Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- ☐ Coloured covers / Couverture de couleur
- ☐ Covers damaged / Couverture endommagée
- ☐ Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- ☐ Cover title missing / Le titre de couverture manque
- ☐ Coloured maps / Cartes géographiques en couleur
- ☐ Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- ☐ Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- ☐ Bound with other material / Relié avec d'autres documents
- ☐ Only edition available / Seule édition disponible
- ☐ Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- ☐ Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- ☐ Coloured pages / Pages de couleur
- ☐ Pages damaged / Pages endommagées
- ☐ Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- ☑ Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- ☐ Pages detached / Pages détachées
- ☑ Showthrough / Transparence
- ☐ Quality of print varies / Qualité inégale de l'impression
- ☐ Includes supplementary material / Comprend du matériel supplémentaire
- ☐ Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- ☐ Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

☑ Additional comments / Commentaires supplémentaires: Pagination is as follows: [i]-xxiii, [1303]-2639 p.

This item is filmed at the reduction ratio checked below / Ce document est filmé au taux de réduction indiqué ci-dessous.

10x	12x	14x	16x	18x	20x	22x	24x	26x	28x	30x	32x
							✓				

The copy filmed here has been reproduced thanks to the generosity of:

Law Library,
McGill University,
Montreal

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ▽ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Law Library,
McGill University,
Montreal.

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

CHAPTER XXVII.

DEFENSE OF COMMON EMPLOYMENT IN CASES NOT INVOLVING THE QUESTION WHETHER THE NEGLIGENT SERVANT WAS A VICE PRINCIPAL.

A. INTRODUCTORY 1349
492. Scope of chapter 1349
493. General statement of what constitutes common employment 1350
494. Provinces of court and jury in determining whether there was a common employment 1352
B. THEORY THAT COMMUNITY OF EMPLOYMENT DEPENDS SOLELY ON WHETHER THE DELINQUENT SERVANT'S NEGLIGENCE WAS A RISK CONTEMPLATED BY THE INJURED SERVANT 1353
495. Generally 1353
496. Diversity of duties or departments not sufficient to exclude defense of common employment 1358
497. Contiguity a material, though not decisive, factor 1359
498. Illustrative cases of common employment 1360
499. Disconnection of duties, when so great as to negative implied acceptance of the risk of a fellow servant's negligence 1378
C. THEORY THAT COMMON EMPLOYMENT DEPENDS ON IDENTITY OF DEPARTMENTS OF WORK OR CONSOCIATION OF DUTIES 1383
500. Identity of department as a test, generally 1383
501. Consociation of duties, as a test of common employment 1386
501a. Same subject continued 1390
502. Relation between the theories of nonassignable duties and consociation of duties 1395
503. Difference or identity of department not necessarily conclusive under the consociation doctrine 1396
504. Consociation primarily a question of fact for the jury 1400
505. General discussion of the doctrine of consociation 1401
506. Illustrative cases 1405

CHAPTER XXVIII.

VICE PRINCIPALSHIP AS REFERRED TO THE TEST OF SUPERIORITY OF RANK.

A. INTRODUCTORY 1417
507. General statement 1417
508. Representative character of servant depends on the actual functions discharged by him 1418
509. Temporary vice principals 1420
510. Sufficiency of a complaint based upon the vice principalship of the negligent servant 1422
511. Functions of court and jury in determining whether the negligent employee was a vice principal 1423
512. Burden of proof 1425
513. Scope of following subtitles 1425

B. Mere inequality of rank, significance of..... 1426
514. Usually held not to warrant inference that the superior servant is a vice principal..... 1426
C. Doctrine that vice principalship is not deducible merely from the possession of a power of control over the injured servant. 1429
515. General statement of the doctrine..... 1429
516. Rationale of the doctrine..... 1431
517. Qualification of the doctrine in cases where an order takes a servant outside the original scope of his employment.. 1433
518. Power of hiring and discharging subordinates, significance of.. 1433
519. Application of the doctrine to the various grades of supervising employees..... 1436
520. Illustrative cases..... 1440
D. Doctrine that all superior servants are vice principals as regards their subordinates..... 1456
521. General statement..... 1456
521a. Relation of the superior servant doctrine to the doctrine that the head of a department is a vice principal..... 1458
522. Rationale of the doctrine..... 1459
a. Unequal knowledge of superior and subordinate..... 1460
b. Inability of master or superior agents to supervise all details of the work..... 1461
c. Obligation of servant to obey his superior..... 1461
d. Duty to use care in giving orders regarded as one of the non-assignable duties of the master..... 1464
e. Summary..... 1467
522a. What constitutes the exercise of control within the meaning of the doctrine..... 1469
523. Existence or absence of a power to hire and discharge subordinate; significance of..... 1470
524. Illustrative cases..... 1474
E. Relation of a general managing agent to his subordinates..... 1484
525. Introductory..... 1484
526. Doctrine that a general manager is a vice principal. English, Scotch, and colonial cases..... 1487
527. — American cases..... 1491
528. Rationale of the doctrine..... 1497
529. Doctrine that a general manager is not a vice principal. English and colonial cases..... 1500
530. — American cases..... 1505
531. Opposing theories reviewed..... 1506
F. Relation of a departmental manager to his subordinates..... 1513
532. General statement..... 1513
533. Rationale of the master's liability for the negligence of a departmental manager..... 1517
534. Limits of the doctrine of departmental control..... 1517
535. Supervising employees held to be heads of departments..... 1523
536. Supervising employees held not to be heads of departments..... 1532

CHAPTER XXIX.

FOR WHAT ACTS OF SUPERIOR SERVANTS A MASTER IS RESPONSIBLE.

536a. Necessity of proving that the act or omission which caused the injury was negligent..... 1533
537. No responsibility as to matters beyond the scope of the authority of the superior servant..... 1536
538. Distinction between official and nonofficial acts of supervising employees; generally..... 1541
539. Distinction considered with relation to the doctrine that the nature of the negligent act is the test of liability..... 1543
540. Breach of non-delegable duties by any superior servant, master liable for..... 1545
541. Issuance of orders deemed to be an official act..... 1549
542. Failure to protect subordinates from transitory dangers deemed to be official negligence..... 1553
543. Theory that a vice principal does not represent the master except in so far as he is discharging some non-delegable duty..... 1555
544. Theory that a vice principal does not act as the master's representative when he engages in manual labor..... 1557
545. Qualifications of this theory..... 1558
546. Theory that a vice principal represents the master even when he participates in manual labor..... 1563
547. Discussion of the doctrine of the dual capacity of vice principals. 1564
a. With reference to the standpoint of the courts which reject the superior servant doctrine..... 1564
b. With reference to the superior servant doctrine..... 1571

CHAPTER XXX.

SUMMARY OF DECISIONS BY THE VARIOUS COURTS WITH REGARD TO THE RELATION OF SUPERIOR SERVANTS TO THEIR SUBORDINATES.

548. Introductory statement..... 1574
549. Decisions in each jurisdiction..... 1575

CHAPTER XXXI.

VICE PRINCIPALSHIP AS DETERMINED WITH REFERENCE TO THE CHARACTER OF THE ACT WHICH CAUSED THE INJURY.

550. Introductory..... 1611
A. MASTER LIABLE FOR ANY NEGLIGENCE WHICH INVOLVES THE BREACH OF ONE OF HIS PERSONAL DUTIES..... 1614
551. Generally..... 1614
552. Various forms in which the master's responsibility is stated.... 1615
553. Subsidiary consequences deduced from the general principle..... 1621
554. Rationale of the doctrine of non-delegable duties..... 1622

555. Master sometimes liable both on account of the character of the negligent act and the official position of the negligent servant 1628
556. Doctrine of non-delegable duties applicable to artificial persons 1629
557. Servants of contractors, when precluded from availing themselves of the doctrine in actions against their masters 1629
558. Delegation of personal duties to an independent contractor, effect of 1630
559. Same subject continued. Opposing doctrines discussed 1636
560. Massachusetts doctrine 1637
561. Servants may act in a dual capacity 1641
562. Pleading 1643
563. Burden of proof 1643
564. Propriety of instructions 1644
564a. Functions of court and jury 1645
B WHAT DUTIES ARE DEEMED TO BE NON-DELEGABLE 1647
565. Duties imposed by statute 1647
a. Quality of duty unchanged by statute 1647
b. Quality of duty altered 1649
566. Duty to see that the inorganic instrumentalities of the work are reasonably safe; general rule stated 1650
567. Duty to see that the inorganic instrumentalities of work, as originally supplied, satisfy the legal standard of safety 1652
a. English, Scotch, and colonial doctrine 1652
b. American doctrine 1654
568. Duty to see that the inorganic instrumentalities are maintained in a suitable condition for the work to be done held to be non-delegable 1664
569. Same duty held to be delegable 1673
570. Duty to see that worn out or otherwise defective parts of instrumentalities are replaced by suitable substitutes 1674
571. Duty to furnish proper medical treatment to sick or injured servants 1675
572. Duty to hire suitable servants 1675
573. Duty to employ servants sufficient in number for the work in hand 1679
574. Duty to frame rules and regulations for the conduct of the business 1680
575. Duty to bring rules and regulations to the knowledge of employees 1682
576. Duty to carry out regulations, how far absolute; generally 1683
577. Duty to carry out regulations with respect to the movements of trains 1687
a. Doctrine that train despatchers are vice principals; generally 1687
b. Train despatchers represent the company as to special orders suspending regular timetables 1688
c. Doctrine that train despatchers are not vice principals 1691
d. Liability of railway companies for the negligence of servants who transmit the orders or see that they are carried out 1693

578. Duty to impart information as to permanent dangers normally incident to the work at the time it is entered upon..... 1694
579. Duty to impart information as to permanent dangers superadded to the environment after the work has begun..... 1699
580. Duty to warn as to dangers of the transitory class, occasionally supervening during the progress of the work..... 1703
581. Duty to inspect instrumentalities; generally..... 1704
582. Duty to inspect instrumentalities at the time they are first brought into use..... 1705
583. Duty to inspect instrumentalities during the time they are kept in use..... 1706
584. Duty to inspect instrumentalities belonging to another person, but temporarily used by the master..... 1712

CHAPTER XXXII.

EXTENT OF AN EMPLOYER'S LIABILITY FOR NEGLIGENCE IN REGARD TO THE DETAILS OF THE WORK.

A. GENERALLY..... 1715
585. Difficulty of defining boundary line between the domains of liability and nonliability..... 1715
586. Supervision of details, not a master's duty..... 1719
587. Merely transitory perils, master not bound to protect the servant against..... 1721
588. Dangers caused by the progress of the work, master not bound to protect servant against..... 1722
589. Preparation or care of instrumentalities, master not responsible for, where these functions are a part of the work to be done... 1723
590. Negligent use of safe appliances by fellow servant, master not responsible for..... 1725
591. Rationale of doctrine exempting master from liability for negligence in carrying out the details of the work..... 1727
592. Pleading..... 1729
a. Declaration..... 1729
b. Plea..... 1730
593. Instructions..... 1730
594. Functions of court and jury in passing upon the evidence..... 1731
595. Explanation of the classification of the cases cited in the ensuing sections..... 1733
B. NEGLIGENCE OF COSERVANTS INVOLVING MERELY THE USE OF THE INSTRUMENTALITIES, MASTER NOT RESPONSIBLE FOR..... 1733
596. Orders respecting the use of the instrumentalities..... 1733
a. Generally..... 1733
b. Order accompanied by an assurance of safety..... 1733
597. Choice of particular methods of work..... 1735
598. Disposition of the force of employees available for the work in hand..... 1736
599. Assigning servants to work for which they are unfitted..... 1736
600. Negligence in sending servants into abnormally dangerous places without warning..... 1737

601. Failing to warn servants as to dangers arising from the execution of the details of the work 1740
602. Absence from the post of duty 1743
603. Selecting an imperfect appliance from the stock available 1743
604. Failing to use the instrumentalities furnished by the master 1745
605. Negligence in failing to discard a defective for a suitable instrumentality 1747
606. Using instrumentalities in a manner not contemplated or authorized by the master 1747
607. Giving of signals 1748
608. Negligence in carrying out the express orders or regulations of the master 1749
609. Failure to give instruction 1751
610. Manipulation of the instrumentalities during the progress of the work 1754
611. Negligence in the transmission of the master's orders to other servants 1755
C. NEGLIGENCE OF COSERVANTS IN RESPECT TO THE PREPARATION OR STRUCTURAL MODIFICATION OF INSTRUMENTALITIES OR THEIR PARTS, WHEN NOT IMPUTED TO THE MASTER 1769
612. Introductory 1769
612a. Negligence which produces structural unsafety of a temporary character 1770
613. Negligence in failing to adjust or secure instrumentalities or their parts while in use 1772
614. Negligence in the preparation of temporary structures or other instrumentalities as a part of the work; general rule 1777
615. Rationale and limits of a master's exemption from liability for the adjustment or preparation of instrumentalities 1780
616. Special circumstances not affecting the extent of the master's liability 1789
a. Superior rank of the delinquent employee 1789
b. Similarity or dissimilarity of the work in which the delinquent and injured servants were engaged 1790
c. Completion of appliance before plaintiff entered the employment 1792
617. When the delinquency is deemed not to be in respect to the details of the work 1794
D. NEGLIGENCE OF COSERVANTS WHOSE DUTY IT IS TO KEEP THE INSTRUMENTALITIES IN PROPER CONDITION, WHEN NOT IMPUTED TO THE MASTER 1799
618. Theory that a master is never liable for negligence in regard to inspection and repairs 1799
619. Theory that the liability of the master depends on the subject-matter of the inspection or repairs neglected 1801
620. Master liable where the delinquent servant was engaged in a different class of work 1810
621. Negligence in failing to replace an unsound by a sound appliance, when master not liable for 1816
622. All employees engaged in repairing regarded as coservants of each other 1817

CHAPTER XXXIII.

LIABILITY OF THE MASTER CONSIDERED WITH REFERENCE TO THE QUESTION WHETHER THE INJURED PERSON WAS A SERVANT IN RESPECT TO THE WORK IN HAND.

623. Introductory 1822
A. LIABILITY AS DEPENDENT UPON THE TEMPORARY SUSPENSION OR INTERMISSION OF THE RELATION OF MASTER AND SERVANT 1823
624. Servants carried on vehicles belonging to their employer 1823
a. Servants traveling in the performance of their contract assume known risks 1824
b. Negligence of coservants operating the vehicles, when deemed to be a risk assumed 1824
c. Rationale of these cases 1827
d. Assumption of the risk of the negligence of servants not operating trains 1831
e. When servants traveling on their employers' vehicles are deemed to be passengers 1832
f. Master's obligations inure to benefit of servant traveling in course of his employment 1835
625. Servants in various other situations 1835
625a. Temporary intermission of relation of master and servant never produced by the servant's neglect of his duties 1839
B. LIABILITY AS DEPENDENT UPON THE QUESTION WHETHER THE ACT FROM WHICH THE INJURY RESULTED WAS OR WAS NOT AUTHORIZED 1840
626. Presence of servant at the place where the accident occurred 1840
a. Circumstances under which recovery has been allowed 1840
b. Circumstances under which recovery has been denied 1845
c. Right of recovery considered with reference to the culpable or nonculpable quality of the servant's conduct 1849
627. Servant's use of the given instrumentality 1850
628. Servant's use of the given instrumentality in a certain manner 1851
629. Servant's unauthorized performance of certain work: generally 1851
630. Right of action where the injured person was not in the service of the defendant for any purpose 1852
631. Volunteers subject to same burdens as servants 1854
632. Persons not deemed to be subject to the disabilities of volunteers 1860
633. Right of action where servants undertake new duties 1863
634. Same subject continued 1864
635. Performance of unauthorized duties, considered as being indicative of negligence 1869
636. Minority as an element 1871

CHAPTER XXXIV.

EFFECT OF GENERAL STATUTES UPON THE EXTENT OF A MASTER'S LIABILITY.

637. When employees are within the purview of such statutes 1873
638. Effect of such statutes considered with relation to the doctrine of common employment 1874

CHAPTER XXXV.

STATUTES ENACTED EXPRESSLY FOR THE BENEFIT OF SERVANTS. INTRODUCTORY CHAPTER.

A. CONSTRUCTION AND EFFECT OF SUCH STATUTES 1887
639. On what footing these statutes are construed 1887
640. Employer not responsible for unauthorized acts of statutory vice principal 1888
641. When the statutory right of action accrues and is terminated .. 1888
642. Necessity of proving knowledge on the defendant's part 1889
B. CONSTITUTIONALITY 1890
643. Statutes entirely abrogating the doctrine of common employment with respect to all employers 1890
644. Statutes modifying the doctrine of common employment in regard to all private corporations 1890
645. Statutes abrogating or modifying the doctrine of common employment with respect to all the servants of railroad companies 1891
a. Georgia 1891
b. Missouri 1892
c. North Carolina 1892
d. Ohio 1892
e. Texas 1892
f. Utah 1893
g. Wisconsin 1893
646. Statutes abrogating the doctrine of common employment with respect to railway servants engaged in operation of the road .. 1893
647. Statutes imposing special duties upon various classes of employers 1896
a. Street car companies 1896
b. Operators of mines 1898
648. Statutes restricting the defenses open to employers 1899
C. DEFENSES AVAILABLE IN ACTIONS UNDER STATUTES 1899
649. Generally 1899
650. Assumption of risks 1900
a. Ordinary risks assumed 1900
b. Possibility of future negligence on the part of statutory vice principal, not a risk assumed 1901
c. Extraordinary risks; how far assumed, in the absence of express provisions on the subject 1901
d. Effect of express provisions with regard to assumption of extraordinary risks 1904
651. Contributory negligence 1905
a. Generally 1905
b. Availability of the defense, as dependent on the provisions of the statute sued upon 1905
c. Availability of defense inferred from language of statute .. 1906
d. Knowledge of risk, how far negligence is inferable from 1909

652. Limits of the doctrine that contributory negligence is a bar to an action 1911
652a. *Volenti non fit injuria* 1912

CHAPTER XXXVI.

STATUTES DECLARATORY OF COMMON-LAW DOCTRINES.

A. MINNESOTA 1917
652b. Text of statute 1917
653. Effect of this statute 1917
B. CALIFORNIA AND DAKOTA 1918
653½. Text of statutes 1918
653¾. Effect of these statutes 1918
C. GEORGIA 1921

CHAPTER XXXVII.

ENGLISH EMPLOYERS' LIABILITY ACT OF 1880 AND THE AMERICAN, CANADIAN, AND AUSTRALIAN STATUTES MODELED THEREON.

653a. Introductory 1925
A. TEXT OF THE STATUTES 1925
654. England 1925
655. Alabama 1930
656. Massachusetts 1931
657. Colorado 1935
658. Indiana 1936
659. New York 1938
660. Ontario and other Canadian provinces 1939
660a. Australian statutes 1945
B. EFFECT OF THE STATUTES AS A WHOLE 1946
661. Generally 1946
662. Modified operation of these acts in the case of servants of municipal corporations 1947
663. Employers' liability acts; whether strictly or liberally construed 1948
664. Concurrent rights of action under the statutes and at common law 1949
665. Liability of infants under the statutes 1950
C. LIABILITY FOR DEFECTS IN THE WAYS, ETC. 1950
666. Effect of the statutory provisions as to defects; generally 1951
667. Master not liable unless the defect alleged was the proximate cause of the injury 1951
668. What instrumentalities are covered by the terms "ways," etc. 1952
a. Two or more descriptive terms used in combination 1952
b. "Ways" 1953
c. "Works" 1954
d. "Machinery" 1954
e. "Plant" 1955

669. Significance of the qualifying phrase, "connected with or used in the business of" the employer..... 1955
a. Instrumentalities temporarily used by the defendant's servants in the transaction of his business..... 1955
b. Structures, etc., in course of erection or demolition..... 1961
c. Instrumentalities not yet brought into use, or disused..... 1962
670. What constitutes a defect 1963
671. Specific examples of defects..... 1967
a. Defects in the condition of the ways..... 1967
b. Defects in the condition of the works..... 1967
c. Defects in the condition of the machinery..... 1968
d. Defects in the condition of the plant..... 1968
672. Conditions not amounting to defects..... 1969
673. Defective system; employer liable for..... 1974
674. "Not discovered or remedied, owing to the negligence," etc. 1975
a. Generally..... 1975
b. "Not discovered"..... 1976
c. "Not remedied"..... 1977
d. "Person intrusted with the duty," etc..... 1978
675. Abnormal conditions resulting from the use of the machines; how far regarded as defects..... 1979
676. Defects in temporary appliances constructed by the servants themselves not deemed to be chargeable to the employer..... 1982
677. Duty of servant to report defects..... 1983
a. Statutory and common-law doctrines compared..... 1983
b. Position of a servant who fails to report a defect..... 1986
c. Position of a servant who has reported a defect..... 1987
D. LIABILITY FOR THE NEGLIGENCE OF EMPLOYEES EXERCISING SUPERINTENDENCE..... 1989
678. Introductory..... 1989
679. Conditions precedent to recovery; generally..... 1990
680. What employees are superintendents under the English, New York, Massachusetts, and Colorado acts..... 1990
a. General remarks..... 1990
b. Employees held to be vice principals..... 1990
c. Employees for whose negligence the master is not liable..... 1993
681. — under the Alabama act..... 1994
682. — under the Canadian and Australian acts..... 1996
683. Employees controlling machinery; status of..... 1996
684. Master liable though injured servant was not under the control of the negligent employee..... 1997
685. Deputy superintendents; liability for negligence of..... 1998
686. Necessity of proving that the injurious act was negligent..... 1999
687. Acts constituting negligence in the exercise of superintendence.. 2002
688. Acts done by superintendents while participating in the work; liability of master for..... 2007
E. LIABILITY FOR INJURIES CAUSED BY THE NEGLIGENCE OF A PERSON TO WHOSE ORDERS THE INJURED SERVANT WAS BOUND TO CONFORM.. 2013
689. Introductory..... 2013
690. Conditions precedent to recovery 2013

691. To what superior servants the subsection is applicable..... 2014
692. Temporary substitutes for regular foremen, status of..... 2016
693. To what orders a servant is bound to conform..... 2017
694. When a servant is deemed to have acted under orders..... 2018
695. Necessity of establishing a causal connection between the order and the injury..... 2019
696. Necessity of showing negligence on the part of the superior servant..... 2024
F. Liability for injuries caused by acts or omissions done or made in obedience to rules..... 2027
698. Introductory..... 2027
699. Necessity of proving negligence in respect to the rules, etc., or to particular instructions..... 2027
700. "In obedience to the rules"..... 2028
701. "Delegated with the authority of the employer"..... 2029
G. Liability for negligence of certain specified railway employees.. 2029
702. Generally..... 2029
703. Persons having "the charge or control of signal points"..... 2030
704. Person in "charge or control of a locomotive engine"..... 2032
a. What is an engine under the statute..... 2032
b. What employees are deemed to be in "charge or control" of engines..... 2032
705. Person having "charge or control of a train"..... 2034
a. What constitutes a train, generally..... 2034
b. How many cars constitute a train..... 2035
c. What employees are deemed to have "charge or control" of a train; conductors..... 2036
d. Employees other than conductors..... 2037
706. Person having "charge or control of a car"..... 2040
706a. Person having "charge of a signal"..... 2040
707. On a "railway" or "railroad"..... 2040
H. Service of notice on the employer..... 2042
708. Notice a condition precedent to the maintenance of an action under the statute..... 2042
709. Notice not essential to recovery if facts constitute a cause of action at common law..... 2043
710. Notice must be given in writing..... 2043
711. Service of the notice..... 2044
a. Service on corporations..... 2044
b. Service through the postoffice..... 2045
c. Service in case of death..... 2045
d. Excuses for failing to serve the notice..... 2045
712. Sufficiency of the particulars contained in the notice..... 2047
a. Generally..... 2047
b. Inaccuracies which do not invalidate a notice..... 2048
I. Death of employer or injured employee; how the right of action is affected by..... 2050
713. Scope of this subtitle..... 2050
714. Death of employer; effect of..... 2050
715. Death of plaintiff; pending action abated by..... 2050
716. Suits by executors or administrators..... 2050

J. Persons entitled to sue under the acts 2053
717. General remarks 2053
718. Servants temporarily under the control of the defendant 2053
719. Volunteers 2054
720. Persons who have permanently or temporarily ceased to be in the employment of the defendant 2054
721. Independent contractors 2054
721a. Servants of independent contractors 2054
722. Railway servant 2055
723. Workmen 2056
a. Domestic or menial servant 2057
b. Laborer 2058
c. Servant in husbandry 2058
d. Journeyman 2059
e. Artificer 2059
f. Handicraftsman 2059
g. Miner 2059
h. Persons "otherwise engaged in manual labor" 2060
i. "Working under a contract with an employer" 2063
724. Seamen 2065
725. Servants working in government departments 2066
K. Damages recoverable 2066
726. Damages recoverable where the injured servant is himself the plaintiff 2066
727. Damages recoverable by the personal representatives of an injured servant 2067
L. Trial practice 2068
728. Scope of subtitle 2068
729. Within what period the action must be brought 2068
730. Service of summons; waiver of irregularity in 2069
731. Joinder of employer and negligent coemployee as parties defendant 2069
732. Institution of distinct suits at common law and under these acts 2069
733. Joinder of causes of action under the different provisions of these acts 2069
734. Joinder of causes of action under these acts and at common law 2070
734a. Joinder of causes of action under these acts and other statutes .. 2070
735. Election between different counts 2071
736. Former recovery in action under another statute or at common law 2071
737. Complaint 2071
a. Relation of employer and employed 2072
b. Necessity of alleging that negligence was committed by a statutory vice principal 2072
c. Caused by such a vice principal while acting in the line of his duty 2072
d. Sufficiency of the allegation of negligence 2073
e. Notice of injury 2077
f. Necessity of alleging absence of contributory negligence 2077
738. Sufficiency of the plea 2078

739. Instructions to jury 2078
740. Provinces of court and jury 2078
741. Removal of actions to higher courts 2079
741a. Appointment of assessors 2079
742. Questions which may be reviewed on appeal 2080

CHAPTER XXXVIII.

STATUTES OF ARKANSAS, MISSISSIPPI, MISSOURI, MONTANA, OHIO, SOUTH CAROLINA, TEXAS, UTAH.

743. Scope of chapter 2081
A. Arkansas 2082
743a. Text of statute, § 1 2082
744. Effect of this section 2082
744a. Text of statute, § 2 2083
745. Effect of this section 2083
B. Mississippi 2084
745a. Text of Constitution and statutes 2084
745b. Provisions construed 2085
a. Superior servants 2085
b. Servants in different departments 2085
C. Missouri 2086
746. Text of statute, § 1 2086
745. Effect of this section 2083
746aa. Text of statute, §§ 2-4 2086
D. Montana 2087
746b. Text of statute 2087
747. Effect of this statute 2087
E. Ohio 2088
747a. Text of statute, §§ 1, 2 2088
747b. Effect of these sections 2089
747c. Text of statute, § 3 2089
748. Effect of this section 2089
F. South Carolina 2091
748a. Text of Constitution 2091
748b. Effect of this provision 2092
G. Texas 2092
749. Statutes as to railway service 2092
749a. Construction of this provision 2093
749b. Text of statutes as to vice principals 2094
750. What employees are vice principals under this section 2094
750a. Text of statutes as to common service 2098
751. Who are fellow servants under this section 2099
751a. Other provisions of Texas statute 2104
H. Utah 2104
751b. Text of statute 2104
752. Construction of this provision 2105

CHAPTER XXXIX.

STATUTES OF COLORADO, GEORGIA, IOWA, KANSAS, MINNESOTA, NORTH CAROLINA, WISCONSIN, WYOMING.

753. Scope of chapter 2106
A. Colorado 2107
753a. Text of the statute 2107
754. Effect of this statute 2107
B. Florida 2107
754a. Text of the statute 2107
755. Effect of this section 2108
C. Georgia 2108
756. Statute as to railway service 2108
757. Effect of these sections 2110
758. Provision declaratory of the doctrine of common employment 2111
D. Iowa 2112
758a. Statutory provisions 2112
759. What injuries are within the purview of the statute 2113
E. Kansas 2119
759a. Statutory provisions 2119
760. What injuries are within the scope of the statute 2119
F. Minnesota 2121
760a. Statutory provisions 2121
761. What injuries are within the purview of the statute 2123
G. North Carolina 2124
761a. Statutory provisions 2124
761aa. Burden of proof 2125
762. Effect of statute 2125
H. Wisconsin 2126
763. Statutory provisions 2126
764. Effect of these statutes 2127
764a. Later legislation 2129
765. Effect of this provision 2129
I. Wyoming 2129
765a. Statutory provisions 2129

CHAPTER XL.

ENGLISH WORKMEN'S COMPENSATION ACT 1897.

766. Purpose and effect of the act; generally 2132
A. Circumstances under which compensation is recoverable 2133
766a. Text of section 1 2133
767. "Accident" (sec. 1, subs. 1) 2135
768. "Out of, and in the course of, the employment" (sec. 1, subs. 1) 2135
769. Period of disablement (sec. 1, subs. 2, *a*) 2138
770. Alternative remedies open to workmen (sec. 1, subs. 2, *b*) 2138
771. "Serious and wilful misconduct" (sec. 1, subs. 2, *c*) 2138
772. Arbitration (sec. 1, subs. 3) 2139

773. Recovery in cases where nonliability apart from the act is established (sec. 1, subs. 4) 2140
774. Application of fines imposed on other proceedings (sec. 1, subs. 5) 2140
774a. Text of section 2 2140
775. Notice of the accident (sec. 2, subs. 1) 2141
a. "Proceedings" 2141
b. "Claim for compensation" 2141
c. Excuses for not serving notice in time 2141
775a. Text of sections 3 and 4 2142
776. Liability to servants of contractors (sec. 4) 2143
a. Generally 2143
b. "Undertakers" 2143
c. "Work merely ancillary or incidental to" 2143
776a. Text of section 5 2144
777. Proceedings under this section 2144
777a. Text of section 6 2144
778. Proceedings under section 6 2145
B. EMPLOYMENTS TO WHICH THE ACT IS APPLICABLE 2145
778a. Text of sections 7–10 2145
779. Scope and effect of these provisions; generally 2146
780. Meaning of the phrase "on or in or about," when used in connection with various kinds of concerns 2146
781. "On or in or about a building" which exceeds 30 feet in height 2148
a. Height of building 2148
b. "Being constructed or repaired" 2149
c. What is a "scaffolding" 2150
782. "On or in or about a building in which machinery driven by steam," etc. 2152
783. Meaning of "railway" 2152
783a. — of "factory" 2152
a. "Dock, wharf, quay" 2153
b. "Premises wherein steam, water, or other mechanical power is used" 2155
c. "Machinery or plant" 2155
d. "Premises wherein . . . any manual labor is exercised . . . for purposes of gain" 2156
e. "Machinery used in the process of loading or unloading" . . 2156
f. "Bleaching or dyeing works" 2156
g. "Shipbuilding yard" 2157
784. — of "engineering work" 2157
785. — of "mine" 2157
786. — of "undertakers" 2158
a. In the case of a factory 2158
b. In the case of engineering work 2159
787. — of "workman" 2160
a. Contractors 2160
b. Seamen 2161
787a. — of "dependents" 2161
a. In England and Ireland 2161

b. In Scotland 2162
788. "Shipbuilding yard" (sec. 7, subs. 3) 2162
C. Compensation recoverable under the act 2163
788a. Text of statutory provisions 2163
789. Amount recoverable in case of death by persons wholly dependent on workman's earnings (par. 1, n. 1) 2165
790. — by persons partially dependent on the workman's earnings 2165
791. — in case of total or partial incapacity (par. 1, b) 2166
792. Average weekly earnings 2167
a. Generally 2167
b. Period of employment necessary to furnish [illegible] computation of average weekly earnings 2168
c. Trade and calendar weeks 2169
d. Continuity of the employment 2170
e. Deductions 2171
793. Medical examination after accident (par. 3) 2172
794. Payment to dependents (par. 4) 2172
795. Review of weekly payments (par. 12) 2172
D. Arbitration 2173
795a. Text of statutory provisions 2173
795b. Effect of these provisions; generally 2175
E. Act of 1900 2176
797. Effect of this statute 2176

CHAPTER XLI.

STATUTES IMPOSING VARIOUS SPECIFIC DUTIES UPON EMPLOYERS.

799. Servant's right to sue for injuries caused by a breach of a statutory duty; generally 2177
800. Same subject continued: provision of special remedy for violation of duty; effect of 2180
801. Employer not rendered an insurer of his servant's safety by the imposition of a specific duty 2187
802. Construction of statutes imposing specific duties on employers . . 2187

CHAPTER XLII.

CAUSATION.

802a. Introductory 2205
A. General principles 2208
803. Necessity of proving that the negligence alleged was the cause of the injury 2208
804. — and also the proximate cause of the injury 2210
805. Provinces of court and jury 2224
B. Intervening causes 2226
806. Generally 2226
807. Operation of nonresponsible agencies 2227
808. Nonculpable acts of responsible actors 2227

809. Culpable acts of responsible actors; negligence of coservants . 2229
810. Same subject continued; negligence of injured servant himself . . 2234
811. Master liable where his own negligence intervenes, as a proximate cause, between a delinquent coservant's negligence and the injury 2242
812. —or between the negligence of the plaintiff himself and the injury 2245
C. Concurrent causes 2246
813. Generally 2246
814. Master liable where his own antecedent negligence and a subsequent delinquency of a coservant are both efficient causes of the injury 2248
a. Generally 2248
b. Illustrative cases 2252
815. Master liable where he or his vice principal directed the details of the work 2253

CHAPTER XLIII.

EVIDENCE.

816. Introductory 2264
A. Admissibility of evidence 2264
817. Relevancy to the pleadings 2264
818. Materiality 2268
819. Competency; generally 2268
820. Condition of the given instrumentality before the accident 2271
a. Condition; generally 2271
b. Nonoccurrence of accidents 2272
c. Occurrence of accidents 2274
821. Condition of the given instrumentality after the accident 2275
822. Condition of the given instrumentality both before and after the accident 2276
823. Condition of parts of the plant other than that which caused injury 2276
a. Generally 2276
b. Nonoccurrence of accidents 2278
c. Occurrence of accidents 2278
824. Alterations in the plant or system after the accident; evidential import of 2278
825. Habitual course of conduct 2280
826. Employer's insuring himself against injuries to servants 2280
827. Models and photographs 2281
828. Best and secondary evidence 2281
829. Statements, admissions, and declarations 2281
a. By other employees 2281
b. By the injured servant himself 2283
c. By the employer 2284
830. Opinions as evidence 2284
a. Not admissible 2284
b. Admissible 2286

831. Judicial notice 2292
B. Burden of proof with respect to the employer's negligence 2293
832. Burden of proving negligence rests on the servant 2293
833. Negligence not inferable from the mere occurrence of an accident 2298
834. *Res ipsa loquitur* 2302
835. Action not maintainable where no specific evidence of fault is offered 2307
836. Burden of proving that the injury was caused by the master's negligence rests on the servant 2310
837. No action maintainable where cause of accident is merely conjectural 2314
838. Shifting of the burden of proof 2320
839. Burden of proof, as affected by express statutory provisions . . . 2321
a. Statutes not exclusively applicable to employees 2321
b. Statutes enacted expressly for the benefit of employees 2322
C. Burden of proof with respect to defenses 2323
840. Generally 2323
841. Burden of proof with respect to the assumption of the risk 2323
a. Ordinary risks 2323
b. Extraordinary risks 2334
842. Burden of proof as to servant's contributory negligence 2326
843. Same subject continued; actions under statutes 2327
a. Statutes which simply extend the common-law liability of the master 2329
b. Statutes in which the right of action is made conditional upon the servant's freedom from negligence 2331

CHAPTER XLIV.

PARTIES IN ACTIONS FOR INJURIES RECEIVED BY SERVANTS.

844. Plaintiffs 2335
845. Defendants: generally 2336
846. Liability of the state to its employees 2336
847. Municipal corporations 2338
848. Receivers: common law actions 2339
848a. Receivers: actions under statute for the benefit of railway employees 2341
849. Fellow servants 2348
849a. Joinder of negligent coemployees and master as parties defendant 2349

CHAPTER XLV.

PLEADING AND PRACTICE.

A. Generally 2350
850. Jurisdiction 2350
850a. Nonsuit, taken after reversal—law of the case 2351
851. Matters not open for argument by counsel 2352
852. Questions not open for consideration on appeal 2352

B. Pleading 2353
853. Scope of subtitle 2353
854. Complaint; sufficiency, generally 2353
855. Sufficiency considered with relation to the doctrine of assumption of risks 2355
855a. — with relation to the doctrine of coservice 2355
856. Averment of the master's knowledge of the dangerous conditions 2357
a. Generally 2357
b. Doctrine that knowledge must be expressly charged 2358
c. Doctrine that an express allegation of knowledge is not necessary 2359
857. Averment of the servant's ignorance of the dangerous conditions 2362
a. Generally 2362
b. Doctrine that a complaint not containing an averment of ignorance is bad 2362
c. Doctrine that a complaint not containing an averment of ignorance is good 2364
d. Effect of an averment that the servant was not negligent . . 2365
858. Averment of the servant's freedom from contributory negligence 2368
859. Necessary correspondence between the *allegata* and *probata* 2369
860. Redundancy 2370
861. Duplicity 2372
862. Repugnancy 2372
863. Definiteness 2372
864. Plea: generally 2375
C. Functions of court and jury 2376
865. Questions of law and fact 2376
a. Sufficiency of evidence to establish a fact in issue . . 2376
b. Facts or conclusions therefrom disputable 2377
c. Facts and conclusions not disputable 2380
866. Instructions 2381
867. Verdicts 2383

CHAPTER XLVI.

CONFLICT OF LAWS.

A. Where the effect of a statute is not involved 2403
868. Conflict of laws, as between the courts of two states 2403
869. — as between Federal and state courts 2405
B. Where the effect of a statute is involved 2406
870. Conflict of laws as between the courts of two of the United States 2406
a. Injury received in another state 2406
b. Injury received in state where action is brought 2410
871. — as between Federal and state courts 2410
872. — as between Federal and foreign courts 2412
873. *Lex fori* controlling, where statute affects merely the remedial procedure 2413
874. Presumptions as to the law prevailing in other states 2414

CHAPTER XLVII.

EMPLOYER'S LIABILITY UNDER THE CIVIL LAW AND SYSTEMS FOUNDED THEREON.

875. Scope of chapter 2416
A. Duties of employers to their servants 2417
876. Generally 2417
877. Duty of employer as to appliances and place of work 2418
878. — as to methods of work 2421
879. — as to rules and regulations 2421
880. — as to the employment of competent servants 2421
881. — as to instruction and warning 2421
882. Duty to save life of imperiled servant 2422
883. Assurance of safety 2422
884. Liability to servants working outside the scope of their employment 2423
885. Obligations of an employer not owed to volunteers 2423
886. Causation 2423
B. Defenses available to employers 2423
887. Assumption of risks 2423
888. *Volenti non fit injuria* 2423
889. Contributory negligence 2424
890. Common employment 2426
a. Scotland 2426
b. France 2427
c. Italy and Switzerland 2427
d. Germany and Austria 2427
e. Quebec 2427

For Table of Cases Cited, see end of this Volume.

(For Contents of Volumes I. and III, see those Volumes.)

MASTER AND SERVANT.

CHAPTER XXVI.

COMMON EMPLOYMENT AS A DEFENSE. INTRODUCTORY CHAPTER.

470. Doctrine of common employment stated.
471. Evolution of the doctrine.
472. Rationale of the doctrine.
473. Same subject continued.
474. Judicial criticisms of the doctrine.
475. General discussion of the doctrine.
476. Doctrine not applicable, where, at the time of the accident the servant was not acting as such.
477. Doctrine not a material factor, unless negligence causing the injury is established.
478. To what classes of acts the doctrine is applicable.
479. Defense not available where the dangerous conditions caused by the fellow servant's negligence were known to the master.
480. — nor where negligence in selecting the coservant is shown.
481. — nor where the wife of a servant is injured by the negligence of his coservants.
482. Rule where a stranger is being sued for an injury partially caused by the injured servant's coemployees.
483. Defense available against a servant beginning work after the commission of the negligent act.
483a. Ratification not inferred from retention of negligent servant.
484. Application of the doctrine in the case of seamen.
485. — of pilots.
486. — of persons performing forced labor.
487. — of employees of public bodies.
488. — of miners.
a. Generally.
b. In actions by a parent for loss of services.
489. Master not liable to his servant for injuries caused by the negligence of servants of a stranger.
490. Common employment not a defense to an action against a third person to recover for his servant's negligence.
491. Discussion of this rule.
491a. Rule where an independent contractor is suing the contractee.

As to the doctrine adopted in countries other than those in which it [illegible] prevails, see chapter XLVII., *post*.

As to the personal liability of negligent coservants, see the chapter in volume III., *post*, dealing with the general subject of the personal liability of agents for their own defaults.

470. Doctrine of common employment stated.—The doctrine which is to be discussed in this and the following chapters may be enunciated in its most elementary form as follows:

A master is not bound to indemnify one servant for injuries caused by the negligence of another servant in the same common employment as himself, unless the negligent servant was the master's representative.[1]

Since the extraordinary diversity of views which this doctrine has produced in its practical application arises simply from the difficulty of attaching a precise and definite signification to the phrases, "common employment," and "representative of the master," an investigation into the extent of the master's liability under this aspect virtually resolves itself into an inquiry into the proper meaning of these words. The classification of the decisions which is suggested by this circumstance will be adopted in the following chap-

[1] The language used in formulating this rule varies a good deal. But it would be an unprofitable task to attempt to take note of all these variations, inasmuch as they are, from a doctrinal standpoint, wholly immaterial, except in so far as they reflect one or other of the main controversies between the courts, which will be discussed in the following chapters. The subjoined quotations will serve as a sufficient illustration of the phraseology which is commonly found in the opinions of judges.

"With respect to servants in a common employ, the master cannot be made answerable for an injury caused to one servant by the negligence of another." *Vose* v. *Lancashire & Y. R. Co.* (1858) 2 Hurlst. & N. 728, 4 Jur. N. S. 364, 27 L. J. Exch. N. S. 249.

"Where several persons are employed in the same general service, and one is injured from the carelessness of another, the employer is not responsible." *Kuhn* v. *Cumberland Valley R. Co.* (1854) 23 Pa. 281.

"An employer is not liable to one of his agents or servants for the negligence of another of his agents or servants engaged in the same general business." *Coon* v. *Syracuse & U. R. Co.* (1851) 5 N. Y. 492 (1849) 6 Barb. 231.

A master "is not liable to one agent or servant for an injury resulting from the negligence or mis-conduct of another agent or servant while engaged in a common business with him, but without any superior authority or control over him." *Mad River & L. E. R. Co.* v. *Barber* (1856) 5 Ohio St. 541, 67 Am. Dec. 312.

"The master is not liable to a servant for injuries resulting from the negligence of a fellow servant engaged in the same general line of duty, where the fellow agent act is performed in the capacity of servant." *Indiana Car Co.* v. *Parker* (1884) 100 Ind. 181.

"The employer is not liable for injuries suffered by one employee, solely through the carelessness or negligence of another employee of the same master, engaged in the same general business." *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615.

The employer is liable to the servant for negligence of a fellow servant only when the employer's own negligence contributes to the injury, or when the other servant occupies such a relation to the injured party or to his employment, in the course of which his injury was received, as to make the negligence of such servant the negligence of the employer." *Quebec L. C. Co.* v. *Merchant* (1889) 133 U. S. 375, 33 L. ed. 656, 10 Sup. Ct. Rep. 397.

ters. But it is proposed, in the first place, to give a brief account of the early evolution of the doctrine, to explain and discuss its rationale, and to deal with some general principles, the application of which is not affected by the particular theory which happens to be entertained with regard to its limits and qualifications.

471. Evolution of the doctrine.—High judicial authority may be produced for the view that the doctrine of common employment has always been an integral part of the common law.[1] This theory, however, is purely conjectural,[2] and based mainly, it would seem, on the unsatisfactory ground that, if this defense had not been generally understood to be open to the master, the books would have recorded numerous decisions turning upon his liability for the negligence of a coservant. One objection to the theory is thus stated by Sir Frederick Pollock: "The argument from novelty is altogether a dangerous one. If a duty has been but recently affirmed by decided cases, it is easy to say that it was never before disputed; it is still easier, when an alleged liability is for the first time formally denied, to reply to the charge of innovation that such claims were previously unheard of."[3] Another objection is suggested by the consideration that, even if the doctrine itself was so axiomatic as to be beyond impeachment, as a rule of law, it is inconceivable that there should not at least have been some discussion with regard to the effect of evidence which rendered it a disputable point whether the proximate cause of the injury was the negligence of the master or of a coservant. Supposing the doctrine to have been really recognized prior to the time when it first emerges as a practical element in determining the liability of employers, it seems scarcely possible to account

[1] "The law must have been the same long before it was enunciated in this court in the case of *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987, 7 L. J. Exch. N. S. 42. If not, such actions would have been of frequent occurrence. No such action, however, appears ever to have been brought before the decision of that case." *Vose* v. *Lancashire & Y. R. Co.* (1858) 2 Hurlst. & N. 728, 27 L. J. Exch. N. S. 249, 4 Jur. N. S. 364, per Pollock, C. B.

"That an employer cannot be made responsible for damage resulting to a servant from the negligence of a fellow servant is a principle as old as the common law." *Waddell* v. *Stinson* (1886) 12 Pa. 567, 4 Atl. 725.

[2] A significant commentary on the statements quoted in the last note is that two judges dissented in the earliest American case in which a servant was denied recovery for the negligence of a coservant (*Murray* v. *South Carolina R. Co.* [1841] 1 McMull. L. 385, 36 Am. Dec. 268); and that in the first case in which a similar conclusion was arrived at in Pennsylvania, the doctrine of common employment was only adopted by a majority of three to two (*Ryan* v. *Cumberland Valley R. Co.* [1854] 23 Pa. 384).

It may be remarked in this connection that the doctrine was at one time repudiated in Wisconsin. *Chamberlain* v. *Milwaukee & M. R. Co.* (1860) 11 Wis. 248. But this decision was soon afterwards overruled by *Moseley* v. *Chamberlain* (1860) 18 Wis. 700, appx.

[3] Essays on Jurispr. p. 115.

for the total absence in the reports of any debates upon this question, except by resorting to the wholly inadmissible hypothesis that the master's nonliability for his own negligence was conceded as unreservedly as his nonliability for the act of a coservant.

Abandoning this very unsatisfactory field of conjecture, we find that the first case in which the doctrine of common employment was applied was *Priestly* v. *Fowler*,[1] decided in 1837. There the plaintiff had sustained an injury through the defendant's overloading of a van in which he was traveling by the direction of the defendant in the discharge of his ordinary duties. The gist of the declaration was that "it became the duty of the defendant, on that occasion (of the journey in question), to use due and proper care that the said van should be in a proper state of repair, that it should not be overloaded, and that the plaintiff should be safely and securely carried thereby, . . . in consequence of the neglect of all and each of which duties the van gave way and broke down, and the plaintiff was thrown with violence to the ground, etc." After a verdict for the plaintiff had been rendered, the judgment was arrested on the ground that the declaration was not sufficient.

The very general grounds relied upon by the judges are noticed below (§ 473, note 1, *infra*). At present it will be enough to point out that such a declaration would clearly be good at the present day, in the United States at all events, as it alleges a breach of the duty to provide safe appliances and keep them in good repair; and if this breach was one of the efficient causes of the accident, the master would clearly not have been absolved by the fact that it was partially due to the overloading of the van by a fellow servant.

In 1841 the supreme court of South Carolina adopted the same doctrine as the English court of exchequer, and held that a fireman could not recover against a railway company for injuries caused by the negligence of an engineer.[2] It is worthy of notice that, so far as the report shows, the decision in *Priestley's Case* was not brought to the attention of the judges, and that the two decisions may, therefore, be regarded as reflecting the independent opinions of the profession in England and the United States. But the extracts from the opinions given in § 472, *infra*, show that the reasoning proceeded upon lines somewhat different from those followed in the English case.

In the same year Chief Justice Shaw delivered his famous judg-

[1] 3 Mees. & W. 1, Murph. & H. 205, 1 (1841) 1 McMull. L. 385, 36 Am. Dec. [illegible] 987, 7 L. J. Exch. N. S. 12 [illegible]

[2] *Murray* v. *South Carolina R. Co.*

ment in *Farwell* v. *Boston & W. R. Corp.* (1842).[6] This luminous and scientific disquisition has ever since been regarded in the United States as the principal fountain of the law of this subject, and has exercised a considerable influence upon judicial opinion in England.[7]

The subsequent development of the law has been decidedly less favorable to the servant in England than in the United States. In the former country the doctrine that a master may be held liable for an employee occupying the position of *alter ego* or vice principal was, after much controversy, finally rejected by the House of Lords,[8] at least to the extent of denying that it was applicable to acts done in conducting a business, as contrasted with those done in the original furnishing of the instrumentalities for the use of the servants. See §§ 529, 531, 567, subd. *a*, *post*. In the latter country, on the other hand, the courts have unreservedly accepted this doctrine, and have declined to differentiate between the positions of an employee to whom is delegated the duty of supplying instrumentalities and of an employee who is intrusted with the function of maintaining them in a proper condition. The other important exception to the general rule regarding injuries inflicted by coservants,—*viz.*, that which is based on the fact that the negligent and the injured persons were doing different kinds of work,—has also been much more liberally construed in the United States than in England, some of the American courts having pushed it to an extreme which virtually ignores the true foundation of the rule itself. See chapter XXVII., (C), *post*. The chief influence which has operated in producing this more liberal tendency of judicial opinion has probably been the fact that industrial enterprises have in modern times been falling more and more into the hands of corporate bodies. The harsher aspects of the doctrine of common employment have naturally been brought into clearer relief by this economic situation.[9]

472. Rationale of the doctrine.—Several different explanations of

[6] 4 Met. 49, 38 Am. Dec. 339.

[7] It was mentioned with marked approval in *Barton's Hill Coal Co.* v. *Reid* (1855) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 769, and has been frequently cited in the lower courts.

[8] *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

[9] "'In the progress of society, and the general substitution of ideal and invisible masters and employers for the actual and visible ones of former times, in the forms of corporations engaged in varied, detached, and widespread operations, . . . it has been seen and felt that the universal application of the rule' (the rule in regard to fellow-service) 'often resulted in hardship and injustice. Accordingly, the tendency of the more modern authorities appears to be in the direction of such a modification and limitation of the rule as shall eventually devolve upon the employer, under these circumstances, a due and just share of the responsibility of the lives and limbs of the persons in its employ.'" *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 397, 18 L. R. A. 802, 19 S. W. 1119.

the juridical basis of the doctrine of common employment have been propounded by the courts.

One theory is that the standard of ordinary care which fixes the limits of the master's obligations (see § 15, *ante*) is fully satisfied by the employment of competent servants.[1]

Another suggested basis for the doctrine is that which was adopted by Lord Cairns in an oft-cited case, *viz.*, that the master is liable to his servants only for his failure to do what he has contracted to do and that he does not contract to conduct his business in person.[2]

The hypothesis on which the court seems to argue in another case is that the principle which declares that a servant who enters an employment impliedly undertakes to perform his duties carefully involves the corollary that he alone is liable to a fellow servant who is injured by a breach of that undertaking.[3]

[1] In *Fifield* v. *Northern R. Co.* (1860) 42 N. H. 225, the court said:

"It has been held substantially that, whether a workman is injured through inadequacy of machinery, or other aids or means furnished by his master, or through incompetency or carelessness of fellow workmen, his right of action against his employer stands upon the same ground: that between master and servant the implied contract is that each will use ordinary care in all things pertaining to the servant's business; that if a master exercises ordinary care in hiring and retaining in his employment a competent engineer, and in buying and continuing to use a suitable engine, the master should no more be liable to a brakeman, if the engineer should prove to be incompetent, or, being generally competent, should on some occasion be careless, than if the engine, apparently sufficient, should explode; that the master has performed his contract with the brakeman, so far as it relates to the engine and engineer, when he has done all that ordinary care requires him to do to secure an engine and engineer reasonably suitable for the business. If the owner of a railroad, being a person of ordinary care, should select his servants with reasonable circumspection, and ride upon the road himself, he would take as much care of his brakeman as of himself, so far as their safety depended upon the other servants; and the brakeman who would charge the owner with greater obligations should establish his claim upon strong and satisfactory grounds of reason, justice, public policy, or probability as to the actual intention and understanding of the parties in making the contract of service." The transition to the doctrine of ordinary risk is also made in this case. See next section.

[2] *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. Compare the statement in *Michigan C. R. Co.* v. *Leahey* (1862) 10 Mich. 193, that the reason of the rule is that "the master or employer for whose benefit work is undertaken cannot be regarded as contracting for anything more than his own personal care and diligence."

[3] "After the workmen have been employed, provided with tools and materials, and the work is actually entered upon, each workman is bound by the nature and terms of service to exercise reasonable care, diligence, and skill in the performance of the work he has undertaken. He is also bound to consider and co-operate with his fellow workmen with a view to promote the success of the industry or undertaking in which they are all engaged. He is as much bound to discharge the duty which the law casts upon him, as is his employer. His failure to do what he is thus bound to do, is a breach of duty towards his employer and his fellow workmen, for which he is legally liable. For this reason, the courts have uniformly held that a workman who has been injured by the act or negligence of his fellow workman must look for his compensation to him who was the author of the wrong, and not to their common employer." *Ross* v. *Walker* (1890) 139 Pa. 42, 21 Atl. 157, 159.

In the earliest of the American cases on the subject, one of the judges took the position that there is, on the part of the several agents who are engaged in carrying on the business of a railway company, "a joint undertaking, in which each stipulates for the performance of his several part;" and that "they are not liable to the company for the conduct of each other, nor is the company liable to one for the misconduct of another." [4]

By another judge who delivered a concurring opinion in the same case, it was considered that the inability of the plaintiff to recover was deducible from two concepts, which he treats as being interdependent, *viz.*, that a master does not undertake to answer to each servant for the diligence and skill of the others, and that, as the risk of injury through the negligence of a coservant is one of the perils incident to an employment in which several servants are cooperating, it is presumably accepted by each of them.[5]

[4] *Murray* v. *South Carolina R. Co.* (1841) 1 McMull. L. 385, 36 Am. Dec. 268. The argument of Evans, J., which leads up to this conclusion, is as follows: "It is admitted he [*i. e.*, the servant] takes upon himself the ordinary risks of his vocation: why not the extraordinary ones? Neither are within his contract—and I can see no reason for adding this to the already known and acknowledged liability of a carrier, without a single case or precedent to sustain it. The engineer no more represents the company than the plaintiff. Each, in his several department represents his principal. The regular movement of the train of cars to its destination is the result of the ordinary performance by each of his several duties. If the fireman neglects his part the engine stands still for want of steam; if the engineer neglects his, everyone runs to riot and disaster." In *Louisville, C. & L. R. Co.* v. *Curens* (1873) 9 Bush. 559, fellow servants are also said to be "agents for each other."

The same idea emerges in a case where the court refers to "the rule that one servant is responsible for the negligence of his fellow." *Evans* v. *Atlantic & P. R. Co.* (1876) 62 Mo. 49.

[5] "The foundation of all legal liability" said Chancellor Johnson, "is the omission to do some act which the law commands, the commission of some act which the law prohibits, or the violation of some contract by which the party is injured. There is no law regulating the relative duties of the owners of a steam car, and the persons employed by them to conduct it. The liability, if any attaches, must therefore arise out of contract. What was the contract between these parties? The plaintiff, in consideration that the defendants would pay him so much money, undertook to perform the service of fireman on the train. This is all that is expressed. Is there anything more implied? Assuming that the injury done was in consequence of the negligence of the engineer, the defendants would not be liable, unless they undertook to answer for his diligence and skill. Is that implied? I think not. The law never implies an obligation in relation to a matter about which the parties are, or may, with proper diligence, be equally informed. No one will ever be presumed to undertake for that which a common observer would at once know was not true. The common case of the warranty of the soundness of a horse, notoriously blind, may be put in illustration. The warranty does not extend to the goodness of the eyes, because the purchaser knew, or might have known, with proper care, that they were defective. Now the plaintiff knew that he was not to conduct the train alone. He knew that he was to be placed under the control of the engineer. He knew that the employment in which he was engaged was perilous, and that its success was dependent on the common efforts of all the hands; and with proper diligence and prudence, he might have been as well, and it does not follow that he might not have been

The former of these two concepts makes its appearance in a few other cases, including the Massachusetts decision cited in the preceding section.[6] The latter concept was also enlarged upon in that decision, and furnished the basis of the earliest English case which deals with this branch of law.[7] It is upon this footing that the master's exemption from liability is most frequently explained. That is to say, the doctrine of common employment is regarded as resting upon "an implied undertaking by the servant to bear the risks arising from the possible negligence of a fellow servant who has been selected with due care by his master."[8]

better, informed than the defendants, about the fitness and security of all the appointments connected with the train. If he was not, it was his own want of prudence, for which the defendants are not responsible. If he was, he will be presumed to have undertaken to meet all the perils incident to the employment."

[6] In one part of his opinion in *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339, Chief Justice Shaw remarked (p. 60): "The implied contract of the master does not extend to indemnify the servant against the negligence of anyone but himself; and he is not liable in tort for the negligence of his servant, because the person suffering does not stand towards him in the relation of a stranger, but is one whose rights are regulated by contract, express or implied."

In a Pennsylvania case decided some years later the court reasoned thus: "The duty insisted upon is substantially one of protection, which cannot exist without implying the correlative one of dependence or subjection. The relations of husband and wife, parent and child, are in law relations of protection and dependence: and there are those which are so in fact, as where a weak-minded person submits himself to the direction of another; and here the law interferes to protect against an undue exercise of influence and power. And there are others, as, the Sunday laws and the laws regulating the hours of labor in particular occupations, whereby the law protects men against the danger arising from undue competition; but the strictness used in defining this relation, as belonging to special cases, implies that it has no wider existence. There is no relation of protection and dependence between master and servant, or of confidence in the institution of the relation; we speak not of master and apprentice. The servant is no Roman client or feudal villein, with a lord to protect him. Both are equal before the law, and considered equally competent to take care of themselves; and very often the servant is the more intelligent of the two. The argument that the law implies a warranty that one servant shall not be injured by the carelessness of another, is only another way of stating the proposition that the law imposes the duty of protection; and it must be set aside by the same answer." *Ryan* v. *Cumberland Valley R. Co.* (1854) 23 Pa. 384.

[7] *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987, 7 L. J. Exch. N. S. 42.

[8] *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97, 55 J. P. 644, 61 L. J. Q. B. N. S. 90, 40 Week. Rep. 405, per Lord Watson (p. 382).

As illustrative of this point of view the following extracts from the opinions of various judges may be quoted:

"When several workmen engage to serve a master in a common work, they know, or ought to know, the risks to which they are exposing themselves, including the risks of carelessness, against which their employer cannot secure them, and they must be supposed to contract with reference to such risks." *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, per Cranworth, L. C.

"The principle is, that a servant, when he engages to serve a master, undertakes, as between him and his master, to run all the ordinary risks of the service, and this includes the risk of negligence on the part of a fellow servant, whenever he is acting in discharge of his duty as servant of him who is the common master of both." *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 6 Railway Cas. 580.

473. Same subject continued.—The effect of the contract thus implied is manifestly to create a very important exception to the juris-

"That principle I take to be that a servant who engages for the performance of services for compensation does, as an implied part of the contract, take upon himself, as between himself and his master, the natural risks and perils incident to the performance of such services: the presumption of law being that the compensation was adjusted accordingly; or, in other words, that these risks are considered in his wages, and that, where the nature of the service is such that, as a natural incident to that service, the person undertaking it must be exposed to risk of injury from the negligence of other servants of the same employer, this risk is one of the natural perils which the servant by his contract takes upon himself, as between him and his master, and consequently that he cannot recover against his master for an injury so caused." As is said by Shaw, Ch. J., in *Farwell v. Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339, he "does not stand towards him in the relation of a stranger, but is one whose rights are regulated by contract, express or implied." *Hoigan v. Vale of Neath R. Co.* (1864) 5 Best & S. 570, 33 L. J. Q. B. N. S. 260, 12 Week. Rep. 1032, per Blackburn, J.

"When a man enters into the service of a master, he tacitly agrees to take upon himself to bear all ordinary risks which are incident to his employment, and, amongst others, the possibility of injury happening to him from the negligent acts of his fellow-servants or fellow-workmen." *Lovell v. Howell* (1876) L. R. 1 C. P. Div. 161, 45 L. J. C. P. N. S. 387, 24 Week. Rep. 672, 34 L. T. N. S. 183, per Archibald, J.

"Every man must have his own business, whether as master or as servant, and there is no business without its risks. Where many servants are employed in the same business, the liability to injury from the carelessness of their fellows is but an ordinary risk, against which the law furnishes no protection but by an action against the actual wrongdoer." *Ryan v. Cumberland Valley R. Co.* (1854) 23 Pa. 384.

It is implied in the contract between the parties that the servant risks the dangers which ordinarily attend or are incident to the business in which he voluntarily engages for compensation; among which is the carelessness of those, at least, in the same work or employment, with whose habits, conduct, and capacity he has, in the course of his duties, an opportunity to become acquainted, and against whose neglect or incompetency he may himself take such precautions as his inclination or judgment may suggest. *Hough v. Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612.

"The rule appears to be founded on the implied contract that he who engages in the employment of another for the performance of specified duties and services, for compensation, takes upon himself the natural and ordinary risks and perils incident to the performance of such services, the compensation, in legal presumption, being adjusted accordingly; and it is said that perils arising from the negligence of fellow servants are incident to the service." *Ford v. Northern R. Co.* (1860) 42 N. H. 225.

"The reason which is said in most of the cases to lie at the foundation of the rule is that when a person engages in any employment, he voluntarily takes upon himself all the ordinary risks belonging to the particular service in which he is to be employed; and is presumed to have indemnified himself, by the terms of his engagement, against any special hazard known to attend it." *Russell v. Hudson River R. Co.* (1858) 17 N. Y. 134.

"Some kinds of business, from the nature of such business, necessarily require a great variety of agents and workmen: and the hazard of the business, we may well conceive, may be materially enhanced from the great number of servants it may become necessary to employ in carrying it on. The person, therefore, who contracts to enter into the service of a man or company engaged in a business of that character, must, when he contracts, regulate his compensation so as to meet the increased risk, or provide in the contract for indemnity against injury in consequence of the negligence of his fellow servants. He then has an opportunity to examine into the nature of the business, the number and character of the persons employed, the duties assigned to each, and everything bearing upon the dangers incident thereto: and must provide for the same in his

tle principle which imposes responsibility for the default of agents.[1] Passages may be quoted from the opinions of judges, in which it seems to be assumed that this result is sufficiently justified by the mere fact of the servant's having entered or remained in the employment with a knowledge of the risks to which he would be exposed from the possible of the commission of negligent acts by other servants.[2] The position thus taken can scarcely be regarded

contract." *Coon* v. *Syracuse & U. R. Co.* (1849) 3 Barb. 231, Affirming (1851) 5 N. Y. 492.

"Where the nature of the service is such that, as a natural incident to that service, the servant must be exposed to the risk of injury from the negligence of other servants of the same employer, or from the use of dangerous machinery, such risk is among the natural perils which the servant assumes upon himself as between himself and the master; and consequently there is no liability of the latter to the former if injuries result from the negligence of other servants." *Cumberland & P. R. Co.* v. *State* (1875) 44 Md. 283.

"A person entering the service of another assumes all risks naturally incident to that employment, including the danger of injury by the fault or negligence of a fellow servant." *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342.

"Like the main rule [*i. e.*, that a master is liable for his own defaults], this exception is founded upon public policy, and had its origin in the idea that the employee has the means of knowing, just as well as the employer, all the ordinary risks incident to the service in which he is about to engage; and that these including the perils that might arise from the negligence of other servants in the same business, entered into the contemplation of the parties in making the contract; on account of which, the law implies, the servant or employee has insisted upon a rate of compensation which would indemnify him for the hazards of the employment." *Sullivan* v. *Mississippi & M. R. Co.* (1861) 11 Iowa, 421.

The same theory is also impliedly affirmed in those numerous cases in which courts have spoken of the risk of injury from a coservant's negligence, as an ordinary one. See, for example, the following: *Burke* v. *Anderson* (1895) 16 C. C. A. 442, 34 U. S. App. 132, 69 Fed. 814; *Melville* v. *Missouri River, Ft. S & G. R. Co.* (1880) 4 McCrary, 191; *Hudson* v. *Richmond & D. R. Co.* (1894) 2 App. D. C. 98; *Burns* v. *Scott* (1893) 99 Cal. 363, 33 Pac. 916; *Wurth's Columbian Exposition* v. *Bell* (1898) 76 Ill. App. 591; *Sherman* v. *Rochester & S. R. Co.* (1858) 17 N. Y. 153; *Anthony* v. *Leerd* (1887) 105 N. Y. 591, 12 N. E. 561; *Doyle* v. *White* (1896) 9 App. Div. 521, 41 N. Y. Supp. 628; *Elwell* v. *Rucker* (1891) 86 Me. 416, 30 Atl. 64; *Hewitt* v. *Flint & P. M. R. Co.* (1887) 67 Mich. 61, 34 N. W. 659; *Missouri P. R. Co.* v. *Lyons* (1898) 51 Neb. 633, 75 N. W. 31; *Routcright* v. *Northeastern R. Co.* (1886) 25 S. C. 128; *Baltimore & O. R. Co.* v. *McKenzie* (1885) 81 Va. 71.

In *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862, it was assumed that the doctrine of common employment might be based either on the maxim, *Volenti non fit injuria*, or the theory of an implied contract. Compare § 370, *ante*.

[1] The following synopsis of the law, extracted from the opinion of Lord Neaves, in *Leddy* v. *Gibson* (1873) 11 Sc. Sess. Cas. 3d series, 301, will be useful in the present connection:

Fundamental principle:—*Culpa tenet suos auctores*; *i. e.*, the person by whose fault an injury is caused, and he alone, is legally liable.

Exception:—The principle of *respondeat superior*.

Counter exceptions:—Nonliability for injuries resulting from—

(1) The fault of an independent contractor or his servants.

(2) The criminal or malicious acts of a servant.

(3) The negligence of a fellow servant of an injured servant.

[2] The following language was used in the earliest of the English cases: "The mere relation of master and servant never can imply an obligation on the part of the master to take more care of the servant than he may reasonably be expected to do of himself. He is, no

as a satisfactory one. Even if it be conceded that, in cases where the doctrine summed up in the phrase, *Respondeat superior*, is not a material element in the investigation, the servant's knowledge of a risk is a circumstance which may reasonably be regarded as affording an adequate foundation upon which to base an unvarying inference of law, a proposition which, since the recent English de

doubt, bound to provide for the safety of his servant in the course of his employment, to the best of his judgment, information, and belief. The servant is not bound to risk his safety in the service of his master, and may, if he thinks fit, decline any service in which he reasonably apprehends injury to himself; and in most of the cases in which danger may be incurred, if not in all, he is just as likely to be acquainted with the probability and extent of it as the master. In that sort of employment, especially, which is described in the declaration in this case, the plaintiff must have known as well as his master, and probably better, whether the van was sufficient, whether it was overloaded and whether it was likely to carry him safely." *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 7 L. J. Exch. N. S. 42, 1 Jur. 987.

In *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 6 Railway Cas. 580, Alderson, B., reasoned thus: "The principle upon which a master is in general liable to answer for accidents resulting from the negligence or unskilfulness of his servant is, that the act of his servant is, in truth, his own act. If the master is himself driving his carriage, and from want of skill causes injury to a passerby, he is, of course, responsible for that want of skill. If, instead of driving the carriage with his own hands, he employs his servant to drive it, the servant is but an instrument set in motion by the master. It was the master's will that the servant should drive, and whatever the servant does in order to give effect to his master's will may be treated by others as the act of the master: *'Qui facit per alium, facit per se.'* So far there is no difficulty. Equally clear is it, that, though a stranger may treat the act of a servant as the act of his master, yet the servant himself, by whose negligence or want of skill the accident has occurred, cannot. And, therefore, he cannot defend himself against the claim of a third person; nor if, by his unskilfulness, he is himself injured, can he claim damages from his master upon an allegation that his own negligence was, in point of law, the negligence of his master. The grounds of these distinctions are so obvious as to need no illustration. The difficulty is as to the principle applicable to the case of several servants employed by the same master, and injury resulting to one of them from the negligence of another. In such a case, however, we are of opinion that the master is not, in general, responsible, when he has selected persons of competent care and skill. Put the case of a master employing A and B, two of his servants, to drive his cattle to market. It is admitted that if by the unskilfulness of A, a stranger is injured, the master is responsible. Not so, if A, by unskilfulness, hurts himself; he cannot treat that as the want of skill of his master. Suppose, then, that by the unskilfulness of A, B, the other servant, is injured while they are jointly engaged in the same service; there we think B has no claim against the master. They have both engaged in a common service, the duties of which impose a certain risk on each of them; and in case of negligence on the part of the other, the party injured knows that the negligence is that of his fellow servant, and not of his master. He knew, when he engaged in the service, that he was exposed to the risk of injury, not only from his own want of skill or care, but also from the want of it on the part of his fellow servant; and he must be supposed to have contracted on the terms that, as between himself and his master, he would run this risk."

In *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 769, Lord Cranworth, after explaining the reasons by which the doctrine of *respondeat superior*, embodied in the phrase, is supported in actions against strangers, proceeded thus: "But do the same principles apply to the case of a workman injured by the want of care of a fellow workman, engaged together in the same work? I think not. When the workman con-

cisions as to the effect of the maxim, *Volenti non fit injuria* (§ 377, subd. *a*, *ante*), is certainly not beyond the reach of controversy, it is not by any means a necessary conclusion that, in cases where that doctrine is an element to be reckoned with, his knowledge should carry the same consequences.[3] The more reasonable position would seem to be that the justifiability of the deduction thus drawn from the servant's knowledge can be admitted only when it is shown that the logical situation embraces some additional element of sufficient importance to override the effect of that doctrine.

In some instances the receipt of wages has been adduced as the factor which differentiates the position of a servant who is suing his master from that of a person who is suing a stranger.[4] That this

tracts to do work of any particular sort, he knows, or ought to know, to what risks he is exposing himself: he knows, if such be the nature of the risk, that want of care on the part of a fellow workman may be injurious or fatal to him, and that against such want of care his employer cannot, by any possibility, protect him. If such want of care should occur, and evil is the result, he cannot say that he does not know whether the master or the servant was to blame: he knows that the blame was wholly that of the servant; he cannot say that the master need not have engaged in the work at all, for he was party to its being undertaken. Principle, therefore, seems to me opposed to the doctrine that responsibility of a master for ill consequences of his servant's carelessness is applicable to a demand made by a fellow workman in respect of evil resulting from the carelessness of a fellow workman, when engaged in a common work."

"The reason for this rule is, that as the master cannot prevent carelessness in his servants, it is reasonable to presume each servant agrees to run the risk of that which he knows, in the nature of things, to be inevitable." *Putnam* v. *Erie R. Co.* (1870) 34 N. J. L. 151.

"The distinction on which this rule of law is founded is an eminently wise and just one. It is this: A workman or servant, on entering upon any employment, is supposed to know and to assume the risks naturally incident thereto; if he is to work in conjunction with others, he must know that the carelessness or negligence of one of his fellow servants may be productive of injury to himself. And besides this, what is more material, as affecting his right to look to his employer for damages for such injuries, he knows, or ought to know, that no amount of care or diligence by his master or employer can by possibility prevent the want of due care and caution in his fellow servants, although they may have been reasonably fit for the service in which they are engaged." *Snow* v. *Housatonic R. Co.* (1864) 8 Allen, 441, 85 Am. Dec. 720.

It has been remarked that a rule similar to that which exempts a master from liability for the act of a servant, by which a fellow servant is injured, is applicable also to guests, who cannot sue the master of the house for an injury done by his servants. *Swainson* v. *Northeastern R. Co.* (1878) L. R. 3 Exch. Div. 341, 47 L. J. Exch. N. S. 372, 38 L. T. N. S. 201, 26 Week. Rep. 413, per Bramwell, L. J.

[3] "It is assuming the whole question as to the reason, justice, and policy of exempting the master from liability in such cases, to say that such exemption is implied from the contract of service; for, unless the exemption is demanded by reason and sound policy, it ought not to be implied." *Kidley* v. *Belcher Silver Min. Co.* (1875) 3 Sawy. 437, Fed. Cas. No. 7,760, per Hillyer, J.

In one case it was laid down that the rule *respondeat superior* can only be applied in an action sounding in tort, and not where the liability arises out of contract. *Ohio & M. R. Co.* v. *Hammersley* (1867) 28 Ind. 371. This is, however, clearly erroneous, as the rule is constantly applied in the case of carriers.

[4] "If the employer's contract with his workmen is that he will use ordinary care in the employment of other workmen, but that he will not guaran-

consideration is entirely inadequate as a differentiating factor was, however, shown long ago by an eminent English judge.[5]

A theory more generally favored is that a contract to accept the risks of a fellow servant's negligence may properly be implied on the ground of expediency and public policy.[6] As the situation has been

tee their carefulness, and if he use such care, and, by the negligence of one of them, another of them is injured, the employer is not liable, the common rule of torts, that the act of the servant is the act of the master, being suspended as to that case by the contract. But if a third person, not a party to the contract between the master and servant, is injured by the fault of the servant, his right of action against the master does not depend upon, and is not limited by, that contract. The servant has agreed to bear, and is paid for bearing, the risks incident to the service; the stranger has not made such an agreement, and is not paid for bearing such risks." *Fifield* v. *Northern R. Co.* (1860) 42 N. H. 225.

"Some minds find it difficult to understand why an employer,—a railroad company, for instance,—should not be responsible to those in its employment for accidents befalling them, in the same cases and to the same extent, as to the persons not in its service. The different relations of the parties toward each other are not kept in view. The customers of a railroad and the public for whom the company acts as carrier of persons and property, pay it to perform such services for them. Its employees, on the contrary, are paid by the company for the exertion of their skill and diligence in its behalf for the very purpose of making repairs, completing equipment, preventing accidents, and enabling it safely and efficiently to fulfil its engagements. The need of this skill and diligence implies imperfection without them, in the work upon which, or the service for which, the employees are engaged, and they are paid according to the nature and exactions of the service. Generally, also, there must be co-operation with them on the part of other employees of the company in the work to be performed. For these reasons it has been often ruled, that, as between their employer and themselves, employees take the risk of any damage they may sustain from the perils incidental to the service in which they engaged, including those arising from the negligence of others engaged therein, unless they are chargeable upon the misconduct or negligence of the employer. This is now well settled law. Obviously, though, such a rule is not applicable between the company and those not in its employment." *Mobile & M. R. Co.* v. *Smith* (1873) 59 Ala. 245.

"The doctrine has its foundation in justice and policy. The ordinary risks of the service in which one is engaged are usually, in fact, considered in making the engagement and adjusting the wages. And this may, with great propriety, be held to be always so in legal contemplation." *Chicago & G. E. R. Co.* v. *Harney* (1867) 28 Ind. 30, 92 Am. Dec. 282.

[5] "The test is not whether the party complaining is paid to undertake the risk. A guest is in the same position as a servant, because he has the means of judging of the character of the house in which he is. The question is whether, knowing the risk, the party incurs it voluntarily." Pollock, C. B., in *Abraham* v. *Reynolds* (1860) 5 Hurlst. & N. 143, 6 Jur. N. S. 53, 8 Week. Rep. 181, 1 L. T. N. S. 330.

[6] "In considering the rights and obligations arising out of particular relations, it is competent for courts of justice to regard considerations of policy and general convenience, and to draw from them such rules as will, in their practical application, best promote the safety and security of all parties concerned. This is, in truth, the basis on which implied promises are raised, being duties legally inferred from a consideration of what is best adapted to promote the benefit of all persons concerned, under given circumstances." "The general rule, resulting from considerations as well of justice as of policy, is that he who engages in the employment of another for the performance of specified duties and services for compensation, takes upon himself the natural and ordinary risks and perils incident to the performance of such services, and in legal presumption the compensation is adjusted accordingly. And we are not aware of any principle which should except the peril arising from the carelessness and negligence of those who are in the same

explained in several cases, the virtual effect of this theory is simply that the consideration thus relied upon points to different conclusions, according as the person sued is a stranger or an employee.[7]

Various elements have been adverted to by the courts in dealing with this aspect of the doctrine.

In the earliest of the English cases much reliance was placed by Lord Abinger upon the *argumentum ab inconvenienti*.[8]

employment. These are perils which the servant is as likely to know, and against which he can as effectually guard, as the master. They are perils incident to the service, and which can be as distinctly foreseen and provided for in the rate of compensation as any others. To say that the master shall be responsible because the damage is caused by his agents is assuming the very point which remains to be proved. They are his agents to some extent, and for some purposes; but whether he is responsible, in a particular case, for their negligence, is not decided by the single fact that they are, for some purposes, his agents." *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339. See also the quotation from the opinion in *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659, § 561, note 1 *ad finem*, *post*.

In a Kentucky case the court speaks of "the reason and policy of implying, as between themselves, such associations, knowledge, and trust, as to have induced an undertaking mutually to risk all the contingencies which the ordinary skill and care of each other in his line of service could not avert." *Louisville & N. R. Co.* v. *Robinson* (1868) 1 Bush, 598.

Public policy has also been recognized — being the foundation of the doctrine — in the following cases: *Union P. R. Co.* v. *Dort* (1873) 17 Wall. 553, 21 L. ed. 739; *Chicago, R. & M. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184; *Rogers* v. *Lumbard Iron Co.* (1885) 141 Mass. 198, 59 Am. Rep. 68, 11 N. E. 77; *Hide* v. *Boston & L. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545; *McDermott* v. *Pacific R. Co.* (1850) 30 Mo. 116; *Chicago & N. W. R. Co.* v. *Moranda* (1879) 93 Ill. 302, 34 Am. Rep. 168; *Hard* v. *Vermont & Canada R. Co.* (1863) 32 N. H. 473.

See also the full list of cases.

[7] "In the case of a third person the actual fault of the servant is imputed to the principal solely on the ground of public policy; in the case of a servant, it is not." *Keegan* v. *Western R. Corp.* (1853) 8 N. Y. 175, 59 Am. Dec. 476.

"As the master's responsibility has been extended by the doctrine of *respondeat superior*, from considerations of public policy, so that doctrine has been limited by similar considerations in respect to the master's responsibility to his servants." *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521.

"As to strangers, upon principles of public policy it treats a master as guilty for the negligence of his servant, but public policy does not demand that he should be so treated as to his own servants, who have the option to examine their surroundings in his service, and to receive pay according to the risk they incur." *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659.

Similar language adverting to the difference between these juridical situations, and the principles appropriate to each of them, is found in *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339; *Coon* v. *Syracuse & U. R. Co.* (1849) 6 Barb. 231, Affirming (1851) 5 N. Y. 492.

[8] "If the master be liable to the servant in this action, the principle of that liability will be found to carry us to an alarming extent. He who is responsible by his general duty, or by the terms of his contract, for all the consequences of negligence in a matter in which he is the principal, is responsible for the negligence of all his inferior agents. If the owner of the carriage is therefore responsible for the sufficiency of his carriage to his servant, he is responsible for the negligence of his coachmaker, or his harness-maker, or his coachman. The footman, therefore, who rides behind the carriage may have an action against his master for defect in the carriage owing to the negligence of the coachmaker or for a defect in the harness arising from the negligence of the harness-maker or for drunkenness, neglect, or want of skill in the coachman; nor is there any reason why the principle should not, if applicable in that class of cases, extend

In other cases stress has been laid upon "the injustice of compelling employers to answer for that which their own care cannot prevent, to those whose opportunities for self-protection are as great, and usually much greater."[9]

Occasionally we find it asserted that any departure from the doctrine is dangerous to the prosperity of industrial enterprises requiring the services of a large number of persons.[10]

In one instance we find the argument advanced that the imposition of a liability upon the master would be open to the same objections as the sociologists of a certain school see in all so-called paternal legislation.[11]

to many others. The master, for example, would be liable to the servant for the negligence of the chambermaid, for putting him into a damp bed; for that of the upholsterer, for sending in a crazy bedstead, whereby he was made to fall down, while asleep, and injure himself; for the negligence of the cook, in not properly cleaning the copper vessels used in the kitchen; of the butcher, in supplying the family with meat of a quality injurious to the health; of the builder, for a defect in the foundation of the house, whereby it fell, and injured both the master and the servant by the ruins.

"The inconvenience, not to say the absurdity, of these consequences, affords a sufficient argument against the application of this principle to the present case." *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987, 7 L. J. Exch. N. S. 42, per Lord Abinger.

[9] *Michigan C. R. Co.* v. *Leahey* (1862) 10 Mich. 193.

"The servant has, commonly, better opportunities than the master of learning the incompetency or carelessness of his fellow servant in the same employment." *Chicago & G. E. R. Co.* v. *Harney* (1867) 28 Ind. 28, 92 Am. Dec. 282. Compare *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987, 7 L. J. Exch. N. S. 42, as quoted in note 1 *supra*.

"The law supposes that the relation which the several employees sustain to each other and the business in which they are engaged would enable them better to guard against such risks and accidents than could the employer." *Sullivan* v. *Mississippi & M. R. Co.* (1860) 11 Iowa, 421.

In *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119, Black, J., stated the ground upon which the defense is based to be, in substance, this: "That from considerations of public policy and convenience the law will imply a contract on the part of the employee to take upon himself all risks arising from the negligent acts of his coemployees. The reasons for the rule are: 'Where several persons are employed in the conduct of one common enterprise or undertaking, and the safety of each depends, to a great extent, on the care and skill with which each shall perform his appropriate duty, each is an observer of the conduct of the other, can give notice of any misconduct in capacity or neglect of duty, and leave the service if the common employer will not take such precautions, and employ such agents, as the safety of the whole party may require.'"

[10] See *New Pittsburgh Coal & C. Co.* v. *Peterson* (1893) 136 Ind. 398, 35 N. E.

"the servants who do this work exclusively were under no obligation to save each other's lives, and to throw all the risks of their dangerous employment upon the companies who employ them, all these great enterprises which require and employ the services of a large number of men would be seriously retarded." *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 91, 18 S. W. 924.

"It would violate a law of nature, if it (i. e. the law as administered by the courts) should provide an immunity to one against the ordinary dangers of his business, and it would be treating him as incapable of taking care of himself." *Ryan* v. *Cumberland Valley R. Co.* (1851) 23 Pa. 384.

But perhaps the consideration upon which most reliance is placed is that the practical tendency of the doctrine is to make a servant more cautious in performing his duties and more watchful as to the character and qualifications of his coemployee, and that the result of the influence thus exerted is that tangible benefits are reaped by everyone concerned, by the servant himself, by his master, and by strangers whose personal safety or business interests are more or less dependent upon the manner in which he performs his duties.[12]

[12] "To allow this sort of action to prevail would be an encouragement to the servant to omit that diligence and caution which he is in duty bound to exercise on the behalf of his master, to protect him against the misconduct or negligence of others who serve him, and which diligence and caution, while they protect the master, are a much better security against any injury the servant may sustain by the negligence of others engaged under the same master, than any recourse against his master for damages could possibly afford." *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987, 7 L. J. Exch. N. S. 62.

"Where several persons are employed in the conduct of a common enterprise or undertaking, and the safety of each depends much on the care and skill with which each other shall perform his appropriate duty, each is an observer of the conduct of the others, can give notice of any misconduct, incapacity, or neglect of duty, and have the service, if the common employer will not take such precautions, and employ such agents, as the safety of the whole party may require. By these means, the safety of each will be much more effectually secured, than could be done by a resort to the common employer for indemnity in case of loss by the neglect of each other. Regarding it in this light, it is the ordinary case of one sustaining an injury in the course of his own employment, in which he must bear the loss himself, or seek his remedy, if he have any, against the actual wrongdoer." *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339.

"It is assumed that the exception operates as a stimulant to diligence and caution on the part of the servant, for his own safety, as well as that of the master." *Chicago, M. & St. P. R. Co.* v. *Ross* (1881) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184; 9 C. C. A. 9.

"Public policy requires that each servant should be influenced by its operation to be, not only careful of his own safety, but as watchful as possible over the acts of his associates." *Burke* v. *Norwich & W. R. Co.* (1867) 34 Conn. 474.

"If we declare that workmen are warranted against such carelessness (i. e. of coservants), then the law places all careless men, which means all badly educated or badly trained men, and it places even these who have not acquired a reputation for care, under the ban of at least a partial exclusion from all work. And this is the ordinary result of all undue attempts to protect by law one class of citizens against another. It is done at a practical sacrifice of liberty on the part of those intended to be protected, and to the embarrassment of the common business of life, by imposing upon the people a rule of a new and unusual character which may require half a century to become fitted like a custom, and adapted to the customs already existing which it does not have the effect of annulling. If this were the rule, it would embarrass the conduct of all business, where any risk is to be run. How could a sailor be ordered aloft, in a storm, without the employer's being liable to the charge that the captain had shown want of proper skill and care in giving such an order in the circumstances? How could the wearied laborer be allowed to ride home with the driver without danger that the employer should be called to account for an accidental tilting of the cart?" *Ryan* v. *Cumberland Valley R. Co.* (1851) 23 Pa. 384.

"As most of the enterprises of modern times, which contribute to human progress and the welfare of society, must be carried on by numerous servants working to the same end under common [illegible], it has been supposed that it would cast upon each too much responsibility to hold him liable for injuries against which he could by no possibility guard, especially by the exercise of [illegible] the negligence of a coservant;

474. Judicial criticisms of the doctrine.—Much adverse criticism has been leveled by various judges at the doctrine of common employment and the arguments by which it has been sustained.

One court has expressed the opinion that "the limitation has no foundation in abstract or natural justice, and all attempts to place it upon any other foundation than that of public policy will prove unsatisfactory, when brought to the test of careful and logical an

and that the servants would be better protected if they were obliged to rely upon their own care and vigilance rather than those of the master. Hence, to enforce the supposed public policy, a fiction has been invented by which the servant is said to assume all the risks of the service in which he engages, which include the risks of injuries caused by the negligence of coservants engaged in the same common employment." *Crispin v. Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521.

"It is considered that public policy requires that servants engaged in a common employment should not have an action against their principal for injuries resulting from the negligence of one or more of such servants; because the tendency of such a doctrine is to make them anxious and watchful, and interested for the faithful conduct of each other, and careful to induce it; while the opposite doctrine would tend in a different direction. The safety and welfare of the public, therefore, demand the establishment of the liability principle on the part of the employer in such cases; while, when established, it can work no injury to the servant, because his entering upon the service is voluntary, is with a knowledge of its hazards and with a power and right to demand such wages as he shall deem compensatory." *Madison & I. R. Co. v. Bacon* (1855) 6 Ind. 205.

"The servants owe to the master a diligent and watchful care over his business, and they owe to each other a vigilance and caution for their own safety. . . . The rule which deprives them of compensation for injuries sustained from the neglect each of the other inspires that care and diligence in the discharge of their duties, both to the master and to themselves, which is essential to the welfare of the master and the safety of each other. When the rule is destroyed, its inducement to care is gone, and the master, if not liable for the fault of his servants as between themselves, has servants whose duties require no care excepting that each shall look to his own safety." *New Pittsburgh Coal & C. Co. v. Peterson* (1893) 136 Ind. 398, 35 N. E. 7.

"The moral effect of devolving these risks upon the employees themselves would be to induce a greater degree of caution, prudence, and fidelity than would in all probability be otherwise exercised by them." *Sullivan v. Mississippi & M. R. Co.* (1860) 11 Iowa, 421.

"The rule thus qualified or limited is too well established, both upon reason and authority, to be now departed from. It rests not only upon the implied agreement to assume all the risks consequent upon the negligence of fellow servants, but, in the case of railway employees particularly, it is supported by considerations of a just and true public policy. The safety of the traveling public is largely dependent upon the care and skill with which railway employees discharge their responsible and perilous duties. The fact that such fellow servants must, as between themselves and the company, take upon themselves the results of the carelessness and negligence of a fellow servant, tends to quicken the zeal and arouse the activities of each employee against such negligence. The public weal demands that no guaranty which tends to guard the public against the negligence of servants guiding the powerful appliances of the modern railway shall be broken down; and we can but regard the rule, as qualified by the courts of this state, as well calculated to stimulate each servant to his utmost exertions to prevent negligence in others." *Louisville & N. R. Co. v. Lair* (1887) 86 Tenn. 335, 6 S. W. 663.

"The doctrine was originally adopted because it fixed the liability where it could best be borne. It was intended, by placing this responsibility upon the employees, to introduce a safeguard, beneficial alike to the servant and the master and to the public by invoking

alysis."[1] But even public policy is deemed by many of the authorities to be an inadequate consideration upon which to base the doc-

the self-interest of the employees to see that each carefully and faithfully discharged the duties of his position, while imposing upon the master the duty of care and discretion in the selection of his servants. . . . The object here sought is a plain rule regulating and controlling some, at least, of the more important relations between railway companies and their employees. They are interested in the solution of this problem, the employees, as a class,—and not merely those who have been or may be injured,—the employer, and the public. That the particular rule is, in its application, always invoked by the employer to defeat the demands of the injured employee does not at all prove that the employees, as a class, are not greatly benefited by it. The number of those injured by the negligence of their fellow servants is, unhappily, very great, but the proportion they bear to the whole number of employees is very small. If the rule, while operating to the disadvantage of the injured few, promotes the safety of the far greater number of those who sustain no injuries, by introducing a salutary superintendence over each other among the servants of the company, then the rule, while beneficial to the employer, is not less so to the employee; for that which promotes immunity from danger is more to be desired than the pecuniary compensation for the injury could be, and, being promotive also of the efficiency of the service, is obviously in the interest of the public. It is to be considered, also, in connection with other rules applicable to the relation of master and servant. The duty is imposed upon the master to exercise caution and discretion in the selection of the servants who are to be 'fellows,' and mutually responsible to each other, and he must not retain in his service anyone found to be unfitted to discharge the duties assigned to him. In the due performance of this duty by the master, the employees, as a class, and the public at large, are deeply interested, and the effect of the rule is to make it to the interest of the employees to keep the employer advised as to the habits, character, and qualifications of the fellow servants." *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342.

"Public policy requires that where the laborers are co-equals, and engaged in laboring in the same field or on the same railroad-train or in any other employment, that each should exercise proper care in the conduct of the business, and look to it that his co-laborer does the same thing; and when he is told that this care and prudence is his only remedy against danger from the negligence of those employed with him, it not only makes him the more careful, but stimulates him to see that others exercise the same caution." *Louisville, C. & L. R. Co.* v. *Cavens* (1873) 9 Bush, 565.

In *Russell* v. *Hudson River R. Co.* (1858) 17 N. Y. 134, the court refers to the theory that, "as the effects of the carelessness of one servant may frequently be obviated by the watchfulness of another, public policy requires the adoption of the rule as an incentive to superior vigilance."

See, to the same effect, *St. Louis, A. & T. R. Co.* v. *Welch* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529; *Smoot* v. *Mobile & M. R. Co.* (1880) 67 Ala. 13, referring to Cooley, Torts, 541; *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258. See also the cases cited in the discussion of the consociation doctrine, §§ 501 *et seq.*, *post*.

[1] *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521.

In the early Scotch case of *Dixon* v. *Ranken* (1852) 14 Sc. Sess. Cas. 2d series, 420, 1 Am. R. Y. Cas. 569, Lord Cockburn, in referring to the contention of counsel that the doctrine ought to be adopted on account of its own inherent justice said: "This last recommendation fails with me, because I think that the justice of the thing is exactly in the opposite direction. I have rarely come upon any principle that seems less reconcilable to legal reason. I can conceive some reasonings for exempting the employer from liability altogether, but not one for exempting him only when those who act for him injure one of themselves. It rather seems to me that these are the very persons who have the strongest claim upon him for reparation, because they incur danger on his account, and certainly are not understood, by our law, to come under any engagement to take these risks on themselves."

trine.[2] Some have impugned the position that it promotes the safety of the servants themselves.[3] Others have attacked the theory that it is advantageous to the members of the public who may be endangered by the negligence of persons in the position of servants.[4] Others have intimated that they are unable to perceive in what respect the grounds of public policy involved in cases where a servant is suing

[2] The earliest expression of judicial dissatisfaction in England is found in the remark of Jervis, C. J., that "there may be a doubt as to the policy of the law." *Tarrant* v. *Webb* (1856) 25 L. J. C. P. N. S. 261, 18 C. B. 797.

[3] In reply to the argument that it would lead to carelessness on the part of servants, if they knew that they could recover for any damage they might receive, the supreme court of Ohio observed: "In answer to this it may be remarked that it is only where the person has been careful himself that any right of action accrues in any case. Besides, we do not think it likely that persons would be careless of their lives and persons or property merely because they might have a right of action to recover for what damage they might prove they had sustained. If men are influenced by such remote considerations to be careless of what they are likely to be most careful about, it has never come under our observation. We think the policy is clearly on the other side. It is a matter of universal observation that in any extensive business where many persons are employed, the care and prudence of the employer is the surest guaranty against mismanagement of any kind. The employer would, we think, be more likely to be careless of the persons of those in his employ, since his own safety is not endangered by any accident, when he would understand that he was not pecuniarily liable for the careless conduct of his agents." *Little Miami R. Co.* v. *Stevens* (1851) 20 Ohio, 432.

"It may be doubted whether the exemption has the effect thus claimed for it. We have never known parties more willing to subject themselves to dangers of life or limb because, if losing the one, or suffering in the other, damages could be recovered by their representatives or themselves for the loss or injury. The dread of personal injury has always proved sufficient to bring into exercise the vigilance and activity of the servant." *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184.

"It has also been doubted whether the law as it stands at present is not injurious, and is not calculated to induce carelessness in both masters and servants. The master does not care to know what careless acts are done by his servants, and the servants do not care if the master does not. When an accident happens no one is liable and nobody cares except the unfortunate man who is injured." Whittaker's Smith, Negl. 138.

The following caustic remark in a well-known text-book is as sensible as it is witty: "The theory that public policy requires that servants should have no remedy against their masters in such cases, because the absence of any remedy will make them more careful of their own safety than they would otherwise be, reminds us of nothing so much as the opinion of Chief Justice Ruffin, in the days of slavery, that the law denied any remedy for any amount of torture to a slave, short of immediate murder, out of humane regard to the best interests of the slaves themselves." 1 Shearm. & Redf. Negl. 4th ed. p. 303.

[4] "The defense of common employment has little of reason or principle to support it, and the tendency in nearly all jurisdictions is to limit rather than enlarge its range. It must be conceded that it cannot rest on reasons drawn from considerations of justice or public policy. . . . No consideration of public policy will sustain this defense, because the public are not at all interested in the question, as they are in questions concerning innkeepers and common carriers." *Ziegler* v. *Danbury & N. R. Co.* (1885) 52 Conn. 543.

"With respect to considerations of policy it is by no means certain that the public interest would not be best subserved by holding the superior, with his higher intelligence, his surer means of information, and his power of selecting, directing, and discharging subordinates, to the strictest accountability for their misconduct in his service, whoever may be the sufferer from it." *Burke* v. *Norwich & W. R. Co.* (1867) 34 Conn. 474.

his master are essentially different from those involved in cases where a stranger is the plaintiff.[5] Others have attacked the theory of an implied contract in language which, while it is directed primarily against the propriety of predicating the existence of such a contract with regard to the risks of a fellow servant's negligence, really cuts much deeper, and amounts to an arraignment of the rationale of the whole doctrine under which the servant's knowledge of any description of risk renders him chargeable with its acceptance.[6]

[5] "Now, it being conceded, as it must be, that the master is liable to third persons for the negligent acts of his servants, it is difficult to see how public policy has much to do with the question as to who shall be deemed fellow servants within the rule of exemption. The liability being admitted in case a third person is injured, but denied in case a servant is injured by another servant, the denial in the latter case must stand on some peculiar relation between master and servant. This peculiar relation cannot be simply the fact that the servants are in a position where one may be injured by the negligence of another, for third persons often occupy the same position: as where they become passengers." *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 409, 18 L. R. A. 802, 19 S. W. 1119.

[6] "However plausible may be the theory, it is very doubtful whether, in fact, a spinner in a factory or a fireman on a railroad ever made an examination into the condition of the machinery, the mode of conducting the business, or the character and habits of the operatives, for the purpose of ascertaining the extent of his risk as an element in calculating the proper amount of his wages. A passenger in a railroad car may well be presumed to have a vivid consciousness of his risk, but it has never been understood that he contracts with reference to it when he buys his ticket, so as to be his own insurer. Again, a principal is responsible to an employee for his own negligence,—why should he not be liable for that of his agent, over whom the employee has no control, and of whom he may have no knowledge?" *Burke* v. *Norwich & W. R. Co.* (1867) 34 Conn. 474.

"I am free to admit that I think the explanation given of this limitation is a very unsatisfactory and artificial one—a supposed contract between master and servant that the latter shall not claim damages in such a case. Can anything be more artificial? I should say you might just as well presume that implied contract in the case of a contractor as in the case of a fellow servant, strictly so called." *Gregory* v. *Hill* (1869) 8 Sc. Sess. Cas. 3d series, 282, per Lord Benholme.

"This exception has been defended on various grounds; sometimes it has been said that the limitation of the master's liability is the consideration of the wages given, sometimes that the servant knows of his risk, and must be held to take it by his contract. These are not legal principles, but legal inferences. The wages form the consideration for the stipulated service, whatever that may be; and the fact that a person knows of the risk and voluntarily encounters it may or may not lead to the inference that he undertakes it, according to the nature of his relation to the wrongdoer or his master." *Woodhead* v. *Gartness Min. Co.* (1877) 4 Sc. Sess. Cas. 4th series, 469, per Lord Moncrieff.

"If the question were open, it might, perhaps, be doubted whether any such condition can be deduced from the contract of service, and whether the supposed obligation does not partake more of the nature of a legal fiction than that of a sound and just inference. The duty of a man to protect those whom he induces to enter his service is to the full as great as any he owes to the public." *Adams* v. *Glasgow & S. W. R. Co.* (1875) 3 Sc. Sess. Cas. 4th series, § 215.

"We confess that the reasoning upon which the rule has been adopted is not very satisfactory. It is said that when the servant accepts the employment of the master, he impliedly assumes the risk of the negligence of his fellow servants. The argument seems illogical. It amounts to saying that the law is that he cannot recover because he takes the risk, and that he takes the risk because the law is so. By a parity of reasoning we might assume that he takes the risk of his master's own personal negligence,

475. General discussion of the doctrine.— A perusal of the judicial arguments for and against the doctrine of common employment would seem to warrant the inference that, as a matter of ultimate analysis, it is taken for granted by the great majority both of its assailants and its vindicators that it is a necessary deduction from the general theory which charges a servant with the assumption of all the ordinary risks which are obviously incident to the work undertaken by him. It is somewhat singular that the unwarrantable character of this hypothesis has never been alluded to in any of the numerous disquisitions on the subject. Yet it needs very little reflection to see that, whether the risk of injury from a coservant's negligence is or is not properly classed among those which are described as "ordinary," the elements to be dealt with in determining whether the responsibility for such a risk shall be cast on the master or the injured person are, in one very important respect, different from those which have to be taken into account where the question to be settled is the extent of the right of recovery in relation to ordinary risks which exist independently of the acts or omissions of coservants.

In considering the propriety of imputing to a servant an assumption of an ordinary risk of the latter class, the essence of the situation is that the fact of the injury's having resulted from such a risk imports, *ex vi termini*, that the master was free from negligence in the premises. As none of the special grounds on which, in certain instances, a liability which approaches more or less nearly to that of an insurer is imposed by the policy of the law are present in the cases where a servant is claiming damages for injuries received in the course of his employment, there is no difficulty in arriving at the conclusion that the master ought not to be required to indemnify the servant under such circumstances. It may be readily

and that therefore the master would not be liable to a servant for such negligence." *St. Louis, A. & T. R. Co.* v. *Welch* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529.

In this connection reference may be made to p. 47 of McFall's Pamphlet on Employers' Liability, where he quotes some strong criticisms made by Bramwell, L. J., and Brett, J., upon the doctrine of an implied contract, when they were under examination before the parliamentary committee, by which the subject of employers' liability was investigated before the English act of 1880 was passed. Attention should also be given to page 107, where a portion of a letter written by Lord Cairns not long afterwards to the London Times is quoted. The following extract is interesting when it is remembered that the writer had, as Lord Chancellor, concurred in the famous judgment rendered in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Ca., 326, 19 L. T. N. S. 30, which applied the doctrine of common employment in its most extreme form (see § 529, *post*): "There cannot continue to be an implied term in contracts, where one of the parties to the contract distinctly repudiates the existence of any such term. That is now the position of the workmen."

conceded that, in view of the socialistic trend of public opinion at the present day in all civilized countries, it is far from improbable that the responsibility of a master to his servants may, by means of legislation, be assimilated to that of a common carrier or an innkeeper. In fact, the most recent of the English statutes have gone very far in that direction. See chapter XL., *post*. But it is manifest that, even under the most liberal theory that could be propounded as to the permissible limits of judicial law-making, the establishment of such a rule in connection with the contract of employment is not within the scope of the powers of a magistrate.

An essentially different situation is involved in those cases in which we have to deal with the ordinary risks which are created by the possibility that a coservant may be guilty of negligence. The inquirer is here confronted by a distinct antagonism of alternative juristic principles, inasmuch as it is necessary to decide whether the rights of the injured person shall be determined with reference to the conception that risks proceeding from this source are undertaken by every servant, or with reference to the conception which is embodied in the phrase, *Respondeat superior*. Since the necessity of reckoning with the latter of these conceptions introduces a new element into the problem, it does not, by any means, follow that, because of the propriety of denying a right of action for injuries caused by ordinary risks which are not produced by a coservant's negligence, no remedy should be allowed for ordinary risks which are produced by such negligence.

The essential difference which is thus shown to exist between the juridical factors involved in ordinary risks which do, and ordinary risks which do not, result from the possibility of coservants being negligent may reasonably be said to impair very materially the strength of the arguments habitually adduced in support of the doctrine of common employment. That those arguments are unsatisfactory, when analyzed from another standpoint, may also, we think, be demonstrated without any difficulty.

As has been stated in § 473, *supra*, the position taken by the courts simply amounts to this:—That on the ground of public policy, injuries resulting from a coservant's negligence should, as a general rule, and in the absence of some special reason to the contrary, be regarded as lying beyond the purview of the principle of *Respondeat superior*. It is a matter of paramount importance, therefore, that the elements of this public policy should rest upon considerations of such a clear and cogent character as to put their convine-

ing weight virtually beyond the reach of controversy. But it is not easy to admit that the considerations actually involved satisfy this high standard. The courts rely upon two theories, the sentence of which may be summed in these two propositions:

(1) That the abrogation of the doctrine of common employment would have a decided tendency to render servants less cautious and efficient in the performance of their duties,—a consequence prejudicial not only to the servants themselves, and their employers, but also, in no small degree, to that portion of the public which is directly affected by the manner in which the business which the servants and their employers are engaged in is conducted.

(2) That, if servants were allowed to maintain actions for injuries caused by the negligence of their fellow servants, the investment of capital in industrial enterprises would be curtailed to such an extent as to inflict serious damage upon the community.

These propositions have been enunciated in language which indicates that the courts deemed them to be axiomatic. At all events, they have never, so far as the writer has found, been sustained by any definite arguments deduced from scientific analogies, or from the teachings of experience. It would appear, therefore, that the doctrine of common employment stands in this singular predicament,—that it rests very largely, if not entirely, upon a basis of suggested facts which we are asked to accept upon the mere *ipse dixit* of a certain number of gentlemen who have attained greater or less distinction in a profession which, to say the very least, does not specially qualify them to form a reliable opinion in respect to the subject-matter.

This situation, which would, in any event, be extremely unsatisfactory, is reduced to something like an absurdity by the fact that the judicial theory as to the supposed inevitable consequences of allowing servants to recover for the negligence of their coemployees has long since been exploded by the logic of actual occurrences, the significance of which is unmistakable. In England and her colonies, as well as in America, statutes have been passed which have greatly restricted the operation of the doctrine of common employment. See chapters XXXVII.–XLI., *post*. No one would have the hardihood to maintain, in the absence of any specific evidence pointing to that conclusion, that, as a result of the legislation, servants have become in a marked degree less careful and efficient, or that industrial development has been crippled and retarded to an appreciable extent. The practical inference is manifest. If, in countries where the doc-

trine of common employment has been more or less circumscribed, none of the evil results which it is declared to have ob ted can be detected, it may be safely concluded that no harm would have been produced if the doctrine had never been applied, and that no harm will result if it should be entirely abrogated by the legislatures,—the only authority by which such a change in the law can now be effected.

In examining the efficacy of the considerations thus relied on, it is highly important to observe that no court has ever gone to the extent of holding that the principle of assumption of risks is invariably controlling, whatever may be the functions of the negligent employee. Under these circumstances it is apparent that the burden actually imposed upon this "unruly horse,"[1] public policy, is not simply that of supplying the determinative element which transfers to the territory of the doctrine of assumption of risks an entire class of cases which would otherwise fall within the domain of the law of agency, but rather that of furnishing a criterion by which to decide what particular portions of that class of cases shall remain on one side or other of the boundary line between the two areas. This state of things greatly aggravates the complexity of the questions involved, and brings into still plainer relief the very unsatisfactory nature of the test proposed.[2] The nebulous quality of

[1] A phrase used by Burrough, J., in *Richardson* v. *Mellish*, 1824, 2 Bing. 229, 9 Moore, 435, 1 Car. & P. 241, Ryan & M. 66.

[2] It is interesting, from a historical standpoint, to peruse the following passage from the opinion of Johnston, J., one of the judges who dissented in the earliest of the American cases in which the defense of coservice was sustained: "I presume no one will contend that the rule applicable to service in a railroad company is that the company is not liable to *one* agent, for *any* injury, provided the company can only show that another of its agents has inflicted it. Would it do to say, for example (and upon what principle could it be said?), —that a superintendent of the hands engaged in repairing the road may, with impunity to the company, abuse his authority, to the injury of their health? Or, if the cars were to be run at night, and through the neglect of hands set apart to watch the road and remove obstructions the whole train were lost, and any officer or hand on board were crippled, certainly no one means to assert that none of those could claim compensation from the company, but must look exclusively to the irresponsible agents (perhaps slaves) hired by the company, through whom the injury accrued. And yet, how is a rule to be laid down—I wish to hear the rule stated—which would include that case and exclude this? The fidelity of the hands detailed to superintend the road, in the case I have supposed, would be as essential to the common enterprise of running the cars as the fidelity of the hands on board to their respective duties. If the idea is indulged that there is, in any branch of this enterprise, an implied undertaking among the servants to do the work jointly, and to waive the neglect of each other, what will constitute such an understanding? Where are its limits? Does it arise from the intimate connection of the hands? Then, I wish to be informed what degree of intimacy, what strength of association, is demanded to raise the implication? Where is the line?" *Warren* v. *South Carolina R. Co.* (1841) 1 McMull. L. 385, 36 Am. Dec. 268.

such a test is sufficiently demonstrated by the remarkable conflict of judicial opinion with respect to the limits of the class of employees who are termed vice principals. See chapters XXVIII.–XXX., *post*.

Since it is not unreasonable to regard the suggested considerations of public policy as having been discredited by the course of events, and thus eliminated from the field of controversy, it remains to inquire whether there is any purely juristic element which will aid us in determining whether the master's liability should be gauged by the doctrine of *Respondeat superior*, or by the doctrine of an assumption of risks. Such an element may, in the opinion of the present writer, be found in the principle which has been summed up in the maxim, *Qui sentit commodum sentire debet et onus*. It would be unbecoming to dogmatize in regard to a matter in which it is practically impossible to obtain an entirely solid basis for a doctrinal superstructure; but we think that there is, at all events, a great deal to be said for the view that the characteristic "advantage" contemplated by this maxim may, not improperly, be held, in the case of an employment requiring the co-operation of several servants, to be enjoyed rather by the master than the individual servants. Without such co-operation the work which the master is supposed to have undertaken would, *ex hypothesi*, have been impossible. It may be conceded that the servants themselves also must profit by the arrangements in question, inasmuch as their admission to work in the concern carried on by the master is a condition precedent to their enjoying the opportunity of utilizing their manual or intellectual capacities. But the balance of the benefits received seems to be decidedly in favor of the master. If this is a correct account of the situation, it is clear that the master, and not the servants, should bear all the burdens that may be created by such occurrences as are normally incident to the co-operation of the servants in the undertaking. That it would be unreasonable to exclude from the class of occurrences thus described the occasional acts of negligence by which servants inflict injury upon each other can scarcely be denied. Indeed, this is virtually conceded by the courts which have adopted the phrase "ordinary risks" as a designation of the hazards which result from the ever-present contingency that such acts may be committed. The final step in the argument may not be quite so clear: but there is certainly no manifest impropriety in taking the position that this contingency should be treated as one of the drawbacks of the business, which should be borne by the master, as the party

to whom accrues the largest part of the advantage derived from the arrangements which render the contingency possible.[3]

If these views are correct, it is clear that not only does the doctrine of common employment rest upon a basis of hypothetical consequences which, as has been amply proved by events, do not follow in a large proportion of employments,—a proportion sufficiently large to justify the inference that the suggested consequences are purely imaginary,—but that it also contravenes a fundamental legal principle. That principle harmonizes so closely with the conditions which pervade the entire organic world that it may, without impropriety, be said to express in no ordinary sense a conception based on natural justice. Its weight, therefore, in respect to the present controversy may well be regarded as decisive.

476. Doctrine not applicable, where, at the time of the accident, the servant was not acting as such.—In an early case it was laid down that a master is not exempt from responsibility to his servant for an injury occasioned to him by the act of another servant, where the servant injured was not, at the time of the injury, acting in the service of his master; and that, in such a case, the servant injured is substantially a stranger, and entitled to all the privileges he would have had if he had not been a servant.[1] The circumstances under which this principle has been frequently applied by the courts are considered in chapter XXXIII., *post*.

If the delinquent servant was the person who, in respect to the negligence complained of, was not acting in the course of his employment, there can be no recovery, for the same reasons that prevent the maintenance of an action under similar circumstances by a stranger. See volume III. In such a case the master is exempted from liability on a ground which renders it unnecessary to take into account the doctrine of common employment.[2]

477. Doctrine not a material factor, unless negligence causing the injury is established.—(Compare § 536a, *post*.)—It is well settled that a servant cannot recover for injuries caused by the nonculpable act of a fellow servant.[1] This inability has been referred, in several

[3] The admirably lucid dissertation of Sir Frederick Pollock on employers' liability (Essays on Jurispr. p. 112) may fairly be said to represent the high-water mark of the attempts to obtain a rational foundation for the doctrine of common employment. But the learned author has omitted to deal with the particular aspect of the question which has been discussed in the text.

[1] *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 6 Railway Cas. 580.

[2] Thus, a natural-gas company is not liable for an injury to a servant from an explosion caused by the striking of a match by a fellow workman to light his pipe. *Allegheny Heating Co.* v. *Rohan* (1888) 118 Pa. 223, 11 Atl. 789.

[1] The risk of errors and mistakes by

of the cases in which it is recognized, to the conception that the hazard of such an act is one which is likely to happen in the ordinary course of the business.[2] But it is manifest that a more simple ground upon which to predicate the nonliability of the master under such circumstances is to be found in the consideration that, if the act which caused the injury was not a negligent one, the essential and primary condition precedent to the maintenance of the action is not satisfied.[3] If the evidence negatives culpability, there is obviously no occasion to proceed to the second stage of the investigation, which is concerned with the question whether the case is controlled by the general doctrine of common employment, or by one of its limitations. This obvious fact is sometimes lost sight of by trial courts.[4]

478. To what classes of acts the doctrine is applicable.—The general rule which is applicable to all cases except those in which the differentiating element is the fact that the negligent and injured servants were or were not engaged in different lines of work is that the defense of common employment is available whenever the negligent servant did the act complained of in his capacity of a servant, and not in his capacity of a representative of the master. Prima facie, every act done by a servant who is not a vice principal by virtue of his official position alone is regarded as being the act of a coservant.[1] Any attempt, therefore, which is made to subject the mas-

coservants in the performance of their duties is no less one of those assumed than the risk of essentially negligent acts. *Cole* v. *Rome, W. & O. R. Co.* (1893) 72 Hun, 467, 25 N. Y. Supp. 276.

[2] *Reusch* v. *Groetzinger* (1899) 192 Pa. 74, 43 Atl. 398 (injury caused by the manner—not alleged to be negligent—in which a fellow servant used his crowbar); *International & G. N. R. Co.* v. *Torrer* (1888) 72 Tex. 308, 11 S. W. 1043 (section hand injured while unloading rails, by act of fellow servant); *Glover* v. *Kansas City Bolt & Nut Co.* (1899) 153 Mo. 327, 55 S. W. 88 (servant injured by stumbling against a machine which the operator, whom he was assisting, had started just a couple of seconds before the accident).

A minor of sufficient age and intelligence to appreciate it assumes a risk so inseparable from the work of erecting a large building as that which arises from the possibility that some of the other workmen on the building may accidentally, or even carelessly, drop some object from the upper floors. *Lehmans* v. *Vogt & Bros. Mfg. Co.* (1893) 5 Misc. 330, 25 N. Y. Supp. 509.

[3] *Greenwald* v. *Marquette, H. & O. R. Co.* (1882) 49 Mich. 197, 13 N. W. 513, is an example of a case in which the right of a brakeman to recover for an injury caused by the act of a fireman was put upon this ground.

[4] See, for example, *Gartside Coal Co.* v. *Turk* (1891) 40 Ill. App. 22, holding that, where the evidence is conflicting as to whether the superior servant was guilty of any negligence contributing to the injury, it is error to instruct the jury that, if the plaintiff received his injury while endeavoring to comply with the superior servant's order, he is entitled to recover.

[1] Unless a superior servant is for general purposes, a vice principal, the consequence of his negligent orders is a risk as much assumed as those of his negligent acts. *Gulf, C. & S. F. R. Co.* v. *Blohn* (1889) 73 Tex. 637, 4 L. R. A. 764, 11 S. W. 867. See also §§ 515 *et seq.*, *post*.

Among the delinquencies which are

ter to liability for the defaults of a servant outside the category of vice principals thus indicated must take the form of a contention that, at the time the injury was inflicted, such servant was doing something which was incident to the performance of one of those duties of the master which are deemed to be personal and nonassignable. See chapters XXXI., XXXII., *post*.

Since the theory of an assumption of the risks of a fellow servant's negligence covers all kinds of acts, provided they were of the kind indicated at the beginning of this section, it is manifest that this defense is none the less available because the act in question was the direct result of the actor's unfitness for his position, and this unfitness was not known to the injured servant.[2]

The operation of the doctrine of common employment is in no way affected by the circumstance that the act of negligence committed by the fellow servant was one prohibited by law,[3] nor by the circumstance that, at the time the accident occurred, both the injured and the negligent servants were infringing the Sunday law.[4]

As it is the failure of a fellow servant to exercise reasonable care, and not his knowledge of a specific danger, that absolves the master from liability to a coemployee for injuries caused thereby, an instruction is erroneous which makes the applicability of the doctrine of common employment turn upon the fellow servant's knowledge of the conditions which became active for mischief as a result of what he did, and not upon his failure to exercise reasonable care.[5]

479. Defense not available where the dangerous conditions caused by the fellow servant's negligence were known to the master.—In some

independent of the particular functions of the servant, and which may be committed by any employee, is the failure to obey the specific directions of the master as to precautions calculated to secure the safety of his subordinates. *Anthony* v. *Leeret* (1887) 105 N. Y. 591, 12 N. E. 561 (trap door left open).

In one case it was said that a master is "not liable for the wilful misconduct of a fellow servant in making the place of work unsafe." *Healey* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 136, 37 Atl. 676.

The fact that his work was dangerous does not entitle an employee to recover for injuries due to the negligence of coemployees. *Craven* v. *Smith* (1894) 89 Wis. 119, 61 N. W. 317.

The rule as to coservice is applicable where any mistake is made by a fellow servant, whether through negligence or otherwise. *Bradbury* v. *Kingston Coal Co.* (1893) 157 Pa. 231, 27 Atl. 400.

[2] *Louisville & N. R. Co.* v. *Kelly* (1894) 11 C. C. A. 260, 24 U. S. App. 103, 63 Fed. 407, where it was held error to refuse an instruction that, if the plaintiff was injured either by the carelessness or unskilfulness of the delinquent servant, the company was not liable, if it had used due care in employing the latter. An objection based on the ground that the instruction assumed that the plaintiff knew of the coservant's want of skill before the accident was overruled.

[3] *Lundquist* v. *Duluth Street R. Co.* (1896) 65 Minn. 387, 67 N. W. 1006.

[4] *Houston & T. C. R. Co.* v. *Rider* (1881) 62 Tex. 267.

[5] *Levene* v. *Standard Oil Co.* (1899) 64 N. J. L. 63, 44 Atl. 847.

cases in which the doctrine was declared to be a bar to the action, the fact is adverted to that the master had no knowledge of the risks created by the coservant's negligence;[1] and it is evident that this ignorance, whether explicitly mentioned or not, is always an implied condition precedent to the availability of the defense. See chapter x., *ante*. On the other hand, the omission of the master to remedy the abnormal conditions or see that the servant was not, without his knowledge, exposed to them, constitutes an independent breach of duty on his part which, upon general principles, renders him personally liable, quite irrespective of the fact that the original cause of the dangerous conditions was the act of a coservant. See, generally, the chapters of the previous volume, in which the duties of employers are discussed.

480. — nor where negligence in selecting the coservant is shown.— The doctrine that a servant cannot maintain an action for injuries caused by the negligence of a coservant has always been conceded to be subject to an exception in cases where negligence on the master's part in employing or retaining in his employ the delinquent coservant is shown.[1]

It follows, therefore, that a declaration is not demurrable which alleges that the plaintiff was injured by an incompetent and careless coservant, whom the defendant then knew to be incompetent and careless; and that a plea to the effect that the servants whose negligence caused the injury were fit and competent persons to perform the duties in question is good against a special demurrer, based on the ground that it was merely an argumentative denial of the causes of action alleged;[3] and that an instruction which states, without qualification, that a servant assumes the risk of being injured by the man-

[1] *Cunningham* v. *Washington Mills Co.* (1891: Mass.) 26 N. E. 235; *Howd* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178; *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 74, 16 S. W. 924 (cars temporarily left on a side track, not such an obstruction as the company would be presumed to know of).

[1] This qualification of the doctrine was recognized in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 769. It has often been recognized in later decisions. See § 178, *ante*.

"All that can be required of the master in that regard is that his servants shall be prudently chosen, and that they shall not be retained in his service after unfitness or negligence has been discovered, and has been communicated to him." *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240.

[1] *Jenson* v. *Great Northern R. Co.* (1898) 72 Minn. 175, 75 N. W. 3.

[3] *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 6 Railway Cas. 580, 19 L. J. Exch. N. S. 296, "A master," said Alderson, B., "is not in general responsible to one servant for an injury occasioned to him by the negligence of a fellow-servant while they are acting in one common service, yet this must be taken with the qualification that the master shall have taken due care not to expose his servant to unreasonable risks. The servant, when he engages to run the risks of his service, including those arising from the negli-

ner in which a given appliance might be used by the coservant operating it, is erroneous, for the reason that it withdraws from the jury the question whether the master may not have been negligent as regards the employment of the servant.[4]

481. — nor where the wife of a servant is injured by the negligence of his coservants.— Where a married woman, not in the employment of her husband's master, is injured through the negligence of his fellow servants, an action by him for the consequential damages caused to him by the injury is not barred by the doctrine of coservice.[1] Still less will it bar the action of the married woman herself, when she is suing for her own benefit.[2]

It would seem that the analogy of the cases in which the defense

gence of fellow-servants, has a right to understand that the master has taken reasonable care to protect him from such risks by associating him only with persons of ordinary skill and care: and the object of the plea in this case is to show that the defendants had discharged this duty, the omission to discharge which might have made them responsible to the deceased."

[4] *Ryan* v. *Chicago & N. W. R. Co.* (1870) 60 Ill. 171, 14 Am. Rep. 32.

[1] In *Gannon* v. *Housatonic R. Co.* (1873) 112 Mass. 234, 17 Am. Rep. 82, Colt, J., said: "We are referred to no case where the rule which exempts the master from liability for injuries received through the negligence of a fellow-servant has been held to defeat the plaintiff's right to recover consequential damages for an injury to his wife. In the opinion of the court the rule is not to be so extended. The implied contract on the part of the servant by which he assumes the risk of the negligence of others has reference to those direct injuries to which he is exposed in the course of his employment. Those injuries which are incident to the nature of his employment he is presumed to have contempl .. and with reference to his exposure to them to have fixed the compensation agreed on. In other respects his relations to his employer remain unchanged. He may insist on the performance of all other duties, whether they are such as are imposed by him, or such as arise from independent contracts, express or implied. It is said that the general rule which exempts the master from liability to his servant has a tendency to insure the safety of the public by increasing his care and fidelity, and that the public policy of the rule is equally applicable here. But if it be conceded that this is the true foundation of the rule, its bearing is too remote to influence the result to which we come in this case."

[2] In *Campbell* v. *Harris* (1893) 4 Tex. Civ. App. 636, 23 S. W. 35, where the plaintiff's wife was injured while on one of the defendant's cars, by its permission and at the suggestion of its agent, under whose orders the husband was working, the court sustained the action, saying: "To deny the wife the right to recover damages for injuries resulting from the negligence of her husband's fellow servant is to bind her by a contract to which she is not a party. The wife is not bound by the husband's contract to assume all the risks of injury to his person resulting from the negligence of his fellow servants. The existence of the wife is not, with us, as at common law, merged in that of her husband. She has rights, and can maintain suit for their protection: and she can recover damages for wrongs done her, and the money recovered for such wrongs is not, as at common law, the exclusive property of the husband. And while it is true that the wife must generally sue in the name of her husband, he who has wronged her cannot justify under a contract made with her husband, to which she is in no wise a party. The husband, it is true, can by his contract convey the interest of the wife in the community estate, but we know of no law which would authorize the husband to make a contract binding upon the wife, which would exclude her from the right to recover for injuries to her person, inflicted by the wrong or negligence of another. The motion must be denied."

has been held to preclude a father from recovering for injuries received by a minor child in the service of the defendant (see § 488, *infra*), justifies the inference that a suit by the husband cannot be sustained, where the injured wife was herself a fellow employee of the person by whose negligence she was injured. But this point does not seem to have been determined by specific judicial authority.

482. Rule where a stranger is being sued for an injury partially caused by the injured servant's coemployees.— The right of action in cases where the action is brought against a stranger, and the defense is that the injury was partly caused by the negligence of the plaintiff's own fellow servants, is usually discussed with reference to the doctrine of imputed negligence, the accepted theory of late years being that the defense in question is not a bar to the action, for the reason that the negligent servant is not the agent of the injured servant in such a sense that the latter can be made responsible for the defaults of the former.[1] But a similar result has also been arrived at by reasoning which is quite similar to that employed in cases in which the availability of the defense of common employment is discussed.[2]

The existence of a right of action under these circumstances may also be deduced from the consideration that such cases come within

[1] *Adams* v. *Glasgow & S. W. R. Co.* (1875) 3 Sc. Sess. Cas. 3d series, § 215; *Chicago, St. P. & K. C. R. Co.* v. *Chambers* (1895) 15 C. C. A. 327, 32 U. S. App. 253, 68 Fed. 148; *Abbitt* v. *Lake Erie & W. R. Co.* (1895; Ind.) 40 N. E. 40; *Poor* v. *Sears* (1891) 154 Mass. 539, 28 N. E. 1046.

[2] In *Perry* v. *Lansing* (1879) 17 Hun, 34, where the pilot of a steamer, who was injured by its coming into collision with another steamer, owing to the negligence of both crews, was allowed to recover against the proprietor of the second steamer, we find the court saying: "The rule applicable, between servant and master, is well . . . The servant cannot recover of . . as . . injuries occasioned by a coserva. in the same general employment. That risk he assumes when he enters into the employment. But has this principle any application to an action for injuries against a third person not the master? Though the servant may not maintain an action against his master for an injury arising from the negligence of a fellow servant, does it follow that he may not have an action against a third person for an injury occasioned by such third person's negligence, because some co-servant has been guilty of negligence contributing to the injury? No such rule can be found so far as I have been able to discover. Between the master and servant there is an implied contract that the servant shall assume the risks of the employment. For this reason the liability does not exist. But there is no such relation between the servant and a stranger. As between them, the servant has not waived his remedy if a coservant has been guilty of contributory negligence. The proximate cause of the injury is the act of the stranger. Why should he be shielded from damages because some person, no way related to him, has failed to exercise the requisite care to prevent plaintiff's injury?"

In a Texas case it was held that the servant of a lessee railway company could not recover damages from the lessor company for injuries caused by the negligence of his own coservants, because (1) he took the risk of their negligence, and (2) because the lessor was not liable for the negligence of the lessee's servants.

See also *Schmidt* v. *Steinway & H. P. R. Co.* (1890) 55 Hun, 496, 8 N. Y. Supp. 664, 9 N. Y. Supp. 939 (evidence that the negligent servant was in the employment of the plaintiff's master, held to be immaterial).

the purview of the rule that a person whose negligence is an efficient cause of the injury complained of is not excused by the fact that the injury was partly caused by the negligence of a third party.[3]

483. Defense available against a servant beginning work after the commission of the negligent act.—That the operation of the doctrine is independent of the fact that the injured servant was not in the defendant's employ when the negligence of the fellow servant was committed, provided that negligence was still a potential source of injury at the time of the accident, is clear both on principle and authority.[1]

The new servant, that is to say, takes the risk of any existing negligence of his fellow servants, as well as that which may thereafter occur.[2]

483a. Ratification not inferred from retention of negligent servant.—The fact that a master retains a servant in his employment after an injury to a coservant by the former's negligence is not a rat-

[2] See *Busch* v. *Buffalo Creek R. Co.* (1883) 29 Hun, 112; *Ft. Worth & D. C. R. Co.* v. *Bell* (1893) 5 Tex. Civ. App. 28, 23 S. W. 922; *Chicago & A. R. Co.* v. *Harrington* (1901) 192 Ill. 9, 61 N. E. 622, Affirming (1900) 90 Ill. App. 638.

[1] In a leading English case it was held to be error to direct a jury that an employee in a mine, whose duty it was to see that it was properly ventilated, and another employee working in the mine, could not be fellow workmen if the imperfect system of ventilation which caused the death of the latter had been completed before he was hired. *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. Lord Chelmsford said: "There is a little want of accuracy here in the learned Judge's language. If the negligence imputed to Neish is to be taken to have occurred at the time of the completion of the system of ventilation, the deceased could not have then stood in the relation of a fellow workman, for he was not a workman at all. I suppose the learned Judge meant to tell the jury that if the negligence which occasioned the accident was finished and completed before the deceased entered the service, the question of fellow workman did not arise. But, assuming this to have been the direction, it was open to exception. If the platform in the Pyotshaw seam was originally of improper construction for the purpose of ventilation, there was undoubtedly a complete act of negligence on the part of Neish at the moment of its erection. But as he was bound to take care that sufficient ventilation was maintained during the whole time of the workings, as long as he omitted to do so he was guilty of negligence, which continued down to the time of the occurrence of the accident. It was therefore incorrect on the part of the learned Judge to confine the act of negligence to the one period of the completion of the system of ventilation, and thereby to conclude the question as to Neish and the deceased being fellow workmen when the accident happened."

In another case where the defense of coservice was sustained, the fact that the date of employment of an injured employee was a day or two subsequent to that of the employment of other men was held not to affect the question of the employer's liability for the imperfect manner in which apparatus to be used by the employees was erected by themselves. *Burns* v. *Bennett* (1893) 99 Cal. 363, 33 Pac. 916.

In another, it was laid down that the rule that an employee assumes the risk from the negligence of coemployees in constructing a scaffold applies even if the negligent act was done before his employment, where he knew, or by reason of his experience was chargeable with knowledge, that the scaffolding was erected by such coemployees. *Olsen* v. *Nixon* (1898) 61 N. J. L. 671, 40 Atl. 694.

[3] *Butler* v. *Townsend* (1891) 126 N. Y. 105, 26 N. E. 1017.

ification. The doctrine of ratification, if applicable at all as between a master and servant, is applicable only when a wilful injury is inflicted by the servant upon a coservant.[1] Manifestly, however, if the act which caused the injury was one which showed the delinquent to be incompetent for his position, the fact of his being retained is indicative of culpability on the master's part.

484. Application of the doctrine in the case of seamen.—In one case it was argued that, as the plaintiff was a seaman, bound to obey the orders of his superior officers and liable to punishment by law if he refused obedience, he was removed from the operation of the doctrine of common employment. This contention did not prevail, though the court suggested that the peculiar relations of the common seaman to his superior officers might relieve him from being charged with contributory negligence in obeying an order which exposed him to peril.[1] See § 302, subd. *c*, § 315, *ante*.

This rule also prevails in admiralty suits *in rem;* but under such circumstances the injured servant is entitled by the maritime law to be cared for at the expense of the ship, and to be paid his wages to the end of the voyage.[2]

485. — of pilots.—The English merchant shipping act (17 & 18 Vict.) chap. 104, subjects a pilot to a penalty if he refuses to take charge of a ship, requires the master under a penalty to employ the pilot, prescribes that the rate of remuneration is to be neither more nor less than the fixed rate, although both parties should so agree, and declares that the ship owner is not to be liable to the pilot as his servant. It has been held that a pilot hired under these provisions does not take upon himself the risk of injury from the negligence of the shipowner's servants, the reason assigned being that he must conduct the ship on the terms fixed by the statute, and is therefore not in the position of an ordinary servant who has, theoretically, "the power of choosing whether he will enter into the employment of a person who does not agree to act personally in the management of his business, or, as an alternative, to be responsible for the negligence of those he employs."[1]

486. — of persons performing forced labor.—Before the abolition of slavery in the United States it was held by two courts that the

[1] *Smith* v. *Sibley Mfg. Co.* (1890) 85 Ga. 333, 11 S. E. 616.

[1] *Olson* v. *Clyde* (1884) 32 Hun. 425. The cases cited in § 520, note 1, subd. q, *post*, in which the only question argued was whether the negligent and injured employees were coservants in the technical sense of the doctrine, are impliedly authorities to the same point.

[2] *The City of Alexandria* (1883) 17 Fed. 390.

[1] *Smith* v. *Steele* (1875) L. R. 10 Q.

doctrine was not applicable where the owner of a slave was suing for injuries received through the negligence of another person employed by the man to whom the services of the slave had been rented, the decision being based on the fact that the conditions of such a service were so entirely different from those under which a free employee is presumed to contract, that the reasons commonly given for the rule were not applicable.[1] By another court the defense was sustained in an action by a master for injuries to his slave.[2]

The only cases which, under modern social conditions, bear any analogy to those in which a slave was the injured person are those in which an accident occurs to a convict whose services have been hired from the state. In one such case it has been held that a chain-gang boss is not a fellow servant of a chain-gang prisoner, so as to relieve the employer of such gang of responsibility for the death of the latter caused by the negligence or wrongful act of the former.[3]

487. — of employees of public bodies.—The doctrine of common employment is a bar to the action of a servant of the state,[1] or of a municipal corporation.[2]

Such a servant is also entitled, under appropriate circumstances, to the benefit of the various limitations to which that doctrine is subject in the jurisdiction where the accident occurred. Thus, recovery is

B. 125, 44 L. J. Q. B. N. S. 60, 32 L. T. N. S. 195, 23 Week. Rep. 388, per Blackburn, J.

[1] *White* v. *Smith* (1860) 12 Rich. L. 595 (hired slave injured by free coemployee); *Scudder* v. *Woodbridge* (1846) 1 Ga. 197. In a Georgia case the latter decision was said to have been based upon the theory that slaves, from their status, were incapable of influencing their associate employees in the common business. *Cooper* v. *Mullins* (1860) 30 Ga. 146, 76 Am. Dec. 638.

[2] *Ponton* v. *Wilmington & W. R. Co.* (1858) 51 N. C. (6 Jones L.) 245. *Jones* v. *Glass* ( ) 13 Ir. Rep. 305, was distinguished on the ground that the overseer whose negligence caused the injury was the representative of his master, who was, therefore, liable for his acts in respect to the chattel hailed.

[3] *Boswell* v. *Barnhart* (1895) 96 Ga. 521, 23 S. E. 414. The court said: "The ground upon which a master is relieved from liability to a servant for injuries resulting from the negligence of a fellow servant is that the servant, when he enters the employment of the master, impliedly contracts to assume the risk of such negligence, as one of the risks incident to the service, and that his compensation is fixed with reference to this; and clearly this reason cannot apply in the case of one not voluntarily in the service, but merely a prisoner serving out his sentence for a violation of the law. Indeed, it can hardly be seriously contended that a chain-gang 'boss' is in any sense a fellow servant of a prisoner working under him. The 'boss,' while acting in that capacity, is the *alter ego* of his employer, and the latter is responsible for any wrongful or negligent acts on the part of such employee by which a prisoner is deprived of his life."

[1] *Loughlin* v. *State* (1887) 105 N. Y. 159, 11 N. E. 371.

[2] *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659 (conceded); *Dube* v. *Lewiston* (1891) 83 Me. 211, 22 Atl. 112 (applying the rule that a mere foreman is not a vice principal).

Many other cases in which this rule is taken for granted will be found in the following chapters.

allowed in cases where the negligent and injured servants were in different departments.[3]

See, generally, §§ 499–506, *post*.

488. — of minors.—*a. Generally.*—It is well settled that the mere fact of a servant's minority does not of itself preclude his master from relying on the defense of common employment.[1] In other words a master does not insure a minor servant against the consequences of a fellow servant's negligence.[2] But the authorities seem to leave it in some doubt, whether the availability of the defense is a rigid presumption of law, as in the case of adults, or merely a presumption of fact, subject to rebuttal by evidence showing that the servant did not comprehend the risk to which he was exposed, under the circumstances, by the possibility of a coservant's negligence.

In some decisions the language used is such that it is difficult to avoid the conclusion that the former of these theories was the one adopted.[3] In others an acceptance of the latter theory is more or less

[1] In *Turner* v. *Indianapolis* (1884) 96 Ind. 51, where a man engaged in driving the engineer of a fire department was injured by a defective street, the court said: "If the rule in any case can be made applicable to such officers and agents (*i. e.*, of municipal corporations), it cannot be made to apply when they are acting in entirely different departments of the municipal government. We cannot see wherein there is any coservice to be performed between members of the fire department and members of the street department, to which the rule could be applied to the case under consideration. A member of the fire department has no servitude connection whatever with the repairing of the streets, or the removal of obstructions therefrom, and we do not think he can in any sense be called a coservant with the street commissioner or any other officer or agent of the city having charge of the streets. They are, to each other, in so far as servitude is concerned, entire strangers, and a fireman, in assuming the duties of his position, takes upon himself no risks arising out of the negligence of those in charge of the streets."

A similar decision as regards a similar accident was rendered in *Coots* v. *Detroit* (1889) 75 Mich. 628, 5 L. R. A. 315, 43 N. W. 17. The point of view, in the judgment of Morse, J., seems to be the same as that in the Indiana case just cited. Champlin, J., based his conclusion on the ground that the relation of master and servant did not exist between the city and the employees of the fire department, and that the engineer was therefore one of the general public, so far as his right of action was concerned.

[1] This doctrine is taken for granted in all the numerous cases in which minors have been held unable to recover, and has been expressly affirmed in *Fisk* v. *Central P. R. Co.* (1887) 72 Cal. 38, 13 Pac. 144.

[2] *Houston & G. N. R. Co.* v. *Miller* (1879) 51 Tex. 270.

[3] In what is apparently the earliest decision bearing on the subject, it was held down that the fact that the injured servant was a minor did not at all affect his legal rights. *King* v. *Boston & W. R. Corp.* (1851) 9 Cush. 112.

In another case, in which a boy of eleven was thrown off a horse attached to a corn cutter, it was held error to give an instruction from which the jury would infer that a recovery might be had even though the injury was the sole result of a coemployee's negligence, and another instruction to the effect that the jury were to determine whether the accident was caused by the negligence of a fellow servant, but that this question did not arise, if it was found that the work was dangerous, and that the plaintiff did not comprehend the danger. *Crocker* v. *Smith* (1891) 80 Wis. 119, 61 N. W. 817.

In another, where a boy engaged in turning switches in a mine was run

strongly indicated by the phraseology of the opinion.[4] In others the servant's appreciation of the risk was a necessary inference from the testimony, and is referred to by the court; but it is not apparent whether this circumstance was actually viewed as a differentiating factor, the absence of which would have enabled the servant to maintain the action.[5]

over owing to the carelessness of coservants in operating a car, the court denied recovery, saying that it did not matter what his age was. *Harris* v. *McNamara* (1892) 97 Ala. 181, 12 So. 103.

A similar point of view is probably discernible in *Heffernon* v. *Northern P. R. Co.* (1891) 45 Minn. 471, 48 N. W. 1; *Jones* v. *Phillips* (1882) 39 Ark. 17, 43 Am. Rep. 263; *Pittsburgh, C. & St. L. R. Co.* v. *Adams* (1885) 105 Ind. 151, 5 N. E. 187; and the cases cited in notes 1 and 2, *supra*.

In two Illinois cases it has been laid down in unqualified terms that an infant is subject to the rule regarding coservice as long as he abstains from exercising his right to avoid the contract of employment. *Garland* v. *Toledo, W. & W. R. Co.* (1873) 67 Ill. 498; *North Chicago Rolling Mills Co.* v. *Benson* (1895) 18 Ill. App. 194.

In the former case the court said: "It is not denied that an express contract made with a minor is valid at his option. It is not void, but voidable only. The express contract by the minor in this case was to serve his employer on a railroad. So long as he did not avoid that contract, but remained in the employment of the railroad company, he was of necessity subject to all the hazards attending that kind of employment, one of which was the negligence of his fellow servants in the same line of duty. The minor, by so entering into this employment, came under the general rule prevailing, not only in this court, but in almost all the courts of the several states and in England, and took upon himself the natural and ordinary risks and perils incident to the service in which he engaged, among which was the carelessness of his fellow servants." See, however, the Illinois case cited in note 4, *infra*.

[4] In *Jones* v. *Florence Min. Co.* (1886) 66 Wis. 268, 57 Am. Rep. 269, 28 N. W. 207, the court, referring to the contention of counsel that infancy and inexperience do not modify the rule as to fellow servants, said that this statement only holds good when it appears that such employee has been properly instructed by his employer as to the dangers of his employment, or has acquired knowledge of such dangers from other sources. See, however, the Wisconsin case cited in note 3, *supra*.

In *De Graff* v. *New York C. & H. R. R. Co.* (1877) 76 N. Y. 125, the court recognized the rule that a minor assumes the risks of a fellow servant's negligence, but intimated that, if a child of unsuitable age should be employed in a hazardous business, or exposed to unsuitable risks, a different question might be presented.

In *Hinckley* v. *Horazdovsky* (1890) 133 Ill. 359, 8 L. R. A. 490, 24 N. E. 421, where a boy of twelve was injured while cleaning machinery in motion, the court held it error to charge the jury, without qualification, that, if they believed from the evidence that the plaintiff was injured by following the direction, or through the carelessness, of the fellow servant named, he could not recover, and said: "The reason why the common master is held liable for an injury caused by the negligence of a fellow servant is that it is one of the ordinary risks of the employment. But if the injured employee is a child, incapable of comprehending that risk, the rule ought not to apply."

In *Hamilton* v. *Galveston, H. & S. A. R. Co.* (1881) 53 Tex. 556, the following language was used: "The employment of a boy only fifteen years of age in the hazardous position of brakeman if without the consent of his mother and only parent, was a wrong done to that mother, and unless the boy had sufficient discretion to comprehend and guard against the dangers of the employment, when fully explained to him, as they should have been by the employer, such a contract would not place him in the position of an employee, or preclude a recovery for injuries suffered from the negligence of a coemployee."

[5] *Curran* v. *Merchants' Mfg. Co.* (1881) 130 Mass. 374, 39 Am. Rep. 457 (boy fourteen years old, who had cleaned machinery two years and a half in a

The theory which would permit a minor servant to recover in any case where it is not an inference in point of law from the testimony that he understood the risks to which he was exposed in the given employment, as a result of his being required to work in company with other employees, seems to be the more conformable to the general principle explained in § 291, *ante*. That the defense of common employment is not a bar to the action if the minor was injured in consequence of his compliance with the order of a superior to undertake new duties is well settled. See § 465, *ante*.

b. In actions by a parent for loss of services.—The defense of common employment is available as a bar to an action by a minor's parent for loss of services resulting from an injury caused by the negligence of a fellow servant of the minor.[6]

489. Master not liable to his servant for injuries caused by the negligence of servants of a stranger.— In two cases it has been held that the servant of a railway company assumes, as one of the ordinary perils of his employment, the risk of injury through the negligence of the servants of another company which is operating trains upon the same line under a lease.[1] But it is not apparent why the doctrine of assumption of risks should have been invoked at all under such circumstances. The fact that the defendant did not control, and had no power to discharge the negligent persons, was of itself a sufficient ground for declaring the action to be not maintainable.[2]

490. Common employment not a defense to an action against a third

mill, was injured by a fellow servant's carelessly starting the machinery while he was cleaning it). *Greenwald* v. *Marquette, H. & O. R. Co.* (1882) 49 Mich. 197, 13 N. W. 513 (brakeman, only seventeen years old, but experienced and competent, was run over); *Brazil C. Coal Co.* v. *Cain* (1884) 98 Ind. 282 (minor of nineteen injured by fall of unpropped roof of tunnel); *Evansville & R. R. Co.* v. *Henderson* (1893) 134 Ind. 636, 33 N. E. 1021 (minor of nineteen killed owing to train being run at excessive speed); *Hefferen* v. *Northern P. R. Co.* (1891) 45 Minn. 471, 48 N. W. 1 (side-rod used for cutting rails had become so battered that fragments were obviously liable to fly off when it was struck).

[6] *Ohio & M. R. Co.* v. *Hammersley* (1867) 28 Ind. 371; *Shields* v. *Yonge* (1854) 15 Ga. 349, 60 Am. Dec. 698. *Augusta Factory* v. *Barnes* (1884) 72 Ga. 217, 53 Am. Rep. 838.

[1] *Clark* v. *Chicago, R. & Q. R. Co.* (1879) 92 Ill. 43, followed in *Bauer* v. *St. Louis, I. M. & S. R. Co.* (1885) 46 Ark. 388.

[2] In one of the earlier Scotch cases it was held that, if a railway company leaves to the servants of another company using the same station the duty of carrying and placing articles on that part of the platform occupied by the former company, and looks no more after those articles, the former company makes those persons its servants, and is liable for their negligence causing injury to one of its own employees. *Hill* v. *Caledonian R. Co.* (1855) 17 Sc. Sess. Cas. 2d series, 569. It would seem that the court regarded the servants of the second company as discharging what would now be termed an absolute or non-delegable duty. But on the facts it is clear that the injury would, according to the more modern theory, be treated as one caused by negligence in carrying out the details of the work. See chapter XXXII., *post*. The decision doubtless reflects the

person to recover for his servant's negligence.— In cases where a third person is sued for injuries caused by the negligence of his servants, it is considered that the fact of their having been, at the time of the accident, engaged in the same general operation as the injured servant, is not a sufficient ground for putting him upon a footing different from that upon which any other stranger would stand in an action against the same defendant for injuries caused by the negligence of his servants. That is to say, as the mere general knowledge that the servants of a person with whom a stranger is brought into contact in the transaction of everyday life may act negligently has never been considered to involve the corollary that the latter accepted the risks of the situation, so the rule is now well settled, both in this country and in England, that "unless the person sought to be rendered liable for the negligence of his servant can show that the person seeking to make him liable was himself in his service, the common employment is not open to him."[1] In brief, the doctrine of common employment "applies only where the negligence is by one of an injury to a servant or agent against the principal by whom that servant was himself employed."[2]

original views of the Scotch courts which were adverse to the adoption of the doctrine of common employment.

[1] *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97, 55 J. P. 644, 61 L. J. Q. B. N. S. 90, 40 Week. Rep. 405, Reversing (1889) L. R. 23 Q. B. Div. 508, 58 L. J. Q. B. N. S. 581, 38 Week. Rep. 119. The decision in *Wiggett* v. *Fox* (1856) 11 Exch. 832, 25 L. J. Exch. N. S. 188, 2 Jur. N. S. 955, was disapproved in so far as it might be held to have countenanced a different doctrine, but was explained as being intended to rest upon the ground that the control exercised by the defendant over the plaintiff was such as to make the latter his servant. *Woodhead* v. *Gartness Min. Co.* (1877) 4 Sc. Sess. Cas. 4th series, 469 (see note t, *infra*), in which it had been categorically held that, in cases of common employment under different masters, each master is exempt from liability for injuries inflicted upon the workmen of other masters by the negligence of his servants, was overruled.

Inderman v. *Dames* (1856) L. R. 1 C. P. 274, 35 L. J. C. P. N. S. 184, 12 Jur. N. S. 432, 14 L. T. N. S. 484, 14 Week. Rep. 586, 1 Hurl. & R. 243, has also been said to have decided that, as between the owner of machinery and those who are sent by their masters to repair it, there is no implied contract that the workmen so sent take upon themselves the risk of injury from the negligence of the servants of the owner of the machinery. Blackburn, J., in *Smith* v. *Steele* (1875) L. R. 10 Q. B. 125, 44 L. J. Q. B. N. S. 60, 32 L. T. N. S. 195, 23 Week. Rep. 388.

Smith v. *New York & H. R. Co.* (1859) 19 N. Y. 127, 75 Am. Dec. 305, per Selden, J.

This principle was first noticed by Chief Justice Shaw *arguendo* in the leading case of *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339, though not explicitly ruled upon. Since then it has been assumed, or formally stated, in a very large number of cases. As the question upon which nearly all these really turn is whether the relation of master and servant did, as a matter of evidence, exist between the plaintiff and the defendant, as well as between the defendant and the negligent servant, they will more appropriately be reviewed in the chapter which deals with that question. See volume III., *post*. In the present connection it will be sufficient to cite the following: *Chicago, St. P. & K. C. R. Co.* v. *Chambers* (1895) 15 C. C. A. 327, 32 U. S. App. 253, 68 Fed. 148; *Cleveland, C. C.*

The rationale of this rule is that a defense which, as already shown (§§ 472, 473, *ante*), is based upon the hypothesis that, as accessory to the contract of hiring, there is implied on the servant's part an agreement to assume the risk of being injured by the negligence of his co-employees, cannot properly be invoked, where he is suing a person with whom he has no contractual relations.[3]

& St. L., R. Co. v. *Kernochan* (1896) 55 Ohio St. 306, 45 N. E. 531; *Poor* v. *Sears* (1891) 154 Mass. 539, 28 N. E. 1046; *Morgan* v. *Smith* (1893) 159 Mass. 570, 35 N. E. 101; *Reagan* v. *Casey* (1894) 160 Mass. 374, 36 N. E. 58; *Swanson* v. *Atlantic Mail S. S. Co.* (1871) 57 N. Y. 108; *Gregory* v. *Hill* (1859) 8 Sc. Sess. Cas. 3d series, 282; *Swainson* v. *North-Eastern R. Co.* (1878) L. R. 3 Exch. Div. 341, 47 L. J. Exch. N. S. 372, 38 L. T. N. S. 201, 26 Week. Rep. 413; *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119; *Union P. R. Co.* v. *Billeter* (1890) 28 Neb. 422, 44 N. W. 483; *Northern P. R. Co.* v. *Croft* (1895) 16 C. C. A. 175, 29 U. S. App. 687, 69 Fed. 124; *Zeigler* v. *Danbury & N. R. Co.* (1885) 52 Conn. 543; *Stewart* v. *Harvard College* (1866) 12 Allen, 58; *Swanson* v. *Atlantic Mail S. S. Co.* (1871) 1 Jones & S. 277, Affirmed in (1874) 57 N. Y. 108; *Kostl* v. *Wabash R. Co.* (1897) 114 Mich. 53, 72 N. W. 28; *Vary* v. *New York, O. & W. R. Co.* (1890) 29 N. Y. S. R. 630, 9 N. Y. Supp. 153.

By an oversight, cases of this type have sometimes been decided upon principles which are irrelevant until it has been decided that a common employment exists within the meaning of the doctrine stated in the text. Thus, in *Martin* v. *Louisville & N. R. Co.* (1894) 95 Ky. 612, 26 S. W. 801, the grounds on which it was held that the engineer of a train belonging to one company was not a fellow servant with a brakeman upon a train of another company, injured by the former's negligence, were (1) that they were in different grades of the service, and (2) that they were on different trains. As the case was plainly concluded in the plaintiff's favor by the fact that he and the negligent employee were not controlled by the same master, the consideration of the points here made was superfluous and erroneous.

In a recent New York case it was attempted to hold the owner of a building responsible for injuries received by a servant of one of the contractors engaged in making repairs and additions, owing to the negligence of the servants of another of the contractors in so placing the door of a vault before its completion, that it was liable to fall down upon him. *Murphy* v. *Altman* (1898) 28 App. Div. 472, 51 N. Y. Supp. 106. But it was held that whatever remedy the injured person might have must be sought from the employer of the negligent persons, and that the risk in question was one manifestly incident to the work.

The English employers' liability act of 1880 (see chapter XXXVII., *post*), being intended merely to remove a defense which is based on the assumption that the relation of master and servant exists between the plaintiff and defendant, has no application to a case where that relation does not exist, as between the employer of a contractor and the contractor's servants. *Robertson* v. *Russell* (1885) 12 Sc. Sess. Cas. 4th series, 634.

[3] In *Swainson* v. *North-Eastern R. Co.* (1878) L. R. 3 Exch. Div. 348, 47 L. J. Exch. N. S. 372, 38 L. T. N. S. 201, 26 Week. Rep. 413, Lord Bramwell said: "We must consider what obligations a servant takes upon himself. It is sometimes said that he contracts to take upon himself the risks of his service; but the proposition may also be stated as follows, namely, that he has not stipulated for a right of action against his master if he sustains damage from the negligence of a fellow servant. The two forms of the proposition seem to me substantially the same; in either case it is necessary to prove that a relation has been established between the person who complains and the master of the person who does the injury."

This passage was referred to with approval by Lord Herschell in *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97, 55 J. P. 644, 61 L. J. Q. B. N. S. 90, 40 Week. Rep. 405, whose point of view is further indicated by the following extract from his opinion: "It is obvious that, if the exception [*i. e.*, that created by the doctrine of common employment] results, as it does

For the purposes of the rule a workman who, at the time of the accident, did not know that he had temporarily passed into the service

according to the authorities I have cited, from the injured person having undertaken, as between himself and the person he sues, to bear the risks of his fellow servants' negligence, it can never be applicable when there is no relation between the parties from which such an undertaking can be implied. There are other considerations which point in the same direction. It must be remembered that whilst a servant contracts with his master to bear the risks of the negligence of his fellow servants, there is, as has been more than once laid down, a corresponding duty on the part of the employer to take due care to select competent servants. And it would be most unreasonable to hold that he is exempt from liability for his servant's negligence in any case where he is not under this obligation. But I do not see how such an obligation can arise otherwise than from some contractual relation. The obligation and the exemption appear to me to be correlative, and to be implied from the relation of master and servant created between the parties."

In the same case Lord Watson stated his views as follows: "I am also unable to assent to the legal doctrine which found favor with the divisional court, and was pressed upon us in the argument for the respondents. I do not agree with Baron Pollock, that the rule which exempts a master from liability to his servant for injuries negligently occasioned by a fellow servant in the course of their common employment rests upon the absence of an implied contract by the master to recoup such damage. The master's responsibility for his servant's acts has its origin in the maxim, *Qui facit per alium facit per se*, which has been construed as inferring his liability for what is negligently done by the servant acting within the scope of his employment. The immunity extended to a master in the case of injuries caused to each other by his servants whilst they are working for him to a common end is an exception from the general rule, and rests upon an implied undertaking by the servant to bear the risks arising from the possible negligence of a fellow servant who has been selected with due care by his master."

The following passages from the dissenting opinion in the Scotch case of *Woodhead* v. *Gartness Min. Co.* (1877) 4 Sc. Sess. Cas. 4th series, 469, are also worthy of notice, since, as already mentioned in note 1, *supra*, the judgment of the majority of the court was overruled by the House of Lords: "When servants work under the same master, they are working in one interest, and for the benefit of the same man. They are appointed and paid by the same man, and the same man is responsible for them. I take it that this element in a common contract of service lies at the root of the exception based on it. The same person is responsible for the conduct of the servants towards third parties, and he is also responsible to his own servants that each shall be chosen with reasonable care. In common service each servant represents the same master. But when two persons enter into a contract for the execution of work to be done either by the servants of both or by the servants of one, there is no such identity of relations or interest. Each party to the contract is liable for his own servants, but he is not liable for the servants of the other. The servants of each work for the interest of their own master, and represent him only. As neither selects the servants of the other, neither can have any responsibility as to their qualifications. And thus it is fixed, first, that neither is liable for the neglect of the servant of the other party to the contract, and, secondly, that each is liable for the neglect of his own servant if the servant of the other is thereby injured. . . . When two persons enter into a mutual independent engagement that a certain operation shall be performed either by both jointly, or by one on the premises of the other, and that for a valuable consideration, neither can complain against the other of the accidental consequences of the act, for they have both agreed that it shall be done. But each is bound to the other that his part of the contract shall be carefully and skilfully performed, and is, of course, liable for negligent and unskilful performance; and this liability is incurred to everyone who is lawfully engaged in the execution of the contract for the behoof of the other party to it. The negligence of one of the parties to the contract in its execution is not an incident of the contract, but a breach of it. The law on this head is clearly settled."

The American cases are to the same effect.

"The ground of exemption of the master in all these cases (*i. e.*, where the servant is suing his own master) is the privity of the contract between him and the person injured, from which the law presumes an agreement between them, for a compensation equal to the risk or peril of the service. If, therefore, the plaintiff in this case was not, in any legal sense, the servant or employee of the defendants, but was the servant or employee of another, and there was no privity between him and the defendants, the decisions referred to do not apply, and the defendants must be liable, upon the general rule, to the plaintiff, the same as to any other stranger. The defendants can claim no benefit or exemption from a contract made between the plaintiff and another party, whatever risks he may have assumed, as between himself and his employer." *Young* v. *New York C. R. Co.* (1859) 30 Barb. 229.

"The general rule is responsibility by the master for the negligence of his servant in the performance of his work from which injury results to another. This liability does not arise from contract, but springs from a breach of that duty which each member of the community owes to each other member. It may, it is true, be limited by contract; and where one enters into the service of another the contract of service is held to imply a release, under certain circumstances, of responsibility by the master for the negligence of fellow servants. But what room is there for the application of this rule as between parties who do not stand in any contractual relation? Or why should a fanciful and imaginary contract be made and supplied by the courts to relieve from liability? That an occupation is dangerous does not make it unlawful; nor is negligence lawful because occurring in a dangerous enterprise. If my business calls me to cross a dangerously crowded street, the circumstances under which I am placed demand a greater care and the exercise of greater watchfulness to avoid danger, failing in which I may be denied an action against another who has also been guilty of the same negligence. But suppose I do exercise all the prudence which my situation requires? Shall I then, who am innocent, be ridden down by one who is negligent, and when appealing to the law for redress be answered that I took the chances of injury? And if I may recover against the person by whom the injury is inflicted, why may I not hold to a like responsibility him whose servant inflicted it? It devolves upon those who advance this view to show some rule of law which relieves the master of the negligent servant, and if any such rule exists it has not been pointed out in a single case to which we have been referred. We understand the law to be that one who engages in a dangerous enterprise assumes the risk of such injuries as he may receive provided they are not caused by the negligent, and therefore unlawful, act of another. But dangerous occupations demand a correlatively greater care on the part of all persons engaged in them, and one guilty of a want of that care which the law imposes on him, and resulting in injury to an innocent person, cannot escape the obligation of making reparation to the innocent by showing that the service in which he was engaged was in itself of a dangerous character, for *non constat* that the injury would have resulted in the dangerous service if the defendant himself had used that care which the very danger required him to observe. But it is said, by engaging in a common work the servants of the employer and those of an independent contractor, or the servants of two independent contractors, become fellow servants. This is a pure, simple, and arbitrary assertion; a fanciful doctrine, invented to subserve some supposed public policy or to limit the operation of a well-recognized rule which judges have thought in particular cases it would result in some hardship to enforce. Suppose the plaintiff, Conroy, had gone to the defendant company and said to it: 'Your engineer is a careless and negligent man; I am unwilling to serve with him, and I ask you to discharge him?' Would not the reply have been 'We have nothing to do with you; we did not engage you; we cannot discharge you; you are not liable under any contract to us; we are not responsible for you nor to you?' The plaintiff would then have gone to McDonald, who had employed him, and made the same complaint. McDonald would have replied, and properly, 'I have nothing to do with the engineer; I did not select him; I cannot discharge him; I do not control him; I am not responsible for him.' The relationship seems to begin just where the master invokes it for his protection, and ends just where the servant invokes it for his

of the party from whom he is seeking an indemnity, is put upon the same footing as one who had always remained outside that service.[4]

491. Discussion of this rule.— The principle established by the cases cited in the last section may fairly be described as an arbitrary limitation upon a rule which is itself based on nothing more substantial than a purely fictitious implication. Considering the intolerable amount of injustice produced by the defense of common employment, it is far from being a subject of regret that the courts should have restricted that defense to cases where the negligent and the injured servants are hired by the same master. But it is impossible to deny that the situation would logically be far more satisfactory if the exception thus ingrafted on the main doctrine had been referred immediately to what seems to be, in the last resort, the only solid foundation which can be suggested for the doctrine itself, *viz.*, public policy. See § 473, *supra*. Even supposing that the theory of an implied agreement is inapplicable, simply and solely because the action is one between a plaintiff and a defendant between whom there is no privity of contract, there are no apparent reasons, apart from such as may be deduced from public policy, why the principle expressed in the maxim, *Volenti non fit injuria*, should not be allowed, under appropriate circumstances, to constitute a valid defense. It is a manifest inconsistency to allow that principle to operate as a bar in such cases as *Woodley* v. *Metropolitan Dist. R. Co.*[1], and to deny it that effect where the risk is as obvious as it was in *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97, 55 J. P. 644, 61 L. J. Q. B. N. S. 90,

It has no foundation in justice, reason, or the analogies of the law; it screens the guilty and denies to the innocent reparation for unlawful injury." *Louisville, N. O. & T. R. Co.* v. *Conroy* (1886) 63 Miss. 562, 56 Am. Rep. 835.

In *Zeigler* v. *Danbury & N. R. Co.* (1885) 52 Conn. 543, where it was contended that the servants of two railway companies used the same line, the court said: "No consideration of public policy will sustain this defense, because the public are not at all interested in the question as they are in questions concerning inn-keepers and common carriers. They are only interested to have the law justly and fairly administered. No considerations of justice will sustain it, because the plaintiff had no relation whatever to the negligent conductor. It was not his duty to observe his conduct, he had no opportunity to do so, and no opportunity to guard against the consequences of his negligence."

In Illinois the reason assigned for denying that the doctrine applicable to cases in which one servant is injured by the negligence of a coservant has any pertinence where the action is against a person other than the common employer of the two servants, is that, if the injury was caused by the coservant, that is simply equivalent to saying that he was not injured by the negligence of the defendant. *Chicago & E. I. R. Co.* v. *O'Connor* (1887) 119 Ill. 586, 9 N. E. 263. To the same effect, see *Pennsylvania Co.* v. *Backes* (1890) 133 Ill. 255, 24 N. E. 563 (servant of mill company loading freight on cars of railroad company), denying the significance, in this connection, of the fact that one of the risks of his employment was exposure to such injury.

[4] *Morgan* v. *Smith* (1893) 159 Mass. 570, 35 N. E. 101.

[1] (1877) L. R. 2 Exch. Div. 384, 46 L. J. Exch. N. S. 521 (see § 376, *ante*).

40 Week. Rep. 405, Reversing [1889] L. R. 23 Q. B. Div. 508, 58 L. J. Q. B. N. S. 581, 38 Week. Rep. 119 (see last section, note 1), and in similar cases. In fact it seems to be not an unreasonable supposition that the principle now under discussion could hardly have been adopted in its present form, as a peremptory rule of law, if due account had been taken by the courts of the effect of the maxim, *Volenti non fit injuria*. The narrow ground taken is that, to let in the defense of common employment, there must be, not only a common employment, but a common master, and the language of the judges shows quite clearly that it has resulted from dealing with the assumption of risks, solely from the standpoint of an implied contract, and ignoring the possible applicability of the maxim which is obviously suggested by most cases of this type, inasmuch as the servant, whenever he is exposed to danger from this source, can scarcely ever be unaware of the fact. Here there is no difficulty in conceding that no implied undertaking to learn the risks arising from the negligence of the servants of the person can be imputed to an employee whose only contractual relations are with another person. But unless the pertinence of the maxim in such cases is to be wholly denied,—and there is no apparent reason why it should be,—the consideration relied upon is not necessarily conclusive. As long as cases like *Woodley* v. *Metropolitan Dist. R. Co.*[2] where the wider rule embodied in the maxim was permitted to defeat the action of a contractor's servant who claimed damages from the contractor's principal, the reason assigned being that the plaintiff continued to work with a full knowledge of the dangers to which he was exposed, are not explicitly disapproved, the law stands in this curious position—that, where a servant is injured by the negligence of one who, though a stranger, stands in such a relation to the servant's master that his negligence will not improbably augment the risks of the employment, the defendant is at least entitled to go to the jury on the issue whether the plaintiff's action is barred for the reason that he fully appreciated the perils to which the possibility of such negligence exposed him; while, on the other hand, it is a rigid rule that the most complete appreciation of the danger to which he is exposed by the negligence of the employees of that stranger will not debar him from recovering damages for injuries caused by the negligence of one of them. How little there really is to choose, upon purely logical grounds, between the accepted and rejected doctrines is shown in a very striking manner from the

[2] (1877) L. R. 2 Exch. Div. 384, 46 L. J. Exch. N. S. 521.

subjoined extracts from the opinions of eminent English and Scotch judges.[3]

[3] In *Johnson* v. *Lindsay* (1889) L. R. 23 Q. B. Div. 508, 518, 58 L. J. Q. B. N. S. 581, 38 Week. Rep. 119, Fry, L. J., whose views differed from those of the other members of the court of appeal, but were those which prevailed in the House of Lords (see above), propounded the question, "What is the duty of a master who does not personally execute the work towards a workman not in his employ, but who, as the servant of another master, is to take part in the common enterprise?"—and proceeded thus: "I know of no authority which answers that question. But I find that in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 332, 19 L. T. N. S. 30, Lord Cairns has indicated a difference between the duty of a master to the general public and to a servant. In the case of the workman there is the element of free will; in the public there is not. Lord Cairns says (at p. 332): 'At all events a servant may choose for himself between serving a master who does, and one who does not, attend in person to his business.' So, a man may choose between taking part in an enterprise in which there is the co-operation of masters who employ servants, and not taking part in such enterprise. If he do voluntarily take part in such an enterprise he cannot complain of the master who does all he can, who chooses competent servants, and supplies them with fitting materials and appliances. This view would have presented itself to me if there had been no decisions before me but *Wilson* v. *Merry*. But it is, so far as I know, to be found in no other authority, and it is obvious that to adopt it would have far-reaching consequences, and would, I think, overrule some old cases, such as *Bland* v. *Ross* (1860) 14 Moore, P. C. C. 210, Lush. 231. I do not, therefore, feel at liberty to adopt it."

