gave way, owing to the breaking dam on adjoining property abov culvert); *Bonner* v. *Wingate* (189 Tex. 333, 14 S. W. 790 (a case gr out of the same accident); *Hus Jacob Dold Packing Co.* (1894) 5 App. 322 (hot-water tank left unco —plaintiff slipped); *Springside Min Co.* v. *Grogan* (1896) 67 Ill. 487 (owner of a coal mine, who n gently left the mouth of an air to the mine unprotected,—held li for the death of an employee caus a barrel falling down the shaft though a sudden and violent gus wind contributed to the accident); *York, T. & M. R. Co.* v. *Green* (1 90 Tex. 57, 38 S. W. 31, Affirmin regard to this particular point (1 Tex. Civ. App.) 36 S. W. 812 (rail

in which one of the causes of the injury was the negligence of a co-servant of the injured person. It is well settled that a servant's action is not barred by the defense of common employment, where a breach of duty on the master's part contributed as a proximate cause to the injury.[1]

In many of the cases cited in chapter XXXII., *ante*, this rule is ad-

company liable for an injury to an engineer in an accident caused by collision with a yearling on the track, co-operating with a defect in the track); *Texas & P. R. Co.* v. *Mogrill* (1897) 15 Tex. Civ. App. 355, 40 S. W. 188 (railroad company held liable for the death of an employee caused by the tipping over of an engine, because of the rottenness of the railroad ties, although it had previously been derailed by collision with a horse without any negligence on the part of the company).

Where plaintiff was injured in a collision between a passenger train and a freight car which had been blown out of a siding by a high wind, it is proper to charge the jury that, if they find that the negligence of defendant in leaving the car on the siding without its wheels blocked or brakes set, and the high and unprecedented wind storm, were concurring causes of the collision and plaintiff's injuries, then their verdict should be for the plaintiff. *Galveston, H. & S. A. R. Co.* v. *Lynch* (1899) 22 Tex. Civ. App. 336, 55 S. W. 389.

Where, in an action for the death of plaintiff's father by failing to supply suitable props to support the roof of the mine where he worked, there was some evidence that deceased had disease of the heart, which might cause his death if he received a severe shock, an instruction that if the jury believed that deceased had heart disease, and died of it, they must find for defendant, though they believed the fall of the roof hastened his death, was properly refused, since, if the fall of the roof produced a shock from which deceased did not rally, such fall was the proximate cause of death. *O'Fallon Coal Co.* v. *Laquet* (1900) 89 Ill. App. 13.

Where an employee is injured while engaged in an unusually dangerous service (here the repairing of cars) there is always a preliminary question to be settled, *viz.*, whether the master has used "all reasonable and necessary means to protect him against any superadded danger that might be reasonably expected to arise from extrinsic causes." *Missouri P. R. Co.* v. *Watts* (1885) 63 Tex. 549.

The rule that a servant takes the risk of the service, including the negligence of the coservants, presupposes that the master has procured proper servants and proper machinery for the conduct of the work; and if the master is negligent in these respects, and injury results to a servant from such neglect, the master is liable, although the immediate negligence is that of the fellow servant. *Craig* v. *Chicago & A. R. Co.* (1893) 54 Mo. App. 523.

Whenever the evidence suggests that the injury may have been caused by the combined operation of the negligence of the master and of a coemployee, the proper course is to submit the question of the master's liability to the jury under proper instructions. *Stringham* v. *Stewart* (1885) 100 N. Y. 516, 3 N. E. 575. Reversing on this ground (1882) 64 How. Pr. 5.

In *Grand Trunk R. Co.* v. *Cummings* (1882) 106 U. S. 700, 27 L. ed. 266, 1 Sup. Ct. Rep. 493, an instruction was upheld which in effect declared that if the negligence of the defendant company contributed to, that is to say, had a share in producing,—the injury, the company was liable, even though the negligence of a fellow servant of the plaintiff was contributory also.

It is error to refuse an instruction embodying the principle stated in the text, if the evidence is susceptible of the construction that there was concurrent negligence. *Haupin* v. *Texas & P. R. Co.* (1900) 40 C. C. A. 234, 99 Fed. 49.

When it is alleged in the declaration that the plaintiff was injured by reason of a defective switch, and one of the defenses was that he was himself in fault in that he was violating the rules of the company by running at a forbidden rate of speed when he was passing switch, it is error to charge the jury that, if this increased speed was caused by the fault of other employees of the company, they should find for the plain-

verted to under what may be called its negative aspect, the c
merely stating in the course of their arguments that the evidence
not show any such ground of liability.[2]

tiff. Such a charge puts the case wholly on the question as to who was at fault for the speed with which the cars approached the switch, and leaves out of view altogether the other question, whether the master was at fault as to the switch, and tells the jury to find for the plaintiff if the increased speed was the fault of other employees than the plaintiff's husband. *Georgia R. & Bkg. Co.* v. *Cole* (1871) 52 Ga. 410.

In an action against a railroad for injuries to an employee, caused by a fireman jumping from an engine and striking against plaintiff, where plaintiff based his right of recovery on the negligence of the engineer in failing to obey a signal, and the negligence of defendant in equipping the train with insufficient brakes, the refusal of an instruction that, if the fireman jumped because of the negligence of a fellow servant of plaintiff (fireman) in displaying an improper signal, plaintiff could not recover, is not erroneous, since such instruction did not submit the question of the negligence of the engineer and the lack of sufficient brakes. *Galveston, H. & S. A. R. Co.* v. *Jackson* (1900) 93 Tex. 262, 54 S. W. 1023, Affirming (1899; Tex. Civ. App.) 53 S. W. 81.

In an action by a brakeman against a railroad company for injuries, an instruction that, if the negligence of a fellow servant in signaling the engineer to back the train concurred with the negligence of defendant in failing to maintain safe and sound couplings, in producing plaintiff's injury, the concurring negligence of the fellow servant did not affect the liability of the company, and it was liable for the injuries as theirs, if only was at fault, is properly refused, since it would allow a recovery without showing that the master's negligence proximately contributed to the injury. *McCoy* v. *Norfolk & C. R. Co.* (1901) 99 Va. 132, 37 S. E. 788.

On the other hand it is not error to refuse an instruction disregarding the rule stated above, where the facts are such that it may render the master liable. *Union Show Case Co.* v. *Blindauer* (1898) 75 Ill. App. 358; *International & G. N. R. Co.* v. *Zapp* (1899; Tex. Civ. App.) 49 S. W. 673; *Dodd* v. *Bell* (1897) 15 App. Div. 258, 44 N. Y. Supp. 198.

Where an accident is partly c
ly the fact that an appli
fective and partly by the
the plaintiff's fellow servants,
struction that plaintiff could not r
for any act of theirs is properly
Ohio & M. R. Co. v. *Stein*
Ind. 61, 39 N. E. 216; *Mor*
Hughes (1893) 65 Vt. 553, 27 Atl

An instruction to the effect th
the excessive speed of the train
uted to cause an accident, the
could not recover, is rightly
where an essential cause of the
was a defective wheel. *Houston*
C. R. Co.* v. *Kelly* (1896; Tex.
App.) 35 S. W. 878.

Where the plaintiff avers that he
injured through the negligence of
road receivers in failing to
sate track, and adduces evidence
port of his averment, it is not er
refuse an instruction to the
he cannot recover "if his injury
caused by the negligence of
neer." The word "solely" should
serted before "caused" to make
charge proper. *Missouri, K. & T.
Co.* v. *Woods* (1894; Tex. Civ. App.
S. W. 741.

There is no error in a charge to
effect that the plaintiff, a fire
entitled to recover for injuries
by the derailment of his engine, "if
of the proximate causes of the
without which it would not have
pened," was the unsafe condition of
wheel or a brake, "notwithstanding
negligence of the engineer or brak
may have contributed to the accident."
Such a charge does not amount to a
rection to find for the plaintiff und
the supposed circumstances, "although
the negligence of the fellow servant
may have caused the injury." *St.
Louis & S. F. R. Co.* v. *McClain* (1893
80 Tex. 85, 15 S. W. 789.

An instruction that a brakeman, i
jured while coupling, could not recover
if his injury was caused by the neg
gence of the engineer, and that no
bility attached unless the "defendan
alone was negligent," and "its negl
gence produced the injury," is sufficien
ly favorable to the defendant. *Wrig
v. Southern P. Co.* (1896) 14 Utah, 58
46 Pac. 374.

[2] For instances of this incidental re

In its positive form the rule has been enunciated in various ways. The subjoined statements will serve as sufficient examples of the phraseology employed.[3]

ognition of the rule with respect to the hiring of competent servants, see *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 13 Week. Rep. 111; *M'Carthy* v. *Bristol Shipowners' Co.* (1883) Ir. L. R. 10 C. L. 384; *Colton* v. *Richards* (1878) 123 Mass. 484; *Darst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102; *Crawford* v. *Stewart* (1887; Pa.) 6 Cent. Rep. 140, 8 Atl. 5; *Benn* v. *Null* (1883) 65 Iowa, 407, 21 N. W. 700; *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528.

The fact that the master did not fail to supply a sufficient amount of materials for the preparation of the instrumentalities, supposing this to be the limit of his obligation, is referred to in *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 56 Am. St. Rep. 630, 45 N. E. 869; *McConc* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697; *Crawford* v. *Stewart* (1887; Pa.) 6 Cent. Rep. 140, 8 Atl. 5; *Kelley* v. *Norcross* (1877) 121 Mass. 508; *Brady* v. *Norcross* (1899) 172 Mass. 331, 52 N. E. 528; *Donnelly* v. *Brown* (1887) 43 Hun, 470.

"It was the duty of Walker, as employer or principal, to provide the men employed to build this bridge with suitable machinery and appliances, to furnish materials sufficient in quantity and suitable in character, to employ men who were reasonably competent to do the work for which they were wanted, and to give them the benefit of the services of a reasonably competent foreman. All this, as we understand the evidence, was done. If so, the employer had filled the measure of his legal liability to his workmen." *Ross* v. *Walker* (1891) 139 Pa. 32, 23 Am. St. Rep. 160, 21 Atl. 157, 159.

[3] "Negligence of a servant does not excuse the master from liability to a coservant for an injury which would not have happened had the master performed his duty." *Coppins* v. *New York C. & H. R. R. Co.* (1890) 122 N. Y. 557, 19 Am. St. Rep. 523, 25 N. E. 915, Affirming (1888) 48 Hun, 292; *Cheeney* v. *Ocean S. S. Co.* (1893) 92 Ga. 732, 44 Am. St. Rep. 113, 19 S. E. 33.

"That a fellow servant may, by care and caution, operate a defective and dangerous machine so as not to produce an injury to others, does not exempt the master from his liability for an omission to perform the duty which the law imposes upon him of exercising reasonable care and prudence in furnishing safe and suitable appliances for the use of his servants. The rule which excuses the master under such circumstances presupposes that he has performed the obligations which the law imposes upon him, and that the injury occurs solely through the negligence of the coemployee." *Stringham* v. *Stewart* (1885) 100 N. Y. 516, 3 N. E. 575.

"Where the injury to the servant has been occasioned by the default of a fellow servant, concurring with the negligence of the master, the latter is liable as though he, only, were at fault." *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342.

"We are not prepared to say that, if one uses a dangerous instrumentality without the safeguards which science and experience suggest, or the positive rules of law require, he is not to be responsible for an injury resulting from such use, because the negligence of one of his servants may have contributed to the result, or because a possible vigilance of the servant might have prevented the injury." *Coyzer* v. *Taylor* (1857) 10 Gray, 274, 69 Am. Dec. 317.

Contributory negligence of a fellow servant does not preclude recovery for an injury to an employee of which the proximate cause was the failure of the employer to furnish a suitable appliance. *Atchison, T. & S. F. R. Co.* v. *Lannigan* (1895) 56 Kan. 109, 42 Pac. 343.

A master is not relieved from liability for injury to a servant by the mere fact that the injury was partly caused by the negligence of a fellow servant, if it clearly appears that the accident would not have happened had not master himself been negligent. *Northern P. R. Co.* v. *P* (1885) 15 C. C. A. 52, 29 U. S. App. 583, 67 F. 881.

A master to be exempt from liability to a servant for negligence of fellow servants must himself have been free from negligence. *Baltimore & O. R. Co.* v. *McKenzie* (1885) 81 Va. 71.

Where the negligence of the master is an efficient cause of the servant's in-

Any complaint is good against demurrer if it alleges facts rea
ably susceptible of the construction that the injury was caused
the combined negligence of the master and a fellow servant.[1]

In order to establish a right to recover upon this theory, the serv
must show that the accident would not have occurred unless the
ter had been negligent,[5] and the jury should be so instructed.[6] A
charge the effect of which is to induce in the minds of the jury
belief that, if the master was guilty of any negligence whatever,
is liable, even though the accident would have occurred without s
negligence, is erroneous.[7]

b. Illustrative cases.—The cases cited below, in which the pr
ciples explained in the last section were applied, are classified un
headings indicative of the nature of the antecedent breach of duty
the master. The character of the fellow servant's delinquency is a
stated. Where nothing is said expressly as to the result of the de
sions it is to be understood that the servant was held to be entitled
recover.[8]

jury, it is not material how many others are also in fault. *McMahon* v. *Davidson* (1867) 12 Minn. 357, Gil. 232.

A master is not relieved from responsibility by the mere fact that a coservant knew of the abnormal conditions and did not report them. *Illinois C. R. Co.* v. *Swisher* (1895) 61 Ill. App. 611; *Mexican Nat. R. Co.* v. *Musette* (1894) 7 Tex. Civ. App. 169, 24 S. W. 529; *Noble* v. *Bessemer S. S. Co.* (1901) 127 Mich. 103, 54 L. R. A. 456, 89 Am. St. Rep. 461, 86 N. W. 520.

[4] *Young* v. *Shickle, H. & H. Iron Co.* (1890) 103 Mo. 324, 15 S. W. 771 (complaint held sufficient which showed that a platform was not protected by a railing and that a fellow servant ran against plaintiff and knocked him off).

A complaint which alleges in substance that a following train struck and splintered the car in which the plaintiff, a brakeman, was traveling, and that such car was improperly constructed, in that it had no doors or windows at the end, or cupola on the top, through which approaching danger could be seen, —is demurrable, since it fails to show in what way the construction of the car, as well as the negligence of the servants on the following train, was an efficient cause of the injury. For aught that appears from the averments, such an accident might have happened if the company had furnished the kind of car suggested by the plaintiff. *Lutz* v. *Atlantic & P. R. Co.* (1892) 6 N. M. 496, L. R. A. 819, 30 Pac. 912 (two judges dissented).

[5] *Whittaker* v. *Delaware & H. Co.* Co. (1888) 49 Hun, 400, 3 N. Y. Supp. 576.

[6] *McCabe* v. *Brainard* (1897) 17 App. Div. 45, 44 N. Y. Supp. 964.

[7] *Hall* v. *Cooperstown & S. V. R. C.* (1888) 49 Hun, 376, 3 N. Y. Supp. 58. In this case the court sustained an exception to a charge which was substantially to this effect: That if the jury found that there was negligence on the part of the delinquent coservant, and also negligence on the part of the defendant, then the defendant was liable for the reason that, if the injury was the result partially of the negligence of a coemployee, and partially by the omission of the defendant in not taking the necessary or proper precautions to protect the servant, then the negligence of the coservant would not relieve the defendant.

[8] (a) *Master held liable on the ground of concurrent negligence predicated in respect to an order, or other official act of one who was a vice principal by virtue of his rank.*—(As to the distinction between official and nonofficial acts, see generally, chapter xxix., ante.) Negligence of a fellow servant, which combined with a negligent order of the employer to produce an injury to an employee, will not relieve the employer

815. Master liable where he or his vice principal directed the details of the work.— The doctrine discussed in chapter XXXII., *ante*,

from liability. *Lapo* v. *Walsh* (1898) 98 Wis. 348, 74 N. W. 212; *Pittsburgh, C. & St. L. R. Co.* v. *Henderson* (1882) 37 Ohio St. 540 (by special order of the superintendent, which was unreasonable, a construction train was allowed to stand on the track, and through the negligence of a flagman sent to give warning of the approach of other trains was run into to the injury of a trainman).

A conductor's ordering a train to run by a station where a section foreman is waiting to give information of a defective bridge, after knowledge that there are disastrous floods and washouts upon the road, is the proximate cause of the breaking of the train through such bridge, notwithstanding the engineer fails to see a danger signal near the bridge, and himself stop the train at the bridge, where the engineer may have inferred, or does infer, that the conductor learned there was no more danger ahead and no need to stop and inquire. *Union P. R. Co.* v. *Colbaghan* (1893) 6 C. C. A. 205, 12 U. S. App. 541, 56 Fed. 988. The court said: "The negligence of the engineer was not an intervening cause that interrupted or turned aside the natural sequence of events, or prevented the natural and probable effect of the conductor' negligence. It simply failed to interpose the engineer's care to prevent this probable result, and left the natural sequence of events to flow on undisturbed to the fatal effect. It may be true that if the engineer had obeyed the danger signal on the track, or had seen the damage to the bridge and had stopped the train, the accident would not have happened; but his failure was but the co-existing or succeeding negligence of a servant, which permitted the conductor's breach of duty to work out, undisturbed, the disastrous result of which it was the primary and efficient cause."

A special finding that an injury was caused by the carelessness of a coemployee in assisting the plaintiff to carry out an order involving danger will not justify a court in entering judgment for the defendant in the face of a general verdict for the plaintiff. "It is not the law that, if a master wrongfully puts his servant in danger, to co-operate with another servant, that the carelessness of the latter, co-operating with the danger, discharges the master from responsibility." *Call* v. *Beckstein* (1898) 66 Ill. App. 478.

As a conductor has full control of his train, and is able to stop it if the engineer undertakes to run past a certain station in violation of the time-card rules, a collision which results from such negligence is deemed to be in part attributable to the conductor's breach of duty. *Illinois C. R. Co.* v. *Spencer* (1893) 93 Tenn. 173, 23 S. W. 211.

A railroad company is liable for an injury to an engine hostler caused by the negligence of the yard master in sending him toward with the engine on a track upon which the yard master has thrown some box cars in charge of a brakeman, although the negligence of such brakeman in bringing the cars too close to a switch on which such hostler is directed to take his engine contributes to the injury. *Norfolk & W. R. Co.* v. *Phelps* (1894) 90 Va. 665, 19 S. E. 852.

A railroad company is not liable for injuries sustained by a brakeman ordered by his superior to make a coupling, if the accident was occasioned by the negligence of the engineer or fireman in failing to heed signals; but if their negligence concurred with that of the superior, who had promised to stop the car in time to avoid harm to the brakeman, then the company is liable. *Louisiana Extension R. Co.* v. *Carstens* (1898) 19 Tex. Civ. App. 190, 47 S. W. 36.

An employee ruptured while attempting to support one end of a switch point being unloaded from a car may recover therefor, although the negligence of fellow servants in lifting too quickly contributed thereto, when the negligence of the foreman (a vice principal under the statute), who failed to give assistance as he had been doing, was a concurrent cause of the injury. *Missouri, K. & T. R. Co.* v. *Hannig* (1899) 20 Tex. Civ. App. 649, 49 S. W. 116.

See also *Augusta* v. *Owens* (1904) 111 Ga. 461, 36 S. E. 830 (superintendent negligently ordered plaintiff's fellow servant to do certain work, and the injury was caused immediately by the negligence of that fellow servant); *Davidson* v. *Cornell* (1890) 31 N. Y. S. R. 982, 10 N. Y. Supp. 521. Reversed in (1892) 132 N. Y. 228, 30 N. E. 573, but not on this point (unsafe method of constructing scaffold prescribed—

is manifestly no bar to a servant's action, where the particular
of the work which caused the injury was carried out under the

work negligently carried out by servants); *Norris* v. *Illinois C. R. Co.* (1900) 88 Ill. App. 614 (negligent order of a vice principal co-operated with a nonofficial act—i. e., failure to put out a signal light to warn incoming trains that track was obstructed); *Houston & T. C. R. Co.* v. *White* (1900) 23 Tex. Civ. App. 286, 56 S. W. 2d 4 (foreman of switching crew—a vice principal under Texas statute—signaled to pull a derailed car in the direction of plaintiff; concurring negligence was that of a switchman).

(b)—*in regard to the nonperformance of a statutory duty.*—The following extract from the opinion in *Cayzer* v. *Taylor* (1857) 10 Gray, 274, 69 Am. Dec. 317, is self-explanatory: "The very object and purpose of a safeguard like the fusible plug are protection against the occasional carelessness and negligence of the engineer. It is intended to be in some degree a substitute for his vigilance,—to keep watch if he nods. To say that the master should be responsible for an injury which would not have happened had a safeguard required by law been used, because the engineer was negligent, would be to say, in substance and effect, that he should not be liable at all for an injury resulting from the failure to use it."

See also *Morris* v. *Stanfield* (1898) 81 Ill. App. 264 (boy employed under the statutory age was pulled by a fellow servant into the position where he was injured).

(bb)—*in respect to the nonperformance of a personal, non-delegable duty.*—A railway company has been held liable for injuries caused partly by the negligence of an employee whose duty it was to inspect an appliance, and partly by the negligence of a coservant. *Kansas City, Ft. S. & M. R. Co.* v. *Becker* (1899) 67 Ark. 1, 46 L. R. A. 814, 77 Am. St. Rep. 78, 53 S. W. 406.