In *Gregory* v. *Hill* (1869) 8 Sc. Sess. Cas. 3d series, 282, it was argued that the defense based on common employment should, on principle, be applied to circumstances where, though the parties are not fellow servants, their work is such that risk from injury to one from the negligence of the other is a natural and necessary consequence of the employment. This contention did not prevail, as the court felt itself bound by the authorities, and therefore not in a position to settle the question on purely scientific grounds. But the following extract from the opinion of Lord Moncrieff indicates clearly the trend of judicial thought in Scotland at that time. "In this case, the plea of the defender entirely repudiates the idea of contract between master and servant, as the ground of immunity. He says that the rule does not rest on an implied contract on the part of the servant, but on a wider principle, which renders the master in a much larger class of cases only liable for his own acts, and the selection of proper persons to do the work. Whatever I may think of the ground on which the rule has been rested, or however willing I might be to see the exemption of the master placed on a more general footing, I can find no authority which has laid down any such rule for our guidance. It might have been sounder to measure the liability of the master by the proper legal incident of his own position rather than by an artificial and rather fanciful implication of a tacit contract, which hardly affords a solid foundation for the result deduced from it. That a workman undertakes the risks of the employment is only true in the sense in which it is true that everyone who contracts takes the ordinary risks incident to the fulfilment of his contract. He does not thereby engage to liberate others from their legal liability to him. He does not engage to free the master from the consequences of his own neglect, nor is it easy to see why he should be supposed to intend to liberate him from the consequences of acts which the law assumes to be his. It is true also of the master in his contract with his workmen; and he who employs twenty workmen may be justly said to know and take the risk of his liability for the negligence of each of them. That is truly an ordinary risk of the employment of laborers. But under color of the phrase an "ordinary risk" there has been spelt out of the contract of service a special contract of liberation or indemnity under which the workman is held not so much to undertake a risk as to free from responsibility those whom otherwise the law would have made liable to him. But the more artificial the rule, the more necessary it is that we should strictly adhere to it; and if we were once to decide that this implied

491a. Rule where an independent contractor is suing the contractee.— In one colonial case it has been held that the fact of a workman's being an independent contractor does not make him any the less a coservant, in the technical sense, of those who are working for

contract was not the foundation of the rule, I do not see that we could stop short of what would be a more scientific rule, liberating the master in all cases in which he had been guilty of no personal neglect."

Eight years later came *Woodhead* v. *Gartness Min. Co.* (1877) 4 Sc. Sess. Cas. 4th series, 469, overruled by *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97, 55 J. P. 644, 61 L. J. Q. B. N. S. 90, 40 Week. Rep. 405 (§ 190, note 1, *supra*), and in the interval the judges had gathered sufficient courage to disregard the authorities and treat the question upon what they deemed a rational basis. The considerations which led the court to the conclusion that, in cases where the servants of different masters are co-operating in the execution of the same work, each master is exempt from responsibility for injuries inflicted upon the servants of other masters by the negligence of his servants, will be apparent from the following extracts from the opinions:

"As a result of the whole of the authorities," said Lord Ingles, "it appears to me that one of the conditions subject to which every man must become a member of one of these great organizations (for mining or manufacturing purposes) is that he shall take on himself all the perils naturally incident to the work he undertakes without looking to anyone else to guarantee him against or indemnify him for injury sustained from the occurrence of such peril. This does not interfere with the principle of personal liability for the consequences of personal wrong or negligence, but it excludes all notions of what, for the sake of distinction, I shall call secondary responsibility. . . . If two miners are employed and paid by the same master, and, while they are hewing at one working face, the one by negligence injures the other, the master is not answerable because it is said they are engaged in a common employment that is to say, they are engaged in the same work as servants of the same master. But if the legal principle were applicable to this case only, it would cease to be a principle, and degenerate into a mere artificial and arbitrary rule. It is not because the wrongdoer is in a technical sense the servant of the same master that the master is not answerable. It is of no moment to the injured workman whether his injury be caused by a servant of the same master or by one who has undertaken some function in the mine upon what is called an independent contract. The injury in either case is the same. The personal liability of the wrongdoer is the same. But the mine owner is freed from responsibility, not because the injured and injurer are both his own hired and paid servants, but because he is not personally in fault and has not warranted the injured workman against the perils of the work. . . . The whole persons engaged in a mine form one organization of labor for one common end (however different their functions may be), and are all subject to one general control, exercised by the mine owner or those to whom his authority is delegated. . . . To such a community as this, and to its individual members, the mine owner is under certain well-defined obligations, but to hold that his obligations and liabilities to the individual workmen depend on whether they are technically his servants employed by a contractor for piece work in some limited portion of the mine, while it would be inconsistent with legal principle, would also, I think, introduce great confusion where it is desirable that everything should be as clear as possible."

"If a committee of the British Association," said Lord Moncrieff in the same case, "choose to go down a mine, they must take the safeguards of the mine as they find them. It would be an entirely different thing if the owner had engaged, for ordinary professional remuneration, the services of a medical man to visit the pit periodically. The distinction manifestly lies in the element of contract and valuable consideration. I do not say, and the reverse has been held, that the moral obligation implied in invitation or encouragement may not amount in special cases to legal obligation. But that requires some element equivalent to a direct undertaking. It is apparent that the principle of presumed acceptance of the risk which ob

wages under the same master.[1] But the decision is essentially, though not in terms, inconsistent with those cited in § 490, *supra*. If there is no common employment as between the servants of an independent contractor and the servants of the contractee, it is clear that there can be no common employment as between the latter servants and the independent contractor himself.

tains in the case of fellow servants has a much wider application. But it has no place in cases of onerous contract."

This decision was followed in *Wingate* v. *Monkland Iron Co.* (1884) 12 Sc. Sess. Cas. 4th series, 91, where an apprentice of a firm of mining engineers was injured by an explosion due to the negligence of a servant of the mine owner; and in *Maguire* v. *Russell* (1885) 12 Sc. Sess. Cas. 4th series, 1071, overruled by the House of Lords in *Johnson* v. *Lindsay* (§ 490, note 1), where a workman in the employ of one who had contracted to do the plumbing work of a building, was held to be engaged in the same work, and therefore to be the fellow servant of a workman hired by a firm to lay the cement flooring in the same building. In the former of these two cases the court took the broad ground that the rule as to an implied assumption of a risk is not restricted in its application to the case of fellow servants, but is a bar to recovery in the case of a member of a master's family, or of a friend who may be driving with him, or of any person who places himself by contract or otherwise voluntarily, in such a relation to the master that he must be held to have taken upon himself the risks incidental to the position.

In *Michigan C. R. Co.* v. *Leahey* (1862) 10 Mich. 193, the court was equally divided on the question whether the servant of a contractor assumed the risk of the negligence of the servants of the contractor's employer. But there the agents of the company knew of the conditions which threatened to cause injury, and the contractor's servant did not.

CHAPTER XXVII.

DEFENSE OF COMMON EMPLOYMENT IN CASES NOT INVOLVING THE QUESTION WHETHER THE NEGLIGENT SERVANT WAS A VICE PRINCIPAL.

A. INTRODUCTORY.

492. Scope of chapter.
493. General statement of what constitutes common employment.
494. Provinces of court and jury in determining whether there was a common employment.

B. THEORY THAT COMMUNITY OF EMPLOYMENT DEPENDS SOLELY ON WHETHER THE DELINQUENT SERVANT'S NEGLIGENCE WAS A RISK CONTEMPLATED BY THE INJURED SERVANT.

495. Generally.
496. Diversity of duties or departments not sufficient to exclude defense of common employment.
497. Contiguity a material, though not decisive, factor.
498. Illustrative cases of common employment.
499. Disconnection of duties, when so great as to negative implied acceptance of the risk of a fellow servant's negligence.

C. THEORY THAT COMMON EMPLOYMENT DEPENDS ON IDENTITY OF DEPARTMENTS OF WORK OR CONSOCIATION OF DUTIES.

500. Identity of department as a test, generally.
501. Consociation of duties, as a test of common employment.
501a. Same subject contined.
502. Relation between the theories of nonassignable duties and consociation of duties.
503. Difference or identity of department not necessarily conclusive under the consociation doctrine.
504. Consociation primarily a question of fact for the jury.
505. General discussion of the doctrine of consociation.
506. Illustrative cases.

A. INTRODUCTORY.

492. Scope of chapter.— In all cases where the defense of coservice is relied upon, the primary question to be determined is whether the relative positions of the negligent and injured servants were such that there was, in the literal sense of the word, a "common employment." If that question is settled in the master's favor, the servant is debarred from recovery, unless he can show that, although there was

such common employment, the negligent servant was the representative or vice principal of the master.[1] The cases dealing with the former of these questions will be reviewed in the ensuing chapter.

493. General statement of what constitutes common employment.—There is a complete unanimity as to the point that in order to let in the defense of common employment, it must appear that, at the time of the accident in suit, the negligent and injured servants were not only under the control of the same master (see § 490, *ante*), but were also engaged in the discharge of duties which may be said, in a reasonable sense, to have been directed to the attainment of the same end.[1] The principle is, however, too vague to be of much assistance in litigation,[2] and it has been attempted to impart greater definiteness

[1] It must be admitted that, as a mere matter of terminology, the distinction taken in the text is not sustained by the authorities, the phrase "common employment" being frequently used to denote the situation which is the antithesis of that which exists where the negligent servant is a vice principal. See, for example, *Curley* v. *Hoff* (1899) 62 N. J. L. 758, 42 Atl. 731. This specialised and not very precise use of the words, which is explicable historically by the fact that the general conception of common employment, as constituting an exception to the doctrine of *respondeat superior*, antedates the partial restoration of that doctrine by means of the theory of vice principalship, cannot be avoided until some term appropriate to express the required concract has been devised. For the purposes of a logical classification, however, it is clearly necessary to discriminate between the two questions mentioned in the text, and in the present chapter the term "common employment" will be conceived of, as bearing the signification which presents the first of these questions only.

[1] "Where another servant has been employed for a purpose entirely other and different, it may be well said that they are not fellow servants of one master. Each is but a servant for the purpose for which he is employed, and as to any other duties or dangers, not resulting from such employment, he is not a servant, and, therefore, for injuries sustained, may hold the master responsible, upon the same ground that he would any stranger." *Ohio & M. R. Co.* v. *Hammersley* (1867) 28 Ind. 371.

[2] The subjoined table of extracts shows that, except so far as it may be explained by subsidiary principles and construed with reference to specific groups of facts, the extremely general phraseology which is employed by judges casts very little light upon the subject.

"The two servants must be men in the same common employment, and engaged in the same common work under that common employment." *Bartonshill Coal Co.* v. *McGuire* (1858) 3 Macq. H. L. Cas. 300, per Lord Brougham.

"Coemployees in the same common employment." *Cumberland & P. R. Co.* v. *State* (1875) 44 Md. 283.

"Engaged in the same common work, and performing duties pertaining to the same general business." *Baltimore Elevator Co.* v. *Neal* (1886) 65 Md. 438, 5 Atl. 338.

"Engaged in a common business which their joint efforts are required to accomplish." *Coulin* v. *Charleston* (1868) 15 Rich. L. 201.

"Engaged in a common work." *Sheehan* v. *Prosser* (1893) 55 Mo. App. 569.

"Engaged in common work" or in "the same general undertaking." *South Florida R. Co.* v. *Weese* (1893) 32 Fla. 212, 13 So. 436.

Engaged in the "same general undertaking." *Wilson* v. *Madison, etc., R. Co.* (1862) 18 Ind. 226.

"Engaged in the same general business." *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143; *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240; *Houston & T. C. R. Co.* v. *Rider* (1884) 62 Tex. 267.

Engaged in the common "service of the same master in conducting and carrying on the same general business." *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 31 S. E. 258, 27 S. E. 278.

to the conception of an identity of object by formulating certain explanatory theories. As these theories, which may, for practical purposes, be reduced to two, represent fundamental differences of opinion as to the rationale of the defense of common employment, and have

"Engaged in a common enterprise with several duties directed to the same end." *Sullivan* v. *Mississippi & M. R. Co.* (1860) 11 Iowa, 421.

"Working to accomplish the same general end." *Neal* v. *Northern P. R. Co.* (1894) 57 Minn. 365, 59 N. W. 312.

Coservice said to exist, "if the services of each [servant] in his particular sphere or department are directed to the accomplishment of the same general end." *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615.

"Co-operation, actively and personally exercised to the accomplishment of one common end." *Logrono* v. *Mobile & O. R. Co.* (1890) 67 Miss. 592, 7 So. 432 (phrase used as to all servants engaged in the operation of trains).

"Employed . . . in the accomplishment of the same common enterprise," and "the duties of each being directed to the same end." *Cayle* v. *Bangor & P. Canal & R. Co.* (1857) 43 Me. 269.

Employees whose "services have an immediate common object." *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322; *St. Louis, I. M. & S. R. Co.* v. *Gaines* (1885) 46 Ark. 555; *St. Louis, I. M. & S. R. Co.* v. *Rice* (1888) 51 Ark. 467, 4 L. R. A. 173, 11 S. W. 699; *Van Avery* v. *Union P. R. Co.* (1888) 55 Fed. 40.

"Engaged in the same common object." *Waller* v. *South Eastern R. Co.* (1863) 2 Hurlst. & C. 102, 32 L. J. Exch. N. S. 205, 9 Jur. N. S. 501, 8 L. T. N. S. 325, 11 Week. Rep. 731.

"Engaged in one common object." *Adams* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 44 N. W. 270.

"Engaged in promoting one common object." *Ohio & M. R. Co.* v. *Hammersley* (1867) 28 Ind. 371.

Co-operating to the same end." *McKay* v. *Buffalo Bill's Wild West Co.* (1896) 17 Misc. 601, 40 N. Y. Supp. 592.

"Engaged in the same undertaking or common work." *Camp* v. *Hall* (1897) Fla. 535, 22 So. 792.

"Performing duties for the same general purpose." *Spees* v. *Boggs* (1901) 198 Pa. 112, 52 L. R. A. 933, 47 Atl. 875.

"Engaged in promoting the same general object." *Foster* v. *Minnesota C. R. Co.* (1869) 14 Minn. 360, Gil. 277.

"Engaged in furthering the same general object." *Kuehtla* v. *Oregon Short Line & U. V. R. Co.* (1891) 21 Or. 136, 27 Pac. 91.

Doing work having the "same general object." *Robertson* v. *Terre Haute & I. R. Co.* (1881) 78 Ind. 77, 41 Am. Rep. 552.

"Employed for the same general purpose by the same master, and working to produce the same result." *Thom* v. *Pillard* (1894) 10 C. C. A. 352, 8 U. S. App. 597, 62 Fed. 232.

"Working to accomplish the same general purpose." *Snyder* v. *Viola Min. & Smelting Co.* (1891) 2 Idaho, 771, 20 Pac. 127.

"Working in the same place to subserve the same interests." *Chicago & A. R. Co.* v. *Murphy* (1870) 53 Ill. 336.

Two persons subject to control and direction by the same general master, in the same common object, are fellow servants. *Hamby* v. *Union Paper Mills Co.* (1900) 110 Ga. 1, 35 S. E. 297 (syllabus written by court).

An eminent English judge has expressed the opinion that the proper method of differentiation is to "look at the common object, and not at the common immediate object." Polbck, C. B., in *Morgan* v. *Vale of Neath R. Co.* (1865) L. R. 1 Q. B. 149, 35 L. J. Q. B. N. S. 23, 13 L. T. N. S. 564, 14 Week. Rep. 144, 5 Best & S. 736. This test may often be useful as a guide in doubtful cases, but the distinction suggested merely shifts the difficulty further back. Except as illustrated by specific instances, the expanded phrase is no more precise than the more general one.

A similar objection applies to a statement of the rule in this form,—that, to constitute coservice on the ground that the servants were engaged in the same common work, it is not necessary that they should have been engaged at the time of the injury in the same particular work. *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50.

produced two distinct lines of decisions, it will be necessary to review them separately.

494. Provinces of court and jury in determining whether there was a common employment.— (See also §§ 501, *infra*, 511, 591, *post*.)— What servants are in a common employment is not a question of fact exclusively, nor is it solely a question of law. It depends for solution upon both law and fact. But when the necessary facts for determining the question are undisputed, it is then simply a question of law.[1] The court, therefore, may nonsuit the plaintiff, or may direct a verdict for the defendant, or set it aside if rendered for the plaintiff, where the only negligence in evidence is that of a fellow servant acting in the performance of his duties, as a servant.[2] This course may be taken where there is sufficient evidence to show that the injury was such that it must have been caused by one of several coservants, although it does not appear which of them was the actual delinquent;[3] or where the only reasonable theory from the evidence is that the negligence which caused the injury must have been either that of the

[1] *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528; *Veal* v. *Yazoo & P. R. Co.* (1894) 57 Minn. 365, 59 N. W. 312.

[2] As most of the cases cited in subtitle B, *infra*, assume this to be the true rule, it will be sufficient to mention a few pertinent decisions: *Quelch* v. *S. S. Co.* v. *Merchant* (1890) 133 U. S. 375, 33 L. ed. 656, 10 Sup. Ct. Rep. 397; *Cagac* v. *Union P. R. Co.* (1889) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382; *Texas & P. R. Co.* v. *Patton* (1891) 9 C. C. A. 487, 23 U. S. App. 319, 61 Fed. 259 (accident caused by the failure of a coservant to report a defect); *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220; *Seaver* v. *Boston & M. R. Co.* (1850) 14 Gray, 466; *Commee* v. *Hobden* (1891) 152 Mass. 598, 26 N. W. 137 (injury received in taking down a building); *Russell* v. *Hudson River R. Co.* (1858) 17 N. Y. 134; *Burke* v. *Syracuse, B. & N. Y. R. Co.* (1893) 69 Hun, 21, 23 N. Y. Supp. 458 (fellow servant opened switch under a mistaken impression that it was set wrong); *Elwell* v. *Hacker* (1894) 86 Me. 416, 30 Atl. 61; *Combes* v. *Belleville Stone Co.* (1896) 59 N. J. L. 226, 36 Atl. 373; *Anderson* v. *Searle Elevator Co.* (1887) 37 Minn. 539, 35 N. W. 382; *Hennig* v. *Globe Foundry Co.* (1897) 112 Mich. 616, 71 N. W. 150 (error to refuse an instruction that if the accident was caused by the negligence of a coservant in regard to a certain act, the plaintiff could not recover; *Schaub* v. *Hannibal & St. J. R. Co.* (1893) 105 Mo. 74, 16 S. W. 924 (distinguishing the case of a car temporarily left on a siding from one in which the obstruction is a permanent structure).

An instruction in an action for personal injuries to an employee that recovery cannot be had if the injury were due to the negligence of one who was clearly a fellow servant with such employee, should be given upon request. *Chapman* v. *Reynolds* (1896) 23 C. C. A. 166, 33 U. S. App. 686, 77 Fed. 274.

[3] *Kennayer* v. *Manhattan R. Co.* (1891) 81 Hun, 444, 31 N. Y. Supp. 82 (collision caused by negligence of one of the men stationed on the track in a fog to pass signals along).

The question whether or not the facts found by a jury in a special verdict show that two persons were fellow servants is a question for the court. *Keller* v. *Gaskill* (1898) 20 Ind. App. 502, 50 N. E. 363.

A special finding which shows that the injury was caused by the negligence of a fellow servant will warrant a court in setting aside a general verdict for the plaintiff. *Chicago, B. & Q. R. Co.* v. *Howard* (1895) 45 Neb. 570, 63 N. W. 872.

plaintiff himself or of a fellow servant;[4] or where it is apparent that the efficient cause of the injury was either accident or the negligence of a coservant;[5] or where the evidence indicates that the injury was due to the concurrent negligence of the plaintiff himself and of his fellow servants.[6]

In far the largest number of instances this power of the court is exercised in favor of the employees, but if the finding of a jury should happen to be against the plaintiff, the verdict will be set aside if the evidence shows that the injury was due to the negligence of one who was not a coservant.[7]

B. Theory that community of employment depends solely on whether the delinquent servant's negligence was a risk contemplated by the injured servant.

495. Generally.— The theory adopted by one school of thought is a direct deduction from the bare legal principle by which an agreement on the part of a servant to assume the risks of injury from the negligence of his fellow workmen is implied for the reason that he

[4] *Berlick* v. *Ashland Sulphite & Fiber Co.* (1896) 93 Wis. 437, 67 N. W. 712; *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220; *Toms* v. *Buffalo Creek R. Co.* (1893) 70 Hun, 84, 23 N. Y. Supp. 1112; *Kelly* v. *Detroit Bridge Works* (1877) 17 Kan. 558; *Hammond* v. *Chicago & G. T. R. Co.* (1890) 83 Mich. 334, 47 N. W. 965; *Chicago, B. & Q. R. Co.* v. *Mercker* (1889) 36 Ill. App. 195; *Tinney* v. *Boston & A. R. Co.* (1872) 62 Barb. 218 (misplaced switch); *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220 (car inspector.—injury due either to his negligence in going into a space between cars without seeing that they were properly guarded, or to the negligence of a conductor in pushing up a car while he was there); *Piper* v. *Cambria Iron Co.* (1893) 78 Md. 249, 27 Atl. 939 (plaintiff and coemployees failed to place a light in a car which was being unloaded, and to put a toolboard in position to facilitate the passage from the car to the platform); *Garvey* v. *New York & C. Mail S. S. Co.* (1898) 26 App. Div. 456, 50 N. Y. Supp. 77 (fellow servant suddenly started a machine while plaintiff was in a dangerous position); *St. Louis, I. M. & S. R. Co.* v. *Peterson* (1898) 65 Ark. 126, 44 S. W. 1123 (servant attempted to board a pay car while upon a moving turntable, and was pushed off by a fellow employee who was alighting).

[5] *Yager* v. *Atlantic, M. & O. R. Co.* (1882) 4 Hughes, 192; *Soderman* v. *Kemp* (1895) 145 N. Y. 427, 40 N. E. 212, Reversing 70 Hun, 449, 24 N. Y. Supp. 401.

[6] *Keys* v. *Pennsylvania Co.* (1886; Pa.) 1 Cent. Rep. 893, 3 Atl. 15; *Brown* v. *Maxwell* (1844) 6 Hill, 592, 41 Am. Dec. 771; *Missouri P. R. Co.* v. *Texas & P. R. Co.* (1887) 31 Fed. 527; *Ward* v. *Chesapeake & O. R. Co.* (1894) 39 W. Va. 46, 19 S. E. 389 (brakeman and fellow servants failed to notice signal showing that a passing train was to be followed by another section); *Felch* v. *Allen* (1868) 98 Mass. 572 (injury caused by plaintiff's following the unauthorized suggestion of a coservant to use an elevator, not then in safe condition, for the purpose of the raising of materials from the basement to the attic of a factory); *Stephen* v. *Stevens* (1893) 19 N. Y. S. R. 850, 21 N. Y. Supp. 721 (plaintiff put his hand close to a circular saw at the direction of a fellow workman).

[7] *Tarrer* v. *Richmond & L. R. Co.* (1887) 81 Va. 192, 4 S. E. 339.

must be taken to have contemplated such risks as one of the ordinary incidents of his work. If the conception underlying this principle, that the master is relieved of responsibility because the danger of being thus injured is known by the servant to be a natural consequence of his entering the employment,[1] is followed out to its logical conclusions, and no account is taken of any of the extraneous factors which, from other points of view, may be conceived to have a bearing upon the question (see §§ 500 *et seq. infra*), we are manifestly conducted to the conclusion that, in determining whether or not there was a common employment, as between two servants, the necessary, and the only proper, question to ask is whether or not their duties were so related that each of them must have known himself to be exposed to the risk of being injured, in the event of the other's committing a negligent act; and that this risk was so normal, and so likely to eventuate in actual disaster, that it was presumably considered by each of them in fixing the amount of the compensation which they were willing to receive for their services.[2]

[1] "When the service to be rendered requires for its performance the employment of several persons, . . . there is necessarily incident to the service of each the risk that others may fail in the vigilance and caution essential to his safety." *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184.

[2] In the leading case of *Morgan* v. *Vale of Neath R. Co.* (1864) 5 Best & S. 570, 10 Jur. N. S. 1074, 33 L. J. Q. B. N. S. 260, 12 Week. Rep. 1032, where the point made was that plaintiff, who was employed to do carpenter's work on the station, and was injured through an engine's striking the scaffold on which he was, was not employed in the same work as those who were employed in working the railway traffic; and it was contended that it was essential that the servants should be in a common employment and working for a common object, Blackburn, J., said: "I quite agree that it is necessary that the employment must be common in this sense,—that the safety of the one servant must, in the ordinary and natural course of things, depend on the care and skill of the others. This includes almost, if not every, case in which the servants are employed to do joint work, but I do not think it is limited to such cases. There are many cases where the immediate object on which the one servant is employed is very dissimilar from that on which the other is employed, and yet the risk of injury from the negligence of the one is so much a natural and necessary consequence of the employment which the other accepts that it must be included in the risks which are to be considered in his wages. I think that, whenever the employment is such as necessarily to bring the person accepting it into contact with the traffic of the line of railway, risk of injury from the carelessness of those managing that traffic is one of the risks necessarily and naturally incident to such an employment, and within the rule." After referring to the view of Pollock, C. B., in *Waller* v. *South-Eastern R. Co.* (1863) 32 L. J. Exch. N. S. 205, 2 Hurlst. & C. 102, 9 Jur. N. S. 501, 8 L. T. N. S. 325, 11 Week. Rep. 731, that in deciding a case the judge should "consider what are the dangers which any servant engages to encounter, and look at the probable dangers attendant upon entering the engagement in question," the opinion proceeds thus: "Applying the same principle to the present case, I think that we ought to hold that the plaintiff, in accepting an employment to work in the station whilst the traffic was being carried on, and which must have brought him close to the traffic, accepted one which necessarily must have exposed him to danger from the negligent use of those conducting the traffic, and must be taken,

It is important to note that, for the purposes of this rule, the contemporaneity of the servant is material only in so far as it may be re-

as between himself and his employers, to have taken upon himself that risk."

Chief Justice Cockburn thought that the plaintiff and the negligent servants were not "fellow laborers engaged in a common work," but felt obliged to defer to the authority of *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837, and *Waller* v. *South Eastern R. Co.* (1863) 2 Hurlst. & C. 102, 32 L. J. Exch. N. S. 205, 9 Jur. N. S. 501, 8 L. T. N. S. 325, 11 Week. Rep. 731. By the exchequer chamber (1 B. & S. Q. B. 149, 5 Best & S. 736, 35 L. J. Q. B. N. S. 23, 13 L. T. N. S. 564, 14 Week. Rep. 144), the argument of Blackburn, J., was adopted as a whole. Pollock, C. B., merely adding: "It appears to me that we should be letting in a flood of litigation, were we to decide the present case in favor of the plaintiff. For, if a carpenter's employment is to be distinguished from that of the porters employed by the same company, it will be sought to split up the employees in every large establishment into different departments of service, although the common object of their employment, however different, is but the furtherance of the business of the master: yet it might be said, with truth, that no two had a common immediate object."

In *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 19 L. J. Exch. N. S. 296, 14 Jur. 837, it was contended that, even admitting the defendants would not be liable for any neglect on the part of those who were managing the train in one of the carriages of which the plaintiff was traveling, yet there could be no principle exempting them from liability for the acts of those who, though, equally with him, servants of the defendants, were not, at the time of the accident, engaged in any common act of service with him. But Alderson, B., said: "We do not think there is any real distinction between the two cases. The principle is that a servant, when he engages to serve a master, undertakes, as between him and his master, to run all the ordinary risks of the service, and this includes the risk of negligence on the part of a fellow servant, whenever he is acting in discharge of his duty as servant of him who is the common master of both. The death of Hutchinson appears on the pleadings to have happened while he was acting in the discharge of his duties to the defendants as his master, and to have been the result of carelessness on the part of one or more other servant or servants of the same master while engaged in their service; and whether the death resulted from the mismanagement of the one train or of the other or of both, does not affect the principle: in any case it arose from carelessness or want of skill, the risk of which the deceased had, as between himself and the defendants, agreed to run."

Compare the language used by Lord Cranworth in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, as quoted in § 496 *infra*.

In *Charles* v. *Taylor* (1878) 1 C. P. D. 492, 38 L. T. N. S. 773, 27 Week. Rep. 32, the court held the defense of coservice to be applicable to a case where a servant of a brewer, whose duty it was to assist in unloading barges, was injured by the negligence of a servant who was shifting barrels in the brewery itself, and who had frequently been at the same spot where the barrels were being moved. Cotton, L. J., said: "In the case before us the plaintiff was employed in the business of the brewery, and it must be taken that the defendants, as masters, pointed out that they would engage other servants, whose acts, as between them and the plaintiff, were not to be considered as the defendants'. The plaintiff knew that other persons would be employed in carrying on the business of the brewery; barrels are used for the purposes of brewing, and the servant by whose negligence the injury was inflicted was, at the time of the accident, engaged in the work of the brewery. According to the authorities, in order to exempt the master from liability, it is unnecessary that the employment should be of the same nature, if there is a common object, and if it must be taken that for the purpose of effecting that object the master must employ other servants." Brett, L. J., said: "I shall now enunciate one principle relating to the question: I do not say there may not be more. It is this: When the two servants are servants of the same master, and where the service of each will bring them so far to work in the same place

solved into an excusable incapacity to forecast the probability of injury from the particular servant who was guilty of the negligent act in question. The mere fact that the negligent act itself was one

and at the same time that the negligence of one in what he is doing as part of the work which he is bound to do may injure the other whilst doing the work which he is bound to do, the master is not liable to the one servant for the negligence of the other. This is a formula, though not the only one. Let me apply this formula to the facts before us: the service of the plaintiff would compel him to work at the same time and in the same place as the servant engaged in moving the barrels, so that the negligence of the latter in moving the defendants' barrels might injure the plaintiff whilst engaged in unloading the barge: the negligence of the one in his work might cause injury to the other whilst employed in his work. I think that Lopes, J., was right in holding that the defendants, who were the employers of both the plaintiff and the servant who was guilty of negligence, were not liable for the accident: it was not necessary, in order to exempt the defendants, that the two servants should be engaged in the same kind of work."

In *Lovell* v. *Howell* (1876) L. R. 1 C. P. Div. 161, 45 L. J. C. P. N. S. 387, 34 L. T. N. S. 183, 24 Week. Rep. 672, recovery was denied on a somewhat similar showing of facts, the court declaring that though it was no part of the plaintiff's duty to assist in the general work of a warehouse —as, for example, in the raising or lowering sacks to or from the upper floors, but that his duty was confined to the care and management of the craft coming to the premises,—yet the essential fact was that it was also a part of his duty to go to the office for orders, and that in the course of this duty he would have to pass through the warehouse and out into the street by the door at which the process of lifting the sacks from the wagon was carried on, where he would necessarily have to encounter the risk of injury from negligence of others in the same employ,—one of the contemplated risks of the service.

In *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322, the court, in summing up its reasons for refusing to allow the plaintiff to recover, said with respect to him and the negligent servant: "The duties of the two bring them to work at the same place at the same time, so that the negligence of the one in doing his work may injure the other in doing his work. Their separate services have an immediate common object, —the moving of the trains. Neither works under the orders or control of the other."

In *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 357, 38 L. ed. 1013, 14 Sup. Ct. Rep. 983, the court said: "As a laborer upon a railroad track, either in switching trains or repairing the track, is constantly exposed to the danger of passing trains, and bound to look out for them, any negligence in the management of such trains is a risk which may or should be contemplated by him in entering upon the service of the company. This is probably the most satisfactory test of liability."

Compare the language used in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342, as quoted in § 498, note 1, subd. (d), *infra*.

In another case the servants were described as being "engaged in duties which brought them to work at the same place, at the same time, under circumstances in which the carelessness of one might be fatal to the safety of the other." *Naylor* v. *New York C. & H. R. R. Co.* (1888) 33 Fed. 801.

In another they were said to be "engaged together at the same place in a work that required co-operation, and such associations as would bring them into frequent contact with each other." *Bier* v. *Jeffersonville, M. & I. R. Co.* (1892) 132 Ind. 78, 31 N. E. 471.

In another the court, in laying it down that the test of a master's liability for injury to one servant caused by the negligence of another is "whether the injury is within the risk ordinarily incident to the service undertaken," and that it was error to instruct a jury that, if they believe from the evidence in the case that the deceased was engaged in the business of repairing cars on a repair track, and was in no way connected with the running of cars, and had nothing to do with the cars being near, then he was not a fellow servant of those engaged in running the cars, said: The fact that Brown was in no way connected with the running of cars, and had nothing to do with the cars being near,

or that he was engaged in a separate department from that of those engaged in moving the cars, should not control the other facts, viz., that the track on which he was at work, and the tracks on which the duties of the switchman and engineer were being performed at the same time, were in close proximity to each other, converging with their switches near the same point, so that the negligence or inadvertence of the switchman in operating the switches and moving the trains was liable to endanger him. *St. Louis, I. & T. R. Co.* v. *Triplett* (1891) 54 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266.

In a later decision by this court it is stated as a ground for predicating co service, that the risk was "natural and normal." *St. Louis S. W. R. Co.* v. *Henson* (1895) 61 Ark. 302, 32 S. W. 1079.

In holding that a founder in a blast furnace, in charge of the inside work of such furnace, assumes the risk of the negligent management of locomotives used by the same company in moving cars over crossings on its premises, his duty requiring him to use those crossings to a considerable extent, the court expressly rejected the contention "that there was nothing in the nature of his employment to subject him to such a risk." *Adams* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 44 N. W. 270.

Other passages illustrating the same conception as the above decisions are these: "Servants . . . are engaged in a common employment, when each of them is occupied in service of such a kind that all the others, in the exercise of ordinary sagacity, ought to be able to foresee, when accepting their employment, that it may probably expose them to the risk of injury in case he is negligent." *Baird* v. *Pettit* (1872) 70 Pa. 477. Compare *Hultan* v. *Philadelphia & S. Mail S. S. R. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2.

A servant assumes the risk of a fellow servant's negligence, even though the latter is "in a position of greater responsibility or a different line of employment, so long as both are in the same general business, so that the negligence of one may contribute to the danger of the other." *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240, per Cooley, J.

The servant's remedy is "restricted by the contract only as to the negligence of fellow servants engaged in the same general service, or those employed in the conduct of one common enterprise or undertaking, or those whose employment is such that, by their negligence in the usual line of their duty, he might reasonably expect to be endangered, or those whose negligence might be understood to be incident to his service." *Fifield* v. *Northern R. Co.* (1850) 42 N. H. 225.

Common employment is service of such kind that, in the exercise of ordinary sagacity, all who engage in it may be able to foresee, when accepting it, that, through the negligence of fellow servants, it may probably expose them to injury. *McAndrews* v. *Burns* (1876) 39 N. J. L. 117; *Ewan* v. *Lippincott* (1885) 47 N. J. L. 192, 54 Am. Rep. 148.

The following instruction has been approved: "A fellow servant is one engaged with another under a common master, and in the same common employment, so that they are brought in contact with each other, notwithstanding they are subject to the orders, and under the exclusive control, of separate bosses or foremen, and in different work in the same service." *Parrish* v. *Pensacola & L. R. Co.* (1891) 28 Fla. 251, 9 So. 659.

In *Coulia* v. *Charleston* (1868) 15 Rich. L. 201 (see § 499, note 1, subd. (a), *infra*) the court approved of the test propounded by Blackburn, J., in *Morgan* v. *Vale of Neath R. Co.* (1865) 5 Best & S. 736, L. R. 1 Q. B. 149, 35 L. J. Q. B. N. S. 23, 13 L. T. N. S. 564, 14 Week. Rep. 141, and held that an instruction was unduly restrictive by which the jury were told that the defense of common employment is available only where the two servants are engaged in a common business which their joint efforts are required to accomplish.

Prior to the definitive adoption of the "consociation" doctrine (see subtitle C, *infra*) a similar theory of common employment was sometimes propounded in Illinois.

In *Valter* v. *Ohio & M. R. Co.* (1877) 85 Ill. 500, it was said that "a proper test of the existence of this relation [of fellow servants] may be to inquire whether the negligence of the one is likely to inflict injury on the other.

When the ordinary duties and occupations of the servants of a common master are such that one is necessarily exposed to hazard by the carelessness of another, they must be supposed to have voluntarily taken the risks of such possible carelessness when they entered the service, and must be regarded as fellow servants within the meaning of this rule.

which could not have been reasonably foreseen does not take the case out of the operation of the general rule.[3]

496. Diversity of duties or departments not sufficient to exclude defense of common employment.— The principle laid down in the preceding section is accepted as the test of common employment by a large majority of the courts. See illustrative cases, § 498, *infra*. One of its corollaries is that the plaintiff is precluded from recovery wherever the functions which he and the negligent coemployee were discharging, although not identical, or even similar, in character, were yet such that the two servants were "contributing directly to the common object of their common employer" in that enterprise for which their services were engaged.[1] Or, to employ a terminology which is frequently found in the books, the injured servant's right to recover does not depend upon the fact that he may have been in a different department of the service from the delinquent.[2]

Chicago & A. R. Co. v. *Murphy* (1870) 53 Ill. 336, 339, 5 Am. Rep. 48.

[1] *Brodeur* v. *Valley Falls Co.* (1889) 16 R. I. 448, 17 Atl. 54.

[1] *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, per Lord Cranworth. Compare the equivalent phrases quoted in § 493, note 2, *supra*). Compare also the language of Brett and of Cotton L. JJ., in *Charles* v. *Taylor* (1878) L. R. 3 C. P. Div. 492, 38 L. T. N. S. 773, 27 Week. Rep. 32, as quoted in § 495, note 2, *supra*.

"The question arises, Who are fellow servants in contemplation of law? To constitute such, they need not at the time be engaged in the same particular work. It is sufficient if they are in the employment of the same master, engaged in the same common work, to perform duties and services for the same general purposes." *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 439; Repeated in *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514.

"When there is one general object, in attaining which a servant is exposed to risk, if he is injured by the negligence of another servant whilst engaged in furthering the same object, he is not entitled to sue the master, and it does not matter that they were not engaged in the same kind of work." *Blake* v. *Maine C. R. Co.* (1879) 70 Me. 60, 35 Am. Rep. 297.

"A common employment upon the same identical work" is not necessary to let in the defense of coservice; it is sufficient if there is "a general community of employment." *M'Eniry* v. *Waterford & K. R. Co.* (1858) 8 Ir. C. L. Rep. 315, per Lefroy, C. J.

That the essential question is whether the services of the negligent and injured servant were "directed to the accomplishment of the same general end" was recognized in *Louisville & N. R. Co.* v. *Stuber* (1901) 54 L. R. A. 696, 48 C. C. A. 149, 108 Fed. 934, Reversing (1900) 102 Fed. 421.

[2] Examples of this form of expression are found in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342; *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339; *New York & N. E. R. Co.* v. *Hyde* (1893) 5 C. C. A. 461, 5 U. S. App. 443, 56 Fed. 188; *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143; *Brodeur* v. *Valley Falls Co.* (1889) 16 R. I. 448, 17 Atl. 54; *Collan* v. *Bull* (1898) 113 Cal. 593, 45 Pac. 1017; *Unfried* v. *Baltimore & O. R. Co.* (1890) 34 W. Va. 260, 12 S. E. 512; *Neal* v. 365, 59 N. W. 312; *Roberts* v. *Chicago, Northern P. R. Co.* (1891) 57 Minn. *St. P. M. & O. R. Co.* (1885) 33 Minn. 218, 22 N. W. 389; *Foster* v. *Minnesota C. R. Co.* (1869) 14 Minn. 360, Gil. 277; *Enright* v. *Toledo, t. I. & N. M. R. Co.* (1892) 93 Mich. 409, 53 N. W. 536; *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258; *Bogard* v. *Louisville, E. & St. L. R. Co.* (1881) 100 Ind. 491; *Snyder* v. *Viola Min. & Smelting Co.* (1891) 2 Idaho, 771, 26 Pac. 127; *Texas & P. R. Co.* v. *Harrington* (1884) 62 Tex. 597; *Trinity & S. R.*

If we have regard to the usual arrangement, which, in the case of a difference of departments, would place the servants in each under the control of different agents of the master, the above rule is usually susceptible of being also expressed in the form that the fact of the two servants receiving their orders from different superiors is ineffectual to exclude the defense of coservice, in any case in which the other elements of that defense are present.[3]

497. Contiguity, a material, though not decisive factor.—In numerous instances a servant's contemplation and inferential acceptance of the risk of his fellow servant's negligence are suggested by the fact that their duties, although diverse in kind, were obviously such that they might at any time be brought into close proximity to each other;[1] and the authorities show that this circumstance is almost decisive against the plaintiff. But the essence of his disability to recover being his imputed comprehension of the likelihood of injury, it is evident that the remoteness of the place where the negligent servant habitually works is not necessarily a circumstance which negatives an assumption of the risk of his negligence.[2]

Co. v. *Mitchell* (1889) 72 Tex. 609, 10 S. W. 698; *St. Louis, A. & T. R. Co.* v. *Welch* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529; *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182; *Louisville & N. R. Co.* v. *Stuber* (1901) 54 L. R. A. 696, 48 C. C. A. 149, 108 Fed. 934, Reversing (1900) 102 Fed. 421.

An instruction that where persons are engaged in the same department of work, and one is injured as the result of a fellow servant's negligence, he cannot recover if it is done in the ordinary employment, is not prejudicial to defendant, in an action by an employee for injuries, as limiting the doctrine of fellow servants to servants engaged in the same department of work. *Hicks* v. *Southern R. Co.* (1901) 63 S. C. 559, 38 S. E. 725, 41 S. E. 753.

[3] *Slater* v. *Jewett* (1881) 85 N. Y. 70, 39 Am. Rep. 627 (see § 498, note 1, subd. (a), *infra*); *Adams* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 44 N. W. 270; *Chicago & A. R. Co.* v. *Murphy* (1870) 53 Ill. 336, 5 Am. Rep. 48; *Knahtla* v. *Oregon Short Line & U. N. R. Co.* (1891) 21 Or. 136, 27 Pac. 91. It is not essential to render employees fellow servants that the same foreman have charge of them both. *Trcka* v. *Burlington C. R. & N. R. Co.* (1896) 100 Iowa, 225, 69 N. W. 422.

[1] This aspect of the situation is emphasized in several of the cases cited in note 2 to the last section. See, especially, *Morgan* v. *Vale of Neath R. Co.* (1865) 5 Best & S. 736, L. R. 1 Q. B. 149, 35 L. J. Q. B. N. S. 23, 13 L. T. N. S. 564, 14 Week. Rep. 144; *Charles* v. *Taylor* (1878) L. R. 3 C. P. Div. 492, 38 L. T. N. S. 773, 27 Week. Rep. 32 (opinion of Brett, L. J.); *Lovell* v. *Howell* (1876) L. R. 1 C. P. Div. 161, 45 L. J. C. P. N. S. 387, 34 L. T. N. S. 183, 24 Week. Rep. 672; *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 357, 38 L. ed. 1013, 14 Sup. Ct. Rep. 983; *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322; *Naylor* v. *New York C. & H. R. R. Co.* (1888) 33 Fed. 801; *Bier* v. *Jeffersonville, M. & I. R. Co.* (1892) 132 Ind. 78, 31 N. E. 471; *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 54 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266; *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342; *Parrish* v. *Pensacola & A. R. Co.* (1891) 28 Fla. 251, 9 So. 659.

[2] The law on this point was settled by the leading case of *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339, where Chief Justice Shaw, in discussing the contention of counsel that the doctrine of coservice, whatever its scope, was at all events not applicable to the facts under review, said: "It was strongly pressed in the argument

498. Illustrative cases of common employment.—In the decisions cited below the principles developed in the preceding sections were held to require the conclusion that there was a common employment. The decisions are arranged under headings adapted to facilitate a comparison with the rulings (§ 506, *infra*) under the doctrine of consociated duties to be discussed below. Many other cases in which

that, although this might be so where two or more servants are employed in the same department of duty, where each can exert some influence over the conduct of the other, and thus to some extent provide for his own security, yet that it could not apply where two or more are employed in different departments of duty, at a distance from each other, and where one can in no degree control or influence the conduct of another. But we think this is founded upon a supposed distinction, on which it would be extremely difficult to establish a practical rule. When the object to be accomplished is one and the same, when the employers are the same, and the several persons employed derive their authority and their compensation from the same source, it would be extremely difficult to distinguish what constitutes one department and what a distinct department of duty. It would vary with the circumstances of every case. If it were made to depend upon the nearness or distance of the persons from each other, the question would immediately arise, How near or how distant must they be, to be in the same or different departments? In a blacksmith's shop, persons working in the same building, at different fires, may be quite independent of each other, though only a few feet distant. In a ropewalk, several may be at work on the same piece of cordage, at the same time, at many hundred feet distant from each other, and beyond the reach of sight and voice and yet acting together. Besides, it appears to us that the argument rests upon an assumed principle of responsibility which does not exist. The master, in the case supposed, is not exempt from liability because the servant has better means of providing for his safety, when he is employed in immediate connection with those from whose negligence he might suffer, but because the implied contract of the master does not extend to indemnify the servant against the negligence of anyone but himself; and he is not liable in tort, as for the negligence of his servant, because the person suffering does not stand towards him in the relation of a stranger, but is one whose rights are regulated by contract, express or implied. The exemption of the master, therefore, from liability for the negligence of a fellow servant does not depend exclusively upon the consideration that the servant has better means to provide for his own safety, but upon other grounds. Hence, the separation of the employment into different departments cannot create that liability, when it does not arise from express or implied contract, or from a responsibility created by law to third persons, and strangers, for the negligence of a servant."

In *The Petrel* [1893] p. 320, Jenne, P., agreed with Chief Justice Shaw that physical contiguity does not afford a distinction on which a practical rule can be established, and said: "In all cases the immediate instrument of physical injury must be contiguous to the person injured, and in most cases the person who causes physical injury is not far from the person to whom it results. But I suppose that the signalman at one end of a rifle range is clearly in common employment with the marker at the other, when the two have a common master; and, to give a stronger instance, a servant who unskilfully packs dynamite in a factory, and another who in unpacking it at a distant warehouse is injured by its explosion, are clearly in common employment. On the other hand, mere contiguity, if unusual or accidental, would not be consistent with common employment."

The doctrine of common employment is not limited to those cases in which "there is a connection between the different grades of employment, bringing the servants into contact with each other." *International & G. N. R. Co. v. Ryan* (1891) 82 Tex. 565, 18 S. W. 219. This decision seems to overthrow the effect of the earlier *dictum* of the same court that, if public policy is to be taken as the true ground, "the rule should be confined to those serv-

the relation of a coservice was taken for granted, and in which the specific controversy was whether the negligence alleged constituted a breach of a non-delegable duty, are cited in chapter XXXII., *post*.[1]

ants whose duties bring them into such juxtaposition that one would be enabled to observe the negligence of his fellows." *St. Louis, A. & T. R. Co.* v. *Welch* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529.

"If a servant cannot look to his employer for indemnity where, notwithstanding the exercise of due care on his part, he is injured by the carelessness of a fellow servant laboring near him in the same particular employment, why should he be permitted to do so when, with the same care on his part, he suffers injury by the negligence of another servant in the same general business, but at the time engaged equally near him, in some different duty? If proximity or remoteness of position is to have influence, where is the line? And what substantial difference is there between a case of injury from the negligence of a servant with superior authority, and one from like negligence of a servant of equal authority, employed at a distance from and without the immediate influence of the party injured? How could the latter better guard against the injury in the case last mentioned than in the former one? If distance is to have effect, what shall the distance be? It is manifest that no distinction or exemption as to liability of the principal, resting on the ability of the injured party to protect himself in the particular case, could be made without practically abrogating the entire rule." *Sherman* v. *Rochester & S. R. Co.* (1858) 17 N. Y. 153.

The most striking illustrations of the doctrine in the text are the cases in which telegraph operators have been held to be in a common employment with trainmen. See § 198, *infra*.

[1] (a) *Servants working in the office departments and operating trains.*—A station agent is a fellow servant of a brakeman. *Tower* v. *Chicago, M. & St P. R. Co.* (1887) 69 Wis. 188, 31 N. W. 101, 33 N. W. 433. The court said: "They were both certainly in the employ of the company, and were both engaged, in a sense, in operating train No. 26. True, the station agent was required to keep the main track free from all obstructions for all trains as well as No. 26; but this fact did not render him any the less a fellow servant of the plaintiff in the work in which both were engaged. They were both fellow servants within the rule; as much so as they would have been if the station agent had had no other duty to perform but to see that the main track was kept unobstructed for this train No. 26."

A station agent is a fellow servant of an engineer. *Brown* v. *Minneapolis & St. L. R. Co.* (1884) 31 Minn. 553, 18 N. W. 834 (cars negligently left standing at a place where the train on which plaintiff was engineer ran into them); *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514 (conceded). A baggage master is a coservant of engineers and brakemen. *Keaveny* v. *Baltimore & O. R. Co.* (1895) 166 Pa. 60, 30 Atl. 1014.

In the following cases a station agent has been held to be the fellow servant of a trainman, but the point taken was that the former was a vice principal, not that he was in a different department: *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514; *Brown* v. *Minneapolis & St. L. R. Co.* (1884) 31 Minn. 553, 18 N. W. 831; *Galveston, H. & S. A. R. Co.* v. *Farmer* (1889) 73 Tex. 85, 11 S. W. 156; *Dealey* v. *Philadelphia & R. R. Co.* (1886; Pa.) 3 Cent. Rep. 112, 4 Atl. 170; *Dana* v. *New York C. & H. R. R. Co.* (1881) 23 Hun, 473; *Byrnes* v. *New York, L. E. & W. R. Co.* (1889) 113 N. Y. 251, 4 L. R. A. 151, 21 N. E. 50; *Gates* v. *Chicago, M. & St. P. R. Co.* (1892) 2 S. D. 422, 15 N. W. 907.

In some cases it has been held generally that a telegraph operator at a wayside station is a fellow servant of the men operating trains. *Price* v. *Detroit, G. H. & M. R. Co.* (1891) 145 U. S. 651, 36 L. ed. 843, 12 Sup. Ct. Rep. 986 (mem. judgment; decision affirmed by a divided court); *Slater* v. *Jewett* (1881) 85 N. Y. 61, 39 Am. Rep. 627 (operator failed to comply with rule that orders regarding trains which were behind time should be communicated to conductors and engineers in the presence of each other). The court said: "Each of those agents, in doing their ordinary work for the defendant, were fellow servants of the intestate, in the same common employment. The conductor was engaged in the particular work in which the intestate was,—that of moving trains. The telegrapher was engaged in a work closely connected

therewith,—that of receiving and giving information of the whereabouts of trains, and communicating orders to those controlling them, for stopping or going on. This was a branch of the general business of the defendant, essential to the smooth and successful movement of the whole,—that branch of it in which the intestate was engaged as much as any other. The argument to sustain this position (i. e., that there was no coservice) consists, in part, in an effort to show that the duties of the operator were in no respect like to those of the intestate. They were not like, but they tended to the same end—that of the speedy, efficient, and successful carriage of passengers and freight over the railway. There are many kinds of servants of a great railway company. Their duties are not in all cases the same, nor always like, yet they are all done to bring one result, and it is their conjoint, simultaneous, and harmonious performance that does effect the finality, sought through the whole complex organism. If it be so that this operator sometimes received and sent messages that had naught to do therewith, still, on this occasion, the act required of him had direct connection with the acts of those engaged in moving the two trains. The position that the operator was hired and discharged by one superior agent, and the intestate by another, and that, therefore, they were not fellow servants, is not sound. The general authority to hire and to turn away was in the defendant. It did radiate from him through different chiefs of department in his general work. His, however, was the ultimate power. The heads of bureaus were not independent contractors, doing a branch of his work on their own responsibility, and free from his interference with their subordinates. He had the right to step into their spheres of duty and act for himself."

In other cases it has been conceded that the telegraph operator was in a common employment with trainmen, and the ground on which it was sought unsuccessfully to hold the master responsible was that the operator was a vice principal. *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952 (see § 611, note 1, *post*); *Oregon Short Line & U. N. R. Co.* v. *Frost* (1896) 21 C. C. A. 186, 41 U. S. App. 606, 74 Fed. 965; *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125; *Blessing* v. *St. Louis, K. C. & N. R. Co.* (1883) 77 Mo. 410; *Monaghan* v. *New York C. & H. R. R. Co.* (1887) 45 Hun, 113; *Dooley* v. *Philadelphia & R. R. Co.* (1886; Pa.) 3 Cent. Rep. 112, 4 Atl. 170; *Vehaag* v. *Northern P. R. Co.* (1889) 42 Fed. 288; *Norfolk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 994; *Reiser* v. *Pennsylvania Co.* (1892) 152 Pa. 39, 25 Atl. 175. In *Sheehan* v. *New York C. & H. R. R. Co.* (1883) 91 N. Y. 332 (regulations held insufficient), and *Sutherland* v. *Troy & R. R. Co.* (1891) 125 N. Y. 737, 26 N. E. 639 (incompetency alleged), the same doctrine was assumed, but the cases went off on the points noted.

In the latest and most authoritative rulings a distinction is taken between train despatchers and telegraph operators, the former only being regarded as vice principals. *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514; *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466. See § 577, *post*. But in an early New York case both these functionaries seem to be placed on the same footing as mere fellow servants, the later distinctions not being adverted to. *Chapman* v. *Erie R. Co.* (1874) 55 N. Y. 579 (case really turned on allegation of incompetency). So, an employee who seems from the report to have been a divisional train despatcher has been held to be a fellow servant of a brakeman, the theory of vice principalship not being referred to; and nonliability was predicated simply on the ground that their duties related to the same general object. *Robertson* v. *Terre Haute & I. R. Co.* (1881) 78 Ind. 77, 41 Am. Rep. 552.

See also *Sullivan* v. *Toledo, W. & W. R. Co.* (1877) 58 Ind. 26, which seems, by implication, to uphold the same doctrine.

So, in an action for the death of the plaintiff's intestate while acting as a fireman, which occurred in a collision through the negligence of the defendant's train despatcher charged with the duty of "directing" the movements of trains, the court held that the train despatcher was the fellow servant of the intestate. *Billups* v. *Louisville, N. O. & T. R. Co.* (1891) 69 Miss. 423, 13 So. 696.

In *Norfolk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 994, the court, in holding that an engineer could not recover for injuries caused by the negligence of a divisional train despatcher, said: "They were both engaged in the same common work,

employed by the same agent of the common master, and were performing duties pertaining to the same general business; and unless the whole current of the Maryland decisions is to be reversed, they were fellow servants."

(b) *Servants engaged in handling the same train.*—In the absence of evidence showing vice principalship, all servants of a common master employed in running, operating, and rendering service with a train of cars, are fellow servants. *Blessing* v. *St. Louis, K. C. & N. R. Co.* (1883) 77 Mo. 410; *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528.

These employees are plainly engaged in services necessary to the accomplishment of a single purpose,—the movement of trains. *Pittsburgh, C. C. & St. L. R. Co.* v. *Ramey* (1882) 37 Ohio St. 665.

Hence, the following employees are coservants:

A conductor and the engineer. *Eckles* v. *Norfolk & W. R. Co.* (1896) 96 Va. 69, 25 S. E. 545; *Michigan C. R. Co.* v. *Dolan* (1875) 32 Mich. 510; *Dillon* v. *Union P. R. Co.* (1874) 3 Dill. 319, Fed. Cas. No. 3,916.

A conductor and a fireman. *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182 (negligence in signaling); *Eckles* v. *Norfolk & W. R. Co.* (1896) 96 Va. 69, 25 S. E. 545; *Summerhays* v. *Kansas P. R. Co.* (1875) 2 Colo. 484.

A conductor and a brakeman. *Pease* v. *Chicago & N. W. R. Co.* (1884) 61 Wis. 163, 20 N. W. 908 (train was started while brakeman was under a car); *Hoover* v. *Beech Creek R. Co.* (1893) 154 Pa. 362, 26 Atl. 315 (negligence in signaling); *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574, Affirmed in (1858) 17 N. Y. 153 (train allowed to attain a dangerous speed); *La Pierre* v. *Chicago & G. T. R. Co.* (1894) 99 Mich. 212, 58 N. W. 69 (car placed so that a long plank had to be used for a gangway, and this broke under the weight of the heavy parcels which the conductor required the servant to carry); *Robinson* v. *Houston & T. C. R. Co.* (1877) 46 Tex. 540 (ordering brakeman to cut a train while in motion); *Norfolk & W. R. Co.* v. *Honchins* (1897) 95 Va. 308, *sub nom. Norfolk & W. R. Co.* v. *Swain*, 40 L. R. A. 859, 25 S. E. 578; *Woodson* v. *Western V. V. & P. R. Co.* (1895) 117 N. Y. 508, 42 N. E. 999, Reversing (1893) 5 Misc. 457, 25 N. Y. Supp. 977.

A conductor and an employee hired to do "any and all kinds of labor," including coupling. *Wilson* v. *Madison etc. R. Co.* (1862) 18 Ind. 226.

See also the cases cited under subd. (d), *infra*, and those cited in the next chapter, in which the relation of coservice, as between the conductor and the other employees on his train, is assumed to exist, and the question discussed is merely whether he is a vice principal. §§ 520, note 1, subd. (b), 524, note 2, subd. (c), *post*.

Engineer and brakeman. *McDonald* v. *Norfolk & W. R. Co.* (1897) 95 Va. 98, 27 S. E. 821; *Central Trust Co.* v. *East Tennessee, V. & G. R. Co.* (1895) 69 Fed. 357; *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574, Affirmed in (1858) 17 N. Y. 153; *East Tennessee, V. & G. R. Co.* v. *Smith* (1890) 89 Tenn. 111, 14 S. W. 1077; *South Florida R. Co.* v. *Price* (1893) 32 Fla. 46, 13 So. 638; *Boatwright* v. *Northeastern R. Co.* (1886) 25 S. C. 128; *Hagins* v. *Cape Fear & Y. Valley R. Co.* (1890) 106 N. C. 537, 11 S. E. 590 (complaint demurrable which alleged that at the time of the injury the locomotive was temporarily abandoned by the engineer in charge, and with his consent and by his direction was moved and operated by a boy of inexperience and careless habits, who was incompetent, reckless, careless, and negligent, which was the proximate cause of the plaintiff's injury); *Evans* v. *Chamberlain* (1893) 40 S. C. 101, 18 S. E. 213; *Moseley* v. *Chamberlain* (1861) 18 Wis. 706 (Overruling *Chamberlain* v. *Milwaukee & M. R. Co.* [1860] 11 Wis. 239 by a majority of two judges to one); *Pittsburgh, C. & St. L. R. Co.* v. *Ramey* (1882) 37 Ohio St. 665; *Mason* v. *New York C. & H. R. R. Co.* (1874) 67 Barb. 493; *Wallis* v. *Mongan's L. & T. R. & S. S. Co.* (1886) 38 La. Ann. 15; *Hoover* v. *Beech Creek R. Co.* (1893) 154 Pa. 362, 26 Atl. 315, *South Florida R. Co.* v. *Reese* (1893) 32 Fla. 212, 13 So. 436; *Chaddick* v. *Lindsay* (1897) 5 Okla. 616, 49 Pac. 940; *Indiana R. & W. R. Co.* v. *Dacka* (1886) 110 Ind. 75, 10 N. E. 631, *Summerhays* v. *Kansas P. R. Co.* (1875) 2 Colo. 484 (cars started without a signal); *Fowler* v. *Chicago & N. W. R. Co.* (1884) 61 Wis. 159, 21 N. W. 10 (train was run again[st] [illegible]); *Alabama & T. R. Co.* v. *Waller* (1872) 48 Ala. 459; *Hoard* v. *Lake Shore & M. S. R. Co.* (1882) 49 Mich. 495, 13 N. W. 832 (engineer obli[illegible] signals).

Engineer and fireman. *Hobbs* v. *At-*

lantic & N. C. R. Co. (1890) 107 N. C. 1, 9 L. R. A. 838, 12 S. E. 124; *Murray v. South Carolina R. Co.* (1841) 1 McMull. L. 385, 36 Am. Dec. 268; *Gulf, C. & S. F. R. Co. v. Bloha* (1889) 73 Tex. 637, 4 L. R. A. 764, 11 S. W. 867; *New Jersey & N. Y. R. Co. v. Yonay* (1892) 1 C. C. A. 428, 1 U. S. App. 96, 49 Fed. 723; *Henry v. Lake Shore & M. S. R. Co.* (1892) 49 Mich. 495, 13 N. W. 832; *South Florida R. Co. v. Price* (1893) 32 Fla. 46, 13 So. 638; *Parrish v. Pensacola & L. R. Co.* (1891) 28 Fla. 251, 9 So. 696; *South Florida R. Co. v. Weese* (1893) 32 Fla. 212, 13 So. 436; *Mulligan v. Montana Union R. Co.* (1897) 19 Mont. 135, 47 Pac. 795. (That the engine is running without any train attached makes no difference in this instance.) *Baltimore & O. R. Co. v. Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914.

Fireman and brakeman. *Louisville & N. R. Co. v. Kelly* (1894) 11 C. C. A. 260, 24 U. S. App. 103, 63 Fed. 407; *Galveston, H. & S. A. R. Co. v. Faber* (1885) 63 Tex. 344; *Kersey v. Kansas City, St. J. & C. B. R. Co.* (1883) 79 Mo. 362; *Greenwald v. Marquette, H. & O. R. Co.* (1882) 49 Mich. 197, 13 N. W. 513; *South Florida R. Co. v. Price* (1893) 32 Fla. 46, 13 So. 638.

Two brakemen. *Young v. West Virginia, C. & P. R. Co.* (1890) 42 W. Va. 112, 24 S. E. 615; *Cole v. Rome, W. & O. R. Co.* (1893) 72 Hun, 467, 25 N. Y. Supp. 276 (in the performance of their ordinary duties); *Hayes v. Western R. Corp.* (1849) 3 Cush. 270 (here the negligent brakeman was acting as conductor); *Chicago, B. & Q. R. Co. v. Howard* (1895) 45 Neb. 570, 63 N. W. 872.

Trainmen and engine wipers. *Ewald v. Chicago & N. W. R. Co.* (1888) 70 Wis. 420, 36 N. W. 12; *Spencer v. Ohio & M. R. Co.* (1892) 130 Ind. 184, 29 N. E. 915 (engine negligently started).

Engineer and fireman and man "staking" cars. *Watts v. Hart* (1893) 7 Wash. 178, 34 Pac. 423, 774.

Trainmen and expressman hired for the trip to act as brakeman. *Chamberlain v. Milwaukee & M. R. Co.* (1860) 7 Wis. 425. Upon the second appeal, (1860) 11 Wis. 248, the servant was held entitled to recover, the doctrine of common employment being repudiated. But the law in Wisconsin afterwards became what it was declared to be on the first appeal, the repudiated doctrine having been reinstated by the case of *Chamberlain* (1861) 18 Wis. 167.

A conductor, coupler, switchman, pin puller, and engineer, all engaged in drilling cars in a railroad yard, are fellow servants. *Central R. Co. v. Keegan* (1897) 27 C. C. A. 105, 51 U. S. App. 489, 82 Fed. 174. So laid down on the authority of the Supreme Court ([1895] 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269), to which the case had been certified for an opinion.

The engineer of a locomotive engaged in shifting, and one of the shifting crew. *Crosscell v. Wilmington & A. R. Co.* (1899) 2 Penn. (Del.) 210, 43 Atl. 629.

An engine driver and a laborer engaged in uncoupling cars. *Robertson v. Linlithgow Oil Co.* (1891) 18 Sc. Sess. Cas. 4th Series, 1221 (engine driven, without warning, against cars between which plaintiff was. Action at common law dismissed; issue allowed under employer's liability act).

(c) *Servants working on different trains*.—In an early English case Pollock, C. B., expressed a doubt, *obiter*, whether the drivers of the engines of different trains are engaged in a common object. *Wather v. South Eastern R. Co.* (1863) 2 Hurlst. & C. 102, 9 Jur. N. S. 501, 32 L. J. Exch. N. S. 205, 11 Week. Rep. 731, 8 L. T. N. S. 325.

But this doubt has long since been resolved against the servant, and it is now settled that trainmen, although engaged on different trains, are fellow servants. *Norfolk & W. R. Co. v. Honchins* (1897) 95 Va. 398, *sub nom. Norfolk & W. R. Co. v. Swaine*, 46 L. R. A. 359, 28 S. E. 578; *Pittsburgh, Ft. W. & C. R. Co. v. Ruby* (1874) 38 Ind. 294; *Cooper v. Mullins* (1860) 30 Ga. 146, 76 Am. Dec. 638, and the cases cited below.

The assumption of the risks of one another's negligence is predicated on the obvious ground that they are "aware that many other trains must pass over the same track as their own train." *Thoa v. Pittard* (1894) 10 C. C. A. 352, 8 U. S. App. 597, 62 Fed. 232. Compare the extract from the opinion in *Howard v. Denver & R. G. R. Co.* (1886) 26 Fed. 837, *infra*.

This rule has been applied in the case of a conductor of one train and the employees on another. *Oakes v. Mase* (1897) 165 U. S. 363, 41 L. ed. 746, 17 Sup. Ct. Rep. 345. Affirming *Northern P. R. Co. v. Mase* (1894) 11 C. C. A. 63, 27 U. S. App. 238, 63 Fed. 114. *Baltimore & O. R. Co. v. Andrews* (1892) 47 L. R. A. 100, 1 C. C. A. 630, 6 U. S. App. 59, 50 Fed. 728 (disregarding *Chicago, M. & St. P. R. Co.*

v. *Ross* [1884] 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, on the ground that the brakeman was not subject to the authority of the conductor or engineer of the other train); *Austin* v. *Chicago, P. & St. L. R. Co.* (1892) 50 Fed. 185, Limiting *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184; *Northern P. R. Co.* v. *Poirier* (1895) 15 C. C. A. 52, 29 U. S. App. 583, 67 Fed. Rep. 881. Following *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322; *St. Louis, I. M. & S. R. Co.* v. *Needham* (1894) 25 L. R. A. 833, 11 C. C. A. 56, 27 U. S. App. 227, 63 Fed. 107 (switch negligently left open in breach of rules); *Becker* v. *Baltimore & O. R. Co.* (1893) 57 Fed. 188; *Pleasants* v. *Raleigh & A. Air-Line R. Co.* (1897) 121 N. C. 492, 28 S. E. 267; *Baltimore Trust & Guaranty Co.* v. *Atlanta Traction Co.* (1895) 69 Fed. 358 (a case of the crews of two different street cars); *Michigan C. R. Co.* v. *Dolan* (1875) 32 Mich. 510; *Pittsburgh, Ft. W. & C. R. Co.* v. *Ruby* (1871) 38 Ind. 294 (rule conceded—case actually turned on negligence *vel non* in retaining the conductor); *Chicago, St. L. & N. O. R. Co.* v. *Doyle* (1883) 60 Miss. 977; *Denver & R. G. R. Co.* v. *Sipes* (1896) 23 Colo. 226, 47 Pac. 287; *Enright* v. *Toledo, A. A. & N. M. R. Co.* (1892) 93 Mich. 409, 53 N. W. 536 (injured person in this case was the conductor).

The theory that the conductor of one train should be regarded as belonging to a different department from the men on another train (see subtitle C, *infra*) has been explicitly repudiated in Virginia and Mississippi. *Norfolk & W. R. Co.* v. *Donnelly* (1892) 88 Va. 853, 14 S. E. 692 (misconstrued right of way order caused collision); *McMaster* v. *Illinois C. R. Co.* (1887) 65 Miss. 264, 4 So. 59.

Coservice has also been held to exist between a brakeman on one train and a fireman on another. *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322 (engineer ran engine too fast, and gave no notice of its approach at a switch); *Whatley* v. *Philadelphia, W. & B. R. R. Co.* (1894) 1 Marv. (Del.) 305, 30 Atl. 650 (brakeman did not signal the other train). And between two engineers, *Van Avery* v. *Union P. R. Co.* (1888) 35 Fed. 40; *Chicago, St. L. & N. O. R. Co.* v. *Doyle* (1883) 60 Miss. 977. And between the engineer of a "wild engine" and a brakeman on another train, *Healey* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 136, 37 Atl. 676. And between a fireman on a passenger train and the engineer of a light engine of the same company, *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

In the last case the reasoning of Brewer, J., was as follows: "Neither can it be said that Ryan and decedent were engaged in a different class of work. Both were employed in the movement of trains,—the same kind of service. True, they were on different trains, and at the time of the accident had no opportunity of noticing the conduct of each other until too late to prevent the collision. But, being engaged in the same kind of service and on the same division, they must naturally have often been thrown into contact and had ample opportunities for mutual supervision. To subdivide beyond the class of service, into the place of work, would carry the exception beyond well-recognized limits. It would make the trainmen on one train not fellow servants with those on another; the carpenters and machinists in one room strangers in service to those of another; one gang of section men not coemployees with another, and all because, at the time, their places of work happened to be different. In *Garraby* v. *Kansas City, St. J. & C. B. R. Co.* (1885) 25 Fed. 258, Mr. Justice Miller carefully notes the complete separation in the class of service of the two employees, while in *Randall* v. *Baltimore & O. R. Co.* (1883) 109 U. S. 478, 27 L. ed. 1003, 3 Sup. Ct. Rep. 322, to be considered hereafter, the Supreme Court treated the fact that the employees were working on different trains as entirely immaterial. He who engages in train service knows that other trains besides his will be running, and may fairly be considered as contracting to take the risk of the negligence of the employees managing such trains. He must expect to be employed now on one train and now on another, to be thus thrown into contact with the other employees in that service, to know, himself, what is proper care in such work, and to be able to detect any evidence of carelessness on the part of those in like service. Every consideration which exempts the master from liability for the negligence of a coemployee seems to bind those in the same class of service together as fellow servants."

See also *Grand Trunk R. Co.* v. *Cummings* (1882) 106 U. S. 700, 27 L. ed.

256, 1 Sup. Ct. Rep. 493, where the engineer of one train was assumed to be a coservant of all the employees on another; and *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182 where the departmental rule was expressly rejected as not applicable to servants on different trains.

(d) *Servants handling ordinary trains, and servants employed in the repair or construction of the permanent way and its appurtenances.* From one point of view these servants are in a common employment because they are "engaged in the same common object,—the safe conveyance of passengers to the end of their journey." *Wallace* v. *South Eastern R. Co.* (1863) 2 Hurlst. & C. 401, 32 L. J. Exch. N. S. 205, 9 Jur. N. S. 591, 8 L. T. N. S. 325, 11 Week. Rep. 731 (per Pollock, C. B. during the argument of counsel, p. 406). Or, as other cases put it, "the common purpose of the service is the movement of trains." *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, 3 L. R. A. 363, 41 N. W. 750. Or they are "engaged in the common enterprise of maintaining and operating the road." *Boldt* v. *New York C. R. Co.* (1858) 18 N. Y. 432.

In *Coon* v. *Syracuse & U. R. Co.* (1849) 6 Barb. 231, the supreme court pointed out that the great object and business of the company was to "transport passengers and freight," and proceeded thus: "To facilitate this business and to render the road capable of performing the business required of it by the public as well as by the interests of the stockholders, a great many different agents and workmen are necessarily employed. To these are assigned various duties; to some are assigned the duty of examining the track of the road, to others the keeping the road in repair; some are engineers and some brakemen; some are conductors and some switchmen; but they are all necessary and indispensable for carrying out the primary object, to wit, the safe and speedy transportation of passengers and freight over the road. They are all engaged in one general business and common enterprise." This decision was Affirmed (1851) 5 N. Y. 492.

From [illegible] point of view the same result follows from the fact that "the conduct of one necessarily affects the duty of the other." *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, 3 L. R. A. 363, 41 N. W. 750. That is to say, though they are in different departments they are, "by the very nature of their employment, brought into frequent contact, and the risk of negligence by the one must therefore be considered to have been in the contemplation of the other when service under the common master was accepted." *Norfolk & W. R. Co.* v. *Nickels* (1895) 91 Va. 105, 21 S. E. 342. See also *Northern P. R. Co.* v. *Hambly* (1891) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983; *Boldt* v. *New York C. R. Co.* (1858) 18 N. Y. 432.

The following employees are therefore held to be coservants:

Track repairers and trainmen generally. *Gormley* v. *Ohio & M. R. Co.* (1880) 72 Ind. 31; *Gillshannon* v. *Stony Brook R. Co.* (1854) 10 Cush. 228; *Whalen* v. *Ind. Rock & I. R. Co.* (1858) 8 Ohio St. 249. *Ryan* v. *Cleveland & T. R. Co.* (1859) 11 Ohio St. 417, 425, 426 (*approved*). *Toledo & S. R. Co.* v. *Mitchell* (1889) 72 Tex. 609, 10 S. W. 598; *Pennsylvania R. Co.* v. *Wachter* (1887) 60 Md. [illegible] (breach of rule to have a headlight [illegible] posed in fog); *Fuller* v. *Grand Trunk R. Co.* (1865) Quebec 1 L. C. L. J. 68 (derailment). Laying down doctrine of common employment without any qualifications [illegible] it is in the common law, and rejecting the rule of the French law. See, however, chapter XLVII., *post*.

Conductors and track repairers. *Northern P. R. Co.* v. *Hambly* (1891) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983 (Diss. Fuller, Ch. J., and Field and Harlan, JJ.); *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603, Affirming *Atchison, T. & S. F. R. Co.* v. *Martin* (1893) 7 N. M. 158, 34 Pac. 536; *Wallace* v. *South Eastern R. Co.* (1863) 9 Jur. N. S. 501, 32 L. J. Exch. N. S. 205, 11 Week. Rep. 731, 8 L. T. N. S. 325, 2 Hurlst. & C. 102; *Coon* v. *Syracuse & U. R. Co.* (1849) 6 Barb. 231, Affirmed (1851) 5 N. Y. 492; *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, 3 L. R. A. 363, 41 N. W. 758. A section man is a fellow servant of a conductor under whose direction he is engaged in removing an obstruction from the track, and the company is not liable for injuries to one occasioned by the negligence of the other, though a rule of the company provides that the section men shall always assist the passage of trains, and, in case of accident or delay, obey the orders of the conductor. *Stevens* v. *Northern P. R. Co.* (1899) 38 C. C. A. 151, 97 Fed. 255.

Conductor and a laborer employed to remove snow and other obstructions

from the track, and under the immediate control of a roadmaster. *Fagundes* v. *Central P. R. Co.* (1889) 79 Cal. 97, 3 L. R. A. 824, 21 Pac. 437, diss. Paterson, J.

Brakeman and track repairers. *Connelly* v. *Minneapolis Eastern R. Co.* (1887) 38 Minn. 80, 35 N. W. 582; *Lovenger* v. *Lake Shore & M. S. R. Co.* (1895) 104 Mich. 80, 62 N. W. 137; *Slattery* v. *Toledo & W. R. Co.* (1864) 23 Ind. 81.

Brakeman and servant making repairs in a pit between the tracks. *Filbert* v. *Delaware & H. Canal Co.* (1890) 121 N. Y. 207, 23 N. E. 1104 (pit was left uncovered and brakeman fell in).

Brakeman and servant employed to nail on the bridges, boards inscribed with the number thereof. *Austin & N. W. R. Co.* v. *Beatty* (1894) 6 Tex. Civ. App. 650, 24 S. W. 634.

Engineers and track repairers. *Burrell* v. *Gowen* (1893) 134 Pa. 527, 19 Atl. 678 (assumed in decision); *Connelly* v. *Minneapolis Eastern R. Co.* (1887) 38 Minn. 80, 35 N. W. 582; *Northern P. R. Co.* v. *Handley* (1894) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983; *Walker* v. *Boston & M. R. Co.* (1879) 128 Mass. 8 (roadmaster misplaced a switch); *Van Buskirk* v. *Manhattan R. Co.* (1886) 32 Fed. 278, 23 Blatchf. 422 (engine was run at excessive speed, and injured trackman); *Gigard* v. *Old Colony R. Co.* (1886) 141 Mass. 504, 6 N. E. 751; *Northern P. R. Co.* v. *Charless* (C. C. A.) 162 U. S. 359, 40 L. ed. 999, 16 Sup. Ct. Rep. 848 (approach of train not duly signaled by engineer). Reversing (1892) 2 C. C. A. 380, 7 U. S. App. 359, 51 Fed. 562; *White* v. *Kennon* (1889) 83 Ga. 343, 9 S. E. 1082; *M'Enery* v. *Waterford & K. R. Co.* (1858) 8 Ir. C. L. Rep. 315 (demurrer sustained); *Hastings* v. *Manitou Union R. Co.* (1896) 18 Mont. 493, 46 Pac. 264 (train not stopped soon enough to avoid running over a laborer); *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258; *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1031; *Dale* v. *Delaware & H. Canal Co.* (1891) 27 Jones & S. 367, 14 N. Y. Supp. 630; *Ellington* v. *Beaver Dam Lumber Co.* (1893) 93 Ga. 53, 19 S. E. 21 ("the work of both, when regularly carried on, conducing to the accomplishment of the common object for which they were engaged by the company, viz., the transportation of its own [the defendant's] supplies and products"):

Norfolk & W. R. Co. v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342; *Koehler* v. *Oregon Short Line & U. N. R. Co.* (1891) 21 Or. 130, 27 Pac. 91 (the fact that the section man was working under the direction of the roadmaster was expressly held to make no difference); *Robback* v. *Pacific R. Co.* (1869) 43 Mo. 187. Overruled, so far as Missouri is concerned, by *Sullivan* v. *Missouri P. R. Co.* (1888) 97 Mo. 113, 10 S. W. 852.

Engineer of a train and track inspector hired to pass over a section of track in front of that train. *Sullivan* v. *Mississippi & M. R. Co.* (1860) 11 Iowa, 421.

Engineer and bridge foreman or his subordinates. *St. Louis, S. W. R. Co.* v. *Beason* (1895) 61 Ark. 302, 32 S. W. 1079 (train managed by engineer ran into the car in which the foreman lived); *International & G. N. R. Co.* v. *Ryan* (1891) 82 Tex. 565, 18 S. W. 219 (same accident as in last-cited case); *St. Louis, I. & T. R. Co.* v. *Hedrick* (1888) 72 Tex. 298, 2 L. R. A. 839, 10 S. W. 529.

Section hand and fireman. *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1031; *Lovenger* v. *Lake Shore & M. S. R. Co.* (1895) 104 Mich. 80, 62 N. W. 137; *Whalan* v. *Red River & L. E. R. Co.* (1858) 8 Ohio St. 249 (fireman, while passing wood from the tender, allowed a stick to fall and strike the trackman).

A yardman engaged in sweeping snow from the tracks, and an engineer and brakeman. *Corcoran* v. *New York, N. H. & H. R. Co.* (1899) 36 App. Div. 201, 61 N. Y. Supp. 672 (cars kicked without warning).

A roadmaster and fireman. *Walker* v. *Boston & M. R. Co.* (1879) 128 Mass. 8 (road master misplaced switch).

A machinist employed to keep the pumps, tanks, wells, etc., of a railway company in good working order, and the engineer of a train on which he was being conveyed in the course of employment. *Louisville & N. R. Co.* v. *Stuber* (1901) 54 L. R. A. 696, 48 C. C. A. 149, 108 Fed. 934, Reversing (1900) 102 Fed. 121.

The crew of a train, to which a car containing a bridge builder and repairer, with his assistants and their tools, is attached for the purpose of conveying them to the place where their work is to be done, are fellow servants of the men so conveyed. *Tomlinson* v. *Chicago, R. & Q. R. Co.* (1899) 38 C. C. A. 148, 97 Fed. 252 (train broke apart).

Fireman and employee having duty to keep switches in order. *King* v. *Boston & W. R. Corp.* (1851) 9 Cush. 112.

Track repairer and servants whose duty it is to light the headlights. *Collins* v. *St. Paul & S. C. R. Co.* (1882) 30 Minn. 37, 14 N. W. 60 (track repairer injured).

Trackmen and switchmen. *Michigan C. R. Co.* v. *Austin* (1879) 40 Mich. 247 (switchman thrown off of the engine by jolt on uneven track); *Cincinnati, N. O. & T. P. R. Co.* v. *Mealer* (1892) 1 C. C. A. 633, 6 U. S. App. 86, 50 Fed. Rep. 725 (switchman stumbled on a piece of coal which the section man should have removed).

A track walker engaged in traveling on a railroad velocipede for the purpose of summoning a section crew to assist in clearing away a wreck, and an engineer in charge of an engine traveling over the same road, in the same direction, for the purpose of reaching the nearest turntable, so as to turn his engine and return to assist at the wreck. *Stephani* v. *Southern P. Co.* (1899) 19 Utah, 196, 57 Pac. 34. This decision seems to mark the abandonment of the consociation doctrine which, as is shown by the cases cited in § 507, *post*, had previously prevailed in Utah. Its basis was that both the servants were engaged in a service having the same common object, *viz.*, that of clearing the track, and in department not "so far removed from each other but that the possibility of coming in contact and incurring danger to each other from their negligent acts must have been in contemplation of the plaintiff when he entered the defendant's service."

Motorman on street car and track repairer. *Rittenhouse* v. *Wilmington Street R. Co.* (1897) 120 N. C. 544, 26 S. E. 922 (laying down rule with a view to new trial); *Lundquist* v. *Duluth Street R. Co.* (1896) 65 Minn. 387, 67 N. W. 1006.

Where a section foreman is injured by the negligence of the crew of a freight train and a station agent in loading a car so carelessly that a piece of timber projects outside the track, it is error to submit the case to the jury on the theory that the negligent employees were not fellow servants of the injured one. *Miller* v. *Michigan C. R. Co.* (1900) 123 Mich. 374, 82 N. W. 58.

In *Boldt* v. *New York C. R. Co.* (1858) 18 N. Y. 432, it was held to be immaterial, so far as regards the application of the principle controlling the above cases, whether a laborer was working on a new track laid parallel to an existing one, or on the old one. The court said: "If the plaintiff had been engaged in repairing the old track, and the injury had occurred to him while digging gravel for that purpose, on the site of the new track, by the cars being thrown from the track and falling upon him, his case could not, in principle, have been distinguished from that of a switch tender or other person employed in the company's service about the track, and injured in such service. Nor can I conceive that a different principle would apply in case the same accident occurred while the injured person was employed in preparing a new track on the site of the gravel pit, instead of digging gravel to repair the old track. In each case the liability to injury would be incident to the employment. In accepting service on such a new track, in the case supposed, he must be taken to have known that his employers were engaged in running cars on the old track, and that he was therefore to incur such hazard as might be occasioned by the negligence of their employees. So, in the case at bar, he must be taken to have contracted with reference to the possibility of cars being run on the new track, whenever it became so nearly finished as to render such running practicable."

In one Federal case it was held that trackmen are not fellow servants with trainmen on the same road. *Howard* v. *Delaware & H. Canal Co.* (1889) 6 L. R. A. 75, 40 Fed. 195. The decision was put on the ground that the trainmen "acted for the defendant in the exercise of the control given them over the movements of the train." Wheeler, J., considered that the effect of the *Ross Case* (see § 532, *post*) was that a railroad company is liable to the trainmen of one train for the negligence of those whom it has placed in charge of another train. "If the company," said the learned judge, "is responsible to trainmen for the negligence of those in charge of the track, that it should be held responsible to trackmen for the negligence of those in charge of its trains would seem to directly follow." The present writer ventures to think that the effect of the *Ross Case* is misstated, and that, even if it were correctly stated, there is a distinct *non sequitur* in the further conclusion drawn. The doctrine that a conductor is not a coservant of his subordinates on the train does not by any means involve the corollary that either

he or the other trainmen represent the company as to another class of servants over whom they have no control.

(e) *Servants handling work trains, and servants employed on the permanent way in connection with such trains.*—There is a common employment between the men engaged upon a railroad work train and section hands engaged upon a hand car, in keeping the roadbed in order, although the two bodies of employees are under separate foremen. *Thom* v. *Pittard* (1894) 10 C. C. A. 352, 62 Fed. 232, 8 U. S. App. 597 ("employed for the same general purpose by the same master, and working to produce the same result"). And between a section master, a trackman, and a trainman, where all three are engaged in looking after and removing obstructions upon a railroad due to a storm. *Wellman* v. *Oregon Short-Line & U. N. R. Co.* (1892) 21 Or. 530, 28 Pac. 625.

A fortiori, where a train under the control of a single superintending officer is used for the purpose of facilitating the repair or construction of a railway track, bridges, etc., the servants operating the train are regarded as being in the same general service with the servants who actually do the work of repair or construction, and the master is not liable for injuries received by the latter class of employees owing to the negligence of the former.

This principle bars the action of the servant, both when he was actively engaged, at the time of the injury, in the performance of his work (*Evansville & R. R. Co.* v. *Henderson* [1893] 134 Ind. 636, 33 N. E. 1021 [laborer injured by a derailment while he was throwing ties from a moving train]; *St. Louis, I. M. & S. R. Co.* v. *Shackelford* [1883] 42 Ark. 417 [train started without warning while plaintiff was shifting a rail from one car to another]; *Corona* v. *Galveston, H. & S. A. R. Co.* [1891; Tex.] 17 S. W. 384 [laborer injured by omission of conductor of work train to protect it by a flag while the men were at work on the track]; *Houston & T. C. R. Co.* v. *Rider* [1884] 62 Tex. 267 [section hand was in a flat car, stationary on a siding, when it was run into by a construction train in connection with which he was working]; *Parrish* v. *Pensacola & A. R. Co.* [1891] 28 Fla. 251, 9 So. 696 [engineer put an unskilful man in charge of the engine, and a ...cer was injured in consequence— ...backed against car which plaintiff was unloading]), and when he was being simply transported from one point on the line to another, provided he was still on duty and subject to the control of the master's representative. See cases cited in chapter XXXIII., *post*, where the general question of the position of servants on duty but not engaged in active work is discussed.

(f) *Servants engaged in handling trains and in giving signals.*—A brakeman and a flagman are coservants. *Cooper* v. *Milwaukee & P. du Ch. R. Co.* (1869) 23 Wis. 668. So are a flagman and a switch tender. *Sammon* v. *New York & H. R. Co.* (1875) 62 N. Y. 251 (misplaced switch allowed train to run over flagman).

(g) *Servants belonging to regular train crews, and switchmen.*—There is common employment between switchmen and trainmen. See *Miller* v. *Southern P. Co.* (1892) 20 Or. 285, 26 Pac. 70 (negligence complained of was that of a switchman, or of the employees upon another train charged with the duty of switchmen, in failing properly to close a switch after the passage of the latter train, or to discover and report that the switch was out of repair).

Coservice exists between a switchman and an engineer. *Satterly* v. *Morgan* (1883) 35 La. Ann. 1166; *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339; *Memphis & C. R. Co.* v. *Thomas* (1875) 51 Miss. 637; *Naylor* v. *New York C. & H. R. R. Co.* (1888) 33 Fed. 801 (switch left open); *Gulf, C. & S. F. R. Co.* v. *Warner* (1896; Tex. Civ. App.) 36 S. W. 118; *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 54 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266; *East Tennessee, V. & G. R. Co.* v. *Gurley* (1883) 12 Lea, 46 (common object said to be that "of keeping the train on the main track and bringing it to its destination"); *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, per Lord Colonsay, *arguendo*.

A switchman is a fellow servant of a fireman. *Hudson* v. *Charleston, C. & C. R. Co.* (1893) 55 Fed. 248 (in charge to jury); *Parker* v. *New York & N. E. R. Co.* (1895) 18 R. I. 773, 30 Atl. 849 (switch left open).

A switchman and a conductor are coservants. *Harvey* v. *New York C. & H. R. R. Co.* (1890) 32 N. Y. S. R. 817, 10 N. Y. Supp. 645 (conductor injured).

A switchman is a fellow servant of a brakeman. *Ponton* v. *Wilmington & W. R. Co.* (1858) 51 N. C. (6 Jones L.)

245; *Slattery* v. *Toledo & W. R. Co.* (1864) 23 Ind. 81, quoting from *Wright* v. *New York C. R. Co.* (1862) 25 N. Y. 562. And of a baggage master. *Roberts* v. *Chicago, St. P. M. & O. R. Co.* (1885) 33 Minn. 218, 22 N. W. 389 (cooperation of a switchman necessary to the successful management of trains). And of a horse-car driver. *Donnelly* v. *New York & H. R. Co.* (1896) 3 App. Div. 408, 38 N. Y. Supp. 709 (misplaced switch caused car to turn suddenly, and driver was thrown off); *Boudeau* v. *Grand Trunk R. Co.* (1866; Quebec) 1 L. C. L. J. 186 (misplaced switch), adopting rule of English law.

A switchman and a fireman are coservants in such a sense that the latter cannot recover for the negligence of the former in using a defective link. The court declined to accept the contention that the switchman was a vice principal merely because the inspection of the appliance was incidental to his duty. *St. Louis, I. M. & S. R. Co.* v. *Brown* (1899) 67 Ark. 295, 54 S. W. 865.

In *Nashville, C. & St. L. R. Co.* v. *Foster* (1882) 10 Lea, 351, the cause of action having arisen in Alabama, the court held that a car inspector and a brake repairer were fellow servants of a brakeman, citing *Thomas* v. *Mobile & O. R. Co.* (1868) 42 Ala. 672. For the Tennessee doctrine, see subtitle C, *infra*.

(h) *Servants handling cars and servants inspecting or repairing them.*—That the defense of common employment is available when car inspectors or car repairers are injured by the negligence of servants operating trains is well settled.

They are held to be fellow servants of a conductor. *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220 (cars "kicked" back after car inspector had notified conductor to leave a space open between the cars); *St. Louis, I. M. & S. R. Co.* v. *Rice* (1888) 51 Ark. 467, 4 L. R. A. 173, 11 S. W. 699.

Of a yard master and head brakeman employed in moving cars to and fro in the yards for the purpose of having them repaired. *Bessel* v. *New York C. & H. R. R. Co.* (1877) 70 N. Y. 171 ("engaged in the same common work and for the same common purpose"); *Gulf, C. & S. F. R. Co.* v. *Kizziah* (1893) 86 Tex. 81, 23 S. W. 578 (failure to set brakes on cars which rolled against one which plaintiff was repairing); *Campbell* v. *Pennsylvania R. Co.* (1886; Pa.) 2 Cent. Rep. 46, 2 Atl. 489,

Of a yard or switch engineer. *Unfried* v. *Baltimore & O. R. Co.* (1890) 34 W. Va. 260, 12 S. E. 512; *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 51 Ark. 289, 304, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266; *Chicago & I. R. Co.* v. *Murphy* (1870) 53 Ill. 336, 5 Am. Rep. 48; *Valtez* v. *Ohio & M. R. Co.* (1877) 85 Ill. 500 (car repairer bound to know that he might be called on to make repairs on a track, and thus be exposed to the risks of the acts of engine-drivers and others whose business called them to the same track. In Illinois the two cases just cited seem to be still law as regards switch engineers, but not as to engineers of ordinary trains. See § 506, note 1, subd. (f) *infra*. In a case where a car repairer was injured owing to the fact that a brakeman dropped a larger train of cars than he could control onto the inclined track where the car under repair was standing recovery was denied on the ground that plaintiff was fully cognizant of the danger to which he was exposed, from negligently dropping in cars on the tracks where he was from time to time at work, and the precautions which were taken to avert such danger. He knew that his safety depended on the care that was exercised by his fellow employees. *Campbell* v. *Pennsylvania R. Co.* (1886; Pa.), 2 Atl. 489. And of a switchman. *Corcoran* v. *Delaware, L. & W. R. Co.* (1891) 126 N. Y. 673, 27 N. E. 1022 (car allowed to run against one under repair).

The cases in which the delinquent servants were the inspectors or repairers, and in which, conceding the existence of common employment, the question arises whether they were discharging a nonassignable duty of the masters, are discussed in chapter XXXI., *post*.

(i) *Servants handling trains and servants performing miscellaneous duties in yards.*—Coservice has been held to exist between the following classes of employees:

The general yard master and a yard foreman. *Cincinnati, N. O. & T. P. Ry. Co.* v. *Gray*, 50 L. R. A. 47, 41 C. C. A. 535, 101 Fed. 623 (negligence was in regard to directing operation of train).

The engineer of any locomotive used on the road and one whose duties are to take the number of each car coming into a station. *Bynhring* v. *Chesapeake & O. R. Co.* (1892) 37 W. Va. 502, 16 S. E. 437. "There was," said the court, "a natural and necessary connection between the classes of the service they rendered, bringing them into contact with

ach other in the same place, in the exe
ution of the master's business; . . .
nd it is no matter that the work was
ssimilar."

The engineer of a freight train, and a
ard clerk engaged in his duty of tak-
g a record of the seals of the cars in
e yard. *New York & N. E. R. Co.* v.
yde (1893) 56 Fed. 188 (injury caused
backing of train).

An engineer and an engine wiper.
uth Florida R. Co. v. *Weese* (1893) 32
la. 212, 13 So. 436 (engineer was negli-
nt in shifting the trains in the yard).

A brakeman and the servant whose
uty it was to fill the sand-box on the
gine. *Louisville, A., O. & T. R. Co.* v.
tly (1889) 67 Miss. 255, 7 So. 351
sand-box insufficiently filled).

An engineer and an employee whose
uties partly consist in coupling and un-
oupling cars. *Wilson* v. *Madison, etc.
Co.* (1862) 18 Ind. 226.

Any workman employed in an engine
rd, and an engineer. *Texas & P. R.
o.* v. *Harrington* (1884) 62 Tex. 597.

(j) *Servants engaged solely in the construction or maintenance of the permanent way and its appurtenances.*—The following classes of servants have been held to be in a common employment:

A tracklayer and a servant engaged
ballasting the road. *Lovegrove* v.
London, B. & S. C. R. Co. (1864) 16 C. B. N. S. 669, 10 Jur.
. S. 879, 33 L. J. C. P. N. S. 329, 12
eek. Rep. 988, 10 L. T. N. S. 718 (non-
uit approved in case of accident caused
y the insufficiency of the number of
eepers laid). "It is clear," said Erle,
h. J., "that the platelayer whose negli
ence caused it [the damage] was a fel-
w workman of the plaintiff, and that
oth were engaged in one common occu-
ation. The thing to be done was to
arry the ballast from the pit to the
ompany's line, and the co-operation of
he platelayers and the laborers was nec
ssary to bring about that result." This
ase is reported with *Gallagher* v. *Piper*,
6 C. B. N. S. 669, 33 L. J. C. P. N. S.
29, involving the same facts.

Two section hands. *International & G. N. R. Co.* v. *Tarver* (1888) 72 Tex.
08, 11 S. W. 1043.

A trackwalker and a la[illegible] removing
now. *Fagundes* v. *Central P. R. Co.* (1889) 79 Cal. 97, 3 L. R. A. 824, 21
Pac. 437.

A member of one section gang and the
ection boss of another gang, employed
y the same railway company. *Clarke*
v. *Pennsylvania Co.* (1892) 132 Ind. 199, 17 L. R. A. 811, 31 N. E. 808 ("engaged in the same general service and the same line of duty").

A laborer blasting rock to obtain materials for riprapping and a telegraph lineman repairing poles broken down by the fragments detached by the shots. *Neal* v. *Northern P. R. Co* (1894) 57 Minn. 365, 59 N. W. 312.

A stone mason and a carpenter employed at the common task of constructing a bridge, though they are under different foremen. *Bier* v. *Jeffersonville, M. & I. R. Co.* (1892) 132 Ind. 78, 31 N. E. 471.

The members of a gang of laborers loading rails on a car. *Coyne* v. *Union P. R. Co.* (1889) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382.

Section men working on a railroad track and other employees of the same company employed on bridge work. *Brunell* v. *Southern P. Co.* (1899) 34 Or. 256, 56 Pac. 129.

All the workmen on a grade, consisting of team drivers drawing dump cars, men working in a cut filling the cars, and men unloading them, and the foreman assisting the man injured to work on a trestle the fall of which injured him,—are fellow servants. *Lindrall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020 (see § 520, note 1, subd. (f), *post*, as to this case in the Federal courts). The court said: "The work which the defendants were engaged in was grading a railroad, and they employed various servants in different departments of labor on that work, but all liable to be called, upon the orders of the foreman, from one department to another. All those engaged in these different departments bore to each other the relation of fellow servants. They were all serving the same master, under the same control, and all engaged in the same general work. The thing to be done was the building of the road, and the co-operation of all the employees in each department of the work was necessary to bring about that result."

(k) *Servants loading cars and servants handling them.* — These were held to be fellow servants in *Bailey* v. *Delaware & H. Canal Co.* (1898) 27 App. Div. 305, 50 N. Y. Supp. 87. The court said: "The car is furnished for the express purpose of being loaded and run over the road, and the brakeman is one of the employees, and the man who loads and inspects the loading is another, whose duty it is to carry out that

purpose. Each uses, within his own sphere, the car furnished by the master, and both are engaged in carrying out the purpose for which it is furnished."

In an early Illinois case, where a contractor was to deliver wood to a railroad company, the company to furnish the equipment to move it, and the men on the train to be subject to the direction and control of the contractor, who could stop them at any time, one of the servants employed by him to load wood upon the car was thrown off and killed. It was held that no recovery could be had by the administratrix for his death, as the parties were all servants of the company. *Illinois C. R. Co.* v. *Cox* (1878) 21 Ill. 20, 71 Am. Dec. 298. It was doubtless proper to absolve the railway company under such circumstances, but not on the ground stated. If anyone was liable, it was the contractor, whose servants, for the time being, all the parties clearly were, upon the facts as stated. The contractor, under the later Illinois doctrine as to consolidation (§ 506, note 1, subd. (i), *infra*), would not have been protected by the defense of common employment; but apart from that doctrine, there could be no recovery, as the New York case last cited shows.

(l) *Servants engaged in loading cars, and trackmen.*—In one case, on the specific ground that distinction of departments will not prevent exoneration of the master, recovery has been denied where the plaintiff was engaged in repairing a track, and the injury was caused by the negligence of another servant of the company, in so piling wood upon a tender and in so running the train that a stick of wood was thrown from the tender, striking the plaintiff. *Foster* v. *Minnesota C. R. Co.* (1869) 14 Minn. 360, Gil. 277.

In another case involving similar facts, the distinction of departments was not referred to, and, merely on the ground that the servants were in the same grade of employment, it was held that coal heavers, or firemen who load coal upon tenders, are fellow servants of a trackwalker. *Schultz* v. *Chicago & N. W. R. Co.* (1887) 67 Wis. 616, 58 Am. Rep. 881, 31 N. W. 321.

(m) *Servants employed in the mechanical departments of railways.*—The following employees have been held to be coservants:

A workman in the repair shop and another workman employed to bring materials to the shop. *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50.

A man employed as a sweeper in a roundhouse and other employees working therein. *Manning* v. *Burlington, C. R. & N. R. Co.* (1884) 64 Iowa, 240, 20 N. W. 169.

Two car repairers. *Gulf, C. & S. F. R. Co.* v. *Kizziah* (1893) 86 Tex. 81, 23 S. W. 578 (failure to set brake on a car caused it to roll against one which plaintiff was repairing).

Foreman of gangs in railroad department shops, and those running cars in and out of the shops to take in supplies. *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50.

A founder in a blast furnace in charge of the inside work of such furnace is a fellow servant of an engineer of a locomotive used in moving cars on the premises of the company, although such founder's department and the department in which the engineer works are separate and under the charge of different foremen. *Adams* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 44 N. W. 270 (plaintiff injured by obstruction of crossing and sudden starting of cars without blowing whistle).

In an early case it was held that an engine driver and an engineer whose duty it is to keep locomotives in repair are fellow servants. *Hubgh* v. *New Orleans & C. R. Co.* (1851) 6 La. Ann. 496, 54 Am. Dec. 565. But under the modern doctrine as to the nonassignability of certain of the master's duties (not here referred to), the master would now be held liable under these circumstances. See § 568, *post*.

(n) *Servants of municipal corporations.*—Whether a steepleman in the employ of a city council was a fellow servant of a carpenter engaged to do repairs in the steeple was left undecided in *Conlin* v. *Charleston* (1868) 15 Rich. L. 201 (carpenter left trap door open,—the case, in this particular point of view, being made to turn upon the correctness of the instruction given to the jury).

(o) *Servants in stores.*—(See also subd. (b), *supra*.) Porters employed in a store are fellow servants. *Beyer* v. *Victor* (1893) 51 N. Y. S. R. 83, 22 N. Y. Supp. 392.

(p) *Servants working on stage coaches.*—The driver and guard of a stage coach are coservants. *Bartonshill Coal Co.* v. *Reid* (1854) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, per Lord Colonsay, *arguendo*.

(q) *Servants in mills, factories, and similar establishments.* — A woodcutter and a locomotive engineer in charge of

a train used for the purpose of hauling timber to a sawmill, and of transporting employees to their respective places of work, are fellow servants. *Bailey* v. *Garbutt* (1900) 112 Ga. 288, 37 S. E. 360.

An engineer in a sawmill and the night watchman therein are coservants. *McCosker* v. *Hilton & D. Lumber Co.* (1900) 110 Ga. 328, 35 S. E. 369.

An engineer in a sawmill is a fellow servant of an employee whose duty it is, during the noon hour, to go down into the box of the lower band-saw wheel, and clean out the sawdust. *Bergstrom* v. *Staples* (1890) 82 Mich. 651, 46 N. W. 1035 (engineer started machinery while the other servant was in the box).

The head carpenter at a mill, although engaged in making repairs on his master's vessel, which is close by, is still a fellow servant with a mill hand, at least while the carpenter is engaged in the mill sawing lumber for such repairs. *Sapperd* v. *Carlson* (1890) 1 Wash. 29, 23 Pac. 830.

Employees in and about a flouring mill, engaged in precisely the same business by the same employer for the accomplishment of a common object, none of whom have any control or authority over the others, are co-servants. *Schmidt* v. *Leistekow* (1889) 6 Dak. 386, 43 N. W. 820.

Employees in charge of flour rolling mills are fellow servants with another employee engaged in operating a feed mill on the same floor; and this relation continues when the employees in charge of the flouring mill are detailed to exchange the rollers in the feed mill for those that are sharper. *Frazer* v. *Stott* (1899; Mich.), 6 Det. L. N. 325, 79 N. W. 896.

An engineer in a rolling-mill is a coservant of an operative engaged in heating nail-iron. *Caldwell* v. *Brown* (1866) 53 Pa. 453 (explosion). And of a workman engaged on the rollers. *Philadelphia Iron & S. Co.* v. *Davis* (1886) 111 Pa. 597, 56 Am. Rep. 305, 4 Atl. 513 (engineer continued to work with fly wheel which he knew to be in a dangerous condition—plaintiff was struck by a fragment of one of the clamps which broke).

A chemist employed in a paper mill, without authority or control over the employees or machinery, and himself under the authority of a general superintendent, is a fellow servant with an employee engaged in working at the machinery. *Wilson* v. *Hudson River Water Power & Paper Co.* (1893) 71 Hun, 292, 24 N. Y. Supp. 1072 (water gates opened by chemist).

A second hand or second foreman under the regular foreman of the machine shop department of a cotton factory, who takes his orders from his immediate foreman or the general superintendent, is, while employed about his work in the machine shop, and while passing across a yard on the ground, a fellow servant with the overseer of the slashing and dressing room, in the upper part of the factory. *Brodeur* v. *Valley Falls Co.* (1889) 16 R. I. 448, 17 Atl. 54 (injury caused by throwing down of empty barrel).

An engraver and printer is a fellow servant of an engineer in charge of an engine furnishing heat and power to the same establishment. *Purling* v. *Hoskins* (1890) 132 Pa. 617, 19 Atl. 301 (injury sustained by falling through a trap door carelessly left unfastened by the engineer, to whom it served as a regular means of access to the engine room).

An engineer and an employee directed to clean the engine are coservants. *Spencer* v. *Ohio & M. R. Co.* (1892) 130 Ind. 181, 29 N. E. 915 (machinery started without warning).

The man who draws the red hot iron from the forge, and the one who hammers it into shape, are coservants. *Bartonshill Coal Co.* v. *Reid* (1854) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, per Lord Colonsay, *arguendo*.

Employees engaged in cleaning out a gearing pit in a factory are fellow servants of an employee engaged in feeding a machine on the same floor. *Burke* v. *National India-Rubber Co.* (1897) 21 R. I. 446, 44 Atl. 307 (plaintiff's contention was that the delinquents were not engaged in the ordinary work of the factory).

A machinist placing shafting in a shop and a workman operating one of the machines are coservants. *Treka* v. *Burlington, C. R. & N. R. Co.* (1896) 100 Iowa, 205, 69 N. W. 422.

The members of a gang engaged in moving a large grindstone were held to be coservants in *Sullivan* v. *Nicholson File Co.* (1900) 21 R. I. 540, 45 Atl. 549.

Two employees engaged in operating a paper winder in a paper mill are coservants while the paper is being wound. *Kreider* v. *Wisconsin River Paper & Pulp Co.* (1901) 110 Wis. 645, 86 N. W. 662.

(r) *Employees in lumber yard.*—A

person employed to pile lumber in a yard is a fellow servant of one whose duties are to assort and scale such lumber, where the duties of both are but steps in preparing the lumber for sale. *Fraser* v. *Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785.

The foreman of a lumber yard and a repairer of the trucks are both fellow servants of a laborer who is injured while being conveyed from one part of the yard to another. *McFarlane* v. *Gilmore* (1884) 5 Ont. Rep. 302.

(s) *Servants working in quarries.*—Two employees engaged in blasting are coservants. *Wiskie* v. *Montello Granite Co.* (1901) 111 Wis. 443, 87 N. W. 461 (blast improperly prepared). A servant engaged in blasting rocks is a fellow servant of one hauling the rock. *Bogard* v. *Louisville, E. & St. L. R. Co.* (1884) 100 Ind. 491.

(t) *Servants working in or about mines, and similar work.* (See also subd. (z) *infra*).—Coservice has been held to exist in the following cases: *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 11 Jur. N. S. 180, 34 L. J. Exch. N. S. 222, 13 Week. Rep. 411, 11 L. T. N. S. 779 ("underlooker" whose duty it was to see that roof was propped and the miners); *Kielley* v. *Belcher Silver Min. Co.* (1875) 3 Sawy. 500, Fed. Cas. No. 7,761 (servants breaking down the ore with picks and by blasting, held to be coservants of others, at the same time loading and wheeling out the ore so broken down—engaged in different stages of the same work of removing ore from the mine); *Troughear* v. *Lower Vein Coal Co.* (1883) 62 Iowa, 576, 17 N. W. 775 (roadman is a fellow servant with a miner). Beck, J., dissented, but merely on the ground that the evidence justified the jury in finding that the injury was caused by the negligence of the superintendent). *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387 (engineer of mine engine, and tender of ventilating furnace); *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240 (timberman charged with duty of looking after a bridge over a chasm, and a miner); *Snyder* v. *Viola Min. & S. Co.* (1891) 2 Idaho, 771, 26 Pac. 127 (blacksmith employed on the surface to sharpen tools for miners and the miners under ground); *Cerrillos Coal Co.* v. *Deserant* (1897) 9 N. M. 49, 49 Pac. 807 (miner paid according to the quantity of coal mined by him is a fellow servant with men employed by the operator of the mine to assist in getting out coal without actually drilling holes or aiding in blasting with powder,—room full of fire damp entered with naked lamp); *Browne* v. *King* (1900) 40 C. C. A. 545, 100 Fed. 561 (helper of operator of drilling machine injured by failure of one of the drilling crew to search for "missed" shots).

(u) *Servants engaged in building or equipping ships.*—Workmen employed to fix sheets of metal on the hull of a vessel and workmen employed to caulk the seams therein are fellow servants. *Butler* v. *Townsend* (1891) 126 N. Y. 105, 26 N. E. 1017, Reversing 32 N. Y. S. R. 1055, 10 N. Y. Supp. 809. The court said: "Assuming, then, that the lumpers were servants of the defendant, acting under the direction and orders of their foreman, they were also the fellow servants of the caulkers. Both were working at the same time under a common master, upon the same vessel and engaged in the same general employment. That to some extent their trades were different, and one might not be skilled in the work of the other, is immaterial where all were working on the hull of the vessel, for one general purpose, to accomplish one common result, and under one control. *Swanson* v. *Atlantic Mail S. S. Co.* (1874) 57 N. Y. 108. Their labor was more closely and clearly related to the general purpose than that of a car repairer, a head brakeman, and a yard master, who were held in a given instance to have been fellow servants. *Besel* v. *New York C. & H. R. R. Co.* (1877) 70 N. Y. 171."

A scaffold builder and a rigger employed on a steamboat in port are fellow servants. *Pickett* v. *Atlas S. S. Co.* (1884) 12 Daly, 441.

The carpenter who prepares a scaffold for the workmen engaged in constructing a ship and the workmen are fellow servants. *Beasley* v. *F. W. Wheeler & Co.* (1894) 103 Mich. 196, 27 L. R. A. 266, 61 N. W. 658.

(v) *Crews of ships and boats.*—All the members of a ship's crew, including officers, are coservants. *The Queen* (1889) 40 Fed. 694; *The Ravensdale* (1894) 63 Fed. 624; *The Victoria* (1882) 13 Fed. 43; *The Sachem* (1890) 42 Fed. 66; *Stevens* v. *San Francisco & N. P. R. Co.* (1893) 100 Cal. 554, 35 Pac. 165 (engineer and fireman of ferryboat); *Grimsley* v. *Hankins* (1891) 46 Fed. 400 (cook and engineer); *The City of Alexandria* (1883) 17 Fed. 390

(steward and chief cook of steamer); *Red River Line* v. *Cheatham* (1894) 9 C. C. A. 124, 23 U. S. App. 19, 60 Fed. 517 (deck hand and man tending the fall of the landing-stage); *Quebec S. S. Co.* v. *Merchant* (1889) 133 U. S. 375, 33 L. ed. 656, 10 Sup. Ct. Rep. 397 (porter and carpenter of a steamship held to be coservants of the stewardess). In the last case the court said: "As the porter was confessedly in the same department with the stewardess, his negligence was that of a fellow servant. The contention of the plaintiff is that, as the carpenter was in the deck department and the stewardess in the steward's department, those were different departments in such a sense that the carpenter was not a fellow servant with the stewardess. But we think that, on the evidence, both the porter and the carpenter were fellow servants with the plaintiff. The carpenter had no authority over the plaintiff, nor had the porter. They and the plaintiff had all signed the shipping articles; and the division into departments was one evidently for the convenience of administration on the vessel, and did not have the effect of causing the porter and the carpenter not to be fellow servants with the stewardess."

The owners of a pilot boat are not liable for the death of men in a yawl which has been lowered to take a pilot from an outgoing vessel, and which is struck by the vessel, where the accident was caused by the failure of the man in charge of the stern painter of the yawl to swing the yawl around by it so as to enable it to be rowed away, and by the negligence of another seaman in prematurely giving the report that the yawl was gone, since such men are fellow servants of those [illegible]et. *Carlson* v. *United Ves[illegible] Hook Pilots Asso.* (1899) [illegible].

(w) *Servants engaged in [illegible]ling and unloading ships.* — [illegible]an is a fellow servant of [illegible]man handling the goods which are being loaded or unloaded by the hoisting machinery under his control. *The Peninsular* (1897) 79 Fed. 972 (tub fell on man in hold); *The Bolivia* (1893) 59 Fed. 626 (box allowed to descend so quickly that it bounded off the deck and fell into the hold); *Garvey* v. *New York & C. Mail S. S. Co.* (1898) 26 App. Div. 456, 50 N. Y. Supp. 77 (assumed in case); *The Scrapis* (1892) 2 C. C. A. 102, 8 U. S. App. 49, 51 Fed. 91, Reversing (1891) 49 Fed. 393.

An engineer and a guy-tender are fellow servants of a longshoreman working in the hold. *The Scrivia* (1891) 44 Fed. 943.

A person placed to attend the hatchway of a vessel, and to give warning to those below, employed to assist in loading the vessel, is a coemployee with the latter. *Ocean S. S.* [illegible] v. *Cheeney* (1890) 86 Ga. 278, 12 S. E. 351.

A laborer loading cargo in the hold of a vessel, and another laborer above, are fellow servants. *Kenny* v. *Cunard S. S. Co.* (1885) 20 Jones & S. 434 (laborer above carelessly handled load, so that it fell).

Employees loading a vessel with coal, and a coal hoister, are coservants. *The Islands* (1886) 28 Fed. 478.

One employed by the owner of a shipyard in operating a steam winch supplying power with which to unload lumber from a ship by means of a rope and tackle running from the wharf to the ship, and a workman also employed by the owner of the yard in piling the lumber as it is unloaded, are fellow servants. *Olsen* v. *Starin*, 43 App. Div. 422, 60 N. Y. Supp. 134.

(x) *Servants employed on works of construction.*—A mason engaged in constructing the brick work of a structure and a carpenter engaged in constructing the wooden part of the same structure are fellow servants. *Keith* v. *Walker Iron & Coal Co.* (1888) 81 Ga. 49, 7 S. E. 166. Brick masons and carriers of brick and mortar on the same building are fellow servants. *Blazinski* v. *Perkins* (1890) 77 Wis. 9, 45 N. W. 947.

A mason and a hod-carrier are coservants. *Bannon* v. *Sauda* (1896) 68 Ill. App. 164; *Maher* v. *McGrath* (1896) 58 N. J. L. 469, 33 Atl. 945 (masons constructed a defective scaffold).

A painter upon a new house, who uses a scaffold erected by carpenters in building the house, is a fellow servant of the carpenters. *Hoar* v. *Merritt* (1886) 62 Mich. 386, 29 N. W. 15 (carpenters here, not independent contractors—"all employed in a common pursuit, in carrying out a common enterprise").

A servant in charge of a derrick and a servant posted on a building are fellow servants. *Fox* v. *Sandford* (1856) 4 Sneed, 36, 67 Am. Dec. 587 (plaintiff struck by timbers hoisted by the derrick, and thrown to the ground).

A common laborer employed in building a bridge and an engineer operating the hoisting machinery for its construc

tion are fellow servants where both belong to the same force under the same foreman's orders. *Ryan* v. *McCully* (1891) 123 Mo. 636, 27 S. W. 533.

A workman engaged in receiving pieces of lumber in a building, and an engineer in charge of an engine by which such lumber is hoisted, are prima facie fellow servants. *Sheehan* v. *Prosser* (1895) 55 Mo. App. 569.

A workman employed in the building of a house, having knowledge that fellow servants are clearing away rubbish on the upper floor, assumes the risk incident to his employment. *Sauer* v. *Harrison* (1887; Pa.) 8 Cent. Rep. 136, 8 Atl. 799.

A carpenter engaged in the construction of a building cannot recover against his employer for injuries received by being struck by rubbish thrown from an upper floor by a laborer employed by their common master to remove such rubbish. *Spillane* v. *Eastman Co.* (1900) 33 Misc. 403, 67 N. Y. Supp. 867, Reversing (1900) 32 Misc. 235, 65 N. Y. Supp. 668.

A bricklayer engaged in building a sewer and the workmen who excavate and sheathe the trench are fellow servants. *Cuchy* v. *Hoff* (1899) 62 N. J. L. 758, 42 Atl. 731. (Citing *Laughlin* v. *State* [1887] 105 N. Y. 159, 11 N. E. 371; *Wilson* v. *Merry* [1868] L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30).

Members of different crews engaged in constructing a trestle are coservants. *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017.

Where a foreman had charge of men working on a part of the work, and also of an engineer on another part of the work, and plaintiff, who was one of the servants employed in the first work, was injured while helping to adjust the engine, under orders of the foreman, the foreman, engineer, and plaintiff were fellow servants. *Daley* v. *Brown* (1899) 45 App. Div. 428, 60 N. Y. Supp. 840.

(y) *Servants engaged in repairing plant.*—The cases as to servants of this class are collected in § 622, *post*. See also subd. (m), *supra*.

(z) *Servants operating hoisting apparatus and other servants in the same establishment.*—(See also subds. (s), (w), (x), *supra*.) "The man who lets the miners down into the mine in order that they may work the coal, and afterwards brings them up, together with the coal which they have dug, is certainly engaged in a common work with the miners themselves. They are all contributing directly to the common object of their common employer in bringing the coal to the surface." *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 707, per Lord Cedonsay; *Bradbury* v. *Kingston Coal Co.* (1893) 157 Pa. 231, 27 Atl. 100 (reverse lever, pulled too far, caused the cage to shoot up rapidly); *Wulhern* v. *Lehigh Valley Coal Co.* (1891) 141 Pa. 270, 28 Atl. 1087; *Spring Valley Coal Co.* v. *Perring* (1898) 30 C. C. A. 168, 58 U. S. App. 575, 86 Fed. 433; *Trecatha* v. *Buchanan Gold Min. & Mill. Co.* (1892) 93 Cal. 495, 28 Pac. 571, 31 Pac. 561; *Stoll* v. *Daly Min. Co.* (1899) 19 Utah, 271, 57 Pac. 295 (doubtful, perhaps, whether this case was decided under the theory now being illustrated, or under that of consociation, but the result is the same in either case); *Buckley* v. *Gould & C. Silver Min. Co.* (1882) 8 Sawy. 394, 14 Fed. 833. The court said in the latter case: "We do not think it makes any difference whether he was running an engine, or working with a wheel and axle, a pulley and bucket, or carrying the material up and down a ladder upon his shoulders. He was doing the same work, but doing it by different means. Every man below performed his part of the work in sinking the shaft—the work in which they were all engaged. They were working together in the same department in excavating this shaft. The fact that the engine runner as he is called, was using a different instrument in carrying the material up and supplies down makes no difference. It was work done in a common employment, to accomplish a common end—the sinking of a shaft. One servant performed one part, and another, another part."

A mechanic employed in a factory is a fellow servant of the servant employed to operate, and of the engineer in charge of, the hoisting machinery of an elevator. *Wolcott* v. *Studebaker* (1887) 34 Fed. 12.

A servant operating hoisting machinery for a tunnel and a workman engaged in excavating the tunnel are coservants. *McAndrews* v. *Burns* (1876) 39 N. J. L. 117.

An engineer operating an elevator on a farm and a farm hand conveyed thereon are coservants. *Stringham* v. *Stewart* (1882) 27 Hun, 562. Reversed (1885) 100 N. Y. 517, 3 N. E. 575, but merely on the ground that there was evidence that the machinery was defect-

ive. On the Second Appeal (1888) 111 N. Y. 188, 1 L. R. A. 483, 18 N. E. 870, a verdict for the plaintiff was reversed on the ground of coservice. The injury occurred through the elevator being started in the wrong direction.

One placed in charge of an apparatus for raising and moving stone out of a quarry is a fellow servant with a quarryman in the quarry. *Chapman* v. *Reynolds* (1896) 23 C. C. A. 166, 33 U. S. App. 686, 77 Fed. Rep. 274.

A servant whose duty it is to apply power for drawing cars loaded with rock up an incline to the top of cement kilns, on receiving a signal from a coemployee charged with the duty of attending to the drawing up of the car and dumping the rock into the kilns, is a fellow servant of the latter. *Clark County Cement Co.* v. *Wright* (1897) 16 Ind. App. 630, 45 N. E. 817 (power applied without proper signal).

An engineer operating hoisting machinery and a man tending the crank are coservants. *Wood* v. *New Bedford Coal Co.* (1876) 121 Mass. 252.

A carpenter engaged in inclosing an elevator shaft within a frame is a coservant of an employee who is operating the elevator. *Mann* v. *O'Sullivan* (1899) 126 Cal. 61, 58 Pac. 375.

Two persons employed by the same person, and under the same general control, one in the tailoring department of a dry-goods store, the other to run an elevator set apart for the use of the employees in going to and from their work, are fellow servants. *Speer* v. *Boggs* (1901) 198 Pa. 112, 52 L. R. A. 933, 47 Atl. 875 (boy allowed elevator to run down to basement).

(aa) *Servants engaged inside and outside of warehouses, factories, etc.* — A waterman helping to moor and unmoor barges which bring goods to a warehouse is a coservant of one engaged in lifting those goods to the upper floors. *Lovell* v. *Howell* (1 L. R. 1 C. P. Div. 161, 45 L. J. C. N. S. 387, 24 Week. Rep. 672, 3 ... T. N. S. 183 (as to this case, see also § 495, note 2, *supra*,— injury occurred while plaintiff was proceeding to the office in compliance with orders).

A servant working inside a brewery is a coservant of one whose duty it is to unload barrels outside from the barges which bring them to the brewery. *Charles* v. *Taylor* (1878) L. R. 3 C. P. Div. 492, 38 L. T. N. S. 773, 27 Week. Rep. 32 (the latter servant had gone into the brewery and was injured by the former, who was shifting a barrel; as to this case, see also § 495, note 2, *supra*).

A demurrer is properly sustained where evidence shows accident to have resulted from the negligence of the drivers of a cart and a wagon at a foundry where plaintiff was employed as a helper. *Hogan* v. *Central P. R. Co.* (1874) 49 Cal. 129.

An employee of a tramway company having charge of the boilers in its power house and a teamster employed to haul coal to such power house are fellow servants. *Denver Tramway Co.* v. *O'Brien* (1896) 8 Colo. App. 74, 44 Pac. 766.

A founder in charge of the inside work of a blast furnace is a coservant of the engineer operating a locomotive used to move cars on the premises. *Adams* v. *Iron Cliffs Co.* (1889) 78 Mich. 271, 44 N. W. 270.

A laborer in a grain elevator is a coservant of the captain of a tug used to tow grain vessels to the elevator pier. *Baltimore Elevator Co.* v. *Neal* (1886) 65 Md. 438, 5 Atl. 338 (yards, not being properly braced, struck the building and knocked off some slating).

(bb) *Employees of showmen* — A watchman employed by an itinerary show company is a fellow servant of one employed to maintain discipline among the employees of the company, and the company is not liable for the destruction of personal property of the latter by the negligence of the former in kicking over a stove in a car used for the accommodation of the employees, as, while the services differed in kind and both differed from the services of other employees, they are co-operative to the same end,—the conduct and maintenance of the defendant's business in and about which they were particularly employed. *McKay* v. *Buffalo Bill's Wild West Co.* (1896) 17 Misc. 601, 40 N. Y. Supp. 592.

(cc) *Employees in restaurants.*—The head waiter at a restaurant and a boy employed to do odd jobs were held to be coservants. *Smithurhite* v. *Moore* (1898) 14 Times L. Rep. 461 (window pane which boy was ordered to clean gave way so that his hand went through it).

(dd) *Employees of company engaged in the production of electricity.*—An engineer in the power house of an electric light company is a coservant of a lineman. *Brush Electric Light & Power Co.* v. *Wells* (1900) 110 Ga. 192, 35 S. E. 365.

499. Disconnection of duties, when so great as to negative implied acceptance of the risk of a fellow servant's negligence.—The theory enunciated in § 495, *supra*, clearly does not involve the consequence that all the servants of one master are in a common employment, for there may be a disconnection of duties so great that it would be wholly unreasonable to infer that the risk of the negligent servant's act was one which the injured servant contemplated and accepted.[1]

Some of the cases under this head present no difficulty. It is obvious, for example, that none of the reasons assigned for the rule are properly applicable where the master is carrying on two different kinds of business, and the plaintiff was working in one establishment and the negligent servant in the other. Common employment is not necessarily constituted by the fact that the "common object" is that of making money for the master.[2] So, also, the courts have refused

[1] "If the contract implied on the part of the servant is to bear the risks only of the business in which he is engaged, and not the risks of other business, he would not be prevented by his contract from maintaining an action against the master, if he were injured by the negligence of another servant of the same master, engaged in other business." *Fifield* v. *Northern R. Co.* (1860) 42 N. H. 225.

"If the departments of the two servants are so far separated from each other that the possibility of coming in contact, and hence of incurring danger from the negligent performance of the duties of such other department, could not be said to be within the contemplation of the person injured, the doctrine of fellow service should not apply." *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983.

"The principle underlying those decisions which hold a master liable to a servant for the negligent acts of another servant in a separate and distinct department of the service is that a servant only assumes the risk from the negligence of those so closely associated with him that he is presumed to have contracted with reference to such risk." *Louisville & N. R. Co.* v. *Stuber* (1901) 54 L. R. A. 696, 48 C. C. A. 119, 108 Fed. 934, Reversing (1900) 102 Fed. 421.

The test is, Were the departments so far separated from each other as to exclude the probability of contact and of danger from the negligent performance of their duties by employees of the different departments? If they were so separated, then the servant is not to be deemed to have contracted with reference to the negligent performance of the duties of his fellow servant in such other department. *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342.

That the carelessness of persons engaged in business having no connection with that about which the party himself is to be employed cannot be regarded as an ordinary risk was also recognized in *Russell* v. *Hudson River R. Co.* (1858) 17 N. Y. 134.

See also the cases cited in the following notes.

One judge has gone to the length of declaring that the departmental doctrine "can be maintained only by overthrowing the rule that the implied contract of the master ends with indemnity against his own negligence and does not extend to that of employees engaged in the same enterprise." *Beesley* v. *F. W. Wheeler & Co.* (1894) 103 Mich. 196, 27 L. R. A. 266, 61 N. W. 658, per Hooker, J. But this statement is too sweeping, if regard be had to the weight of authority; for unless the words "same enterprise" are here used in an unusually narrow sense, the essential antagonism the predicated does not exist, as the cited hereafter show quite clearly.

The Petrel [1893] P. 320, 325, per Jenne, Pr. Persons employed by the same master, one as a blaster for the purpose of removing rocks, and the other as wood-workman in the foundry

to attach to the phrase "common employment" a meaning so wide as to bar the action, where one servant was hired for business purposes, and the other to perform duties which have no connection with the occupation by which the master makes his livelihood;[3] and where one of the servants was hired for household duties and the other for work entirely dissociated from the domestic establishment,— as, the preservation of game.[4]

But it is scarcely feasible, as the authorities stand, to fix with a satisfactory degree of precision the dividing line between liability and nonliability in cases where the servants are working in the same establishment, or for the furtherance of the same industrial enterprise. Some of the earlier *dicta* and rulings as to the extent of the servant's right of recovery under such circumstances seem to have tended in the direction of a doctrine which, in its practical results, would have differed but little from that discussed in the following subtitle. But the law in the jurisdictions from which these emanated has now been settled on another footing.[5]

of the master, are not fellow servants. *Bain* v. *Athens Foundry & Mach. Works* (1885) 75 Ga. 718.

"If a person carried on the occupation of a banker and a brewer in different localities, and his bill clerk was run over by his drayman, it would be strange to say that the two were servants in common employment." Bramwell, B., in *Waller* v. *South Eastern R. Co.* (1863) 2 Hurlst. & C. 102, 112, 32 L. J. Exch. N. S. 2, 5, 9 Jur. N. S. 501, 8 L. T. N. S. 325, 11 Week. Rep. 731.

[3] Neither a domestic servant nor a coachman of a manufacturer is engaged in a common employment with an operative in his factory. *Relyea* v. *Kansas City, Ft. S. & G. R. Co.* (1892: Mo.) 19 S. W. 1116.

"If one employed to drive the private carriage of his master should, by his careless manner of driving, injure another servant of the same master, engaged in some mechanical employment, it may well be doubted whether the rule we are considering would apply." *Russell* v. *Hudson River R. Co.* (1858) 17 N. Y. 131.

A driver of a wagon used by his employer in the meat business is not a fellow servant with a hod carrier engaged in the erection of the walls of an addition to the employer's premises. *McTaggart* v. *Eastman's Co.* (1899) 57 N. Y. Supp. 222, 27 Misc. 181. Affirmed in (1899) 28 Misc. 127, 58 N. Y. Supp. 1111 (wagon driven against ladder on which hod carrier was—servants said to be "employed under different capacities, and on different classes of work").

[4] In *Battonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, Lord Cranworth quoted with approval a remark made by Lord McNeill in *Gray* v. *Brassey* (1852) 15 Sc. Sess. Cas. 2d series, 135, that "if a gentleman's coachman were to drive over his gamekeeper, the master would be just as liable as if the coachman had driven over a stranger." Such servants are not engaged in "the same work."

[5] In *Gilhespeater* v. *Madison & I. R. Co.* (1851) 5 Ind. 339, 61 Am. Dec. 101 the court, in holding a bridge carpenter not to be a fellow servant of the engineer of the train which was conveying him to the place of work, with reference to the plaintiff said: "His business of house-carpenter, as applied to the erection of a railroad bridge, did not even remotely link him with the careless management of that particular train. He had no participation in the duties, the neglect of which contributed to the injury complained of. Though in some sense a servant of the company, he was not a coservant of the engineer and conductor, within the meaning of *Farwell* v. *Boston & W. R. Co.* (1842) 4 Met. 49, 38 Am. Dec. 339. He clearly belonged to a distinct department of duty. As to the company, therefore, on the par-

Some Federal court cases, even if we take the most liberal view of the circumstances under which a servant may be heard to allege that

ticular occasion, Gillenwater stood clothed with all the rights of passenger and stranger. . . . If the bridge builder of the company be regarded as a coservant of the engineer, within the meaning of the *Priestley* and *Farwell Cases*, the principle becomes alike vicious and absurd, by the very extent of its application. Every person in the service of the company is brought within its range. Even the position of the legal adviser of the railroad is included. He, too, is, in some measure, the company's servant. He derives his compensation and authority from the same source as the engineer, conductor, and bridge builder. Like them, though in a fainter degree, he contributes to the ultimate objects of the company. Had he been on the train by the side of Gillenwater and injured by the same negligence, in a suit against the company he would have been summarily dismissed by the same argument. He would be told that his action was of new impression, that he contracted with reference to the risks of the employment and reserved a compensation in fees with an eye to these risks. He would, therefore, be denied redress, because he was a quasi coservant of the careless engineer. It would be difficult to imagine upon what principles, either of justice or public policy, such ruling could be supported. For the basis of implied contract and increased compensation, with reference to such risks, on the part of the carpenter and legal adviser, is wholly visionary."

This decision was followed in *Donaldson* v. *Mississippi & M. R. Co.* (1865) 18 Iowa, 280, 87 Am. Dec. 391 (holding that a bridge builder's duties are so entirely in another department, and wholly disconnected with operating the road, that his relation to the employees managing a train which ran over him is not that of a coservant). But, so far as Indiana itself is concerned, it was, in effect, overruled by *Slattery* v. *Toledo & W. R. Co.* (1864) 23 Ind. 81 (brakeman held to be coservant of section foreman), and later cases noted under § 498, *supra*; and the above extract is inserted chiefly for the purpose of showing the difficulties involved in testing the existence or absence of common employment solely by the servant's supposed contemplation of the risk.

Another early recognition of the consequences of a disconnection occurs in the judgment of Lord Chelmsford in a leading case: "Where servants, therefore, are engaged in different departments of duty, an injury committed by one servant upon the other, by carelessness or negligence in the course of his peculiar work, is not within the exception, and the master's liability attaches in that case in the same manner as if the injured servant stood in no such relation to him." *Bartonshill Coal Co.* v. *McGuire* (1858) 3 Macq. H. L. Cas. 300, 7 Jur. N. S. 773. He thought that the Scotch case, *McNaughton* v. *Caledonian R. Co.* (1857) 19 Sc. Sess. Cas. 2d series, 271, where the company was held liable for the death of a car repairer caused by the negligence of an engine driver and a switchman, might be reconciled with the English authorities, on the ground that the deceased and the other servants were engaged in totally different departments of work. But this suggestion is inconsistent with the general effect of the later authorities in England where the "departmental doctrine" has been entirely repudiated (see subtitle C, *infra*), (§ 495, *supra*), except, perhaps, in the recent case of *The Petrel*, *infra*, and the decisions cited in the subjoined note. The cases where a servant has recovered on the ground of a disconnection of duties are too few to be the subject of generalizations.

The master, officers, and crew of a vessel sunk in collision with another belonging to the same owners, through the fault of the latter, are entitled to claim against the fund arising in proceedings to limit liability, in respect of their lost effects. *The Petrel* [1893] P. 320, Jenne, Pr., said: "The consideration that the risk of injury to the one servant is the natural and necessary consequence of misconduct in the other implies that the skill and care of the one is of special importance to the other by reason of the relations between their services. Tried by this principle, can it be said that the safety of the captain of one ship of a company is, in the ordinary and natural course of things, dependent on the skill and care of the captain of another ship of the same company, or that injury by the negligence of one is an ordinary risk of the service of the other? In some cases it might, perhaps,—for ex-

the risk was not contemplated, seem not to be sustainable under the theory by which such contemplation becomes the test of common em-

ample, it might if all the ships of the company were in the habit of meeting in the same dock and the safety of each thus became, in the ordinary course of things, dependent on the skill with which the other was navigated. But in regard to navigation on the high seas or in the estuary of the Thames, would a captain of one ship of the General Steam Navigation Company have more reason to be interested in the skill of a captain of another ship of the company than in that of the masters of the myriad other craft in whose vicinity it might happen to navigate? By no reasonable supposition can it be imagined that he would. I think, therefore, that these two captains were not in common employment." The test suggested by Blackburn, J., in *Morgan* v. *Vale of Neath R. Co.* § 495, note 2, *supra*, was approved.

The crew of one river steamer were held not to be coservants of the crew of another, although the defendant was a partner in the business of operating both vessels. *Connolly* v. *Davidson* (1870) 15 Minn. 519, 2 Am. Rep. 154, Gil. 428 (boiler burst on one steamer).

The court said: "Plaintiff and those navigating the John Ramsey cannot be said either to be engaged in the same common enterprise, or employed to perform duties and services tending to accomplish the same general purposes, as that language is used in the case of *Wright* v. *Milwaukee & St. P. R. Co.* (1869) 25 Wis. 46 (relied on by defendant), as synonymous with 'the same general business;' nor are the examples there given of maintaining and operating a railroad, 'operating a factory,' 'working a mine,' or 'erecting a building,' at all analogous to the case at bar. If (and we think the test a good one, as illustrated by the case of *Abraham* v. *Reynolds* [1860] 5 Hurlst. & N. 143, 6 Jur. N. S. 53, 1 L. T. N. S. 330, 8 Week. Rep. 181), the question in each case is, as the court of appeals states that it is, whether the alleged coemployees are under the same general control, the rule clearly cannot be claimed by defendant to apply here, for he swears that he and Ramsey had each the exclusive control and management of his own boats and hands. Each boat, in fact, was doing a separate business in every respect, (though of the same sort) as much so as any two independent railroads separately owned and managed, but run for the joint profit of the owners; in which easily conceivable case, while the owners of the railroads might be partners as to third persons in the business of running each, the employees on each, though they were engaged in the common enterprise of maintaining and operating that road on which they were respectively employed, and assumed the risks incident to that business, could no more be said to assume the risks incident to the business of maintaining and operating the road upon which they are not employed, than in the instance put in the leading case on this subject in this country, of *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339.

Trainmen and car repairers are not coservants. *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342 (see the extract given in note 1, *supra*).

The doctrine of the negligence of coemployees was held to not apply where an open well, into which a servant hired to assist in putting up telegraph poles fell on a dark night, had been dug by other employees of the same employer. *Indiana Pipe Line & Ref. Co.* v. *Neusbaum* (1899) 21 Ind. App. 361, 52 N. E. 471 (negligent servants said to be "not in the same line of work." But this case should rather have been made to turn on the nonassignability of the duty of furnishing a safe place of work).

The engineer and fireman of a gravel train are not fellow servants of a boiler maker in the repair shop of a railway company. The former have no more business in and about the shop than if the shop belonged to some other company or individual. *Pennsylvania & N. Y. Canal & R. Co.* v. *Leslie* (1885) 42 Phila. Leg. Int. 267.

A draftsman in locomotive works has been held not to be in a common employment with a man who was employed in "jobbing" in any part of the building where he might be needed, and whose negligence in regard to the excavation of a cellar below the office was the cause of the accident. *Baird* v. *Pettit* (1872) 70 Pa. 477 (here there was the additional feature in the plaintiff's favor, that the injury was received after he had left his work).

In one case it has been held that a

ployment, and to require for their support the theory discussed in subtitle C, *infra*. Upon the facts, these decisions are clearly in conflict with the decisions of the Supreme Court, cited in the foregoing sections.[6]

longshoreman employed in unloading a ship, and the servants aboard ship, having charge of the ship's supplies, are not fellow servants. *Sansol* v. *Compagnie Generale Transatlantique* (1900) 101 Fed. 390. (Trap door left open). The rationale of this decision is not indicated very clearly by the language used.

But it would seem to represent an adoption of the same point of view as that exemplified in a Pennsylvania case, where a laborer was injured by a defective rope, while working under the head stevedore of the defendant company, to whose authority he was wholly subject, by whom he was paid, and who had power to discharge him; and the evidence went to show that the defect was due to the negligence of the mate of the ship which was being unloaded. It was held error to rule, as a matter of law, that the laborer and the mate were coservants. Whether that defense was available "would depend on what should be ascertained to be their relations to each other, the extent to which they were brought into contact, and to which they were engaged in the common employment, and the connection of the duties of each with the other." *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2.

In *Sell* v. *Charles Rietz & Bros. Lumber Co.* (1888) 70 Mich. 479, 38 N. W. 451, the court was equally divided upon the question whether the employees operating the elevator in the warehouse of a salt works were fellow servants of a laborer who used to do light work in the mill yard, in loading blocks of salt, and in gardening, but who had never been employed in the warehouse.

A common laborer employed in various kinds of work about a mine, but not himself a miner, was held not to be a fellow workman of the miners in such a sense that he cannot recover of the mine owner for injuries caused by the mining operations. *James* v. *Emmet Min. Co.* (1884) 55 Mich. 335, 21 N. W. 361. But here the right of action seems to be sustained partly on the ground of an imperfect knowledge of the conditions, as it was said that he was not "bound to know the condition or fully understand the exigencies of the underground works, so far as he was not in contact with them, with means of passing judgment upon them."

A laborer engaged in constructing a railway for transportation of coal from a mine is not a fellow servant with a miner at work outside the mine, handling lumber to be used in the mine in timbering up, in the absence of further facts showing them to be engaged in a common employment. *Evans* v. *Carbon Hill Coal Co.* (1881) 47 Fed. 437 (overruling demurrer based on theory that complaint showed coservice).

Common employment is not an available defense where the plaintiff was hired by the defendant to carry wheat from the latter's mill to another place, and was injured by the negligence of a millhand while his cart was being loaded. *Bellis* v. *Maxfield* (1875) Australian Jur. Rep. (Victoria) 35.

It seems impossible, however, to lay down any rigid rule regarding cases of the type of the last three cited, for even if the servant were hired merely for the purposes specified, yet, if he should appear to have been regularly under the immediate control of the same superior as the other servants, and habitually brought into contact with them, it is hard to see how he could be allowed to maintain the action merely on the ground that the risk of injury from their negligence was not within his contemplation.

* *Garraby* v. *Kansas City, St. J. & C. B. R. Co.* (1885) 25 Fed. Rep. 258 (employee operating an engine engaged in other business than that of relaying the track, not a fellow servant of laborer distributing rails along the track). *Hall* v. *Galveston, H. & S. A. R. Co.* (1889) 39 Fed. 18 (telegraph operator at a way station not coservant of brakeman).

The former of these rulings was based on *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, which is wholly irrelevant; and, as the latter ruling was made in an oral instruction, without any citation of authorities, it is impossible to say what the grounds of it really were.

In another case, the principle that, whenever the negligence of another em-

C. Theory that common employment depends on identity of departments of work or consociation of duties.

500. Identity of department as a test, generally.—The passage quoted in § 497 *supra*, from the opinion in *Farwell* v. *Boston & W. R. Corp.*[1] shows that the significance of an identity or difference of the departments of duty to which the negligent and injured servants belonged, has, from the very earliest period in the evolution of this branch of law, been a subject of discussion. The phrase "departmental doctrine," or some similar combination of words is now not as frequently met with in reports and treatises.[2] The choice of this terminology, however, and the prominence given to the conception which it represents, are rather unfortunate. The conflict between the cases reviewed in the preceding sections and those which now demand our notice is a clear proof, if any were needed, of the inherent impossibility of fixing, upon grounds that will be deemed generally satisfac-

ployee of the same master can be considered an ordinary risk,—one which he might reasonably anticipate at the time of making his contract,—the servant accepts the perils liable to happen through such negligence, has been thought to involve, from the converse point of view, the corollary that those only are fellow servants for whose negligence the master is not answerable, who serve in such capacity and in such relation to the master and each other that the means of the servants to protect themselves are equal to, or greater, than those of the master to afford them protection. This doctrine does not seem to be materially different from that of associated duties, as developed in subtitle C, *infra*. *Kielley* v. *Belcher Silver Min. Co.* (1875) 3 Sawy. 436, Fed. Cas. No. 7,760, where it was held, by Field, J., and Hillyer, D. J., that a complaint which alleges that a laborer in a mine was injured by the negligence of the defendant coporation in failing to perform its duty of notifying him that a blast was about to be exploded by certain miners at a place which he was approaching is not demurrable on the ground that it shows upon its face that the injury was due to the negligence of servants, who though in a different branch of the service, were in a common employment with the plaintiff. But one of the grounds on which Hillyer, J., based his decision was that the master's duty to select his servants carefully requires him at least to see that those who labor in one department of his business are not injured by those in another, a mode of connecting the theory of nonassignable duties and the separate department theories which has not, so far as the present writer knows, been suggested elsewhere.

In *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983, the court seems, in its argument, inclined to approve of the cases which hold that persons whose duty it is to keep railroad cars in good order and repair are not engaged in a common employment with those who run or operate them, for the reason that their departments are so far distinct that contemplation of the risk is negatived. But the point was not directly ruled upon, and the theory most commonly applied by the Supreme Court in such cases is that of a nonassignability of duties. See § 568, *post*.

[1] (1842) 4 Met. 49, 38 Am. Dec. 339. See also several of the cases cited under § 495, note 2, *supra*.

In *Clarke* v. *Pennsylvania Co.* (1892) 132 Ind. 199, 17 L. R. A. 811, 31 N. E. 808, the court speaks of the "departmental doctrine."

The title of chapter V of Mr. McKinney's work on Fellow Servants is, "The Different Department Limitation."

The "separate department" doctrine is referred to in *Norfolk & W. R. Co.* v. *Nickels* (1895) 91 Va. 195, 21 S. E. 342.

tory, the meaning which, for juristic purposes, should be attached to the word "department." While it is agreed on all hands (see § 499, *supra*), that, under some circumstances, a difference of department is a ground for allowing recovery, there is a radical and irreconcilable divergence of opinions as to what the circumstances are which will, in this point of view, exclude the defense of common employment. Neither doctrinal precision nor doctrinal harmony are feasible when the same word may be and is used to describe predicaments which are in some essential respects quite distinct.

But the drawbacks of this terminology do not end here. Even if exactness in the definition of the word "department" were attainable, —and, so far as can be seen, it is not attainable,—there would still remain the objection that, as is now declared in the states which have most thoroughly worked out the so-called "departmental doctrine" (See the cases cited in § 503, *infra*), neither a difference nor an identity of department are necessarily decisive of the injured servant's ability or inability to recover; and, in fact, if it is admitted that the ultimate issue is whether the negligent and injured servants were or were not co-operating in the sense already explained (§ 495, *supra*), this theory as to the nonconclusive effect of proof that they were in different or the same departments is, from a logical standpoint, the only possible one. Only confusion can result from the use of language which, so far from indicating the elements on which the solution of the problems in this class of cases actually depends, is misleading to the extent of suggesting that difference or identity of department, instead of being merely probative facts raising at the most a presumption for or against the servant, may be finally determinative of the existence or absence of a common employment.

The terminology criticised is doubtless convenient, as a means of roughly labeling the nature of the controversy between two schools of opinion. But this is scarcely an adequate justification for its retention in discussions which purport to go below the surface of the subject. In the ensuing discussion, therefore, the cases will be reviewed under a classification which will take due account of the merely evidential character of the facts of identity or difference of department.

As will be seen from the illustrative cases tabulated in § 507, *post*, the so-called "departmental doctrine" has obtained a foothold in comparatively few jurisdictions. The decisions which actually turn upon it seem to be confined to Georgia, Illinois,[3] Missouri,[4] Nebraska,

[3] There is some wavering apparent in the rulings prior to *Chicago & N. W.* the views of the courts, as disclosed by *R. Co.* v. *Miranda* (1879) 93 Ill. 302.

Indiana, Louisiana, Virginia, Washington, West Virginia, Kentucky, Utah, Arizona, and such Federal courts as have avowedly followed the local rule.[5] In some of these jurisdictions its application is modified by the operation of doctrines which possess a merely local force.[6] In others it has been explicitly or virtually abandoned in the more recent decisions.[7]

Most of the courts which apply the so-called "departmental doc-

34 Am. Rep. 168. In that decision the earlier cases were extensively reviewed and collated, and the opinion is now regarded as the fountain of law upon this subject in the state where it was delivered, as well as in the others which have adopted the same doctrine. It overruled some in which the view was adopted that the fact of one servant's being necessarily exposed, by reason of the nature of his duties, to the risk of injury through the carelessness of another, justified the inference of coservice. *Chicago & A. R. Co.* v. *Murphy* (1870) 53 Ill. 336, 5 Am. Rep. 48; *Valtez* v. *Ohio & M. R. Co.* (1877) 85 Ill. 500.

[4] In *Corbett* v. *St. Louis, I. M. & S. R. Co.* (1887) 26 Mo. App. 621, it was held, rejecting the department rule, that a track repairer and trainmen were fellow servants. Under that rule, these servants are certainly not, as matter of law, in a common employment. See § 506, note 1, subd. (j), *infra*.

[5] An instance of such a decision is *Pike* v. *Chicago & A. R. Co.* (1890) 41 Fed. 95 (decided in a Missouri district). Other cases in which the influence of the theory is also apparent to some extent are those cited at the end of note, § 499, *supra*.

[6] *Kentucky.*—One of the special factors to be taken into account in noting the results of the decisions in this state is the provision in Gen. Stat. chap. 57, § 3, that "punitive damages may be recovered by the widow, heir, or personal representative of any person or persons killed by the wilful neglect of another person, company, or corporation, or their agents." Another is the extreme doctrine which the court has adopted respecting the effect of any inequality of rank in excluding the defense of coservice. Another is the distinction drawn between gross or wilful neglect and ordinary neglect, so that a dereliction of the former kind by a fellow servant will sometimes render a master responsible where, if it had been of the latter kind, he might successfully have pleaded common employment. The effect of the decisions, as a whole, is summarized, in § 549, *post*.

Tennessee.—In this state the application of the doctrine is restricted to railway companies. *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387, a distinction which, in view of the great diversity of work which results from the enormous extent of many mining and manufacturing concerns at the present day, it seems quite impossible to sustain on rational grounds.

[7] *Georgia.*—The language used in the early case in which the doctrine was first propounded (*Cooper* v. *Mullins* [1860] 30 Ga. 146, 76 Am. Dec. 638) was thought by the same court, in *Ellington* v. *Beaver Dam Lumber Co.* (1893) 93 Ga. 53, 19 S. E. 21, to be too broad. There is a decided tendency manifested in the latter case to approximate to the doctrine received by the majority of the courts; and the actual decision—that a track repairer while being transported to and from his work is a fellow servant of the driver of the engine, the vehicle not being used for work on the permanent way at the time the injury was received—cannot, it would seem, be reconciled with the Illinois doctrine. See § 506, note 1, subds. (j), (k), *post*.

Indiana.—*Madison & I. R. Co.* v. *Bacon* (1855) 6 Ind. 205, seems to be no longer law. See *Gormley* v. *Ohio & M. R. Co.* (1880) 72 Ind. 31, where the conflict in the earlier rulings is discussed.

Virginia.—In this state the doctrine was at one period accepted. *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339; *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401 (both holding that a track repairer is not a fellow servant of a brakeman); *Richmond & D. R. Co.* v. *Normont* (1887) 84 Va. 167, 4 S. E. 21, ("overhauler of cars," not a fellow servant of a conductor and engineer of a moving train, by whose negligence he was injured). But in *Norfolk & W. R. Co.* v. *Donnelly* (1892) 88 Va. 853, 14 S. E. 692, a decided disposition was shown to

trine" refer it to the conceptions explained in the next section. But in some of the cases there is no formal adoption of the theory of consociation, and it would seem that, in at least a portion of these, the decision is independent of that theory, and based upon the simple notion that the duties of the servants were so related in respect to closeness or remoteness, that it was or was not proper to impute to each of them an acceptance of the risks arising from the other's negligence. See § 499, *supra*. Since, however, the inferences drawn from like groups of facts are practically identical, whichever of these forms of the "departmental doctrine" may be applied to the solution of the case, it is not deemed worth while to attempt any discrimination between the two classes of decisions. Indeed the line of demarcation between them is so obscure that the task of segregation would be extremely difficult, if not impossible.

But, in view of the fact that the doctrine antagonistic to that of associated duties grew up, and was steadily adhered to by nearly every court, long after the development of many of the great railway systems, it would seem that no great importance can be properly attached to this consideration. The reasons of the rule, in this point of view, have not undergone in recent times any such material change as would justify a change in the rule itself.

501. Consociation of duties, as a test of common employment.—In §§ 495–498, *supra*, are set forth the results of construing, from one standpoint, the general proposition—as to which there is no disagreement among the authorities—that, as all servants of the same master are prima facie in a common employment, a servant who is injured by one of his coemployees is necessarily debarred from recovery against the master, unless this presumption is overcome by evidence

revert to the doctrine received by the majority of the courts, and the reversion seems to be completed in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342, which virtually overrules the earlier decisions, so far as they rest upon the theory of consociated duties, though, upon the facts, they are, perhaps, sustainable as applications of the rule that a master is liable where his own negligence concurs with that of a fellow servant. The latest case bearing upon the question is *Eckles* v. *Norfolk & W. R. Co.* (1896) 96 Va. 69, 25 S. E. 545, but it simply decides that a freight conductor cannot recover for injuries due to the acts of the engineer or fireman—a conclusion which would clearly follow under either theory of common employment. In this state, therefore, it would seem that difference of department is now material only in so far as it tends to negative contemplation of the risk. See *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342, and compare §§ 495, 498, *supra*.

Utah.—Here the cases cited in § 507, *post*, do not seem to have been formally overruled, but they are certainly irreconcilable with the recent decision in *Stephens* v. *Southern P. Co.* (1899) 19 Utah. 196, 57 Pac. 34 (facts stated in § 498, subd. (d), *supra*), which distinctly embodies the theory that the servant's contemplation of the risk is the sole test of common employment.

showing that the relation between the duties of the injured and the delinquent servants was such as to render it improper to infer an implied stipulation on the part of the former to accept the risks of injury from the acts of the latter. According to the cases there cited, the propriety or impropriety of such an inference is determined solely by inquiring whether, under the circumstances, the carelessness of a servant whose regular functions were those discharged by the delinquent was so likely to be harmful to the plaintiff that the latter must have understood that the peril to which he might at any moment be exposed by such carelessness was a natural and normal incident of his employment.[1]

[1] Under this theory, it will be observed, the fact that there was a certain intimate consociation of duties may be important, not as a starting point for an inquiry on the same lines as that in the cases to be presently discussed, but as indicating that the negligent servant was one of those whose negligence was likely to be injurious to the plaintiff. Such consociation is sometimes noted by courts which have rejected the "departmental doctrine." *St. Louis S. W. R. Co.* v. *Henson* (1895) 61 Ark. 302, 32 S. W. 1079. The negative aspect of this conception is observable in such cases as *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983, where the departments of the two servants were said to be so far apart that the risk of injury from each other's negligence was not contemplated. It will become obvious, moreover, if we compare the specific rulings referred to in the following sections with those already reviewed, that in many instances the plaintiff's inability to recover is equally unquestionable whether his relation to the delinquent servant is determined by the test of consociation, as explained below, or by the test of contemplation of the risk. The terms by which the position of servants in a common employment is described in the opinions of courts which apply the doctrine of consociated duties are, in fact, often so general as to give no intimation of the characteristic and distinctive conceptions underlying that doctrine. Compare, for example, the following phrases with those quoted in § 3 *ante*:

"Directly co-operating with each other in the same line of employment." *Chicago & A. R. Co.* v. *O'Brien* (1895) 155 Ill. 630, 40 N. E. 1023.

"Directly co-operating in the particular business." *Chicago & A. R. Co.* v. *Hoyt* (1887) 122 Ill. 369, 12 N. E. 225.

"In the same line of employment." *Chicago, B. & Q. R. Co.* v. *Young* (1887) 26 Ill. App. 115.

"In the same line of employment, and directly co-operating in the particular business then in hand." *Illinois C. R. Co.* v. *Swisher* (1897) 74 Ill. App. 164.

Compare also *North Chicago Street R. Co.* v. *Conway* (1898) 76 Ill. App. 621, where a servant is said to be a fellow servant of other employees whose labors "directly co-operate" with his own in the particular work in which they are engaged.

"Co-operation" in the "particular business in hand" was also deemed to let in the defense, in *Card* v. *Eddy* (1894) 129 Mo. 510, 36 L. R. A. 806, 28 S. W. 979.

Of the fact that the two doctrines cover this common ground an illegitimate dialectic use seems to have been made, where the court, in what is believed to be the earliest reported case in which the doctrine of consociated duties was adopted, lays stress upon the fact that in *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, 1 Murph. & H. 305, 1 Jur. 987, the plaintiff and "his coservant, the conductor of the van, were intimately associated in the business intrusted to them by the common employer." *Gillenwater* v. *Madison & I. R. Co.* (1851) 5 Ind. 339, 61 Am. Dec. 101. The rationale of the case cited was wholly different from what this comment seems to intimate. It may be noted, moreover, that the influence of the doctrine of consociated duties upon judicial language and reasoning is sometimes traceable even in the opinions of courts in which it has not been formally adopted or even definitively re-

But by the courts with whose decisions we are now concerned, this comprehension by the plaintiff of the likelihood of injury is not regarded as being of itself sufficient to preclude him from maintaining the action. The dialectic starting-point of the so-called "departmental doctrine," as explained in what may be considered the leading case on the subject, is that, as the principle of *respondeat superior* "is founded on the expediency of throwing the risk upon those who can best guard against it,"[2] the question how far that principle should be qualified in the case of injuries caused by the negligence of fellow servants "must turn upon the proper consideration, in each class of cases, of what ruling will in fact throw the risk upon those who can best guard against it,—of what is demanded to promote in the highest degree the well-being of society."[3] Under such a theory the servant's

jected. In Mississippi where the departmental doctrine does not prevail (*McMaster* v. *Illinois C. R. Co.* [1887] 65 Miss. 264, 4 So. 59), the court once remarked that the safety of employees is more effectually secured by making it the interest and the duty of each one to observe the conduct of the others, so as to be associated as far as practicable with the prudent and the cautious. *New Orleans, J. & G. N. R. Co.* v. *Hughes* (1873) 49 Miss. 258.

When a court speaks of servants in separate departments not having "contracted to be associated with each other by reason of their employment," it is apparently meant that one did not contemplate the risk of the other's negligence. *Nashville & C. R. Co.* v. *Carroll* (1871) 6 Heisk. 347.

[2] Shaw, Ch. J., in *Farwell* v. *Boston & W. R. Corp.* (1841) 4 Met. 49, 38 Am. Dec. 339.

[3] *Chicago & N. W. R. Co.* v. *Moranda* (1879) 93 Ill. 302. The court said: "The best interests of society demand that all business should at all times be so conducted that the least possible harm shall be caused thereby; that all servants, and especially all servants controlling dangerous instrumentalities, shall constantly use due care. The position that the well-being of society in early days demanded in such cases the rule *respondeat superior* was sustained upon the view then taken of the usual subordination of servants to the will of the master, and the usual devotion of the servant to the interest of the master. It seems to have been wisely thought that it would induce greater caution in servants to avoid injury to others, if servants knew that the master must answer for such injury; and also that the responsibility of the master in such case would usually incite him to greater vigilance in promoting the desired constant caution in his servants. Where servants are habitually consociated in their daily duties (as most servants were at an earlier day in England), they may well be supposed to have an influence over each other, and a power to promote in each other caution, by their counsel, exhortation, and example, at least equal to that of the master, and perhaps greater. In such case the well-being of society does not seem to demand that the master should be made to answer, in cases where he had done all that he ought to do, and the injury was to one such servant and from the negligence of another. The vigilance of such servants in such case may well be supposed to have a greater stimulant to constant exercise if each one knows that neither he nor his comrades can have any redress for injury to one by the negligence of the other. But where servants of a common master are not consociated in the discharge of their duties,—where their employment does not require co-operation, and does not bring them together, or into such relations that they can exercise an influence upon each other promotive of proper caution,—in such case the reason of the rule holding the master responsible for damages resulting from the negligence of one of his servants seems reasonably to apply with as great force as if a stranger were the party injured. The influence of one servant upon another in the encouragement of caution cannot be relied

capacity for self-protection necessarily becomes the ultimate controlling consideration upon which the servant's right to recover depends and the existence of common employment resolves itself into the inquiry, whether there was such a relation between the duties of

upon in such case, for that can only operate where they are co-operating, or are brought together by their usual duties, or where there is habitual consociation. Then, indeed, in cases where they cannot be supposed to have it in their power in any way to promote caution in each other the well-being of society, if it is to have any such security, must depend entirely upon the vigilance of the master in promoting constant caution in each of his servants, and upon the desire of servants to protect the master from liability. Hence the master must in such case be held responsible for the neglect of his servant. . . . The line of argument, briefly stated, is this: The ancient common-law rule which holds a master (even in cases where he is guilty of no fault) responsible for the neglect of his servant where a third person suffers damage from the negligence of such servant rests entirely upon consideration of its practical effect upon society,—upon considerations of policy; and these considerations of policy rest upon the idea that the subordination of the servant to the will of the master and his devotion to the interests of the master give him, under that rule, incentives to caution he would not otherwise have; and upon the idea that the rule will incite the master to greater vigilance in the selection of prudent servants, and to greater zeal in the exercise of his influence over his servant to secure the exercise of care in all cases. When the reason of the rule ceases, the application of the rule ought also to cease, and especially is this true of a rule which rests, not upon its own justice, but solely upon considerations of policy. Where servants of the same master are directly co-operating with each other in a particular business at the time of the injury, or are, by their usual duties, brought into habitual consociation, it may well be supposed that they have the power of influencing each other to the exercise of constant caution in the master's work (by their example, advice, and encouragement, and by reporting delinquencies to the master), in as great and in most cases in a greater, degree than the master. If, then, each such servant knows that neither he nor his fellow servant, if injured by the other's negligence, can have redress against the master, he has such incentive to constant care, and such incentive to the exercise of his influence upon his fellow to incite him to constant care, that the well-being of society in such case does not demand that the master be made to answer. The same considerations of policy which, to avoid injuries to third persons, usually demand that the master be held responsible, seem plainly not to demand it in the case of such coservants. But though servants are employed by the same master, and are engaged in doing parts of some great work carried on by the master, still, unless either their duties are such that they usually bring about personal association between such servants, or unless they are actually co-operating at the time of the injury in the business in hand, or in the same line of employment, they have generally no power to incite each other to caution by counsel, exhortation, or example, or by reporting delinquencies to the master; and the well-being of society in such case must depend upon the devotion of the servant to the interests of the master, and the zeal of the master to promote a constant exercise of due care by his servant; and to bring these instrumentalities into action it becomes necessary (as in the case of an injury to a stranger) to adhere to the general rule that the master must answer for the neglect of his servant, and this, as already suggested, because the facts are such that society cannot, in such case, avail itself of the mutual power and influence of one servant upon another for want of the necessary opportunity for its exercise, and hence must depend for inducements to caution which are supposed to follow the general rule of the master's liability."

The effect of the doctrine embodied in this case is that the master's liability is tested with reference to the answer to one or other of these two questions: (1) Whether the servants are directly co-operating with each other in particular business in the same line of employment; or (2) whether their duties are such as to bring them into habitual association, so that they may exercise a mutual influence upon each other pro-

the negligent and delinquent servants, such consociation and co-operation in the performance of the work which was being done when the injury was received, — that such self-protection was reasonably feasible by one or other of the means noted in the cases cited in the following section.[1]

501a. Same subject continued.— An examination of the cases shows that the elements upon the existence or nonexistence of which the applicability or nonapplicability of the doctrine of consociation depends are those indicated by the following paragraphs:

1. The fact that the injured servant had or had not an opportunity of observing the extent to which the negligent servant was competent for the performance of his duties and the manner in which he habitually conducted himself.

2. The fact that the injured servant was or was not able to take appropriate measures to ward off the danger which should be created by an act already committed or on the point of being committed by the negligent servant, while the work was actually in progress.

3. The fact that the injured servant was or was not able to lessen

motive of proper caution. *Chicago & A. R. Co.* v. *Stallings* (1900) 90 Ill. App. 609; and the cases cited, *infra*. If the jury believed that the men in another gang were not actually co-operating with the plaintiff and his crew, or that their duties were not such as to bring them into habitual association, etc., the disjunctive "nor" should have been used. *Chicago & A. R. Co.* v. *Stallings* (1900) 90 Ill. App. 609. For the same reason it is error to instruct a jury that, if the servants are not directly co-operating with each other in a particular business in the same line of employment, they are not fellow servants. *Ibid.*

The omission of the clause in brackets has been held erroneous in giving an instruction to the effect that to constitute fellow servants they must either directly co-operate in the particular business [so that they may exercise an influence on each other promotive of proper caution], or their duties must be such as to bring them into habitual association so that they may exercise an influence on each other promotive of proper caution. *Pagels* v. *Meyer* (1899) 88 Ill. App. 169. Such an instruction is liable to the construction that, in order to be fellow servants, it is only necessary that they direct[ly] co-operate in the particular bus[iness] in hand, without their duties bein[g] such as to promote proper caution. In *Chicago & A. R. Co.* v. *Swan* (1898) 176 Ill. 428, 52 N. E. 916, it was laid down, in reference to the two tests of the master's liability, which are here referred to, that the qualifying words, "so that they may exercise an influence on each other promotive of proper caution," have no application to the first, but are limited entirely to the second.

[1] The doctrine, it may be remarked in passing, has also been justified by the broad consideration specified in the subjoined passage. "When the law of fellow servants was first announced, business enterprises were comparatively small and simple. The servants of one master were not numerous. They were all engaged in the pursuit of a simple and common undertaking. Now things have changed. Large enterprises are conducted by persons or by corporations employing vast numbers of servants, divided into classes, each pursuing a different portion of the work, and each practically independent of the other. The old reasons do not apply to the new conditions." *Union P. R. Co.* v. *Erickson* (1894) 41 Neb. 1, 29 L. R. A. 137, 59 N. W. 347. The simple character of operations in the industrial enterprises of early times is also referred to in *Hammarberg* v. *St. Paul & P. Lumber Co.* (1898) 19 Wash. 537, 53 Pac. 727.

the risk of injury, by exercising upon the negligent servant an influence calculated to promote caution and diligence on the part of the latter.

4. The fact that the injured servant was or was not able to protect himself against the peril of future repetitions of some particular act of negligence, of an employee, by reporting that act to a superior employee, and thus insuring that the delinquent will be more carefully supervised, or, in extreme cases, discharged.

It will be found that the whole of these elements are seldom adverted to in any single case. As a general rule the courts content themselves with a reference to that particular one which happens to be suggested by the special aspect of the evidence under which the case has been submitted.[1] But in the formal and more lengthy dis-

[1] Sometimes the possession or lack of an opportunity to observe the coemployee's conduct is alone adverted to, and no allusion is made to the means of self-protection which such an opportunity confers on the servant. Thus, in *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401 (overruled in Virginia. See § 500, note 6, *supra*), recovery was allowed simply on the ground that the two servants "were not coemployees, thrown together in a common duty, and having opportunity to observe and judge of the habits and qualifications of each other." In *Illinois C. R. Co.* v. *Pilliard* (1896) 99 Ky. 684, 37 S. W. 75, coservice was negatived on the ground that the servants "acted in different spheres, and neither could or was required to know whether the other was properly doing his duty." But it is clear that the ultimate conception which was here present to the mind of the court was that the lack of opportunity for observation deprived the servant of those means of self-protection which are indicated by the other elements enumerated in the text. Ordinarily, one or other of these elements is explicitly referred to.

In *Klees* v. *Chicago & E. I. R. Co.* (1896) 68 Ill. App. 244, the existence of common employment was predicated upon the fact that, as between the servants, there was a necessary dependence on each other's care and vigilance for their mutual safety.

In *Hammarberg* v. *St. Paul & P. Lumber Co.* (1898) 19 Wash. 537, 53 Pac. 727; *Uren* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174, coservice was negatived on the ground that the servants had "no opportunity to use precautions against each other's negligence."

The doctrine has been said to have no application where there is no right or opportunity of supervision, and no right or opportunity to avoid the negligent acts of another, without disobedience to the orders of his immediate superior. *North Chicago Rolling Mill Co.* v. *Johnson* (1885) 114 Ill. 57, 29 N. E. 186.

It is said the doctrine "rests upon the theory that the vast extent of the business of railway companies has led to the division of their business into separate and distinct departments; that by reason of this division a servant in one branch or department has no sort of association or connection with one in another department; that this absence of association gives such servant no opportunity of observing the character of a servant in another department of labor and no opportunity to guard against the negligence of such servant." *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387. This passage seems to indicate some shifting of ground when it is compared with an earlier opinion of the same court in *Nashville & C. R. Co.* v. *Carroll* (1871) 6 Heisk. 347, where the court reasoned thus: "The rule, we hold, cannot be held to apply as between an employee in one department of the work of a railroad company, separate, distinct, and apart from the work of the other employee by whom he is injured, who has no immediate or necessary connection with the work in which the injured employee is engaged, further than being in

employment on the same road and by the same company where the injury is caused by the negligence or carelessness or want of skill of such employee or agent of the company in the performance of the work of such company. . . . We can see no principle of connection between employees of different grades and in different departments and kinds of labor, separate from each other, upon a railroad, upon which the exception can fairly stand. This case very well illustrates the rule we have laid down. Hinton was a trackman or 'boss,' as he is called, employed by the company in keeping in order and repair a section of the road. As such, he had no necessary connection or association with the conductors and employees who were engaged in running the passenger trains under the direction of the general superintendent of the company. They were separate and distinct in their employments and the one had in no wise contracted to be associated with the other by reason of their employment."

In an early Georgia decision, apparently the second explicit recognition of the doctrine, the impossibility of their exercising a corrective influence over each other's conduct was put forward, as the ground upon which the court denied the negligent and injured servants to be in a common employment. *Cooper* v. *Mullins* (1860) 30 Ga. 146, 76 Am. Dec. 638, where the court, referring to the exception to the rule of *respondeat superior* created by the doctrine of common employment, said: "Such an exception has been recognized in some modern cases, but when confined within the reason on which it is founded, it can have no application to this case. That reason is one of public policy to secure to the public a more faithful service from employees on railroads, steamboats, and other branches of business wherein the safety and property of the public are involved, by making it the interest of each one of such employees to look after and encourage the carefulness and fidelity of all the rest. This reason can have no application to employees whose situations allow them no corrective influence over each other. The exception operates as a penalty, and to impose the penalty when there is no opportunity of exercising that supervising care which it is intended to enforce is sheer cruelty. . . . Nor can it be extended to other employees who from any cause are not in a situation to exert such an influence on their fellows. It follows, therefore, that the cases to which this exception applies are only those where the servant receiving the injury is engaged, with the servant inflicting it, in a common business where he has an opportunity to exercise a preventive care over his negligence." This case is perhaps overruled. See § 590, note 7, *supra*.

In Illinois, also, the same conception is the one which is ordinarily emphasized in the sloctor enumerations of the doctrine. In several recent cases it is held down that, in order that one shall be the fellow servant of another, their duties must be "such as to bring them into habitual association, so that they may exercise a mutual influence on each other, promotive of proper caution." *Joliet Steel Co.* v. *Shields* (1890) 134 Ill. 209, 25 N. E. 569; *Chicago & A. R. Co.* v. *Way* (1884) 108 Ill. 288; *Chicago & E. I. R. Co.* v. *Geary* (1884) 116 Ill. 383; *North Chicago Rolling Mill Co.* v. *Johnson* (1885) 114 Ill. 57, 29 N. E. 186; *Edward Hines Lumber Co.* v. *Ligas* (1898) 172 Ill. 315, 50 N. E. 225, Affirming (1896) 68 Ill. App. 523; *Chicago & A. R. Co.* v. *Hoyt* (1887) 122 Ill. 369, 12 N. E. 225; *Joliet Steel Co.* v. *Shields* (1893) 146 Ill. 603, 34 N. E. 1108; *Chicago & A. R. Co.* v. *Kelly* (1889) 127 Ill. 637, 21 N. E. 203.

A superintendent and a subordinate workman engaged in putting out a fire in their employer's factory are not fellow servants, so as to prevent the subordinate from recovering of the employer for injuries caused by the negligence of the superintendent, unless their relations were such that the subordinate could "exercise an influence" upon the superintendent "promotive of proper caution." *Hubbold* v. *Chicago Sugar Ref. Co.* (1892) 44 Ill. App. 418.

As another case puts it, mere co-operation is not enough to back the servant's action, if there was no opportunity to exercise this mutual influence. *Chicago & E. I. R. Co.* v. *Knittrim* (1894) 152 Ill. 158, 39 N. E. 324, adopted in *Chicago & A. R. Co.* v. *Swan* (1897) 70 Ill. App. 331, holding that a baggageman and engineer are not, as matter of law, fellow servants simply because they co-operate in the transportation of the passengers and their baggage.

When the servant "is told that this care and prudence is his only remedy against danger from the negligence of those employed with him, it not only makes him the more careful, but stimulates him to see that others exercise the

cussions of the doctrine the evidential significance of each and all c the various elements involved is duly recognized.[2]

Personal acquaintance between persons employed by the same

same caution." *Louisville, C. & L. R. Co.* v. *Carcus* (1873) 9 Bush, 559.

In a case where coservice was negatived, it was remarked that the servants had "no control over the other servants; no opportunities of judging of their efficiency." *Union P. R. Co.* v. *Erickson* (1891) 41 Neb. 1, 29 L. R. A. 137, 59 N. W. 347.

See also *Card* v. *Eddy* (1894) 129 Mo. 510, 36 L. R. A. 800, 28 S. W. 979; *Madden* v. *Chesapeake & O. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695.

Common employment has been predicated from the fact that the servants in question were "engaged in a common work, and were so situated that they could observe the conduct and delinquencies of each other and report to a common master." *Sheehan* v. *Prosser* (1893) 55 Mo. App. 569.

A case in which this aspect of the servant's capacity to protect himself will naturally present itself to the exclusion of the others arises where the negligent and injured servants were working under different supervising officers. The inability of the latter servant to protect himself by complaining of delinquencies committed is then apt to be put forward as the most prominent feature in the relations between the servants. Thus, in *Dixon* v. *Chicago & A. R. Co.* (1891) 109 Mo. 431, 18 L. R. A. 792, 19 S. W. 412, we find Barclay, J., arguing thus: "In the case in ban[illegible] master had seen fit to place the d[illegible]ased quarryman and the trainman under supervision and management totally apart from each other. They were not 'acting under the same immediate direction.' *Missouri P. R. Co.* v. *Mackey* (1887) 127 U. S. 208, 32 L. ed. 108, 8 Sup. Ct. Rep. 1161. Each looked to a different individual as the master's representative for directions in his work, and had no practical connection with the superior who guided and supervised the acts and conduct of the other. If Dixon, instead of being killed, had merely noticed repeated acts of negligence by the trainmen in omitting to signal its approach, what could he have done to correct such course of conduct, and insure his own safety? Complain to his foreman? The foreman directing his work had no power to discharge or to control the trainmen referred to. The theory that a servant entering employment may fairly be considered to assume the risks (among others) of possible injury from the negligence of his fellow workmen (now most frequently mentioned as the groundwork of the exemption) can have no just or logical application where the supposed fellow servants are so widely severed by the division of the employer's business that neither can have a ready appeal to any common superior, having power to require, and, if need be, to enforce, correct and careful conduct on the part of the other. Such an appeal furnished to the servant the means to avert, or at least to diminish the dangers arising from incompetency or carelessness on the part of his fellows. But when that appeal is impossible, by reason of the total severance of their fields of labor and of the control to which they severally are subject, we apprehend there is little left of recognizable principle upon which servants so situated can be supposed to have mutually assumed the risks of each other's negligence. Workmen so distantly related to each other in the master's service as the quarrymen and the train operatives here are scarcely more nearly allied, for all practical purposes of mutual observation, vigilance, and protection, than are the servants of different independent contractors, engaged in separate branches of labor upon a common enterprise (though we do not mean to imply that the legal relations between them are identical). Employees of the latter class are universally held not fellow servants within the rule under discussion."

[2] Speaking of the prior decisions in Missouri, the court said, in *Reiley* v. *Kansas City, Ft. S. & G. R. Co.* (1892) 112 Mo. 86, 18 L. R. A. 817, 20 S. W. 480: They "reject the rule of exemption. . . . that all are coservants who are engaged by the same master in carrying on some general enterprise, no matter how different and disconnected the work may be. They assert the more reasonable and just rule that they are coservants who are so related and associated in their work that they can observe and have an influence over each other's conduct and report delinquencies to a common correcting power; and they

master is not necessary to create the relation of fellow servants.[3] Nor does the mere fact that the association of the negligent and ignorant servants was brief and temporary exclude the inference of coservice, provided that there was a necessary dependence on each other's care and diligence for their mutual safety.[4] But a relation

are not coservants who are engaged in different and distinct departments of work."

In *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119, where it was held, by a majority of four judges to three, that a trackman engaged in ballasting a track was in a common employment with the men handling the ballast train, the court said: "The real and only point of distinction [i. e., contrasting their position with that of strangers], it seems to us, arises out of the fact that the servants are so associated and related in the performance of their work that they can observe and influence each other's conduct, and report any delinquency to a correcting power. To say a clerk engaged in an office making out pay rolls for a railroad company is a fellow servant, within the rule of exemption, with those engaged in operating trains, is out of all reason. Guided by the real reason for the rule it seems to us it should be applied and applied only in those cases where the servant injured and the one inflicting the injuries are so associated and related in their work that they can observe and have an influence over each other's conduct, and can report delinquencies to a common correcting power or head. In short they should be fellow servants in fact, and not simply in dialectic theory. If in separate and distinct departments, so that the circumstances just stated do not and cannot exist, then they are not fellow servants within any just or fair meaning of the rule." A good deal of the language used in this case seems to carry the court very close to the confines of the doctrine explained in the preceding subtitle.

"The reason of the rule, when applicable, is that each servant engaged in the same department of business, for the safety of all, shall be interested in securing a faithful and prudent discharge of duty by his fellow servants, or that they shall report to the master any delinquencies of those engaged with them in the performance of duty." *Ryan* v. *Chicago & N. W. R. Co.* (1871) 60 Ill. 171, 14 Am. Rep. 32. "The object of the rule is to make each servant vigilant in seeing that the others are careful, prudent, and faithful in the discharge of their duty, and, if not, that it shall be to their interest to report all derelictions that occur." *Pittsburg, Ft. W. & C. R. Co.* v. *Powers* (1874) 74 Ill. 341.

In *Daniels* v. *Union P. R. Co.* (1890) 6 Utah, 357, 23 Pac. 762, the rule is laid down as follows: "In order to constitute servants of one master fellow servants, within the rule *respondeat superior*, they must be engaged in the same line of work, be under the control of the same foreman, be employed and discharged by the same head of the department in which they work; that they labor together in such personal relations that they can exercise an influence upon each other promotive of proper caution in respect of their mutual safety; that they shall be, at the time of the injury, directly co-operating with each other in the particular business in hand, or that their mutual duties shall bring them into habitual consociation, as that they may exercise an influence upon each other promotive of proper caution; and to be so situated in their labor, to some extent, to supervise and watch the conduct of each other as to skill, diligence, and carefulness." See also the quotation from the opinion in *Chicago & N. W. R. Co.* v. *Moranda* (1879) 93 Ill. 302, 34 Am. Rep. 168, in § 11, *ante*.

[3] *World's Columbian Exposition* v. *Bell* (1898) 76 Ill. App. 591, Following *Chicago & A. R. Co.* v. *Hoyt*, Affirmed in (1887) 122 Ill. 369, 12 N. E. 225.

[4] "An engineer of switching crew, although under a temporary employment, is a fellow servant with the engineer and brakeman of a road train, through whose negligence the former is injured while making up a train. *Klees* v. *Chicago & E. I. R. Co.* (1896) 68 Ill. App. 211.

A yard hand in the employ of a railroad company was directed by the foreman to assist B, another employee, in removing a heavy piece of machinery from an engine, the same having been detached by B, whose business it was to take engines to pieces for repairs. While engaged in removing the same, a plank on which they were standing broke, by

between the duties of the negligent and injured servants which merely enables them to observe how each did his work, and does not furnish either with an opportunity of influencing the other's conduct, is not one of which coservice can be predicated.[5]

502. Relation between the theories of nonassignable duties and consociation of duties.— It is obvious that, wherever the duties of the negligent servant relate to the providing or maintaining of safe instrumentalities, and those of the injured servant to the use of those instrumentalities, the master may usually be held liable either on the ground of a difference of department or on the ground that the delinquent was a vice principal, in the sense explained in §§ 567, 568, *post*.[1]

reason of an unseen defect, and the machinery fell on A and injured him. Held that A and B were fellow servants. *Chicago & N. W. R. Co.* v. *Scheuring* (1879) 4 Ill. App. 533.

The fact that the head blacksmith of a railway is only associated for a single day with the members of a wrecking crew will not prevent his being regarded as their fellow servant. *Ubend* v. *Terre Haute & I. R. Co.* (1884) 111 Ill. 203, 53 Am. Rep. 616. The court said: "The evidence shows that a wrecking force is always made up, in the hurry of the moment, out of the employees and servants of the company who happen to be within convenient reach, without regard to the particular line of service in which they are employed. The removing of obstructions from the tracks in case of a collision is, as shown by the proofs in this case, a distinct branch of service, to which all the laboring force of the company are liable to be called, without any reference to their ordinary calling or duties; and when a force thus made up goes aboard the wrecking train and starts to the scene of disaster, they are all, including conductor, engineer, fireman, and brakeman, just as much in a common branch of service while on the way, as they are after their arrival, and the work of clearing the tracks has actually commenced. It is an error to suppose that a force of men cannot be engaged in a common service unless all are contemporaneously working at the same time and engaged in doing precisely the same kind of work. It is sufficient if all are actually employed by the same master, and that the work of each, whatever it may be, has for its immediate object a common end or purpose sought to be accomplished by the united efforts of all. The skill of a carpenter, blacksmith, or other mechanic, might be very useful in removing a wreck, and when thus working together in such a service, though each one in his own particular way, they are all, within the meaning of the rule, engaged in a common employment, notwithstanding in their ordinary employment they have no connection with each other, and consequently when so engaged are not fellow servants."

[5] In *North Chicago Rolling Mill Co.* v. *Johnson* (1885) 114 Ill. 57, 29 N. E. 186, the court, in approving of the refusal of the trial judge to find for the appellant if the duties of the negligent and injured servants were so related that they could observe how each did his work, said: "The idea is that the relations between the servants must be such that each, as to the other, by the exercise of ordinary caution, can either prevent or remedy the negligent acts of the other, or protect himself against its consequences; and, of course, where there is no right or no opportunity of supervision, or where there is no independent will, and no right or opportunity to take measures to avoid the negligent acts of another without disobedience to the orders of his immediate superior, the doctrine can have no application. How can the laborer be profited by a knowledge of the usual manner of doing work in another department, if he is unable, in any reasonable way, while engaged in the proper discharge of his duties, and without disobedience to his immediate superiors, to influence the conduct of the laborers in that department?"

[1] Such cases are those in which the injury was caused by the first-mentioned of each pair of employees mentioned in the subjoined list:

Servants who furnish rolling-stock and those who use it. *Chicago & N. W. R. Co.* v. *Jackson* (1876) 55 Ill. 492, 8 Am. Rep. 661; *Pittsburg, Ft. W. & C.*

The fact that this particular type of cases admits of a double solution has led to some confusion in the arguments of the courts. This is apparently the earliest decision in Illinois which is based distinctly on the ground that the servants were not in the same line of employment, and the court relies to some extent on the doctrine of a nonassignability of duties, and sustains its conclusions by rulings which avowedly rest upon that doctrine;[2] and the same tendency to a wavering between two theories is also noticeable in some later cases.[3] Such overlapping of doctrines is not an uncommon situation in jurisprudence, and is especially frequent in the law relating to employers' liability. In the present instance it need not produce any embarrassment if court and counsel realize adequately the distinction between the alternative theories, and state plainly that it is intended to rely upon one or other, or on both of them.

It is scarcely necessary to point out that, if the second servant of the pairs enumerated in note 1 of this section were the delinquent, there would be no recovery except under the doctrine of associated duties.

503. Difference or identity of department not necessarily conclusive under the consociation doctrine.— In some recent cases, full effect is given to the principle that common employment is essentially a matter which hinges on the question whether there was a consociation of duties, and all that such consociation brings with it; and the conclusion is adopted that, although the negligent and injured servants may have been employed by their master to assist in transacting what are undeniably different and distinct branches or departments of his business, this fact will not necessarily negative the existence of a common employment. Under such circumstances, if their usual duties bring them into habitual association, so that they may exercise a mutual influence upon each other, promotive of proper caution, such persons may still be fellow servants.[1]

R. Co. v. *Powers* (1871) 74 Ill. 341 (*arguendo*); *Toledo, W. & W. R. Co.* v. *Ingraham* (1875) 77 Ill. 309.

A car inspector and a conductor. *Illinois C. R. Co.* v. *Hilliard* (1896) 99 Ky. 684, 37 S. W. 75.

A boiler manufacturer and a fireman. *Nashville & D. R. Co.* v. *Jones* (1871) 9 Heisk. 27.

Track repairers and trainmen. *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339; *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401.

[2] *Chicago, B. & Q. R. Co.* v. *Gregory* (1871) 58 Ill. 272.

[3] *Toledo, W. & W. R. Co.* v. *Moore* (1875) 77 Ill. 217; *Toledo, W. & W. R. Co.* v. *Ingraham* (1875) 77 Ill. 309. Compare *Central Trust Co.* v. *Wabash, St. L. & P. R. Co.* (1888) 34 Fed. 646. See § 520, note 1, subd. (e), *post.*

[1] *Joliet Steel Co.* v. *Shields* (1893) 146 Ill. 603, 34 N. E. 1108, Affirming (1892) 45 Ill. App. 153 (disapproving instruction limiting fellow servants to persons in the same line of employment); *Chicago & A. R. Co.* v. *Kelly*

The converse of this doctrine is that servants working in the same department are not fellow servants within the rule as to the master's liability, unless they directly co-operate with each other in the same line of employment, or by their usual duties are brought into habitual association, so that they may exercise a mutual influence upon each other promotive of proper caution.[2] But in the nature of

(1889) 127 Ill. 537, 21 N. E. 203; *Cleveland, C. C. & St. L. R. Co.* v. *McLaughlin* (1894) 56 Ill. App. 53.

An instruction has been approved to the effect that a section foreman who sustained injuries alleged to be due to the negligence of an engineer in failing to observe a signal flag placed on a bridge upon which he was working is not a fellow servant of such engineer, if they were "employed in different departments" and were "wholly separated and disconnected from each other in the performance of their respective duties." *Peoria, D. & E. R. Co.* v. *Rice* (1893) 144 Ill. 227, 33 N. E. 951. The objection was made that this instruction permitted a recovery where there was simply a difference of departments, but the court said that the concluding clause evented this construction.

These decisions overrule, *pro tanto*, *Pittsburg, Ft. W. & C. R. Co.* v. *Powers* (1874) 74 Ill. 341, where it was distinctly laid down that the "only" case in which the defense of common employment is available is "where they are engaged in the same department of business."

In *Card* v. *Eddy* (1895) 129 Mo. 510, 36 L. R. A. 806, 28 S. W. 979, *in banc*. Overruling (1894) 28 S. W. 753, this aspect of the doctrine is thus discussed: "From these rules, and the reasons for them, it is manifest that the mere general employment in different departments of service, and under different immediate heads, are not absolute tests of the relationship the servants of the departments bear to each other as it affects the liability or exemption of the master. If the servants were, at the time of the injury, actually co-operating together in the particular business in hand, they would be fellow servants for the time being, notwithstanding they may have been regularly employed, and their ordinary duties required them to work, in different departments. Indeed, while co-operating in the same work the servants would be engaged in the department in which the work was required, and under the direction of the agent of the master in charge of it. It might be, and doubtless often is, the case that the duties in distinct departments are so blended as to make it difficult, if not impossible, to determine in which the work is done. Should the employees of a freight train be engaged in assisting trackmen in unloading a carload of ties or rails, the two sets of men could not but be regarded as fellow servants in respect to the particular work in which they are engaged, though their general employment was in different departments, and under different superintendents, and though the work may have been directed by one or both. They would have equal opportunity of observing and influencing the conduct of each other, as though their general work brought them into habitual association. . . . Now it seems to me perfectly clear that in the act of the fireman, which resulted in the injury to plaintiff, the two servants were co-operating together. In respect to the performance of the act a duty devolved upon each. One was required to deliver, and the other to receive, the message. Though the respective duties were very simple, that fact did not change the relationship of those performing it. Not only that, but the evidence shows it was one of the ordinary duties of the service, often performed. Each understood by signals from the other, what was required of him."

[2] *Chicago & A. R. Co.* v. *O'Brien* (1895) 155 Ill. 630, 40 N. E. 1023. Affirming (1893) 53 Ill. App. 198 (section hand and member of fence gang held not to be coservants, as matter of law). The theory of plaintiff's case was that, while returning from work, the hand car upon which he was riding was run down by the other car on which were the members of the other gang. There was evidence that the fence gang was subject to the supervision of the section boss while at work on his section, but no proof that the two gangs of men worked together or that their duties were the same. There was also evidence tending to show that the two

the case, the instances in which the conditions of common employment would not be present, as between servants in the same department, must be rather rare; and there are not wanting Missouri and Illinois cases in which there is laid down a doctrine which is practically indistinguishable from a rule which would make identity of department absolutely conclusive against the servant.[3]

forces, in going to and returning from their daily labor, were more or less frequently thrown together: but this occurred only casually, and rather by accident, than necessarily in the performance of their duties. It was held "too clear for argument that from these facts the jury might properly find that at the time of the alleged injury the plaintiff was not co-operating with the other servants, and that his duties in no way brought him into habitual association with them in such a way that he might exercise an influence upon them or they upon him, promotive of proper caution for their personal safety." The opinion then proceeds thus: "It is, however, said that the law of this state is, 'that servants working in the same department or in the same line of duty, when no question of vice principal arises, are fellow servants.' The law is not so stated in any of the cases above referred to, nor is our attention called to any to that effect. Mr. Justice Scholfield, in *North Chicago Rolling Mill Co.* v. *Johnson* (1885) 114 Ill. 57, 29 N. E. 186, stated the rule to be, from [illegible] cases there cited, 'that the servants of the same master, to be exempt [illegible]es, so as to exempt the master from liability on account of injuries sustained by one resulting from the negligence of the other, shall be directly co-operating with each other in a particular business,—*i. e.*, the same line of employment,—or that their usual duties shall bring them into habitual association so that they may exercise a mutual influence upon each other promotive of proper caution.' The expression, 'the same line of employment,' is here expressly given the same meaning as the preceding words, 'in a particular business,' in which the servants must 'be directly co-operating with each other.' To hold, broadly, that all 'servants working in the same department' are fellow servants would practically abolish the rule of this court, as distinguished from that at common law and held by other courts."

In *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119, Thomas, J., in commenting on an earlier case (*Sullivan* v. *Missouri P. R. Co.* (1888) 97 Mo. 113, 10 S. W. 852) said: Sullivan was a track walker, and was killed by the negligence of the employees in charge of a passenger train. It was held they were not fellow servants. Upon what theory? Upon the theory alone that the conductor and those employed with him in running the train represented the master and stood in his stead. It is said Sullivan's duty was to keep the track clear, and hence he was not performing the same kind of work the trainmen were performing. He and the trainmen were engaged in the same general work, that is, in operating traffic on a railroad. He kept the track clear while the trainmen ran the train on the same track. They were all employed and paid by the same master to aid in carrying on commerce on the same road, and, hence, it is illogical to predicate a right to recover in such case upon the ground that Sullivan and the trainmen were engaged in different kinds of work. And the learned judge goes on to point out that the true ground of the decision was that the servants were not "consociated" in their work.

[3] In Missouri the fact that the two employees were working together under one common directing superior seems to be conclusive as to common employment. *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 176, 21 S. W. 916. Compare *Ryan* v. *McCully* (1894) 123 Mo. 636, 27 S. W. 533.

The situation thus deemed to be decisive must obviously exist wherever the two servants were in the same department, unless it is intended to confine the words "directing superior" within extremely narrow limits. But the remarks in the *O'Brien Case*, commented on in note 2, *supra*, show that, in Illinois, at all events, this inference will be drawn only where it appears that accident occurred while the controlling authority was actually being exercised. "Were it not for the explanations in [illegible] case, the principle that an identity of

This doctrine as to the non-conclusive effect of proof that the departments were different or identical is a necessary corollary of the theory that consociation is the appropriate test of common employment. In courts which do not refer common employment directly to that test (see § 500, *supra, ad finem*), such difference or identity is naturally decisive, as, when they are once established, there is no further question of fact to be determined. Only one deduction of law can be drawn from a given predicament, and as the deductions in the present instance must be antithetical and complementary, it follows that, as a matter of law, a difference of department will negative coservice,[4] and that identity of department lets in that defense.

It will be noticed that so far as regards the power of the court to make a peremptory ruling the same situation arises when the evidence clearly shows the existence or absence of consociation. See § 504, *infra*. But the ruling is then made with respect to the further

department bars the servant's action, as matter of law, might also be deemed deducible from the earlier statements of the same court, that employees of the same master, to be fellow servants so as to exempt the master from liability on account of injuries sustained by one resulting from the negligence of the other, must be directly co-operating in the particular business, or their usual duties must bring them into habitual association, so that they may exercise a mutual influence upon each other promotive of proper caution. *Chicago & A. R. Co.* v. *Hoyt* (1887) 122 Ill. 369, 12 N. E. 225; *North Chicago Rolling Mill Co.* v. *Johnson* (1895) 114 Ill. 57, 29 N. E. 186; *Chicago & N. W. R. Co.* v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 604. The direct co-operation here spoken of must now be taken to mean something distinct from co-operation in the same department. That the negligent and injured servants were under different "directing superiors" will, of course, still less exclude the defense of common employment than a difference of department. That defense will still prevail if they were engaged in the same line of employment, such as necessarily brought them into frequent contact with each other in the prosecution of their work. *Chicago & A. R. Co.* v. *O'Bryan* (1884) 15 Ill. App. 134, where the question was whether gangs employed in a car shop and a machine shop, between which cars were constantly being moved, were co-servants. It was held misleading to charge the jury that men are not fellow servants, where "they are not co-operating with each other in any particular business or work," since a jury would probably understand these words as requiring the parties to be engaged in doing exactly the same work at the same place and under the same foreman.

Since the question whether or not two persons are fellow servants must be determined from a consideration of all the evidence concerning the respective duties performed by them, and their respective relations to the business generally and toward each other in the performance of their respective duties (*Lebanon Coal & Mach. Asso.* v. *Zerwick* [1898] 77 Ill. App. 486) it is error to give an instruction that to constitute coservice, it is essential that the servants shall be, at the time of the injury, directly co-operating with each other in the particular business in hand.

[4] *Nashville & C. R. Co.* v. *Carroll* (1871) 6 Heisk. 347; *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342, following *McNaughton* v. *Caledonian R. Co.* (1857) 19 Sc. Sess. Cas. 2d series, 271; *Louisville & N. R. Co.* v. *Filbern* (1869) 6 Bush, 574, 99 Am. Dec. 690. *Fort Hill Stone Co.* v. *Orm* (1886) 84 Ky. 183; *Volz* v. *Chesapeake & O. R. Co.* (1893) 95 Ky. 188, 24 S. W. 119; *Louisville & N. R. Co.* v. *Robinson* (1868) 4 Bush. 507; *Edmonson* v. *Kentucky C. R. Co.* (1898) 20 Ky. L. Rep. 1256, 49 S. W. 200; *Louisville, C. & L. R. Co.* v. *Cavens* (1873) 9 Bush. 565.

fact of consociation, as distinguished from identity of department.

504. Consociation primarily a question of fact for the jury.—A theory of common employment which makes the availability of this defense turn upon the determination of the several questions of fact indicated by the statement at the beginning of the last section, with regard to the elements involved, necessarily entails the consequence that the general question, whether the negligent and the injured servant in any given case were coservants, is primarily for the jury.[1] Hence, whenever different deductions might be reasonably drawn from the evidence as to either of the alternative issues upon which this ultimate fact depends, it is error to take the case from the jury.[2] According to the Illinois decisions it would seem that there is always deemed to be, within the meaning of this rule, a possibility of diverse opinions in respect to those issues, if the servants were working in what would be styled, in popular parlance, different departments, and the court should not assume to control or review a verdict, unless it would be a clear abuse of terms to predicate such a difference under the circumstances.[3] On the other hand the question whether the

[1] *Chicago & A. R. Co.* v. *Swan* (1898) 176 Ill. 424, 52 N. E. 916, Affirming (1897) 70 Ill. App. 331; *Mobile & O. R. Co.* v. *Massey* (1894) 152 Ill. 144, 38 N. E. 787; *Louisville, E. & St. L. Consol. R. Co.* v. *Hawthorn* (1893) 147 Ill. 226, 30 N. E. 534; *Chicago & A. R. Co.* v. *House* (1898) 172 Ill. 601, 50 N. E. 151; *Lake Erie & W. R. Co.* v. *Middleton* (1892) 142 Ill. 550, 32 N. E. 453; *Toledo, W. & W. R. Co.* v. *Moore* (1875) 77 Ill. 217; *Westville Coal Co.* v. *Schwartz* (1898) 177 Ill. 272, 52 N. E. 276, Affirming (1897) 75 Ill. App. 468; *Illinois Steel Co.* v. *Bauman* (1898) 78 Ill. App. 73, Affirmed (1899) in 178 Ill. 351, 53 N. E. 107.

After this question has been determined by the court of appeals in Illinois, which is the highest one competent to pass upon the facts, its decision is not subject to review. *Chicago & A. R. Co.* v. *Kelly* (1889) 127 Ill. 637, 21 N. E. 203; *Indianapolis & St. L. R. Co.* v. *Morgenstern* (1883) 103 Ill. 216; *Chicago & A. R. Co.* v. *O'Brien* (1895) 155 Ill. 630, 40 N. E. 1023.

In *Chicago & N. W. R. Co.* v. *Snyder* (1889) 128 Ill. 655, 21 N. E. 520, the jury returned a negative answer to the following question: "At the time of the accident causing Snyder's death did the usual duties of said Snyder and Torrence, the semaphore attendant, bring them habitually together, so that they could exercise a mutual influence upon each other promotive of proper caution, *so as to make them coemployees in the same line of employment, as explained in defendant's instruction?*" (embodying rule laid down in earlier Illinois cases). The italicised clause was added to the question by the court, and this modification of the question by the court was complained of as error. It was held that the defendant company was not prejudiced by thus referring the jury to its own instruction prepared by its own counsel, since they were not required by the modification to pass upon the law, but were merely told to answer the question of fact propounded to them, in accordance with the principles of law laid down in the instruction.

[2] *Chicago & A. R. Co.* v. *Kelly* (1889) 127 Ill. 637, 21 N. E. 203; *Mobile & O. R. Co.* v. *Godfrey* (1895) 155 Ill. 78, 39 N. E. 590.

[3] *Louisville, E. & St. L. Consol. R. Co.* v. *Hawthorn* (1893) 147 Ill. 226, 35 N. E. 534, Affirming (1892) 45 Ill. App. 635; *Chicago & E. I. R. Co.* v. *Kuciria* (1892) 48 Ill. App. 243, (1894) 153 Ill. 458, 39 N. E. 324; *Chicago & N. W. R. Co.* v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 604; *Chicago & N. W. R. Co.* v. *Moranda* (1879) 93 Ill. 302, 34 Am. Rep. 168; *Cleveland, C. C. & St. L. R. Co.* v. *McLaughlin* (1894) 56 Ill. App. 53; *Chicago & E. I. R. Co.* v. *Shannon*

relation of fellow servants existed is, in the same state, one of law for the court, where the evidence for the plaintiff is absolutely conclusive, and reasonable minds would not differ as to the proper inference to be drawn.[4]

The question whether servants are in a common employment has also been termed a mixed question of law and fact.[5] This mode of describing it does not, of course, imply a relation between the court and jury at all different from that stated above.

505. General discussion of the doctrine of consociation.—The view that common employment may depend on mere contiguity or distance, or on a more or less intimate association between the duties of the negligent and injured servants was, as we have seen (§ 6, *ante*), discussed in the leading case of *Farwell* v. *Boston & W. R. Corp.*[1] Chief Justice Shaw's arguments against this view, which have been restated, and to some extent expanded, in later opinions, have been regarded as completely convincing, except by the few courts whose

(1892) 43 Ill. App. 540; *Chicago & W. I. R. Co.* v. *Flynn* (1894) 54 Ill. App. 387. Affirmed in (1895) 154 Ill. 448, 40 N. E. 332; *Chicago & A. R. Co.* v. *Hoyt* (1887) 122 Ill. 369, 12 N. E. 225. See also *Webb* v. *Denver & R. G. R. Co.* (1891) 7 Utah, 363, 26 Pac. 981.

In a case where the plaintiff had been temporarily placed under the control of a foreman in another department, the question whether he [plaintiff] and the workman through whose negligence he was injured were fellow servants was held to be a question for the jury. *Supple* v. *Agnew* (1901) 191 Ill. 439, 61 N. E. 392, Reversing (1898) 80 Ill. App. 457.

[4] *Meyer* v. *Illinois C. R. Co.* (1899) 177 Ill. 591, 52 N. E. 848, Affirming (1895) 65 Ill. App. 531; *Chicago & E. I. R. Co.* v. *Driscoll* (1898) 176 Ill. 330, 52 N. E. 921, Reversing (1897) 70 Ill. App. 91; *Swadley* v. *Missouri P. R. Co.* (1893) 118 Mo. 268, 24 S. W. 140; *Relyea* v. *Kansas City, Ft. S. & G. R. Co.* (1892) 112 Mo. 86, 18 L. R. A. 817, 20 S. W. 480; *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 111, per Gantt, J., and Barclay, J., (assenting and dissenting judges); *Gerraby* v. *Kansas City, St. J. & C. B. R. Co.* (1885) 35 Fed. 258.

The rule that it is for the court to state what constitutes the relation of fellow servants, and for the jury to determine whether or not that relation exists, cannot be construed to mean that the trial court is bound to submit the case to the jury, even when the evidence shows conclusively that the relation of fellow servants exists, and there is no evidence to show the contrary. *O'Leary* v. *Wabash R. Co.* (1893) 52 Ill. App. 641; *Springfield Iron Co.* v. *Gould* (1880) 11 Ill. App. 439 (rails left in dangerous position by plaintiff and co-servants).

The definition of fellow servants is a question of law; whether a given case falls within that definition is a question of fact. *Chicago & I. R. Co.* v. *Swan* (1898) 176 Ill. 424, 52 N. E. 916; *Springside Coal Min. Co.* v. *Grogan* (1897) 169 Ill. 50, 48 N. E. 190; *Pittsburg Bridge Co.* v. *Walker* (1897) 170 Ill. 550, 48 N. E. 915; *Chicago City R. Co.* v. *Leach* (1898) 80 Ill. App. 354.

In a case where the supreme court of Wisconsin was applying the Illinois doctrine it was laid down that, where there is no dispute as to the respective duties of servants employed by the same master, the question whether they are fellow servants is for the court. *MacCarthy* v. *Whitcomb* (1901) 110 Wis. 113, 85 N. W. 707.

[5] *Chicago, B. & Q. R. Co.* v. *Fitzgerald* (1890) 40 Ill. App. 476.

[1] (1841) 4 Met. 49, 38 Am. Dec. 339.

decisions have just been discussed.[2] Yet they are not altogether satisfactory.

Two separate positions, it will be observed, are taken. One of these is that the doctrine of associated duties is "incorrect in prin-

[1] In *Brodeur* v. *Valley Falls Co.* (1889) 16 R. I. 448, 17 Atl. 54, the court, after quoting from this opinion, said: "The reasons here set forth are a strong answer to the position taken in the Illinois cases. They show an obvious impracticability in trying to gauge the liability of an employer, in a complex business, by the independence of its different branches, or by the intercommunication of those employed. Not only would it be almost impossible, in many cases, to separate the work into distinct departments and to discern their dividing lines, but incidental duties, changing the relations of workmen to each other, would also vary the master's liability. He would thus be liable for the negligence of a servant at one time or place, and not at another. Without a personal supervision of all his help in all their work he could not know when he was responsible and when he was not. Moreover, such a rule would govern the liability of a master when the groundwork upon which the rule is founded did not exist. For, if the test of liability be that of the separate and independent duties of the servants, they may, nevertheless, be so near each other as to be able to exert a mutual influence to caution; or, if it be that of association, they may still be in the same department, but unable, from their duties or positions, to exert such influence. But, aside from these considerations, we do not think the rule is correct in principle. The principle upon which the determination of *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339, proceeded is the same that has been generally followed in England and in this country,—namely, that the rights and liabilities of both master and servant are those which grow out of their contract relation. The master impliedly agrees to use due care for the safety of his servant, in providing suitable places and appliances for work; and, as is universally conceded, the servant agrees to assume the ordinary risks of his employment. The most common risks of service spring from the negligence of fellow servants. When one works with others, he knows that his safety depends on the exercise of care by those around him, as their safety depends also upon his own caution. No man can enter into an employment without a thought of this. Negligence, therefore, among workmen [illegible] breach of the duty which each [illegible] the others, and not a breach of t[illegible]ter's duty, if he has exercised the ca[illegible] that is required of him. For his own negligence the master must answer, but for that of others, which is a risk incident to every employment, he has not agreed to be responsible, but on the contrary the servant has impliedly agreed to assume it upon himself. The contract relation, therefore, puts them outside of the rule which makes a master liable to a stranger for the negligence of his agent, for *respondeat superior* is based upon considerations of public policy which are not called for in the relation between master and servant."

See also the following passage in *Ross* v. *New York C. & H. R. R. Co.* (1875) 5 Hun, 488: "The rule exempting the master from responsibility to one servant for injury sustained by him from the negligence of another servant does not rest or depend upon the intimacy of their relations to each other in their particular work, respectively. It extends to all employees of a common master engaged in carrying on any general work or enterprise. It rests upon the single ground above stated, that the master impliedly contracts with each and every employee to subject them, respectively, to no unreasonable risks from the incompetency of any of their fellow workmen. If workmen are employed together in any particular branch of labor, and their knowledge of each other, and of the state of the machinery or implements furnished for their common use, is as well known to them as to their master, this fact may furnish another element of exemption from responsibility on the part of the master, if they consent to continue to work with incompetent fellow servants, or with defective or insufficient implements or machinery. . . . These cases [i. e., in Illinois and other states where a similar theory is adopted], it seems to me, overlook or mistake the

ciple,"[3] or based on "an erroneous theory."[4] The other is that there are insuperable practical difficulties in the way of testing the existence of a common employment by the independence of the different branches of the business, or by the intercommunication of those employed.

As regards the former of these positions, it seems sufficient to point out that there is a clear *petitio principii* committed when a court assumes to condemn, as radically and inherently incorrect, one of two opposing theories which, in their ultimate analysis, are, it is evident, based upon no more solid foundation than mere postulates, incapable of demonstration, and expressing simply the opinions of various judges as to matters concerning which a lawyer is no more likely to be in the right than any other person of intelligence and good education.

On the one hand it is assuredly not self-evident that servants are made more cautious and diligent by being deprived of the right of recovering for injuries caused by the negligence of all coemployees except vice principals,—which is practically the result of the rule applied by the majority of the courts.[5] Still less is it self-evident that, if the rule does operate in the manner supposed, the increase of caution and diligence thus secured is so considerable that its enforcement is justifiable on so broad a ground as that of public policy.

On the other hand, it is equally impossible to assert that there is anything essentially fallacious and unsound in the idea of the other school of thought,—that it is illogical to throw the responsibility to which a rule deduced from such premises subjects the servant upon any employees except those who possess the opportunity and means for that self-protection which it is one of the principal, if not the principal, object of the rule to secure. The proposition that a doc-

true principle upon which the master's liability in such cases rests. All the servants of a common master stand to him in the same relation: they severally undertake to work for the same master, and take and assume on their part the risk of all dangers ordinarily incident to their employment. The master impliedly undertakes on his part to exercise ordinary care to protect them from all unreasonable risks and dangers pertaining to such work, resulting from the employment of incompetent servants in other departments of his work."

[3] See the Rhode Island Case cited in the last note.

[4] So expressed in *Neal* v. *Northern P. R. Co.* (1894) 57 Minn. 365, 59 N. W. 312.

[5] See subtitle B, *supra*.

Extremely expressive in this connection are the common-sense remarks of Field, J., in *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, as to the extreme questionableness—to use no strange term—of the soundness of a doctrine which simply amounts to an assertion that the instinct of self-preservation is not a motive power sufficiently strong to make servants as careful as their character and temperament will permit.

trine which, when reduced to its simplest terms, merely amounts to the statement that the law should imply a contract to assume the risks of a fellow servant's negligence, because it is expedient on grounds of public policy (see § 162, *ante*), is intrinsically less correct than another doctrine, the essence of which is that in certain classes of cases it would be unreasonable to imply such a contract, cannot be satisfactorily established by a mere dogmatic assertion. Under this head, therefore, the utmost that can be affirmed is that the doctrine of associated duties is the doctrine of the minority; and in judicial, as in other kinds of legislation, this fact is, for practical purposes, conclusive.

The other objections made to the Illinois doctrine,—the extreme vagueness of the test supplied by the conception of association or dissociation of duties, and the immense difficulties which the constantly changing relations of servants would, in practice, create,—are unquestionably serious; but, properly viewed, they seem to be not so much objections which are fatal to the doctrine itself, taken in the abstract, as objections which tend to discredit the doctrine in the form in which it is actually applied by courts which shrink from carrying it out to its proper conclusions. A judge who takes his stand on the broad ground that a servant is not in a common employment with any fellow employee against whose negligence he is incapable of protecting himself cannot, it is submitted, find any logical halting place short of a theory which will enable the injured servant to recover in every case where the particular act which caused his injury was done at such a distance that his senses could give him no intimation of the peril which menaced him, or under such circumstances that, although he may have been aware of the peril, he was unable to ward it off or escape from it. The means of self-protection upon which the Illinois doctrine lays most stress, *viz.*, that associated servants can exercise an influence upon each other's conduct, and report any delinquencies which they may observe, must evidently be, in many instances, wholly inadequate to secure them. If the theory that the capacity for self-protection is the final test of common employment is once accepted, there seems no reason whatever why this relaxation of the general rule should stop at the point at which the courts of that and other states have chosen to arrest it.[6] The servant can receive the

[6] There is only too good reason for the following complaint of Thomas, J., in a case which is one of the most remarkable illustrations of the hair-splitting distinctions of which the doctrine of consociation has been so prolific. "The embarrassment the courts encounter in the discussion of the law of fellow service grows out of the difficulty in adopting and adhering to some general prin

legitimate benefit of this principle only by a doctrine which will permit his action to be maintained except in cases where the relation between his duties and those of the delinquent coemployee were such that he had a reasonable chance of protecting himself by his own personal efforts.[7] The doctrine in its present shape is a mere arbitrary compromise which can scarcely be said to have any higher justification than its effect in mitigating the severe consequences of a rule which so often operates in a manner revoltingly harsh and oppressive.

506. Illustrative cases.—In the subjoined note are collected the cases in which the rights of the parties were determined with reference to the identity or difference of departments, or the doctrine of consociation. For the purpose of facilitating comparison, they are tabulated under headings similar to those employed in § 498, *supra*.[1]

ciple upon which to proceed. When the principle announced in the earlier cases—that all servants employed and paid by the common master to perform common service were fellow servants—was abandoned, the courts were left apparently with no sound principle by which they could be guided and controlled in concrete cases." *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 403, 18 L. R. A. 802, 19 S. W. 1119.

[7] The futility of attempting to base a theory of consociation on any other grounds but this is well brought out in the following remarks of the court, in *Hamilton* v. *Cleveland & T. R. Co.* (1860) 11 Ohio St. 417: "In this use of the term common duty or common service, applied to the employees of a railroad company, in conducting the active business upon the road, servants somewhat disconnected in their respective duties are necessarily included. But this want of immediate connection in their respective duties will be found to obtain even if the use of the term should be restricted so as to embrace only the operatives upon the same train. The respective duties of those assigned to different positions upon the train will be found, to a great extent, necessarily independent of each other; and yet the carelessness of any one may often be fatal to other servants on the same train, having no control over the delinquent, and in full discharge of their own duties. And yet the most limited application of the rule must necessarily embrace such cases."

[8] It is of some interest to note in the present connection that if, as is asserted by the authorities, the absence of any traces of the doctrine of common employment in the reports prior to the decision of *Priestley* v. *Fowler* (1837) 3 Mees. & W. 1, 1 Murph. & H. 305, 4 Jur. 987, is due to the fact that it was considered so indisputable as to be beyond the reach of attack, this unquestioning acceptance may possibly be explained by the small size of most of the industrial concerns in early times, and the character of the work usually done in those which were larger than the average. Owing to the conditions which prevailed, accidents must have been quite rare in which the negligent and injured servants did not occupy, in the discharge of their duties, such local relations that each could protect himself to some extent against isolated acts of negligence; and to the sturdy, self-reliant Anglo Saxon artisan or laborer there might well have seemed nothing unfair, under such circumstances of physical contiguity, in expecting him to assume the risk of his fellow worker's negligence. The existence of such a feeling, coupled with the extremely undeveloped condition of the law of negligence, was, it may be, the reason no attempts were made to hold the employers responsible. If this surmise be well-founded, it is apparent that the theory of associated duties may be regarded as representing the results of a tendency to revert to what may have been the original rule.

[1] (a) *Servants engaged in office work and in handling trains.* There is no common employment between a conductor and a station agent. *Chicago & V.*

W. R. Co. v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 604.

A station agent is not the fellow servant of a car repairer or inspector having supervision of the condition of car brakes, although the agent is required to set the brakes of cars left at his station. *Chicago, R. ... Co.* v. *Kellogg* (1898) 51 Neb. ... 74 N. W. 451 (modified on rehearing in 76 N. W. 462, but above ruling not touched).

The conductor of a freight train, who also assists in switching cars at stations, is not a fellow servant of a station agent. *Louisville & N. R. Co.* v. *Jackson* (1901) 61 S. W. 771, 106 Tenn. 438 (agent left pinch bar lying on the track).

In *Pittsburg, Ft. W. & C. R. Co.* v. *Powers* (1874) 74 Ill. 341, it was assumed, *arguendo*, for purposes of illustration, that a clerk keeping books in the office was not a coservant of trainmen.

In *Madden* v. *Chesapeake & O. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695, the same conclusion was reached as regards an operator and an engineer, on the two grounds that they were not so situated as to control or influence each other's conduct, and that the operator was the superior servant.

In *East Tennessee, V. & G. R. Co.* v. *De Armond* (1887) 86 Tenn. 73, 5 S. W. 600, a telegraph operator was held not to be a fellow servant of a conductor, both because he is in a separate department, and also a vice principal, as being the mouthpiece of the superintendent. The ruling in *Hall* v. *Galveston, H. & S. A. R. Co.* (1889) 39 Fed. 18, that a telegraph operator was not a fellow servant of a brakeman is possibly based on the same principle as the above cases. But as it was made in an oral charge, and the judge gives no reasons and cites no authorities, its precise rationale is doubtful.

It is held that a fireman and a telegraph operator are engaged in different departments or "about a different piece of work," within the meaning of the Mississippi Constitution of 1890, § 193. *Illinois C. R. Co.* v. *Hunter* (1892) 70 Miss. 471, 12 So. 482.

(b) *Servants working on the same train.*—There is a common employment between an engineer and brakeman. *Illinois C. R. Co.* v. *Keen* (1874) 72 Ill. 512 (engine exploded); *Chicago & I. R. Co.* v. *Brandau* (1895) 65 Ill. App. 150; *Louisville & N. R. Co.* v. *Martin* (1889) 87 Tenn. 398, 3 L. R. A. 282, 10 S. W. 772; *Dysart* v. *Kansas City, Ft. S. & M. R. Co.* (1898) 145 Mo. 83, 46 S. W. 751 (not disputed; theory of plaintiff was negligence in selecting the engineer).

Between an engineer and fireman. *Chicago & I. R. Co.* v. *Brandau* (1895) 65 Ill. App. 150 (engine exploded).

Between two brakemen. *Chicago & I. R. Co.* v. *Rush* (1877) 84 Ill. 570; *Chicago, R. & Q. R. Co.* v. *Howard* (1895) 45 Neb. 570, 63 N. W. 872 (special finding held to override general verdict for the plaintiff).

Between a conductor and his coemployees on the train. *Chicago & N. W. R. Co.* v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 601; *Heyer* v. *Illinois C. R. Co.* (1899) 177 Ill. 591, 52 N. E. 818.

For Kentucky case, see § 549, *post*.

(c) *Servants handling different trains.*—Under the coassociation doctrine in Illinois it is a mixed question of law and fact, whether these servants are in a common employment, and their relations should therefore be submitted to the jury under proper instructions. *Lake Erie & W. R. Co.* v. *Middleton* (1892) 142 Ill. 550, 32 N. E. 453.

An engineer in charge of an engine on the main track is not, as matter of law, a fellow servant of a brakeman at the rear of a train on a side track. *Chicago & W. I. R. Co.* v. *Flynn* (1891) 51 Ill. App. 387. Affirmed (1895) 151 Ill. 448, 40 N. E. 332.

So it has been held to be a question for the jury, whether the crews of a coal and an extra freight train were coservants. *Malott* v. *Crow* (1900) 90 Ill. App. 628.

In *Chicago & A. R. Co.* v. *House* (1896) 71 Ill. App. 147, affirmed in (1898) 172 Ill. 601, 50 N. E. 151 (switch left open), it was held that a jury were justified in finding that the conductor of a freight train and his subordinates were not fellow servants of the crew of a passenger train.

The gripman of one street car is not, as matter of law, a fellow servant of a conductor of another car injured by the former's negligence, where there are about a thousand persons employed as conductors or gripmen on the same line of road, and there is not necessarily any association between the men constituting the crews of two different trains, and the conductor injured had never worked upon the same train and was personally unacquainted with the negligent gripman. *Chicago City R. Co.* v. *Leach* (1898) 80 Ill. App. 354.

But in this state it has also been frequently ruled, as a matter of law, that employees on different trains were coservants. *Cincinnati, N. O. & T. P. R. Co.* v. *Roberts* (1901) 23 Ky. L. Rep. 264, 62 S. W. 901 (two engineers); *Wabash, St. L. & P. R. Co.* v. *Conkling* (1884) 15 Ill. App. 157; *Ohio & M. R. Co.* v. *Robb* (1886) 36 Ill. App. 327 (two engineers); *Clark* v. *Wabash R. Co.* (1893) 52 Ill. App. 104 (conductor of one train and engineer of another); *North Chicago Street R.* v. *Dudgeon* (1893) 69 Ill. App. 57 (two of two street cars); *Elgin, J. & E. R. Co.* v. *Maloney* (1894) 59 Ill. App. 111 (two switching crews); *Terre Haute & I. R. Co.* v. *Leeper* (1895) 60 Ill. App. 194 (crews of two sections of a train, who, it was contended, should be regarded as serving on two different trains;—ruling was based on the ground that "the duty of each relates to a joint enterprise, in the proper execution of which each is equally interested," and that the servants were put to constant care to avoid collisions); *Illinois C. R. Co.* v. *Swisher* (1897) 74 Ill. App. 134, Affirmed in (1899) 182 Ill. 533, 55 N. E. 555, Former Appeal (1893) 53 Ill. App. 411, (1895) 61 Ill. App. 611 (brakeman of a freight train standing on a side track, improperly turned a switch, so that a passenger train left the main track and collided with the freight train, to the injury of the fireman on the engine drawing the passenger train); *Klees* v. *Chicago & E. I. R. Co.* (1899) 68 Ill. App. 244 (engineer of switching crew, and engineer and brakeman of a road train).

In Wisconsin it has been held, with regard to an injury received in Illinois, that the conductor and brakeman on a freight train, who negligently leave the train standing on the track without displaying the proper signals, are fellow servants of a fireman on another train, who is injured by a collision resulting from such negligence. *MacCarthy* v. *Whitcomb* (1901) 110 Wis. 113, 85 N. W. 707.

In Missouri, coservice has been held to be a defense where a brakeman failed to set brakes on cars left on the main track while others were being switched on to a siding, and the unsecured cars got into motion and collided with another train, killing the fireman thereon. *Rehm* v. *Kansas City, Ft. S. & G. R. Co.* (1892, Mo.) 19 S. W. 1116. Affirmed in Banc (1892) 112 Mo. 86, 18 L. R. A. 817, 20 S. W. 480. The division court said: "In this case each servant was under the immediate command of his own conductor, it is true; but that fact does not constitute a decisive or controlling circumstance. Many cases may be instanced where different gangs of men, each gang under the orders of its own foreman, are clearly coservants within the rule of exemption. It does appear in this case that train 52 left Thayer and pursued its trip under the orders of the train dispatcher; and it is fair to presume that the other trains made their trips under orders emanating from the same source. The injured and offending servants were operating trains over the same section of the road. Though sometimes far apart, they were necessarily thrown into close relation in respect to the performance of their work and they were engaged in the same department of service. They were, in our opinion, coservants within the fair meaning of the rule of exemption, so that defendant is not liable for injuries inflicted by one upon the other." In the opinion delivered by the court in banc, stress was laid on the fact that both servants were under orders of the same train dispatcher.

Coservice has been denied to exist between the engineer of one ordinary train and the brakeman of another. *Louisville & N. R. Co.* v. *Robinson* (1868) 4 Bush, 507; *Louisville, C. & L. R. Co.* v. *Curran* (1873) 9 Bush, 559; *Kentucky C. R. Co.* v. *Lehlen* (1888) 87 Ky. 278, 8 S. W. 691 (no opportunity to exercise watchfulness over the negligent servant). In the last two cases the delinquent was a conductor. As to the Kentucky doctrine, see § 549, *post*.

In West Virginia it has been held that there is no coservice between an engineer and the conductor on another train. *Hudden* v. *Chesapeake & O. R. Co.* (1885) 28 W. Va. 610, 57 Am. Rep. 695.

(d) *Servants handling trains, and switchmen.*—A switchman has been held a fellow servant of the men operating an ordinary freight train. *Rutledge* v. *Missouri P. R. Co.* (1894) 123 Mo. 121, 24 S. W. 1053 (in banc), Affirmed in (1894) 123 Mo. 140, 27 S. W. 327 (by whole court without argument).

And a like ruling has been made in several Illinois cases where a switchman was injured by the negligence of a switch engineer. *Stafford* v. *Chicago, B. & Q. R. Co.* (1885) 114 Ill. 244, 2 N. E. 185; *Chicago, R. I. & P. R. Co.* v. *Hearn* (1880) 7 Ill. App. 322; *Chicago, R. I. & P. R. Co.* v. *Touhy* (1887) 26

Ill. App. 99; *Warmington* v. *Atchison, T. & S. F. R. Co.* (1891) 46 Mo. App. 159.

A tower switchman is a fellow servant of a fireman and an engineer. *Cleveland, C. C. & St. L. R. Co.* v. *Loerler* (1901) 94 Ill. App. 36.

In *Louisville & N. R. Co.* v. *Sheets* (Ky. 1890) 11 Ky. L. Rep. 781, 13 S. W. 248, a yard switchman was held not to be a fellow servant of an engineer of an ordinary train, but the decision was determined by difference of grade rather than difference of department. See § 549, *post*.

(e) *Servants handling trains, and express and baggage men.*—There is no coservice, as matter of law, between a baggageman and an engineer. *Chicago & A. R. Co.* v. *Swan* (1898) 176 Ill. 424, 52 N. E. 916. Affirming (1897) 70 Ill. App. 331 (declaration alleging facts not sufficient to show coservice). Nor between a baggageman and a brakeman. *American Exp. Co.* v. *Risley* (1898) 77 Ill. App. 476. Affirmed in (1899) 179 Ill. 295, 53 N. E. 558.

In *Central Trust Co.* v. *Wabash, St. L. & P. R. Co.* (1888) 34 Fed. 616, where it was held that an expressman and a baggageman of a passenger train were not fellow servants, the court quotes Illinois cases, but seems also to consider that the freight train employees represented the master at the time of a collision caused by running past a train, contrary to regulations. The latter conception is clearly erroneous.

(f) *Servants handling trains, and car inspectors, or car repairers.*—(See also § 502, note 1, *supra*.) Servants operating trains and car repairers have been denied to be coservants in *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302 (train negligently backed by switching crew); *Richmond & D. R. Co.* v. *Vaiment* (1887) 84 Va. 167, 4 S. E. 211; *Illinois C. R. Co.* v. *Hilliard* (1895) 99 Ky. 684, 37 S. W. 75 (see § 549, *post*, for Kentucky doctrine); *Daniels* v. *Union P. R. Co.* (1890) 6 Utah, 357, 23 Pac. 762 (this case, in which the car inspector was the delinquent, was affirmed in *Union P. R. Co.* v. *Daniels* (1894) 152 U. S. 684, 38 L. ed. 597, 14 Sup. Ct. Rep. 756, but on the ground of the nonassignability of the duty of inspecting cars); *Chicago & A. R. Co.* v. *Hoyt* (1887) 122 Ill. 369, 12 N. E. 225.

In the case last cited the circumstance which was regarded as conclusively negativing common employment was that the duties of the engine driver in connection with his train ceased at or before the time it was the inspector's duty to go upon it to begin his work of inspection. The court said: "In specting cars after they are delivered in the yards can have no relation or connection with the running of trains at distant points. . . . Plaintiff and the engine driver were not engaged in the same business at all. It was distinct and wholly different, and had each continued in his particular business for any indefinite period, it is hardly predicable they would have been brought into any relation where one might have exercised an influence over the other promotive of proper caution. In the very nature of the business each was engaged in, it was impracticable for one to have had any influence over the other promotive of proper caution, or otherwise. They were strangers to each other, and might have remained so for an indefinite time, so far as anything in their business relations would have brought them together. It is true they might have been fellow servants in the strictest sense, and yet they might not have been associated an hour before the happening of the injury. What is meant is, if the parties continue to be engaged in a common service they will be habitually associated, so that they may exercise any influence over each other promotive of common safety. That never could have occurred in this case, for the obvious reason the duties of the engine driver ceased at or before plaintiff's would begin, so that it would be impossible for one to exercise any influence whatever over the other."

This reasoning seems to suggest that there may be a distinction between ordinary engineers and those whose duties are confined to switching, and two earlier cases in Illinois expressly predicate coservice between switch engineers and car repairers. *Chicago & A. R. Co.* v. *Murphy* (1870) 53 Ill. 336, 5 Am. Rep. 48 (car repairer struck by switch engine while walking along the track); *Baltez* v. *Ohio & M. R. Co.* (1877) 85 Ill. 500 (same facts).

But in *Webb* v. *Denver & R. G. R. Co.* (1891) 7 Utah, 363, 26 Pac. 981, a directly opposite view was taken, and this agrees with the *Renfro Case* (1885) 86 Mo. 302.

In West Virginia also it has been held that a carpenter repairing cars and an engineer are coservants. *Unfred* v. *Baltimore & O. R. Co.* (1890) 34 W. Va.

260, 12 S. E. 512 (injury caused by mismanagement of locomotive).

The question as to the negligence of an engineer in putting the air brakes in motion and thereby causing an injury to an inspector who was under a car should be withdrawn from the jury, where the inspector in his hearing had just before expressed his satisfaction with the working of such machinery, but warned him to be "careful," which warning he supposed had reference to other duties of the inspector about the train. *Eckland* v. *Chicago, St. P. M. & O. R. Co.* (1897) 52 Neb. 729, 73 N. W. 224.

A switchman and a car repairer are not coservants. *McVaughton* v. *Canadaigua R. Co.* (1857) 19 Sc. Sess. C. 2d series, 271 (cited with approval by Field J., in *Chicago, M. & St. P. R. Co.* v. *Ross* [1884] 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184); *Pool* v. *Southern P. Co.* (1891) 7 Utah, 303, 26 Pac. 654 (the car repairer in this case usually worked in the shop, but occasionally made small repairs in the yard, and the switchman was under the direction of the yard master. At all events, they are not coservants, as matter of law); *Chicago & E. R. Co.* v. *Knerim* (1892) 48 Ill. App. 243 (1894) 152 Ill. 458, 39 N. E. 324. *Contra*, see *Corbett* v. *St. Louis, I. M. & S. R. Co.* (1887) 26 Mo. App. 621, where the "departmental doctrine" was rejected. But in view of the more recent decisions by the supreme court this ruling is, perhaps, no longer law in Missouri.

A car repairer is not a fellow servant of a motorman on a street car, by whose negligence he is injured. *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342.

(g) *Servants handling trains, and watchmen.*—An engineer is not a coservant of a watchman at a bridge. *Pike* v. *Chicago & A. R. Co.* (1890) 41 Fed. 95. Here the watchman has nothing to do with the operation of the trains, and the disconnection of duties is obvious.

On the other hand, a watchman at a curve of a cable street railroad, whose duty is to signal approaching cars to stop and start, so that they will not meet upon the curve, is a fellow servant with the gripman. *Murray* v. *St. Louis, C. & W. R. Co.* (1889) 98 Mo. 573, 5 L. R. A. 735, 12 S. W. 252. Here both are employed in operating the car—the one from the car and the other from the ground—"engaged in the same department of work, and their common business was such that one could exercise a preventive care over the other."

So, the crew of a switching engine used in making up trains and a night watchman at a street crossing where such engine is constantly passing and repassing are deemed to be, as matter of law, in habitual consociation, and, therefore fellow servants. *Chicago & E. I. R. Co.* v. *Geary* (1884) 110 Ill. 383.

(h) *Switching crews in yards.*—The authorities are in conflict as to the relation which servants regularly attached to the different switching crews hold to other crews at the same yard.

In Illinois it is held that the members of two switching crews working in the same yard, and performing duties almost identical in character, are fellow servants, as matter of law, though under different foremen. *Chicago & E. I. R. Co.* v. *Driscoll* (1898) 176 Ill. 330, 52 N. E. 921, Reversing (1897) 70 Ill. App. 91; *Tierney* v. *Chicago Junction R. Co.* (1901) 92 Ill. App. 631; *Chicago & A. R. Co.* v. *Stallings* (1900) 90 Ill. App. 609; *O'Leary* v. *Wabash R. Co.* (1893) 52 Ill. App. 641 (where stress was laid on the fact that the two crews were under the direction of the same road master).

It has been said that the crews of different switch engines, frequently meeting each other in the discharge of their duties, running upon the same track, and brought into frequent association, so that "their movements with relation to each other are governed by a consideration of their mutual safety and convenience," are fellow servants, though all or any number of their hours of service are not the same. *Elgin, J. & E. R. Co.* v. *Malaney* (1894) 59 Ill. App. 114 ("in that service they were brought into frequent association, so that they might exercise mutual influence upon each other promotive of proper caution").

In Nebraska, also, the doctrine is that the foreman of one of two switching crews in a switch yard, though a vice principal of those of his own crew, is a fellow servant of the members of the other crew, where both crews are under the control and direction of the same yard master, and the foreman has no control or direction over the members of the other crew. *Missouri P. R. Co.* v. *Lyons* (1898) 51 Neb. 633, 75 N. W. 31 (instruction to opposite effect erroneous—members of both crews said to be "consociated" in the same depart-

ment, though three of the cases cited are Indiana decisions, and therefore emanate from a court which has rejected the "consociation" doctrine).

In Utah, on the other hand, a foreman of one of several switching crews in a yard is held not a fellow servant of a member of a crew other than his own. *Armstrong* v. *Oregon Short-Line & U. N. R. Co.* (1893) 8 Utah, 420, 32 Pac. 693.

Whether a switchman working sometimes in one of four crews, and sometimes in another, is consociated with other members of such crews is a question of fact. *Chicago, B. & Q. R. Co.* v. *Fitzgerald* (1890) 40 Ill. App. 476.

The foreman of a crew making up trains and a servant whose duty it is to watch and report his conduct are coservants. *Chicago & E. I. R. Co.* v. *Geary* (1884) 110 Ill. 385 (plaintiff could not perform his duty without constantly watching the train crews).

Two switching crews in the employ of different railroad companies, though using the same track for their trains, their duties not being such as to bring them into habitual consociation, and so cause them to exercise a mutual influence on each other promotive of proper caution, are not to be regarded as fellow servants. *Tierney* v. *Chicago Junction R. Co.* (1901) 92 Ill. App. 631 (cars slunted without anyone on them).

Two switchmen in the same crew are fellow servants. *Illinois C. R. Co.* v. *Stewart* (1901) 23 Ky. L. Rep. 637, 63 S. W. 596.

(i) *Servants handling trains and servants loading cars.*—A laborer engaged in unloading cars is not a fellow servant of the engineer of a locomotive which drives another train of cars against the one on which the laborer is working. *North Chicago Rolling Mill Co.* v. *Johnson* (1885) 114 Ill. 57, 29 N. E. 186.

A switchman and a servant engaged in loading freight cars are not coservants. *Chicago, R. I. & P. R. Co.* v. *Henry* (1880) 7 Ill. App. 322.

(j) *Servants handling ordinary trains and servants employed in the repair or construction of the permanent way and its appurtenances.*—(This and the three following subdivisions should be read in connection with § 502, *supra*). So far as regards servants handling a train and servants engaged in work upon the permanent way, which the operation of the train does not directly facilitate and further, the rule is that, under normal circumstances, these classes of employees are not fellow servants. This rule has been applied where the servants whose relation to the trainmen was in question were engaged in track repairing. *Sullivan* v. *Missouri P. R. Co.* (1889) 97 Mo. 113, 10 S. W. 852 (no proper lookout was kept;—this case seems to overrule *Rohback* v. *Pacific R. Co.* [1869] 43 Mo. 187, where a contrary decision as to the relations of the same servants was given, though Black, J., in *Parker* v. *Hannibal & St. J. R. Co.* [1891] 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119, seeks to reconcile the two cases on the ground that in the earlier decision the men were all at work in the same yard, and for angle that appeared were under the same foreman, and in constant association); *Schlereth* v. *Missouri P. R. Co.* (1892) 115 Mo. 87, 21 S. W. 1110; *Swadley* v. *Missouri P. R. Co.* (1893) 118 Mo. 268, 24 S. W. 140; *McKenna* v. *Missouri P. R. Co.* (1893) 54 Mo. App. 161 (assumed *arguendo*); *Pittsburg, Ft. W. & C. R. Co.* v. *Powers* (1874) 74 Ill. 341; *Toledo, W. & W. R. Co.* v. *O'Connor* (1875) 77 Ill. 391 (hand car run into); *Chicago & N. W. R. Co.* v. *Moranda* (1879) 93 Ill. 302, 34 Am. Rep. 168 (trackman injured by a lump of coal which the fireman threw from an engine); *Chicago & A. R. Co.* v. *Calbu* (1900) 187 Ill. 523, 58 N. E. 455, Affirming (1899) 87 Ill. App. 374 (section foreman was struck by a defective car door which the trainmen allowed to swing out while the train was moving); *St. Louis & S. F. R. Co.* v. *Weaver* (1886) 35 Kan. 412, 11 Pac. 408 (section foreman and trainmen held to have no means of knowing anything of each other's qualifications); *Nashville & C. R. Co.* v. *Carroll* (1871) 6 Heisk. 347; *Louisville & N. R. Co.* v. *Filbern* (1869) 6 Bush, 574, 99 Am. Dec. 690; *Union P. R. Co.* v. *Erickson* (1894) 41 Neb. 1, 29 L. R. A. 137, 59 N. W. 347; *Omaha & R. Valley R. Co.* v. *Kraeuhuhl* (1896) 48 Neb. 553, 67 N. W. 447; *Chicago & E. I. R. Co.* v. *Shannon* (1892) 43 Ill. App. 540 (train was driven forcibly by switching engineer against a dead car behind which the track repairer had stepped to avoid another train).

Laborers unloading rails. *Peoria, D. & E. R. Co.* v. *Johns* (1892) 43 Ill. App. 83 (engineer failed to report defect in engine).

A servant working in a quarry operated by railroad and men in charge of passing train are not coservants. *Church* v. *Chicago & A. R. Co.* (1893) 119 Mo. 203, 23 S. W. 1056; *Dixon* v.

Chicago & A. R. Co. (1891) 109 Mo. 413, 18 L. R. A. 792, 19 S. W. 412.

In Kentucky an engineer and a section laborer temporarily engaged under him in getting a locomotive back on the track are not fellow servants. *Louisville & N. R. Co.* v. *Collins* (1865) 2 Duv. 114, 87 Am. Dec. 486, but the decision rests partly upon the superiority of the engineer's grade.

A sectionman is not a coservant of one employed to load tenders with coal. *Union P. R. Co.* v. *Erickson* (1894) 41 Neb. 1, 29 L. R. A. 137, 59 N. W. 347. A locomotive engineer and member of fence gang are not fellow servants, as matter of law. *Louisville, E. & St. L. Consol. R. Co.* v. *Hawthorn* (1893) 147 Ill. 226, 35 N. E. 534, Affirming (1892) 45 Ill. App. 635. A fireman on a running train has been held a fellow servant with a section foreman in delivering from the train, as it passes, a message for the latter tied around a piece of coal. *Card* v. *Eddy* (1894) 129 Mo. 510, 36 L. R. A. 806, 28 S. W. 979 (see an extract from the opinion in this case, § 503, *supra*).

A carpenter in a railway yard and an engineer are not coservants. *Egmann* v. *East St. Louis Connecting R. Co.* (1896) 65 Ill. App. 345.

A member of a bridge crew and the employees operating a train with which he has nothing to do are not coservants. *Freeman* v. *Illinois C. R. Co.* (1901) 107 Tenn. 340, 64 S. W. 1 ("duties and labors entirely distinct").

But upon both principle and authority, it is apparent that in spite of the prima facie disconnection of duties in these cases, the master may still escape liability if he can show that the servants were, as a matter of fact, so associated.

In *Cleveland, C. C. & St. Co.* v. *McLaughlin* (1894) 56 Ill. App. 53, it was left to the jury to say whether a road supervisor and an engine driver where fellow servants.

But evidence that a railway section foreman who sustained injuries on a bridge, alleged to be due to the negligence of an engineer in failing to observe a flag placed on the bridge, had a right to flag the train, that he was endeavoring to do so when he was injured, and that it was the engineer's duty to obey the signal, does not show such a cooperation as tends to establish the relation of fellow servants. *Peoria, D. & E. R. Co.* v. *Rice* (1893) 144 Ill. 227, 33 N. E. 951. Otherwise, it was pointed out, "all employees of one employer would be fellow servants within that rule, whenever it could be shown that one was, at the time of the injury, attempting to prevent another from committing it."

In two Virginia cases the master was held liable where trainmen were injured by the negligence of track repairers. *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339; *Hoon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401. The same ruling would undoubtedly be made in any other state where the "consociation" doctrine prevails, but it is probable that in Virginia itself these cases would now be sustained only on the ground that the track repairers were vice principals as regards keeping the roadbed in safe condition.

(k) *Servants handling work trains and servants employed on the permanent way.*—So far as these servants are concerned it is clear that the principles applied in the preceding subdivision will negative common employment where the track laborers were not a part of the force attached to the work train.

This is one case where it was ruled that a section hand is not a fellow servant of men in charge of a construction train, unless they are together cooperating in furthering a particular business of the common master. *Chicago & A. R. Co.* v. *Kelly* (1887) 28 Ill. App. 655, Affirmed in (1889) 127 Ill. 637, 21 N. E. 203. The court laid it down that during the part of the day the plaintiff had been engaged in unloading rock from a train, he was a fellow servant of the trainmen, but not before or after.

In *Parker* v. *Hannibal & St. J. R. Co.* (1891) 109 Mo. 362, 18 L. R. A. 802, 19 S. W. 1119, where four out of seven judges were of opinion that section hands engaged in ballasting the track were not fellow servants of the men operating the material train which brought the stone with which the track was to be ballasted, the defendant sought to take the case out of the general rule on the ground that the train was hauling material for the sectionmen to use in constructing the roadbed. This contention did not prevail. Thomas, J., said, p. 405, 109 Mo., p. 816, 18 L. R. A., and p. 1133, 19 S. W.: "The train was, however, being operated on the road, and I cannot see why the trainmen's relation to the sectionmen could be changed, simply by what the former hauled. Such a distinction is arbitrary and artificial, and hence unsatisfactory

What did Parker know about the skill of the engineer or conductor in charge of the construction train? What right had he to inquire into the operation of that train? He and those in charge of that train were in no proper sense consociated in the performance of their respective duties."

But the employment of the person injured cannot be considered distinct, in the sense of the "consociation" doctrine, if it is of a character to make him a part of the force employed upon the train,—as, where the engineer of a construction train injured a laborer engaged in unloading iron, by starting the train without the usual signal. *Chicago & A. R. Co.* v. *Keefe* (1868) 47 Ill. 108 (instruction that departments were distinct, held erroneous).

A foreman of a gang of laborers hauling dirt with a train of flat cars is not a fellow servant of the conductor of the train. *Dobson* v. *New Orleans & W. R. Co.* (1900) 52 La. Ann. 1127, 27 So. 670 (derailment caused by conductor leaving the train in exclusive charge of the engineer, who was at the rear end of the train).

See also *Waller* v. *Ohio & M. R. Co.* (1887) 24 Ill. App. 326 (facts similar to those in case just cited); *Higgins* v. *Missouri & P. R. Co.* (1891) 104 Mo. 413, 16 S. W. 409 (demurrer sustained, where the plaintiff was a laborer on a train side-tracked to let another pass, and was injured by the engineer's starting it without a signal. "They were working," said the court, "under the same conductor, derived their authority and compensation from the same common source, and were engaged in the same general business, though in a different grade of the common service").

Compare also the cases cited in chapter XXXIII., *post*, many of which take the same doctrine for granted, though the question actually discussed was whether the injured servants were in the position of passengers at the time of the accident.

Where each of several laborers acts as brakeman, when occasion arises, upon truck cars used for the transportation of dirt, the laborer who actually performs that duty in any case is a fellow servant of the rest, as he does not thereby cease to be in the same field of labor and in the same grade of employment. *Casey* v. *Louisville & N. R. Co.* (1886) 84 Ky. 79.

A teamster who hauls ties in the construction of a railroad is not consociated with the engineer of the construction train, by whose negligence he is injured while being conveyed to camp at dinner time. *Hobson* v. *New Mexico & A. R. Co.* (1886; Ariz.) 11 Pac. 545. The conductor and engineer of a "wild" train are not coservants of a laborer on a gravel train. *Northern P. R. Co.* v. *O'Brien* (1889) 1 Wash. 599, 21 Pac. 32 (collision occurred while laborer was being carried on the train).

(l) *Servants engaged solely in the construction or maintenance of the permanent way.*—There is, of course, coservice where the negligent and injured employees are both members of the same working force, under the orders of the same foreman,—as, between a laborer belonging to a bridge gang and an engineer operating the machinery by which the timbers are hoisted. *Ryan* v. *McCully* (1894) 123 Mo. 636, 27 S. W. 533; *Lotz* v. *Chesapeake & O. R. Co.* (1893) 95 Ky. 188, 24 S. W. 119 (negligent and injured servants were in the same gang of pile drivers).

If they are controlled by the same superior, that circumstance is apparently decisive in the master's favor,—as, where two foremen of track repairers are working independently of each other, but under the same road master. *Sherwin* v. *St. Joseph & St. L. R. Co.* (1890) 103 Mo. 378, 15 S. W. 442.

Conversely, a section man is not, as matter of law, a fellow servant of the members of a fence gang temporarily working on the section, where they do not work together, and are only casually thrown together in going to or returning from their daily duties. *Chicago & I. R. Co.* v. *O'Brien* (1895) 155 Ill. 630, 40 N. E. 1023.

(m) *Servants in the mechanical and in other departments.*—There is no coservice between the following classes of employees:

A brakeman and those providing the car, by the defects of which he suffers injury. *Toledo, W. & W. R. Co.* v. *Ingraham* (1875) 77 Ill. 309.

Trainmen and those who furnish rolling stock and place it on the track. *Chicago & N. W. R. Co.* v. *Jackson* (1870) 55 Ill. 492.

An engineer and servants (master mechanic and master car builder) charged with the duty of building and keeping in repair locomotive boilers. *Toledo, W. & W. R. Co.* v. *Moore* (1875) 77 Ill. 217.

A boiler manufacturer and a fireman. *Louisville & D. R. Co.* v. *Jones* (1871) 2 Heisk. 27.

A laborer in the car shops of a rail-

road corporation and the foreman of the switchmen in the train department. *Pool* v. *Southern P. Co.* (1899) 20 Utah, 210, 58 P. 326.

A common laborer in the carpenter shop near the railroad track, and the engineer in charge of a passing train. *Ryan* v. *Chicago & N. W. R. Co.* (1871) 60 Ill. 171, 14 Am. Rep. 32.

Servants who place a "mail-catcher" too near the track and a fireman struck by it. *Chicago, B. & Q. R. Co.* v. *Gregory* (1871) 58 Ill. 272.

A gripman on a cable car and the crew of a wrecking train. *West Chicago Street R. Co.* v. *Dreyer* (1894) 57 Ill. App. 440.

See also *Pittsburg, Ft. W. & C. R. Co.* v. *Powers* (1874) 74 Ill. 341, where it was assumed, *arguendo*, for the purposes of illustration, that an employee in the car shop was not a coservant of the trainmen.

On the other hand a head blacksmith is a coservant of the members of a wrecking crew as long as he is associated with them in any particular job. *Ubsdell* v. *Terre Haute & I. R. Co.* (1884) 111 Ill. 203, 53 Am. Rep. 616. So, a yard hand may be a coservant of a mechanic in the repair shop if they are required by their foreman to co-operate in the same job. *Chicago & N. W. R. Co.* v. *Schoning* (1879) 4 Ill. App. 533.

(n) *Servants engaged in roundhouses and the various shops.*—Two car repairers are coservants. *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302. So are an engine hostler and a helper in the roundhouse, who also has duties to perform in the care of the engines, coservants. *Chicago & W. I. R. Co.* v. *Massig* (1893) 50 Ill. App. 666.

Whether gangs employed under different foremen in a car shop and a machine shop, between which cars are constantly being moved, are fellow servants is a question for the jury. *Chicago & I. R. Co.* v. *O'Boyle* (1884) 15 Ill. App. 134.

(o) *Servants engaged in work on buildings in process of erection.*—A workman employed to build a scaffold and masons and bricklayers working thereon are coservants. *Stevens* v. *Howe* (1890) 28 Neb. 547, 44 N. W. 865.

Painters employed on the same building to do the same kind of work are coservants, although they are working on different scaffolds. *World's Columbian Exposition* v. *B.* (1894) 76 Ill. App. 591 (injury occurred through the negligence of one servant in adjusting a rope supporting one of the scaffolds).

A carpenter who constructs a scaffold and a mason who uses it are not coservants when working under separate foremen. *Chicago & I. R. Co.* v. *Harmon* (1896) 67 Ill. App. 618. Affirmed in (1897) 170 Ill. 520, 48 N. E. 953, but on the ground that the carpenter was discharging a nonassignable duty.

Operators of elevator in a building in the process of construction are not fellow servants with a gang of carpenters, one of whom is killed while at work by the counter weight of the elevator coming down on him. *Leiter* v. *Finnare* (1896) 68 Ill. App. 558 (approving of instructions assuming this).

Whether a carpenter working on an elevator shaft in a building in course of construction, and the boy running the elevator, in raising and lowering workmen and materials and persons inspecting rooms in the building, are fellow servants, is a question for the jury. *Hughes* v. *Fagin* (1891) 46 Mo. App. 37 (nonsuit held erroneous under the more recent decisions in Missouri; though it would have been proper under those prior to *Conroy* v. *Vulcan Iron Works* (1876) 62 Mo. 351.

(p) *Servants working on or about ships.*—A finding by the jury that plaintiff, who was master of one of several canal boats, was a "coemployee" with the captain of a steamboat employed to tow the canal boats, including the one of which plaintiff was master, and that plaintiff was "associated with" the steamboat captain and engaged in the same line of business at the time of the injury, in making up the tow,—does "not bring the plaintiff and the captain of the steamboat into the category of fellow servants." *Western Stone Co.* v. *Whalen* (1893) 51 Ill. App. 512, on appeal. Affirmed in (1894) 151 Ill. 472, 38 N. E. 241, where it was assumed that the servants were in a common employment, and the case was made to turn on the master's knowledge of the delinquent's incompetency.

In a case where defendant's lumber was being unloaded from a vessel into his dock, the evidence was that his yardmen were piling it up after it was passed out of the boat by another set of men; that plaintiff, belonging to the latter set, was injured by the falling of a pile of lumber, while he was passing from the vessel to the dock; and that his association with the former set of men ended with passing the lumber over

the vessel's rail. It was held that even if defendant were the common master of both sets of men—which was disputed—the verdict that plaintiff was not a fellow servant of the yardmen would be justified. *John Spry Lumber Co.* v. *Duggan* (1899) 182 Ill. 218, 54 N. E. 1002, Affirming (1898) 80 Ill. App. 394.

(q) *Servants employed in coal yards.*—Switchmen at work in a coal yard, engaged in switching the cars from place to place, are not in such direct co-operation with other employees of the same company engaged in loading the cars with coal, as to create the relation of fellow servant between them. *Wenona Coal Co.* v. *Holmquist* (1895) 51 Ill. App. 507.

(r) *Servants employed in iron works.*—A servant employed by a steel company to pour the molten steel into molds to be sent to the billet mill is not, as matter of law, a fellow servant of another employee, not within sight and separated from him by two walls, whose duty it is to chill the molds on delivery. *Illinois Steel Co.* v. *Bauman* (1898) 78 Ill. App. 73, Affirmed in (1899) 178 Ill. 351, 53 N. E. 107.

The foreman of a gang of men engaged in repairing the tracks in the works of a steel-converting mill, and employees engaged in the mill in making steel from iron, whose duties never bring them together in their discharge, are not fellow servants. *Joliet Steel Co.* v. *Shields* (1893) 146 Ill. 603, 34 N. E. 1108.

Whether an employee in a steel manufactory engaged in cooling and uncapping molds under the control of a yard foreman is a fellow servant of a "pourer" employed in the converting room under the control of a superintendent is a question of fact for the jury, where the evidence tends to show that the two employees were not stationed in the same building or within sight or hearing of each other, and that the usual duties of their respective employments did not bring them into habitual or even temporary association. *Illinois Steel Co.* v. *Bauman* (1899) 178 Ill. 351, 53 N. E. 107, Affirming (1898) 78 Ill. App. 73.

(s) *Servants employed in factories, etc.*—The foreman in the shipping department of an ice manufactory is not a fellow servant of carpenters who remove the cover of a hot-water tank under the floor in the factory, while placing a guard around the opening. *Musick* v. *Jacob Dold Packing Co.* (1894) 58 Mo. App. 322.

Where a machinist in a machine shop was injured by the bursting of an emery wheel which he was using, and which had just been set by three of the ordinary workmen in the shop, superintended and assisted by the foreman, it was held erroneous to instruct the jury that "workmen employed to set up machinery for use, and workmen using the machinery so set up, were not engaged in a common service," since it was a question of fact, and not of law, whether the two species of service formed two departments or one. This "depends upon whether the same servants are employed by the master to perform both lines of service." *Holton* v. *Daly* (1879) 4 Ill. App. 25.

(t) *Servants engaged in mining work.*—The engineer of the hoisting machinery is a fellow servant of a roadman and tracklayer. *Nuntic Coal & Min. R. Co.* v. *Leonard* (1886) 25 Ill. App. 95 (cage lowered too rapidly—Affirmed in [1888] 126 Ill. 216, 19 N. E. 294, on the ground of negligence in employing the engineer). And of a laborer in charge of mules, and doing general work. *Starne* v. *Schlothane* (1886) 21 Ill. App. 97 (crushed while working at the bottom of the shaft).

In Tennessee the doctrine of associated duties being applied only in the case of railway servants, the engineer of a mine engine, and tender of a ventilating engine, were held to be coservants, though not in the same department. *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387.

"Pushers" in charge of the several shifts of men operating a mine are fellow servants as respects their duty of notifying each other, at the time of changes of shifts, of unexploded holes in the shaft. *Anderson* v. *Daly Min. Co.* (1897) 16 Utah. 28, 50 Pac. 815.

Employees in charge of the fan furnishing air for a mine and gas testers are fellow servants of miners at work in the mine. *Hughes* v. *Oregon Improv. Co.* (1898) 20 Wash. 294, 55 Pac. 119 (fan stopped during fire).

An employee superintending the excavation of a mining tunnel in the side of a hill is not a coservant of a man working on another tunnel lower down under the directions of another superintendent. *Uren* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174.

(u) *Servants employed in hotels.*—An

elevator boy and an electrician, and engineer employed in a hotel, both of whom are subject to the orders of the president of the hotel company, its general manager, and its chief clerk, are fellow servants. *McCarty* v. *Rood Hotel Co.* (1898) 144 Mo. 397, 46 S. W. 172.

A chambermaid in a hotel is a fellow servant of an elevator man employed therein. *Oriental Invest. Co.* v. *Sline* (1897) 17 Tex. Civ. App. 692, 41 S. W. 130.

(v) *Servants employed in mills.*—A millwright engaged in constructing an addition to a mill is not the fellow servant of one who operates a saw therein. *Hammarberg* v. *St. Paul & T. Lumber Co.* (1898) 19 Wash. 537, 53 Pac. 727 (millwright left a chisel on the beam over the saw, and it was shaken off by the vibration of the machinery).

An employee wheeling out hot cinders from a rolling mill is not a coservant of a workman employed to shovel the cinders, when cold, into a box car. *Western Tube Co.* v. *Polobinski* (1901) 94 Ill. App. 640.

An employer is not liable for an injury to an employee caused by the rolling of a log from a runaway on which it was being moved by means of a dolly, where the injury could have been avoided by blocking the log. *Ignew* v. *Supple* (1898) 80 Ill. App. 437.

(w) *Servants employed in quarries.*—There can be no recovery where a laborer in the hopper house over a stone crushing machine is killed by a loaded car which runs down the incline from the quarry, owing to the negligence of one of the hands engaged in loading it. *Fort Hill Stone Co.* v. *Orm* (1886) 84 Ky. 183.

CHAPTER XXVIII.

VICE PRINCIPALSHIP AS REFERRED TO THE TEST OF SUPERIORITY OF RANK.

A. INTRODUCTORY.

507. General statement.

508. Representative character of servant depends on the actual functions discharged by him.

509. Temporary vice principals.

510. Sufficiency of a complaint based upon the vice principalship of the negligent servant.

511. Functions of court and jury in determining whether the negligent employee was a vice principal.

512. Burden of proof.

513. Scope of following subtitles.

B. MERE INEQUALITY OF RANK, SIGNIFICANCE OF.

514. Usually held not to warrant inference that the superior servant is a vice principal.

C. DOCTRINE THAT VICE PRINCIPALSHIP IS NOT DEDUCIBLE MERELY FROM THE POSSESSION OF A POWER OF CONTROL OVER THE INJURED SERVANT.

515. General statement of the doctrine.

516. Rationale of the doctrine.

517. Qualification of the doctrine in cases where an order takes a servant outside the original scope of his employment.

518. Power of hiring and discharging subordinates, significance of.

519. Application of the doctrine to the various grades of supervising employees.

520. Illustrative cases.

D. DOCTRINE THAT ALL SUPERIOR SERVANTS ARE VICE PRINCIPALS AS REGARDS THEIR SUBORDINATES.

521. General statement.

521a. Relation of the superior servant doctrine to the doctrine that the head of a department is a vice principal.

522. Rationale of the doctrine.

a. Unequal knowledge of superior and subordinate.

b. Inability of master or superior agents to supervise all details of the work.

c. Obligation of servant to obey his superior.

d. Duty to use care in giving orders regarded as one of the non assignable duties of the master.

e. Summary.

522a. What constitutes the exercise of control within the meaning of the doctrine.

523. Existence or absence of a power to hire and discharge subordinate; significance of.
524. Illustrative cases.

E. Relation of a general managing agent to his subordinates.
525. Introductory.
526. Doctrine that a general manager is a vice principal. English, Scotch, and colonial cases.
527. —American cases.
528. Rationale of the doctrine.
529. Doctrine that a general manager is not a vice principal. English and colonial cases.
530. —American cases.
531. Opposing theories reviewed.

F. Relation of a departmental manager to his subordinates.
532. General statement.
533. Rationale of the master's liability for the negligence of a departmental manager.
534. Limits of the doctrine of departmental control.
535. Supervising employees held to be heads of departments.
536. Supervising employees held not to be heads of departments.

A. Introductory.

507. General statement.— None of the courts, even those which have applied the doctrine of common employment in its most rigorous and sweeping form, have gone to the length of asserting that it is absolutely and invariably controlling in all the cases in which a master is being sued for injuries caused by the negligence of a fellow servant of the injured person. It is conceded that a portion, at least, of those cases are governed by the rule embodied in the maxim, *Respondeat superior*.[1] But with regard to the precise extent of the domain which is covered by each of these two antagonistic principles, there is an extraordinary diversity of judicial opinion. The decisions on the subject, indeed, are conflicting to a degree which, it may safely be affirmed, is without a parallel in any department of jurisprudence. To attempt to reconcile these decisions, or even to suggest grounds upon which, as rulings with respect to specific facts, they may be reconciled, would be to attempt an impossible and un-

[1] The designation usually applied to those employees who represent the master in such a sense that he is liable to other servants for their negligence is "vice principal," or *alter ego*, the former term being the most frequently used. See the cases cited *passim* in this and the following chapters. The term "deputy master" is also found. *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 13 Week. Rep. 411.

fruitful task. The utmost that the commentator can aim at, with any hope of attaining success, is to group the authorities under categories which will enable the reader to comprehend, as nearly as may be, the extent to which the courts diverge from, or agree with, one another in regard to the various subsidiary issues through which an answer to the main question has been sought.

Broadly speaking, it will be found that the cases with which we have to deal may be divided into two classes: (1) The cases in which the contention has been that the doctrine of common employment was not applicable because the negligent servant was of a higher grade than the injured servant; (2) The cases which have turned upon the nature of the injurious act, as being one which was or was not incident to the discharge of functions which the master is absolutely bound to perform with reasonable care, whether he undertakes them personally or deputes them to an employee. In some instances these conceptions lead to the same results, as regards the liability or nonliability of the defendant, and it will be seen that, merely as a matter of abstract logical analysis, nearly all the rulings governed by the former conception are susceptible of being brought under the latter conception, provided a certain significance is attached to it. The theories underlying the two classes of cases have, however, been developed along independent lines, and, in their practical application by the courts, are still differentiated to an extent which renders it impossible to discuss them otherwise than separately.

508. Representative character of servant depends on the actual functions discharged by him.— Whether the employee whose negligence caused the injury was or was not a vice principal is determined by the nature of the functions which he was, as a matter of fact, discharging at the time when the injury was received, and not by the appellation by which he was designated.[1] His official denomination

[1] "Superintendents are not made by calling them such, but by the nature of their employment, their duties, and their work." *Greenway* v. *Conroy* (1894) 160 Pa. 185, 28 Atl. 692.

"It is the law, in the absence of express contract, that establishes the relation of the parties, creating him agent or representative of the master who performs duties which the law itself makes it incumbent on the master to perform." *Miller* v. *Southern P. Co.* (1891) 20 Or. 285, 26 Pac. 70.

In *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30, **Lord Colonsay** remarked: "I agree with what has been said as to the terms 'fellow-workman' and 'collaborateur.' They are not expressions well suited to indicate the relation on which the liability or nonliability of a master depends, especially with reference to the great systems of organization that now exist. And these expressions, if taken in a strict or limited sense, are calculated to mislead. The same may be said of such words as 'foreman' or 'manager.' We must look to the functions the party discharges, and his position in the organism of the force employed, and of which he forms a constituent part. Nor is it of any consequence that the posi-

will not, if itself, determine whether or not he was a representative of the master.[2] Nor does a rule the effect of which is to cast upon him certain functions under the circumstances specified operate so as to alter the legal relations which would, apart from the rule, be held to exist between him and the other employees.[3] Nor is the fact that the injured servant believed the negligent employee to be a vice principal, and was not aware that he had been discharged in that capacity, a sufficient ground for allowing the action to be maintained.[4] Nor will the mere fact that the subordinate believed in good faith that he had been told by the employer to obey the directions of another employee enable the subordinate to recover for the negligence of that employee, if, as a matter of fact, no such instructions were given.[5]

The mere fact that a vice principal exercised his authority through an intermediary clearly cannot affect the extent of the employer's responsibility.[6] Nor is it material, in a case where injury was

tion he occupies in such organism implies some special authority, or duty, or charge, for that is of the essence of such organizations."

In *Dwyer* v. *American Exp. Co.* (1882) 55 Wis. 453, 13 N. W. 471, the court, in sustaining a demurrer to the complaint, said: "Designating Colvin as agent and manager does not convey any definite idea of the powers vested in such manager or agent. The court cannot presume from that designation that he had all the powers of the company and stood in its place for all purposes; and especially must this be so where the complaint itself shows that the only acts he did perform, and from which the injury resulted, were performed by him in the business of the defendant as a coemployee with the plaintiff."

[2] *See Dayharsh* v. *Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 551 (*arguendo*); *Copper* v. *Louisville, E. & St. L. R. Co.* (1885) 103 Ind. 305, 2 N. E. 749.

[3] A rule of a railroad company that, where a train or engine is run without a conductor, the engineer shall be regarded as the conductor, does not change the general rule of law as to the liability of the company for injuries to an employee caused by the engineer's negligence, so as to make the company liable to a fireman for such negligence. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914.

This decision was followed in Utah with respect to a rule which provided that, "in case an engine is run over any portion of the road, unaccompanied by a conductor, the engineer must perform the duties and make the reports of a conductor, in addition to his own." *Stephani* v. *Southern P. Co.* (1899) 19 Utah, 196, 57 Pac. 34.

A rule of a railroad company providing that conductors will be held responsible for the proper adjustment of switches used by their trains does not make a conductor the representative of the company. *Hiller* v. *Southern P. Co.* (1891) 20 Or. 285, 26 Pac. 70; *Guthrie* v. *Southern P. R. Co.* (1891; Or.) 26 Pac. 76.

[4] *Allen* v. *Goodwin* (1892) 92 Tenn. 385, 21 S. W. 760. This decision, however, seems to be inconsistent with the doctrine that persons who have dealt with a general agent, as such, may lawfully presume, in the absence of notice of a withdrawal of his authority, that he still represents the principal. See Mechem, Agency, § 224.

[5] *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743.

[6] The liability of an employer for injuries to an employee through certain dangerous conditions resulting from a compliance with the express direction of the superintendent is not affected by the fact that such directions were given to the foreman in charge of the work. The foreman is but the defendant himself acting through another medium. *Donahoe* v. *Kansas City* (1895) 136 Mo. 657, 38 S. W. 571.

caused by following the directions of a vice principal, that he himself was temporarily absent when those directions were being carried out.[7]

509. Temporary vice principals.—Both on principle and authority it is manifest that a master is no less responsible for the negligence of an employee who is temporarily filling the position of an *alter ego*, than he is for the negligence of an employee who holds that position permanently.[1]

In determining the question whether the relation of temporary vice principalship existed between the negligent and injured persons at the time of the accident, the essential circumstance to be considered is the nature of the functions discharged by the alleged vice principal.[2] In some instances the exercise of those functions will

The acts of a servant done under the immediate supervision of a vice principal, who told him how to place the appliance which caused the injury, are, as regards another who is injured by such appliance, deemed to be the acts of the vice principal. *Benson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20.

[7] In *Missouri P. R. Co.* v. *James* (1888; Tex.) 10 S. W. 332, an instruction to this effect was approved in a case in which the plaintiff, while working under the instructions of the section master, was ordered to do some special work by the road master, and was injured by a defective rail which the road master had promised to remove. The objection taken to the instruction is not stated.

[1] In the following cases recovery was allowed on the ground that the negligent persons were vice principals *pro tempore*: *Bergman* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 667 (a foreman of car repairers put in charge of a wrecking crew); *Baldwin* v. *St. Louis, K. & N. W. R. Co.* (1888) 75 Iowa, 297, 39 N. W. 507 (one upon whom the management of a timber yard devolved in the absence of the regular superintendent); *Ryan* v. *Los Angeles Ice & Cold Storage Co.* (1896) 112 Cal. 244, 32 L. R. A. 524, 44 Pac. 471 (engineer in sole charge of a refrigerating machine when the general manager was absent, and invested with equal power to control the workmen); *Steube* v. *Christopher & S. Architectural Iron & Foundry Co.* (1900) 85 Mo. App. 640 (workman left in charge of his coservants when superintendent was absent); *Colorado Midland R. Co.* v. *O'Brien* (1891) 16 Colo. 219, 27 Pac. 701 (general foreman of tracklayers in full control of work of construction when the general superintendent was absent).

A train despatcher to whom a general superintendent, while absent, deputes the operation of the trains, is a vice principal *ad hunc vicem*. *Losky* v. *Canadian P. R. Co.* (1891) 83 Me. 461, 22 Atl. 367.

Temporary conductors are treated as vice principals in any jurisdiction where a regular conductor is regarded as such. *Coultes* v. *Richmond & D. R. Co.* (1884) 84 N. C. 309, 37 Am. Rep. 620 (engineer in charge of train legally in same position as a conductor); *East Tennessee & W. N. C. R. Co.* v. *Collins* (1886) 85 Tenn. 227, 1 S. W. 883 (engineer in charge of train not fellow servant of brakeman); *Brown* v. *Central P. R. Co.* (1887) 72 Cal. 523, 14 Pac. 138; *Daniel* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 397, 16 L. R. A. 383, 15 S. E. 162.

In *Murphy* v. *Smith* (1865) 19 C. B. N. S. 361, 12 L. T. N. S. 605, Erle, Ch. J., argues on the hypothesis that, if the evidence had actually shown that the negligent employee was a deputy to whom the regular representative of the master had delegated his powers, during his absence from work, the plaintiff might have recovered. But he considered that the employee in question was not shown to have filled any other position with relation to the plaintiff than that of a fellow servant.

[2] A conductor (in jurisdictions where he is a vice principal), although he is normally in a different department from a foreman of bridge builders, is a vice

have resulted from his compliance with the provisions of a rule, the effect of which was that, in a specified contingency, he was to exercise certain powers. In such cases the employer incurs no responsibility unless, at the time of the accident, the subordinate had actually passed under the control of the temporary vice principal.[3] Nor will the substitute be considered a vice principal if it is apparent that he was not exercising some power or function which was an essential attribute of the position held by the employee whose place he had taken.[4]

principal of that foreman, while the foreman is traveling on a work train controlled by the conductor. *Northern P. R. Co.* v. *Beaton* (1894) 12 C. C. A. 301, 29 U. S. App. 88, 64 Fed. 563.

An engineer of a shop who marks out work for other employees, and, when the employer, who acts as his own superintendent, is absent, takes charge of the shop, is a fellow servant of a boy over fourteen employed in the shop, and not a vice principal for whose negligence in giving an unreasonable order the employer is responsible, although the latter told the boy to go to such engineer, who would tell him what to do. Such a direction will be considered to have relation to the kind of work the boy has been accustomed to do, and does not amount to a delegation by the employer of his general authority over the plaintiff to another. *Greenman* v. *Conroy* (1891) 150 Pa. 185, 28 Atl. 692; *Duffy* v. *Oliver Bros.* (1889) 131 Pa. 203, 18 Atl. 872 (foreman taking general manager's place, when he was absent, not a vice principal—precise grounds of decision not stated).

[3] In a Tennessee case it was ruled that a brakeman on the forward end of a freight train which is uncoupled or broken in two, leaving the conductor on the rear end, although under the rules of the company the right to command thereupon devolves upon the engineer, is a fellow servant of the latter, until he avails himself of his right to take charge of the train, and does take charge, and assumes to direct and control the movements of the brakeman; and that the latter cannot recover where, acting without directions from the engineer, but in performance of his duty, under the rules of the company, he goes to the rear end of his fragment of the train, to act as lookout and give signals to the engineer, and by the latter's negligence in suddenly jerking the train, is thrown off and injured. *Louisville & N. R. Co.* v. *Martin* (1889) 87 Tenn. 398, 3 L. R. A. 282, 10 S. W. 772. An instruction was disapproved which told the jury that the company would be liable for the engineer's negligence to the same extent as if he had actually taken charge and been, at the time of the accident, engaged in the exercise of his authority. Upon the assumption that both the engineer and the brakeman knew of the rules which were to govern their conduct under the circumstances, it seems impossible to sustain this case on any rational ground. It is submitted that, in the absence of proof to the contrary, the implication should be that, where servants in such a case proceed to perform their duties precisely as they would perform them if the superior had formally announced his assumption of his new functions, they were acting with reference to the rule.

A brakeman sent forward by the conductor of a train which has broken apart, to signal the forward portion, which under the rules of the railroad company is under the control of the engineer, is a fellow servant of the latter, and cannot recover from the company for injuries sustained from the latter's negligence, for at the time of the accident he is not controlled by the engineer. *Newport News & M. Valley Co.* v. *Howe* (1892) 3 C. C. A. 121, 6 U. S. App. 172, 52 Fed. 382.

[4] A section foreman with authority to hire or discharge only the men employed on his section is not a vice principal, as being the head of a department (§§ 532, *et seq.*, *infra*), while temporarily taking the place of the road master, and superintending the unloading of ties from a work train, where he has no authority to direct when the train shall be made up and sent out, or where it shall go, except as he receives his instructions from the road master,

Since the powers of a temporary vice principal can in no case be greater than those of the permanent one, the master is not responsible if those powers are exceeded by the substitute.[5]

510. Sufficiency of a complaint based upon the vice principalship of the negligent servant.—(Compare § 562, *post.*) As all employees of the same master are prima facie coservants, a plaintiff who seeks to recover on the theory that a delinquent employee was a representative of the master in regard to the matters out of which the injury arose must make such allegations as will take the case out of the ordinary rule. What allegations will suffice for this purpose is a question which depends upon the theory the particular court where the action is brought has adopted as to the functions from which a representative capacity may be inferred. For detailed information as to the different theories entertained, the following chapters must be consulted.

In jurisdictions where the doctrine that there are no vice principals by virtue of their official rank, so far as regards the management of a going concern (see §§ 529, 530, *infra*), is accepted, even an averment implying that the delinquent was the general manager or superintendent is not proof against a demurrer.[1]

Worch v. *Toledo, S. & M. R. Co.* (1897, 113 Mich. 154, 71 N. W. 464 (injury alleged to have been caused by excessive speed of train from which the ties were dropped).

In jurisdictions where the possession or nonpossession of a power to employ and discharge subordinates is viewed as a crucial test of his representative character (see § 523, *infra*), a temporary foreman is not a vice principal, unless he is invested with that power. *St. Louis, A. & T. R. Co.* v. *Lemon* (1892) 83 Tex. 143, 18 S. W. 331; *Allen* v. *Logan City* (1894) 10 Utah, 279, 37 Pac. 496. In the latter case Bartch, J., dissented on the ground that the foreman left in charge had been notified by the vice principal of special circumstances which created additional hazards, and had failed to notify the laborer who was injured by the falling of the bank. This seems to be the more correct view. The duty to warn being absolute, the rank and powers of the servant to whom the duty was delegated ceased to be a material consideration.

[5] In one case it was held that an engineer given charge of the movement and management of cars, with the assent or knowledge of a temporary conductor acting in the absence of the regular conductor, has the authority of a conductor in giving directions to subordinate employees, and may waive a general rule and contract of the company: and a brakeman injured by going between the cars to place a bent link in position for coupling under the direction of such engineer, and exercising ordinary care in so doing, may recover for the injuries sustained, notwithstanding a written contract forbidding him to go between the cars, and requiring him to use a stick. *Finley* v. *Richmond & D. R. Co.* (1893) 59 Fed. 419. This decision was reversed in (1894) 12 C. C. A. 595, 25 U. S. App. 16, 63 Fed. 228, on the ground that even a regularly appointed conductor had no power to waive the rule.

[1] *Connolly* v. *Young's Paraffin Light & Mineral Oil Co.* (1894) 22 Sc. Sess. Cas. 4th series, 80 (averment that he had superintendence intrusted to him held not to be enough); *Albro* v. *Agawam Canal Co.* (1850) 6 Cush. 75 (action dismissed where injury alleged was due to superintendent).

In an early Missouri case a petition was held demurrable which alleged that

In jurisdictions where it is held that vice principalship is not inferable from the mere fact that the negligent servant was in a position of superiority, no cause of action is stated by a complaint showing only that he was a foreman.[2]

In jurisdictions where the negligence of a general manager is held to be imputable to the master, a complaint which describes the delinquent employee in terms which bring him within the scope of this rule is good.[3]

In jurisdictions where the superior servant doctrine (§§ 521 *et seq. infra*) is adopted, it is error for a trial judge to sustain a demurrer to a complaint which alleges facts indicating that the negligent employee controlled the injured plaintiff.[4]

511. Functions of court and jury in determining whether the negligent employee was a vice principal.—(Compare § 494, *ante*, and § 538, note 4, *post*.)—In one of the earlier English cases, Byles, J., expressed the opinion that it was for the jury to determine whether the negligent servant, the defendant's foreman, was a vice principal.[1] The doctrine thus adopted would seem to be the same as that which

the plaintiff was injured by the collapse of a bridge, that this bridge "was received by the chief engineer or superintendent of the road," and that "the company conducted themselves so negligently by their engineer, servants, etc., that, by reason of such negligence, the plaintiff received the injuries complained of." *McDermott* v. *Pacific R. Co.* (1860) 30 Mo. 115. But this petition would now undoubtedly be held good in Missouri itself, as well as in other American states, with the possible exception of Massachusetts.

[2] *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga. 761 (1882) 68 Ga. 639 (facts alleged showed negligent servant to be a mere foreman); *Gausior* v. *Minneapolis & St. L. R. Co.* (1877) 26 Minn. 385, 31 N. W. 515 (same grounds assigned for dismissing the action).

A complaint of which the gravamen is the negligent order of a superior servant who is not a vice principal is demurrable in the absence of an allegation that such servant was incompetent, or that the injured servant was sent, by the order, outside the scope of his employment. *Standard Cement Co.* v. *Minor* (1901) 27 Ind. App. 479, 61 N. E. 684.

[3] The complaint of an employee of a city is not demurrable where it alleges that the injury was caused by the negligence of a person appointed by the board of public works of the city, with the approval of the city council, to take charge of the work on the streets, with authority to employ and discharge men and control and direct the work in its entirety. *Hathaway* v. *Des Moines* (1896) 97 Iowa, 333, 66 N. W. 188.

In one Wisconsin case it was held that an allegation that the negligent employee was "agent and manager" does not convey any definite idea of the powers vested in him, as the court could not presume from this designation that he had all the powers of the company and stood in its place for all purposes. *Dwyer* v. *American Exp. Co.* (1882) 55 Wis. 453, 13 N. W. 471. Such a ruling could scarcely be made except in a court which still applies the strict standard of the older rules of pleading. It would doubtless be held, in most jurisdictions, that such an averment was sufficient to let in evidence tending to show the actual position of the agent in question. The case is useful, however, as suggesting the advisability of not confining the description to the mere official designation of the delinquent, but of expanding it in the manner indicated by the above-cited Iowa case.

[4] *Vix* v. *Texas P. R. Co.* (1891) 82 Tex. 473, 18 S. W. 571.

[1] *Gallagher* v. *Piper* (1864) 16 C. B. N. S. 669, 33 L. J. C. P. N. S. 329.

is not infrequently stated by American judges, *viz.*, that this question is one partly of law and partly of fact.[2] This doctrine involves the corollary that it is error to take the question from the jury, where there is a dispute as to the determinative facts, or those facts are such that more than one inference may be drawn from them.[3]

In other words the question whether the position of the delinquent employee was that of a vice principal is one for the jury, whenever the nature of his relations to his subordinates is left in doubt by the evidence.[4]

On the other hand it has frequently been explicitly declared, and is taken for granted in almost all the cases cited in this chapter, that it is for the court to say whether or not the negligent employee was a vice principal, in every case in which the facts are clearly established, and show precisely what were the respective duties of the plaintiff and the delinquent coemployee, and what relation they bore to one another.[5] Under such circumstances it is error to submit to

S. 323, 44 L. ed. 181, 20 Sup. Ct. Rep. 85); *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269; *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843; *Hactin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603; *Alaska Treadwell Gold Min. Co.*

the jury the question whether the defense of coservice is or is not available.[6]

512. Burden of proof.—(Compare § 563, *post.*)—From the principles stated in the preceding section it follows that the burden of proving that the negligent fellow employee was vested with such a measure of authority, or with such functions, as constituted him the representative of the master rests on the party alleging that he occupies that position, unless the vice principalship is a necessary implication from the nature of his agency or employment.[1]

No issue of fact as to the position of a servant can properly be said to be raised when the plaintiff brings forward no testimony but his own bare assertion that such servant is a superintendent, while the uncontradicted testimony of the defendant, resting upon tangible proofs, demonstrates that this assertion is erroneous.[2]

513. Scope of following subtitles.—In the remaining subtitles of this chapter only those decisions will be reviewed in which the essential question was whether the negligent employee was a vice principal by virtue of his official position, and the nature and extent of the control exercised by him over the fellow servant whose injury was caused by his negligence. The succeeding chapters will be devoted to a discussion of the cases in which the starting point of the investigation is the character of the particular act which caused the injury, and the master is held liable or absolved according as that

v. *Whelan* (1897) 168 U. S. 86, 42 L. ed. 390, 18 Sup. Ct. Rep. 40.

[6] *Marshall* v. *Schricker* (1876) 63 Mo. 308; *Wilson* v. *Charleston & S. R. Co.* (1896) 51 S. C. 79, 28 S. E. 91.

Where, upon plaintiff's own statement of the facts, the delinquent employee was his fellow servant, the court should charge the jury that the action is barred on this ground, and leave the case to the jury upon such other contentions as may be raised by the declaration. *National Fertilizer Co.* v. *Travis* (1898) 102 Tenn. 16, 49 S. W. 832.

[1] *Patton* v. *Western North Carolina R. Co.* (1887) 96 N. C. 455, 1 S. E. 863. Where there is nothing to show what the duties of a train dispatcher are, it will be presumed that he was a fellow servant of an engineer. *Blessing* v. *St. Louis, K. C. & N. R. Co.* (1883) 77 Mo. 410 (plaintiff rightly nonsuited on the ground that it was shown merely that the train dispatcher controlled the movements of trains). In the absence of testimony showing what the power and duties of the conductor are, a railway company will not be held responsible for injuries resulting from his negligence in assuring a laborer that a piece of apparatus was safe. *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528. The court said: "Prima facie all servants of a common master employed in running, operating, and rendering service with a train of cars are fellow servants. If there are facts which show that this relation does not really exist between all of such servants, the burden of showing such facts is on him who seeks to avail himself of the absence or nonexistence of such relation. This court cannot take judicial notice of the duties required of, or performed by, such servants, nor of the degrees of supremacy or subordination existing among them."

See also *Gilmore* v. *Oxford Iron & Nail Co.* (1892) 55 N. J. L. 39, 25 Atl. 707 (plaintiff nonsuited where nothing more is shown than that the negligent servant controlled the injured one).

[2] *Greenway* v. *Conroy* (1894) 160 Pa. 185, 28 Atl. 692.

act did or did not constitute a breach of some specific duty which the law regards as non-delegable. In some instances there is considerable difficulty in distinguishing these two classes of cases for purposes of classification (see the remarks in § 539, *post*); but usually the standpoint of the court is so unmistakable as to exclude all uncertainty with regard to the rationale of the decision. Wherever any doubt has been felt whether a particular case should be cited under this or the following chapter, it has been referred to in both of them.

In subtitles B-F of the present chapter, which contain the discussion of general principles, the writer has endeavored to show, as far as possible, the real value which the cases cited possess, as authorities, at the present time. But in order to lessen still further the danger of a misunderstanding on this point, it has been deemed advisable to append the summary, in chapter XXX., *post*, the main object of which is to indicate the fluctuations of opinion in the different jurisdictions. The practitioner is cautioned against relying on any particular decision, until he has ascertained from this summary how it stands with relation to other rulings of the same court.

B. Mere inequality of rank, significance of.

514. Usually held not to warrant inference that the superior servant is a vice principal.—So far as regards the jurisdictions in which the superior servant doctrine is rejected, it is sufficient to point out that, in most instances, the plaintiff's right of recovery on the mere ground of the negligent servant's higher rank is necessarily negatived by the fact that such higher rank, even when it is accompanied by the power of control, will not render him a vice principal.[1] In this group of

[1] In nearly all the very numerous instances in which the courts belonging to the class mentioned in the text have laid it down in general terms that the defense of common employment prevails, without respect to difference of grade or rank, the nature of the facts under discussion shows that the particular situation which the court had in view was that in which a superiority of rank is accompanied by a power of control. See, for example, *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615; *Rogers* v. *Ludlow Mfg. Co.* (1887) 144 Mass. 198, 59 Am. Rep. 68, 11 N. E. 77; *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324; *Blake* v. *Maine C. R. Co.* (1879) 70 Me. 60, 35 Am. Rep. 297; *Baltimore & O. R. Co.* v. *McKenzie* (1885) 81 Va. 71; *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 193, 21 S. E. 342.

"A master is not responsible to his servant for the negligent performance of some detail of the work intrusted to the servant, whatever may have been the grade of the [latter] servant." *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860.

"There is no distinction as to the exemption of a common employer from liability to answer for an injury to one of his workmen from the negligence of another in the same employment in consequence of their being workmen of different classes." Lord Chelmsford, in

courts, therefore, it would seem that the significance of an inequality of grade cannot be of any practical importance except in those comparatively rare instances in which the control exercised was of such an extent and such a nature as to make the superior servant a head of department as regards his own subordinates, and his negligence proves injurious to a servant not under his control. This precise conjunction of circumstances so rarely arises that few specific authorities for the nonliability of the master in such cases are to be found in the books; but it has been distinctly recognized both by the Federal court of appeals and the Supreme Court of the United States that a conductor of a train, although a vice principal as to the men working under his orders, is a mere fellow servant as to men on other trains.[2]

In most of the courts which apply the doctrine that a servant is the

Wilson v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

The same remark may be made as to the language used in cases decided under statutes which are declaratory of common-law principles. Thus it has been laid down that the law of California "recognizes no distinction growing out of the grades of employment of the respective employees; nor does it give any effect to the circumstance that the fellow servant through whose negligence the injury came was the superior of the plaintiff in the general service in which they were, in common, engaged." *McLean* v. *Blue Point Gravel Min. Co.* (1876) 51 Cal. 255.

A chemist in a factory, having no direct authority over the other employees, is not a vice principal. *Wilson* v. *Hudson River Water Power & Paper Co.* (1893) 71 Hun, 292, 24 N. Y. Supp. 1072.

[2] *Northern P. R. Co.* v. *Poirier* (1896) 167 U. S. 48, 42 L. ed. 72, 17 Sup. Ct. Rep. 741, Reversing on another point (C. C. A.) 15 C. C. A. 52, 29 U. S. App. 53, 67 Fed. 881, where the above doctrine was conceded. This decision overrules three others based upon the hypothesis that the doctrine of *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, has been supposed to involve the corollary that the conductor is a representative of the company, not only as to the men on his own train, but as to those on other trains also. *Northern P. R. Co.* v. *O'Brien* (1889) 1 Wash. 599, 21 Pac. 32; *Au* v. *New York, L. E. & W. R. Co.* (1886) 29 Fed. 72 (omission to see that brakemen were at their posts and brakes set on a steep grade—brakeman on another train injured by running away of train); *Ragsdale* v. *Northern P. R. Co.* (1889) 42 Fed. 383, is to the contrary.

In *Daniel* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 397, 16 L. R. A. 383, 15 S. E. 162, the court was of opinion that a conductor, being a vice principal, as being in control of his own train, was also a vice principal as to a brakeman on another train. The *Ross Case* (§ 22, *ante*, and chapter XXX., *post*) was relied on, and as the decision of the Supreme Court of the United States just cited negatives that construction of its earlier ruling, it would seem that this West Virginia ruling must have lost its authority, even if it had not been overruled on the other grounds stated in subtitle H, *infra*.

Norfolk & W. R. Co. v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 994 (divisional train despatcher not vice principal as to engineer not employed by him, for the mere reason that he is of a superior grade) may also be cited as sustaining in some degree the general principle stated in the text, though here the difference of department was not alluded to by the court.

In *McMaster* v. *Illinois C. R. Co.* (1887) 65 Miss. 264, 4 So. 59, a conductor of one train was deemed to be a vice principal as to the employees on another. But such a decision is of no special significance in this state. See § 530, *infra*.

representative of the master in respect to any fellow servant over whom he exercises control (see subtitle C., *infra*), the rule is that, unless the higher rank of the negligent servant gave him the right of controlling the injured servant, the defense of common employment will prevail, even though the two servants are in the same department of the business.[3] In Kentucky alone it is held that the negligence of a servant who is higher in rank than the injured one will affect the master with liability even where the superiority of rank was not accompanied by a power of control (see chapter XXX., *post*).

For practical purposes, therefore, the courts are unanimous as to the doctrine that vice principalship is not to be inferred from the mere fact of superiority of rank. Very different is the situation

[3] In *East Tennessee, V. & G. R. Co.* v. *Rush* (1885) 15 Lea, 145, it was held that an engine driver and a servant employed to put danger signals on the track, though they are of different grades, are fellow servants. In *Nashville, C. & St. L. R. Co.* v. *Wheless* (1882) 10 Lea, 741, 43 Am. Rep. 317, the court, in holding a railroad company not liable to a brakeman for the negligence of the engineer, said: "Of course, in some cases a railroad company may be held liable to a brakeman for the negligence of an engineer,—as, where the former is in fact acting under the orders of the latter. We do not mean to hold that the relation of superior or inferior may not, in some cases, exist between them—only that it did not in this case, so far as the record shows. In this view we are of opinion that the facts do not show that the engineer was, in the sense we are considering, the superior of the plaintiff in this instance. They were engaged in a common service, each performing his particular part. They may both be said to have been acting under the orders, either express or implied, of the conductor. But the engineer did not assume any supervision of the work or give any orders in regard to it, and the plaintiff cannot, in any fair sense, be said to have been acting in this particular matter under the orders, either express or implied, of the engineer; and the mere fact that the engineer was the superior of the plaintiff in position, skill, intelligence, and pay, does not change the result." To the same effect is the language used, *arguendo*, in *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387. See also *Wright* v. *Northampton & H. R. Co.* (1898) 122 N. C. 852, 29 S. E. 100, holding that a section master who rides to and from his place of work on one of the railroad company's trains is a fellow servant with the engineer of such train, for whose negligence the former cannot recover, even though such engineer is also the conductor of the train. *Lincoln Coal Min. Co.* v. *McNally* (1884) 15 Ill. App. 181, denying recovery where a shift-boss in a mine injured a miner not under his control, by his carelessness in lowering a board down a shaft.

In *Pittsburg, Ft. W. & C. R. Co.* v. *Devinney* (1867) 17 Ohio St. 197, a brakeman of one train was held to be a fellow servant of the conductor of another. But this case seems to be in conflict on this point with a more recent one in the same state. *Dick* v. *Indianapolis, C. & St. L. R. Co.* (1882) 38 Ohio St. 389, where, in an action brought by a section man who was struck by a train, it was held error to take the question from the jury, inasmuch as the evidence tended to show that the train was run by the conductor at an unlawful rate of speed, and no warning signals were given. Compare also, to the same effect, *Daniel* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 397, 16 L. R. A. 383, 15 S. E. 162, and the comments on it in note 2, *supra*. The principle applied in the last two cases has been embodied in the Ohio act of 1890, declaring that persons "having charge or control of employees in any separate branch or department" are not fellow servants of subordinate employees in other departments.

when the investigation begins to concern itself with the significance of the superior servant's right to control the inferior. The solvent and disturbing effect of the introduction of this element is strikingly indicated by the irreconcilable conflict of views disclosed in the cases cited in the following subtitles of this chapter. The boundaries between the dominions of each particular theory are so extremely obscure and ill-defined at their points of contact that it is often impossible to determine with certainty the principle to which a case should be referred, and the difficulty of classifying the cases on a satisfactory basis is enormously increased by the fluctuations of opinion in the same court. All that is possible, therefore, is to review the authorities under the broad categories into which the larger portion of them seem naturally to fall, and to note any instances in which the arrangement is necessarily defective, owing to an overlapping of theories or other causes.

C. Doctrine that vice principalship is not deducible merely from the possession of a power of control over the injured servant.

515. General statement of the doctrine.—The rule accepted by the great majority of the courts is that, for the purpose of determining whether the negligent employee is one of those for whose acts the master is responsible, the fact that one servant has control over another is immaterial, and that a master is not responsible for the negligence of a superior servant, even in giving orders whereby injury is sustained by the inferior servant.[1] This rule applies, whether the negligent order was given to the servant injured, or to another serv-

[1] *Moody* v. *Hamilton Mfg. Co.* (1893) 159 Mass. 70, 34 N. E. 185; *Howard* v. *Hood* (1892) 155 Mass. 391, 29 N. E. 630; *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 400; *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324; *Indiana Car Co.* v. *Parker* (1884) 100 Ind. 181; *Foucs* v. *Phillips* (1882) 39 Ark. 17, 43 Am. Rep. 264 (reviewing instructions); *Blake* v. *Maine C. R. Co.* (1879) 70 Me. 60, 35 Am. Rep. 297 (*aranendo*); *Feltham* v. *England* (1866) L. R. 2 Q. B. 33, 7 Best & S. 676, 36 L. J. Q. B. N. S. 14, 15 Week. Rep. 151; and the cases cited in § 7, *post*.

"The common law of England is that, where fellow servants are engaged in a common employment, whether one is inferior to the other, whether one is bound to obey the other or not, the master is not liable for injury occasioned to the one through the negligence of the other. There has been some discussion how far the law of Scotland is the same, but it was long ago settled that the law of England is as I have stated." Lord Esher in *Hedley* v. *Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 58.

"A servant who sustains an injury from the negligence of a superior agent, engaged in the same general business, cannot maintain an action against their common employer, although he was subject to the control of such superior agent, and could not guard against his negligence or its consequences." *Keenan* v. *New York, L. E. & W. R. Co.* (1895) 145 N. Y. 190, 39 N. E. 711. Citing

ant whose act in obedience to the order caused the injury,[2] and whether the control exercised was that incident to a more or less permanent relation, or merely temporary.[3]

For purposes of procedure the rule in question is treated as creating a presumption of fact, which, where the evidence is merely that the negligent servant controlled the injured one, requires the court to declare that the action is, as matter of law, not sustainable.[4]

Considered in its relation to the sufficiency of the pleadings, the rule entails the consequence that a complaint which alleges an injury resulting from the negligence of an employee whose designation indicates no more than that he was in control of the injured servant with respect to the work in progress is demurrable unless it also avers facts of which the legal effect is that the superior servant represented the master.[5]

Sherman v. *Rochester & S. R. Co.* (1858) 17 N. Y. 153; *Loughlin* v. *State* (1897) 105 N. Y. 159, 11 N. E. 371.

"The fact that the person whose negligence causes the injury is a servant of a higher grade than the servant injured, or that the latter is subject to the direction or control of the former, and is engaged at the time in executing the orders of the former, does not take the case out of the operation of the general rule stated, nor make the master liable." *Vitto* v. *Keogan* (1897) 15 App. Div. 329, 44 N. Y. Supp. 1.

"The rule [*i. e.*, as to the defense of common employment] is the same, although the one injured may be inferior in grade, and is subject to the control and direction of the superior whose act caused the injury, provided they are both co-operating to effect the same common object." *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 439.

In several of the states the opinions of the courts have undergone a change, the result being sometimes a departure from, sometimes an adoption of, the principle stated in the text. See the summary in chapter XXX., *post*.

[2] *Moody* v. *Hamilton Mfg. Co.* (1893) 159 Mass. 70, 34 N. E. 185. The following are a few of the numerous cases in which the order was given to a fellow servant of the injured person: *Huska Treadwell Gold Min. Co.* v. *Whelan* (1897) 168 U. S. 86, 42 L. ed. 390, 18 Sup. Ct. Rep. 40; *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556; *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143; *McGinley* v. *Levering* (1893) 152 Pa. 366, 25 Atl. 824; *Benson* v. *Goodwin* (1888) 147 Mass. 237, 17 N. E. 517.

[3] *Hathaway* v. *Illinois C. R. Co.* (1894) 92 Iowa, 337, 60 N. W. 651.

[4] *White* v. *Fidlitz* (1897) 19 App. Div. 256, 46 N. Y. Supp. 184 (error to rule that a foreman represented the master, where there was no evidence tending to show that he had the requisite authority). A verdict should not be directed for the plaintiff where there is no evidence indicating special reasons for making an exception to the general rule that a mere foreman is not a vice principal. *Dube* v. *Lewiston* (1891) 83 Me. 211, 22 Atl. 112.

[5] *Flynn* v. *Salem* (1883) 134 Mass. 351. Compare *Lawler* v. *Androscoggin R. Co.* (1873) 62 Me. 463, 16 Am. Rep. 492 (road master ordered plaintiff to work in culvert known to be dangerous —demurrer sustained to complaint alleging merely that the road master carelessly managed the repairs of the culvert); *Brazil & C. Coal Co.* v. *Cain* (1884) 98 Ind. 882 (demurrer properly sustained where the only negligence alleged was that a "bank boss" in a mine sent a servant, a minor of nineteen years, who had been engaged in mining coal, to drive a bank car); *Peterson* v. *Whitebreast Coal & Min. Co.* (1879) 50 Iowa, 673, 32 Am. Rep. 143 (demurrer properly sustained to petition seeking to recover on the theory that the delinquent servant had "charge and control" of plaintiff).

See also *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655; *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga. 761 (1882) 68 Ga. 839.

The line which divides the cases controlled by this general rule and by the principle that the duty of giving instruction to servants who require it is nonassignable (see §§ 578, 579, *post*) is sometimes exceedingly thin,—as, where it was held that the fact that one employee has more experience than another and is authorized to give the latter directions in respect to their common work does not make him the vice principal of the employer.[6] All that would be necessary, under such circumstances, to convert nonliability into liability would be the introduction of evidence showing that the inexperience of the injured servant was an element in the accident, and that the master understood, or ought to have understood, the special danger arising from this source. In most instances, probably, the facts would readily bear this construction.

516. Rationale of the doctrine.— The theory upon which the rule stated in the last section rests is that the risk of a superior servant's negligence is as much an ordinary risk of the employment as is the risk of the negligence of a coequal or inferior servant.[1] The rea-

[6] *Rozelle* v. *Rose* (1896) 3 App. Div. 132, 39 N. Y. Supp. 363 (unsafe method of doing work adopted).

[1] "The same rule of liability must necessarily apply to the several grades of employments, where those in the inferior are subject to the direction and control of those in the higher grades, as to cases where all occupy a common footing and possess equal authority. . . . And what substantial difference is there between a case of injury from the negligence of a servant with superior authority, and one from like negligence of a servant of equal authority, employed at a distance from and without the immediate influence of the party injured? How could the latter better guard against the injury in the case last mentioned than in the former one? If distance is to have effect, what shall the distance be? It is manifest that no distinction or exception as to liability of the principal, resting on the inability of the injured party to protect himself in the particular case, could be made without practically abrogating the entire rule." *Sherman* v. *Rochester & S. R. Co.* (1858) 17 N. Y. 153.

"There is no principle which should make the employer liable to one of his common laborers for injuries sustained in consequence of the negligence of his foreman or overseer, which should not also make him liable for the negligence of another common laborer. There can not be any distinction of that kind. They all represent the principal, for certain purposes, and the principal is liable to a stranger for an injury received in consequence of the negligence of the former, as well as the latter." *Coon* v. *Syracuse & U. R. Co.* (1849) 5 Barb. 231.

In *Kalleck* v. *Deering* (1894) 161 Mass. 469, 37 N. E. 450, replying to the suggestion that the fact of ordering the servant to use an appliance which turned out to be defective was an act belonging to the superior servant as such, and might have the effect of taking the case out of the operation of the doctrine as to common employment, the court said: "Looking at the reason given for the exception to the general liability of masters for servants, the last suggestion cannot prevail. If the sailor takes the risk of a negligent injury to his person from a fellow sailor, there is equal reason to say that he takes the risk of a negligent command. A command is a transitory act which the employer has no chance to supervise. It is not like a permanent condition of land or machinery, or the abiding incompetence of an employee. See *Flynn* v. *Campbell* (1893) 159 Mass. 128, 35 N. E. 453. If the defendants have been guilty of no personal negligence, and the plaintiff does take the risk of the negligence of some persons with whom his work will bring him into contact,

sons of policy for extending the implication of a contract to assume this risk are necessarily the same as those by which the doctrine of common employment, as a whole, is sustained.[2]

This theory, if pushed to its strictly logical conclusions, lands us in a doctrine similar to that which, as will be explained below (§ 529, *infra*), was established in England by *Wilson* v. *Merry*.[3] But, as limited by the effect of the decisions which embody the conception of the nonassignability of certain duties of the master, and applied to the situations in which the effect of the mere element of control is commonly presented, it may be said to stand or fall with the correctness of the argument that, "if the servant is supposed to assume the risks which the master, with due care and diligence, cannot pre-

the question whether the negligence of one of those persons is within or outside of the risks assumed is not a matter of names or dignities. That is too well settled to need the citation of cases. *Moody* v. *Hamilton Mfg. Co.* (1893) 159 Mass. 70, 34 N. E. 185. The question is what he must be taken to have contemplated when he went into the employment. The chances of negligence on the part of a superior employed in the common business are as obvious as in the case of one of a lower grade, and, therefore, when the duty is not personal to the employer the same rule applies whatever the degree of the negligent employee. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914."

In an article in 24 Am. L. Rev. 190, quoted with approval in *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 54 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266; *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222, and other cases, Judge Dillon remarks: "The real inquiry is, Was the injury caused by another servant one of the ordinary risks of the particular employment? If so, the mere grade, whether higher, lower, or co-ordinate, or the department of the faulty servant, is of no consequence. It is a condition of contract of service that the servant takes upon himself the risk of accidents in the common course of the business, all open and palpable risks, including the negligence of all fellow servants of whatever grade in the same employment. The true inquiry in each case is, Was the accident one of the normal and natural risks in the ordinary course of business? If so, then there is no common-law liability on the part of the employer; i. not, there is such liability; and the inquiry, except as it bears on the above, is not one of grades or departments. This is the final form the doctrine has assumed, and it is the correct one. It is plain, intelligible, and practical. It is founded upon just principles, viz., that it is precisely commensurate with the master's personal duties."

[2] "Sound policy seems to require that the law should make it for the interest of the servant that he should take care, not only that he be not himself negligent, but also that any negligence of others in the same employment be properly guarded against by him, so far as he may find it reasonably practicable, and be reported to his employer if needful." Cooley, Torts, 2d ed. 640, adopted in *Norfolk & W. R. Co.* v. *Houchins* (1897) 95 Va. 398, *sub nom. Norfolk & W. R. Co.* v. *Swaine*, 46 L. R. A. 359, 28 N. E. 578, and in *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258.

"The fellow-servant rule is founded in wisdom, and any departure from it is dangerous to the prosperity and perpetuity of the enterprises of manufacturing, mining, railroading, and those industries requiring the services of many servants. More than this, it increases the dangers to such servants who may be so employed." *New Pittsburgh Coal & C. Co.* v. *Peterson* (1893) 136 Ind. 398, 35 N. E. 7, quoted with approval in *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 381, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258.

[3] (1868) L. R. 1 H. L. Sc. App. 326, 19 L. T. N. S. 30.

vent, . . . he assumes the risks from negligence of those servants who may be placed over him as superior servants or overseers, as well as of those of equal grade with himself," for the reason that, "in respect to such overseers or superior servants, the master, when he has used due care in selecting them, cannot prevent their casual negligence, any more than he can prevent the casual negligence of those inferior in grade."[4] In other words, the function of giving directions as to the proper manner of performing the work is not one of those absolute, personal functions for the careful discharge of which a master is responsible, whatever agents he may employ.[5]

517. Qualification of the doctrine in cases where an order takes a servant outside the original scope of his employment.—As pointed out in § 465, *ante*, the effect of the decisions regarding the liability of a master for injuries received by a servant through his compliance with the order of a superior to incur risks not within the scope of the original contract of hiring is that, even in the courts which administer the doctrine now under discussion, the mere possession of a power of control is deemed to be a sufficient ground for letting in the operation of the rule of *respondeat superior*. The reasons assigned for this somewhat illogical qualification of the general rule are explained in the section referred to.

518. Power of hiring and discharging subordinates, significance of.—By all the courts which apply the above doctrine, it is held down or assumed that a mere foreman of a subordinate grade is not converted into a vice principal by the fact that, among his powers, is included that of hiring and discharging his subordinates.[1] No greater signifi

C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970; *Nowes* v. *Wood* (1894) 102 Cal. 389, 36 Pac. 766; *McLean* v. *Blue Point Gravel Min. Co.* (1876) 51 Cal. 255; *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222; *Gilmore* v. *Oxford Iron & Nail Co.* (1892) 55 N. J. L. 39, 25 Atl. 707; *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663; *Hastings* v. *Montana Union R. Co.* (1896) 18 Mont. 493, 46 Pac. 264; *Lochbaum* v. *Oregon R. & Nav. Co.* (1900) 44 C. C. A. 220, 104 Fed. 852; *Casey* v. *Pennsylvania Asphalt Paving Co.* (1900) 198 Pa. 348, 47 Atl. 1128.

Averments that the superior officer whose negligence caused the plaintiff's injury was defendant's agent, with full authority "to control the work of, and to employ and discharge, the plaintiff from his employment, as well as other servants of said defendant," do not show that such officer was a vice principal in performing the act from which the injury resulted. *New Pittsburgh Coal & C. Co.* v. *Peterson* (1893) 136 Ind. 398, 35 N. E. 7. See also *Hanna* v. *Granger* (1894) 18 R. I. 597, 28 Atl. 659, cited at the end of the section.

cance will be attached to this power for the mere reason that the subordinate had special reasons for fearing that the result of disobedience would be the loss of his position.[2]

In the case of officials whose authority is so extensive as to constitute them general managers of an entire business or of a department of it (see sub-titles E, F *infra*), the evidential significance of this element is to be estimated with reference to the fact that such officials must always, as a matter of fact, possess the power of determining, either directly or through instructions to some intermediate foreman, what persons shall be employed or discharged.[3] Theoretically, therefore, wherever it is a matter of doubt whether a supervising employee stands above or below the line which separates mere foremen from departmental or general managers, proof that he possessed or did not possess the power of employing and discharging his subordinates probably is a material factor in the inquiry. In practice, however, the question or absence of such a power has very rarely been considered from this standpoint and in this connection, the judges naturally preferring to rest their conclusions on evidence of a more positive character. It would seem that, among the group of states with which we are now concerned, the only one in which any marked tendency has been shown to ascribe a really differentiating import to evidence that the delinquent co-employee possessed the power is Michigan.[4] In most of the judgments such evi-

[2] *Robertson* v. *Chicago & E. R. Co.* (1895) 146 Ind. 486, 45 N. E. 655 (superior was quick-tempered and passionate).

[3] In a Michigan case stress was laid on the fact that the assistant road master, who was held to be a vice principal, had control over the section master by whom the plaintiff was actually hired. *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397.

[4] In one case it was laid down that the power of discharging was not a controlling factor, but an important one. *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397. The ground of the dissent of two judges, in *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663, where the majority held that the boss or foreman of a gang of men unloading and leveling dirt on a railroad, who is under the immediate control of a railroad official who is often present, sometimes daily, directing the work, is a fellow servant of a member of the gang who is injured by the foreman's failure to give notice that the train is about to move, was that, admitting the act which was neglected—*viz.*, giving notice of the intention to move the engine—to be that of a mere fellow servant, the evidence showed the delinquent co-employee to have been in full control of a branch of the company's business with complete power to hire and discharge his subordinates. The cases relied upon were *Hunn* v. *Michigan C. R. Co.* (1889) 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502, and *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034. As to the first of these, the possession of the power of discharge is merely mentioned as a cumulative fact. In the second it was certainly laid down, *arguendo*, that "whether or not the servant has power to employ and discharge other servants is also important in determining whether or not he is deemed to be a superior servant, for whose acts the master is held liable." But there the court did not refer to any other au-

dence is merely referred to as a fact of a corroborative character, rendering still more unquestionable a conclusion sufficiently justified on other grounds.[5] The absence of the power is, of course, conclusive against the inference that the delinquent employee was a vice principal, for it would be an abuse of language to apply that term to any official who is incapable of exercising a function so essentially characteristic of a master as that of deciding who shall or shall not work for him.[6]

cities but *Chapman* v. *Erie R. Co.* (1871) 55 N. Y. 579, and *Kansas P. R. Co.* v. *Salmon* (1873) 11 Kan. 83. These are merely to the effect that a servant invested with the power of employing and discharging other servants is a vice principal as regards the exercise of that particular power, and therefore do not sustain the theory in aid of which they are vouched; *viz.*, that a general agency may be implied from the possession of this power. The majority of the court in the *Schroeder Case* recognized the doctrine of departmental vice principal-ship, but did not discuss the evidence directly from the standpoint of the minority. It should be observed that this court holds section foremen to be mere servants (see summary of Michigan decisions in chapter XXX, *post*), a doctrine which shows that the possession of a power of discharge is not regarded by it as conclusively proving the possessor to be a vice principal.

[5] See, for example, *Gormly* v. *Vulcan Iron Works* (1876) 61 Mo. 492; *Denver, S. P. & P. R. Co.* v. *Driscoll* (1889) 12 Colo. 520, 21 Pac. 708; *Colorado Midland R. Co.* v. *Naylon* (1892) 17 Colo. 501, 30 Pac. 249; *Erickson* v. *Milwaukee L. S. & W. R. Co.* (1892) 93 Mich. 114, 53 N. W. 231; *Shumway* v. *Walworth & A. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251; *Babbitt* v. *St. Louis, K. & N. W. R. Co.* (1888) 75 Iowa, 297, 39 N. W. 507; *Brooks* v. *Lowell* (1894) 4 C. C. A. 37, 4 U. S. App. 49, 48 Fed. 62.

[6] Probably for the reason that the above principle is essentially incontestable, it has never, so far as the writer is aware, been discussed in any reported case. The absence of a power of employing and discharging subordinates is not infrequently mentioned among the facts which are deemed to negative vice principal-ship; but in all these instances the nonrepresentative character of the employee was indisputable for other reasons: *Peschel* v. *Chicago, M. & St. P. R. Co.* (1884) 62 Wis. 338, 21 N. W. 269; *Drovers* v. *Spencer* (1895) 17 C. C. A. 215, 25 U. S. App. 141, 70 Fed. 480; *Richmond Locomotive Works* v. *Ford* (1897) 94 Va. 527, 27 S. E. 509; *Delaware & H. Canal Co.* v. *Carroll* (1879) 89 Pa. 382; *Brown* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484; *Keystone Bridge Co.* v. *Newberry* (1880) 96 Pa. 246, 12 Am. Rep. 513; *Fox* v. *Chicago, R. I. & P. R. Co.* (1884) 61 Iowa, 611, 21 N. W. 121.

Sometimes the fact that a power of discharge was to be exercised by a foreman subject to the approval of a general superintendent or other higher official is mentioned as a reason by declaring him to be a mere coservant. *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324; *Gagnon* v. *Davis* (1898) 31 C. C. A. 306, 52 U. S. App. 587, 87 Fed. 302. From our present point of view this situation is plainly the same as one in which the power cannot be exercised at all.

In one case it was denied that the nonpossession of the power deprived the supervising employee of the character of a vice principal, and it was laid down that "the most satisfactory evidence that one is, as to his coemployees, a vice principal is that his coemployees are under his supervision, his control, subject to his orders and direction." *Union P. R. Co.* v. *Doyle* (1897) 50 Neb. 555, 70 N. W. 43. But this ruling was made in a state where the "superior servant" doctrine prevails (subtitle D, *infra*), and it was not necessary to refer to the consideration which would undoubtedly have been deemed controlling in any of the states we are now concerned with,—*viz.*, that an official like the one in question, a head of a department, although he might not have exercised the power directly, could have exercised it by issuing the necessary orders to the foreman who had actually hired the injured person.

Where the alleged breach of duty was the employment or retention of unfit servants, the evidential significance of the power of hiring and discharging subordinates is considered from a standpoint quite different from that which is appropriate where the general agency of a delinquent employee is in question. The breach of such a duty by a person possessing such a power necessarily imports a breach of a non-delegable duty by one who is the master's agent for its performance, and if the possession of the power is proved, the master's liability is an unavoidable inference.[7]

519. Application of the doctrine to the various grades of supervising employees.— As will be seen from the general collection of authorities cited in the note to the following section, the most numerous illustrations of the doctrine now under discussion are furnished by the decisions absolving the master from liability for injuries caused by the negligence of employees appointed to direct the laborers of those small bodies of servants who, in every industrial concern of any considerable magnitude or complexity, must necessarily be intrusted with certain distinct duties, which are of such a nature as to segregate them into more or less independent groups, but which are commonly of a somewhat mechanical character, not requiring for their performance the exercise of any of the higher qualities of a superintending officer.[1] That is to say, the controlling conception in the

[7] "Undoubtedly the power to hire and discharge is the test of a vice principal when the question involved is that of selecting or retaining proper servants; for in this respect the servant would clearly represent the master. But in no other sense is it a test. The power to summarily discharge unworthy servants and to hire new ones is often a very necessary and beneficial power for the safety of other servants, for it gives a foreman authority to compel attention to duty. But it does not change the character of the foreman's duties from that of a servant to those of the principal, nor does it impose upon him the master's responsibility in other respects." *Houna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659.

[1] In *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324, the court said: "Whether the master retain the superintendence and management of his business, or withdraws himself from it and devolves it on a vice principal or representative, it is quite apparent that, although the master or his representative may devise the plans, engage the workmen, provide the machinery and tools, and direct the performance of work, neither can, as a general rule, be continually present at the execution of all such work. It is the necessary consequence that the mere execution of the planned work must be intrusted to workmen, and, where necessary, to groups or gangs of workmen, and in such case that one should be selected as the leader, boss, or foreman, to see to the execution of such work. This sort of superiority of service is so essential and so universal that every workman, in entering upon a contract of service, must contemplate its being made use of in a proper case. He therefore makes his contract of service in contemplation of the risk of injury from the negligence of a boss or foreman, as well as from the negligence of another fellow workman. The foreman or superior servant stands to him, in that respect, in that precise position of his other fellow servants."

In another case we find it remarked that an employee is a fellow servant with a foreman under whose direction

majority of cases is that, to justify imputing the negligence of an employee to the master, "he must be more than a mere foreman to oversee a batch of hands, direct their work under the supervision of the master, see that they perform their duty, and, in case of dereliction, report them."[2] Or, as it has also been put, "in order to constitute one a vice principal, he must have general power and control over the business, and not mere authority over a certain class of work or a certain gang of men."[3]

Under the rulings, as they stand, there is no warrant for the contention that evidence of the participation of such employees in the manual labor of their subordinates is at all necessary to establish that they are mere fellow servants; and it has been expressly laid down in at least one case that the fact of a foreman's not engaging in such labor is immaterial in this connection.[4] In the cases where it is mentioned, such evidence seems to be regarded as of merely cumulative force.[5] And the same may be said of evidence that the foreman received the same compensation as his subordinates.[6] From a purely logical standpoint these circumstances may be regarded as negativing the inference that the supervising employees were of sufficiently high rank to be general managers or heads of departments. But in all conceivable cases this inference would, in any event, be so clearly excluded on other grounds, where the delinquent employees were of the humble class indicated by such evidence, that its practical weight in the determination of their character and capacity would be very slight indeed.

he is at work, where the only judgment and discretion exercised by such foreman is that which "belongs to a co-worker in a superior grade." *Lavich* v. *Hoics* (1894) 18 R. I. 513, 28 Atl. 661 (where the work to be done was simply getting a load of sand).

[2] *Dobbin* v. *Richmond & D. R. Co.* (1879) 81 N. C. 446, 31 Am. Rep. 512. The principle thus laid down, however, has not been construed in the North Carolina court in the same sense or applied to the same classes of employees as in most of the courts which have expressed their views in similar terms. See § 549, note 1, *post*.

[3] *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50. Servants employed at the same kind of work, except that one has authority to give directions to the other as to the manner of doing the work, are fellow servants. *Postal Teleg. Cable Co.* v. *Hulsey* (1896) 115 Ala. 193, 22 So. 854. Compare the language used in *Ludre* v. *Winslow Bros. Elevator Co.* (1898) 117 Mich. 560, 76 N. W. 86, and the cases cited in § 536, *infra*, deciding that certain employees are not departmental vice principals.

[4] *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

[5] See, for example, *Moore Lime Co.* v. *Richardson* (1897) 95 Va. 326, 28 S. E. 334; *Balch* v. *Haas* (1896) 20 C. C. A. 151, 36 U. S. App. 693, 73 Fed. 974; *Dearers* v. *Spencer* (1895) 17 C. C. A. 215, 25 U. S. App. 411, 70 Fed. 480; *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269; *Cates* v. *Huey* (1898) 104 Ga. 879, 30 S. E. 884; *Ludre* v. *Winslow Bros. Elevator Co.* (1898) 117 Mich. 560, 76 N. W. 86.

[6] *Griffiths* v. *New Jersey & N. Y. R.*

In some instances the specific ground upon which supervising employees have been declared to be mere servants is that they were not heads of departments.[7] But nothing is gained by the use of a test which gets rid of one difficulty by introducing another equally great. The conception of a "department" is one which, even after all the rulings which deal with the subject, remains too essentially vague to serve as an element of differentiation between the cases in which the master is liable and the cases in which he is not liable.[8] Besides, it is abundantly evident from a comparison of the rulings cited under the next section with those relating to vice principals in charge of departments, that even this unsatisfactory test would not supply a basis on which the decisions could be reconciled. Only in one class of cases does it seem to suggest a rule of evidence which can be of any practical service,—those, namely, in which the delinquent foreman was himself subject to a higher official, who was plainly the master's general agent, if there was one at all, as regards the work in progress. This subordinate position of foremen, denied to be vice principals, is frequently adverted to by the courts.[9] A

Co. (1893) 5 Misc. 320, 25 N. Y. Supp. 812. Affirmed in (1894) 8 Misc. 3, 28 N. Y. Supp. 75.

[7] See cases cited in § 536, *infra*. In *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2, it was distinctly ruled that an agent of the employer is not a vice principal unless he has charge of the entire business, or a department of it.

[8] See § 521a, *infra*, and the remarks of the court in the recent case of *Grattis* v. *Kansas City, P. & G. R. Co.* (1900) 153 Mo. 380, 48 L. R. A. 398, 55 S. W. 108.

[9] *Richmond Locomotive Works* v. *Ford* (1897) 94 Va. 627, 27 S. E. 509 (gang boss under foreman of machine shop); *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970. Reversing on rehearing (1893) 6 C. C. A. 142, 18 U. S. App. 16, 56 Fed. 804 (subordinate foreman having a departmental superior); *What Cheer Coal Co.* v. *Johnson* (1893) 6 C. C. A. 148, 12 U. S. App. 490, 56 Fed. 810 (a foreman in a mine, controlled by a pit boss, who was himself under the superintendent); *Gayuon* v. *Durkee* (1898) 31 C. C. A. 306, 52 U. S. App. 587, 87 Fed. 302 (general foreman of railway shops, who is himself under the control of the master mechanic—workmen ordered into unsafe place); *Dearers* v. *Spencer* (1895) 17 C. C. A. 215, 25 U. S. App. 411, 70 Fed. 480 (track foreman subordinate to a supervisor); *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50 (gang boss in railway repair shops under master mechanic); *McBride* v. *Union P. R. Co.* (1889) 3 Wyo. 247, 21 Pac. 687 (gang boss under control of the master mechanic's foreman); *Keystone Bridge Co.* v. *Newberry* (1880) 96 Pa. 246, 42 Am. Rep. 543 (gang boss under direction of a superintendent); *Johnson* v. *Ashland Water Co.* (1890) 77 Wis. 51, 45 N. W. 807 (foreman in exclusive charge of calking and laying pipes under the general superintendent of a water company); *Peschel* v. *Chicago, M. & St. P. R. Co.* (1885) 62 Wis. 338, 21 N. W. 269 (one of several foremen subordinate to a master carpenter); *Coulson* v. *Leonard* (1896) 77 Fed. 538 (foreman with supervision over several men in erecting the iron work of a building, subject to the supervision of a member of the corporation employing them—injury caused by improper signal); *Ibid.*; *Fordyce* v. *Briney* (1893) 58 Ark. 206, 24 S. W. 250 (foreman of car repairers who is under the foreman of the roundhouse); *McGinley* v. *Leering* (1893) 152 Pa. 366, 25 Atl. 824 (assistant foreman); *Murray* v. *Crimmins* (1895) 14 Misc. 466, 35 N. Y. Supp. 1023, (some facts); *Collins* v. *Crimmins* (1895) 11 Misc. 24,

like deduction is drawn, and for similar reasons, where the master was supervising the operation himself, and the superior servant was working under his directions. Here the very nature of the situation excludes the theory that he was a representative of the master.[10] Where this subjection to a general manager or to the master himself, as his own superintendent, is established, the mere fact that the manager or the master was not actually present in person and managing the operations when the injury was received, will not have the effect of converting the subordinate foreman into a vice principal.[11] In order that this result may follow from the absence of

31 N. Y. Supp. 860 (same facts); *Connolly* v. *Manver* (1893) 6 Misc. 98, 26 N. Y. Supp. 18 (foreman of men engaged under a general superintendent in the construction of a particular part of a building, having authority to tell the men when to work and when to stop, when their services are no longer needed, and when they are required—recently built arch gave way, from which the foreman had prematurely removed the centers); *Belfus* v. *New York, L. E. & W. R. Co.* (1883) 29 Hun, 556 (a wreck master taking his orders from an official in charge of the shops and yards); *Barringer* v. *Delaware & H. Canal Co.* (1879) 19 Hun, 216 (section foreman with two superiors, a track master and a superintendent, between him and the company); *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 201, 21 Atl. 321 (plaintiff's foot drawn into machinery of dredge set in motion by the "engineer" or foreman operating a dredge under the control of the general superintendent of the company); *Gilmore* v. *Oxford Iron & Nail Co.* (1892) 55 N. J. L. 39, 25 Atl. 707 (foreman of mine under a general superintendent); *Schroeder* v. *Flint & P. M. R. Co.* (1891) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663 (foreman of gang of grabers under the immediate control of another official, who was frequently present directing the work); *McDermott* v. *Boston* (1882) 133 Mass. 349 (foreman of laborers in the service of a city, who was himself controlled by a general superintendent).

Many of the cases cited under the next section, especially those relating to foremen of section gangs and in mines, will serve to illustrate the same point of view, whether the control by a higher superior is explicitly referred to or not.

In *Belch* v. *Haas* (1896) 20 C. C. A. 151, 36 U. S. App. 693, 73 Fed. 974, a case where the negligent servant was the foreman of a gang engaged in excavation, the court reasoned thus: "Clausen was not charged with the superintendence and control of the entire business of his employers. He was not the manager or head of a department of a diversified business. Neither was he engaged at the time of the accident in the performance of a special duty which the law devolved upon his employers. On the contrary, he was simply an ordinary foreman, who had charge of a gang of laborers, and who usually worked with them. He did not even have full control of the particular job on which he was employed, for another foreman was engaged on the same work, who seems to have had equal authority, and both foremen were under the general supervision of the common master."

[10] See *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573, where (dissenting, Church, Ch. J., and Rapallo, J.) it was held erroneous to give an instruction framed on the theory that vice principalship was predicable of a mere foreman of carpenters,—one charged with the special duty of executing repairs in a building, "but performing them under general or special instructions from the principal, who retains and has the general supervision of the business and to whom and whose immediate direction, all [the employees] are subject." Similarly, a vice principal loses his representative character for the time being when the employer himself assumes control and directs him how to do the work in hand. *Percost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88.

[11] *Dearers* v. *Spencer* (1895) 17 C. C. A. 215, 25 U. S. App. 411, 70 Fed. 480. See also *Bean* v. *Vail* (1881) 65 Iowa, 407, 21 N. W. 700, where the master was ordinarily absent. The immateriality of the fact that no vice principal was pres-

his superiors, it must be shown that, under the arrangements of the establishment, he was to be in sole charge and to wield the same powers of control as the manager himself, whenever that manager should be absent.[12]

If the negligent servant was, as a matter of fact, a mere foreman, the position of the plaintiff is in no wise improved by the circumstance that he was called a superintendent.[13]

520. Illustrative cases.— The supervising employees specified in the subjoined note have been held to be mere fellow servants of their subordinates. For brevity's sake, everything but the mere designation of the delinquent has been omitted in most instances, the nonliability of the master being understood to be the effect of the ruling, where nothing is stated to the contrary.

The facts, as indicated by the memoranda appended to the citations, should be compared with those involved in the cases to be discussed in the next two chapters, in which the master's nonliability is referred directly to the character of the act which caused the injury as being essentially that of a mere servant. In this connection it should be remarked that, in not a few instances, it is extremely difficult to say whether the court intends to rely upon the ground that the operation of the doctrine of common employment is not defeated by the fact that the delinquent controlled the injured servant or upon the ground that the delinquent was, in any event, a mere fellow servant as to the act which caused the injury, or upon both these grounds. In view of the uncertainty thus created, it has been deemed advisable to include in the following list a good many cases which might, with apparently equal propriety, have been reserved for the following chapters.

These rulings may also be advantageously contrasted with those which illustrate the superior servant doctrine in its application to employees holding similar or identical positions. See subtitle D, *infra*.[1]

ent at the time of the injury is evidently taken for granted in many of the decisions already cited, especially those respecting the foreman of track-repairing gangs, and similar bodies of men, who normally do their work under circumstances which preclude the exercise of a personal control by the higher agents of the master.

[12] See cases cited in § 509, *supra*.

[13] See § 508, *supra*.

[1] (a) *General and departmental managers.*— The consideration of the status of these functionaries is reserved for subtitles E, F, *infra*.

(b) *Employees in control of railway trains or parts thereof.*—As is apparent from the cases cited below, the regular conductor of a train is held to be a mere servant by all the courts outside those which reject the superior servant doctrine (subtitle D, *infra*), and those which, while not accepting that doctrine, hold conductors to be departmental vice principals (subtitle F, *infra*). It would seem that the Supreme Court of

the United States is no longer to be reckoned in the latter category. See § 535, note 1, subd. (b), *infra*.

Cosgrave v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175 (breach of rules in starting train before scheduled time); *McCosker* v. *Long Island R. Co.* (1881) 84 N. Y. 77 (signaled to engineer to back train while brakeman was in a dangerous position); *Thayer* v. *St. Louis, A. & T. H. R. Co.* (1864) 22 Ind. 26, 85 Am. Dec. 409 (brakeman fell into an open culvert, while obeying an order of the conductor to detach a car, and sought to recover on the ground that the conductor was negligent in not slackening the speed of the train after the order was given); *Louisville, N. A. & C. R. Co.* v. *Southwick* (1896) 16 Ind. App. 486, 44 N. E. 263 (conductor was helping a brakeman to unload a car); *Georgia P. R. Co.* v. *Davis* (1890) 92 Ala. 300, 9 So. 252 (orders given in the management of the train); *Dow* v. *Kansas P. R. Co.* (1871) 8 Kan. 642 (decided on demurrer); *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220 (backing cars in such manner as to crush car repairer); *Jarman* v. *Chicago & G. T. R. Co.* (1893) 98 Mich. 135, 57 N. W. 32 (did not reject an improperly loaded car from his train); *La Pierre* v. *Chicago & G. T. R. Co.* (1894) 99 Mich. 212, 58 N. W. 60 (not placing car on siding while being unloaded, and ordering excessively heavy packages to be carried across the plank that was needed to reach the platform. See, however, summary of Michigan decisions in subtitle II, *infra*); *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528 (assurance that defective rope was safe), recently followed, after a long series of antagonistic rulings (see subtitle D, *infra*, and chapter XXX., *post*), in *Grattise* v. *Kansas City, P. & G. R. Co.* (1899) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108 (signal to go ahead—held error to instruct a jury on the theory that a conductor was, as matter of law, a vice principal); *Criswell* v. *Montana C. R. Co.* (1896) 18 Mont. 167, 33 L. R. A. 554, 44 Pac. 525, Reversing (1895) 17 Mont. 189, 42 Pac. 767, on the ground that the territorial statute under which the earlier ruling had been made had been abrogated by a self-executing provision of the state Constitution; *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574 (1858) 17 N. Y. 153 (train was run at dangerous speed); *Woodlen* v. *Western N. Y. & P. R. Co.* (1895) 147 N. Y. 508, 42 N. E. 199, Reversing (1891) 43 N. Y. S. R. 218, 16 N. Y. Supp. 840 (1892) 46 N. Y. S. R. 77, 18 N. Y. Supp. 768 (exercise of discretion in not applying for more brakemen or to have some of the cars set off before descending a steep grade); *Robinson* v. *Houston & T. C. R. Co.* (1877) 46 Tex. 540 (order to get on moving train. See, however, summary of Texas decisions, subtitle H, *infra*); *Norfolk & W. R. Co.* v. *Hawkins* (1897) 95 Va. 398, *sub nom. Norfolk & W. R. Co.* v. *Swaine*, 46 L. R. A. 359, 28 S. E. 578 (directing trains onto track on which a train from the opposite direction is due), overruling earlier cases in this state (see § 524, note 2, subd. (c), *infra*, and chapter XXX., *post*); *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258 (signaled to engineer to back a train before the plaintiff, a brakeman, was ready to make a coupling), overruling earlier decisions in this state. See § 524, note 2, subd. (c), *infra*, and chapter XXX., *post*; *Heine* v. *Chicago & N. W. R. Co.* (1883) 58 Wis. 525, 17 N. W. 420 (laborer was injured by the train's being started without warning).

The conductor of a construction train was held to be a mere servant. *Cassidy* v. *Maine C. R. Co.* (1884) 76 Me. 488 (laborer ordered to jump from moving train). The same ruling has also been made as to the fireman of a gravel train (*O'Connell* v. *Baltimore & O. R. Co.* [1863] 20 Md. 212, 83 Am. Dec. 549); the foreman of a material train (*St. Louis, I. M. & S. R. Co.* v. *Shackelford* [1883] 42 Ark. 417 [train set in motion without warning while laborer was shifting rails from one car to another]); and the foreman of a train crew unloading and leveling dirt on a railway (*Schroeder* v. *Flint & P. M. R. Co.* [1894] 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663 [failed to give notice that a train was about to move]).

The engineer of an engine not drawing a train, who has no subordinate except a fireman, is a mere servant. *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837 (disobeyed instructions as to running of engine). Even though the engineer in such case may be called a conductor, and has full charge of the engine. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914 (running engine without orders—see further, as to this case, under § 535, note 1, subd. (b), *infra*).