See also following subdivisions.

(c)—*in respect to a defective roadbed on railways.*—*Franklin* v. *Winona & St. P. R. Co.* (1887) 37 Minn. 409, 5 Am. St. Rep. 856, 34 N. W. 898 (negligence of railway company in not covering an open culvert where couplings had to be made concurred with negligence of conductor in requiring coupling to be made at that place); *Gulf, C. & S. F. R. Co.* v. *Pettis* (1888) 69 Tex. 689, 7 S. W. 93 (railroad company not excused breach of duty in allowing rotte to remain in its track, by the fa the trackmen were negligent in to notify it in time to avert an ac from the defect; it seems to hav assumed, though the point was n cussed, that the company had con ive knowledge of the defects); *M K. & T. R. Co.* v. *Woods* (1894 Civ. App.) 25 S. W. 741 (defective bed—disregard of signals by engi *Houston & T. C. R. Co.* v. *Kelly* Tex. Civ. App.) 35 S. W. 878 ment due to defective wheel and combined with fast running of tr *Trinity & S. R. Co.* v. *Brown* Tex. Civ. App.) 46 S. W. 926 lowed to accumulate on the track run at a reckless rate of speed); v. *Richmond & D. R. Co.* (1894) 394 (defective rail—undue spe train); *Smith* v. *Memphis & L. R* (1883) 18 Fed. 304 (similar fa *Stetler* v. *Chicago & N. W. R.* (1879) 46 Wis. 497, 1 N. W. 112 49 Wis. 609, 6 N. W. 303 (sim facts); *Morrisey* v. *Hughes* (1893 Vt. 553, 27 Atl. 205 (blocking of at the top of an incline was defect truck running on those rails was negligently).

A railroad company is liable for injuries to a brakeman who, while forming his duty of keeping a pass off the step, was struck by a train another track at a curve where tracks were too close together for safe passage of trains, although the gineer of one of the trains was negli in undertaking to pass at that po *Mulvaney* v. *Brooklyn City R.* (1892) 1 Misc. 425, 21 N. Y. Supp. In *Torian* v. *Richmond & A. R.* (1887) 84 Va. 192, 4 S. E. 339, a secti master was regarded as vice princip in respect to the repair of the track, a as a mere servant in respect to signali trains to slacken speed where the repa were going on. This is the theory the case as explained in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 19 21 S. E. 342.

(d)—*in respect to defective switche —St. Louis, I. M. & S. R. Co.* v. *Needha* (1895) 16 C. C. A. 457, 32 U. S. App. 635, 69 Fed. 823 (injury caused b neglect of a railroad company to main tain a target upon a switch negligently

intendence, or by the direction, of the master himself, or of one of those employees who are deemed to be vice principals by virtue of

left open by fellow servants); *Bennett* v. *Long Island R. Co.* (1897) 24 App. Div. 25, 47 N. Y. Supp. 258 (train operated at excessive speed was run into an open switch not provided with a target); *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342 (fellow servant allowed car to run onto siding through a defective switch, and hurt a car repairer who had not received any warning as to the risks arising from the condition of the switch); *Georgia R. & Bkg. Co.* v. *Oaks* (1874) 52 Ga. 410 (defective switch—negligent management of train); *Chicago & A. R. Co.* v. *House* (1898) 172 Ill. 601, 50 N. E. 154, Affirming (1896) 71 Ill. App. 447 (switch not provided with signal light was left open by coservant and run into by tram moving at an unlawful rate of speed); *Ellingson* v. *Chicago & A. R. Co.* (1895) 60 Mo. App. 679 (switch light was not provided—negligence of brakeman in misplacing switch and signaling for train to come on caused collision); *Monmouth Min. & Mfg. Co.* v. *Erling* (1892) 45 Ill. App. 111 (brakeman injured by the want of a lamp on a switchstand—engineer knew of defect, but failed to impart his knowledge to the plaintiff).

(e)—*in respect to dangerous objects close to railway tracks.*—*Howe* v. *St. Clair* (1891) 8 Tex. Civ. App. 101, 27 S. W. 800 (dangerous objects not removed—train negligently operated); *North Chicago Street R. Co.* v. *Dudgeon* (1899) 83 Ill. App. 528, Affirmed in (1900) 184 Ill. 477, 56 N. E. 796 (pile of stones left near track—gripman started car before plaintiff had got a proper footing thereon).

The fact that a track walker has failed to do his duty in giving notice of a possible danger to trains from the falling of a rock near the track will not excuse the company if it does actually fall. The company being bound to remove such a danger, a breach of its duty in this respect is not to be condoned because the servant deputed to look out for the danger has also failed in his duty. *Bean* v. *Western N. C. R. Co.* (1890) 107 N. C. 731, 12 S. E. 600.

Compare also last case cited in preceding subdivision, and *Gulf, C. & S. F. R. Co.* v. *Pettis* (1888) 69 Tex. 689, 7 S. W. 93, subd. C, *supra*.

(f)—*in respect to defective bridges.*—*Elmer* v. *Locke* (1884) 135 Mass. 575 (defective trestle gave way under train allowed to escape from control); *Carney* v. *Cuttaquet R. Co.* (1890) 29 N. B. 425 (road master ordered train to be taken over a defective bridge).

(g)—*in respect to the improper making up of trains.* *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401 (train run at undue speed). This is the theory of the case, as explained in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 495, 24 S. E. 342.

But the making up of trains is, by most of the authorities, deemed to be a mere detail of the work. See § 610, note 1, subd. (a), *ante*.

(h)—*in respect to the want of proper lighting of the place of work.*—*Irmer* v. *St. Louis Bowling Co.* (1897) 69 Mo. App. 47 (no proper arrangements for lighting a passageway, the result being that the plaintiff fell through a trap door left open by a fellow servant, which he might have discovered but for the obscurity); *Swift & Co.* v. *O'Neill* (1899) 88 Ill. App. 162, Affirmed in (1900) 187 Ill. 337, 58 N. E. 416 (plaintiff run down by a truck in an imperfectly lighted alley).

(i) *in respect to uncovered machinery.*—*Pullman's Palace Car Co.* v. *Harkins* (1893) 5 C. C. A. 326, 17 U. S. App. 22, 55 Fed. 932 (fellow servant ordered plaintiff to work near an unguarded shaft).

(j)—*in respect to defective scaffolds.*—*Drennie* v. *Hogan* (1891) 153 Mass. 29, 26 N. E. 237 (dropping of stone subjected a defective staging to an increased strain); *Cole* v. *Warren Mfg. Co.* (1899) 63 N. J. L. 626, 44 Atl. 647 (coservant lowered himself down onto a defective scaffold, which gave way); *Barnum* v. *Sunday* (1896) 68 Ill. App. 464 (failure of master to discover defect in scaffold concurred with negligence of fellow servant in throwing down a load of stones on it in such a violent manner as to make it fall).

(k)—*in respect to other abnormal dangers of the place of work.*—*Bourne* v. *Mesaba Iron Min. Co.* (1895) 128 Mo. 423, 31 S. W. 110 (plaintiff set to work in a place where stones were constantly falling fellow servant failed to keep watch for them); *Hancock* v. *Keene* (1892) 5 Ind. App. 108, 32 N. E. 329 (coemployee's negligence in blasting

caused injury to plaintiff, required to work in an unsafe tunnel); *Crowell* v. *Thomas* (1895) 90 Hun. 193, 35 N. Y. Supp. 936 (explosion occurred where steam was incautiously let into a barrel used for heating water, the vent of which, by the negligence of the defendant's manager, had been left plugged); *Lantee* v. *Duckworth* (1898) 19 Ind. App. 535, 48 N. E. 864 (steam negligently admitted into defective waste pipe); *Bagley* v. *Consolidated Gas Co.* (1895) 13 Misc. 6, 34 N. Y. Supp. 187 (negligence of foreman allowed a tank to move unsteadily while it was being hoisted, the consequence being that it dislodged some planks from a scaffold and they fell on plaintiff—superincumbency of the plank held to be a concurring cause of the accident); *Pzepka* v. *American Glucose Co.* (1895) 11 Misc. 131, 31 N. Y. Supp. 1049 (defective insulation of electric wires caused a fire—fellow servants were negligent in failing to put it out); *Tetherton* v. *United States Tele Co.* (1901) 165 N. Y. 665, 59 N. E. 1131, Affirming (1899) 41 App. Div. 613, 58 N. Y. Supp. 55 (excessive blast, put in when a new way was being opened for a track in a mine, brought down a large mass of rock); *Anthony* v. *Leeret* (1887) 105 N. Y. 591, 12 N. E. 561 (inadequately guarded trap door located in a passage was left open by coservant).

The continued flow of burning oil, which would have been at once checked except for the master's negligent failure to provide the usual facilities for cutting off the supply, is the proximate cause [illegible] will render him liable in case [illegible] resulting therefrom to a servant [illegible] as this would not have happened if a fellow servant had not also been negligent in failing to cut off the supply by the use of the less adequate facilities that did exist. *Pullman Palace Car Co.* v. *Lvark* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285.

A mining company is not relieved from liability for an injury to one of its employees, caused by its negligence in failing to keep the roof of the mine in a reasonably safe condition, although the negligence of a fellow servant in performing the duties assigned to him in that regard contributed to the injury. *Island Coal Co.* v. *Risher* (1895) 13 Ind. App. 98, 40 N. E. 158, declaring that, in view of a finding that both the defendant and a mine boss had long known that the roof was unsafe, the question whether the boss was a vice princip[al] a mere fellow servant was immat[erial].

A master must respond in damag[es] an injury caused by a heavy [object] which was allowed to fall on the p[lain]tiff by a coservant, where the pl[ace] was set to work in a place where [there] was a danger of the fall of such obj[ect]. *The Magdaline* (1898) 91 Fed. 798; *Printing Press Co.* v. *Lewopke* (1[900]) 90 Ill. App. 427, Affirmed in (1901) 191 Ill. 199, 60 N. E. 968 (frame of p[rint]ing press, which had been insecu[rely] propped, fell on plaintiff).

(1) — *in respect to defective cars.*—*New Jersey & N. Y. R. Co.* v. *Young* (1892) 1 C. C. A. 428, 1 U. S. App. 96, 49 Fed. 723, Affirming (1[891]) 46 Fed. 169 (car run at improper s[peed] could not be stopped in time to av[oid] a collision, owing to its brakes b[eing] defective); *Lilly* v. *New York C. & H. R. R. Co.* (1887) 107 N. Y. 566, 14 N. E. 503 (coservants negligently ran c[ar] against a stationary one and so caus[ed] an injury which would not have b[een] received if the stationary car had [been] moved a considerable distance on [ac]count of its brake being defective); *Louis & S. F. R. Co.* v. *McCo[y]*, 7 (Tex.) 80 Tex. 85, 15 S. W. 789 (train w[ith] defective wheel was run too fast d[own] a grade); *Houston & T. C. R. Co.* v. *Kelly* (1896) Tex. Civ. App.) 35 S. W. 858 (car with defective wheel run [at] [illegible]); *Ransier* v. *Minneapolis & St. L. R. Co.* (1884) 32 Minn. 331, 20 N. W. 332 (use of defective brake by brakem[an] after discovering its condition caus[ing] collision between sections of train w[hich] had separated on a descending gr[ade]); *Illinois C. R. Co.* v. *Johnson* (1901) 95 Ill. App. 54, Judgment Affirmed in 193 Ill. 564, 61 N. E. 334 (car unsuitable for running switch was negligently used [in] coercion for that purpose); *Hoyt* v. *Whitwell* (1865) 3 Sc. Sess. Cas. 3d series, 506 (brakewagon of defective c[on]struction used in grading a railway, and improperly placed in the train to which it belonged); *Hollingsworth* v. *Long Island R. Co.* (1895) 91 Hun. 641, 3[6] N. Y. Supp. 1126 (car with defective [brake] negligently managed); *Missouri, K. & T. R. Co.* v. *Bains* (1897) Tex. Civ. App.) 40 S. W. 635 (servants negligently set cars with defective brakes in motion on an excessively steep grade); *International & G. N. R. Co.* v. *Sparks* (1895) Tex. Civ. App.) 29 S. W. 686 (injury caused partly by want of handhold and partly by leaving cars so close to the end or siding as to be dangerous

to men on trains on the main track); *Southern P. Co.* v. *Leash* (1893) 2 Tex. Civ. App. 68, 21 S. W. 563 (plaintiff working as fireman of pile-driver engine was thrown off by a jolt received from a moving car, because there was nothing to hold onto when the shock came).

Failure to furnish suitable appliances for coupling cars is actionable, although the negligence of a fellow servant also contributes to produce the injury. *Norfolk & W. R. Co.* v. *Ampey* (1896) 93 Va. 108, 25 S. E. 226 (injury to brakeman caused both by defective couplings and by excessive speed with which cars were brought together); *Gulf, C. & S. F. R. Co.* v. *Kissiah* (1893) 86 Tex. 81, 23 S. W. 578, Reversing 4 Tex. Civ. App. 362, 22 S. W. 110, 26 S. W. 242 (defect in air brakes, which allowed cars to start on a grade and roll against the car which plaintiff was repairing, combined with negligence of another car repairer or a brakeman in failing to secure the cars by hand brakes); *Donohue* v. *Brooklyn City R. Co.* (1891) 38 N. Y. S. R. 485, 14 N. Y. Supp. 639 (injury caused to coupler, partly by defective buffers, and partly by backing of engine with undue speed); *International & G. N. R. Co.* v. *Boaatz* (1898; Tex. Civ. App.) 48 S. W. 767 (defective couplings—engine negligently backed); *International & G. N. R. Co.* v. *Zapp* (1899; Tex. Civ. App.) 49 S. W. 673 (defective bumper beam—cars negligently managed); *Ellis* v. *New York, L. E. & W. R. Co.* (1884) 95 N. Y. 546 (brakeman trying to escape from an impending rear-end collision with a following train might have succeeded if the buffers between his own and the next preceding car had not been so defective as to allow the cars to come together and crush him when the collision occurred; case held to be for jury); *McMahon* v. *Henning* (1880) 1 McCrary, 516, 3 Fed. 353 (cars with defective bumpers were run together with dangerous speed); *Brinde* v. *St. Paul City R. Co.* (1893) 55 Minn. 63, 56 N. W. 461 (similar facts); *Chicago & N. W. R. Co.* v. *Gillison* (1893) 153 Ill. 264, 64 Am. St. Rep. 117, 50 N. E. 657, Affirming (1897) 72 Ill. App. 207 (accident caused partly by mismanagement of engineer in stopping the forward section of a train after it had separated owing to defects in a drawbar); *Galveston, H. & S. A. R. Co.* v. *Sweeney* (1896) 14 Tex. Civ. App. 216, 36 S. W. 800 (similar facts); *Richmond & D. R. Co.* v. *George* (1891) 88 Va. 223, 13 S. E. 429 (coupling was defective—engineer backed without a signal); *Terre Haute & I. R. Co.* v. *Mansberger* (1895) 12 C. C. A. 574, 24 U. S. App. 551, 65 Fed. 196 (accident due partly to a defective coupling pin and partly to the negligence of an engineer in backing cars too rapidly down grade); *Tacus* v. *Vicksburg, S. & P. R. Co.* (1885) 37 La. Ann. 630, 55 Am. Rep. 508 (use of cars of such unequal height as to render their buffers useless concurred with negligence of engineer in backing cars for coupling at an improper speed); *Browning* v. *Wabash Western R. Co.* (1894) 124 Mo. 55, 24 S. W. 731, Affirmed in 27 S. W. 644 (vice principal allowed brake-staffs to be removed, and left cars heavily loaded near the top of a heavy grade—negligence of fellow servant consisted in not seeing that the cars were all coupled before backing the engine against them, and in throwing the switch so that they ran onto the main line).

An employee who, while working upon the track, was struck by a fireman who sprang from a train, under apprehension of danger, as the train approached the place where repairs were being made, is entitled to recover, if the company was negligent in not having sufficient brakes on the train, and the flagman failed to give the slow signal, thereby increasing the fireman's alarm. *Galveston, H. & S. A. R. Co.* v. *Jackson* (1898; Tex. Civ. App.) 44 S. W. 1072.

In *Louisville, N. A. & C. R. Co.* v. *Berkey* (1894) 136 Ind. 181, 35 N. E. 3, where it was laid down that the negligence of a coemployee in failing to inspect the couplings on a train will not relieve a railroad company from liability for the death of a brakeman, due to defective couplings whose unfitness was known to the company or could have been known with reasonable diligence, the opinion seems to waver between the doctrine as to concurrent negligence and upon the rule that the employee performing the duty of inspection is a vice principal.

The negligence of employees of a freight train waiting upon a side track, in leaving the switch open and giving the signal that the track was clear by covering the headlight, without being signaled that the switch was closed, does not relieve the company from responsibility for the death of a fireman, on an approaching train, caused by the derailing of his engine, due to the failure to supply the red light customarily carried in the cupola of the caboose of the

freight trains, to be taken down when the train carrying it entered on a side track, which was the only red light which could be seen from the front, where the lamp specially constructed for this purpose was out of repair and had been taken to the company's shops to be repaired, and there were no other lamps in the caboose which could be used in the place provided for such light. *Denver & R. G. R. Co.* v. *Sapes* (1899) 55 Pac. 1093, 26 Colo. 17, First Appeal (1898) 23 Colo. 226, 47 Pac. 287.

(m)—*in respect to defective locomotives.*—Where a locomotive the valves of which have been leaking for several months, to the knowledge both of the company's superintendent and of the engineer, is left unattended by the latter without his taking certain precautions which would, as he knew, have prevented the escape of steam into the cylinder, the company is liable for injuries received by a car repairer as a result of the locomotive's being set in motion by such an escape of steam. *Cone* v. *Delaware, L. & W. R. Co.* (1880) 81 N. Y. 206, 37 Am. Rep. 491, Affirming (1878) 15 Hun, 172.

Where the plaintiff, while cleaning the ash pan of an engine, was injured through its sudden starting by reason of a leaking throttle, the mere fact that the accident would not have happened if a coservant had performed his duty of blocking the wheels will not prevent a recovery. *Atchison, T. & S. F. R. Co.* v. *Holt* (1883) 29 Kan. 149.

See also *San Antonio & A. P. R. Co.* v. *Harding* (1895) 11 Tex. Civ. App. 497, 33 S. W. 373 (railroad company held to be liable for the death of an engineer, caused in part by its negligence in failing to keep the headlight of switch engine in good condition, so that its position on track might be seen from an approaching train, although the yard hands may have been negligent in letting it stand upon the track); *Fowler* v. *Chicago & N. W. R. Co.* (1884) 61 Wis. 159, 21 N. W. 40 (accident caused partly by mismatched couplings and partly by negligence of engineer); *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612 (negligence of railway company in furnishing defective engine concurred with negligence of coservants in sending it out on the road); *Ohio & M. R. Co.* v. *Stein* (1891) 140 Ind. 61, 39 N. E. 246 (collision caused partly by defective condition of an engine and partly by mismanagement of the train); *Crutchfield* v. *Richmond & D. R. Co.* (1877) 76 N. C. (negligence of master in having a ive engine concurred with that engineer in using it); *Louisville R. Co.* v. *Kenley* (1893) 92 Ten 21 S. W. 326 (cars of train s jammed together by engineer warning, when brakeman was in of putting his foot upon a defectiv rest).

The liability of a railway co should be submitted to the jury an employee, while engaged in th formance of his duties, was injur a rear collision, partly owing to neglect of a fellow servant to pl tail light on the cars, and partly defective condition of the locom which disturbed the time arrange and rendered the shock of the col when it came, more severe. *Cf. Melbourne R. Co.* (1871) 2 Viet. L. (L.) 71.

(n)—*in respect to defective hand —Northern P. R. Co.* v. *Charless* (1 162 U. S. 359, 40 L. ed. 999, 16 Sup Rep. 848, Affirming (1892) 2 C. C. 380, 7 U. S. App. 359, 51 Fed. 562 (car with defective brake ran at exce speed—liability conceded, *arguendo*, posing this combination of facts to established); *Maupin* v. *Texas & P Co.* (1900) 40 C. C. A. 234, 99 Fed (same facts); *International & G. N. Co.* v. *Williams* (1896) Tex. Civ. Ap 34 S. W. 161 (same facts); *Chicago, M. & St. P. R. Co.* (1894) Wis. 284, 60 N. W. 180 (section fore was negligent in running hand car w a defective brake past a switch, a hearing warning signals).