Contrast the cases cited in the general list in subtitle D, *infra*, as to the status an engineer obtains by the "superior servant" doctrine under the same circumstances.

In *Hayes* v. *Western R. Corp.* (1849) 3 Cush. 270, the court declined to discuss the question whether a conductor was a vice principal, but held that, at all events, the company was not liable for the negligence of a brakeman acting as a conductor on a section of a train temporarily divided. The negligence alleged was that the brakeman neither went on the rear car himself, nor stationed another brakeman there, the result being that the train parted on a grade and the rear section ran into the forward one.

As to the status of conductors in South Carolina, see § 535, note 1, subd. (b), *infra*, and chapter XXX., *post*.

Under ordinary circumstances an engineer is a coservant of his fireman, though the latter is under his control. *Brigal* v. *Southern P. Co.* (1900) 39 C. C. A. 359, 98 Fed. 958.

(c) *Supervising employees in railway yards.*—A general yard master in full control of a yard. *Cincinnati, N. O. & T. P. R. Co.* v. *Gray* (1900) 50 L. R. A. 47, 41 C. C. A. 535, 101 Fed. 623. Affirming *Thomas* v. *Cincinnati, N. O. & T. P. R. Co.* (1899) 97 Fed. 215 (while handling an engine in the absence of the engineer, the yard master backed a train rapidly against a switch, which, being closed, derailed the car on which the plaintiff, a yard foreman, was, and dashed it against another car on an adjacent track); *McMahon* v. *Henning* (1880) 1 McCrary, 516, 3 Fed. 353 (ran cars together at excessive speed, injuring coupler). An employee commonly acting for a yard master. *Kirk* v. *Atlanta & C. Air-Line R. Co.* (1886) 94 N. C. 625, 55 Am. Rep. 621 (gave a signal which caused an engineer to drive his train against the car which plaintiff was repairing—functions said to be merely attending to details). See, however, the summary of North Carolina decisions, chapter XXX., *post*.

A foreman subject to the orders of a yard master. *Fraker* v. *St. Paul, M. & M. R. Co.* (1884) 32 Minn. 54, 19 N. W. 349 (directions as to the manner of removing a damaged car).

The foreman of a drill crew in a railroad yard, who is "a component part of the crew and active coworker in the manual work of switching, with the specific duty assigned to him by the yard master of turning the switches." *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269 (moving detached cars without anyone on them to set the brakes).

A foreman of a switching crew. *Flanagan* v. *Chicago & N. W. R. Co.* (1880) 50 Wis. 462, 7 N. W. 337 (ordered plaintiff to mount a car with a defective jaw strap; verdict for him set aside, as there was no evidence that foreman was charged with the duty of inspecting the cars, or knew of the defect).

The foreman of one of several switching crews working under the general control of a yard master. *Harley* v. *Louisville & N. R. Co.* (1893) 57 Fed. 141 (signaled at improper time for the movement of a car).

A yard foreman. *Hunt* v. *Hurd* (1900) 39 C. C. A. 226, 98 Fed. 683 (failed to station brakeman on backing car to give notice of their approach to employees on the track).

(d) *Foremen of wrecking gangs on railways.*—A wreck master. *McGrath* v. *Texas & P. R. Co.* (1894) 9 C. C. A. 153, 23 U. S. App. 86, 60 Fed. 555 (wrecking car improperly placed, and no ropes used to keep the derrick in position).

The acting foreman of a wrecking car. *Flippin* v. *Kimball* (1898) 31 C. C. A. 282, 59 U. S. App. 1, 87 Fed. 258 (excessive strain on rope attached to a derrick broke it).

These two Federal decisions may probably be regarded as superseding one to the contrary effect. *Burgman* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 667. See § 535, note 1, subd. (e), *infra*. But, on the facts, it is just possible that, in the earlier case, the delinquent really occupied a position sufficiently high to make him a departmental vice principal.

The superintendent of removal of wrecks, taking his orders from the employee in charge of shops and yards. *Rollins* v. *New York, L. E. & W. R. Co.* (1883) 29 Hun, 556 (clasp holding derrick car to trestle while a wrecked car was being hoisted was ordered to be struck loose, the result being that the derrick car was pulled off the trestle).

(e) *Employees supervising track work on railways.*—An "inspector" apparently a roadmaster—and a railway laborer. *Macfarlane* v. *Caledonian R. Co.* (1867) 6 Sc. Sess. Cas. 3d Series, 102 (servant sent to watch a bridge, without being informed at what time

trains were to be expected was run over).

A roadmaster. *Lawler* v. *Androscoggin R. Co.* (1873) 62 Me. 463, 16 Am. Rep. 492 (declaration demurrable which alleges an order to work under a dangerous overhanging bank); *Brown* v. *Winona & St. P. R. Co.* 1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484; *O'Niel* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086 (bolt which had been left in the timber of a bridge which was being taken down struck the plaintiff); *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 14 L. ed. 1051, 17 Sup. Ct. Rep. 603, Affirming (1893) 7 N. M. 158, 34 Pac. 536 (train run so as to cause collision with hand car). In the first of these cases a mere divisional road master is apparently meant. In the second and third that was certainly his capacity. They were, therefore, not of that grade of road masters which, perhaps, constitutes an employee a head of a department (see § 535, note 1, subd. (c), *infra*).

An employee having the supervision of one half of a road, and, at the time of the accident, in charge of a repair train. *Mobile & M. R. Co.* v. *Smith* (1877) 59 Ala. 245 (negligent operation of a train).

A foreman of a section gang. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603, Affirming (1893) 7 N. M. 158, 34 Pac. 536 (hand car run so as to collide with train); *Northern P. R. Co.* v. *Charless* (1896) 162 U. S. 359, 40 L. ed. 999, 16 Sup. Ct. Rep. 848 (ran hand car without taking precautions to escape collision with trains); *Dowers* v. *Spencer* (1895) 17 C. C. A. 215, 25 U. S. App. 411, 70 Fed. 480 (jumped on a jack which was holding up the track and caused the rail to fall on plaintiff's foot); *Kansas & A. Valley R. Co.* v. *Waters* (1895) 16 C. C. A. 609, 36 U. S. App. 31, 70 Fed. 28 (failed to guard against collision of hand car with trains); *Wright* v. *Southern R. Co.* (1897) 80 Fed. 260 (tried to save hand car from collision with train); *Lochbaum* v. *Oregon R. & Nav. Co.* (1900) 44 C. C. A. 220, 104 Fed. 852 (failed to scrape the loose rocks off the side of a cut where work was being done); *Davis* v. *Southern P. Co.* (1893) 98 Cal. 19, 32 Pac. 708 (switch negligently left open); *Justice* v. *Pennsylvania Co.* (1891) 130 Ind. 321, 30 N. E. 303 (foreman allowed car to run at dangerous speed, the result being that the plaintiff lost his hold of the lever, and was struck by it); *Hoben* v. *Burlington & M. River R. Co.* (1866) 20 Iowa, 562 (hand car collided with train); *Clifford* v. *Old Colony R. Co.* (1886) 141 Mass. 564, 6 N. E. 751 (*carucada*); *Hammond* v. *Chicago & G. T. R. Co.* (1890) 83 Mich. 334, 17 N. W. 935 (failure to send ahead a lookout, when hand car is near a curve); *Timm* v. *Michigan C. R. Co.* (1893) 98 Mich. 226, 57 N. W. 116 (assumed); *Gaeigan* v. *Lake Shore & M. S. R. Co.* (1896) 110 Mich. 71, 67 N. W. 1097 (struck by a car pushed by his colaborers, while he was obeying an order to climb a stationary car to set brakes);

Olson v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866 (no precautions to protect hand car against trains); *Lagrone* v. *Mobile & O. R. Co.* (1890) 67 Miss. 592, 7 So. 432 (injury received while holding a fish-bar for foreman to straighten); *Hastings* v. *Montana Union R. Co.* (1896) 18 Mont. 493, 46 Pac. 264 (laborer not warned of approach of a train); *Couch* v. *Charlotte, C. & A. R. Co.* (1884) 22 S. C. 557 (at all events as to orders relating to ordinary duties; but no negligence was, as matter of fact, established; see further, as to this case, § 519, *post*); *Hanley* v. *Grand Trunk R. Co.* (1882) 62 N. H. 274 (method of loading rails); *Brunell* v. *Southern P. Co.* (1899) 34 Or. 256, 56 Pac. 129 (failure to place a signal flag to warn approaching trains and hand cars that men were on the track); *Spancake* v. *Philadelphia & R. R. Co.* (1892) 148 Pa. 184, 23 Atl. 1006 (no warning as to approach of train was given).

The boss of a small gang of ten or fifteen men engaged in aiding the regular gang upon each section, as occasion requires. *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843 (sudden application of brakes caused collision with following hand car); *Goodsell* v. *Montana C. R. Co.* (1896) 18 Mont. 293, 45 Pac. 210 (negligence in allowing a rail to fall on plaintiff's foot—injury caused by order to coldorers).

Whether, in the cases where the negligent orders relate to the use of appliances known to be defective, a foreman of a gang working on a railway track is a vice principal, is a question which essentially involves the inquiry whether he represents the employer in respect to the duty of furnishing appliances. It

is held that, under the normal arrangements of railway companies, he is not an agent of the employee for the purpose, the agency being vested in his superior officers. *Kinney* v. *Corbin* (1890) 132 Pa. 341, 19 Atl. 141 (laborer injured by the breaking of a chain which the foreman of the gang required him to use, when he knew it was defective); *Barringer* v. *Delaware & H. Canal Co.* (1879) 19 Hun, 216 (foreman failed to report defective hand car for repairs). The second of these being a typical case, it will be worth while to give the facts *in extenso*. The section "boss" had charge of about five miles of track, and was foreman of the men employed to keep such track in repair, working with them. He had charge of and was responsible for the tools and machinery used. He hired his men, or some of them. If he required machinery or tools, he applied to the track master therefor. If machinery gave out, or was defective, he was ordered to take it to the shop and have it repaired. Over him, and in a superior position, was the track master, who superintended the track, who employed the foreman of the section and other proper men, and furnished the tools and machinery necessary. To such track master or his assistant all reports were made. If repairs were necessary, or tools needed, notice was to be given by the section foreman to the track master, who supplied the tools or directed as to the repairs. The foreman was subject to the track master and bound by his orders. The court said: "Under such a state of facts, we think that the learned judge erred in holding that Brown represented the defendant and stood in its place. Brown was an employee just as plaintiff was. They were in the same circle of employment; they worked together for a common purpose. Each knew his relations to the other when the employment began, and each took the risks attending the same. The negligence of either was one of those risks. That Brown was foreman, and directed the action or hired the others, does not change the rule. Perhaps the track master did represent the defendant. We are not called upon to decide that. Possibly no one below the superintendent stood in the place of the defendant in respect to the matter in dispute. It is enough that two officers of a superior grade stood between Brown and the defendant, either of whom presumptively could have hired or discharged Brown at will. So Brown's position was that of an employee, and not a representative of the company."

(f) *Employees supervising various kinds of construction work.*—The chief engineer of a road. *McDermott* v. *Pacific R. Co.* (1860) 30 Mo. 115 (bridge collapsed). This case is no longer law in Missouri. See subtitle D, *infra*, and chapter XXX., *post*.

A division superintendent of depots and bridges. *Neubauer* v. *New York, L. E. & W. R. Co.* (1885) 101 N. Y. 607, 4 N. E. 125 (bridge carpenter injured).

An official called a "superintendent" under the general manager of a road (apparently a supervisor of structures). *Carney* v. *Curaquet R. Co.* (1890) 29 N. B. 425 (ordered engineer to cross a bridge while in a dangerous condition owing to a flood).

A superintendent of railway bridges. *Warner* v. *Erie R. Co.* (1868) 39 N. Y. 468, Reversing (1867) 49 Barb. 558 (bridge collapsed). This case is, in some degree, inconsistent with later New York cases. See § 530, *infra*, and chapter XXX., *post*.

An employee superintending the construction of a bridge, with gang foreman under him. *State, use of Hamelin* v. *Malster* (1881) 57 Md. 287 (plank used that was too short to afford a secure foothold).

The foreman in charge of the work of constructing an arch of a railway bridge. *Hofnagle* v. *New York C. & H. R. R. Co.* (1874) 55 N. Y. 608 (ordered centers to be taken out too soon, thus causing arch to fall).

A foreman of masons working on a railway bridge. *Weger* v. *Pennsylvania R. Co.* (1867) 55 Pa. 460 (train ran down the hand car on which the foreman and his gang were returning from work).

A foreman of a gang engaged in placing a bridge pier in position. *Ulrich* v. *New York C. & H. R. R. Co.* (1898) 25 App. Div. 465, 51 N. Y. Supp. 5 (selection of improper appliance and improper method of work).

A temporary boss of a bridge gang who is himself a laborer. *Texas & P. R. Co.* v. *Rogers* (1893) 6 C. C. A. 403, 13 U. S. App. 547, 57 Fed. 378 (ordered the hoisting of heavy timber with an inadequate force of workmen).

A division foreman of bridges on a railway, who labors with his subordinates. *Yager* v. *Atlantic, M. & O. R. Co.* (1882) 4 Hughes, 192 (bridge got out of the perpendicular and fell, owing to insufficient propping).

A foreman on the construction of a bridge, with two superiors over him. *Kelly* v. *Jutte & F. Co.* (1899) 98 Fed. 380 (negligent management of derrick; failure to inspect it for proper adjustment).

One of several foremen of bridge carpenters. *Lee* v. *Detroit Bridge & Iron Works* (1876) 62 Mo. 565 (unskilful adjustment of frame which was about to be lowered into a caisson caused it to tip up and throw plaintiff's intestate into the water). (This decision is not law under recent Missouri decisions; see subtitle D, *infra*); *Ludlow* v. *Groton Bridge & Mfg. Co.* (1896) 11 App. Div. 452, 42 N. Y. Supp. 343 (1895) 71 N. Y. S. R. 510, 36 N. Y. Supp. 452 (1896) 16 Misc. 222, 37 N. Y. Supp. 595 (failed to secure properly a heavy piece of iron which was being carried on a truck).

A foreman supervising the building of a boat (distinguished from an agent in full control). *Olsen* v. *Nixon* (1898) 61 N. J. L. 671, 40 Atl. 694 (scaffold gave way).

The superintendent of repairs to a ship. *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556 (direction to remove hatches).

A foreman of a pile-driving gang. *Ell* v. *Northern P. T. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222 (pile not being blocked was shoved against the plaintiff); *Drew* v. *East Whitby Twp.* (1881) 46 U. C. Q. B. 107 (hammer of pile-driver fell on laborer through neglect of foreman to see that it was blocked properly).

The superintendent of the construction of a trestle. *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017 (timber for cap negligently selected).

The foreman of carpenters under a corporation. *Dorcy* v. *Parke, D. & Co.* (1889) 76 Mich. 631, 43 N. W. 644 (temporary and movable platform, for use in taking down partitions, was so defectively constructed that a carpenter was injured).

A timber boss superintending repairs to a stairway beside the track on which lifting cars used in mining run. *Jenkins* v. *Mahopac Iron Ore Co.* (1890) 32 N. Y. S. R. 866, 10 N. Y. Supp. 484 (plaintiff ordered to do work which required him to stand on a track along which a car might at any moment come—foreman omitted to notify signal man not to start the cars).

A foreman of a gang of carpenters working on a building. *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573 (supports of mash tub were inadequate); *Jenkins* v. *Mahopac Iron Ore Co.* (1890) 32 N. Y. S. R. 866, 10 N. Y. Supp. 484 (foreman failed to warn laborer of the approach of a car running on the incline where he was repairing a track).

The foreman overseeing the construction of a building. *Summersell* v. *Fish* (1875) 117 Mass. 312 (derrick fell while being hoisted under superintendence of foreman, and injured a carpenter); *Duffy* v. *Upton* (1873) 113 Mass. 544 (careless operation of derrick in hoisting timber injured a mason).

A clerk of the works appointed by a company to superintend the construction of a building by an independent contractor. *Brown* v. *Accrington Cotton Spinning & Mfg. Co.* (1865) 3 Hurlst. & C. 511, 34 L. J. Exch. N. S. 208, 13 L. T. N. S. 94 (as to this case, see further §§ 531, *infra*, and 567 (a), *post*).

A foreman of workmen constructing a building. *Kiffin* v. *Wendt* (1899) 39 App. Div. 229, 57 N. Y. Supp. 109 (order to use a temporary contrivance).

A gang boss employed by a contractor engaged in the construction of a building and supervising the work himself. *Cates* v. *Huer* (1898) 104 Ga. 679, 30 S. E. 884.

An assistant foreman of a contractor for structural ironwork. *McGinley* v. *Lovering* (1893) 152 Pa. 366, 25 Atl. 824 (fellow servant of plaintiff was ordered to use a defective tool).

A general foreman of a contractor, who has charge of the work of putting in the foundation for a wharf and has full power to employ and discharge all the workmen. *McDonald* v. *Buckley* (1901) 48 C. C. A. 372, 109 Fed. 290.

One who has charge of a number of men for the construction of a particular piece of work, with authority to direct them therein. *Hughes* v. *Leonard* (1901) 199 Pa. 123, 48 Atl. 862 (ordered plaintiff into a place where he was exposed to danger if a rope belonging to another employee, who was jointly engaged in a certain piece of work, should happen to break).

A carpenter employed by the day by a contractor, and left by the latter in control of the construction of a house while he himself was absent. *Bean* v. *Null* (1884) 65 Iowa, 407, 21 N. W. 700 (defective scaffold).

A foreman subordinate to a master carpenter. *Peschel* v. *Chicago, M. & St. P. R. Co.* (1885) 62 Wis. 338, 21 N. W. 269.

The foreman of a squad receiving timbers on a scaffold, after they were hoist-

ed by a derrick, to be used in a house under construction. *Gunn* v. *Willingham* (1900) 111 Ga. 427, 36 S. E. 804 (derrick fell, being inadequately secured).

A workman engaged in constructing a dye-house, together with two or three other workmen, and having the direction of the work. *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga. 761 (1882) 68 Ga. 839 (timber fell while being hoisted by a derrick managed by the employee directing the work).

The foreman of a crew engaged in repairing a dam. *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143 (plank under a great strain was suddenly released, and swung against the plaintiff).

The foreman of masons employed on a building. *Jenkinson* v. *Carlin* (1894) 10 Misc. 22, 30 N. Y. Supp. 530 (derrick had no check rope and fell).

A mason working with a "tender" under his orders. *Kennedy* v. *Spring* (1893) 160 Mass. 203, 35 N. E. 779 (defective staging).

The foreman of bricklayers on a building. *White* v. *Eidlitz* (1897) 19 App. Div. 256, 46 N. Y. Supp. 184 (unauthorized order to use a defective elevator).

Whether a foreman in charge of a gang of masons engaged in the construction of a subway is a vice principal was left undecided in *Ricks* v. *Flynn* (1900) 196 Pa. 263, 46 Atl. 360.

A foreman in charge of the erection of a scaffolding. *Moore* v. *McNeil* (1898) 35 App. Div. 323, 54 N. Y. Supp. 956 (selection of materials).

A foreman supervising workmen putting in an elevator. *Andre* v. *Winslow Bros. Elevator Co.* (1898) 117 Mich. 560, 76 N. W. 86 (failed to take proper precautions with respect to the operation of the elevator, so as to prevent the workmen from being struck by the cage); *Whallon* v. *Sprague Electric Elevator Co.* (1896) 1 App. Div. 264, 37 N. Y. Supp. 174 (subordinate injured while obeying an order to take measurements on one of the upper floors).

The foreman overseeing the construction of a large iron gasholder. *McLaughlin* v. *Camden Iron Works* (1897) 60 N. J. L. 557, 38 Atl. 677 (failure to use proper appliances provided by the master for raising a heavy frame).

One in charge of a gang of men erecting poles and a telegraph line along a railroad. *Johnson* v. *Western N. Y. & P. R. Co.* (1901) 49 Atl. 794, 200 Pa. 314.

The "district manager" of a telephone company, in charge of a crew stringing wires. *Knutter* v. [illegible] *York & N. J. Teleph. Co.* (1902) 6[illegible] L. 646, 58 L. R. A. 808, 52 Atl.

A foreman of construction. *Frawley* v. *Sheldon* (1897) 20 R. I. 258, 38 Atl 370 (implement dropped).

Any workman supervising blasting operations. *Marshall* v. *Schricker* (1876) 63 Mo. 308 (plaintiff's horse killed by a large stone, while standing at a place to which the foreman had directed plaintiff to remove his team —foreman was said to be "as much engaged in the same general service, when blasting, as he would have been in detaching the material to be removed with a pick or shovel;" but it is questionable whether this case is law any longer in Missouri. See subtitle D, *infra*, and chapter XXX., *post*); *Perry* v. *Rogers* (1898) 157 N. Y. 251, 51 N. E. 1024, Reversing (1895) 91 Hun, 213, 36 N. Y. Supp. 208 (failure to notify workmen to pry off an overhanging fragment of rock, left after a blast); *Vitto* v. *Keegan* (1897) 15 App. Div. 329, 44 N. Y. Supp. 1 (order to remove unexploded blast, without warning of presence of dynamite in the hole); *Capasso* v. *Woodfolk* (1900) 163 N. Y. 472, 57 N. E. 760, Reversing (1898) 25 App. Div. 234, 49 N. Y. Supp. 409 (large piece of rock left in such a position that it fell). See also *Kenney* v. *Shaw* (1882) 133 Mass. 501, cited in subd. (h), *infra*.

A foreman controlling a gang in one of the tunnels of a cement company. *Ross* v. *Union Cement & Lime Co.* (1900) 25 Ind. App. 463, 58 N. E. 500 (removed a portion of the loose stones which had been thrown out by a blast, and so caused a large rock which they supported to fall on the plaintiff).

A foreman of a gang of laborers engaged in blasting upon a railroad track, whose duty it is to prepare, care for, distribute, and direct the explosion of the dynamite used. *Sullivan* v. *New York, N. H. & H. R. Co.* (1892) 62 Conn. 209, 25 Atl. 711 (improper management of use,—trial judge, on a hearing in damages after a default, sustained contention of defendant's counsel that the foreman and the laborers were fellow servants, and awarded merely nominal damages).

A foreman of blasting operations forming part of the general work of constructing a canal. *Wanzer* v. *Barrett Constr. Co.* (1895) 87 Hun, 519, 34 N.

Y. Supp. 273 (failure to search holes for unexploded charges).

The foreman of work at one of the shafts of the tunnel driven for the Croton aqueduct. *Riley* v. *O'Brien* (1889) 53 Hun, 147, 6 N. Y. Supp. 129 (failure to secure a pile of brick, to the shaky condition of which his attention was called).

A foreman of a gang of men employed in grading a railroad. *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020 (injury caused by the fall of a trestle constructed to carry the earth excavated from a cutting, to an adjoining embankment). See also, as to this case, § 498, note I, subd. (j), *ante*. The action being dismissed by the trial court in accordance with the judgment of the supreme court, another suit was subsequently brought in a Federal court, which ruled that this dismissal, not being a judgment on the merits, was no bar, and the plaintiff was finally declared by the court of appeals to be entitled to recover on the ground that the foreman was a vice principal. See chapter XXX., *post*.

A civil engineer superintending the construction of a railway for nonresident contractors, he himself being under the control of such contractors. *McBride* v. *Brogden* (1876) 3 New Zealand, C. A. 271 (laborer injured by the derailment of a ballast car which was being pushed in front of the engine,—a method of transportation authorized by the superintendent).

An assistant engineer superintending grading work. *Carmichael* v. *Eastern R. Co.* (1892) 50 Minn. 23, 52 N. W. 224 (dangerous method of withdrawing unexploded charge).

The overseer of a gang of laborers engaged in making an excavation. *Wilson* v. *Merry* (1868) L. R. 1 Sc. App. Cas. 326, 19 L. T. N. S. 30 (per Lord Cranworth; *arguendo*, p. 334, L. T. N. S. p. 34). *Daby* v. *Brown* (1899) 45 App. Div. 428, 60 N. Y. Supp. 840 (concealed,—injury was caused by dangerous method of getting an engine back into place); *Larich* v. *Mains* (1894) 18 R. I. 513, 28 Atl. 631 (negligent order); *Chicago & T. R. Co.* v. *Simmons* (1882) 11 Ill. App. 147 (injury caused by obeying order to work at a particular point,—but *quære*, as to this case, under later Illinois decisions. See subtitle D, *infra*).

The foreman of a gang of laborers employed by a contractor for the excavation of a tunnel. *Anderson* v. *Winston* (1887) 31 Fed. 528 (injury caused by earthslide, danger of which was seen by foreman).

A foreman of a job of excavating work, whose duty it is merely to report want of proper appliances to a vice principal. *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102 (failure to inform superintendent of a circumstance creating danger).

A foreman in charge of men constructing a sewer, with authority to hire and discharge them, under the supervision of a superintendent of sewer construction, who is himself subject to the instructions of the city engineer, as general superintendent of all public works. *Minneapolis* v. *Linden* (1893) 7 U. C. A. 311, 19 C. C. A. App. 245, 58 Fed. 525 (sewer caved in, owing to inadequate shoring of sides).

A person superintending the digging of a trench or sewer. *Flynn* v. *Salem* (1883) 134 Mass. 351 (sewer caved in,—demurrer to complaint upheld); *Conley* v. *Portland* (1886) 78 Me. 217, 3 Atl. 658 (sides of sewer caved in); *O'Connor* v. *Roberts* (1876) 120 Mass. 227 (same facts); *Dube* v. *Lewiston* (1891) 83 Me. 211, 22 Atl. 112 (same facts,—master held not liable for failure of foreman to use materials furnished for shoring sewers); *Schott* v. *Onondaga County Sav. Bank* (1900) 49 App. Div. 503, 63 N. Y. Supp. 631 (assurance that place of work would be kept secure against transitory danger,—in this case the injury was caused by the act of a fellow laborer); *Zeigler* v. *Day* (1877) 123 Mass. 152 (similar accident, owing to want of proper planking,—here the superintendent's compensation was a certain proportion of the profits); *Coltons* v. *Crimmins* (1895) 11 Misc. 24, 31 N. Y. Supp. 859 (similar accident).

A foreman in a waterworks company, having exclusive charge of caulking and laying pipes, in the absence of the general superintendent. *Johnson* v. *Ashland Water Co.* (1890) 77 Wis. 51, 45 N. W. 807 (pipe rolled off blocks while plaintiff was assisting the foreman).

The foreman of a gang employed in the construction of a line of telegraph. *Postal Teleg. Cable Co.* v. *Hulsey* (1896) 115 Ala. 193, 22 So. 854 (negligent directions as to manner of performing work).

A superintendent of the work of removing a telephone pole. *Morgridge* v. *Providence Teleph. Co.* (1898) 20 R. I. 386, 39 Atl. 528 (premature order to workmen to let go their hold on the pole).

No employee having the direction of the actual work of removing a telephone and telegraph line, with authority to hire, pay, and discharge employees. *American Teleph. & Teleg. Co.* v. *Bonser* (1898) 20 Ind. App. 32, 49 N. E. 182 (climbed pole and loosened wires after the soil had been removed from around the bottom of the pole).

A foreman of a street railway company. *Dixon* v. *Winnipeg Electric Street R. Co.* (1897) 11 Manitoba L. R. 529 (allowed electric current to be turned on a wire which workmen were handling).

The foreman of a crew engaged in taking down a building. *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 137, 34 U. S. App. 759, 73 Fed. 970. Reversing on rehearing (1893) 6 C. C. A. 142, 18 U. S. App. 10, 56 Fed. 804, in consequence of the decision in the *Baugh Case* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914 (plaintiff was ordered to chop through a post, no sufficient precautions being taken to prevent the fall of the building while he was so engaged).

See also *Floyd* v. *Sugden* (1883) 134 Mass. 563, where a foreman in charge of the repairing of a mill property was held not to be a vice principal. See further § 530, *infra*.

(g) *Supervising employees in the mechanical departments of railways.*—The master mechanic of a railway company. *Shanck* v. *Northern C. R. Co.* (1866) 25 Md. 462 (defective engine—distinction between assignable and nonassignable duties not discussed); *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473 (defective engine—Overruled in *Davis* v. *Central Vermont R. Co.* [1882] 55 Vt. 84, 45 Am. Rep. 590); *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615 (defective engine. This case is no longer law in Indiana. See summary in § 549, *post*).

A machinist employed in repairing railroad engines, who occasionally calls in other employees of the railroad company to aid in work which he cannot do alone, is not the vice principal or superior of such employees. *Hathaway* v. *Illinois C. R. Co.* (1894) 92 Iowa, 337, 60 N. W. 651.

The foreman of locomotive shops. *Beaulieu* v. *Portland Co.* (1860) 48 Me. 291 (loose lumber fell on plaintiff).

The foreman at a roundhouse of a railroad. *Gonsior* v. *Minneapolis & St. L. R. Co.* (1887) 36 Minn. 385, 31 N. W. 515 (alleged negligence was in ordering servant to pull a car spring without any assistance, the evidence tending to show that two men were needed to do such work safely).

Contra.—Such a foreman was assumed to be a departmental vice principal in *Fordyce* v. *Briney* (1893) 58 Ark. 206, 24 S. W. 250.

One of several foremen in a railway machine shop. *Gaynon* v. *Darkee* (1898) 31 C. C. A. 300, 52 U. S. App. 587, 87 Fed. 302 (let steam into a boiler while a subordinate was inside it).

A gang boss in a railway shop, under a master mechanic. *McBride* v. *Union P. R. Co.* (1889) 3 Wyo. 247, 21 Pac. 687 (took a man away from work which could not be done safely without him).

A "boss wiper," who directs the engine wipers where to work and what to do. *Knox* v. *Southern R. Co.* (1898) 101 Tenn. 375, 47 S. W. 491 (negligent order as to moving of engine). As to this case, see §§ 521, note 8, *infra*, and 549, *post*.

An employee under whose directions an engine cleaner in a round house is to work until he has gained sufficient experience. *Spencer* v. *Ohio & M. R. Co.* (1892) 130 Ind. 181, 29 N. E. 915 (engine started while cleaner was under neath it).

A gang boss over forty or fifty men working in a railroad repair yard. *Keenan* v. *New York, L. E. & W. R. Co.* (1895) 145 N. Y. 190, 39 N. E. 711 (plaintiff was sent to take a spring from a car standing on a track other than that on which repairs were usually made, and was injured by other cars backing against the one from which he was taking the spring).

A foreman of car repairers. *Peterson* v. *Chicago & N. W. R. Co.* (1887) 67 Mich. 102, 34 N. W. 269 (failure of foreman to set signal flag to protect car repairers).

A foreman of car repairers, who cannot hire or discharge his men, and has no authority except to direct them about their work. *Foley* v. *Chicago, R. I. & P. R. Co.* (1884) 64 Iowa, 644, 21 N. W. 124 (here injury occurred while the foreman was assisting in manual labor—car not being blocked, moved forward and crushed plaintiff's foot).

(h) *Foreman supervising work in quarries.*—A foreman of a quarry. *Cullen* v. *Norton* (1891) 126 N. Y. 1, 26 N. E. 905 (workmen improperly placed); *Wiskie* v. *Montello Granite Co.* (1901) 111 Wis. 443, 87 N. W. 461 (improper preparation of blast).

The superintendent of blasting at a quarry. *Kenney* v. *Shaw* (1882) 133 Mass. 501 (workman injured by an explosion in consequence of his using iron drill in a hole in which the superintendent had previously placed some blasting powder, and had neglected to see that it had effectively exploded before giving the order to deepen the hole).

A member of a gang of men engaged in quarrying limestone and burning lime, who acts as foreman in the work of moving cars to the lime kilns, but at other times does the same work and receives the same pay as the rest of the gang. *Moore Lime Co.* v. *Richardson* (1897) 95 Va. 328, 28 S. E. 334 (failure to give notice of the approach of a car).

A foreman in a quarry, under the management of a superintendent. *Donovan* v. *Ferris* (1900) 128 Cal. 48, 60 Pac. 519 (failure to notify servant that a blast was about to be fired).

(i) *Employees supervising the loading of vehicles elsewhere than on railways.*—A foreman in charge of a derrick used to move stone on a truck. *Scott* v. *Sweeney* (1884) 34 Hun, 292 (injury caused by the fall of the boom, which was being lowered by the order of the foreman).

A foreman overseeing the loading of an elevator. *Dorenfeld* v. *Baumann* (1899) 40 App. Div. 502, 58 N. Y. Supp. 110 (negligence alleged was overloading).

(j) *Foremen of gangs loading or unloading ships.*—A gang foreman under direction of the chief stevedore. *Kenny* v. *Cunard S. S. Co.* (1885) 20 Jones & S. 434, S. C. (1888) 24 Jones & S. 558 (boards imperfectly secured in a sling fell out).

An under foreman controlling a gang of laborers loading a ship. *The Louisiana* (1896) 21 C. C. A. 60, 41 U. S. App. 324, 74 Fed. 748 (unprotected hatchway).

The foreman of a gang engaged in loading a ship. *McDonald* v. *Hazletine* (1878) 53 Cal. 35 (accident in this case not due to negligence of foreman, but of colaborer).

The foreman of a steamship company, under whom longshoremen are employed in loading a vessel. *Tully* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29 (order to work in a certain place).

A foreman of stevedores. *The Kensington* (1898) 91 Fed. 681 (handled the load himself).

A master stevedore's foreman. *The Wm. F. Babcock* (1887) 31 Fed. 418 (hatch left open); *O'Connor* v. *Hall* (1901) 52 App. Div. 428, 65 N. Y. Supp. 136 (barrel insecurely fastened fell while it was being hoisted).

A foreman of a gang engaged in unloading a ship. *Dolan* v. *Boston & L. S. Co.* (1888) 147 Mass. 101, 16 N. E. 690 (negligence in selection of rope from a stock furnished).

It is error to rule, as a matter of law, that a head stevedore is a fellow servant of one of his subordinates, where there is evidence to the effect that he was in full control of the work, and invested with the duty of furnishing the appliances used. *Hallan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2, Reversing (1872) 9 Phila. 16. See, further, as to the case under subtitle E, *infra*.

(k) *Supervising employees in smelting works.* A foreman supervising the silver-room department of smelting works. *Vaca* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803 (extemporised a hose to conduct a hot acid—plaintiff, not knowing it to be defective, was injured).

(l) *Employee supervising farms.*—A foreman of a farm. *Vogel* v. *Wood* (1894) 102 Cal. 389, 36 Pac. 766 (presumably not in full control. See California decisions cited under § 17, *post*,—accident was due to a defective scaffold).

(m) *Employees in factories and other places where machinery is used* (see also subd. (g), *supra*).—A yard master supervising the outdoor work of a manufacturing company. *Woody* v. *Hamilton Mfg. Co.* (1893) 159 Mass. 70, 34 N. E. 185 (plaintiff injured in obeying order to handle a carboy of sulphuric acid, which proved to be broken).

A millwright in the employ of a manufacturing company, as regards a carpenter hired by him to assist in a special job. *National Tube Works Co.* v. *Bedell* (1880) 96 Pa. 175 (selection of appliances, but evidence here showed that those furnished had no flaw that could have been discovered by a reasonable inspection).

The superintendent and manager in charge of the machinery in a factory. *Boyce* v. *Fitzpatrick* (1881) 80 Ind. 526 (operative injured by recklessness of superintendent in passing straw to a flax-brake).

A workman employed in the packer-room of a factory with two other persons, and having the direction of the

work therein as foreman. *McGovern* v. *Columbus Mfg. Co.* (1888) 80 Ga. 227, 5 S. E. 492 (machine negligently started by foreman while it was being cleaned).

The foreman in charge of a room in a factory. *Findlay* v. *Russel Wheel & Foundry Co.* (1896) 108 Mich. 236, 66 N. W. 50 (set a drum in motion in the wrong direction while helping to place a car on its trucks).

A gang foreman in a factory. *Casey* v. *Pennsylvania Asphalt Paving Co.* (1900) 198 Pa. 348, 47 Atl. 1128 (plaintiff ordered into dangerous position).

The foreman in charge of a crew operating the grinders in a mill. *Cocan* v. *Umbagog Pulp Co.* (1897) 91 Me. 26, 39 Atl. 340 (alteration made in machinery rendered it dangerous—water pipe which supplied pressure was plugged).

A foreman in a woolen mill, sometimes called a "boss machinist" and sometimes "master mechanic," who had charge of the repairs of the machinery, but neither made any important alterations in it nor hired or discharged the gang under his control without consulting the general superintendent. *Stevens* v. *Chamberlin* (1900) 51 L. R. A. 513, 40 C. C. A. 421, 100 Fed. 378 (did not block up a heavy plate properly, and it fell on a subordinate).

One of several foremen in a sawmill, having authority, under the direction of the general manager, to employ and discharge workmen, and having general supervision of the mill, performing more or less manual labor therein. *Logan* v. *Hall* (1901) 128 Mich. 523, 87 N. W. 619 (load of logs run against workman while he was working with his back to the rollway).

The boss of a gang of reamers in a bridge shop of iron works. *Duncan* v. *A. & P. Roberts Co.* (1900) 194 Pa. 563, 45 Atl. 330.

The foreman of a woodshop in a car factory (except so far as he may be discharging the duty of providing proper machinery). *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

A foreman of an oil company. *Mahoney* v. *Vacuum Oil Co.* (1894) 76 Hun, 579, 28 N. Y. Supp. 196 (selection of plank to serve as a temporary support).

An engineer in charge of the engine room and freezing department of an ice company. *Provost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88 (negligence in directing work to be done in an improper way).

An engineer of a steam roller used in repairing the streets of a city, as regards a flagman subject to his orders and liable to discharge by him. *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659 (roller started without warning).

An engineer. *Watts* v. *Beard* (1897) 18 App. Div. 243, 45 N. Y. Supp. 873 (fireman was injured, while adjusting a pump under the engineer's control).

The foreman of a lathe. *Faber* v. *Carlisle Mfg. Co.* (1889) 126 Pa. 387, 17 Atl. 621 (counter balance, being left insecured, flew off and struck an apprentice).

An operator of a machine. *Hamby* v. *Union Paper Mills Co.* (1900) 110 Ga. 1, 35 S. E. 297 (helper injured).

The leader or boss of a gang of hands, himself under the direction and control of a foreman, and doing such work as the latter directs to be done. *Richmond Locomotive & Mach. Works* v. *Ford* (1897) 94 Va. 627, 27 S. E. 509 (heavy wheel which was being moved fell on plaintiff).

A foreman of a gang lifting heavy machinery. *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655 (foreman failed to assist in sustaining some heavy machinery, and plaintiff was ruptured).

(n) *Supervising employees in mines, without reference to statutes.*—A "fire boss," whose duty is merely to direct the miners to leave dangerous places at which gas accumulates, but who has no control over the work. *Morgan* v. *Carbon Hill Coal Co.* (1893) 6 Wash. 577, 34 Pac. 152, 772 (here the accident, an explosion, did not even occur while the boss was engaged in his duty of imparting information).

An underground boss, except as to nonassignable duties. *Russell Creek Coal Co.* v. *Wells* (1898) 96 Va. 416, 31 S. E. 614 (a mere fellow servant as to keeping the drifts in safe condition as the work progresses).

One of several in a mine, having direction of the work of eight or ten men himself controlled by the pit boss, who is subject to the direction and control of the superintendent or general manager. *What Cheer Coal Co.* v. *Johnson* (1893) 6 C. C. A. 148, 12 U. S. App. 490, 56 Fed. 810 (struck the top of a room with a pick, and brought down a piece of rock on the plaintiff).

A gang foreman. *Alaska Treadwell Gold Min. Co.* v. *Whelan* (1897) 168 U. S. 86, 42 L. ed. 390, 18 Sup. Ct. Rep. 40

(gate of chute drawn without notice, the result being that the broken rock at its upper end ran through and injured a laborer).

A foreman of a mine (precise functions not stated). *St pleux* v. *Doe* (1887) 73 Cal. 26, 14 Pac. 378 (miner obeyed order to enter a chamber too soon after blast,—no recovery, though he had not experience to appreciate the danger).

An employee in a mine, whose regular duties were to take charge of the tools and keep the time of the men, and who, in the superintendent's absence, used to give occasional directions as to the work. *Wilson* v. *Dunreath Red Stone Quarry Co.* (1889) 77 Iowa, 429, 42 N. W. 360 (ordered to use appliances which proved to be defective, said appliances being constructed by the miners themselves).

The slate-picker boss in a coal mine. *McCool* v. *Lucas Coal Co.* (1892) 150 Pa. 638, 24 Atl. 350 (slate picker killed while complying with an order to perform a certain errand).

A top boss. *Hughes* v. *Oregon Improvement Co.* (1898) 20 Wash. 294, 55 Pac. 119 (ventilating fan stopped during fire).

A "bank boss." *Brazil & C. Coal Co.* v. *Cain* (1884) 98 Ind. 282 (complaint held demurrable which alleged that the plaintiff's intestate had been directed to undertake new duties, but failed to allege that the risks thereof were not understood by him).

A shift boss in a mine, who acts as foreman, and directs when and where blasts shall be put in and where the men shall work, and who is appealed to to settle claims arising as the work progresses. *Pehrja* v. *Aurora Iron Min. Co.* (1895) 106 Mich. 463, 32 L. R. A. 435, 64 N. W. 335. Affirmed on rehearing in 106 Mich. 469, 32 L. R. A. 438, 66 N. W. 951 (too large a space mined out before supports were put in).

A foreman supervising drilling in a mine, with authority to hire and discharge subordinates. *Gilmore* v. *Oxford Iron & Nail Co.* (1892) 55 N. J. L. 39, 25 Atl. 707 (loose fragment of ore fell on plaintiff).

An "underbooker." *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 43 Week. Rep. 411 (failure to see that roof of mine was propped safely).

A pit boss. *Desrosiers* v. *Cerrillos Coal R. Co.* (1898) 9 N. M. 495, 55 Pac. 290 (explosion occurred in a room into which workmen went with naked lights, either by the direction of the boss, or with him).

In *Somerville* v. *Gray* (1863) 1 Sc. Sess. Cas. 3d series, 768, it was held that the underground manager of a mine, invested more particularly with the duty of providing against danger from the roof of the pit, and having authority to hire and discharge men and to direct them where to work, was a representative of the mine owners in such a sense as to make them liable for his negligence in keeping a miner at work in a place where he knew there was such imminent danger of the fall of stones that he had actually promised the miner to have it propped after a few hours. To much the same effect, see *Hardie* v. *Oldie* (1858) 20 Sc. Sess. Cas. 2d series, 553.

But in *Wright* v. *Roxburgh* (1864) 2 Sc. Sess. Cas. 3d series, 748, it was held that an underground manager of a mine was a fellow servant of a workman killed by an explosion of fire damp in a seam at some distance from that in which the manager was carrying on certain operations, involving the temporary suspension of a system of ventilation which the evidence showed to be efficient and safe. *Somerville* v. *Gray* (1863) 1 Sc. Sess. Cas. 3d series, 768, was distinguished on the ground that the injury was caused directly by obedience to the orders of the defendant's foreman.

In *Wilson* v. *Stockton* (1866) 4 Sc. Sess. Cas. 3d series, 736, an underground manager was also held to be a mere servant, and this is now definitely settled to be the true doctrine so far as the United Kingdom is concerned. *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. See §§ 529, 532, *infra*.

(o) *Supervising employees in mines—appointed under statutes.* A foreman appointed under the Pennsylvania acts, which require the employment of a mining boss who shall keep a careful watch over the ventilating apparatus and all things connected with and appertaining to the safety of the men at work in the mine (statute passed March 3, 1870, amended April 28, 1877, and June 30, 1885), is a fellow servant of his subordinates. *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 432 (explosion caused by defective ventilation); *Delaware & H. Canal Co.* v. *Carroll* (1879) 89 Pa. 374 (explosion of fire damp); *Haddell* v. *Simpson* (1886) 112 Pa. 567, 4 Atl. 725 (defective construction of

gangway); *Reese* v. *Riddle* (1886) 112 Pa. 72, 3 Atl. 813 (failure to use props furnished); *Redstone Coke Co.* v. *Roby* (1886) 115 Pa. 364, 8 Atl. 593 (explosion of fire-damp); *Haley* v. *Keim* (1892) 151 Pa. 117, 25 Atl. 98 (deadly gases penetrated through openings which should have been closed); *Lincoski* v. *Susquehanna Coal Co.* (1893) 157 Pa. 153, 27 Atl. 577 (roof collapsed); *Velas* v. *Patton Coal Co.* (1900) 197 Pa. 380, 47 Atl. 360 (negligent order); *Loshefskey* v. *Hillside Coal & I. Co.* (1897) 21 App. Div. 168, 47 N. Y. Supp. 386 (defective bumper on car).

The theory on which the master is absolved from liability in these cases will be apparent from the following extracts from some of the opinions:

"As the defendants had complied strictly with the 8th section of the act of 3d of March, 1870, in providing a practical and skilful inside overseer or mining boss, and as they had thus fulfilled the duty imposed upon them by the General Assembly, it is not for this or any other court to charge them with an additional obligation. . . . The act is one of great practical utility to the miner, and lays upon the proprietors of mines all the burthens they ought of right to bear. They must provide capable overseers for their works, and they must furnish what, by such overseers, is required for the safety and welfare of the men engaged in those works. More than this they cannot do, for upon the judgment and skill of these practical agents they must depend quite as much as any of the men who are engaged in their mines." *Waddell* v. *Simason* (1886) 112 Pa. 567, 4 Atl. 725.

"Nor do we think the liability of the company for the act of its mining boss is changed by the fact that he is appointed pursuant to a statute, where he has a general superintendent over him, who has power to direct and control him. We discover no sound reason for any distinction. In either case the company must appoint a competent and suitable person, and provide suitable and safe machinery. He is to 'carefully watch' and 'to see,' for the purpose of protecting from danger all men at work in the mines, says the statute. This, however, does not displace or supersede his superior, to whom he may be required to report." *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 432.

"There is no room for the allegation that a mining boss under the mine ventilation act of 1870 is an agent of the mine owner or a coemployer. He is clothed with no powers of engaging and discharging miners and laborers at pleasure. He is merely a fellow servant with the miner. He is nowhere in the act designated as the agent of the owner of the mines. His duties are specified in the same manner that the duties of the engineer are specified in the 16th section, and as the duties of other employees are defined in various other sections. He has no general power of control. His duties are confined to special matters. That they are different from those of others of his fellow colaborers, or even that they are of a higher grade, does not matter." *Delaware & H. Canal Co.* v. *Carroll* (1879) 89 Pa. 374.

"The mining boss is a creature of the legislature, selected by the mine owner in obedience to the command of the law, and in the interest and for the protection of the miners themselves." *Redstone Coke Co.* v. *Roby* (1886) 115 Pa. 364, 8 Atl. 593.

"These remarks are as precisely applicable to the act of 1885 as they were to the acts of 1870 and of 1877. The fundamental idea as to all of them is that properly qualified persons, as designated in the several acts, shall be employed by mine owners with prescribed duties relative to the care and inspection of mines, and where this is done, the mine owner has discharged his duty in this regard, and if, having done so, accidents occur which can be traced to the carelessness or negligence of these persons, the owners are not liable." *Lincoski* v. *Susquehanna Coal Co.* (1893) 157 Pa. 153, 27 Atl. 577.

In this last case the court denied that there was any force in the contention that, because, under the act of 1885, "the miner must give notice of any apprehended danger to the mine foreman," he is to be considered as the representative of the owner for all purposes, so as to charge the company with liability. "No such provision," it was said, "is found in the act, and the duty to give such information was just as great before the act as after. The act simply embodied what was already a legal duty of the miner into the provisions of the statute, making it more precise and emphatic, and bringing the performance of such duty more directly to the attention of the miner. The position of the mining foreman with relation to the owner was not changed by this provision. His duty was the same, with or

without this provision, to wit, to give immediate attention to the apprehended danger, and take all proper measures to prevent its occurrence. The effect of his negligence in not correcting the defects or dangers complained of would be precisely the same after as before the statute, and it would require a specific change of the law by statutory enactment, to impose liability upon the owner for his negligence when there was no such liability at the date of the passage of the act."

In *Hearer* v. *Iselin* (1891) 161 Pa. 386, 29 Atl. 49, the trial judge, in a charge declared to be correct, ruled that the possession of a power to employ and discharge workmen—this not being a statutory duty of a mine boss—placed him in the position of a vice principal, and enlarged the liability of the employer beyond that to which he is subject in the case of a mine boss employed under the provisions of the act, and performing only the duties prescribed therein.

The relation of the rule applied in these cases to that which declares a head of a department to be a vice principal (see subtitle F, *infra*), has apparently not been discussed, and there might seem to be some ground for considering such a foreman to be within the purview of the latter rule. But the differentiating element is clearly indicated by the remark in *Delaware & H. Canal Co.* v. *Carroll* (1879) 89 Pa. 374, that he "has no general power of control," and that "his duties are confined to special matters."

In other states a similar view has, on the authority of the above cases, been taken as to the capacity of foremen appointed under acts of the same tenor as that of Pennsylvania.

In West Virginia a mine boss employed according to the provisions of the Code of 1891, Append. p. 995, § 11, is held not to be a vice principal, as his duties are not delegated to him by his employer, but prescribed by statute. *Williams* v. *Thacker Coal & C. Co.* (1898) 44 W. Va. 599, 40 L. R. A. 842, 30 S. E. 107 (large fragment of rock fell from roof of drift), applying the principle that "where a person or corporation is compelled by law to employ an individual in a given matter, no liability attaches for his tortious or negligent acts."

In Colorado a mine boss vested with no authority other than that prescribed by the coal-mining act of 1885 is a fellow servant of employees in the mine. *Colorado Coal & I. Co.* v. *Lamb* (1895) 6 Colo. App. 255, 40 Pac. 251 (mass of rock fell in a drift). The court said: "The mine boss is an individual, so designated by the statute, who must be employed by the mine owner, and put in charge, with reference to its safety and security. He has entire supervision of the whole system of the ventilation of the mine, likewise of its entries, drifts and rooms, and all machinery and appliances which are used in its operations. He is bound to make his reports regularly to the mine inspector, and is subject to severe penalties for any violation of the act. Of necessity, this would include any failure on his part in the supervision, inspection, and care which the statute requires. Miners are likewise given the right to inspect the mine and machinery either in person or by committee, conjointly with the owner, or otherwise, as they may choose, and to take such steps as their prudence may dictate to secure their own safety and prevent accidents. In another section a right of action is given to certain designated parties in case they sustain damage by reason of any failure to comply with the provisions of the statute, or because of any violation of its requirements. . . . We are unable to see how it is possible to compel a company to employ a mine boss, upon whom is laid the responsibility and the duty by statute to attend to the mine and its safety, as a place to work in, clothe him with full authority and power in this respect, and subject him to punishments and responsibilities in case of failure, and then hold the master responsible for his acts. He is in no sense the representative of the master, from whom the statute attempts to take entire control of this part of his mining operations. The master may supervise him, and he may, so far as may be, direct such changes to be made as his judgment indicates to be necessary; but when the statute put the control of this particular matter into the hands of the boss, and left to his judgment both the question of safety and the means to be used to that end, we are unable to see how he is, in any sense, either as vice principal or otherwise, the representative of the master, or how he can stand in any other relation to his colaborer than that of a fellow servant."

(p) *Subordinate officers of ships.*—A chief engineer on a steamer is a fellow servant of the third engineer

(*Searle* v. *Lindsay* [1861] 11 C. B. N. S. 429, 31 L. J. C. P. N. S. 106, 8 Jur. N. S. 746, 5 L. T. N. S. 427, 10 Week. Rep. 89 [machinery out of order]); and of the second engineer (*Wyman* v. *The Duart Castle* [1899] 6 Can. Exch. 387).

A mate of ships. *The City of Alexandria* (1883) 17 Fed. 390 (hatchway left open); *The E. B. Ward* (1884) 20 Fed. 702 (hatchway left unprotected); *Malone* v. *Western Transp. Co.* (1873) 5 Biss. 315, Fed. Cas. No. 8,996 (same facts); *The Job T. Wilson* (1897) 84 Fed. 204 (here the mate was at the wheel and therefore performing the duties of a mere servant); *The Egyptian Monarch* (1888) 36 Fed. 773 (mate was superintending work of reeling in the hawser); *Carlson* v. *United New York Sandy Hook Pilot's Asso.* (1899) 93 Fed. 468 (navigation of pilot boat); *The Miami* (1899) 35 C. C. A. 281, 93 Fed. 218, Affirming (1898) 87 Fed. 757 (topmast fell, while the mate was attempting to cast off a turn of the chain from around the drum); *Buson* v. *Goodwin* (1888) 147 Mass. 237, 17 N. E. 517 (no evidence offered to take the case out of the general rule applicable to a superintendent of work and one working under his orders; accident was caused by order to slacken a rope, thus allowing a heavy object to fall on plaintiff's foot); *Olson* v. *Clyde* (1881) 32 Hun, 425 (ordered off, to other work, a seaman who was assisting plaintiff to pay out a hawser, the strength of two men being necessary for the due performance of the work); *Geoghegan* v. *Atlas S. S. Co.* (1895) 146 N. Y. 369, 40 N. E. 507 (assistant steward fell overboard through a gangway door which had been left open); *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796 (assumed in this case, exception being made as regards the performance of the nonassignable duty of giving medical aid to seamen); *Livingston* v. *Kodiak Packing Co.* (1891) 103 Cal. 258, 37 Pac. 149 (injured servant was a steward waiting at table, who fell through an open hatchway).

The status of these officers was elaborately discussed in a recent Massachusetts case, where it was held that an employee of a coasting vessel is a fellow servant with the mate who is in control of the vessel, with respect to the latter's negligence in constructing and ordering the employee to use a triangle, the breaking of which, while he was sitting on it, for the purpose of scraping a mast, caused the injuries in suit. *Kalbek* v. *Deering* (1894) 161 Mass. 469, 37 N. E. 450. Holmes, J., said: "As the case comes before us, we must take it that the defendants did their duty in furnishing materials for the construction of the triangle, that the mate was in control of the vessel at the time, and that the cause of the plaintiff's injury was some negligence on the mate's part in constructing the triangle and in ordering the plaintiff to use it. The question is whether the defendants are answerable for this conduct of the mate. By the common law, as understood in this state, the work of construction was not one of the matters which the defendants were bound at their peril to see done with reasonable care, and therefore, if those engaged upon it were fellow servants in their general standing and occupation, the plaintiff took the risk of their negligence. They were not removed from the class of fellow servants, for the time being, by the nature of their occupation, to adopt the mode of expression which has been used. *Johnson* v. *Boston Tow-Boat Co.* (1883) 135 Mass. 209, 46 Am. Rep. 458; *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574; *Allen* v. *G. H. & F. Smith Iron Co.* (1894) 160 Mass. 557, 36 N. E. 581. But if the work had been done by the defendants in person, and they had done it negligently, they would have been liable, and it is argued that they are equally liable when the work is done by the master of the vessel, or by one who, for the time being, stands in his place. It is said that the master is not a fellow servant with the seamen, and therefore is not within the rule as to the risks assumed by the plaintiff, but that he is nevertheless an agent and representative of the owners, and that his negligence is their negligence. Even if it be said, as it has been said in some cases, that masters are not liable to servants for the negligence of others, except when the law, on grounds of policy, imposes a personal duty on them to see certain precautions taken or reasonable care used; and if it be admitted, therefore, that the defendants could not be liable for negligence in the construction of the triangle on the part of the master, whether a servant or not, any more than when the same work was done by the seaman (*Quinn* v. *New Jersey Light Co.* [1885] 23 Fed. 363; *The Queen* [1889] 40 Fed. 691; *Loughlin* v. *State* [1887] 105 N. Y. 159, 11 N. E. 371; *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772,

13 Sup. Ct. Rep. 911), still, ordering the plaintiff to use the faulty triangle was an act belonging to the superior officer as such, and it might be that, as to that, a different rule would apply. Looking at the reason given for the exception to the general liability of masters for servants, the last suggestion cannot prevail. If the sailor takes the risk of a negligent injury to his person from a fellow sailor, there is equal reason to say that he takes the risk of a negligent command. A command is a transitory act which the employer has no chance to supervise." The contention that a different doctrine obtains in the admiralty, and, that the court ought to follow the law which would be administered by the courts especially constituted for the affairs of seamen, was then discussed. It was pointed out that the case most relied on (*The* I. *Boaton* (1890) 43 Fed. 592, followed by *The Frank and Willie* (1891) 45 Fed. 494, and *The Julia Fowler* (1892) 49 Fed. 277) did not mean that the admiralty courts had worked out a different theory of the captain's liability from their own peculiar principles, but was really decided in deference to the *Ross Case* (§§ 532, 535, *infra*), which the judge himself did not agree with, and which has been explained away in later cases.

That the admiralty rule is the same as that of the common law was also declared in *Olson* v. *Oregon Coal & Nav. Co.* (1900) 44 C. C. A. 51, 104 Fed. 574, affirming 96 Fed. 109.

In *Benson* v. *Goodwin* (1888) 147 Mass. 237, 17 N. E. 517, the court said: "If we are asked to establish a special rule, applicable only to mates of vessels and common sailors, on the ground of the peculiar relations between them, the existence and particulars of those relations must be shown. The evidence in the case at bar discloses only facts which, under the decisions of this court show that the mate and the plaintiff were fellow servants of the defendant." In this case *Peterson* v. *The Chandos* (1880) 4 Fed. 645, 649; *Daub* v. *Northern P. R. Co.* (1883) 18 Fed. 625, and *Sullivan* v. *The Neptune* (1887) 30 Fed. 925, were cited to sustain the contention that a common sailor and a mate are not fellow servants. The reply of the court was as follows: "The first case contains on this point *dicta* only of Deady, J.; the second case contains a report of an oral charge to a jury by the same judge, which expressly assumes the responsibility of instructions against the admitted probable weight of authority; the third case was against the owners of a vessel, one of whom was the master, for negligence of the master."

In *The Walla Walla* (1891) 46 Fed. 198, also, *Daub* v. *Northern P. R. Co.* (1883) 18 Fed. 625, was held to be against the weight of authority, and a first mate who superintended the loading of a ship and discharged the longshoremen was held to be a mere servant.

In one case it was held, without qualification, that the owner of a vessel is not responsible for injuries to a seaman, caused by the negligence of the mate in failing to examine the fastenings of a block which had been chafed by wear and tear. *Halverson* v. *Visen* (1876) 3 Sawy. 562, Fed. Cas. No. 5,970; but in view of the late decisions as to non-assignable duties, this ruling needs some modification. See chapter XXXI., *post*.

In an Australian case it was laid down that the chief mate is a mere servant while superintending bumpers in discharging cargo, unless he is acting as defendant's general manager. *Sanderson* v. *Smith* (1882) 3 New So. Wales L. R. 31 (accident from giving way of rotten rope. — negligence of defendant as to furnishing not discussed).

(q) *Commanding officers of ships.* — A captain of a vessel has been held to be a representative of the owner according to the following cases: *Malone* v. *Western Transp. Co.* (1873) 5 Biss. 315, Fed. Cas. No. 8,996 (failure to have a hatch closed or protected by a light); *The Job T. Wilson* (1897) 81 Fed. 204 (here the master was keeping a lookout; but the rule seems to be laid down in general terms, and no stress is laid on the nature of the functions they were discharging. See subtitle F, *infra*); *The Ravensdale* (1891) 63 Fed. 621 (load which was being hoisted aboard a lighter was inadequately secured, and fell); *Johnson* v. *Boston Tow Boat Co.* (1883) 135 Mass. 209, 16 Am. Rep. 458 (captain of a lighter); *Loughlin* v. *State* (1887) 105 N. Y. 159, 11 N. E. 271 (plaintiff set to work under a bank, after the captain of a large had loosened the overhanging earth); *Scariff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796 (except as regards his performance of the duty of giving medical aid to a seaman); *Gabrielson* v. *Wendell* (1892) 135 N. Y. 1, 17 L. R. A. 228, 31 N. E. 969 (a case of unquestionable personal violence); *Greenman* v. *Atlas S. S. Co.* (1895) 146 N. Y. 369, 40 N. E. 507 (neglect of the master or mate of a

D. Doctrine that all superior servants are vice principals as regards their subordinates.

521. General statement.—Several of the American courts have adopted what may be conveniently designated as "the doctrine of superior and subordinate,"[1] or, more briefly still, the "superior servant doctrine."[2] The nature and scope of this doctrine is indicated by the subjoined extracts from various opinions.

"Where the negligent act of one servant causes injury to another, as the result of the exercise of the authority conferred upon him by the master over the servant injured, the master is liable."[3]

vessel to use iron doors supplied by the owner to bar an opening in her side, and the use, instead, of an insufficient rope, in consequence of which a member of the crew falls through the opening and is drowned); *Olson* v. *Oregon Coal & Nav. Co.* (1899) 96 Fed. 109, Affirmed in (1900) 44 C. C. A. 51, 104 Fed. 574 (seaman thrown, by a lurch of the ship, down an open hatchway); *Baltimore Elevator Co.* v. *Neal* (1886) 65 Md. 438, 5 Atl. 338 (here the captain of a tugboat belonging to an elevator company omitted to brace the yards of a ship, so that they should not come into collision with the elevator building, the result being that one of them struck a piece of slate from the roof and it fell onto a laborer,—vice principalship denied partly on the ground that servants may be coemployees, though not engaged in the same particular piece of work. See chapter XXVII., subtitle B, especially § 496, *ante*); *Price* v. *Houston Direct Nav. Co.* (1877) 46 Tex. 537; *Mathews* v. *Case* (1884) 61 Wis. 491, 50 Am. Rep. 151, 21 N. W. 513 (mate injured here); *Caniff* v. *Blanchard Nav. Co.* (1887) 66 Mich. 638, 33 N. W. 744 (left hatchways open when the mate went on board to inspect the ship as she was lying in harbor); *Larsson* v. *Delaware, L. & W. R. Co.* (1901) 59 App. Div. 202, 69 N. Y. Supp. 355 (negligent direction of captain of barge to cast off a hawser); *Leddy* v. *Gibson* (1873) 11 Sc. Sess. Cas. 3d series, 304 (sailor, in complying with an order to let go a rope under a heavy strain, had his leg broken); *Wyman* v. *The Duart Castle* (1899) 6 Can. Exch. 387.

In a recent English case it was held that the doctrine of common employment applies to the death of a seaman falling overboard and drowning, because of the neglect of the master to put in place stanchions and rails provided to raise the bulwarks to a proper height. *Hedley* v. *Pinkney & Sons S. S. Co.* [1894] A. C. 222. Affirming *Hedley* v. *Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 58, and overruling *Ramsay* v. *Quinn* (1874) Ir. Rep. 8 C. L. 322 (where the ground taken was that the position of captain, for the purpose of securing the safety of the crew, is not that of a servant, but that of a superintendent). It was considered that, in view of the decision in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30 (§ 529, *infra*) the only question to be decided was whether the captain was a servant or an agent. This question was thus briefly answered by Lopes, L. J., in the court of appeals: "The ship owner appoints and pays him, and can dismiss him. These are the ordinary incidents of the status of a servant, and apart from authority would show that the captain is a servant of the ship owner." *Hedley* v. *Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 67.

[1] *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342. Mr. McKinney's designation for the doctrine is the "superior servant limitation." Fellow Servants, chap. IV.

[2] This phrase is used in *Northern P. R. Co.* v. *Hogan* (1894) 11 C. C. A. 51, 27 U. S. App. 184, 63 Fed. 102, and many other cases.

It should be remarked that, even by courts outside the group we are now concerned with, decisions have been rendered which, at first sight, would seem to commit them to this doctrine. But these are explicable on special grounds. See the summary of cases in chapter XXX., *post*.

[3] *Consolidated Coal Co.* v. *Wombacher*

"Where the master appoints an agent with a superintending control over the work, and with power to employ and discharge hands and direct and control their movements in and about the work, the agent . . . stands in the place of the master." [4]

"Where the master gives to a person power to superintend, control, and direct the men engaged in the performance of work, such person is, as to the men underneath him, a vice principal, and it can make no difference whether he is called a superintendent, conductor, boss, or foreman. For his negligent acts and omissions in performing the duties of the master, the master is liable." [5]

A servant "does not assume risks and dangers caused by the negligent act of another servant under whose orders he works, and who, in a legal sense, stands as the master's representative, in rendering unsafe and dangerous work which the superior servant orders the employee to perform." [6]

"If the servant has been injured by the negligence of a superior servant having a right to control, and while executing the order of such superior about a matter in which the superior had a right to control, then such superior servant is, as to the inferior, a vice principal, and his negligence is that of the master." [7]

The master is equally responsible under this doctrine, whether the injury resulted from obedience to an order by the injured servant himself or by one of his fellow servants.[8]

In spite of the very sweeping language used in such passages as those quoted above, some of the courts whose decisions are cited have rather inconsistently declined to carry the doctrine enunciated to its logical conclusions. How low down in the scale of controlling em-

(1890) 134 Ill. 57, 24 N. E. 627. For other examples of the same form of expression, see—*Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288; *Louisville & N. R. Co.* v. *Lahr* (1888) 86 Tenn. 335, 6 S. W. 663; *Taylor* v. *Missouri P. R. Co.* (1891; Mo.) 16 S. W. 206; *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916; *Hoke* v. *St. Louis, K. & N.* R. Co. (1885) 88 Mo. 360.

[4] *Stephens* v. *Hannibal & St. J. R. Co.* (1885) 86 Mo. 221.

[5] *Miller* v. *Missouri P. R. Co.* (1891) 109 Mo. 350, 19 S. W. 58.

[6] *Anderson* v. *Ogden Union R. & Depot Co.* (1892) 8 Utah, 128, 30 Pac. 505.

[7] *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387.

[8] *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288; *Hoke* v. *St. Louis, K. & N. R. Co.* (1885) 88 Mo. 360; *Spencer* v. *Brooks* (1895) 97 Ga. 681, 25 S. E. 480; *Proctor* v. *Missouri, K. & T. R. Co.* (1890) 42 Mo. App. 124; *Purcell* v. *Southern R. Co.* (1896) 119 N. C. 728, 26 S. E. 161; *Dick* v. *Indianapolis, C. & L. R. Co.* (1882) 38 Ohio St. 389 (conductor allowed engineer to run train at undue speed, and a section hand was struck down).

Contrast the principle, applied in the courts which reject the "superior servant" doctrine, that the master is not the less free from responsibility for the reason that the negligent order which caused the injury was given to a fellow servant of the injured person. See § 515, note 2, *supra*.

ployees the line between liability and nonliability should be drawn is far from being clear under the decisions, as they stand, and we shall therefore content ourselves with stating the effect of the few rulings which bear upon the question."

It need scarcely be said that the superior servant doctrine has no application to cases in which a superior servant is injured by the negligence of a workman under his control.[10]

521a. Relation of the superior servant doctrine to the doctrine that the head of a department is a vice principal.— In enunciating the superior servant doctrine, courts have often used language which, if taken literally, would imply that there is no distinction between that doctrine and the one which denies the character of a vice principal to any employee below the rank of the head of a department.[1] See subd. F., *infra*. But the facts involved in the decisions in which

[9] That the delinquent was a vice principal has been denied in the case of a "boss-wiper," who directs the engine wipers when to work and what to do (*Knox* v. *Southern R. Co.* [1898] 101 Tenn. 375, 47 S. W. 491); and of one of a small body of laborers, who is merely directing their work, but has no power to compel them to work in a particular manner, and to discharge them if they refuse (*Kellyville Coal Co.* v. *Hamble* [1899] 87 Ill. App. 437; *Agnew* v. *Supple* [1898] 80 Ill. App. 437).

But it is not easy to see how the refusal to maintain the action in these cases can be reconciled with the rulings allowing a servant to recover where the delinquent was merely the feeder of a machine and the injured employee a boy helping him (*Fanter* v. *Clark* [1884] 15 Ill. App. 470); or where the delinquent was superintending a gang of men engaged in lifting some heavy article (*Fraser* v. *Hand* [1889] 33 Ill. App. 153; *Fraser* v. *Schroeder* [1896] 163 Ill. 459, 45 N. E. 288).

As no negligence was proved in another case, it was left undetermined whether an operator of a sheers was a vice principal of his helper. *Glover* v. *Kansas City Bolt & Nut Co.* (1900) 153 Mo. 327, 55 S. W. 88.

[10] *Chicago & N. W. R. Co.* v. *Snyder* (1886) 117 Ill. 376, 7 N. E. 604, holding that a conductor is chargeable with the negligence of his subordinates, and cannot recover for an injury partly caused by such negligence, although the negligence of an employee in another department is a co-operating cause of the accident.

[1] "When a railway company confers authority upon one of its employees to take charge and control of a gang of men in carrying on some particular branch of its business, such employee, in governing and directing the movements of the men under his charge with respect to that branch of its business, is the direct representative of the company itself, and all commands given by him within the scope of his authority are, in law, the commands of the company." *Chicago & A. R. Co.* v. *Hay* (1884) 108 Ill. 288. The language of this statement is followed very closely in *Wyanet Coal Co.* v. *Holmquist* (1894) 152 Ill. 581, 38 N. E. 946; *Illinois Steel Co.* v. *Schymanowski* (1896) 162 Ill. 447, 44 N. E. 876; *Wabash, St. L. & P. R. Co.* v. *Hauck* (1887) 121 Ill. 259, 11 N. E. 253.

"One who has charge and control of other servants, and has authority to govern and direct their movements in the branch of the principal's business in which they are engaged, is, while acting in pursuance of and within the scope of such authority, a vice principal, so as to make his acts and directions the acts and directions of the principal." *Lichtenberg, McV. & L.* v. *Scherman* (1893) 146 Ill. 540, 34 N. E. 701 (contents of one of a pile of barrels removed, thereby weakening it, so that it could not support the weight resting on it, and the barrels consequently spread and fell on plaintiff). Affirming (1892) 50 Ill. App. 123.

See also *Gravelle* v. *Minneapolis & St. L. R. Co.* (1882) 3 McCrary, 352, 10 Fed. 711, where the jury were charged that a servant invested with control

liability has been imposed on the master by the courts which have expressed themselves in this fashion show quite clearly that the domains covered by the two doctrines are far from being coextensive. No more striking proof of the essential difference between them can be given than the fact that, in one of the cases just cited, it was declared that the master is none the less liable for the reason that the negligent employee may have an immediate superior standing between him and the master,[2] —a circumstance which is usually inconsistent with the theory that such employee is the manager of a department (see §§ 519 *supra*, 534 *infra*). Moreover, it is plain from the illustrative rulings given in § 524, *infra*, that the manager of a department, as such an official is conceived by the courts which have adopted the doctrine of departmental vice principals, is a functionary of a much higher grade than those who are regarded as vice principals under the superior servant doctrine.[3]

The difficulty of defining so essentially vague a term as "department" has, as we shall see in a later subtitle (F., *infra*), produced much conflict of opinion as to the position of certain functionaries, —notably conductors; but this source of confusion is manifestly inoperative wherever the superior servant doctrine is adopted.

522. Rationale of the doctrine.— The theoretic foundations of the superior servant doctrine have been variously stated.

over another "with respect to any *particular part of the business*" is not a fellow servant of the latter.

In one Texas case a section foreman was spoken of as being in control of a department. *Gulf, C. & S. F. R. Co.* v. *Wells* (1891; Tex.) 16 S. W. 1028. And in another the same phrase is used as to the foreman of a railway car repairing shop. *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835.

[2] *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288. Compare the facts as illustrating this distinction in *Darling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298; *St. Louis, A. & T. H. R. Co.* v. *Holman* (1894) 53 Ill. App. 617; *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334; *Lloyd* v. *St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 22 S. W. 1089, and the cases cited in § 524, *infra*, more especially those relating to section foremen.

This fundamental distinction is lost sight of in at least one case, where the ground assigned for holding that a car repairer entrusted by the master workman with the duty of instructing in his duties the plaintiff, a new employee who was to take his place, was a vice principal, was that he was the manager of a department in which his duty was that of direction and superintendence. *Chicago, R. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 673, 43 N. W. 415. This ruling is only sustainable under the superior servant doctrine pure and simple.

See subd. F, *infra*, and the summary of Federal decisions in chapter XXX., *post*, especially the remarks in the *Ross Case*.

In *Fort Worth & D. City R. Co.* v. *Peters* (1894) 87 Tex. 222, 27 S. W. 257, Affirming (1894) 7 Tex. Civ. App. 78, 25 S. W. 1077, the court, referring to the earlier decision of *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835, where the character of vice principal had been ascribed to an "employee who has charge of a special department" of the business, said that this did not mean that, in order to let in the "superior servant doctrine," the department controlled must be a principal one.

a. Unequal knowledge of superior and subordinate.- One case dwells on the presumably unequal knowledge of the superior and inferior servants.[1] But a presumption which must evidently be, in a large proportion of instances, contrary to fact, is neither appropriate nor adequate to support a rule which is enunciated as one of universal application. Indeed, the statement in the case just cited is directly contradicted by another in a later judgment of the same court.[2]

In other cases language is used which implies that there are good grounds for admitting an exception to the doctrine of common employment, where the superior servant "in the exercise of the authority so conferred, orders the former into a place of unusual danger, and thus exposes him to extraordinary peril, of the existence and extent of which he is not advised."[3] Clearly, however, it is impossible to ascribe any logical force to the element thus emphasized. The rule which prevents recovery for the negligence of a fellow servant is perfectly general in its scope, and the ignorance of the injured person as to the dangers of his environment at a certain conjuncture must be characterized as an entirely irrelevant circumstance. So far as this factor is concerned, the rationale of the doctrine of common employment requires the conclusion that the injured servant's knowledge or lack of knowledge is not material, except so far as it had relation to his connection with the delinquent coemployee. If he knew that he was to work under the orders of another person, he must necessarily have known that, in the normal course of things, he would be exposed to the risk of being injured by the latter's negligence. A general acceptance of the risk being thus imputed, it can make no difference under which of the many possible forms the breach of duty may ultimately take effect.

[1] In *Louisville & N. R. Co.* v. *Bowler* (1872) 9 Heisk. 861, the court remarked: "It is absurd to hold that the common manual laborer, as a general rule, understands the management of such work, its proper mode of execution, and the dangers attending it, equally with him who sets himself up as the overseer, director, and architect of it."

Compare the language in the dissenting opinion of Turney, J., in *Knoxville Iron Co.* v. *Dobson* (1881) 7 Lea, 367, denying that one whose duty it was to retemper the knives of a nail machine was the fellow servant of a feeder of the machine, the ground taken being that the one duty was a matter of skill; the other simply mechanical, requiring no skill.

[2] *Nashville, C. & St. L. R. Co.* v. *Wheless* (1882) 10 Lea, 741, 43 Am. Rep. 317. See the quotation under subd. C, *infra*.

[3] *Missouri P. R. Co.* v. *Peregoy* (1887) 36 Kan. 424, 11 Pac. 7. Compare the grounds assigned for the decisions in *Thompson* v. *Chicago, M. & St. P. R. Co.* (1883) 4 McCrary, 629, 14 Fed. 564; *Consolidated Coal Co.* v. *Womacher* (1889) 31 Ill. App. 288 (1890) 134 Ill. 57, 24 N. E. 627. But, in the latter case at least, no stress is intended to be laid on the character and effects of the negligent order.

b. Inability of master or superior agents to supervise all details of the work.—Another consideration relied on is that the manager of an entire establishment (or the master himself) cannot be present everywhere in person to direct the employees in their work, but must, of necessity, give orders through others.[1] But this is a fact the significance of which depends entirely on the standpoint. There is no reason why it should not be deemed equally appropriate to serve as a justification of the theory that a servant assumes the risks of his superior's negligence, and such is actually the use made of it by the courts in which that doctrine is accepted. See § 516, *supra*. It cannot be of any force unless and until the conclusion has, on other grounds, been arrived at, that the doctrine of the assumption of a coservant's negligence shall not extend to cases in which an employee has been deputed to give orders at times and places at which it is impossible for the master or his general agent to be present. To conceive of an order of a subordinate foreman as being in effect an order of the master or his general agent, for the reason that the latter has actually or impliedly instructed the workmen to do whatever the former directs them to do, does not strengthen the theory here criticised. Such a conception, it is obvious, really begs the whole question which has to be determined, *viz.*, whether the subordinate foreman is to be regarded as an employee who stands in the place of his superior.[2]

c. Obligation of servant to obey his superior.—From the language used in some cases it would seem that a sufficient foundation for the superior servant doctrine is by some judges supposed to be furnished by the obligation of a subordinate to obey the orders of those who are set in authority over him.[3]

d. Duty to use care in giving orders regarded as one of the non-

[1] See the extract from *Dixon* v. *Ranken* (1852) 14 Sess. Cas, 2d series, 420, 1 Am. Ry. Cas. 569, in note 7, *infra*; also *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298.

[2] See *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 208.

[3] "In exercising this power he does not stand upon the same plane with those under his control. His position is one of superiority. When he gives an order within the scope of his authority, if not manifestly unreasonable, those under his charge are bound to obey, at the peril of losing their situations; and such commands are, in contemplation of law, the commands of the company, and hence it is held responsible for the consequences." *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288.

"In entering the service of the defendant, the plaintiff might be and is presumed to understand and take upon himself every risk naturally pertaining to such service, and, amongst others, that which may proceed from the possible carelessness of such fellow servants as he must know, from the very nature of the employment, he may be required to associate with in the performance of his duties. But no such presumption is or should be raised, of his willingness to assume the risk growing out of the possible negligence of one who, while a servant to their common master, stands to himself in the light of a superior

assignable duties of the master.—(See also § 576, *ad finem*, *post.*)—Another suggested basis for the doctrine is that the duty of using reasonable care in giving orders to servants is one of those obligations which the master cannot delegate so as to absolve himself from lia-

whose commands and directions he is bound to obey; for so to hold, in the case of a corporation like this defendant, which can only operate through its agents and employees, would be to absolve it from all responsibility to those in its employment." *Cooke* v. *Richmond & D. R. Co.* (1881) 84 N. C. 309, 37 Am. Rep. 620.

The test is whether the subordinates "have just reason for believing that the failure or refusal to obey the superior will or may be followed by a discharge." *Turner* v. *Goldsboro Lumber Co.* (1896) 119 N. C. 387, 26 S. E. 23. But the language held in North Carolina is not of a uniform tenor in this connection. See the extract from *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863, in note 7, *infra*.

In other cases it has been laid down that the rule is not based "upon the idea of the relative rank of the two servants, or the general superiority of the one in position, intelligence, or skill, or in the wages received, but upon the ground that the one is placed under the orders and directions of the other, and required to submit to and obey such orders in the performance of his duties; that the 'inferior' is placed in the position of a servant to the 'superior.' In such cases the superior is held to represent the master." *Nashville, C. & St. L. R. Co.* v. *Wheless* (1882) 10 Lea, 741, 43 Am. Rep. 317; *Illinois C. R. Co.* v. *Spence* (1893) 93 Tenn. 173, 23 S. W. 211.

Among the states which adopt this theory may, perhaps, be numbered Kentucky, though the following extract from the leading case of *Louisville & N. R. Co.* v. *Collins* (1865) 2 Duv. 114, 87 Am. Dec. 486, shows that in some respects, notably in respect to the distinction taken between the effects of gross and ordinary negligence, the views of this court place it in a class by itself (see § 549, *post*). "In the employment and control of his subordinates, the engineer acts as the representative agent of the common superior,—the corporation. They have no authority to control or resist him in his allotted sphere of service: and why, then, should the law imply a contract to trust him alone, and never look to the corporation as his employer and constituent, for indemnity for damage resulting from his wilful wrongs or grossly negligent omissions? When they engaged to serve under him, perhaps they knew nothing of his trustworthiness or his credit; but they knew that they would serve a corporation, and probably faith in its responsibility and protection induced them to venture into its service; and this faith may be presumed to include an assurance of safety as well as of pay. Perhaps if they had understood that the corporation would not be responsible for the conduct of its engineer, they would never have risked such service under him. The contract implied by law would, therefore, rather seem to be that the subordinates should look to the corporation, and not to its agent alone, for indemnity for loss arising to them from his unskilfulness or culpable negligence. Nor can we perceive how public policy could be subserved by the irresponsibility of the corporation in such a case. Such exemption, if known, might possibly stimulate the subordinates to a more vigilant observance of the engineer's conduct; but why should they be left to depend on that which could be of little, if any, avail to prevent the unskilfulness or negligence of a superior above their dictation or control? In undertaking the perilous service, they might be presumed to risk the hazards necessarily incident to their employment; and as they could not expect infallibility in the management of the locomotive and its running train, and as they knew that the most faithful and skilful managers occasionally lapse into common blunders and ordinary negligence, the law might imply an agreement to risk their possible occurrence. But the corporation being under an implied obligation to provide sound and safe cars and engines and a competent and faithful engineer, his subordinates cannot reasonably be presumed to expect or to hazard his gross negligence, which borders on fraud and crime; and it seems to us therefore, that while the corporation may not be responsible to them for his ordinary negligence both justice and policy require that it should be held liable for his gross negli-

bility for their nonperformance or improper performance. This theory seems to furnish the only really satisfactory explanation of the liability imposed, as it brings this particular exception to the coservant rule into line with the others, which rest upon the representative character of the negligent employee.[7] Such a standpoint

gence as its chief and controlling agent in the management of its running train. . . . The only consistent or maintainable principle of the corporation's responsibility is that of agency. *Qui facit per alium facit per se.* It is therefore responsible for the negligence or unskilfulness of its engineer as its controlling agent in the management of its locomotives and running cars, and that responsibility is graduated by the classes of persons injured by the engineer's neglect or want of skill: as to strangers, ordinary negligence is sufficient; as to subordinate employees associated with the engineer in conducting the cars, the negligence must be gross; but as to employees in a different department of service, unconnected with the running operations, ordinary negligence may be sufficient. Among common laborers, constituting a distinct class, all standing on the same platform of equality and power, and engaged in a merely incidental, but independent, service, no one of them, as between himself and his coequals, is the corporation's agent, and therefore it is not, on the principle of agency or otherwise, responsible for damage to one of them resulting from the act or omission of another of them, although each of the company's employees would be its agent as to entire strangers to it." But when it is remembered that what is really wanted is some reason which will be adequate to justify introducing an exception to the general rule that the risks of a fellow servant's negligence are assumed, this conception is, it is obvious, quite irrelevant. There is no such essential incompatibility between an agreement not to hold the master liable for a fellow servant's acts, and a duty to obey the same fellow servant's orders, that it is warrantable to suppose the implication of the agreement to be excluded by the existence of the duty.

[7] The language of the following elaborate exposition of the doctrine in the early case of *Cleveland, C. & C. R. Co. v. Keary* (1[illegible]3 Ohio St. 204, where a railway co[illegible] was held liable for the negligence of a conductor, is unduly wide, in so far as it supposes the existence of a general obligation in the master to "superintend and control the forces he employs:" for such a principle, if carried to its logical conclusion, would make him the supervisor of every act of every servant, and thus sweep away the whole doctrine of coservice. But otherwise it is a sound and lucid presentment of the considerations by which the inference of an acceptance of the risk of a fellow servant's negligence in this particular instance may be deemed to be negatived. "No one has the right to put in operation forces calculated to endanger life and property, without placing them under the control of a competent and ever-active superintending intelligence. Whether he undertakes it, or procures another to represent him, the obligation remains the same, and a failure to comply with it in either case imposes the duty of making reparation for any injury that may ensue. When one enters his employment in a subordinate situation, and agrees to be subject to his orders, either directly or indirectly given, he has a right to expect that his employer will perform the duty resting upon him to furnish suitable machinery and control it with care and prudence. Whenever the law recognizes duties it imposes corresponding obligations. It is the duty of the owner to superintend and control the forces he employs, and the duty of the servant to obey and perform under his directions: and certainly, in the absence of positive stipulations, the law will not, as between themselves, throw those which belong to the one on to the other, or refuse to enforce the obligations which either may have incurred. As corporations can act only through their agents and officers authorized to exercise the functions conferred by their charters, there is much force in the view . . . that the superintendent (and conductor when running a train) of a railroad ought to be regarded as the proper representatives of the company, and their acts considered as those of the company. But I do not think it necessary to insist upon this position.

is fully warranted by the fact that the power of controlling the details of the work to be done is, as shown in volume III., the very element which serves to distinguish one who is, from one who is

Let the company be liable only upon the maxim, *respondeat superior*, or upon the obligations arising out of the contract of service and in either view their liability for injuries to their subordinates, caused by the carelessness of the conductor they have placed over them, in charge of the train, is, in our opinion, sufficiently apparent. This conclusion rests wholly upon the idea that the company, from the very nature of the contract of service, is under obligations to them, as well as they to the company; and that amongst these obligations is that of superintending and controlling, with skill and care, the dangerous force employed, upon which their safety so essentially depends. For this purpose the conductor is employed, and in this he directly represents the company. They contract for and engage his care and skill. They commission him to exercise that dominion over the operations of the train which essentially pertains to the prerogatives of the owner; and in its exercise he stands in the place of the owner, and is in the discharge of a duty which the owner, as a man and a party to the contract of service, owes to those placed under him, and whose lives may depend on his fidelity. His will alone controls everything, and it is the will of the owner that his intelligence alone should be trusted for this purpose. This service is not common to him and the hands placed under him. They have nothing to do with it. His duties and their duties are entirely separate and distinct, although both necessary to produce the result. It is his to command and theirs to obey and execute. No service is common that does not admit a common participation; and as servants are fellow servants when one is placed in control over the other. The servants employed to execute cannot recover for injuries arising from a failure in that part of the business committed to them, because it is their failure, and not that of their employer; and although it should happen from the negligence of but one of them, yet each one entered the common service with a knowledge that others must be engaged, and they were jointly bound to perform what was jointly intrusted to them, and public policy may be concerned in their keeping a supervision over each other for the purpose. But how this can be made to extend to the conductor, over whose acts they have no supervision or control, and are not presumed to be possessed of the requisite intelligence for the purpose, we are wholly unable to see; and equally so, how the safety of travelers is likely to be jeopardized by adding to the responsibility of the conductor for his carelessness that of the company that places him in power. . . . While the principle of *respondeat superior* is as old as the law itself, it is everywhere admitted that no exception to its operation, as is now contended for, was ever asserted until the case of *Priestley* v. *Fowler* [(1837) 3 Mees. & W. 1 Murph. & H. 305, 1 Jur. 987] was decided. That case and those made upon its authority in England and America have all proceeded upon the general ground of exempting the master from responsibility to one servant for injuries arising from the carelessness of another engaged in the common service, because the servant, by his contract, takes these risks upon himself. None of them have in terms declared that he is not liable for the negligent and careless conduct of him to whom he delegates the power of control and command over them. The court whose authority has been most relied on in this country has expressly refused to declare it. Even to this extent the doctrine has been resolutely resisted at every step by distinguished jurists. To speak of it, therefore, as a settled principle of the common law, is to confound ideas. To adopt it without a conviction of its justice and propriety is to abuse the power with which the law has invested us. Our plain duty is to endeavor to ascertain the true nature of the relation between the parties and the inherent elements of the contract on which it is founded, and from them deduce the principle that ought to govern. . . . Tested in this manner it seems to us clear, in a case like the present, that, as between the company and those employed to labor in subordinate situations under the control of a superior, two distinct classes of obligations arise,— the one resting upon the company and the other upon the servants,—and both founded upon what each, either expressly or impliedly, has agreed to do in execution of the

not, a master as regards the injured person. It is a perfectly logical and rational position to take, that, where this essentially characteristic function is involved, the rule as to assumption of risks shall

contract. It is the duty of the company to furnish suitable machinery and apparatus, and, as they reserve the government and control of the train to themselves, and intrust no part of it to these servants, to control it and them with prudence and care. As the necessity for this prudence and care is constant and continuing, the obligation is performed only when it is constantly exercised, and they cannot rid themselves of it by devolving this power upon the conductor. If they intrust him with its exercise, in the language of Judge Story, they 'in effect warrant his fidelity and good conduct.' It is the duty of the servants to obey the orders of the superior thus placed over them, and to perform as he shall direct. If they fail to do this, and injure each other, they violate their engagements to the company, and are alone answerable for the wrongs they may do. In such case there is no failure of the company to do what, as between them and these servants, it was understood they should do, when the servants entered the service. But they cannot be made to bear losses arising from carelessness in conducting the train, over which their employer gave them no power or control, either separately or collectively, until we are prepared to say that justice and public policy require the consequences of duty omitted by one party to be visited upon the other, although stripped of all power to prevent such consequences."

This opinion was largely based on the Scotch case of *Dixon* v. *Rankeu* (1852) 14 Sc. Sess. Cas. 2d series, 420, 1 Am. Ry. Cas. 569 (afterwards overruled by the House of Lords in *Bartonshill Coal Co.* v. *Reid* [1858] 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767), where Lord Justice Clerk reasoned thus: "The master's primary obligation in every contract of service in which his workmen are employed in a hazardous and dangerous occupation for his interest and profit is to provide for and attend to the safety of the men. That is his first and leading obligation, paramount ev[illegible]o that of paying for their labor. T[illegible] ligation includes the duty of furnishing good and sufficient machinery and apparatus, and of keeping the same in good condition,—and the more rude and cheap the machinery, and the more liable on that account to cause injury, the greater his obligation to make up for its defects by the attention necessary to prevent such injury. In his obligation is equally included, as he cannot do everything himself, the duty to have all acts by others whom he employs done properly and carefully, in order to avoid risk. This obligation is not less than the obligation to provide for the safety of the lives of his servants by fit machinery. The other servants are employed by him to do acts which, of course, he cannot do himself, but they are acting for him and instead of himself, as his hands. For their careful and cautious attention to duty, and for their want of vigilance, and for their neglect of precaution, by which danger to life may be caused, he is just as much responsible as he would be for such misconduct on his own part if he were actually working or present. And this particularly holds as to the person he intrusts with the direction and control over any of his workmen, and who represents him in such a matter."

Other judicial statements of the same tenor are the following: "The master, by appointing a foreman or other person to superintend work, with power to direct the men under him when and how to do it, thereby devolves upon such person the performance of those duties personal to the master." *Miller* v. *Missouri P. R. Co.* (1891) 109 Mo. 350, 19 S. W. 58.

"There seems to be no well-settled rule that classifies the agents and servants of a common employer, whether natural or artificial, first, into such as have authority to represent, act for, and in the place of, the employer in respect to the persons, business, matters, and things wherewith they are charged; and, secondly, such as have no such authority, but are merely fellow servants. But, without regard to such rule, there is no reason why such authority may not be specially conferred upon any such agent or servant. In this case the burden of proving the authority—its extent and compass— by competent evidence, would rest upon the party alleging it, unless the nature of the agency or employment implied its existence and extent. Thus, an employer might confer upon a particular laborer charged to do a particular sort of service, but who simply, by

the nature of his employment, would have no authority to represent or bind his principal in any respect, power to employ other like laborers with himself to do the service to be done, to direct and command them when, where, and how to work, to control and superintend them, and to discharge them from employment in his discretion, although he should labor with and as one of them. And there can be no question that the employer would be answerable for the misfeasance or nonfeasance of such agent in the course of his employment and in the exercise of the power thus conferred upon him. This is so because the agent in such case would be expressly authorized to represent, act for, and in the place of, his employer in the business designated and within the compass of the power conferred. And so, in the case before us, although the section master or foreman might not have authority, arising from the nature of his employment, to bind the defendant for his acts toward, and his commands to, his fellow servants, yet, if the defendant conferred upon him power and authority to employ laborers—fellow laborers with himself—to work on the section of the road wherewith he was charged, and authority to superintend them, to give them orders and commands in the line of work to be done, which they were bound to obey, and to discharge them from such employment, in his discretion, as alleged in the complaint and as the evidence introduced on the trial tended to prove, the defendant would be liable for his misfeasance and nonfeasance in the course of the exercise of his authority thus conferred by it. This is so upon the plainest principles of law applicable to and governing the relations of principal and agent towards each other and third persons. This case is not like the ordinary one of injury done by one fellow servant acting as foreman or leader of several or many laborers, to one of his fellow servants. The complaint expressly alleges that the section master named was agent and servant, and 'had full power and authority of the said defendant to hire and discharge hands and servants in that behalf on said section, and who was the superior of the said plaintiff in that behalf, whose orders and commands in the line of said service, as the agent, foreman, and boss of the said defendant, the said plaintiff was lawfully bound to obey;' and there are other similar allegations to the same effect. Evidence was introduced on the trial to prove this material allegation, and the jury found by their verdict that it was true. So it appears that the section master in this case was not simply a fellow servant of the plaintiff, but as well the agent of the defendant, charged with authority to employ, control, and command the plaintiff as to the labor he should do on the railroad of the defendant while he was so in its service, and to discharge him from such service, just as its president or other leading executive officers might have done; and the defendant must therefore be held liable for his misfeasance in the course of his agency, just as if the same had been done by its chief executive officer." *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 86.

The following passage from a Minnesota case is also instructive in this connection, though it must be remembered that in that state the superior servant doctrine has never been accepted: "Where a large number of men are employed upon the same work, it is essential that reasonable orders regulating their conduct and assigning them proper places in which to work should be given. It is the duty and the right of the master to give orders and direct the places where his servant shall work. . . . A workman when ordered from one part of the work to another cannot be allowed to stop, examine, and experiment for himself in order to ascertain if the place assigned to him is a safe one; and therefore in obeying the order, . . . he has a right to rely upon a faithful discharge of the master's duty to use ordinary care to warn and protect him against unusual dangers. Any rule or doctrine which deprives the workman of this right and protection when the master delegates the power and duty of giving such orders to a subordinate, no matter how high or low his rank or grade, is unsupported by reason, violates all considerations of justice, and is not supported by the weight of authority." *Carlson* v. *Northwestern Teleph. Exch. Co.* (1896) 63 Minn. 438, 65 N. W. 914. Strictly speaking, this reasoning is, it should be remarked, applicable in its entirety only to one particular kind of order, viz., that which takes a servant to a new place of work without giving him time to examine his surroundings. If, however, the propositions here laid down are unreservedly accepted, it is difficult to see what logical halting place there can be short of an adoption of the su-

give way to the rule which makes certain obligations of the master nonassignable.[3]

Not the least of the merits of this mode of explaining the rationale of the doctrine—and it is a merit which none of the other theories possess—is that it furnishes a simple, clearly defined issue upon which the controversy between the opposing schools of thought which reject and which accept the superior servant doctrine may be concentrated. The advantages of such a situation in dialectics are as obvious as they are in pleading.

e. Summary.—Whichever of the above explanations of the doctrine may be regarded as the correct one, it seems abundantly evident that the broad question whether the master shall be held responsible for the negligence of all supervising employees, and, if so, whether the responsibility shall extend to every species of negligent act, or be circumscribed within the lines indicated by some of the cases cited in chapter XXIX., *post*, is not susceptible of settlement on any purely juridical basis, and therefore presents a peculiarly appropriate subject for that legislative intervention which, in a large number of jurisdictions, has already enlarged the servant's right of

perior servant doctrine. But when tested by the earlier and later decisions in this state, the case cannot be sustained except on the narrow ground of a breach of the duty of instruction or warning. See § 57, *ante*.

See also *Hoon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401; *Criscell* v. *Pittsburgh, C. & St. L. R. Co.* (1888) 30 W. Va. 798, 6 S. E. 31; *Schroeder* v. *Chicago & A. R. Co.* (1891) 108 Mo. 322, 18 L. R. A. 827, 18 S. W. 1094; *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916; *Bland* v. *St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 22 S. W. 1089—which all proceed more or less upon the theory that the duty of supervision is nonassignable.

[3] In discussing this particular aspect of an employer's responsibility Messrs. Shearman & Redfield (1 Neg. § 233) seem to the present writer to put the case for their own side of the question much more strongly than the authorities really warrant. There is a wide distinction between the theory that the master must answer for the results of a negligent order when it is given by a general or departmental manager, and the theory that any employee to whom the power of control is delegated is a vice principal. This distinction, it is submitted with all deference, the learned authors have not fully appreciated; otherwise they would hardly have cited in support of their views the decisions of the Federal courts, or of Alabama, Connecticut, Georgia, Colorado, Minnesota, Oregon, Vermont, Washington, Louisiana, Wyoming, and Indiana. As the summary of decisions in chapter XXX., *post*, indicates, these are all jurisdictions in which responsibility cannot be fixed upon the master merely by showing that the injury was caused by complying with the orders of a controlling employee. South Carolina, the decisions in which are also relied upon, is a more doubtful state; but in the decisions as they stand (see summary in chapter XXX., *post*), it can scarcely be classed as one of those which accept the superior servant doctrine in the sense contended for. Virginia and West Virginia, which supported the theory of the learned authors at the time their treatise was compiled, have now gone over to the opposite camp. See summary in chapter XXX., *post*.

It is noticeable that the phraseology employed in stating the nature of the supervision exercised by a foreman often suggests his representative character from the point of view adverted to in the text,—as, where he is described as

recovery.[9] But it is not unworthy of remark that there is some inconsistency in the position of those courts which reject the superior servant doctrine, and at the same time maintain that the duty of framing suitable regulations for the conduct of the business is non-delegable. Such regulations are essentially nothing but general orders, the object of which is to secure the safety of servants. Why should any distinction be made, in the present point of view, between such general orders, and the particular orders which it is the duty of controlling officials, as the work progresses, to issue in such a form that their subordinates will not be exposed to undue perils?[10] The only difference between the two kinds of orders is that by one of them the master's will is declared in such a form as to indicate the

an agent "who directs the manner of executing the particular work" (*Herriman* v. *Chicago & A. R. Co.* [1887] 27 Mo. App. 435); or as one who has "control of work and authority to direct how, when, and where it should be done" (*Cox* v. *Sprague Granite Co.* [1890] 39 Mo. App. 424).

[9] In this connection it is interesting to note that one of the main innovations introduced by the English employers' liability act of 1880 and the American statutes modeled upon it embodies the following principle formulated in the report which the Parliamentary Commission of Inquiry submitted in 1877: "Where the actual employers cannot personally discharge the duties of masters, or where they deliberately abdicate their functions and delegate them to agents, the acts or defaults of the agents who thus discharge the duties and fulfil the functions of the masters should be considered as the personal acts or defaults of the principals and employers, and should impose the same liability on such principals and employers as they would have been subject to had they been acting personally in the conduct of their business, notwithstanding that such agents are technically in the employment of the principals."

[10] The essential identity of general and particular orders is thus noted by the supreme court of Missouri: "It is a part of the personal duty of the master to give direction to the work he undertakes, and to prescribe the system or method of conducting it. In so doing he must use ordinary care for the safety of those engaged in his service. Accordingly, it has been held that the omission to adopt and to enforce rules necessary for the reasonably safe management of a business as complex and as hazardous to life and limb as that here in view may sometimes form the basis for a finding of negligence on the part of the master. *Reagan* v. *St. Louis, K. & N. W. R. Co.* (1887) 93 Mo. 348, 6 S. W. 371; *Abel* v. *Delaware & H. Canal Co.* (1891) 128 N. Y. 662, 28 N. E. 663; *Whittaker* v. *Delaware & H. Canal Co.* (1891) 126 N. Y. 544, 27 N. E. 1042. Such holdings rest upon the same principle that supports the rule of liability for defects in the plant or appliances. As has lately been tersely said in a case which received very thorough consideration: 'A master is no less responsible to his workmen for personal injuries occasioned by a defective system of using machinery than for injuries caused by a defect in the machinery itself.' Lord Watson in *Smith* v. *Baker* [1891] A. C. 353, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660. Rules, however, are but one means of giving direction to the master's work. Its guidance, as to details, is often necessarily intrusted to managers, foremen, and others. By whatsoever name such a superior employee may be called, his relation to the subordinates acting under his orders is not that of a fellow workman in respect to his performance of the master's function of directing them and the work in his charge." *Schroeder* v. *Chicago & A. R. Co.* (1891) 108 Mo. 322, 18 L. R. A. 827, 18 S. W. 1094.

Compare the language used in *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916, as quoted under § 523, note 3, *infra*.

course to be pursued at those indefinite times in the future when the circumstances provided for shall happen to supervene, while by the other he expresses his wishes as to some particular operation connected with work which is about to be carried out or is already in progress. There is no little difficulty in discovering any adequate or satisfactory ground upon which it can be maintained that this difference is so fundamental as to justify the application of [illegible] rules of law with respect to the representative capacity of the two classes of employees from whom the general and the special orders issue. If there is such a difference, it has never been explained in what it consists or on what ground it rests. The present writer ventures to think that the only loophole by which this difficulty can be escaped is furnished by the bald theory that reasonable care requires the master to promulgate general rules, but not to give orders about details. If there is no duty in the latter respect, the question whether such a duty is nonassignable becomes immaterial.[1] In the nature of the case, however, it is clear that the existence or nonexistence of such a duty must remain a mere matter of opinion, the inherent uncertainty of which once more suggests the need of a legislative determination of the controversy.

522a. What constitutes the exercise of control within the meaning of the doctrine.—It is very rarely that there can be any possible dispute as to what constitutes an exercise of control within the meaning of the superior servant doctrine. In a few cases recovery has been sought on the theory that the signals given by employees to one another while they are performing duties which render such means of intercommunication necessary are in the nature of orders or commands, the argument being that, as each employee is authorized to give them and the others are bound to obey them when given, the result is to create the relation of superior and subordinate. But this contention has not prevailed.[2]

[1] This is practically the [illegible] setts doctrine. See § 560, *post*.

[2] Evidence that the rules of a [illegible] company required that the engineer should give certain specified signals as a "notice" to apply or loose the brakes, and that the brakeman should manage the brakes accordingly, and while on the train be in subordination to the conductor, has been held not to render the brakeman a subordinate servant in such a sense as to render the company liable for an injury occasioned by the negligence of the engineer. (Scott and Ashburn, JJ., dissenting.) *Pittsburg, Ft. Wayne & C. R. Co.* v. *Lewis* (1877) 33 Ohio St. 196. The following passage is extracted from the opinion of the majority: "To secure the management and transit of trains, and the safety of passengers, employees, and others, from the nature of the business many signals and of various kinds are required. They are required by the rules to be given by all classes of employees,—conductors, engineers, brakemen, switchmen, stationmen, flagmen, trackmen. A corresponding duty of heeding signals is required

A mere request is not an order within the scope of the superior servant doctrine, where it emanates from an employee who is not authorized to require the service performed in compliance with it.[3] Compare § 536, *infra*.

523. Existence or absence of a power to hire and discharge subordi-

of all employees without reference to their grade of employment; and yet it was never supposed that thereby any relation of superior and subordinate was created or necessarily existed. The system of giving notice by signals is a mere mode of doing the business of the company, arising from the necessity of the case. They are to be given and heeded by both superiors and subordinates, in accordance with the nature of the thing to be done, or as circumstances may require. It is as much the duty of an engineer to be controlled by the signals of brakemen, given under the rules of the company, as it is the duty of brakemen to be governed by the signals of an engineer, given under the same rules, and neither one more than the other is thereby made subordinate to the other. That relation can be created only by the act of the master conferring his authority upon one over the other; when that is done then one represents the authority of the master, and therefore may control the other, who for that reason becomes his subordinate."

The same conclusion, though again by a divided court, was arrived at in *Pittsburgh, C. & St. L. R. Co.* v. *Ramey* (1882) 37 Ohio St. 665 (signal given by engineer to brakeman). "These signals," it was said, "are so named properly, and are intended to notify all concerned of the thing signified. They are addressed to the conductor as well as brakeman, and it is the duty of the conductor to see that brakemen perform the duty signified. This duty is imposed upon the brakemen by force of the rule itself, and not by virtue of any authority vested in the engineer over the brakeman. The signal is a mere notice. The rule is the order of the company to the brakeman directly. Suppose a train is signaled by a station agent, as this train was, to stop for orders. It thereby became the duty of the conductor, as well as of each employee on the train, to stop for orders; and yet no one can contend that such station agent who gives the signal is the superior, and the train crew subordinate, employees of the company within the meaning of the rule under consideration. A variety of signals, under a variety of circumstances, are required to be given by different employees of the company, to signify that an occasion exists for the performance of a particular duty; but it would be absurd to hold that in each case the employee giving the signal is a superior servant, to whom all others to whom information is thus communicated are subordinated, so that the company would be responsible to them for any act of negligence of the employee who gave the signal, whether such negligence was in giving the signal or in the performance of other duties. For, it must be observed, that negligence or carelessness is not affirmed of the act of the engineer in giving either the signal to tighten the brakes or to loosen them. The only negligent and careless act charged against him was in forcing the engine forward violently, without giving time to the brakeman to loosen the brakes."

Compare also the doctrine that a servant who is appointed to give warning signals or to notify his coworkers as to the approach of transitory dangers is not engaged in discharging the master's nondelegable duty to maintain a safe place of work. *Hermann* v. *Port Blakely Mill Co.* (1896) 71 Fed. 853.

It is deserving of note that a workman who merely gives directions when to set in motion or stop machinery is not a "superintendent" within § 1, subs. 2, of the English employers' liability act of 1880. *Shaffers* v. *General Steam Nav. Co.* (1883) L. R. 10 Q. B. Div. 356, 52 L. J. Q. B. N. S. 260, 48 L. T. N. S. 228, 31 Week. Rep. 656, 47 J. P. 327.

Hunter v. *Kansas City & W. R. & Bridge Co.* (1898) 29 C. C. A. 206, 54 U. S. App. 653, 85 Fed. 379, a ruling as to a similar provision in the Arkansas statute of 1893, is to the same effect as this English decision, and the *Ramey Case* (1882) 37 Ohio St. 665, was cited with approval. Compare also *Texas C. R. Co.* v. *Frazier* (1896) 90 Tex. 33, 36 S. W. 432, construing the Texas statute.

[3] *Bradley* v. *Nashville, C. & St. L. R. Co.* (1884) 14 Lea. 374 (yardmaster coupled cars at request of engineer).

nate; significance of.—(Contrast with the doctrines discussed in this section those noticed in § 518, *supra.*)—The possession of the power to hire and discharge his subordinates is normally possessed by a large proportion of those employees who are held under the superior servant doctrine to be vice principals, and is frequently mentioned by the courts in the enumeration of their attributes.[1] As the cases stand, however, the precise evidential significance of this power, as an actually determinative element, is somewhat obscure.

If it were of any importance to determine the character of a servant who should possess the power of discharge without the power of control, there is apparently some authority for the principle that the fact of an employee's having authority from the master to discharge his fellow servants does not of itself constitute him a vice principal.[2] The correct rule in regard to the situation supposed is, however, of very small moment, inasmuch as the only instance of the separation of powers likely to occur in practice is that in which the power of discharge is wielded by a servant superior to the one who actually controls the workmen while actually engaged in their work: and this official would of necessity always be a vice principal by virtue of that potential power of control which is implied by his higher rank, and which is susceptible of being called into active exercise whenever he chooses to assume the personal management of any servants who may be normally supervised by a subordinate foreman.

As regards the cases in which the superior servants possess the power of control without the power of discharge, the obvious inference from the theory that such servants are vice principals for the reason that the exercise of control involves the discharge of a non-

[1] *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863; *Logan* v. *South Carolina R. Co.* (1895) 116 N. C. 940, S. E. 359; *Miller* v. *Cairo P. R. Co.* (C. C. 53) 5 McCrary, 300, 17 Fed. 67; *Chicago Dredging & Dock Co.* v. *McMahon* (1888) 30 Ill. App. 358; *Chicago, B. & Q. R. Co.* v. *Blank* (1887) 24 Ill. App. 438; *Mason* v. *Edison Mach. Works* (1886) 28 Fed. 228; *Kansas P. R. Co.* v. *Little* (1877) 19 Kan. 267; *Clowers* v. *Wabash, St. L. & P. R. Co.* (1886) 21 Mo. App. 213; *Rowland* v. *Missouri P. R. Co.* (1886) 20 Mo. App. 463; *Hoke* v. *St. Louis, K. & N. R. Co.* (1882) 11 Mo. App. 574; *Clayhaugh* v. *Kansas City, Ft. S. & M. R. Co.* (1894) 56 Mo. App. 630; and other cases cited in § 524, *infra*,— especially those relating to section, foreman.

[2] *Webb* v. *Richmond & D. R. Co.* (1887) 97 N. C. 387, 2 S. E. 449; *Hamilton* v. *Iron Mountain Co.* (1877) 4 Mo. App. 564, Appx. But the later case is a mere memorandum of the conclusion of the court, and the opinion in the former mentions no precedents, and does not state the grounds on which the conclusion is based to rest. It is therefore impossible to say exactly what were the precise limits of the doctrine intended to be laid down,—especially as the superior servant in both cases was, so far as appears, in control of the work as well as invested with the power of discharge. In any event, the mere fact that the negligent servant may have the right to employ other servants, but not the complainant, will not invest him with the character of vice principal as respects the latter. *Lloyd Coal Min. Co.* v. *McNally* (1881) 15 Ill. App. 181.

delegable duty is that they are none the less representatives of the master because they are not invested with the power of discharge. And such is the effect of most of the decisions.[3] Especially must the nonpossession of this power be immaterial, where the superior servant is of sufficiently high rank to control the employee who actually possesses the power; though, perhaps, it would be more correct to describe such a case as one in which the power is not exercised directly, rather than one in which it is wanting.[4]

The doctrine that an employee without the power of discharge cannot be a vice principal would be a natural deduction from the theory which refers the superior servant doctrine to the obligation of the subordinate to obey duly authorized commands. But the deduction is not a necessary one.[5]

[3] *Deghuish* v. *Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 554 *Carpenter*; *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588; *Glover* v. *Kansas City Bolt & Nut Co.* (1900) 153 Mo. 329, 55 S. W. 88; *Hull* v. *St. Joseph Water Co.* (1892) 48 Mo. App. 356.

The fact that an assistant superintendent of a sawmill reports to the superintendent in regard to the hiring and discharge of his subordinates does not make him the less a vice principal as respects any non-delegable duties imposed on him. *Zontek* v. *Stimson Mill Co.* (1894) 9 Wash. 395, 37 Pac. 310.

In *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916, the court said: "Defendant's contention is that the master should not be held answerable for negligent directions, unless the managing employee is intrusted with the authority to hire and discharge and thereby to enforce obedience to his orders. But that contention ignores the principle on which the master's liability in such circumstances rests. It is part of his personal duty to direct the work he has in hand, and, where it is complex (as that of railroading), to provide and enforce reasonable and necessary regulations of the labor engaged therein. . . . But the master's function of directing a large enterprise must of necessity be intrusted, as to many details, to subordinate employees. In exerting that function they perform the master's part, and for their action (within the scope of that delegated authority, and as to those placed under their orders) the master is responsible, whether the superintending employee has or has not power to hire and discharge, and whatever may be the title by which he is designated."

But it has also been held in Missouri that the head hostler of a roundhouse is a fellow servant, and not the vice principal, of a locomotive fireman and of a "wiper or fire puller" employed in the roundhouse; and his knowledge of the incompetence of the latter employee is not chargeable to the company so as to render it liable for personal injuries to the fireman resulting from such incompetence, where the roundhouse was in charge of a foreman and master mechanic, who alone had the power to hire and discharge servants. *Smith* v. *St Louis & S. F. R. Co.* (1892) 151 Mo. 391, 18 L. R. A. 368, 52 S. W. 378. The differentiating element here seems to be the fact that the hostler was not under any duty to report the incompetence.

[4] *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916, from which an extract is given in the last note, was a case of a roadmaster whose negligence injured a section hand hired by a foreman subject to the roadmaster.

[5] In Illinois, one of the states where this theory has been enunciated (§ 522, subd. (c), *supra*), the capacity of the controlling official is still for the jury, though it is shown that he had no power to discharge. *Fraser* v. *Schroeder* (1896) 163 Ill. 459, 45 N. E. 288; *Foster* v. *Clark* (1884) 15 Ill. App. 470. The contrary seems to be laid down in *Illinois C. R. Co.* v. *Weger* (1895) 65 Ill. App. 5[illegible] (his decision was affirmed in (1899) 177 Ill. 591, 52 N. E. 818, but this particular point was not touched upon.

It has recently been held by the court

From the decisions in North Carolina, it was scarcely possible, until quite lately, to extract a clear doctrine; but it appears to be now settled that, in the absence of evidence that the negligent superior servant had power to discharge the plaintiff, the former is not deemed to be a vice principal.[6]

In Texas the doctrine is that a superior servant is a vice principal when he has the power of hiring and discharging the class of servants to which the injured person belongs, but not otherwise.[7] But

of appeals that the fact that a foreman in a mine had on previous occasions directed the plaintiff, a dirt scratcher, to assist the timber man in propping the roof did not have the effect of constituting the timber man the plaintiff's vice principal on another occasion when the latter complied with the former's request for assistance, since under such circumstances the timber man had no power to compel the plaintiff to do the work, or to discharge him if he refused. *Kellyville Coal Co.* v. *Humble* (1900) 87 Ill. App. 437. But here the essence of the situation seems to be the coemployee's lack of authority to control the plaintiff's actions.

[6] *Bryan* v. *Southern R. Co.* (1901) 128 N. C. 387, 38 S. E. 913 (crew of four men were loading timbers on a car under the direction of another employee).

In *Dobbin* v. *Richmond & D. R. Co.* (1879) 81 N. C. 446, 31 Am. Rep. 512, it was declared that the power of discharge was one of the essential elements of vice principalship. But that decision was distinctly rested on the ground that the delinquent was the head of a department, and, as already stated (§ 518, *supra*), the conception of such a functionary devested of the power of discharge would involve a logical contradiction. The case of *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863, throws no light upon the question, the power being merely enumerated among the foreman's attributes. See extract in § 522, subd. d, *supra*. Where the particular point to which the inquiry is directed is whether the subordinate was justified in obeying the order which led to his injury, it is not essential, in this state, to show that the superior had the power of discharge. Here, however, a special reason is operative; for, if the rule were otherwise, the master would be enabled to evade responsibility by the colorable expedient of arranging that the power of discharge should be lodged in some other agent than the immediate superior, though, as a matter of fact, the latter's recommendations as to dismissal would always be acted upon. See *Turner* v. *Goldsboro Lumber Co.* (1893) 113 N. C. 387, 26 S. E. 23 (§ 441, *ante*). There the *Patton Case* was cited, so that it is possibly a legitimate inference that the rule was considered to be the same when, as in the earlier case, the question was simply whether the superior servant was a vice principal. But the attention of the court does not seem to have been specially directed to the different character of the question involved, and for this reason the real support of the *Patton Case* in the present connection may be regarded as doubtful.

[7] *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835; *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 562; *Gulf, C. & S. F. R. Co.* v. *Wells* (1891; Tex.) 16 S. W. 1025; *Vix* v. *Texas P. R. Co.* (1891) 82 Tex. 373, 18 S. W. 571; *Campbell* v. *Cook* (1894) 86 Tex. 630, 26 S. W. 486; *Texas C. R. Co.* v. *Frazier* (1896) 90 Tex. 33, 36 S. W. 432; *Fort Worth & D. C. R. Co.* v. *Peters* (1894) 87 Tex. 222, 27 S. W. 257, Affirming (1894) 7 Tex. Civ. App. 78, 25 S. W. 1077; *Sumner* v. *Atchison, T. & S. F. R. Co.* (1897) 17 Tex. Civ. App. 337, 43 S. W. 533 (fireman of switch engine not a vice principal as to brakeman of freight train); *Riley* v. *Galveston City R. Co.* (1895) 13 Tex. Civ. App. 247, 35 S. W. 826; *Texas & P. R. Co.* v. *Reed* (1895) 88 Tex. 439, 31 S. W. 1058; *San Antonio & A. P. R. Co.* v. *Reynolds* (1895; Tex. Civ. App.) 30 S. W. 846; *Vaughan* v. *Behring* (1898) 19 Tex. Civ. App. 299, 46 S. W. 917.

It also seems to be held in one of these cases, though the language of the court is somewhat obscure, that the master is not liable unless at the time of the injury the injured servant was working under the immediate supervision and control of the servant who had the power to discharge. *Missouri P. R. Co.* v. *Wil-*

even in this state the master cannot escape liability on the ground that the superior servant through whose negligence in sending an incompetent workman to work with the plaintiff the injury was received had no power to discharge that workman. Under such circumstances the only essential question is whether the superior servant had the power to assign the workman to the duties which he was performing.[8]

Under any theory of the evidential significance of the power of hiring and discharging, the character of the superior servant as a vice principal will not be taken away by the fact that the power can only be exercised subject to the approval of a higher officer.[9] Nor, of course, is there any room for doubt that the possession of the power renders an employee a vice principal as respects the discharge of the correlative duty which it imposes on him, of selecting competent and careful servants.[10] In this connection it is worth noting that the courts, in estimating the significance of the power so far as it bears upon the status of a superior servant, have not always been mindful of the distinction which the nonassignable quality of this duty creates between the cases where the question is whether that duty has been fulfilled, and the cases where the question is merely whether a superior servant shall be regarded as the representative of the master for general purposes.[11]

524. Illustrative cases.— In note 2 are tabulated, under headings calculated to facilitate comparison with the cases collected under the

liams (1889) 75 Tex. 4, 12 S. W. 835; *Galveston, H. & S. A. R. Co.* v. *Farmer* (1889) 73 Tex. 85, 11 S. W. 156, seems to declare that the power of discharge is not a test of vice principalship, except where the duty of selecting competent servants is in question. But if this is its effect, it is clearly contrary to the weight of authority in Texas.

[8] *Missouri P. R. Co.* v. *Patton* (1894; Tex.) 26 S. W. 978, Affirming (1894; Tex. Civ. App.) 25 S. W. 339.

[9] *International & G. N. R. Co.* v. *Hinzie* (1891) 82 Tex. 623, 18 S. W. 681 (foreman of paint shop could discharge only with the consent of the superintendent of the car department) *Fort Worth & D. C. R. Co.* v. *Peters* (1894) 87 Tex. 222, 27 S. W. 257 (immaterial by whom power of discharge was conferred); *Zintek* v. *Stimson Mill Co.* (1894) 9 Wash. 395, 37 Pac. 340 (power exercised by foreman of mill lumber yard, subject to sanction of general superintendent).

"The first and most important question is, When the foreman commands, must the workman obey or be discharged by the foreman or by some other authority to whom the foreman may report the act of disobedience? In such case the effect is the same whether the foreman discharges the workman at once, or only after consultation with his own superior. In either case the procuring cause of the discharge is disobedience to the foreman, which is taken by the railroad authorities as disobedience to the principal." *St. Louis, A. & T. H. R. Co.* v. *Holman* (1894) 53 Ill. App. 617.

[10] See § 572, *post*.

[11] See, for example, the arguments in *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 673, 43 N. W. 415; *Harrison* v. *Detroit, L. & V. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034.

preceding subtitle, the decisions already cited in the present subtitle, as well as others in which the general principles above discussed have been applied, with the result of imposing liability on the master for the acts of the employees referred to.

Some of the cases in which damages have been recovered for an injury received in obeying the order of a superior to do work outside the scope of the original employment have the practical effect of extending the domain of the superior servant doctrine, under these particular circumstances, to courts whose decisions have been reviewed in the preceding subtitle. These cases stand in a class of their own, and depend upon special considerations which are explained in § 465, *ante*.

In another class of cases a doctrine not distinguishable from that of superior and subordinate has been applied for the benefit of minor employees. These decisions also turn upon a special principle of a narrow scope, the boundaries of which are not very clearly defined as yet, except where the gravamen of the action is a default in respect to the duty of instruction. See chapter XVI., *ante*. In the summary, chapter XXX., *post*, are cited some Georgia cases illustrating the more general principle that a higher degree of care is owed to minor employees than to adults, and showing how this principle sometimes produces decisions which, if the employee had been of full age, could only be justified on the theory that any superior servant is a vice principal.

In regard to some of the courts the writer has felt considerable doubt whether the decisions should be cited in this section or among those relating to departmental managers (subd. F, *infra*). To avoid misunderstanding, it will be proper to explain the plan upon which these doubtful cases have been distributed. The position of each state with respect to the superior servant doctrine is assumed to have been fixed by the decision in which its supreme court, when holding a delinquent to be a representative of the master, has gone the furthest down in the scale of supervising employees. Accordingly, if by any decision which is still in force, or which, supposing the common law to have been superseded by a statute, was in force up to the time of the enactment of that statute, a court has predicated liability in respect to acts done by an employee of a lower grade than departmental vice principals, in the sense in which that term is used in the best-considered judgments, every ruling by that court has been included in the subjoined list, although in many instances the delinquent may have been of sufficiently high rank to be possibly, or even

certainly, a departmental principal. If such a decision has been rendered, but was discarded, independently of statutory provisions, no ruling in that particular state is here mentioned, and the discredited decisions are noted under other subtitles. Such an arrangement necessarily excludes from this section all the Federal decisions which embody the superior servant doctrine. These will be found reviewed in chapter XXX., *post.*

The Kansas decisions are tabulated under the present section, for the reason that the most recent of them have unmistakably committed the supreme court of that state to the superior servant doctrine, and thus superseded one or two rulings of a different, or at least doubtful, tenor in the earlier volumes of the reports. See chapter XXX., *post.*

The Georgia decisions which hold a master to be liable for the negligence of superior employees are reserved for subd. F, *infra.* The reasons for this arrangement will be apparent from chapter XXX., *post,* where some cases are noted which are apparently, but, as the writer conceives, not really, applications of the superior servant doctrine.

The cases in Arkansas, North Carolina, and Louisiana are included in this section, for the reason that they predicate vice principalship as to lower grades of employees than is justifiable under the best-considered of the decisions which turn upon the doctrine of departmental control. See chapter XXX., *post.* But it has been found convenient to mention some of the decisions in these states under that subtitle also which relates to departmental managers. See § 535, *infra.*

Virginia and West Virginia, which might, perhaps, for some years have been classed among the states which applied that doctrine, have now abandoned it definitely. See summary, chapter XXX., *post.*

In Missouri a recent case[1] seems to foreshadow a complete change of front as regards the doctrine of superior and subordinate; but for the present it must be numbered among the states which accept that doctrine.

As to the peculiar limitation on the superior servant doctrine which prevails in Kentucky, see the summary of the decisions in that state § 549, *post.*

In the list below, no decision is mentioned except those in which the injury was received by a subordinate under the control of the delinquent employee, for the effect of the general rule stated in § 514 *supra*

[1] *Grattis* v. *Kansas City, P. & G. R. Co.* (1900) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108. See chapter XXX., *post.*

is that, as to persons not under their control, they are mere fellow servants, except in so far as they may be discharging some nonassignable duty owed by the master to those persons.

For brevity's sake, only the designation of the delinquent employee is mentioned, it being understood that, unless otherwise stated, the employee was held to be a vice principal.[2] In the courts which apply

[1](a) *General managing agents.*—See the cases cited under §§ 527, 537, *post*, and also the general remarks in subd. E. F. *infra*, as to the alternative theories by which the ascription to these officials of the status of the master's agents may be conceived to be supported.

(b) *Employees controlling the movements of trains which they do not assist in operating.*—An assistant superintendent is a vice principal. *Chicago, B. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109. Held to be negligent in ordering a freight train forward without making it certain that a passenger train traveling in the opposite direction had an order which could in some manner restrain its speed and regulate its movements so as to guard with certainty against collision.

Under the rule in Tennessee a telegraph operator at a way station, who has no control of or connection with the running of railway trains, except as a medium through which orders from the superintendent's office are communicated to servants of the company in charge of its trains, is not the fellow servant of a train conductor. *East Tennessee, V. & G. R. Co.* v. *De Armond* (1887) 86 Tenn. 73, 5 S. W. 600 (said to be the conductor's superior as a helper of the superintendent; accident was caused by omission of the operator to display a signal to stop an expected train, the result being a collision).

In *West Chicago Street R. Co.* v. *Dreyer* (1894) 57 Ill. App. 440, it was held that, on the evidence, the "starter" of a street railway company was probably a superior servant (plaintiff ordered into position where he was injured owing to grip machinery being out of order).

A railroad company is liable to a section hand for injuries received by a car upon which he is riding in the discharge of his duty coming in contact with a car upon a side track, negligently left by the station agent having control of such track in such a position that a collision was inevitable. *St. Louis, A. & T. H. R. Co.* v. *Biggs* (1894) 53 Ill. App. 550.

(c) *Employees in control of railway trains.*—*Meyer* v. *Illinois C. R. Co.* (1899) 177 Ill. 591, 52 N. E. 818. Affirming (1895) 65 Ill. App. 531 (here, however, recovery was denied on the ground that the negligent act was non official. See §§ 543, 544, *post*); *Mobile & O. R. Co.* v. *Godfrey* (1895) 155 Ill. 78, 39 N. E. 590 (here held not to be a vice principal for all purposes. See chapter XXIX., *post*); *Walker* v. *Gillett* (1898) 59 Kan. 214, 52 Pac. 442 (car driven without warning against a stationary one the coupling of which a brakeman was examining); *Louisville & N. R. Co.* v. *Robinson* (1891) 13 Ky. L. Rep. 153, 16 S. W. 707 (conductor in failing to notify a brakeman that a car had been rendered dangerous to couple by reason of the slipping of lumber on it, at the time he sent him to make such coupling, when he knew of such danger, was guilty of wilful negligence); *Louisville & N. R. Co.* v. *Moore* (1886) 83 Ky. 675 (conductor allowed inexperienced fireman to operate an engine while plaintiff was coupling); *Louisville & N. R. Co.* v. *Mitchell* (1888) 87 Ky. 327, 8 S. W. 706 (vice principal-ship assumed in argument); *Newport News & M. Valley Co.* v. *Deutzel* (1890) 91 Ky. 42, 14 S. W. 958 (conductor failed to stop the rear section of a broken train, the result being that the plaintiff, a brakeman on the forward section, was killed by a collision of the two sections); *Greer* v. *Louisville & N. R. Co.* (1893) 94 Ky. 169, 21 S. W. 649 (speed dangerously increased while brakeman was attempting to uncouple two cars from a moving train; brakeman lost his footing and fell under the cars); *Cincinnati, N. O. & T. P. R. Co.* v. *Palmer* (1895) 98 Ky. 382, 33 S. W. 199 (charge held erroneous which allowed jury to find for the plaintiff in the case of ordinary negligence; see summary of Kentucky decisions in chapter XXX., *post*); *Newport News & M. Valley R. Co.* v. *Carroll* (1895) 17 Ky. L. Rep. 374, 31 S. W. 132 (minor injured in coupling cars under orders of conductor); *Louisville & N. R. Co.* v. *Wallingford* (1893) 15 Ky. L. Rep. 170, 22 S. W. 439 (foreman of construction

train ordered a train to move back while a switchman was coupling, without waiting for a signal from the latter); *Clark* v. *Hughes* (1897) 51 Neb. 780, 71 N. W. 776 (signaled to back cars while brakeman was coupling); *Mason* v. *Richmond & D. R. Co.* (1892) 111 N. C. 482, 18 L. R. A. 845, 16 S. E. 698 (1894) 114 N. C. 718, 19 S. E. 362 (brakeman obeyed order to couple with his hands when the stick required by the rules proved ineffective; here the actual point decided was that the brakeman was not negligent in complying with the order); *Shadd* v. *Georgia, C. & N. R. Co.* (1895) 116 N. C. 968, 21 S. E. 554 (conductor prematurely ordered movement of cars, without ascertaining whether coupling was complete; same point as in last case); *Purcell* v. *Southern R. Co.* (1896) 119 N. C. 728, 26 S. E. 161 (sudden starting of train threw brakeman to the ground); *Haltom* v. *Southern R. Co.* (1900) 127 N. C. 255, 37 S. E. 262 (ordered brakeman to get a stone and scotch a rolling car at night); *Little Miami R. Co.* v. *Stevens* (1851) 20 Ohio, 415 (engineer was injured in a collision resulting from the omission of the conductor to observe his time card); *Cleveland, C. & C. R. Co.* v. *Keary* (1854) 3 Ohio St. 201 (similar accident); *Lake Shore & M. S. R. Co.* v. *Spangler* (1886) 44 Ohio St. 471, 58 Am. Rep. 833, 8 N. E. 467 (assumed in opinion) *Lake Shore & M. S. R. Co.* v. *Knittal* (1878) 33 Ohio St. 468 (flying switch negligently made); *Illinois C. R. Co.* v. *Spence* (1893) 93 Tenn. 173, 23 S. W. 211 (collision caused by conductor's allowing freight train to pass a certain station in violation of the time-card rules injured fireman); *Openshaw* v. *Utah & N. R. Co.* (1889) 6 Utah, 132 (negligent loading of car; piece of timber fell on brakeman). See also Louisiana cases cited in § 535, note 1, subd. (b), *infra*.

Upon principle the liability of the company in the case of conductors of construction or work trains would also seem to be indisputable under the superior servant doctrine, but the authorities are conflicting.

The servant was allowed to recover in *Chicago, St. P. M. & O. R. Co.* v. *Lundstrom* (1884) 16 Neb. 254, 49 Am. Rep. 718, 20 N. W. 198 (conductor of construction train sent a laborer into a cut when a train was known to be due); *Burlington & M. River R. Co.* v. *Crockett* (1886) 19 Neb. 138, 26 N. W. 921 (conductor of gravel train neglected to station a watchman to give notice of danger from a bank caving in, and the under boss of the train was killed by an earth slide); *Louisville & N. R. Co.* v. *Hawkins* (1899) 21 Ky. L. Rep. 354, 51 S. W. 126 (conductor of gravel train was negligent in signaling for the movement of a train); *Miller* v. *Missouri P. R. Co.* (1891) 109 Mo. 350, 19 S. W. 58 (conductor of material train without warning gave signal to start train, the result being that a laborer who was stepping from one car to another was jerked off and run over; see, however, summary of Missouri cases in chapter XXX., *post*); *Dobbin* v. *Richmond & D. R. Co.* (1879) 81 N. C. 446, 31 Am. Rep. 512 (injury caused by fall of gravel bank); *Chicago, B. & Q. R. Co.* v. *Blank* (1887) 24 Ill. App. 438 (conductor of gravel train ordered air brakes to be set suddenly, thereby causing a jerk which threw a laborer off. This case does not refer to the Illinois decisions, *infra*).

But such conductors were held to be mere fellow servants of their subordinates in *Ahrend* v. *Terre Haute & I. R. Co.* (1881) 111 Ill. 202, 53 Am. Rep. 616 (collision caused by the negligence of the conductor of a wrecking train in disregarding his running orders); Followed in *Chicago & A. R. Co.* v. *Mcdonald* (1887) 21 Ill. App. 409. Distinguishing the *Ross Case* and other cases of conductors of regular trains; collision caused by disregard of running regulations; said to be "acting under special order at all times in the movement of his train").

Under the Texas rule (§ 523, *supra*) a conductor, not being invested with the power of discharge, is a mere coservant of the other trainmen. *Campbell* v. *Cook* (1894) 86 Tex. 630, 26 S. W. 486 (negligent management of cars while brakeman was coupling).

To employees whose services a conductor is authorized to command temporarily he bears the same relation as to employees regularly under his control, so far as the liability of the company under this doctrine is concerned. *Ritt* v. *Louisville & N. R. Co.* (1887) 9 Ky. L. Rep. 397, 4 S. W. 796 (train started without warning injured car repairer).

An engineer, though not a vice principal (except, under some circumstances, in Kentucky; see § 514, *supra*) while he is acting under a conductor, becomes, according to some decisions, a vice principal when he is in charge of a train. *East Tennessee & W. N. C. R. Co.* v. *Collins* (1886) 85 Tenn. 227, 1 S. W. 883 (cars negligently backed against

each other); *Cowles* v. *Richmond & D. R. Co.* (1881) 84 N. C. 309, 37 Am. Rep. 620 (but case really turned on proved negligence of defendant as to defective appliances); *Means* v. *Carolina C. R. Co.* (1900) 126 N. C. 424, 35 S. E. 813, Former Appeals (1898) 122 N. C. 990, 29 S. E. 939 (1899) 124 N. C. 574, 45 L. R. A. 164, 32 S. E. 960. He is therefore a vice principal after he has taken charge of the forward section of a train which has separated, where it is his duty to do so under the rules of the company. *Louisville & N. R. Co.* v. *Martin* (1889) 87 Tenn. 398, 3 L. R. A. 282, 10 S. W. 772 (here held, however, to be a mere fellow servant of brakeman, as he had not actually taken charge); *Newport News & M. Valley Co.* v. *Howe* (1892) 3 C. C. A. 121, 6 U. S. App. 172, 52 Fed. 362 (assumed in opinion; but such a doctrine is hardly law in Federal courts since the *Baugh Case*; see § 535, *infra*.

The decisions as to conductors in South Carolina, Virginia, West Virginia, and the Federal courts will be noticed in subd. F, *infra*, and chapter XXX., *post*.

(d) *Supervising employees in railway yards and depots.*—A yardmaster having charge of making up trains, handling cars in the yard, and having control of the switchmen. *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302 (ran cars against the car which injured servant was repairing); *Taylor* v. *Missouri P. R. Co.* (1891; Mo.) 16 S. W. 206 (improvised a coupling by the use of a piece of a brakebeam rod, and inserted it in such a manner that it fell out when the cars were in motion); *Chicago, R. I. & P. R. Co.* v. *Touhy* (1887) 26 Ill. App. 99 (but negligence was held to be non-official here); *Norris* v. *Illinois C. R. Co.* (1899) 88 Ill. App. 614 (negligence as to order not to put out a signal caused collision).

An assistant yardmaster. *Gravelle* v. *Minneapolis & St. L. R. Co.* (1882) 3 McCrary, 352, 10 Fed. 711 (in charge to jury; but this case is no longer law under the more recent decisions of the supreme court denying vice principalship to any lower grade than heads of departments; see subd. F, *infra*).

A night yard master with power to discharge switchmen. *Texas & P. R. Co.* v. *Reed* (1895) 88 Tex. 439, 31 S. W. 1058.

A yard foreman. *San Antonio & A. P. R. Co.* v. *Reynolds* (1895; Tex. Civ. App.) 30 S. W. 846 (charge erroneous which failed to state differentiating significance of the power or want of power to discharge).

A foreman of one of several switching crews. *Armstrong* v. *Oregon Short Line & U. N. R. Co.* (1893) 8 Utah, 420, 32 Pac. 693 (cars backed violently against one which one of the switchmen was coupling in the nighttime).

A foreman of a switching crew. *Louisville & N. R. Co.* v. *Hurst* (1892) 14 Ky. L. Rep. 632, 20 S. W. 817 (negligence *per se* so to station himself when he knows that a member of the crew is between the cars attempting to uncouple them, that signals of danger can be given by him to the engineer only through the fireman of the engine).

The foreman of a railway lumber yard. *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288 (a car the bumper of which supported some planks projecting over the end of a push car being removed by the foreman's orders; the push car was tilted up and thrust onward so as to crush the plaintiff's intestate against the other car). An official similarly described was held to be a departmental manager, in *Baldwin* v. *St. Louis, K. & N. W. R. Co.* (1888) 75 Iowa, 297, 39 N. W. 507.

A foreman of car repairers. *Hannibal & St. J. R. Co.* v. *Fox* (1884) 31 Kan. 586, 3 Pac. 320 (failed to protect subordinate from moving cars); *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588 (same breach of duty); *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302 (same breach of duty); *St. Louis, A. & T. H. R. Co.* v. *Holman* (1894) 53 Ill. App. 617 (allowed car under repair to stand where it was so close to an adjoining track that a car moving thereon struck it); *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342 (failed to secure a servant repairing a car against the approach of other cars); *Lake Shore & M. S. R. Co.* v. *Laralley* (1880) 36 Ohio St. 221 (car allowed to strike the one under which the plaintiff was working).

A car repairer deputed by the master workman to instruct as to his duties the plaintiff, a new employee who was to take his place. *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 679, 43 N. W. 415 (failed to protect new employee against moving cars).

On the other hand a "hoss wiper" who is the foreman of a gang of wipers employed by a railroad company to wipe its locomotives, and directs them when to work and what to do, is their fellow servant, and not a vice principal. *Knox*

v. *Southern R. Co.* (1898) 101 Tenn. 375, 47 S. W. 491 (wiper injured by engine moved under the orders of the foreman; this case seems to indicate some change of view in this state as to the scope of the superior servant doctrine; see summary of decisions in chapter XXX., *post*).

The foreman of an electric railway company at its car shed is a vice principal. *Metropolitan West Side Elev. R. Co.* v. *Skola* (1900) 183 Ill. 454, 56 N. E. 171 (ran cars himself on to the repair track, and injured a repairer).

(e) *Employees supervising the loading of railway cars.*—A foreman in charge of gang loading or unloading cars, and giving orders as to the manner of unloading. *Higgins* v. *Missouri P. R. Co.* (1890) 43 Mo. App. 547 (failure to furnish chain to prevent tipping of car); *Proctor* v. *Missouri, K. & T. R. Co.* (1890) 42 Mo. App. 124 (foreman without warning ordered workmen to throw to the ground a rail which plaintiff was helping to raise to the side of a car to serve as a skid, and which he supposed was about to be placed as other rails had been).

(f) *Employees supervising track work on railways.*—The general road master of a line. *Hoke* v. *St. Louis, K. & N. W. R. Co.* (1885) 88 Mo. 360. Reversing (1882) 11 Mo. App. 574 (road master carelessly gave a wrong signal to engineer, the result being that he started his engine in the wrong direction, and drew a car from under the wrecked car, allowing it to fall on plaintiff, a laborer.

A road master. *Stoddard* v. *St. Louis, K. C. & N. R. Co.* (1877) 65 Mo. 514 (failure to employ another man where force was inadequate; possibly decided rather on the ground of a breach of a non-delegable duty than under the superior servant doctrine); *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916 (section man injured by a rail thrown on to the car where he was by the orders of the road master); *Thompson* v. *Chicago, M. & St. P. R. Co.* (1883) 5 McCrary, 542, 18 Fed. Rep. 239 (assumed in charge to jury; not law under recent supreme court decisions; question was whether the failure to protect laborers from a bank which fell was due to a want of care).

A division road master. *Browning* v. *Wabash Western R. Co.* (1894) 124 Mo. 55, 24 S. W. 731, 27 S. W. 644 (removal of brake staff caused engineer's death);

As to *Rains* v. *St. Louis, I. M. & S. R. Co.* (1879) 71 Mo. 164, 36 Am. Rep. 459 (brakeman killed by low overhead bridge), which denies that a road master is a vice principal, see chapter XXX., *post*.

A section boss or track foreman *Chattanooga Electric R. Co.* v. *Lawson* (1898) 101 Tenn. 406, 47 S. W. 489 (ordered to board a moving car; held to be an official act, as it was done in the discharge of his function of controlling the cars); *Gann* v. *Nashville, C. & St. L. R. Co.* (1898) 101 Tenn. 380, 47 S. W. 493 (nonofficial negligence in this case); *Illinois C. R. Co.* v. *Bolton* (1897) 99 Tenn. 273, 41 S. W. 442 (except when engaged in manual labor, as in this case); *Louisville & N. R. Co.* v. *Bowler* (1872) 9 Heisk. 866 (nature of negligent act not stated); *Schroeder* v. *Chicago & A. R. Co.* (1891) 108 Mo. 322, 18 L. R. A. 827, 18 S. W. 1094 (laborer injured by a hand car which was struck by a train while the section gang were attempting to get it off the track); *McDermott* v. *Hannibal & St. J. R. Co.* (1885) 87 Mo. 285 (same facts); *Stephens* v. *Hannibal & St. J. R. Co.* (1885) 86 Mo. 221, Second Appeal (1888) 96 Mo. 207, 9 S. W. 589 (laborer injured in complying with an order to get a large stone off the track when a train was approaching); *Russ* v. *Wabash Western R. Co.* (1892) 112 Mo. 45, 18 L. R. A. 823, 20 S. W. 472 (water keg rolled off hand car, owing to carelessness of foreman, who had used it for a while as a seat, and then jumped up and left it unsecured); *Rowland* v. *Missouri P. R. Co.* (1886) 20 Mo. App. 463 (assured laborer that the end of a rail about to be thrown on a car was free; not being so it rebounded and struck the laborer); *Clowers* v. *Wabash, St. L. & P. R. Co.* (1886) 21 Mo. App. 213 (foreman knowing hand car was defective failed to report it); *Banks* v. *Wabash Western R. Co.* (1890) 40 Mo. App. 458 (hand car allowed to become unsafe); *Herriman* v. *Chicago & A. R. Co.* (1887) 27 Mo. App. 435 (rail which plaintiff was ordered to remove from the track caught under another rail and flew back and struck plaintiff; foreman not assisting); *Claybaugh* v. *Kansas City, Ft. S. & M. R. Co.* (1894) 56 Mo. App. 630 (dangerous method of loading ties on cars *Hetson* v. *Missouri P. R. Co.* (1892) Mo. App. 300 (injury caused by foreman's use of pick); *Louisville & N. R. Co.* v. *Bass* (1897) 19 Ky. L. Rep. 1474, 43 S. W. 463 (negligence in management of hand car not shown); *Chicago & A. R. Co.* v. *Goltz* (1897) 71 Ill. App. 414 (injury received in operation of hand

car; denied to be negligent in this instance); *Chicago, St. L. & P. R. Co.* v. *Goss* (1889) 35 Ill. App. 178, Affirmed in (1890) 133 Ill. 37, 24 N. E. 563 (gave no warning of the approach of a train); *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863 (track man injured by jumping from a moving hand car in obedience to the orders of his foreman); *Logan* v. *North Carolina R. Co.* (1895) 116 N. C. 940, 21 S. E. 959 (injury caused by obedience to order to remove a hand car from the track when a train was approaching); *Johnson* v. *Southern R. Co.* (1898) 122 N. C. 955, 29 S. E. 784 (hand car was started on a curve where an expected train could not be seen); *Missouri P. R. Co.* v. *James* (1888; Tex.) 10 S. W. 332 (derailment caused by defective hand car and defective track which foreman had promised to repair); *Succum* v. *Gulf, C. & S. F. R. Co.* (1892) 84 Tex. 433, 19 S. W. 555 (threw switch prematurely while hand car was moving on to the main line, the result being a derailment); *Gulf, C. & S. F. R. Co.* v. *Wells* (1891; Tex.) 16 S. W. 1025 (derailment of defective hand car); *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339 (did not signal the approach of a train). *Criswell* v. *Pittsburgh, C. & St. L. R. Co.* (1888) 30 W. Va. 798, 6 S. E. 31 (foreman disregarded rules promulgated for the purpose of securing the safe running of hand cars); *Gregory* v. *Ohio River R. Co.* (1893) 57 W. Va. 606, 16 S. E. 819 (section hand injured while on a hand car taken out on a Sunday by order of the foreman, but in contravention of a rule forbidding this to be done without the consent of the road-master).

It is probable that the last three decisions are no longer good law in the states where they were rendered. See chapter XXX., *post*.

As to the status of section foreman in South Carolina, see chapter XXX., *post*.

(g) *Employees supervising various kinds of construction work.*—A superintendent of construction on a railway is a vice principal. *Kansas P. R. Co.* v. *Little* (1877) 19 Kan. 267 (defective machinery furnished). Under the more recent decisions in some states, such an employee would be regarded as a departmental manager. See § 535, note 1, subd. (c), *infra*.

A jury is justified in ascribing, as regards an employee engaged in loading bridge materials, the character of a vice principal to another employee spoken of as assistant superintendent, or as foreman, in charge of the structural iron work of a bridge company, with authority to direct the foreman of the yard where the material is stored to get it out and load it for transportation. *Pittsburg Bridge Co.* v. *Walker* (1897) 70 Ill. App. 55, Affirmed in (1897) 170 Ill. 550, 48 N. E. 915 (dispensed with a tag-line which should have been used to steady a piece of the framework of the bridge while being transported to its place, and attempted to steady it with his hands).

The following employees are vice principals:

A foreman of bridge builders. *Bloyd* v. *St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 22 S. W. 1089 (as to this case, see chapter XXX., *post*); *St. Louis, A. & T. R. Co.* v. *Torrey* (1893) 58 Ark. 217, 24 S. W. 244 (case went off on point that negligent act was one done as a mere servant; see §§ 543, 544, *post*).

A foreman of a gang of carpenters. *Hiller* v. *Union P. R. Co.* (1883, 5 McCrary, 300, 17 Fed. 67 (assumed in charge to jury in a case where the injury resulted from an order to use a hand car for transporting the gang; not law under recent decisions of the supreme court; see chapter XXX., *post*); *Leiter* v. *Kinmare* (1896) 68 Ill. App. 558 (improper order).

A foreman of a gang engaged in the business of repairing bridges, water tanks, and telegraph lines along a railway. *Sioux City & P. R. Co.* v. *Smith* (1888) 22 Neb. 775, 36 N. W. 285 (sudden application of brake to hand car by the foreman threw plaintiff off).

A foreman of a pile driving crew. *Fremont, E. & M. Valley R. Co.* v. *Leslie* (1894) 41 Neb. 159, 59 N. W. 559 (insufficient number of men detailed to stay the driver while it was being moved).

A foreman in charge of the construction of a telegraph line. *Postal Teleg. Cable Co.* v. *Coote* (1900; Tex. Civ. App.) 57 S. W. 912 (hiring of incompetent fellow servant was the negligence alleged).

A foreman in full control of the work of constructing a line of telegraph, with power to discharge the workmen. *Ivers* v. *Cumberland Teleph. & Teleg. Co.* (1900) 52 La. Ann. 2153, 28 So. 367 (too much power was, by the foreman's order, brought to bear upon a pole which was being braced and straightened).

An employee supervising the work of taking down a building. *Faren* v. *Sellers*

(1887) 39 La. Ann. 1011, 3 So. 363 (unsafe method of demolition adopted).

A foreman of a gang of carpenters engaged in erecting a new floor in a building. *Pullman's Palace Car Co.* v. *Harkins* (1893) 5 C. C. A. 326, 17 U. S. App. 22, 55 Fed. 932 (inexperienced workman set to work in a dangerous place: not law according to the late decisions of the supreme court: see chapter XXX., *post*).

A foreman in charge of the construction of a building. *Heckman* v. *Hackey* (1888) 35 Fed. 353 (pitfall created in the absence of the plaintiff by an order to a coemployee to remove a securely fastened plank in a staging, and substitute another which was left loose: hardly law under recent decisions of the supreme court, unless—which the report does not show—the foreman was a general agent).

A foreman of carpenters putting in car scales. *Kansas City Car & Foundry Co.* v. *Scevist* (1898) 59 Kan. 778, Appx. (beam fell owing to removal of props).

An assistant foreman in charge of the drilling of a well. *Nix* v. *Texas P. R. Co.* (1891) 82 Tex. 473, 18 S. W. 571 (engineer managing stationary engine was injured by the sudden application of steam to the machinery without any warning).

A foreman of a crew engaged in the construction of a turntable. *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298 (1885) 88 Mo. 293 (inexperienced boy was ordered to stop an engine, and was injured by a set screw while attempting to step over a revolving shaft).

A foreman in charge of the removal of the roof of a building. *Sullivan* v. *Hannibal & St. J. R. Co.* (1891) 107 Mo. 66, 17 S. W. 748 (staging which foreman had assured plaintiff was safe gave way: here, as plaintiff had nothing to do with its construction, the case is also covered by the principle that the duty to provide a safe place of work is non-delegable).

A railroad foreman in a gravel pit, having full charge of the work, with power to hire and discharge men and to direct and control their work. *Anderson* v. *Ogden Union R. & Depot Co.* (1892) 8 Utah, 128, 30 Pac. 305 (plaintiff crushed by caving of bank, owing to fact that he did not receive customary warning).

The foreman in charge of the removal of an embankment. *Bradley* v. *Chicago, M. & St. P. R. Co.* (1897) 138 Mo. 293, 39 S. W. 760 (laborer sent to work on a place where there was danger of the earth falling).

A foreman of a water company supervising the excavation of a reservoir. *Hall* v. *St. Joseph Water Co.* (1892) 48 Mo. App. 356 (walls of trench fell in).

A foreman supervising the construction of a city sewer. *Chicago* v. *Cronin* (1900) 91 Ill. App. 466 (ordered pipe to be lowered in an improper manner).

A city engineer acting as foreman of the work of constructing a sewer. *La Salle* v. *Kostka* (1901) 190 Ill. 130, 60 N. E. 72. Affirming (1900) 92 Ill. App. 91 (side of sewer not properly braced).

(b) *Foremen in the mechanical departments of railway companies.*—A master mechanic in railway repair shops. *Douglas* v. *Texas Mexican R. Co.* (1885) 63 Tex. 564 (negligent order).

That a wrecking train was under the supervision of a conductor will not render the master mechanic traveling upon the train a fellow servant with a bridge carpenter of whom he has the full control. *Tabler* v. *Hannibal & St. J. R. Co.* (1887) 93 Mo. 79, 5 S. W. 810. In any orders given within the scope of his authority—as, in directing the material of which a coupling shall be made, where there is no drawhead,—he represents the company.

Master mechanics are by some courts regarded as departmental vice principals. See § 535, note 1, subd. (c), *infra*.

A foreman in a machine shop. *Missouri P. R. Co.* v. *Peregoy* (1887) 36 Kan. 424, 14 Pac. 7 (ignorant apprentice set, without notice or instruction, to do work which was dangerous to any one but a skilled mechanic; here, be it observed, the duty violated was a non delegable one).

The foreman of a railway car-repairing shop. *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835 (foreman broke his promise to protect car repairer from moving cars).

An employee in charge of a roundhouse, the engines, and men necessary to care for them. *Dayharsh* v. *Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 554 (moved engine upon plaintiff without warning).

A foreman of a wrecking crew (here spoken of as being in charge of a gang carrying on a particular branch of the business). *Wabash, St. L. & P. R. Co.* v. *Hawk* (1887) 121 Ill. 259, 12 N. E. 253 (floor of wrecked car fell, owing to inadequacy of propping).

A wreckmaster has also been considered to be a vice principal, as being the head of a department. *Borgman* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 667. See, however, chapter XXX., *post*, as to the authority of this case in Federal courts.

The foreman of the paint shop of a railway company. *International & G. N. R. Co.* v. *Hinzie* (1891) 82 Tex. 623, 18 S. W. 681 (plaintiff set to work painting cars without having been instructed as to a rule requiring men working on side tracks to set out signal flags).

An engineer is a vice principal as regards a common laborer subject to his directions. *Baltimore & O. R. Co.* v. *Sutherland* (1894; Ohio C. C.) 1 Toledo Leg. News, 388.

(i) *Employees in charge of machinery.*—A feeder of a planing machine as regards a boy under his orders. *Foster* v. *Clark* 1884) 15 Ill. App. 470 (boy injured in obeying an order to pull a shaver out of a planing machine).

A foreman supervising a gang hoisting stone with a derrick. *Union P. R. Co.* v. *Fray* (1890) 43 Kan. 750, 23 Pac. 1039 (defective machinery).

The foreman of a dredger. *Chicago Dredging & Dock Co.* v. *McMahon* (1888) 30 Ill. App. 358 (injury caused by compliance with a negligent order).

A foreman of a machine factory. *Huson* v. *Edison Mach. Works* (1886) 24 Blatchf. 93, 28 Fed. Rep. 228 (accident occurred in the moving of heavy machinery which plaintiff was left to hold up alone; not law since recent decisions of the supreme court, unless foreman was a general agent, which the report does not show; see chapter XXX., *post*).

(j) *Supervising employees in manufacturing establishments.*—An operator of a machine. *Norton Bros.* v. *Vadebok* (1901) 190 Ill. 595, 54 L. R. A. 842, 60 N. E. 843 (helper injured by starting of machine while he had his hand inside it); *Glover* v. *Kansas City Bolt & Nut Co.* (1899) 153 Mo. 327, 55 S. W. 88 (plaintiff injured by stumbling against a shearing machine immediately after it was started; held, that there was no evidence to show that the operator could by ordinary care have seen the danger before starting the machine).

A foreman in a sugar refinery. *Groszewski* v. *Chicago Sugar Ref. Co.* (1899) 84 Ill. App. 583 (ordered a servant to shove a car through a door, without warning him that there was not space enough to walk between the car and the sides of the door).

A foreman of a foundry. *Fitzgerald* v. *Honkomp* (1892) 44 Ill. App. 305 (negligence as regards order denied upon the evidence).

The foreman of a steel company (apparently not the general manager). *Illinois Steel Co.* v. *Schymanowski* (1896) 162 Ill. 447, 44 N. E. 876 (foreman struck the side of a loose pike of ore, thereby causing a large piece to fall on plaintiff).

A foreman in charge of a mill and vested with power to employ and discharge employees. *Sulphur Lumber Co.* v. *Kelley* (1895; Tex. Civ. App.) 30 S. W. 696 (machinery not stopped to make necessary repairs).

A foreman of a sawmill. *Sulphur Lumber Co.* v. *Kelley* (1895; Tex. Civ. App.) 30 S. W. 696 (did not stop machinery to examine it, when there were indications that something had gone wrong); *Lawrence* v. *Hagemeyer & Co.* (1892) 93 Ky. 591, 20 S. W. 704 (omitted to have machinery repaired as he had promised).

A foreman of a fertilizer company's business. *National Fertilizer Co.* v. *Travis* (1899) 102 Tenn. 16, 49 S. W. 832 (started machinery without warning).

The foreman of a meat packing establishment. *Libby, McN. & L.* v. *Scherman* (1893) 146 Ill. 540, 34 N. E. 801, Affirming (1892) 50 Ill. App. 123 (barrels carelessly piled fell).

Some of the above employees, it will be observed, were of a grade which placed them nearly, if not quite, in the class of general managers; but whether they were really such was a question not necessary to be considered, the superior servant doctrine being decided in fixing their position.

In Arkansas the foreman of the oil department of a compress company's establishment has been held a vice principal. *Ft. Smith Oil Co.* v. *Slover* (1893) 58 Ark. 168, 24 S. W. 106. But this is perhaps intended as an explicit adoption of the doctrine of departmental control. See chapter XXX., *post*. In any event, the default alleged was in respect to the nondelegable duty of instruction, and might be rested on that ground alone.

(k) *Supervising employees in smelting works.*—See the Kansas case cited under § 555, note 1, subd. (h), *infra*.

(l) *Employees supervising the moving of heavy articles.*—An employee super-

the superior servant doctrine there is no difference of opinion as to the responsibility of a railway company for the negligence of a conductor of a regular freight or passenger train. As to whether, under the superior servant doctrine, a conductor is a vice principal as to employees not controlled by him, see § 514, note 1, *supra*, and compare § 535, note 1, subd. b, *infra*.

E. Relation of a general managing agent to his subordinates.

525. Introductory.— From a very early period in the development

vising the hoisting of a heavy box. *Fraser* v. *Hand* (1889) 37 Ill. App. 153 (unsafe method adopted for hoisting).

A foreman of a gang of men engaged in lifting heavy pieces of machinery. *Fraser* v. *Schroeder* (1896) 163 Ill. 159, 45 N. E. 288 (manner of incompetent servant's obedience to order to stop machinery caused injury).

(m) *Employees supervising the loading of vessels.*—An employee superintending the entire work of unloading coal barges at the wharf of a foundry. *Devany* v. *Vulcan Iron Works* (1877) 4 Mo. App. 236 (scaffold so defectively constructed that, when a laborer stepped on it, it fell and crushed plaintiff). Possibly this case is intended as an application of the "head of department" theory, as the phraseology appropriate to that theory is employed. But see § 521, n. *supra*.

(n) *Foreman in quarries.*—A foreman of a quarry belonging to a railway company. *Kansas City, Ft. S. & M. R. Co.* v. *Hammond* (1894) 58 Ark. 324, 24 S. W. 723 (laborer allowed to remain on the track when a train was known to be approaching).

The foreman of a quarry. *Berea Sto. Co.* v. *Kraft* (1877) 31 Ohio St. 287, 27 Am. Rep. 510 (foreman himself attached the hooks of a hoisting apparatus to a large stone which was so soft that chains should have been used). As to official in this position who is in some cases treated as a general manager, see § 527, *infra*.

One of three subordinate foremen in a quarry. *Cox* v. *Syenite Granite Co.* (1890) 39 Mo. App. 424 (plaintiff was ordered back to work from place where he had gone for safety while a boatload of stone was being swung to the top of the quarry cliff by a derrick, and was struck by a stone which fell back over the cliff after the boat had passed the derrick. Contention of defendant was that the foreman was not the defendant's vice principal in signaling the plaintiff to return to work, because a motion of the hand could not be construed into an order.

(o) *Foremen in mines.*—A pit boss in a mine having authority to command the workmen in respect to what work they shall do, and when they shall discontinue. *Consolidated Coal Co.* v. *Woolbacher* (1890) 134 Ill. 57, 24 N. E. 627. Affirming (1889) 31 Ill. App. 288 (order to work under a dangerous portion of the roof).

An underground manager. *Somerville* v. *Gray* (1863) 1 Sc. Sess. Cas. 3d series, 768; *Hardie* v. *Addie* (1858) 20 Sc. Sess. Cas. 2d series, 553 (roof fell in); these two decisions are inconsistent with later cases, especially *Wilson* v. *Merry*. See § 529, *infra*.

A foreman in full charge of a coal mine underground. *Cunningham* v. *Union P. R. Co.* (1885) 4 Utah, 206, 7 Pac. 795 (overhanging piece of coal fell); *Trihay* v. *Brooklyn Lead Min. Co.* (1886) 4 Utah, 468, 11 Pac. 612 (plaintiff injured by fall of roof of untimbered stope).

A mine boss who has control of a mine, with power to hire and discharge employees. *Wellston Coal Co.* v. *Smith* (1901) 65 Ohio St. 70, 55 L. R. A. 99, 61 N. E. 143 (mine owner chargeable with knowledge of boss).

An assistant manager. *Consolidated Coal Co.* v. *Gruber* (1900) 188 Ill. 584, 59 N. E. 254. Affirming (1900) 91 Ill. App. 15 (operated machine for the purpose of testing it).

(p) *Officers of ships.*—Several cases decided in the lower Federal courts before the date of the *Ross Case* proceed upon or countenance the theory that the officers of a ship are vice principals. These are clearly contrary to the weight of authority in the Federal courts. See § 520, note 1, subd. (p), *supra*, and chapter XXX., *post*.

of the doctrine of common employment, one of the currents of judicial authority has set strongly towards the theory that a master ought not to be allowed to escape the consequences of the rule which fastens liability upon him for his personal negligence by transferring the entire control of his business to an agent.[1] Such a theory obviously involves the practical result that, as we ascend the scale of supervising employees, a grade is at length reached at which the representative character of the employee becomes the controlling element in the case, superseding *pro tanto* the operation of the doctrine that the defense of common employment is none the less available to the master for the reason that the negligent servant was of higher rank than the one injured. Whether the corresponding situation should, under the so-called superior servant doctrine, be regarded as one of substitution or merger, is not very material, since in either case the master's responsibility, so far as appears, will be precisely the same.

In another line of decisions may be traced the influence of the opposite view, that the principle by which a servant is charged with an assumption of the risks of a fellow servant's negligence, on the ground that such negligence is one of the ordinary and known incidents of his relations to his master, is universal in its application, and must prevail even when it comes into conflict with the principle of accountability for the defaults of a general agent.

Before we proceed to the examination of the cases which support each of these two views, it is proper to remark that the only kind of functionary with which we are properly concerned in this and the following subtitles is an employee who may be described as being "retained generally to represent the principal in his absence;"[2] or as one whom the master substitutes for himself in the superintendence of his business;[3] or as an agent in whose hands the master "has placed the entire charge of the business or a distinct branch of it, exercising no

[1] See cases referred to in § 526, note 1, *infra*, for examples of this trend of opinion not many years after the establishment of that doctrine in the *Priestley* and *Farwell Cases*, in 1837 and 1842 respectively.

Murphy v. *Smith* (1865) 19 C. N. S. 361, 12 L. T. N. S. 605. Compare *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369, where the court laid stress on the fact that the master gave no personal attention to the business. In *Conway* v. *Belfast & N. Counties R. Co.* (1877) Ir. Rep. 11 C. L. 345, it was suggested that a servant should not be deemed the *alter ego* of the employer, unless he had been invested with such authority that, as between him and the employee, nothing done by him in relation to the business of which he had control would be an unauthorized act.

Plainly, the directors of a corporation must, at all events, be its representatives in all respects where the safety of the employee is concerned. *Rose* v. *Boston & A. R. Co.* (1874) 58 N. Y. 217; *Brickner* v. *New York C. R. Co.* (1870) 2 Lans. 506.

[2] *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324.

authority and superintendence of his own therein;"[4] or as one employed to superintend the employer's entire business;[5] or as one to whom "full power to manage a business and employ and discharge servants, without interference," has been delegated by an employer.[6] Obviously these descriptions are not fulfilled where the evidence fails to show that the alleged vice principal was vested with the whole power and authority of the master in the conduct of the business,[7] either as a whole, or as regards a single department of it which was so distinct from and independent of the others that the authority delegated to the employee supervising it resembled in its nature and extent that which is wielded by a manager of an entire establishment. See subd. F, *infra*.

At least one case which, at first sight, would seem to commit the court to a total rejection of the doctrine that a master is responsible for the acts of a general manager may be explained on the ground that the test thus indicated was, under the circumstances, not satisfied.[8] Other cases in which recovery was denied present facts which place them near the border line, and the functions of the negligent employee and the precise grounds on which the court proceeded are not stated with sufficient fulness to indicate whether they really embody the principle that even general agents are not vice principals, or are simply intended as affirmations of the rule that all controlling employees, however high their rank, are mere fellow servants until the level of general agents is attained.[9] Indeed, it is often impossible, in perusing some of the opinions, to avoid the suspicion that judges have not

[4] *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 439. Compare the language employed by this court in *Frazier* v. *Pennsylvania R. Co.* (1860) 38 Pa. 104, 80 Am. Dec. 467; *Irdesco Oil Co.* v. *Gilson* (1869) 63 Pa. 150; *Hullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2; *Lewis* v. *Reifert* (1887) 116 Pa. 628, 11 Atl. 514; *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50.

Coulson v. *Leonard* (1896) 77 Fed. Rep. 538 (*arguendo*).

[5] *Shumway* v. *Walworth & N. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251.

[6] *Schultz* v. *Chicago, M. & St. P. R. Co.* (1879) 48 Wis. 375, 4 N. W. 399; *Hoth* v. *Peters* (1882) 55 Wis. 405, 13 N. W. 219. In the latter case recovery was sought on the sole ground that one of the several foremen of a nonresident defendant's lumber yard directed a car to be started when he knew that the plaintiff occupied a dangerous position on the car; but the court considered that such an allegation did not bring the case within the rule applicable where the whole power and authority of the master are vested in the employee who gives the order.

[8] See *Feltham* v. *England* (1866) L. R. 2 Q. B. 33, 7 Best & S. 676, 36 L. J. Q. B. N. S. 14, 15 Week. Rep. 151 (several freshly built piers collapsed), setting aside verdict in (1865) 4 Fost. & F. 460, where the master, though he was not present when the accident occurred, had retained a general control over the work.

[9] Some of the Massachusetts cases cited in § 520, note 1, subd. (1), *supra*, are of this doubtful color. But the recent case of *Merchau* v. *Speirs Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518, as well as others noted in § 530, *infra*, leave no doubt as to real position of this court.

always realized adequately the extreme importance of marking and taking into account the fundamental distinction which may fairly be said to exist on strictly logical grounds, as it certainly does according to many authorities, between the situations in which there is or is not an entire abdication by the master of the management of his business.

Another source of difficulty for the commentator is that the courts frequently do not make it entirely clear whether their decisions were based upon the general agency of the delinquent, as a deputy master for all purposes, or upon the narrower ground that his delinquency involved the breach of some specific non-delegable duty for which the employer would be responsible quite irrespective of the rank of the delinquent. In a large number of instances this question is of no practical importance, so far as regards the servant's right of recovery. But as long as there is so wide a difference of opinion respecting the limits of the so-called "official acts" of supervising employees for which the master should be held responsible (see (G), *post*), there must remain a considerable residuum of cases in which the distinction between the consequences of a general agency and of an agency in regard to the particular duty shown to have been violated will always be material. A difficulty of the same kind, but of exactly the opposite character in its bearing on the servant's rights, has been noticed in § 520, *supra*.

In view of the uncertainties by which an exact classification of the authorities is, under these circumstances, embarrassed, it has been deemed advisable to note in the succeeding sections a considerable number of rulings which might possibly be assigned with equal propriety to the following chapter.

526. Doctrine that a general manager is a vice principal. English, Scotch, and colonial cases.— In the earlier periods of the development of the doctrine of common employment in England, we find several more or less distinct recognitions of the principle that the case of general managers constituted an exception to the rule which precluded recovery for the negligence of a coservant.[1]

[1] In *Paterson* v. *Wallace* (1854) 1 Macq. H. L. Cas. 748, the point actually determined by the House of Lords was that the trial judge was not justified in holding, as matter of law, that the plaintiff, a miner, was guilty of contributory negligence in continuing to work at a place where he knew that the roof of a drift was rendered dangerous by a large stone which ultimately fell upon him after the underground manager had given orders to have it removed. The real scope of the decision is therefore narrow; but the remarks made by two of the members of the House are only intelligible upon the hypothesis that they regarded the mine owner as responsible for the negligence of his manager. Lord Brougham said that the defendants were, beyond all doubt, answerable for the negligence of the manager. Lord Cranworth, in one part of his opinion, was equally emphatic on the same side, declaring it to

be good law "that if Snedden, the defenders' manager, had failed in his duty in timeously directing the stone in question to be removed, it would afford no defense that Paterson [the plaintiff] had continued to work after the orders for the removal of the stone had been ultimately given." In another passage he seems inclined to go even further, though the language used was more guarded. In commenting upon the point made by plaintiff's counsel in his exception taken to the action of the judge in withdrawing the case from the jury, *viz.*, that, if the plaintiff continued so to work in consequence of the directions of the roadsman the defenders were responsible for such directions, he said: "That may be right or wrong: for we have no evidence to show what is the character of a 'roadsman.' This, therefore, would require further explanation. If a 'roadsman' is, according to the rules and regulations of Scotch mines, a person whose province it is to direct the workmen whether they may safely work or not, the law stated in the exception may be correct." These expressions of opinion are peculiarly interesting when it is remembered that the same noble lord concurred fourteen years afterwards in the decision in *Wilson* v. *Merry* (§ 529, *infra*). Still more remarkable is the fact that the clear recognitions of the doctrine of vice principalship in *Paterson* v. *Wallace* should have been so completely ignored in the later case.

In *Potts* v. *Plunkett* (1866) 9 Ir. C. L. Rep. 290, Lefroy, Ch. J., construed *Paterson* v. *Wallace* as being a decision based on the broad principle that a master "is liable . . . for the acts and default of those whom he places in his stead and to whom he deputes his authority." Mr. Bevens comment on this gloss (1 Neg. 738) is that it is "manifestly an inaccurate statement of the law." Too broad and sweeping, undoubtedly it is; for under such a principle, taken literally, even a mere foreman of subordinate rank would be a vice principal. But the remarks of Lord Brougham and Lord Cranworth, referred to, certainly justify the inference that they considered some classes of supervising employees to be deputies of the master in such a sense that he must answer for at least a portion, if not all, of their acts. And this is all that Chief Justice Lefroy seems to mean.

In the same year that *Paterson* v. *Wallace* was decided, Lord Cranworth and Lord Chelmsford expressed a qualified approval of the Scotch case of *O'Rourke* v. *Burn* (1854) 16 Sc. Sess. Cas. 2d Series, 1025, where a young girl was injured while she was working on a machine, of the peculiar dangers of which she was not aware. The former said: "It may be that, if a master employs inexperienced workmen, and directs them to act under the superintendence and to obey the orders of a deputy whom he puts in his place, they are not, within the meaning of the rule, employed in a common work with the superintendent. They are acting in obedience to the express commands of their employer, and if he, by the carelessness of his deputy, exposes them to improper risks, it may be that he is liable for the consequences." *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 295, 4 Jur. N. S. 767. Lord Chelmsford's comments upon the same case were as follows: "It was hardly possible to apply the principle of the servant having undertaken the service with a knowledge of the risks incident to it. She was an inexperienced girl employed in a hazardous manufactory, placed under the control, and, it may be added, the protection, of an overseer who was appointed by the defendant and intrusted with this duty. And it might well be considered that, by employing such a helpless and ignorant child, the master contracted to keep her out of harm's way in assigning to her any work to be performed." This amounts to a recognition, albeit rather a halting one, of the principle that, where young persons are concerned, the obligation of the master to protect them from perils which they do not understand is one of which he cannot devest himself by intrusting the superintendence of his business to an employee. The particular form in which this principle is applied by the American courts is that the duty to instruct such persons is nonassignable (§§ 578, 579, *post*).

A few years later, in a case where the plaintiff was injured by unfenced machinery, the theory that there may be an *alter ego* of the master was thus distinctly adopted by Byles, J.: "I do not rest the right of the plaintiff to recover on the statutable obligation incumbent on the master to fence the machinery, nor yet on the personal knowledge of the master that the machinery was improperly left unfenced, though I do not presume to intimate any disagreement with the court of exchequer. But I

think the master liable on the broader ground, to wit, that the owner of dangerous machinery is bound to exercise due care that it is in a safe and proper condition. . . . Why may not the master be guilty of negligence by his manager or agent, whose employment may be so distinct from that of the injured servant that they cannot with propriety be deemed fellow servants? And if a master's personal knowledge of defects in his machinery be necessary to his liability, the more a master neglects his business and abandons it to others the less will he be liable." *Clarke* v. *Holmes* (1862) 7 Hurlst. & N. 937, 947, 31 L. J. Exch. N. S. 356, 8 Jur. N. S. 992, 10 Week. Rep. 405.

In *Gallagher* v. *Piper* (1864) 16 C. B. N. S. 669, 33 L. J. C. P. N. S. 329, all of the judges reasoned upon the assumption that, under an appropriate showing of facts, a managing employee might be held to be a vice principal; but the majority of the court were of opinion that there was no such evidence set out on the record. The ground upon which the plaintiff rested his claim was this: One Phear was the defendants' foreman or manager at the work in question,—a large building. One Mahoney was employed under him as a foreman of the scaffolders; and the plaintiff worked at the raising of the scaffolding under the orders of Mahoney. It was Phear's duty to supply the materials, consisting of poles, putlogs, and boards, for the rearing of the scaffolding. He had notice through Mahoney that the supply of these materials for the due and safe performance of the work was insufficient; and the cause of the injury sustained by the plaintiff was Phear's omission to supply proper and sufficient materials upon Mahoney's requisition. Chief Justice Erle said: "The only matter upon which I pause is whether or not Phear was such a general manager as to make him stand in the place of Messrs. Piper, so that what was said to Phear may be considered as having been said to them. Is there anything to show that Phear, the foreman or manager more represented his employers here than the foreman did in *Wigmore* v. *Jay* [(1850) 5 Exch. 354, 19 L. J. Exch. N. S. 296, 14 Jur. 837]? In each case the defendants were engaged in very extensive works, and in each a foreman or manager was employed to direct them, and to whom the workmen looked for their instructions. In this case, beyond a doubt, Phear, the manager, was guilty of negligence in the performance of his duty: he had repeated notices that there were not sufficient materials for the erection of the scaffolding, but failed to supply them. But I think Phear and the plaintiff were fellow workmen within the principle laid down in the cases I have referred to. There was no evidence of any default on the part of the defendants themselves, either as to the supply of sufficient materials or in the selection of Phear to be their foreman or manager; and the neglect of Phear imposes no responsibility upon them. The rule in this case, therefore, will be absolute to enter a nonsuit." To the same effect is the reasoning of Willes, J.: "Here the notice was given, not to the masters, but to the foreman. If Phear had been a partner with the defendants, notice to him would have rendered them liable; for the case would not then have fallen within the rule illustrated by *Priestley* v. *Fowler* [(1837) 3 Mees. & W. 1, Murph. & H. 305, 1 Jur. 987], and that class of cases. But here we are dealing with a case where the person whose negligence caused the injury is a servant of the persons sought to be charged. It is true, he filled a superior position, but still he was a servant; and I am unable to draw any distinction in this respect between one description of servant and another, so long as the relation of master and servant exists, and the party injured and the person whose negligence caused the injury are employed under one common master. If this had been the case of a person who might be said to have authority to act for the master as a kind of universal agent, I should have been prepared to consider the suggestions thrown out by my brother Byles in his judgment in *Clarke* v. *Holmes* (1862) 7 Hurlst. & N. 937, 949, 31 L. J. Exch. N. S. 356, 8 Jur. N. S. 992, 10 Week. Rep. 405, and see whether he could come within the denomination of "servant" at all. But before I could bring myself to say that such an agent did not come within the rule, I should take time to look into the subject, and especially to consider the position of that most authoritative of all agents, the master of a ship. I should like to consider whether, if the master of a ship, without the knowledge of his owners, were to start from an intermediate port with the vessel in a damaged and unseaworthy condition, and she was in consequence driven on shore or upon a

In Scotland, also, the courts adopted still more unequivocally the same view.[2]

rock, and some of the crew thereby sustained personal injury, it would be just or reasonable to hold the owners to be liable to the sailors, as they would undoubtedly be to third persons. But it is unnecessary to discuss that here: for it is plain that Phear was as much a servant of the defendants as was any one of the laborers employed under his direction and control." In a strong dissenting opinion, Byles, J., whose opinion in *Clarke* v. *Holmes* has just been noticed, thus discussed the position of the foreman: "As I understood the evidence, he was not merely the foreman or manager *pro hac vice*, but had been the general manager of the defendants' work for many years,—about twenty-four or twenty-five years. He had the entire management of the men employed under him, engaging them and dismissing them as he thought fit, Mahoney being employed under him as foreman of the scaffolders. It is said that Phear stood in the relation of fellow servant to the plaintiff. I am bound to say that I think otherwise. He was acting master. At all events there was evidence for the jury that such was his position. Take the case of a large builder, who is never seen near his works, but who intrusts the entire conduct of his business to a foreman or manager, who is eyes, ears, tongue, brains, and everything to him. Is not the master liable for acts of negligence of his employer,—for I will not use the term, 'servant' which, like that of 'foreman,' is susceptible of many meanings,—whilst acting thus for him? If these defendants had been a corporation aggregate they must have employed somebody to represent them. Take the case of a railway company employing a general traffic manager, and through his negligence an accident happens to a servant of the company. Is it to be said that the party injured is without remedy, because the corporation is incapable of personal misconduct? If the rule here relied on be found so inconvenient that it cannot be applied to a case like that, ought it to be applied here? That depends very much upon the position of Phear. If he had been a servant, though a superior one, I should have entertained some doubt. But I do not think he stood in the position of a servant at all. He stood rather in the position of a general agent for the defendants. It is true he was called the foreman; but that is a word the meaning of which is extremely various. The case of *Wigmore* v. *Jay* (1850) 5 Exch. 354, 19 L. J. Exch. N. S. 296, 14 Jur. 837, is distinguishable in this, that there it does not appear that the person whose negligence caused the accident was anything more than foreman for the particular work. For these reasons, I think notice to Phear and negligent misconduct of Phear would be notice to the defendants and negligence or misconduct of the defendants. Personal knowledge is not indispensable: for it has been held that notice to one of two partners is notice to both. So here, I cannot help thinking that notice to Phear was notice to the defendants."

The charges of Cockburn, Ch. J., in *Feltham* v. *England* (1865) 4 Fost. & F. 460, and in *Webb* v. *Rennie* (1865) 4 Fost. & F. 608, may perhaps also be taken to indicate that this eminent judge had accepted the doctrine that, under certain circumstances, a managing employee might be a vice principal.

In *Murphy* v. *Smith* (1865) 19 C. B. N. S. 361, 12 L. T. N. S. 605, the court set aside a verdict for the plaintiff solely on the ground that there was no evidence to show that the negligent workman was, as contended, a general manager of a lucifer factory *pro hac vice*. See § 509, note 1, *supra*. But it must be admitted that the case is deprived of a part of its significance by the fact that the injured servant was an inexperienced boy, and this may have been considered a differentiating factor, so far as regards the remarks of the judges conceding that the master might have been held liable under a different state of the evidence.

[2] In one case Lord Ingles expressed the opinion that there was no authority, either English or Scotch, for the doctrine that a foreman or manager who represents the master in the entire work, and to whom has been delegated the entire duty of the master, is not a person for whose negligence the master is responsible. *Finnighan* v. *Peters* (1861) 23 Sc. Sess. Cas. 2d series, 260.

In another case a foreman or general superintendent of a factory was held to be a vice principal. *Darby* v. *Duncan* (1861) 23 Sc. Sess. Cas. 2d series, 529

So far as these decisions embody the theory that a master can be liable for the negligent acts of a general manager, committed in the course of his superintendence of a going concern, they are no longer law in any jurisdiction where the authority of the House of Lords is paramount. See § 529, *infra*.[3]

527. — American cases.—It has been deemed advisable to comment at some length upon the decisions embodying a doctrine thus finally repudiated in the mother country, not merely because they are of interest to the student of historical jurisprudence, as indicating the trend of opinion among a considerable number of very distinguished judges, but because the doctrine which they recognize is that which has finally prevailed in nearly every court of the United States.[1]

(fencing around machinery allowed to become defective). Lord Pres. M'Neill summed up his position in the following words: "It comes to this, that there has been a delegation of his duty by the master, and until I am otherwise instructed, I cannot hold that, where a master delegates his duty, he is to be freed from liability."

In another case a complaint alleging that a defect in a scaffolding had been pointed out to the manager was held not demurrable. *Lynch* v. *Haggart* (1857) 19 Sc. Jur. Cas. 2d series, 399.

In another case it was ruled that a complaint alleging that the injury was due to the negligence of one of the defendant's foremen in giving an order to lift an excessive weight is not demurrable, as the liability depends on the particular charge which the foreman had in the business. *M'Millan* v. *M'Millan* (1861) 23 Sc. Sess. Cas. 3d series, 1082.

In *McAulay* v. *Brownlie* (1860) 22 Sc. Sess. Cas. 2d series, 975, it was held that a contractor's foreman superintending the erection of a building was a vice principal of the master in regard to providing the laborers with a safe scaffold. This duty was assumed by the court (see especially the opinion of Ld. Deas) to be non-delegable.

[3] Curiously enough, however, the doctrine of an *alter ego* does not seem to be quite extinct in at least one of the British colonies. Thus, there has been held to be a liability for the negligence of the manager of a mine conducting the business in a manner as complete as an individual owner would or could have done on the spot. *Band of Hope & J. Consols* v. *Mackay* (1871) 2 Victorian Rep. (L.) 158 (ladder insecurely fastened); *Wilson* v. *Merry* (§ 529, *infra*) was cited by counsel, but not commented on by the court.

In *Sanderson* v. *Smith* (1882) 3 New So. Wales L. R. 31, it was suggested, but not directly decided, that a general manager was a vice principal. The actual point ruled was that a mate of a ship was not a representative of the shipowner.

The same view is taken in Quebec. *Hall* v. *Canadian Copper Co.* (Quebec, 1879) 2 Legal N. 245 (foreman ordered use of drill which caused the accident). Here the case was considered as one of personal interference by the master, so far as such interference was possible in the case of a company. But in this Province the doctrine of common employment, as a whole, is rejected. See *Canadian P. R. Co.* v. *Robinson* (1887) 14 Can. S. C. 105. The decision in the Quebec case is therefore of no importance to common lawyers.

[1] The cases *contra* are noted in § 530, *infra*.

Possibly the earliest American case in which there is a suggestion of the principle that a master is liable for the acts of a general agent is to be found in *Honner* v. *Illinois C. R. Co.* (1854) 15 Ill. 550, where the court leaned to the opinion that there might be "cases of carelessness or misconduct on the part of those to whom a corporation may intrust the management of its concerns, producing injury to the employees of the company for which it would be liable," but said that the declaration of the plaintiff did not raise this point.

In 1859 the doctrine was fully recognized as to the superintendent of a railway in *Washburn* v. *Nashville & C. R. Co.* 3 Head, 638, 75 Am. Dec. 784. The significance of this decision is, however,

How widely that doctrine prevails is apparent from the decisions cited in the subjoined notes, though it must be remembered that many of them, inasmuch as they emanate from courts which have accorded more or less recognition to the superior servant doctrine, cannot with entire certainty be cited as being authorities for the particular rule with which we are now concerned, *viz.*, that the case of a general managing agent constitutes an exception to the principle that the exercise of a power of control does not make the controlling employee the *alter ego* of the master. That principle has been thus formally stated in a leading New York case:

Where the "master withdraws from the management of the business, or the business is of such a nature that it is necessarily committed to agents, as in the case of corporations, the master is liable for the neglects and omissions of duty of the one charged with the selection of the other servants in employing and selecting such servants, and in the general conduct of the business committed to his care."[2]

Most of the decisions illustrating this rule relate to agents bearing designations indicative of positions which suggest the conduct of a permanent business and tenure of office extending over an indefinite period.[3]

diminished by the fact that it was rendered in a state in which the superior servant doctrine is applied. See subd. D, *infra*.

Even seven years after the date of this decision it would appear, from the report of a Pennsylvania case, that the master's liability under such circumstances was not then established in that state. In *Caldwell* v. *Brown* (1866) 53 Pa. 453, where the trial court, at the request of the plaintiff, instructed the jury that the acts and knowledge of the manager of a rolling mill were the acts and knowledge of the proprietor himself, the supreme court said that this charge was perhaps not warranted by the authorities (*Albro* v. *Agawam Canal Co.* (1850) 6 Cush. 75), but that, if it was, it was not an error of which the plaintiff could complain.

After 1870 the cases illustrating the doctrine become quite numerous in the reports.

[2] *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573. Following *Murphy* v. *Smith* (1865) 19 C. B. N. S. 361, 12 L. T. N. S. 605 (see § 526, note 1, *supra*).

[3] Thus, a railway company must answer for the negligence of its general manager or superintendent. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914 (*arguendo*); *Frazier* v. *Pennsylvania R. Co.* (1860) 38 Pa. 104, 80 Am. Dec. 467 (error to reject evidence that he knew of incompetency of delinquent); *Patterson* v. *Pittsburg & C. R. Co.* (1871) 76 Pa. 389, 18 Am. Rep. 412 (defective construction of siding was known); *Huntingdon & B. T. Road & Coal Co.* v. *Decker* (1877) 84 Pa. 419 (unfit servant employed); *Hoover* v. *Carbon County Electric R. Co.* (1899) 191 Pa. 146, 43 Atl. 74: (doctrine: assumed but proximate cause of the injury was held to be the act of a fellow servant); *Lasky* v. *Canadian P. R. Co.* (1891) 83 Me. 461, 22 Atl. 367 (despatch of trains); *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143 (conceded *arguendo*; but see § 530, *infra*); *Cumberland & P. R. Co.* v. *State* (1875) 44 Md. 283 (purchase of defective machinery: see § 530, note *infra*); *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034 (*arguendo*); *Krogg* v. *Atlanta & W. P. R. Co.* (1886) 77 Ga. 202 (defective track caused derailment); *Bateman* v. *Peninsular R. Co.*

Upon purely logical grounds the same rule is, it would seem, equally applicable to employees superintending a specific piece of work whose controlling functions have relation only to that work, and will cease when it is finished. The situation in such cases, so far as

(1898) 20 Wash. 133, 54 Pac. 996 (not taking steps to stop trains upon learning that a forest fire is raging along the road); *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784; (collision caused by failure to give proper running orders); *Haines* v. *East Tennessee & G. R. Co.* (1866) 3 Coldw. 222 (train started at an unusual hour); *Galveston, H. & S. A. R. Co.* v. *Smith* (1899) 76 Tex. 611, 13 S. W. 562 (failure to give such information and orders to the company's servants in charge of its trains as will enable them to avoid collision is the neglect of the company); *Pittsburgh, C. & St. L. R. Co.* v. *Henderson* (1882) 37 Ohio St. 552 (negligent orders with respect to the management of a train); *Cleveland, C. & C. R. Co.* v. *Keary* (1851) 3 Ohio St. 201 (negligent operation of trains); *Reddon* v. *Union P. R. Co.* (1887) 5 Utah, 344, 15 Pac. 262 (workmen ordered to help in clearing gangway of the mine, in which sup. intendent had temporarily ceased to put up timbering although he knew that pieces of coal were constantly falling); *Hyatt* v. *Hannibal & St. J. R. Co.* (1885) 19 Mo. App. 294 (breach of agreement to provide means to keep men warm while they were shoveling snow at night in very cold weather; plaintiff was frost-bitten).

In one case it was not decided, but said to be at least open to question, whether the superintendent of a short branch line leading to coal mines was a fellow servant of the conductor of a train in giving an order. *Woodes* v. *Delaware & H. Canal Co.* (1891) 141 Pa. 632, 21 Atl. 733. But it is difficult to see why the smallness of a concern should have any qualifying effect. The only proper question is whether the superior servant is in a real sense the master's substitute in the management of the concern.

The same doctrine holds good where the negligent act is that of the general manager or superintendent of other concerns,—as, of a flour mill. *Hirick* v. *Morton* (1901) 62 Kan. 870, 64 Pac. 609 (servant not warned as to latent danger).

Or of a mill and elevator company. *Colorado Mill. & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28 (failure to provide proper appliance for raising a smokestack).

Of a steel-mill. *Duffy* v. *Oliver Bros.* (1890) 131 Pa. 203, 18 Atl. 872 (*arguendo*).

Of a saw mill. *Sulphur Lumber Co.* v. *Kelley* (1895; Tex. Civ. App.) 30 S. W. 696 (negligent order to start saw when there were indications of the existence of a defect); *Shumway* v. *Walworth & N. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251; *Bouck* v. *Jackson Sawmill Co.* (Ky.; 1899) 49 S. W. 472.

Of a manufacturing establishment. *Griffin* v. *Glea Mfg. Co.* (1892) 67 N. H. 287, 30 Atl. 344 (orders); *State, use of Hamelin* v. *Malster* (1881) 57 Md. 287, *arguendo* (at all events so far as regards his function of employing servants and procuring the instrumentalities necessary for the service (see § 530, *infra*); *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369 (elevator suffered to get into bad repair; owner was nonresident and gave no personal attention to the business but see §§ 543, 547, *post*); *Northwestern Fuel Co.* v. *Danielson* (1893) 6 C. C. A. 636, 12 U. S. App. 688, 57 Fed. 915 (gave orders increasing danger for workmen not directly affected by them and failed to warn them); *Keenan Boiler Co.* v. *Erickson* (1898) 78 Ill. App. 35 (steam allowed to enter boiler which plaintiff was repairing); *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774 (assumed in the opinion); *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 400 (here the negligent employee had "succeeded" the superintendent in his function; the negligence alleged was failing to keep a boiler in repair); *Doctiaq* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298 (orders); *Cole Bros.* v. *Wood* (1894) 11 Ind. App. 37, 36 N. E. 1074 (orders); *Foster* v. *Pusey* (1888) 8 Houst. (Del.) 168, 14 Atl. 545 (defective machinery); *Strange* v. *McCormick* (1849) 1 Phila. 156; *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521 (but case went off on the point that the negligent act was nonofficial; see §§ 513, 547, *post*; owner of concern was nonresident); *Gormly* v. *Vulcan Iron Works* (1876) 61 Mo. 492 (fire or-

the completeness of the transfer of the master's powers and obligations is concerned, may well be, and often is, the same as in the case of the general managing agents of a continuing business. A few decisions

dered to be applied to a furnace in iron works, so as to produce an explosion); *Martin* v. *Cook* (1891) 37 N. Y. S. R. 733, 14 N. Y. Supp. 329 (seems to assume that the foreman was a vice principal; but the negligence was a breach of a non-delegable duty in not discarding a defective appliance).

Of a hog-slaughtering establishment, *Mitchell* v. *Robinson* (1881) 80 Ind. 281, 41 Am. Rep. 812 (defective boiler).

Of a lumber company, *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743 (conceded); *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143 (*arguendo*); *Klochinski* v. *Shores Lumber Co.* (1896) 93 Wis. 417, 67 N. W. 934 (but act here was nonofficial; see chapter XXIX., *post*); *Lund* v. *Hersey Lumber Co.* (1890) 41 Fed. 202 (defective rope and tackle furnished; proprietors were a foreign corporation).

Of a brick company, *Chicago Anderson Pressed Brick Co.* v. *Sobkowiak* (1894) 148 Ill. 573, 36 N. E. 572, Affirming (1892) 45 Ill. App. 317 (assurance that overhanging bank was not dangerous; the question of coservice was not raised in the court of appeals at the place cited, but was discussed on former hearing (1889) 34 Ill. App. 312).

Of a quarry or stone-cutting establishment, *Hoosier Stone Co.* v. *McCain* (1892) 133 Ind. 231, 31 N. E. 956 (cars, being insufficiently blocked on an incline, were started by impact of another car, and injured servant who was loading one of them); *Salem-Bedford Stone Co.* v. *O'Brien* (1898) 150 Ind. 656, 49 N. E. 857 (wheels of heavy traveler were not secure); *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874 (defective hoisting gear broke under a load); *Richmond Granite Co.* v. *Bailey* (1896) 92 Va. 554, 24 S. E. 232 (superintendent disregarded a rule made by himself, as to giving a warning signal before the cable which drew the cars up an incline was drawn taut); *Reed* v. *Stockmeyer* (1896) 20 C. C. A. 381, 34 U. S. App. 727, 74 Fed. 186 (orders as regards the kind of work to do); *Lantry* v. *Silverman* (1892) 1 Colo. App. 404, 29 Pac. 180 (slab thrown down towards place where foreman had sent plaintiff to remove some tools, without proper precautions being taken to see that he had reached a place of safety); *Calloa* v. *Norton* (1889) 52 Hun, 9, 4 N. Y. Supp. 221 (employee ordered into place of danger), Reversed in (1891) 126 N. Y. 1, 26 N. E. 905, on the ground that the danger was solely the result of the manner in which the foreman performed or directed a detail of the work.

Of an ice company, *Gerrish* v. *New Haven Ice Co.* (1893) 63 Conn. 9, 27 Atl. 235 (omission to notify engineer that servant was in a position where he would be endangered by the starting of machinery, and breach of a rule requiring the posting of an employee to see that the machinery was not started without a signal); *Crystal Ice Co.* v. *Sherlock* (1893) 37 Neb. 19, 55 N. W. 294 (piece of ice sent down a chute).

Of a mine, *Pantzar* v. *Tilly Foster Iron Min. Co.* (1885) 99 N. Y. 368, 2 N. E. 24 (knew that a cliff was in danger of falling, and failed to safeguard plaintiff; here, however, the court relies rather on the non-delegable character of the duty violated than on the general agency of the superintendent); *What Cheer Coal Co.* v. *Johnson* (1893) 6 C. C. A. 148, 12 U. S. App. 490, 56 Fed. 810 (assumed); *Northern P. Coal Co.* v. *Richmond* (1893) 7 C. C. A. 485, 15 U. S. App. 262, 58 Fed. 756 (negligence alleged was ordering boy to do dangerous work outside scope of employment); *Wagner* v. *Sullivan Min. Co.* (1884) 76 Me. 100 (cut a hole in a platform creating secret pitfall); *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240 (*arguendo*); *Descrant* v. *Cerrillos Coal R. Co.* (1898) 9 N. M. 495, 55 Pac. 290 (seems to be assumed in opinion, though case did not require a decision on this point). Other supervising officials in mines who have been held to be vice principals have been described as follows: A foreman of the entire work at a mine, with power to employ and discharge hands, *McLean* v. *Blue Point Gravel Min. Co.* (1876) 51 Cal. 255 (plaintiff not notified that a blast was about to be fired). A mining captain who has the entire management of the mine, without interference by the owner, a nonresident, *Ryan* v. *Bagaley* (1883) 50 Mich. 179, 45 Am.

have recognized this identity, and imposed liability upon employers for the negligence of agents in charge of important works of construction.[4] But that the tendency of the courts is to treat employees of

Rep. 35, 15 N. W. 72. Defendant argued that, as the captain had been appointed by the owner's agent, he was "a mere foreman, or department leader, or subchief;" but it was pointed out that the agent, not being an expert himself, took no part in the management, and that the essential question was, What, as matter of fact, was his position? not by what directness or circuity he got it.

The foreman of a gang of men, to whom a stevedore delegates the entire management of the work of unloading a vessel, with "full discretion to control and supervise it," is a vice principal as to his subordinates. *Brown* v. *Sennett* (1885) 68 Cal. 225, 58 Am. Rep. 8, 9 Pac. 74 (failure to signal for stoppage of engine when an overloaded bucket of coal was swinging dangerously. This ruling was criticised in *Congrave* v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175, as being hard to reconcile with some other rulings, particularly *Collier* v. *Steinhart* (1875) 51 Cal. 116 (complaint alleging the negligent employment of an engineer by the superintendent of a mine held demurrable). It was also suggested that *Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20, went no further than to hold that the duty of providing suitable appliances was nonassignable. The decision may doubtless stand on this footing; but that it was not founded on any such theory is apparent from the report. A recent decision of this court seems to indicate that whatever doubt it may at one time have entertained as to the vice principalship of general agents is now abandoned, as the master has been held liable for the negligence of an engineer in charge of a refrigerating machine under the direction of the superintendent and general manager of a corporation when he was present, and in sole charge during his absence. *Ryan* v. *Los Angeles Ice & Cold Storage Co.* (1896) 112 Cal. 244, 32 L. R. A. 524, 44 Pac. 471 (allowing inexperienced men to do work for which they were unfitted). See further the summary of California decisions in chapter XXX., *post*.

As to the position of captains of ships, see § 535, *infra*.

If the functions discharged by a supervising employee are those of a general manager, he will be treated as such, though he was appointed by an agent of the master, a nonresident, where it also appears that such agent, not being an expert, took no part in the conduct of the business. *Ryan* v. *Bagley* (1883) 50 Mich. 179, 45 Am. Rep. 35, 15 N. W. 72.

[4] Recovery has been allowed for the negligence of the following employees:

One having full control of the erection of a building. *Slater* v. *Chapman* (1887) 67 Mich. 523, 35 N. W. 106 (foreman removed cleat which kept a temporary staircase in position, and subsequently ordered plaintiff to ascend it).

A person in full control of the construction of a tunnel. *Dobinson* v. *Bennett* (1888) 16 Or. 515, 19 Pac. 765 (workman set to drilling holes, without any steps being taken to ascertain whether there were any unexploded blasts).

An employee in full charge of the construction of a bridge. *Brothers* v. *Carter* (1873) 52 Mo. 372, 14 Am. Rep. 424 (falsework gave way).

An employee in full charge of the construction of a building. *Whalen* v. *Centenary Church* (1876) 62 Mo. 326 (defective scaffold).

A general foreman of construction work, in full charge of work, with power to hire and discharge. *Engan* v. *Tucker* (1879) 18 Hun, 347 (plaintiff injured while executing order to excavate under a pier the lower part of which, below the beam on which the upper section rested, was left without any support except that given by the force of cohesion: possibly a case merely of a breach of non-delegable duty).

A superintendent in entire control of the work of constructing a bridge. *Fort* v. *Whipple* (1877) 11 Hun, 586 (scaffold collapsed in consequence of the superintendent's directing the removal of the stay-laths; but perhaps the remark made as to the last case applies to this one also).

See also *Gallagher* v. *Piper* (1864) 16 C. B. N. S. 669, 33 L. J. C. P. N. S. 329, discussed under the preceding section, note 1.

With the above decisions should be compared those cited in subd. F, *infra*

this class as mere foremen will be abundantly evident if we compare the decisions cited in the last two notes with those tabulated in § 7, note 1, subd. F, ante. The tendency disclosed by this comparison is, it will be observed, not confined to courts which, like those of Massachusetts and Maryland, construe the doctrine of common employment most rigorously against the servant, but is equally apparent in states in which general managers of a continuing business are conceded to be vice principals. This inconsistency is doubtless one of the many embarrassing consequences of the haphazard fashion in which the doctrine of vice principalship has been evolved; and it must be admitted that there is also a genuine difficulty in separating the cases of this description which really involve the exercise of the functions of a general agent from those in which the supervising employee is a mere foreman, exercising no larger discretion than those who, in a complicated concern, like a railway, are intrusted with certain well-defined duties of a simple character.[5] But neither in justice nor in reason can a court which treats a general manager of a continuing business as a vice principal decline to indemnify a servant for the negligence of an official occupying a position which actually involves the discharge of functions differing in no essential respect from those which are characteristic of a general manager.

That the above rule of liability is considered to be applicable to corporations is shown by the large number of cases in which, as is shown by note 3 to the present section, such bodies were held responsible without any suggestion that a distinction could be raised on this ground. Any other doctrine, in fact, would involve the absurd and unjust consequence that, as all the business of corporations is neces-

in regard to departmental managers: —especially those relating to the masters of ships, who, according to circumstances, may sometimes be general, and sometimes departmental, managers.

The value of the two Missouri decisions referred to above is, so far as other jurisdictions are concerned, somewhat diminished by the fact that this court has become an uncompromising adherent of the superior servant doctrine. See subd. D, *supra*. But they seem to date from the earlier period during which that doctrine was not accepted. See summary in chapter XXX., *post*.

A ruling of the supreme court of New York, that the superintendent of repairs to a ship was a vice principal (*Hussey* v. *Coger* [1886] 39 Hun. 639), was reversed by the court of appeals on the ground that he was merely a special agent in regard to some of his duties (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556.

Whether a foreman in charge of the construction of a bridge is a vice principal was left undecided in *Ross* v. *Walker* (1890) 139 Pa. 42, 21 Atl. 15, 159, the court denying recovery on the special ground that the mere selection of materials from a mass is the act of a mere servant. See § 603, *post*.

[5] It has been expressly held that a servant appointed to supervise a little job, such as raising a piece of timber by a derrick for a building under erection, cannot be placed in the category of general superintendents. *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga 761 1882) 68 Ga. 844.

sarily transacted by agents, they would be virtually absolved from all liability.[6] Where the corporation is a foreign one, the propriety of not admitting any exception on such a ground is especially obvious.[7]

528. Rationale of the doctrine.—The language used by the judges in discussing the responsibility of the master for the negligence of a general manager shows that such an employee is conceived to be a vice principal for the reason that, as a necessary consequence of the essential elements of the position which he occupies, he must be regarded as the agent appointed by the master to see that the subordinate workmen are as fully guarded against unnecessary perils as if the master himself were conducting his business in person.[1] In the large

[6] *Lehigh Valley Coal Co.* v. *Jones* (1878) 86 Pa. 439. In *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head. 638, 75 Am. Dec. 784, the trial judge ruled that "the superintendent, and even the president, of a railway company, stood upon exactly the same footing as any other employee, however subordinate his position, and that the board of directors only was to be regarded as the principal. The criticism of the supreme court was as follows: "If this be correct, it will inevitably follow that the company cannot be held liable in a case like the present, unless it can be shown that the injury resulted from the direct action of the company in its corporate capacity. This is absurd. The corporation of necessity acts through the instrumentality of its officers and agents. If not prohibited by the charter, it may delegate its authority to its officers and agents, so far as it may be necessary to effect the purposes of its creation. It must act in this mode, or not act at all. The superintendent may be said to be, as respects this particular company, from the power shown to have been given him by the board, the immediate representative of the company,—the corporate executive officer,—intrusted for the time with the power and authority of the board of directors, so far as regards the control and management of the train and all the arrangements connected therewith. In this view, the company must be held liable for any injury resulting from the negligence or improper order of the superintendent, just as much as if it had emanated directly from an act of the company in its corporate capacity."

[7] As in *Lund* v. *Hersey Lumber Co.* (1890) 41 Fed. 202; *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521.

[1] In a case decided by the supreme court of New York, the reasoning of which was indorsed by the court of appeals, the following lucid argument is found: "A corporation cannot act personally. It requires some person to superintend structures, to purchase and control the running of cars, to employ and discharge men, and provide all needful appliances. This can only be done by agents. When the directors themselves personally act as such agents, they are the representatives of the corporation. They are then the executive head or master. Their acts are the acts of the corporation. The duties above described are the duties of the corporation. When these directors appoint some person other than themselves to superintend and perform all these executive duties for them, then such appointees equally with themselves represent the corporation as master in all those respects. And though in the performance of these executive duties he may be and is a servant of the corporation, he is not in those respects a co-servant, a colaborer, a coemployee, in the common acceptation of those terms, any more than is a director who exercises the same authority. Though such superintendents may also labor like other colaborers, and he may be in that respect a colaborer, and his negligence as such colaborer, when acting only as a laborer, may be likened to that of any other, yet when by appointment of the master he exercises the executive duties of master, as, in the employment of servants in the selection for adoption of the machinery, apparatus, tools, structures, appliances, and means suitable and proper for the use of other and subordinate servants,—then his acts are executive acts, are the acts of a master; and then the corporation are responsible that he shall act with a rea-

majority of instances the discharge of these protective functions will be measured by, and coextensive with, the performance of those obligations which are treated as non-delegable by very nearly all the

sonable degree of care for the safety, security, and life of the other persons in their employ. These executive duties may also be distributed to different heads of different departments, so that each superintendent within his sphere may represent the corporation as master. In controlling and directing structures, in employing and dismissing operatives, in selecting machinery and tools, thus he speaks the language of a master. Then he issues their orders to their operatives. Then he is the mouthpiece and interpreter of their will. Their voice, which is silent, is spoken by him. He then only speaks their executive will, not the irresponsible will of a fellow workman or colaborer. The corporation can speak and act in no other way. His executive acts are their acts. His negligence is their negligence. His control their control. He has in this executive duty no equal. He is not, while in the performance of these executive duties, only the equal of the common colaborer or coservant." *Brickner* v. *New York C. R. Co.* (1870) 2 Lans. 506, Affirmed in (1872) 49 N. Y. 672.

In *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369, the following language is used: "The defendants who operated the mill at the time of the injury gave no personal attention to conducting the mill, but it was managed by a general agent who had general charge of the mill, machinery, and operatives, with power to purchase all supplies and hire and discharge operatives. It is evident that this general agent was not a mere fellow servant of the plaintiff, who was a common hand in the mill, but that he was charged with the performance of the duties which the defendants owed to the hands employed in the mill. There was no other person to discharge those duties, and the defendants could not, by absenting themselves from the mill and refraining from giving any personal attention to its conduct, but committing the entire charge of it to an agent, exonerate themselves from those duties, or from the consequences of a failure to perform them."

Compare also the following extracts:

"So far as the corporate directors are concerned, no question can be made that for all purposes they represent the corporation, and their acts as a board are the acts of the principal; but, in the management of its affairs, certain powers are and must be delegated to agents or servants who are clothed with certain discretionary powers. If the master places the entire charge of his business, or a distinct branch of it, wholly in the hands of an agent, exercising no discretion and no oversight, the neglect of the agent of the ordinary care in the exercise of the business of the master thus intrusted to him is a breach of duty for which the master is held liable." *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034.

"To the general rule [that a foreman is a fellow servant of his subordinates] there is this qualification, or exception, that, where the middleman or superintendent is intrusted with the discharge of the duties incumbent upon the master, as between the latter and the servant, there the master may be liable for the omissions or neglect of the manager or superintendent in respect to those duties. If the master relinquishes all supervision of the work, and intrusts not only the supervision and direction of the work, but the selection and employment of laborers, and the procuring of materials, machinery, and other instrumentalities necessary for the service, to the judgment and discretion of a manager or superintendent, in such case the latter becomes a vice principal, and for his omissions or negligence in the discharge of those duties the principal will be liable." *State use of Hamelin* v. *Halster* (1881) 57 Md. 287.

"If the master has delegated to a servant or employee the care and management of the entire business, or a distinct department of it, the situation being such that the superior servant is charged with the performance of duties towards the inferior servant which the law imposes upon the master, then such superior servant stands in the place of the master, and the rule of *respondeat superior* applies." *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 665.

"The servant on entering upon the employment is supposed to know and

American courts.[2] But it is impossible, as the authorities stand, to say that the conception of general agency and non-delegability of duties can be treated as interchangeable tests of vice principalship. Most of the courts which have adopted the doctrine of non-delegability of duties have refused to construe it in such a sense that the master would be subjected to responsibility for any superior servant's lack of care in giving orders (see subd. D, *supra*); and yet a large number of the decisions in jurisdictions where the doctrine now under discussion has been applied, proceed upon the hypothesis that a master must answer for injuries caused by complying with the negligent directions of a general manager. See § 541, *post*.[3]

assume the risk. But does he risk the carelessness and negligence of those placed over him, in the selection of suitable materials, machinery, and the appliances incident to the employment? He acts in subordination. His simple duty is obedience. He has no means or opportunity of knowing whether the articles furnished are safe, and has to rely on the judgment of his superiors. If the master in person superintends the work, then there is no controversy or dispute as to where the responsibility belongs. If the master deputes the superintending control of the work, with the power to employ and discharge hands and purchase and remove materials, to an agent, then the master acts through the agent, and the agent becomes the master. The duties are the duties of the master, and he cannot evade the responsibilities which are incident and cling to them, by their delegation to another. When the master appoints some other person to perform these duties, then the appointee represents the master, and though in their performance he may be and is a servant to the master, yet in those respects he is not a coservant, a colaborer, a coemployee, in the common acceptation of these terms. He is an agent and stands instead of the principal, and is not a fellow servant within the meaning of the rule as applied to laborers and workmen. His acts are the acts of a master and superior, and the servants are bound to use whatever materials, machinery, apparatus, or appliances he may see fit to provide for them." *Brothers* v. *Cartter* (1873) 52 Mo. 372, 14 Am. Rep. 424, quoted with approval in *Gormly* v. *Vulcan Iron Works* (1876) 61 Mo. 492.

In another case the court speaks of a general agent employed to represent the master in his absence, and "charged with the duties which it would be incumbent on the master to perform if he were present." *Mitchell* v. *Robinson* (1881) 80 Ind. 281, 41 Am. Rep. 812.

"It is not the mere fact that the chief engineer had control over the firemen and the coal passer that destroys the relation of fellow servants between him and the servants, but the additional fact that he succeeded the superintendent and vice principal, George Smith; that he had full authority to provide for the safety of the servants, and had the management of the factory, and in view of the further fact that it is the duty of the master to supply machinery and tools, and to see to their repair and that they are kept in good repair." *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 400.

"For the purposes of managing the business, determining what machinery should be used and how placed, what men should be employed and how much paid, he was the defendant. He was its mouthpiece and hand. He selected the materials of which the pipe was to be constructed; knew, or ought to have known, whether it was sufficient for the purposes for which it was intended (except as to the latent defects in the material); knew, or ought to have known, whether it was safe to be placed within an inch or two of wood." *Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20.

See also *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 245, 58 Fed. 525; *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240.

[2] The few exceptions are discussed in § 530, *infra*.

[3] In some of the states, notably New York, general managers are employees

529. Doctrine that a general manager is not a vice principal. English and colonial cases.—The trend of English judicial opinion during the period which preceded the rendition of the judgment to be presently referred to is shown by the cases cited in § 526, *supra*, to have been strongly in the direction of the doctrine which, as is apparent from § 527, *supra*, is now accepted by most American courts. It may fairly be said that, although the courts had undoubtedly rendered some decisions inconsistent with the theory that an employee might be converted into a vice principal merely by virtue of being intrusted with certain duties having relation to the protection of the servants,[1] they had never committed themselves to the theory that a master who had completely abdicated his functions of control as respects a going concern, was not responsible for the negligence of the employee to whom he intrusted the discharge of those functions.[2] The whole question, therefore, was still an open one up to 1868, when the House of Lords settled it in the master's favor by the famous case

who, for the purpose of gauging the extent of the master's liability, are viewed merely as agents intrusted with the performance of the obligations which are most commonly known as non delegable, and the theory of a representative capacity existing independently of and disconnected from such duties has, in theory, been entirely discarded. But it has yet to be settled whether all these courts will go to the same length as some of them have already done, and hold that the doctrine thus adopted requires them to absolve the master from responsibility where a general manager's negligent order in respect to the details of the work results in injury (see § 543, *post*). The statement that the agent "in the general arrangement and management of the business is in the discharge of the duty pertaining to the principal" (*Flike* v. *Boston & A. R. Co.* [1873] 53 N. Y. 549, 553, 13 Am. Rep. 545), does not solve this question as regards New York, for such a principle still leaves open the possibility of a distinction being drawn between the "general arrangement" and particular orders as to details,—a distinction not obscurely suggested by the reasoning in *Brick* v. *Rochester*, N. Y. & P. R. Co. (1885) 98 N. Y. 211. In *Rose* v. *Boston & A. R. Co.* (1874) 58 N. Y. 217, Johnson, J., while recognizing the doctrine that a railway company must, at its peril, see that certain functions are discharged, suggests that "its responsibility may be extended to other particulars by the direct exercise of the authority of its managing body, or, perhaps, of its general agents." But what description of employee a "general agent" in this sense was conceived to be was not explained.

[1] As that of inspection and repair of appliances. *Searle* v. *Lindsay* (1861) 11 C. B. N. S. 429, 31 L. J. C. P. N. S. 106, 8 Jur. N. S. 746, 5 L. T. N. S. 427, 10 Week. Rep. 89; *Hall* v. *Johnson* (1865) 3 Hurlst & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 13 Week. Rep. 411; *Brown* v. *Accrington Cotton Spinning & Mfg. Co.* (1865) 3 Hurlst. & C. 511, 34 L. J. Exch. N. S. 208, 13 L. T. N. S. 94.

[2] The strongest case is *Feltham* v. *England* (1866) L. R. 2 Q. B. 33, 36 L. J. Q. B. N. S. 14, 15 Week. Rep. 151, 7 Best. & S. 676; but there the decision only goes to the extent of holding that a manager is not the master's "*alter ego*" where the master retains control of the business himself, the bodily absence of the master at the time of the injury not being enough to override the effect of this principle.

Of course, under any theory except the superior servant doctrine, properly so called, the question whether a foreman is a vice principal or not is immaterial, where the master himself superintends the work. The question of delegation of authority cannot then arise. *Scott* v. *Craig* (1862) 24 Sc. Sess. Cas. 3d series, 789.

of *Wilson* v. *Merry*.[3] In its essential effect this decision amounts to a declaration that the principle under which each servant is deemed to assume the risks arising from the negligent acts of other servants is not subject to any exception based on the master's transfer of his function of superintendence, and the propriety of regarding the employee invested with the function so transferred as a representative for whose acts the master must answer. But the actual ground upon which Lord Cairns denied the right of recovery is, as will be seen from the subjoined extract from his opinion, that it is not one of the implied terms of a contract of service, that the master should supervise the operations incident to his business:

"I do not think the liability or nonliability of the master to his workmen can depend upon the question whether the author of the accident is not, or is, in any technical sense, the fellow workman or co-laborateur of the sufferer. In the majority of cases in which accidents have occurred, the negligence has, no doubt, been the negligence of a fellow workman; but the case of the fellow workman appears to me to be an example of the rule, and not the rule itself. The rule, as I think, must stand upon higher and broader grounds. As said by a

[3] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. There the essential facts were as follows: By the faulty construction of a scaffold in a Scotch mine the ventilation was obstructed, and the fire damp accumulated and blew up the scaffold, thus killing the plaintiff's son. The erection of the scaffold was ordered by one Neish, the manager of the pit, and the persons who actually constructed it were the underground manager, one Bryce, and a miner. Over these employees was the general manager of the defendant's mines. The scaffold had been completed before the deceased was employed, and was blown up immediately after he began to work. There was a verdict for the plaintiff, but the court of sessions granted a new trial on the ground of misdirection, in that the jury were charged that if they were satisfied that the system of ventilation in the pit at the time of the accident had been designed and completed by the manager before the deceased was engaged to work, and that the defendants had delegated their whole power, authority, and duty in regard to that matter, and also in regard generally to underground operations, without control or interference on their part, the deceased and the pit manager did not stand in the relation of fellow workmen in the same common employment. The House of Lords upheld the ruling of the court of sessions.

Those parts of the opinions which relate more particularly to the form of the instruction are as follows: Lord Cairns, after expressing his opinion as to the substantive law of the case in the passage quoted in the text, proceeded thus:

"Applying these observations to the direction of the learned judge to the jury in this case, I think the first error in that direction is that it is pregnant with the suggestion to the jury that, if they found the scaffold to have been finished by Neish before the deceased was engaged to work in the pit, a liability for the accident was thrown upon the respondents, which would not have existed if the deceased had been engaged before the scaffold was finished. This, my Lords, was calculated, as I think, to mislead, and it appears to have misled, the jury. But, my Lords, I think there is another objection to the charge of the learned judge. He asks the jury to consider whether the respondents had delegated to Neish their whole power, authority, and duty in regard to the arrangement or system of ventilation, and also in regard generally to all the underground operations, without control or interference on their part. My Lords,

distinguished jurist, *Exempla non restringunt regulam, sed loquuntur de casibus crebrioribus.* Donellus, de Jure Civ. L. 9, c. 2, n. The master is not, and cannot be, liable to his servant unless there be negligence on the part of the master in 'that which he (the master) has contracted or undertaken with his servant to do. The master has not contracted or undertaken to execute in person the work connected with his business. The result of an obligation on the master personally to execute the work connected with his business, in place of being beneficial, might be disastrous to his servants, for the master might be incompetent personally to perform the work. At all events, a servant may choose for himself between serving a master who does, and a master who does not, attend in person to his business. But what the

I think there is nothing in the evidence which would warrant a question being lett to the jury in these terms. The respondents had delegated no power, authority, or duty to Neish, except in the sense in which a master who employs a skilled workman to superintend a portion of his business delegates power, authority, and duty to the workman for that purpose. It was admitted that the respondents gave no specific directions to Neish as to the manner or form in which the scaffold was to be arranged. They told him that the Pyotshaw seam was to be opened, and they left to him the arrangements underground for opening and working it. And the learned judge ought not, as I think to have suggested to the jury that this could be viewed in any other light than as the ordinary employment by the respondents of a submanager or foreman. I think the learned judge ought to have told the jury that, if they were of opinion that the respondents exercised due care in selecting proper and competent persons for the work, and furnished them with suitable means and resources to accomplish the work, the respondents were not liable to the appellant for the consequences of the accident."

Lord Chelmsford said: "Although the learned judge, in the course of his summing up, distinguished 'between keeping clear and in good working order the ventilation arrangement or system when completed, and a defect or fault in the arrangement or system itself,' yet he does not appear to have left it to the jury to decide whether the accident occurred through faulty ventilation, or through casual obstruction in the ventilation, the latter of which appears from the evidence to be more likely to have been the case. But, supposing it to have been quite clear that the ventilation itself was defective, yet, if it occurred in the course of the operations in the pit, it ought to have been distinguished from that 'system of ventilation and putting the mine into a safe and proper condition for working,' which, according to the opinion of the Lord Justice Clerk, in *Dixon* v. *Rankin* (1852) 14 Sc. Sess. Cas. 2d series, 420, 'it was the duty of the master for whose benefit the work is being carried on to provide.' In the course of working the Haughhead pit it became necessary to arrange a system of what, for distinction's sake, I may call local ventilation. This must be considered as part of the mining operations, and therefore, even if the accident happened in consequence of the scaffold in the Pyotshaw seam having, under Neish's orders, been constructed so as to obstruct the necessary ventilation, it would have been the result of negligence in the course of working the mine; and if Neish and the deceased were fellow servants, it would have been one of the risks incident to the employment in which the deceased was engaged."

Lord Colonsay said: "Now, the direction of the learned judge with reference to the circumstances of this case appears to me to have been objectionable for these reasons: First, it deals, apparently, with the alleged defect in the scaffold as if it was a defect in the general arrangement or system of ventilation of the pit, for which, in certain views, the defenders might be regarded as liable, whereas it was a defect in the construction of a temporary structure erected by order of Neish for certain working operations, whereby the free action of a good system of ventilation was

master is, in my opinion, bound to his servant to do, in the event of his not personally superintending and directing the work, is to select proper and competent persons to do so, and to furnish them with adequate materials and resources for the work. When he has done this he has, in my opinion, done all that he is bound to do. And if the persons so selected are guilty of negligence, this is not the negligence of the master; and if an accident occurs to a workman to-day, in consequence of the negligence of another workman, skilful and competent, who was formerly, but is no longer, in the employment of the master, the master is, in my opinion, not liable, although the two workmen cannot technically be described as 'fellow workmen.'

In two later cases the opinion has been expressed that the language of Lord Cairns was to be read as meaning that a fellow servant who is the *alter ego* of the master—who directs but does not labor—is a co-laborateur for the purposes of the rule of law on the subject.[4] In another,[5] the ground was distinctly taken that the doctrine of vice principalship had been "exploded" by *Wilson* v. *Merry*. This statement, however, is possibly too broad, unless the term "*alter ego*" is to be taken in a very narrow sense. See § 531, *infra*.

As the subjoined note shows, the decision in *Wilson* v. *Merry* has

temporarily interfered with, which raised a totally different question for the consideration of the jury in reference to the liability of the defenders for the fault of Neish. But the distinction does not appear to have been adverted to. Secondly, it suggests to the jury that, if the faulty scaffold was completed before Wilson entered into the employ of the defenders, a liability was imposed on the defenders which would not otherwise have existed, inasmuch as in that case Wilson and Neish could in no view have been fellow workmen at the time when the fault was committed by Neish. But if it was the duty of Neish to provide for the passage of air upwards in the shaft, that duty did not cease with the erection of the scaffold, but continued while the scaffold remained, and he was in fault so long as that duty was not performed. It was not merely the erection of the scaffold on Saturday, but the maintenance of it in a defective state until Tuesday morning, that caused the injury, if it was really caused by the defective construction of the scaffold; and consequently there was no room for the suggested disconnection of Wilson and Neish as fellow workmen. Thirdly, the direction points the attention of the jury to the question whether Wilson and Neish stood in the relation of fellow workmen engaged in the same common employment, as the test of nonliability, without sufficient explanation of what constituted that relation; and, in particular, without explaining that diversity of duties and gradation of authority are not inconsistent with that relation, and without referring to the effect which might be produced on the liability of the master by a careful selection of proper persons to take charge of different departments in the working of the mine."

[4] *Johnson* v. *Lindsay* [1891] A. C. 371, 65 L. T. N. S. 97; *Hedley* v. *Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 58.

[5] "The owners of a colliery within the coal mines regulations act of 1872 (35 & 36 Vict. chap. 76) appointed a certificated manager, as required by § 26. A miner employed in the colliery was killed by an explosion of fire damp, the death being caused by the negligence of the manager. Held, that the fact that the manager was appointed pursuant to the act, which placed him "in control" of the mine, did not put him in any different position than that he would have held had he been simply appointed manager. *Howells* v. *Landore Siemens Steel Co.* (1874) L. R. 10 Q. B. 62, 44

been followed in numerous cases, both in the United Kingdom and in the colonies.[6]

L. J. Q. B. N. S. 25. 32 L. T. N. S. 19, 23 Week. Rep. 335.

[6] *England.*—See notes 4, 5, *supra*.

Scotland.—Master held not liable for the negligence of the manager of a mine. *Sneddon* v. *Moss End, etc.* (1876) 3 Sc. Sess. Cas. 4th series, 868 (roof of adit insufficiently supported gave way), where Lord Ardmillan, who strongly protested against this extreme extension of the doctrine, took the view that *Wilson* v. *Merry* rests on the broad ground that, "in a question of damages for injury inflicted by the fault of one servant on another, down through the whole gradation of servants, the employer is not responsible," unless personal fault is shown.

Of the general manager and secretary of a limited liability mining company. *Wright* v. *Dunlop* (1893) 20 Sc. Sess. Cas. 4th series, 363 (no difference between such an official and a mere certificated manager); *Stewart* v. *Coltness Iron Co.* (1877) 4 Sc. Sess. Cas. 952.

Ireland.—Here the question was left in a somewhat peculiar position by *Conway* v. *Belfast & N. Counties R. Co.* (1875) Ir. Rep. 9 C. L. 498 (1877) Ir. Rep. 11 C. L. 345. The court of common pleas ruled on the authority of *Wilson* v. *Merry* and *Howells* v. *Landore Siemens Steel Co.* (1874) L. R. 10 Q. B. 62, 44 L. J. Q. B. N. S. 25, 32 L. T. N. S. 19, 23 Week. Rep. 335, that a traffic manager was not a vice principal as regards a trackman. The Irish exchequer chamber, ignoring these decisions, laid it down that a master may so depute to an employee the entire control of his establishment as to constitute that employee his *alter ego*, and virtually held that, while all those in the employment of a railway company are prima facie fellow servants, this inference may be rebutted by showing that the status of the negligent person was that of a representative or vice principal. But the ruling of the lower court was not disturbed. Upon the facts, therefore, the decision is not open to exception, even in England; but it seems clear that no court which is bound by the principles formulated in *Wilson* v. *Merry* can accept the theory of the exchequer chamber as to the possibility of an employee being invested with functions which will put him in the position of a vice principal.

Canada.—Master not liable unless manager is incompetent. *Smith* v. *Intercolonial Min. Co.* (1876) 2 R. & C. (Nova Scotia) 556 (defective plan of working caused explosion of gas). *Campbell* v. *General, etc. Asso.* (1868) 1 Gold. & Ox. (Nova Scotia) 415; *Rudd* v. *Bell* (1887) 13 Ont. Rep. 47; *Matthews* v. *Hamilton Powder Co.* (1887) 14 Ort. App. 261; *Fairweather* v. *Owen Sound Stone Quarry Co.* (1895) 26 Ont. Rep. 604 (where the principle was broadly laid down that where the negligence complained of is that the manager of a quarry prepared a charge so that it failed to explode, and also that the plaintiff was ordered to remove the charge without the proper implements therefor, the action cannot be sustained, so far as the liability of the employer depends upon the acts of the manager).

The reeve of a municipality who takes service as the foreman of a pile driver under a councilor who undertakes the repair of a bridge is considered, with respect to anything which he does in that capacity, to be, not the representative of the municipality, but a fellow servant of the workmen whom he directs. *Drew* v. *East Whitby Twp.* (1881) 46 U. C. Q. B. 107 (hammer of pile driver fell on workman, owing to its being insufficiently blocked).

In *Melanis* v. *Malaga Min. Co.* (1895) 25 N. S. 345, the system in vogue at a mine, with respect to the keeping of a quantity of dynamite in the shaft house, was, so far as the evidence disclosed, established by defendant's manager or foreman; and there was no proof that defendants interfered in any way, or directed the mode of working, or the system in operation in any particular at the time, before or at the time of the accident. It was held that, if the explosion which caused the injury arose from a defect in the system of management, it could not entitle plaintiff to recover, in the absence of proof that such system was due to the acts or intervention of the defendants themselves directly.

In an action for a death caused by a defective boiler, the jury should be specifically charged that the duty of a master, in the event of his not personally superintending the work of repairing his machinery, is to select competent persons for this purpose, and to furnish them with all adequate materials re-

The fact that the employer is a corporation, and can, therefore, act only through a manager, does not affect the operation of the doctrine laid down by the House of Lords.[7]

530.—American cases.—In the American reports are to be found a considerable number of decisions and *dicta* which, under any reasonable construction, must be regarded as embodying a doctrine not materially different from that formulated by the House of Lords. Some of these are explicitly overruled or discredited by later decisions of the same court; but, after every possible deduction under this head has been made, there is still some authority in favor of the English rule. The cases which seem to require comment in this connection are collected in the note below. Undoubtedly, however, the great weight of authority in this country sustains the doctrine that the master is responsible for the negligence of general managers and other employees intrusted with similar functions, so far, at least, as such negligence may occur in the exercise of what may be called their official duties. See § 527, *supra*, and chapter XXIX., *post*.

quired for the work. *Baird* v. *Dunn* (1895) 33 N. B. 156 (new trial ordered because this duty was not properly explained).

Australia.— The "running foreman" of a locomotive shed, charged with the duty of looking after the condition of the engines, is not a vice principal. *Brown* v. *Board of Works* (1882) 8 Victoria L. Rep. (L.) 414, following *Wilson* v. *Merry*. Higginbotham, J., dissented on the ground that the board could not delegate the statutory duty of supervision which was imposed on them, and that the question whether an employee was a vice principal was a mixed question of law and fact. See, however, § 526, note 3, *supra*.

[7] *Howells* v. *Landore Siemens Steel Co.* (1874) L. R. 10 Q. B. 62, 44 L. J. Q. B. N. S. 25, 32 L. T. N. S. 19, 23 Week. Rep. 335. S. P., *Wright* v. *Dunlop* (1893) 20 Sc. Sess. Cas. 4th series, 363; *Ullen* v. *New Gas Co.* (1871) L. R. 1 Exch. Div. 251, 45 L. J. Exch. N. S. 668, 34 L. T. N. S. 541.

[8] *Alabama.*—In *Mobile & M. R. Co.* v. *Smith* (1877) 59 Ala. 245, the company was absolved on the ground that the superintendent of a railroad, when he sends out a repair train to put the road in proper condition after a storm, is not exercising a function of the company itself, but merely performing a duty incumbent on him as one of the company's skilled servants. Commenting on the functions of the superintendent, the court said: "He was possessed of a much larger authority than O'Brien [road master], and more directly represented the company. But he was also in its service. If it authorized him to exercise the functions which properly belonged to the company itself, and which it, by its board of directors or president, might perform,—as, the selection and employment of the persons who were to do the work of building, equipping, keeping in repair, and operating its railroad,—and through want of care and due diligence he should employ incompetent [illegible] persons, whereby injury is done [illegible] of its employees, the company [illegible] liable therefor to them. He would [illegible] its substitute in the performance of such an office. So, perhaps, he would be when intrusted with the duty of procuring the materials for the work. But a railroad company, or the stockholders and directors thereof, are not supposed to be civil engineers, or to possess the scientific or mechanical skill necessary to the building, repairing, and operating of a railroad. The company is expected to employ, and must rely on, other persons who possess such skill to do such work, while its duty further is to procure and furnish the requisite and proper materials, and to pay the wages of the numerous employees." The instruction of the trial judge that the defendant was absolutely liable for any

531. Opposing theories reviewed.— The foregoing review of the cases turning upon the relation of general managers to their subordinates indicates that, if the reasoning of the House of Lords in *Wilson* v. *Merry* is sound, the inquirer has once more reached one of those logical *impasses* which so often confront him in the law of employers' liability,—that is to say, an antagonism of opposing theories which

negligence of the superintendent was expressly disapproved.

The earlier case of *Walker* v. *Talling* (1853) 22 Ala. 294, simply decides that a general manager (here the captain of a steamer) is the agent of the master as regards the proper performance of his duty to employ competent servants, and is therefore not necessarily in conflict with the general principle formulated in *Mobile & O. R. Co.* v. *Thomas* (1868) 42 Ala. 672.

Most of the cases which have come before the courts in this state since 1885 are naturally controlled by the provisions of the employers' liability act passed in that year; but there is nothing in the later decisions which can be said to indicate that, so far as the rights of the parties may be governed by the common law, the views expressed in the case just referred to have undergone any modification.

In *Postal Telg. Cable Co.* v. *Hulsey* (1896) 115 Ala. 193, 22 So. 854, the supervising employee was merely the foreman of a gang of men employed in the construction of a telegraph, and therefore the position of a general manager did not directly come into question. But the decision in *Mobile & M. R. Co.* v. *Smith*, was thought in *Georgia P. R. Co.* v. *Davis* (1890) 92 Ala. 300, 9 So. 252, to have gone to the "extreme verge of soundness."

California.—In one case the supreme court went so far as to hold that a complaint which counts on the negligence of a fellow servant, alleging that the defendant did not use ordinary skill in selecting him, is demurrable where the recital of facts also shows that the fellow servant was employed by the defendant's superintendent, and there is no averment that such superintendent was negligently selected. *Collier* v. *Steinhart* (1875) 51 Cal. 116. But this ruling is decidedly inconsistent with other decisions in this state. See § 537, note 3, and summary in chapter XXX., *post.*

Indiana.—*Wilson* v. *Merry* was relied upon in *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615, to support a decision that a master machinist was not a vice principal; but this ruling is inconsistent with several later cases in the same court. See § 537, note 3, and summary in chapter XXX., *post.*

Maine.—In 1860 the supreme court regarded it as well settled that, "if a company exercise ordinary care to employ servants of good habits and of competent skill and experience in their various departments, and to furnish them with machinery and apparatus of approved construction and material, their responsibility extends no further." *Beaulieu* v. *Portland Co.* (1861) 48 Me. 291. But the principle, though verbally it is hardly distinguishable from that laid down by the House of Lords, is not deemed, in this state, to preclude recovery for the negligence of a general superintendent. See *Mayhew* v. *Sullivan Min. Co.* (1884) 76 Me. 100.

Maryland.—The doctrine that a railway company would be responsible for an injury caused by defective appliances, if the defect should be known to an employee occupying the position of a superintendent, is recognized, *arguendo*, in *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143. But in that case it was held that an inspector of machinery and rolling stock was not a vice principal; and the same ruling was subsequently made as to the master of machinery who sent out a defective engine. *Shauck* v. *Northern C. R. Co.* (1865) 25 Md. 462. In later cases the position of the court was still further defined by the decisions that vice principalship cannot be predicated as to one who merely exercises supervision, but only as to one to whom it also gives the selection of subordinate servants, and the procuring of the instrumentalities necessary for the service (*State use of Hamelin* v. *Matster* [1881] 57 Md. 287); that a railway company was liable for the negligence of its superintendent in purchasing a defective engine (*Cumberland & P. R. Co.* v. *State* [1875] 41 Md. 283); and that the chief manager of charcoal works, who works at charging

are dialectically unassailable, provided the postulates on which they are founded are granted. It seems, however, to be fairly open to question whether that reasoning is entirely satisfactory. The present writer ventures to express the opinion that there is a palpable *non se-*

the retorts, etc., with no direct charge over the machinery, but with the right to repair it, and with the duty to see whether it is out of repair, but with no authority to buy, alter, or change machinery, where the works and machinery are inspected once or twice a week by different officers of the company, is a fellow servant with a man employed in such works in using an apparatus consisting of a large bucket hanging from a yoke, which runs on a wheel on an overhead track, and is not a vice principal whose negligence as to such workman will make the employer liable (*Yates* v. *McCullough Iron Co.* [1888] 69 Md. 370, 16 Atl. 280).

A comparison of these cases might seem to indicate that the position of a superintendent in this state is determined by an assumed distinction between the duty of furnishing instrumentalities, including servants, and the supervision of those instrumentalities in the ordinary operation of the establishment, with a view to securing their efficient condition. So far as he or any other official may be intrusted with the former duty he will be a vice principal. So far as he may be merely discharging the latter duty, he will be a mere servant. But in *Yates* v. *McCullough Iron Co.* there was the very material circumstance that the master must have been retaining a general control over the business, as he used frequently to inspect his works; and in *State use of Hamelin* v. *Walster*, the language used is fairly open to the construction that an employee who is a "universal agent" in the management of the business as a going concern is a vice principal. It cannot, therefore, be affirmed with certainty that the doctrine in this state is absolutely identical with that of *Wilson* v. *Merry*. Probably, however, this court would not be prepared to go to the same length as that case; for, although a train despatcher has been denied to be a vice principal in the still more recent case of *Norfolk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 711, 29 Atl. 994, the default there alleged consisted not in controlling the movements of trains improperly, but in sending out unfit brakemen, who were not employed by him, but by the division superintendent. The reasoning of the court seems, at all events, to assume that such a superintendent might have been held a vice principal if the question had presented itself, and the opinion certainly leans towards the view that, if the delinquency had been in connection with the moving of trains, the servant would have been entitled to recover.

Massachusetts.—In *Albro* v. *Agawam Canal Co.* (1850) 6 Cush. 75, the master was held not liable, where the superintendent in charge of a large establishment was alleged to have negligently directed a person employed in the manufacture of gas to throw all the weights off a gas meter, the result being that the gas was forced into the mill and induced spasmodic fits in the servant. In the next year the same court defined its position still further in *King* v. *Boston & W. R. Corp.* (1851) 9 Cush. 112: "As a corporation can act only through the agency of some individual person or persons, a question has sometimes been made as to what particular officers or persons should be considered as the corporation itself, as distinct from the servants of the corporation, for the purpose of settling what should be considered as the neglect of the corporation itself, and not of its servants. I am not aware that there has been any direct adjudication on this point. But, assuming that it is correct, as a general principle, that the responsibility as to the sufficiency of the road rests on the defendants themselves, still, their obligation, so far as respects those in their employment, would not extend beyond the use of ordinary care and diligence, and they would be held responsible only for the want of ordinary care and diligence. If a corporation itself should be held responsible to its servants that the road, when first used, was safe and sufficient, yet, keeping the road in proper repair afterwards would seem to be the work of servants or laborers, as much as any other part of the business of the corporation." The language thus used would seem to indicate that the court, in spite of the earlier decision just cited, considered that the responsibility of an employer for the defaults of a gener manager was still an open question in Massachusetts. But, whether the language

quitur involved in an argument the essence of which is that, because a master must sometimes intrust this business wholly to the management

is or is not susceptible of this construction, that point can no longer be regarded as a doubtful one since the decision in *Floyd* v. *Sugden* (1883) 134 Mass. 563. There the purchaser of a mill property hired one Gilman to take the entire charge of the premises, and make all repairs that in his judgment might be necessary to put them into a proper condition for use or for sale. Gilman, in accordance with these instructions, assumed the entire control of the premises, collecting the rents, selecting, hiring, and discharging the employees, purchasing and providing whatever tools, appliances, and machinery he deemed necessary, and paying all bills, including the wages of the employees, with money furnished for that purpose by the defendant, who withdrew entirely from the management of the repairs, and did not undertake to exercise any discretion or control over the acts of Gilman or the employees. It was held that the following instruction was rightly refused: "If the defendant withdrew from the management of the work, and intrusted to Gilman the entire charge of it, exercising no discretion and no oversight, then the defendant is liable for the neglect by Gilman to cause the trench to be shored up and to construct a platform in the bottom of the trench over the penstock for the plaintiff to stand upon, if in the exercise of reasonable care such appliances were necessary for the safe performance of the service." If the circumstances specified in this instruction do not constitute a "universal agent" (see *Gallagher* v. *Piper*, § 526, note 1, *supra*), it is difficult to see how any degree of independence in the control of a business can ever be sufficient for that purpose.

Taking this decision in connection with the fact that, as will be shown in the following chapter, the doctrine of nonassignability of duties is probably not accepted in Massachusetts in the sense in which it is understood by most American courts, it is apparent that there is no material difference between the law in this state and in England.

The recent case of *McGuerty* v. *Hale* (1894) 161 Mass. 51, 36 N. E. 682, where the master was held not liable for the coercion of a foreman of a factory to ventilate a workroom properly, is of neutral import as respects the present subject, as it need not necessarily be considered to raise the question of the position of a general agent. But in the still later decision in *Meehan* v. *Spears Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518, the delinquent employee is described as a superintendent in full control of a factory, and would therefore have been regarded as the master's representative in most states.

The passage of the employers' liability act in 1887 has naturally had the effect of diminishing the number of decisions in Massachusetts which could throw light on the subject.

Mississippi.—The doctrine of the House of Lords in *Wilson* v. *Merry* has been explicitly followed, the court laying it down that, "in order to hold a railroad company responsible to an employee (as conductor on its train) for injuries sustained because of the road or its appurtenances being out of repair, it must be shown that the company is in default in its duty, either by the selection of incompetent servants, or an insufficient number to do the work, or failure to furnish proper material, or that the company had notice of the bad condition of the road, or is chargeable with negligence for not knowing." *Hoard* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178. See also *New Orleans, J. & G. N. R. R. Co.* v. *Hughes* (1873) 49 Miss. 258.

This principle requires the conclusion that a general manager is not a vice principal, though no specific ruling to that effect has been made. It has been held, however, that the train despatcher of a railway company is a coservant of a fireman (*Millsaps* v. *Louisville, N. O. & T. R. Co.* [1891] 69 Miss. 423, 13 So. 696),—a doctrine contrary to that now held in most jurisdictions. See § 577 a, *post*.

In this state the superior servant doctrine has been introduced by the Constitution of 1890, § 193, and § 3559 of the Code of 1892.

Missouri.—In *McDermott* v. *Pacific R. Co.* (1860) 30 Mo. 115 (defective bridge) the superintendent of a railway was denied to be a vice principal, and the master's nonliability was distinctly put upon the ground that there was no allegation that the defendant had failed to exercise ordinary care in the selection of servants. But so far as Missouri itself

of others, and is even under the obligation of doing so whenever he does not possess that degree of technical skill which would qualify him to

is concerned, this is no longer the law, since that state has not only adopted the superior servant doctrine (see subd. D, *supra*),—which, of course, imports liability under the supposed circumstances,—but also the doctrine of the nonassignability of duties such as the superintendent was charged with not performing. See, for example, *Herdler* v. *Buck's Stove & Range Co.* (1896) 136 Mo. 3, 37 S. W. 115.

New Jersey.—In one case it was laid down that the president of a corporation so far represented it that it was liable for his acts of negligence; but the court declined to go into the question whether the liability extended to any of the employees properly so called. *Smith* v. *Oxford Iron Co.* (1880) 42 N. J. L. 407, 36 Am. Rep. 535.

Quite recently, however, in deciding that a foreman of the entire work of constructing a sewer was not a vice principal (*Curley* v. *Hoff* [1899] 62 N. J. L. 758, 42 Atl. 731), this court relied on *Wilson* v. *Merry*,— a citation which seems to place it in the same class as that of Massachusetts; especially as it had previously used language which implied that even employees who have full charge of a business, or a distinct department of it, are fellow servants of their subordinates in *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324; and has explicitly laid down the rule that the master sufficiently discharges his duty as to the inspection and repair of appliances by employing competent persons to make the inspection and repairs. *Harrison* v. *Central R. Co.* (1895) 31 N. J. L. 293; *Rogers Locomotive & Mach. Works* v. *Hand* (1888) 50 N. J. L. 464, 14 Atl. 766; *Essex County Electric Co.* v. *Kelly* (1894) 57 N. J. L. 160, 29 Atl. 427; *McAndrews* v. *Burns* (1876) 39 N. J. L. 117.

It must be admitted, however, that it is extremely difficult to say what view is really predominant in this state, as in other cases the court distinctly recognizes the doctrine that a master may be liable for the negligence of a foreman in failing to keep the place of work safe (*Van Steenburgh* v. *Thornton* [1895] 58 N. J. L. 169, 33 Atl. 380; trench caved in); and distinguishes, *arguendo*, a foreman who is simply supervising the building of a boat and working with his subordinates, from an agent in full control and acting as middleman exclusively (*Olsen* v. *Nixon* [1898] 61 N. J. L. 671, 40 Atl. 694). It has also applied the doctrine that, where the duty of inspecting and repairing appliances is cast upon an employee not actually engaged in the work which the plaintiff is doing, such employee is the master's representative. In *Nord Deutscher Lloyd S. S. Co.* v. *Ingebrosten* (1894) 57 N. J. L. 400, 31 Atl. 619 (storekeeper furnished a worn cable for use in unloading a vessel). The distinction suggested by these last two cases as compared with the others is, to say the least, extremely subtle, and does not appear to be recognized by any other court, at least in the form in which it is here stated. Nor is it apparent how the decision in *Van Steenburgh* v. *Thornton* can be reconciled on the facts, with *Curley* v. *Hoff*. The doctrine of *VanSteenburgh* v. *Thornton*, however, was approved in a case decided the year before *Curley* v. *Hoff*, the court holding that the existence of the duty to provide a safe place of work implied the nonassignability of the duty to warn workmen in time to get out of danger when a blast was about to be set off. *Belleville Stone Co.* v. *Mooney* (1897) 61 N. J. L. 253, 39 L. R. A. 834, 39 Atl. 764, Affirming (1897) 60 N. J. L. 323, 38 Atl. 835. Coming from a court which had previously gone so far in the direction of absolving the master for the negligence of the supervising agents this ruling is quite remarkable, as it extends the doctrine of non delegable duties to circumstances which by most courts are regarded as being outside its operation. See § 580, *post*.

New York.—In *Brown* v. *Maxwell* (1844) 6 Hill, 592, 41 Am. Dec. 771, the earliest case in New York in which the doctrine of common employment was applied, the court assumed that the principle of the decision in *Farwell* v. *Boston & W. R. Corp.* 4 Met. 49, 38 Am. Dec. 339, required the conclusion that the foreman of a stonecutter's establishment was a fellow servant of the workmen under him; but it is not certain, from the report, what the precise functions of the foreman were. The master may have retained a general supervision over the work, and, if so, the case is not inconsistent with later ones in the same state.

conduct the business in person, his duties to his servants, "in the event of his not personally superintending the work," are limited to selecting "proper and competent persons to do so, and to furnishing them with adequate materials and resources for the work."[1]

It is quite possible without any inconsistency to concede that large industrial establishments could not, and, in many instances, ought not to, be conducted upon any other footing than that of control and supervision by competent experts hired for that purpose,[2] and at the same time to deny that the situation thus regarded as inevitable, or most conducive to the interests of all parties, necessarily implies that the servant should be deemed to accept the risks which are incident to the master's delegation of his functions of control. The logical propriety of such a deduction depends altogether upon whether any special considerations can be suggested which are of sufficient force to override the effect of the fundamental principle embodied in the maxim *Qui sentit commodum sentire debet et onus;* and with this aspect of the question the House of Lords has made no attempt to deal.[3]

In *Warner* v. *Erie R. Co.* (1867) 49 Barb. 558, the supreme court held a superintendent of bridges to be a vice principal, but the decision was reversed by the court of appeals (1868) 39 N. Y. 468. *Wilson* v. *Merry* (see last section) and *Hard* v. *Vermont & C. R. Co.* (see *infra*, under Vermont decisions) were expressly approved by the latter court. The language used in the opinion embodies doctrines wholly inconsistent with later decisions in New York, and to this extent it is not law; but the decision itself may be supported on the facts, as the supervising employee was really not proved to have been culpable in the performance of his duties. It should be remembered that this case dates from a period at which the theory of non-delegability of duties (see next chapter), was not as yet established in this state. That theory was first enunciated in its modern form by Chief Justice Church in *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545. The authority of *Wilson* v. *Merry* was still recognized even in 1876, when it was held that a master could not be held liable for the negligence of an employee who constructed a washtub with defective supports. *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573. Church, Ch. J., however, dissented, considering the decision to be inconsistent, not only with the *Flike Case*, but with *Laning* v. *New York C. R. Co.* (1872) 49 N. Y. 521, 10 Am. Rep. 417, which proceeded on the theory that the duty of hiring fit servants could not be delegated.

Vermont.—In *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473, the principle was laid down in broad terms that the master "does not warrant that the servants shall faithfully discharge their duties in keeping the machinery in its original safe condition," a doctrine which, although it was here applied with the effect of absolving the employer from responsibility for the negligence of a master mechanic, possibly implies that even a general manager would not have been regarded as a vice principal by this court. This decision, whatever its import, was overruled in *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590, and the doctrine of *Wilson* v. *Merry* was expressly repudiated in favor of that of the nonassignability of certain duties. But it remains to be seen whether in this state a master would be held liable for the negligence of a manager in giving orders,—a function which is not of an essentially non-delegable quality.

[1] *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 332, 19 L. T. N. S. 30, per Lord Cairns.

[2] As was remarked by Lord Ormidale in *Stewart* v. *Coltness Iron Co.* (1877) 4 Sc. Sess. Cas. 4th series, 952.

[3] See § 475, *ante*. The bearing of this

If a concern is set in operation which it is impossible or improper for the owner to supervise in person, whether because it is too extensive or because he lacks the necessary skill and knowledge, or, as happens in an ever-increasing number of instances, because it is the property of a corporation which can act only by agents, it is certainly by no means self-evident that the law might not to require the owner of the concern to bear, among the other drawbacks of such an arrangement, any which may arise from using the services of others to represent him in the control of the work and the workmen. Granting that it was settled by the authorities preceding *Wilson* v. *Merry* that, so long as the master maintains a general supervision over his business, the negligence of all employees, whatever their rank, must be regarded as one of the ordinary risks of service, it may fairly be urged that neither by these decisions themselves, nor by the principles which they embody, is the conclusion required that a master who abdicates all his functions is not answerable for the negligence of the employee to whom those functions are transferred. It may be that there are some great considerations of public policy involved which would justify the application of the doctrine of common employment to this extreme case; in none of the opinions delivered in the House of Lords is it intimated that such considerations, if any there are, were relied upon.

The necessity for strengthening the argument at this point becomes still more imperative when it is remembered that, even from a purely juridical standpoint, it is, to say the least, doubtful whether there is a preponderance of abstract equity on the side of the rule adopted,[4] and

maxim upon the extent of an employer's responsibility has been far too much slighted in judicial discussions of that particular phase of the subject with which we are here concerned; but its importance has been duly recognized by some courts. See, for example, the following passage from a very recent case:

"A master choosing to have a scattered or diversified business which he cannot personally look after must need have a representative on the ground, and hence, taking the benefits of such an extended business, he must bear the burdens incident to its transaction." *Gratlis* v. *Kansas City, P. & G. R. Co.* (1899) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108.

[4] It has already been mentioned (§ 526, *supra*) that several of the most distinguished English judges have declined to concede the justice of a rule which entails the anomalous consequence that masters who do not interfere at all in the conduct of their business incur a smaller measure of responsibility than those who act as their own managers. Lord Cockburn, one of the Scotch judges who accepted under protest the English doctrine that a master is not liable for the negligence of a supervising employee, considered that, although this doctrine was supposed to be recommended by its own inherent justice, "the justice of the case is exactly in the opposite direction." See reporter's note to *Searle* v. *Lindsay* (1861) 11 C. B. N. S. 429, 31 L. J. C. P. N. S. 106, 8 Jur. N. S. 746, 5 L. T. N. S. 127, 10 Week. Rep. 89.

In *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590, the court, after noting that the view taken by the House of Lords "places the liability of the master upon the duty he

that, if the employers' liability act of 1880 is to be taken as embodying the opinion of the majority of non-professional Englishmen on this question, the justice of the rule, when referred to the more general ethical tests which laymen are quite as competent to apply as lawyers, is even less clearly beyond controversy.

It would appear, therefore, that the decision in *Wilson* v. *Merry* is open to exception in this respect, at all events,—that no attempt is made to bridge over the logical hiatus indicated by the fact that, as that decision has apparently extended the doctrine of common employment to a point at which its antagonism to a general maxim of jurisprudence becomes especially manifest and direct and its justice particularly questionable, the conclusion deduced cannot be admitted to be a necessary consequence of the premise laid down.

But this is not the only weak point in the argument. The doctrine propounded amounts, as the present writer ventures to think, to a logically untenable compromise between the admission and rejection of the non-delegability of certain obligations imposed by the law upon the master. From the opinion of Lord Cairns it seems impossible to draw any other inference than that, while the duty of the master to keep the plant in reasonably safe condition is deemed to be one which he can delegate in such a sense as to incur no responsibility if it is not properly performed, the duty to "select proper and competent persons to superintend the work, and to furnish them with adequate resources and materials for the work," is regarded by him as one which cannot be so delegated. In view of the language used there is apparently no escape from this conclusion, unless the wholly inadmissible hypothesis is entertained that he intended to stand sponsor for the self-contradictory proposition that a person may be subject to positive obligation, and, at the same time, not liable for the defaults of the agent appointed to discharge that obligation.[5] A similar theory is

owes the workman arising from their relations to each other," and "implies that if the master personally attempts to discharge that part of the work which the relation devolves upon him, and his negligence therein causes injury to the workman," he is liable therefor, proceeded thus: "The question is naturally suggested, why should he not also be liable for the negligence of the agent or servant whom he has appointed to discharge the same duty in his stead, although he has exercised due care to select a person competent and skilful? Is such an agent or servant, while performing the duty cast by the relation upon the master, a fellow workman with the master's servant in the employment, in such a sense that the latter cannot and ought not to recover of the master for injuries sustained through the negligence of the former? If so, the master who performs his part of the duty, as this defendant and all corporations must, by agents and servants, secures an immunity from liability, which the master who personally enters the service to manage and direct the performance of the work does not enjoy."

[5] See, however, § 558, *post*, as to the delegation of duties to an independent contractor.

indicated by the remarks of the other law lords and of various judges who have dealt with the question in later cases. See § 567a, *post*.

That the adoption of any such distinction as that which is now taken involves some consequences sufficiently anomalous to throw doubt upon its validity may, we think, be shown without any difficulty. If the duty of furnishing proper instrumentalities at the inception or extension of a business is absolute, there is no rational ground upon which it can be denied that the duty of replacing those instrumentalities when they are no longer fit for use is also absolute;[3] and, if the duty of replacement is absolute, it seems to be a natural, if not necessary, deduction, that the same absolute quality should be ascribed to the duty of seeing that the instrumentalities do not fall below the obligatory standard of efficiency and safety while they are in use. The maintenance or restoration of that standard being the essential object to which both duties have reference, it is a mere scholastic refinement to differentiate them in the present connection. The conclusion, therefore, seems to be irresistible that the qualified concessions which are made in *Wilson* v. *Merry* to the theory that there are certain non-delegable duties have the effect of rendering the arguments deficient in logical symmetry, if not actually self-destructive, and that the doctrine of vice principalship ought either to be wholly rejected, or extended so as to cover the cases which the House of Lords excludes from its domain.

F. Relation of a departmental manager to his subordinates.

532. General statement.—As the greater includes the less, the rejection of the doctrine that the manager of an entire business is a vice principal necessarily involves the consequence that the master is not responsible for the negligence of the manager of a single department of a business.[1]

It may be remarked in passing that the fallacy adverted to in the text underlies the reasoning of Mr. Beven (1 Neg. 738), by which he seeks to establish that the remarks of the law lords in *Paterson* v. *Wallace* (1854) 1 Macq. H. L. Cas. 748, do not support the doctrine of vice principalship. See § 526, note 1, *supra*.

[3] This proposition is too self-evident and elementary to need, or to have been embodied in, many specific authorities. See, however, *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574.

[1] The decision of the House of Lords in *Wilson* v. *Merry* (§ 529, *supra*), though rendered in terms which are broad enough to cover the case of managers of a whole business, really dealt with the negligence of an employee who, under the theory of the cases to be cited below, would possibly be a manager of a department. That it was the intention of the trial judge to propound a theory not materially different from the one embodied in those cases is apparent from the terms of his instruction as well as from the following remarks by Lord Chelmsford on the propriety of putting to the jury the question whether

On the other hand, no court which treats a general manager as a vice principal can, without disregarding logical considerations of controlling operative force, decline to hold the master liable for the negligence of at least some classes of supervising employees of lower grade than managers of an entire business.

The control of a single important branch of an extensive and complicated business—notably that of transportation—often involves the management of what is virtually a separate industrial concern, and implies that the controlling agent is left as completely to the exercise of his own discretion as if he were actually conducting an entire concern of a similar description for an independent proprietor. Of such an agent it would be wholly illogical to affirm that, so far as the master's liability is concerned, he should not be placed on the same footing as the general manager, which to all intents and purposes he is.[2]

What may be regarded as the leading case on the subject of departmental vice principals is *Chicago, M. & St. P. R. Co.* v. *Ross*,[3] which was made to turn upon the theory there is a "clear distinction to be made in their relation to their common principal, between servants of a corporation exercising no supervision over others engaged with them in the same employment, and agents of the corporation clothed with the control and management of a distinct department in which their duty is entirely that of direction and superintendence."[4] B

the defenders had delegated to Neish (the underground manager), their whole power, authority, and duty in regard to the arrangement or system of ventilation, and also generally in regard to all the underground operations, without control or interference on their part. "The words 'delegated' and 'without interference or control' are ambiguous, or, at all events, misleading expressions. Every master may be said to delegate to his servant the power, authority and duty of his particular department in the service, without his interference and control, and yet he would be responsible to third persons for the consequences arising from the negligence of that servant in the performance of the duties so intrusted to him. What the learned judge meant to tell the jury was that if Neish 'had the complete power of engaging and dismissing workmen as he pleased, and the ventilation process was entirely left to him, without the direction or control of the defenders, he was a superintendent, and not a fellow workman with the deceased.' But if the learned judge had so directed the jury, it would, in my opinion, have been a misdirection."

Thus decision overrules two earlier Scotch cases in which a mine owner was held liable for the negligence of his underground manager in not properly securing the roof. *Hardie* v. *Hill* (1858) 20 Sc. Sess. Cas. 2d series, 553, *Lennon* v. *Addie* (1859) 21 Sc. Sess. Cas. 2d series, 1382.

[2] See the extract from the opinion in the *Baugh Case*, as set out in § 534 *infra*.

[3] (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184 (see § 535, note 1, subd. (b) *infra*. This celebrated decision, as we are informed by an eminent Federal judge, was "a surprise to the profession, and was regarded as carrying the doctrine of departmental control to an extreme." Brewer, J., in *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

[4] "The reason of the rule of the liability of the master for the servant's negligence, as declared in the *Ross Case*,

the later decisions of the Supreme Court the range of positions to which the general principle enunciated was at first supposed to be applicable has been considerably narrowed." See chapter XXX., *post*. But the general principle itself has been steadily adhered to, and, as the cases to be cited in this subtitle clearly show, it is now fully recognized as a test of representative capacity, not only by Federal judges, but also by a large and increasing number of the state courts.

Considered in its relation to the superior servant doctrine, the vice principalship of departmental managers, like that of general manager, may be viewed as the result either of merger or of substitution, operating as regards all employees above a certain grade. Compare § 525, *supra*. In this connection, however, it will seldom be material where the division line between departmental managers and other superior servants should be drawn. If it is once admitted that all servants exercising control are vice principals as regards their subordinates, the only theory upon which the plaintiff's right of recovery can possibly be enlarged by fixing the character of departmental manager upon the delinquent employee is that the range of official acts for which the master is responsible is wider in the case of a general agent like a departmental manager than in the case of a

and interpreted in the *Baugh Case*, does not consist in the fact that the conductor of the train was the superior officer of the injured servant, but rather in the fact that the latter was in the department of the former; and the conductor was held to be a vice principal, not because he could enforce the obedience of subordinate servants placed under his charge, but because he was clothed with the power to govern the movements of the train, which constituted his department." *Northern P. R. Co. v. Beaton* (1891) 42 C. C. A. 301, 2 U. S. App. 88, 61 Fed. 563.

The doctrine formulated by the supreme court of Georgia on the authority of the *Ross Case* is as follows: "An agent or employee of a corporation, who, in the discharge of his general duties, has charge of a particular branch of the corporation's business, as to which he acts in the capacity of a vice principal, and as such employs and has control of all the subordinate servants who are at work under him, is, as to one of the latter whose duty it is to obey his orders and who takes his orders from no other source, a quasi master, and not a fellow servant in the sense that such subordinate servant will have no right of action against the corporation for personal injuries caused without fault on his part by the negligence of the superior." *Taylor v. Georgia Hardware Co.* (1895) 99 Ga. 512, 27 S. E. 768.

[5] There is, however, a want of precision in the recent statement of one of the Federal circuit courts of appeal, that "the *Ross Case* . . . has been so limited to its peculiar facts as to make it of no force as authority in any case where those facts are not exactly presented." *Cincinnati v. Southern R. Co.* (1899) 31 C. C. A. 191, 92 Fed. 191. It is true that since the *Conroy Case* (see § 535, note 1, subd. (b), *infra*), the specific ruling as to the relation of a conductor to his subordinates is discredited, but a decision declaring a principle to be wrongly applied under the particular facts in evidence in an earlier case cannot properly be spoken of in the terms used by the court of appeals. On the contrary, the correct way of describing its present status as a precedent would rather be to say that it has been overruled as a decision on the facts, but still stands unshaken in so far as it enunciates a general principle.

superior servant of lower rank. Whether such a distinction is recognized in any of the courts is quite doubtful. See chapter XXIX., *post*, where it will be shown that the difference of opinion which prevails as to the liability of a master for the manual acts of a vice principal is illustrated by cases decided both in states where the superior servant doctrine is rejected and in states where that doctrine is applied.[6]

[6] This is a convenient place to refer to several examples of a use of the term "department," which, if the doctrine of departmental control is to form an integral, well-defined division of the law of employers' liability, must be pronounced inaccurate.

One court lays it down that, as long as a mere foreman of a department of a business keeps within the line of his duties as such he is a mere fellow servant of one of his subordinates. *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

Another denies that the foreman of the "silver-room department" of smelting works is a vice principal. *Nixon* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803.

Another has been guilty of a double verbal inaccuracy when, on the one hand, it has refused to predicate the vice principalship in the case of the foreman of the "carpenter department" under a corporation (*Dewey* v. *Parke, D. & Co.* [1889] 76 Mich. 631, 43 N. W. 644), and has spoken of a mere foreman of a room in a factory as a "foreman of a department" (*Findlay* v. *Russel Wheel & Foundry Co.* [1896] 108 Mich. 285, 66 N. W. 50); and, on the other hand, has declared a certain employee to be a vice principal, and not a mere "department leader" (*Ryan* v. *Bagaley* [1883] 50 Mich. 179, 45 Am. Rep. 35, 15 N. W. 72). In all these instances it is clear that the "department" intended is not such a subdivision of the business as is contemplated in the decisions to be reviewed below.

The same loose use of the term sometimes produces the converse result of seemingly committing a court to an adoption of the doctrine of departmental vice principalship when there was probably no intention of applying that doctrine; as, where it was ruled that a jury was rightly instructed that if a fireman is placed under an engineer, as his superior, and this superior has a right to give orders in his department, the engineer is to be regarded as the representative of the employer. *Mann* v. *Oriental Print Works* (1875) 11 R. I. 152. The true rationale of this decision is that the doctrine which denies that the power of control constitutes a servant a vice principal ceases to be operative where the exercise of that power takes a subordinate outside the scope of his employment. See § 465, *ante*.

On the other hand, the words "department" or "branch of business" are frequently used, as already noted in § 521a, *supra*, where the superior servant doctrine is adopted to describe the functions of a class of employees who would certainly not be regarded as heads of departments in jurisdictions where the mere power of control does not imply vice principalship.

In some of the Missouri cases in which an employee in charge of a department of the business is regarded as representing the master, the officials are higher than those just mentioned, but yet lower than most courts include in the category of vice principals, and it is difficult to say whether the use of this phraseology is to be taken as implying an adoption of the doctrine now under discussion or mere verbal laxity. *Daykarsh* v. *Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 554 (foreman of railway roundhouse); *Devanu* v. *Vulcan Iron Works* (1877) 4 Mo. App. 236 (foreman in charge of the entire work of loading barges at the wharf of a foundry); *Hoke* v. *St. Louis, K. & N. R. Co.* (1882) 11 Mo. App. 574 (a roadmaster).

In Michigan, where an employee must certainly be a head of a department to be a vice principal, the master has been held liable for the acts of agents of no higher grade than these. See next section, and summary of decisions, chapter XXX., *post*). But the rationale of the liability in states where the superior servant doctrine is applied is of no importance, except possibly in the connection adverted to in a section (521a), where reference was made to the relation between that doctrine and the one now under discussion.

533. Rationale of the master's liability for the negligence of a departmental manager.— The parallelism which, as remarked in the preceding section, exists between the characteristic functions of general and departmental managers, seems to indicate that, so far at least as the courts which reject the superior servant doctrine are concerned, the doctrine of departmental control is an offshoot of the doctrine which makes general managers vice principals. But whether it was or was not evolved along this line, the authorities, at all events, show clearly that there is no material difference between the grounds upon which general and departmental managers are held to be vice principals.[1]

534. Limits of the doctrine of departmental con d.—The rationale of the doctrine which declares the master to be responsible for the negligence of a departmental manager indicates that no employee can properly be placed in this category unless he is exercising all the functions which the master himself would exercise, if he were personally supervising the same section of his business. That is to say, his representative character is not established by any evidence which fails to show that there has been that complete transfer of the master's characteristic functions which implies that the transferee is invested with the right and duty, not of merely seeing that his subordinates perform some definite routine work in the manner prescribed, and with the appliances furnished, but of providing the appliances themselves, and of making such a disposition of the workmen in regard to

[1] This will be sufficiently apparent if we compare with the passages quoted in § 528, *supra*, the extract quoted in the following section from Mr. Justice Brewer's opinion in the *Baugh Case*, and such statements as these: "Where a master places the entire charge of his business or a distinct branch of it in the hands of an agent, exercising no discretion and no oversight of his own, it is manifest that the neglect by the agent of ordinary care in supplying and maintaining suitable instrumentalities for the work required is a breach of duty for which the master should be held answerable. The negligence of the agent with such powers becomes the negligence of the master." *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2. It is not unusual, in formal statements of the doctrine that a master is liable for the negligence of an agent managing his entire business, to introduce a supplementary declaration that he is under a liability of a like character and extent with respect to the defaults of an agent in whose hands he places the control of a distinct branch of his business. Thus it has been said: "A vice principal for whose negligence an employer will be liable to other employees must be either, first, one in whom the employer has placed the entire charge of the business, or of a distinct branch of it, giving him not mere authority to superintend certain work or certain workmen, but control of the business, and exercising no discretion or oversight of his own." *Provost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88; *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50; *Andesco Oil Co.* v. *Gibson* (1869) 63 Pa. 150; *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 544; *Smith* v. *Wabash, St. L. & P. R. Co.* (1887) 92 Mo. 359, 4 S. W. 129; *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 215, 58 Fed. 525; *Coulson* v. *Leonard* (1896) 77 Fed. 538.

those appliances as will most effectually secure the general results for the attainment of which the branch of the business under his control has been organized.[1]

[1] Two years after the decision in the *Ross Case* (see § 532, *supra*), Brewer, J., laid down the law as follows: "To make one as the controller of a department properly the representative of the master, his duties should be principally those of direction and control. He should have something more than the mere management of machinery; he should have subordinates over whose various actions he has supervision and control, and not a mere assistant to him in his working of machinery. He should have control over an entire department of service, and not simply of a single machine in that service. He should be so lifted up, in the grade and extent of his duties, as to be fairly regarded as the *alter ego* — the other self — of the master." *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

In *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914, the same distinguished jurist wrote the opinion of the majority of the court, and had an opportunity to explain at greater length his views as to the proper scope and meaning of the doctrine by which the head of a department is a vice principal: "Where the master is a corporation, there can be no negligence on the part of the master except it also be that of some agent or servant, for a corporation only acts through agents. The directors are the managing agents; their negligence must be adjudged the negligence of the corporation, although they are simply agents. So, when they place the entire management of the corporation in the hands of a general superintendent, such general superintendent, though himself only an agent, is almost universally recognized as the representative of the corporation,—the master,—and his negligence as that of the master. And it is only carrying the same principle a little further and with reasonable application, when it is held that, if the business of the master and employer becomes so vast and diversified that it naturally separates itself into departments of service, the individuals placed by him in charge of those separate branches and departments of service, and given entire and absolute control therein, are properly to be considered, with respect to employees under them, vice principals, — representatives of the master,—as fully and as completely as if the entire business of the master was by him placed under charge of one superintendent. It was this proposition which the court applied in the *Ross Case*, holding that the conductor of a train has the control and management of a distinct department. But this rule can only be fairly applied when the different branches or departments of service are in and of themselves separate and distinct. Thus, between the law department of a railway corporation and the operating department there is a natural and distinct separation,—one which makes the two departments like two independent kinds of business, in which the one employer and master is engaged. So, oftentimes, there is in the affairs of such corporation what may be called a manufacturing or repair department, and another strictly operating department: these two departments are, in their relations to each other, as distinct and separate as though the work of each was carried on by a separate corporation. And from this natural separation flows the rule that he who is placed in charge of such separate branch of the service, who alone superintends and has the control of it, is, as to it, in the place of the master. But this is a very different proposition from that which affirms that each separate piece of work in one of these branches of service is a distinct department, and gives to the individual having control of that piece of work the position of vice principal, or representative of the master. . . . It may safely be said that this court has never recognized the proposition that the mere control of one servant over another in doing a particular piece of work destroys the relation of fellow servants, and puts an end to the master's liability. On the contrary, all the cases proceed on the ground of some breach of positive duty resting upon the master, or upon the idea of superintendence or control of a department. It has ever been affirmed that the employee assumes the ordinary risks incident to the service; and, as we have seen, it is as obvious that there is risk from the negligence of one in immediate control as from one simply a coworker. That the running of an en-

It is not altogether clear what precise evidential weight the courts consider to be due to the official designations which may have been bestowed upon the delinquents by the masters themselves. Those

gine by itself is not a separate branch of service seems perfectly clear. The fact is all the locomotive engines of a railroad company are in the one department,—the operating department; and those employed in running them, whether as engineers or firemen, are engaged in a common employment, and are fellow servants. It might as well be said that, where a liveryman has a dozen carriages, the driver of each has charge of a separate branch or department of service, and that if one drives his carriage negligently against another employe the master is exempt from liability.

The doctrine established by this case has been stated thus: The test as to whether one employee of a corporation is or is not a vice principal as regards another employee is not the control exercised by him over the other, but he must "stand for and represent the corporation as the superintending and commanding head of one of the separate and distinct departments of its service." *Harley* v. *Louisville & N. R. Co.* (1893) 57 Fed. 144.

The theory of the supreme court of Indiana is similar: "Ordinarily the duties pertaining to a given employment are clearly defined. When one speaks of employment as a section hand, a brakeman, or an engineer on a railroad, or as a farm hand, or as a puddler in an iron furnace, or a moulder in a foundry, the general character of the duties such employee will be required to perform are at once understood by those initiated into the mysteries of the particular calling. As a rule, also, the mention of a given employment suggests the character of the appliances to be used, and the place and manner of using them. One who is placed in charge of a force of men engaged in any of those occupations, whose duties are limited to carrying on the work, or directing it, whether actively assisting therein or not, and who is invested with no authority or charged with no duty in furnishing places or appliances for the work, or in the employment or retention of employees, is himself usually a mere coemployee. His duties require him to use, or superintend and direct the using of, places and appliances, and to control employees furnished by the master. If, however, he is given additional authority, and is charged with the duty of furnishing places to work, and appliances for the work, and is authorized to employ and discharge operatives, he is, as to such things, not a coemployee, but speaks and acts as the master. One who is placed in unrestricted control of a given department by his master, and is clothed with the power to command the services of the other employees, not simply to see that they faithfully discharge the duties ordinarily pertaining to their employment, and in the usual places, with the usual appliances provided therefor, but has authority to require of them the performance of other duties, in other places, and with other appliances, . . . is certainly in such matter more than a mere fellow servant with those thus subject to his control." *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 269, 28 N. E. 183, 611.

In another case a foreman was considered to be a departmental vice principal because he had absolute control of employees working under him, and authority to direct them from one kind of employment to another, without any immediate directions or supervision. *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 316, 55 Pac. 673. The characteristic function of a departmental vice principal which is here referred to recalls the rule already noticed (§ 465, *ante*), that when an order takes a servant outside the scope of his employment the directing employee is treated as a vice principal with respect to the order and its results, whether he would or would not occupy that relation to the master under the doctrine of the court in which the case presents itself.

Compare also the language used in *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2 (§ 533, note 1, *supra*); *Ryan* v. *Bagaley* (1883) 50 Mich. 179, 45 Am. Rep. 35; *Louisville, N. A. & C. R. Co.* v. *Graham* (1890) 124 Ind. 89, 24 N. E. 668.

In *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143, the court contrasts the position of a general or departmental manager with that of "a foreman in a particular special job of work."

A jury may deduce vice principalship

designations are certainly not conclusive;[2] but in the absence of some special reason for inferring that a descriptive title which ordinarily imports a general agency as regards a certain branch of a business is wrongly applied, a court ought always, it is conceived, to accept such a title as a declaration or admission of the master himself that his characteristic functions have, within the area indicated by it, been transferred to the employee bearing it. In recent cases it has been admitted that on approaching the line of separation between a fellow workman and a superintendent of a particular and separate department, there may be embarrassment in determining the character of the delinquent[3]; and it has also been intimated that the scope of the doctrine of departmental control is, in all probability, quite limited.[4]

The descriptive titles and functions of the employees mentioned in the cases tabulated under the following section show that the master is not usually held liable for the negligence of any employees of lower grades than those who, in the ordinary course of business, would be subject to the immediate control of the master himself or his general manager. But there is some authority for including within the scope

from evidence that the delinquent employee was placed by a railway company in charge of a quarry, with authority to employ, control, and discharge the workmen, his control and management being referred to his discretion and judgment, and not governed by detailed rules known to his subordinates as well as to himself. *Kansas City, Ft. S. & M. R. Co.* v. *Hammond* (1894) 58 Ark. 324, 24 S. W. 723.

The circumstance that "neither exercises the discretion or the judgment or the control of the master, but each contributes his part to the safe running of the train" has been adverted to as one of the reasons for holding telegraph operators and trainmen to be fellow servants. *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952. Compare *Monaghan* v. *New York C. & H. R. R. Co.* (1887) 45 Hun, 113, where it was said that an operator was not a vice principal, as he merely had to exercise some discretion within a department.

[2] See § 508, *supra*.

[3] *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

[4] "The *Baugh Case* has set such limits to the vice principal doctrine that it is exceedingly difficult to suggest a position, outside of the superintendent or acting superintendent of the various great departments of the railroad, which will not be filled by fellow servants of all the other employees." *Grady* v. *Southern R. Co.* (1899) 34 C. C. A. 494, 92 Fed. 491. The building of a bridge is a single undertaking, not varied or extensive enough to admit of distinct departments. *Kelly* v. *Jutte & F. Co.* (1899) 98 Fed. 380.

In *Muhlman* v. *Union P. R. Co.* (1889) 2 L. R. A. 192, 37 Fed. 189, it was held that a complaint alleging an injury caused by another, the master mechanic, having sole control of the yard, was demurrable for reasons thus explained: "Whether it was a yard with one switch or two; a side track or two; whether it was a trifling matter or a large and extensive responsibility; whether this sole control was limited to the repairs of engines or things of that kind, or whether it went to the entire business of a yard of such size and with so extensive works and duties that the company is bound to put in charge some man of experience, information, and character,—one for whose acts in all respects it should be held responsible,—is not sufficiently disclosed by a mere statement that the party was a master mechanic, having sole control of this yard. The size of the yard, amount of responsibility, or vastness of the busi-

of the doctrine of departmental control a class of officials who, for want of a better term, may be termed deputy vice principals, as being the real representatives of the master in the absence of their own superiors, so far as regards a portion of the official domain controlled by those superiors.[5] Logically, such a doctrine is unexceptionable

ness intrusted to him,—the extent of his control,—is not disclosed. I do not mean to say that he does occupy such a position that he cannot properly be considered as in control of a department so that the company may be responsible. I simply hold that the complaint as it stands is defective in that respect, and the demurrer will be sustained."

[5] An assistant roadmaster having general charge of a portion of a railroad, with control of all the section gangs along that line, is not a fellow servant with a section hand so as to prevent recovery by the latter for an injury caused by the negligence of the former in ordering him to continue his work of adjusting a load of poles on a car while an engine is approaching, thus throwing him off his guard, and then failing to take care to prevent injury by the approach of the engine. *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034. Discussing the position of the negligent servant, the court said: "He had general charge of the entire length of about 150 miles of defendant's road, and had under his control all the section gangs along that line; and there is nothing in the record showing that Doyle, the general road master, in any way interfered with him in the manner in which the work of that division was being conducted. He in fact controlled that entire division absolutely, so far as employing and discharging the men was concerned. The order came from Doyle to remove these poles, because they were to be taken to another division or branch of the same road. Wahl was not present at the time of the injury, and the fair inference is that whatever power Doyle would have had, if present, Light had like power, and represented the defendant company as fully as Doyle would have done. He did no manual labor himself, but had the full oversight, care, and management of it. It is apparent that the business of the railroad could not be carried forward without this division of labor and responsibility. It was necessary that these heads of departments and divisions should be made, and power delegated to each head. Under such circumstances, and well-settled rules of law, it must be held that Light represented the company; and for his negligence, while in the line of the duties so assigned and delegated to him, the company must be held responsible. . . . Any other rule than this would enable the master to escape all liability, by parceling out his work to different heads of departments or divisions, and retiring from any management or control of it; and the more he abandoned it to others,—the more he neglected it,—the less would he be liable. When the master appoints a middle man, with such powers as were delegated to Light in this case, or where the business is of such a nature that it is necessarily committed to agents, with full power to employ and discharge those acting under them, and with full and absolute control of the work, the principal is liable."

The same view was taken in a later case, where the court, in holding an assistant road master to be a vice principal, reasoned thus: "He had charge of and directed the method of its performance, and while it does not appear that he personally had anything to do with employing plaintiff in the first instance, yet his authority was so great that, at least while engaged in this particular work, he even had control and direction over the section foreman, Mr. Cavenaugh, who did employ the plaintiff, and who also, as representing the defendant, acted in accordance with Wahl's instructions in reference to the work and method of its performance. Under the facts shown by this record it is apparent that Mr. Wahl, as assistant road master, had not only full power to direct and control the work, and prescribe the method of its performance, but that he did so, and, in addition, that his judgment as to what men should be employed, and when or how long their employment should continue, or when a man should be discharged from such employment, was absolute, or as nearly so as it is possible for a master to confide a power of that sort to an agent to perform for him. To hold otherwise would be to close our eyes to conditions

for it cannot be denied that, if the business of the employer is so extensive and complicated that there is necessarily a complete transfer of his characteristic functions to a grade of officials lower than those which take their orders directly from himself or his general manager, he should be required to answer for their negligence. But it must be admitted that, upon the facts, the cases cited in the last note carry the doctrine of departmental control beyond the limits by which the chief exponents of that doctrine, the Federal courts, seem inclined to circumscribe it in the most recent decisions.[6]

patent to everybody in all the ordinary business affairs of life. It is evident that the plaintiff and all the other section hands, including the section foreman, looked upon Wahl as the absolute manager and controller of the work, and from whom they received their orders, and whom they were bound to obey. Under these circumstances, we must hold that the act of Wahl was the act of the defendant." *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397.

The liberal construction put by this court upon the doctrine of departmental control is also exemplified in the ruling that a foreman of a gravel train is a vice principal. *Erickson* v. *Milwaukee, L. S. & W. R. Co.* (1890) 83 Mich. 281, 47 N. W. 237. See, however, as to this case, § 535, note 1, subd. (b), *infra*. See also *Lyttle* v. *Chicago & W. M. R. Co.* (1890) 84 Mich. 289, 47 N. W. 571, holding a railway company liable for the negligence of a yard master. But in this last case distinctly non-delegable duties were involved. See § 535, note 1, subd. (d), *infra*.

In another state it has been held that a foreman having authority to employ and discharge the men under his direction, who is the sole representative of a railroad company at the place where the work of blasting rock and transporting it on flat cars is being prosecuted, and who has authority to direct when, how, by whom, and in what manner the work shall be performed, is not the fellow servant of a laborer under his direction, and his negligent omission to remove a blast, or warn the latter of its presence, is chargeable to the company, although he is under the general control of a road master, whose headquarters are several miles away. *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334.

With these cases may possibly be classed *Foley* v. *California Horseshoe Co.* (1896) 115 Cal. 184, 47 Pac. 42, where it was held that an assistant foreman in a factory was not a fellow servant of a minor fourteen years of age, "under his control and subject to his order and discretion." The injury was due to the fact that the boy's sleeve caught in a cogwheel while he was putting in a bolt. This work, though unusual, was spoken of as not being beyond the scope of the servant's employment, so that the case cannot be classed with those cited in § 465, *ante*. The doctrine as to departmental vice principals was not referred to, and the language used is broad enough to commit the court to the superior servant doctrine. But as the latter doctrine is undoubtedly rejected in California (see § 549, *post*), it would seem that the only category in which the negligent employee can be placed is that of departmental vice principals. On the facts it is clear that the decision might have been referred to the theory that the foreman had not discharged the non-delegable duty of instructing the boy as to the dangers of the work, see §§ 518, 519, *supra*. It may be that this is the real effect of the ruling, as the case relied upon is *Mullin* v. *California Horseshoe Co.* (1894) 105 Cal. 77, 38 Pac. 535, where the master was held liable on the distinct ground that the superior employee had not provided a safe place of work. But if this is the court's point of view, the language used is very inapt, as it was laid down quite generally that the foreman was not a vice principal, and there was nothing said from which it can be inferred that he was regarded as being a vice principal merely because he was discharging a non-delegable duty.

[6] See note 1, *supra*, and chapter XXX., *post*. In a decision rendered prior to the *Baugh Case* it seems to have been assumed by the Supreme Court of the United States that a foreman of con-

It is manifest that only the directors of a corporation, or the general superintendent, in whose hands its entire management is placed, can be held to be vice principals in a case where there is no division of the business of the corporation into distinct departments.[7]

535. Supervising employees held to be heads of departments.—In the subjoined note are tabulated, under suitable headings, all the cases which may certainly be referred to the doctrine of departmental control properly so called, as well as a number of others which, though not categorically relying upon that doctrine, involve facts which render it desirable to notice them in this connection. To the latter class belong, in particular, several decisions in New York,—a state in which the true doctrine of departmental vice-principals does not seem to have been formulated with any distinctness. (See chapter XXX., *post.*) In fact, it is now, for all practical purposes, merged in the theory that the character of the negligence determines whether the negligent employee was the master's agent. The reasons why the decisions of some states whose attitude on the doctrine of departmental control is more than usually difficult to define have been classified under the subtitle relating to the superior servant doctrine, rather than under the present one, have been explained in § 524, *supra.* But it has been deemed advisable to make the following list of departmental managers more complete by citing again any of those decisions which, though already tabulated in the other subtitle, seem to be legitimate illustrations of the principles now under discussion.[1]

struction was a vice principal. *Coyne v. Union P. R. Co.* (1889) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382. But probably, though it is not apparent from the report, his rank was higher and his functions more comprehensive than those of the foreman in the *McDonough Case* (1896) 15 Wash. 244, 46 Pac. 334. In the *Harrison Case* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1031, it was remarked that the tendency of modern decisions was to enlarge the liability of masters, especially where the delinquent was a superior servant, and the decision was doubtless influenced by the supposition that the general current of authority was being followed. This supposition, however, was scarcely justified. Any tendency there may be to hold the master to a larger measure of liability may rather be said to be manifesting itself in the majority of jurisdictions, at least, along the lines indicated by the theory which refers his responsibility directly to the character of the act which caused the injury, and ignores the functions ordinarily discharged by the negligent employee. See chapter XXIX., *post.*

[1] *What Cheer Coal Co. v. Johnson* (1893) 6 C. C. A. 148, 12 U. S. App. 490, 56 Fed. 810, disapproving an instruction to the effect that one of several foremen in charge of a few miners, himself subject to the control of a pit boss, who was in turn under the direction of the general superintendent of the mine, was a vice principal if the power of control, management, and direction as to the men engaged in the room under his charge had been conferred upon him, and the duty of obedience was exacted from his subordinates.

[1] (a) *Employees in the operating department of railway companies.*—A division superintendent of a railroad company who has general charge and supervision of the company's entire busines-

over his division, including the control of the movement of all trains, is a vice principal. *Louisville, N. A. & C. R. Co. v. Heck* (1898) 151 Ind. 292, 50 N. E. 988.

The same doctrine was possibly assumed to be the true one in *Norfolk & W. R. Co. v. Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 994, though all that was actually decided was that a train despatcher appointed by a division superintendent, and subject to his orders, is not a vice principal in respect to sending out unfit brakemen with trains.

The reopening an abandoned switch, without restoring the lights or notifying the trainmen that it has been put into use again, is deemed to be the negligence of the railway company, and not of the section master, where it was the division superintendent who authorized the reopening. *Town v. Michigan C. R. Co.* (1890) 84 Mich. 214, 47 N. W. 665.

In *Hunn v. Michigan C. R. Co.* (1889) 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502, a train despatcher was regarded as the head of a department. The decision in *Darrigan v. New York & N. E. R. Co.* (1884) 52 Conn. 285, 52 Am. Rep. 590, was possibly put partly on this ground, as the court in its argument seems to waver between the conception of departmental control and non-delegable duties. The *Ross Case* is one of those relied upon. But the Federal court of appeals seems to consider that the master's responsibility in this instance cannot properly be referred to this conception, as it remarks in one case that a train despatcher, in giving notice of a change in the running of trains, acts as a vice principal, "not because he has charge of a department, but because of the nature of the duty which he discharges." *Oregon Short Line & U. N. R. Co. v. Frost* (1896) 21 C. C. A. 186, 44 U. S. App. 606, 74 Fed. 965. There seems, however, to be no valid reason why the master's liability should not be placed on either of these grounds.

For cases denying a train despatcher and a traffic manager to be vice principals, see the note to § 26, *ante, ad finem.*

(b) *Employees in charge of railway trains.*—In *Chicago, M. & St. P. R. Co. v. Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, the Supreme Court of the United States held, affirming (1881) 2 McCrary, 235, 8 Fed. 544, that a conductor is not a fellow servant of the engineer in respect to the issuance of proper running orders to the engineer of his train (Bradley, Matthews, Gray, and Blatchford, JJ., dissenting.) The grounds of the decision are thus explained by Field, J., who, after laying down the general principle stated in § 532, *supra*, proceeded thus: "A conductor, having the entire control and management of a railway train, occupies a very different position from the brakemen, the porters, and other subordinates employed. He is, in fact, and should be treated as, the personal representative of the corporation, for whose negligence it is responsible to subordinate servants. This view of his relation to the corporation seems to us a reasonable and just one, and it will insure more care in the selection of such agents, and thus give greater security to the servants engaged under him in an employment requiring the utmost vigilance on their part, and prompt and unhesitating obedience to his orders. The rule which applies to such agents of one railway corporation must apply to all, and many corporations operate every day several trains over hundreds of miles, at great distances apart, each being under the control and direction of a conductor specially appointed for its management. We know from the manner in which railways are operated that, subject to the general rules and orders of the directors of the companies, the conductor has entire control and management of the train to which he is assigned. He directs when it shall start, at what speed it shall run, at what stations it shall stop, and for what length of time, and everything essential to its successful movements, and all persons employed on it are subject to his orders. In no proper sense of the term is he a fellow servant with the fireman, the brakemen, the porters, and the engineer. The latter are fellow servants in the running of the train under his direction; as to them and the train, he stands in the place of, and represents, the corporation. . . . There are decisions in the courts of other states, more or less in conformity with those cited from Ohio and Kentucky, rejecting or limiting, to a greater or less extent, the master's exemption from liability to a servant for the negligent conduct of his fellows. We agree with them in holding—and the present case requires no further decision—that the conductor of a railway train, who commands its movements, directs when it shall start, at what stations it shall

stop, at what speed it shall run, and has the general management of it, and control over the persons employed upon it, represents the company, and therefore that, for injuries resulting from his negligent acts, the company is responsible. If such a conductor does not represent the company, then the train is operated without any representative of its owner.

But the latest utterance of the Supreme Court is that, in the absence of evidence that special and unusual powers have been conferred upon the conductor of a freight train, it cannot be held, as matter of law, that he is a vice principal as regards the other trainmen. *New England R. Co.* v. *Conroy* (1899) 175 U. S. 323, 44 L. ed. 181, 20 Sup. Ct. Rep. 85 (conductor did not properly examine a train at a place where it was especially liable to break apart); Harlan, J., dissenting. This decision, although not explicitly condemning the *Ross Case*, must, we think, be regarded as having virtually overruled it. The conclusion arrived at in the earlier case was declared to have been based on certain assumptions, not borne out by the evidence, respecting the powers and duties of the conductors of freight trains, and to be inconsistent both with the reasoning and the conclusion in the *Baugh Case* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914. The precise position of the majority, as explained by Shiras, J., in his opinion, was that, as the evidence merely showed that the negligent servant was a freight conductor exercising the ordinary powers of such an employee, the plaintiff was virtually asking the court to declare, upon such common knowledge as it could be supposed to possess, that the conductor was a vice principal. This, it was considered, would be going further than was warrantable, although the court had taken upon itself to lay this down in the *Ross Case*. The doctrine that a conductor may by possibility be shown to be the head of a department, and for that reason a vice principal, is left intact; but it is very difficult to conceive of any specific evidence which, after this decision, would be regarded by a court as strong enough to overcome the presumption that he is a mere coservant of his subordinates.

By the court of appeals the *Conroy Case* has been viewed as having absolutely overruled the *Ross Case*. *Stevens* v. *Chamberlin* (1900) 51 L. R. A. 513, 40 C. C. A. 421, 100 Fed. 378; *Bridgal* v. *Southern P. R. Co.* (1900) 39 C. C. A. 359, 98 Fed. 958; *Maher* v. *Union P. D. & G. R. Co.* (1900) 45 C. C. A. 301, 106 Fed. 309. The practitioner, therefore, should bear in mind that the decisions mentioned in the remainder of this subdivision cannot any longer be safely cited in a Federal court as precedents supporting the specific theory that a conductor is a vice principal. But as long as the *Ross Case* is followed in other jurisdictions, these decisions have not lost all their authority, and it would be improper to ignore them here.

The *Ross Case* was followed in Federal courts as to the relation of a conductor to the trainmen in the subjoined decisions: *Northern P. R. Co.* v. *Carnaugh* (1892) 2 C. C. A. 358, 10 U. S. App. 197, 51 Fed. 517 (disobedience to telegraphic order as to holding train); *Canadian P. R. Co.* v. *Johnston* (1894) 25 L. R. A. 470, 9 C. C. A. 587, 26 U. S. App. 85, 61 Fed. 738 (sudden starting of train while brakeman was in a position of danger); *Union P. R. Co.* v. *Callaghan* (1895) 6 C. C. A. 205, 12 U. S. App. 541, 56 Fed. 988 (disobedience to rule requiring conductor, after storms, to obtain information about the condition of the track at frequent intervals); *Northern P. R. Co.* v. *Poirier* (1895) 15 C. C. A. 52, 29 U. S. App. 583, 67 Fed. 881 (rear end collision); *Ragsdale* v. *Northern P. R. Co.* (1889) 42 Fed. 383 (demurrer to answer sustained); *Missouri P. R. Co.* v. *Texas & P. R. Co.* (1889) 38 Fed. 816 (train was started while brakeman was tying a bell cord).

It has been held that an engineer in charge of a train during the absence of the conductor so far represented the company as to have the power of waiving a rule, expressly assented to by a brakeman, which forbade entering between cars to couple them, where such waiver was required by a sudden necessity caused by defects in the lever and brake of the engine, which prevented the engineer from controlling properly its movements. *Finley* v. *Richmond & D. R. Co.* (1893) 59 Fed. 419.

In another case which may fitly be mentioned in this place, it was laid down that to run a train towards a hand car, after warning, without keeping any lookout ahead, was a neglect of duty on the part of the trainmen, for which the railroad company was liable in case of injuries from a collision. *Howard* v. *Delaware & H. Canal Co.* (1889) 6 L. R. A. 75, 40 Fed. 195. This decision proceeded on what is manifestly a mistaken view of the purport of the *Ross Case* (1884)

112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, and of *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590. On the authority of the former case it was considered that the defendant was liable for the negligence of the trainmen, because they acted for it, "in the exercise of the control given over the movements of the train." The decision in the latter case, that trackmen represented the company in such a sense as not to be coservants of the company, was supposed to involve the inference that the trainmen were not coservants of the trackmen.

The doctrine of the *Ross Case* still prevails in some states, according to the most recent decisions on the subject. In *Van Ambacy* v. *Vicksburg, S. & P. R. Co.* (1885) 37 La. Ann. 650, 55 Am. Rep. 514 (train run at undue speed across bridge in course of construction), the court said: "The company is responsible for the other cause, for the conductor was the company on that day and for that occasion. He had exclusive command of that train,—was to the engineer his master for the time,—and did not so much represent the company as personate it. He was the company in bodily form, with authority to command, and power to enforce. The pretension that no responsibility can attach to the company except when it is present through its chief officers would practically relieve it from all responsibility. With its president in New York, and its directors equally remote, no possibility of fastening upon it any liability whatever would exist. No other doctrine than that it is present in the person of those of its employees who, for the time, operate it, would give the smallest modicum of protection to the public."

To the same effect see *Wilson* v. *Louisiana & V. W. R. Co.* (1899) 51 La. Ann. 1133, 25 So. 961 (excessive speed, considering the character of the track; log of wood fell off and derailed train); *Dobson* v. *New Orleans & W. R. Co.* (1900) 52 La. Ann. 1127, 27 So. 670 (conductor of work train left it in charge of the engineer only); *Spencer* v. *Brooks* (1895) 97 Ga. 681, 25 S. E. 480 (conductor signaled engineer to back a car prematurely, so that the plaintiff, a brakeman, was crushed; decided independently of the Georgia statute); *Boatwright* v. *Northeastern R. Co.* (1886) 25 S. C. 128 (failed to procure suitable coupling appliances from a stock supplied by the company); *Coleman* v. *Wilmington, C. & A. R. Co.* (1886) 25 S. C. 446, 60 Am. Rep. 516 (negligent adjustment of switch). As to these South Carolina cases, see chapter XXX., *post*.

In Virginia and West Virginia the *Ross Case*, though once followed, is no longer accepted as an authority. See chapter XXX., *post*.

In Michigan a railway company has been held liable for the negligence of the fireman of a gravel train. *Erickson* v. *Milwaukee, L. S. & W. R. Co.* (1890) 83 Mich. 281, 47 N. W. 237. But here the injury was the result of complying with an order to do work outside the scope of the servant's employment, and cases of this class stand on a peculiar footing. See § 465, *ante*. As already noted in § 526 note 1, subd. (b), *supra*, a conductor is, under ordinary circumstances, a mere fellow servant of [illegible] is subordinates in Michigan.

It is held that the principle of the *Ross Case* is not applicable as between a conductor of a work train and a laborer upon such train, where the road master is in charge of such train, directs its movements, and has control of all persons employed upon it, including the conductor and engineer. *Northern P. R. Co.* v. *Smith* (1894) 8 C. C. A. 563, 15 U. S. App. 294, 59 Fed. 993 (collision alleged to be due to want of proper flagging). Compare *Chicago & A. R. Co.* v. *McDonald* (1887) 21 Ill. App. 409, § 524, note 1, subd. (c), *supra*.

In *McGill* v. *Southern P. Co.* (1893; Ariz.) 33 Pac. 821 (hurried order to get on to a work train), it was held that the conductor of a work train was a vice principal as to a section foreman traveling by the train; but, on a rehearing of the case, they were held to be fellow servants, for the reason that they were both under the control of a superior on the same train. *Southern P. Co.* v. *McGill* (1896; Ariz.) 44 Pac. 302.

That a conductor may be a departmental vice principal as to a servant only temporarily under his control was recognized in a case where it was held that a foreman of bridge carpenters in the employ of a railroad company, in riding to his work, belongs to the train and is in the train department, so as to render the conductor in charge of the train a vice principal rather than a fellow servant, although in going upon the train such foreman acts under the order of his immediate superior. *Northern P. R. Co.* v. *Benton* (1894) 12 C. C. A. 361, 29 U. S. App. 88, 64 Fed. 563 (rock in

a tunnel was loosened by the arm of a derrick improperly left raised, and fell on the plaintiff).

But the doctrine of the *Ross Case* will not render the company liable for the negligence of the driver of an engine not drawing a train, who has no subordinate except a fireman. *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837; even though the engineer in such case may be called a conductor, and have full charge of the engine. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914 (neglected to deliver running orders to engineer).

Compare the ruling that the driver of a "wild engine," not attached to a train, is a fellow servant, and not a vice principal, of a brakeman upon another train with which the engine collides by reason of such engineer's negligence. *Healey* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 136, 37 Atl. 676 (plaintiff's counsel had taken the special point that where an engineer is appointed to "conduct" a train agreeably to special orders or general rules, he is not a fellow servant of servants on his own or other trains).

Nor does it follow that because a rule of the company requires section men to obey conductors in furthering the passage of trains delayed by defects in the track, the conductor is constituted a vice principal as to the section men in such a sense as to render the company liable for the conductor's failure to warn one of those section men of the danger that a bluff overhanging the track may fall. *Slavens* v. *Northern P. R. Co.* (1899) 38 C. C. A. 151, 97 Fed. 255.

A conductor is not a vice principal except as to servants under his control. *Northern P. R. Co.* v. *Poirier* (1896) 167 U. S. 48, 42 L. ed. 72, 17 Sup. Ct. Rep. 741; *Northern P. R. Co.* v. *Mase* (1894) 11 C. C. A. 63, 27 U. S. App. 238, 63 Fed. 114. The latter case, in holding that it is only under the Montana statute that a conductor is a vice principal as to men on another train, supersedes the ruling to the contrary effect in *Ragsdale* v. *Northern P. R. Co.* (1889) 42 Fed. 383. A different principle has been applied in Ohio, under the superior servant doctrine. See § 514, *supra*.

For the North Carolina cases on conductors, see § 524, note 1, subd. (c).

(c) *Employees supervising the construction and maintenance of railway tracks and structures.*—A foreman of railway construction is assumed to be a vice principal in *Coyne* v. *Union P. R. Co.* (1889) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382 (negligence alleged was confusing order). His precise functions are not apparent from the report.

Employers have also been held liable for the negligence of the following employees:

A superintendent of construction on a railway. *Kansas P. R. Co.* v. *Little* (1877) 19 Kan. 267 (defective machinery furnished).

A superintendent of the work of extension of a railroad, who has foremen and workmen under him whom he employs and discharges at his pleasure, and who has control of the cars, tools, and machinery, with "full discretion to control and supervise." *Denver, S. P. & P. R. Co.* v. *Driscoll* (1889) 12 Colo. 520, 21 Pac. 708 (control of small flat car without brake was lost on a grade owing to the fact that a workman, in compliance with the superintendent's orders, lifted a stick which was used to govern its speed).

A general foreman of track layers, under the superintendent of construction, having the power to hire and discharge hands, and superintending their labor in constructing a railroad. *Colorado Midland R. Co.* v. *O'Brien* (1891) 16 Colo. 219, 27 Pac. 701 (overloaded steel car was derailed; negligence in regard to transportation of subordinates).

The general agent in charge of the track laying, having five gangs of men under him, each subject to its particular foreman, whom he has authority to hire and discharge, and having supreme control of his department in the absence of the general superintendent. *Colorado Midland R. Co.* v. *Naylon* (1892) 17 Colo. 501, 30 Pac. 219 (derailment caused by the negligent manner in which the work was directed to be done; same accident as *Colorado Midland R. Co.* v. *O'Brien* (1891) 16 Colo. 219, 27 Pac. 701).

The foreman of a railroad company to whom is delegated absolute authority and control of an undertaking to clear away *debris* against one of the company's bridges, and to call out employees to assist in that purpose, and "command where they should work and what they should do." *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 28 N. E. 183, 611 (while plaintiff's decedent was at work among driftwood, the foreman suddenly started a locomotive, the result being that one of the ropes passing from

it to the driftwood was jerked from its place, and struck plaintiff's decedent. "The foreman," said the court, "having required decedent to do a certain thing, while that thing is being done, he carelessly, by another command, puts him in mortal peril, and causes his death".

A foreman having exclusive charge and control of the work of constructing a tunnel, and authority to direct all the employees under him where they shall work. *Louisville, N. A. & C. R. Co.* v. *Graham* (1890) 124 Ind. 89, 24 N. E. 668 (plaintiff, while working in the place to which he was assigned, struck by falling timbers, said timbers being of insufficient strength and not sufficiently braced, to the knowledge of the foreman or repairs, who was aware of the existence of a dangerous crack in the roof).

The superintendent of the construction of a railway tunnel. *Tissue* v. *Baltimore & O. R. Co.* (1886) 112 [illegible] 56 Am. Rep. 310, 3 Atl. 667 (servant killed by explosion of dynamite or nitroglycerine placed too close to the work).

Of the remaining decisions in which liability was imposed on the master for the negligence of the officials designated, those decided by the circuit court of appeals are of more than doubtful authority under the more recent decisions of the Supreme Court of the United States. Another, the Nebraska one, as it emanates from a state in which the superior servant doctrine is accepted (see subd. D, *supra*, and chapter XXX., *post*) is of no particular significance. The others probably go further than most of the courts which reject that doctrine would at present be willing to extend the master's responsibility. As to the Michigan cases, see also the preceding section, *ad finem*.

A road master. *Atchison, T. & S. F. R. Co.* v. *Wilson* (1891) 1 C. C. A. 25, 4 U. S. App. 25, 48 Fed. 57 (section hand killed through the overturning of a wrecking car upon which he was engaged, because of the defective construction, under the superintendence of the road master, of a temporary track around a wreck); *Thompson* v. *Chicago, M. & St. P. R. Co.* (1883) 4 McCrary, 629, 11 Fed. 564 (order to go into place of unusual danger). As it was expressly held in *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603, that a divisional road master was not a vice principal, the authority of these cases can be saved only, if at all, by assuming (what the report does not show clearly) that the delinquent was the general road master of the entire road.

A road master (not stating whether divisional or general). *Cook* v. *St. Paul, M. & M. R. Co.* (1885) 31 Minn. 45, 24 N. W. 311 (plaintiff was set at work clearing away the *debris* of a burnt depot building, without proper precautions being taken for his safety). As to the relation of these employees to the subordinates in Minnesota, see chapter XXX., *post*.

A divisional road master. *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 109, 7 L. R. A. 623, 44 N. W. 1034 (on facts see § 24, *ante*).

A assistant road master. *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 367, 17 L. R. A. 636, 53 N. W. 397 (order to drop rails from moving car). As to the two Michigan cases, see § 544 [illegible]

[illegible] charge of a gravel train [illegible] hand under his command, and subject to his [illegible] tion, and subject to his [illegible] *Chicago P. R. Co.* v. *Doyle* (1897) 56 [illegible] 55, 70 N. W. 43 (sudden stop [illegible] in by order of foreman threw [illegible] against a brake).

A foreman in charge of a pile driver, with full authority to have it repaired when out of repair, and to hire and discharge the crew. *Schultz* v. *Chicago, M. & St. P. R. Co.* (1879) 48 Wis. 375, 4 N. W. 399 (failure to repair; but possibly this case was intended to rest on the conception that the negligence alleged was the breach of a non delegable duty).

A foreman of a gang of twenty men engaged in taking down a shed standing between railroad tracks. *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1893) 6 C. C. A. 112, 18 U. S. App. 10, 56 Fed. 801 (subordinate put to work in a dangerous place without proper precautions to protect him being taken).

(d) *Supervising employees in railroad yards, depots, etc.* — In Michigan a yard master who hires and discharges the yard hands, and directs and assigns their labors, is the agent of the company in these respects as well as in the furnishing of proper, suitable, and safe appliances for their labor. *Luttle* v. *Chicago & W. M. R. Co.* (1890) 84 Mich. 289, 47 N. W. 571 (knew of defect in engine, and incompetency of fireman to handle it).

The same doctrine has been applied by two Federal courts. *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 200, 70 Fed. 669

(workmen ordered to use defective skids for loading a car); *Hardy* v. *Minneapolis & St. L. R. Co.* (1888) 36 Fed. 857 (order given in making up trains). But these cases are more than doubtful law under the recent decisions of the supreme court. See § 549, *post*.

In Louisiana a yard master is held to be a vice principal. *McGraw* v. *Texas & P. R. Co.* (1898) 50 La. Ann. 766, 23 So. 401 (failed to notify train despatcher that cars had been left in a dangerous position).

The superintendent of the horse department of a street railway company was possibly regarded as a vice principal in *Rettig* v. *Fifth Ave. Transp. Co.* (1893) 3 Misc. 328, 26 N. Y. Supp. 896; but there the negligence was in regard to the place of work (door in a dangerous condition) and, moreover, the general manager had also been notified of the defect.

(c) *Supervising employees in the mechanical departments of railways.*—A railway company is responsible for the negligence of a master mechanic having control of the whole mechanical department of a railway company. *Rehbein* v. *Chicago & N. W. R. Co.* (1875) 33 Wis. 289 (defective engine injured switchman; case possibly rests on fact that negligence was the breach of a non-delegable duty); *New York, L. E. & W. R. Co.* v. *Bell* (1888) 112 Pa. 400, 4 Atl. 50 (allowed a pipe to remain where it was dangerous to men on cars passing under it); *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876 (plaintiff was engaged in the work of removing the key of the "equalizer" of a locomotive, under the master mechanic's direction, when the latter negligently pulled the equalizer out of its place so that it fell on the plaintiff).

It has also been held that a foreman of car repairers at the general shops of a railway company, who is known as the "wreck master" of the road, and who has entire control, when he goes to a wreck, of all engaged therein, including, among others, such general officers as the road master, is a vice principal. *Bergman* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 867 (section hand injured by defective tools). Brewer, J., thought the circumstances rendered the *Ross Case* controlling. Shiras, J., considered that any employee having the power of control and direction was a vice principal, and that the test of responsibility was not whether the negligent employee was at the head of some recognized department of the business. This is certainly not the doctrine of the Supreme Court of the United States. *Quære* as to this case under later decisions of the Supreme Court. See chapter XXX, *post*. A decision antagonistic to it rendered by the Federal court of appeals is cited in § 520, note 1, subd. (d), *supra*.

In *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 673, 43 N. W. 415 (failure to protect car repairer from moving cars), a railway company was held liable for the negligence of a master workman to whom was deputed the duty of instructing a car repairer as to the proper way of doing his work. The *Ross Case* was cited, but whether on the assumption that it is an exponent of the superior servant doctrine, or that it embraced the doctrine of departmental control, is not clear. Probably the former explanation is the correct one, as the Ohio decisions are also referred to.

A foreman of car repairers was held to be a vice principal in *Stacke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342.

(f) *Employees supervising railway departments not connected with transportation.*—A railway company is liable for the negligence of the following officials:

An employee having the full control of its timber yard. *Baldwin* v. *St. Louis, K. & N. W. R. Co.* (1888) 75 Iowa, 297, 39 N. W. 507 (pile of timber carelessly put up fell on a subordinate).

A foreman of a quarry belonging to a railway. *Kansas City, Ft. S. & M. R. Co.* v. *Hammond* (1894) 58 Ark. 321, 24 S. W. 723 (allowed laborer to remain on the track when a train might be expected at any moment).

Superintendent appointed by a railway company to supervise and manage its mining operations. *McDade* v. *Washington & G. R. Co.* (1886) 5 Mackey, 144 (defective machinery).

The head of the law department. See argument of Brewer, J., in *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914.

Compare also *McGovern* v. *Central Vermont R. Co.* (1890) 123 N. Y. 281, 25 N. E. 373, where the negligence of a manager of a grain elevator belonging to a railway company was held to affect it with liability; but the essence of the decision was the breach of the non-delegable duty of examining the possibly dangerous place of work into which he was sending a subordinate.

(g) *Supervising employees of manu-*

facturing establishments.—The following employees have been held vice principals:

The "superintendent of labor" of a large steel company, who is controlling the construction of a new building to contain the works. *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102.

The foreman of the oil department of a compress company. *Ft. Smith Oil Co.* v. *Slover* (1893) 58 Ark. 168, 24 S. W. 106 (possibly; but here the negligence alleged was the breach of the non-delegable duty of instruction).

The foreman of the foundry department in machine works. *Drinkout* v. *Eagle Mach. Works* (1883) 90 Ind. 423 (apparently assumed; but case went off on nature of negligent act).

The mill manager of a lumber company. *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743 (negligent order).

An assistant superintendent of a sawmill company in charge of a lumber yard, whose duties are to superintend the piling of the lumber, take charge of the yard and its management, and superintend the workmen, performing no labor himself in handling lumber. *Zintek* v. *Stimson Mill Co.* (1893) 6 Wash. 178, 32 Pac. 997, 33 Pac. 1055, second appeal (1894) 9 Wash. 395, 37 Pac. 340 (pile of lumber set on insecure foundation fell on workman).

(h) *Foremen in smelting works.*—A foreman having absolute control of the workmen engaged in operating the roasters at smelting works, who assigns them to whatever duties he thinks fit, without any immediate direction or superintendence of any one, is a vice principal. *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 316, 55 Pac. 673 (switch thrown in such a way as to injure a subordinate while pushing a car).

(i) *Employees supervising mining work.*—A jury would be justified in finding that an employee in full charge of the sinking of a shaft is a vice principal. *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210 (order to clean out a "missed" hole below a safe depth). Compare cases in (e) *supra.*

(j) *Supervising employee under municipality.*—An employee of a city engaged in shoveling dirt from a bank into a wagon is not a fellow servant of a person appointed by the board of public works of the city, with the approval of the city council, to take charge of the work on the streets, with authority to employ and discharge men, and control and direct the work in its entirety. *Hathaway* v. *Des Moines* (1896) 97 Iowa, 333, 66 N. W. 188 (petition describing an employee with above functions is not demurrable, as it shows him to be a vice principal).

The following have also been held to be vice principals:

A superintendent in full control of a quarry belonging to a city, with power to hire and discharge the workmen, and not joining with them in the work. *Augusta* v. *Owens* (1900) 111 Ga. 464, 36 S. E. 830 (ordered two laborers to loosen rock at a place where the plaintiff, underneath, would be endangered if it fell).

A street commissioner superintending the construction of a bridge. *Lebanon* v. *McCoy* (1895) 12 Ind. App. 500, 40 N. E. 700 (order to work in a dangerous place).

The inspector of the municipal water works, engaged in supervising the construction of a trench. *Ft. Wayne* v. *Christie* (1901) 156 Ind. 172, 59 N. E. 385.

A foreman upon a public work carried on by a municipal corporation which intrusted him with the entire charge of details, giving him the direction of the laborers and power to discharge them. *Stahl* v. *Duluth* (1898) 71 Minn. 311, 74 N. W. 143 (laborer ordered to pick round a hole in which there was an unexploded charge of dynamite).

(k) *Employees concerned with the loading of vessels.*—The relation of a head stevedore of a steamship company to his subordinate was held to be for the jury, where there was some evidence that the entire duty of providing the appliances for loading and unloading the vessels of the defendants had been intrusted to his discretion, and the proof which tends to fix upon him responsibility for the selection of the rigging, and for adjusting and working it, also tends to establish the fact that he was clothed as to these duties with the ultimate power and authority of the company. *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2.

Compare *Brown* v. *Sennett* (1885) 68 Cal. 225, 58 Am. Rep. 8, 9 Pac. 74, where a master stevedore was held liable for the negligence of his foreman. See § 527, note 3, *supra.*

An employee of a steamship company, superintending the loading of a ship, is a vice principal. *Chesney* v. *Ocean S.*

S. Co. (1893) 92 Ga. 726, 19 S. E. 33 (here the delinquency was the failure to keep a promise to supply a "hatch-tender;" but it is not stated whether it was simply an improper disposition of an adequate force, or the omission to hire enough assistants); *Hondson v. Wm. Johnston & Co.* (1899) 109 Ga. 454, 34 S. E. 587 ("walking boss;" for facts see § 540, note 2, *post*).

A steamship company was held liable for the negligence of the superintendent of its dock in *McCampbell v. Cunard S. S. Co.* (1893) 69 Hun, 131, 23 N. Y. Supp. 477 (defective arrangement of appliances injured stevedore). But the decision was reversed in (1895) 141 N. Y. 552, 39 N. E. 637, on the ground that the negligence related merely to the details of the work.

A foreman superintending the loading of a ship was treated as a vice principal in *Anderson v. Elder* (1901) 105 La. 672, 30 So. 120 (block attached to boom was not properly moused).

(1) *The commanding officers of ships.*

On the authority of the *Ross Case* it was held by the circuit court of appeals that the master of a steamboat was not a fellow servant of the engineer. *The Transfer No. 7* (1894) 9 C. C. A. 521, 20 U. S. App. 570, 61 Fed. 364, Reversing on this point (1893) 55 Fed. 38 (collision caused by nonobservance of rules as to signals). It is to be observed that the *Baugh Case*, decided the year before this one, is not cited, and the effect of that decision is still a matter of doubt, as regards this class of employees. See chapter XXX, *post*.

Other rulings have also been made upon the authority of the same case.

A seaman injured by the breaking of a gasket which the captain knew, from the report of the mate, to be in a rotten condition, was allowed to maintain a libel in admiralty against the ship to recover damages for the injury. *The A. Heaton* (1890) 43 Fed. 592, followed in *The Julia Fowler* (1892) 49 Fed. 277 (mate knew that a rope was defective).

A pilot, being a master *pro hac vice*, and responsible for the management and navigation of the vessel, was held not to by a fellow servant of a deckhand who is injured by his derelictions of duty in regard to such management. *The Titan* (1885) 23 Blatchf. 177, 23 Fed. 413 (collision due to not having a lookout properly stationed).

In *The E. B. Ward* (1881) 20 Fed. 702, it was suggested, *obiter*, that a captain was a vice principal.

Another case in which, though not on the ground of his being a departmental manager, a captain was held to be a representative of the shipowner, is *Thompson v. Hermann* (1879) 47 Wis. 602, 32 Am. Rep. 784, 3 N. W. 579. There it was held that a seaman could recover where the captain, who was also part owner, ordered him to adjust the rigging in a dangerous manner, and the seaman, after protesting and suggesting a safer method, was injured in carrying out the order. In a later case this decision was said to have been "placed mainly on the peculiar character of the employment, and the relations existing between the master and a common seaman of a merchant vessel outside of port." *Mathews v. Case* (1884) 61 Wis. 491, 50 Am. Rep. 151, 21 N. W. 513, where recovery was denied to a mate injured by the negligence of the captain, the relations between these two employees not being the same as those between the captain and the seaman.

The action of a mate injured by a captain's negligence was also held not maintainable in *Caniff v. Blanchard Var. Co.* (1887) 66 Mich. 638, 33 N. W. 744.

In *Olson v. Clyde* (1884) 32 Hun, 125, it seems to be assumed, *arguendo*, that the master of a vessel may be the *alter ego* of the owners; but so far as New York is concerned, this is certainly not the law. See § 520, note 1, subd. (g), *supra*.

In *Ramsay v. Quinn* (1871) Ir. Rep. 8 C. L. 322 (seaman drowned while obeying an order to abandon the ship), it was held that a demurrer based on the theory that the captain of a ship was a mere fellow servant of one of the crew should be overruled.

The following passage from Story on Agency, 7th Ed. § 116, was relied on: The captain of a ship is "clothed with the character of a special employer or owner of the ship, and representing not merely the absolute owner (*dominus navis*), but also the temporary owner, or charterer for the voyage (*exercitor navis*). In short, our law treats him as having a special property in the ship, and entitled to the possession of it, and not as having the mere charge of it, as a servant."

But this ruling was disapproved in *Hedley v. Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 58. Affirmed in [1894] A. C. 222 § 7, note, subd. 16, *ante*.

The master of a ship is, in any case, a representative of the shipowner in re-

536. Supervising employees held not to be heads of departments.—The delinquent employees mentioned in the cases collected below were expressly held not to be departmental vice principals. These rulings are referred to in a former subtitle (§ 520, *supra*) and are tabulated here for the reason that they will serve to indicate the downward limits of the doctrine discussed above. The remainder of the decisions cited in the section just specified may also be examined in this connection, for even though it may not be so stated in terms, the employees there named must be taken by implication not to be vice principals within the meaning of that doctrine.[1]

spect to the performance of all non-assignable duties. *Walker* v. *Bolling* (1853) 22 Ala. 294 (employment of crew); *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796 (giving medical aid to crew).

As to the cases in which the captain undertakes to do manual work himself, see chapter XXIX., *post*.

In Washington neither the mate nor the captain is a fellow servant of an ordinary seaman. *Keating* v. *Pacific Steam Whaling Co.* (1899) 21 Wash. 415, 58 Pac. 224 (order to furl sail in a dangerous manner). The *Ross Case* (subd. [b], *supra*) was cited. But this certainly does not support the conclusion that a mate is a vice principal.

[1] The boss of a small gang of ten or fifteen men engaged in making repairs upon a railroad over a distance of three sections, aiding the regular gang upon each section as occasion demands. *Northern P. R. Co.* v. *Peterson* (1895) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843, Reversing (1892) 51 Fed. 182 (careless application of brake); *Goodwell* v. *Montana C. R. Co.* (1896) 18 Mont. 293, 45 Pac. 210 (negligence in directing the work).

A foreman of carpenters, subject to the bridge superintendent, and merely deputed to take down a building. *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970.

A foreman working on the construction of a bridge, with two superiors between him and his employers. *Kelly* v. *Butte & F. Co.* (1899) 98 Fed. 380.

One who is merely in charge of a crew of men for the construction of a particular piece of work. *Hughes* v. *Leonard* (1901) 199 Pa. 123, 48 Atl. 862.

A foreman of car repairers, under a master car builder who is himself under the control of the master mechanic. *Grady* v. *Southern R. Co.* (1899) 34 C. C. A. 494, 92 Fed. 491.

The general foreman of railway shops, under a master mechanic. *Gaynon* v. *Durkee* (1898) 31 C. C. A. 306, 52 U. S. App. 587, 87 Fed. 302.

A general yard master in full control of a yard. *Cincinnati N. O. & T. P. R. Co.* v. *Gray* (1900) 50 L. R. A. 47, 41 C. C. A. 535, 101 Fed. 623; *Thomas* v. *Cincinnati, N. O. & T. P. R. Co.* (1899) 97 Fed. 245

A road master. *O'Viel* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086. See, however, summary of Minnesota decisions in chapter XXX., *post*.

A track foreman. *Spancake* v. *Philadelphia & R. R. Co.* (1892) 148 Pa. 184, 23 Atl. 1006.

An employee who commonly acts for the yard master. *Kirk* v. *Atlanta & C. Air-Line R. Co.* (1886) 94 N. C. 625, 55 Am. Rep. 621. Assuming the delegation of functions to have been complete in this case, it scarcely seems consistent with the other decisions in this state (see summary, chapter XXX., *post*), when construed in connection with the general principle that a servant deputed to act for an absent superior bears the same relation as the latter to his subordinates. Compare, however, *Prevost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88; *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102, cited *infra*.

The foreman of one of several switching crews engaged in the yard of a railroad company, under the general control of a yard master. *Harley* v. *Louisville & N. R. Co.* (1893) 57 Fed. 144, following the *Baugh Case*.

A gang boss in a railway shop, under

a master mechanic. *McBride* v. *Union P. R. Co.* (1889) 3 Wyo. 247, 21 Pac. 687.

A station agent. *Brown* v. *Minneapolis & St. L. R. Co.* (1884) 31 Minn. 553, 18 N. W. 834 (neither in general control of the business nor of a special branch of it, but simply charged with a special duty).

A telegraph operator. *Dealey* v. *Philadelphia & R. R. Co.* (1886; Pa.) 3 Cent. Rep. 112, 7 Atl. 170; *Monaghan* v. *New York C. & H. R. R. Co.* (1887) 45 Hun, 113. In the last-cited case the telegraph operator was charged with important duties at a certain point, imposing upon him the controlling and directing of the movements of trains there, within the system which the rule provided for that particular locality; but the court held the service required of him was within and subordinate to a department of the business of the company, and that, although in the performance of this service he necessarily exercised discretion and judgment in giving preference by signal in the movement of trains on to a single track, with a view to the safety and protection of persons and property, and for the orderly operation of the road, that did not make his judgment that of the company, as between it and its employees.

That there is nothing in his official character to make a mere telegraph operator, as distinguished from a train despatcher, a head of a department, is also implied in a portion of the reasoning of the court in *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952. But the representative character of these employees is usually denied on the ground that they are discharging the functions of mere servants. See § 611, *post*.

An engineer in charge of the motive power of an elevator in which other employees are carried to and from their work. *Walcott* v. *Studebaker* (1887) 34 Fed. 8.

A foreman subject to the order of a yardmaster. *Fraker* v. *St. Paul, M. & M. R. Co.* (1884) 32 Minn. 54, 19 N. W. 349.

A chief engineer who has general charge of an engine room and a department, with power to give orders to the men in the department, and to engage men for short jobs, in the manager's absence. *Prevost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88.

A foreman in a woolen mill, sometimes called a "boss machinist" and sometimes a "master mechanic," who was obliged to consult the superintendent as to any important alteration. *Stevens* v. *Chamberlin* (1900) 51 L. R. A. 513, 40 C. C. A. 42, 100 Fed. 378.

A foreman of a gang at a factory. *Casey* v. *Pennsylvania Asphalt Paving Co.* (1901) 198 Pa. 348, 47 Atl. 1128.

A foreman in charge of men constructing a sewer, with authority to hire and discharge them, under the supervision of a superintendent of sewer construction, who is himself subject to the instructions of the city engineer, as general superintendent of all public works. *Minneapolis* v. *Landin* (1893) 7 C. C. A. 344, 58 Fed. 525, 19 U. S. App. 245, following the *Baugh Case*.

A subordinate foreman who is not invested with any of the duties of the vice principal, while absent, and is merely instructed to call upon him to provide against danger, if any should arise. *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 182, 33 Atl. 1102.

An employee having direction of the actual work of removing a telephone line. *American Teleph. & Teleg. Co.* v. *Bower* (1897) 20 Ind. App. 32, 49 N. E. 182 (here the work was ordered by the company's district superintendent, and planned by its district chief).

A foreman of carpenters, working for a corporation. *Dewey* v. *Parke D. & Co.* (1889) 76 Mich. 631, 43 N. W. 644.

The underground manager of a mine. *Wilson* v. *Merry* (1868) L. R. 1 H. C. Sc. App. Cas. 326, 19 L. T. N. S. 30.

In Maryland it has been held that a divisional train despatcher on a railway is a fellow servant of an engineer. *Norfolk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 991. The ground taken being that the management of the division upon which the negligent servant was train despatcher had been committed to him, as he was a subordinate appointed by the superintendent, and that, though he had charge of the trainmen and of the movements of trains on his division, and could employ and discharge flagmen and brakemen, it was not shown that the master had relinquished all supervision of the work on that division, and intrusted its direction as well as the procuring of materials and machinery and other instrumentalities necessary for the service to his judgment and discretion. That this ruling, if construed as an unqualified assertion of a general doctrine

as to the position of a train despatcher, is contrary to the weight of authority in most jurisdictions, will be shown in § 577, subd. *a*, *post*. These adverse cases, however, are almost all founded on the theory that the controlling of the movements of trains is a nonassignable function of the railway company; and, as the negligence here alleged was merely that the despatcher had sent out unfit brakemen with a train, and these were not employed by him, but by the division superintendent, the decision is not necessarily repugnant, upon its facts, to those in other states. If the default had had relation to the movement of trains, the trend of judicial opinion in Maryland (see § 530 *supra* and chapter XXX., *post*) seems to leave it an open question whether the servant would not have been allowed to recover.

In an Irish case it has been held that, in the absence of evidence to show that the general traffic manager of a railway company occupies, towards the company, the position of a vice principal, he is to be taken as a fellow servant of a milesman (*i. e.*, track walker) employed by the same company. *Conway* v. *Belfast & N. Counties R. Co.* (1877) Ir. Rep. 11 C. L. 345 (Exch. Cham.). Affirming (1895) Ir. Rep. 9 C. L. 498. But this decision, which rests on *Wilson* v. *Merry* (§ 529, *supra*), is contrary to the general current of American authority.

CHAPTER XXIX.

FOR WHAT ACTS OF SUPERIOR SERVANTS A MASTER IS RESPONSIBLE.

536a. Necessity of proving that the act or omission which caused the injury was negligent.
537. No responsibility as to matters beyond the scope of the authority of the superior servant.
538. Distinction between official and nonofficial acts of supervising employees; generally.
539. Distinction considered with relation to the doctrine that the nature of the negligent act is the test of liability.
540. Breach of non-delegable duties by any superior servant, master liable for.
541. Issuance of orders deemed to be an official act.
542. Failure to protect subordinates from transitory dangers deemed to be official negligence.
543. Theory that a vice principal does not represent the master except in so far as he is discharging some non-delegable duty.
544. Theory that a vice principal does not act as the master's representative when he engages in manual labor.
545. Qualifications of this theory.
546. Theory that a vice principal represents the master even when he participates in manual labor.
547. Discussion of the doctrine of the dual capacity of vice principals.
    a. With reference to the standpoint of the courts which reject the superior servant doctrine.
    b. With reference to the superior servant doctrine.

536a. Necessity of proving that the act or omission which caused the injury was negligent.— In the great majority of the cases in which the defense of common employment is raised, the question whether the act or omission from which the injury resulted was culpable is not one of those which is submitted for the consideration of the court of review. It is clear, however, that this preliminary issue must be settled in the plaintiff's favor before the defense can become a material factor in the investigation. In the note below are collected some decisions in which it has been held that negligence was or was not an inference in point of law.[1]

[1] (a) *Negligence held to be for jury.* gineer who was killed by the falling of Negligence on the part of the super a locomotive through a burning trestle intendent of a railroad towards an en is established by evidence that he was

537. No responsibility as to matters beyond the scope of the authority of the superior servant.— Whatever difference of opinion there may be as to the character of the relations which must be shown to

notified by a county road superintendent, about two and a half hours before the accident occurred, that a fire was raging on the road, but sent no one to notify the train, which he knew was approaching, of the danger, and did not go himself in time to reach the dangerous point until after the accident. *Bateman* v. *Peninsular R. Co.* (1898) 20 Wash. 133, 54 Pac. 996.

The question as to whether a section master was guilty of negligence rendering the company liable for injuries sustained by a section hand in attempting to get a hand car off the track and out of the way of an approaching train is for the jury upon evidence that, with knowledge that an express train which was due had not passed, he ordered the car to be placed upon the track, promising the men to keep watch of the train, and that, upon seeing the train approach around a curve, he ordered the crew to remove the hand car. *Johnson* v. *Southern R. Co.* (1898) 122 N. C. 955, 29 S. E. 784.

In an action by an employee for personal injuries received by the fall of a pile driver, evidence, although contradicted, that the foreman ordered plaintiff to the top of the pile driver, some 30 feet high, to oil the wheel, and that, while he was on the same with the hammer near the top, other employees began moving it at the foreman's order by "pinching" it with crowbars, and that only one man was in charge of the guy rope, although two were necessary to properly stay it while being moved, —is sufficient to sustain a judgment for plaintiff. *Fremont, E. & M. Valley R. Co.* v. *Leslie* (1894) 41 Neb. 159, 59 N. W. 559.

A foreman is negligent in undertaking to move a car when a pair of wheels are off the track, as a result of which an employee is caught between such car and other cars standing on an adjoining track, and killed. *Chicago & E. I. R. Co.* v. *Driscoll* (1897) 70 Ill. App. 91.

(b) *Negligence not established.*—A message by a train despatcher to a conductor to "get orders" at a certain station was, as matter of law, an adequate provision to secure his train against collision with another, where it appears that this form of order was in frequent use on the road, and was understood to mean that the train to which it related should be held at the station specified until fresh instructions were received. The sufficiency of such an order as to the movement of a train cannot be tested by the fact that a collision occurred through its disobedience by the conductor and engineer. *Chicago, St. L. & N. O. R. Co.* v. *Doyle* (1883) 60 Miss. 977.

The conductor of a freight train is not guilty of negligence in signaling the engineer to move the train forward for the purpose of easing up upon a coupling pin, after giving instructions to his subordinates to open a switch, cut off a flat car, and place it upon a side track, since he has a right to presume that his subordinates have obeyed his order and are in a position safely and properly to uncouple the cars as directed. *Hudson* v. *Charleston, C. & C. R. Co.* (1893) 55 Fed. 248.

A conductor who is on a train while a running switch is in progress cannot be held negligent on the ground that the speed of the engine is unexpectedly rapid at the moment of the uncoupling, when it has always been usual for the engineer to control the speed, and it is his duty to do so. The conductor has the right to rely on the performance of that duty. *Lake Shore & M. S. R. Co.* v. *Knittal* (1878) 33 Ohio St. 468.

A train master is not negligent in ordering cars to be taken out of a train without seeing specially that a brakeman engaged in coupling cars is warned, since he has a right to assume that his orders will be properly carried out. *Martin* v. *Chicago & I. R. Co.* (1895) 65 Fed. 384. The court said: "The order in and of itself was a perfectly proper one: one which the situation and circumstances required to be given. The fault, if any, which resulted in the plaintiff's injuries, attended the execution of the order as an incident of that act, and was not naturally or necessarily inherent to or resultant from the order."

There was no negligence in placing a lumber car dangerous to mount and pass over, next behind the cars equipped with air brakes, which were immediately in the rear of the engine, where it was unnecessary for the brakeman to climb

exist between the delinquent and the injured employees, in order to affect the master with liability, it is universally agreed that the general rules of the law of agency are controlling in all cases to this extent, that, on the one hand, if the act was within the scope of such employee's authority, the master cannot escape liability on the ground

over it, and the only brake to be set thereon could be reached from the car following. The safety of the brakeman could not have been more effectively secured if the car had been placed in the middle of the train, where it could have been worked up to from both ends of the train by the front and the rear brakeman. *Harris* v. *Chesapeake & O. R. Co.* (1895; Va.) 23 S. E. 219.

Trainmen have a right to rely on the observance of a rule that watch should be kept while repairs are being made under a car, and are not negligent in backing a train against a car which, so far as may be inferred from the absence of a watchman, is not undergoing repairs. *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302 (car repairer injured).