(o)—*in regard to defective machine and tools of other kinds.*—*Pittsburg & G. Lumber Co.* (1900) La. Ann. 1109, 27 So. 654; *Murray R. Co.* v. *Murray* (1900) 42 C. C. 334, 102 Fed. 264 (breaking of defe hoisting machinery was followed by co tributory negligence of fellow servant *Anderson* v. *The Ashebrooke* (1899) Fed. 124 (fellow servants continued operate defective tackling with know ledge of its condition); *Monmouth M. & Mfg. Co.* v. *Erling* (1894) 148 I 521, 39 Am. St. Rep. 187, 36 N. E. 11 (negligence in operating defective ma chinery, for the proper repair of wh the master had not supplied proper ma terials); *Atchison, T. & S. F. R. Co.* v. *Lannigan* (1895) 56 Kan. 109, 42 Pac 343 (brakeman injured while coupling partly owing to his lantern furnishing insufficient light, and partly through the

negligence of the engineer in bringing the cars together with excessive speed); *Myers* v. *Hudson Iron Co.* (1889) 150 Mass. 125, 15 Am. St. Rep. 176, 22 N. E. 631 (engineer negligent in operating hoisting apparatus of which brake was defective); *Craig* v. *Chicago & A. R. Co.* (1893) 54 Mo. App. 523 (assurance of safety by fellow servant, machinery being inadequate for work to be done); *Stringham* v. *Stewart* (1885) 100 N. Y. 516, 3 N. E. 575 (defective elevator); *McCabe* v. *Brainard* (1897) 17 App. Div. 45, 44 N. Y. Supp. 961 (defect in step of wagon negligently driven); *Lerkin* v. *Washington Mills Co.* (1899) 45 App. Div. 6, 61 N. Y. Supp. 93 (injury partly caused by the negligence of some third person in moving an elevator, and partly by defects in the elevator gate); *Strauss* v. *Huberman Mfg. Co.* (1898) 5 App. Div. 623, 18 N. Y. Supp. 1116 (defective part of a press, being left unfixed by foreman, fell on plaintiff's hand); *Auld* v. *Manhattan L. Ins. Co.* (1906) 185 N. Y. 610, 58 N. E. 1085, affirming (1898) 34 App. Div. 491, 54 N. Y. Supp. 222 (elevator door constructed so that it closed when a button was pressed, and could not be stopped after it had once been set in motion, was negligently raised by the operator); *Acosta* v. *Dietro & D. Sugar Ref. Co.* (1889) 24 N. Y. S. R. 748, 5 N. Y. Supp. 548 (failure to equip elevator with proper safety appliances combined with negligence of engineer in pushing it off when it had caught); *Missouri, K. & T. R. Co.* v. *Perch* (1898) 18 Tex. Civ. App. 46, 44 S. W. 317 (brake driver not properly inspected was operated with a leaky valve); *Williams* v. *New York L. E. & W. R. Co.* (1892) 2 Misc. 21 N. Y. Supp. 259 (co-servant selects defective tool from among a stock which comprised a good many which were known by the master to be defective); *Koiseo* v. *Flaccus* (1890) 138 Pa. 332, 22 Atl. 88 (shaft ran so loosely that the belt fell off and struck plaintiff—engineer was also negligent); *Dodd* v. *Bell* (1897) 15 App. Div. 258, 44 N. Y. Supp. 198 (defendant liable for injury caused by defective pulley on which belt ran, though coemployee may have been negligent in ordering plaintiff to work where such defect exposed him to danger); *Sherman* v. *Menominee River Lumber Co.* (1888) 72 Wis. 122, 1 L. R. A. 173, 39 N. W. 365 (edger-saw out of repair—feeder of machine careless in attempting to remove the plank which caused the injury).

(p)—*in respect to the employment of suitable servants.*—The negligence of a railway company in putting the delinquent servant in the position of extra man, who might be selected by the conductor to fill a vacancy, and not the negligence, if any, of the conductor in assigning him work, is the primary cause of an accident which results from his unfitness. *Mann* v. *Delaware & H. Canal Co.* (1883) 91 N. Y. 495 (negligence of the conductor said to be secondary and co-operative merely).

See also *Coppes* v. *New York C. & H. R. R. Co.* (1888) 48 Hun, 298 (derailment due partly to switch being left open by switchman known to be over-loss in the performance of his work, and partly to the negligence of the engineer).

There is also considerable authority for bringing within the scope of the rule under discussion the cases in which the negligence shown is that of the incompetent servant himself. *Galveston, H. & S. A. R. Co.* v. *Shipp* (1891) 81 Tex. 517, 17 S. W. 47; *Hockley* v. *Delaware Min. Co.* (1897) 15 Utah, 153, 62 Am. St. Rep. 936, 49 Pac. 295; *Cowan* v. *Chicago & A. R. Co.* (1893) 54 Mo. App. 523; *Oldaker* v. *New York C. & H. R. R. Co.* (1897) 27 N. Y. Week. Dig. 109, 9 N. Y. S. R. 384 (since patent engineer selected to run a disabled engine "without"); *Greer* v. *St. Louis, I. M. & S. W. R. Co.* (1884) 20 Fed. 87 (negligence of master as regards hiring of servants and framing of rules connected with the negligence of servants in operating train); *Terrell* v. *Russell* (1897) 16 Tex. Civ. App. 573, 42 S. W. 129 (negligent management of engine by incompetent engineer); *Kelley* v. *Doyle* (1891) 63 Fed. 172 (injury caused by the negligence of the master in putting a deckhand at the wheel of a tug, the consequence being that his negligence caused a collision).

Logically speaking, this is not an impossible view; but it seems preferable to regard such an infringement of duty as being, rather, the sole efficient cause of the injury in the same sense as similar negligence in respect to the provision and maintenance of the instrumentalities of work. This is the theory in a case where it was held that a workman may recover for injuries caused by the giving way of a defective brake-wheel, the result being that he was thrown off the car, where the fall was due to the oscillation produced by the sudden application of the brake while the train was being run at an excessive

rate of speed by an engineer whom the company could have known to be reckless and of intemperate habits if it had instituted proper inquiries. *Illinois C. R. Co.* v. *Jewell* (1867) 46 Ill. 99, 92 Am. Dec. 240.

In an action to recover damages sustained by the death of the plaintiff's intestate, killed, while engaged in the performance of his duties as a fireman, in a collision caused by the fact that the train, although the proper semaphore signal was not displayed, ran over an open switch from one track to another, on which it proceeded until the accident occurred, it is for the determination of the jury whether it was the duty of the switch tender (alleged to be incompetent) to display the light, whether he was negligent in that regard, and whether such negligence, together with that of the engineer, was the concurrent, proximate, and efficient cause of the accident; and nonsuit is improperly granted. *Hosford* v. *New York C. & H. R. R. Co.* (1899) 39 App. Div. 327, 56 N. Y. Supp. 933. Affirmed in (1900) 161 N. Y. 660, 57 N. E. 1112.

(p)—*in respect to the failure to employ an adequate number of servants.*—The negligence of an engineer in starting a train at the station where it is made up without seeing, as he is required by the rules to do, that the brakemen assigned to it, or a sufficient number, were aboard, will not absolve the company from the liability predicated upon its duty to see that the train does not start with an insufficient crew. *Booth* v. *Boston & A. R. Co.* (1878) 73 N. Y. 38, 29 Am. Rep. 97.

The fact that the employee who threw a bale into the hold of a ship was negligent in doing so when no "hatch tender" was there, without himself warning those in the hold, will not defeat the plaintiff's right to recover, if the defendant was negligent in failing to supply a "hatch tender." *Chesney* v. *Ocean S. S. Co.* (1895) 92 Ga. 732, 44 Am. St. Rep. 113, 19 S. E. 33.

See also *Swift & Co.* v. *Rutkowski* (1898) 82 Ill. App. 108 (negligence of coservant in handling machinery concurred with negligence in failing to employ a sufficient number of servants); *Craig* v. *Chicago & A. R. Co.* (1893) 54 Mo. App. 523 (assurance of safety by fellow servant, where there was an insufficient number of men); *Sincere* v. *Union Compress & Warehouse Co.* (1897; Tex. Civ. App.) 40 S. W. 326 (insufficient number of men furnished to handle bales of cotton, one of which fell to fall on plaintiff while it hoisted); *Wright* v. *Southe* (1896) 14 Utah, 383, 46 Pac. neer operating a defective e which, though it required a amount of attention to contro ments, the company had plac man who could observe the s brakeman engaged in coupling

Where plaintiff was injur the employ of defendant by re latter's failure to furnish su to do the work in safety it rial, so far as defendant's concerned, whether plaintiff man whom he was assisting servants. *Supple* v. *Ry.* Ill. 439, 61 N. E. 392. Reversin 89 Ill. App. 137.

(r)—*in respect to a defe tem.*—A railway employee's ri tion for injuries caused by the of a train at an illegal rate of not detected because he and charge of the train were fellow where the train was run pursu time-card promulgated by the employing him. *Bluedorn* v. *P. R. Co.* (1891) 108 Mo. 439, St. Rep. 615, 18 S. W. 1103.

See also *Hann* v. *New York C. R. Co.* (1894) 80 Hun, 71, 29 Supp. 897; *Paulmier* v. *Erie* (1870) 34 N. J. L. 151 (injury partly by arrangements requiring to be run frequently to a point trestle too weak to support a loc began, and partly by the negli the engineer in disobeying orders take his engine beyond that *Luebke* v. *Chicago, M. & St. P.* (1883) 59 Wis. 127, 48 Am. Re 17 N. W. 870 (want of proper for protection of car repairer, ering with negligence of foreman ting plaintiff to work without that he was protected); *Farer* v. (1887) 39 La. Ann. 1011, 4 A Rep. 256, 3 So. 363 (negligence servant in carrying out a faulty n of taking down a building); *P Southern P. Co.* (1899) 20 Utah, 58 Pac. 326 (no proper system fo tecting car repairers,—engineer gently backed a car against one repair).

(s)—*in respect to seeing that re tions are duly carried out.*—The m is liable where the injury compla of was caused partly by a coserv disregard of rules and partly by negligence of the master himself o

some employee for whose omissions of duty he is responsible. *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988 (collision due partly to the train dispatcher's neglect of rules and partly to a coservant's disobedience of other rules).

In an action by an engineer for an injury received in a collision alleged to have been due to the negligence of the train dispatcher, an instruction is properly refused, which authorizes a verdict for defendant upon a finding that the conductor had violated the rules, although the jury might further find that the negligence of the train dispatcher, either independently or concurrently with that of the conductor, was the proximate cause of the injury. *Baltimore & O. R. Co.* v. *Camp* (1900) 44 C. C. A. 451, 105 Fed. 212.

See also *Mexican C. R. Co.* v. *Glorea* (1901) 46 C. C. A. 334, 107 Fed. 356 (collision caused partly by order that two trains should meet at night at a "blind" siding, where there was no signal light, and partly by the negligence of the conductor and engineer of one of the trains in operating it without a light); *Felton* v. *Harbeson* (1900) 44 C. C. A. 188, 104 Fed. 737 (train dispatcher violated one rule, as to the delivery of an order with regard to the meeting of two trains.—engineer violated another rule by failing to have his train under control as he approached meeting point); *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125 (negligence of train dispatcher in moving trains.—negligence of engineer and conductor in running train too fast); *Cincinnati, I. St. L. & C. R. Co.* v. *Lang* (1889) 118 Ind. 579, 21 N. E. 317 (section hand killed by the negligence of those in charge of a "wild" train, of the danger of meeting which he had not been notified in any way when he received the special order under which he was traveling on a hand car along the track where he met the train); *Hunn* v. *Michigan C. R. Co.* (1889) 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502 (negligence of train dispatcher in failing to hold a train concurred with that of trainmen in running the train at undue speed); *Texas & P. R. Co.* v. *Eberhart* (1897; Tex. Civ. App.) 40 S. W. 1060. Affirmed in (1897) 91 Tex. 321, 43 S. W. 510 (negligence in regard to the enforcement of rules with regard to the protection of car repairers concurred with negligence of fellow servants in sending a moving car on the repair track).

(t)—*in respect to the failure to notify as to abnormal dangers.*—A superintendent who orders a trestle work above a dock to be torn down while men are at work under it, without notifying such men or their foreman that it is to be done, is guilty of negligence which will render the employer liable for injuries to one of such workmen from the tearing down of such trestle, notwithstanding the concurrent negligence of the foreman. *Northwestern Fuel Co.* v. *Danielson* (1893) 8 C. C. A. 636, 12 U. S. App. 688, 57 Fed. 915.

An engineer injured by the derailing of his train caused by a partly open switch may recover, notwithstanding the switch was unlocked by a negligent fellow servant, where the negligence of the company in opening the switch for use after it had been abandoned for a long time, without putting on it any lights to warn the engineer of its presence or danger, was a concurrent cause of the accident. *Town* v. *Michigan C. R. Co.* (1890) 84 Mich. 211, 47 N. W. 665. "It is contended," said the court, "that the plaintiff cannot recover because the absence of the lights was not the proximate cause of the accident; that, if the switch had been locked the train would have passed safely by as it was, without any lights; and that the opening or unlocking of the switch was caused either by the intermeddling of some stranger or trespasser, or by the negligence of fellow servants of the plaintiff; that he could not recover in either event. But I do not so understand it. If the plaintiff's theory be true, the lights would have prevented any accident in the condition in which the switch was, as they would have warned the plaintiff in time to avoid the danger; so the negligence of defendant in opening this closed switch for use, without any lights to warn plaintiff of the presence of the switch or its danger, was just as much the proximate cause of the injury as was the turning of the switch rails. And it certainly was a concurrent cause; and the injury in any event under the plaintiff's theory and evidence was occasioned partly through the negligence of the defendant as to the switch lights, and partly by the condition of the switch rails, in which case the defendant would be liable."

See also *Jones* v. *Florence Min. Co.* (1886) 66 Wis. 268, 28 N. W. 207 (failure to instruct miner as to dangers of underground work in a mine.—carelessness of fellow servants in blasting in

their rank.[1] Under such circumstances his negligence must, events, be one of the efficient causes, and, in most cases, will p be the sole efficient cause, of the injury.[2]

jured such miner); *Costa* v. *Pacific Coast Co.* (1901) 26 Wash. 138, 66 Pac. 398 (injury received through an explosion of fire damp in a mine was caused partly by the failure of the defendant's agent to warn the plaintiff that there was gas in the mine and partly by the negligence of a coservant in brushing a small collection of gas in the direction of an open lamp held by the plaintiff).

Other decisions recognizing the doctrine stated in the text are the following: [illegible] v. *Central P. R. Co.* (1887) 76 Cal. 156, 1 Am. St. Rep. 22, 13 Pac. 141; [illegible] v. *Fitzpatrick* (1881) 80 Ind. 526; *Griffin* v. *Boston & A. R. Co.* (1889) 148 Mass. 143, 1 L. R. A. 698, 12 Am. St. Rep. 526, 19 N. E. 166; *Howe* v. *Sligo Furnace Co.* (1895) 62 Mo. App. 491; *Flanigan* v. *Guggenheim Smelting Co.* (1899) 63 N. J. L. 647, 44 Atl. 762; *Ill's* v. *New York, L. E. & W. R. Co.* (1881) 95 N. Y. 546; *Harvey* v. *New York C. & H. R. R. Co.* (1890) 32 N. Y. S. R. 817, 10 N. Y. Supp. 615; *Shields* v. *Robins* (1896) 3 App. Div. 582, 38 N. Y. Supp. 214; *Hollingsworth* v. *Long Island R. Co.* (1895) 91 Hun, 611, 36 N. Y. Supp. 1126; *Gulf, C. & S. F. R. Co.* v. *Johnson* (1892) 83 Tex. 629, 19 S. W. 151; *Gulf, C. & S. F. R. Co.* v. *Wagner* (1896) Tex. Civ. App.) 36 S. W. 118; *Paisley* v. *Dominion Atlantic R. Co.* (1895) 27 N. S. 498; *Texas & P. R. Co.* v. *Harpin* (1901) 26 Tex. Civ. App. 385, 63 S. W. 346.

[1] That superintendence is an official act of a vice principal, see §§ 541, 542, *ante*.

[2] An employer who fails to furnish safe and suitable lumber for the construction of a staging by the employees for use in their work, and who specially directs the use of a stringer in a specified place, is liable for an injury to an employee caused by the breaking of such stringer. *Stanwick* v. *Butler-Ryan Co.* (1896) 93 Wis. 430, 67 N. W. 723.

An employer is liable where he instructs his employees to build horses for a scaffold, to be used by the workmen in the construction of a house, from certain particular material, of which there is just enough for that purpose, and an employee is injured by the breaking of a horse made of defective material, the defect not being apparent to an ordinary observer. *Brown* v. [illegible] (1900) 46 App. Div. 516, 61 N. Y. 963. The theory of the case w the selection of the material left to the servants thereof, the express direction by the m to the material to be used cast sponsibility upon him.

That a railway company would ble if a heap of sand which injury had been deposited tr[illegible]s by its direct order wa in *Johnson* v. *Houston & T. C.* (1877) 46 Tex. 540.

A specific direction by the m a vice principal to place a [illegible] a position where it may be a servant will render the [illegible] for an injury caused by it. Bu eral order which merely mea points between which the pla will not affect him with liabil negligence of the servants who the order, in placing it so that servant receives an injury by into collision with it. *Nor. & W. R. Co.* v. *Bell* (1886) 112 4 Atl. 50.

A railway company fail[illegible] its duty to furnish a safe plac where a foreman of car repa[illegible] a car to be repaired so near leading to the repair track that ble to be struck by moving adjoining track. *St. Louis, [illegible] R. Co.* v. *Holman* (1895) 155 I 39 N. E. 573.

A master is responsible for t of a framework constructed u own supervision for the purpos ering a heavy article. *Bell Goodwin* (1886) 108 Ind. 286, 9 N 302.

In many cases where rec[illegible] been denied, the fact that there authority to do the particular caused the injury is mentioned of the grounds of the decision. example, *Curran* v. *Androscoggin [illegible]* (1897) 91 Me. 26, 39 Atl. 340; *Ann Maillard* (1858) 3 Bosw. 591.

Compare also the cases in which delinquency consists in using the instrumentalities in a manner not contemplated by the master (§ 606, *ante*), in disobeying his express orders (§ 60 *ante*).

CHAPTER XLIII.

EVIDENCE.

816. Introductory.

A. Admissibility of evidence.

817. Relevancy to the pleadings.

818. Materiality.

819. Competency: generally.

820. Condition of the given instrumentality before the accident.

a. Condition: generally.

b. Nonoccurrence of accidents.

c. Occurrence of accidents.

821. Condition of the given instrumentality after the accident.

822. Condition of the given instrumentality both before and after the accident.

823. Condition of parts of the plant other than that which caused the injury.

a. Generally.

b. Nonoccurrence of accidents.

c. Occurrence of accidents.

824. Alterations in the plant or system after the accident; evidential import of.

825. Habitual course of conduct.

826. Employer's insuring himself against injuries to servants.

827. Models and photographs.

828. Best and secondary evidence.

829. Statements, admissions, and declarations.

a. By other employees.

b. By the injured servant himself.

c. By the employer.

830. Opinions as evidence.

a. Not admissible.

b. Admissible.

831. Judicial notice.

B. Burden of proof with respect to the employer's negligence.

832. Burden of proving negligence rests on the servant.

833. Negligence not inferable from the mere occurrence of an accident

834. *Res ipsa loquitur.*

835. Action not maintainable where no specific evidence of fault is offered.

836. Burden of proving that the injury was caused by the master's negligence rests on the servant.

837. No action maintainable where cause of accident is merely conjectural.

838. Shifting of the burden of proof.

839. Burden of proof, as affected by express statutory provisions.
a. Statutes not exclusively applicable to employees.
b. Statutes enacted expressly for the benefit of employees.
C. Burden of Proof with Respect to Defenses.
840. Generally.
841. Burden of proof with respect to the assumption of the risk.
a. Ordinary risks.
b. Extraordinary risks.
842. Burden of proof as to servant's contributory negligence.
843. Same subject continued; actions under statutes.
a. Statutes which simply extend the common-law liability of master.
b. Statutes in which the right of action is made conditional upon the servant's freedom from negligence.

816. Introductory.—The sufficiency of the evidence with reference to the specific issues which arise in actions against employers [illegible] discussed under a great variety of phases in the several parts of this [illegible] in which the doctrines determinative of those issues have been [illegible] and analyzed. In the present chapter it is proposed to give [illegible] the decisions which indicate the manner in which certain general principles of the law of evidence have been applied by the courts in cases involving injuries to servants. For a full discussion of these principles, the reader will of course consult the standard text books on the law of evidence.

A. Admissibility of Evidence.

817. Relevancy to the pleadings.—The rule which declares that evidence is admissible, or inadmissible, according as it has or has not some tendency to establish the allegations in support of which it is offered, is illustrated by the cases cited below.[1]

[1](a) *Evidence held admissible.*—Under a general allegation of negligence any evidence tending to establish circumstances contributing proximately to the injury is admissible. *Uren* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174 (evidence offered was that rocks were allowed to roll down a gulch from a tunnel above the one where plaintiff was working).

Under a complaint alleging an injury caused by the defective condition of a track, evidence is admissible which shows that the accident was caused partly by the collision of the engine with a calf on the track, and partly by the defective condition of the track. *New York, T. & M. R. Co.* v. *Gre* (1896; Tex. Civ. App.) 36 S. W. 812.

Under a declaration alleging that reason of defendant's negligence in permitting the walls, roof, and supports of its mine to remain defective, and knowingly placing an incompetent and unskilful foreman in charge thereof and that in consequence of his lack ordinary competency and skill plaintiff's intestate was killed, plaintiff is entitled to introduce evidence to prove the foreman's incompetency. *Dingee* v. *Virginian* (1900) 98 Va. 247, 35 S. E. 794.

Evidence that it was impossible for one's foot to be caught in a switch frog provided with blocking such as was in

use by the defendant is admissible, in an action for the death of a switchman through having caught his foot in a frog, as tending to show that the blocking at the particular point in question was out of repair. *Paine* v. *Eastern R. Co.* (1895) 91 Wis. 340, 64 N. W. 1005.

Where the complaint alleges the negligent furnishing of defective "coupling appliances," evidence as to whether the brakeman injured had received a coupling stick is properly admitted under the allegations of the complaint, since "coupling appliances" would embrace a coupling stick, and absence thereof would make a defective set. *Youngblood* v. *South Carolina & G. R. Co.* (1901) 60 S. C. 9, 85 Am. St. Rep. 824, 38 S. E. 232.

Under a declaration alleging that defendant failed to keep "the earth, sand, and other substances" of the walls of a sewer excavation firmly in place, "by negligently suffering the excavation to remain in an unsafe condition," by suffering the earth, sand, etc., to remain in a "loose, water-soaked, and *dangerous* condition," evidence is admissible that the sides of the sewer were not properly or securely braced or shored. *LaSalle* v. *Kostka* (1901) 190 Ill. 139, 60 N. E. 72. Affirming (1900) 92 Ill. App. 91.

Where the complaint against a railroad for the negligent killing of an engineer alleges that the company failed to employ a sufficient number of men to operate its railroad in a manner safe and free from unnecessary danger to its employees engaged in operating engines or trains over its road, the plaintiff may prove that for some time previous to the accident the switch, from the negligent operation of which the accident resulted, had been operated by brakemen or trainmen whenever it was necessary to use the side track, and that the latter were seen to block it open, as it was found at the time of the accident, with a plank or iron bar, and then go away to uncouple cars. *Young* v. *Syracuse, B. & N. Y. R. Co.* (1901) 166 N. Y. 227, 59 N. E. 828. Affirming (1899) 45 App. Div. 296, 61 N. Y. Supp. 202.

Where the complaint alleges that defendant railroad company failed to give a warning, and to place a man on the front part of a car which it was dropping down a gravity in its switch yard, as was its usage and custom, which caused the car to strike plaintiff,—a clerk in the yards,—and injure him, evidence that it was the custom of the railroad company to place a man at the brake of such cars, which was sometimes in front and sometimes at the back of the car and to give a warning, should not be excluded. *Sears* v. *Duluth Northern R. Co.* (1900) 81 Minn. 337, 84 N. W. 114.

Where, in an action for negligently causing the death of a miner, by failing to furnish timber to be used as props, the declaration alleged that defendant wilfully failed to keep them at the bottom of the shaft, and was not concerned to, a question asked witnesses, whether there were any props at the bottom of the shaft at the time, was not improper, though the statute did not require them to be kept at any specified place. *Ill. Olive & S. Coal Co.* v. *Red-mocker* (1901) 190 Ill. 538, 60 N. E. 888, Affirming (1900) 92 Ill. App. 442.

In a case where an order in a mine was injured, while attending to a hot box, by having his arm caught in an unguarded gear wheel close to the farther side of the bridge tree on which the box rested, evidence that the light was a considerable distance from the box, and that there was a shadow over the box, is admissible as part of the *res gestæ* and as bearing on the question whether the plaintiff assumed the risk, and whether defendant was negligent in not guarding the wheel and in not warning the plaintiff of the danger, although the complaint did not charge insufficiency of the light as a ground of negligence. *Kucera* v. *Merrill Lumber Co.* (1895) 91 Wis. 637, 65 N. W. 374.

Where one of the issues in an action for injuries caused by the explosion of a locomotive was the cause of the explosion, any evidence was competent which tended to show what that cause was. Accordingly, the admission of evidence that it would not have occurred had the locomotive been equipped with a safety appliance was not error, though the complaint contained no allegation alleging defective construction as a ground for recovery, since any evidence tending to show the cause of the explosion was competent. *San Antonio & A. P. R. Co.* v. *De Ham* (1899) 93 Tex. 74, 53 S. W. 375.

A petition in an action to recover damages for injuries to a fireman alleging that "he was greatly, seriously, and permanently injured on his head, eye, right shoulder, hand, side, leg, hips, back, and spine, and was seriously and permanently injured for life," and that "as a result of his injuries he has become weak, inefficient and incapacitated

in his business of railroading, in which he is skilled," warrants the admission of evidence of vomiting and hemorrhages which followed soon after the injuries complained of. *Mexican C. R. Co.* v. *Glover* (1901) 46 C. C. A. 334, 107 Fed. 350.

In an action for causing the death of a railway employee, the language of an answer alleging that deceased was guilty of contributory negligence in so negligently unloading a car as to obstruct the passage of defendant's train, which was backing into the station, and that, but for said neglect, the accident would not have happened, is broad enough to warrant the admission of evidence that at the time of the injury the deceased was performing services not within his ordinary duties. *Marshall* v. *Charleston & S. R. Co.* (1900) 57 S. C. 138, 35 S. E. 497.

(b) *Evidence held inadmissible.* — Where the issue is whether the plaintiff had been sufficiently instructed as to the dangers of a machine, evidence that the machine might at a slight expense have been set up so as to be less dangerous is irrelevant. *Rock* v. *Indian Orchard Mills* (1886) 142 Mass. 522, 8 N. E. 401.

Where the petition did not charge defendant with negligence on account of the character of a switch used in its railroad yard, it was error to permit witnesses to testify as to what, in their opinion, was the safest switch to use. *Galveston, H. & S. A. R. Co.* v. *English* (1900; Tex. Civ. App.) 59 S. W. 626, Rehearing Denied in 59 S. W. 912.

Where the evidence does not indicate that plaintiff was under the influence of liquor when injured, it is error to permit evidence that he had been seen drinking, with a worthless character, two months before, or that once he had been seen intoxicated, or that he had taken a drink the morning of the accident. *Dowalt* v. *Houston, E. & W. T. R. Co.* (1900) 22 Tex. Civ. App. 493, 55 S. W. 534.

Where there is no allegation that the injury was caused by the negligence of a fellow servant, evidence on that point is not admissible. *Bowling Green Stone Co.* v. *Cupliaw* (1901) 23 Ky. L. Rep. 945, 64 S. W. 507.

Where the only negligence alleged in an action against a railroad company for injuries to an employee was its failure to carry a burning headlight or ring the bell or blow the whistle, it is error to admit testimony that the engine had no pilot or cowcatcher. *Tennessee Coal, Iron, & R. Co.* v. *Hansford* (1900) 24a. 349, 82 Am. St. Rep. 241, 2 45

Where a complaint charge[s] that defendant's servants in [the] the first section were negligent in giving decedent's section the [sig]n in not protecting the rear of [his] section by flagman, it is error to testimony to show negligence in run the two sections so close together in failing to apprise deceased of proximity of the first section. *Louisville & N. R. Co.* v. *Scrcelon* (1901) Ky. L. Rep. 1400, 60 S. W. 613.

In an action by an employee for injuries alleged to have been caused by defects in a paper cutting machine, admission of evidence of the size of paper which was being cut is error. *Howe* v. *Medaris* (1899) 183 Ill. 488, N. E. 724, Reversing (1899) 82 Ill. 515.

Defendant's evidence that the track, where an injury was received, was ballasted in the usual and [ordinary] manner, is properly excluded where there is no complaint as to the condition of the ballast, but it is alleged that there was a cattle-guard sion, surrounded by weeds, [which] a switchman. Plaintiff's intestate stepped, causing him to fall and be run over. *Lake Erie & W. R. Co.* v. *Wilson* (1901) 189 Ill. 89, 59 N. [E.] Reversing (1900) 87 Ill. App. 300.

Where the petition in an action for an injury to a fireman, caused by the explosion of the boiler of the [locomotive] engine, alleges the generally defective condition of the fire box, and [contains] specific averments as to [defects] therein, but does not mention the absence of a "soft plug," evidence [in] relation to the want of [such] plug is inadmissible. *San Antonio & A. P. R. Co.* v. *De Ham* (1899; Tex. Civ. App.) 51 S. W. 395.

In an action against an employer for injuries, where plaintiff testified that he commenced work at 2 o'clock in the evening, which was long before dark at the time of the year when the injury occurred, and there was nothing in the complaint or in plaintiff's testimony indicating that any want of light contributed to the injury, or that it occurred in the night, the exclusion of evidence as to the lighting facilities in defendant's mill was proper. *Kocher* v. *Wisconsin River Paper & Pulp Co.* (1901) 110 Wis. 645, 86 N. W. 662.

In an action to recover for the death of a fireman caused by the tender leav-

ing the track at a certain place, evidence that the train was running at a dangerous rate of speed is improper, where negligence of that kind is not pleaded. *Kahoe* v. *Wisconsin Cent. R. Co.* (1887) 70 Iowa, 561, 31 N. W. 868.

An allegation that it was the duty of defendants to employ a suitable engineer, and that they neglected to do so, does not authorize proof that a fireman, in the absence of the engineer, managed the locomotive, unless the petition also alleges that defendants authorized or allowed the fireman to do such act. *Harper* v. *Indianapolis & St. L. R. Co.* 1869) 41 Mo. 488.

A petition setting forth that plaintiff was injured through the negligence of the company in "using defective machinery," and "in running its cars," etc., cannot be supported by evidence that the injury was caused by a defect in a rail. *Waldhier* v. *Hannibal & St. J. R. Co.* (1880) 71 Mo. 514.

In an action for negligence in failing to keep the plant in a safe condition, evidence that the negligence was in employing incompetent servants, is not admissible without a specific allegation thereof. *Troughear* v. *Lower Vein Coal Co.* (1883) 62 Iowa, 576, 17 N. W. 775.

In *Dickson C. R. Co.* v. *Dolin* (1875) 32 Mich. 510, the special incompetence alleged in the proof was that, when the offending servant was awakened by the person whose duty it was to awaken and call the conductors who were to run trains, he told the caller he did not feel able to go, and the latter told him he would have to go because there was no one else to go. The court remarked that it was questionable whether the declaration averred anything which would authorize proof of general incompetence; but there was, in their opinion, no proof either that the servant was incompetent, or that there was any reason to suppose it; that question was regarded as immaterial.

Where a complaint of an employee alleging injury from a piece of hammer breaking off and hitting him charges negligence generally, and then specifies negligence in that the hammer was old and cracked, there can be no recovery on evidence that the hammer was new, and not cracked, but too highly tempered. *De La Vergne Refrigerating Mach. Co.* v. *Stahl* (1899; Tex. Civ. App.) 54 S. W. 40.

Where there is no allegation in the complaint that the defendant had been negligent in ascertaining the habits of its employee, or that it has failed to avail itself of the means of doing so, and for certain specific faults of character the proof of the general verdict tends that the plaintiff had ample means of knowledge of such habits, will be regarded as [illegible] ible the [illegible] by a court of review. *Louisville, N. O. & T. R. Co.* v. *Sheppard* (1891) 123 Ind. 240, 24 N. E. 240.

Evidence that a servant was charged to close doors of factory upon leaving it for meals, that the work would be performed is not admissible under a complaint which merely alleges an injury received from such doors on application. *Hahn* v. *Hahn* (1896) 5 Neb. 480, 66 N. W. 650.

In *Conrad* v. *Missouri P. R. Co.* (1888) 98 Mo. 62 the charge in the petition was that a hand hold was "improperly, defectively, and dangerously constructed, in this, that it was not fastened to the brake staff securely and safely," etc. The court said: "The plain meaning of this charge is that the hand hold was so constructed originally that the defect was in the design itself. Such being the cause of action alleged in order to make a good petition it was necessary to state that the company negligently or carelessly adopted that hand brake or continued to use it after ascertaining its unfitness. We are inclined to the opinion that the petition does not state any cause of action. But however that may be, it certainly was error to admit evidence that the hand brake was out of repair, and that the company neglected to repair it. No such cause of action was stated in the petition, and there was an entire failure of proof of the cause of action alleged. There was no evidence adduced by plaintiff tending to prove that the brake shod or hand hold was improperly, defectively, or dangerously constructed, but only that from use its fastening to the brake staff had been weakened."

Where plaintiff alleged that his injuries were caused by defects in machinery at which he worked, evidence that a former employee had attempted to remedy the defects while working at the same machinery is inadmissible, as it neither tended to prove defendant's negligence nor that the risk was obvious. *Smith* v. *Bromley* (1900) 175 Mass. 286, 56 N. E. 593. The court remarked that such evidence was objectionable as tending to confuse the jury by raising an immaterial issue involving the acts of third persons.

818. Materiality.— The subjoined note summarizes the effect of a few decisions turning upon the materiality of the evidence offered.[1]

819. Competency; generally.— As a general rule, any evidence is competent which tends directly to prove what the condition of the place of work or the appliance which caused the injury may have been at the time of the casualty, or which has a bearing upon the question whether, supposing that condition to have been abnormally dangerous, the employer was culpable in creating it or permitting its continuance.[1] But evidence is inadmissible where it merely goes to

[1] In an action for personal injuries occasioned to the plaintiff while in the defendant's employ by the falling upon him of a large iron pump which, loaded upon a truck, he with others was moving from one part of the defendant's works to another, if the plaintiff contends that the absence of washers on the truck constituted a defect, evidence that the purpose of washers was to prevent the wheels from rubbing against and working out the pins, and not to prevent the truck or its load from shaking, is rightly excluded as immaterial. *Gelcneck* v. *Dean Steam Pump Co.* (1896) 165 Mass. 202, 43 N. E. 85.

Testimony that knowledge of the dangerous character of a machine was brought to the attention of the master mechanic in a repair shop by the witness, within a year prior to the time of an accident to an employee for which a recovery is sought, is immaterial where the danger was obvious and therefore assumed. *Cunningham* v. *Lynn & B. Street R. Co.* (1898) 170 Mass. 298, 49 N. E. 410.

In an action against a railroad company, where the issue is whether a headlight was burning on the occasion of the accident, evidence as to defendant's custom of lighting the headlight on its engine is immaterial, and therefore inadmissible. *Tennessee Coal, Iron, & R. Co.* v. *Hansford* (1900) 125 Ala. 349, 82 Am. St. Rep. 241, 28 So. 45.

In an action for injuries received in a coal mine, where the negligence charged is that a particular pillar of coal was negligently suffered to become too thin for safely mining coal, and that shots placed in it were likely to, and did, break through and injure plaintiff, a question asked of defendant's witness as to who had charge of the laying off of rooms and pillars and work in the mine is immaterial, as the negligence thus alleged consists, in any event, of the breach of a non-delegable duty. *Eureka Block Coal Co.* v. *Wells* (1901) 29 Ind. App. 1, 61 N. E. 236.

[1] Evidence of the precautions taken for his own safety by a witness who worked in the same trench as the injured servant was admissible as bearing on the dangerous character of the trench, and to rebut any inference prejudicial to his testimony from his conduct in going into the trench. *Bartolomeo* v. *McKnight* (1901) 178 Mass. 242, 59 N. E. 804.

In an action to recover for the death of a servant, killed by the fall of a staging suspended from iron hooks, one of which broke, evidence that the owner of the hooks,—a man who had a practical knowledge of such appliances, and had tested and used them,— recommended them to the defendant's foreman, is admissible to show the extent of care exercised in selecting them. *Little* v. *Read & D. Co.* (1898) 69 N. H. 494, 43 Atl. 619.

In an action to recover damages for the death of the plaintiff's intestate, killed while descending a ladder in a mine, testimony that the witness informed the superintendent of the mine of the unsafe condition of the ladder several days before the accident, and that the latter promised to repair it, is admissible as tending to show knowledge on the part of the defendant of the unsafe condition of the ladder prior to the accident. *Reese* v. *Morgan Silver Min. Co.* (1899) 17 Utah, 489, 54 Pac. 759.

In an action for injuries sustained through the falling of a wheel from a tackle block, owing to the pin working out, if there is a conflict of evidence as to the position of the head of the pin at the time of the accident and whether it was up or down, it is error to exclude evidence offered by the employer tending to show the position of the tackle block and how it was fastened to the mast which held it. *Houston* v. *Brush* (1894) 66 Vt. 331, 29 Atl. 380.

Evidence as to the manner in which

show the existence of facts which, even if they should be established to the satisfaction of the jury, would not warrant the inference that the defendant was negligent in the premises.[2]

machinery might easily have been remedied is admissible in an action for personal injuries caused by defects in such machinery. *Belle of Nelson Distilling Co.* v. *Riggs* (1898) 20 Ky. L. Rep. 499, 45 S. W. 99.

Where employees were injured by the failing of a derrick, evidence that they saw no one inspect it, or go up the mast to oil the parts, or for any purpose, is admissible to show want of inspection. *McMahon* v. *McHale* (1899) 174 Mass. 320, 54 N. E. 854.

Evidence that a railroad company had no car inspector in a town of 7,000 or 8,000 people, through which three railroad companies jointly use a track, and in which a great deal of switching is done, is admissible as tending to negative the claim that the railroad had exercised proper care in discovering and remedying defects in cars. *Missouri, K. & T. R. Co.* v. *Crowder* (1899; Tex. Civ. App.) 55 S. W. 380.

Where plaintiff was injured by reason of an alleged defective step on a locomotive on March 31st, it is not error to permit defendant's witness to testify that on the 17th of May, and for two months before, he had observed the step, and that it was in good condition. *Powers* v. *Boston & M. R. Co.* (1900) 175 Mass. 466, 56 N. E. 710.

Before a custom of other employers can affect the rights of parties, it must be shown to be so general that their knowledge of it may be presumed. *Couch* v. *Watson Coal Co.* (1877) 46 Iowa, 17. But with that proviso it is competent on the question of the employer's negligence. See § 13, *ante*.

Evidence of a custom in a mining district, that an operating company should look after the safety of roofs of entries to the mines, and of the company's responsibility for the condition of such roofs when notified of their defects, is admissible in an action for injuries resulting from the falling of a roof. *Taylor* v. *Star Coal Co.* (1899) 110 Iowa, 40, 81 N. W. 219.

Evidence that the system of block signals in use on defendant's trolley road was the same as that which had been adopted on a large number of electric railways, and was generally regarded as a sufficient protection to the servants operating the cars thereon, is competent. *Bergen County Traction Co.* v. *Bliss* (1898) 62 N. J. L. 410, 41 Atl. 837.

Evidence as to the practice of timbering up in mines similar to defendant's is competent. *Bergquist* v. *Chandler Iron Co.* (1892) 49 Minn. 511, 52 N. W. 137.

As regards a customary practice of the employer himself, it is clearly competent to prove that he departed from it in the given instance. Such departure implies an abnormality of conditions which, under some circumstances at all events, will import negligence, whether or not the practice was one which the employer was originally bound to adopt. Thus, in an action to recover for injuries caused by an blocked frog, a servant may introduce evidence that it was the custom of the defendant company to block all its frogs. *Coates* v. *Burlington, C. R. & N. R. Co.* (1883) 62 Iowa, 491, 17 N. W. 760.

[2] Where the risk arising from the position of machinery at which plaintiff was injured was obvious, evidence that the machinery was not placed in the proper manner was inadmissible, since it was of no consequence that the business might have been conducted more safely. *Smith* v. *Beaudry* (1903) 175 Mass. 286, 56 N. E. 596.

In an action for the death of a brakeman, caused by the fact that drawheads slipped and allowed the cars to come together, evidence that there were safer couplers of a different pattern from those used by defendant, is inadmissible. *Chicago & P. I. R. Co.* v. *Dinan* (1889) 81 Ill. App. 383.

Evidence of the unusual speed of a freight train is inadmissible in an action against a railway company to recover for the death of a brakeman who, while sitting on the top of one of the freight cars with his feet over the side, was knocked from the car by a mail bag suspended from a "mail crane." *Louisville & N. R. Co.* v. *Milliken* (1899) 21 Ky. L. Rep. 489, 51 S. W. 796. The court said: "Appellant had a right to run its train at any rate of speed it chose, and if, from the oscillation of the train, the intestate's feet were swung out in contact with the mail bag, by reason of the unusual speed of the train, this was one of the risks incidental to the business."

Evidence that new ties were put into a track before the accident is not com-

It is proper to admit evidence which tends to support or negativ either the conclusion that a servant for whose defaults the master wa responsible was culpable in respect to the particular act which wa the immediate cause of the injury,[3] or the conclusion that one of th defenses available to an employer was or was not open to him.[4]

petent upon the issue of a railroad company's negligence, unless it tends to show that the repairs were made at the place of the accident. *Knapp* v. *Sioux City & P. R. Co.* (1887) 71 Iowa, 41, 32 N. W. 18.

See also § 821, note 4, *post*.

[3] It is not error to admit in evidence a rule from a railroad company's book of rules providing that "a lamp swung across the track is the signal to stop," where the issue involved is whether the engineer was negligent, in failing to perceive upon the track an employee who had fallen down and become unconscious by reason of sickness. *Helton* v. *Alabama Midland R. Co.* (1893) 97 Ala. 275, 12 So. 276.

[4] Where it is alleged that the injury resulted from the failure of a railway company to discharge its duty to its employees by neglecting to provide rules for signals to engineers of switch engines in the yard, where there were many tracks and where two or more engines were employed near each other at night, and it is disputed whether the injury was caused by the engineer in charge of the engine causing the injury mistaking a signal intended for another engineer, or whether the intestate gave the signal for the purpose of coupling cars, evidence showing that the intestate knew that the coupling could not be made is relevant to the issue. *Louisville & N. R. Co.* v. *York* (1901) 128 Ala. 305, 30 So. 676.