A section foreman is not negligent in ordering the section hands to get a hand car on which they have been riding, off the track on discovering a passenger train approaching. On the contrary, the failure to give such an order would be culpable. *Chicago & A. R. Co.* v. *Goltz* (1897) 71 Ill. App. 414.

The instantaneous stopping of a work train without warning to a section hand standing on the platform of a caboose was not negligence rendering the company liable for injuries to the section hand from being thrown from the platform, where he knew that the train was to be moved forward a car's length. *Union P. R. Co.* v. *Doyle* (1897) 50 Neb. 555, 70 N. W. 43.

A railroad company is not liable for injuries to an employee engaged in constructing a bridge, incurred while in a dangerous position to which he went upon his understanding that he was ordered there by motions of the foreman in fact not made for such purpose, where the foreman did not know that he was in such place, and proceeded with the work causing the injuries. *McCarthy* v. *Chicago, R. I. & P. R. Co.* (1891) 83 Iowa, 485, 50 N. W. 21.

The foreman of a cable-car company, whose special duty it is to see that the cars are brought out of the car house on time each morning and started for their regular trips with the proper men in charge, is not guilty of negligence towards the gripman of one of such cars when first brought out on an important street, in failing to observe the latter's presence on the car, or to look to the rear of the car before starting it for the purpose of making room for other cars, where he was required to keep a close lookout in front, and had no reason to suspect that the gripman would get on the car in such a manner as to make it dangerous to start it. *Krouen* v. *St. Louis R. Co.* (1897) 141 Mo. 86, 41 S. W. 926.

The mere fact that a vice principal hurried his subordinates at their work, and used oaths in giving directions, does not show negligence. *Coyne* v. *Union P. R. Co.* (1889) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382.

A direction to the engineer by a vice principal in a harsh and loud tone, to hoist a loaded scaleboard, as a team is waiting, is not negligence which will render the employer liable for an injury to a fellow servant of the engineer, caused by the latter's applying the steam and hoisting the scaleboard too quickly. *Griffin* v. *Glen Mfg. Co.* (1893) 67 N. H. 287, 30 Atl. 344. The court said: "The direction to the engineer was not a command to hoist the scaleboard improperly, nor more quickly than usual. He could not reasonably understand he was to act in such manner as to endanger the safety of others. He was not commanded to do an unlawful act, nor a lawful act in an improper manner. There was nothing in the fact that a team was waiting, that required undue haste in hoisting the board. That was the only reason given by Perry to the engineer to attend to the duty assigned to him. There was no danger of injury to the team, nor from it, by collision or otherwise. The negligent manner of hoisting the board was the act of the engineer, and not of Perry."

A foreman of a foundry is not guilty of negligence in attempting to empty a ladle full of molten metal into a perfect one upon learning that the former is beginning to leak, when his act is not manifestly improper, and he has no reason to anticipate a fall of the ladle,

that it was done in direct violation of his orders,[1] and that on the other hand, there can be no recovery, where the act or order which caused the injury was entirely outside the scope of the authority of the delinquent employee. If the act or order had no reference to the master's concerns, there is, of course, no liability on the master's part.[2] But even if this point is determined in the plaintiff's favor, he

resulting in injury to a workman. *Martin* v. *Cook* (1891) 37 N. Y. S. R. 733, 14 N. Y. Supp. 329.

A foreman in a car repair shop is not guilty of negligence in selecting a bolt to be driven through the floor of the car, which is 1 inch longer than is needed, by which an employee under the car is injured, where bolts are frequently used somewhat longer than are required, and a bolt of a proper length would project 1½ inches below the bottom of the car. *Holtz* v. *Great Northern R. Co.* (1897) 69 Minn. 524, 72 N. W. 805.

[1] *Atchison, T. & S. F. R. Co.* v. *Randall* (1888) 40 Kan. 421, 19 Pac. 783. In *Chicago & N. W. R. Co.* v. *Bayfield* (1877) 37 Mich. 205, where the railway company was held liable for the negligence of the conductor of a work train in ordering a laborer to do work outside the scope of his contract (see chapter XXV., *ante*), the court said: "It is, in general, no excuse to the employer that an injury which has occurred was caused by disobedience of his orders, whether they be express orders or implied orders. He assumes the risk of such disobedience when he puts the servant into his business; and the reasons for holding him responsible for the servant's conduct are the same, whether the injury results from a failure to observe the master's directions, or from neglect of the ordinary precautions for which no specific directions are deemed necessary. It will be conceded that for a positive wrong beyond the scope of the master's business, intentionally or recklessly done, the master cannot be held responsible; this being very properly regarded as the personal trespass or tort of the servant himself. But when the wrong arises merely from an excess of authority, committed in furthering the master's interests, and the master receives the benefit of the act, if any, it is neither reasonable nor just that the liability should depend upon any question of the exact limits of the servant's authority. The master fixes these, and it is his duty to keep his servant, in what is done by him, within the limits fixed. An act in excess would still have the apparent sanction of his authority; the occasion for it would be furnished by the employment, and the injured party could not always be expected to know or be able to discover whether it was or was not without express sanction."

In *Redman* v. *Michigan C. R. Co.* (1884) 55 Mich. 57, 54 Am. Rep. 348, 20 N. W. 788, the court was equally divided upon the question whether a brakeman could recover for an injury caused by the conductor's undertaking to manage an engine in the absence of the engineer. Two were for holding the company liable as for an "abuse of authority" by an employee invested with the non-delegable duty of seeing that his subordinates discharged their respective duties. Judge Cooley and another of his colleagues thought there was nothing to show that the conductor was not acting within his powers in operating the engine, and drew the inference that the plaintiff was not in the position of a servant receiving an order, which he might rightfully have disobeyed, to do something outside the scope of his employment. The *Bayfield Case* was thought by them not to be in point.

An employer is liable for the acts of a vice principal done within the scope of his employment, resulting in an injury to an employee, although the employer was not present. *Connor* v. *Saunders* (1894) 9 Tex. Civ. App. 56, 29 S. W. 1140 (defendants had argued that they would not be liable unless they had expressly authorized their foreman to commit an injury upon the plaintiff).

[2] A section hand injured while traveling on a hand car after the day's work was over, and merely for the purpose of bringing provision for his boss, cannot recover. *Hurst* v. *Chicago, R. I. & P. R. Co.* (1878) 49 Iowa, 76.

A foreman in speaking to an employee in a friendly manner and for purposes not connected with the employment is

must still fail, unless he can show that the superior servant had authority, either express or implied from the nature of his functions and the regular course of the business, to do the act or give the order alleged to be negligent.[3] The ultimate and essential question is whether the vice principal had ostensible authority to give the orders which led to the injury. Hence, if a representative capacity is bestowed upon a superior servant by general directions to obey his orders, that capacity continues, so far as the subordinate receiving those directions is concerned, until he is actually informed that the

not acting as a vice principal so as to render the master liable for an injury which the employee receives through having attention diverted momentarily from his work by the foreman's words. *Walsky* v. *Schumacher* (1894) 7 Misc. 8, 27 N. Y. Supp. 331.

[3] Where an engineer has no authority to order a yard master to couple cars, and it is no part of the latter's duties to do such work, the company is not liable for injuries received by him in coupling a car at the request of the engineer. *Bradley* v. *Nashville, C. & St. L. R. Co.* (1884) 14 Lea, 374.

Where a boy employed in a boiler shop to work in a tool room, being out of work, is directed by the boss of the tool room to go into the adjoining boiler room for work, where he sustains the injuries sued for, the boss of the tool room, being merely authorized to direct the work in that room, has no authority to direct plaintiff to seek employment in the boiler room, and the master is not liable. *Fisk* v. *Central P. R. Co.* (1887) 72 Cal. 38, 13 Pac. 144.

A servant who has no power to suspend rules cannot, by directing a subordinate to procure certain materials in violation of the rules provided for such a case, impose responsibility on the master. *Keenan* v. *New York, L. E. & W. R. Co.* (1895) 145 N. Y. 190, 39 N. E. 711. There the plaintiff's intestate and another man were at work repairing a car, and found they needed a bumper spring. The intestate applied to a coemployee for it, and was informed that he did not have one. After a further search he told the "gang boss" that he was unable to find what he wanted, and was directed to go to another track, and take one from a car there. While he was under the car, some cars were backed against it, and he was injured. It was admitted by appellant's counsel that there was no direct evidence in the case showing that it was any part of Tracy's duty to furnish materials required by the workmen under him, but he insisted that, as the defendant had failed to designate any one person whose duty it should be to borrow springs from other cars for temporary use, and still continued the business of car repairing, it not only acquiesced in the gang foreman's procuring such materials, but impliedly authorized them to procure them wherever they could. The appellant's counsel also admitted that Tracy was the fellow servant of the intestate in everything except in the performance of a duty which the law imposed upon the defendant, *viz.*, procuring materials for use. The court declined to adopt these views, saying: "It would lead to the establishment of an exceedingly unsafe rule, to hold that a gang boss over forty or fifty men could, without direct authority from the company, change the safe and proper rules in pursuance of which the work in the repair yards was conducted, and direct workmen to prosecute their labors under cars standing on tracks other than the regular, duly protected repair tracks. Tracy [the gang boss] was in no legal sense the representative of the defendant when he suggested to the intestate that he should procure a spring from a car standing on track No. 8; he was a fellow servant making a very unwise and dangerous suggestion."

A mason injured by the negligence of carpenters working on the same building, in constructing a defective scaffold, cannot recover where there is no evidence to show that it was any part of their employment as carpenters to make ladders for anybody but themselves. *Mercer* v. *Jackson* (1870) 54 Ill. 397.

It will be useful to note here that the principle stated in the text is controlling under the English employers' liability act of 1880 and similar American statutes making the master liable for the negligence of employees exercising su-

authority so given has been withdrawn or restricted.[4] But in cases of this class it is held that the mere belief of the injured servant that he had been directed to obey the orders of the delinquent will not be sufficient to fasten responsibility on the employer, if, as a matter of fact, no such directions had ever been given.[5]

In most kinds of business authority to commit acts of personal violence amounting to a battery cannot be inferred, for this reason, if for no other, that larger powers cannot be imputed to an agent than the principal himself possesses. A master, therefore, cannot ordinarily be held liable for the act of a supervising employee in beating a subordinate, even though it was for the purpose of furthering the master's business by compelling him to work.[6] Under the maritime law a ship owner may be required to answer for a similar offense by the captain of one of his vessels, where it amounts to a misuse of his power to chastise a seaman for the maintenance of discipline, but this principle cannot be extended so as to create a liability for a wanton assault, which, as the evidence shows, was not demanded by any

perintendence or control. *Brown* v. *Butterley Coal Co.* (1885) 53 L. T. N. S. 964, 50 J. P. 230. See chapter XXXVII., *post*.

[4] A son of an employer represents the latter so as to render the latter liable for his neglect in directing an employee to do a certain act which he was not ordinarily called upon to perform, where the son had been directed to have such act performed, and the employee had general directions to do what the son told him. *La Fortune* v. *Jolly* (1896) 167 Mass. 170, 45 N. E. 83. The court held that it was not competent for the defendant to show that the son's general authority had been secretly withdrawn, and that the son had been instructed to perform personally the duty in the execution of which the plaintiff was injured.

An instruction in an action for injuries to a gripman upon a cable car, that it is immaterial whether the person exercising the authority to direct and command was known as a foreman or by any other title, if clothed with such apparent authority, is not objectionable on the ground that the master is not liable for negligence of one clothed with a special or limited authority, not arising from the performance of such authority. *West Chicago Street R. Co.* v. *Dwyer* (1896) 162 Ill. 482, 44 N. E. 815.

[5] *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743 (servant here had been ordered to perform duties outside the scope of his employment).

[6] *Jones* v. *St. Louis, N. & P. Packet Co.* (1890) 43 Mo. App. 398. There Judge Thompson after pointing out that, under the general law of master and servant, the master had no power to inflict personal chastisement upon the servant, and that the admiralty law on this point has no application to actions based on circumstances occurring on a river like the Mississippi, at least when such actions are brought into state courts, summed up as follows: "The case is not one where the superior servant or vice principal had any authority from the general master, either express or implied, to use violence under any circumstances whatever in accomplishing the purposes of the master. It is, therefore, not like the case where the railway conductor wrongfully expels the passenger. Nor was it a case where the master had assumed, by contract or otherwise, any special duty toward the servant injured, of protecting him from injury on the part of another servant, such as the duty which the carrier assumes toward his passenger, of transporting him safely and without harm from one place to another. The act done to the plaintiff by the superior servant was therefore, neither an act done in the scope of his employment, nor an act

pressing emergency, and was a mere vindictive indulgence of the captain's own passions.[7]

Another case in which a vice principal is deemed to be acting outside the scope of his employment is where, merely as a personal matter, he gives a subordinate some information which proves to be erroneous, and the subordinate receives an injury in consequence of his reliance on the statement.[8]

538. Distinction between official and nonofficial acts of supervising employees; generally.— Under the general law of agency, the principal, while he is not liable if the agent transcends his authority, must answer for everything done by such agent within the scope of his authority. But in actions brought by a servant to recover for injuries caused by a delinquent vice principal, the rule of *respondeat superior* is not universally conceded to have this unrestricted scope. As will be shown below (§§543–545, *infra*), many of the courts proceed upon the theory that, even where the negligence in suit is proved to have had reference to the master's business, the plaintiff's action may still be barred by evidence susceptible of the construction that the vice principal was acting in the capacity of a mere servant when he inflicted the injury for which indemnity is sought. In other words, he is conceived of as a functionary having a dual character, some of whose derelictions of duty are official, and others nonofficial, a subordinate being allowed to recover if his injury was due to an official act, and not otherwise.[1]

done in violation of any special duty which the general master has assumed towards the plaintiff, which duty the immediate actor was appointed to perform. It stands in law as his mere wanton and criminal act, for which not another person, but himself, is liable."

[7] *Gabrielson* v. *Waydell* (1892) 135 N. Y. 1, 17 L. R. A. 228, 31 N. E. 969. The court remarked that the captain's command does not extend over the persons of the crew, "beyond the infliction of usual and necessary punishment in cases of disobedience or infraction of rules."

[8] Recovery has been denied where a workman was injured by relying on the statement of his foreman that a rope which he was about to use for the purpose of descending from a trestle was secure. *Louisville & N. R. Co.* v. *Lahr* (1888) 86 Tenn. 335, 6 S. W. 663. The court here relied upon the distinction between official and unofficial acts, but it is submitted that the true and only reason for absolving the employer should have been that the servant was under no orders to descend from the trestle, and was using the rope for his own accommodation entirely. If the servant had been about the company's business, or had been leaving his work, such an assurance would undoubtedly have been given by the foreman in his character of vice principal.

[1] "The same individual may combine in his own person the functions of both master and servant." *Cole Bros.* v. *Wood* (1894) 11 Ind. App. 37, 36 N. E. 1074. "The mere fact that an injury results from the negligence of a servant superior in rank to the injured servant does not render the master liable, but, in order to charge the master with such negligence, the superior servant must so far stand in the place of the master as to be charged in the particular matter with the performance of a duty towards the inferior servant, which, under the law, the master owes that servant." *Allen* v. *Goodwin* (1893) 92 Tenn. 385, 21 S. W. 760.

This theory of course only becomes a

In any jurisdiction where the functions of supervising employees are differentiated upon this basis, the effect which the theory has upon the plaintiff's rights of recovery should be explained to the jury in terms appropriate to the evidence introduced.[2]

The question as to whether an employee was acting as a vice principal at the time an injury was received by another employee is a question for the jury to determine from the evidence in the case.[3]

It may be mentioned in passing, though the subject does not fall,

material element where the delinquent was in control of the injured person. In *Lincoln Coal Min. Co.* v. *McNally* (1884) 15 Ill. App. 181, it was contended that as a negligent shaft boss had the power to hire and discharge other employees of the company working at the shaft, and to superintend them at work, he was a representative of the master, and not a fellow servant with deceased, who did not work under him. But the court said: "It is not necessary to inquire how far, if at all, he represented the power of the common master. The mere fact that he may have had the power to employ and discharge other servants, if conceded, and to superintend them when at work, did not, as to the particular alleged act of negligence by which deceased was killed, change his character from that of a coservant to that of a representative of the company. The death of deceased was not the result of the exercise of any authority conferred upon Downey. He exercised no power that placed deceased in a more exposed or dangerous position than he would otherwise have occupied; nor did any power exercised by him contribute to the accident. The authority possessed by Downey, whatever it may have been, had no influence or bearing upon the accident which caused the injury; and at the time of the accident Downey and deceased were performing the labor of common servants, neither exercising any authority over the other; and they were coservants as to the labor then being performed by them."

In exceptional instances, employees may "occupy not only a dual, but a threefold, relation toward each other, according to the duties they are called upon or delegated to perform, to wit, that of superior or master, co-ordinate or fellow servant, inferior or servant. . . . Where the injury is caused by an employee acting in the discharge of a duty that renders him inferior to or co-ordinate with the injured employee, the master or company is not liable; but where he acts in a superior position the master is liable." "For instance, in running the train, the conductor is the superior of the engineer, and in that particular he represents the master; in the separate management of the engine and the train from the engine back they are co-ordinate or fellow servants, each being independent in his own sphere; and in permitting the fireman or other person to manage the engine in his stead, the engineer is the superior of the conductor, discharging a nonassignable duty delegated to him by the master or company." *Core* v. *Ohio River R. Co.* (1893) 38 W. Va. 456, 469, 18 S. E. 596.

[2] Instructions drawing the attention of the jury to this principle should be given where there is evidence tending to show negligence of a superior servant, whereby an inferior servant has been injured. *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387; *Illinois C. R. Co.* v. *Bolton* (1897) 99 Tenn. 273, 41 S. W. 442 (error to refuse an instruction that a section foreman does not represent the company as to what he does as a laborer); *Mobile & O. R. Co.* v. *Godfrey* (1895) 155 Ill. 78, 39 N. E. 590 (error to instruct a jury on the theory that a conductor who was also acting as foreman of a work train was, as matter of law, a representative of the master for all purposes).

An instruction that, if the jury believe that the complainant was injured through the negligence of defendant or his servants, and not through his own negligence, they will find for the complainant, is too broad, as it does not distinguish between the acts of a vice principal and the acts of a servant. *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 673, 43 N. W. 415.

[3] *Mazzeli* v. *Zdarski* (1901) 93 Ill. App. 331 (weight of evidence held to be that the delinquent employee acted as an interpreter merely, in receiving complaints as to the existence of a defect).

strictly speaking, within the scope of the present note, that the cases decided under the various employers' liability acts which impose a liability for the negligence of superior servants also disclose a conflict of opinion as to the limits of that liability, where the injury was due to participation in manual work. See chapter XXXI., *post*.

539. Distinction considered with relation to the doctrine that the nature of the negligent act is the test of liability.— It should be observed here that, although many of the decisions to be cited in the following sections, in which the master was held liable, might have been equally well referred to the theory that he must, at his peril, see that all non-delegable duties are performed with reasonable care, the only cases with which we are now properly concerned are those in which, conceding the delinquent employee to be a vice principal by virtue of his rank and the nature and extent of the control exercised by him, he was acting as an agent of the master, or as a mere servant. Logically speaking, the process by which the master's liability is determined in this class of cases is, it is manifest, precisely the reverse of that employed in those reviewed in the following chapters. In the one instance, the inquiry starts with the assumption that the delinquent was a vice principal, and proceeds to determine whether he was acting in his representative capacity as regards the default complained of. In the other, the single question to be considered is whether the default imputed was one which amounted to a breach of some one of the master's non-delegable obligations, and the superior rank of the delinquent employee consequently becomes a nonessential element in the inquiry. He is viewed, that is to say, solely as the medium through which the culpable violation of duty operated to the injury of the plaintiff. In classifying the authorities, however, it is often somewhat difficult to observe the distinction here adverted to, for the reason that, where the facts are such as render it possible to conduct the investigation along either of the alternative lines thus indicated, the courts have failed to define, with as much precision as the situation demands, the standpoint from which they were examining the defendant's liability. In not a few instances, indeed, there is even room for doubting whether judges have fully appreciated the distinction and its rationale.[1] Any case in which there is any

[1] For example, in *McCosker* v. *Long Island R. Co.* (1881) 84 N. Y. 77, to sustain the ruling that no recovery could be had for the negligence of a yard master in signaling for the movement of a car at a wrong moment, there is cited *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521. This case, as will be seen by referring to § 543, *post*, was quite inappropriate as an authority, inasmuch as a yard master was, under previous rulings of the court, unquestionably a fellow servant as to the discharge of his ordinary duties. It is ob-

uncertainty on this score will receive notice both in this and in the following chapter.

The essence of the position of a vice principal being that he represents an absent master, it occasionally follows that, "where the employer himself assumes control and gives an express order not only what to do, but how to do it, even a vice principal is bound to obey, and becomes for the time being a mere coemployee, whatever his general authority under the circumstances."[2] An analogous situation is presented where an employee who is a vice principal as being the superintendent of a main department of his master's business is at the time of the accident occupying another position of a lower grade. As long as he fills that position, it is clear that none of his acts can be those of a vice principal, unless they belong to the class of representative acts which are wholly independent of rank.[3]

Although, as will be shown below, many courts hold that a negligent act of a vice principal is not official where it has a direct connection with manual labor, it is clear that the mere fact of its being the duty of a vice principal to assist his subordinates in their work will not prevent recovery for injuries caused by negligence of a distinctly official character.[4]

servable, moreover, that, in none of the late decisions by this court (see § 543, *post*) absolving the master from liability for the defaults of supervising employees whose official position was such as to place them at least on the border line between vice principals and mere servants, is any clear statement found showing whether the tests of representative capacity recognized in *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573, and *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369, are still regarded as having a concurrent existence with the test supplied by the nature of the negligent act, and as being merely limited by the latter test under certain circumstances, or whether the earlier decisions are now no longer law in New York.

[2] *Provost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88.

[3] Cases illustrating this rule must, in practice, be extremely rare, for the simple reason that officials of sufficiently high rank to be vice principals seldom discharge the duties of another distinct position in the manner here supposed. But the general principle must clearly be as stated, and it is recognized in the very recent decision of the Federal court of appeals that an engineer, in ordering his fireman to oil a turntable at a place out on the line does not act as a vice principal, although he may also be foreman of a roundhouse at a place some distance away, and, as such, possibly a representative of the company while acting in that capacity. *Briegal* v. *Southern P. Co.* (1900) 39 C. C. A. 359, 98 Fed. 958 (started the turntable). Compare also the language used in *Brick* v. *Rochester*, N. Y. & *P. R. Co.* (1885) 98 N. Y. 211, quoted in § 543, *post*.

[4] *Lake Shore & M. S. R. Co.* v. *Lavalley* (1880) 36 Ohio St. 222 (foreman of car repairers failed to protect properly a car under which he himself and one of his hands were working, the consequence being that it was struck by a moving car). Compare *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863; *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 386, 55 Pac. 673. The fact that an assistant superintendent in a lumber yard occasionally performs some services in keeping tally of the lumber does not deprive him of his character of vice principal so far as it depends on the discharge of any nonassignable duties. *Zintek* v. *Stimson Mill Co.* (1894) 9 Wash. 395, 37 Pac. 340.

540. Breach of non-delegable duties by any superior servant, master liable for.— According to the great weight of authority, the master must answer for the defaults of employees who are vice principals, under any of the doctrines developed in the three preceding subtitles, wherever the negligence complained of consists in the failure to see that only appliances which satisfy the legal standard of safety are supplied to their subordinates;[1] or that the place of work is and remains as safe as it can be made by reasonable care;[2] or that the serv

[1] *Clarke* v. *Holmes* (1862) 7 Hurlst. & N. 937, 31 L. J. Exch. N. S. 356, 8 Jur. N. S. 992, 10 Week. Rep. 805, per Byles, J. (see § 526, *ante*); *Borgman* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 667 (wreckmaster); *Lund* v. *Hersey Lumber Co.* (1890) 41 Fed. 202 (general superintendent); *Foster* v. *Passeg* (1888) 8 Houst. (Del.) 168, 11 Atl. 545 (general manager); *Colorado Mill & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28 (manager); *Helbish* v. *Washington & G. R. Co.* (1886) 5 Mack. 144 (departmental manager); *Lytle* v. *Chicago & W. M. R. Co.* (1890) 84 Mich. 289, 47 N. W. 571 (yardmaster); *Mc Campbell* v. *Camrid S. S. Co.* (1893) 69 Han. 131, 23 N. Y. Supp. 477 (deck superintendent of steamship company); *Retton* v. *Fifth Ave. Transp. Co.* (1894) 6 Misc. 328, 26 N. Y. Supp. 896 (departmental manager); *Union P. R. Co.* v. *Fay* (1890) 43 Kan. 750, 23 Pac. 1039 (foreman of derrick); *Mitchell* v. *Robinson* (1881) 80 Ind. 281, 41 Am. Rep. 812 (general manager; defective hoister); *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 401 (boiler exploded; no accident would have occurred if it had been disconnected by the manager when it was observed to be defective); *Walton* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2 (head stevedore negligent in selecting and adjusting rigging); *Hannas* v. *Missouri P. R. Co.* (1891) 43 Mo. App. 547 (gang foreman failed to furnish necessary appliances); *Tobler* v. *Hannibal & St. J. R. Co.* (1887) 93 Mo. 79, 5 S. W. 810 (master mechanic improvised a coupling); *Taylor* v. *Missouri P. R. Co.* (1891, Mo.) 16 S. W. 206 (road master improvised a coupling); *National Fertilizer Co.* v. *Travis* (1899) 102 Tenn. 16, 49 S. W. 832 (failure of foreman to maintain appliances in safe condition); *Brannon* v. *Wabash Western R. Co.* (1891) 124 Mo. 55, 24 S. W. 731, 27 S. W. 644 (road master removed brake staffs); *Pittsburg Bridge Co.* v. *Walker* (1897) 170 Ill. 550, 18 N. E. 915 (bridge foreman dispensed with appliance necessary for safety); *The Jalo Fowler* (1892) 49 Fed. 277 (chief officer of ship furnished defective rope); *Banks* v. *Wabash Western R. Co.* (1890) 40 Mo. App. 458 (section foreman allowed hand car to become unsafe); *Clowers* v. *Wabash, St. L. & P. R. Co.* (1886) 21 Mo. App. 213 (section foreman failed to report defective hand car for repairs); *Sweeney* v. *Gulf, C. & S. F. R. Co.* (1892) 81 Tex. 133, 19 S. W. 555 (section foreman allowed hand car to become defective); *Wassau P. R. Co.* v. *James* (1888; Tex.) 10 S. W. 332 (same facts); *The* I. *Heaton* (1890) 43 Fed. 592 (captain of ship knew rope to be rotten).

In *Ushros* v. *Ingus* (1895) 61 Ill. App. 304, the trial court held to have erroneously given instructions from which it might be inferred that the foreman was a fellow servant, because the erection of a derrick was for the purpose of carrying on the same general business in which the plaintiff was engaged.

Patterson v. *Pittsburg & C. R. Co.* (1874) 76 Pa. 389, 18 Am. Rep. 412 (general manager); *Brothers* v. *Carbee* (1873) 52 Mo. 372, 14 Am. Rep. 424 (general manager); *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 100, 4 Atl. 50 (departmental manager); *Patterson* v. *Wallace* (1851) 1 Macq. H. L. Cas. 748 (roof of mine tunnel allowed by underground manager to become unsafe); *Gallagher* v. *Piper* (1864) 16 C. B. N. S. 669, 33 L. J. C. P. N. S. 329 (see § 525, *ante*); *Lynch* v. *Hoppart* (1857) 19 Sc. Sess. Cas. 2d series, 399 (defects in scaffolding known to manager); *Walsh* v. *Centenary Church* (1876) 62 Mo. 326 (same facts); *Deacon* v. *Lukens Iron Works* (1877) 4 Mo. App. 296, (foreman furnished defective scaffold); *Heckman* v. *Hodge* (1888) 35 Fed. 253 (foreman allowed scaffold to become a pitfall); *Slater*

v. *Chapman* (1887) 7 Mich. 523, 35 N. W. 106 (foreman created pitfall by removing clay from a temporary staircase); *Mayhew* v. *Sullivan Min. Co.* (1884) 76 Me. 100 (manager created a pitfall by having hole cut in platform); *Brothers* v. *Carter* (1873) 52 Mo. 372, 14 Am. Rep. 424 (superintendent built defective false work); *Woods* v. *Lindrall* (1891) 1 C. C. A. 37, 4 U. S. App. 49, 48 Fed. 62 (foreman of construction erected an unsafe trestle); *Band of Hope & A. Consols* v. *Mackay* (1871) 2 Victorian Rep. (L.) 158 (general manager allowed mine ladder to remain insecurely fastened); *Louisville, N. A. & C. R. Co.* v. *Graham* (1890) 124 Ind. 89, 24 N. E. 668 (foreman of tunnel did not support roof adequately); *Westcdle Coal Co.* v. *Schwartz* (1898) 177 Ill. 272, 52 N. E. 276, Affirming (1897) 75 Ill. App. 468 (failure of pit boss to look after the roof of a room in a mine); *Anderson* v. *Bennett* (1888) 16 Or. 515, 19 Pac. 765 (superintendent did not make sure that all the blasts had been properly exploded before sending laborer to resume drilling); *Libby, McN. & L.* v. *Scherman* (1893) 146 Ill. 540, 34 N. E. 801, Affirming (1892) 50 Ill. App. 123 (foreman piled barrels carelessly); *Zintek* v. *Stimson Mill Co.* (1894) 9 Wash. 395, 37 Pac. 340 (assistant superintendent raised a pile of lumber on an insecure foundation); *Tissue* v. *Baltimore & O. R. Co.* (1886) 112 Pa. 91, 56 Am. Rep. 310, 3 Atl. 667 (departmental manager stored explosives dangerously close to the place of work); *Chicago Anderson Pressed Brick Co.* v. *Sobkowiak* (1889) 34 Ill. App. 312 (1894) 148 Ill. 573, 36 N. E. 572 (foreman did not secure laborer against being injured by the fall of a bank); *Thompson* v. *Chicago, M. & St. P. R. Co.* (1883) 5 McCrary, 542, 18 Fed. 239 (similar facts); *Burlington & M. River R. Co.* v. *Crockett* (1886) 19 Neb. 138, 26 N. W. 921 (no watchman stationed to give notice of danger while a bank threatened to fall); *LaSalle* v. *Kostka* (1901) 190 Ill. 130, 60 N. E. 72, Affirming (1900) 92 Ill. App. 91 (foreman did not see that sides of sewer trench were properly braced); *Hall* v. *St. Joseph Water Co.* (1891) 48 Mo. App. 356 (similar facts); *Atchison, T. & S. F. R. Co.* v. *Wilson* (1891) 1 C. C. A. 25, 4 U. S. App. 25, 48 Fed. 57 (road master constructed a defective temporary track); *Kansas City Car & Foundry Co.* v. *Scerist* (1898) 59 Kan. 778, Appx. (foreman of carpenters left a heavy beam in such a position that it fell); *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1893) 6 C. C. A. 142, 18 U. S. App. 10, 56 Fed. 804 (no proper precautions to secure servants taking down building); *Cook* v. *St. Paul, M. & M. R. Co.* (1885) 34 Minn. 45, 24 N. W. 311 (place of work not kept safe for servants ordered to clear away *débris* of a burnt building); *Northern P. R. Co.* v. *Beaton* (1894) 12 C. C. A. 301, 29 U. S. App. 88, 64 Fed. 563 (improper disposition of a derrick on a railway car); *Colorado Midland R. Co.* v. *O'Brien* (1891) 16 Colo. 219, 27 Pac. 701 (overloaded car caused derailment); *Colorado Midland R. Co.* v. *Naylon* (1892) 17 Colo. 501, 30 Pac. 249 (same facts); *Openshaw* v. *Utah & N. R. Co.* (1889) 6 Utah, 132 (defective loading of railway car by conductor); *Salem-Bedford Stone Co.* v. *O'Brien* (1898) 150 Ind. 656, 49 N. E. 457 (superintendent failed to secure wheels of "traveler" used for moving large stones).

Proof that a rule of a steel company, that molds of a certain class rounding on the bottom should be laid down, was violated by leaving such a mold standing on one end with the empty molds, and that, within twenty minutes after it was thus left standing, it fell over on an employee, is sufficient to justify a finding that the servants of such company were guilty of negligence. *Joliet Steel Co.* v. *Shields* (1893) 146 Ill. 603, 34 N. E. 1108, Affirming (1892) 45 Ill. App. 453.

It has been held that a fire boss in a coal mine, whose only power of control is to direct the men to leave a dangerous place at which they are working and go to another, even if he is a vice principal by virtue of his functions, which was denied, does not occupy that relation of vice principal toward an employee, as regards the act of opening his lamp for the purpose of lighting his pipe, after a statement by such employee that there is no gas at a place which such boss is about to test. *Morgan* v. *Carbon Hill Coal Co.* (1893) 6 Wash. 577, 34 Pac. 152, 772 (Dunbar, Ch. J., dissenting). But it is difficult to admit that this decision is correct, in view of the fact that it was the especial duty of the negligent employee to prevent miners from going to places where there were dangerous accumulations of gas.

The employer is responsible for the negligence of the superintendent of the work of loading a ship, in changing the

ants whom they control are competent for the duties to which they are assigned,[3] and sufficient in number to perform those duties without unduly endangering themselves or their coëmployees;[4] or that the place of work and the various appliances are examined at proper intervals with a view to ascertaining whether they have become abnormally dangerous from any cause;[5] or that a safe system for the conduct of the business is adopted and adhered to;[6] or that instruction and

deck crew without notifying the men in the hold, and in replacing that crew by one composed of men unacquainted with the work, the result being that one of them threw down a bale of cotton into the hold and injured the plaintiff. *Woodson* v. *Wm. Johnston & Co.* (1899) 109 Ga. 454, 34 S. E. 587.

Where a carpenter assisting in the care of electric-light towers was sent at half past three to remove a lamp and connect the wires with the circuit, and was injured by the turning on of the current while he was at work, if he had a right to believe that the current would not be turned on earlier than usual, and it was turned on that day earlier than usual, the company is liable. *Colorado Electric Co.* v. *Lubbers* (1888) 11 Colo. 505, 19 Pac. 479.

Where the foreman of the injured servant ordered him to load freight on an elevator, and, without warning him, permitted another person to remove it, and the servant backed into the elevator shaft with a load, the question whether the foreman, in allowing the removal of the elevator, acted as a vice principal or as a fellow servant was held to be for the jury. *Perras* v. *A. Booth & Co.* (1901) 82 Minn. 191, 84 N. W. 739, 85 N. W. 179.

App. 153; *Richmond Granite Co.* v. *Bailey* (1896) 92 Va. 554, 24 S. E. 232 (general manager gave an order which amounted to an abrogation of a rule issued by himself); *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988 (division superintendent negligent in controlling the movements of trains); *Chicago, B. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109 (similar negligence on the part of an assistant superintendent); *Bateman* v. *Peninsular R. Co.* (1898) 20 Wash. 133, 54 Pac. 996 (general superintendent did not stop a train when it was dangerous for it to proceed); *Maher* v. *Union P. D. & G. R. Co.* (1901) 45 C. C. A. 301, 106 Fed. 309 (breach of rules by conductor); *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397 (laborers required by assistant road master to throw rails on moving cars); *East Tennessee, L. & G. R. Co.* v. *De Armond* (1887) 86 Tenn. 73, 5 S. W. 690 (telegraph operator did not display a stop signal); *Bouck* v. *Jackson Sand Mill Co.* (1899) 20 Ky. L. Rep. 1542, 49 S. W. 472 (tightening of wire rope pulled it loose from its fastenings); *Ross* v. *Collier* (1897) 75 Ill. App. 194 (superintendent ordered

warning should be given in all proper cases as to any extraordinary risks incident to the work, whether their abnormal character arises from the inexperience of the servant;[7] or from the condition of the instrumentalities.[8]

It is manifest that although, as will be seen by comparing the various memoranda of facts in the notes to this section with those appended to the citations in § 520, *ante*, and with the cases to be discussed in the next chapter, that the delinquencies falling under the categories thus indicated do not in all instances amount to breaches of a non-delegable duty in such a sense that, even if committed by a mere fellow servant, they would render the master liable, yet they are so distinctly of the same character that it would be irrational to hold them to be nonofficial when the guilty party is once conceded to be a vice principal. See, however, § 546, *infra*.[9]

men to use beam after a suggestion that it should be strengthened); *San Antonio & A. P. R. Co.* v. *McDonald* (1895; Tex. Civ. App.) 31 S. W. 72 (large timber allowed to swing against plaintiff, who had received no notice that it was about to be hoisted); *Cox* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174 (superintendent of tunnel in hillside allowed rocks to be rolled down on servants who had no notice of what was about to be done); *Fremont, E. & M. Valley R. Co.* v. *Leslie* (1891) 41 Neb. 159, 59 N. W. 559 (only one man detailed to hold the guy rope of a pile driver while it was being moved); *The Transfer* (1894) 9 C. C. A. 521, 26 U. S. App. 570, 61 Fed. 364, Reversing (1893) 55 Fed. 98 (captain of ship disregarded rules as to signaling); *Criswell* v. *Pittsburgh, C. & St. L. R. Co.* (1888) 30 W. Va. 798, 6 S. E. 31 (section foreman disobeyed rule); *Gregory* v. *Ohio River R. Co.* (1893) 37 W. Va. 606, 16 S. E. 849 (similar facts).

See also §§ 541, 542, *infra*.

[7] *Missouri P. R. Co.* v. *Peregoy* (1887) 36 Kan. 424, 14 Pac. 7 (no instruction was given by a superintendent to an ignorant apprentice); *Ft. Smith Oil Co.* v. *Slover* (1893) 58 Ark. 168, 24 S. W. 100 (departmental manager); *International & G. N. R. Co.* v. *Hinzie* (1894) 82 Tex. 623, 18 S. W. 681 (foreman).

[8] As, where a departmental manager omitted to remove a blast, or warn a laborer of its presence. *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334. Where the conductor of a work train failed to see that laborers had timely notice of the danger of earthslides. *Burlington & M. River R. Co.* v. *Crockett* (1886) 19 Neb. 138, 26 N. W. 921. Where the foreman of a gravel pit failed to warn us to the danger of the fall of a bank. *Anderson* v. *Ogden Union R. & Depot Co.* (1892) 8 Utah, 128, 30 Pac. 305. Where a conductor failed to warn brakeman of the dangerous condition of a load. *Louisville & N. R. Co.* v. *Robinson* (1891) 13 Ky. L. Rep. 153, 16 S. W. 707. Where a foreman in a sugar refinery, who had ordered a laborer to shove a car through a door, failed to warn him that there was not space enough to walk between the car and the sides of the door. *Grosczewski* v. *Chicago Sugar Ref. Co.* (1899) 84 Ill. App. 583.

[9] A requested instruction to the effect that the master would not be liable for any negligence of the foreman, unless in the employment of incompetent men, or in the use of unfit machinery or appliances, is properly refused. *Baldwin* v. *St. Louis, K. & N. R. Co.* (1885) 68 Iowa, 37, 25 N. W. 918. The court said: "It may be conceded that a mere foreman, as the word 'foreman' is generally understood,—that is, as a laborer, with power to superintend the labor of those working with him, is a coemployee so far as his own mere labor is concerned. *Peterson* v. *Whitebreast Coal & Min. Co.* (1879) 50 Iowa, 673, 32 Am. Rep. 143. But the instruction is too sweeping. It could be sustained only upon the ground that there was no evidence tending to show negligence on the part of Coller, or anyone else acting as a superior. Now, as we have observed, the evidence showed that Coller

541. Issuance of orders deemed to be an official act.—The logical consequence, if not the actual effect, of some decisions referred to in § 544, *supra*, is to absolve the master even from the results of complying with the negligent order of a vice principal, where such order relates merely to the details of the work. But there is an overwhelming weight of authority to sustain the doctrine that the liability to which the master is declared to be subject wherever "the negligent act is a direct result of the exercise of power conferred by the master, in the performance of a duty devolving by law upon him"[1] is predicable in the case of orders issued in respect to the work, whatever may be the precise object to which those orders may have relation. It is, in fact, difficult to see what more indisputable example there can be of an "exercise of authority" than the giving of such orders, and for the purpose of affecting the master with liability in this instance, it is obviously quite immaterial whether the delinquent employee be a mere superior servant or a general or departmental manager. According to the great majority of the cases, therefore, all that is necessary to fix liability upon the master is that the negligent order which caused the injury should be proved to be incident to the performance of the duties of his position.[2]

The order may be a negligent one because the servant is directed to use dangerously defective appliances;[3] or to work in an abnormally dangerous place,[4] or to do work in a dangerous manner;[5] or to do

had charge of the yard. If his charge involved the duty of maintaining an inspection of the piles in reference to their security against falling upon those employed near them, he was, we think, in the performance of such duty as superior. The close question, perhaps, is as to whether his charge involved such duty; but we think that the jury might infer from the circumstances that it did. . . . We are not prepared to say, therefore, that, as a matter of law, the plaintiff was negligent in not discovering them. If he was not, it would seem to follow that a duty in that respect rested upon the defendant, to be discharged by the person in charge of the yard. Neither the expense nor difficulty of inspecting the pile appears to have been such that an exposure like the one in question should be regarded as practically unavoidable. We think that the defendant should have seen in the first place, as perhaps it did, that the piles were originally properly constructed; and if, as the evidence shows, the piles afterwards sometimes became dangerous by reason of a custom among the employees of cutting the cross-strips to enable them to take out sticks of timber, the defendant should have exercised reasonable diligence in seeing that the piles were rendered safe again by a supply of other cross-strips of proper length."

[1] Phrase used in *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285.

[2] "The defendant ought not to escape liability for negligently issuing, as master and in the course of the performance of its duty as such to its employees, an improper order." *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466, Reversing (1889) 55 Hun, 51, 8 N. Y. Supp. 272.

[3] *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 200, 70 Fed. 569.

[4] *Paterson* v. *Wallace* (1854) 1 Macq. H. L. Cas. 748; *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep 298 (1885) 88 Mo. 293. *Bradley* v. *Chicago,*

something which, under the circumstances, will render the place of work abnormally dangerous for a fellow servant.[6]

The order may also be culpable because it directs instrumentalities, suitable and safe if properly handled, to be used in a manner which any man of ordinary prudence and sagacity would understand to be likely to eventuate in disaster,[7] or because it is given in such a way

M. & St. P. R. Co. (1897) 138 Mo. 293, 39 S. W. 763; *Cox* v. *Syenite Granite Co.* (1899) 39 Mo. App. 424; *Consolidated Coal Co.* v. *Wombacher* (1890) 134 Ill. 57, 24 N. E. 627. Affirming (1889) 31 Ill. App. 288; *Pullman's Palace Car Co.* v. *Hackiey* (1893) 5 C. C. A. 326, 17 U. S. App. 22, 55 Fed. 932; *Lebanon* v. *McCoy* (1895) 12 Ind. App. 500, 40 N. E. 700; *Jones* v. *Old Dominion Cotton Mills* (1886) 82 Va. 140; *Chicago, St. P. M. & O. R. Co.* v. *Lundstrom.* (1884) 16 Neb. 254, 49 Am. Rep. 718, 20 N. W. 198; *Stuckmeyer* v. *Reed* (1893) 55 Fed. 259; *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210.

It is for a jury to say whether negligence can be predicated of the act of a vice principal in setting a laborer to work upon a bench in a perpendicular wall of rock, about 15 feet below the place where other laborers had been ordered to drill holes round an unexploded blast for the purpose of blowing out the rock which held it. *Cullen* v *Norton* (1889) 52 Hun, 9, 4 N. Y. Supp. 774. The master was finally held not liable by the court of appeals ([1891] 126 N. Y. 1, 26 N. E. 905), but merely on the ground that the foreman was not a vice principal.

According to early Scotch decisions a superior servant (here the underground manager of a mine) may be a representative of the master in respect to an order exposing a subordinate to danger (*Somerville* v. *Gray* [1863] 1 Sc. Sess. Cas. 3d series, 768), while he is a fellow servant as to other operations connected with his functions as a controlling employee (*Wright* v. *Roxburgh* [1861] 2 Sc. Sess. Cas. 3rd series, 748 [caused explosion of fire damp caused by temporary interruption of ventilation]). This particular ground of distinction seems never to have been acknowledged in any of the English cases which countenanced the doctrine of vice principalship, and must, in any event, be repudiated in any court which is bound by the subsequent ruling of the House of Lords in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30, § 529, *ante*).

Evidence that a foreman struck a pile of ore, whose fall caused an injury to an employee, and profanely ordered such employee to work at the place, is sufficient to go to the jury on the question whether such conduct was or was not wanton and reckless as alleged in the declaration. *Illinois Steel Co.* v. *Schymanowski* (1896) 162 Ill. 447, 44 N. E. 876.

[6] *Thompson* v. *Hermann* (1879) 47 Wis. 602, 32 Am. Rep. 784, 3 N. W. 579; *Palmer* v. *Michigan C. R. Co.* (1892) 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397; *Proctor* v. *Missouri, K. & T. R. Co.* (1890) 42 Mo. App. 121 (disposition of rails which were being loaded); *Foster* v. *Missouri P. R. Co.* (1893) 115 Mo. 165, 21 S. W. 916 (same facts); *Foster* v. *Clark* (1884) 15 Ill. App. 470 (direction to remove obstruction from a planing machine without stopping it); *Illinois C. R. Co.* v. *Johnson* (1900) 95 Ill. App. 54, Judgment Affirmed in 61 N. E. 334 (direction to make a "running switch"); *Stahl* v. *Duluth* (1898) 71 Minn. 341, 74 N. W. 143 (employee ordered to pick round a hole where there was an unexploded charge of dynamite); *Gormly* v. *Vulcan Iron Works* (1876) 61 Mo. 492 (order to apply fire to an oven in a manner calculated to cause an explosion); *Keating* v. *Pacific Steam Whaling Co.* (1899) 21 Wash. 415, 58 Pac. 224 (furling of sails).

[7] *Augusta* v. *Owens* (1900) 111 Ga. 464, 36 S. E. 830.

[7] The most frequent illustrations of such orders are furnished by the cases in which conductors and other employees having the control of railway cars manage them so as to cause injury. *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184; *Union P. R. Co.* v. *Callaghan* (1893) 6 C. C. A. 205, 12 U. S. App. 541, 56 Fed. 988; *Northern P. R. Co.* v. *Carnaugh* (1892) 2 C. C. A. 358, 10 U. S. App. 197, 51 Fed. 517; *Canadian P. R Co.* v. *Johnston* (1894) 25 L. R. A. 470, 9 C. C. A. 587, 26 U.

S. App. 85, 61 Fed. 738; *Northern P. R. Co.* v. *Poirier* (1895) 15 C. C. A. 52, 29 U. S. App. 583, 67 Fed. 881; *Missouri P. R. Co.* v. *Texas & P. R. Co.* (1889) 38 Fed. 816; *Northern P. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695; *Daniel* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 397, 16 L. R. A. 383, 15 S. E. 162; *Louisville & N. R. Co.* v. *Hawkins* (1899) 21 Ky. L. Rep. 354, 51 S. W. 426; *East Tennessee & W. N. C. R. Co.* v. *Collins* (1886) 85 Tenn. 227, 1 S. W. 883; *Kirk* v. *Atlanta & C. Air-Line R. Co.* (1886) 94 N. C. 625, 55 Am. Rep. 621; *Hardy* v. *Minneapolis & St. L. R. Co.* (1888) 36 Fed. 657; *Norris* v. *Illinois C. R. Co.* (1899) 88 Ill. App. 614; *Armstrong* v. *Oregon Short-Line & U. N. R. Co.* (1893) 8 Utah, 420, 32 Pac. 693; *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 28 N. E. 183, 611; *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288.

In *Chicago, R. I. & P. R. Co.* v. *Touhy* (1887) 26 Ill. App. 99, it was held that a yard master, in giving a signal to an engineer that a public crossing was clear of teams and might be blocked by backing some cars, was not acting as a representative of the company in the same sense that he would have been if he had issued a peremptory command, and that the company was therefore not liable for an injury received by a switchman through being crushed between a moving and a stationary car. But the distinction thus implied seems to be of very dubious correctness.

The negligent management of hand cars by section foremen and other employees controlling them is another analogous instance of official culpability. *Schroeder* v. *Chicago & A. R. Co.* (1891) 108 Mo. 322, 18 L. R. A. 827, 18 S. W. 1094; *McDermott* v. *Hannibal & St. J. R. Co.* (1885) 87 Mo. 285; *Woodward Iron Co.* v. *Andrews* (1896) 114 Ala. 213, 21 So. 440; *Louisville & N. R. Co.* v. *Bass* (1897) 19 Ky. L. Rep. 1474, 43 S. W. 363; *St. Louis, I. M. & S. R. Co.* v. *Rickman* (1898) 65 Ark. 138, 45 S. W. 56; *Alabama Mineral R. Co.* v. *Jones* (1896) 114 Ala. 519, 21 So. 507 (1898) 121 Ala. 113, 25 So. 814; *Gann* v. *Nashville, C. & St. L. R. Co.* (1898) 101 Tenn. 381, 47 S. W. 493; *Johnson* v. *Southern R. Co.* (1898) 122 N. C. 955, 29 S. E. 784; *Louisville & N. R. Co.* v. *Bass* (1897) 19 Ky. L. Rep. 1474, 43 S. W. 463; *Chicago & A. R. Co.* v. *Goltz* (1897) 71 Ill. App. 414.

Similar official acts of negligence are the omission to station a lookout at the proper place on board a ship. (*The Titan* [1885] 23 Blatchf. 177, 23 Fed. 413); and an order to use a push-car for the improper purpose of transportation (*Miller* v. *Union P. R. Co.* [1883] 5 McCrary, 300, 17 Fed. 67).

See also, as illustrating the general principle in the text: *Chattanooga Electric R. Co.* v. *Lawson* (1898) 101 Tenn. 406, 47 S. W. 489; *Leiter* v. *Kinnare* (1896) 68 Ill. App. 558; *Lloyd* v. *St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 22 S. W. 1089; *Denver, S. P. & P. R. Co.* v. *Driscoll* (1889) 12 Colo. 520, 21 Pac. 708; *Chicago Dredging & Dock Co.* v. *McMahon* (1888) 30 Ill. App. 358; *West Chicago Street R. Co.* v. *Dwyer* (1894) 57 Ill. App. 440; *McCarthy* v. *Chicago, R. I. & P. R. Co.* (1891) 83 Iowa, 485, 50 N.

that, under the circumstances, it is likely to confuse the workman receiving it, and thus render him less capable of protecting himself;[8] or because it has the effect of throwing the workman off his guard when some transitory danger is approaching.[9]

It is scarcely necessary to cite authorities to the point that an order within the meaning of the general rule may be given by word of mouth, or by any other means of communication which may be appropriate or convenient.[10] It is also clear that the entire omission to give any orders at all, when the occasion demands it, is as culpable as the actual giving of improper orders.[11]

One who acts as vice principal in an emergency, in selecting men, machinery, and a place to work, does not become a fellow servant immediately upon beginning the work, with all suitable agencies provided therefor, but continues a vice principal in directing the movements of the individual employees.[12]

[11] *Gerrish* v. *New Haven Ice Co.* (1893) 63 Conn. 9, 27 Atl. 235 (manager did not take steps to prevent plaintiff from being injured by the sudden starting of machinery); *Brown* v. *Sennett* (1885) 68 Cal. 225, 58 Am. Rep. 9 Pac. 74 (head stevedore failed to signal engineer to stop the machinery when an overloaded bucket of coal was swinging dangerously).

[12] *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 268, 28 N. E. 183, 611. The court said: "Counsel err in assuming that when Helms pointed out to the assembled employees the imperiled bridge and the accumulated drift and *débris* which threatened it, he had completed the work of selecting the place to work. As above stated, within their several departments each man knows, or should know, in a general way at least, what duties are required of him, and how, when, and where to use the appliances provided; but at such a time and in such an emergency as that described in the complaint there must be an intelligent directing head to assign to the men their places and direct them what to do; to direct what appliances shall be used, and when, where, and how they shall be used. This intelligent and directing head must be the master. And he to whom the master delegates such duty acts as the master, who cannot escape responsibility by having another act in his stead. Therefore, when Helms ordered the decedent to go down among the driftwood, and directed him what he should do there, he was still acting as vice principal, and was furnishing to decedent his place to work."

Intimately connected with negligence in issuing orders is that which consists in assuring a servant that there is no danger to be feared, when, as a matter of fact, the superior giving the assurance knows or ought to know that his statement is not true. The liability of the master under this head is fully treated in chapter XXIV, *ante*.

542. Failure to protect subordinates from transitory dangers deemed to be official negligence.—The courts, as a whole, require the master to answer for the negligence of a vice principal whenever the default complained of consists in the omission to take such precautions as a prudent man would, under the circumstances, have taken for the purpose of protecting the injured subordinate against some peril of the transitory class, against which he had no adequate means of guarding himself.[1]

[1] It has often been held or assumed that employees controlling workmen whose duties require them to be in places where they may be struck by moving railway cars are acting in their representative capacity when they do not adopt means for preventing the cars from reaching the place where the work is going on, or for giving the workmen due warning, at all events, of the approach. Cases where injured car repairers have been allowed to recover on this ground are the following: *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 51 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266; *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 172, 23 So. 342; *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588; *Renfro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302; *Lake Shore & M. S. R. Co.* v. *Lavalley* (1880) 36 Ohio St. 221; *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835; *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 673, 43 N. W. 415; *St. Louis, A. & T. H. R. Co.* v. *Holman* (1894) 53 Ill. App. 617; *Hannibal & St. J. R. Co.* v. *Fox* (1884) 31 Kan. 586, 3 Pac. 320.

The duty of a section foreman to protect his subordinates from moving trains is also recognized as official in several cases. *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339; *Chicago, St. L. & P. R. Co.* v. *Gross* (1889) 35 Ill. App. 178. Affirmed in (1890) 133 Ill. 37, 24 N. E. 563; *St. Louis, I. M. & S. R. Co.* v. *Rickman* (1898) 65 Ark. 138, 45 S. W. 56.

In *Hannibal & St. J. R. Co.* v. *Fox* (1884) 31 Kan. 586, 3 Pac. 320, the court, in holding the company liable for the negligence of a foreman of car repairers, said: "He was not only the foreman to direct the work of his subordinates, but he was the person above all others to provide that they had a reasonably safe place at which to work; and while he was present, overseeing their work, upon him devolved the duty of using ordinary care and diligence to prevent them from being injured, mangled, or crushed by other trains or cars moving the one under which he had placed them. It is immaterial, therefore, whether Lovell be called superintendent, middleman, boss repairer, or foreman. The duty devolved upon him to direct his subordinates to work in a peculiarly dangerous place, where by the exercise of reasonable care they could not protect themselves from approaching trains of cars; and under such circumstances the duty devolved upon him, as the representative of the company, to protect his subordinates, while at work, from the switching of cars and the making up of trains on the same track. He failed to perform his duty. For his negligence in this respect the company is liable. The latter cannot in this matter interpose between itself and Fox, who has been injured without fault on his part, the personal responsibility of Lovell, who in exercising the company's authority has violated the duty he owed, as well to Fox as to the company."

A foreman who orders a workman to get into an open coal car boarded up at the sides about 48 inches, and to pile ties thrown from the outside, places him in a position in which at times he cannot possibly see what is done by the men who are loading the ties, and is therefore bound to adopt some appropriate precaution to guard against the risk of

The duty to prevent the happening of the occurrence which would expose the servant to such a peril, or, if that is not possible, to give such warning as will enable him to remove his person out of the zone of danger in time to avoid injury, may well be regarded as a form of the nonassignable duty to furnish and maintain a safe place of work.[2] It is true that the weight of authority is against pressing this theory to such an extent as to hold a mere servant to be a vice principal solely for the reason that he was appointed to look out for the apprehended peril and take appropriate steps to prevent its producing injury.[3] But the negation of liability in this regard clearly does not involve the consequence that one who is a vice principal by virtue of his position as a superior official ceases to be a vice principal while he is discharging the duty in question, any more than the acceptance of the doctrine which prevails in most courts, that the mere possession of a power of control does not constitute an employee a vice principal, necessitates the conclusion that such a vice principal

his being struck by a tie. *Claybaugh* v. *Kansas City, Ft. S. & M. R. Co.* (1894) 56 Mo. App. 630.

See also *Illinois C. R. Co.* v. *Gilbert* (1895) 157 Ill. 354, 41 N. E. 724 (servant's work was taking wheels across tracks where trains were passing every few minutes).

Other cases which illustrate the general rule in the text are the following: *McLean* v. *Blue Point Guard Min. Co.* (1876) 51 Cal. 255 (foreman of mine failed to notify workman that a blast was about to be let off). *Johnson* v. *Richmond & A. R. Co.* (1888) 84 Va. 713, 5 S. E. 707 (conductor failed to station himself where he could control the movements of the cars so as to avoid injuring a brakeman ordered to couple); *Kewanee Boiler Co.* v. *Erickson* (1898) 78 Ill. App. 35 (superintendent allowed steam to be let into a boiler which plaintiff was repairing); *Wabash, St. L. & P. R. Co.* v. *Hack* (1887) 121 Ill. 259, 12 N. E. 253 (floor of wrecked car, being insecurely propped, fell); *Alaska Treadwell Gold Min. Co.* v. *Whelan* (1901) 12 C. C. A. 225, 29 U. S. App. 1, 61 Fed. 462 (night boss in mine failed to warn workman that chute was about to be opened; reversed in [1897] 168 U. S. 86, 42 L. ed. 390, 18 Sup. Ct. Rep. 40, solely on the ground that the negligent servant was a mere gang foreman); *Hoosier Stone Co.* v. *McCain* (1892) 133 Ind. 231, 31 N. E. 956 (manager of quarry allowed insufficient blocked cars to be started on an incline by the impact of others); *Wills* v. *Cape Girardeau S. & R. Co.* (1891) 44 Mo. App. 51 (superintendent negligently ordered an engine to be moved while the plaintiff was at a certain place); *Richmond Granite Co.* v. *Bailey* (1896) 92 Va. 551, 24 S. E. 222 (foreman in quarry failed to warn subordinate that a cable was about to be tightened); *Augusta* v. *Owens* (1900) 111 Ga. 461, 36 S. E. 831 (orders given to fellow servant without warning plaintiff); *Kirk* v. *Senzig* (1898) 79 Ill. App. 251 (foreman failed to warn elevator man of presence of another workman in the shaft).

See also the cases cited in note 11 to the last section and also those in note 7, which deals with the management of railway and hand cars most of which may be referred to the principle now under discussion, as well as to the conception of negligence in giving orders.

[2] See the language used by the court in *Alaska Treadwell Gold Min. Co.* v. *Whelan* (1901) 12 C. C. A. 225, 29 U. S. App. 1, 61 Fed. 462 (Reversed in Supreme Court, but merely on the ground that the superior servant was not a departmental manager); *St. Louis, A. & T. R. Co.* v. *Triplett* (1891) 54 Ark. 289, 11 L. R. A. 773, 15 S. W. 831, 16 S. W. 266.

[3] See § 580, *post*.

does not represent the master as respects the orders which he issues to his subordinates.

543. Theory that a vice principal does not represent the master except in so far as he is discharging some non-delegable duty.—An examination of the cases cited in this and the following sections will show that many of the courts have practically committed themselves to the adoption of a principle which, if carried to logical conclusions, would prevent recovery wherever the negligence of the delinquent vice principal did not amount to a breach of one of those personal duties of the master which are non-delegable in the sense that any servant intrusted with their performance represents the master *ad hac vice*.[1] Since none of the courts, apart from those which apply the superior servant doctrine, predicate nonassignability with regard to the duty of giving orders, it is clear that the acceptance of such a rule in its entirety involves the consequence that, even in giving orders, a vice principal does not always act in a representative capacity. From this consequence, as will be seen from the decisions cited below, some judges have not shrunk, though, upon any reasonable theory of the relations of a vice principal to his subordinates and to the common employer, it is difficult to see how such a doctrine can be justified. See the remarks in § 547, *infra*.[2]

In *Dayharsh* v. *Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 554, the ground seems to be distinctly taken that the boss of a roundhouse, in directing where the engines are to be placed, is performing the employer's nonassignable duty to see that the servants doing the work of the roundhouse are not exposed to any extraordinary risks from the insecurity of the place of work, and is therefore a vice principal. The case shows how readily one line of argument in this class of cases may run into another; but the true rationale of the decision is probably that the negligence was an official default of a vice principal, which the delinquent certainly was under the rulings of this court.

[1] In a case where a bridge superintendent pushed a piece of timber over the edge of a pit, so that it fell on a laborer, an instruction that the employer is answerable to all the underservants for the negligence of a vice principal, either in his personal conduct within the scope of his employment, or in his selection of other servants, was held erroneous, faulty, as failing to distinguish between acts done in the performance of the master's duty to the servant, and acts done in discharge of a duty which the master might properly commit to another without liability for negligence. An employer, it was declared, is liable for the negligence of a vice principal only when the latter is engaged in the performance of some of the employer's personal duties. *Scott* v. *Chicago G. W. R. Co.* (1901) 113 Iowa, 381, 85 N. W. 631.

[2] Recovery was denied in *The Queen* (1889) 40 Fed. 694 (collision caused by the negligence of the master of a ship having too long a hawser, in omitting to give signals in a dense fog); *Olson* v. *Oregon Coal & Nav. Co.* (1899) 96 Fed. 109 (master of ship omitted to have the cover placed over a hatch), laying down the general rule that the master was a fellow servant of his crew in regard to all matters pertaining to the navigation of his ship; *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258 (conductor was negligent in waving to engineer to back up a car;—conductor assumed to be, for the purposes of this statement, a vice principal, though this was denied; see chapter XXX., *post*); *Garland* v. *Missouri, K. & T. R. Co.*

It is especially difficult to see any rational ground on which it can be maintained, as has been done in one case, that the official character

(1900) 85 Mo. App. 579 (foreman of switching crew held not to represent the company when transmitting a signal, according to the usual practice, from a switchman who was making a coupling, to the engineer).

In *Brick* v. *Rochester, N. Y. & P. R. Co.* (1885) 98 N. Y. 211, the plaintiff, a laborer on a repair train, was injured through a derailment caused by a crossing which was not kept properly cleaned. It was held that the company could not be made liable on the theory that the general foreman of the repairs on the old road, which was under reconstruction, was a vice principal as regards the negligence in question, though he might be such as regards the nonperformance of other functions in connection with the system of the defendant as a whole. After declaring that a conclusive bar to the action was supplied by the plaintiff's implied assumption of the special risks incident to the work of repairing an old road, the court proceeded thus: "More especially is such the case when the individual who had charge of the construction train and the reconstruction of the road was chargeable with negligence in performing such work as was necessary to keep the track in good condition. In the capacity in which he acted, he was only a fellow servant, and for his negligence the defendant was not responsible according to well-settled rules of law. The fact that Thompson had imposed upon him larger duties, embracing the reconstruction of the entire road, does not alter his relation here, and it is sufficient to say that at this time he was acting as foreman or superintendent of a number of men employed by the company to repair its old road, and was on the construction train for that purpose. He thus became and was a coemployee with the others who were there, and was not relieved from responsibility because he had other and more important duties to perform outside of those in which he was specifically engaged. Even if Thompson may have been regarded as representing the master in some respects in reference to the road generally, the duties he was at this time performing were those of a fellow servant, and not of the master; and hence, if he was chargeable with negligence, it was that of a fellow servant, and not of the master, within the principle of well-considered cases. *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521; *McCosker* v. *Long Island R. Co.* (1881) 84 N. Y. 77."

In *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556, the delinquent employee was the superintendent in full control of the work of repairing a steamer, and the plaintiff was a workman whose injury resulted from the improper method adopted for removing the covering of one of the hatches. This case belongs more properly to the following section, but in the present connection it is worth while to quote the following passage from the opinion, which is sufficiently general in its language to commit the court to a doctrine of the scope mentioned in the text, if the superintendent is assumed to be a vice principal: "Assuming that this evidence presented a question of fact for the jury, and that it might properly find that no signal was given, yet the duty of giving the caution necessarily belonged to those engaged in executing the work, and not to the master. It pertained purely to the mode of execution, and rested upon those who were engaged in its performance and were well informed of the customary usage in respect thereto. It was no part of the duty of the master to remove hatches or direct the particular mode of doing so, any more than to direct workmen in the use of the tools with which they performed their work. There were customary and established modes of performing such services, and each employee was expected to do his work in the manner and style to which he was accustomed, without special directions in respect thereto. It was entirely immaterial whether the superintendent undertook to perform the work of removing hatches, or ordered it to be done by others; he was, in either case, engaged in performing the duty of a workman."

The language used in *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466 (quoted in § 541, *supra*, is, so far as it goes, an authority against the extreme doctrine which would thus absolve an employer from liability for a negligent order given by a vice principal within the scope of his authority. But the remark was made with respect to a train despatcher, the very essence of whose

of a vice principal is suspended so completely by his mere participation in the work which is being done, that a command given during the period of such suspension is not deemed to be given in his representative capacity.[3]

544. Theory that a vice principal does not act as the master's representative when he engages in manual labor.—A large number of decisions proceed upon the theory that a superior employee, although he may be a vice principal by virtue of his official rank, does not represent the master as to any purely manual acts which he may do while engaged in manual labor. Or to put the matter in another form, the defense of common employment is allowed to prevail if the fact of the negligent servant's superiority was not one of the actual evidential elements involved, that is to say, if the injury might as well have happened, even though he was not superior;[1] or, as it is also expressed, if the negligence complained of consisted of some act or omission of a vice principal "which relates to his duties as a colaborer with those under his control, and which might just as readily have happened with one of them having no such authority," the master will not be liable.[2]

functions is to issue orders of a certain description, and not with respect to a general manager.

[3] *Klochinski* v. *Shores Lumber Co.* (1896) 93 Wis. 417, 67 N. W. 934 (superintendent of lumber company was helping to roll logs when he gave the order which caused the injury). This decision is directly opposed to that in *Hardy* v. *Minneapolis & St. L. R. Co.* (1888) 36 Fed. 657 (§ 545, note 2, *infra*).

In *Meyer* v. *Illinois C. R. Co.* (1899) 177 Ill. 591, 52 N. E. 848 (fireman cannot recover for injuries caused by conductor's failure to have brakes set in time to enable his train to be side tracked, as ordered by the train despatcher), the court said: "The accident did not occur on account of the conductor's exercise of any authority over the appellant, which appellant, by virtue of his inferior position, was bound to obey under penalty of discharge; but the accident resulting from the negligence, if any, was one that might have happened if any other person than the conductor had been intrusted with simply running the train and setting the brakes in connection with the fireman and others, without any control over the fireman. The negligence was, then, that of a fellow servant, done in the performance of a fellow servant's duty, so far as the evidence shows." This case is not easy to reconcile with those cited in § 545, note 1, *infra*.

[1] *Mann* v. *Oriental Print Works* (1875) 11 R. I. 152.

[2] *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288; *Fitzgerald* v. *Honkomp* (1892) 44 Ill. App. 365.

"If a superior undertakes to do the work of a fellow servant, and puts himself in the place to do the work of a fellow servant, he becomes one as to that particular work; and his negligence in such case is that of a fellow servant, and not that of a vice principal, although he is a vice principal generally." *Gann* v. *Nashville, C. & St. L. R. Co.* (1898) 101 Tenn. 380, 47 S. W. 493.

The leading case on this doctrine is *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521, where the plaintiff was injured by the negligence of the managing representative of a nonresident owner of iron work in letting steam into a cylinder and so starting machinery, and was held not entitled to recover by the majority of the court, which laid down the general rule that "a superintendent of a factory, although having power to employ men or represent the master in other respects, is, in the management of the machinery, a fel-

545. Qualifications of this theory.— The courts which apply the rule stated in the last section have conceded it to be subject to some limitations.

Under the doctrines of legal causation, as generally accepted, it is

low servant of the other operatives." For a criticism of this case see § 547, *infra*.

Reed v. *Stockmeyer* (1896) 20 C. C. A. 381, 34 U. S. App. 727, 74 Fed. 186, Affirming, on this point (1893) 55 Fed. 259, the court argues thus: "In ordering the plaintiff to work below the stone which was being quarried, the foreman was performing an act pertaining to the duties of a master; but no injury arose from the plaintiff's obedience to this order. Nor was the dry seam in the stone the proximate cause of the injury. The proximate cause of the injury was the careless and negligent acts of the foreman in pounding and prying on the stone in attempting to remove it from its bed. The quarrying of the stone and its removal from its bed pertained to the duties of a servant, and not to those of a master. The injury was the proximate result of the careless and negligent acts of the foreman which pertained to his duties as a servant, and not to the improper performance of those duties which pertained to the defendant as master."

A complaint is demurrable which alleges an injury caused by a local "agent and manager" of an express company through the manner in which he drove a wagon which it was the plaintiff's duty to load and unload. *Dwyer* v. *American Exp. Co.* (1882) 55 Wis. 453, 13 N. W. 471. The court said: "If the complaint had alleged facts showing that Colvin was in fact the vice principal of the defendant, and authorized and empowered to do all acts at the city of Oshkosh which the company was authorized to do, there would still remain the disputed question whether the company would be liable to the plaintiff for the negligence of such agent when in fact employed in the same work with the plaintiff. If the agent or manager had full power to act for the company at Oshkosh in all matters pertaining to its business there, and was also required to act as driver of the team in transporting goods, etc., to and from the office to the depots, the authorities are somewhat in conflict whether he would not be held as the plaintiff's coemployee while so engaged, notwithstanding his ample authority in other respects, and whether, for his negligence in the capacity of driver, the company might not claim exemption from liability on the ground that the injury resulted from the negligence of a coemployee."

An instruction in an action by an employee for injuries sustained, that, if one P. was foreman of a certain department, with power to employ and discharge plaintiff, he was not a fellow servant of such plaintiff, is erroneous, where P. was helping plaintiff at the time of the accident. *Southern R. Co.* v. *Mauzy* (1900) 98 Va. 692, 37 S. E. 285. See also the following cases, in which acts specified in the memoranda appended to the citations were held not to have been done by the vice principals in their representative capacity: *Gall* v. *Beckstein* (1898) 173 Ill. 187, 50 N. E. 711, Affirming (1897) 69 Ill. App. 616 (foreman assisted subordinates to lift a barrel); *Meeker* v. *C. R. Remington & Son Co.* (1900) 53 App. Div. 592 65 N. Y. Supp. 1116 (superintendent opened a valve while testing some new steampipes;—on second appeal, a decision was rendered in the servant's favor, on the ground of a breach of the nondelegable duty to furnish a safe place of work; see § 568, *post*); *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876 (general superintendent helping a laborer to load a rail, example given *arguendo*); *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210 (superintendent of the work of sinking a shaft undertook to work a sand pump to clean out a "misse" hole in a mine); *Drinkout* v. *Eagle Mach. Works* (1883) 90 Ind. 423 (superintendent of foundry department of machine works acts as a servant in preparing the flasks for the making of the castings); *American Teleph. & Teleg. Co.* v. *Bower* (1897) 20 Ind. App. 32, 49 N. E. 182 (foreman held to have acted not as a vice principal when he climbed a telegraph pole and loosened the wires, thus causing several poles standing in unfilled trenches to fall); *Solom Stone & Lime Co.* v. *Chastain* (1893) 9 Ind. App. 453, 36 N. E. 910 (superintendent of quarry pried off a part of a stone, so

clear that a master cannot be allowed to escape liability where the official and the nonofficial acts were so closely associated and inter-

that a laborer was crushed); *St. Louis, A. & T. R. Co.* v. *Torrey* (1893) 58 Ark. 217, 24 S. W. 244 (foreman of bridge construction acts as mere servant in wrapping the rope of a block and tackle around the brace of the bridge to take it out of the way of a passing engine; here the engine cab caught the rope and flung the block against plaintiff); *Ricks* v. *Flynn* (1900) 196 Pa. 263, 46 Atl. 360 (foreman of crew constructing a wall, even if a vice principal, acts as a mere servant in hooking the tongs into a hole drilled in a large stone which was being lifted by a derrick); *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288 (section foreman working with his gang and negligently striking one of them; example mentioned *arguendo*); *Illinois C. R. Co.* v. *Swisher* (1895) 61 Ill. App. 611 (negligence of engineer caused a train to run off the track and injured fireman); *Clay* v. *Chicago, B. & Q. R. Co.* (1894) 56 Ill. App. 235 (hostler negligently started engine while his helper was underneath in the ash pit, cleaning out the ashes); *Chicago & W. I. R. Co.* v. *Massig* (1893) 50 Ill. App. 666 (hostler at a roundhouse, and his helper in caring for locomotives, are fellow servants in respect to injuries to the latter from the running of a locomotive upon his foot placed upon or inside the rail); *Nashville, C. & St. L. R. Co.* v. *Handman* (1884) 13 Lea, 423 (boiler exploded, because engineer was not at his post as he should have been under the rules, and injured the fireman. *Held*, that the engineer did not stand in the place of the master, so far as the particular negligence in question was concerned, for the performance of any duty which, under the law, the master was bound to perform for the protection of the servant); *Allen* v. *Goodwin* (1893) 92 Tenn. 385, 21 S. W. 760 (heavy iron pipe dropped by foreman); *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210 (handling brakes or coupling cars; example given *arguendo*); *Sontar* v. *Minneapolis International Electric Co.* (1897) 68 Minn. 18, 70 N. W. 796 (superintendent handed workman a box to enable him to reach a point above his head. See, however, *O'Neill* v. *Great Northern R. Co.* [1900; Minn.] 82 N. W. 1086, the effect of which is stated in § 547, note 11, *infra*); *Indianapolis & St. L. R. Co.* v. *Johnson* (1885) 102 Ind. 352, 26 N. E. 200 (in discussion of sufficiency of complaint; negligence alleged was in regard to loading of cars); *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 189, 70 Fed. 669 (selection and placing of skids for loading a car, and assisting in the work afterwards); *Saygeard* v. *Carlson* (1890) 1 Wash. 29, 23 Pac. 830 (foreman of mill deemed to be a fellow servant of the hands while actually engaged in sawing); *Gann* v. *Nashville, C. & St. L. R. Co.* (1898) 101 Tenn. 389, 47 S. W. 493 (manipulation of brake by section foreman); *Holtz* v. *Great Northern R. Co.* (1897) 69 Minn. 524, 72 N. W. 205 (foreman drove a bolt through the floor of a car); *National Fertilizer Co.* v. *Travis* (1898) 102 Tenn. 16, 49 S. W. 832 (machinery started without warning by foreman running an engine, and killed man adjusting bolts); *Gulf, C. & S. F. R. Co.* v. *Schwabbe* (1892) 1 Tex. Civ. App. 573, 21 S. W. 706 (foreman of railway yard undertook to handle an engine and injured a wiper; decision placed on the ground that he was not engaged in the performance of a duty owed by the master, but apparently sustainable also on the ground that the act was beyond the scope of his authority; otherwise it is in conflict with the Texas cases cited under the next section); *Quinn* v. *New Jersey Lighterage Co.* (1885) 23 Blatchf. 209, 23 Fed. 363 (captain undertook to hook the tongs to rails which were being loaded); Followed in *The Miami* (1899) 35 C. C. A. 281, 93 Fed. 218, Affirming (1898) 87 Fed. 757 (where the injury was caused by the mate attempting to cast off a chain from around a drum); *Chicago Architectural Iron Works* v. *Nagel* (1898) 80 Ill. App. 492 (case for jury, where there was evidence that the foreman was engaged in performing the same kind of work as the injured subordinate); *Page* v. *Naughton* (1901) 63 App. Div. 377, 71 N. Y. Supp. 503 (injury caused by fall of bags of cement, piled by superintendent).

Whatever may be the position of a master or mate of a vessel, they are not vice principals where the injury is caused by the negligence of the former in keeping a lookout, and of the latter in steering. *The Job T. Wilson* (1897) 84 Fed. 204.

In *Barnicle* v. *Connor* (1900) 110

woven that the injury must be regarded as being the result of both in combination;[1] nor, *a fortiori*, where the evidence shows that such a

Iowa, 238, 81 N. W. 452, the court held that, whether the foreman of carpenters, who was the delinquent, was a vice principal or not, there could not, in any event, be a recovery, as the negligence was committed in regard to manual work. This case is a very strong application of the doctrine of dual capacity, as the facts were that the foreman was directing plaintiff in the moving of a column, and told him to let go of it, and do something else, and that, when the foreman had taken plaintiff's place, and the latter had turned to go to the other work, the column rolled and struck him. Such a situation, we think, is governed by the same principle as the cases cited in § 545, note 1, *infra*.

Other decisions in which courts have recognized the doctrine of dual capacity are: *Ricks* v. *Flynn* (1900) 156 Pa. 263, 46 Atl. 360; *Ross* v. *Walker* (1891) 139 Pa. 49, 21 Atl. 157, 159 (see the comments on these in § 547, *infra*); *Hobbes* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 52 N. E. 391, 54 N. E. 383.

In *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588, it was said that a foreman of car repairers would have been treated as a mere servant, if he had caused the injury by his negligence while he was actually engaged in the manual work of repairing the cars; and this doctrine was reasserted in *Rowland* v. *Missouri P. R. Co.* (1886) 20 Mo. App. 463. But in both of these cases the negligence was unquestionably of an official kind, and the remarks as to the dual capacity of the employees were merely *obiter*. They are also antagonistic to some other Missouri rulings in which this point was directly involved. See § 546, note, 1, *infra*.

[1] In holding an employer responsible for the negligence of a vice principal in dispensing with the use of a tag line in raising the framework of a bridge, notwithstanding that he attempted to control the swaying framework by seizing it with his hands and holding it in proper position by his unaided strength (*Pittsburgh Bridge Co.* v. *Wacker* [1897] 170 Ill. 550, 48 N. E. 915, Affirming [1897] 70 Ill. App. 55), the court said: "The primary cause of the injury received by the appellee was the exercise by Farnsworth of authority conferred upon him by the master to order, direct, and control the operation of moving the framework from its position on the bank to the place where it was needed to be placed in the bridge, without using the tag line. If the appellant, through Farnsworth as vice principal, abandoned the use of a tag line,—a confessedly appropriate and safe device,—and adopted an improper and unsafe method of accomplishing such removal, and injury resulted to appellee in consequence thereof, under such circumstances as the master would be liable if Farnsworth had not personally participated in the execution of the plan, no reason is perceived why liability should be avoided upon the ground that Farnsworth personally assisted in endeavoring to perform the work. In so assisting, Farnsworth voluntarily assumed temporarily to labor as a common workman, but he was not any the less the representative of the appellant company, nor his position any the less one of superiority."

The question what cars shall be taken into repair tracks, and where they shall be placed, is determined by the foreman of an electric railway in his capacity as vice principal; and if under the circumstances he should have notified a workman on one of those tracks that other cars were about to be moved thereon, the company is liable for his omission to give such notification, and will not be absolved for the mere reason that he himself acted as motorman in moving the cars. *Metropolitan West Side Elev. R. Co.* v. *Skola* (1900) 183 Ill. 454, 56 N. E. 171.

In a case where the injury resulted from the negligence of a section foreman in suddenly rising from a keg on the front end of a hand car, which he was using as a seat, the result being that it rolled off and derailed the car, it was held that this act, although done for the purpose of assisting his men, could not be separated from the negligence which it also imported as being a breach of his duty to look out for their safety while engaged in propelling the car. *Ross* v. *Wabash W. R. Co.* (1892) 112 Mo. 45, 18 L. R. A. 823, 20 S. W. 472.

The principle in the text is recognized in the exceptive form of statement that a railway company is not liable for an injury to an employee caused by the negligence of a foreman while performing an act of labor in common with that of the employee, "unless its own negligence as employer contributed to pro

breach was in a legal sense the sole proximate and efficient cause of the injury.[2]

Nor could the master, without a gross absurdity, be absolved where the manual act which caused the injury was done for the very purpose of discharging some non-delegable duty.[3]

Other cases proceed upon the theory that a vice principal who orders a workman to take up a particular position where he will be imperiled if certain kinds of manual acts are negligently done must be regarded as a representative of the master in respect to any acts of that description by which he may subsequently injure the workman.[4] It would seem, however, that the qualification of the rule

duce the injury." *St. Louis, A. & T. R. Co.* v. *Torrey* (1893) 58 Ark. 217, 24 S. W. 244.

[2] Where a servant was injured by the fall of a heavy iron box which was being hoisted by two chains, and the accident was due to the fact that a handle of the box had been broken, and the hook on the end of one of the chains had slipped on the flange of the box to which it had been attached by the orders of the employee in charge of the work, the injury was regarded as being due, not to his negligence on the character of a fellow servant, but to his breach of the nonassignable duty of preventing the accident by using additional chains or taking some other precaution suggested by the circumstances. *Fraser* v. *Hand* (1889) 33 Ill. App. 153.

Where it was the duty of a yard master to see to the making up of trains, if he directed a boy engaged as a call boy to perform the duties of a switchman, the fact that he was on an engine in charge of it at the time of giving the orders is immaterial; and if it was negligence to give such orders, it was his negligence as yard master, and not as engineer. *Hardy* v. *Minneapolis & St. L. R. Co.* (1888) 36 Fed. 657 (injury declared to have been caused, not by the operation of the engine, but in the discharge of the yard master's duties in making up trains).

[3] *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774 (no error in submitting to jury the question whether the starting of machinery for the purpose of testing it was an act done as a vice principal); *Consolidated Coal Co.* v. *Gruber* (1901) 188 Ill. 584, 59 N. E. 254, Affirming (1900) 91 Ill. App. 15 (assistant mine manager operated a coal cutting machine to ascertain why it would not work, and while doing so brought down a portion of the roof).

See, however, *Wellihan* v. *National Wheel Co.* (1901) 128 Mich. 1, 87 N. W. 75 (§ 601, note 1, *post*); *Hecker* v. *C. R. Remington & Son Co.* (1900) 53 App. Div. 592, 65 N. Y. Supp. 1116, Second Appeal (1901) 62 App. Div. 472, 70 N. Y. Supp. 1070 (§ 567, note 7, subd. [b], *post*).

[4] In *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876, where a master mechanic, after ordering a servant to do work which required him to take up a certain position with respect to a locomotive, caused him injury by taking out the "equalizer," the court said: "The obligation to make safe the working place and the materials with which the work is done rests on the master, and he cannot escape it by delegating his authority to an agent. It is also the master's duty to do no negligent act that will augment the dangers of the service. In this instance Torrence was doing what the master usually and properly does when present in person, for he was commanding, and directing the execution of what he had commanded. By his own act he made it unsafe to do what he had commanded should be done. Acts of the master were, therefore, done by one having authority to perform them, and the breach of duty was that of one who stood in the master's place. It is not easy to conceive how it can be justly asserted that one who commands an act to be done, and who possesses the authority to command and enforce obedience from all servants employed in a distant department by virtue of the power delegated to him by the master, is no more than a fellow servant; for, in the absence of the master, the command, if

which is thus admitted is essentially inconsistent with the rule itself. The cases in which the doctrine has been applied that a vice principal is a mere servant when he is doing a servant's work all presuppose, at the very least, some general direction respecting the work, which accounts for the position of the injured servant at the time of the accident; and there is apparently no logical ground upon which such a direction can, as an essential and controlling element of the juridical situation, be differentiated from a special order, so as to entail the consequence that recovery shall be allowed in one case and denied in the other. Until this difficulty has been fairly met, and, supposing that to be possible, cleared away, the cases last cited must be regarded as antagonistic in principle, if not upon the specific facts, to the decisions referred to in the preceding section. The suggestion in the Nebraska case cited in the last note above, that the

entitled to obedience, must be that of the master, conveyed through the medium of an agent. Nor can it be held, without infringing the principles of natural justice, that if he who is authorized to give the command makes its execution unsafe, the employee, whose duty it is to obey, has no remedy for an injury received while doing what he was commanded to do."

In *Cole Bros.* v. *Wood* (1894) 11 Ind. App. 37, 36 N. E. 1074, where the foreman of a factory, after giving an order which required a servant to take up a certain position with reference to a machine, proceeded to do some work himself on the same machine, and by his careless handling of a tool caused the injury complained of, the court said: "In doing these things he was performing the master's duty, and in that respect he was not a fellow servant with the appellee. The execution of the master's orders, in conjunction with the manual acts of Crawley and Eller [the foreman] rendered the place in which appellee was working dangerous, and injury actually befell him. Here was a violation of the master's duty which the appellant owed to appellee, to keep the place in which he worked reasonably safe." (Dissenting, Ross, J.)

In *Crystal Ice Co.* v. *Sherlock* (1893) 37 Neb. 19, 55 N. W. 294, where the manager of an ice company injured a workman on a chute by sending down upon him a lump of ice, the court, in replying to the argument of plaintiff's counsel that, as the injury was caused by setting free the piece of ice which caused the damage sued for, the defendant should not be held liable, for the reason that the act was not peculiarly within the scope of the foreman's duties but was rather one of the performance of which properly fell within the class of labor properly to be performed by the laborers under the direction of said foreman, said: "The difficulty with this argument is that it loses sight of the fact that the defendant in error was placed in a dangerous place, and required to do an act which of necessity forbade his avoidance of injury, should the foreman set in motion a piece of ice from a point above where the foreman's orders required him to go. Suppose, now, that this piece of ice had been detached by a fellow servant of the defendant in error, under the orders of the foreman, after the foreman had so located the defendant in error that he must inevitably suffer if the order was executed, could it with any propriety be claimed that the company was relieved of liability simply because the agency which caused the injury was set in motion by a fellow servant? In such case, as in the one at bar, the negligence and carelessness pertained not to the mere manual act of releasing the ice which caused the injury, but was rather imputable to the order which placed defendant in error in such situation, under such circumstances that injury to him was unavoidable from the foreman's setting in motion the ice which caused the damage."

In a later Nebraska case the act of a foreman with general control and authority to employ and discharge workmen, in ordering a subworkman upon

injury was, under the circumstances, really caused rather by the order than by the subsequent manual act, would plainly not suffice as a ground of distinction between the decisions in which recovery has been allowed and refused, except in so far as the order may have been itself culpable, and it does not seem to have been of that description either in the Nebraska case or the others referred to.

546. Theory that a vice principal represents the master even when he participates in manual labor.— A considerable body of authorities can also be produced for the other view, that a vice principal acts in a representative capacity as to what he does while assisting to do the work which he is appointed to supervise. To this conclusion, as is indicated by the extracts quoted below from the opinions, the courts have felt themselves forced by their inability to find any satisfactory logical grounds upon which to predicate a distinction between the quality of an act done by the order of a vice principal, and the quality of the same act when done by the vice principal in person.[1]

an elevator, and himself operating the elevator with negligence, to the workman's injury, was held not to be the act of a fellow servant, but of a vice principal. *Swift & Co.* v. *Bleise* (1902) 63 Neb. 739, 57 L. R. A. 147, 89 N. W. 310.

Recovery has been allowed for an injury caused by the negligence of an operator in starting a machine suddenly while the "helper" had his hand inside it, removing an obstruction, in compliance with the operator's orders. *Norton Bros.* v. *Nadebok* (1901) 190 Ill. 595, 54 L. R. A. 842, 60 N. E. 843, Affirming (1900) 92 Ill. App. 541.

Where a foreman, while assisting his workmen in lowering a heavy sewer pipe into a trench, ordered a departure from the usual manner of lowering such pipe [illegible]ing it fall down of its own weight [illegible]giving employees at work in the [illegible]otice and an opportunity to es[illegible]nd one of them was injured in [illegible]nce, the employer was held to be [illegible]e, though in assisting to lower the pipe the foreman was acting as a fellow servant. *Chicago* v. *Cronin* (1900) 91 Ill. App. 466.

The negligence of a track foreman who was acting as motorman of an electric car, in failing to stop the same in time to prevent an accident to a track hand who had attempted, pursuant to his direction, to board the same while in motion, and was in a perilous position, was official, and not personal. *Chattanooga Electric R. Co.* v. *Lawson* (1898) 101 Tenn. 406, 47 S. W. 489.

Other cases to the same effect are: *Illinois Steel Co.* v. *Schymanowski* (1896) 162 Ill. 447, 44 N. E. 876 (allowing recovery where a foreman picked at a pile of ore so as to cause it to fall on a laborer set to work beside it); *New Omaha Thomson-Houston Electric Light Co.* v. *Baldwin* (1901) 62 Neb. 180, 87 N. W. 27 (foreman held to have acted as vice principal where he neglected to keep his hold on a rope, thus bringing about the fall of a ladder); *William Graver Tank Works* v. *O'Donnell* (1901) 191 Ill. 236, 60 N. E. 831, Affirming (1900) 91 Ill. App. 521 (servant thrown off a plank on to which he had been ordered to go, as a result of the efforts of his foreman and a fellow workman to unscrew a pipe).

Compare also the statement that the master is not released from responsibility for an injury sustained by a servant in the course of his employment because ordered by a foreman to work in a dangerous place, although the foreman co-operated with the servant in the work. *Kolb* v. *Carrington* (1897) 75 Ill. App. 159.

On the facts the *Shumway Case*, 98 Mich. 411, 57 N. W. 251, cited in note 1 to the next section, might perhaps be classed with those here referred to; but the language of the court indicates, we think, an adoption of a doctrine more favorable to the servant.

[1] In *Shumway* v. *Walworth & N. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251 (machinery started by a superintendent after an obstruction had been removed),

547. Discussion of the doctrine of the dual capacity of vice principals.—*a. With reference to the standpoint of the courts which reject the superior servant doctrine.*—In 1875 the supreme court of

the defendant was held liable on the broad ground that a superintendent "stands in the place of the master in whatever he does in furtherance of the business and operations he has in charge." The court said: "The defendant concedes, in effect that Mr. Neville's relations to the defendant corporation and to the plaintiff were such as that, for some purposes, he might in law be regarded as a representative of the master, but that in the performance of the particular act of starting the machine he was acting in the capacity of a fellow servant; and the contention is that the question of whether the act was that of a master or of a fellow servant depends for its solution rather upon the nature of the act than upon the general scope or extent of the superior servant's authority. The contention, precisely as made, is undoubtedly supported by eminent authority, but we are constrained to hold that the previous holdings of this court have not so limited the liability of the master. It is not necessary to a decision of this case to hold that an agent exercising only occasional acts of authority, while performing duties, in the main, those of a subordinate, is, in the performance of the latter duties, to be regarded as a representative of the principal; but, in the performance of the particular duty in question, Neville was performing an act of authority which he only had the right to perform by virtue of his authority as superintendent of the mills, and within the scope of his authority to see that the machinery was in safe condition. We think, under the former rulings of this court, he must be held to have been, in the performance of this act, a representative of the master, rather than a fellow servant."

In *Berea Stone Co. v. Kraft* (1877) 31 Ohio St. 287, 27 Am. Rep. 510, where the injury was caused by using hooks for hoisting a large stone which was so soft that chains should have been passed round it, the court said: "The fact, if it be true, that Stone's negligence in assisting in fastening the hooks to the stone to be raised may have caused the injury, and that he was then performing the duty of a common workman, and not those strictly pertaining to the duties of foreman, in no wise relieves the company from liability. If the act done by him had been done under his direction as he did it, by one of the employees of the company, its liability could not be doubted, and for the reason that the negligent act, although committed by the hand of another, was, in law, the act of the foreman, and consequently the act of the master. And it could be no less the act of the master when performed by the foreman in person."

In *Purcell v. Southern R. Co.* (1896) 119 N. C. 728, 26 S. E. 161, the court laid down the law as follows: "The defendant had no cause to complain of the instruction of the court that the conductor could change his own relation to the company from that of *alter ego* to that of a fellow servant of a brakeman by volunteering to anticipate the plaintiff in the performance of his ordinary duty. If the conductor had ordered the fireman to do an act which might reasonably have been expected to endanger the brakeman, and which did result in injury to him, the company would have been answerable for the natural consequences of his orders. It would be unreasonable to hold that, by doing the careless act himself, instead of ordering another who felt constrained to obey to do it, he relieved the company from responsibility. *Qui facit per alium, facit per se*, is the maxim which applies where, as vice principal, he compels another to do what is culpable. It would be illogical to say that, where he directs or orders, he utters the command of the company, and adopts for it the act of the employe who obeys, and yet, when he does the act in proper person, he descends from the role of vice principal to that of servant."

In *Daghirsh v. Hannibal & St. J. R. Co.* (1890) 103 Mo. 570, 15 S. W. 554, where the "boss" of a roundhouse undertook to move one of the engines himself, and injured a subordinate, the court reasoned thus: "If he had expressly directed the engine to be moved down by another upon the plaintiff, in the manner described in the evidence for the latter, the defendant would have been responsible for the act; and we are unable to perceive any logical or reasonable distinction between so directing it, and his performing such negligent act

Rhode Island recognized, *arguendo*, the theory that there are certain classes of negligent acts in regard to which a vice principal does not

himself, in the circumstances here shown. It was one which fell within his authority as the master's representative to direct, and it can make no difference in principle whether he did it personally or by another, in its bearing on the rights of the parties to this cause, where his act involved an obvious breach of the master's duty to use care to provide a reasonably safe place for plaintiff to work."

In *Hutson* v. *Missouri P. R. Co.* (1892) 50 Mo. App. 300, where a section foreman injured a laborer with the pick which he was using to pull a tie from under the rails, the court said: "In this case we have the unusual fact that the injury was directly inflicted by the foreman himself while engaged in the work as a colaborer with plaintiff. Does this fact alter the relation of the parties, or interfere with the master's liability? Our opinion is that it does not. If in the case at bar the section foreman had ordered one of his hands to strike his pick down between the heads of the two others, it would not be contended that defendant was not liable for the injury resulting from such imprudent order. There is no just or logical distinction between the act of the vice principal in negligently ordering a servant to do an imprudent thing, and in doing the thing himself. In each case it is the act of the vice principal; in one, he wills the servant shall do the act, in the other, he wills that he himself shall do it."

In a recent case the supreme court of Texas, in holding the defendant liable for the negligence of a section foreman in prematurely throwing a switch for a hand car, referred to three earlier decisions in that state, *viz.*: *Missouri P. R. Co.* v. *Williams* (1889) 75 Tex. 4, 12 S. W. 835 (ferry car repairers failed to keep proper lookout to protect subordinate); *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 562 (road master in moving train so as to cause collision acts as servant; decision of commission adopted by supreme court, but only on the ground that the case was distinguished from the *Williams' Case* by the fact that the injured servant "was not employed under the immediate eye of the road master." *Nix* v. *Texas P. R. Co.* (1891) 82 Tex. 473, 18 S. W. 571 (assistant foreman negligently started machinery while plaintiff was near a driving belt). After pointing out that, in the first of these cases, the delinquent was a vice principal, the court proceeded thus: "Such relation being established, the three cases first cited, as adopted by the supreme court, lead to the conclusion that Murphy should be held to have been the representative of the defendant in the performance of any act, service, or duty for the defendant in the line of his employment, and that no distinction should be drawn between the performance of those higher duties intrusted to him specially, and those of an ordinary character which both he and the subordinate servants and employees under him were in the habit of indiscriminately performing. In other words, when he negligently injured the plaintiff the law viewed his act in the same light as if the same master had been personally present and committed the negligent act himself, and in the latter contingency no one would doubt the liability of the master." *Sweeney* v. *Gulf, C. & S. F. R. Co.* (1892) 84 Tex. 433, 19 S. W. 555.

See also the following cases in which the master was held responsible: *Northern P. R. Co.* v. *Peterson* (1892) 2 C. C. A. 457, 4 U. S. App. 574, 51 Fed. 182 (sudden application of the brake of a hand car by foreman of track repairers); Reversed in (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843 (but solely on the ground that the delinquent employee was not a vice principal. The Supreme Court mentioned but did not pronounce any decided opinion as to the controversy respecting the proper limits of official acts); *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 316, 55 Pac. 673 (foreman threw a switch in such a manner as to injure a subordinate while pushing a car); *Hughlett* v. *Ozark Lumber Co.* (1893) 53 Mo. App. 87 (oiler of machinery injured by superintendent's negligence in causing machinery to start by the manner in which he handled a new belt); *Erickson* v. *Milwaukee, L. S. & W. R. Co.* (1890) 83 Mich. 281, 47 N. W. 237 (foreman of gravel train caused an accident to a laborer by releasing a brake, and thereby suddenly widening the gap between a car from which he had or-

act in his representative capacity.[1] But the earliest case in which that theory was actually applied, with the result of preventing a servant from recovering damages, seems to be *Crispin* v. *Babbitt*.[2] This decision is, at all events, the leading authority on the subject, and the question whether the theory applied was correct virtually resolves itself into the question whether the opinion delivered by Rapallo, J., for the majority of the court, or the dissenting opinion of Earl, J., embodies the sounder views.

Minority opinions so seldom receive any attention from the judge who is intrusted with the task of stating the conclusions of the majority, that the omission of Judge Rapallo to notice Judge Earl's criticism of the theory which was deemed to be a bar to the plaintiff's action is not at all surprising. But it is less easy to understand why the lucid and forcible arguments of the latter judge should have made so little impression upon courts in other jurisdictions, that, so far as the number of decisions goes, the doctrine which he combated must now be regarded as the more authoritative. In order to draw the attention of the profession once more to the reasoning of this distinguished jurist, some lengthy extracts from his opinion are subjoined.[3]

dered the laborer to jump and the one to which he was to jump).

In Kentucky it has been declared that a subordinate may recover for injuries caused by the negligence of a superior servant, whether the negligent act was done by his own hand or by another under his orders. *Illinois C. R. Co.* v. *Coleman* (1900) 22 Ky. L. Rep. 878, 59 S. W. 13; *Illinois C. R. Co.* v. *Josey* (1901) 22 Ky. L. Rep. 1795, 54 L. R. A. 78, 61 S. W. 703 (negligent application of brake of hand car by section foreman).

[1] *Hann* v. *Oriental Print Works* (1875) 11 R. I. 152.

[2] (1880) 81 N. Y. 516, 37 Am. Rep. 521. The majority of the court indorsed a charge to the effect that, although the delinquent might, as manager, have represented the defendant, he did so only in respect of those duties which the defendant had confided to him as superintendent; and the trial judge's refusal to charge that, as to any other acts or duties performed by him, he was not to be regarded as the defendant's representative, was held to [illegible]or.

[3] If this fiction were literally applied, if it were held that every servant entering into the service of a master assumed all the risks incident to such service, then the master would not be responsible to such servant for his own negligence, as that would be as much an incident to the service as the negligence of a coservant. The maxim, *Volenti non fit injuria*, would shield the master. But the fiction is not applied to shield the master. He is held responsible for his own negligence, whether engaged in the discharge of the duties peculiar to him as master, or working side by side with his servants in the same kind of labor. So the fiction should not be applied to shield the master from responsibility for the negligence of the middleman standing in his place and representing him. Public policy does not require that the doctrine of *respondeat superior* should be thus far limited. It is not too much for the master to be responsible for his negligence. He is generally a person selected with care, of superior judgment and skill, and is, more generally than other servants, able to respond to his master for his own negligence. I can perceive no reason founded upon public policy, as there is none founded upon any principle of natural justice, for limiting the doctrine of *respondeat superior* in its application to the relation existing between a master and such an agent. The

His position seems to the present writer to be quite impregnable, but the current of judicial authority has set so strongly against his view that it will be worth while to supplement his arguments by pointing out that, quite apart from those objections which he urges against the theory of his associates, there are some serious, if not fatal, flaws in the reasoning by which that theory is supported.

The first of these flaws is the reliance placed upon the two rulings

master should be responsible for all his negligence while engaged in his service, because he stands in his place representing him as his *alter ego;* and I can perceive no reason founded on public policy or expediency for enforcing that doctrine in such a case in favor of strangers, which does not exist for enforcing it in favor of the other servants of the common master. A rule that a master shall be held responsible for some negligent acts of his representative, and not responsible for other negligent acts, done possibly at the same time, within the scope of his employment in the same service, would be illogical, perplexing, and inconvenient. Take the case of a general superintendent of a railway. It is conceded that, for negligence in his discharge of the absolute duties which a master owes to his servants, the master—the corporation—would be responsible. But suppose, instead of such duties, he should, in furtherance of his master's business, carelessly perform a mechanical act about which common laborers were also engaged. Would there be any reason, founded upon principle or public policy, for distinguishing the two cases, and imposing upon the master a liability in the one case, and not in the other? Suppose the superintendent carelessly ordered a train to be started, and some one was thus injured. The corporation would undoubtedly be liable for the damages. Would it not be thus liable if, instead of ordering the train to be started by others, he placed his own hand to the lever and carelessly started it himself? Would he be the responsible representative of the corporation in the one case, and not in the other? Suppose he was standing upon a train of cars, and carelessly started that train himself, causing an injury to someone, and at the same moment of time he carelessly ordered an engineer to start another train, also causing an injury. Would the corporation be liable for the damages in the one case, and not in the other? The question in all this class of cases, the negligent act and consequent injury being proved, is whether the servant whose act is complained of stood in the place of the master—represented him as his *alter ego.* That is always mainly a question of fact. If he did, then the rule of law to be applied is plain and simple, and is the same which would measure the responsibility of the master to a stranger in his service. On the one hand, it is claimed that, in determining the responsibility of the master in such cases, we must look solely at the duties which were devolved upon the servant whose acts are complained of; and that if we find that the duty which he was engaged in discharging when he committed the negligent act or wrong was one of those absolute duties which the master owed to his servants, then the master is responsible, no matter what was the grade or position of the servant. On the other hand, I claim the rule to be that, in determining the responsibility of the master for the negligent acts of his servant, we must look solely at the position of such servant, and we must consider the duties devolved upon him, solely for the purpose of determining such position; and if we find that he was the representative of the master, within the rules above stated, then the master must be held responsible for all his acts of negligence committed within the scope of the business intrusted to his hands as well to coservants as to strangers. It cannot be claimed that what John I. Babbitt did was an idle thing, having no pertinency to the business in hand. If he was there in defendant's works, as we have assumed the jury found, standing in his place and having the general charge of his business, then he was empowered to do whatever he saw fit in and about that business and in furtherance of its objects. Whatever he could order or employ another to do, he could do himself. Did he represent the defendant when he ordered the laborers to put the boat into the dry dock, and not represent him,

which are cited from other jurisdictions, one an Irish, and the other a Massachusetts, case.[4] In both of these the rationale of the decisions was simply that the delinquent was not a vice principal at all, and the question whether a vice principal may occupy a dual relation to his subordinates was not determined or even alluded to. It is submitted that cases in which representative capacity is denied altogether, and the character of the negligent act is for this reason a mere incidental detail, are not legitimate precedents to sustain a decision which makes the character of the act the point upon which the liability of the master hinges.[5]

Nor, at it seems to us, is Judge Rapallo more fortunate in the attempt which he makes to extract the doctrine enunciated by him from an earlier case in New York itself. There is a flagrant *non sequitur* in that passage of his opinion in which *Flike* v. *Boston & A. R. Co.*[6] is cited. After stating its effect he proceeds thus: "The liability of the master is thus made to depend upon the character of the act in the performance of which the injury arises, without regard to the rank of the employee performing it. If it is one pertaining to the duty the master owes to his servants, he is responsible to them for the manner of its performance. *The converse of this proposition necessarily follows.* If the act is one which pertains only to the duty of an operative, the employee performing it is a mere servant, and the master, although liable to strangers, is not liable to a fellow servant for its improper performance." The sentence which we have italicised, whether it be viewed from the standpoint of abstract principle or in connection with prior decisions of the same court, to say nothing of those in other jurisdictions, certainly cannot be accepted as a statement of a self-evident conclusion. If it were not for the position thus taken by so many eminent judges, one would be at a loss to understand how the doctrine that a master remains liable for the performance of certain obligations, even though the servant intrusted with the performance may not have been a vice principal for general

a few minutes later, when he put his hands to the engine to further the same work? If he had ordered another servant to do this careless act, the defendant would have been liable, and does the defendant escape liability because John did the act himself? I say no." *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 531, 37 Am. Rep. 521.

[4] *Albro* v. *Agawam Canal Co.* (1850) 6 Cush. 75; *Conway* v. *Belfast & N. Counties R. Co.* (1877) Ir. Rep. 11 C. L. 353.

[5] It may be noticed in passing that there is a similar misuse of a precedent in *National Fertilizer Co.* v. *Travis* (1899) 102 Tenn. 16, 49 S. W. 832, which cites *Boyce* v. *Fitzpatrick* (1881) 80 Ind. 526, where the delinquent was simply held to be a fellow servant of the plaintiff, and no allusion was made to a dual relation.

[6] (1873) 53 N. Y. 549, 13 Am. Rep. 545.

purposes could ever have been supposed to involve the corollary that a vice principal for general purposes is a vice principal only when he is in the discharge of one of those obligations. From such a corollary an obvious way of escaping is indicated by the consideration that, logically speaking, the conceptions of a liability traced home to the master through the particular act which caused the injury, and of liability referable to the official position of the delinquent which constitutes him a general agent of the master, are neither essentially incompatible nor mutually exclusive in such a sense that a court must elect between them. In fact, it may fairly be maintained that the New York court of appeals, by its language in three decisions which are of later date than the *Flike Case* and which recognize, without any suggestion of a qualification or restriction, the responsibility of a master for the defaults of a general manager, has by implication conceded that the "converse" adverted to in Judge Rapallo's argument does not "follow necessarily" from the theory on which he relies.[7]

Surely there could be no more striking proof of the commanding influence of the court which is mainly responsible for the adoption of the doctrine of the dual capacity of vice principal than the fact that so many other judges should have been content to follow a decision based upon reasoning which not only ignores the possibility that there may well be two principles upon which the question whether an employee represents the master or not may be determined, but even fails to take into consideration prior rulings of the same

[7] In *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573, the court, while holding that the position of the delinquent was that of foreman merely, having no general charge except such as is common to those acting in that capacity, and that the defendants were present and had the general charge and responsibility for the different branches of their business, added: "If it was claimed that Bagley's (the foreman's) position and responsibilities were different from that named as foreman, and that the defendants had transferred the charge and direction of any branch of the business and of the duties upon him, it would have been a proper question for the jury, if, indeed, there was any evidence to warrant the claim."

In *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369, the precise point of view is more disputable. But, at all events, there are reasonable grounds for arguing that its rationale is rather that the non-delegable duty there violated was among those with which a functionary assumed to be a vice principal was intrusted, than that this functionary was conceived to be a vice principal merely because he was a special agent for the performance of that duty.

In *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556, it was laid down, *arguendo*, that, where an employer exercises no personal supervision over the work, but devolves its whole management and control upon the superintendent, who is authorized to employ and discharge workmen, to regulate and direct the manner of their work, to provide the means and appliances necessary to its prosecution, and to determine the time and place of its performance, the superintendent is a vice principal.

court, which, by a reasonable intendment, may be construed as conceding the concurrent existence of those principles.

There is still another point in which the opinion of the majority seems to be open to attack. It loses sight of the fact that the essence of the conception of an *alter ego*, or vice principal, as such a functionary was understood in the earlier cases, was simply this: that the law of agency, which, as a general rule, was superseded by the doctrine of common employment where a fellow servant was the delinquent, remained operative where that servant exercised such complete control over the work to be done that he was, simply as a matter of fact, the master's substitute or deputy.[8] Under these circumstances, it is plain that the effect of declaring a master not to be liable for some acts of a vice principal which are undoubtedly within the scope of his powers amounts to what is nothing more or less than the introduction of an entirely novel principle into the law of agency. To justify such a modification of that law, it is submitted that arguments addressed more directly to the real question involved than those of Judge Rapallo may fairly be demanded. A court which asks us to adopt the doctrine that the servant's right to recover should be made to depend solely upon the conception of a special agency as regards the performance of certain duties of a non-delegable character is at least bound to demonstrate, by some satisfactory reason, that the duties to which that agency is restricted are the only ones in regard to which a master can be deemed to have a representative.[9] Until such a reason has been produced it seems not too much to say that the decision in *Crispin* v. *Babbitt* rests upon no more solid foundation than a couple of irrelevant precedents and a transparently fallacious piece of dialectic legerdemain by which the rule in the *Flike Case*, primarily intended, as the opinion shows, to provide an additional offensive weapon for the servant, was converted into an instrument for the curtailment of the rights which he already enjoyed.[10]

[8] See especially *Gallagher* v. *Piper* (1864) 16 C. B. N. S. 669, 33 L. J. C. P. N. S. 329, and the other English cases cited in § 526, *ante*.

[9] The reason for which the perplexed inquirer is looking is certainly not supplied by the suggestion made in one case, that the injured servant is no worse off than he would have been if the vice principal, instead of undertaking the work himself, had ordered one of his subordinates to do it, and the injury had resulted from the default of that subordinate. *Quinn* v. *New Jersey Lighterage Co.* (1885) 23 Blatchf. 209, 23 Fed. 363. The essential question is simply whether the servant's implied assumption of certain risks can reasonably be said to cover any of the acts done by a superior employee who, as regards most of his functions, is conceded to represent the master; and there is no legal analogy, so far as the writer is aware, which would justify a court in taking into account the extent of the injury or benefit which would accrue to the servant, according as the question is answered in one way or the other.

[10] The special difficulty involved in the

Very little light is thrown upon the logical foundations of the doctrine of dual capacity by any of the cases outside of New York. None of them, it seems to us, really go to the root of the matter.[11]

b. With reference to the superior servant doctrine.—One conceivable view of the relation of an employee who exercises control to his master and his subordinates is that, assuming the basis of the superior servant doctrine to be the non-delegable quality of the duty of giving such orders as will not expose servants to unnecessary dangers (§ 522, *id. ante*), a controlling employee should be treated as a special agent for the performance of that duty alone. The corollary from this theory would clearly be that negligent acts done while he

acceptance of a theory which in many instances would absolve the master even for the injuries produced by negligent orders has been already adverted to in § 543, *supra*.

[11] Until last year the utterances of the supreme court of Pennsylvania were such that it might apparently have been numbered among the opponents of the New York theory. In *Prevost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88, the concurrent existence of two tests of vice principalship was thus distinctly recognized: "A vice principal for whose negligence an employer will be liable to other employees must be either, first, one in whom the employer has placed the entire charge of the business, or of a distinct branch of it, giving him, not mere authority to superintend certain work or certain workmen, but control of the business, and exercising no discretion or oversight of his own; . . . or, secondly, one to whom he delegates a duty of his own, which is a direct, personal, and absolute obligation, from which nothing but performance can relieve him." This passage was quoted with approval in *Ricks* v. *Flynn* (1900) 196 Pa. 263, 46 Atl. 360; but its effect is so much cut down by the comments of the court that the law in this state would now seem not to be materially different from that in New York. The *Prevost Case*, it is now declared, should be construed as embodying a doctrine subject to a qualification which is deemed to have been established by *Ross* v. *Walker* (1891) 139 Pa. 49, 21 Atl. 157, 159, where it was laid down that a servant intrusted with the performance of the various non-delegable duties is a vice principal while he is in discharge of those duties, and that, as to any other acts, he is not the master's representative. But it is submitted that the citation of this case as an authority to sustain the position which the court adopts —*viz.*, that a vice principal by virtue of his position does not represent the master as to merely manual acts—is as improper, though not for the same reason, as the citation, in *Crispin* v. *Babbitt*, of the Massachusetts and Irish cases mentioned in the note above. In *Ross* v. *Walker* the question whether the delinquent was a vice principal by virtue of his position was not involved, the court even refusing to consider it; and the observations made *arguendo* manifestly had reference to a representative capacity conceived of as arising out of a restricted agency in respect to one or more particular non-delegable duties.

In Minnesota the principle that there are two distinct tests of representative capacity has been declared quite recently. "It has been settled by this court that an employee becomes a vice principal, as respects another servant, only when he is intrusted with the performance of some absolute and personal duty of the master himself, or the general management and control of the master's business, or some branch of it." *O'Neill* v. *Great Northern R. Co.* (1900; Minn.) 82 N. W. 1086, citing *Brown* v. *Minneapolis & St. L. R. Co.* (1884) 31 Minn. 553, 18 N. W. 834. The position taken, as expressed in the syllabus written by the court itself, was that the road master of a railway company, directing the work of clearing away a bridge, is not the vice principal of the company to the extent that his omission to give a particular warning of a detail thereof which portends danger would render the company liable for his omissions in that respect. It was fully rec-

was participating in manual labor would not be done in his representative capacity. The position of the courts which, while applying the superior servant doctrine, except from its operation acts not done in the exercise of authority, is, therefore, stronger, in a sense, than that of the courts whose decisions were reviewed in the preceding subsection, inasmuch as it does not necessarily involve the anomaly of declaring that there are some acts as to which, although they are within the scope of his authority, and he is not even forbidden to do them, a general agent does not represent the master.

But this hypothesis of a special agency in respect to the duty of giving orders does not by any means represent the only possible theory as to a superior servant's relation to his employer. It is clear from the decisions cited in § 546, *supra*, that some at least of the courts which apply the superior servant doctrine proceed upon the assumption that, as to all matters within the scope of their authority, foremen of the lower grades are as much general agents for the protection of their subordinates as are the superintendents of an entire business or a principal department of it, when acting within the scope of their much wider authority. If this is really the juridical situation, the essential ground upon which the master's liability or nonliability will depend must obviously be the same in the courts which accept the superior servant doctrine as in those which reject it. In both classes of courts, therefore, the refusal to allow recovery under the circumstances must bring us face to face with the same difficulty, *viz.*, that such refusal is only justifiable on the assumption that the duty of a vice principal to avoid injuring his subordinates by manual acts is not one of those which the master, who would admittedly have been under a similar duty if he had himself participated in the work, may be conceived to have delegated to his deputy.

ognized that such an act would have been treated as official if the delinquent had been a vice principal by virtue of his position; and the doctrine was applied that, except in cases of general managers of a whole business or a department of it, the distinction upon which the master's liability rests is that which exists between a general warning and one as to the dangers of the transitory class which arise during the progress of the work. This theory of responsibility is, however, not construed in this state as enabling a servant to recover where the negligent act was purely a manual one, committed while the vice principal was participating in the labor of his subordinates. *Soutar* v. *Minneapolis International Electric R. Co.* (1897) 68 Minn. 18, 70 N. W. 796. The court therefore merely declines to go to the same length as those whose decisions are referred to at the beginning of § 543, *supra*.

In *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258, it was distinctly recognized that the case of a general or departmental manager constitutes an exception to the principle that the final test of representative capacity is whether the negligent act represented a breach of one of the non-delegable duties, as that term is generally understood.

and that no reasons have ever been judicially suggested why this assumption, rather than its converse, should be entertained. In default of such reasons, the present writer has no hesitation in saying that he considers the rulings of the Illinois and Tennessee courts, as stated in § 544, *supra*, to be less correct in principle than those of the Ohio, Missouri, and Texas courts cited in § 546, *supra*.

CHAPTER XXX.

SUMMARY OF DECISIONS BY THE VARIOUS COURTS WITH REGARD TO THE RELATION OF SUPERIOR SERVANTS TO THEIR SUBORDINATES.

548. Introductory statement.
549. Decisions in each jurisdiction.

548. Introductory statement.— In the present chapter it is proposed to give a succinct summary of the effect of the decisions which have been rendered in various jurisdictions with respect to the specific application of the doctrines discussed in chapter XXVIII., *ante*.

An inspection of the dates of these decisions shows that, broadly speaking, the American courts, as a whole, followed very closely in the steps of the English judges up to about the year 1870. That is to say, setting aside the few states in which the theory that any superior servant was a vice principal (see chapter XXVIII., *ante*) had been avowedly adopted, the only qualification of the doctrine of common employment which had been suggested or allowed was the case in which a general manager was the delinquent, and the same difference of opinion upon this point existed here as in the mother country. See chapter XXVIII., *ante*.

Whether the judgment of the House of Lords in the famous case of *Wilson* v. *Merry*,[1] which was at first mentioned with approval in several American cases, provoked a reaction against the rigorous doctrine applied in it, or the social and economic conditions of the United States operated so as to modify the trend of judicial ideas, it is, at all events, sufficiently obvious to a student of the reports, that, during the last thirty years of the nineteenth century, there was a marked tendency to temper the strictness of the doctrine of common employment in various directions. An important step was taken in the *Flike Case*,[2] in which it was, for the first time, distinctly laid down that, however low the rank of the delinquent, the master is responsible, if the negligent act involved a breach of certain duties declared to be absolute and non-delegable. But this doctrine was, in some measure, a sort of two-edged sword; for it was afterwards con-

[1] (1868) L. R. 1 H. L. Sc. App. Cas. [2] (1873) 53 N. Y. 549, 13 Am. Rep. 326, 19 L. T. N. S. 30. See § 529, *ante*, 545.

strued, in the *Crispin Case*,[3] and in the decisions which followed it, in such a manner as to deprive the servant of a remedy for certain kinds of negligence, even when committed by a general manager. (See §§ 538–547, *ante*.) But this construction was, as we have seen, not adopted in all jurisdictions; and, in view of this limited acceptance, and the comparative rarity of the circumstances under which the rule in the *Crispin Case* becomes applicable, the doctrine that the character of the negligent act is a controlling consideration has been, on the whole, a distinct gain to the servant.

Whatever he may have lost by it was, in any event, more than compensated by the extension of the principle that a general manager is the master's *alter ego* to cases in which the delinquent was the manager of a distinct department. This theory seems to have been first propounded in the *Ross Case*.[4] It was afterwards explained and limited in the *Baugh Case*,[5] and is now firmly established not merely in the Federal courts, but in a large number of the state courts also. (See chapter XXVIII., *ante*.)

So far as the present position of the law is concerned, it is clear that its most marked feature is the disposition of the judges to refer the liability of the master in all cases to the character of the negligent act, and to disregard altogether the superiority of the delinquent's rank as a test of representative capacity. It is scarcely possible, however, to deny that a development of doctrine along this line alone may be productive of much injustice to the servant, and the writer has already expressed his opinion (§ 547, *ante*), that the disuse of the test which is thus excluded is an unwarrantable innovation in the law of agency.

549. Decisions in each jurisdiction.—In the subjoined note the writer has endeavored to exhibit the effect of the decisions bearing on the status of superior servants in such a manner as to indicate, with as much precision as is possible under the circumstances, the nature and extent of the fluctuations of judicial opinion, and the present position of the law in each separate jurisdiction.

If it is desired to ascertain the facts involved in any particular decision, it can be traced through the index of cases to the section where it is discussed in the preceding chapters.[1]

[3] (1880) 81 N. Y. 516, 37 Am. Rep. 521.

[4] (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184.

[5] (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914.

[1] *The United Kingdom.*—Several cases have been cited in § 526, *ante*, in which the doctrine of the vice principalship of a general manager was recognized by English judges, but, as stated in § 529, the law was declared in a different sense by the House of Lords in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App.

Cas. 326, 19 L. T. N. S. 30. See also § 531.

The doctrine of departmental control is impliedly condemned in the same case (§ 532, *ante*); but it has never really been discussed as a distinct and specific conception. That superior servants of a lower grade than general managers could be vice principals is a theory which has never been countenanced in England. It has been declared that there can be no recovery for the negligence of the following employees:

An "underlooker" in a mine. *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 180, 11 L. T. N. S. 779, 13 Week. Rep. 411.

An underground manager of a mine. *Wright* v. *Roxburgh* (1864) 2 Macph. Sc. Sess. Cas. 3d series, 748; *Wilson* v. *Sneddons* (1866) 4 Macph. Sc. Sess. Cas. 3d series, 736; *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. The last-mentioned case definitely settles this to be the law in the United Kingdom, and overrules some earlier Scotch cases to the contrary. *Somerville* v. *Gray* (1863) 1 Sc. Sess. Cas. 3d series, 768; *Hardie* v. *Addie* (1858) 20 Sc. Sess. Cas. 2d series, 553.

The foreman of a gang engaged in excavating. *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 334, 19 L. T. N. S. 30, per Lord Cranworth, *arguendo*, page 334.

The chief engineer of a steamer. *Searle* v. *Lindsay* (1861) 11 C. B. N. S. 429, 31 L. J. C. P. N. S. 106, 8 Jur. N. S. 746, 5 L. T. N. S. 427, 10 Week. Rep. 89.

The captain of a ship. *Hedley* v. *Pinkney & Sons S. S. Co.* [1894] A. C. 222, Affirming [1892] 1 Q. B. 58 and overruling *Ramsay* v. *Quinn* (1874) Ir. Rep. 8 C. L. 322; *Leddy* v. *Gibson* (1873) 11 Sc. Sess. Cas. 3d series, 304.

The traffic manager of a railway. *Conway* v. *Belfast & N. Counties R. Co.* (1877) Ir. Rep. 11. C. L. 345, Affirming (1875) Ir. Rep. 9, C. L. 498.

In Scotland a strong tendency towards the superior servant doctrine was at first exhibited, and one of the earlier decisions, *Dixon* v. *Rankin* (1852) 14 Sc. Sess. Cas. 2d series, 420, was strongly relied on in the leading Ohio case of *Cleveland, C. & C. R. Co.* v. *Keary* (1854) 3 Ohio St. 201 (see § 522, *ante*). This tendency seems to have been only partially checked by the judgment of the House of Lords in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767; for it will be observed that one of the decisions cited above, in which an underground manager in a mine was held to be a vice principal, bears the date of 1863. The law was only settled definitely on the same basis as that of England by *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

The particular decisions with regard to general managers in Scotland have been discussed in §§ 526 and 529, *ante*.

British Colonies.—In these the English cases are, of course, followed. The following have been held to be mere servants:

The foreman of a pile-driving gang. *Drew* v. *East Whitby Twp.* (1881) 46 U. C. Q. B. 107.

The superintendent of structures on a railway. *Carney* v. *Caraquet R. Co.* (1890) 29 N. B. 425.

A civil engineer superintending the construction of a railway for nonresident contractors, who are represented by a general agent. *McBride* v. *Brogden* (1876) 3 New Zealand C. A. 271.

The mate of a ship. *Sanderson* v. *Smith* (1882) 3 New So. Wales L. R. 31.

As to the cases on the position of general managers, see §§ 526, 529, *ante*.

A foreman of a street railway company. *Dixon* v. *Winnipeg Electric Street R. Co.* (1897) 11 Manitoba Rep. 528.

Federal Courts.—The Federal decisions are singularly conflicting, and their significance as authorities can perhaps be shown most clearly by considering them with reference to the two leading cases in which the Supreme Court has explained its views.

Several cases preceding the judgment in the *Ross Case* (see *infra*) permitted recovery under circumstances in which the master would now be absolved in any court which was not an avowed adherent of the superior servant doctrine (§§ 521, *et seq.*, *ante*), and are, therefore, no longer law so far as the Federal courts are concerned.

In *McMahon* v. *Henning* (1880) 1 McCrary, 516, 3 Fed. 353, a yard master was held to be a vice principal.

In *Gravelle* v. *Minneapolis & St. L. R. Co.* (1882) 3 McCrary, 352, 10 Fed. 711, a jury was told that, if the plaintiff was a subordinate of an assistant yard master with respect to the duties which he was then performing, he was not a fellow servant of such yard master.

In *Thompson* v. *Chicago, M. & St. P.*

R. Co. (1883) 4 McCrary, 629, 14 Fed. 364, it was laid down that the general rule as to common employment is subject to this exception among others, that, where the employer places one employee under the control and direction of another, and the latter, in the exercise of the authority so conferred, orders the former into a place of unusual danger, and thus exposes him to extraordinary perils, of the existence and extent of which he is not advised, the master is liable. In this case a road master was assumed to be a vice principal.

In *Miller* v. *Union P. R. Co.* (1883) 5 McCrary, 300, 17 Fed. 67, the master was held liable for the negligence of a foreman of carpenters, who ordered a subordinate into a dangerous position.

In *Brown* v. *The Bradish Johnson* (1873) 1 Woods, 301, Fed. Cas. No. 1, 992, it was laid down that a mariner who is injured in the service of the ship can recover damages in the nature of extra wages, where there has been some carelessness or other fault on the part of the officers of the ship; his rights, in the absence of such fault, being limited to free medical attendance until he is cured.

In another case in the same circuit a vessel was held liable for the expenses of a sailor, incurred during his recovery from an injury caused by the misconduct of his officers, as well as for the wages accruing during the same period. *Brown* v. *The D. S. Cage* (1872) 1 Woods, 401, Fed. Cas. No. 2,002 (liability for wages conceded).

In *The Chatsop Chief* (1881) 7 Sawy, 274, 8 Fed. 163, it was held that a fireman of a steam tug, injured through a collision caused by incompetence of the master, could recover, the broad ground being taken that he was an inferior servant injured by the misconduct of a superior one.

In *Peterson* v. *The Chandos* (1880) 4 Fed. 645, Deady, D. J., although the case was decided on another point, considered that, on account of the dependent position of a seaman, and of the impossibility of his leaving the service, like a workman on land, when he is dissatisfied with the competency of his coemployees, it was unjust to apply the doctrine of common employment to a case where a seaman was injured by the carelessness of the mate in putting up a rotten crane line. (This *dictum* was disapproved in *Benson* v. *Goodwin* [1888] 147 Mass. 237, 17 N. E. 517.)

In *Daub* v. *Northern P. R. Co.* (1883) 18 Fed. 625, a deckhand caught round the leg by a headline which he was paying out, owing to the negligence of the mate in not stationing himself in such a position as to be able to observe any accident which might render it necessary to stop the ship instantly. (Also disapproved in *Benson* v. *Goodwin* [1888] 147 Mass. 237, 17 N. E. 517.)

But the tendency exhibited by these cases was not universal, as a division foreman of bridges on a railway was, in 1882, held to be a mere servant in *Yager* v. *Atlantic, M. & O. River R. Co.* 4 Hughes, 192; and the same defense was admitted in the case of a mate of a ship. *The E. B. Ward, Jr.* (1884) 20 Fed. 702; *Malone* v. *Western Transp. Co.* (1873) 5 Biss. 315, Fed. Cas. No. 8996; *The City of Alexandria* (1883) 17 Fed. 390.

In *Union P. R. Co.* v. *Fort* (1873) 17 Wall. 553, 21 L. ed. 739, the employer was held liable for injuries received by a boy in obeying the order of a foreman. But the rationale of this decision is that the risk undertaken was outside the scope of the contract of service. See § 465, *ante*. It is not material, therefore, to inquire whether it is or is not in harmony with later decisions not involving this element.

The actual scope of the decision in *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184, is, first, that the head of any distinct department of a business is a representative of the master; and secondly, that under this doctrine a railway company is liable for the negligence of a conductor. But a good deal of the language used by Mr. Justice Field in the majority opinion was apparently susceptible of the construction that he intended to adopt a theory of vice principalship not materially different from that discussed in chapter XXVIII., D, *ante*; and before the *Baugh Case* had explained the real scope of the decision, several rulings based on an erroneous idea of its effect had been made, both in the Federal and the state courts. Confining our attention for the present to the former courts, it seems certain that a master would not now be held liable by one of them, as he was between the dates of the *Ross* and *Baugh Cases*, for the negligence of the following employees:

A gang foreman in a machine factory. *Mason* v. *Edison Mach. Works* (1886) 24 Blatchf. 93, 28 Fed. 228.

A foreman of carpenters. *Pullman's*

Palace Car Co. v. *Harkins* (1893) 5 C. C. A. 326, 17 U. S. App. 22, 55 Fed. 992.

An engineer who, in accordance with the company's rules, has taken charge of the forward section of a train which has broken apart. *Newport News & M. Valley Co.* v. *Howe* (1892) 3 C. C. A. 121, 6 U. S. App. 172, 52 Fed. 362.

In *Haas* v. *Balch* (1893) 6 C. C. A. 201, 12 U. S. App. 534, 56 Fed. 98, a foreman of a gravel train seems to have been viewed as a vice principal (as respects an assurance of safety).

A section foreman was held to be a vice principal in *Northern P. R. Co.* v. *Peterson* (1892) 2 C. C. A. 157, 4 U. S. App. 574, 51 Fed. 182, where the court of appeals went so far as to lay it down that the test for determining whether a person occupies the relation of vice principal or fellow servant is not whether he has charge of an important department of the master's service, but whether his duties are exclusively supervision, direction, and control of the work, and over subordinate employees engaged therein. This decision was reversed in 1895 by the Supreme Court (162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843), the *Baugh Case* having been decided in the meantime. See further as to such employees, *infra*.

Possibly the *Baugh Case* has not impliedly overruled the decisions declaring employers liable for the negligence of the following employees:

The foreman of a quarry. *Reed* v. *Stockmeyer* (1896) 20 C. C. A. 381, 34 U. S. App. 727, 74 Fed. 186, Adirming, on this point (1893) 55 Fed. 259.

A foreman in charge of the erection of a building. *Heckman* v. *Mackey* (1888) 35 Fed. 353.

A road master (apparently of a division only). *Atchison, T. & S. F. R. Co.* v. *Wilson* (1891) 1 C. C. A. 25, 4 U. S. App. 25, 48 Fed. 57.

A foreman of a construction crew. *Lindvall* v. *Woods* (1891) 44 Fed. 855, where it was left to the jury to say whether the foreman of several gangs engaged in constructing a railway was a vice principal, the judge charging them that a master is responsible for the negligence of an employee vested with the entire control and supervision of a particular work to be done. This charge was approved in (1891) 1 C. C. A. 37, 4 U. S. App. 49, 48 Fed. Rep. 62. In the case of the same name in (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020, arising out of the same accident, the foreman was held to be a mere servant, and the further ground was taken that the trestle which fell was not a structure furnished for the laborers to work upon, but was itself a part of what was to be done in the construction of the road.

A pilot in command of a vessel. *The Titan* (1885) 23 Blatchf. 177, 23 Fed. 413.

A captain of a ship. *The A. Heaton* (1890) 43 Fed. Rep. 592; *The Transfer No. 4* (1894) 9 C. C. A. 521, 20 U. S. App. 570, 61 Fed. 364, Reversing (1893) 55 Fed. 98 (*Baugh Case* not cited though it was decided in the previous year). The case of *Quinn* v. *New Jersey Lightcrage Co.* (1885) 23 Blatchf. 500, 23 Fed. 363, in which such liability was denied, turned on the fact that the captain was engaged in manual labor. The theory of dual capacity is also the ground of the decision in *The Queen* (1889) 40 Fed. 691, though this case probably carries that theory further than is justifiable under the principles accepted by most courts. See §§ 543-547, *ante*.

A yard master was held to be a vice principal, in *Hardy* v. *Minneapolis & St. L. R. Co.* (1888) 36 Fed. 567, and the same ruling has been made since the *Baugh Case*. See *infra*.

That a foreman of construction on a railway is a vice principal was assumed by the Supreme Court itself in *Coyne* v. *Union P. R. Co.* (1890) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382, but his precise functions are not stated.

One case which, at first sight, might seem to have been superseded by the later rulings of the Supreme Court, may be upheld as really embodying the principle that the duty of furnishing appliances is nonassignable. *The Julia Fowler* (1892) 49 Fed. 277 (seamen recovered for injuries caused by defective rope furnished by chief officer of ship).

On the other hand, some of the cases decided during this period also took a correct view of the effect of the *Ross Case*, the master being held not liable for the negligence of the following employees:

The engineer . . a detached engine. *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

The foreman of a gang engaged in excavating work. *Anderson* v. *Winston* (1887) 31 Fed. 528.

A "wreck master" having full control of members of wrecking crews, not excluding road masters, when they are

present. *Barquon* v. *Omaha & St. L. R. Co.* (1890) 41 Fed. 697. This case is susceptible of being reconciled with the cases *infra* to the opposite effect, on the supposition of a different arrangement which made the delinquent a real head of a department, when the occasions for his services arose; otherwise the case must be treated as overruled, both generally by the *Baugh Case*, and as to the specific facts by *McGrath* v. *Texas & P. R. Co.* (1894) 9 C. C. A. 133, 23 U. S. App. 86, 60 Fed. 555, cited *infra*.

An engineer in charge of the motive power of an elevator. *Wolcott* v. *Studebaker* (1887) 34 Fed. 8.

The foreman of a master stevedore. *The Wm. F. Babcock* (1887) 31 Fed. 418 (hatch left open).

In 1893 came the Supreme Court's explanation of its real position in *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914, an extract from which has already been given in § 534, *ante*. The court declined to extend the principle of the *Ross Case* so as to cover the engineer of a detached engine, and declared that the doctrine of departmental control, as formulated in that case, merely enabled the servant to recover for the negligence of an employee in complete control of one of the principal departments of a large concern, and did not imply that the master was liable for the acts of all servants controlling a separate piece of work in one of those departments. See § 524, *ante*.

In later decisions, accordingly, the action has been declared not to be maintainable, where the delinquent was one of the following employees:

The foreman of a gang assisting regular section crews as occasion required. *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

A section foreman. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603; *Northern P. R. Co.* v. *Charless* (1896) 162 U. S. 359, 40 L. ed. 999, 16 Sup. Ct. Rep. 818; *Dorrers* v. *Spencer* (1895) 17 U. S. C. A. 215, 25 U. S. App. 411, 70 Fed. 480; *Kansas & A. Valley R. Co.* v. *Waters* (1895) 16 U. S. C. A. 609, 36 U. S. App. 31, 70 Fed. 28; *Wright* v. *Southern R. Co.* (1897) 80 Fed. 260.

A divisional road master. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603.

A foreman in the construction of a bridge, with two superiors over him. *Kelly* v. *Jutte & F. Co.* (1899) 98 Fed. 380.

A wreck master. *McGrath* v. *Texas & P. R. Co.* (1894) 9 U. S. C. A. 133, 23 U. S. App. 86, 60 Fed. 555.

An acting foreman of a wrecking gang. *Flippin* v. *Kimball* (1898) 31 C. C. A. 282, 59 U. S. App. 1, 87 Fed. 258.

A yard master. *Cincinnati, N. O. & T. P. R. Co.* v. *Gray* (1900) 50 L. R. A. 47, 41 U. S. C. A. 535, 101 Fed. 623. Affirming (1899) 97 Fed. 245.

A section foreman. *Lochhaum* v. *Oregon R. & Nav. Co.* (1900) 44 C. C. A. 220, 104 Fed. 852.

A foreman of a drill crew in a railway yard. *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269.

A yard foreman. *Hunt* v. *Hurd* (1900) 39 U. S. C. A. 226, 98 Fed. 683; *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269.

A foreman of a switching crew. *Harley* v. *Louisville & N. R. Co.* (1893) 57 Fed. 144.

A foreman of car repairers. *Grady* v. *Southern R. Co.* (1899) 34 C. C. A. 494, 92 Fed. 493.

The foreman of a gang taking down a building. *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 447, 34 U. S. App. 759, 73 Fed. 970. Reversing on rehearing (1893) 6 C. C. A. 142, 18 U. S. App. 10, 56 Fed. 804.

The temporary boss of a bridge gang, who was himself a laborer. *Texas & P. R. Co.* v. *Rogers* (1893) 6 C. C. A. 403, 13 U. S. App. 547, 57 Fed. 378.

A foreman in the construction of a bridge, with two superiors over him. *Kelly* v. *Jutte & F. Co.* (1899) 98 Fed. 380.

One of several foreman in a railway machine-shop. *Gaynon* v. *Durkee* (1898) 31 C. C. A. 306, 52 U. S. App. 587, 87 Fed. 302.

A foreman in charge of the repairs of machinery in a mill. *Stevens* v. *Chamberlin* (1900) 40 C. C. A. 421, 100 Fed. 378.

A foreman supervising laborers constructing a sewer. *Minneapolis* v. *Lundin* (1893) 7 U. S. C. A. 344, 19 U. S. App. 245, 58 Fed. 525.

The foreman of a gang of stevedores. *The Louisiana* (1896) 21 C. C. A. 60, 41 U. S. App. 324, 74 Fed. 748; *The Kensington* (1898) 91 Fed. 681.

A gang foreman in a mine. *Alaska Treadwell Gold Min. Co.* v. *Whelan*

(1897) 168 U. S. 86, 42 L. ed. 390, 18 Sup. Ct. Rep. 40.

An underground boss in a mine. *What Cheer Coal Co.* v. *Johnson* (1893) 6 C. C. A. 148, 12 U. S. App. 490, 56 Fed. 810.

In one case a railway company was held liable for the negligence of a yard master. *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 200, 70 Fed. 569; but it seems at least an open question whether this is a proper inference from the *Baugh Case*. In *Cincinnati, N. O. & T. P. R. Co.* v. *Gray* (1900) 50 L. R. A. 47, 41 C. C. A. 535, 101 Fed. 623, such functionaries were denied to be vice principals; but the other decision of the court of appeals was not cited.

In *Bowes* v. *Hopkins* (1898) 28 C. C. A. 524, 56 U. S. App. 217, 84 Fed. 767, it was not determined whether the lower court was right in declaring, as it had done, that a road master was a vice principal, and the case was decided in favor of the defendant on the ground that, even if there was negligence, he was not the culpable party.

The cases cited in § 535, note 1, subd. (h), *ante*, following the *Ross Case* as to the point that conductors are vice principals, have been, as there mentioned, virtually, if not actually, overruled by the decision in *New England R. Co.* v. *Conroy* (1899) 175 U. S. 323, 44 L. ed. 181, 20 Sup. Ct. Rep. 85, and need not be again noticed in the present summary. The vice principalship of a conductor was again denied in *Maher* v. *Union P. D. & G. R. Co.* (1901) 45 C. C. A. 301, 106 Fed. 309.

The doctrine that the mere possession of a power of direction does not constitute a superior servant a vice principal was again applied quite recently in a case where a foreman was injured by the negligence of an engineer. *Briegal* v. *Southern P. Co.* (1900) 39 C. C. A. 359, 98 Fed. 958.

A general foreman, employed by contractors, and having charge of the work, of putting in the foundations for a wharf, and of all employees engaged in the work, with power to employ and discharge, was declared not to be a vice principal in *McDonald* v. *Buckley* (1901) 48 C. C. A. 372, 109 Fed. 290. But this seems to be an extreme decision, as the foreman was representing an absent employer in the management of the operatives.

As already stated at the beginning of this subdivision, the earlier cases are conflicting as to the relation of mates of vessels to their subordinates; but since the *Ross Case*, there can no longer be a question that, in the Federal courts, they are regarded as mere servants, under ordinary circumstances. *The Egyptian Monarch* (1888) 36 Fed. 773; *Carlson* v. *United N. Y. Sandy Hook Pilots* (1899) 93 Fed. 408; *The Job T. Wilson* (1897) 84 Fed. 204; *The Miami* (1899) 35 C. C. A. 281, 93 Fed. 218. *Fleming* (1898) 87 Fed. 757; *The Walla Walla* (1891) 46 Fed. 198.

The ruling in *Halverson* v. *Vice* (1876) 3 Sawy. 502, Fed. Cas. No. 5,970, that a ship owner is not liable for a mate's negligence in not examining an appliance, is, however, not law under the modern doctrine as to nonassignable duties. See chapter XXXI., *post*.

The decisions made on the authority of the *Ross Case* as to the status of captains were, as we have seen, conflicting. Whether they should be regarded as vice principals, or not, still remains doubtful even after the *Baugh Case* and the other later utterances of the Supreme Court. Recovery was denied in *The Ravensdale* (1894) 63 Fed. 624; *Olson* v. *Oregon Coal & Nav. Co.* (1899) 96 Fed. 109; *The Job T. Wilson* (1897) 84 Fed. 204.

But in the first case, the delinquent was merely the captain of a lighter, and his position did not involve the discharge of the functions usually associated with the masters of vessels. In all of them, moreover, the negligence was such as might be considered unofficial in the sense in which that term is understood by many Federal courts. See § 543, *ante*. These rulings, therefore, are not entirely conclusive. It can scarcely be denied that there is a certain inconsistency in refusing to treat them as at least departmental vice principals when so far that character is ascribed to various classes of employees whose functions are much less responsible than those of the master of a vessel.

The liability of an employer for the negligence of a general manager is fully recognized by the Federal courts. *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914 (see § 533, *ante*); *Northern P. Coal Co.* v. *Richmond* (1893) 7 C. C. A. 485, 15 U. S. App. 262, 58 Fed. 756; *Northwestern Fuel Co.* v. *Danielson* (1893) 6 C. C. A. 636, 12 U. S. App. 688, 57 Fed. 915; *Lund* v. *Hersey Lumber Co.* (1890) 41 Fed. 262.

The doctrine of the dual capacity of a vice principal has been recognized by the court of appeals. *Reed* v. *Stockmeyer*

(1900) 20 C. C. A. 381, 31 U. S. App. 727, 74 Fed. 186; *Great Northern R. Co. v. McLaughlin* (1895) 17 C. C. A. 330, 14 U. S. App. 189, 70 Fed. 669; *The Miami* (1899) 35 C. C. A. 281, 93 Fed. 218. Affirming (1898) 87 Fed. 757; and by the lower courts. *Quinn v. New Jersey Lighterage Co.* (1885) 23 Blatchf. 209, 23 Fed. 363; *Olson v. Oregon Coal & Nav. Co.* (1890) 96 Fed. 109; *The Ida T. Wilson* (1897) 84 Fed. 201.

In *Northern P. R. Co. v. Peterson* (1892) 2 C. C. A. 157, 4 U. S. App. 574, 51 Fed. 182, a railway company was declared liable for an act of mutual negligence done by a section foreman. The decision was reversed by the Supreme Court (1894) 162 U. S. 340, 40 L. ed. 994, 16 Sup. Ct. Rep. 813, but merely on the ground that the delinquent was not a vice principal. The difference of opinion as to the distinction between official and nonofficial acts was referred to in the argument, but no ruling was made as to this point.

District of Columbia.—An employee appointed by a railway company to supervise and manage a quartz mine, with authority to employ and discharge laborers, is a vice principal. *Wedgle v. Washington & G. R. Co.* (1886) 5 Mackey, 144.

Alabama. Under the common law it was settled that even an employee supervising half a railroad was not a vice principal. *Mobile & M. R. Co. v. Smith* (1877) 59 Ala. 245.

In later cases recovery was denied for the negligence of the conductor. *Georgia P. R. Co. v. Davis* (1890) 92 Ala. 309, 9 So. 252 (intimating that *Mobile & M. R. Co. v. Smith* had gone to the "extreme verge of soundness"); and of the foreman of a gang of men employed in the construction of a telegraph line. *Postal Teleg. Cable Co. v. Hulsey* (1896) 115 Ala. 193, 22 So. 854 (a decision both with reference to the common law and the employers' liability act).

Arizona.—This court has held, following the *Ross Case, supra*, that the conductor of a work train is a vice principal. *McGill v. Southern P. Co.* (1893; Ariz.) 33 Pac. 821; except when a superior is on the train. See subsequent report of same case (1896; Ariz.) 44 Pac. 302.

Arkansas.—In *Jones v. Phillips* (1882) 39 Ark. 17, 43 Am. Rep. 264, it was laid down, *arguendo*, that superiority of rank is not a test of the representative capacity of an employee; and, pursuant to this theory, the conductor of a work train was in 1883, held not to be a vice principal. *St. Louis, I. M. & S. R. Co. v. Lochelford* (1883) 42 Ark. 417.

The question did not come before the Supreme Court again until 1893, in which year several judgments were rendered which modified the earlier rulings on lines indicated by the *Ross Case, supra*, and the decisions based upon it. In *Lloyd v. St. Louis & S. F. R. Co.* (1893) 58 Ark. 66, 22 S. W. 1089, a foreman of bridge builders on a railway was held to be a vice principal. Besides the *Ross Case*, other decisions were relied upon, which were supposed to have established a general rule that, where supervision is necessary to the safety of workmen, it is the master's duty to bestow it, the corollary drawn being that he is responsible for the negligence of any agent to whom the duty is intrusted. This is virtually the superior servant doctrine (chapter XXVIII., D, *ante*), and only the authorities based upon that doctrine support this sweeping statement of the court. The learned judge who wrote the opinion was certainly mistaken in thinking that the rulings which he cites as to general managers (*Quincy Min. Co. v. Kitts* [1879] 42 Mich. 34, 3 N. W. 240) or as to train despatchers (*Hoon v. Michigan C. R. Co.* [1883] 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502), are pertinent precedents for the general rule formulated. The scope of those rulings is much narrower than is here represented (chapter XXVIII., F, *ante*). Nor can even the *Ross Case* itself be properly vouched in aid of the specific ruling of the court. The cases cited in chapter XXVIII., F, *ante*, show very plainly that a foreman of the grade of the delinquent is not a vice principal under any proper conception of the doctrine of departmental control.

A similar criticism applies to *St. Louis, I. M. & S. R. Co. v. Torrey* (1893) 58 Ark. 217, 24 S. W. 241, supposing the rationale of that case to be that a vice principal (there a foreman of bridge construction) was not a representative of the master in respect to a negligent act characteristic of a servant. But possibly the nature of the act is intended to be the sole essential ground of the decision.

In *Fordyce v. Briney* (1893) 58 Ark. 206, 24 S. W. 250, it seems to be assumed that the foreman of a railway roundhouse was a departmental vice principal.

In *Kansas City, Ft. S. & M. R. Co. v. Hammond* (1894) 58 Ark. 324, 24 S. W.

723, it was held, on the authority of the *Bloyd Case* (1893) 58 Ark. 66, 22 S. W. 1089, that the superintendent in charge of a quarry owned by a railway company was a vice principal. This is a legitimate application of the doctrine of departmental control if the superintendent exercised control unrestricted except as regards the general manager of the company; but the report does not show as clearly as might be wished the precise nature and extent of the powers vested in the delinquent.

In *Ft. Smith Oil R. Co.* v. *Storer* (1893) 58 Ark. 168, 24 S. W. 106, an employee in charge of the oil department of a compress company seems to have been viewed as a departmental manager; but the main stress, perhaps, was intended to be laid on the non-delegable quality of the duty violated.

From the foregoing summary it would appear reasonable to conclude that the Arkansas court, while it is theoretically an adherent of the doctrine of departmental control, has applied that doctrine to employees of lower grade than is warrantable under the latest and best considered decisions of the Federal courts, whose views as to the proper limits of this doctrine are of strongly persuasive, if not of controlling, authority in the other jurisdictions where it has been adopted. Under these circumstances the proper classification of the Arkansas cases becomes a matter of some difficulty. But having regard to the actual facts, and the position of the employees held to be vice principals, from the *Bloyd Case* downwards, it seems justifiable, upon the whole, to say that, even if this state cannot be described as one of those which proceed upon the theory that all directing employees represent the master, its decisions are most correctly placed in the same list as those which illustrate that theory. See § 524, *ante*.

The dual capacity of superior servants was recognized in *St. Louis, I. & T. R. Co.* v. *Torrey* (1893) 58 Ark. 217, 24 S. W. 244.

California.—At an early date the common law was superseded in this state by the Code provision (§ 1970—see § 653a, *post*) which relieves employers from liability for the negligence of a coservant "in the same general business." These words have been thought by the supreme court to have been intended to sweep away the distinctions created by the adjudged cases in favor of the servant, on the ground of the negligent servant's superior position. *Congrave* v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175. Such a theory, if rigidly applied, would clearly absolve the master from responsibility for the negligence even of a general manager; and at one period there was a strong tendency to adopt this extreme view. But, on the whole, the statute has been treated as merely declaratory of the common law, the result being that this court, like those of nearly all the other states, holds a master to be liable for the negligence of a general manager. *Ryan* v. *Los Angeles Ice & Cold Storage Co.* (1896) 112 Cal. 244, 32 L. R. A. 524, 44 Pac. 471. See § 527, *ante*, for a review of the decisions.

Whether the doctrine of departmental vice principalship has been adopted in this state is a matter of doubt as the decisions stand. In one case a railway company was required to answer for the negligence of a road master, an official who, in some states, has been held a vice principal (see § 535, *ante*); but the rationale of the decision was that the plaintiff had not been warned of a special danger incident to the place of work. *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 34 Pac. 720. In another case the master was held liable for the negligence of an assistant foreman in a factory. *Foley* v. *California Horseshoe Co.* (1896) 115 Cal. 184, 47 Pac. 42. But the precise effect of this decision is not very clear. See § 534, note 5, *ante*.

The master's liability for the acts of the following supervising employees of lower grades has been declared:

A conductor. *Congrave* v. *Southern P. R. Co.* (1891) 88 Cal. 360, 26 Pac. 175.

A section foreman. *Dares* v. *Southern P. Co.* (1893) 98 Cal. 19, 32 Pac. 708.

A foreman in a mine. *Stephens* v. *Doe* (1887) 73 Cal. 26, 14 Pac. 378 (presumably not in full control; see above).

The foreman supervising the silver-room department of smelting works. *Nixon* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803.

The foreman of a farm. *Voyes* v. *Wood* (1894) 102 Cal. 389, 36 Pac. 766 (presumably not in full control; see above).

A gang foreman of stevedores. *McDonald* v. *Hazletine* (1878) 53 Cal. 35.

The mate of a ship. *Livingston* v. *Kodiak Pkg. Co.* (1894) 103 Cal. 258, 37 Pac. 149.

The superintendent of the construction of a bridge. *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559.

The foreman of construction of a trestle. *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017.

A foreman in a quarry which is managed by a superintendent. *Donovan* v. *Ferris* (1900) 128 Cal. 48, 60 Pac. 519.

The theory that a vice principal should be regarded as a mere servant when he is doing a servant's work has not been discussed in any of the cases. In two cases the essence of the decision in this point of view may be said to be that foremen whose rank is lower than that of general managers are vice principals in regard to the performance of non-delegable duties. *Higgins* v. *Williams* (1896) 114 Cal. 176, 45 Pac. 1041; *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 34 Pac. 720. (See above.) The theory on which two others turn is that certain foremen of this grade were not vice principals to the negligent act which caused the injury. *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559 (answering that all was clear below when a workman was about to throw down a heavy article); *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017 (neglect to provide a scaffold of sufficient strength during the progress of the work). But in the latter of these cases some language is used which shows a decided leaning toward the doctrine of *Crispin* v. *Babbitt*. (See §§ 544, 547, *ante*.)

Colorado.—A master is held to be liable for the negligence of the following employees:

A manager. *Colorado Mill & Elevator Co.* v. *Mitchell* (1899) 26 Colo. 284, 58 Pac. 28; *Lantry* v. *Silverman* (1892) 1 Colo. App. 404, 29 Pac. 180.

A departmental manager,—as, an employee in full charge of the sinking of a mine shaft. *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210.

The superintendent of the construction of a railway. *Denver, S. P. & P. R. Co.* v. *Driscoll* (1889) 12 Colo. 520, 21 Pac. 708.

The general foreman of tracklayers, under a superintendent of construction. *Colorado Midland R. Co.* v. *O'Brien* (1891) 16 Colo. 219, 27 Pac. 701; *Colorado Midland R. Co.* v. *Naylon* (1892) 17 Colo. 501, 30 Pac. 249.

A road master was assumed to be a vice principal in *Burlington & M. River R. Co.* v. *Budin* (1895) 6 Colo. App. 275, 40 Pac. 503.

A conductor was assumed to be a vice principal in *Denver, T. & G. R. Co.* v. *Simpson* (1891) 16 Colo. 55, 26 Pac. 339.

The doctrine that a vice principal is a mere servant when he does manual work is applied in one of the above cases. *Deep Min. & Drainage Co.* v. *Fitzgerald* (1895) 21 Colo. 533, 43 Pac. 210.

Connecticut.—A master is liable for the negligence of a general manager. *Gerrish* v. *New Haven Ice Co.* (1893) 63 Conn. 9, 27 Atl. 235.

The doctrine of departmental vice principalship seems also to be recognized in this state, as the *Ross Case* was relied upon in *Darrigan* v. *New York & N. E. R. Co.* (1884) 52 Conn. 295, 52 Am. Rep. 590 (delinquent was a train despatcher). But the court in its argument wavers between this conception and that of a non-delegable duty intrusted to the despatcher. See § 577 (a), *post*.

The mere fact that the negligent servant was the superior of the injured one will not enable the latter to recover. *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 653; *Sullivan* v. *New York, N. H. & H. R. Co.* (1892) 62 Conn. 209, 25 Atl. 711 (gang foreman not a vice principal).

Delaware.—A general manager has been held to be a vice principal. *Foster* v. *Pusey* (1888) 8 Houst. (Del.) 168, 14 Atl. 545.

The status of superior servants of lower grade has not been discussed.

Florida.—The subject of vice principalship has apparently not been discussed in this state, all the employer's cases of injuries to servants turning upon the question of common employment merely. (See chapter XXVII., *ante*.)

Georgia.—A general manager is deemed to be a vice principal. *Atlanta Cotton Factory Co.* v. *Speer* (1882) 69 Ga. 137, 47 Am. Rep. 750 (assumed); *Krogg* v. *Atlanta & W. P. R. Co.* (1886) 77 Ga. 202; *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga. 761 (1882) 68 Ga. 839.

A departmental manager is a vice principal. *Taylor* v. *Georgia Marble Co.* (1895) 99 Ga. 512, 27 S. E. 768; *Spencer* v. *Brooks* (1895) 97 Ga. 681, 25 S. E. 480 (conductor was delinquent; *Ross Case* [§ 532, *ante*] followed); *Au-*

gusta v. *Owens* (1900) 111 Ga. 464, 36 S. E. 830 (superintendent of quarry owned by a city); *Chesney* v. *Ocean S. S. Co.* (1893) 92 Ga. 726, 19 S. E. 33 (employee of steamship company superintending the loading of a ship); *Woodson* v. *Wm. Johnston & Co.* (1899) 109 Ga. 454, 34 S. E. 587 (same description of employee,—called here a "walking boss"); *Blackman* v. *Thomson-Houston Electric Co.* (1897) 102 Ga. 64, 29 S. E. 120 (general foreman of power house of electric company).

No action can be maintained for the negligence of the following superior servants of the lower grades:

A workman with two or three under him, engaged in erecting a building. *McDonald* v. *Eagle & P. Mfg. Co.* (1881) 67 Ga. 761 (1882) 68 Ga. 839 (refusing to treat such an employee as a general superintendent).

A gang boss on the construction of a building. *Cates* v. *Ilner* (1898) 104 Ga. 679, 30 S. E. 884.

A room foreman in a factory. *McGovern* v. *Columbus Mfg. Co.* (1886) 80 Ga. 227, 5 S. E. 492.

A foreman of a squad of men receiving timbers which are being hoisted by a derrick. *Gunn* v. *Willingham* (1900) 111 Ga. 427, 36 S. E. 804.

An operator of a machine. *Hamby* v. *Union Paper Mills Co.* (1900) 110 Ga. 1, 35 S. E. 297 (helper injured).

In one case a doctrine which was virtually the same as that of superior and subordinate (§§ 521 *et seq.*, *ante*), was enunciated. *Atlanta Cotton Factory Co.* v. *Speer* (1882) 69 Ga. 137, 47 Am. Rep. 750, where the master was held liable for the negligence of the immediate overseer of a girl of fifteen years of age, in allowing her to play with her companions in a room to which the superintendent had forbidden them to be taken. If it was intended by this ruling to formulate a principle of universal applicability, as between master and servant, the case is clearly overruled by the four cases last cited above. But it was recently explained that, when the court laid it down that "the agent who represents the corporation as master over other employees for the time occupies the position of the corporation for such time as to such subordinates," all that was meant was that the corporation was liable where the injured employee was a child who was without access to the general superintendent, and who received her orders solely from the manager of the branch of the business in which she was engaged. *Southern Agricultural Works* v. *Franklin* (1900) 111 Ga. 319, 36 S. E. 693. Obviously, however, such an explanation is anything but satisfactory, for, if the mere fact of an absence of personal communication between a servant and the general manager is to make the intermediate superior a vice principal, there is no logical ground upon which a court can decline to accept the superior servant doctrine without qualification. The scope of the *Speer Case*, therefore, must be even narrower than that suggested. Its true rationale should rather be sought in the theory, exemplified in numerous cases, that the obligations of employers to minors of tender years are more extensive than those to which they are subject with regard to servants of full age. In other words, the general doctrine that a master is not liable for an injury caused by the negligence of a fellow servant does not apply to the case of a child who was injured through the negligence of a superintendent whose orders the child was bound to obey. *Southern Agricultural Works* v. *Franklin* (1900) 111 Ga. 319, 36 S. E. 693, explaining the effect of *Augusta Factory* v. *Barnes* (1884) 72 Ga. 228, 53 Am. Rep. 838, to be that the [illegible] company's agent, in the case of a minor employee, owed the employee a higher degree of care and duty, which required the agents in authority over her to look after her safety while under their charge, and in the performance of her duty. (There the servant was not only a minor, but was also directed to undertake new risks, so that the case for the servant was really stronger than is stated). It was considered that the doctrine of *Scudder* v. *Woodbridge* (1846) 1 Ga. 195, that the defense of common employment was not available where the injured person was a slave, was applicable to minors of tender age. As regards the *Speer Case* itself, a court which rejects the doctrine of superior and subordinate might clearly hold an employer liable upon the specific facts there in evidence, by construing them as indicative of a breach of the non-delegable duty of instructing a young employee as to the dangers of the place of work. (See §§ 578, 579, *post*.) But this theory was not relied upon.

Illinois.—This is one of the states which has unreservedly accepted the doctrine of superior and subordinate (chapter XXVIII., D, *ante*). Employers

have been held responsible for the negligence of the following servants:

A general superintendent. *Kewanee Boiler Co.* v. *Erickson* (1898) 78 Ill. App. 35.

The foreman of a steel company. *Illinois Steel Co.* v. *Schymanowski* (1896) 162 Ill. 447, 44 N. E. 876.

The foreman of a brick company's clay mine. *Chicago Anderson Pressed Brick Co.* v. *Sobkowiak* (1889) 34 Ill. App. 312. Affirmed in (1894) 148 Ill. 573, 36 N. E. 572 (vice principalship not for jury in this instance).

The foreman of a meat packing establishment. *Libby, McN. & L.* v. *Scherman* (1893) 146 Ill. 540, 34 N. E. 801, Affirming (1892) 50 Ill. App. 123.

The foreman of a foundry. *Fitzgerald* v. *Honkomp* (1892) 44 Ill. App. 365.

A yardmaster. *Chicago, R. I. & P. R. Co.* v. *Touhy* (1887) 26 Ill. App. 99. *Norris* v. *Illinois C. R. Co.* (1899) 88 Ill. App. 614.

The foreman of a wrecking crew. *Wabash, St. L. & P. R. Co.* v. *Hawk* (1887) 21 Ill. 259, 12 N. E. 253.

The foreman of a railway lumber yard. *Chicago & A. R. Co.* v. *May* (1884) 108 Ill. 288.

A foreman of track repairers. *Chicago, St. L. & P. R. Co.* v. *Gross* (1890) 133 Ill. 37, 24 N. E. 563, Affirming (1889) 35 Ill. App. 178.

A section foreman. *Chicago & A. R. Co.* v. *Goltz* (1897) 71 Ill. App. 414.

The foreman of an electric railway company at its car shed. *Metropolitan West Side Elev. R. Co.* v. *Skola* (1900) 183 Ill. 454, 56 N. E. 171.

The "starter" of a street railway. *West Chicago Street R. Co.* v. *Dwyer* (1894) 57 Ill. App. 440 (probably a vice principal).

A foreman of one of the gangs engaged on the construction of a bridge. *Pittsburg Bridge Co.* v. *Walker* (1897) 170 Ill. 550, 48 N. E. 915, Affirming (1897) 70 Ill. App. 55.

The foreman of a gang of carpenters. *Leiter* v. *Kinmare* (1896) 68 Ill. App. 558.

The foreman of a gang engaged in hoisting a heavy article. *Fraser* v. *Hood* (1889) 33 Ill. App. 153; *Fraser* v. *Schroeder* (1896) 163 Ill. 459, 45 N. E. 288.

A pit boss in a mine. *Consolidated Coal Co.* v. *Wombacher* (1890) 134 Ill. 57, 24 N. E. 627, Affirming (1889) 31 Ill. App. 288.

The foreman of a gang engaged in excavating. *Chicago & T. R. Co.* v. *Simmons* (1882) 11 Ill. App. 147.

A foreman of car repairers. *St. Louis, I. & T. H. R. Co.* v. *Holman* (1894) 53 Ill. App. 617.

The foreman of a dredge. *Chicago Dredging & Dock Co.* v. *McMahon* (1889) 30 Ill. App. 358.

The feeder of a planing machine (as regards a boy under his orders). *Hunter* v. *Clark* (1884) 15 Ill. App. 470.

An assistant superintendent on a railway. *Chicago, R. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109.

A foreman supervising the construction of a city sewer. *LaSalle* v. *Kostka* (1901) 190 Ill. 130, 60 N. E. 72, Affirming (1900) 92 Ill. App. 91; *Chicago* v. *Cronin* (1900) 91 Ill. App. 466.

The operator of a machine. *Norton Bros.* v. *Nadebok* (1901) 190 Ill. 595, 54 L. R. A. 842, 60 N. E. 843 (as to his "helper").

An assistant mine manager. *Consolidated Coal Co.* v. *Gruber* (1900) 188 Ill. 584, 59 N. E. 254.

A foreman in a sugar refinery. *Groszewski* v. *Chicago Sugar Ref. Co.* (1899) 84 Ill. App. 583.

A superior servant is a vice principal only as to servants under his control. *Lincoln Coal Min. Co.* v. *McNally* (1884) 15 Ill. App. 181.

It might be thought that courts which have imposed liability for the negligence of the employees above enumerated would have had no hesitation in holding railway companies liable for the defaults of conductors. But the precise extent of the responsibility for such employees is, as the cases stand, somewhat obscure. The supreme court has held the conductor of a wrecking train to be a vice principal. *Abend* v. *Terre Haute & I. R. Co.* (1884) 111 Ill. 202, 53 Am. Rep. 616; and the same ruling has been made by the court of appeals with regard to the conductor of a gravel train. *Chicago, B. & Q. R. Co.* v. *Blank* (1887) 24 Ill. App. 438. On the other hand, the court of appeals has declared a railway company not liable for the negligence of the conductor of a construction train. *Chicago & A. R. Co.* v. *McDonald* (1887) 21 Ill. App. 409; and the principle of this case has been approved by the supreme court to the extent that it has declared it to be a question for the jury whether such a conductor is a vice principal as to one of the laborers. *Mobile & O. R. Co.* v. *Massey* (1894) 152 Ill. 144, 38 N. E. 787, Affirming (1893) 52 Ill. App. 556 (omission to

read running orders led to a collision). The more recent decisions of the supreme court seem to regard the company's liability as being dependent simply upon the answer to the question whether, irrespective of the kind of train which he controlled, the act of the conductor was official or not. In one it was held error to instruct a jury on the theory that, as matter of law, a conductor who is also the foreman of a work train represents the company for all purposes. *Mobile & O. R. Co.* v. *Godfrey* (1895) 155 Ill. 78, 39 N. E. 590. In another the court refused to disturb the finding of the court of appeals that the negligence of a conductor of a freight train in permitting it to run past a switch on which he had been directed to await the passage of another train is that of a fellow servant, and not of a vice principal of the fireman, notwithstanding a rule of the company requiring trains to be run under the directions of the conductor, except when his directions conflicted with the rules or involved risk and hazard, in which case the engineer would be held equally responsible. *Meyer* v. *Illinois C. R. Co.* (1899) 177 Ill. 591, 52 N. E. 848, Affirming (1895) 65 Ill. App. 531.