Evidence that plaintiff in an action for injuries received while in defendant's employ recommended for appointment as a conductor another employee through whose recklessness plaintiff was injured has no tendency to show that plaintiff knew the latter to be a reckless and careless man. It rather tends to show the contrary, as it will be presumed that he would not recommend an unfit man. *Texas & P. R. Co.* v. *Johnson* (1897) 90 Tex. 304, 38 S. W. 520, Denying Writ of Error in (1896) 14 Tex. Civ. App. 566, 37 S. W. 973.

Evidence that it was customary, when men were to lower or hoist a mechanism by the use of falls, for them to make the hitch in such way as they saw fit, is incompetent, unless it was shown that deceased knew of the custom. *Keegh* v. *Overman Wheel Co.* (1899) 174 Mass. 455, 54 N. E. 890.

In an action by a brakeman who was injured by falling between the cars in attempting to pass from the roof of one freight car to that of another, the accident being attributed by the company to the fact that he was not using the running board in the middle of the car but walking on the roof of the car, it was held that evidence regarding the usual condition of the running boards as compared with the roofs of the freight cars off the running boards, such evidence being offered for the purpose of justifying plaintiff's failure to use the running board on the car in question, was incompetent, in the absence of any evidence or contention that the running board of the car in question was out of repair. *Benson* v. *New York N. H. & H. R. Co.* (1901) 23 R. I. 147, 49 Atl. 689.

Evidence as to the custom of many electric roads with reference to the number of men employed to operate a car under conditions similar to those shown in the case under review is inadmissible upon the question of the negligence of the company in employing but one man to operate the car. *Redfield* v. *Oakland Consol. Street R. Co.* (1896) 112 Cal. 220, 43 Pac. 1117.

As bearing on the question of his contributory negligence, it is competent to show that a servant adopted the course usually followed by other employees of his class under similar circumstances (*Whitsett* v. *Chicago, R. I. & P. R. Co.* [1885] 67 Iowa, 155, 25 N. W. 104; *McKean* v. *Burlington, C. R. & N. R. Co.* [1880] 55 Iowa, 192, 7 N. W. 505); or that the act of a fellow servant which caused the injury was one of such an unusual character that he had no reason to anticipate it (*Jeffrey* v. *Keokuk & D. M. R. Co.* [1881] 56 Iowa, 546, 9 N. W. 884).

The admission in evidence in an action for personal injuries to a brakeman while coupling a train, of a rule holding conductors and engineers equally responsible for the violation of any rules

The exclusion even of evidence which, if it had been admitted, would have been decisive as to a certain issue, is not prejudicial error, if evidence of substantially the same import has already been admitted.[5]

Whether evidence the probative force of which depends upon the existence of a substantial similarity between the conditions to which it relates and the conditions prevailing at the time or place of the accident is admissible without some specific testimony tending to show that there is such a similarity must be determined with reference to the circumstances of each particular case.[6]

820. Condition of the given instrumentality before the accident.— The significance of testimony showing that the given instrumentality had discharged its functions properly during the period anterior to the accident has already been discussed, in so far as it has a bearing upon the question whether the employer was chargeable with notice of the existence of the defects which caused the accident (§§ 136–138, *supra*). In the present section the effect of such testimony in its relation to the question whether the instrumentality was a proper one to use under the circumstances will be considered.

a. Condition; generally.— In one case the doctrine was adopted that evidence of the condition of an appliance at times prior to the accident is not admissible for the purpose of proving that it was in a dangerous condition when the injury was received.[1] But a more logi-

governing the safety of their trains, and requiring them to take every precaution for the protection of their trains, even though not provided for by rule, is harmless to defendant. *Galveston, H. & S. A. R. Co.* v. *Henning* (1897; Tex. Civ. App.) 39 S. W. 302, Affirmed in (1897) 90 Tex. 656, 40 S. W. 392.

[5] As, where the court in an action by a brakeman refused to admit in evidence a rule of the railroad forbidding brakemen to ride on the engine, and the record showed that evidence had been given of the promulgation of a rule forbidding them to leave their posts of duty, or take any position on the train other than that assigned to them. *Norfolk & W. R. Co.* v. *Marpole* (1899) 97 Va. 594, 34 S. E. 462.

[6] In an action for injuries caused by the explosion of the boiler of a locomotive in charge of plaintiff, when the question of contributory negligence depends somewhat upon the time taken to run over the section of the road on which the explosion occurred, old timetables of the defendant company, not in effect at the date of the accident, are inadmissible for the purpose of showing that no unusual danger was incurred by violating the requirements of the existing timecard, when it is not first shown that the conditions were the same at the date of the time-tables and the time of the accident. *Knold* v. *Rio Grande W. R. Co.* (1900) 21 Utah, 379, 81 Am. St. Rep. 693, 60 Pac. 1021.

As the condition of sand at various times affects its weight, a servant injured by the caving in of a trench in which he was at work cannot be permitted to show the weight of a cubic foot of sand taken from the trench, without showing the time when it was taken and weighed. *Laporte* v. *Cook* (1901) 22 R. I. 551, 48 Atl. 798.

In an action for injuries alleged to have been caused by the excessive speed of a train, it is competent to introduce testimony as to the rate of speed at a place 1½ miles from the scene of the accident. *Louisville & N. R. Co.* v. *Woods* (1894) 105 Ala. 561, 17 So. 41.

See also cases cited in the following sections.

[1] Evidence that the state mining in-

cal theory is embodied in the statement th.t, in an action by an employee against an employer for an injury caused by a defect in plant, it is not necessary to adduce evidence of the condition of plant at the precise moment the casualty occurred, and that i enough to prove such a state of facts so shortly before or after casualty as will induce a reasonable presumption that the condi was unchanged.[2] Especially is such evidence competent when injury resulted from the manner in which the plant was arranged constructed, and the conditions thus created were essentially per nent in their nature.[3]

b. Nonoccurrence of accidents.—It is not disputed that the n occurrence of accidents during a long period under conditions si lar to those which prevailed when the injury was received is evide which tends strongly to show that the defendant was free from ne gence.[4] But there is some conflict of opinion as to the precise qual of such evidence when considered with reference to the power o court to direct or review the finding of a jury.

The New York doctrine has been thus formulated: "As a gene rule, where an appliance, machine, or structure not obviously dang ous has been in daily use for years, and has uniformly proved a quate, safe, and convenient, it may be continued without the imput

spector on an occasion prior to the accident in question found the safety catches removed from the cages used in the mine was held inadmissible upon the question as to whether the safety catches were in a defective condition at the time of the fall of the cage. *Diamond Block Coal Co.* v. *Edmonson* (1896) 14 Ind. App. 594, 43 N. E. 242.

[2] *Little Rock & Ft. S. R. Co.* v. *Eubanks* (1885) 48 Ark. 460, 3 Am. St. Rep. 245, 3 S. W. 808 (railway track).

A jury is warranted in finding that a machine was defective at the time the injury was received, when there is evidence that it had been defective for several months, and had remained in that condition up to a day or so before the accident, and the defendant has offered no proof that the defect had been remedied during the period not covered by the direct evidence. *Pioneer Cooperage Co.* v. *Romanowicz* (1900) 186 Ill. 9, 57 N. E. 864, Affirming (1899) 85 Ill. App. 407.

Cases in which the prior condition of an appliance is submitted as a circumstance bearing upon its condition at the time of the accident are distinguishable from those in which the same evide is viewed as one of the elements wh point to the conclusion that the ma was negligent in not having remedi defect of which he had notice. *H* v. *Quigley* (1900) 41 C. C. A. 294, Fed. 187.

[3] Where there was no change in t general conditions and character of passageway adjoining the carriage a circular saw in a mill from the time machinery was placed therein until a er an employee was injured by con with the saw, and there was evidence an action for the injury that the on the carriage when the injury o curred was not unusually large, th mony of witnesses in defense, as to the use of the passageway, should not limited to those who were then wh the plaintiff was, he having testi that the passageway was never s ea reasonably convenient. *Lafl Plumley* (1900) 175 Mass. 304, 56 N. 281.

[4] In all the cases cited in the follow ing notes this is assumed to be the co rect doctrine.

tion of negligence."[5] A similar doctrine possibly prevails in Georgia.[6]

In other cases the fact that a certain instrumentality had been used, or a certain system had been in operation, for a long time before the accident, without disclosing any unsafe qualities, has been treated as one which merely tends to negative culpability, and is not conclusive in the master's favor.[7]

The latter of these theories would appear to be the more reasonable and logical. In most of the cases in which the right of recovery was denied as a matter of law, the instrumentality in question was one which was in common use; and in a large number of jurisdictions this circumstance alone is deemed conclusive in the master's favor (see § 44, *ante*). But if this element is assumed to be abstracted, it is dif-

[5] *Lafflin* v. *Buffalo & S. W. R. Co.* (1887) 106 N. Y. 140, 60 Am. Rep. 433, 12 N. E. 599. To the same effect are the cases of *Burke* v. *Witherbee* (1885) 98 N. Y. 562 (two judges dissenting); *Stringham* v. *Hilton* (1888) 111 N. Y. 196, *sub nom. Stringham* v. *Stewart*, 1 L. R. A. 483, 18 N. E. 870; *Dingley* v. *Star Knitting Co.* (1890) 34 N. Y. S. R. 989, 12 N. Y. Supp. 31. Affirmed in (1892) 131 N. Y. 552, 32 N. E. 35; *Kaye* v. *Rob Roy Hosiery Co.* (1889) 51 Hun, 519, 4 N. Y. Supp. 571.

For a decision of the supreme court embodying a different doctrine, see note 7, *infra*.

[6] See *Riverside Cotton Mills* v. *Green* (1900) 98 Va. 58, 34 S. E. 963.

[7] *Myers* v. *Hudson Iron Co.* (1889) 150 Mass. 125, 15 Am. St. Rep. 176, 22 N. E. 631 (disapproving of the unqualified doctrine enunciated in New York); *Illinois C. R. Co.* v. *Jones* (1882) 11 Ill. App. 324; *Ferris* v. *Bernheim Bros.* (1899) 51 La. Ann. 178, 24 So. 771 (servant had passed frequently down a defective stairway); *Cosselman* v. *Dunfee* (1901) 59 App. Div. 467, 69 N. Y. Supp. 271 (hook from which heavy bucket was suspended bent after being safely used for some time).

In an English case the fact that a turntable had been operated for about five years without any accident was said to point to the conclusion that it was constructed with due care. But the decision was really based on the absence of any evidence that the persons constructing it were incompetent, and it is perhaps doubtful whether, apart from this fact, the court would have taken upon itself to negative liability. *Potts* v. *Port Carlisle Dock & R. Co.* (1860; Q. B.) 8 Week. Rep. 524, 2 L. T. N. S. 283.

In *Mellors* v. *Shaw* (1861) 1 B. & S. 437, 30 L. J. Q. B. N. S. 333, 7 Jur. N. S. 845, 9 Week. Rep. 718, the defendants were held liable in spite of evidence that the shaft which caused the injury had been safely used for six years before the accident; but the precise effect of the evidence was not discussed by the judges.

An instruction that when a machine not obviously dangerous had been in daily use for a long time, and had uniformly proved safe and efficient, its use might be continuous without imputation of negligence, was properly refused. *Silveira* v. *Iversen* (1900) 128 Cal. 187, 60 Pac. 687.

On the ground that a person should not be relieved of the consequences of carelessness simply because no injury had resulted from former carelessness, it has been held that an instruction, in an action by a stevedore for injury from lumber which was being lowered through a hatchway into the hold of the vessel where he was stowing it away, falling on him, that if it was customary to station a man at the hatch to give a warning cry, and, on hearing the signal, it was customary for the men to get to a place of safety, and this means of warning the men "had theretofore been found to be" a safe and sufficient mode for the protection of the men so working in the hold, and that all these precautions had been taken by defendant, the verdict should be for defendant, was properly modified by inserting the word "was" for the words "had theretofore been found to be." *Hennessey* v. *Bingham* (1899) 125 Cal. 627, 58 Pac. 200.

ficult to perceive any satisfactory ground upon which a court can justified in drawing a legal inference of noncalpability from the b fact that the instrumentality in question had never caused an ac dent until the plaintiff was injured.

Under any view of the master's obligations it is manifest that lo user of an obviously dangerous instrumentality indicates nothi more than good fortune in respect to the avoidance of an accident."

c. *Occurrence of accidents.*—"Where the sufficiency or safety the instrument which is claimed to have caused the accident is issue, evidence of similar accidents resulting from the same cause competent. Such facts are in the nature of experiments to show actual condition of the instrument and how it served its purpose wh put to the use for which it was designed, and that the common ca of these accidents was a dangerous and unsafe thing."[9] This rule of course, not applicable where the imperfections indicated by th prior unsatisfactory operation were wholly different from those whi eventually caused the accident.[10] Nor can it be adduced to the di

[8] *Monaghan* v. *Pacific Rolling Mill Co.* (1889) 81 Cal. 196, 22 Pac. 590.

Co.* (1886) 36 Minn. 6, 4 Am. St. Rep. 629, 29 N. W. 340 (other trains derailed at same switch); *Daley* v. *American Printing Co.* (1889) 150 Mass. 77, 22 N. E. 439 (belt had frequently come off of a pulley); *Auhl* v. *Manhattan L. Ins. Co.* (1898) 34 App. Div. 491, 54 N. Y. Supp. 222 (persons had been caught in automatically closing door of elevator); *Findlay Brewing Co.* v. *Bauer* (1893) 50 Ohio St. 560, 35 N. E. 55 (barrels had frequently fallen out of an elevator while it was being operated); *Whitelaw* v. *Moffat* (1849) 12 Sc. Sess. Cas. 2d series, 431 (chain which gave way had broken twice before).

Other cases to the same effect are cited in Shearm. & Redf. Neg. § 60b.

In an action by an employee of a railroad for injuries caused by an explosion of dynamite carried in the caboose, the question whether evidence that "sparks were flying all the time" tended to show that the engine was in a defective condition was a question for the jury. *Rush* v. *Spokane Falls & N. R. Co.* (1900) 23 Wash. 501, 63 Pac. 509.

Evidence of the happening of accidents to other persons working about the machinery, under such conditions and circumstances as attended the accident in question, was held competent to show that the employer could reasonably have apprehended the happening thereof, and should therefore have guarded against it, or instructed the employees in regard to the danger, it not being apparent. *Wyman* v. *Orr* (1900) 17 App. Div. 136, 62 N. Y. Supp. 195.

Evidence that an undercut machine which, when in proper working order would make but one cut, and then stop was reported to defendant's foreman about two years before the injury to plaintiff, as repeating itself, and starting from a stop, and that plaintiff also reported that the machine repeated on the day he was injured, by reason of the machine starting from a dead stop, is sufficient proof of defendant's negligence to go to the jury. *Packer* v. *Thomson-Houston Electric Co.* (1900) 175 Mass. 486, 56 N. E. 704.

Evidence that a horse by which an employee was kicked had, on two previous occasions, viciously and without provocation, kicked in a dangerous manner, is competent on the question of the vicious character of the animal. *Knickerbocker Ice Co.* v. *Finn* (1897) 25 C. C. A. 579, 51 U. S. App. 256, 80 Fed. 183.

[10] *Kern* v. *De Castro & D. Sugar Ref. Co.* (1890) 125 N. Y. 50, 34 N. Y. S. R. 363, 25 N. E. 1071.

advantage of the employer, where the instrumentality in question was not defective in such a sense as to import culpability.[11]

821. Condition of the given instrumentality after the accident.—According to some of the authorities, the mere fact that an appliance was found to be defective after the accident is not evidence sufficient to sustain a verdict for a plaintiff who bases his right of action upon the failure of the company to keep the appliance in good condition.[1]

Another theory is that such evidence is admissible if it relates to a time not long after the occurrence of the accident, and, for aught that appears, there has been no change in the conditions during the intervening period.[2]

Whichever view is taken, such evidence is certainly incompetent where the defects discovered were such that they may reasonably be supposed to have been the result of the accident itself,[3] or where the

[11] *Benedict* v. *Schrader* (1891) 38 N. Y. S. R. 201, 14 N. Y. Supp. 888.

[1] *Popp* v. *Michigan C. R. Co.* (1895) 103 Mich. 130, 65 N. W. 808 (railway car); *Darcy* v. *New York, N. H. & H. R. Co.* (1897) 168 Mass. 179, 47 N. E. 418 (switch stand which plaintiff struck was found to be leaning towards the track); *Ketterman* v. *Dry Fork R. Co.* (1900) 48 W. Va. 606, 37 S. E. 683 (brake of a car which ran away found to be slightly out of order).

A verdict for the plaintiff was set aside where there was no other direct testimony on the part of the defendant's car inspector to the effect that he had examined the car which caused the accident the morning before that accident occurred, and found all appliances in good condition, and all the evidence tending to prove knowledge here referred only to the condition of the car after the accident. *Johnson* v. *Chesapeake & O. R. Co.* (1882) 36 W. Va. 73, 14 S. E. 432.

[2] Evidence of the condition of the brakes of a car twenty minutes after an accident alleged to have been caused by the defective adjustment of the brakes was held admissible, as there was no proof of any alteration in that time. *Woods* v. *Long Island R. Co.* (1899) 159 N. Y. 546, 54 N. E. 1095, Affirming (1896) 11 App. Div. 16, 42 N. Y. Supp. 140.

Evidence going to show that a hand-hold on a railway car was defective after the accident was held admissible for the purpose of proving the nature and character of the conditions which caused the injury. *Gutridge* v. *Missouri P. R. Co.* (1887) 94 Mo. 468, 4 Am. St. Rep. 392, 7 S. W. 476, (1891) 105 Mo. 520, 16 S. W. 943.

In an action for injuries due to the breaking of a defective brake staff, evidence that defendant's car repairer, shortly before the accident, repaired the car in question, and a week after the accident examined the brake appliances and broken pieces, and identified them as those he had put on the car, which lacked a necessary and usual part to make them safe, was held to have been properly admitted. *St. Louis, P. & N. R. Co.* v. *Dorsey* (1899) 89 Ill. App. 555, Affirmed (1901) 189 Ill. 251, 59 N. E. 593.

A witness who visited a mine four days after an accident, and was shown by the shift boss the ladder from which the deceased fell, may testify as to its rotten condition, as against an objection that he only knew it was the ladder in use at the time of the accident by hearsay. Under such circumstances there is an adequate identification of the ladder. *Reese* v. *Morgan Silver Min. Co.* (1899) 17 Utah, 489, 54 Pac. 759.

It may be mentioned in the present connection that evidence of the condition of machinery shortly after the term of a lease has begun to run has been held competent to show its condition at the commencement of the term. *McCulloch* v. *Dobson* (1892) 133 N. Y. 114, 30 N. E. 641.

[3] As, where an elevator fell 30 feet, and some parts of the machinery were subsequently found to be out of place and loosened. *Robinson* v. *Charles Wright & Co.* (1892) 94 Mich. 283, 53 N. W. 938.

circumstances are otherwise of such a nature as to show conclu
that, even if the defect did actually exist at the time of the acci
the defendant was not negligent.[4]

822. Condition of the given instrumentality both before and afte accident.— Evidence that the machine which caused the accid
in good condition at the time of the trial, and at other times
before and after the accident, and that it worked properly before
after the accident, is admissible as having a tendency to show its
dition and how it worked at the time of the accident.[1] Such evid
may even be conclusive in the master's favor.[2]

823. Condition of parts of the plant other than that which caused injury.— *a. Generally.*—The supreme court of Minnesota has
down the doctrine that evidence of the existence of defective co
tions at a place on the employer's premises other than that at wh
the injury was received is not admissible for the purpose of estab
ing the existence of similar conditions at the place where the acci
occurred, unless testimony is also introduced which tends to s
that the former conditions were the result of a cause which was
sumptively operative at the place of the casualty also, or unless
other defects may themselves have been the cause of the defect wh
produced the injury.[1] This doctrine would seem to be the only

[4] Opinions as to the existence of a defect, and the negligence of the master in failing to discover it, are of no weight where it is apparent that they are based on an examination after the accident and the defect is of such a nature that none of the usual tests would have revealed it. *Indianapolis, B. & W. R. Co.* v. *Toy* (1879) 91 Ill. 474, 33 Am. Rep. 57.

Where a servant's eye was struck by a fragment which flew from a cold-chisel used by him in cutting steel rails, and the chisel was shown to have been made by a reputable foundry, and to have been inspected and pronounced sound by defendant's inspector, and also considered sound by plaintiff, himself,—a man of many years' experience with such tools,—the evidence of experts who examined it after the accident, that it was defective, was held inadmissible. *Kent* v. *Yazoo & M. Valley R. Co.* (1899) 77 Miss. 494, 78 Am. St. Rep. 534, 27 So. 620.

[1] *Tremblay* v. *Haruden* (1894) 162 Mass. 383, 38 N. E. 972.

When evidence of the condition of the instrumentality in question before and after the accident is first offered, the trial judge may, without an abuse of discretion, reject it, unless the plain also offers to show that the cond was practically the same at the time the accident. If the testimony sub quently takes such a course that the dence ought to be admitted if offe it is for the plaintiff to renew the of If he omits to do so, he has no gro upon which to predicate prejudicial ror as regards the original rejecti *Powers* v. *Boston & M. R. Co.* (1900 175 Mass. 466, 56 N. E. 710.

[2] Thus, it has been held that where mangle is shown to have run steadi both before and after an accident, a its construction is such as would ha prevented it from running unsteadily, jury is not warranted in finding that was running unsteadily at the time the accident, and that this unsteadine was the cause of the injury receive Testimony to the contrary by the serv ant himself was characterized as bein either intentionally or unintentionall false. *Groth* v. *Thomann* (1901) 11 Wis. 488, 86 N. W. 178.

[1] *Morse* v. *Minneapolis & St. L. R. Co* (1883) 30 Minn. 465, 16 N. W. 353 where the injury was caused by a broke rail and an imperfect switch, and it wa held error to admit evidence of other de

cal one; but it is not easy to reconcile on such a basis the cases in which such evidence has been declared either admissible or inadmissible.[2]

fects at other places on the road, there being nothing to show that they had any connection with the accident.

[2](a) *Evidence not admissible.*—Testimony as to the condition of the track at places other than that of the accident was held incompetent in *Grand Rapids & I. R. Co.* v. *Huntley* (1878) 38 Mich. 540, 31 Am. Rep. 321; *Louisville & N. R. Co.* v. *Fox* (1875) 11 Bush, 495.

In an action against a lumber company for an injury alleged to have been partly caused by the roughness of the roadbed on which its trains were operated, it was held proper for the plaintiff to prove on his own behalf that any part of the road on which the train had run on the trip in question was rough and uneven, but evidence going to show the general condition of the road in other respects in other localities was held not admissible. *Haley* v. *Jump River Lumber Co.* (1892) 81 Wis. 412, 51 N. W. 321, 956. The court, however, thought that such evidence might be competent to some extent on cross-examination.

Evidence as to the unblocked condition of the frogs in yards on defendant's road other than that in which the accident in suit occurred is not admissible for the purpose of charging the plaintiff with constructive knowledge of the condition of the frogs which caused his injury. *Trott* v. *Chicago, R. I. & P. R. Co.* (1901) 115 Iowa, 80, 86 N. W. 33.

The admission of evidence in an action by an employee against his employer for injuries sustained by the falling of a metal "mandrel," alleged to have been caused by negligently permitting a clamp device which held it in place to become out of order, that several other mandrels similarly placed had fallen on previous occasions, is reversible error, where such falls were occasioned by causes not affecting the attachment whose defect caused the fall in question. *Gaar, S. & Co.* v. *Wilson* (1898) 21 Ind. App. 91, 51 N. E. 502.

In an action by a stranger it was held that the condition of telegraph poles 40 or 60 rods away from those which fell was inadmissible, where there was no evidence to show that the former were of the same kind as the latter, put up at the same time, and equally exposed to decay. *Western U. Teleg. Co.* v. *Lewis* (1874) 47 Ind. 552.

(b) *Evidence admissible.*—In a case where a defective track was alleged to have wrecked a train, evidence tending to show the condition of the roadbed just prior to and contemporaneously with the accident, at places other than that where the wreck occurred, was held admissible. *Tanner, B. & H. R. Co.* v. *Taylor* (1890) 79 Tex. 101, 23 Am. St. Rep. 316, 14 S. W. 918.

It is competent, for the purpose of charging an employer with negligence in the use of a pulley which broke and injured an employee, to show that another pulley of the same form of construction and material, and used for the same purpose and in the same way, as the one in question, broke a short time before, in connection with evidence that both pulleys were driven by a tight belt, and that the tightness of the belt and the danger of its breaking the pulley were called to the employer's attention. *Shute* v. *Ex Oz Mfg. Co.* (1898) 69 N. H. 210, 40 Atl. 304.

Where the timbers supporting the roof of a drift in a mine gave way, evidence showing the construction of other parts of the roof adjacent to the place of the accident, so far as such other parts can be shown to have been constructed in a similar manner, is properly admitted on the issue whether the timbers which fell were or were not negligently placed in the roof. *Sampson Min. & Mill Co.* v. *Schaad* (1899) 15 Colo. 197, 25 Pac. 89.

Where it is alleged that a locomotive boiler, including the flues, was in a generally worn-out condition, and that because of such condition as to the shell the boiler exploded, evidence of the condition of the flues, as well as other parts of the inside structure of the boiler, is admissible as bearing on the question whether the defendant knew or ought to have known of the existence of defects in the shell. *Baxter* v. *Chicago & N. W. R. Co.* (1898) 101 Wis. 307, 80 N. W. 614.

In a case where injury was received by an employee owing to a defect in a dock on which he was working, it is competent to introduce evidence showing that the dock was defective by reason of holes at many other places be

The fact that several appliances belonging to the same lot as to which the one which caused the accident belonged were de[fective] sometimes admissible as evidence tending to show that a certain defect of manufacture runs through the entire lot. Whether defect is of such a character as to warrant the reception of such dence depends upon circumstances.[3]

b. Nonoccurrence of accidents.— In two cases it has been held a master cannot be held liable on the ground of having furnished ans[wer] appliance, where similar appliances have for a long time put to the same use without the occurrence of any accidents.[4] In instance the propriety of treating such a fact as a basis for a sion of law would seem to be as questionable as it is where simi evidence is proffered with regard to the instrumentality which ca the injury.

c. Occurrence of accidents.—Evidence that accidents simila that which caused the injury had occurred in the use of parts of plant which were of the same kind as the one in question is adm ble where those accidents were due to circumstances which may have been operative at the time when the injury was received.[5]

824. Alterations in the plant or system after the accident; evidential import of.— Evidence which shows that, after the accident, the plant or the system of the employer was altered and improved such a manner as to eliminate the particular risk which caused injury, is undoubtedly competent to show that defective condition existed at the time of the accident.[1] But, according to the weight of authority, such evidence is not admissible for the purpo

sides that at which the accident occurred. *Propsom* v. *Leatham* (1891) 80 Wis. 895, 50 N. W. 586.

Evidence that telegraph poles and wires had been down at other places and times within a few miles of the scene of an accident is competent, but not conclusive, on the question of an employer's negligence in maintaining an unsafe line. *Randall* v. *Northwestern Telg. Co.* (1882) 54 Wis. 142, 41 Am. Rep. 17, 11 N. W. 419.

[3] *De Dora* v. *White* (1896) 9 App Div. 521, 41 N. Y. Supp. 628, the court, while recognizing that there are cases in which such evidence is admissible, rejected the testimony offered, as it related only to a single appliance,—an eye bolt of the same pattern as that which broke,—and the defect proved was merely bad welding.

[4] *La Pierre* v. *Chicago & G. T. R. Co.* (1891) 99 Mich. 212, 58 N. W. 60; *Hall & C. Mfg. Co.* v. *Tina* (1899) 85 App. 310. In the latter case the master was absolved, although experts testified that the appliance was constructed unscientifically, and was weak for the purpose for which it was used.

Cavanagh v. *O'Neill* (1895) 27 App Div. 48, 50 N. Y. Supp. 267 (other appliances had fallen under circumstances similar to those which prevailed when the servant was injured by the one in question).

[5] *Mercer* v. *Atchison, T. & S. F. R. Co.* (1895) 55 Kan. 250, 38 Pac. 778; *Atlas* v. *Atlas S. S. Co.* (1899) 37 Fed. 426; *St. Louis & S. F. R. Co.* v. *Ivie* (1886) 35 Kan. 112, 11 Pac. 105, 57 Am. Rep. 156; *Atchison, T. & S. F. R. Co.* v. *McKee* (1887) 37 Kan. 62, 2 Pac. 184.

of establishing negligence on the employer's part in respect to the existence of the conditions which created that risk.[2]

Where it is a question of the propriety of a temporary expedient adopted for preventing an accident, after the discovery of certain dangerous conditions, evidence of what was done after those condi-

[2] The reasons of the doctrine thus adopted are clearly explained by the court in *Morse* v. *Minneapolis & St. L. R. Co.* (18—) 30 Minn. 468, 16 N. W. 358, where the court, after referring to the decisions cited in the last note, proceeded thus: "If competent, such evidence is only so as an admission of the previous unsafe condition of the thing repaired or removed, and, to render it admissible as such, the act must have been done so soon after the accident and under such circumstances as to indicate that it was suggested by the accident, and was done to remedy the defect which caused it. All courts who admit the evidence at all so hold. In the present case the change in this switch was made over a year after the accident, and after it had been removed to another place. Under such circumstances the repairs were, presumptively, merely an ordinary betterment. Under such a state of facts such evidence would not be admissible under any rule, and its admission was therefore error. But, on mature reflection, we have concluded that evidence of this kind ought not to be admitted under any circumstances, and that the rule heretofore adopted by this court is on principle wrong; not for the reason given by some courts, that the acts of the employees in making such repairs are not admissible against their principals, but upon the broader ground that such acts afford no legitimate basis for construing such an act as an admission of previous neglect of duty. A person may have exercised all the care which the law required, and yet, in the light of his new experience, after an unexpected accident has occurred, and as a measure of extreme caution, he may adopt additional safeguards. The more careful a person is, the more regard he has for the lives of others, the more likely he would be to do so; and it would seem unjust that he could not do so without being liable to have such acts construed as an admission of prior negligence. We think such a rule puts an unfair interpretation upon human conduct, and virtually holds out an inducement for continued negligence."

This statement of principles is adopted as correct in *Columbus & P. S. R. Co.* v. *Hawthorne* (1892) 144 U. S. 202, 36 L. ed. 405, 12 Sup. Ct. Rep. 591.

To the same effect is the following passage in the judgment of the court in *Matey* v. *Pickle Marble & Granite Co.* (1896) 20 C. C. A. 366, 36 U. S. App. 682, 74 Fed. 155. "Evidence that after the accident the master repaired his machinery, or adopted a different method of conducting his business, is inadmissible to prove his negligence at the time of the accident, because a rule that such evidence is competent would impose a penalty upon the master for making such repairs and changes, would constitute them a confession on his part of a prior wrong, and would thus deter him from improving his machinery and his methods. Such evidence is also inadmissible because it has no legitimate tendency to prove that the machinery and methods were not reasonably safe and suitable for use in the conduct of the business at the time of the accident."

The doctrine thus laid down has also been approved in the following cases: *Hart* v. *Lancashire & Y. R. Co.* (1869) 21 L. T. N. S. 261; *Atchison, T. & S. F. R. Co.* v. *Parker* (1893) 5 C. C. A. 220, 12 U. S. App. 132, 55 Fed. 595; *Norris* v. *Atlas S. S. Co.* (1889) 37 Fed. 426; *Colorado Electric Co.* v. *Lubbers* (1888) 11 Colo. 505, 7 Am. St. Rep. 255, 19 Pac. 479; *Morris* v. *Winchester Repeating Arms Co.* (1901) 73 Conn. 680, 49 Atl. 180; *Weber Wagon Co.* v. *Kehl* (1891) 40 Ill. App. 585; *Chicago & E. R. Co.* v. *Lee* (1897) 17 Ind. App. 215, 46 N. E. 543; *Harter* v. *Atchison, T. & S. F. R. Co.* (1895) 55 Kan. 250, 38 Pac. 778; *St. Louis & S. F. R. Co.* v. *Weaver* (1886) 35 Kan. 412, 11 Pac. 408, 57 Am. Rep. 176; *Missouri, K. & T. R. Co.* v. *Young* (1896) 4 Kan. App. 219, 45 Pac. 963; *Cherokee & P. Coal & Min. Co.* v. *Britton* (1896) 3 Kan. App. 292, 45 Pac. 100; *Ducey* v. *New York, N. H. & H. R. Co.* (1897) 168 Mass. 479, 47 N. E. 418; *Downey* v. *Sawyer* (1892) 157 Mass. 418, 32 N. E. 656; *Hipsley* v. *Kansas City, St. J. & C. B. R. Co.* (1885) 88 Mo. 348; *Alcorn* v. *Chicago & A. R.*

tions had caused an injury is admissible for the purpose of ing what could have been done to prevent the casualty.[3]

825. Habitual course of conduct.— Evidence that an employ bitually pursued a certain course of action or behaved in a c way is not admissible for the purpose of showing what he ac did at the time of the accident.[4]

826. Employer's insuring himself against injuries to servants.— fact that the defendant had taken out a policy of insurance secured him an indemnity for such compensation as he might be pelled to pay to injured servants is not competent evidence action by one of those servants. The fact of the insurance may sibly tend to lessen the strength of his motives for being careful, the question is not how much or how little motive the defendant for being careful, but whether he did in fact exercise proper c But the admission of evidence of a conversation between the plai and defendant, in which reference was made by the latter to the that he was insured against accident, will not be regarded as p dicial error, where the trial judge expressly stated that this fact

Co. (1891) 108 Mo. 81, 18 S. W. 188; *Friel* v. *Citizens' R. Co.* (1893) 115 Mo. 503, 22 S. W. 498; *O'Donnell* v. *Baum* (1889) 38 Mo. App. 245; *Delaney* v. *Hilton* (1883) 18 Jones & S. 341; *Virginia & N. C. Wheel Co.* v. *Chalkley* (1900) 98 Va. 62, 34 S. E. 976; *Kreider* v. *Wisconsin River Paper & Pulp Co.* (1901) 110 Wis. 645, 86 N. W. 862; *Rudd* v. *Bell* (1887) 13 Ont. Rep. 47 (p. 55). Citing *Wyman* v. *The Duart Castle* (1899) 6 Can. Exch. 387.

The making of changes may show rather a desire to remedy defects as they become apparent, than that the defects had before been apparent. *Ragotte* v. *Canadian P. R. Co.* (1889) 5 Manitoba L. Rep. 365.

The Minnesota case cited at the beginning of this note overrules the three following decisions: *O'Leary* v. *Mankato* (1874) 21 Minn. 65; *Phelps* v. *Mankato* (1877) 23 Minn. 276; *Kelly* v. *Southern Minnesota R. Co.* (1881) 28 Minn. 98, 9 N. W. 588.

[3] *Willey* v. *Boston Electric Light Co.* (1897) 168 Mass. 40, 37 L. R. A. 723, 46 N. E. 395, where a wire from which the insulating substance had been burned off by lightning was not put into a safe position until after the plaintiff had received a shock.

[4] Evidence that a conductor was a careful man, and had long been in the continuous employ of a railroad, is not relevant upon the question as to whether he complied with a rule that, in of a train stopping between station should require the flagman to go a certain distance. *Fromfelker* v. *Ware, L. & W. R. Co.* (1900) 48 Div. 206, 62 N. Y. Supp. 840.

The mere fact that there is a cu to inspect all foreign cars will not tify the inference that any partic car was inspected. *Eddy* v. *Pec* (1894) 8 Tex. Civ. App. 58, 27 S. 1063.

On the ground that the case did fall within the principle that evid that a person is habitually careles not competent to establish his lack care at a particular time, it was that where plaintiff and another moving a locomotive tender by mean pinch bars, and, on plaintiff's compet withdrawing his bar from under a wh of the tender, plaintiff attempted to l the tender by means of his bar, but started back and ran over him, plaintiff might show the general cor tion of the bars kept at the shop at t time, he having been ordered to sele bar from among a number. *Cahoon Chicago, R. I. & P. R. Co.* (1901) Iowa, 226, 84 N. W. 1056.

[4] *Sawyer* v. *J. H. Arnold Shoe* (1897) 89 Me. 369, 38 Atl. 332; *B rett* v. *Bonham Oil & Cotton Co.* (19 Tex. Civ. App.) 57 S. W. 602; and t case cited in note 2, *infra*.

not competent to show an admission of liability, and in his charge repeated this statement, and told the jury that it was for them to say, without any regard to this fact, whether the conversation imported such an admission.[2]

827. Models and photographs.— Where a machine is set up in court for the purpose of enabling the jury better to understand how the accident happened, and the plaintiff desires to show something else through its operation, a request should first be made to the presiding judge. The defendant should have an opportunity to object to this additional use, as well as an opportunity to test the evidence thus produced, and the experiment should be made under the supervision of the presiding judge. If the experiment is made before the objections of the defendant have been heard, and in the presence of the jury only, the presiding judge not being informed of what is being done, the evidence produced may be ruled out.[1]

The fact that a photograph of the place where a brakeman was injured did not contain a set of guard rails, removed since the accident, is admissible to show the condition of the place where the accident occurred, and the manner in which it happened.[2]

828. Best and secondary evidence.—Where it is a question whether a coemployee for whose negligence a statute makes the master responsible violated a rule, parol proof that the master's rules required the performance of the act which the employee is alleged to have omitted is admissible, where it does not appear that there is any better evidence of such rules.[1]

829. Statements, admissions, and declarations.— *a. By other employees.*—In the subjoined note are collected a number of decisions illustrative of the circumstances under which the statements, admissions, and declarations of employees have been affirmed or denied to be competent evidence in actions against employers.[1]

[2] *Anderson* v. *Duckworth* (1894) 162 Mass. 251, 38 N. E. 510.

[1] *Probert* v. *Phipps* (1889) 149 Mass. 258, 21 N. E. 370.

[1] *Himber* v. *Iowa C. R. Co.* (1901) 114 Iowa, 551, 87 N. W. 505.

[1] *Sobieski* v. *St. Paul & D. R. Co* (1889) 41 Minn. 169, 42 N. W. 863.

[1](a) *Held admissible.*—In an action by a servant for injuries sustained from defective scaffolding, a conversation between two foremen, tending to show that each had notice of the condition of the scaffolding, is admissible as such notice. *Brady* v. *Norcross* 174 Mass. 112, 54 N. E. 87

Where plaintiff was injured by the caving of a gravel pit, a conversation between the street commissioner under whom plaintiff was working and another employee, which occurred a few minutes before the accident, and in the absence of plaintiff, as to the existence of a crack in the wall of the gravel pit, is admissible to show that the commissioner had notice of the dangerous condition of the pit. *Colorado City* v. *Linfe* (1901) 28 Colo. 468, 65 Pac. 630

Evidence that plaintiff, while employed as a [illegible] company, was in [illegible] the cogs in a [illegible] a heavy [illegible] and that

Where the complaint in an action for causing the death of a vant contains no allegation that the defendant was negligent in

another employee had had a conversation with the defendant's foreman about its defects a few hours before the accident, requires submission to the jury of the question of the defective condition of the jack, and of defendant's knowledge thereof. *Missouri, K. & T. R. Co.* v. *Young* (1896) 4 Kan. App. 219, 45 Pac. 963.

In *Chapman* v. *Erie R. Co.* (1874) 55 N. Y. 579, it was objected that the trial court had erred in admitting in evidence a declaration by the defendant's superintendent that he had heard that the negligent servant had been "off on a spree, drinking;" that the servant did not deny it, and that the superintendent reprimanded him for it. The court of appeals, however, said: "As evidence of the fact of the habit of drinking, it [the declaration] was not admissible, within the general rule, that the declarations of an agent will not bind the principal unless made at the time of doing some act within the scope of the agency, and which in fact constitutes a part of the act itself (*Luby* v. *Hudson River R. Co.* [1858] 17 N. Y. 131; *First Baptist Church* v. *Brooklyn F. Ins. Co.* [1863] 28 N. Y. 153). But we think this evidence was competent to prove notice to Fisk [the superintendent]. Other evidence was produced that Allison [the negligent servant] was in the habit of drinking to excess, and the remark, if it had reference to such habit, was pertinent to establish that he knew it. It would be competent to prove that a third person told him of it; and it is more satisfactory to establish the fact that he admitted such knowledge at the time. It is evidence of a material fact. An admission afterward that he had known the fact would stand upon a different footing. It is not error to receive evidence, if competent for any purpose."

In a case where the injury was caused by the fall of a bank of gravel which the servant was assisting to excavate, it is not error to permit a witness to testify that the foreman, at the moment when the accident occurred, uttered an exclamation which indicated his knowledge of the dangerous condition of the bank, and his apprehension that it might fall. *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 38 Am. St. Rep. 290, 34 Pac. 720.

Admissions or statements of the eral manager of a railroad com made directly after an accident, the condition of a road, while he the line of his duty and upon being formed by an agent of the road of wreck, are admissible, both as sho knowledge of the corporation as to improper construction and condition the road before the accident, and because it is his business, as the *ego* of the company, to know the co tion of the road, and what he says der such circumstances is said *dum vet opus*. *Krogg* v. *Atlanta & W. P Co.* (1886) 77 Ga. 202, 4 Am. St. 79.

(b) *Held not admissible.* — Decl tions of an agent of the master, a after an accident, will not bind the m ter unless they are of such a chara as to show that he had previous kn edge of the defect in the machin *Baker* v. *Allegheny Valley R. Co.* (18 95 Pa. 211, 40 Am. Rep. 631.

A declaration of defendant's road m ter some days after an accident, that section foreman whose negligence can the plaintiff's injury was incompete is not admissible as evidence to cha the company with knowledge of such competency. *McDermott* v. *Hannibal St. J. R. Co.* (1881) 73 Mo. 517, 39 A Rep. 526.

Statements of the employees of a m ing company as to how another employ lost his life are inadmissible in an a tion for his death, unless they we made immediately after and at t place of the killing. *Lexington & C. Min. Co.* v. *Huffman* (1895) 17 Ky. Rep. 775, 32 S. W. 611.