In the case last cited the court seems to have contravened the principle enunciated by itself (§ 543, *ante*), that any act of negligence involving an exercise of authority is official. Most of the decisions, however, merely go to the extent of treating as a bar to the action the fact that the negligent act was done by the delinquent employee while participating in the work of his subordinates. *Hall* v. *Beckstein* (1898) 173 Ill. 187, 50 N. E. 711 (1897) 69 Ill. App. 616; *Illinois C. R. Co.* v. *Swisher* (1895) 61 Ill. App. 611; *Clay* v. *Chicago, B. & Q. R. Co.* (1894) 56 Ill. App. 235; *Chicago & W. I. R. Co.* v. *Mossig* (1893) 50 Ill. App. 663; *Chicago Architectural Iron Works* v. *Nagel* (1898) 80 Ill. App. 492; *Chicago* v. *Cronin* (1900) 91 Ill. App. 466.

For explanation of the cases in which the servant was allowed to recover under such circumstances, see § 545, note 1, *ante*.

Indiana.—In this state the doctrine that a master is not rendered liable merely by reason of the superior rank of the delinquent was carried so far at one time that the master mechanic of a railway was held not to be a vice principal. *Columbus & I. C. R. Co.* v. *Arnold* (1869) 31 Ind. 174, 99 Am. Dec. 615. This decision, which was based upon the opinion of the House of Lords in *Wilson* v. *Merry* (§ 527, *ante*), was afterwards declared, somewhat guardedly, to be "an extreme case, perhaps carrying the doctrine beyond its proper limits." *Indiana Car. Co.* v. *Parker* (1885) 100 Ind. 181. In a still later decision it was merely described as "an extreme case," and declared to have been greatly modified by later rulings. *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 28 N. E. 183, 611. It has never been expressly overruled, therefore, but the decisions cited below show that the general principle it embodies is no longer law in Indiana. Upon the specific facts it is discredited by *Taylor* v. *Evansville & T. H. R. Co.* (1891) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876. See *infra*.

A general manager was treated as a vice principal in *Mitchell* v. *Robinson* (1881) 80 Ind. 281, 41 Am. Rep. 812.

A possible illustration of the doctrine of departmental control is furnished by *Drinkout* v. *Eagle Mach. Works* (1883) 90 Ind. 423, where the delinquent was the foreman of the foundry department in machine works. But liability was really predicated rather from the nature of the negligent act. The same remark seems applicable to *Louisville, N. A. & C. R. Co.* v. *Graham* (1899) 124 Ind. 89, 24 N. E. 668, where the foreman of the construction of a tunnel allowed the place of work to become unsafe. Less equivocal recognitions of the doctrine are the following decisions, imposing liability for the negligence of the following employees:

A master mechanic. *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876.

A foreman in full control of the work of clearing away *debris* which is endangering a railway bridge. *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 28 N. E. 183, 611.

A division superintendent of a railway. *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988.

A street commissioner superintending the construction of a bridge. *Lebanon* v. *McCoy* (1895) 12 Ind. App. 500, 40 N. E. 700.

The inspector of municipal waterworks, supervising the construction of a trench. *Ft. Wayne* v. *Christie* (1901) 156 Ind. 172, 59 N. E. 385.

That mere superiority of rank will not constitute a servant a vice principal, the rule being the same, whether

the injured servant is an adult or a minor, is well settled. *Pittsburgh, C. & St. L. R. Co.* v. *Adams* (1886) 105 Ind. 151, 5 N. E. 187. Hence, all these employees below the grade of departmental managers are treated as mere servants:

A conductor. *Yeager* v. *St. Louis, A. & T. H. R. Co.* (1864) 22 Ind. 26, 85 Am. Dec. 409; *Louisville, N. A. & C. R. Co.* v. *Southwick* (1896) 16 Ind. App. 486, 44 N. E. 263.

A section foreman. *Justice* v. *Pennsylvania Co.* (1891) 130 Ind. 321, 30 N. E. 303.

A foreman controlling a gang in one of the tunnels of a cement company. *Ross* v. *Union Cement & Lime Co.* (1906; Ind.) 58 N. E. 500.

The foreman of the woodshop in a car factory. *Indiana Car Co.* v. *Parker* (1884) 100 Ind. 181.

The superintendent of machinery in a factory. *Boyce* v. *Fitzpatrick* (1884) 80 Ind. 526.

The foreman of a gang lifting machinery. *Robertson* v. *Chicago & T. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655.

An employee controlling an engine cleaner while he is instructing him in his duties. *Spencer* v. *Ohio & M. R. Co.* (1892) 130 Ind. 181, 29 N. E. 915.

A "bank boss" in a mine. *Brazil & C. Coal Co.* v. *Cain* (1884) 98 Ind. 282.

The foreman of a gang removing a telegraph line. *American Teleph. & Telg. Co.* v. *Bower* (1898) 20 Ind. App. 32, 49 N. E. 182.

Negligence committed in doing manual work which has no immediate connection with the characteristic functions of a vice principal, viewed as a supervising and directing agent, is deemed to be nonofficial. *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 976; *Drinkout* v. *Eagle Mach. Works* (1883) 90 Ind. 423; *Indianapolis & St. L. R. Co.* v. *Johnson* (1885) 102 Ind. 352, 26 N. E. 200; *Salem Stone & Lime Co.* v. *Chastain* (1894) 9 Ind. App. 453, 36 N. E. 910 (complaint demurrable which alleges that the foreman of a stone company injured a subordinate by prying off a large piece of rock). In the first case the employer was held liable for the special reasons noted in § 545, note 4, *ante*, where an extract from the opinion is given. In the last three cases, it is possible that the delinquent was not regarded as a vice principal by virtue of his rank, and that the rationale of the decision was merely the nature of the act.

Iowa.—The superior servant doctrine was categorically rejected by a decision which declared a petition to be demurrable which seeks recovery on the theory that the delinquent servant had "charge and control" of the plaintiff. *Peterson* v. *Whitebreast Coal & Min. Co.* (1879) 50 Iowa, 673, 32 Am. Rep. 143 (approved in *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* [1896] 100 Iowa, 441, 69 N. W. 743). The effect of this decision was subsequently stated to be that a mere foreman, as the word is generally understood,—that is, a laborer with power to superintend the labor of those working with him,—is a coemployee, so far as his own labor is concerned. *Baldwin* v. *St. Louis, K. & N. R. Co.* (1885) 68 Iowa, 37, 25 N. W. 918. Hence, liability has been denied where the delinquents were the following employees:

A foreman of track repairers. *Haben* v. *Burlington & M. River R. Co.* (1866) 20 Iowa, 562.

A machinist who occasionally called in other employees of a railway company to his assistance. *Hathaway* v. *Illinois C. R. Co.* (1894) 92 Iowa, 337, 60 N. W. 651.

A foreman superintending the construction of a house for a contractor. *Bean* v. *Null* (1884) 65 Iowa, 407, 21 N. W. 700 (presumably not in complete control; see cases cited below as to general and departmental managers).

A foreman of car repairers. *Foley* v. *Chicago, R. I. & P. R. Co.* (1884) 64 Iowa, 644, 21 N. W. 124.

An employee who, in the absence of the superintendent of a mine, gave the others occasional directions as to their work, and whose regular functions were to take charge of the tools, and keep the time of the men. *Wilson* v. *Duncraft Red-Stone Quarry Co.* (1889) 77 Iowa, 429, 42 N. W. 360.

A master is held liable for the negligence of a general manager. *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743; and of a departmental manager. *Newbury* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743 (mill manager of lumber company); *McCarthy* v. *Chicago, R. I. & P. R. Co.* (1891) 83 Iowa, 485, 50 N. W. 21 (plaintiff entered into dangerous place by foreman superintending the construction of a railway bridge); *Baldwin* v.

St. Louis, K. & N. W. R. Co. (1888) 75 Iowa, 297, 39 N. W. 507 (employee controlling the lumber yard of a railway company); *Hathaway* v. *Des Moines* (1896) 97 Iowa, 333, 66 N. W. 188 (in entire charge of municipal street-work).

In this state the theory of dual capacity is, perhaps, not finally settled. The court has very distinctly recognized the applicability of both the alternative tests of vice principalship which are supplied by the official position of the delinquent, and the nature of the negligent act. See *Newberg* v. *Getchel & M. Lumber & Mfg. Co.* (1896) 100 Iowa, 441, 69 N. W. 743, holding that a master is liable for negligence in giving orders when the employee is a vice principal, and then only. But in the only case which touches on the doctrine of dual capacity, it was left undetermined whether a foreman of carpenters employed by a firm of contractors was a vice principal by virtue of his official position. *Barnicle* v. *Connor* (1900) 110 Iowa, 238, 81 N. W. 452, and the position taken was that there could not in any event be a recovery, as the negligent act was done while he was participating in manual labor. But the language used by the court can scarcely bear any other construction except that the doctrine was accepted.

Kansas.—In one of the earlier cases a petition was held demurrable on the ground that it merely averred that the plaintiff, a brakeman, was injured by the negligence of his conductor, and did not allege that the company was negligent in employing such conductor. *Dow* v. *Kansas P. R. Co.* (1871) 8 Kan. 642. The court was inclined to except from the operation of the doctrine of coservice only the higher officers who had authority to hire and discharge the other employees.

Other cases involving delinquencies of superior servants were made to turn upon the non-delegability of certain duties, irrespective of rank. *Kansas P. R. Co.* v. *Salmon* (1875) 14 Kan. 512; *Atchison, T. & S. F. R. Co.* v. *Moore* (1883) 29 Kan. 632; *St. Louis & S. F. R. Co.* v. *Weaver* (1886) 35 Kan. 412, 11 Pac. 408. But in the last-named case the *Ross Case* was cited by the court with approval, *arguendo*, and it was laid down that an employer was liable for the negligence of "one having the general management or control of some portion of the master's business."

It has also been held that something more than the mere possession of a power of control is required to warrant the inference that the delinquent was a vice principal. *Kansas P. R. Co.* v. *Little* (1877) 19 Kan. 267, where it was declared that the superintendent in full charge of the construction of a culvert is in a different position from a mere foreman working with the other employees under a common principal. Here, however, the default was in respect to defective machinery, and the decision in the servant's favor might have been put on that ground.

Some years later, however, a doctrine not distinguishable from that of superior and subordinate was applied in *Hannibal & St. J. R. Co.* v. *Fox* (1884) 31 Kan. 586, 3 Pac. 320, where an action was sustained for the negligence of a foreman of car repairers in not protecting a subordinate from moving cars.

In *Missouri P. R. Co.* v. *Peregoy* (1887) 36 Kan. 424, 14 Pac. 7, where a foreman of a railway machine shop was held to be a vice principal, the court seem to have had in mind a doctrine of no wider scope than the *Little Case* (1877) 19 Kan. 267, as it approved the following charge: "If Wirth was vested with full power to command the services of the deceased, and directed what he should do and how he should do it, and the whole management thereof and the direction of the deceased were vested in said Wirth, the defendant and superior servants reserving no discretion in themselves as to the direction of the work, then the act of Wirth is the act of the defendant, and not of a fellow servant."

The default was in respect to the quality of the machinery furnished in a case where a foreman of a gang hoisting stone with a derrick was held to be a vice principal. *Union P. R. Co.* v. *Fray* (1890) 43 Kan. 750, 23 Pac. 1039. This ruling is, therefore, of a somewhat ambiguous import in the present connection. The same remark is applicable to *Rouse* v. *Downs* (1897) 5 Kan. App. 549, 47 Pac. 982 (roadmaster constructed switch improperly).

But under the most recent decisions in which employers were held liable, it is no longer doubtful that the superior servant doctrine is a part of the law of this state. It has been laid down that whoever has full and unrestricted authority to direct and command is a vice principal. *Walker* v. *Gillett* (1898) 59 Kan. 214, 52 Pac. 442 (conductor), following the *Ross Case*, and refusing to accept the restrictions subsequently for-

mulated in the *Baugh Case.* (§§ 532, 534, *ante.*) Upon the authority of this case, employers have been held liable for the negligence of the following employees:

A foreman of carpenters in a car factory. *Kansas City Car & Foundry Co.* v. *Secrist* (1898) 39 Knn. 778, Appx.

A foreman in smelting works, who has absolute control of ton roasters and the workmen engaged thereon, and assigns them, at his discretion, to whatever duties he may think fit. *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 316, 55 Pac. 673.

A "head miller" in general charge of a mill. *Mirick* v. *Morton* (1901) 62 Kan. 870, 64 Pac. 609.

This is probably one of the states in which an employer is not absolved on the ground that the negligence of the vice principal was committed in doing work usually done by a servant. See *Consolidated Kansas City Smelting & Ref. Co.* v. *Peterson* (1899) 8 Kan. App. 316, 55 Pac. 673.

Kentucky.—The net result of the Kentucky cases is the establishment of three rules of a highly artificial character, which have no counterpart in any other jurisdiction.

(a) *Rule as to servants working in different departments.*— Where the negligent and injured servants are in different departments, the master is responsible for the act of the former. Here the difference of department is sufficient of itself to exclude the defense of common employment, and neither the degree of negligence nor the superiority of rank enter, as material factors, into the case. *Louisville & N. R. Co.* v. *Fulbern* (1869) 6 Bush, 574, 99 Am. Dec. 690 (engineer killed by negligence of section foreman).

In one case liability was imposed for the reason that the servants were "in different spheres, and neither could, or was required to know, whether the other was properly doing his duty." *Illinois C. R. Co.* v. *Hilliard* (1896) 99 Ky. 684, 37 S. W. 75.

An instruction that there must be gross negligence on the part of the servants in charge of a passenger train in order to find for plaintiff, an engineer and fellow servant injured by reason of such negligence, was more favorable to defendant than the law authorized, as ordinary negligence was sufficient to make defendant liable. *Louisville & N. R. Co.* v. *Hiltner* (1900) 21 Ky. L. Rep. 1826, 56 S. W. 651; judgment reversed on rehearing (1900) 22 Ky. L. Rep. 1141, 60 S. W. 2, but not on this point.

In another case the court, in holding that an engineer on one train was not a coservant of the conductor of another train, by whose negligence he was killed, said: "Appellee's intestate undertook to serve the company on the train of Anderson, or to act as engineer upon such trains as might be required by the company. He was placed where he had no power to control, advise with, or resist the acts of Armstrong, and was unable to know what orders had been given the latter as to the movements of his train, or the skill and prudence with which these orders were obeyed; he had no voice in his employment, or the right to determine his skill and judgment in its exercise. Is it not more reasonable to make the company, whose duty it is to employ careful and skilled agents for the conduct of its business, and when it alone controls such agents, liable for this neglect of duty, than to adjudge that a mere subordinate, who has no means of knowing the qualifications of the agent for such a position, or voice in his selection as such, and without the means or power to resist or control his action, is without remedy, except as against the party committing the negligent act? If Cavens had been on the same train with Armstrong and in a condition, by reason of his equality with him as an employee, to watch over and provide against his negligence, the reasons then for refusing to make the company liable would apply; but when on different trains, and with no opportunity to exercise this watchful care over each other, the reason for releasing the company from responsibility ceases to exist, and in such cases those controlling and directing the movements of one train with reference to those upon another and different train must be regarded as the agents of the company." *Louisville, C. & L. R. Co.* v. *Carens* (1873) 9 Bush, 566.

The engineers of two different trains were held not to be coservants in *Cincinnati, N. O. & T. P. R. Co.* v. *Roberts* (1901) 23 Ky. L. Rep. 264, 62 S. W. 901.

A brakeman may recover of the master for the ordinary neglect of the servants charged with the duty of keeping the roadbed in repair. *Chesapeake & N. R. Co.* v. *Venable* (1901) 23 Ky. L. Rep. 427, 63 S. W. 35.

In a case where an engineer who saw

a fence builder on the track did not apply brakes until the train was within about 100 yards of him, the question of negligence was held to be for the jury. *Louisville & N. R. Co.* v. *Simpson* (1900) 23 Ky. L. Rep. 1075, 64 S. W. 750.

Where a conductor of a train on one division of a railroad was injured by the gross negligence of the servants in charge of a train on another division of the same road at a point where the two divisions crossed, the company was held liable. *Louisville & N. R. Co.* v. *Edmonds* (1901) 23 Ky. L. Rep. 1049, 64 S. W. 727.

(b) *Rule as to servants of coequal grade in the same department.*—Even though the negligence of the delinquent servant may have been gross, the action is barred by the defense of common employment, where he is in the same department, or the same "field of labor" as the injured servant, and not of a higher grade than the latter.

In most of the cases where this rule was applied, the negligent and injured servants were on an equality. *Ft. Hill Stone Co.* v. *Orm* (1886) 84 Ky. 183 (workman at foot of incline in quarry killed by wilful negligence of workman at the top in allowing loaded car to run down); *Casey* v. *Louisville & N. R. Co.* (1886) 84 Ky. 79 (here the negligent servant and the plaintiff's intestate were laborers at work on a railway, transporting earth on a small truck to the cars, and by turns acting as brakeman, and the death was caused by the wilful neglect of the former while he was handling the brakes); *Volz* v. *Chesapeake & O. R. Co.* (1893) 95 Ky. 188, 24 S. W. 119 (member of gang of pile drivers, injured by gross neglect of a fellow workman in prematurely letting fall the hammer); *Cincinnati, N. O. & T. P. R. Co.* v. *Roberts* (1901) 23 Ky. L. Rep. 264, 62 S. W. 901 (engineer on one of two engines attached to the same train was injured by the negligence of the engineer on the other); *Illinois C. R. Co.* v. *Stewart* (1901) 23 Ky. L. Rep. 637 63 S. W. 596 (two switchmen held to be coservants); *Potter* v. *Louisville & N. R. Co.* (1899) 20 Ky. L. Rep. 1842, 50 S. W. 1 (two cars were started down an incline, and the men on the second one allowed it to run so fast that it collided with the first); *Southern R. Co.* v. *Clifford* (1901) 23 Ky. L. Rep. 111, 62 S. W. 514 (brakeman, and a fireman in the discharge of his ordinary duty of receiving signals from the brakeman and repeating them to the engineer, held to be coequal fellow servants).

But the result of the rule is, of course, the same where the injured servant was the higher in rank. *Edmonson* v. *Kentucky C. R. Co.* (1899) 20 Ky. L. Rep. 12, 6, 49 S. W. 200, Reversing on rehearing (1898) 46 S. W. 679; former appeal (1894) 16 Ky. L. Rep. 459, 28 S. W. 789 (conductor held not to be entitled to recover for negligence of engineer); *Linck* v. *Louisville* [illegible] *R. Co.* (1899) 107 Ky. 370, 54 S. W. 184 (railroad company not liable for the death of a train conductor caused by the negligence of the engineer, though the conductor was at the time acting as brakeman).

When a number of persons contract to perform service for another, the employees not being superior or subordinate, the one to the other, in its performance, and one receives an injury by the neglect of the other in the discharge of his duty, they are regarded as substantially the agents of each other, and no recovery can be had against the employer. *Louisville, C. & L. R. Co.* v. *Carens* (1873) 9 Bush. 566.

(c) *Rule as to superior and subordinate servants in the same department.*—A master is liable for injuries caused by the gross or wilful negligence, but not by the ordinary negligence, of a superior coemployee of the injured servant in the same department. *Louisville & N. R. Co.* v. *Collins* (1865) 2 Duv. 114, 87 Am. Dec. 486 (laborer usually employed in loading cars injured by gross negligence of engineer while he was assisting the latter to right an overturned locomotive); *Louisville & N. R. Co.* v. *Robinson* (1868) 4 Bush. 507 (brakeman on freight train run over in a yard through the gross negligence of a switchman and the engineer of a passenger train); *Louisville & N. R. Co.* v. *Brooks* (1885) 83 Ky. 129 (brakeman killed by wilful negligence of engineer); *Louisville & N. R. Co.* v. *Moore* (1886) 83 Ky. 675 (brakeman injured by wilful neglect of conductor); *Louisville & N. R. Co.* v. *Sheets* (1890) 11 Ky. L. Rep. 781, 13 S. W. 248 (yard switchman held not to be a fellow servant of an engineer of an ordinary train); *Louisville & N. R. Co.* v. *Rains* (1893) 15 Ky. L. Rep. 423, 23 S. W. 505 (engineer of a train following another injured by the gross negligence of conductor of the latter in failing to set proper danger signals); *Chesapeake, O. & S. W. R. Co.* v. *Hoskins* (1897) 19 Ky. L. Rep. 1359, 43 S. W. 484 (similar facts); *Louisville & N. R. Co.*

v. *Sanders* (1898) 19 Ky. L. Rep. 1941, 44 S. W. 644 (laborer on trestle killed by gross negligence of his foreman or some other superior coemployee); *Louisville & N. R. Co.* v. *Adams* (1899) 106 Ky. 859, 51 S. W. 577 (plaintiff allowed to recover for the death of his intestate, a brakeman, caused by the gross negligence of the engineer); *Greer* v. *Louisville & N. R. Co.* (1893) 94 Ky. 169, 21 S. W. 649; *Louisville & N. R. Co.* v. *Slack* (1899) 20 Ky. L. Rep. 1200, 49 S. W. 3 (held to be gross negligence on the part of an engineer to start a train suddenly and without a signal, immediately after a brakeman has made a coupling, and before he has had time to withdraw); *Richards* v. *Louisville & N. R. Co.* (1899) 20 Ky. L. Rep. 1478, 49 S. W. 419 (moving train ahead without waiting for signals; brakeman run over); *Cincinnati, N. O. & T. P. R. Co.* v. *Palmer* (1895) 98 Ky. 382, 33 S. W. 199 (porter had his hand crushed through the negligence of the engineer in running his engine too rapidly against a car to be coupled); *Louisville & N. R. Co.* v. *Sarrant* (1894) 96 Ky. 197, 27 S. W. 999 (error not to instruct jury as to this point); *Louisville & N. R. Co.* v. *Brantley* (1894) 96 Ky. 297, 28 S. W. 477 (where the precise relations of the delinquent and injured servants are not stated); *Eastern Kentucky R. Co.* v. *Powell* (1895) 17 Ky. L. Rep. 1051, 33 S. W. 629 (instruction making company liable for ordinary negligence only was disapproved); *Illinois C. R. Co.* v. *Coleman* (1900) 22 Ky. L. Rep. 878, 59 S. W. 13 (same point); *Louisville & N. R. Co.* v. *Hawkins* (1899) 21 Ky. L. Rep. 354, 51 S. W. 426 (negligent employee was foreman of a gravel train); *Louisville & N. R. Co.* v. *Bass* (1897) 19 Ky. L. Rep. 1474, 43 S. W. 463 (negligent employee was a section foreman); *Illinois C. R. Co.* v. *Josey* (1901) 22 Ky. L. Rep. 1795, 61 S. W. 703 (section foreman applied brake of hand car without giving notice of his intention); *Louisville & N. R. Co.* v. *Hurst* (1892) 14 Ky. L. Rep. 632, 20 S. W. 817 (negligent employee was foreman of a switching crew); *Lawrence* v. *Hagemeyer & Co.* (1892) 93 Ky. 591, 20 S. W. 704 (negligent employee was foreman of a sawmill).

In a recent case an engineer of a train which had accidentally broken into two sections was considered to be, while he was backing the engine to find the other part of the train, a superior servant in charge of the engine, and therefore a vice principal as respects a brakeman on the engine. *Southern R. Co.* v. *Barr* (1900) 21 Ky. L. Rep. 1615, 55 S. W. 900.

The test of common employment, when viewed under this particular aspect, is that the injured servant shall be "in a condition, by reason of his equality with him as an employee, to watch over and provide against his negligence." *Edmonson* v. *Kentucky C. R. Co.* (1899) 105 Ky. 479, 49 S. W. 200, 448. Compare § 522 (c), note 6, *ante*.

In this connection it seems to be a conclusive presumption that the subordinate is not in a common employment with his superior, for the reason that his subordinate position implies that he has no opportunity to exercise a watchful care "over" the superior, that he has no knowledge or means of knowledge of such superior's qualifications, nor any authority to resist him or control his actions. *Louisville & N. R. Co.* v. *Collins* (1865) 2 Duv. 114, 87 Am. Dec. 486; *Louisville, C. & L. R. Co.* v. *Cavens* (1873) 9 Bush, 559.

In some of the above-cited cases, it will be observed, the servants were upon different trains, and, as the master's liability is predicated solely upon the degree of negligence and the superiority of rank, it follows that such servants are assumed to be in the same department.

It is held that the absence of slight care by superiors in the management of a railway train is gross negligence, and will render the company liable for consequent injuries sustained by a brakeman, without his fault. *Greer* v. *Louisville & N. R. Co.* (1893) 94 Ky. 169, 21 S. W. 649. Thus, evidence that when an engine was within a yard of a coach, to which plaintiff was preparing to couple it, the engineer put on steam and pushed it back so fast that plaintiff's hand was caught in trying to make the coupling, and that plaintiff did not have time to drop the link and pull out his hand, requires the submission to the jury of the question of gross negligence of the engineer. *Cincinnati, N. O. & T. P. R. Co.* v. *Palmer* (1895) 98 Ky. 382, 33 S. W. 199. So, permitting the movement of a train after an employee has gone between the cars by the conductor's direction, for the purpose of coupling them, is gross negligence on the part of the conductor, which will render the company liable for injuries thereby inflicted. *Louisville & N. R. Co.* v. *Mitchell* (1888) 87 Ky. 327, 8 S. W.

706. So, it is gross negligence for an engineer to attempt to run his engine upon a switch without a signal from plaintiff, the switchman, to move forward; so that the railroad company is liable for an injury to plaintiff's foot resulting therefrom. *Illinois C. R. Co.* v. *Stewart* (1901) 23 Ky. L. Rep. 637, 63 S. W. 596. So, a cause of action for injuries to a brakeman is stated by a petition alleging that the plaintiff, in anticipation of the throwing of a switch, at the suggestion of the fireman who had charge of the engine, climbed upon the pilot, and rode down to the switch; that suddenly, and without warning, and negligently, the air brakes were applied, causing a sudden check of the train, and throwing him from the engine; and that the air brakes were then suddenly released, and the engine run over and injured his foot and leg, necessitating their amputation. *Louisville & N. R. Co.* v. *Foard* (1898) 104 Ky. 456, 47 S. W. 342. So, where a freight train parts, it is gross negligence to back the engine rapidly at night in search of the lost cars. *Southern R. Co.* v *Barr* (1900) 21 Ky. L. Rep. 1615, 55 S. W. 900 (collision by which brakeman was killed). So, where a brakeman who had been run over had fainted from the loss of blood resulting from his injury, and fallen from the running board of the engine upon which he had mounted after he was injured, the engineer, not being able to see him, was not negligent in running the engine upon him; but, when he was under the engine, and it had stopped, the engineer was guilty of gross negligence in backing the engine without knowing where he was, and without a signal from another switchman to do so, especially after the other switchman urged him to stop, and told him plaintiff was under the engine. *Illinois C. R. Co.* v. *Stewart* (1901) 23 Ky. L. Rep. 637, 63 S. W. 596. So, where a gravel train was being operated with the caboose instead of the engine in front, and in making a running switch, in violation of the rules of the company, the caboose was cut off, causing plaintiff, a laborer on the train, to be thrown from the train and injured as he was attempting, without warning of what was being done, to pass to the caboose from the next car, the question whether there was gross negligence was properly submitted to the jury. *Illinois C. R. Co.* v. *Walters* (1900) 22 Ky. L. Rep. 137, 56 S. W. 706. So, where the servants in charge of a train saw a bridge watchman on his tricycle on a trestle, approaching the bridge, when the train was three quarters of a mile away, it was their duty to use proper care to avoid running him down, especially after they saw a signal from him, and saw that he was trying to reach a cage in front of him, provided for the safety both of himself and his tricycle. *Louisville & N. R. Co.* v. *Seibert* (1900) 21 Ky. L. Rep. 1503, 55 S. W. 892.

But the general rule thus laid down and exemplified seems rather difficult to reconcile with the ruling that gross negligence is not shown by evidence which merely shows that an engineer might, if he had looked, have observed a brakeman lying in an unconscious state near the track. *Robinson* v. *Louisville & N. R. Co.* (1894) 15 Ky. L. Rep. 626, 24 S. W. 625.

The foreman of a crew of laborers engaged in shoving a loaded push car over a trestle at a fast gait is not guilty of such gross negligence as will authorize a recovery from the railroad company for an injury to one of the laborers from having his foot run over by the car, by ordering the laborers to shove the car faster,—especially where it was necessary to hurry the car over the trestle that an expected train might pass safely. *Louisville & N. R. Co.* v *Bass* (1897) 19 Ky. L. Rep. 1474, 43 S. W. 663.

The petition of one who was injured by the fall of a timber insecurely placed by the boss on a car near which he was working, occasioned by the movement of the train, directed by the boss, after telling the workmen to continue the work, sufficiently states the cause of action by charging gross negligence in running and operating the train. *Louisville & N. R. Co.* v. *Hawkins* (1899) 21 Ky. L. Rep. 354, 51 S. W. 426.

The mere fact that it was possible for trainmen to see a part of the body of a servant, while the latter was passing between cars, where he was injured, was not sufficient to authorize the submission to the jury of the question whether they did see him, when there was no reason to expect his presence there. *Louisville & N. R. Co.* v. *Hocker* (1901) 23 Ky. L. Rep. 982, 64 S. W. 638.

In one case it was held that, if the plaintiff seeks to avail himself of the damage act, providing for a right of action in case the injured person should die, he must prove that the negligence was wilful; and that, unless death results, the common law rule governs

Cincinnati, N. O. & T. P. R. Co. v. *Palmer* (1895) 98 Ky. 382, 33 S. W. 199 (in this case separate instructions were given as to gross and wilful negligence).

In another case it was laid down that the rule that a servant cannot recover from the master for an injury caused by the neglect of his fellow servant applies as well to an action under the statute for wilful neglect as to a common-law action for neglect. *Edmonson* v. *Kentucky C. R. Co.* (1899) 105 Ky. 479, 49 S. W. 20, 448, Reversing on Rehearing (1898) 46 S. W. 679. The statute has been construed as but enlarging the common-law rule, or providing a remedy unknown to the common law; while, "at the same time, the doctrine of the text-books as to the liability of the employer for the acts of those in his employment, except as to the degrees of negligence, must prevail." *Casey* v. *Louisville & N. R. Co.* (1880) 84 Ky. 79. The doctrine of common employment under this statute is not altered by the Kentucky Constitution of 1891, § 241 providing generally that "whenever the death of a person shall result from an injury inflicted by negligence or wrongful act, then, in every such case, damages may be recovered for such death from the corporations and persons so causing the same." *Edmonson* v. *Kentucky C. R. Co.* (1899) 105 Ky. 479, 49 S. W. 200, 448. That there was no such alteration was assumed in *Volz* v. *Chesapeake & O. R. Co.* (1893) 95 Ky. 188, 24 S. W. 119, though the point was not directly raised.

The doctrine of dual capacity was rejected in *Illinois C. R. Co.* v. *Coleman* (1900) 22 Ky. L. Rep. 878, 59 S. W. 13.

Louisiana.—A general manager is a vice principal. *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 400.

The position of superior employees of lower grades is determined by the doctrine of the *Ross Case*, as it was understood by some courts before it was explained by the *Baugh Case* (§ 534, *ante*),—that is to say, as being very nearly, if not quite, equivalent to the doctrine of superior and subordinate. Liability has been imposed for the negligence of the following employees:

A conductor. *Dobson* v. *New Orleans & W. R. Co.* (1900) 52 La. Ann. 1127, 20 So. 670; *Van Amburg* v. *Vicksburg, S. & P. R. Co.* (1885) 37 La. Ann. 650, 55 Am. Rep. 517; *Wilson* v. *Louisiana & N. W. R. Co.* (1899) 51 La. Ann. 1133, 25 So. 961.

An employee supervising the work of taking down a building. *Paren* v. *Sellers* (1887) 39 La. Ann. 1011, 3 So. 362.

A yard master. *Metivier* v. *Texas & P. R. Co.* (1898) 50 La. Ann. 466, 23 So. 461.

A foreman in full control of the work of constructing a line of telegraph. *Lowers* v. *Cumberland Teleph. & Teleg. Co.* (1900) 52 La. Ann. 2153, 28 So. 307.

A foreman of car repairers. *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342.

A foreman superintending the loading of a ship was treated as a vice principal in *Anderson* v. *Elder* (1901) 105 La. 672, 30 So. 120.

Maine.—A general manager is a vice principal. *Mayhew* v. *Sullivan Min. Co.* (1884) 76 Me. 100; *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 119, 37 Atl. 874; *Lasky* v. *Connahan P. R. Co.* (1891) 83 Me. 461, 22 Atl. 367; *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143 (*arguendo*).

The doctrine of departmental control was recognized in *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143.

The principle that mere superiority of rank does not constitute a vice principal has been applied in the case of the following employees:

A road master. *Lawler* v. *Androscoggin R. Co.* (1873) 62 Me. 463, 16 Am. Rep. 492.

The conductor of a construction train. *Cassidy* v. *Maine C. R. Co.* (1884) 76 Me. 488.

The foreman of a locomotive shop. *Beaulieu* v. *Portland Co.* (1860) 48 Me. 291.

The foreman in charge of the "grinder" crew in a mill. *Cowan* v. *Umbagog Pulp Co.* (1897) 91 Me. 26, 39 Atl. 340.

A foreman superintending the digging of a sewer or trench. *Conley* v. *Portland* (1886) 78 Me. 217, 3 Atl. 658; *Dube* v. *Lewiston* (1891) 83 Me. 211, 22 Atl. 112.

The foreman of a gang repairing a dam for a lumber company. *Doughty* v. *Penobscot Log Driving Co.* (1884) 76 Me. 143.

Maryland.—It seems doubtful whether this court has ever really recognized the doctrine that even general managers are vice principals. See § 530, *ante*, for a review of the cases. But it is at least certain that the following employees, who are elsewhere held to be departmental vice principals in some, if not most, jurisdictions, are regarded as mere servants:

A division superintendent in full control of his section of a railway. *North Pk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 711, 29 Atl. 994.

The master mechanic of a railway company. *Shoock* v. *Northern C. R. Co.* (1856) 5 Md. 462.

A captain of a tug boat belonging to an elevator company. *Baltimore Elevator Co.* v. *Veal* (1880) 53 Md. 438, 5 Atl. 338.

The foreman of a gravel train. *O'Donnell* v. *Baltimore & O. R. Co.* (1863) 20 Md. 212, 83 Am. Dec. 549.

An employee superintending the construction of a bridge, with several gang foremen under him, has also been held not to be a vice principal. *State use of Hamelin* v. *Malster* (1881) 57 Md. 287.

Massachusetts.—The decisions in this state are clearer and more consistent than in any other, as they proceed upon the theory that no servant, however high his rank and complete his control over his master's business, is ever a vice principal merely by virtue of his official position. Liability has been denied where the delinquents were the following employees, which are enumerated, roughly speaking, according to a descending scale:

A general manager. *Albro* v. *Agawam Canal Co.* (1850) 6 Cush. 75; *King* v. *Boston & W. R. Corp.* (1851) 9 Cush. 112; *Floyd* v. *Sugden* (1883) 134 Mass. 563; *Wechsler* v. *Speirs Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518.

The captain of a ship. *Johnson* v. *Boston Tow-Boat Co.* (1883) 135 Mass. 209, 46 Am. Rep. 458.

A foreman of a factory (not clear whether he was in full control). *McGuerty* v. *Hale* (1894) 161 Mass. 51, 36 N. E. 682.

A foreman superintending the construction of a building. *Sumnersell* v. *Fish* (1875) 117 Mass. 312; *Daffin* v. *Upton* (1873) 113 Mass. 544.

The foreman of the work in the yard of a manufacturing company. *Moody* v. *Hamilton Mfg. Co.* (1893) 159 Mass. 70, 34 N. E. 185.

A foreman superintending the digging of a sewer or trench. *Flynn* v. *Salem* (1883) 134 Mass. 351; *O'Connor* v. *Roberts* (1876) 120 Mass. 227; *Zeigler* v. *Day* (1877) 123 Mass. 152.

The mate of a ship. *Benson* v. *Goodwin* (1888) 147 Mass. 237, 17 N. E. 517; *Kallock* v. *Herring* (1894) 161 Mass. 369, 37 N. E. 450.

A foreman of stevedores. *Daley* v. *Boston & L. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690.

The superintendent of blasting at a quarry. *Keaney* v. *Shaw* (1882) 133 Mass. 501.

A conductor. *Whitmore* v. *Boston & M. R. Co.* (1890) 150 Mass. 477, 23 N. E. 220.

A section foreman. *Clifford* v. *Old Colony R. Co.* (1886) 141 Mass. 561, 6 N. E. 751.

A brakeman in charge of a section of a train temporarily divided. *Hayes* v. *Western R. Corp.* (1849) 3 Cush. 270.

A mason with a "tender" working under him. *Kennedy* v. *Spring* (1893) 160 Mass. 203, 35 N. E. 779.

Michigan.—A general manager is a vice principal. *Quincy Min. Co.* v. *Kitt.* (1879) 12 Mich. 34, 3 N. W. 210 (*comparando*); *Slater* v. *Chapman* (1887) 67 Mich. 523, 35 N. W. 106; *Shumway* v. *Walworth & V. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251; *Ryan* v. *Bagaley* (1883) 50 Mich. 179, 45 Am. Rep. 35, 15 N. W. 72; *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034 (*aff'g cobb*).

The doctrine of departmental control is extended somewhat further in this state than the decisions of the Supreme Court of the United States seem to warrant,—a railway company having been held liable for the negligence not only of a division superintendent (*Town* v. *Michigan C. R. Co.* [1890] 84 Mich. 214, 47 N. W. 665); and of a train despatcher (*Hunn* v. *Michigan C. R. Co.* [1889] 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502), but also of an assistant road master (*Harrison* v. *Detroit, L. & N. R. Co.* [1890] 79 Mich. 109, 7 L. R. A. 623, 44 N. W. 1034 [see § 535, *ante*]; *Dunn* v. *Michigan C. R. Co.* [1892] 93 Mich. 363, 17 L. R. A. 636, 53 N. W. 397 [see § 533, *ante*]); and a yard master (*Lyttle* v. *Chicago & W. M. R. Co.* [1890] 84 Mich. 289, 47 N. W. 571); but in the last case the negligence was a breach of two non-delegable duties, and it may be that the decision was intended to be based on that ground alone.

In some of its decisions this court has contrived to come very near the superior servant doctrine; but they are susceptible of explanation on another footing. Thus in one case it was broadly laid down that "where the superior servant, by means of an authority which he exercises by delegation of the master, wrongfully exposes the inferior servant to risks and injury, the master must respond;" and on this ground a

railway company was held liable for the act of a conductor of a construction train in ordering a young and inexperienced laborer to do dangerous work outside the scope of his employment. *Chicago & N. W. R. Co.* v. *Bayfield* (1877) 37 Mich. 205. The effect of this case, however, is greatly restricted by the remark of the same court in *Wheeler* v. *Rose* (1893) 95 Mich. 250, 54 N. W. 870, in commenting on this case that if the plaintiff had been a man of full age and experience, and familiar with the work, recovery could not have been sustained. The rationale of the case, therefore, is rather the fact that the risk was not assumed, than the superior position of the servant. Moreover, the order had reference to the performance of work outside the scope of the servant's contractual duties, and it would seem that, under such circumstances, all courts, whether they accept or reject the superior servant doctrine, hold the master responsible wherever the injury was the result of obedience to a command given by an employee controlling the injured servant, irrespective of whether such employee was a vice principal or not, as that term is construed in other connections. See § 165, *ante*.

In *Rodman* v. *Michigan C. R. Co.* (1884) 55 Mich. 57, 54 Am. Rep. 348, 20 N. W. 788, two of the judges in an equally divided court were for holding a railway company responsible to a brakeman for the negligence of a conductor in undertaking to operate an engine himself. The ground taken by Champlin, J., for himself and his colleague, was that he was a vice principal, as being charged with a non-delegable duty, conceived to be imposed on the company, of seeing that the men under his control were performing their respective functions. Such a theory, if it is strictly and literally construed, leads up to a doctrine practically indistinguishable from that discussed in chapter XXVIII. (D) *ante*. But here, as in the *Bayfield Case* (1877) 37 Mich. 205, *supra*, the language used is to be construed with reference to the contention of the plaintiff that he was entitled to recover on the ground that the act of the conductor had subjected him to risks outside the scope of his employment. The very broad theory laid down by Champlin, J., cannot, it seems, be regarded as committing him to the doctrine that a conductor is a vice principal under ordinary circumstances. So far as this case, therefore, decides anything it is not really in conflict with the Michigan decisions, *infra*, declaring a conductor to be a fellow servant of his subordinates. But the facts were clearly discussed by the learned judge from a standpoint which was, to some extent, at least, an improper one. The duties of the brakeman were in no respect changed because the conductor handled the engine himself, and it is only when there is such a change, that a servant can be said, in the true sense of the phrase, to be exposed to risks outside his employment. The brakeman in this case was precisely in the same position as if any other incompetent person had done what the conductor did. Even supposing that such a situation might import liability, that liability would clearly be predicated on a ground of the failure to have a competent engineer,—altogether a different theory from the one put forward by Champlin J. See the opinion delivered by Cooley, Ch. J. A subordinate decision, holding the conductor of a construction train to be a vice principal, is also to be explained as an illustration of the doctrine applicable in regard to risks outside the scope of the original employment. *Erickson* v. *Milwaukee, L. S. & W. R. Co.* (1890) 83 Mich. 281, 47 N. W. 237.

That this court has never had any intention of adopting the superior servant doctrine is put beyond controversy by its refusal to sustain an action for the negligence of the following employees:

The captain of a ship. *Caniff* v. *Blanchard Nav. Co.* (1887) 66 Mich. 638, 33 N. W. 744 (mate injured).

A conductor. *La Pierre* v. *Chicago & G. T. R. Co.* (1894) 99 Mich. 212, 58 N. W. 60; *Jarman* v. *Chicago & G. T. R. Co.* (1893) 98 Mich. 135, 57 N. W. 32.

A section foreman. *Hammond* v. *Chicago & G. T. R. Co.* (1890) 83 Mich. 334, 47 N. W. 965; *Timm* v. *Michigan C. R. Co.* (1893) 98 Mich. 226, 57 N. W. 116; *Corrigan* v. *Lake Shore & M. S. R. Co.* (1896) 110 Mich. 71, 67 N. W. 1097.

The foreman of a ballasting train on a railway. *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663.

A foreman of car repairers. *Peterson* v. *Chicago & N. W. R. Co.* (1887) 67 Mich. 102, 34 N. W. 260.

A foreman supervising the erection of an elevator. *Andre* v. *Winslow Bros.*

Elevator Co. (1898) 117 Mich. 560, 76 N. W. 86.

A shift boss in a mine. *Petaja* v. *Aurora Iron Min. Co.* (1895) 106 Mich. 463, 32 L. R. A. 135, 64 N. W. 335, Affirmed on rehearing (1895) 106 Mich. 469, 32 L. R. A. 438, 66 N. W. 951.

One of several foremen in a sawmill, under the direction of the general manager. *Lopan* v. *Hall* (1901) 128 Mich. 523, 87 N. W. 619.

Minnesota.—Masters are held liable for the negligence of general managers. *Hess* v. *Adamant Mfg. Co.* (1896) 66 Minn. 79, 68 N. W. 774.

As regards departmental managers, the language used in *Cook* v. *St. Paul, M. & M. R. Co.* (1885) 31 Minn. 45, 24 N. W. 311, seems scarcely susceptible of any other construction than that a railway company is liable for the negligence of such a functionary. Yet, a few years before, it had been held that a road master was a mere servant. *Brown* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484. As there was no question in the latter case of a violation of any duty classed among those that are non-delegable, it would seem that the two rulings are in conflict, unless the latter one may be supposed to have had reference to the general road master of the line, and the earlier one to a divisional road master. So far as the report shows, however, such a ground of differentiation was not in the mind of the court. The doctrine of the earlier of the above two cases was again applied in *O'Neil* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086; but here again the precise official position of the road master is not apparent from the report.

Until quite recently it could not be said that this court had shown any tendency toward the adoption of the superior servant doctrine. It refused to allow recovery for the negligence of the following employees:

The foreman of graders on one of the sections of railroad under construction. *Lindrall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020.

An assistant engineer supervising graders. *Cornelison* v. *Eastern R. Co.* (1892) 50 Minn. 23, 52 N. W. 224.

A foreman subject to the orders of a yard master. *Fraker* v. *St. Paul, M. & M. R. Co.* (1884) 32 Minn. 54, 19 N. W. 349.

The foreman of a railway roundhouse. *Gonsior* v. *Minneapolis & St. L. R. Co.* (1887) 36 Minn. 385, 31 N. W. 515.

A section foreman. *Olson* v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866. As to road masters, see above.

But four years ago the case of *Carlson* v. *Northwestern Teleph. Exch. Co.* (1896) 63 Minn. 138, 65 N. W. 914, seemed to foreshadow a new departure. The court held merely that a foreman in charge of the excavation of a ditch, with power to employ and discharge subordinates, was a vice principal in respect to the act of ordering a laborer to work in a place of unusual danger in the ditch, without giving him proper warning as to the perils to which he would be exposed. Upon such facts, the case may obviously be kept out of the category of those which embody the superior servant doctrine, by referring the ruling to the conception of a breach of the non-delegable duty of instruction. But it will be seen from the extract from the opinion which was quoted in § 522, *d, ante*, that the decision was sustained by reasoning which, if carried to its logical conclusions, would render the mere exercise of a power of control a test of representative capacity. It remains to be seen whether the court will take any further steps in this direction. In *O'Neil* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086, there is an unmistakable reversion of the doctrine of the earlier rulings cited above, but it does not refer to the language used in the *Carlson Case*.

The doctrine of dual capacity has been applied in *Soutar* v. *Minneapolis Interurban Electric Co.* (1897) 68 Minn. 18, 70 N. W. 796; *Holtz* v. *Great Northern R. Co.* (1897) 69 Minn. 524, 72 N. W. 805. As to its limits, see *O'Neil* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086 (§ 547 (a) *ante*).

Mississippi.—In this state *Wilson* v. *Merry* (§ 529, *ante*) has been expressly approved in *Lagroue* v. *Mobile & O. R. Co.* (1890) 67 Miss. 592, 7 So. 432. *Hood* v. *Mississippi C. R. Co.* (1874) 50 Miss. 178. But, of these cases, the first merely denied liability for the negligence of a section foreman, and the second absolved the company where the delinquent was a conductor. The broad rule impliedly adopted by the approval thus expressed of the English decision was, therefore, not required for the purposes of either decision; and, when the

Constitution of 1890, § 193, and the Code of 1892, § 3559, introduced what was virtually the superior servant doctrine, it was still, perhaps, an open question whether a general or departmental manager would have been held a vice principal or not.

Missouri. In the earlier decisions in this state we find the superior servant doctrine categorically rejected, the Ohio rulings (see *post*) being disapproved in *McDermott* v. *Pacific R. Co.* (1860) 30 Mo. 115 (denying a chief engineer of a railway company to be a vice principal). *Rohback* v. *Pacific R. Co.* (1862) 13 Mo. 187. These cases were approved in 1873. *Brothers* v. *Carter* (1873) 52 Mo. 372, 14 Am. R. p. 424, where it was laid down that a master is not liable for injuries received by a servant, caused by the negligence of a coservant, unless the latter is not possessed of the ordinary skill and capacity for the business intrusted to him, and unless his employment is attributable to the want of ordinary care on the part of the master.

In 1876 a conductor was held to be, prima facie, a mere servant. *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528, as was also a gang foreman of carpenters at a bridge. *Lee* v. *Detroit Bridge & Iron Works* (1876) 62 Mo. 565; while in *Marshall* v. *Schricker* (1876) 63 Mo. 308, the doctrine is laid down, upon a review of all the previous authorities in Missouri, that the exercise of control does not make the employee a vice principal (foreman of blasting operations held a mere servant).

The law remained the same up to 1879, in which year it was held erroneous to instruct a jury to the effect that an employee acting for and in the employ of the defendant in its yard at B., his duties being to direct and control assistant brakemen in said yard, deceased being one of such, was a vice principal. *Rains* v. *St. Louis, I. M. & S. R. Co.* (1879) 71 Mo. 164, 36 Am. Rep. 459.

The case which may be said to mark the passage from a rejection to an acceptance of the superior servant doctrine, which, at least up to quite recently, has been consistently applied, is *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298. The opinion professes to rely upon the earlier cases in Missouri; but in view of their plain purport, as set forth above, it is impossible to claim that there is not a complete discontinuity of theories at this stage of the development of the law in that state. The decision was that the master was liable for the consequence of obedience to the order of a foreman in charge of the construction of a turntable, whose directions the general superintendent had directed the plaintiff to follow. From a perusal of the opinion, it seems apparent that this conclusion was reached by a dialectic process which is responsible for a good deal of faulty judicial ratiocination, *viz.*, indulging the assumption that because, among the various grounds for denying liability in a previous case, the court may have mentioned the absence of a certain element, it therefore meant to commit itself to the doctrine that, if that element had been present, its decision would have been different. When the explicit language used in the cases above cited is examined, it is submitted that there is no sufficient ground for inferring that the representative capacity of the foreman in this instance would have been conceded at any earlier period in this state, although it may have been noted in one of those cases, *McGowan* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528, that "there was no proof that the conductor had the superintendence or control over the men, or the work, or power to provide or replace the machinery," and in another of the cases, *Marshall* v. *Schricker* (1876) 63 Mo. 309, that "the employer cannot be charged with the negligence of one who was merely a foreman over the plaintiff, not engaged in a distinct department of the general service, but in the same work with plaintiff, and not charged with any executive duties or control over plaintiff which would constitute him the agent of the employer." The consideration by which the court seeks to fortify its conclusion in the *Dowling Case*, *viz.*, that, as the superintendent had instructed plaintiff to do whatever the foreman might order him to do, the accident was in effect a direct consequence of an order given by the superintendent, is really of no importance. That it cannot be conceded to bear the weight here ascribed to it is at once apparent if we remember that such an instruction is impliedly or expressly given in every instance where servants are working under foremen of the lower grades. The actual or supposed giving of such an instruction may possibly be adduced as one of the grounds for adopting the superior servant doctrine; but it cannot be made to

serve as a bridge to span the chasm between that doctrine and the one which denies the possession of control to be a test of representative capacity.

But, however this case may be explained, it is certain that a doctrine involving precisely the same results as that prevailing in Ohio, which was explicitly repudiated in the earlier decisions, has been applied in a large number of cases. Employers have been held liable for the negligence, not merely of the higher grades of employees, such as a master mechanic (*Tabler* v. *Hannibal & St. J. R. Co.* [1887] 93 Mo. 79, 5 S. W. 810), but also for the defaults of such servants as a foreman in charge of a roundhouse (*Dayharsh* v. *Hannibal & St. J. R. Co.* [1890] 103 Mo. 570, 15 S. W. 554); a conductor (*Waller* v. *Missouri P. R. Co.* [1891] 109 Mo. 350, 19 S. W. 58 [see, however, the *Grattis Case* (1899) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108, *infra*]); a roadmaster (*Hake* v. *St. Louis, K. & N. R. Co.* [1885] 88 Mo. 300; *Foster* v. *Missouri P. R. Co.* [1893] 115 Mo. 165, 21 S. W. 916); a division road master (*Browning* v. *Wabash Western R. Co.* [1894] 124 Mo. 55, 24 S. W. 731, 27 S. W. 644); a yard master (*Renfro* v. *Chicago, R. I. & P. R. Co.* [1885] 86 Mo. 302); a foreman of a switching crew (*Taylor* v. *Missouri P. R. Co.* [1891; Mo.] 16 S. W. 206); a section foreman (*Schroeder* v. *Chicago & I. R. Co.* [1891] 108 Mo. 322, 18 L. R. A. 827, 18 S. W. 1094, and the other cases cited in § 524, note 2, subd. [f]); a foreman of car repairers (*Moore* v. *Wabash, St. L. & P. R. Co.* [1885] 85 Mo. 588; *Renfro* v. *Chicago, R. I. & P. R. Co.* [1885] 86 Mo. 302); a foreman of gang loading railway cars (*Higgins* v. *Missouri P. R. Co.* [1891] 43 Mo. App. 547; *Proctor* v. *Missouri, K. & T. R. Co.* [1890] 42 Mo. App. 124); a foreman of a gang constructing a turntable (*Dowling* v. *Allen* [1881] 74 Mo. 13, 41 Am. Rep. 298 [1885] 88 Mo. 293); a foreman of a gang removing the roof of a building (*Sullivan* v. *Hannibal & St. J. R. Co.* [1891] 107 Mo. 66, 17 S. W. 748); a foreman in charge of the removal of an embankment (*Bradley* v. *Chicago, M. & St. P. R. Co.* [1896] 138 Mo. 293, 39 S. W. 763); one of several subordinate foremen in a quarry (*Cox* v. *Sycnite Granite Co.* [1890] 39 Mo. App. 424); a foreman at a foundry in charge of the work of unloading barges (*Devany* v. *Vulcan Iron Works* [1877] 4 Mo. App. 236); a foreman supervising excavation of reservoir (*Hall* v. *St. Joseph Water Co.* [1892] 48 Mo. App. 356).

The authority of these decisions, however, seems to be greatly shaken by the recent case in which it was held that a conductor was prima facie a mere fellow servant of an engineer and fireman, and that it was therefore error to instruct the jury on the theory that he was a vice principal in charge of a department. *Grattis* v. *Kansas City, P. & G. R. Co.* (1900) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108 (signal to go ahead). This ruling embodies the precise doctrine of the *McGowan Case* (1876) 61 Mo. 528, which was in fact relied upon by the court, and, in view of the long line of cases just cited, must be regarded as one of the most extraordinary examples of a judicial *volte-face* which can be produced from the reports. The decisions which had laid down in such clear and unambiguous terms that all superior servants were vice principals were quietly ignored, and the decision is based apparently upon the ground that, because it is practically impossible to determine what are departments of the service within the meaning of the doctrine which declares that when they are different, there is no common employment (see chapter XXVII., C, *ante*), it is therefore preferable to adopt some other test of representative capacity than that which depends on the question whether the delinquent was a head of a department. But there are two obvious flaws in this singular argument. In the first place, there is no warrant in the cases, as they stand, for saying that the departments with which the doctrine of departmental control is concerned (chapter XXVIII., F, *ante*) have been conceived of as being coextensive or identical with the departments the diversity of which takes the delinquent and injured servants out of the category of coemployees. This is a point which no judge has yet undertaken to elucidate, and as long as it remains in obscurity it cannot legitimately be made the basis of any argument like that of the Missouri court. So far as any reasonably precise intercuces can be drawn from a comparison of the two kinds of departments, it seems most probable that, if there should ever be any necessity to decide the matter, it would be found that they do not connote coextensive subdivisions of the master's business. But such an investigation would be a frivolous waste of time and labor, for it is much better to re-

gard the word "department" as at best a rough means of identifying the conception to which it is intended to refer the master's responsibility, and to determine that responsibility by means of the tests supplied by the elementary considerations for which, according to circumstances, the word may stand.

In the second place, the introduction of the conception of headship of department was wholly irrelevant in a state in which the superior servant doctrine had been so unreservedly adopted. The error of the trial court in this respect was obvious, and, in view of the earlier decisions, the proper course would have been simply to declare the essential incorrectness of the charge in this regard, unless it was intended to inaugurate a wholly new series of cases in which the superior servant doctrine should find no place. But if this is the purpose of the court, it is certainly being attained in a very curious fashion.

Both during the earlier and later periods defined by the rejection and acceptance of the superior servant doctrine, the master has been held liable for the acts of a general manager, or other employee in full control of a business or an independent piece of work. *Brothers* v. *Cartter* (1873) 52 Mo. 372, 14 Am. Rep. 424; *Whalen* v. *Centenary Church* (1876) 62 Mo. 326; *Gormly* v. *Vulcan Iron Works* (1876) 61 Mo. 492; *Dowling* v. *Allen* (1881) 74 Mo. 13, 41 Am. Rep. 298; *Hyatt* v. *Hannibal & St. J. R. Co.* (1885) 19 Mo. App. 294.

The doctrine of dual capacity was recognized, *obiter*, in *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588; *Rowland* v. *Missouri P. R. Co.* (1886) 20 Mo. App. 463.

But the actual decisions on the subject confine its operation within very narrow limits. *Dowling* v. *Hannibal & St. J. R. Co.* (1887) 103 Mo. 570, 15 S. W. 551; *Hutson* v. *Missouri P. R. Co.* (1892) 50 Mo. App. 300; *Russ* v. *Wabash Western R. Co.* (1892) 112 Mo. 45, 18 L. R. A. 823, 20 S. W. 472; *Hughlett* v. *Ozark Lumber Co.* (1893) 53 Mo. App. 87.

As to the significance in this state of the possession or nonpossession of the power of discharge, see § 523, *ante*.

Montana.—In 1896 it was held that the effect of the adoption of the new constitution was to abrogate the Compiled Stat. 1887, § 697, which, while the state was still under a territorial government, had introduced a rule of liability virtually the same as the superior servant doctrine. *Criswell* v. *Montana C. R. Co.* (1896) 18 Mont. 167, 33 L. R. A. 554, 44 Pac. 525. This ruling reversed the judgment in the same case ([1895] 17 Mont. 189, 42 Pac. 767) by which liability had been imposed for the negligence of a conductor, on the supposition that the rights of the plaintiff, a brakeman, were determined by the provisions of the act. Under the common-law principles thus restored to operation, it has been held that no action can be sustained for the negligence of a section foreman. *Hastings* v. *Montana Union R. Co.* (1895) 18 Mont. 493, 46 Pac. 264. Or of a foreman of a gang assisting regular section crews as occasion required. *Goodwell* v. *Montana C. R. Co.* (1896) 18 Mont. 293, 45 Pac. 210.

Nebraska.—In this state the superior servant doctrine prevails, and employers have been held liable for the negligence, not only of general managers (*Crystal Ice Co.* v. *Sherlock* [1893] 37 Neb. 19, 55 N. W. 294), but also of the following employees:

The foreman in charge of a gravel train. *Union P. R. Co.* v. *Doyle* (1897) 50 Neb. 555, 70 N. W. 43.

The conductor of a work train. *Chicago, St. P. M. & O. R. Co.* v. *Lundstrom* (1884) 16 Neb. 254, 49 Am. Rep. 718, 20 N. W. 198; *Burlington & M. River R. Co.* v. *Crockett* (1886) 19 Neb. 138, 26 N. W. 921.

A conductor. *Clark* v. *Hughes* (1897) 51 Neb. 780, 71 N. W. 776.

A car repairer deputed to instruct a new workman. *Chicago, B. & Q. R. Co.* v. *Sullivan* (1889) 27 Neb. 679, 43 N. W. 415.

The foreman of a gang repairing structures along a railway. *Sioux City & P. R. Co.* v. *Smith* (1888) 22 Neb. 775, 36 N. W. 285.

A gang foreman under an electric company. *New Omaha Thomson-Houston Electric Light Co.* v. *Baldwin* (1901) 62 Neb. 180, 87 N. W. 27.

The foreman of a pile driving crew. *Fremont, E. & M. Valley R. Co.* v. *Leslie* (1894) 41 Neb. 159, 59 N. W. 559.

The doctrine of dual capacity was repudiated in *Crystal Ice Co.* v. *Sherlock* (1893) 37 Neb. 19, 55 N. W. 294; *New Omaha Thomson-Houston Electric Light Co.* v. *Baldwin* (1901) 62 Neb. 180, 87 N. W. 27 (for facts in both cases, see § 544, *ante*).

New Hampshire.—A general manager is possibly regarded as a vice principal. *Noyes* v. *Glen Mfg. Co.* (1891) 67

N. H. 287, 30 Atl. 344. But the evidence here was held not to show negligence.

There is no liability for the negligence of the lower grades of superior servants—as a section foreman. *Hanley* v. *Grand Trunk R. Co.* (1882) 62 N. H. 274.

New Jersey.—The question whether general managers are vice principals has been discussed in § 539, *ante*, where it has also been pointed out that the doctrine of non-delegability of duties has been applied to an unwonted set of facts in a recent case.

There is no liability for the negligence of the following superior servants of lower grades than general managers:

A foreman in full charge of the work of constructing a sewer. *Curley* v. *Hoff* (1899) 62 N. J. L. 758, 42 Atl. 731; approving *Wilson* v. *Merry* (§ 529, *ante*).

A foreman of driller in a mine. *Gilmore* v. *Oxford Iron & Nail Co.* (1892) 55 N. J. L. 39, 25 Atl. 707.

A foreman superintending the erection of a gas-holder. *Melaughlin* v. *Camden Iron Works* (1897) 60 N. J. L. 557, 38 Atl. 677.

A foreman supervising the building of a boat, and working with his subordinates. *Olsen* v. *Nixon* (1898) 61 N. J. L. 671, 40 Atl. 691.

A "district manager" of a telephone company, in charge of a crew stringing wires. *Knutter* v. *New York & N. J. Teleph. Co.* (1902) 67 N. J. L. 646, 58 L. R. A. 808, 52 Atl. 565.

In *Curley* v. *Hoff* (1899) 62 N. J. L. 758, 42 Atl. 731, it was said that the statement of the court in *Van Steenburgh* v. *Thornton* (1895) 58 N. J. L. 166, 33 Atl. 380, that the master was liable for the negligence of the boss foreman, was really not relevant, the real ground of liability being the master's knowledge of the conditions.

New Mexico.—A section foreman is not a vice principal. *Atchison, T. & S. F. R. Co.* v. *Martin* (1893) 7 N. M. 158, 34 Pac. 536, Affirmed in (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603. Nor is a pit boss of a mine, working under a general superintendent. *Descrant* v. *Cerrillos Coal R. Co.* (1898) 9 N. M. 495, 55 Pac. 290.

New York.—The doctrine that a general manager is a vice principal was fully recognized in *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573; *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369; *Hoyt* v. *Coger* (1889) 112 N. Y. 611, 3 L. R. A. 559, 20 N. E. 553; *Eagan* v. *Tucker* (1879) 18 Hun, 397; *Fort* v. *Whipple* (1877) 11 Hun, 586. Possibly in these last two cases the essential ground of the decision may really have been the breach of a non-delegable duty; but as they antedate *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521, they are more probably intended as applications of the doctrine accepted in the three rulings of the court of appeals cited above. Whether this is so or not, it is clear that the operation of that doctrine is considerably circumscribed by the case just cited. See §§ 543, 547, *ante*. The decision in *Pantzar* v. *Tilly Foster Iron Min. Co.* (1885) 99 N. Y. 368, 2 N. E. 24, holding the defendant liable for the negligence of its general superintendent, is really based upon the theory that the non-delegable duty of inspection was violated.

The terminology appropriate to, and usually associated with, the doctrine of departmental control, is not, so far as the writer knows, found in the New York reports, but there are some rulings bearing upon the subject.

In 1868 it was held that a railway company was not liable for the negligence of its superintendent of bridges. *Warner* v. *Erie R. Co.* 39 N. Y. 468. But the conclusion was based on arguments which could preclude recovery for the negligence of any agents of a company except the directors (see § 530, *ante*), and is therefore inconsistent with the cases as to general managers, cited above.

In *Brick* v. *Rochester, N. Y. & P. R. Co.* (1885) 98 N. Y. 211, the delinquent was superintending the reconstruction of an old road, and, from his functions as stated, would undoubtedly have been held in some jurisdictions to be a departmental manager. But the case actually turned on the nature of the negligent act. See § 513, *ante*.

In *McCampbell* v. *Cunard S. S. Co.* (1893) 69 Hun, 131, 23 N. Y. Supp. 477, a dock superintendent of a steamship company was treated as a vice principal, but this decision was reversed in (1895) 144 N. Y. 552, 39 N. E. 637, on the ground of the character of the negligent act.

In another case a railway company was held liable for the negligence of the superintendent of its grain elevator. *Jetlorern* v. *Central Vermont R. Co.* (1890) 123 N. Y. 281, 25 N. E. 373; but here the real rationale of the deci-

sion was the breach of the non-delegable duty of inspecting the place of work.

A telegraph operator has been held not to be a vice principal, as he merely has to exercise some discretion within a department. *Monaghan* v. *New York C. & H. R. R. Co.* (1887) 45 Hun, 113.

In this state the superior servant doctrine has never obtained the slightest footing. Employers have been held not liable for the negligence of the following employees below the rank of general managers:

A wreck master. *Beilfus* v. *New York, L. E. & W. R. Co.* (1883) 29 Hun 556.

A yard master. *McCosker* v. *Long Island R. Co.* (1881) 84 N. Y. 77.

A conductor. *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574 (1858) 17 N. Y. 153; *Wooden* v. *Western N. Y. & P. R. Co.* (1895) 147 N. Y. 508, 42 N. E. 199. Reversing (1891) 43 N. Y. S. R. 218, 16 N. Y. Supp. 841 (1892) 46 N. Y. S. R. 77, 18 N. Y. Supp. 768.

A locomotive engineer. *Watts* v. *Beard* (1897) 18 App. Div. 243, 45 N. Y. Supp. 873 (foreman injured).

A section foreman. *Barringer* v. *Delaware & H. Canal Co.* (1879) 19 Hun. 216.

A foreman of car repairers. *Keenan* v. *New York, L. E. & W. R. Co.* (1895) 145 N. Y. 190, 39 N. E. 711.

A foreman superintending the construction of a building. *Kiffin* v. *Wendt* (1899) 39 App. Div. 229, 57 N. Y. Supp. 109.

A foreman of a gang of carpenters. *Malone* v. *Hathaway* (1876) 64 N. Y. 5, 21 Am. Rep. 573; *Jenkins* v. *Mahopac Iron Ore Co.* (1890) 32 N. Y. S. R. 866, 10 N. Y. Supp. 484.

A division superintendent of railway bridges. *Neubauer* v. *New York, L. E. & W. R. Co.* (1885) 101 N. Y. 607, 4 N. E. 125.

A foreman supervising the construction of a bridge arch. *Hofeagle* v. *New York C. & H. R. R. Co.* (1874) 55 N. Y. 608.

A gang foreman on a bridge. *Ludlow* v. *Groton Bridge & Mfg. Co.* (1896) 11 App. Div. 452, 42 N. Y. Supp. 343.

A foreman superintending the placing of a bridge pier. *Ulrich* v. *New York C. & H. R. R. Co.* (1898) 25 App. Div. 465, 51 N. Y. Supp. 5.

A foreman superintending the erection of a scaffold. *Moore* v. *McNeil* (1898) 35 App. Div. 323, 54 N. Y. Supp. 956.

A foreman in charge of a derrick. *Scott* v. *Sweeney* (1884) 34 Hun, 292.

A foreman of bricklayers. *White* v. *Eidlitz* (1897) 19 App. Div. 256, 46 N. Y. Supp. 184.

A superintendent of repairs to a ship. *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556.

A foreman supervising the erection of an elevator. *Whalley* v. *Sprague Electric Elevator Co.* (1896) 1 App. Div. 264, 37 N. Y. Supp. 174.

The foreman of the work of drawing one of the shafts for a tunnel. *Riley* v. *O'Brien* (1889) 53 Hun, 147, 6 N. Y. Supp. 129.

A foreman superintending the digging of a trench. *Collins* v. *Crimmins* (1895) 11 Misc. 24, 31 N. Y. Supp. 860; *Schott* v. *Onondaga County Sav. Bank* (1900) 49 App. Div. 503, 63 N. Y. Supp. 631.

A foreman of a gang engaged in excavating work. *Daley* v. *Brown* (1899) 45 App. Div. 428, 60 N. Y. Supp. 840.

A foreman supervising the loading of an elevator. *Dencefeld* v. *Baumann* (1899) 40 App. Div. 502, 58 N. Y. Supp. 110.

A foreman under a master stevedore. *Kenny* v. *Cunard S. S. Co.* (1885) 20 Jones & S. 434 (1885) 23 Jones & S. 558; *Tully* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29.

A foreman under a master stevedore. *O'Connor* v. *Hall* (1900) 52 App. Div. 428, 65 N. Y. Supp. 136.

The foreman of a quarry. *Cullen* v. *Norton* (1891) 126 N. Y. 1, 26 N. E. 905.

A foreman of blasting operations in a public work. *Perry* v. *Rogers* (1898) 157 N. Y. 251, 51 N. E. 1021, Reversing (1895) 91 Hun, 243, 36 N. Y. Supp. 208; *Vanecuso* v. *Cataract Constr. Co.* (1895) 87 Hun, 519, 34 N. Y. Supp. 273; *Vitto* v. *Keegan* (1897) 15 App. Div. 329, 44 N. Y. Supp. 1; *Capasso* v. *Woolfolk* (1900) 163 N. Y. 472, 57 N. E. 760, Reversing (1898) 25 App. Div. 234, 49 N. Y. Supp. 409.

The captain of a ship. *Longblia* v. *State* (1887) 105 N. Y. 159, 11 N. E. 371; *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796; *Gabrielson* v. *Waydell* (1892) 135 N. Y. 1, 17 L. R. A. 228, 31 N. E. 963; *Geoghegan* v. *Atlas S. S. Co.* (1895) 146 N. Y. 369, 40 N. E. 507.

The mate of a ship. *Geoghegan* v. *Atlas S. S. Co.* (1895) 146 N. Y. 369, 40 N.

E. 507; *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796; *Olson* v. *Clyde* (1884) 32 Hun, 425.

It should be noted that, in all the more recent of the above cases, the essential ground of the decision is rather the character of the negligent act than the official position of the delinquent, which, since the ruling in *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521 (see §§ 543, 547, *ante*), is treated as being of secondary importance.

North Carolina.—In the earliest case in which the proper inference to be drawn from the exercise of the control by the delinquent was considered (*Dobkin* v. *Richmond & D. R. Co.* [1879] 81 N. C. 446, 31 Am. Rep. 512), a railway company was held liable for the negligence of an employee who was superintendent, engineer, conductor, and fireman of a gravel train. The court, as is evident from its opinion, had no intention of going any further in ascribing a representative capacity to superior servants than the point fixed afterwards by the *Ross Case*, as afterwards explained by the *Baugh Case* (see Federal cases, *supra*). The servant, it was declared, "does not undertake to incur the risks that may result from the negligence of the master, or such person to whom he may choose to delegate his authority in that branch or department of business in which he is engaged. To impute the negligence of such an agent to the master, he must be more than a mere foreman to oversee a batch of hands, direct their work under the supervision of the master, see that they perform their duty, and, in case of dereliction, report them. He must have entire management of the business, such as the right to employ hands and discharge them, and direct their labor, and purchase materials, etc. He must be an agent clothed in this respect with the authority of the master, to whom the laborers are put in subordination, and to whom they owe the duty of obedience. Such an agent is what is known as a 'middleman,' who, as well as the laborer, is the servant of the master, and although he may work with the laborer in furthering the common business of the master, he is yet not a 'fellow servant' in the sense of that term as used by the courts, because he represents the master in his authority to direct, control, and manage the business."

In a case decided two years later, it was remarked, *arguendo*, that an employer was liable for "the defaults of a superior whose commands and directions the injured servant was bound to obey. *Corbin* v. *Richmond & D. R. Co.* (1881) 84 N. C. 309, 37 Am. Rep. 620. But the real point on which this case turned was negligence in respect to defective appliances, and therefore the precise question whether the delinquent, an engineer in charge of a train, was a vice principal or not, was not settled.

If this question had been presented, it would almost certainly have been determined against the plaintiff; for some years afterwards the doctrine of the *Dobkin Case* (1879) 81 N. C. 446, 31 Am. Rep. 512, was reiterated, and it was declared that, in order to be regarded as a vice principal, a superior servant must be something more than a mere foreman. *Kirk* v. *Atlanta & Char-Line R. Co.* (1885) 94 N. C. 625, 55 Am. Rep. 621 (acting yard master denied to be a vice principal); *Wasson* v. *Richmond & D. R. Co.* (1892) 111 N. C. 482, 18 L. R. A. 845, 16 S. E. 698 (conductor held to be a vice principal). In the former case the court even professes to rely on the English case of *Feltham* v. *England* (1866) L. R. 2 Q. B. 33, 36 L. J. Q. B. N. S. 14, 15 Week. Rep. 151, 7 Best. & S. 676; but this ruling, as we have seen (§ 529, note 2, *ante*), goes much further than any North Carolina decision in denying the servant indemnity for the acts of a superior. Moreover, it is difficult to see any rational ground on which a yard master can be held not to be a vice principal, if that character is ascribed to a section foreman, as was done in the very next year. The court considered such an employee to be something more than a mere foreman within the meaning of the rule laid down in the *Dobkin Case* (1879) 81 N. C. 446, 31 Am. Rep. 512, inasmuch as he was "charged with authority to employ, control, and command the plaintiff, as to the labor he should do in the railroad, and to discharge him from such service." *Patton* v. *Western N. C. R. Co.* (1887) 96 N. C. 455, 1 S. E. 863. Other later cases assuming or holding a section foreman to be a vice principal are *Logan* v. *North Carolina R. Co.* (1895) 116 N. C. 940, 21 S. E. 959; *Styles* v. *Richmond & D. R. Co.* (1896) 118 N. C. 1084, 24 S. E. 740; *Johnson* v. *Southern R. Co.* (1898) 122 N. C. 955, 29 S. E. 781.

The principle of the *Dobkin Case* is also held to render a railway company liable for the negligence of a conductor.

Mason v. *Richmond & D. R. Co.* (1892) 111 N. C. 482, 18 L. R. A. 845, 16 S. E. 698 (1894) 114 N. C. 718, 19 S. E. 362; *Shadd* v. *Georgia, C. & N. R. Co.* (1895) 116 N. C. 968, 21 S. E. 551; *Purcell* v. *Southern R. Co.* (1896) 119 N. C. 728, 26 S. E. 161.

Whether a foreman of carpenters was a vice principal was held not to be established by the evidence set out on the record in *Turner* v. *Goldsboro Lumber Co.* (1896) 119 N. C. 387, 26 S. E. 23.

The inference from the above cases would seem to be that this court, although it disclaims the theory that the mere exercise of control constitutes a vice principal, can scarcely be placed in any other class than that of the adherents of the superior servant doctrine. Neither by the Federal courts nor by any of the state courts which have elaborated the doctrine of departmental control is a section foreman held to be a vice principal.

It has quite lately been held that an employee controlling a small gang, but not invested with the power of discharge, is a mere coservant of his subordinates. *Bryan* v. *Southern R. Co.* (1901) 128 N. C. 387, 38 S. E. 914.

A superior servant is a vice principal only as to servants under his control (§ 514, *ante*). *Wright* v. *Northampton & H. R. Co.* (1898) 122 N. C. 852, 29 S. E. 100.

The doctrine of dual capacity was rejected in *Purcell* v. *Southern R. Co.* (1896) 119 N. C. 728, 26 S. E. 161.

North Dakota.—Section 1130 of the Civil Code of Dakota, reproducing the provisions of the California Code (see *supra*), has been expressly held to be merely declaratory of the common law. *Elliot* v. *Chicago, M. & St. P. R. Co.* (1889) 5 Dak. 523, 3 L. R. A. 363, 41 N. W. 758. Under this Code it has been held that a foreman of a pile-driving gang is not a vice principal. *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222.

Ohio.—This is one of the states in which the superior servant doctrine has been adopted. Employers have been held liable for the negligence of the following employees:

A general manager. *Cleveland, C. & C. R. Co.* v. *Keary* (1854) 3 Ohio St. 201.

A conductor. *Cleveland, C. & C. R. Co.* v. *Keary* (1854) 3 Ohio St. 201, and other cases cited under § 523, note 2, subd. (c), *ante*.

A foreman of car repairers. *Lake Shore & M. S. R. Co.* v. *Laralley* (1880) 36 Ohio St. 221.

The foreman of a quarry. *Berea Stone Co.* v. *Kraft* (1877) 31 Ohio St. 287, 27 Am. Rep. 510.

A locomotive engineer (as regards a laborer under his directions). *Baltimore & O. R. Co.* v. *Sutherland* (1894) 1 Toledo Leg. News, 388.

A mine boss. *Wellston Coal Co.* v. *Smith* (1901) 65 Ohio St. 70, 55 L. R. A. 99, 61 N. E. 143.

A superior servant is regarded as a vice principal, even as to servants not under his control. *Pittsburg, Ft. W. & C. R. Co.* v. *Devinney* (1867) 17 Ohio St. 197.

The doctrine of dual capacity was rejected in *Berea Stone Co.* v. *Kraft* (1877) 31 Ohio St. 287, 27 Am. Rep. 510.

Oregon.—An employer is liable for the negligence of a general manager. *Anderson* v. *Bennett* (1888) 16 Or. 515, 19 Pac. 765, but not for that of superior servants of lower grade,—as a section foreman. *Brunell* v. *Southern P. Co.* (1899) 34 Or. 256, 56 Pac. 129.

Pennsylvania.—In this state a master is liable for the negligence of a general manager. *Frazier* v. *Pennsylvania R. Co.* (1860) 38 Pa. 104, 80 Am. Dec. 467; *Hoover* v. *Carbon County Electric R. Co.* (1899) 191 Pa. 146, 43 Atl. 74; *Duffy* v. *Oliver Bros.* (1890) 131 Pa. 203, 18 Atl. 872; *Ardesco Oil Co.* v. *Gilson* (1869) 63 Pa. 150; *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2; *Prevost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88; *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50; *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514.

Under the doctrine of departmental control employers have been held answerable for the defaults of an employee superintending the construction of a railway tunnel. *Tissue* v. *Baltimore & O. R. Co.* (1886) 112 Pa. 91, 56 Am. Rep. 310, 3 Atl. 667.

Of the master mechanic of a railway company. *New York, L. E. & W. R. Co.* v. *Bell* (1886) 112 Pa. 400, 4 Atl. 50.

Of the superintendent of labor of a large steel company. *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102.

That a departmental manager is a vice principal was also recognized in *Ardesco Oil Co.* v. *Gilson* (1869) 63 Pa. 150; *Prevost* v. *Citizens' Ice & Refrig-*

erating Co. (1898) 185 Pa. 617, 40 Atl. 88; *Lewis v. Seifert* (1897) 116 Pa. 628, 11 Atl. 511.

Whether a head stevedore of a steamship company is a vice principal was held, under the circumstances stated in § 535, note 1, subd. (k), *ante*, to be a question for the jury. *Hulton v. Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2.

There is no liability for the negligence of the following employees of lower grade than departmental managers:

A section foreman. *Spincake v. Philadelphia & R. R. Co.* (1892) 148 Pa. 184, 23 Atl. 1096.

An assistant foreman of a contractor for structural ironwork. *McGinley v. Leeering* (1893) 152 Pa. 366, 25 Atl. 824.

A foreman of a gang engaged in removing stone from the side of a railway. *Kinney v. Corbin* (1890) 132 Pa. 341, 19 Atl. 141.

A gang foreman in a factory. *National Tube Works Co. v. Bodell* (1880) 96 Pa. 175; *Duncan v. A. & P. Roberts Co.* (1900) 194 Pa. 563, 45 Atl. 330.

A foreman of a lathe. *Faber v. Carlisle Mfg. Co.* (1889) 126 Pa. 387, 17 Atl. 621.

A foreman of masons. *Weger v. Pennsylvania R. Co.* (1867) 55 Pa. 460.

A foreman of gang engaged in excavation work. *Darst v. Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102.

A slate-picker boss in a mine. *McCool v. Lucas Coal Co.* (1892) 150 Pa. 638, 24 Atl. 350.

An engineer in charge of the engine room and freezing department of an ice company. *Prevost v. Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88.

A foreman of mines, appointed under the statutes. See cases cited in § 520, note 1, subd. (n), *ante*.

A foreman of a gang of men erecting a telegraph line along a railway. *Johnson v. Western N. Y. & P. R. Co.* (1901) 200 Pa. 314, 49 Atl. 794.

Rhode Island.—Much of the language used in *Wann v. Oriental Print Works* (1875) 11 R. I. 152, indicates a leaning towards the adoption of the superior servant doctrine; but there the superior servant, an engineer, was really held to be, as regards his fireman, a representative of the master merely for the reason that his order took the subordinate (a fireman) outside the scope of his original employment. See § 465, *ante*.

In a later case the superior servant doctrine as expounded in the *Ross Case* (§ 532, *ante*) was repudiated. *Hanna v. Granger* (1894) 18 R. I. 507, 28 Atl. 659 (delinquent was engineer of a steam roller). There the court declared that the decisive test of liability was the character of the negligent act; and primarily on this special ground it has subsequently been held that there can be no recovery for the defaults of the following employees:

The foreman of a gang engaged in excavating. *Larich v. Hobbs* (1891) 18 R. I. 513, 28 Atl. 661.

A foreman of a foundry. *De Wan v. Builders Iron Foundry* (1893) 18 R. I. 514, 27 Atl. 328, 28 Atl. 661.

A foreman of construction. *Franken v. Sheldon* (1897) 20 R. I. 258, 38 Atl. 370.

The foreman of a gang engaged in removing telegraph poles. *Morgridge v. Providence Teleph. Co.* (1898) 20 R. I. 386, 39 Atl. 328.

South Carolina.—The doctrine of representative capacity as deducible from the discharge of a non-delegable duty was recognized in *Gunter v. Graniteville Mfg. Co.* (1882) 18 S. C. 262, 44 Am. Rep. 573; *Losure v. Graniteville Mfg. Co.* (1882) 18 S. C. 275. But it was not until 1884 that this court had any occasion to express its opinion as to the relation of superior servants to their subordinates. In *Couch v. Charlotte, C. & A. R. Co.* (1884) 22 S. E. 557, it inclined to the view that in the control and direction of his gang, a section foreman was in the peformance of the duties of the company, and to that extent its representative, but recovery was refused on the ground that an order to get down and push behind a car did not require the servant to do anything outside the scope of his employment, and that the case was therefore controlled by the principle that ordinary risks are assumed.

In *Boatwright v. Northeastern R. Co.* (1886) 25 S. C. 128, the *Ross Case* (§§ 532, 535, *ante*) was followed, and the refusal of the trial judge to charge that a conductor was a fellow servant of a brakeman was approved. The negligence here was in failing to procure suitable coupling appliances from a stock supplied by the company, so the question of non-delegable duties was not involved.

In *Coleman v. Wilmington, C. & A. R. Co.* (1886) 25 S. C. 446, 60 Am. Rep. 516, a conductor of a material train was held to be a vice principal as respects a laborer, the court considering that the

delinquency alleged,—that of failing to readjust a switch,—constituted a breach of the duty to provide a safe and suitable track.

But these cases are no longer law, as the doctrine enunciated by the Supreme Court of the United States in the *Conroy Case* has been explicitly adopted, and a conductor is denied to be a vice principal.

Hicks v. *Southern R. Co.* (1901) 63 S. C. 559, 38 S. E. 725, 41 S. E. 753, held that it was error to introduce into a requested instruction a modification embodying the superior servant doctrine.

In *Wilson* v. *Charleston & S. R. Co.* (1897) 51 S. C. 79, 28 S. E. 91, it is apparently assumed by the court that a yard master, while performing his ordinary duties of making up and controlling the movements of trains, is a fellow servant of a car cleaner; but it is not clear from the statement of facts whether the injured person was a subordinate of the yard master or not.

On the ground that no breach of non-delegable duties was shown, it was held that there could be no recovery for the negligence of a conductor of one train in failing to give notice to the men on another train which was following his that there were "loose" cars on the track. *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182. See § 514, *ante*.

From the above summary of the effect of the decisions it is extremely difficult to say what is precisely the position of this court in regard to the representative capacity of delinquent employees. But the *obiter dictum* as to the status of section foremen in the *Couch Case* (1884) 22 S. C. 557, taken in connection with the fact that the *Ross Case* is relied on in the two rulings with respect to conductors, may be regarded as indicating an adoption of the doctrine of departmental control (chapter XXVIII., P. *ante*). So far as railway companies are concerned, the question has ceased to be of any practical importance, as they are prevented by the Const. of 1895, art. IX., § 15, from availing themselves of the defense of coservice, where the injury was the result of the negligence of a superior agent or officer of the defendant. See chapter XXXIX., *post*.

South Dakota.—The relation of supervising employees to subordinates has not been discussed in any reported case. But the doctrine of non delegable duties was recognized in *Gates* v. *Chicago, M. & St. P. R. Co.* (1892) 2 S. Dak. 422, 50 N. W. 907.

Tennessee.—This is one of the states where the superior servant doctrine prevails. A master is held to be liable for the negligence of the following employees:

A general manager. *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784; *Haynes* v. *East Tennessee & G. R. Co.* (1866) 3 Coldw. 222.

A telegraph operator (as being a helper to the superintendent). *East Tennessee, V. & G. R. Co.* v. *De Armond* (1887) 86 Tenn. 73, 5 S. W. 600 (conductor injured).

A conductor of a train. *Illinois C. R. Co.* v. *Spence* (1893) 93 Tenn. 173, 23 S. W. 211.

An engineer in charge of a train. *East Tennessee & W. N. C. R. Co.* v. *Collins* (1886) 85 Tenn. 227, 1 S. W. 883.

An engineer in charge of a part of a divided train, where it is his duty under the rules to assume control. *Louisville & N. R. Co.* v. *Hartin* (1889) 87 Tenn. 398, 3 L. R. A. 282, 10 S. W. 772.

A foreman of a fertilizer company's business. *National Fertilizer Co.* v. *Travis* (1899) 102 Tenn. 16, 49 S. W. 832.

A section foreman. *Gann* v. *Nashville, C. & St. L. R. Co.* (1893) 101 Tenn. 389, 47 S. W. 493; *Illinois C. R. Co.* v. *Bolton* (1897) 99 Tenn. 273, 41 S. W. 442; *Louisville & N. R. Co.* v. *Bowler* (1872) 9 Heisk. 866.

A track foreman on an electric street railway. *Chattanooga Electric R. Co.* v. *Lawson* (1898) 101 Tenn. 406, 47 S. W. 493.

But in *Knox* v. *Southern R. Co.* (1898) 101 Tenn. 375, 47 S. W. 491, the court refused to hold that a "boss wiper" who had certain duties of a higher grade than those of an ordinary wiper, such as opening the doors, giving the signal for the moving of the engine, and ordering the hands to go and adjust the turntable, "stood in the place and stead of the master" in the discharge of his duties.

A superior servant is a vice principal only as to servants under his control (§ 514, *ante*). *East Tennessee, V. & G. R. Co.* v. *Rush* (1885) 15 Lea, 145; *Nashville, C. & St. L. R. Co.* v. *Wheless* (1882) 10 Lea, 741, 43 Am. Rep. 317; *Coal Creek Min. Co.* v. *Davis* (1891) 90 Tenn. 711, 18 S. W. 387.

In other recent cases the master's responsibility has been contracted by the adoption of the theory of dual capacity, which has been applied in several cases.

Nashville, C. & St. L. R. Co. v. *Handman* (1884) 13 Lea, 423; *Ulen* v. *Goosman* (1893) 92 Tenn. 385, 21 S. W. 760; *Gann* v. *Nashville, C. & St. L. R. Co.* (1898) 101 Tenn. 380, 47 S. W. 493; *National Fertilizer Co.* v. *Travis* (1899) 102 Tenn. 16, 49 S. W. 832.

Texas.—An employer is liable for the negligence of a general manager. *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 562; *Sulphur Lumber Co.* v. *Kelley* (1895) Tex. Civ. App.) 30 S. W. 696.

In the earlier cases all employees of lower grades than general managers were held to be mere servants,—as a conductor. *Robinson* v. *Houston & T. C. R. Co.* (1877) 46 Tex. 540. And a captain. *Price* v. *Houston Direct Nav. Co.* (1877) 46 Tex. 537.

But afterwards the court adopted the doctrine that the possession of a power of control, if accompanied by a power of hiring and discharging the injured person, constitutes an employee a vice principal. See § 523, note 6, *ante*.

It had been explained that, when it was laid down in an earlier case (*Missouri P. R. Co.* v. *Williams* [1889] 75 Tex. 4, 12 S. W. 835) that an employee who has charge of a special department of the employer's business, with the power to hire the servants in his department, is not a fellow servant of those under his control, this did not imply that the department of the business must necessarily be a principal one; but that the rule is applicable to any special business of the empdoyer, which is carried on by a number of employees under another who has power to employ and discharge them. *Ft. Worth & D. C. R. Co.* v. *Peters* (1894) 87 Tex. 222, 27 S. W. 257.

Employers have been held liable for the negligence of the following employees.

A master mechanic. *Douglas* v. *Texas Mexican R. Co.* (1885) 63 Tex. 561.

The foreman of a railway company's paint shop. *International & G. N. R. Co.* v. *Hinzie* (1891) 82 Tex. 623, 18 S. W. 681.

A superintendent of the work of constructing a bridge. *San Antonio & A. P. R. Co.* v. *McDonald* (1895) Tex. Civ. App.) 31 S. W. 72.

A night yard master. *Texas & P. R. Co.* v. *Reed* (1895) 88 Tex. 439, 31 S. W. 1058.

A yard foreman. *San Antonio & A. P. R. Co.* v. *Reynolds* (1895) Tex. Civ. App.) 30 S. W. 846.

A section foreman. *Missouri P. R. Co.* v. *James* (1888) Tex.) 10 S. W. 332; *Sweeney* v. *Gulf, C. & S. F. R. Co.* (1892) 84 Tex. 433, 19 S. W. 555; *Gulf, C. & S. F. R. Co.* v. *Wells* (1891) Tex.) 16 S. W. 1025.

A foreman of the construction of a telegraph line. *Postal Teleg. Cable Co.* v. *Coole* (1900) Tex. Civ. App.) 57 S. W. 942.

A foreman of a sawmill. *Sulphur Lumber Co.* v. *Kelley* (1895) Tex. Civ. App.) 30 S. W. 696.

A conductor, as having no power of discharge, was denied to be a vice principal, in *Campbell* v. *Cook* (1894) 86 Tex. 630, 26 S. W. 486.

The doctrine of dual capacity is rejected in Texas. See § 516, *ante*.

Utah.—This court has adopted the superior servant doctrine, and has held masters liable for the negligence of the following employees:

A general manager. *Reddon* v. *Union P. R. Co.* (1887) 5 Utah, 344, 15 Pac. 262.

A conductor. *Openshaw* v. *Utah & W. R. Co.* (1889) 6 Utah, 132.

A foreman of a switching crew. *Armstrong* v. *Oregon Short Line & U. N. R. Co.* (1893) 8 Utah, 420, 32 Pac. 693.

An underground foreman of a mine. *Cunningham* v. *Union P. R. Co.* (1885) 4 Utah, 206, 7 Pac. 795; *Tetlow* v. *Brooklyn Lead Min. Co.* (1886) 4 Utah, 468, 11 Pac. 612.

A foreman of a railway gravel pit. *Anderson* v. *Ogden Union R. & Depot Co.* (1892) 8 Utah, 128, 30 Pac. 305.

Vermont.—The superior servant doctrine was disapproved in *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590 (*arguendo*); but the actual point settled by that case is that certain duties of the master are non-delegable. It overruled a former decision to the effect that the master mechanic was not a representative of the defendant company. *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473.

Virginia.—The earliest case in which the relation of a superior servant to a subordinate was directly presented was *Woon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401, where a brakeman was injured through a detailment caused partly by the way in which the train was made up, and partly by the excessive speed at which it was run. The court held that a conductor in control of men on a material train, and of its makeup generally, is not a fellow servant of a brakeman, but his

superior, holding "a position wherein he exercises discretionary authority," and charged with "duties for the proper performance of which the law holds the company itself responsible, any negligence on his part in this behalf is the negligence of the company itself." This case was said, in *Norfolk & W. R. Co. v. Nuckols* (1895) 91 Va. 193, 21 S. E. 342, to have been really decided on the ground that the negligence of the master was one of two concurring causes of the accident. But the instruction which it was held error to refuse unquestionably embodies the superior servant doctrine.

In 1887, following the *Moon Case* (1884) 78 Va. 745, 49 Am. Rep. 401, a section foreman was held not to be a fellow servant of a section man in regard to the duty of signaling the approach of a train. *Torian v. Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339.

During the following years we find reported several cases holding railway companies liable for the negligence of conductors. *Johnson v. Richmond & A. R. Co.* (1888) 84 Va. 713, 5 S. E. 707 (conductor ordered inexperienced brakeman, a boy sixteen years of age, to couple cars, and failed to place himself in such a position as to be able to give signals which would have brought the cars gently together); *Lyers v. Richmond & D. R. Co.* (1888) 84 Va. 679, 5 S. E. 582 (brakeman caught between the lumber projecting from one car and another car which he was coupling to it cried out for help, and the conductor, without waiting to see whether the cars were connected, ordered the engineer to go ahead quickly, the result being that the brakeman fell when released through the taking up of the slack, and was run over); *Richmond & D. R. Co. v. De Watts* (1894) 90 Va. 405, 18 S. E. 837 (assumed, but case turned on contributory negligence); *Richmond & D. R. Co. v. Brown* (1893) 89 Va. 749, 17 S. E. 132 (order to unload car in an unnecessarily dangerous manner by crossing a track where a train might be expected to pass); *Richmond & D. R. Co. v. Williams* (1889) 86 Va. 165, 9 S. E. 990 (demurrer to evidence properly overruled where a brakeman was injured by the negligence of his conductor in ordering him to ascend a defective ladder while the train was standing, and in starting the train knowing the dangerous position in which the brakeman was placed).

The argument of the court in *Norfolk & W. R. Co. v. Donnelly* (1892) 88 Va. 853, 14 S. E. 692, evinced a strong disposition on its part to discard the superior servant doctrine altogether, and to adopt the rule that the character of the delinquent servant's act is the true test by which to determine whether the relation of coservice exists. But the change of opinion thus foreshadowed did not immediately take effect, for in 1895 a yard master was assumed, for the purposes of a decision, to be a vice principal. *Norfolk & W. R. Co. v. Brown* (1895) 91 Va. 668, 22 S. E. 496. See also *Norfolk & W. R. Co. v. Lindamood* (1892; Va.) 14 S. E. 694, where it is distinctly implied that the plaintiff might have recovered if his decedent had been subject to the control of the delinquent servant.

In 1896 a stone company was held liable for the negligence of the foreman in full charge of its quarry. *Richmond Granite Co. v. Bailey*, 92 Va. 554, 24 S. E. 232 (breach of duty to warn). But this is a decision which might possibly have been arrived at without reference to the superior servant doctrine.

The definite abandonment of that theory seems to be indicated by two decisions in 1897, denying the right to recover for the negligence of a gang boss in locomotive works. *Richmond Locomotive & Mach. Works v. Ford* (1897) 94 Va. 627, 27 S. E. 509. And of a gang foreman in quarry. *Moore Lime Co. v. Richardson* (1897) 95 Va. 326, 28 S. E. 334.

So also, in 1898, when a mining boss was held to be a vice principal in respect to the performance of nonassignable duties, and a mere servant as regards duties affecting the administration of the work. *Russell Creek Coal Co. v. Wells* (1898) 96 Va. 416, 31 S. E. 614.

Finally, the decisions as to conductors were overruled by *Norfolk & W. R. Co. v. Houchins* (1897) 95 Va. 398, *sub nom. Norfolk & W. R. Co. v. Swaine*, 46 L. R. A. 359, 28 S. E. 578. The court of appeals considered that the *Ross Case* (§§ 522, 535, *ante*), had been "completely overturned" by later decisions. So far as regards the decisions rendered up to the time when this opinion was expressed, such a statement is clearly erroneous, as will be apparent from an examination of *Baltimore & O. R. Co. v. Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914. But the statement correctly describes

what is probably the actual effect of the *Conroy Case* (§§ 535, note 1, subd. (c), *ante*).

The doctrine of a dual capacity was recognized in *Southern R. Co.* v. *Yauzy* (1900) 98 Va. 692, 37 S. E. 285.

Washington.—That a general manager was a vice principal was recognized in *Bateman* v. *Peninsular R. Co.* (1898) 20 Wash. 133, 54 Pac. 996; *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334.

Following the principle of the *Ross Case* (§§ 532, 535, *ante*), this court also holds employers liable for the negligence of managers of departments, by giving that expression a more liberal construction than it receives in some jurisdictions. Thus the servant has been allowed to recover where the delinquent was one of the following employees:

An assistant superintendent in charge of the lumber yard of a sawmill company. *Zintek* v. *Stimson Mill Co.* (1893) 6 Wash. 178, 32 Pac. 997, 33 Pac. 1055 (1894) 9 Wash. 395, 37 Pac. 34.

The superintendents of each of two mining tunnels which are being excavated in the same hill. *Uren* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174.

The foreman of an important piece of railway construction work, carried on at a distance from the headquarters of the general road master of the line. *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334 (see § 535, *ante*).

Either a captain or a mate of a ship. *Keating* v. *Pacific Steam Whaling Co.* (1899) 21 Wash. 415, 58 Pac. 224. But this ruling, so far as the mate is concerned, is clearly inconsistent with any reasonable construction of the doctrine of departmental control.

Employers are not liable for the negligence of the following employees below the grade of departmental managers:

A "fire boss," whose duty it is merely to direct the miners to leave dangerous places at which gas accumulates, but who has no control over their work. *Morgon* v. *Carbon Hill Coal Co.* (1893) 6 Wash. 577, 34 Pac. 152, 772 (no right, at the time of the accident, to control the action of the other miners, even if a vice principal at other times).

A "pit boss" in a mine. *Hughes* v. *Oregon Improv. Co.* (1898) 20 Wash. 294, 55 Pac. 119.

A "top boss" in a mine. *Hughes* v. *Oregon Improv. Co.* (1898) 20 Wash. 294, 55 Pac. 119.

The doctrine of dual capacity is recognized in this state. *Sayward* v. *Carlson* (1890) 1 Wash. 29, 23 Pac. 830.

West Virginia.—Upon the authority of the *Ross Case* (§§ 532, 535, *ante*) a conductor was in several decisions held to be a vice principal. *Madden* v. *Chesapeake & O. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695 (breach of rules as to running orders caused a collision). *Haney* v. *Pittsburgh, C. C. & St. L. R. Co.* (1893) 38 W. Va. 570, 18 S. E. 748 (collision caused by conductor's neglect of signal to reduce speed). In one of them, even as to a brakeman on another train. *Daniel* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 397, 16 L. R. A. 383, 15 S. E. 162 (track not kept clear for other trains; but this construction of the *Ross Case* is inconsistent with a later decision of the Supreme Court of the United States; see § 514, *ante*).

In another decision a railway company was even made to answer for the negligence of a section foreman. *Cromwell* v. *Pittsburgh, C. & St. L. R. Co.* (1888) 30 W. Va. 798, 6 S. E. 31. But the *Ross Case* plainly did not warrant such a ruling, though, as we have already seen, a similar misconception as to its meaning prevailed even in some of the Federal courts for several years. See *supra*.

None of these cases are any longer law in this state. A conductor is held not to be a departmental vice principal, but merely an employee who performs a particular piece of work in the operating department. *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258 (negligent order to engineer while brakeman was coupling). There the rule was adopted that the nature of the function discharged at the time of the injury is the true test, except where the supervising employee is a general or departmental manager. The court seems to have assumed that the *Ross Case* was overruled by *Northern P. R. Co.* v. *Hambly* (1894) 154 U. S. 349, 38 L. ed. 1009, 14 Sup. Ct. Rep. 983, and *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914. This theory, if such was the basis of the decision, is not justified by anything said in the cases cited, but it embodies what is now the doctrine of the Supreme Court of the United States with regard to the status of conductors. See *supra*.

Wisconsin.—General managers are vice principals. *Klochinski* v. *Shores Lumber Co.* (1896) 93 Wis. 417, 67 N. W. 934 (negligent act here was held to be nonofficial); *Schultz* v. *Chicago, M. & St. P. R. Co.* (1879) 48 Wis. 375, 4 N. W. 399.

The doctrine of departmental control does not seem to have been explicitly adopted in this state, but a captain of ship, who is, for all practical purposes, at all events, a departmental manager as respects the lastness of a ship owner (see § 535, note 1, subd. (1), *ante*), has been held to be a vice principal. *Thompson* v. *Hermann* (1879) 47 Wis. 602, 32 Am. Rep. 784, 3 N. W. 579. *Contra*, *Mathews* v. *Case* (1884) 61 Wis. 491, 50 Am. Rep. 151, 21 N. W. 513, where a captain was declared to be a mere fellow servant of his mate.

In two other cases railway companies were held liable for the negligence of a foreman in full charge of a pile driver. *Schultz* v. *Chicago, M. & St. P. R. Co.* (1879) 48 Wis. 375, 4 N. W. 399; and of a master mechanic. *Brabbits* v. *Chicago & N. W. R. Co.* (1875) 38 Wis. 289. But these decisions were probably based rather on the ground of a breach of a non-delegable duty, than on the theory of departmental control.

A master is not required to answer for the negligence of a foreman of a water company in charge of the pipe laying. *Johnson* v. *Ashland Water Co.* (1890) 77 Wis. 51, 45 N. W. 807. Nor a foreman of a switching crew in a railway yard. *Flannagan* v. *Chicago & N. W. R. Co.* (1880) 50 Wis. 462, 7 N. W. 337. Nor of a conductor. *Home* v. *Chicago & N. W. R. Co.* (1883) 58 Wis. 525, 17 N. W. 420. Nor of a foreman subordinate to a master carpenter. *Peschel* v. *Chicago, M. & St. P. R. Co.* (1885) 62 Wis. 338, 21 N. W. 269.

The dual capacity of vice principals is recognized in *Dreyer* v. *American Exp. Co.* (1882) 55 Wis. 453, 13 N. W. 471; *Klochinski* v. *Shores Lumber Co.* (1896) 93 Wis. 417, 67 N. W. 934.

Wyoming.—A gang boss in a railway shops under a master mechanic, is not a vice principal. *McBride* v. *Union P. R. Co.* (1889) 3 Wyo. 247, 21 Pac. 687

CHAPTER XXXI.

VICE PRINCIPALSHIP AS DETERMINED WITH REFERENCE TO THE CHARACTER OF THE ACT WHICH CAUSED THE INJURY.

550. Introductory.

A. MASTER LIABLE FOR ANY NEGLIGENCE WHICH INVOLVES THE BREACH OF ONE OF HIS PERSONAL DUTIES.

551. Generally.
552. Various forms in which the master's responsibility is stated.
553. Subsidiary consequences deduced from the general principle.
554. Rationale of the doctrine of non-delegable duties.
555. Master sometimes liable both on account of the character of the negligent act and the official position of the negligent servant.
556. Doctrine of non-delegable duties applicable to artificial persons.
557. Servants of contractors, when precluded from availing themselves of the doctrine in actions against their masters.
558. Delegation of personal duties to an independent contractor; effect of.
559. Same subject continued. Opposing doctrines discussed.
560. Massachusetts doctrine.
561. Servants acting in a dual capacity.
562. Pleading.
563. Burden of proof.
564. Propriety of instructions.
564a. Functions of court and jury.

B. WHAT DUTIES ARE DEEMED TO BE NON-DELEGABLE.

565. Duties imposed by statute.
a. Quality of duty unchanged by statute.
b. Quality of duty altered.
566. Duty to see that the inorganic instrumentalities of the work are reasonably safe; general rule stated.
567. Duty to see that the inorganic instrumentalities of work, as originally supplied, satisfy the legal standard of safety.
a. English, Scotch, and colonial doctrine.
b. American doctrine.
568. Duty to see that the inorganic instrumentalities are maintained in a suitable condition for the work to be done held to be non-delegable.
569. Same duty held to be delegable.
570. Duty to see that worn-out or otherwise defective parts of instrumentalities are replaced by suitable substitutes.
571. Duty to furnish proper medical treatment to sick or injured servants.
572. Duty to hire suitable servants.
573. Duty to employ servants sufficient in number for the work in hand.
574. Duty to frame rules and regulations for the conduct of the business.
575. Duty to bring rules and regulations to the knowledge of employees.

576. Duty to carry out regulations, how far absolute; generally.
577. Duty to carry out regulations with respect to the movements of trains.
a. Doctrine that train despatchers are vice principals: generally.
b. Train despatchers represent the company as to special orders suspending regular time-tables.
c. Doctrine that train despatchers are not vice principals.
d. Liability of railway companies for the negligence of servants who transmit the orders or see that they are carried out.
578. Duty to impart information as to permanent dangers normally incident to the work at the time it is entered upon.
579. Duty to impart information as to permanent dangers superadded to the environment after the work has begun.
580. Duty to warn as to dangers of the transitory class, occasionally supervening during the progress of the work.
581. Duty to inspect instrumentalities; generally.
582. Duty to inspect instrumentalities at the time they are first brought into use.
583. Duty to inspect instrumentalities during the time they are kept in use.
584. Duty to inspect instrumentalities belonging to another person, but temporarily used by the master.

550. Introductory.—In the following chapter it is proposed to review the cases which illustrate the various aspects of a theory which produces results sometimes coincident with, and sometimes different from, those which are obtained by the application of the principles discussed in the preceding chapter,—the theory, namely, that the question whether a delinquent servant was or was not a vice principal as regards the injured person is ultimately determinable by the character of the act which caused the injury.[1]

The practical effect of this theory is that the defense of common employment is excluded, or allowed to prevail, according as the delinquency in question was or was not a breach of what the law regards as a "direct, personal, and absolute obligation, from which nothing but performance can relieve" the master.[2]

The subjoined table of cases, arranged according to states, is designed merely to indicate the present territorial limits of this theory, so far as it has actually received judicial recognition. The separate lists of authorities do not pretend to be exhaustive as regards each particular jurisdiction.[3]

[1] It may be observed in this place that the formal adoption of the principle is of comparatively recent date, the first case in which it was explicitly enunciated being *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545. In *Wright* v. *New York C. R. Co.* (1862) 25 N. Y. 562, the question whether the negligence of an agent intrusted with the function of hiring a servant was a vice principal was apparently viewed as debatable.

[2] The phrase as quoted is taken from *Prevost* v. *Citizens' Ice & Refrigerating Co.* (1898) 185 Pa. 617, 40 Atl. 88.

[3] *Federal courts.*—*Hough* v. *Texas &*

In some respects the test thus furnished has greatly simplified the subject, and tempered the harshness of the doctrine of common em-

P. R. Co. (1879) 100 U. S. 213, 25 L. ed. 612; *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 37 L. ed. 772, 13 Sup. Ct. Rep. 914; *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590; *Union P. R. Co.* v. *Daniels* (1894) 152 U. S. 684, *sub nom. Union P. R. Co.* v. *Snyder*, 38 L. ed. 597, 14 Sup. Ct. Rep. 756; *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843; *Western Coal & Min. Co.* v. *Ingraham* (1895) 17 C. C. A. 71, 36 U. S. App. 1, 70 Fed. 219; *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 215, 58 Fed. 525; *Woods* v. *Lindrall* (1891) 1 C. C. A. 34, 4 U. S. App. 49, 48 Fed. 73; *Texas & P. R. Co.* v. *Thompson* (1895) 17 C. C. A. 524, 30 U. S. App. 549, 70 Fed. 941, 17 C. C. A. 526, 30 U. S. App. 553, 71 Fed. 531; *Atchison, T. & S. F. R. Co.* v. *Mulligan* (1895) 14 C. C. A. 547, 34 U. S. App. 1, 67 Fed. 569.

District of Columbia.—*Mackey* v. *Baltimore & P. R. Co.* (1890) 8 Mackey, 282; *Baltimore & P. R. Co.* v. *Elliott* (1896) 9 App. D. C. 341.

Alabama.—*Wolker* v. *Bolling* (1853) 22 Ala. 294; *Tyson* v. *South & North Ala. R. Co.* (1878) 61 Ala. 554, 32 Am. Rep. 8.

Arkansas.—*Little Rock & M. R. Co.* v. *Borry* (1893) 58 Ark. 198, 25 L. R. A. 386, 23 S. W. 1097; *Fones* v. *Phillips* (1882) 39 Ark. 17, 43 Am. Rep. 264.

California. — *Sanborn* v. *Madera Flume & Trading Co.* (1886) 70 Cal. 261, 11 Pac. 710; *Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20; *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 34 Pac. 720; *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559; *Daves* v. *Southern P. Co.* (1893) 98 Cal. 19, 32 Pac. 708; *Nixon* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803. In the last-cited case it was said that the case of *McKune* v. *California Southern R. Co.* (1885) 66 Cal. 302, 5 Pac. 482; and *Brown* v. *Sennett* (1885) 68 Cal. 225, 9 Pac. 74, were perhaps inconsistent with the doctrine that the character of a duty performed by a supervising officer is the test by which it is determined whether he is a vice principal or a mere servant, and had been criticised and doubted, if not overruled.

Colorado. — *Wells* v. *Coe* (1886) 9 Colo. 159, 11 Pac. 50; *Grant* v. *Varney* (1895) 21 Colo. 329, 40 Pac. 771; *Denver Tramway Co.* v. *Crumbaugh* (1897) 23 Colo. 363, 48 Pac. 503.

Connecticut.—*Darrigan* v. *New York & N. E. R. Co.* (1885) 52 Conn. 285, 52 Am. Rep. 590; *McElligott* v. *Randolph* (1891) 61 Conn. 157, 22 Atl. 1094; *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 653.

Delaware.—*Murphy* v. *Hughes* (1898) 1 Penn. (Del.) 250, 40 Atl. 187; *Foster* v. *Posey* (1888) 8 Houst. (Del.) 168, 14 Atl. 545.

Florida.—*Duval* v. *Hunt* (1884) 34 Fla. 85, 15 So. 876.

Georgia.—*Chesney* v. *Ocean S. S. Co.* (1893) 92 Ga. 726, 19 S. E. 33.

Idaho.—*Palmer* v. *Utah & N. R. Co.* (1887) 2 Idaho, 290, 13 Pac. 425.

Illinois.—*Chicago & N. W. R. Co.* v. *Swett* (1867) 45 Ill. 197, 92 Am. Dec. 206; *Chicago, B. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109; *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285; *Chicago & I. R. Co.* v. *Kneirim* (1894) 152 Ill. 458, 39 N. E. 324; *Chicago & I. R. R.* v. *Maroney* (1897) 170 Ill. 520, [illegible] E. 953; *Norton* v. *Volzke* (18[illegible] 8 Ill. 402, 41 N. E. 1085; *Chi[illegible]* *I. R. Co.* v. *Scanlan* (1897) 170 [illegible], 48 N. E. 826; *Edward Hines Lumber Co.* v. *Ligos* (1898) 172 Ill. 315, 50 N. E. 225.

Indiana.—*Atlas Engine Works* v. *Randall* (1885) 100 Ind. 293, 50 Am. Rep. 798; *Cleveland, C. C. & St. L. R. Co.* v. *Ward* (1897) 147 Ind. 256, 45 N. E. 325, 46 N. E. 462; *Capper* v. *Louisville, E. & St. L. R. Co.* (1885) 103 Ind. 305, 2 N. E. 749; *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181; *Justice* v. *Pennsylvania Co.* (1892) 130 Ind. 321, 30 N. E. 303; *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655; *Kerner* v. *Baltimore & O. S. W. R. Co.* (1897) 149 Ind. 21, 48 N. E. 364; *New Pittsburgh, Coal & Coke Co.* v. *Peterson* (1893) 136 Ind. 398, 35 N. E. 7; *Ohio & M. R. Co.* v. *Pearcy* (1891) 128 Ind. 197, 27 N. E. 479; *Cincinnati, H. & D. R. Co.* v. *McMullen* (1889) 117 Ind. 439, 20 N. E. 287.

Iowa.—*Braun* v. *Chicago, R. I. & P. R. Co.* (1880) 53 Iowa, 595, 36 Am. Rep. 243, 6 N. W. 5; *Fink* v. *Des Moines*

ployment. But, on the other hand, it has created several new and extremely embarrassing problems, and has even, by being treated as the

Ice Co. (1892) 84 Iowa, 321, 51 N. W. 155.

Kansas.—Kansas P. R. Co. v. *Salman* (1875) 14 Kan. 512; *Atchison, T. & S. F. R. Co.* v. *Moore* (1883) 29 Kan. 632; *Kelley* v. *Ryus* (1892) 48 Kan. 120, 29 Pac. 144; *Atchison, T. & S. F. R. Co.* v. *McKee* (1887) 37 Kan. 592, 15 Pac. 484; *Missouri P. R. Co.* v. *Dwyer* (1886) 36 Kan. 58, 12 Pac. 352; *St. Louis & S. F. R. Co.* v. *Weaver* (1886) 35 Kan. 412, 57 Am. Rep. 176, 11 Pac. 408.

Kentucky.—McLeod v. *Ginther* (1882) 80 Ky. 339; *Louisville, C. & L. R. Co.* v. *Carens* (1873) 9 Bush. 559; *Kentucky C. R. Co.* v. *Corr* (1897) 19 Ky. L. Rep. 1172, 43 S. W. 193.

Louisiana.—Stucke v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342; *Ferris* v. *Hernsheim Bros.* (1899) 51 La. Ann. 178, 24 So. 771.

Maine.—Shanny v. *Androscoggin Mills* (1876) 66 Me. 420; *Small* v. *Allington & C. Mfg. Co.* (1901) 94 Me. 551, 48 Atl. 177.

Massachusetts.—Ford v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598; *Wheeler* v. *Wason Mfg. Co.* (1883) 135 Mass. 294. See, however, § 560, *infra*.

Michigan.—Shumway v. *Walcarth & N. Mfg. Co.* (1894) 98 Mich. 411, 57 N. W. 251; *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034; *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663; *Van Dusen* v. *Letellier* (1889) 78 Mich. 492, 44 N. W. 572; *Fox* v. *Spring Lake Iron Co.* (1891) 89 Mich. 387, 50 N. W. 872.

Minnesota.—Brayn v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484; *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020; *Tierney* v. *Minneapolis & St. L. R. Co.* (1885) 33 Minn. 311, 53 Am. Rep. 35, 23 N. W. 229; *Carlson* v. *Northwestern Teleph. Exchange Co.* (1896) 63 Minn. 428, 65 N. W. 914.

Missouri.—Long v. *Pacific R. Co.* (1877) 65 Mo. 225; *Condon* v. *Missouri P. R. Co.* (1883) 78 Mo. 567; *Bowen* v. *Chicago, R. & K. C. R. Co.* (1888) 95 Mo. 268, 8 S. W. 230; *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588; *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 87, 16 S. W. 924; *Herder* v. *Buck's Stove & Range Co.* (1896) 136 Mo. 3, 37 S. W. 115; *Coontz* v. *Missouri P. R. Co.* (1894) 121 Mo. 652, 26 S. W. 661.

Montana.—Kelley v. *Cable Co.* (1887) 7 Mont. 70, 14 Pac. 633.

Nebraska.—Chicago, B. & Q. R. Co. v. *Kellogg* (1898) 54 Neb. 127, 74 N. W. 454.

New Hampshire.—Jaques v. *Great Falls Mfg. Co.* (1891) 66 N. H. 482, 13 L. R. A. 824, 22 Atl. 552.

New Jersey.—Maher v. *Thropp* (1896) 59 N. J. L. 186, 35 Atl. 1057.

New Mexico.—Cerrillos Coal R. Co. v. *Deserant* (1897) 9 N. M. 49, 49 Pac. 807. Following *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590.

New York.—Flike v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545; *Booth* v. *Boston & A. R. Co.* (1878) 73 N. Y. 38, 29 Am. Rep. 97; *Hofnagle* v. *New York C. & H. R. R. Co.* (1874) 55 N. Y. 608; *Benzing* v. *Steinway* (1886) 101 N. Y. 549, 5 N. E. 449; *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369; *Loughlin* v. *State* (1887) 105 N. Y. 159, 11 N. E. 371; *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466; *Crispin* v. *Babbitt* (1880) 81 N. Y. 521, 37 Am. Rep. 521; *Wann* v. *Delaware & H. Canal Co.* (1883) 91 N. Y. 495.

North Carolina.—Chesson v. *John L. Roper Lumber Co.* (1896) 118 N. C. 59, 23 S. E. 925.

North Dakota.—Ell v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222; *Cameron* v. *Great Northern R. Co.* (1898) 8 N. D. 124, 77 N. W. 1016.

Oregon.—Anderson v. *Bennett* (1888) 16 Or. 515, 19 Pac. 765; *Hast* v. *Ivers* (1898) 34 Or. 247, 54 Pac. 950.

Pennsylvania.—Ross v. *Walker* (1890) 139 Pa. 42, 21 Atl. 157, 159; *Prescott* v. *Ball Engine Co.* (1896) 176 Pa. 459, 35 Atl. 224; *Lehlering* v. *Struthers* (1893) 157 Pa. 312, 27 Atl. 720.

Rhode Island.—Mulvey v. *Rhode Island Locomotive Works* (1883) 14 R. I. 204; *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659; *Di Marcho* v. *Builders Iron Foundry* (1893) 18 R. I. 514, 27 Atl. 328, 28 Atl. 661.

South Carolina.—Jenkins v. *Richmond*

only admissible gauge of liability, operated so as to narrow the servant's rights of recovery.[4]

A. Master liable for any negligence which involves the breach of one of his personal duties.

551. Generally.— The principle stated in the preceding section will, in the first place, be considered under the form which it assumes when it is treated as constituting a reason for excluding the defense of common employment.

For the purposes of the application of that principle it is assumed that an implied incident of the contract of employment is that the master undertakes, as regards the servant, certain obligations which are spoken of as "personal duties;"[1] "positive duties;"[2] "personal, positive duties;"[3] "duties which the master owes personally and absolutely to his servants;"[4] "duties which a master owes, as such, to a servant entering his employment;"[5] or "absolute, personal duties."[6]

[6] *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 245, 58 Fed. 525.

The existence of such duties being predicated, it follows, as a necessary corollary from the quality ascribed to them, that the master must, at his peril, see that they are discharged with reasonable care, whether he undertakes their performance himself, or employs an agent to perform them in his stead. The judicial statements of the doctrine thus deduced are couched in extremely varied phraseology, but may be conveniently classified under a few main groups. So far as the actual liability of the employer is concerned, it is, of course, quite immaterial from which standpoint the position of the employee who represents him is considered; and, as might be expected, a court is apt to pass from one form of expression to the other in the course of the same discussion. They all connote the conception that of the duties imposed by the law upon an employer "he cannot relieve himself except by performance."[7]

552. Various forms in which the master's responsibility is stated.—Having regard to the diverse language in which the principle now under review has been formulated, it will be convenient to distribute the judicial statements into several distinct groups.

1. In one group of statements prominence is given to the conception that the character of the negligent act is, in every case, the test of vice principalship.[1]

[7] *Atchison, T. & S. F. R. Co.* v. *Sceley* (1894) 54 Kan. 21, 37 Pac. 104.

[1] "The question turns rather on the character of the act than on the relations of the employees to each other. If the act is one done in the discharge of some positive duty of the master to the servant, then negligence in the act is the negligence of the master; but if it be not one in the discharge of such positive duty, then there should be some personal wrong on the part of the employer before he is held liable therefor." *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 387, 37 L. ed. 772, 781, 13 Sup. Ct. Rep. 914.

"Whether the master is liable for the negligence of a servant intrusted with the discharge of one of the absolute, personal duties which the law imposes on him is determined in any given case by the nature of the act in the performance of which he was guilty of the negligence. If he was engaged in discharging an absolute duty of the master, the latter is liable; otherwise he is not." *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 245, 58 Fed. 525.

"In every case the position of vice principal must be determined by ascertaining whether the act performed or duty omitted is one the doing of which is charged upon the master and delegated to the servant,—in other words, whether the servant has been put in the place of the master as to the particular service performed or omitted. If he has, and his act or omission, while in that particular service, involves a duty owing by the master to the servant, the master is liable for injury resulting from such act or omission, if the injured servant is free from negligence and has not assumed the hazard." *New Pittsburgh Coal & Coke Co.* v. *Peterson* (1894) 136 Ind. 398, 35 N. E. 7.

"Whenever it is sought to hold the master liable for the act or neglect of his foreman, the question to be first considered is whether the negligence complained of relates to anything which it was the duty of the principal to do. If it does, then the principal is liable; for he must see, at his peril, that his own obligations to his workmen are properly discharged. If it does not, he is not liable; for all his workmen are liable to each other for the consequences of their negligence, respectively, and he does not insure them against each other

2. In another, an affirmation of the crucial importance of the character of the negligent act appears in connection with an assertion that the rank, title, or official position of the offending servant, and the degree of control exercised by him over the plaintiff, are not material factors in the determination of the master's liability.[2]

by the mere fact of employing them." *Ross* v. *Walker* (1890) 139 Pa. 42, 21 Atl. 157, 159.

"The test as to whether an employee is the representative of the master is not whether such employee has the power to employ or discharge hands, or to purchase or change machinery, for, while these are some of the duties of the master, they are not all his duties; and hence an employee who is not intrusted with either of these powers may still be the representative of the master. The true test is whether the person in question is employed to do any of the duties of the master." *Gunter* v. *Graniteville Mfg. Co.* (1882) 18 S. C. 270, 44 Am. Rep. 573.

"The question as to whether the relation of fellow servants exists in a given case is, in our opinion, determined by an inquiry into the nature of the service at the particular time in question. If, at the time the offending servant performed the act by which another servant was injured, he was in the performance of a duty which the master owed to his servants, he was not a fellow servant; for the rule is fundamental that the master cannot rid himself of the duty he owes to his servants by delegating his authority to another, and if he attempts to do so, the person to whom he delegates the power to act is a vice principal, and not a fellow servant. On the other hand, if at the time of the alleged negligence the servant was not engaged in the performance of a duty which the master owed to his servants, but was in the discharge of a duty which the servant acting owed to the master, he will be held to be a fellow servant with others engaged in the same common business, and the master will not be liable for any injury inflicted upon such fellow servant by reason of his negligence." *Justice* v. *Pennsylvania Co.* (1892) 130 Ind. 321, 30 N. E. 303.

"A railroad corporation may be controlled by competent, watchful, and prudent directors, who exercise the greatest caution in the selection of a superintendent or general manager, under whose supervision and order its affairs and business, in all of its departments, are conducted. The latter, in turn, may observe the same caution in the appointment of subordinates at the head of the several branches or departments of the company's service. But the obligation still remains to provide and maintain in suitable condition, the machinery and apparatus to be used by its employees,—an obligation the more important, and the degree of diligence in its performance the greater, in proportion to the dangers which may be encountered. Those, at least, in the organization of the corporation, who are invested with controlling or superior authority in that regard represent its legal personality; their negligence, from which injury results, is the negligence of the corporation. The latter cannot, in respect of such matters, interpose between it and the servant who has been injured, without fault on his part, the personal responsibility of an agent who, in exercising the master's authority, has violated the duty he owes, as well to the servant as to the corporation." *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 218, 25 L. ed. 612, 615.

"The test of liability is not the safety of the place or appliance at the time of the injury, but the character of the duty, the negligent performance of which caused the injury." *Sofield* v. *Guggenheim Smelting Co.* (1900) 64 N. J. L. 605, 50 L. R. A. 417, 46 Atl. 711.

The true rule "makes the character of the act or omission wherein the negligence exists the test of the master's responsibility therefor." *McElligott* v. *Randolph* (1891) 61 Conn. 157, 22 Atl. 1094.

"The test must always be whether the negligent act or omission was in discharge of the master's or the servant's duty." *Curley* v. *Hoff* (1899) 62 N. J. L. 758, 42 Atl. 731.

[2] The true rule is to hold the corporation liable for negligence in respect to such acts and duties as it is required to perform as master, without regard to the rank or title of the agent intrusted with their performance. As to such acts the agent occupies the place of the corporation, and the latter is liable for the manner in which they are performed.

Flike v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545; quoted in *Crispin* v. *Babbitt* (1880) 81 N. Y. 521, 37 Am. Rep. 521.

In *Fuller* v. *Jewett* (1880) 80 N. Y. 46, 36 Am. Rep. 575, the court, after citing earlier cases, proceeded thus: "We understand the principle of these cases to be that acts which the master, as such, is bound to perform for the safety and protection of his employees, cannot be delegated so as to exonerate the former from liability to a servant who is injured by the omission to perform the act or duty, or by its negligent performance, whether the nonfeasance or misfeasance is that of a superior officer, agent, or servant, or of a subordinate or inferior agent or servant to whom the doing of the act, or the performance of the duty, has been committed. In either case, in respect to such act or duty the servant who undertakes, or omits to perform it, is the representative of the master, and not a mere coservant with one who sustains the injury. The act or omission is the act or omission of the master, irrespective of the grade of the servant whose negligence caused the injury, or of the fact whether it was or was not practicable for the master to act personally, or whether he did or did not do all that he personally could do by selecting competent servants, or otherwise to secure the safety of his employees. It is sometimes difficult to determine what is the master's duty, within the rule. But when it is ascertained that the negligence by which an employee is injured relates to this duty, then there is no middle ground, and the case cannot be determined upon any distinction founded upon the particular grade, office, or function of the negligent servant or agent."

"The true test, it is believed, whether an employee occupies the position of a fellow servant to another employee, or is the representative of the master, is to be found, not from the grade or rank of the offending or injured servant, but it is to be determined by the character of the act being performed by the offending servant, by which another employee is injured; or, in other words, whether the person whose status is in question is charged with the performance of a duty which properly belongs to the master." *Schroeder* v. *Flint & P. M. R. Co.* (1894) 103 Mich. 213, 29 L. R. A. 321, 61 N. W. 663.

The test whether or not an employee by whose negligence another employee was injured was a fellow servant of the latter is not "a difference in rank, or the power to control and direct or discharge from service the employee injured," but "whether the act or omission resulting in injury involved a duty owing by the master to the injured employee." *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655.

"For failure or negligence in the discharge of these personal duties of the master, resulting in injury, the master is liable whether he acts in person or by other servants. If he acts by servants in such cases, it makes no difference as to the grade of the servant. The servant is identified with the master. The master's duties are cast upon him and for his default the master is liable, and in these cases the doctrine of 'fellow servants,' so called, has no application whatever." *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 87, 16 S. W. 924.

"It is not the law that the mere fact that an appliance furnished by the master to his servants to be used by them in the prosecution of their work has been constructed by one who has been a fellow servant, engaged in the same kind of work with the servant who is injured, exonerates the master from liability for the consequences of a defectiveness of the appliance. On the contrary the law is that the duty of the master to furnish reasonably safe tools, machines, and appliances to his servants, to be used by them in the prosecution of the work assigned to them, is absolute in its nature, and personal to the master to the extent of using due care to accomplish the end named. As this duty is personal to the master, it is entirely immaterial to what grade of servants or employees he delegates its performance. He may delegate it to his general agent, who has the general superintendence of his work and the duty of employing and discharging hands, and the entire control over their movements and operations; or he may delegate it to one of the common laborers who are to use the appliance. He may delegate it to a trained mechanic, or he may select a laborer utterly without skill. In either case, as the duty is personal to him, he becomes responsible for its proper performance to the extent of using reasonable care and diligence to the end that it is properly performed. In any of these cases the particular agent, employee, or servant, to whom he delegates this duty, becomes, for that reason, and

3. In another it is laid down that the mere employment of a competent person to perform the duty which was omitted is not sufficient to absolve the master from responsibility.[3]

4. In another we find a simple affirmative of the representative character of the employee who is intrusted with the performance of one of the non-delegable duties.[4]

as to it, his vice principal, and is taken out of the category of fellow servants in respect of any other servants who are injured through the defectiveness of the appliance." *Jones* v. *St. Louis, N. & P. Packet Co.* (1891) 43 Mo. App. 398.

For other examples of the same turn of expression, see *Stoekmeyer* v. *Reed* (1893) 55 Fed. 259; *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466; *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034; *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020; *Carlson* v. *Northwestern Teleph. Exchange Co.* (1896) 63 Minn. 428, 65 N. W. 914; *Kerner* v. *Baltimore & O. S. W. R. Co.* (1897) 149 Ind. 21, 48 N. E. 364; *Capper* v. *Louisville, E. & St. L. R. Co.* (1885) 103 Ind. 305, 2 N. E. 749; *Peirce* v. *Oliver* (1897) 18 Ind. App. 87, 47 N. E. 485; *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182; *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 502; *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258; *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222; *Dares* v. *Southern P. Co.* (1893) 98 Cal. 19, 32 Pac. 708; following *Collier* v. *Steinhart* (1875) 51 Cal. 116.

[3] *Van Dusen* v. *Letellier* (1889) 78 Mich. 492, 44 N. W. 572.

[4] "If, instead of personally performing these [personal] obligations, the master engages another to do them for him, he is liable for the neglect of that other, which, in such case, is not the neglect of a fellow servant, no matter what his position as to other matters, but is the neglect of the master to do those things which it is the duty of the master to perform as such." *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

"If a person employs another to perform a duty which he would have to discharge if another were not employed to do it for him, such employee, as to that service, stands in the master's stead with relation to other persons." *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588.

"At common law, whenever the master delegates to any officer, servant, agent, or employee, high or low, the performance of any of the duties above mentioned, which really devolve upon the master himself, then such officer, servant, agent, or employee stands in the place of the master and becomes a substitute for the master, a vice principal and the master is liable for his acts or his negligence to the same extent as though the master himself had performed the acts, or was guilty of the negligence." *Atchison, T. & S. F. R. Co.* v. *Moore* (1883) 29 Kan. 632.

"It is clear upon principle that where the duty rests directly on the master, and he authorizes an agent or servant to perform that duty, he is bound to answer to a servant injured by the negligent performance of the duty." *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

"One who is placed in charge of a force of men engaged in any of those occupations, whose duties are limited to carrying on the work, or directing it, whether actively assisting therein or not, and who is invested with no authority, or charged with no duty, in furnishing places or appliances for the work, or in the employment or retention of employees, is himself usually a mere coemployee. His duties require him to use, or superintend and direct the using of places and appliances, and to control employees furnished by the master. If, however, he is given additional authority, and is charged with the duty of furnishing places to work and appliances for the work, and is authorized to employ and discharge operatives, he is, as to such things, not a coemployee, but speaks and acts as a master." *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 260, 28 N. E. 183, 611.

"If the master has delegated to a servant or employee the care and management of the entire business, or a distinct department of it, the situation be-

5. In another the non-delegable quality of the master's personal duties is emphasized.[5]

ing such that the superior servant is charged with the performance of duties towards the inferior servant which the law imposes upon the master, then such superior servant stands in the place of the master, and the rule of *respondeat superior* applies." *Harrison* v. *Detroit, L. & N. R. Co.* (1890) 79 Mich. 409, 7 L. R. A. 623, 44 N. W. 1034.

Where injuries are caused by negligence of a servant who is charged with the performance of duties which by law it is incumbent on the master to perform, in legal contemplation his negligence is the negligence of the master. *Baltimore & O. R. Co.* v. *McKenzie* (1885) 81 Va. 71.

In *Riley* v. *West Virginia, C. & P. R. Co.* (1885) 27 W. Va. 145, the correct rule on this subject, as deduced from the more recent and better-considered American cases, was said to have been that stated in Wood on Master & Servant, § 438, as follows: "Whenever the master delegates to another the performance of a duty to his servants, which the master had impliedly contracted to perform in person, or which rests upon his as an absolute duty, he is liable for the manner in which that duty is performed by the middleman whom he has selected as his agent; and to the extent of the discharge of those duties by the middleman, he stands in the place of the master, but as to all other matters he is a mere coservant; and the question is not whether the master reserved any oversight or discretion to himself, but whether he did in fact clothe the middleman with power to perform his duties to the servant injured."

See also *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369; *Loughlin* v. *State* (1887) 105 N. Y. 159, 11 N. E. 371; *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020; *Mackey* v. *Baltimore & P. R. Co.* (1890) 8 Mackey, 282.

[5] "No duty required of him [the master] for the safety and protection of his servants can be transferred, so as to exonerate him from such liability." *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590, Affirming (1882) 3 Dak. 38, 13 N. W. 349.

"The nonfulfilment of a positive duty cannot be excused by the delegation of its performance to another." *Pennsylvania R. Co.* v. *LaRue* (1897) 27 C. C. A. 363, 55 U. S. App. 20, 81 Fed. 148.

"An employer is not relieved from responsibility to an employee, who has been injured in consequence of his failure to make the working place reasonably safe, by proof that he employed a competent superintendent or foreman, supplied him with necessary appliances, and gave him all needful instructions for the purpose." *Baird* v. *Reilly* (1899) 35 C. C. A. 78, 63 U. S. App. 157, 92 Fed. 884.

"No duty belonging to the master to perform for the safety and protection of his servants can be delegated to any servant of any grade, so as to exonerate the servant from responsibility to a coservant who has been injured by its nonperformance." *Munn* v. *Delaware & H. Canal Co.* (1883) 91 N. Y. 495.

"A master is never exonerated by the negligent omission of subordinates to perform duties which are imposed on him in his character as master, resulting in injury to his employees." *Bailey* v. *Rome, W. & O. R. Co.* (1893) 139 N. Y. 302, 34 N. E. 918.

In *Ford* v. *Lake Shore & M. S. R. Co.* (1891) 124 N. Y. 493, 12 L. R. A. 454, 26 N. E. 1101, the court, after stating that a want of care on the master's part may appear from various derelictions of specific duties, said: "These are the master's duties, and responsibility cannot be evaded by their delegation to agents. As to such acts the agent occupies the master's place, and the latter is deemed present and liable for the manner in which they are performed."

"The duty of the master to exercise reasonable care that the machinery, appliances, and place to work, supplied to the servant, are reasonably safe, is personal, and cannot be delegated to another so as to relieve the master from liability for its nonperformance." *Edward Hines Lumber Co.* v. *Ligas* (1898) 172 Ill. 315, 50 N. E. 225, Affirming (1897) 68 Ill. App. 523.

The master "cannot avoid the liability by deputing another to perform these duties in his stead." *Brown* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484.

"While the master may delegate the [*i. e.*, a personal] duty to other employees, he cannot thereby escape liability for its nonperformance." *Cadden* v.

6. In another, the language takes the shape of a declaration that coservice will not defeat the action where the delinquent was discharging one of the personal duties of the master.[q]

American Steel Barge Co. (1894) 88 Wis. 409, 60 N. W. 800.

Similarly the courts have spoken of an "obligation not satisfied by devolving it upon a subordinate" (*Baird* v. *Reilly* [1899] 35 C. C. A. 78, 63 U. S. App. 457, 92 Fed. 884); of "duties to those serving him, which he cannot devest himself of by any delegation to others." (*Indiana Car Co.* v. *Parker* [1885] 100 Ind. 181, quoting from an essay by Judge Cooley, in 2 Southern Law Review, N. S. 114 [p. 1239]); of "a duty which the master cannot rid himself of by casting it upon an agent, officer, or servant employed by him" (*Indiana Car Co.* v. *Parker* [1885] 100 Ind. 181); of "duties of which the master cannot relieve himself by any delegation" (*Quincy Min. Co.* v. *Kitts* [1879] 42 Mich. 34, 3 N. W. 240); of "a primary duty, of which the master cannot relieve himself by clothing some general agent with the power, and charging him with the duty, of making performance for him" (*Ticiney* v. *Minneapolis & St. L. R. Co.* [1885] 33 Minn. 311, 53 Am. Rep. 35, 23 N. W. 229).

For other examples of the same form of statement, see the following cases: *Comben* v. *Belleville Stone Co.* (1896) 59 N. J. L. 226, 36 Atl. 473; *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181; *Brazil Block Coal Co.* v. *Young* (1889) 117 Ind. 520, 20 N. E. 423; *Johnson* v. *Chesapeake & O. R. Co.* (1892) 36 W. Va. 73, 14 S. E. 432; *Van Steenburgh* v. *Thornton* (1895) 58 N. J. L. 66, 33 Atl. 380; *Benzing* v. *Steinway* (1886) 101 N. Y. 549, 5 N. E. 449; *Union P. R. Co.* v. *Daniels* (1894) 152 U. S. 684, *sub nom. Union P. R. Co.* v. *Snyder* 38 L. ed. 597, 14 Sup. Ct. Rep. 756, Affirming (1890) 6 Utah, 357, 23 Pac. 762; *Chicago G. W. R. Co.* v. *Healy* (1898) 30 C. C. A. 11, 57 U. S. App. 513, 86 Fed. 245; *Pike* v. *Chicago & A. R. Co.* (1890) 41 Fed. 95; *Smith* v. *Hillside Coal & I. Co.* (1898) 186 Pa. 28, 40 Atl. 287; *Balhoff* v. *Michigan C. R. Co.* (1895) 106 Mich. 606, 65 N. W. 592; *Carlson* v. *Northwestern Teleph. Exchange Co.* (1896) 63 Minn. 428, 65 N. W. 914; *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559; *Addicks* v. *Christoph* (1899) 62 N. J. L. 786, 43 Atl. 196; *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex 611, 13 S. W. 562.

[q] "If an employee sustains an injury through the negligence of a coemployee while such coemployee is performing the duties of the master, the master cannot defeat his recovery on the ground that they are fellow servants." *Wilson* v. *Charleston & S. R. Co.* (1896) 51 S. C. 79, 28 S. E. 91.

"The negligence of a fellow servant or coemployee, acting as such, will not authorize a recovery in any case, although the fellow servant or coemployee may be a superior officer, an agent, or a foreman: but, if the superior agent is charged with the performance of the master's duty, then, in so far as that duty is concerned, his acts and his negligence are the acts and the negligence of the master, and not simply those of a coemployee or fellow servant." *Krueger* v. *Louisville, N. A. & C. R. Co.* 111 Ind. 52, 11 N. E. 957.

Compare *Stucke* v. *Orleans R. Co.* (1898) 50 La. Ann. 188, 23 So. 342.

The elementary conception underlying this form of statement is observable in the declaration that a servant does not assume the risks of negligent acts of this class on the part of the injured servant. *Monmouth Min. & Mfg. Co.* v. *Erling* (1894) 148 Ill. 521, 36 N. E. 117, Affirming (1892) 45 Ill. App. 411.

Commenting upon the last two of these alternative modes of statement, in *Rogers* v. *Ludlow Mfg. Co.* (1887) 144 Mass. 201, 59 Am. Rep. 68, 11 N. E. 77, the court said: "As a corporation must act by natural persons, and as all large corporations carry on their business by means of servants of different grades, it is manifest that, if it is held that they are all fellow servants, and that a corporation can delegate the whole duty of hiring and superintending its servants, and of providing its machinery and of keeping it in repair, to one or more principal servants, such as superintendents or managers the corporation may escape all responsibility for injuries caused by defective machinery, except in the few cases where it can be shown that these principal servants were incompetent, or that the directors of the corporation, or its principal officers, knew that the subordinate

553. Subsidiary consequences deduced from the general principle.—From the principle that the master's liability is a peremptory inference of law when the evidence shows that the injury was caused by a violation of one of his non-delegable duties, several consequences follow.

1. If a master has no representative to discharge the non-delegable duties which he does not undertake to discharge in person, he is no less culpable than where the representative actually appointed for that purpose performs his functions negligently.[1]

2. The master is none the less responsible, because he did not know that his agent was habitually careless and unfit for his position.[2]

3. The mere fact that a vice principal has given orders which, if they had been executed, would have averted the catastrophe from which injury resulted, will not discharge his employer from liability. Empty orders will not suffice.[3]

4. The fact that the delinquent was not the sole person to whom the performance of a non-delegable duty was intrusted, as respects the plaintiff, will not avail the master.[4]

servants were incompetent, or that the machinery used was defective. To avoid this result, some courts have held that superintendents or managers are not fellow servants with the men employed to work under them, or that servants employed in one department of the business are not fellow servants with those employed in another. Other courts have held that they are all fellow servants, but that the master cannot avoid his obligation to see to it that reasonable care shall be exercised in procuring suitable machinery, in keeping it in repair, and in hiring and retaining competent servants, by employing a servant to do these things for him, and that if he does employ a servant for this purpose, and the servant does not use due care, the master is responsible."

[1] *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 653; *Prescott* v. *J. Ottman Lithographing Co.* (1897) 20 App. Div. 397, 46 N. Y. Supp. 812.

[2] *Whaley* v. *Bartlett* (1894) 42 S. C. 454, 20 S. E. 745.

[3] *Mattise* v. *Consumers' Ice Mfg. Co.* (1894) 46 La. Ann. 1535, 16 So. 400.

"All the cases hold that it is not enough for the master to order safe machinery to be constructed, but he must exercise reasonable care to see that the machinery is in fact safe, after the order has been executed. It would be an easy matter for a master to escape liability if an order to construct safe machinery would be sufficient. That would be equivalent to exculpating him entirely from all liability in this regard." *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 563 (appliance left incomplete).

Compare also *Flike* v. *Boston & A. R. Co.* (1893) 53 N. Y. 549, 13 Am. Rep. 545 (brakeman who had been hired to fill a vacancy did not arrive, and the train was sent out with an insufficient number of hands; see § 573, *infra*); *Anderson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585 (assistant road master sent section foreman to repair defective track, but did not see that his orders had been carried out properly); *Galasso* v. *National S. S. Co.* (1898) 27 App. Div. 169, 50 N. Y. Supp. 417, Rehearing denied in 51 N. Y. Supp. 136; *Fuller* v. *Jewett* (1880) 80 N. Y. 46, 36 Am. Rep. 575, Affirming S. C. *sub nom. Sherenson* v. *Jewett* (1878) 16 Hun, 210 (here it was expressly said by the court of appeals that the superintendent of repairs was not negligent, as he had given proper orders, and the immediate cause of the injury was the failure of the mechanics to do their work properly); *McNamara* v. *Brooklyn City R. Co.* (1895) 11 Misc. 667, 32 N. Y. Supp. 913.

[4] *Cole Bros.* v. *Wood* (1894) 11 Ind.

5. The nondischarge of a personal duty is not excused by proof that the master enunciated a rule requiring employees to make a personal examination of appliances before trusting them.[5]

6. A custom to perform a personal duty through the agency of fellow servants is equally ineffectual to shield the master, if it is neglected.[6]

As to the effect of delegating personal duties to an independent contractor, see § 558, *infra*.

554. Rationale of the doctrine of non-delegable duties.—The establishment of the above doctrine has undoubtedly been brought about

N. E. 1074, the court remarked that the master "cannot shield himself from liability by dividing his [duties] and laying them on various subordinates."

[illegible] of the shop of a railway company [illegible] more [illegible] fellow servant of [illegible] injured by the explosion of [illegible] the master [illegible] personal supervision [illegible] Each, within his sphere as [illegible] of the company." *St. Louis, [illegible] S. R. Co.* v. *Harper* (1884) 44 [illegible].

Similarly in *[illegible]s* v. *Chicago & N. R. Co.* (1877) 38 Wis. 289, the contention was rejected that the defendant, although it might have been held liable if the nonrepair of the defective engine which caused the injury had been due to the negligence of its master mechanic, could not be required to answer for similar negligence on the part of the shop foreman. "Each, in his sphere," said the court, "was the agent of the defendant, charged with the performance of certain duties which the latter owed to the public and to its servants, and, on principle, it seems quite immaterial that one of them was subordinate to the other, or that he operated in a narrower field. The relations between them were not unlike those usually existing between the master mechanic and general manager or superintendent, or between the latter and the board of directors. The functions of a railway company must be performed by numerous servants or employees, and among these there must necessarily be a gradation of authority, arranged with reference to the business of the company. Where two of these are charged with the same duty, no good reason is perceived why the company should be held liable for the failure of one to perform such duty, and not for the failure of the other. In this case the master mechanic and foreman were each charged with the duty of causing all defective engines to be repaired; and the failure of either to do so after notice that an engine is out of repair and unsafe is negligence. On what principle can it be successfully maintained that the failure of the master mechanic to do so is to be imputed to the defendant as negligence, while the same failure by the foreman is his own negligence and not that of the defendant? I confess my inability to answer the question . . . It would be monstrous to allow the defendant to relieve itself from all liability for a breach of that duty by simply charging one of its inferior officers or servants with its performance. We hold, therefore, that the instruction was correct,—that notice to the foreman was notice to the defendant, that the negligence of the foreman was the negligence of the defendant, and that the latter is liable to the plaintiff for the injuries received by him because of such negligence."

[5] *Bailey* v. *Rome, W. & O. R. Co.* (1893) 139 N. Y. 302, 34 N. E. 918; *Bookrum* v. *Galveston, H. & S. A. R. Co.* (1900) Tex. Civ. App.) 57 S. W. 919.

[6] *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

In *Boelter* v. *Ross Lumber Co.* (1899) 103 Wis. 324, 79 N. W. 243 a servant was held not to be precluded from recovering for an injury sustained through the giving way of a wheel of the loaded wagon on which he was riding, due to the negligence of a fellow servant, who failed to observe a custom that the teamsters should look after their own wagons.

See, however, chapter XXXII., subtitle D, *post*.

a recognition of the fact that, unless the master's liability for the acts of a vice principal were admitted, the rule that dangers caused by the master's negligence are not among those assumed by the servant would, in the great majority of cases, be rendered nugatory.[1]

[1] In *Snow* v. *Housatonic R. Co.* (1864) 8 Allen, 441, 85 Am. Dec. 720, it was urged by the counsel for the defendant that the omission to repair the defect which occasioned the injury was the result of the negligence of the person whose duty it was to see that certain planks across the highway were kept in a safe and proper condition, and that the accident was therefore caused by the carelessness of a fellow servant. The answer of the court to this contention was as follows: "This argument leaves out of sight the real ground on which the liability of the defendants rests. If the argument is well founded, then it would follow that, as a corporation can act only by agents or servants, it would escape all responsibility for every species of injury caused by defective machinery and apparatus, or badly constructed tracks, or insufficient bridges, and other similar causes. So, an individual could avail himself of a similar immunity, if he conducted his business exclusively by agents or servants. But the rule of law does not lead to any such absurd result. The liability of the master or employer in such cases is founded, as has been already said, on the implied obligation of his contract with those whom he employs in his service. This requires him to use due care in supplying and maintaining suitable instrumentalities for the performance of the work or duty which he requires of them, and renders him liable for damages occasioned by a neglect or omission to fulfil this obligation, whether it arises from his own want of care, or that of his agents to whom he intrusts the duty. But it does not extend so far as to require of him that he should be responsible for the negligence of his servants, if of competent skill and experience, in using or managing the means and appliances placed in their hands in the course of their employment, if they are neither defective nor insufficient."

In *Gilman* v. *Eastern R. Co.* (1866) 13 Allen, 433, 90 Am. Dec. 210, after laying down the rule that the duty to have suitable instruments, whether persons or things, is non-delegable, the court proceeded: "To hold otherwise would be to exempt a master who selected all his machinery and servants through agents or superintendents, from all liability whatever to their fellow servants, although he had been grossly negligent in the selection or keeping of proper persons and means for conducting his business. In the case of a corporation, the president and directors, at least, cannot be deemed mere servants, but must be considered as representing the corporation itself."

"If the master suffers machinery, from wear and tear, or otherwise, to become so bad that the hazard is greatly increased, this increased hazard is not one of the negligent acts of the fellow workmen, for such acts are merely part of the ordinary risks incident to the employment. The increased hazard thus produced is the act of the master, and he thus enhances the risks which the servant agreed to take. He cannot then shift his responsibility by urging that the workman whom he employed was negligent. To hold that the master could do that would be to hold that he was under no obligation in respect to appliances and machinery." *Bridges* v. *St. Louis, I. M. & S. R. Co.* (1879) 6 Mo. App. 392.

"It appears, then, that part of the administrative functions of the corporation were confided to subagents and employees. Such practice may be, and probably is, necessary in the control and government of so large a corporation as a railroad usually is. But the performance of such delegated power by the subagent or employees is the act of the corporation, and the corporation is responsible for its faithful and prudent performance to the same extent as if the service were performed by the highest officer of the corporation." *Tyson* v. *South & North Ala. R. Co.* (1878) 61 Ala. 554, 32 Am. Rep. 8.

In *Brown* v. *Gilchrist* (1890) 80 Mich. 56, 45 N. W. 82, counsel went so far as to argue that, because the delinquent employee had absolute control and direction in and about the business, the defendants could not be held responsible and urged that "there is absolutely no ground . . . for any claim that either of the defendants was pres-

But there is some discrepancy in the explanations which are found in the books, with regard to its logical basis.

The most satisfactory standpoint seems to be obtained by considering it to be an application of the general principle of jurisprudence, that anyone upon whom a duty of an absolute quality is imposed must, at his peril, see that it is discharged in a reasonably careful manner, whether he undertakes its performance in person, or employs a deputy for that purpose.[2] That is to say, the care which a master is bound to use, he can exercise through another only at his own risk.[3]

It is manifest that, if the decisive elements are the nonperformance of an obligation, and the legal significance of the resulting conditions, as betokening care or the absence of care, the fact that those conditions may have been immediately due to the act of a human agent becomes an element in the investigation, as entirely neutral and unimportant as if the master had brought them about by his own management of an inorganic instrumentality, or of one of the lower animals. This point of view is distinctly apparent in the statement that, where the cause of action relied on is an alleged failure of the defendant to use reasonable care to provide safe materials for the plaintiff's work, the question to be decided is whether the defendant failed in that specific duty, and it is of no consequence how the materials furnished became dangerous, whether by the act of a fellow servant or otherwise.[4]

ent or superintending or directing in person the erection of this scaffold, or the selection of the materials of which it was composed." The comment of the court was as follows: "That is, because the defendants had delegated the authority to Mr. Reed to select proper materials, and to direct, control, and superintend the erection, they should escape liability. If this were the rule, then the more they remained away from their business,—the greater power and authority they gave a foreman or manager to select material, employ men to build a safe and proper scaffold, upon which other servants, who had no knowledge of the manner of its construction, were to be invited to work, the less the liability."

See also *Union P. R. Co.* v. *Erickson* (1894) 41 Neb. 1, 29 L. R. A. 137, 59 N. W. 347; and the passage quoted below from the opinion in *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

[2] See 1 Beven, Negl. pp. 493 *et seq.*; Shearm. & Redf. Neg. §§ 14, 176.

[3] *Van Steenburgh* v. *Thornton* (1895) 58 N. J. L. 160, 33 Atl. 380.

"The duty to exercise reasonable care to see that the place furnished for a servant to work in is reasonably safe is a positive obligation towards the servant; and the master is liable for any failure to discharge that duty, whether he undertakes that performance personally or through another servant." *Hess* v. *Rosenthal* (1896) 160 Ill. 621, 43 N. E. 743.

Compare also the statement that the fact that the insecure condition of a railroad track is remotely due to the negligence of some servant who failed to report its condition and put it in repair will not excuse the company from liability. *O'Donnell* v. *Allegheny Valley R. Co.* (1869) 59 Pa. 239, 98 Am. Dec. 336. The word "remotely" seems, however, to be used with some want of accuracy here. If the negligence of the servant is "remote" in the ordinary sense in which that term is used in discussions as to causation, it would clearly not be an element in the case at all, instead of being one which merely did not prevent liability from attaching.

[4] *Aceren* v. *Sears* (1892) 155 Mass. 303, 29 N. E. 472.

Compare also the following passage.

The applicability of this elementary conception, however, is not always brought out as clearly as might be desired in the passages in which judges have undertaken to state the grounds of the master's liability.

Thus, it is sometimes said that a servant who is intrusted with the discharge of one of the so-called non-delegable or nonassignable duties is an agent, not a servant, such agency being regarded as a deduction from the fact that the rule which imputes to servants an acceptance of the risks of a fellow servant's negligence ceases, under the supposed circumstances, to be operative because the reasons upon which its existence depends are not properly applicable. But the extract quoted below shows that the consideration by which the implication usually indulged as to such an acceptance of the risks is deemed to be overridden is really the absolute quality of the duties discharged by the agent.[5]

"Some places of work and some kinds of machinery are more dangerous than others, but that is something which inheres in the thing itself, which is a matter of necessity, and cannot be obviated. But within such limits the master who provides the place, the tools, and the machinery owes a positive duty to his employee in respect thereto. That positive duty does not go to the extent of a guarantee of safety, but it does require that reasonable precautions be taken to secure safety, and it matters not to the employee by whom that safety is secured, or the reasonable precautions therefor taken. He has a right to look to the master for the discharge of that duty, and if the master, instead of discharging it himself, sees fit to have it attended to by others, that does not change the measure of obligation to the employee, or the latter's right to insist that reasonable precaution shall be taken to secure safety in these respects." *Baltimore & O. R. Co.* v. *Baugh* (1893) 149 U. S. 368, 387, 37 L. ed. 772, 781, 13 Sup. Ct. Rep. 914.

[5] In *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181, the court said: "Where the duty is one owing by the master, and he intrusts its performance to an agent, the agent's negligence is that of the master. As the master is charged with the imperative duty of providing safe and suitable appliances, this duty he must perform; and if he intrusts it to an agent, and the agent performs it in his place, the agent's act is that of the master. In authorizing an agent to perform such an act, the principal is, in legal contemplation, himself acting when the agent acts, for he who acts by an agent, acts by himself. This principle does not conflict with any of the general rules we have stated, for the agent assumes, by authority, the master's place, and does what the law commands the master to do. He is, for the occasion, and in the eyes of the law, the master. If it be true that the agent's act is the master's act, then it must be true that the negligence involved in the act is that of the master himself. The rule which absolves the master from liability for the negligence of the fellow servant has no application whatever where the agent stands in the master's place. The reason of the rule fails, and where the reason fails, so does the rule itself. The reasons which support the rule are that servants take the risks of the employment upon which they enter, and that public policy requires that fellow servants should 'each be an observer of the conduct of the other.' *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339. The first of these reasons completely fails when it is brought to mind that the servant does not assume the risk arising from unsafe and unsuitable machinery and appliances. The second as surely and completely fails when we affirm, as, under all the authorities, affirm we must, that the duty to provide safe appliances rests upon the master, and not on any servant, for, surely, servants are

Another explanation treats the master's liability as the result of the fact that the employees who discharge non-delegable duties are not in the same department as the employees who use the various instrumentalities which are the subject-matter of those duties.[6] To pronounce

not bound to be observers of the master's conduct. It is, therefore, not at all difficult to clearly discriminate and broadly mark the difference between a case where it is the master's duty, as master, that is neglected, and a case where it is the fellow servant's duty, as servant, that is negligently performed. A servant has a right, himself exercising ordinary care, to rely upon his master's care and diligence. He is not bound to watch his master as he is his fellow servant. The rights are reciprocal: the master has his duty, as the servant has his. When the master's duty is negligently done, he it is who is guilty of a breach of duty, although he acted through the medium of an agent. If the master were permitted to escape his duty by shifting it to an agent, the practical result would be his entire absolution from the duty which the law imposes. The law will not permit this result, for it will not permit a duty to be evaded, but will require performance by the person upon whom it has fixed it."

[6] "The agents who are charged with the duty of supplying safe machinery are not, in the true sense of the rule relied on, to be regarded as fellow servants of those who are engaged in operating it. They are charged with the master's duty to his servant. They are employed in distinct and independent departments of service, and there is no difficulty in distinguishing them, even when the same person renders service, by turn, in each, as the convenience of the employer may require." *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598. Quoted with approval in *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612.

"All those by whom a corporation performs its work are its servants, and, thus, fellow servants each with the other. But the relation in which those who together manage the train and the track for the purpose of performing transportation stand each to the other is quite different from that which they bear to those who perform the work of its construction and repair; and they have a right to expect the suitable instrumentalities and appliances which it is the duty of the master to furnish." *Elmer* v. *Locke* (1883) 135 Mass. 575.

"That doctrine [the nonliability of the master for the negligence of a fellow servant] was never applied unless the one injured and the one at fault were engaged in the same general employment. Whatever conflict has arisen in cases has been as to what should be considered the same general employment. The rule adopted by the Federal courts, and in most of the states, and which seems to us most in consonance with reason and humanity, is that those employed by the master to provide or to keep in repair the place, or to supply the machinery and tools, for labor, are engaged in a different employment from those who are to use the place or appliances when provided, and they are not, therefore, as to each other, fellow servants. In such case the one whose duty it is to provide and look after the safety of the place where the work is to be done represents the master in such a sense that the latter is liable for his negligence." *Roux* v. *Blodgett & D. Lumber Co.* (1893) 94 Mich. 607, 615, 54 N. W. 492.

"Those employed by the master to provide or to keep in repair the place, or to supply the machinery and tools for labor, are engaged in a different employment from those who are to use the place or appliances when provided, and they are not, therefore, as to each other, fellow servants. In such case the one whose duty it is to provide and look after the safety of the place where the work is to be done represents the master in such a sense that the latter is liable for his negligence." *Sadowski* v. *Michigan Car Co.* (1890) 84 Mich. 100, 47 N. E. 598.

To provide machinery and keep it in repair, and to use it for the purpose intended, are very distinct. They are not employments in the same common service, leading to the same common result. The one may be said to begin where the other ends. *Shauncy* v. *Androscoggin Mills* (1876) 66 Me. 420.

"In the present case the road master, the division road master, and the section foreman and his assistants were in one line of duty, while the trainmen

such a standpoint to be erroneous would scarcely be justifiable in view of the imposing array of authorities by whom it has been adopted. But it is certainly not free from objection, inasmuch as the conception of a difference of department is also suggestive of that class of cases

were in another, and a different, line of duty, and each set, within its own line of employment, represented the master as to the other set; and the members of one set were not mere fellow servants with the members of the other set. The principal ground upon which the doctrine has been established—that the master is not liable for any negligence that might take place as between mere fellow servants — is that such fellow servants work together in the same line of employment, are intimately acquainted with each other, and, knowing each other better than the master could possibly know any one of them, they take all risks of negligence on the part of their fellow servants; that if any servant chooses to work with a known incompetent or negligent fellow servant, without informing the master, he himself should take all the risks and consequences of his fellow servant's negligence and incapacity, the master being required only to use reasonable and ordinary care and diligence in the original employment and the subsequent retention of only such servants as are competent and habitually careful. *Dow v. Kansas P. R. Co.* (1871) 8 Kan. 642, 646. But where employees work in different lines of employment, one having no means of knowing anything about the business or qualifications of the other, and being wholly unacquainted with the other, they cannot be said to be fellow servants within the meaning of the foregoing rule: and this state of things fairly represents the condition of a railroad section foreman and an engineer on a freight train and the relation existing between them. Therefore, where a railroad company delegates, directly or indirectly, to a section boss or section foreman the duty of keeping a certain section of the railroad in proper condition and repair, and to warn trainmen in case of danger, and the section boss fails to perform his duty in these respects, and a trainman is injured by reason of such negligence, the railroad is responsible." *St. Louis & S. F. R. Co. v. Weaver* (1886) 35 Kan. 112, 57 Am. Rep. 176, 11 Pac. 408.

"There is a certain incongruity in holding that the duty to exercise reasonable care in providing reasonably safe appliances and machinery is a personal one, which cannot be delegated, and at the same time holding that, if the failure to exercise such reasonable care was the neglect of a fellow servant of the party injured, then the master is not liable; and it seems more correct to say that agents who are charged with the duty of supplying safe machinery and appliances are not, when so doing, in the true sense, to be regarded as fellow servants of those who are engaged in the use of the same." *Edward Hines Lumber Co. v. Ligas* (1898) 172 Ill. 315, 50 N. E. 225, Commenting on *Fraser v. Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785.

A superior servant performing non-assignable duties was spoken of as being "in a different department" from men under him. *Moon v. Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401.

In *Cadden v. American Steel Barge Co.* (1894) 88 Wis. 409, 60 N. W. 800, the court, after declaring that the defendant must answer for the negligence of the workmen employed to build a scaffold, for the reason that the duty they were performing was non-delegable, continued thus: "The scaffold builders were not, in the true sense of the rule relied on, fellow servants with the plaintiff, who was using the scaffold, but were charged with the duty of the master to the servant, and were therefore engaged in a distinct and independent department."

In *Atchison, T. & S. F. R. Co. v. Sceley* (1894) 54 Kan. 21, 37 Pac. 104, an employee intrusted with the duty of inspecting cars was declared not to be in the same branch of the service as a brakeman, though the rest of the argument was based on the theory that the duty of inspection was nonassignable.

In *Gray v. Brassey* (1852) 15 Sc. Sess. Cas. 2d series, 135, one of the cases approved is *Bartonshill Coal Co. v. Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, where the complaint was held good for the reason that it showed the injury to have been received owing to the negligence of a servant in another department with which the plaintiff had no concern, *viz.*, that of furnishing machinery.

in which the delinquent and injured servants were engaged in spheres of work so disconnected that neither can be deemed to have assumed the risks of the other's negligence. See chapter XXVII., *ante*. Merely for the purpose of securing greater verbal precision, therefore, it seems desirable that this conception should be reserved for the settlement of these cases alone. Moreover, if the phrase is used to describe these two distinct kinds of relations between delinquent and injured servants, we are confronted by the logical difficulty that the degree of disconnection which will prevent this implication may exist no less between two servants who are using instrumentalities, than between one servant belonging to this category and another who is discharging non-delegable duties with respect to those instrumentalities. This objection is not obviated by the fact that sometimes those relations may be such that it may be equally possible and proper to refer the master's liability either to the idea of a difference of department, as that phrase is commonly understood, or to the idea of the non-delegability of the duty omitted.[7]

555. Master sometimes liable both on account of the character of the negligent act and the official position of the negligent servant.— The performance of non-delegable duties is not infrequently intrusted to some employee who controls a larger or smaller number of subordinates. It follows, therefore, that, if such an employee causes injury to one of his subordinates by a delinquency in respect to one of those duties, and the nature and extent of the control exercised by him is such as to constitute him a vice principal, the master's liability may be inferred indifferently from his official position or from the

[7] In *Chicago & A. R. Co.* v. *Maroney* (1897) 170 Ill. 520, 48 N. E. 953, Affirming (1896) 67 Ill. App. 618, the appellate court decided in the plaintiff's favor on the ground that the carpenters who built a scaffold were not consociated with the plaintiff, a mason, who used it; while the supreme court sustained the action on the ground that the carpenters were discharging a non-delegable duty.