Statements of a conductor relating a collision, an hour after its occurren are inadmissible as *res gestæ*. *Norfo & C. R. Co.* v. *Suffolk Lumber C* (1896) 92 Va. 413, 23 S. E. 737.

The declarations of an employee of railroad company, charged with th duty of keeping the bridges and trestl in proper repair, with reference to a accident to an employee under him, no constituting part of the *res gestæ*, a not admissible against the company *Garrick* v. *Florida C. & P. R. Co.* (1898 53 S. C. 448, 31 S. E. 334.

A declaration of the general superin tendent of a railway, that the freigh conductor who was alleged to hav

employment of the servants who had control over the deceased, the declaration of a "general boss," since deceased, that he had been in the employment of the defendant for only a short time, and did not know what were the duties of the injured servant, is not admissible as a declaration of a deceased agent.[2]

b. By the injured servant himself.—An employee's declarations or statements are not usually admissible in his own behalf,[2a] though they may be so when made as part of the *res gestæ*.[3]

caused by his negligence the death of plaintiff's decedent, and who had been employed by the superintendent himself, had disobeyed orders, is inadmissible where it was made the day after the accident. *Huntingdon & B. T. Mountain R. & Coal Co.* v. *Decker* (1876) 82 Pa. 123.

A declaration of a car repairer that he knew of the defective condition of the car which caused the injury is not admissible, unless it was made while he was engaged in the performance of his duty as repairer, and had relation to the subject-matter in his charge. A declaration that he knew the car was in bad order is not admissible, where it was made while he was in the position of a mere spectator appearing at the scene of the catastrophe some minutes after it had occurred. *Verry* v. *Burlington, C. R. & M. R. Co.* (1877) 47 Iowa, 549.

The declarations of the superintendent of a corporation, made several days after the occurrence of an accident by the breaking of an appliance and away from the place of business, that the appliance had been condemned and should not have been used, is not admissible in an action for personal injuries against the corporation. *Giberson* v. *Patterson Mills Co.* (1896) 174 Pa. 369, 34 Atl. 563.

In an action by a brakeman against a railroad company to recover for a personal injury, where it is shown as a defense that at the time of the injury plaintiff was not in the place required by a rule of the company, testimony of the division superintendent that he would discharge any employee who persistently violated such rule to his knowledge is not a statement of fact, and is incompetent to disprove a waiver of the rule by the company. *Tullis* v. *Lake Erie & W. R. Co.* (1901) 44 C. C. A. 597, 105 Fed. 554.

As to matters of mere opinion, a master is not bound by the declarations of his foreman in regard to the cause of an accident to a servant under his orders. Accordingly, in an action for personal injuries sustained by a boy between eighteen and nineteen years old, in the defendant's mill, the plaintiff, after testifying that he told the foreman immediately after the accident that it was caused by a machine at which he was set to work by the sub-foreman, cannot be permitted to testify that the foreman then said to the plaintiff that it was just like the sub-foreman to set him at work at a dangerous machine he did not know anything about. *Loistritz* v. *American Zylonite Co.* (1891) 154 Mass. 382, 28 N. E. 294.

Evidence that defendant's foreman stated after the injuries for which suit is brought, alleged to have resulted from a broken window, that he ought not to have allowed plaintiff to go where he did while the window was broken, and that he told defendant's president a week before that the window was broken and ought to be fixed, is incompetent. *Fisher* v. *Nubian Iron Enamel Co.* (1895) 60 Ill. App. 568.

[2] *Smith* v. *Bibb Mfg. Co.* (1900) 112 Ga. 680, 37 S. E. 861.

[2a] Neither a report by the plaintiff himself, stating the manner in which his injuries were received, such report being submitted in compliance with a rule, nor his letters in which he made a claim for damages, are admissible as evidence in his own favor. *Howard* v. *Savannah, F. & W. R. Co.* (1890) 84 Ga. 711, 11 S. E. 452.

The admission of plaintiff's statements which were made to a fellow servant who had direction of the work as agent of the principal, as to how the injury complained of was received, and which were communicated on the understanding that they should not be repeated to the principal,—is prejudicial error. *Miles* v. *Chicago, R. I. & P. R. Co.* (1898) 76 Mo. App. 484.

[3] A statement by an employee of a rail-

c. By the employer.—The general rule allowing proof of a
sions against interest entitles an employee to put in evidence the
ployer's admissions against himself.[4]

830. Opinions as evidence.— *a. Not admissible.*—A well-recogn
doctrine as to the admissibility of evidence is that a witness
state facts, and not opinions.[1] As applied to that particular des

road company, run over and killed while uncoupling cars, made to his brother, while still under the car, as to the cause and manner of the injury, is admissible as part of the *res gestæ*, in an action by his administrator for damages. *Little Rock, M. R. & T. R. Co.* v. *Leverett* (1886) 48 Ark. 333, 3 Am. St. Rep. 230, 3 S. W. 50.

[4] Admissions made by defendant to several persons on different occasions, to the effect that he knew of the existence of a fissure in a shaft before plaintiff went down, and knew it was dangerous, but thought it would hold until the work was done, are sufficient evidence to justify submitting the question of his negligence to the jury. *Strahlendorf* v. *Rosenthal* (1872) 30 Wis. 674.

[1] *Chicago G. W. R. Co.* v. *Price* (1899) 38 C. C. A. 239, 97 Fed. 423.

It is not error for the court to refuse to allow a witness to be asked whether a certain danger was one of the risks of the service assumed by the plaintiff. *Alton Lime & Cement Co.* v. *Calvey* (1892) 47 Ill. App. 343.

A witness should not be allowed to state his opinion as to whether a crib or partition in coal storage bins was or was not safe. *Davis* v. *New York, L. E. & W. R. Co.* (1893) 69 Hun, 174, 23 N. Y. Supp. 358.

The sufficiency of a rule is not a matter as to which a witness can express an opinion. *Nary* v. *New York, O. & W. R. Co.* (1890) 55 Fed. 612, 9 N. Y. Supp. 153.

A witness cannot give his opinion as to whether there was time for an engineer to signal the approach of a train, and whether, if he had given the signal, the deceased could have escaped being run down. *Dowdy* v. *Georgia R. Co.* (1891) 88 Ga. 726, 16 S. E. 62. Nor as to whether a certain person who did not hear any signal from an approaching train could have heard it if it had been given. *Eskridge* v. *Cincinnati, N. O. & T. P. R. Co.* (1889) 89 Ky. 367, 12 S. W. 580.

A witness, not an expert, cannot give an opinion as to whether a train could have been stopped in time to have a
ed the accident if it had been ru
slower. *International & G. N. R.*
Kuehn (1893) 2 Tex. Civ. App. 2
S. W. 58.

The question, "If the engineer
paid attention to the signals which
given him, and stopped the train, w
this man have been killed?" is o
tionable. *Kendrick* v. *Central R. &*
Co. (1892) 89 Ga. 782, 15 S. E. 6

A witness cannot give his conclu
or opinion as to carelessness of an
ployee, when it is an issue in the

A witness cannot be asked whethe
certain train was backed carefully
the occasion of an accident. *Centra*
& Bkg. Co. v. *Ryles* (1889) 84 Ga. 4
11 S. E. 499.

A plaintiff, whether testifying as
expert or not, should not be permit
to give an opinion as to the propriety
his own conduct at the time when
injury was received. *Hudson* v. *Ge*
gia P. R. Co. (1890) 85 Ga. 203, 11
E. 605.

A servant cannot be allowed to test
that he did a certain act cautious
Mayfield v. *Savannah, G. & N. S. R.*
(1891) 87 Ga. 374, 14 S. E. 459.

An opinion as to the competency
skill of an employee should not be a
mitted. *Stoll* v. *Daly Min. Co.* (189
19 Utah, 271, 57 Pac. 295; *Butler*
Chicago, B. & Q. R. Co. (1893) 87 Iow
206, 54 N. W. 208.

Opinion testimony as to the comp
tency of a motorman is not permissib
but such fact should be established
showing his experience as a motorma
and his opportunity for familiarizin
himself with the work and learning th
method of performance. *Langston*
Southern Electric R. Co. (1898) 14
Mo. 457, 48 S. W. 835, following *Boet*

tion of opinions which is ordinarily spoken of as expert testimony, this doctrine takes such forms as these:—that such testimony is not admissible as to matters within the experience or knowledge of persons of ordinary information;[2] that the opinion of an expert who neither knows nor can know more about the subject-matter than the jury, and who, in order to form his opinion, must draw his deductions from facts in the possession of or accessible to the jury, is not admissible;[3] that the question whether a certain act or omission imported negligence under the given circumstances is not one which can be determined by expert testimony.[4] In the subjoined decisions this doctrine was applied under one or other of the aspects indicated by the phraseology of these statements. A comparison of these decisions with the rulings collected in note 8, *infra*, shows that the authorities are far from being harmonious.[5]

ger v. *Scherpe & K. Architectural Iron Co.* (1896) 136 Mo. 536, 38 S. W. 298.

At the trial of an action under the Massachusetts employers' liability act (see chapter XXXVII., *ante*), for causing the death of an employee, alleged to have been due to the negligence of a person in the defendant's service intrusted with "superintendence," a fellow employee cannot be asked, "Have you ever noticed anything with regard to the care or the method which the superintendent used in his work?" and, "Have you noticed whether or not the superintendent in directing the work has any tendency either to show great care or to rush work?" *Gunn* v. *New York, N. H. & H. R. Co.* (1898) 171 Mass. 417, 50 N. E. 1031.

It has been held that a nonexpert witness, after stating the facts, may state his opinion, based upon such facts, as to the health and mental condition of an injured employee. *Price* v. *Richmond & D. R. Co.* (1892) 38 S. C. 199, 17 S. E. 732.

Questions with regard to the speed of trains are not properly of a scientific nature, nor beyond the competency of ordinary witnesses, provided they have the means and habits of observation. *Detroit & M. R. Co.* v. *Van Steinburg* (1868) 17 Mich. 99; *Grand Rapids & I. R. Co.* v. *Huntley* (1878) 38 Mich. 540, 31 Am. Rep. 321.

Testimony of an employee which does not go to modify or vary a rule, but merely indicates the practical construction placed upon it by the employees whom it concerned, is admissible on the question whether a certain employee had the authority to do a certain act. *Gulf, C. & S. F. R. Co.* v. *Pierce* (1894) 7 Tex. Civ. App. 597, 25 S. W. 1052. Affirmed in (1894) 87 Tex. 144, 27 S. W. 60 (brakeman whose incompetency was known to the company left a switch open, and the conductor of another train was injured).

See also the cases cited in note 5, *infra*.

[2] *Southern R. Co.* v. *Mauzy* (1900) 98 Va. 692, 37 S. E. 285.

[3] *Lincoski* v. *Susquehanna Coal Co.* (1893) 157 Pa. 153, 27 Atl. 577.

[4] *Bergquist* v. *Chandler Iron Co.* (1892) 49 Minn. 511, 52 N. W. 136.

[5] An expert should not be allowed to give his opinion as to whether defendant's road was prudently managed (*Louisville & N. R. Co.* v. *Hall* [1888] 87 Ala. 708, 4 L. R. A. 710, 13 Am. St. Rep. 84, 6 So. 277); nor as to the propriety of a given method of operating trains (*Jeffrey* v. *Keokuk & D. M. R. Co.* [1881] 56 Iowa 546, 9 N. W. 881).

A witness cannot be allowed to express an opinion as to whether a person could walk safely between an obstruction and a building (*Brunker* v. *Cummins* [1892] 133 Ind. 143, 32 N. E. 732); nor as to whether the fencing of a railway track at a certain point would endanger the safety of the employees (*Toledo, St. L. & K. C. R. Co.* v. *Jackson* [1892] 5 Ind. App. 547, 32 N. E. 793).

Trainmen cannot be permitted to testify that a certain train was being handled in a "careful and cautious manner," or "carefully and cautiously." *DeWalt* v. *Houston, E. & W. T. R. Co.*

b. Admissible.—The above-stated doctrine is subject to an ex
tion which arises out of the necessity of the case, and which is
firmly established and as well known as the doctrine itself. T
exception is embodied in the rule that the opinion of witnesses

(1900) 22 Tex. Civ. App. 403, 55 S. W. 534.

Expert testimony by a yardmaster that the manner in which a brakeman employed in the yard attempted to make a coupling was dangerous and improper is inadmissible. *Seese* v. *Northern P. R. Co.* (1888) 39 Fed. 487.

A brakeman cannot be asked: "What is the proper way to couple cars when timber projects?" as the opinion called for does not pertain to a matter of skill, science, trade, or the like, upon which experts are permitted to give opinions, but merely bears upon the question whether the plaintiff exercised due care. *Hamilton* v. *Des Moines Valley R. Co.* (1872) 36 Iowa, 31.

A witness cannot be asked to state whether, if the drawheads or bumpers of cars are properly matched, there is danger of one overriding the other, or crushing a person making a coupling. If the construction of the cars, the position and area of the impinging surface of the bumpers, the speed with which the cars come in contact, and the position of the brakeman while making the coupling are shown, it needs no especial skill or study to tell what danger he would incur by attempting to make the coupling. *Muldowney* v. *Illinois C. R. Co.* (1873) 36 Iowa, 462.

In an action for damages for the death of a brakeman killed by the separation of the train on a ridge, the opinion of an expert as to how the brakes should have been applied is inadmissible. *Burns* v. *Chicago, M. & St. P. R. Co.* (1886) 69 Iowa, 450, 58 Am. Rep. 227, 30 N. W. 25.

Whether a locomotive of a certain model exhibited to the jury can be safely coupled to a car of a certain model, also exhibited in court, is not a question upon which expert testimony is admissible, as the jury, when they have the relation of the various parts explained to them, can have no difficulty in determining the extent of the danger incident to coupling them. *Way* v. *Illinois C. R. Co.* (1875) 40 Iowa, 341.

A witness cannot be asked whether it was not more dangerous to ride on a cross beam in front of the engine than on top of the cars (*Warden* v. *Louisville & N. R. Co.* [1891] 94 Ala. 277. 14 L. R. A. 552, 10 So. 276); whether it was proper to ride on ladder of a railway car (*Johnston Oregon Short Line R. Co.* [1892] 23 94, 31 Pac. 283).

A witness may not give his opi that it is not improper, or an act carelessness, for a brakeman to si top of a freight car with his feet the side. *Louisville & N. R. Co.* v. *liken* (1899) 21 Ky. L. Rep. 489, 5 W. 796.

In a suit by a railroad employee injuries, it is error not to exclude testimony of witnesses as to whethe switch would have been safer with without a light thereon. *Galveston, & S. A. R. Co.* v. *English* (1900) T Civ. App.) 59 S. W. 626. Rehear Denied in (1900) 59 S. W. 912.

An expert witness cannot give, as opinion, that the kind of block sig used on a trolley road are not such to insure reasonable safety to the ployees operating the cars, where he pointed out, as he might properly defects in the system and suggested i provements, and there is evidence th the system is used on a large number electric roads, and is generally reg a sufficient protection to those operati the cars thereon. *Bergen County Tra tion Co.* v. *Bliss* (1898) 62 N. J. L. 4 72 Am. St. Rep. 685, 41 Atl. 837.

Where one employed as a helper defendant's shops was engaged, togeth with a fellow servant, in moving a loc motive tender by means of pinch bar and, on plaintiff's companion withdraw ing his bar from under a wheel of th tender, it started backward and ran ov plaintiff, the question whether two me were sufficient to move the tender wit safety is not a subject for expert test mony. *Cahow* v. *Chicago, R. I. & P R. Co.* (1901) 113 Iowa, 224, 84 N. W 1056.

In an action against a railroad com pany for injuries received while loadin car wheels on a flat car, it is error t permit witnesses to give opinions as t the best and safest method of loadin such wheels. *Southern R. Co.* v. *Mann* (1900) 98 Va. 692, 37 S. E. 285.

Expert testimony that a lumber wagon with a seat is safer than one without, and that long lines are safe

sessing peculiar skill or knowledge of the subject-matter may be received in evidence, whenever the facts are such that inexperienced persons are likely to prove incapable of forming a correct judgment without such assistance."[6] Or, as the doctrine has also been stated, "where the question under investigation so far partakes of the nature of science as to require a course of study or a previous habit of special practice, in order to the attainment of a correct knowledge of the subject, the opinion of witnesses competent to speak should be received."[7]

for driving than short ones, is inadmissible in an action by a teamster for injuries received because the wagon furnished by defendant was without a seat, and the lines were too short. *Limberg* v. *Glenwood Lumber Co.* (1900) 127 Cal. 598, 49 L. R. A. 33, 60 Pac. 176.

An expert cannot be asked whether the particular facts stated showed that sufficient precautions had been taken in a certain mine. *Bergquist* v. *Chandler Iron Co.* (1892) 49 Minn. 511, 52 N. W. 136.

In an action for injuries sustained by reason of a charge of powder blowing out a pillar of coal in a mine, where evidence as to the pillar's thickness, the time when it was drilled, and the result of the explosion is before the jury, it is not error to exclude an opinion of a witness to the effect that such pillar was safe and proper. *Eureka Block Coal Co.* v. *Wells* (1901) 29 Ind. App. 1, 61 N. E. 236.

An expert witness should not be allowed to testify that, under the facts stated in the hypothetical case, a prudent man would have discontinued the use of a wire cable which broke as a result of the friction to which it was subjected. *Bruce* v. *Beall* (1897) 99 Tenn. 303, 41 S. W. 445.

The breaking strength and safe working strain of a manilla rope having been determined by practical tests and recorded in tables recognized over the whole civilized world, the question of the master's negligence in supplying the rope in question, and its sufficiency for the purpose for which it was used, is not a matter to be determined by the opinions of expert witnesses. *Hunt* v. *Kile* (1899) 38 C. C. A. 641, 98 Fed. 49.

Whether the injured person was careless at the time when he received his injury cannot be settled by expert testimony. *McCarragher* v. *Rogers* (1890) 120 N. Y. 526, 24 N. E. 812.

Expert testimony that the act of a conductor in going between cars, and pounding the angle cock at the end of the air hose, in order to close it, was not safe and prudent, but a dangerous and improper thing for him to do, is inadmissible. *St Louis & S. F. R. Co.* v. *Nelson* (1899) 20 Tex. Civ. App. 536, 49 S. W. 710.

The question whether the appearance of machinery would suggest to a prudent man the necessity of an examination is not one for an expert witness, but is for the jury to determine. *Goodsell* v. *Taylor* (1889) 41 Minn. 207, 4 L. R. A. 673, 16 Am. St. Rep. 700, 42 N. W. 873.

Whether a defect would have been discovered if a proper examination had been made is not a question upon which expert evidence is admissible. *Allen* v. *Union P. R. Co.* (1891) 7 Utah, 239, 26 Pac. 297.

It is error to allow a witness to be asked, as an expert, whether a proper inspection would have disclosed an obvious defect in an appliance. *Gutridge* v. *Missouri P. R. Co.* (1887) 94 Mo. 468, 4 Am. St. Rep. 392, 7 S. W. 476.

The sufficiency of the inspection of a brake is not a matter as to which a witness can give his opinion. *Schneider* v. *Second Ave. R. Co.* (1892) 133 N. Y. 583, 30 N. E. 752.

In an action for injuries sustained by a miner through the explosion of a missed shot, the negligence alleged being defendant's failure to discover and remove the missed shot, it is error to allow a witness to testify as to whether a man ought not to find such shots if he used ordinary care in looking for them, after he has testified that such missed shots are ordinarily easily detected, and were detected in a mine belonging to witness. *Holy Cross Gold Min. & Mill Co.* v. *O'Sullivan* (1900) 27 Colo. 237, 60 Pac. 570.

[6] *Chicago G. W. R. Co.* v. *Price* (1899) 38 C. C. A. 239, 97 Fed. 423.

See, generally, Rogers, Expert Testimony; Greenl. Ev. ed. 1899, § 441.

[7] *Louisville, N. A. & C. R. Co.* v.

The decisions cited below illustrate the manner in which this has been applied in actions against employers.[8]

Frawley (1886) 110 Ind. 18, 9 N. E. 594.

[8]An expert may give his opinion as to the merits or demerits of whipping straps as warning signals in the vicinity of low overhead bridges or railways, and may state whether or not they are generally used on roads regarded as being well managed. *Louisville & N. R. Co.* v. *Hall* (1888) 87 Ala. 708, 4 L. R. A. 710, 13 Am. St. Rep. 84, 6 So. 277.

Evidence that mail trains may be run with safety on a well-ballasted track at the rate of 60 miles an hour is admissible. *Ft. Worth & D. C. R. Co.* v. *Thompson* (1893) 2 Tex. Civ. App. 170, 21 S. W. 137.

Witnesses who have had several years' experience in track work are competent to testify that a certain track is not properly constructed. *Ft. Worth & D. C. R. Co.* v. *Wilson* (1893) 3 Tex. Civ. App. 583, 24 S. W. 686.

The question whether the rough and uneven condition of a railroad track would be likely to cause a coupling pin to be thrown out while a train was going down grade over such track, and thus part the train, is a proper one for expert testimony; and the opinion of an experienced railroad engineer shown to have been familiar with the track at the time may be received as that of one better qualified to form an opinion than the members of the jury. *Chicago G. W. R. Co.* v. *Price* (1899) 38 C. C. A. 239, 97 Fed. 423.

On the trial of an action against a railroad corporation, after several experts called by the plaintiff had testified, upon a statement of the facts and circumstances of the accident what in their opinion threw the cars from the track, it was held proper to permit the defendants to ask a machinist who had been connected for many years with railroads and with the running of cars and engines upon them, and who was in the cars at the time of the accident, and saw all these facts and circumstances, "What in your judgment threw off the baggage car at the time of the accident?" *Seaver* v. *Boston & M. R. Co.* (1860) 14 Gray, 466.

An experienced trainman is competent to testify as to the consequences which follow when a car, heavily loaded or empty, runs rapidly over a switch improperly set. *Louisville & N. R. Co.* v. *Mothershed* (1893) 97 Ala. 261, 12 714.

Where the train was running b ward at the time of an accident, there was evidence that the track in the same condition at that time when it was seen by an expert witn it is proper for the expert to st whether, if the track was in the sa condition, it would be more dangerou run the train backward than forwa *Kuhns* v. *Wiscousin, I. & N. R.* (1887) 70 Iowa, 561, 31 N. W. 868.

A car coupler injured while making coupling was held to have been prope allowed to testify that the cars by wh he was caught were coming back fast, and that this was the sole ca of the accident. *Georgia R. Co.* *Bryans* (1886) 77 Ga. 429.

An experienced brakeman may testi as to whether a railway track was proper place for a brakeman to sta when signaling a train. *Helton* v. *Lamar Midland R. Co.* (1893) 97 A 275, 12 So. 276.

A qualified witness may state wh is the proper and general rule for engineer with regard to awaiting a s nal from a brakeman engaged in cou ling cars before putting them in motio *Galveston, H. & S. A. R. Co.* v. *H* (1897) 90 Tex. 656, 40 S. W. 392, A firming (1897; Tex. Civ. App.) 39 S. W 302.

In an action to recover for injuri suffered by a brakeman in attempti to make a coupling with a link and pi alleged to be defective, old and experi enced brakemen are competent to giv their opinions as to the safety of coup ling one car to another, where the pi was so bent that it could not be take out, and the coupling had to be made with the link fast in the drawhead o the standing car. *Goins* v. *Chicago, R I. & P. R. Co.* (1891) 47 Mo. App. 174.

The evidence of experienced train hands as to the increased danger in volved in coupling cars with double deadwoods, instead of single, is properly received. *Louisville, N. A. & C. R. Co.* v. *Frawley* (1886) 110 Ind. 18, 9 N. E. 594.

An expert witness may be asked what advantage double deadwoods afford to cars; what effect, if any, they would have in protecting the cars from being drawn together in the course of trans-

In all cases where an opinion is competent as evidence, a foundation must be laid for its introduction by showing that the proposed

poration; and whether, with a higher degree of caution, cars so equipped could be coupled with safety. *Baldwin* v. *Chicago, R. I. & P. R. Co.* (1879) 50 Iowa, 680.

In an action by a brakeman for injuries received in coupling cars, evidence is admissible to show that brakemen frequently get their hands injured while so engaged. *Cincinnati, N. O. & T. P. R. Co.* v. *Lewallen* (1895; Ky.) 32 S. W. 958.

Where an engineer sued to recover for injuries caused, as he alleged, from a defective engine, but, according to the theory of the defendants, by plaintiff's own negligence, it was held that plaintiff, being himself an expert, might state what were his duties; that he might testify that he had complied with all instructions given him; that another expert engineer might relate the circumstances under which he had once stopped an engine, the relation being relevant and by way of illustration; that the conductor, having authority over the engineer, might testify as to the duties of the latter; and that the exclusion of such testimony was a substantial, and not merely a technical, error. *Augusta & S. R. Co.* v. *Dorsey* (1881) 68 Ga. 228.

An experienced railway man may state his opinion as to the different degrees of danger involved in using an ordinary road engine as a yard engine, with or without a flat car attached to it. *Mobile & O. R. Co.* v. *George* (1891) 94 Ala. 199, 10 So. 145.

Where plaintiff was injured in the making up of a train, it was not error to allow the trainmen to state that it was made up in the usual manner. *De Walt* v. *Houston, E. & W. T. R. Co.* (1900) 22 Tex. Civ. App. 403, 55 S. W. 534.

A brakeman who for five years has had opportunities of observing the making up of freight trains in a yard is competent to testify as to the respective duties of the conductors and other train hands in making up and moving the trains. *Price* v. *Richmond & D. R. Co.* (1892) 38 S. C. 199, 17 S. E. 732.

The opinions of witnesses are competent to show the distance at which a horse car can be seen along a railway track, if all the details bearing upon the question cannot be submitted to the jury. *East Tennessee, V. & G. R. Co.* v. *Watson* (1890) 90 Ala. 41, 7 So. 813.

In an action for negligently causing the death of a brakeman, testimony of other brakemen which relates to the duties of such employees in examining appliances, and as to the duties of the car inspector in this regard, and embraces the statement that a brakeman is not expected to get under a car, while it is in motion, to make such examination, is admissible as relevant to plaintiff's contention that decedent was injured by reason of a defective coupling appliance. *Missouri P. R. Co.* v. *Fox* (1900) 60 Neb. 531, 83 N. W. 744.

Expert evidence to show how a railroad track could have been made safest for the use of employees is admissible to show whether or not defendant company used proper care to furnish a reasonably safe track, although it was not required to furnish the safest track that could be constructed. *Galveston, H. & S. A. R. Co.* v. *Pitts* (1897; Tex. Civ. App.) 42 S. W. 255.

In an action against a railroad company, where it is shown that the injuries were sustained while the plaintiff's intestate was assisting in placing a derailed car back upon the track, and that, in order to do this, jack screws were being used, it is competent to show by a witness, who testified that he had for ten years worked upon a section of a railroad, that a car jacked up with two track jacks under the same end of the car would be likely to fall. *Louisville & N. R. Co.* v. *Jones* (1901) 130 Ala. 456, 30 So. 586.

A person who has had abundant experience in the use of a mechanical appliance is competent, although not familiar with its construction, to testify as to whether such appliance was reasonably adapted for the purpose for which it was used and also as to its condition at the time when an injury was received. *Alabama Co. Coal & Coke Co.* v. *Pitts* (1893) 98 Ala. 285, 13 So. 135.

In an action by an employee to recover for an injury sustained by falling earth while excavating for the foundation of a building near a high chimney, for which cuts were made under the foundation of the chimney, a civil engineer may give his opinion, in answer to a hypothetical question based on the evidence as to the manner of performing the work, that the method employed was not a proper one. *Finn* v. *Cassidy*

(1901) 165 N. Y. 584, 53 L. R. A. 877, 59 N. E. 311, Affirming (1899) 39 App. Div. 641, 57 N. Y. Supp. 1138.

A person who has made a special study of the strength of materials and the proper mode of building structures to sustain weight may be allowed to give his opinion as to whether a staging erected in a specified way can safely be trusted to carry a particular load. *Prendible* v. *Connecticut River Mfg. Co.* (1893) 160 Mass. 131, 35 N. E. 675; *Fox* v. *Buffalo Park* (1900) 163 N. Y. 559, 57 N. E. 1109, Affirming (1897) 21 App. Div. 321, 47 N. Y. Supp. 788; *Westland* v. *Gold Coin Mines Co.* (1900) 41 C. C. A. 193, 101 Fed. 59.

The evidence of a carpenter as to the nature and character of hemlock lumber and its strength as material to be used in scaffolding is admissible in an action for the death of an employee, caused by the giving way of a scaffolding composed of such material. *Kuhn* v. *Delaware, L. & W. R. Co.* (1895) 92 Hun, 74, 36 N. Y. Supp. 339.

The opinion of a house painter, of extended experience, as to the sufficiency of iron hooks to suspend a staging of a given weight, is competent where he has repeatedly used and tested them. *Little* v. *Head & D. Co.* (1899) 69 N. H. 494, 43 Atl. 619.

Evidence of a coemployee that he thought the situation of a belt and pulley would cause a strain on the pulley in the direction of the engine is not incompetent. *Knight* v. *Overman Wheel Co.* (1899) 174 Mass. 455, 54 N. E. 890.

Where negligence in failing to furnish proper rope and tackle was in issue, an objection to a question as to the manner of determining whether a rope had become rotten and unsound was properly overruled, since defendant's negligence depended to some extent on the question whether such defect was discernible. *Silveira* v. *Iversen* (1900) 128 Cal. 187, 60 Pac. 687.

The weakness arising from the crystallization of iron being a defect which cannot be discerned by an external examination, a servant who is injured owing to the breaking of a hook from that cause after a few months' use is, as a matter of law, unable to recover damages where, according to expert testimony, the breaking strain of a sound hook of the same cross-section is about four times as great as that to which it was being subjected when the accident occurred. *Lyons* v. *Knowles* (1893; Cal.) 32 Pac. 883.

An expert witness may give his opinion as to the effect of the breaki strands of wire upon the ult strength of the cable, or the proc crystallization, the result of time friction, and as to the probable li a cable under given circumsta *Bruce* v. *Beall* (1897) 99 Tenn. 30 S. W. 445.

It is not error to permit a man has been in the hardware busines testify that, in his opinion, a trac in a brake staff was an old one. v. *Northern P. R. Co.* (1891) 46 M 106, 24 Am. St. Rep. 194, 48 N. W.

In a case where an employee was injured by the breaking of the clamp which a derrick guy rope was faste and the clamp had been forged in fendant's shops from material furnis by it, expert testimony that the b could have been caused only by the of defective material in making clamp, or the subsequent overstrain of the derrick, was received. *Welsh Cornell* (1900) 49 App. Div. 203, 63 Y. Supp. 44.

In an action for injuries caused a defective elevator, where the evide showed that it had been put up by experienced and incompetent workm and that no safety appliances had b introduced, it was proper to admit t testimony of an expert builder of e vators, for the purpose of showing th an elevator without safety appliance was unsafe, and that an ordinary ca penter or machinist would not be a person to construct, repair, or put u an elevator. *Bier* v. *Standard Mfg.* (1889) 130 Pa. 446, 18 Atl. 637.

A question calling for the opinion a witness as to the competency of coservant of the injured person is n objectionable after a sufficient predica has been laid. *Buckalew* v. *Tennes Coal, Iron & R. Co.* (1895) 112 Al 146, 20 So. 606, where it was held tha the evidence of an expert miner who wa well acquainted with the work done b the delinquent coservant—the foreman of a gang of convicts—was admissible.

The testimony of an experienced rail road man, though not an engineer, tha a certain engineer had no idea of speed that he would pull a train down hill a fast as he could turn a wheel, and di so on trains on which the witness wa a conductor, is admissible upon the issue of the general negligence and incompe tency of the engineer. *Galveston, H. & S. A. R. Co.* v. *Davis* (1898) 92 Tex 372, 48 S. W. 570, Reversing (Tex. Civ. App.) 45 S. W. 956.

Upon the issue whether a defect in a

witness possesses the qualifications of an expert in regard to the subject-matter.[9]

machine was so patent that one who worked on it after knowing thereof assumed the risk of injury from it, a witness who has stated that the machine would have been perfectly safe but for such defect may be asked whether, with the experience he has had, he would have known that the defect made the machine more dangerous to work upon. *Blumenthal* v. *Craig* (1897) 26 C. C. A. 427, 55 U. S. App. 8, 81 Fed. 320.

An expert may properly testify that a dump car may be in perfectly good order and still lly buck by reason of the fault of those who dump it, and that he had seen it done. The latter statement serves to show more clearly the value and weight of his opinion. *Donahoe* v. *New York & N. E. R. Co.* (1893) 159 Mass. 125, 34 N. E. 87.

Where a witness who was on a hand car with deceased at the time it was run down by a train had testified to all the facts, it was competent to ask him whether the deceased had ample time to jump from the hand car before the collision. *Quinn* v. *New York, N. H. & H. R. Co.* (1888) 56 Conn. 44, 12 Atl. 97.

Where the negligence alleged is that an inexperienced boy was set to work without proper instruction, a witness of experience is properly allowed to testify as to the dangers incident to the use of a machine, what precautions were necessary to avoid those dangers, that the men usually employed about such a machine were adults, and that, before being set to work, those men were ordinarily instructed carefully in its use. *New York Biscuit Co.* v. *Rouss* (1896) 20 C. C. A. 555, 45 U. S. App. 45, 74 Fed. 608.

[9] Witnesses introduced in a personal injury case, for the purpose of showing a coal company's negligence in not blocking its railroad switch rails, may, to show their experience as railroad men, testify that switches were blocked before and after the accident in certain railroad yards where they worked. Nor is it a valid objection to their testimony, that they acquired their experience from work at ordinary railroad yards, and not at switch tracks about coal shafts. *Hamilton* v. *Rich Hill Coal Min. Co.* (1891) 108 Mo. 364, 18 S. W. 977.

The conductor of an electric street car, who has been so employed for two months, is a competent witness to testify within what distance such a car, going at a stated rate of speed, can be stopped. *Watson* v. *Minneapolis Street R. Co.* (1893) 53 Minn. 551, 55 N. W. 742.

A witness who is an expert in regard to the subject-matter, and has made a personal examination of the place where the accident occurred, may, after he has described it, state his opinion regarding its dangerous nature. *McVeaney* v. *Reading City* (1892) 150 Pa. 611, 25 Atl. 57.

The testimony of a witness as to the speed of trains is properly admitted, where it has been shown that he is a resident of the particular district through which they passed, is familiar with the running of trains, and has formed an opinion as to the speed of those under discussion. *Pence* v. *Chicago, R. I. & P. R. Co.* (1890) 79 Iowa, 389, 44 N. W. 686.

The fact that a witness did not know how many feet or rods there are in a mile was held not to be a sufficient reason for excluding his testimony as to the speed of a certain train, where it was shown that he lived near the scene of the accident, and had seen many trains pass. *Ward* v. *Chicago, St. P. M. & O. R. Co.* (1893) 85 Wis. 601, 55 N. W. 771.

A fireman is not competent to testify as an expert respecting the necessity of a safety switch at the point where a train was derailed. *Ballard* v. *New York, L. E. & W. R. Co.* (1889) 126 Pa. 141, 19 Atl. 35.

No one should be allowed to testify as to the condition of electrical apparatus, or as to the cause of an injury received in making repairs thereon, unless he has first shown himself to be an expert, and also has sufficient knowledge of the facts connected with the appliance used to enable him to form an intelligent and reliable opinion. *Schweitzer* v. *Citizens' General Electric Co.* (1899) 21 Ky. L. Rep. 608, 52 S. W. 830.

The exclusion of testimony by defendant's manager as to his knowledge of the use, purpose, and necessity of a certain improved form of appliance in defendant's paper mill, is not error where he has testified that he is not a practical machine man, and other evidence by a competent witness on the subject is undisputed. *Kreider* v. *Wisconsin River*

Prejudicial error is deemed to have been committed if the hy
thetical state of facts upon which an expert was asked to give
opinion did not correspond with that which was actually involve
the case.[10]

831. Judicial notice.— The extent to which judicial notice will
taken of certain facts which have actually been, or may well be, ma
rial in employers' liability cases, is indicated by the subjoined n
The decisions, especially those which are concerned with the functi
and duties of servants, are anything but consistent.[1]

Paper & Pulp Co. (1901) 110 Wis. 645, 86 N. W. 602.

[10]A question put to an expert, asking his opinion as to whether danger would be increased by running an engine backwards over the track at a higher rate of speed, supposing such track was so badly out of line that it was plainly visible to the eye, was held to be improper because there was no issue as to the improper rate of speed, and the question was indefinite as to the condition of the track. Slight as well as serious defects may be seen. The extent of the visible defect should be stated, for if this is done, the expert may not regard it as a defect at all. *Kuhns* v. *Wisconsin, I. & N. R. Co.* (1887) 70 Iowa, 561, 31 N. W. 868.

[1](a) *Judicial notice taken.*—A court will take judicial notice of the functions of ticket agents and conductors. *Dye* v. *Virginia Midland R. Co.* (1891) 9 Mackey, 63. Of the extent of the authority of a general superintendent of a railway in conducting its ordinary business operations. *Sacalaris* v. *Eureka & P. R. Co.* (1883) 18 Nev. 158, 51 Am. Rep. 737, 1 Pac. 835. Of the fact that a conductor's authority does not extend to carrying passengers gratuitously. *Condran* v. *Chicago, M. & St. P. R. Co.* (1895) 28 L. R. A. 749, 14 C. C. A. 506, 32 U. S. App. 182, 67 Fed. 522. Of the fact that it is the duty of a section master to keep both track and right of way in proper condition. *Mobile & O. R. Co.* v. *Stinson* (1896) 74 Miss. 453, 21 So. 14, 522. Of the fact that a brakeman on a train which is out on the road has other duties to perform besides those of inspection. *Matchett* v. *Cincinnati, W. & M. R. Co.* (1892) 132 Ind. 334, 31 N. E. 792. Of the facts that trainmen often walk along by the side of trains, that they must go between cars in coupling and uncoupling them, that this is frequently done while the cars are in motion, and that it is quite a general practice for brake
to go ahead of trains and open switc
for them to enter on side tracks.
dianapolis, D. & W. R. Co. v.
(1891) 4 Ind. App. 282. Of the
that conductors of passenger tra
must not only enter their trains w
in motion, but leave them before th
come to a full stop. *Dailey* v. *Profe
Masonic Mut. Acci. Asso.* (1893)
Mich. 289, 26 L. R. A. 171, 57 N.
181, 50 N. W. 694.

Courts know judicially that loadi
railroad iron on flat cars pertains to
service of an employee. *Indianapolis
St. L. R. Co.* v. *Johnson* (1885) 102 I
352, 26 N. E. 200.

In a much-discussed case the Supre
Court of the United States held th
judicial notice would be taken of t
fact that, subject to the general rul
and orders of the directors of the co
pany, a conductor has entire control o
management of his train. *Chicago,
& St. P. R. Co.* v. *Ross* (1884) 112
S. 377, 28 L. ed. 787, 5 Sup. Ct. Re
184. This particular ruling has n
been reversed by *New England R. C
v. Conroy* (1899) 175 U. S. 323, 44 L
ed. 181, 20 Sup. Ct. Rep. 85, though, a
already stated (§ 549, note 1, *ante*)
the later case qualifies the earlier on
to the extent of discarding the theor
on which it was decided, viz., that th
court was justified in saying, from such
common knowledge as it might be sup
posed to possess, that the nature o
the control exercised by a conductor wa
such as to constitute him a depart
mental vice principal.

Where the jury have found for the
plaintiff on the theory that his injury
was caused by his head striking against
an arch in a tunnel while he was sitting
on the brake wheel of a box car, and it
is shown that this could not have oc
curred unless his forehead was 4 feet
7 inches above the wheel, the court will
take judicial notice of the fact that the

B. Burden of Proof with Respect to the Employer's Negligence.

As to the burden of proof in actions of negligence generally, see Shearm. & Redf. Neg. §§ 57-60; 1 Beven, Neg. pp. 127-147.

As to the burden of proof in cases where it is essential to determine whether a negligent coservant was or was not a vice principal, see §§ 512, 563, *ante*.

As to the presumptions entertained with regard to the adoption of the doctrine of common employment in a state other than that wherein the action is brought, see § 874, *post*.

832. Burden of proving negligence rests on the servant.—An injured servant, like all other persons who seek to recover damages on the ground of negligence, has the burden of proving by a preponderance of evidence that the defendant was culpable in the premises.[1] This

accident could not have happened, in the manner alleged, to a man of anything like normal height, and will set aside the verdict. *Hunter* v. *New York, O. & W. R. Co.* (1889) 116 N. Y. 616, 6 L. R. A. 246, 23 N. E. 9.

(b) *Judicial notice not taken.*—A court cannot take judicial notice of the rules and regulations of a particular railway company,—as, that the footboard of an engine, while being used for switching purposes, is the post of duty of the yardmaster. *Highland Ave. & Belt R. Co.* v. *Walters* (1890) 91 Ala. 435, 8 So. 357. Nor of the duties performed by trainmen, and the degrees of supremacy or subordination existing among them. *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528. Nor of the extent of the duties and authority of a division superintendent of a railway. *Brown* v. *Missouri, K. & T. R. Co.* (1877) 67 Mo. 122 (action by stranger; the question being whether the company was bound by an order given for drugs required for an injured person). Nor of the functions of a general solicitor of a railway company. *Illinois C. R. Co.* v. *Pairpoint Mfg. Co.* (1894) 55 Ill. App. 231 (validity of service of summons). Nor of the extent to which a railway company is bound by the acts of a brakeman in respect to third persons. *Farber* v. *Missouri P. R. Co.* (1893) 116 Mo. 81, 20 L. R. A. 350, 22 S. W. 631 (ejection of passenger from train). Nor of the meaning of such technical and arbitrary terms as are used by railway employees to describe certain operations connected with the handling of trains. *Georgia R. & Bkg. Co.* v. *Fitzgerald* (1899) 108 Ga. 507, 19 L. R. A. 175, 34 S. E. 316. In the last-cited case, where the injury was alleged to have been caused by the negligent "kicking" of a car, and no evidence was introduced to show that a "running switch" and a "kick" were the same thing, it was held to be erroneous to admit in evidence against defendant one of its rules which related exclusively to running switches. *Georgia R. & Bkg. Co.* v. *Fitzgerald* (1899) 108 Ga. 507, 34 S. E. 316.