In *Chicago & N. W. R. Co.* v. *Jackson* (1870) 55 Ill. 492, 8 Am. Rep. 661, the court upheld a verdict for the plaintiff, using the following language: "This car was placed upon the road by someone superior to appellee in authority, and he was acting under such authority. The jury might reasonably infer that those placing it on the road knew its condition. He had no choice but to obey orders, and was compelled by those above him in authority to ascend the car, and again descend and uncouple the car from the engine when required. He was not, and could not be, responsible for the defect. Nor should he be held liable for the defective car, as he neither furnished it nor placed it upon the track. Nor should he be held responsible for the acts of those who did, as fellow servants, as the fault was not that of such a servant engaged in the same department of the common business. It was the act of a superior, in another department."

In *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401, a section foreman was held not to be a fellow servant of trainmen, on the double ground that he was in a different department and that he was responsible for the proper discharge of the nonassignable duty of keeping the track in safe condition.

character of the negligent act. This situation may present itself both in jurisdictions where the mere exercise of control is deemed to confer representative capacity,[1] and in jurisdictions where such capacity is admitted only in the case of agents managing an entire business, or a distinct department thereof.[2]

556. Doctrine of non-delegable duties applicable to artificial persons. Although a categorical affirmation of such a point might seem scarcely necessary, there is specific authority for the doctrine that a corporation is no less responsible than a natural person for the proper performance of an employer's absolute duties, although it is impossible for it to discharge those duties otherwise than through agents.[1] A limited company created under the provisions of the English companies act and similar statutes is also as much liable as an individual for its failure to perform any of the duties which a master owes to employees.[2]

The reasonable view of the situation obviously is that the impossibility of exercising personal control is an imperative ground for holding such artificial bodies liable, rather than for applying a less rigorous standard of responsibility.[3] Manifestly, if they could escape liability for the breach of an absolute duty on the plea that their agent was a fellow servant or coemployee of the party injured, they could never be held at all.[4]

557. Servants of contractors, when precluded from availing themselves of the doctrine in actions against their masters.— A contract for work to be done may be so worded that the principal has the right to prescribe the manner in which its various details are to be executed.

[1] See, for example, the following decisions in favor of servants injured by the negligence of their foreman in the matters indicated by the memoranda appended to the citations: *Bowen* v. *Chicago, B. & K. C. R. Co.* (1888) 95 Mo. 268, 8 S. W. 230 (bridge not repaired); *Union P. R. Co.* v. *Fray* (1890) 43 Kan. 750, 23 Pac. 1039 (derrick not repaired); *Browning* v. *Wabash Western R. Co.* (1893) 124 Mo. 55, 24 S. W. 731, Affirmed (1894) 27 S. W. 644 (brakestaffs removed from freight cars); *Taylor* v. *Missouri P. R. Co.* (1894; Mo.) 16 S. W. 206 (defective coupling furnished); *Banks* v. *Wabash Western R. Co.* (1890) 40 Mo. App. 458; *Richmond Granite Co.* v. *Bailey* (1896) 92 Va. 554, 24 S. E. 232 (rule abrogated).

[2] See the cases cited in §§ 520, 524, *ante*.

[1] *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598; *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612; *Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369.

Instructions are erroneous which declare that a corporation is not liable for the negligence of any of its officers, except its board of directors. *Krueger* v. *Louisville, N. A. & C. R. Co.* (1887) 111 Ind. 51, 11 N. E. 957.

[2] *Wright* v. *Dunlop* (1893) 20 Sc. Sess. Cas. 4th series, 363.

[3] See *Brann* v. *Chicago, R. I. & R. Co.* (1880) 53 Iowa, 595, 36 Am. [illegible] p. 243, 6 N. W. 5.

[4] See *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401; *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545.

Compare also the cases cited in the preceding section.

If the contractor is thus required to act according to the principal's directions, the workmen are deemed to be so far the servants of the principal that the contractor is released from the duty to furnish them with suitable materials. But there is no such exemption where the provisions of the contract are merely that the work shall be executed under the supervision of an officer of the government, who shall prescribe the order in which the materials are to be placed; that no material shall be placed in the works without his knowledge; that the contractor will remove from the work any person not acceptable to the agents of the government; and that all material, supervision, and labor furnished by him shall be subject to the approval of the engineer officer in charge.[1]

558. Delegation of personal duties to an independent contractor, effect of.— It is apparent that the rule discussed in § 153, *ante*—that a master is not negligent in omitting to test appliances, if he purchases them from a reputable dealer *or* manufacturer—virtually creates an exception *pro tanto* to the operation of the doctrine of non-delegable duties; for, although the rationale of the decisions there cited is the absence of negligence, the rule virtually amounts to an assertion that a master may, to some extent, evade responsibility for the nonperformance of one of those duties, *viz.*, that of supplying proper instrumentalities, by procuring them from an independent contractor. Singularly enough, this aspect of the rule does not seem to have thus far attracted the attention of the courts.

As regards the cases in which the liability of a master for the default of an independent contractor in discharging a non-delegable duty is in question, they are so conflicting as to render it impossible to formulate any definite doctrine upon the subject.

In England the only decision directly in point seems to be a case in which Denman, J., sitting alone, held that a servant could not recover where a staging which gave way under him had been put up by a competent contractor.[1] If the failure of duty thus committed be regarded as one of management, the doctrine laid down in *Wilson* v. *Merry*[2] would obviously have freed the master from liability, even if the deputy had been another servant. But the learned judge seems

[1] *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017.

[1] *Kiddle* v. *Lorett* (1885) L. R. 16 Q. B. Div. 605, 34 Week. Rep. 518. In line with this decision is the doctrine that neither the master himself nor an employee for whose acts it is sought to hold him responsible can be held negligent on the ground that they relied upon the assurance of an independent contractor that the place of work into which they were sending their servants was a safe one. *Moore* v. *Gimson* (1889) 5 Times L. R. 177, 58 L. J. Q. B. 169; *M'Innulty* v. *Primrose* (1897) 24 Sc. Sess. Cas. 4th series, 442.

[2] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30. See § 529, *ante*.

to have intended [1] to enunciate a general principle, and would, so far as appears, have rendered a similar decision if the point had been taken that the delinquency which led to the injury was one having reference to original construction or the furnishing of appliances. If this be really the scope of the decision it would seem to be incorrect upon any reasonable construction of the opinions of the Law Lords in the case just mentioned. See § 566, *infra*.[3]

In Scotland the natural conception of a positive duty has been followed out to its logical conclusion in a case where it was laid down that, if the defect in an appliance (here a scaffold) could have been discovered by the exercise of reasonable care, a master is answerable for injuries caused by its unsafe condition, even though the master, not being properly skilled himself, may have intrusted the work of furnishing the appliance to a competent contractor.[4]

In one of the Federal circuit courts of appeals the doctrine has been laid down, without qualification, that a master is not relieved of a positive personal duty by letting work to a contractor.[5]

In a Georgia case in which no opinion is reported, the court has embodied its views in a syllabus which lays it down that a railroad company permitting another company to use a section of its main line to reach a terminal point is liable to one of its own employees for personal injuries from the negligence of the latter company in running its train over such section.[6]

In Illinois it has been held that persons who, under a license from the master, put in new burners in a brick kiln for the purpose of testing their advantages, are in the position of vice principals, so far as relates to making such apparatus suitable and safe for the employees, or giving notice of increased danger.[7]

Other cases with which it appears to conflict are *Hardaker* v. *Idle Dist.* [1896] 1 Q. B. 335, 65 L. J. Q. B. N. S. 363, 74 L. T. N. S. 69, 44 Week. Rep. 323, 60 J. P. 196; *Groves* v. *Wimborne* [1898] 2 Q. B. 402, 67 L. J. Q. B. N. S. 862 (§ 565, note 5, *infra*).

[1] *Macdonald* v. *Wyllie* (1898) 1 Sc. Sess. Cas. 5th series, 339.

In another case it was considered doubtful whether the commissioners, by entering into a contract for the cleaning of the streets, could relieve themselves of their statutory duties and responsibilities. But the point was not ruled upon. *Stephens* v. *Thurso Police Comrs.* (1876) 3 Sc. Sess. Cas. 4th series, 542.

[3] *Toledo Brewing & Malting Co.* v. *Bosch* (1909) 41 C. C. A. 482, 101 Fed. 530 (plaintiff was injured by the fall of a heavy beam, due to the negligence of the contractor's servants in leaving it loose while repairs were being made).

[4] *Central R. & Bkg. Co.* v. *Passmore* (1892) 90 Ga. 203, 15 S. E. 760, following *Macon & A. R. Co.* v. *Hayes* (1873) 49 Ga. 355, 15 Am. Rep. 678.

[5] *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285. One of the grounds on which the decision proceeded was that the licensees were discharging a positive duty owed by the master to his servants.

In another case the employer was held liable for defects in a scaffold, which had been constructed by a contractor for the brick work on a building, and which gave way under a stone

In Missouri it has been declared that a master cannot relieve himself of the duty of exercising ordinary care to provide reasonably safe appliances for his servants, by the employment of superintendents or independent contractors to provide such appliances.[8]

In New Hampshire it has been held that a railway company is liable for injuries received by a trainman by reason of defects negligently permitted to exist in the track of another company over which it has running powers, although the duty of keeping it in repair is devolved on the latter company, and the trainman is aware of the arrangement between the two companies.[9]

In New Jersey it has been held that a servant injured by an elevator which was in course of construction by an independent contractor on the master's premises could not recover.[10] But in such a case there was no delegation of a duty in the proper sense of the phrase, and the circumstances were governed by the principle that the dangerous agencies were, for the time being, quite out of the control of the plaintiff's master.

In New York the doctrine established is that an employer is not liable to a servant for the condition of a structure erected for the use of his servant by an independent contractor.[11] It will be observed from

setter, and the general principle was laid down that it does not matter whether the instrumentality furnished to an employee was constructed by the master himself, or was obtained by gift, or through a right arising from an established custom. *McBeath* v. *Rawle* (1901) 93 Ill. App. 212.

[8] *Herdler* v. *Buck's Stove & Range Co.* (1896) 136 Mo. 3, 37 S. W. 115; *Burnes* v. *Kansas City, Ft. S. & M. R. Co.* (1895) 129 Mo. 41, 31 S. W. 347; *Bartley* v. *Trorlicht* (1892) 49 Mo. App. 214 (elevator fell into disrepair). Citing *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 647, 29 L. ed. 758, 6 Sup. Ct. Rep. 590. It was further held in this case that the fact that an elevator was leased with a building will not absolve the lessee from liability for injuries to his elevator boy by its fall, caused by the lessee's failure to use reasonable care to keep it in repair.

See also *Sackewitz* v. *American Biscuit Mfg. Co.* (1899) 70 Mo. App. 144, holding that there is a sufficient correspondence between a petition alleging that, while the plaintiff was in defendant's employment, she was required to work in a place rendered unsafe by the negligent acts of men engaged in repairing the building, and proof that plaintiff was injured by the negligent acts of one who had entered into a contract with defendants to repair the building.

Under a statute giving a right of action against the owner, agent, or operator of a mine, for injury caused by failure to furnish props, the owner is liable even though the mine is operated by another under a contract with the owner,—especially where such contract provides that the latter shall furnish timber for props. *Leslie* v. *Rich Hill Coal Min. Co.* (1892) 110 Mo. 31, 19 S. W. 308.

[9] *Story* v. *Concord & M. R. Co.* (1900) 70 N. H. 364, 48 Atl. 288.

[10] *Conway* v. *Furst* (1895) 57 N. J. L. 645, 32 Atl. 380.

[11] The question was very fully discussed in *Devlin* v. *Smith* (1881) 27 Hun, 206, Affirmed (1882) 89 N. Y. 470, 42 Am. Rep. 311. There the defendant was employed to paint a building, and not being able himself to build a scaffold, employed a skilful and competent person to build it. Held, that A was not liable for injuries received by one of his workmen through the giving way of the scaffold. The position taken in the lower court is shown by the following passage of the opinion delivered:

the extracts given from the opinion of the court of appeals in the note below that, while recognizing the antagonism between this doctrine and that of the non-delegable quality of certain duties, it contents itself with declaring the master's nonliability, and gives no reasons for its opinion.

In Pennsylvania it has been laid down, *arguendo*, in a compara-

"Whenever the employer has been held liable, not for his own negligence but for the negligence of another person, it was upon the ground that the latter was charged with his duties. . . . That is not the case where the employer, not having the requisite skill to do the work himself, intrusts the performance of it entirely to a competent and unexceptionable contractor. The employer cannot escape the responsibility of exercising due care by delegating that duty to an agent, but he can employ a competent and unexceptionable contractor to construct tools, machinery, etc., and such conduct would be the exercise of that care which the law requires. The employment of a contractor is not a delegation of the employer's duty. It is, when properly done, an exercise of the care, and a fulfilment of the duty which the law exacts. It would be unreasonable and unjust to hold an employer liable for the negligence of such a contractor so employed, for the employment of him would not be negligence, and the contractor's negligence could not be attributed to the employer, because no relation of agency would exist between them. Unless, therefore, the employer knew of the defect which caused the injury, or his ignorance thereof of itself indicated a breach of duty on his part, there would be nothing of which negligence could be predicated. . . . Smith, having used due care in procuring the scaffold, and having no knowledge nor any reason to apprehend that it was in any respect defective, he was justified in subjecting it to immediate use without inspection. It is true an inspection might have disclosed the fact that the support which gave way was fastened with nails instead of ropes. But no reason has been shown why that fact should have admonished Smith that the scaffold was unsafe. Not being an expert, his inspection must have been merely that of a common observer. If the defect in the scaffold would have been apparent to him, the deceased was equally bound to take notice of it; one was as competent to determine whether the fastenings referred to were sufficient or not, as the other."

The argument of the court of appeals proceeds upon much the same lines: "Under the recent decisions in this state, it may be that if Smith had undertaken to erect the scaffold through agents or workmen acting under his direction, he would have been liable for negligence on their part in doing the work, provided that in doing it they were not fellow servants of the party injured. But in this case he did not so undertake. Stevenson was not the agent or servant of Smith, but an independent contractor for whose acts or omissions Smith was not liable. *Blake* v. *Ferris* (1851) 5 N. Y. 48, 55 Am. Dec. 304. Smith received the scaffold from him as a completed work, and we do not think that it was negligence to rely upon its sufficiency, and permit his employees to go upon it for the purpose of performing their work. Stevenson was, as appears from the evidence, much more competent than Smith to judge of its sufficiency. He had undertaken to construct a first-class scaffold, and had delivered it to Smith in performance of this contract, and we do not think that Smith is chargeable with negligence for accepting it without further examination. All that such an examination would have disclosed would have been that the upright was nailed to the ledger, and Smith, not being an expert, would have been justified in relying upon the judgment of Stevenson as to the propriety of that mode of fastening. The defect was not such as to admonish Smith of danger."

To the same effect, see *Wittenberg* v. *Friederich* (1896) 8 App. Div. 433, 40 N. Y. Supp. 895, where a floor constructed by a subcontractor in a building which a contractor was erecting gave way and injured one of the latter's servants.

These cases seem inconsistent with *Wanamaker* v. *Rochester* (1892) 24 N. Y. S. R. 45, 17 N. Y. Supp. 321, where a municipality was held liable for inju-

tively late case that the master, as he owes to the servant the duty of providing a reasonably safe place in which to work, and reasonably safe appliances, is not relieved from liability [illegible] an injury resulting to a servant from neglect of such duty, by the fact that he delegated it to an agent or independent contractor.[12] But there is an earlier decision to the effect that, if a mechanic is under a contract for the work of constructing stills of sufficient strength for a certain purpose, and the details are left to his own judgment and skill, the employer cannot be visited with the consequences of his failure.[13] The task of reconciling the conflicting views thus evidenced must be left to the distinguished court which is responsible for them. To the present writer the more recent expressions of opinion appear to embody the correct doctrine. It is worth observing that, as the doctrine of non-delegable duties had not yet been formulated with much distinctness at the time the earlier case was decided, it is extremely probable that the effect of such a conception as qualifying the rule with regard to independent contractors was not considered at all by the court. Indeed, the opinion delivered gives no indication that this aspect of the relations of the parties was taken into account.

In Rhode Island a company has been held responsible for the negligence of an independent contractor in so constructing a crane that the hauling chains were not properly insulated from the current of electricity which operated it.[14]

Some language has been used by the supreme court of South Carolina which would seem to indicate that the master is not absolved from liability for conditions of the place, created by work which is being

ries caused by the caving-in of a trench made by an independent contractor. But there is no discussion of the general question involved in such a situation.

[12] *Trainor* v. *Philadelphia & R. R. Co.* (1890) 137 Pa. 148, 20 Atl. 632.

In *Ortlip* v. *Philadelphia & W. C. Traction Co.* (1901) 198 Pa. 586, 48 Atl. 497, the court said: "The use of the tracks was under the direct control of the company's superintendent, who retained and exercised the right to direct the management of the cars and signals. In all matters incident to the use of the track the contractors and their workmen represented the will of the company, and its responsibility remained."

[13] *Ardesco Oil Co.* v. *Gilson* (1870) 63 Pa. 146. The liability of the company was held to be for the jury, as there was evidence that the stills were made according to a plan directed by the president; but the court states the rule as to the result of employing a contractor in the most uncompromising terms. The court said: "It may be considered as now settled that, if a person employs others, not as servants, but as mechanics, or contractors in an independent business, and they are of good character, if there was no want of due care in choosing them, he incurs no liability for injuries resulting to others from their negligence or want of skill. *Painter* v. *Pittsburgh* (1863) 46 Pa. 213. If I employ a well known and reputable machinist to construct a steam engine, and it blows up from bad materials or unskilful work, I am not responsible for any injury which may result, whether to my own servant or to a third person."

[14] *Moran* v. *Corliss Steam Engine Co.* (1899) 21 R. I. 386, 15 L. R. A. 267, 43 Atl. 874 (the appliance became dangerous after being put into use).

done by a contractor.[15] But the precise position of the learned judge who wrote the opinion is not clearly defined.

In Texas it has been held that the duty of a railroad company to an employee to furnish safe appliances cannot be affected by a contract between it and a third person, to which the plaintiff was not a party, giving such person control of the cars and requiring him to make all repairs.[16] In this state a railway company has also been held liable where a derrick used by a contractor to unload stones from a car was inadequately secured and fell on a brakeman.[17]

In Virginia, on the general ground that the reconstruction of a railway bridge without the interruption of traffic is not an essentially hazardous undertaking, but may be effected with entire safety if ordinary care be used, a company has been held not liable for the negligence of a reputable contractor, employed to do the work.[18]

Whichever of the antagonistic views of the nature of the master's liability be taken, it is manifest that the general principles which determine the extent of the responsibility of an employer for the acts of an independent contractor involve the corollary that the owner of premises cannot dictate that his building shall be constructed of improper materials or upon an unsafe plan, and escape liability for injuries caused thereby because he made a contract with a third person to build it; nor can he, with knowledge of a weakness or defect threatening the strength of the building, set a man at work immediately under it, and shift all responsibility upon the builder.[19] Similarly it has been held, on the ground that the physical conditions created by the negligence are the necessary result of the work contracted for, that an employee of a street railway, which is relaying its rails under a municipal permit, may recover for injuries due to an obstruction in the track.[20]

A contractor is not exonerated from liability for injury to one of

[15] *Coulin* v. *Charleston* (1868) 15 Rich. L. 201.

[16] *Gulf, C. & S. F. R. Co.* v. *Shearer* (1892) 1 Tex. Civ. App. 343, 21 S. W. 133; *Gulf, C. & S. F. R. Co.* v. *Delaney* (1900) 22 Tex. Civ. App. 427, 55 S. W. 538. In the latter case the contract for ballasting a railroad track provided that "the contractor would carry on and prosecute the work in such manner" as the engineer of the railroad company should direct, and the injury was caused by a defect in a derrick used by the contractor in performing such work.

[17] *Gulf, C. & S. F. R. Co.* v. *Delaney* (1900) 22 Tex. Civ. App. 427, 55 S. W. 538.

[18] *Norfolk & W. R. Co.* v. *Stevens* (1899) 97 Va. 631, 46 L. R. A. 367, 34 S. E. 525 (train went through one of the spans, owing to the fact that the falsework had been taken away too soon). The court does not refer to any of the authorities opposed to its own conclusion, and contents itself with applying the general rule as to independent contractors, without noticing the possibility of an exception to that rule in the case of absolute duties.

[19] *Meier* v. *Morgan* (1892) 82 Wis. 289, 52 N. W. 171.

[20] *North Chicago Street R. Co.* v. *Dudgeon* (1900) 184 Ill. 477, 56 N. E. 796, Affirming (1898) 83 Ill. App. 528.

his employees by reason of a defect in an appliance, because the other party to the contract was to furnish suitable appliances, where the discretion was left to the contractor with reference to the appliances to be used.[21]

The rule that a master discharges his duty to a servant by furnishing an appliance made by a reputable manufacturer is only applicable where it appears that the appliance was made for the use to which it was put.[22]

559. Same subject continued. Opposing doctrines discussed.—The writer has no hesitation in saying that he considers the cases absolving the master from responsibility for the negligence of an independent contractor in this connection have been decided upon a false theory of the circumstances involved. It is a contradiction in terms to speak of an absolute duty as being susceptible of delegation. If it can be delegated in any particular instance, it ceases, *ex hypothesi*, to be absolute. That this is a necessary corollary of the theory that a duty is absolute has been fully recognized in many English and American cases, where the complainant was a stranger.[1] Why a different principle should be applied where the injury is received by a servant of the party subject to the duty is not apparent, and no court has yet furnished any reason for making such a distinction. On the other hand there is a consideration which points very strongly, if not conclusively to the conclusion that the case of a servant is precisely the one in which the courts should be most unwilling to allow the interposition of a contractor to shield the master. As has been shown elsewhere by the present writer (46 L. R. A. pp. 38–45, and pp. 107–119), a manufacturer who supplies a chattel to another person to be used in his business is not bound to indemnify the servants of the vendee for injuries which they receive owing to defects in the chattel. Manifestly the result of applying concurrently both this principle and also the principle that the master who purchases an appliance from a manufacturer is, as regards his servants, entitled to rely upon its being fit

[1] *Hole* v. *Sittingbourne & S. R. Co.* (1861) 6 Harlst. & N. 488, 30 L. J. Exch. N. S. 81, 3 L. T. N. S. 750, 9 Week. Rep. 274 (railway company held liable for the act of a contractor in obstructing the navigation of a river while building a bridge); *Terry* v. *Ashton* (1876) L. R. 1 Q. B. Div. 314, 45 L. J. Q. B. N. S. 260, 34 L. T. N. S. 97, 24 Week. Rep. 581 (tenant who maintained a lamp over a footpath in a condition so defective as to be a dangerous nuisance was held answerable to a passer by injured by its fall, although he had hired a competent contractor to repair it); *Curtis* v. *Kiley* (1891) 153 Mass. 123, 26 N. E. 421 (similar facts); *Wilkinson* v. *Detroit Steel & Spring Works* (1889) 73 Mich. 405, 41 N. W. 490 (building so defectively constructed as to be a nuisance); and the other cases cited in 1 Shearm. & Redf. Neg. §§ 14, 176.

for the purposes contemplated, unless there is something to put him on inquiry as to its condition, is that those servants are usually left remediless if they are injured by reason of some dangerous property of the appliance. The writer sees no reason for modifying the opinion which he has already had an opportunity of expressing in other publications,—that such a conclusion is simply preposterous and disgraceful to any system of jurisprudence.[2] Either the vendor should no longer be allowed to shelter himself under the supposed circumstances by the defense of want of privity of contract, or it should be regarded as an implied term in the contract between the master and his servants that all appliances obtained from parties not in his service are free from all defects which can be prevented by the exercise of that degree of care and skill which is required of persons following the same line of business as the vendor. The latter method of escaping from the absurd predicament into which the law has got itself, at this meeting point of the principles under discussion, would seem to be the most desirable. Not only would it round off and render entirely consistent the doctrine of absolute duties, but it would obviate the almost insuperable practical difficulties which would, in many instances, block the attempts of servants to obtain redress from vendors of instrumentalities residing in distant localities. There would be no injustice to the master in such a rule, for he would still have his action over against the vendor of the defective appliance, and would almost invariably be more favorably situated than his servants for the enforcement of his rights.

560. Massachusetts doctrine.— In some of the decisions by this court the theory of non-delegable duties has been propounded in language not materially different from that which has been used by judges in other states.[1] More commonly, however, that theory is enunciated in

[1] 16 Law Quarterly Review, p. 189; 36 Canada L. J. p. 203.

[2] "For the management of his machinery and the conduct of his servants, he [the master] is not responsible to their fellow servants; but he cannot avail himself of this exemption from responsibility when his own negligence in not having suitable instruments, whether persons or things, to do his work, causes injury to those in his employ. He cannot divest himself of his duty to have suitable instruments of any kind, by delegating to an agent their employment or selection, their superintendence or repair. A corporation must, and a master who has an extensive business often does, perform this duty through officers or superintendents; but the duty is his, and not merely theirs, and for negligence of his duty in this respect he is responsible." *Gilman* v. *Eastern R. Co.* (1860) 13 Allen, 433, 90 Am. Dec. 210.

In *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598, it was held that instructions were properly refused which said the defendants would not be liable for negligence of persons examining a boiler. The court said: "The corporation is equally chargeable whether the negligence was in originally failing to provide, or in afterwards failing to keep, its machinery in safe condition. The duty is essentially the same . . . . The question was not whether the officers named knew, or might have

a form which is peculiar to this jurisdiction, the position taken being essentially this,— that the master's exercise or nonexercise of a proper supervision over the servants to whom he has delegated the performance of the duties which elsewhere are treated as absolute, without qualification, is the ultimate test to which the question of his responsibility for the negligence of those servants ought to be referred.[2]

known, of the defect, or of the incompetency of those who had charge of the repairs, but whether the corporation in any part of its organization, by any of its agents, or for want of agents, failed to exercise due care to prevent injury to the plaintiff from defects in the instrument furnished for his use."

See also the quotation from the opinions in *Snow* v. *Housatonic R. Co.* § 554, note 1, and in *Wheeler* v. *Wason Mfg. Co.* (1883) 135 Mass. 297.

[2] The most useful explanation of this theory, for the purpose of comparative jurisprudence, is contained in the following passage from the opinion of Field, J., in *Rogers* v. *Ludlow Mfg. Co.* (1887) 144 Mass. 198, 59 Am. Rep. 68, 11 N. E. 77. "As a corporation must act by natural persons, and as all large corporations carry on their business by means of servants of different grades, it is manifest that, if it is held that these are all fellow servants, and that the corporation can delegate the whole duty of hiring and superintending its servants, and of providing its machinery and of keeping it in repair, to one or more principal servants, such as superintendents or managers, the corporation may escape all responsibility for injuries caused by defective machinery, except in the few cases where it can be shown that these principal servants were incompetent, or that the directors of the corporation, or its principal officers, knew that the subordinate servants were incompetent, or that the machinery used was defective. To avoid this result, some courts have held that superintendents or managers are not fellow servants with the men employed to work under them, or that servants employed in one department of the business are not fellow servants with those employed in another. Other courts have held that they are all fellow servants, but that the master cannot avoid his obligation to see to it that reasonable care shall be exercised in procuring suitable machinery, in keeping it in repair, and in hiring and retaining competent servants, by employing a servant to do these things for him; and that if he does employ a servant for this purpose, and the servant does not use due care, the master is responsible. . . . The rule of *respondeat superior*, as applied to cases like the present, the exception of injuries caused by the negligence of a fellow servant, and the limitations of this exception have been established by courts upon consideration of public policy, as well as of the legal principles which govern cases somewhat analogous. If a master who takes no personal part in the management of his business has any duty to perform towards his servants, it is difficult to say that it is always wholly performed by doing two things, namely, by employing competent servants, and by furnishing ample means. In order that the business may be properly managed the servants should not only be competent but they should be numerous enough to do, and they should have the means of doing, whatever ought reasonably to be done; and such regulations should be established as will insure the requisite subordination and control, and the exercise of reasonable intelligence and care in the conduct of the business; and it is almost as difficult to define all the duties of the master in these respects as to define the duties of a person under other relations. If it is not the absolute duty of the master to furnish suitable machinery, and if he is not held to warrant that the servants he employs to furnish machinery or to keep it in repair shall always use reasonable care, then the duty of a master who does not personally conduct his business, if he is under any duty, we think, must be to use reasonable care in the management, and that is to exercise, or have exercised, a reasonable supervision over the conduct of his servants, as well as to use reasonable care in seeing that his servants are competent, and are furnished with suitable means for carrying on the business." The learned judge then reviewed some of the earlier cases and proceeded thus: "These decisions show that it is the duty of the master to exercise a reasonable supervision over the

This conception would seem to involve the result, that there is only one duty which is non-delegable in the sense in which that term is ordinarily understood,—the duty, namely, of efficient supervision over the agents whom he has appointed to represent him in seeing that the various instrumentalities of work are in a reasonably safe condition; and for this reason the Massachusetts decisions in regard to negli-

condition in which the machinery, structures, and other appliances used in his business are kept by his servants, and that he cannot wholly escape responsibility by delegating the performance of this duty to servants; that the negligence of his servants in repairing or in failing to repair machinery is not necessarily the negligence of the master, but that it is also to be determined in each case whether the master has exercised a reasonable supervision over his servants, and reasonable care in seeing that his machinery is kept in proper condition, although he may have employed competent servants and furnished them with suitable materials, and instructed them to keep the machinery in repair. As was said in *Johnson* v. *Boston Tow-Boat Co.* (1883) 135 Mass. 215, 46 Am. Rep. 458, 'the master is liable in all cases for his own negligence, and that may be shown by a defect of such a nature, or so long continued, as to be of itself evidence of negligence in the master; or the negligence of a servant may be of such a character that negligence of the master may be inferred from it.' We are aware that this rule is somewhat indefinite, and is, perhaps, not precisely that which generally prevails in the United States." *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590; *Benzing* v. *Steinway* (1888) 101 N. Y. 547, 5 N. E. 149.

The following extracts will also be found serviceable as elucidating still further the position of the court.

"Perhaps the whole question is whether the master has exercised reasonable care in employing competent servants, in providing suitable machines and implements, and in doing that part of his business which he has undertaken to do himself, and has exercised a reasonable supervision over his servants in the performance of the duties which he has intrusted to them. This is often a question for the jury. Courts have therefore held that they could not say, as matter of law, that a master was not responsible for injuries occasioned by defective machinery, when the defect was substantial and rendered the machine unfit for use, although it was through the neglect of a competent servant that the machine had not been repaired; and they have also held that, when the defect was one that must frequently arise from the use of the machine, and was such that the person employed to superintend the use of the machine should attend to in order to keep it in running order, the master performed his whole duty by furnishing suitable materials and employing competent servants to keep the machinery in repair. These decisions have been made in cases where it appeared that the defect in the machinery was unknown to the master. The general question is what, under the circumstances, the master ought reasonably to have known and done, and, in determining this, the nature of the defect, the length of time it has existed, and the means taken to remedy it, are important facts." *Rice* v. *King Philip Mills* (1887) 141 Mass. 236, 59 Am. Rep. 80, 11 N. E. 101.

"It is the duty of the master to exercise ordinary care in supplying and maintaining machinery, appliances, and instrumentalities; and if the servant exercising ordinary care is injured by a deficiency therein, he is entitled to recover damages. The servant charged with providing these appliances stands in the place of the master, and performs the duty incumbent on him. It is not sufficient that he is an intelligent and competent servant; if he neglects this, the master is still responsible, unless he shall himself have exercised a reasonable care and supervision over him in seeing that the machinery was in proper condition. Nor is it enough that the master has employed suitable servants, and furnished them with suitable materials, and instructed them to keep the machinery in repair. He must see that such servants do their duty." *Elmer* v. *Locke* (1883) 135 Mass. 575; *Daly* v. *Boston & L. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690.

"The very nature of the implied con-

gence of the kind with which we are concerned in this chapter stand, in some respects, outside the general current of the authorities. But a connecting link between the doctrine thus formulated and the one which prevails in most American states is supplied by the consideration that it is only in cases which have relation to obligations which are commonly viewed as being non-delegable, that the ulterior duty of supervision is treated as a determinant factor. From the standpoint of other courts those cases may fairly be regarded as an

tract created by the hiring, whereby he undertakes to use proper care in always providing safe tools and appliances, is inconsistent with his delegation of the duty to a fellow servant, for whose negligence he is not to be responsible. His obligation involves the exercise of every kind of care and diligence which is necessary to give him knowledge of the condition as to safety of his machinery and appliances, so far as such knowledge is obtainable by reasonable effort. His duty relates to the condition of these articles when they come to the hands of his servants for use, and the performance of that duty must carry him just so far into details as it is reasonably necessary to go, in view of the nature and risk of the business, to enable him reasonably to protect his servants from a danger which he should prevent." *Moynihan* v. *Hills Co.* (1888) 146 Mass. 592, 16 N. E. 574.

In *Coates* v. *Boston & M. R. Co.* (1891) 153 Mass. 297, 10 L. R. A. 769, 26 N. E. 864, a case of an accident caused by the absence of a jaw-strap on a railway car, the court expressly refused to put its decision "on the identification of master and servant, and a union of the knowledge of the corporation and the command of the conductor in one person, by a fiction."

In *Babcock* v. *Old Colony R. Co.* (1890) 150 Mass. 467, 23 N. E. 325, the court in discussing the question whether there was evidence to warrant the judge in submitting to the jury the question whether the section master was so far charged with the duty of supervision that the defendant might be liable to one of its servants for his negligence, said: "It is well settled that one who is in some things a mere servant may be made the master's agent to perform duties which are primarily personal to the master. *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574, and cases cited. If, in the present case, the section master was intrusted by the defendant with the performance of the duty, or a part of the duty, of supervision of the tracks which a reasonable regard for the safety of its employees required the corporation to perform, the defendant is liable for his negligence in the performance of it. There was evidence tending to show that different persons had some responsibility in representing the defendant in this respect. A part of the printed instructions to section masters was in these words: 'They will see that no wood, lumber, ties, or other obstructions are piled within 6 feet of the track.' It does not very clearly appear what other measures were taken by the defendant promptly to ascertain the existence of defects or obstructions along the track. The evidence on this branch of the case is rather meager, but we cannot say that there was not enough to warrant the judge in submitting the question to the jury under the instructions which he gave. It is the duty of a railroad corporation to use reasonable care and diligence to keep its tracks in a safe condition for its employees to work upon. So far as the work of keeping its tracks in repair is left to its servants, it is its duty to exercise reasonable supervision to see that the work intrusted to them is properly done. How far into details this supervision must go before the domain which belongs exclusively to the master is passed and the domain which may be left to servants is entered depends upon what it is reasonable to require of a master who is charged with the duty of providing safe works, machinery, tools, and appliances for his employees. In some cases this may be a difficult question to decide. But undoubtedly a jury may find that a railroad corporation should so far supervise the work of its servants in repairing its tracks as to see that a pile of sleepers 3 or 4 feet wide is not left for a long time within 18 inches of the rails in the freight yard of an important station."

Commenting on the exception taken to

thorities for the position that the obligations involved belong to the non-delegable category; and this is the footing upon which they have been, for the purposes of the present inquiry, collated, as to the facts involved, with the rulings in other jurisdictions.[3]

Contrast the cases cited in § 586, note 1, *post*.

561. Servants may act in a dual capacity.—In the last chapter (§§ 540 *et seq.*) we had occasion to cite a number of decisions in which employees who are deemed to be vice principals by virtue of the extent of the control exercised by them were viewed as persons whose negligence is or is not imputed to the master, according as they may or may not be discharging one of his absolute duties. The foundations of this theory, as was there shown, are by no means satisfactory; but no objection, either on the score of logic or otherwise, can be made to the theory of such a dual capacity in cases where the vice principalship of the delinquent employee is itself predicated solely from the fact that his delinquency was of such a nature as to constitute a breach of an absolute duty. The doctrine that a representative character is deducible from this circumstance obviously connotes by implication the doctrine that the delinquent employee is not, as regards any other kind of negligence, an agent of the master; and such is the effect of the cases.[1]

the refusal of the trial judge to instruct the jury that, if the defendant had used reasonable care in the supervision of the section men and of the use of the yard the plaintiff could not recover for the neglect of the section men in leaving the ties by the track, or the neglect of the yard master or the section master or road master in failing to have them removed, or to report that they were there, the court said: "This instruction could not properly be given, because it required of the corporation merely supervision of the section men and of the use of the yard, and disregarded the duty of the defendant to use reasonable care in looking after the condition of the road in other particulars. It may have been the duty of the yard master or the road master to exercise this supervision, and if he discovered neglect, to see that the road was not left in a dangerous condition on account of the neglect. Under the instructions requested the yard master or road master might have used reasonable care in the supervision of the section men, and been negligent in the performance of a part of the master's duty which was incidental to supervision, namely, the correction of the errors which supervision disclosed. We are of the opinion that the instructions were correct and sufficient."

See also *Sweat* v. *Boston & A. R. Co.* (1892) 156 Mass. 284, 31 N. E. 296; *Colton* v. *Richards* (1878) 123 Mass. 484; *Nevin* v. *Sears* (1892) 155 Mass. 303, 29 N. E. 472.

[3] It should be observed that the non-delegable quality of the duty of supervision, so far as it is connected with other duties of the same stamp, is sometimes asserted in the opinions of other courts beside Massachusetts.

"He [a master] cannot claim immunity upon the ground that he has exercised due care in selecting mechanics of competent skill in the construction of such machinery and buildings, but assumes the burthen of seeing that such mechanics actually exercise reasonable care and skill in the execution of their work." *Collyer* v. *Pennsylvania R. Co.* (1886) 49 N. J. L. 59, 6 Atl. 438.

[1] "One who has not the authority of a general vice principal may be intrusted by the master with the discharge of absolute personal duties that rest upon it, such as the duty to use reasonable care to employ competent and careful

Whether the negligent act in any particular instance did or did not amount to a breach of a non-delegable duty will be determined

fellow servants; and in such a case he may be termed a special vice principal. He stands in the place of the master when he is discharging one of these personal duties of the master, and the latter is liable for his negligence in the discharge of it; but in the performance of his other services as a general employee he is not the representative of the master, nor is the master liable for his negligence in the performance of them." *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 245, 58 Fed. 525.

"A servant is a vice principal only when he stands in place of the principal with reference to the principal's duty, or in the exercise of the principal's functions." *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659.

"The relation of a foreman to the other workmen is that of a coemployee, except as to such acts performed by him as were embraced in the duties of the defendant." *Mahoney* v. *Vacuum Oil Co.* (1894) 76 Hun. 579, 28 N. Y. Supp. 196.

"If the principal be a corporation, or be unable for any reason to discharge these obligations in person, they must be discharged through an officer, agent or foreman. The person who is thus put in the place of the principal, to perform for him the duties which the law imposes, is a vice principal, and *quoad hoc* represents the principal, so that his act is the act of the principal. This is true, however, only when and so long as his acts are in discharge of the duties which the principal owes to his employees. Beyond this line he acts as a workman, and not as a vice principal." *Ross* v. *Walker* (1891) 139 Pa. 42, 21 Atl. 157, 159.

"The liability of the master, when the negligence is not his personal act or omission, but the immediate act or omission of a servant, turns upon the character of the act or omission complained of. If the coservant whose act or omission caused the injury is at the time representing the master, in doing the master's duty, the master is liable; if, on the other hand, he is simply performing the work of servant in his character as a servant or employee merely, the master is not liable. The injury in the last case supposed would, as between the master and the servant sustaining the injury, be attributable solely to the immediate author, and not to the master." *Vitto* v. *Keogan* (1897) 15 App. Div. 329, 44 N. Y. Supp. 1.

"It is not the rank of the employee or his authority over other employees, but the nature of the duty or service which he performs, that is decisive: that, whenever a master delegates to another the performance of a duty to his servant, which rests upon himself as an absolute duty, he is liable for the manner in which that duty is performed by the middleman whom he has selected as his agent; and to the extent of a discharge of those duties by the middleman, however high or low his rank, or however great or small his authority over other employees, he stands in the place of the master, but as to all other matters he is a mere coservant. It follows that the same person may occupy a dual capacity of vice principal as to some matters, and of fellow servant as to others. *Lindvall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020.

"According to the firmly settled rule of law in this state, Helm, notwithstanding the higher grade of service in which he was employed, was a fellow servant with plaintiff in so far as he served in the places or with the machinery or appliances prepared and furnished by the defendant; and for the consequences to fellow servants of his negligence in the performance of such services in the places or with machinery or appliances thus prepared and furnished, the defendant is not responsible. But in so far as Helm was authorized and employed to prepare the places in which other servants were to work, or to furnish the machinery or appliances with which they were to work, he represented the corporate defendant, and his negligence in the performance of these services was the negligence of the defendant, for the injurious consequences of which to other servants, without their fault, it is responsible to the same extent it would have been if such places, machinery, and appliances had been prepared and furnished through the immediate agency of Mr. Rolf, the general superintendent, or by Mr. Bee, the special superintendent, of the silver room." *Nixon* v. *Selby Smelting & Lead Co.* (1894) 102 Cal. 458, 36 Pac. 803.

A Scotch case was sent back for re-

with reference to the principles established by the cases cited in the following subtitle.

562. Pleading.—A complaint alleging that the injury to the servant resulted from the breach of one or more of the absolute duties of the defendant is good against a demurrer.[1]

563. Burden of proof.— In the face of proof of injury from ill-con-

trial on the ground that the instructions had not been such as to make it clear to the jury that the defendant would be liable for the negligence of his underground manager in providing a defective rope only if such negligence was committed by him in his representative capacity, as performing a duty delegated to him by the master, and representing the master in the performance of that duty. *Wilson* v. *Sarchdons* (1866) 4 Sc. Sess. Cas. 3d series, 736.

See also, to the same effect, *Mechan* v. *Speirs Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518; *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 241, 14 Am. Rep. 598; *Hussey* v. *Cager* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556, Reversing (1886) 39 Hun, 639; *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796; *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559; *Calhan* v. *Ball* (1896) 113 Cal. 593, 45 Pac. 1017; *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258; *Ell* v. *Northern P. R. Co.* (1891) 1 N. D. 336, 12 L. R. A. 97, 48 N. W. 222; *Chapman* v. *Southern P. Co.* (1895) 12 Utah, 30, 41 Pac. 551; *Small* v. *Allington & C. Mfg. Co.* (1901) 94 Me. 551, 48 Atl. 177.

The moment that an employee, not vice principal for general purposes, but who has authority to hire an emergency assistant, has completed such a hiring, and, after having resumed his place as servant, enters upon the performance of his work as such, he ceases to represent the master and becomes a coemployee of the emergency assistant for all purposes. *Burks* v. *Rochester R. Co.* (1899) 41 App. Div. 66, 58 N. Y. Supp. 210 (Former Appeal [1894] 77 Hun, 77, 28 N. Y. Supp. 314, Reversed [1895] 146 N. Y. 181, 40 N. E. 782).

Any liability beyond this "is inconsistent with the well settled rule of the master's duty. It adds to and alters it in ways that cannot be foreseen nor guarded against, and makes the master liable, however great may have been his care and diligence in selecting his servants. But it may be said that the converse makes the servant suffer. So it may. Accidents are continually happening from somebody's carelessness. The law gives a remedy in damages against the guilty party, but not against an innocent one. As to strangers, upon principles of public policy, it treats a master as guilty for the negligence of his servant; but public policy does not demand that he should be so treated as to his own servants, who have the option to examine their surroundings in his service and to receive pay according to the risk they incur. They may sue a fellow servant for his negligence; but to make the master liable for it, unless that servant is taking the place of the master, is contrary to reason and justice." *Hanna* v. *Granger* (1894) 18 R. I. 507, 28 Atl. 659.

[1] *Louisville, E. & St. L. Consol. R. Co.* v. *Miller* (1895) 140 Ind. 685, 40 N. E. 116; *Camp* v. *Hall* (1897) 39 Fla. 535, 22 So. 792; *Wallace* v. *Standard Oil Co.* (1895) 66 Fed. 260; *Chicago & N. W. R. Co.* v. *Swett* (1867) 45 Ill. 197, 92 Am. Dec. 206; *Nicholas* v. *Burlington, C. R. & N. R. Co.* (1899) 78 Minn. 43, 80 N. W. 776; *Hulehan* v. *Green Bay, W. & St. P. R. Co.* (1883) 58 Wis. 319, 17 N. W. 17; *Bessex* v. *Chicago & N. W. R. Co.* (1878) 45 Wis. 477.

"A declaration alleging that he [the defendant] carelessly and negligently permitted the track and a car to become and remain defective would be sustained by evidence that they became and remained defective through his personal carelessness and negligence in not discovering and remedying the defects, if he took upon himself that branch of the business; or by evidence that he assumed the general management and superintendence of the road and employed all the workmen, and that from gross negligence he employed no repair men, or an insufficient number, or unskilful ones, whereby the track and a car became and remained defective. In either case the defects were existing by reason of his own negligence." *Field* v. *Northern R. Co.* (1860) 43 N. H. 225.

structed and unsafe machinery furnished for the servant's use, a court will indulge in no presumption that the master performed his duties, or that coservants were negligent.[1] The act of a servant in repairing an appliance will be presumed to be that of a vice principal, where one of the principals testified that the appliance was repaired the evening before the accident by one of the hands, the presumption being that it was done by the direction of the principal.[2] In the absence of evidence showing who directed the use of a place of work at a time when it was in such an unsafe condition that it should not have been used at all, the negligence inferable from such use will be attributed to the master rather than to the fellow servants of the injured employee.[3] But if the immediate cause of the accident may, upon the evidence, have been the act of a fellow servant, and the servant seeks to recover on the ground that it was really due to negligence constituting a breach of a non-delegable duty, he will fail unless he satisfies the requirements of the ordinary rule that the burden of proving negligence be on the person who alleges it.[4]

564. Propriety of instructions.— Any instruction inconsistent with the doctrine of non-delegable duties is properly refused, and if such an instruction is given, it is a ground for reversing a verdict in favor of the defendant.[1]

[1] *Ellis* v. *New York, L. E. & W. R. Co.* (1884) 95 N. Y. 546.

[2] *Huth* v. *Dohle* (1898) 76 Mo. App. 671 (demurrer to evidence properly refused).

[3] *Stoker* v. *St. Louis, I. M. & S. R. Co.* (1891) 105 Mo. 192, 16 S. W. 591, First Appeal (1887) 91 Mo. 511, 4 S. W. 389 (train run over defective truck).

[4] In *Rose* v. *Boston & A. R. Co.* (1874) 58 N. Y. 217, where the train on which the plaintiff's intestate was a brakeman was sent out within three or four minutes after another train, and was itself followed by a third train at about the same distance of time, and the injury which caused the death of the brakeman resulting from the trains being sent out so near together, but by whose direction it did not appear, the plaintiff failed to make out a clear case, and the court rendered a decision based upon the theory that the company was not liable for negligence in not observing the regulations regarding the starting of trains, or in the disobedience.

Negligence of a car inspector as to the inspection of a car is not sufficiently shown, where there is no evidence that the inspection, as made, was not a proper one, or such as a man of ordinary prudence would have made under the circumstances. *Oglesby* v. *Missouri P. R. Co.* (1899) 150 Mo. 137, 51 S. W. 758, Reversing in Banc (1896) 37 S. W. 829.

[1] As, for example, an instruction which directs the jury to find for the defendant if he has used care in the selection of the appliance and of a competent inspector, and the plaintiff's injury was due to the negligence of such inspector in not making proper tests. *Texas & P. R. Co.* v. *Barrett* (1895) 14 C. C. A. 373, 30 U. S. App. 196, 67 Fed. 214. Or an instruction that a corporation is only liable for the negligence of its directors, and not for the negligence of any other officers, whatever their position and duties. Authorities cited in *Krueger* v. *Louisville, N. A. & C. R. Co.* (1887) 111 Ind. 51, 11 N. E. 957. Or an instruction that an appliance furnished by the master to his servants, to be used by them in the prosecution of their work, has been constructed by one who is a fellow servant engaged in the same kind of work with the servant who is injured (see chapter XXXII., subtitle C, *post*), exonerates

564a. Functions of court and jury.— (Compare § 511, *ante*, and § 594, *post*.)—If there is no dispute as to the facts, and the deduction to be drawn from these facts under the doctrines accepted in the jurisdiction where the cause of action arose is also clear, the question whether the negligent servant was a vice principal or not, as regards a certain act, is one of law.[1] But if the facts are in controversy, or the evidence is susceptible of two constructions, the proper course is for the court to define the relation of fellow servants and leave it to the jury to determine whether the employees in a particular case come within the definition.[2] In other words, the question whether a particular act was one incidental to the duty of the master, or to the duty of a servant, as such, is a mixed question of law and fact, to be sub-

the master from liability for the consequences of a defectiveness of the appliance. *Jones* v. *St. Louis, N. & P. Packet Co.* (1890) 43 Mo. App. 398. Or an instruction that if the fall of a roof in a mine was due to the negligence of the "mine boss," it was the negligence of a fellow servant. *Russell Creek Coal Co.* v. *Wells* (1898) 96 Va. 416, 31 S. E. 614.

See also, to the same general effect, *Mann* v. *Corliss Steam Engine Co.* (1899) 21 R. I. 386, 45 L. R. A. 267, 43 Atl. 874; *Rouse* v. *Downs* (1897) 5 Kan. App. 549, 47 Pac. 982; *Hess* v. *Rosenthall* (1896) 160 Ill. 621, 43 N. E. 743.

A railroad company, when sued by a stock and fuel agent for injuries due to a defective track, is not entitled to an instruction that the plaintiff could not recover if he were an employee of the company, and the injury was caused by the negligence of a servant of the company. *Texas & P. R. Co.* v. *Kirk* (1884) 62 Tex. 227.

Where the servant injured by the failure of his foreman to shore the sides of a trench properly had nothing to do with its excavation, being merely one of a gang sent, after it had been cut, to lay pipes along it, and there is no evidence tending to show that it became unsafe after he began work, it is not error to refuse to instruct the jury that, if they found from the evidence that the defendant had selected a foreman who was competent to take charge of the work, and had given him proper instructions, and if the cave-in occurred by reason of the foreman's subsequent neglect to shore up the trench, the neglect, if there was any, which caused the accident, was that of a coservant of the plaintiff, and the defendant was not responsible. *Baird* v. *Reilly* (1899) 35 C. C. A. 78, 63 U. S. App. 157, 92 Fed. 884.

In a case where no reliance is placed upon the latent character of the defects, an instruction is not exhaustive, and therefore erroneous, which allows a jury to infer that a master has sufficiently discharged his duty of furnishing his servant with a safe scaffold, when he intrusts the construction of it to a competent contractor. *Macdonald* v. *Wyllie* (1898) 1 Sc. Sess. Cas. 5th series, 339. But see §§ 558, 559, *supra*.

An instruction to the effect that if the room in question was a suitable place, and there were proper and suitable means of extinguishing fire, and the means of egress and escape were suitable and proper, and in order and ready for use, then the plaintiff could not recover, is sufficiently favorable to the plaintiff. *Keith* v. *Granite Mills* (1878) 126 Mass. 90, 30 Am. Rep. 666.

[1] *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017; *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

[2] *Wilson* v. *Charleston & S. R. Co.* (1897) 51 S. C. 79, 28 S. E. 91. There the trial judge had erroneously ruled that the relation of the negligent and injured servants was one solely for the consideration of the jury. The following distinction was drawn by the supreme court: "Whether an engineer, brakeman, or switchman is, when exercising his ordinary duties, a fellow servant with a car cleaner, is a question of law. But whether, in a particular case, either of them was engaged in performing certain acts which the law requires of the master, and which would prevent

mitted to the jury as to the fact under legal rules, and its determination depends upon the circumstances of the case.[3] On the one hand, the jury must decide the master's liability where the vice principalship of the negligent employee would be a legitimate, though not a necessary, deduction from the evidence.[4] On the other hand, if the facts are not in dispute, and their significance is unambiguous, when considered in relation of the theory of vice principalship adopted in the jurisdiction where the case is tried, it is error to take the opinion of the jury.[5]

Where there is testimony going to show that the injury was caused by a breach of a non-delegable duty, it is error to take the case from

them from being fellow servants, is a question of fact to be determined by the jury."

In an action by an employee to recover of a railway company for injuries sustained by the giving way of a grab iron of a ladder on the side of the car, an instruction that defendant's duty to inspect the car was shown to have been performed by two inspectors when it was put in the train is erroneous, in declaring, as matter of law, that defendant had discharged its duty as to the inspection of the car. *Thompson* v. *Great Northern R. Co.* (1900) 79 Minn. 291, 82 N. W. 637.

[3] *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874.

[4] In an action against a gas company to recover for personal injuries resulting from the falling in of an overhanging bank of earth in a street excavation made for repairing a pipe, it appeared that the superintendent, after making the trench 2½ feet too far south, ordered the men, in order to avoid opening a new trench, to undermine the earth north to the pipe, and throw the dirt on the bank above the pipe. Held, that the question whether it was therein to be regarded as the *alter ego* of the company was for the jury, and a nonsuit was error. *Devine* v. *Tarrytown & I. Union Gaslight Co.* (1880) 22 Hun, 26. In another case the court, in holding that, where the question was whether the construction of a derrick by defendant's foreman, and the use of it by a servant of defendant, for whose death damages were claimed, made them fellow servants, an instruction that they were not fellow servants was error, said: "It is undoubtedly the duty of an employer, where he undertakes to supply his employees with machinery and other appliances to be used by them in the prosecution of his business, to exercise reasonable care and prudence in supplying such as will be safe and suitable for the purpose for which they are to be used. But whether that is the undertaking of the employer in any given case is a question of fact to be determined from the circumstances. He may undertake to provide the machinery and appliances themselves, or only the materials out of which they are to be constructed, leaving their construction to the same employees who are to use them when constructed. Thus, for example, a person employing others to erect a building, might undertake, on his own part, to put up and supply all the scaffolding necessary to be used in the progress of the work, and in that case he doubtless would be liable for injuries to his employees resulting from defects in the scaffolding which reasonable care and prudence would have obviated. But if his undertaking is merely to supply the materials out of which the employees erecting the building may put up their own scaffolding, his duty would only extend to the use of reasonable care and prudence in the choice of materials and the selection of his servants." *Shield* v. *Moran* (1882) 10 Ill. App. 618.

[5] *McGivity* v. *Athol Reservoir Co.* (1892) 157 Mass. 183, 29 N. E. 510, holding it to be a question of law whether an employee, in setting a post for one of the guy ropes of a derrick, acted as a fellow servant of the plaintiff, or for the master in discharge of the master's duty to see that suitable appliances were supplied.

the jury.[6] On the other hand, there is no error, under such circumstances, in refusing to say, as a matter of law, that the plaintiff cannot recover.[7]

B. What duties are deemed to be non-delegable.

565. Duties imposed by statute.— So far as it is possible to extract any general rule from the cases, it may, perhaps, be said that the courts proceed upon the theory that, unless the legislature has either expressly, or by reasonable implication, declared its intention in this regard, a duty imposed upon a master by a statute should be treated as delegable or non-delegable, according as it belonged to one category or the other under the common-law doctrines which previously prevailed in the particular jurisdiction to which the statute applies.

a. Quality of duty unchanged by statute.—On the one hand, the logical consequence of the doctrine that duties pertaining to maintenance are, as a class, delegable (see § 618, *post*), is considered to be that, in so far as the performance of duties prescribed by statute constitutes a part of the operation of a going concern, they are delegable.[1]

[7] *Herbert* v. *Northern P. R. Co.* (1882) 3 Dak. 38, 13 N. W. 349. Affirmed in (1883) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590 (brake defective through negligence of car repairer); *McCauley* v. *Southern R. Co.* (1897) 10 App. D. C. 560; *Mackey* v. *Baltimore & P. R. Co.* (1890) 8 Mackey, 282; *Leonard* v. *Kinnare* (1898) 174 Ill. 532, 51 N. E. 688, Affirming (1897) 75 Ill. App. 145; *Brickner* v. *New York C. R. Co.* (1870) 2 Lans. 506; *Bernardi* v. *New York C. & H. R. R. Co.* (1894) 78 Hun, 454, 29 N. Y. Supp. 230; *Schulz* v. *Rohe* (1893) 4 Misc. 384, 24 N. Y. Supp. 118; *Richards* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 234; *Cavanagh* v. *O'Neill* (1898) 27 App. Div. 48, 50 N. Y. Supp. 207; *Carter* v. *Oliver Oil Co.* (1891) 34 S. C. 211, 13 S. E. 419; *Luehke* v. *Chicago, M. & St. P. R. Co.* (1883) 59 Wis. 127, 48 Am. Rep. 483, 17 N. W. 870; *McMahon* v. *Ida Min. Co.* (1897) 95 Wis. 308, 70 N. W. 478.

[1] See remarks of Lord Chelmsford in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30 (p. 341 of Law Reports), with regard to the effect of the act of 23 & 24 Viet. chap. 151, §§ 10 and 22, requiring mine owners to keep up an adequate amount of ventilation, and imposing a penalty for a breach of this provision.

The other law lord declined to express any opinion on this point. But the reasoning and the decision in *Hedley* v. *Pinkney & Sons S. S. Co.* [1894] A. C. 222, Affirming [1892] 1 Q. B. 58, are quite in harmony with this view. There it was held that a ship is "seaworthy" within the provisions of the English merchant shipping act (39 & 40 Viet. chap. 80), if it is properly equipped for the safety of the crew in the first instance, and that the mere neglect of the captain to use the equipment furnished will not render her unseaworthy in such a sense as to render her owner liable as for an infringement of the act. The fault in such a case was regarded as being entirely that of the captain, a mere co-servant of the members of the crew. The plaintiff, who was injured by the omission to secure properly a movable section of the ship's railing, contended, without success, that the case came within the 5th section of the merchant shipping act 1876, which provides that in every contract of service, express or implied, between the owner of a ship

On the other hand, the acts which have been passed in most of the American states for the purpose of securing the safer operation of mines are held to prescribe duties of the absolute class.[2]

and the master or any seaman thereof, there should be implied, notwithstanding any agreement to the contrary, an obligation on the owner of the ship that he and the master should use all reasonable means to insure the seaworthiness of the ship for the voyage at the time when the voyage commences, and to keep her in a seaworthy condition for the voyage during the same.

In the court of appeal, Kay, L. J., reasoned thus: "Leaving a door open or a bolt unshot or a movable railing out of position, as in this case, clearly would not make the ship unseaworthy within that definition. The ship here had all the necessary equipment ready to be used she was a perfect machine. It was a case of negligence in not using a perfect machine properly. I do not think it can be said that the negligence of the master in allowing a door to be left open or a bolt to be left unshot, or not having a railing placed in position, which was ready to hand, not stowed away in the hold where it could not be got at, or for any other reason unavailable, amounts to a breach of the obligation to keep the ship seaworthy under the act."

In the House of Lords the same view prevailed. Lord Herschell said: "It is quite clear . . . that the Prodano was not unseaworthy at the time she left the port of London. After she left that port her hull and equipment remained precisely what they were at the time of her departure. She was in all respects efficiently equipped. The fault was in not making use of the equipment with which she had been furnished. Under circumstances such as these, I do not think it can be said that there has been a failure to keep her in a seaworthy condition for the voyage, within the meaning of the enactment. Following, as it does, the obligation that the owner and the master, and every agent charged with the loading of the ship or the preparing thereof for sea, shall use all reasonable means to insure the seaworthiness of the ship for the voyage, I think the words 'to keep her in a seaworthy condition for the voyage during the same,' point to an obligation of the same character, and not to a neglect properly to use the appliances on board a vessel well equipped and furnished. There is ample scope for the operation of the words in question, even though this construction be put upon the enactment. If any of the necessary appliances were lost or destroyed in the course of the voyage, it would, no doubt, be the duty of the master to use all reasonable means to supply others in their place, just as it might be his duty during the voyage to restore the hull or machinery, if damaged, to a condition suited to the perils to be encountered. But if the appellant's argument were to prevail, it would have a much wider scope than I am able to gather from the words of the enactment was intended by the legislature. The failure properly to secure many parts of the ship which are, in ordinary practice, open from time to time, would no doubt diminish the safety of those serving on board her, and be a source of danger to them; but I do not think it could reasonably be said that because in such a case a bolt was not securely fixed the vessel thereupon became unseaworthy. In truth the point is only of importance because of the limitation which the law at present imposes upon a liability of an employer for accidents due to the negligence of his servants; but for this limitation, I do not think it would have occurred to anyone to maintain that there had been, in the present case, a breach of the implied obligation created by § 5 of the merchant shipping act 1876."

[2] *Cherokee & P. Coal & Min. Co. v. Button* (1896) 3 Kan. App. 292, 45 Pac. 100 (decision upon Kan. Gen. Stat. 1889, par. 3850, which, in order to promote the health and safety of the persons employed in coal mines, provides that the owner, agent, or operator shall employ a competent and practical inside overseer, who shall keep a careful watch over the ventilating apparatus, the airways, traveling ways, pumps and pump timbers, drainage, and roofs of tunnels, and that there shall be sufficient manholes and proper signaling apparatus on manholes on the traveling ways; and also prescribes that safety lamps and sufficient timber for props shall be furnished); *Sommer v. Carbon Hill Coal Co.* (1898) 32 C. C. A. 156, 59 U. S. App. 519, 89 Fed. 51 (coal miner does not assume the risk of negligence of the

A similar doctrine prevails with respect to statutory duties imposed on railway companies to fence their tracks,[3] and to block the frogs in their yards so as to prevent the catching of feet therein.[4] Similarly, it has been denied that a statutory duty to fence dangerous machinery can be delegated so as to relieve the master from responsibility for its negligent performance by the agent.[5]

b. Quality of duty altered.—On the one hand, the rule which absolves a master from liability for negligence in the erection of a scaffold, where such erection is a part of the work, has been changed by the New York labor law (Laws 1897, chap. 415, § 18), providing that any person employing or directing another to perform labor of any kind in the erection of a building shall not furnish unsafe scaffolding. His duty is not discharged sufficiently by furnishing a sufficient quantity of suitable materials.[6]

person having charge of the ventilation of the mine, where a statute requires the mine owner to provide for proper ventilation); *Costa* v. *Pacific Coast Co.* (1901) 26 Wash. 138, 66 Pac. 398 (gas tester held to be a vice principal as regards the miners); *Linton Coal & Min. Co.* v. *Persons* (1894) 11 Ind. App. 264, 39 N. E. 214 (holding that the owner of a mine does not, by employing a mining boss, relieve himself from liability for failure of the latter to use reasonable care to make the mine safe to work in, under Ind. Rev. Stat. 1894, §§ 7472, 7473, providing for the employment of such boss, and that for any violation of the act the owner shall be liable to any person who is injured thereby).

[3] *Atchison, T. & S. F. R. Co.* v. *Reesman* (1894) 23 L. R. A. 768, 9 C. C. A. 20, 19 U. S. App. 596, 60 Fed. 370.

[4] *Ashman* v. *Flint & P. M. R. Co.* (1892) 90 Mich. 567, 51 N. W. 645 (railway company held guilty of actionable negligence, under Mich. Laws 1883, p. 191, where a frog was suffered to remain unfilled so long that knowledge of its condition might be presumed); *LeMay* v. *Canadian P. R. Co.* (1890) 17 Ont. App. Rep. 293 (see § 567, note 1, *infra*).

[5] In *Groves* v. *Wimborne* (1898) 2 Q. B. 402–410, 67 L. J. Q. B. N. S. 862, Smith, L. J., said: "But in my judgment the defense of common employment only applies where the action is by a servant against the master and is founded upon the negligence or misconduct of his fellow servant. In such a case the doctrine of common employment attaches. In the present case, which is an action founded upon the statute, there is no resort to negligence on the part of a fellow servant or anyone else. There being an unqualified statutory obligation imposed upon the defendant, what answer can it be to an action for breach of that duty to say that his servant was guilty of negligence, and therefore he was not liable? The defendant cannot shift his responsibility for the performance of the statutory duty on to the shoulders of another person. The case of *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 320, 19 L. T. N. S. 30, was relied upon as showing the contrary. But that case decided nothing of the kind. It simply decided that the law of Scotland with regard to the applicability of the doctrine of common employment where the fellow servant was in a position of superintendence was the same as that of England." Rigby, L. J., said: "Where an absolute duty is imposed upon a person by statute it is not necessary, in order to make him liable for breach of that duty, to show negligence. Whether there can be negligence or not, he is responsible *quacun que via* for nonperformance of the duty." Rigby, L. J., in *Groves* v. *Wimborne* (1898) 2 Q. B. 402, 67 L. J. Q. B. N. S. 862.

Where a statute requires the fencing of all gearing in manufacturing establishments, the negligence of certain employees in bending the rods which guarded gearing was held not to be chargeable to another employee who slipped, and, in falling, thrust his arm through the opening thus made. *Lore* v. *American Mfg. Co.* (1901) 160 Mo. 608, 61 S. W. 678.

On the other hand, certain statutes which require mine owners to take specified precautions have received a construction which apparently renders their obligations less onerous than they would have been, if common-law principles had been left to operate. This is virtually the effect of the acts in force in Pennsylvania and elsewhere, by which mine owners are required to appoint competent foremen to supervise the underground workings. As we have already seen, in § 520, note 1, subd. (o), *ante,* an appointment made in compliance with the terms of these acts relieves the employer of any further liability with regard to the defective condition of this mine, so far as that condition is the consequence of the nonperformance of duties of the class which the foreman is supposed to discharge.

566. Duty to see that the inorganic instrumentalities of the work are reasonably safe; general rule stated.— Subject to certain qualifications which will be explained in later sections, the doctrine which now prevails in the large majority of the American states may be enunciated in the following terms: A master must indemnify a servant who is injured by the negligence of a coservant, when the delinquency consisted in a failure to discharge properly either the function of furnishing the instrumentalities with which the business is carried on, or the function of keeping those instrumentalities up to the legal standard of safety while they continue to be used.[1]

Allister v. *Ferguson* (1900) 50 App. Div. 529, 64 N. Y. Supp. 197; *Stewart* v. *Ferguson* (1899) 44 App. Div. 58, 60 N. Y. Supp. 429, reiterating doctrine laid down in the first appeal (1898) 34 App. Div. 515, 54 N. Y. Supp. 615.

[1] "A railroad corporation may be controlled by competent, watchful, and prudent directors, who exercise the greatest caution in the selection of a superintendent or general manager, under whose supervision and orders its affairs and business, in all of its departments, are conducted. The latter, in turn, may observe the same caution in the appointment of subordinates at the head of the several branches or departments of the company's service. But the obligation still remains to provide and maintain, in suitable condition, the machinery and apparatus to be used by its employees,—an obligation the more important, and the degree of diligence in its performance the greater, in proportion to the dangers which may be encountered. Those, at least, in the organization of the corporation who are invested with controlling or superior authority in that regard represent its legal personality; their negligence, from which injury results, is the negligence of the corporation. The latter cannot, in respect of such matters, interpose between it and the servant, who has been injured without fault on his part, the personal responsibility of an agent who, in exercising the master's authority, has violated the duty he owes, as well to the servant as to the corporation." *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612. To the same effect, see *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590; *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

"The rule of law which exempts the master from responsibility to the servant for injuries received from the ordinary risks of his employment, including the negligence of his fellow servants, does not excuse the employer from the exercise of ordinary care in supplying and maintaining suitable instrumentalities for the performance of the work required. One who enters the employment of another has the right to count on this duty, and is not required to as-

Many of the cases cited in the following sections directly suggest, by the facts involved, the difference, hereafter to be explained, (§§ 603, 612–615, *post*) between the position of servants who supply a stock of material, from which a selection is to be made as the work progresses, and of servants who make that selection; and this distinction is often expressly relied upon as the rationale of the judgments.[2] But the master cannot avail himself of the protection afforded by this distinction, where it is negligent, under the circumstances, to leave the task of selection to the particular servant or class of servants upon whom that function is necessarily thrown in the ordinary course of the master's business.[3] Such a situation indicates a lack of that effi-

sume the risks of the master's negligence in this respect. The fact that it is a duty which must always be discharged, when the employer is a corporation, by officers and agents, does not relieve the corporation from the obligation. The agents who are charged with the duty of supplying safe machinery are not, in the true sense of the rule relied on, to be regarded as fellow servants of those who are engaged in operating it. They are charged with the master's duty to his servant. They are employed in distinct and independent departments of service, and there is no difficulty in distinguishing them, even when the same person renders service by turns in each, as the convenience of the employer may require. In one the master cannot escape the consequence of the agent's negligence; if the servant is injured in the other, he may." *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 260, 14 Am. Rep. 598. The theory of the master's responsibility, however, which is now accepted in Massachusetts itself is somewhat different from this. See § 560, *supra*.

The doctrine of common employment is not applicable, "where injuries to servants or workmen happen by reason of improper and defective machinery and appliances, used in the prosecution of the work [of the corporation]." *Harper* v. *Indianapolis & St. L. R. Co.* (1871) 47 Mo. 567, 4 Am. Rep. 358.

[2] In *Lehigh Valley Coal Co.* v. *Warrek* (1898) 28 C. C. A. 540, 55 U. S. App. 437, 84 Fed. 866, the evidence was that, whenever plaintiff needed new blocks, he applied for them to the foreman, whereupon the [illegible] brought them; that, so far as plaintiff was informed, there was no [illegible] of new ones from which he could supply himself; that plaintiff, three days before the accident, and again two days before the accident, called the attention both of the foreman and of the outside superintendent to the condition of the blocks, and asked for sound ones; and that to his request both replied "All right," and the foreman expressly promised to "give him new blocks right away." The case was held by the court to be distinguishable from those cited by defendant's counsel, where the plaintiff had a stock of new appliances at hand from which to help himself.

See also, as illustrating the same point of view, *Thomas* v. *Ann Arbor R. Co.* (1897) 114 Mich. 59, 72 N. W. 30; *Bushby* v. *New York, L. E. & W. R. Co.* (1887) 107 N. Y. 374, 14 N. E. 407; *Woods* v. *Lindvall* (1891) 1 C. C. A. 37, 4 U. S. App. 49, 48 Fed. 62; *Mullane* v. *Houston, W. S. & P. Ferry R. Co.* (1897) 21 Misc. 10, 46 N. Y. Supp. 957. Affirming (1897) 20 Misc. 434, 45 N. Y. Supp. 1039; *Strauss* v. *Haberman Mfg. Co.* (1897) 23 App. Div. 1, 48 N. Y. Supp. 425; and the cases cited in § 617a, *post*.

Similarly, in *Mansfield Coal & C. Co.* v. *McEnery* (1879) 91 Pa. 185, 36 Am. Rep. 662, we find the court committing itself to this doctrine: If a railroad company exercises ordinary care and skill in the selection of employees to construct a bridge, it will not be responsible for defects resulting from its original construction.

[3] In *McElligott* v. *Randolph* (1891) 61 Conn. 157, 22 Atl. 1094, the court reasoned thus: "While it is true that the defendants intrusted the execution of the work upon which McElligott was engaged to a competent superintendent, provided him, McElligott, with colaborers who were fit and competent when under competent supervision, and had upon the premises appliances and appa-

cient supervision the maintenance of which must be shown before the master can be allowed to claim the advantage of the rule which precludes recovery for injuries caused by the negligence of a coservant in carrying out the details of the work. See chapter XLII., *post*.

It is observable, moreover, that the rule which absolves the master from liability for the condition of the place of work, on the ground that it is temporary and transitory, is not available as a defense, when the place is unsafe at the time the servant is brought to the place of work, and no warning is given him of the peril.[4]

567. Duty to see that the inorganic instrumentalities of work, as originally supplied, satisfy the legal standard of safety.—*a. English, Scotch, and colonial doctrine.*—Although the point has never been directly raised, or specifically decided in the same explicit language as in the United States, it would seem to be a legitimate deduction from the language used by the English, Scotch, and colonial judges, that a servant to whom a master intrusts the function of constructing or supplying any part of the plant is regarded by them as an agent, for whose negligence in discharging that function the master is responsible. As the correct doctrine upon this subject is a matter of con-

ratus suitable for the work, it is equally true that, during the progress of much of the work, and at the time of, and for a considerable time prior to, the accident, the work was wholly without competent superintendence; that there was even no one present who was possessed of mechanical skill; that the provision of suitable appliances was simply in the sense of there being such near at hand, mingled with others unsuitable; that those appliances which were in fact chosen and set apart for the work were mainly selected by unskilled factory hands, at random and without instructions, oversight, or examination; and that they were adjusted by like laborers with the like absence of instructions, oversight, and examination. The accident happened, in part, because a certain wooden horse or support was inadequate. Dunning, the superintendent, selected this particular appliance and directed its use. The wheel fell in fact because a certain rope was too small and inadequate. The defendants had done nothing to provide a suitable rope except to have upon the premises a stock of various kinds of rope, some suited to one purpose and some to another, and to allow any chance inexperienced laborer to select for each special use the one which his impulse dictated. Just here we touch upon the most significant and potent factor in the situation, namely, the entire absence of competent superintendence during all the later stages of the work. After Dunning's departure, about midnight, there was no one, either over or connected with the gang of men employed, who possessed any mechanical knowledge or skill. Had Dunning remained present, properly executing his master's duty intrusted to him, there would have been no such unintelligent, haphazard selection of apparatus, no such inadequate and unsuitable devices of support, as were instrumental in McElligott's death. Moreover, Dunning's departure in an instant transformed McElligott and his fellows from fit into unfit colaborers. The finding states explicitly that these men were incompetent for the work assigned them, without suitable supervision. During the hours, therefore, which succeeded Dunning's return home, McElligott was surrounded only by incompetent fellow workmen, and he went down to his death in consequence of constructions and mechanical adjustments made by his fellow servants, employed by the defendants to do, in company with him, what they were unfit to do. Plainly, therefore, the defendants' duties as masters of the deceased were not performed."

[4] *Hess* v. *Rosenthal* (1896) 160 Ill. 621, 43 N. E. 743.

siderable importance to lawyers practising in that part of the United States which is adjacent to Canada, the authorities have been analysed at considerable length and collated in the subjoined note.[1]

[1] As will be seen from the quotations from their opinions in § 529, *ante*, Lord Chelmsford and Lord Colonsay both distinctly conceded that a mine owner may be liable for defects in the general arrangement or system of ventilation, and contrasted such a cause of injury with that nader discussion. *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 344, 19 L. T. N. S. 30. The following remarks of the latter are also worth noting: "I think that there are duties incumbeat on masters with reference to the safety of laborers in mines and factories, on the fulfilment of which the laborers are entitled to rely, and for the failure in which the master may he responsible. A total neglect to provide any system of ventilation for the mine may be of that character. Culpable negligence in supervision, if the master takes the supervisioa oa himself, or, where he devolves it on others, the heedless selection of unskilful or incompeteat persons for the duty, or the failure to provide or supply the means of providing proper machinery or materials,—may furnish gromads of liability; and there may be other duties, varying according to the nature of the employment, wherein, if the master fails, he may be responsible."

Lord Cranworth in the course of his opinioa said: "If, indeed, the owners had failed to take reasonable care in causing the scaffold to be erected, the case would have been different; but of this there is no evidence. It certainly was not incumbent oa them personally to fix the scaffold. They discharged their duty whea they procured the services of a competent underground manager; and whether Wilsoa began to work with, or under, Neish before or after he had prepared the scaffold, was a matter of no importance. From the time when he began to work he was a fellow workman with him."

This decisioa, therefore, really goes no farther than to deny that there is such a functionary as a vice principal in matters conaected with the operati f a going concera, and leaves the ob ns of the master absolute, so far as r gards the original coadition of the plant and the capacity of the employees at the time when they are hired.

In a later appeal from Scotland the House of Lords held that a complaint alleging an injury from the defective splicing of a ship's tackle is demurrable unless at all events, it also avers that the splicing was defective at the time the vessel was equipped. *Gordon* v. *Pyper* (1892) 20 Sc. Sess. Cas. 4th series, 23. Lord Watson's position was that a mere defect in the splicing of a ship's tackle, which is obvious, does not constitute any default of duty on the part of the shipowner, if he provides the master and crew with the proper materials for correcting the defect in the course of the voyage.

In *Allen* v. *New Gas Co.* (1876) L. R. 1 Exch. Div. 251, 45 L. J. Exch. N. S. 668, 34 L. T. N. S. 541, Huddleston, B., after referring to the opinion of Lord Cairns in *Wilson* v. *Merry*, proceeded thus: "To establish, therefore, negligence against the defendants, the plaintiff must prove that the defendants undertook personally to superintend and direct the works, or that the persons employed by them were not proper and competent persons, or that the materials were inadequate, or the means and resources were unsuitable to accomplish the work. The onus is upon him, and failing to do so he fails to establish negligence. . . . By suitable means and resources, we think must be meant all that was necessary to carry on the business, including premises reasonably safe for that purpose,—as, for instance, in case of a mine, of a proper system of ventilation, as pointed out by Lord Colonsay in *Wilson* v. *Merry* (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30: but there was no evidence to show that the premises of the defendants were dangerous, that these gates were defective in their original construction, or that they had not been perfectly safe when first put up. If they had fallen into a state of decay, and had been permitted to remain in that state, it could scarcely be said that that was the act of the defendants, but must have been that of the persons whom they must have employed, and there was no evidence to show that such persons were not proper and competent for the defendants to employ."

A similar position seems to be indicated by the following remark of Lord Wensleydale in an earlier Scotch ap-

b. American doctrine.—All the courts in the United States seem to be unanimous as to the doctrine that, where it is a question of the condition of the instrumentalities, animate or inanimate, when they first

peal: "All that the master is bound to do is to provide machinery fit and proper for the work, and to take care to have it superintended by himself or his workmen in a fit and proper manner." *Weems* v. *Mathieson* (1861) 4 Macq. 1 H. L. Cas. 215.

In *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 80, 11 L. T. N. S. 779, 13 Week. Rep. 411, the court emphasized the fact that the master was not shown to have been negligent in regard to putting his mine in proper order.

See also the cases cited in § 526, note 1, *ante*.

In one Scotch case, where a defective scaffold had been erected under the superintendence of the defendant's foreman, it was laid down that it is a master's duty to see that a scaffold to be used by masons is sufficient, even though he left the charge of erecting it to the masons themselves. *Cook* v. *Duncan* (1857) 20 Sc. Sess. Cas. 2d series, 180.

In another case a part of the judges, while denying that negligence was established by the evidence, admitted that the failure of a mining company to supply timber for the support of the roofs imported a breach of duty. *Stewart* v. *Coltness Iron Co.* (1877) 4 Sc. Sess. Cas. 4th series, 952. In another case it was held that a declaration which stated in substance that the plaintiff's son had been run over by a train, while acting as a flag boy at a crossing, and that the accident was due to the fact that a water tank had been erected in such a position that it was impossible for those in charge of the engine to see whether the line was clear, or to receive signals, could not be successfully demurred to on the ground that there was no averment that the engineers appointed to lay out the station yard and fix the site of the water tank were incompetent. *McKillop* v. *North British R. Co.* (1896) 23 Sc. Sess. Cas. 4th series, 768. The essence of the court's position was that the duty of placing a part of the permanent equipment of the station, so that the lives of employees should not be exposed to unnecessary and avoidable hazard, "is a duty incumbent on the employer, whether he be an individual, or a company acting through directors," and that, "while the company would of course be morally right in relying to a large extent on the judgment of engineers or practical men, it is not relieved of its responsibility by the mere fact that it had appointed competent engineers and managers to whose judgment it trusts." It was also considered that a railway company is no more able than a private company or a partnership to displace the responsibility for providing a sufficient machinery plant by delegating the duty of selection to a manager. In regard to this matter the directors of a railway company are in the same position as managing partners.

In another case it was held that a complaint which imputes fault to the master himself, as distinguished from his servants, in a matter which may fairly be described as his system of working, is not demurrable. *MacDonald* v. *Udston Coal Co.* (1896) 23 Sc. Sess. Cas. 4th series, 504 (injury caused by failure to prop a mine sufficiently).

In another case it was held erroneous to dismiss the action, where the failure to light the bottom of a shaft was relied on as the gravamen of the complaint. *Farnham* v. *New Bank Coal Co.* (1896) 23 Sc. Sess. Cas. 4th series, 722.

In *LeDay* v. *Canadian P. R. Co.* (1890) 17 Ont. App. Rep. 293, the duty violated was a statutory one; but the following remarks of Haggarty, C. J. O., are pertinent in the present connection: "I look upon the duty of seeing that a track is fit for use and properly safeguarded as required by law before its being used, as a duty which the company must perform at its peril, and that it will not excuse them to prove that they gave directions to have everything done rightly and legally. It might present a different aspect if the portion of road had been all right at its opening,—the frog duly packed,—and that by some servant's neglect it had not been repacked. The original omission to pack the frog cannot, as I think, be properly excusable as the negligent act of a servant in a common employment with plaintiff."

The line which the reasoning took in *Wilson* v. *Merry*, and the weight of judicial opinion, evidenced by the above cases, in favor of making a distinction between the quality of the duties of a master in respect to original construc-

became a part of the organism through which the master carries on his business, the master's liability is determined by the principle that he must answer for any negligence which may be committed by any

tion and subsequent maintenance, has cast doubt upon the correctness of some earlier decisions which seem to ignore that distinction.

In one it was broadly laid down that, in order to render a master liable for an injury to his servant, caused by the breaking of a machine belonging to the master, it is not sufficient to show that the machine was defectively constructed, but there must also be evidence that the master employed incompetent persons to construct the machine. *Potts* v. *Port Carlisle Dock & R. Co.* (1860) 8 Week. Rep. 524, 2 L. T. N. S. 283.

In another it was held that a workman cannot recover damages from his employers for injuries sustained by him while at work in their mill, and resulting from the building having been originally negligently constructed, unless personal negligence is proved against his employers themselves (or against some person acting by their orders), either in having given directions how the building should be constructed, or in having knowingly intrusted the execution of the work to an incompetent person. *Brown* v. *Accrington Cotton Spinning & Mfg. Co.* (1865) 3 Hurlst. & C. 511, 34 L. J. Exch. N. S. 208, 13 L. T. N. S. 94. There the accident was caused by the negligence of one Dean, the clerk of the works, employed by the defendant to supervise the contractors for the construction of the several parts of the building. The position of the judges is apparent from the following extracts. At one stage of the argument Martin, B., observed: "It is necessary to show either personal negligence on the part of the defendants or the workmen acting under their orders, or that the defendants employed workmen whom they knew to be unskilful. The plaintiff must establisa this,—that if persons building a house employ a man to superintend the works, and allow them to be completed without their personal superintendence, and, many months after the negligent act is done, the owners not being aware of it, the house falls and injures a person whom they employed to work there, they are responsible. That cannot be done without showing some contract or warrant to the person employed, that the state of the house was such that it was safe for him to work in it." The case of *Barton's Hill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 288, 4 Jur. N. S. 767, being cited by counsel, the same learned judge remarked: "The question in that case was whether a master was liable for injury to a servant caused by the negligence of a fellow servant. In all the cases in which a master has been held liable for injury to a servant, there has been a want of reasonable care at the very time the accident happened, and which immediately and directly caused it; here it is sought to go far back, and I do not see the limit; it might be fifty years after the house was improperly built."

In summing up the conclusions of the court, he said: "It is enough to say that our judgment is founded on this,—that there was no evidence of personal negligence on the part of the company or any of the members of it; nor was it shown that there was negligence on the part of any person acting as their servant or under their orders, for which they are responsible, either by having given specific directions as to the mode in which the work should be done, or by having any reason to suppose that the person to whom they intrusted the duty of seeing that it was properly performed was not a person of ordinary competence."

In one Scotch case the court apparently argued upon the assumption that a defect in construction, if it was due to the negligence of a coservant, did not affect the master with liability. *Matthews* v. *M'Donald* (1865) 3 Sc. Sess. Cas. 3d series, 506.

On the whole, therefore, it may be asserted with reasonable confidence that the servant's right of recovery, in that country, remains, so far as the common law is concerned, exactly what it was when it was declared by Lord Cranworth in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, that the ruling in *Gray* v. *Brassey* (1852) 15 Sc. Sess. Cas. 2d series, 135, was in strict accordance with the English authorities. In the Scotch case referred to, the complaint was held to be relevant, inasmuch as the plaintiff would be entitled to recovery if he established his allegations that his injuries were due to the negligence of an

servant to whom he delegates the duty of furnishing those instrumentalities.[2]

In view of some of the decisions cited in § 558, *supra*, it is impossible to state the principle in a more general form than this.

Some courts seem to limit the application of this principle to cases in which the delinquent servants were invested with a controlling or superior authority in respect to the supply of the instrumentalities.[3] But this view is not supported by the authorities as a whole; nor is it consistent with the theory that the rank of the offender is entirely immaterial. See chapter XXX., subtitle C, *ante*.

employee whose functions were the providing of safe machinery for the employee who had to use it. The facts alleged were that a brake slipped down when plaintiff stepped on it, in consequence of there being no blocking on it.

In a recent Michigan case where a servant was injured, while working in a tunnel on the Canadian side of the St. Clair river, by reason of the high pressure of air maintained, an instruction that it was defendant's duty to adopt the proper system for maintaining the air pressure, and to use the proper locks on the valves of the machinery, or to give plaintiff warning of the danger, was held to be improper, for the reason that the law of Canada governing the case was that defendant had performed its duty when it employed competent persons to control the work, and authorized them to purchase suitable material and machinery. *Turner* v. *St. Clair Tunnel Co.* (1899) 121 Mich. 616, 47 L. R. A. 112, 80 N. W. 720, first appeal (1897) 111 Mich. 578, 36 L. R. A. 134, 70 N. W. 146. The court declined to admit that there was any distinction, as regards delegable quality, between the duty of furnishing a safe place of work and the duty of maintaining it. The conclusion thus arrived at is believed, for the reasons explained above, to be erroneous.

[2] In view of some of the decisions cited in § 558, *supra*, it is impossible to state the principle in a more general form than this.

"The principle upon which, as we take it, all the authorities agree, is that the master is under what may be termed an absolute duty to his servant of using care, to the end that the machinery put into the hands of his servant for use shall be reasonably safe, having regard to its nature and the purposes for which it is intended. This duty he may discharge, either by himself in person, or by a designated agent or servant. If he discharge it by an agent or servant, the latter becomes, in respect of it, his vice principal, wholly without reference to the rank which in other respects he occupies in his master's or principal's service." *Dutzi* v. *Geisel* (1886) 23 Mo. App. 676.

An appliance constructed to enlarge the capacity of the master's work stand, so far as the non-delegable quality of the duty to see that it is not defective in any respect, on the same footing as if it had been a part of the work when they first began to be operated. *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 653 (operative injured by the fall of a countershaft on some new machinery—superintendent had been notified that collar was needed).

The selection of appliances out of a stock furnished by the master is a function usually regarded as characteristic of a mere servant (see § 57, *ante*), but in one case it was held, on the ground of his having discretionary authority in the premises, that a master was liable for the negligence of an employee in the choice and use of tackle for the purpose of lowering a heavy piece of machinery into its place. *Telander* v. *Sunlin* (1891) 44 Fed. 564. But this decision is scarcely consistent with the general current of the authorities, as the special factor relied upon for purposes of differentiation seems to be present in every instance where the master's duty has been denied to extend beyond the supply of the materials out of which the selection is to be made. See, however, *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 189, 70 Fed. 669, note 7, subd. (j), *infra*.

[3] This form of expression is used in *Cooper* v. *Pittsburgh, C. & St. L. R. Co.* (1884) 24 W. Va. 37.

The rationale of the principle also indicates that its operation is not dependent upon the delinquent's possession of the power of discharging or employing other servants.[4]

The reason assigned for the principle, *viz.*, that, "were it [the rule] otherwise, the duty before us, one of the most important of those [the duties] owed by capital to labor, could be evaded by the capitalist employing only his own servants in the construction of his buildings and machinery," [5] sounds somewhat singular when we consider it in connection with that other rule which, according to some courts (see § 558, *supra*), allows capital to "evade the duty" in question by the simple expedient of abstaining from the "employment of his own servants"and intrusting the work to an independent contractor. A theory of absolute responsibility which may be so easily nullified is little better than a solemn farce. It is only proper, however, to mention that in the state in which the policy of holding capital to its obligations has been thus indorsed, there has been no explicit adoption of the theory which entirely exonerates a master who interposes an independent contractor between himself and his servants. Possibly this court may hereafter declare its views on this point in a form which will save it from the charge of inconsistency, from which it seems impossible to absolve the judges who accept that theory, and at the same time hold that the master must answer for the negligent construction of an instrumentality by any person in his service.

The decisions cited in the subjoined note are referred to as illustrations of the general principle enunciated above, for the reason that the use of some such word as "provide," "furnish," "supply," etc., in describing the duty incumbent on the master, may, in some sense, be said to show that the court had in mind the master's responsibility for the original condition of the instrumentalities. But, so far as most of the courts are concerned, it is immaterial whether the dereliction of duty was [illegible] to original supply or subsequent maintenance, and the absence [illegible]y practical necessity for differentiating between the existence [illegible] master's liability in one case or the other has naturally resulted [illegible] certain lack of precision in the phraseology employed. It is customary to predicate two distinct nondelegable duties in respect to what we have, for convenience sake, styled the unintelligent instrumentalities of work, *viz.*, the duty to provide "reasonably safe tools, appliances, and machinery for the accomplishment of the work necessary to be done," and the duty "to provide the servant with a reasonably safe place to work in, having

[4] *Allen* v. *Spokane Falls & N. R. Co.* (1899) 21 Wash. 324, 58 Pac. 244.

[5] *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181.

reference to the character of the employment."[6] But this division of duties scarcely satisfies the exigencies of a logical classification, for the reason that, in a large number of cases, it is difficult, if not impossible, to say with certainty whether the liability of the master for a defective apparatus should be treated as resulting from a violation of his duty to furnish that apparatus, or from a violation of his duty to see that the place of work, which was rendered dangerous by the apparatus was safe. The subjoined cases in which the master was held liable are therefore arranged, without regard to the supposed distinction of duties, under headings indicative of the nature of the abnormal danger from which the master's representative failed to protect the injured person. Whether it is explicitly so stated or not, the master was held responsible for the acts of the servants whose negligence was the cause of the various abnormally dangerous conditions mentioned in connection with the citations.[7] For other cases, see § 617, *post*.

[6] *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

[7] (a) *Defective railway track and appurtenances.*—(Compare § 568, note 6, subd. (a), *infra*.) *Trask* v. *California Southern R. Co.* (1883) 63 Cal. 96; *Louisville, N. A. & C. R. Co.* v. *Graham* (1890) 124 Ind. 89, 24 N. E. 668; *Rouse* v. *Downs* (1897) 5 Kan. App. 549, 47 Pac. 982 (fireman injured by switch negligently constructed by division road master).

(b) *Inadequacy of safeguards against dangers from explosive substances.*—(Contrast §§ 600, 601, and 612a, note 1, subd. (c) *post*.) *Gilmore* v. *Northern P. R. Co.* (1884) 9 Sawy. 558, 18 Fed. 866 (no suitable appliances provided for thawing giant powder); *O'Donnell* v. *East River Gas Co.* (1895) 91 Hun. 184, 36 N. Y. Supp. 288 (duty to provide proper appliances held to have been violated, where an employee was injured while cleaning out a boiler, by an explosion of naphtha negligently left by a fellow servant in a pipe to which the hose used in cleaning out the boiler was attached. Fellow servant's negligence here was in regard to the use of the defective appliance for work distinct from that upon which the plaintiff was engaged, and the naphtha was exploded by the heat of an adjoining boiler); *Bernardi* v. *New York C. & H. R. R. Co.* (1894) 78 Hun. 454, 29 N. Y. Supp. 230 (no cars suitable for transporting dynamite were provided).

(c) *Defective appliances for protecting servants engaged in excavating.*—*Kranz* v. *Long Island R. Co.* (1890) 123 N. Y. 1, 25 N. E. 206 (servant ordered to perform work as a machinist in underground trenches, opened and prepared for him by other employees, held not a fellow servant of the latter). Followed in *Schmit* v. *Gillen* (1899) 41 App. Div. 302, 58 N. Y. Supp. 458 (servants opening a trench are not, as regards duty to sheath it properly, the fellow servants of other servants who lay pipes in it); *Van Steenburgh* v. *Thornton* (1895) 58 N. J. L. 160, 33 Atl. 380 (foreman of work of excavating a trench neglected to take measures to prevent the sides from falling in); *Lapoint* v. *Cook* (1899) 21 R. I. 158, 42 Atl. 519 (no materials furnished for the servant's protection); *Baird* v. *Reilly* (1899) 35 C. C. A. 78, 63 U. S. App. 157, 92 Fed. 884 (foreman, whose duty it is to shore a trench which is being dug for laying pipes, held not to be a coservant of one of the pipe layers, who has nothing to do with the work of excavation).

(d) *Defects in bridges, trestles, etc.*—A master is liable for the negligence of employees to whom he delegates the function of building bridges, etc. *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84, 45 Am. Rep. 590, Overruling *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473.

Where contractors for the erection of a railway trestle constitute an employee

To render the master liable on the ground that an employee was negligent in furnishing defective materials, it must be shown that

their representative, and impose on him the duty, and confer on him the authority, to supervise, direct, and control its construction, and require the laborers to obey his orders and directions in the premises, that employee stands in the shoes of his employers, and they are responsible for the results of his negligence in the work so committed to his direction, supervision, and control. *Woods* v. *Lindrall* (1891) 1 C. C. A. 37, 1 U. S. App. 49, 48 Fed. 62, Affirming 41 Fed. 855. The supreme court of Minnesota had previously held that the injured servant in this case was not entitled to recover. *Lindrall* v. *Woods* (1889) 41 Minn. 212, 4 L. R. A. 793, 42 N. W. 1020.

(e) *Defects in scaffolds, stagings, etc.*—(Contrast §§ 613-616, *post*) That the master is liable for the negligent selection of the materials to be used in constructing a scaffold has occasionally been expressly laid down. *Kansas City Car & Foundry Co.* v. *Sawyer* (1898) 7 Kan. App. 146, 53 Pac. 90; *Goldie* v. *Werner* (1893) 50 Ill. App. 297, Affirmed in (1894) 151 Ill. 551, 38 N. E. 95; *Kerr-Murray Mfg. Co.* v. *Hess* (1899) 38 C. C. A. 647, 98 Fed. 56 (servant charged by the master with providing lumber for the building of a scaffolding by his fellow servants is in that respect discharging a personal duty of the master); *McNamara* v. *Mac Donough* (1894) 102 Cal. 575, 36 Pac. 941 (carpenter deputed to construct scaffold for bricklayers and hod carriers). Other cases to the same effect are cited in § 617, note 2, *post*.

The doctrine thus exemplified is taken for granted in all those numerous cases in which for reasons to be hereafter explained, the master is not responsible for the improper construction of the scaffold out of the materials furnished. See §§ 614, 615, *post*.

The servants constructing a scaffold are deemed to be vice principals whenever the master undertakes to furnish it as a completed instrumentality. *Kilka* v. *Faxon* (1878) 125 Mass. 485; *Brickner* v. *New York C. R. Co.* (1879) 2 Lans. 506 (where scaffold erected by coservants collapses, injured person has a right to have the case submitted to the jury both on the theory that the master was negligent in furnishing a dangerous structure, and on the theory that he was negligent in knowingly keeping incompetent servants in his employ); *McCoon* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697 (completed scaffold furnished for particular work); *Ellis* v. *Northern P. R. Co.* (1900) 103 Fed. 416 (running board furnished by foreman of shops to a man engaged in repairing a locomotive was defective); *Sellick* v. *J. Langdon & Co.* (1891) 37 N. Y. S. R. 511, 13 N. Y. Supp. 858 (scaffold erected where its supports were liable to be struck by defendant's wagons); *Green* v. *Banta* (1882) 10 Jones & S. 156, *Chicago & A. R. Co.* v. *Scanlan* (1897) 170 Ill. 106, 48 N. E. 826, Affirming (1896) 67 Ill. App. 621 (foreman charged with duty of erecting scaffold, to be furnished in a complete condition to workmen, held to be a vice principal); *Chicago & A. R. Co.* v. *Maroney* (1897) 170 Ill. 520, 48 N. E. 953, Affirming (1896) 67 Ill. App. 618); *McBath* v. *Bawle* (1901) 93 Ill. App. 212 (stone setter used scaffold constructed by the contractor for the brick work); *Haworth* v. *Sowers Mfg. Co.* (1892) 87 Iowa, 765, 51 N. W. 68, 62 N. W. 325 (employee superintending erection of scaffold); *Swift & Co.* v. *Hyatt* (1898) 75 Ill. App. 348 (one injured by a fall from a scaffold, caused by the tipping of an unfastened ladder, placed in position before the servant was employed and directed to use it held to be entitled to recover therefor, although the ladder was placed by a fellow servant); *Thalea* v. *Centenary Church* (1876) 62 Mo. 326 (seems to be based on the unassignability of the duty to provide a safe scaffold, but the real ground of the decision is somewhat obscure); *Haworth* v. *Sowers Mfg. Co.* (1892) 87 Iowa, 765, 51 N. W. 68, 62 N. W. 325 (superintendent of construction of a building held to be a vice principal as regards the erection of a scaffold); *Brown* v. *Gilchrist* (1890) 80 Mich. [illegible], 45 N. W. 82 (foreman intrusted with the entire control of the erection of a scaffold.—injury was received after the scaffold was finished); *Kansas City Car & Foundry Co.* v. *Sawyer* (1898) 7 Kan. App. 146, 53 Pac. 90 (scaffold already complete when plaintiff was set to work on it).

That this was the character of the implied contract in regard to such a structure is equally inferable where it

was erected by a set of servants different from that to which the plaintiff belonged). *Chicago & I. R. Co.* v. *Moroney* (1897) 170 Ill. 520, 48 N. E. 953, Affirming (1896) 67 Ill. App. 618 (scaffold built by carpenter for masons to use); *McNamara* v. *MacDonough* (1891) 102 Cal. 575, 36 Pac. 941 (carpenter employed by the day by an architect having the management of the construction of a building for the owner, to erect a scaffolding for the use of masons and hod carriers employed in the construction of the building); *Cudden* v. *American Steel Barge Co.* (1894) 88 Wis. 409, 60 N. W. 800 (riveter upon the side of a vessel, who uses a scaffold, is not a fellow servant with the scaffold builders whom the master employs to adjust the scaffold for him, although the former indicates where it is to be placed).

Where, upon the trial of a case, it is shown that a defendant had in his employ a crew of men, whose exclusive work and duty it was to put up such staging and scaffolding as, from time to time, was needed for the use of workmen engaged in defendant's general work and business, the presumption arises that a staging found in position at the place where a workman is required to perform his work, and upon which he is obliged to stand to perform it, was built by one or more of the staging crew, and, as the men composing such a crew are not fellow servants of men engaged in the defendant's general work, any of the latter may, if injured by defects in the staging, recover damages. *Sims* v. *American Steel Barge Co.* (1894) 56 Minn. 68, 57 N. W. 322.

Sometimes the circumstance emphasized is that the scaffold was one erected for permanent use, and is therefore distinguishable from one erected as a part of the work merely. *Edward Hines Lumber Co.* v. *Ligas* (1898) 172 Ill. 315, 50 N. E. 225, Affirming (1896) 68 Ill. App. 523 (scaffold erected for permanent use in removing lumber from the top of a pile). See also cases cited in § 617, subd. 1, *post*. In *Hatton* v. *Hilton Bridge Constr. Co.* (1901) 167 N. Y. 590, 60 N. E. 1112, Affirming (1899) 42 App. Div. 398, 59 N. Y. Supp. 272, it was held that the defendant was answerable for the omission of the foreman in charge of the erection of a scaffold to use a clamp which, according to the plans furnished by the engineer, were to secure the rods by which the scaffold was suspended. The Supreme Court took the position that it was the duty of the defendant not only to prepare clamps which, if used, would have prevented the injury, but also, by a proper inspection of the work, to see that they were properly placed. The act of the foreman in omitting to use the clamps was considered to be negligence committed by him in the capacity of a vice principal, that status being ascribed to him because he was discharging a non-delegable duty. It was pointed out that the authorities do not hold that it is the master's duty, even during the progress of the work, to guard the servant from risks which are obvious, are unknown to the servant, and require mechanical knowledge to detect.

If the scaffold was unsafe for the work which the injured servant was ordered to do, the master cannot excuse himself on the theory that it was sufficient for the work for which it was originally erected. *Richards* v. *Hoges* (1897) 17 App. Div. 422, 45 N. Y. Supp. 231.

Sometimes the fact that the servants deputed to erect the scaffold did not possess sufficient skill to qualify them for doing the work properly furnishes an independent ground for compelling defendant to answer for the injuries caused by defects in the structure. *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 110, 37 Atl. 871 (owner of quarry, who employs common laborers engaged in stowing stone posts in a schooner to suspend a platform to be used in loading the vessel with heavy stone, and to select the gear by which the platform is suspended, held liable for injury to another employee while engaged in loading the vessel, caused by the breaking of a defective rope selected by them).

Compare *Brickner* v. *New York C. R. Co.* (1870) 2 Lans. 506, as stated *supra* in this subdivision of the note.

(f) *Defects in other structures.*—The delinquent employees in the following cases were held to be vice principals: *McCampbell* v. *Cunard S. S. Co.* (1893) 69 Hun, 131, 23 N. Y. Supp. 477 (omission of dock superintendent to have the wedge-shaped "mouthpiece" properly fastened to the skid or gangplank upon which trucks are drawn from a ship to a dock by stevedores is not a risk assumed by the latter); *Welty* v. *Lake Superior Terminal & Transfer R. Co.* (1898) 100 Wis. 128, 75 N. W. 1023 (servant who had to climb a railway semaphore was injured by its negligent construction); *Van Dusen* v. *Letellier*

(1889) 78 Mich. 492, 44 N. W. 572 (defects in lumber-yard dock, discoverable by reasonable care).

(g) *Unguarded openings in floors, etc.*—*Johnson* v. *Field Thatcher Co.* (1898) 171 Mass. 181, 51 N. E. 18 (no guards furnished by employer for trap door; coservant, in leaving trap door open, held not to be, as matter of law, guilty of negligence causing the injury).

(h) *Defective pipes, etc.*—*Beeson* v. *Green Mountain Gold Min. Co.* (1880) 57 Cal. 20 (defective pipe in mine, put up by a miner under the direction of the superintendent, caused a fire); *Nixon* v. *Selby Smelting & Lead Co* (1894) 102 Cal. 458, 36 Pac. 803 (servant scalded by the severing of a rubber hose improvised by the foreman of the silver-room of a smelting company for the purpose of conveying acid into the waste tank).

The negligence of a superintendent in turning steam into new pipes before they are in proper condition to receive it is a breach of the non-delegable duty to provide a reasonably safe place of work. *Meeker* v. *C. R. Remington & Son Co.* (1901) 62 App. Div. 472, 70 N. Y. Supp. 1070. On the first appeal recovery was denied on the ground that the superintendent was acting as a mere servant in what was done to test the pipe.

(i) *Defective appliances for loading and unloading vehicles.*—*Kain* v. *Smith* (1880) 80 N. Y. 458 (1881) 25 Hun, 146 (jigger used for loading heavy wheels defective to the knowledge of yard foreman).

A complaint alleging that a foreman selected unsafe skids for the purpose of unloading a car has been held not demurrable. *Great Northern R. Co.* v. *McLaughlin* (1895) 17 C. C. A. 330, 44 U. S. App. 189, 70 Fed. 669. But in view of the cases cited in § 617, *post*, this ruling can, it would seem, only be sustained on the ground that the negligent employee was a vice principal by virtue of his official position. Compare, however, *Telander* v. *Sunlin* (1891) 44 Fed. 564 (note 2, *supra*).

(j) *Defective locomotives.*—*Cumberland & P. R. Co.* v. *State* (1875) 44 Md. 283 (1876) 45 Md. 229 (agent for purchase of locomotive is a vice principal); *Krueger* v. *Louisville, N. A. & C. R. Co.* (1887) 111 Ind. 51, 11 N. E. 937 (tender with deck 3 or 4 inches higher than that of engine broke away from engine in consequence of the excessive lost motion thereby produced, and allowed plaintiff's decedent to fall on the

(k) *Defective railway cars.*—(See also §§ 582–584, *infra*.) *Louisville, E. & St. L. Consol. R. Co.* v. *Miller* (1895) 140 Ind. 685, 40 N. E. 116; *Chicago & N. H. R. Co.* v. *Jackson* (1870) 55 Ill. 492, 8 Am. Rep. 661; *Missouri P. R. Co.* v. *James* (1888; Tex.) 10 S. W. 332; *Redington* v. *New York, O. & W. R. Co.* (1895) 84 Hun, 231, 32 N. Y. Supp. 535 (cars too short for the load to be placed on them); *Toledo, W. & W. R. Co.* v. *Fredericks* (1871) 71 Ill. 294 (car with too short a drawbar sent out); *Taylor* v. *Missouri P. R. Co.* (1891; Mo.) 16 S. W. 208 (defective coupling furnished); *Troxler* v. *Southern R. Co.* (1899) 124 N. C. 189, 44 L. R. A. 313, 32 S. E. 550 (defective couplings); *Griffin* v. *Boston & A. R. Co.* (1889) 148 Mass. 143, 1 L. R. A. 698, 19 N. E. 166 (suitable links for coupling cars not furnished in sufficient number); *McIntyre* v. *Boston & M. R. Co.* (1895) 163 Mass. 189, 39 N. E. 1012 (not enough for a railway company to furnish suitable lumber for side stakes on flat cars); *Pennsylvania R. Co.* v. *La Rue* (1897) 27 C. C. A. 363, 55 U. S. App. 20, 81 Fed. 148 (standards used for retaining timber on flat car deemed to be part of its equipment, in such a sense that the duty to select proper ones is non-delegable), Followed in *Port Blakely Mill Co.* v. *Garrett* (1899) 38 C. C. A. 342, 97 Fed. 537; *Bushby* v. *New York, L. E. & W. R. Co.* (1887) 107 N. Y. 374, 14 N. E. 407 (servant, charged with duty of furnishing side stakes for a lumber car, held to be a vice principal); *Dougherty* v. *Rome, W. & O. R. Co.* (1892) 45 N. Y. S. R. 154, 18 N. Y. Supp. 841 (counsel for defendant had agreed that whatever was done to lengthen the drop stakes was merely part of the operation of loading the car. See § 610, note 1, subd. (c), *post*); *Indiana, I. & I. R. Co.* v. *Snyder* (1895) 140 Ind. 647, 39 N. E. 912 (timber known to be unsuitable put in handle of hand car).

On the ground that a conductor was a vice principal as regards the duty of providing a safe and suitable car for laborers who were being conveyed from the place of their work, a railway company has been held liable for injuries received by a laborer, owing to the failure of the conductor to fasten a gate on the platform of a car, as the rules of the company required. *Pendergast* v. *Union R. Co.* (1896) 10 App. Div. 207, 41 N. Y.

Supp. 927. But it is difficult to see how this decision can be sustained without breaking in upon the rule that the master is not liable where the proximate cause of the injury was the negligence of a fellow servant in respect to a detail of the work. See next chapter.

(l) *Defective ladders.*—*Ryan* v. *Miller* (1883) 12 Daly, 77.

(m) *Defective ropes, rigging, etc.*—*Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181 (defective rope—condition known to foreman); *Thomas* v. *Ann Arbor R. Co.* (1897) 114 Mich. 59, 72 N. W. 40 (defective stock of rope selected); *The Julia Fowler* (1892) 49 Fed. 277 (defective rope used by chief officer of ship to suspend a triangle); *Lund* v. *Horsey Lumber Co.* (1890) 41 Fed. 202 (foreman furnished defective rope and tackle); *The Norway* v. *Jensen* (1869) 52 Ill. 373 (defective rigging furnished for a ship); *McElligott* v. *Randolph* (1891) 61 Conn. 157, 22 Atl. 1094 (defective rope); *Prescott* v. *Ball Engine Co.* (1896) 176 Pa. 459, 35 Atl. 224 (master held liable for negligence of rigger charged with the duty of keeping a supply of ropes from which a selection may be made).

Compare also the Maryland cases cited in § 530, *ante*.

[5] *Hoppin* v. *Worcester* (1885) 140 Mass. 223, 2 N. E. 779. There the committee on highways of a city directed the commissioner to erect a building to be used to contain a machine for crushing stone for the highways of a city. The commissioners employed A, a master builder, to furnish the labor and tools required in the erection of the building. The city paid A and the men employed by him for their services, and furnished all the materials used in the erection of the building. A directed B, one of the men employed by him, to erect a staging for the purpose of shingling the roof of the building, and to use therefor certain brackets which belonged to A. B used the brackets for the support of the staging. One of the brackets, being defective, broke, and the staging upon which C was working fell, and he was injured. Held, that C could not maintain an action against the city for his injury. The court said: "It is argued that Gates, in supplying the defective brackets, acted as the agent of the defendant in furnishing materials, and not as its servant to construct the staging, and was not, in that respect, a fellow servant with the plaintiff. But Gates had no authority from the defendant to furnish materials for it, and it was not as its agent for that purpose that he used his own brackets to support the staging. If not strictly tools required to be furnished by him, they are implements prepared and kept by him for the purpose of supporting stagings, which he might use under his contract with the defendant. He had no other authority from the defendant for furnishing them. The defendant employed him to furnish the labor and tools in the erection of the building from materials to be furnished by the defendant, and it provided for furnishing all materials needed. The negligence which the evidence tends to prove is that of servants in constructing an unsafe staging, and not that of the master in not furnishing proper materials."

In *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860, one of the grounds on which recovery was denied was that it was not shown that the plumbers' scaffold, which gave way, was only part of the material furnished by the defendants or the foreman, or that they contemplated the use of it for the purpose to which it was put.

In *Keenan* v. *New York, L. E. & W. R. Co.* (1895) 145 N. Y. 190, 39 N. E. 711, where a foreman of car repairers was held not to be a vice principal in directing a subordinate to go on a track not ordinarily used for repairing purposes, and not protected by any rules, for the purpose of getting a car spring which he needed in his work, the court said: "It is admitted by the learned counsel for the appellant that there is no direct evidence in the case showing that it was any part of Tracy's duty to furnish materials required by the workmen under him, but he insists that the defendant having failed to designate any one person whose duty it should be to borrow springs from other cars for temporary use, and still continuing the business of car repairing, it not only acquiesced in the gang foreman procuring such materials, but impliedly authorized them to procure them wherever they could. The appellant's counsel also admits that Tracy was the fellow servant of the intestate in everything except in the performance of a duty which the law imposed upon the defendant, *viz.*, procuring materials for use. We are unable to adopt these views. It would lead to the establishment of an exceedingly unsafe rule to hold that a gang boss over forty or fifty men could, without direct authority from the company, change the safe and proper rules in pursuance of which the work in the repair yards was conducted, and direct workmen to prosecute their labors under cars standing on tracks other than the regular duly-protected repair tracks.

568. Duty to see that the inorganic instrumentalities are maintained in a suitable condition for the work to be done held to be non-delegable.—Most of the courts which apply the doctrine illustrated by the decisions cited under the last section have also adopted the doctrine that from the moment an instrumentality is, or by the exercise of reasonable care might have been, known to be defective, an absolute duty on the master's part arises either to remedy the defect or to cease using the instrumentality.[1] This principle may be expressed in the form

Tracy was in no legal sense the representative of the defendant when he suggested to the intestate that he should procure a spring from a car standing on track No. 8; he was a fellow servant making a very unwise and dangerous suggestion."

In *Callaway* v. *Allen* (1894) 12 C. C. A. 114, 24 U. S. App. 388, 64 Fed. 297, a master was declared not to be liable for an injury to an employee through the failure of an additional device provided by the employees in violation of the orders of the superintendent, for the purpose of making the work easier to themselves, although the ground of his prohibition was that it was a hindrance to the work, and not that it was unsafe. "As we understand the contention of the appellee," said the court, "it is this: That it is the absolute duty of the master to furnish safe and suitable machinery and appliances; that this duty cannot be delegated; and that, therefore, when the foreman, Thompson and Anderson, constructed this dangerous device, and used it, the receiver became liable for its use, though it was wholly unknown to him, and neither himself nor his general superintendent, nor superintendent of bridges and buildings, had provided it, or authorized its use. This contention, we think, is not maintainable. A railroad corporation must act through its agents, and where a railroad is in the hands of a receiver, the receiver represents the company, and acts through its agents in the same way. Of course, the receiver must use all reasonable care to provide suitable machinery. The evidence shows that he did so provide in this case. The employees, however, were not satisfied with it; and they themselves provided something in addition that would make the work of lifting timbers easier for them, though the evidence showed that it was rather a hindrance than a help to the progress of the work. It is true the superintendent of bridges knew that this device had been used, and its use had been forbidden by him; and he had very recently told foreman Anderson to throw it away, and that if he used it he should hold him responsible. . . . The objection to its use seemed to be founded wholly upon its want of effectiveness in aiding the work. No suggestion was made by Johnson or the men that it was not safe. The most that can be said of the superintendent is that he did not succeed in stopping the use of the device. Probably his objection that it retarded the work may have been the reason why the men afterwards tried to carry three stringers at a time instead of one and two, as they had done before. We do not think, under the circumstances, that the receiver should be held liable for the use of this device. He neither furnished it, nor authorized its use. It could not be expected that he or the superintendent should be present at all times and at all places to see that such a device was not used, or that they should take means to destroy it, or prevent its use by force. The orders of the superintendent were disobeyed and his wishes disregarded by the employees, and the responsibility for its use should rest with them."

[1] A master is "equally chargeable, whether the negligence was in originally failing to provide, or in afterwards failing to keep its machinery in safe condition." *Ford* v. *Fitchburg R. Co.* (1872) 110 Mass. 240, 14 Am. Rep. 598. Quoted with approval in *Hough* v. *Texas & P. R. Co.* (1879) 100 U. S. 213, 25 L. ed. 612.

"It is well settled that it is the duty of the master to provide suitable and safe machinery and appliances for the use of his operatives; and we think it is also settled that his duty does not stop there, but that it is likewise his duty to keep such machinery in proper repair and safe working order; and if these duties, or either of them, are negligently performed, and one of the servants

that the duty of furnishing suitable and safe instrumentalities for the use of the servants includes the duty of maintaining them in safe condition,[2] or that the duty to provide safe instrumentalities is a continuous one.[3]

It follows, therefore, that the defense of common employment is not available where the defects which caused the injury would not have existed, if the servant whose appropriate function it was to keep the defective instrumentality up to the legal standard of safety and efficiency had adequately discharged his duty.[4] The master must, of course, also answer for defects resulting from the negligence of a servant in altering a machine. Compare § 570, *infra*.

It is proper to draw attention here to a doctrine to which we shall recur in a later subtitle (see § 812),—that, even if the dangerous conditions which caused the injury were originally due to negligence which is deemed characteristic of mere servants, as distinguished from a vice principal, the responsibility for those conditions is shifted to the master as soon as he has ascertained, or might by the exercise of reasonable care have ascertained, that they exist. The general principle which thus becomes controlling has been fully discussed in chapter X., *ante*.

The master is chargeable with knowledge which any employee intrusted with the duty of keeping instrumentalities in repair may acquire regarding their condition.[5]

thereby sustains an injury, the master is liable, even though he may have intrusted the performance of such duties to subordinates, by whatever name they may be called, and even though the master may have exercised due care in the selection of such subordinates." *Gunter* v. *Graniteville Mfg. Co.* (1882) 18 S. C. 274, 44 Am. Rep. 573.

The non-delegable quality of the duty to discontinue the use of instrumentalities known to be defective is seldom adverted to explicitly. See *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181; *Doing* v. *New York, O. & W. R. Co.* (1897) 151 N. Y. 579, 45 N. E. 1028 (duty to abandon a dangerous system). But the predication of such a quality is so obviously a necessary corollary of the existence of a duty as to maintenance, that specific authority for it is scarcely required.

[2] "Repairing" is, in a sense, "furnishing." *Tierney* v. *Minneapolis & St. L. R. Co.* (1885) 33 Minn. 311, 53 Am. Rep. 35, 23 N. W. 229.

[3] *Indiana Car Co.* v. *Parker* (1885) 100 Ind. 181; *Nall* v. *Louisville, N. A. & C. R. Co.* (1891) 129 Ind. 268, 28 N. E. 183, 611.

[4] An instruction that "the defendant would be responsible for the consequences of any want of diligence or due care or caution on the part of those whose duty it was to make repairs" is correct. *Cowan* v. *Umbagog Pulp Co.* (1897) 91 Me. 26, 39 Atl. 340.

[5] *Ohio & M. R. Co.* v. *Stein* (1894) 140 Ind. 61, 39 N. E. 246; *Strauss* v. *Haberman Mfg. Co.* (1897) 23 App. Div. 1, 48 N. Y. Supp. 425. See, generally, chapter X., subtitle D, *ante*. Even in cases where it may be conceded that there was no duty of regular inspection of the tools in use imposed upon the supervising officers of the defendant, and he trusts to the daily inspection of the man who uses the tools for information as to their condition of repair, yet, when such information is given to them, those officers, and not the plaintiff, are the proper agents to fulfil the master's duty in furnishing reasonably safe tools. *Lehigh Valley Coal*

The illustrative decisions cited below are arranged under headings which correspond as closely as may be to those employed for the purposes of classification in the preceding section, and indicate the nature of the specific dereliction of duty involved.[6] For other cases see §§ 582–584, *infra*.

Co. v. *Warrek* (1898) 28 C. C. A. 540, 55 U. S. App. 437, 84 Fed. 866.

[6] (a) *Defective railway tracks.*—In some cases under the head in which liability has been imposed, the delinquent has occupied a position higher than that of servants actually engaged in the manual work of repairing track. *Atchison, T. & S. F. R. Co.* v. *Moore* (1884) 31 Kan. 197, 1 Pac. 644 (road master was delinquent here); *Anderson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585 (company held liable to a brakeman on the ground that the assistant road master had sent the section foreman to repair the track, but did not see that the defect was remedied); *Palmer* v. *Utah & N. R. Co.* (1887) 2 Idaho, 290, 13 Pac. 425 (station agent failed to report condition of track); *Nashville & C. R. Co.* v. *Elliott* (1860) 1 Coldw. 611, 78 Am. Dec. 506 (engineer did not report defects in track); *Colorado C. R. Co.* v. *Ogden* (1877) 3 Colo. 499 (assistant superintendent had notice that track was defective); *Bessex* v. *Chicago & N. W. R. Co.* (1878) 45 Wis. 477 (yard master is a vice principal as to the act of leaving a dangerous obstruction, like a pile of lumber, near the track).

But the application of the general principle is by no means restricted to such employees. That the master must answer for the negligence of the trackmen themselves, and more especially of the foremen of gangs engaged on repairs, has been frequently affirmed. *Louisville & N. R. Co.* v. *Ward* (1894) 10 C. C. A. 166, 18 U. S. App. 683, 61 Fed. 927 (dangerous hole left by ballasting crew); *Southerland* v. *Northern P. R. Co.* (1890) 43 Fed. 646 (pile of ashes left on the track); *Kansas City, Ft. S. & G. R. Co.* v. *Kier* (1889) 41 Kan. 661, 671, 21 Pac. 770 (brakeman stumbled over pile of cinders deposited near the track); *St. Louis & S. F. R. Co.* v. *Weaver* (1886) 35 Kan. 412, 57 Am. Rep. 176, 11 Pac. 408; *Kentucky C. R. Co.* v. *Ryle* (1892) 13 Ky. L. Rep. 862, 18 S. W. 938 (tie left on track threw brakeman off of a switch engine); *Snow* v. *Housatonic R. Co.* (1864) 8 Allen, 441, 85 Am. Dec. 720; *Bolhoff* v. *Michigan C. R. Co.* (1895) 106 Mich. 606, 65 N. W. 592 (failure to level depression caused derailment); *Drymala* v. *Thompson* (1879) 26 Minn. 40, 1 N. W. 255; (rail taken up without setting proper signals to warn approaching trains); *Hall* v. *Missouri P. R. Co.* (1881) 74 Mo. 298 (obstruction); *Vantrain* v. *St. Louis, I. M. & S. R. Co.* (1880) 8 Mo. App. 538 (dangerous hole left by section hands); *Fifield* v. *Northern R. Co.* (1860) 42 N. H. 225 (track allowed to become blocked with snow and ice); *Wellman* v. *Oregon, Short Line & U. N. R. Co.* (1892) 21 Or. 530, 28 Pac. 625 (failure to report defects); *Carlson* v. *Oregon Short Line & U. N. R. Co.* (1892) 21 Or. 450, 28 Pac. 497 (track repairer killed by derailment of car, while he was being conveyed to his work); *Cairo* v. *Charlotte, C. & A. R. Co.* (1885) 23 S. C. 526, 55 Am. Rep. 28; *Gulf, C. & S. F. R. Co.* v. *Johnson* (1892) 1 Tex. Civ. App. 103, 20 S. W. 1123; *Moon* v. *Richmond & A. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401; *Baltimore & O. R. Co.* v. *McKenzie* (1885) 81 Va. 71 (night watchman, as well as section foreman, here held to be vice principal); *Bateman* v. *Peninsular R. Co.* (1898) 20 Wash. 133, 54 Pac. 996; *Hulehan* v. *Green Bay, W. & St. P. R. Co.* (1887) 68 Wis. 520, 32 N. W. 529 (obstruction).

In the following cases, also, the non-delegable quality of the duty of repairing tracks is asserted in perfectly general terms. *Illinois C. R. Co.* v. *Patterson* (1873) 69 Ill. 650; *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 87, 16 S. W. 924; *Wright* v. *Southern R. Co.* (1898) 123 N. C. 280, 31 S. E. 652 (1901) 128 N. C. 77, 38 S. E. 283; *Missouri P. R. Co.* v. *James* (1888: Tex.) 10 S. W. 332; *Texas & P. R. Co.* v. *Kirk* (1884) 62 Tex. 227; *Houston & T. C. R. Co.* v. *Dunham* (1878) 49 Tex. 181; *Galveston, H. & S. A. R. Co.* v. *Pitts* (1897: Tex. Civ. App.) 42 S. W. 255; *Torian* v. *Richmond & A. R. Co.* (1887) 84 Va. 192, 4 S. E. 339; *McClarney* v. *Chicago, M. & St. P. R. Co.* (1891) 80 Wis. 277, 49 N. W. 963 (snow was allowed to accumulate, and caused derailment).

The breach of the duty to keep an instrumentality in safe condition may obviously be committed not only by failing to repair it, but by removing from it some essential part, the want of which renders it

An action by a trainman for injuries received from a guy which the railroad company permitted a third person to stretch across the track does not present the question of common employment, since it involves the duty of the employer to provide safe tracks. *New York, N. H. & H. R. Co.* v. *O'Leary* (1899) 35 C. C. A. 562, 93 Fed. 737.

Where a defect in the planking over a railroad crossing, by reason of which a brakeman was injured while coupling cars, had existed for so long a time that the company may be presumed to have had notice of it, the fact that the section foreman was furnished with materials, and instructed generally to make repairs when needed, does not relieve the company from the charge of negligence. *Fluhrer* v. *Lake Shore & M. S. R. Co.* (1899) 121 Mich. 212, 80 N. W. 23.

In several of the above cases the abnormal danger, it will be observed, arose from the negligence of the trackmen in leaving temporary obstructions, etc., on the track. But according to one ruling the trackmen themselves are not vice principals in respect to the duty of remedying defects produced by the use of the track,—such as piles of ashes,—and the company should not be held liable unless the conditions have been brought to the knowledge of some supervising official, like the road master or one of his assistants, and he fails to see that the proper remedy is applied. *Anderson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585 (Grant, J., dissented). It is submitted that this doctrine, which seems to represent the result of an attempt to compromise between the theory that the duty of repairing is non-delegable, and the theory that trainmen and trackmen are not in distinct departments, in such a sense that the former do not assume the risk of the latters' negligence, is wholly illogical.

Under the Massachusetts doctrine, explained in § 560, *supra*, it is held that, if a section master was intrusted by a railroad company with the performance of the duty, or a part of the duty of supervision of the tracks, which a reasonable regard for the safety of its employees required the corporation to perform, the company is liable for his negligence. *Babcock* v. *Old Colony R. Co.* (1890) 150 Mass. 467, 23 N. E. 325.

(b) *Dangerous conditions alongside or above railway tracks.*—A railway company is liable to a trainman for injuries due to an obstruction near a track, which fell after being allowed to remain an unreasonable time in such a position that, if it fell, it would necessarily endanger the safety of such a servant. That the derrick was originally set up by his fellow servants will not affect this result. *Holden* v. *Fitchburg R. Co.* (1880) 129 Mass. 268, 37 Am. Rep. 343.

In *Texas & N. O. R. Co.* v. *Echols* (1897) 17 Tex. Civ. App. 677, 41 S. W. 488, it was shown that a remnant stack of ties was liable to topple over and fall upon men at work, which rendered the premises unsafe. The court said that if, by the exercise of due care, "its servants and agents, charged with the duty of keeping the premises in a safe condition, knew or would have known of the dangerous condition in which the remnant stack of ties was left, in time to have removed the danger, and failed to do so, the company would be liable." The insecurity was deemed to be a merely temporary condition.

The plaintiff was also held entitled to recover in *Southern P. R. Co.* v. *Harkey* (1892; Tex.) 19 S. W. 392 (brakeman fell over a piece of timber lying near the track); *Lewis* v. *St. Louis & I. M. R. Co.* (1875) 59 Mo. 495, 21 Am. Rep. 385 (excavation left near track); *Gates* v. *Chicago, M. & St. P. R. Co.* (1892) 2 S. D. 422, 50 N. W. 907 (no one deputed to see that a derrick near a track was properly secured, when not in use; iron hook suspended from the arm struck plaintiff while standing on a passing car); *Donahue* v. *Boston & M. R. Co.* (1901) 178 Mass. 251, 59 N. E. 663 (pile of stones left near track); *Missouri P. R. Co.* v. *Bond* (1893) 2 Tex. Civ. App. 104, 20 S. W. 930 (pile of cinders left near the track).

The failure to see that the guy of a derrick, which extends across a railway track, is high enough to obviate the risk of injury to trainmen is negligence which is imputable to the railway company. *New York, N. H. & H. R. Co.* v. *O'Leary* (1899) 35 C. C. A. 562, 93 Fed. 737.

(c) *Defects in other kinds of tracks.*—Recovery was allowed in *Gunter* v. *Graniteville Mfg. Co.* (1882) 18 S. C.

262, 44 Am. Rep. 573; *Lasure* v. *Graniteville Mfg. Co.* (1882) 18 S. C. 275 (tramway on which plaintiff was wheeling bales of cotton collapsed).

(d) *Defective footpaths.*—A railroad company owes its employees the duty, not only to employ suitable persons to keep in repair walks upon which their duties call them, but also to use reasonable diligence to see that they perform their duty. *Sweat* v. *Boston & A. R. Co.* (1892) 156 Mass. 284, 31 N. E. 296.

(e) *Inadequacy of safeguards against dangers from explosive substances.*—(See also subd. (g), and § 579, *infra.*) In *McDonough* v. *Great Northern R. Co.* (1896) 15 Wash. 244, 46 Pac. 334, where the plaintiff was injured by striking his drill against an unexploded charge of dynamite. The court seems to base its decision both on the general ground that anything which the foreman did in the discharge of his functions, as a departmental vice principal, was constructively the act of the railway company (see §§ 532 *et seq.*, *ante*), and also on the special ground that he was intrusted with the particular nonassignable duty of seeing that the place of work was safe.

See also *Stewart* v. *New York, O. & W. R. Co.* (1889) 28 N. Y. S. R. 215, 8 N. Y. Supp. 19 (explosion of dynamite while being thawed).

(f) *Inadequacy of protection for servants engaged in excavation work.*—(See also § 579, *infra.*) It is only at his own risk that a person engaged in excavating a ditch can depute to another the task of keeping it in a safe condition for the servants whom he puts to work in it. *Van Steenburgh* v. *Thornton* (1895) 58 N. J. L. 160, 33 Atl. 380 (sewer trench fell in for want of adequate means to shore up the sides properly).

On the ground that the work was particularly dangerous, and the foreman was the only person on the ground who could discharge the duty of supervision, it has been held that the foreman of a gang of twenty-five or thirty men, who has charge of drilling, blasting, and removal of material from a bank of hardpan, and indicates the places where the men under him shall use their shovels, and who hires and discharges men, and alone gives orders,—is not, as matter of law, a fellow servant with those under him, and, as such, discharged from any duty of supervising in order to protect them against unnecessary dangers from the fall of loose earth. *Hill* v. *Winston* (1898) 73 Minn. 80, 75 N. W. 1030.

To the same effect, see *Pantzar* v. *Tilly Foster Iron Min. Co.* (1885) 99 N. Y. 368, 2 N. E. 24 (earthslide, danger of which was apparent to official in control); *Thompson* v. *Chicago, M. & St. P. R. Co.* (1883) 18 Fed. 239 (bank in process of excavation under road master's directions fell in); *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 34 Pac. 720 (road master held to be vice principal as regards keeping place of work safe for men blasting rock from a cliff).

(g) *Inadequacy of protection for servants working in mines.*—One employed to timber a drift in a mine, so as to provide and keep a safe place for other employees working therein, is a vice principal as to them. *Grant* v. *Laney* (1895) 21 Colo. 329, 40 Pac. 771; *Russell Creek Coal Co.* v. *Wells* (1898) 96 Va. 416, 31 S. E. 614; *Consolidated Coal Co.* v. *Schreiber* (1896) 65 Ill. App. 304.

A gas tester is a vice principal. *Costa* v. *Pacific Coast Co.* (1901) 26 Wash. 138, 66 Pac. 398.

A miner intrusted by the mine boss with the duty of making and maintaining safe entries is a vice principal. *Wellston Coal Co.* v. *Smith* (1901) 65 Ohio St. 70, 55 L. R. A. 99, 61 N. E. 143.

The negligence of the boss of an oil going shift to inform the members of an on-coming one of the existence of a "missed" hole is the negligence of the master, and not that of a fellow servant. *Shannon* v. *Consolidated Tiger & Poorman Min. Co.* (1901) 24 Wash. 119, 64 Pac. 169.

(h) *Defects in bridges.*—The defendant was held liable in *Chicago G. W. R. Co.* v. *Healy* (1898) 30 C. C. A. 11, 57 U. S. App. 513, 86 Fed. 245; *Chicago & N. W. R. Co.* v. *Swett* (1867) 45 Ill. 197, 92 Am. Dec. 206; *Toledo, P. & W. R. Co.* v. *Conway* (1873) 68 Ill. 560; *Bowen* v. *Chicago, B. & K. C. R. Co.* (1888) 95 Mo. 268, 8 S. W. 230; *Galveston, H. & S. A. R. Co.* v. *Daniels* (1892) 1 Tex. Civ. App. 695, 20 S. W. 955; *San Antonio & A. P. R. Co.* v. *Adams* (1894) 6 Tex. Civ. App. 102, 24 S. W. 839; *Davis* v. *Central Vermont R. Co.* (1882) 55 Vt. 84; 45 Am. R. 590 (road master was negligent). Contra, ruling *Hard* v. *Vermont C. R. Co.* (1860) 32 Vt. 473; *Bateman* v. *Peninsular R. Co.* (1898) 20 Wash. 133, 54 Pac. 996.

(i) — *in scaffolds, platforms, etc.*—(Contrast §§ 613–616, *post.*) *Cole* v. *Warren Mfg. Co.* (1899) 63 N. J. L. 626, 44 Atl. 647 (master liable for failure to maintain in safe condition a scaf-

fold furnished for the use of a millwright repairing a shaft); *Chesson* v. *John L. Roper Lumber Co.* (1896) 118 N. C. 59, 23 S. E. 925 (platform not repaired by carpenters employed for that purpose).

(j) — *in other structures.*—*Ferris* v. *Hornsheim Bros.* (1899) 51 La. Ann. 178, 24 So. 771 (judgment for defendant by judge sitting as jury—reversed on evidence showing that a stairway had not been kept in repair); *Van Dusen* v. *Letellier* (1889) 78 Mich. 492, 44 N. W. 372 (employee repairing docks in a millyard, held a vice principal).

A complaint for injuries to a servant, alleging that the latter, in the performance of his duty for defendant, was necessarily required to stand and work at and near an embankment of earth on defendant's land; that such embankment was supported by timbers, braces, and planks; that said supports gave way and broke by reason of their rottenness and insufficiency, thereby causing the injuries; that said supports had been allowed to remain for an unusually long time, and a much longer time than they should have been permitted to remain, and that they were not properly inspected by defendant, and had become worn and rotten,—sufficiently alleges that defendant was guilty of negligence in failing to furnish a safe place. *Nicholas* v. *Burlington, C. R. & N. R. Co.* (1899) 78 Minn. 43, 80 N. W. 776.

(k) *Defective method of loading cars.*—(Contrast cases cited in § 610, note subd. (e), and § 619, note 4, subd. (f), *post*). It has been held that a railway company is liable for an injury to a brakeman caused by his being thrown off a car and under the wheels by the negligent loading of smokestacks on the car by a station agent. *Atchison, T. & S. F. R. Co.* v. *Seeley* (1893) 54 Kan. 21, 37 Pac. 104. The court said: "An authority is cited, to the effect that, where the company has employed a competent inspector to see that the cars are properly loaded and in good condition, it cannot be held liable for the negligence of the inspector in failing to observe that the car was improperly loaded. *Dewey* v. *Detroit, G. H. & M. R. Co.* (1893) 97 Mich. 343, 22 L. R. A. 392, 16 L. R. A. 342, 52 N. W. 942, 56 N. W. 756. This authority is not satisfactory to us, nor in line with the decisions that have been cited. We are unable to see any reason for a distinction between the preparation and inspection of the car itself, as a fit instrumentality to be placed in a train, and the preparation and inspection of a loaded car to be placed in the train for transportation. Each is an instrumentality to be used in connection with the services necessary to be performed by the trainmen in its transportation, and no distinction between them is seen, so far as the obligation of the company or the safety of the employees engaged in handling it are concerned. The inspection in either case is made with reference to the same end, and the person to whom this duty is delegated stands in the place of the company, and the latter is responsible for his acts."

To the same effect, see *Irvine* v. *Flint & P. M. R. Co.* (1891) 89 Mich. 416, 50 N. W. 1008 (held to be the duty of a railroad company to see that its cars are so loaded that a brakeman will have reasonably safe access to the brakes; *Galveston, H. & S. A. R. Co.* v. *Farmer* (1889) 73 Tex. 85, 11 S. W. 156 (car loaded so that lumber projected over the end); *Redington* v. *New York, O. & W. R. Co.* (1895) 84 Hun, 231, 32 N. Y. Supp. 535 (loading a car held to be an act of the employer, where it makes coupling more dangerous than usual, and there are no rules providing for such a case).

(l) *Pitfalls.*—*Sumney* v. *Holt* (1883) 15 Fed. 886 (jury charged that a porter, whose duty it is to light the hatchways of a ship, is a vice principal); *Simmons* v. *Peters* (1897) 20 App. Div. 251, 46 N. Y. Supp. 800 (servant charged with the duty failed to light a gas jet which was intended solely to give employee a safe means of access to an elevator); *Gulf, C. & S. F. R. Co.* v. *Brentford* (1891) 79 Tex. 619, 15 S. W. 561 (no lights provided for place of work); *Sadowski* v. *Michigan Car Co.* (1890) 84 Mich. 100, 47 N. W. 598 (person employed to lay a water pipe in a ditch through a yard left the yard in a dangerous condition).

(m) *Want of adequate protection against injuries from falling bodies.*—*Northwestern Fuel Co.* v. *Danielson* (1893) 6 C. C. A. 636, 12 U. S. App. 688, 57 Fed. 915 (fellow servants of a workman held to be the representatives of the employer in removing timbers standing over the head of such workman); *Wilson* v. *Willimantic Linen Co.* (1883) 50 Conn. 433, 47 Am. Rep. 653 (employee engaged in setting up machinery injured by a countershaft which fell owing to the negligence of the superintendent or overseer of re-

pairs in a factory); *Stephens* v. *Hudson Valley Knitting Co.* (1893) 69 Hun, 375, 23 N. Y. Supp. 656 (injury was caused by the fall of a pile of rolls of cloth); *Cavanagh* v. *O'Neill* (1898) 27 App. Div. 48, 50 N. Y. Supp. 207, Affirmed in (1900) 161 N. Y. 657, 57 N. E. 1106 (employee in a store injured by the fall of a dress form model); *Stimpson* v. *Fuchs & L. Mfg. Co.* (1898) 26 App. Div. 333, 49 N. Y. Supp. 785 (part of machine, not being properly secured, fell on plaintiff); *Blondin* v. *Oolitic Quarry Co.* (1894) 11 Ind. App. 395, 37 N. E. 812 (stone negligently set on edge by one servant fell on another working in the same yard); *Urey* v. *Golden Tunnel Min. Co.* (1901) 24 Wash. 261, 64 Pac. 174 (no precautions taken to prevent rocks taken out of a mining tunnel from rolling down on men working below); *Sackewitz* v. *American Biscuit Mfg. Co.* (1899) 78 Mo. App. 144.

It seems scarcely possible to reconcile some of the above cited cases with some of those cited in §§ 610, note 1, subd. (2), and 612a, note 1, subd. (c), *post*.

In *Freeman* v. *Glens Falls Paper Mill Co.* (1891) 61 Hun, 125, 15 N. Y. Supp. 657, it was held that a servant was entitled to recover for an injury caused by a barrel which fell on him. The theory on which the court proceeded was that the barrel had been left in a position which affected the safety of the place of work, and that this created a risk of which the plaintiff was shown by the evidence to be ignorant. This doctrine was not noticed on the second appeal ([1893] 70 Hun, 530, 24 N. Y. Supp. 403), which was taken from a judgment entered on a verdict for the defendant, which found the plaintiff to be negligent, and seems impossible to reconcile with the more recent rulings of the New York court of appeals.

In *Cole Bros.* v. *Wood* (1894) 11 Ind. App. 37, 36 N. E. 1074, it was held (Ross, J., *dissenting*) that a foreman in a manufacturing shop is a vice principal and not a fellow servant of an employee ordered by him to work in a space just large enough for one person to work in safety, with respect to his act in going into such place with another, without such employee's knowledge, where one of them comes in contact with and displaces certain tubing, causing it to fall and seriously injure such employee. The court distinguished *New Pittsburgh Coal & Coke Co.* v. *Peterson* (1894) 136 Ind. 398, 35 N. E. 7, on the ground that the acts there charged, *viz.*, the starting of machinery and the failure to warn the plaintiff, were such as naturally devolved on a fellow servant. The only principle on which this decision can be sustained, if at all, appears to be that the duty of notifying an employee of any increase of danger in his environment is nonassignable. See § 579, *infra*.

(n) *Want of adequate means to keep railway cars stationary when not in use.*—*Henry* v. *Wabash Western R. Co.* (1891) 109 Mo. 488, 19 S. W. 239 (railway company cannot relieve itself from liability for injuries to a locomotive fireman by a collision with a freight car placed on a side track, by delegating to a servant its duty of seeing that such car is properly supplied with brakes and that other means are used to prevent it from being removed by its own weight or by wind upon the main track).

(o) *Defective locomotives.*—In *Texas & P. R. Co.* v. *Barrett* (1897) 166 U. S. 617, 41 L. ed. 1136, 17 Sup. Ct. Rep. 707, the following instruction was approved: "If the jury believe, from the evidence under the foregoing instructions, that the boiler which exploded and injured the plaintiff was defective and unfit for use, and that defendant's servants, whose duty it was to repair such machinery, knew or by reasonable care might have known of such defects in said machinery, then such neglect upon the part of its servants is imputable to the defendant: and if said boiler exploded by reason of said defects, and injured the plaintiff, the defendant would be responsible for the injuries inflicted upon plaintiff, if plaintiff in no way, by his own neglect, contributed to his injuries."

In *Fuller* v. *Jewett* (1880) 80 N. Y. 46, 36 Am. Rep. 575, Affirming *sub nom. Stevenson* v. *Jewett* (1878) 16 Hun, 210, an action against a railroad receiver to recover damages for the killing of a locomotive engineer by the explosion of a boiler, there was evidence that the boiler had been frequently reported and sent to the repair shops for repairs, and the defendant was held not to be exensed from liability by the facts that there was no negligence in employing the superintendent of repairs, or in making proper regulations, that the master mechanic in charge gave proper instructions for the repairing, and that the negligence was that of the workmen directed to make the repairs.

Where there is evidence that the en-

gine which caused the injury was out of repair, to the knowledge of the defendant's master mechanic, a trial judge is not justified in nonsuiting the plaintiff on the ground that the doctrine of common employment is applicable. The question still remains: Did the master exercise due care to furnish a safe appliance? *Kain* v. *Smith* (1881) 25 Hun, 146, Affirmed in (1882) 89 N. Y. 375; Reiterating doctrine of (1880) 80 N. Y. 458, Which Reversed (1877) 11 Hun, 552.

To the same effect are the following cases, in which the employees in charge of the roundhouse or other place where repairs of locomotives are executed were held to be vice principals as regards trainmen. *St. Louis, I. M. & S. R. Co.* v. *Harper* (1884) 44 Ark. 524 (foreman of shops and master mechanic both vice principals in allowing a defective engine to go out on the road); *Chicago & I. R. Co.* v. *Shannon* (1867) 43 Ill. 338; *Ohio & M. R. Co.* v. *Stein* (1891) 140 Ind. 31, 39 N. E. 246; *Krueger* v. *Louisville, N. A. & C. R. Co.* (1887) 111 Ind. 51, 11 N. E. 957; *Cone* v. *Delaware, L. & W. R. Co.* (1880) 81 N. Y. 206, 37 Am. Rep. 491, Affirming (1878) 15 Hun, 172; *Pennsylvania & N. Y. Canal & R. Co.* v. *Mason* (1885) 109 Pa. 296, 58 Am. Rep. 722; *Brabbits* v. *Chicago & N. W. R. Co.* (1875) 38 Wis. 289.

There is also authority for holding a railway company liable for the failure of an engineer to report that his engine was defective. *Texas & N. O. R. Co.* v. *Bingle* (1897) 16 Tex. Civ. App. 653, 41 S. W. 90, Writ of error denied in 91 Tex. 287, 42 S. W. 971, Former Appeal (1895) 9 Tex. Civ. App. 322, 29 S. W. 674 (company held to be bound by promise of engineer that repairs would be done); *Bridges* v. *St. Louis, I. M. & S. R. Co.* (1879) 6 Mo. App. 389. These decisions would hardly be concurred in by many of the courts which adopt the general principle under discussion. But the imposition of responsibility to the extent here predicated seems to be quite justifiable, on logical grounds, if the engineer be regarded as the person who, for the time being, is in full charge of the piece of machinery operated by him.

(p) *Defects in railway cars.*—That railway companies are responsible for the negligence of employees whose duty it is to keep cars in repair was held in the following cases: *Northern P. R. Co.* v. *Herbert* (1886) 116 U. S. 642, 29 L. ed. 755, 6 Sup. Ct. Rep. 590, Affirming (1882) 3 Dak. 38, 13 N. W. 349 (car repairer failed to remedy defects in brake); *Central Trust Co.* v. *Texas & St. L. R. Co.* (1887) 32 Fed. 448 (defect in brake due to negligence of foreman of roundhouse); *Mackey* v. *Baltimore & P. R. Co.* (1890) 8 Mackey, 282 (defective brakes); *Chicago & N. W. R. Co.* v. *Jackson* (1870) 55 Ill. 492, 8 Am. Rep. 661; *Chicago & E. I. R. Co.* v. *Driscoll* (1897) 70 Ill. App. 91; *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 87, 16 S. W. 924; *McNamara* v. *Brooklyn City R. Co.* (1895) 11 Misc. 667, 32 N. Y. Supp. 913; *Missouri P. R. Co.* v. *James* (1888; Tex.) 10 S. W. 332.

In *Rodney* v. *St. Louis S. W. R. Co.* (1895) 127 Mo. 676, 28 S. W. 887, 30 S. W. 150, the duty with respect to a car discovered to be defective was discussed as follows: "The defendant did not discharge its full duty to the plaintiff by inspecting and marking the car. The duty to furnish reasonably safe appliances and machinery for the use of its servants in the course of their employment was not only an imperative, but a continuous, duty. It ran, so to speak, with the defective car from the moment it was discovered to be defective, continually calling upon the master to repair it, or to warn those of its servants, whom it required in the course of their employment to handle it, of its dangerous character. These duties were not only imperative and continuous, but they were personal duties of the master, to whomsoever delegated, and if neglected by those to whom they were delegated, their negligence was the negligence of the master."

The failure of a conductor to see that, when the red light ordinarily carried in the caboose of his train was removed for repairs, it was replaced by another one, is the breach of a non-delegable duty. *Denver & R. G. R. Co.* v. *Sipes* (1899) 26 Colo. 17, 55 Pac. 1093.

Trainmen charged with the duty, upon discovering the defective condition of a car, to report it to the master for repair, and to discontinue the use of it until it is restored to a reasonably safe condition, are not fellow servants of a section foreman killed in consequence of their neglect. *Chicago & A. R. Co.* v. *Cullen* (1900) 87 Ill. App. 374, Affirmed in (1900) 187 Ill. 523, 58 N. E. 455.

Like principles are controlling where the defective apparatus is a hand car.

Banks v. *Wabash Western R. Co.* (1890) 40 Mo. App. 458. There the delinquent was the foreman of a section crew, and the decision as to such a functionary is, perhaps, not one which would everywhere receive approval. In some courts it would only be sustained, if at all, on the same ground as that suggested for the similar decision as to a locomotive engineer, in the preceding subdivision of this note.

Unless it is a part of the duty of the trainmen themselves to make the adjustment of the brake rods of a railway car, an improper adjustment is as much a breach of the non-delegable duty to keep the appliance in safe condition as if some part of it were defective in character, or wanting. *Woods* v. *Long Island R. Co.* (1899) 59 N. Y. 546, 54 N. E. 1095, Affirming (1898) 11 App. Div. 10, 42 N. Y. Supp. 140.

(q) *In other vehicles.*—*Boelter* v. *Ross Lumber Co.* (1899) 103 Wis. 324, 79 N. W. 243 (foreman permitted use of wagon reported to be unsafe).

(r) *Defective boilers.*—(See also subd. (k), *supra*.) *Mitchell* v. *Robinson* (1881) 80 Ind. 281, 41 Am. Rep. 812 (defective boiler exploded).

(s) *Defective hoisting apparatus.*—*Corcoran* v. *Holbrook* (1875) 59 N. Y. 517, 17 Am. Rep. 369 (mill owner was held liable for the negligence of his general agent in omitting to repair a chain by which an elevator was raised and lowered, after he had been notified that the apparatus was in a dangerous condition; *Morton* v. *Zwierzykowski* (1901) 192 Ill. 328, 61 N. E. 443, Affirming (1900) 91 Ill. App. 462 (defendant held liable for the negligence of an engineer in failing to attach a bucket securely); *Union P. R. Co.* v. *Fray* (1890) 43 Kan. 750, 23 Pac. 1039 (foreman in charge of derrick failed to keep it in safe condition).

In *Courtney* v. *Conrad* (1883) 17 J. & S. 286, the majority of the court held that the owner of a derrick was liable for the negligence of his foreman in beginning work with a derrick, the rigging of which was defective, owing to the fact that the ropes had been stretched by a rain which fell during the night before the accident. Sedgwick dissented on a ground which would probably be now deemed controlling in New York (see next chapter), *viz.*, that the plaintiff "accepted the risk that would be involved in arranging the derrick and several attachments from occasion to occasion."

(t) *Defective adjustment of the parts of machinery.*—*Eingartner* v. *Illinois Steel Co.* (1894) 94 Wis. 70, 34 L. R. A. 503, 68 N. W. 664 (oiler was injured through the negligence of a carpenter gang, whose duty it was to replace planks about a machine called the "bloom rolls," after their removal for the purpose of attaching new rolls); *Monmouth Min. & Mfg. Co.* v. *Erbug* (1894) 148 Ill. 521, 36 N. E. 117, Affirming (1892) 45 Ill. App. 411 (employer is not relieved from liability for injuries to an employee, caused by the sudden starting of machinery, due to the absence of a nut from an eyebolt used to hold a lever in place to keep the machinery stationary, where the nut had been gone for several weeks, and another employee having charge of the machinery knew of such defect, and did not report it or see that it was repaired).

Inspection and repair necessary to the safe support and maintenance of overhead shafting in a factory are not merely incidental to the running of the engine with which it is connected, within the rule that the inspection or repair incident to use by a servant of machinery is the servant's, not the master's, duty. *Huxtis* v. *James A. Banister Co.* (1899) 43 Atl. 651, 63 N. J. L. 465.

The tightening of a belt which is liable to slip is a part of the work which devolves on the master in the performance of his duty to keep the machinery in safe condition. *Ellis* v. *Pierce* (1898) 172 Mass. 220, 51 N. E. 974.

(u) *Other defects in machinery.*—*Darby* v. *Duncan* (1861) 23 Dunlop, Sc. Sess. Cas. 2d series, 529 (fencing round machinery allowed to become defective. See § 526, note 1, *ante*); *Fox* v. *Le Comte* (1896) 2 App. Div. 61, 37 N. Y. Supp. 316, (power press so defective that it moved without pressure on the treadle). *Carter* v. *Oliver Oil Co.* (1891) 34 S. C. 211, 13 S. E. 419 (servant whose duty it is to repair sacks, which are dangerous to use when torn, held to be a vice principal as regards another servant, who handles them in operating a machine); *Swift & Co.* v. *Short* (1899) 34 C. C. A. 545, 92 Fed. 567 (acts of fellow servants of a person injured by the flying of a shoe forming part of a clutch, from a rapidly revolving wheel, in wiring the shoe to make it safe, after it is cracked, held to be the act of the master); *Jaques* v. *Great Falls Mfg. Co.* (1894) 66 N. H. 482, 13 L. R. A. 824, 22 Atl. 552 (employer liable for an injury received by a weaver in conse-

dangerous in use.[7] An employee is a vice principal as regards the care and custody of dangerous instrumentalities which are given into his charge.[8]

569. Same duty held to be delegable.— The cases in which the doctrine that a master is not liable for the negligence of servants to whom he deputes the function of keeping the instrumentalities in a proper condition has been avowedly or impliedly adopted are collected in § 618, *post*.

quence of the unskilful manner in which the loom had been repaired by the mechanic to whom the duty of repairing had been assigned).

An injury received by one servant through the failure of another servant to keep the brake of a hoisting apparatus in repair would be regarded as due to the negligence of a vice principal. But if the injury is received by the negligence of the second servant in releasing the brake, while taking an active part in the working of the apparatus, the negligence is that of a mere fellow servant. *Fox* v. *Spring Lake Iron Co.* (1891) 89 Mich. 387, 50 N. W. 872.

A millwright called in to straighten a shaft and the servants of a mill architect and builder reconstructing the building were said to be probably not coservants in *Cole* v. *Warren Mfg. Co.* (1899) 63 N. J. L. 626, 44 Atl. 647.

(v) *Defective lighting of place of work.*—It has been held that the owner of a ship cannot escape his responsibility for the unlighted condition of a passageway to coal bunkers in use on a dark night while the ship is coaling, by furnishing lanterns to his servants without using any care to see that they are properly lighted. *The Saratoga* (1898) 87 Fed. 349. But this ruling is in conflict with the principle discussed in chapter XXXII., subtitle B, *post*. See, especially, § 610, note 1, subd. (r).

(w) *Other authorities for the general principle are the following: Wells* v. *Co.* (1886) 9 Colo. 159, 11 Pac. 50; *Denver Tramway Co.* v. *Cranehaugh* (1897) 23 Colo. 363, 48 Pac. 503; *Monmouth Min. & Mfg. Co.* v. *Erling* (1894) 148 Ill. 521, 36 N. E. 117; *Norton* v. *Volzke* (1894) 158 Ill. 402, 41 N. E. 1085; *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285; *Tudor Iron Works* v. *Weber* (1889) 31 Ill. App. 306; *Atchison, T. & S. F. R. Co.* v. *Reagan* (1887) 37 Kan. 592, 15 Pac. 584; *Lawrence* v. *Hagemeyer & Co.* (1892) 93 Ky. 591, 20 S. W. 704; *Shanny* v. *Androscoggin Mills* (1876) 66 Me. 420; *Rice* v. *King Philip Mills* (1887) 144 Mass. 229, 59 Am. Rep. 80, 11 N. E. 101; *Fox* v. *Spring Lake Iron Co.* (1891) 89 Mich. 387, 50 N. W. 872; *Rowe* v. *Blodgett & D. Lumber Co.* (1893) 94 Mich. 607, 54 N. W. 492; *Sadowski* v. *Michigan Car Co.* (1891) 84 Mich. 100, 47 N. W. 598; *Anderson* v. *Michigan C. R. Co.* (1895) 107 Mich. 591, 65 N. W. 585; *Bridges* v. *St. Louis, I. M. & S. R. Co.* (1879) 6 Mo. App. 392; *Dutzi* v. *Geisel* (1886) 23 Mo. App. 676; *Benzing* v. *Steinway* (1886) 101 N. Y. 547, 5 N. E. 449; *Ballard* v. *Hitchcock Mfg. Co.* (1893) 71 Hun, 582, 24 N. Y. Supp. 1104; *Strauss* v. *Hakenjos Mfg. Co.* (1897) 23 App. Div. 1, 48 N. Y. Supp. 125; *Galassa* v. *National S. S. Co.* (1898) 27 App. Div. 169, 50 N. Y. Supp. 417. Rehearing denied in 28 App. Div. 624, 51 N. Y. Supp. 136; *Carter* v. *Olicer Oil Co.* (1891) 34 S. C. 211, 13 S. E. 419; *Houston & T. C. R. Co.* v. *Marcelles* (1883) 59 Tex. 334; *Pudjez* v. *Cutrer* (1893) 2 Tex. Civ. App. 569, 22 S. W. 237; *Chapman* v. *Southern P. Co.* (1895) 12 Utah, 30, 41 Pac. 551 (employee charged with the direction of work in the absence of a foreman, and with the duty of repairing machinery when needed, not a fellow servant of another employee, so far as his duty to make repairs is concerned); *Hockey* v. *Baltimore & P. R. Co.* (1890) 8 Mackey, 282.

A judgment for plaintiff is properly entered on a finding that the handle of a hammer used for breaking of stones was worm-eaten, and defective and broken. *Baltimore & O. S. W. R. Co.* v. *Laos* (1898) 20 Ind. App. 378, 49 N. E. 854.

[7] *Browning* v. *Wabash Western R. Co.* (1894) 124 Mo. 55, 24 S. W. 731, Affirmed in (1894) 27 S. W. 644 (engineer killed owing to the removal of brake stairs by a road master).

[8] *Rush* v. *Spokane Falls & N. R. Co.* (1900) 23 Wash. 501, 63 Pac. 500.

570. Duty to see that worn-out or otherwise defective parts of instrumentalities are replaced by suitable substitutes.— The quality of this duty may be said to depend upon the essential nature of the operation by which the replacement is effected in each particular instance.

In some cases that operation is, logically speaking, equivalent to a discharge of the function of supplying a suitable instrumentality. Under such circumstances the liability of the master for the negligence of an employee to whom that function is deputed cannot be consistently denied by any court which concedes the duty of supply to be non-delegable. For the purposes of this principle it is plainly immaterial whether the substitution is that of an entire instrumentality or merely one of its constituent parts.[1] Upon general principles it would seem that that species of replacement which would be incident to the preparation of instrumentalities as part of the work, or to any of the other operations discussed in chapter XXXII., would not constitute the exercise of a non-delegable function; but no case is known to the writer in which this precise point has been considered.[2]

In other cases the operation of replacement is associated with the function of maintenance in this respect,—that substitution represents the most appropriate, as possibly the only available, method by which a defective instrumentality can be prevented from falling below the legal standard of safety. So far, therefore, as the doctrine that this

[1] *Lehigh Valley Coal Co.* v. *Warrek* (1898) 28 C. C. A. 510, 55 U. S. App. 137, 84 Fed. 866 (blocks furnished for checking the speed of coal cars were defective to the knowledge of the superintendent); *Mulcey* v. *Rhode Island Locomotive Works* (1883) 14 R. I. 204 (superintendent had notice that an elevator chain was defective, but failed to furnish a new one).

An employee in charge of the mechanical department represents the master as regards the substitution of an essential part of the machinery. *Slattery* v. *Walker & P. Mfg. Co.* (1901) 179 Mass. 307, 60 N. E. 782 (larger sized check valve inserted in an air hoist).

"A machine may be so constructed, and its operation may be such, as to call for a frequent replacement of one or more of its constituent parts. Such parts, when adjusted in the machine, become as much a part of it as if included in the original construction and a defect in one of them is a defect in the machine. The duty of seeing that such parts are not defective is one incumbent on the master. It is not a matter of ordinary repair from day to day, which may be intrusted to a servant. The defendant could not, therefore, avoid responsibility by delegating this duty to persons whom it believed to be competent, and who in fact were competent to perform it. If the injury to the plaintiff was due to a defect in the punch, which might have been discovered by the exercise of reasonable care on their part, but was not, the defendant is liable for their negligence." *Toy* v. *United States Cartridge Co.* (1893) 159 Mass. 313, 34 N. E. 461.

See also the quotation from the opinion in *Moynihan* v. *Hills Co.* (1888) 146 Mass. 586, 16 N. E. 574, as given in § 619, *post*.

[2] The control of the repairs is deemed to be rather with those who are to provide the apparatus than with those who are to work with it, where the means of replacing defective parts are not supplied to the person in charge of it, until he asks for what is needed. *Daley* v. *Boston & A. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690.

function is one pertaining to the absolute obligations of the master is not limited by the principle explained in §§ 605, 621, *post*, it is clear that the master must answer for the negligence of all employees whose duty it is to see that the instrumentalities or their parts are renewed, whenever this is the course which a prudent man would adopt under the circumstances.[3]

571. Duty to furnish proper medical treatment to sick or injured servants.— A shipowner cannot escape liability for the negligence of the captain of a ship in failing to follow the advice of a physician as to the proper treatment of a member of the crew who is injured in the course of his employment.[1]

572. Duty to hire suitable servants.— In the nature of the case this duty must be regarded as one which, for the purpose of practical litigation, has relation solely to original supply, or replacement. The maintenance of a human being in a condition of efficiency is not a function which can be viewed as the subject-matter of an obligation, in the same sense as that which is contemplated by the law where unintelligent agencies of work are concerned. To make out a certain parallelism between the two cases would doubtless be possible; but the analogies evolved by such an investigation would be of merely scholastic interest. For example, it may fairly enough be maintained that a master who, instead of resorting to the customary remedies of dismissal, suspension, or change of work, where a servant has become so "incapable, through bodily or mental infirmities, as to endanger" the safety of his colaborers, retains him in the same employment, is subject to the duty of seeing that everything is done that can reasonably be done under the circumstances to bring him back to health and vigor by appropriate treatment. But the writer is not aware that the enforcement of such a duty has ever been discussed. The obligation of the master to provide medical treatment for a sick or injured servant has never been viewed as one creating legal rights in favor of coservants, except under the special circumstances adverted to in the preceding section. The only absolute obligation, therefore, to which it is necessary to advert in the present connection is that of "exercising proper diligence in the employment of reasonably safe and competent men to perform their respective duties."[2]

The American courts are in full agreement as to the doctrine that

[1] See, for example, *Houston & T. C. R. Co.* v. *Dunham* (1878) 49 Tex. 181 (railroad company held liable for an injury to a brakeman, resulting from failure of the road master and section men to replace rotten ties with sound ones).

[2] *Scarff* v. *Metcalf* (1887) 107 N. Y. 211, 13 N. E. 796.

[3] Phrase used in *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843.

the negligence of one who represents the employer in hiring and discharging men is chargeable to the employer.[2] The acceptance of this doctrine involves the consequence that it is quite immaterial whether the negligent person was a partner or an employee of the defendant, since the servant must succeed on either theory.[3] Negligence which consists in transferring persons already in the service from duties which they are competent to perform to duties for which they are unfitted is deemed to be a breach of the personal obligation now under

[2] *Olson* v. *Andrews* (1897) 168 Mass. 261, 47 N. E. 90; *Bosworth* v. *Rogers* (1897) 27 C. C. A. 385, 53 U. S. App. 620, 82 Fed. 975; *Baltimore & O. R. Co.* v. *Heathorne* (1896) 19 C. C. A. 623, 43 U. S. App. 113, 73 Fed. 631; *Walker* v. *Bailey* (1853) 22 Ala. 294; *Tunnel* v. *South & North Ala. R. Co.* (1878) 61 Ala. 554, 32 Am. Rep. 8; *Matthews* v. *Ball* (1897; Cal.) 47 Pac. 773; *Murphy* v. *Hughes* (1898) 1 Penn. (Del.) 250, 40 Atl. 187; *Justice* v. *Pennsylvania Co.* (1892) 130 Ind. 521, 30 N. E. 303; *Quincy Min. Co.* v. *Kitts* (1879) 42 Mich. 34, 3 N. W. 240; *Brown* v. *Gilchrist* (1890) 80 Mich. 56, 45 N. W. 82; *Brown* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484; *Harper* v. *Indianapolis & St. L. R. Co.* (1871) 47 Mo. 567, 4 Am. Rep. 353 (company permitted engineers to allow their firemen to handle locomotives, and damage was caused by the incompetency of one of them); *Mann* v. *Delaware & H. Canal Co.* (1883) 91 N. Y. 495 (conductor put a man on the list of extra brakemen, without any inquiry as to his qualifications, or instructing him as to the rules of the company); *O'Laughlin* v. *New York C. & H. R. R. Co.* (1887) 27 N. Y. Week. Dig. 109, 9 N. Y. S. R. 381, Affirmed in (1889) 113 N. Y. 623, 20 N. E. 876; *Sullivan* v. *Metropolitan Street R. Co.* (1900) 53 App. Div. 89, 65 N. Y. Supp. 842 (special point raised was that the delinquent went beyond the scope of his proper duties); *Frazier* v. *Pennsylvania R. Co.* (1880) 38 Pa. 104, 80 Am. Dec. 467; *Texas Mexican R. Co.* v. *Whitmore* (1883) 58 Tex. 276 (foreman of bridge gang knew that engineer of pile driver was incompetent); *Galveston, H. & S. A. R. Co.* v. *Eckles* (1900) 21 Tex. Civ. App. 179, 60 S. W. 830 (yard master had power to discharge).

The New York cases cited above are in accord with the decision of the supreme court in *Wright* v. *New York C. R. Co.* (1858) 28 Barb. 80, which was not explicitly concurred in as to this point by the court of appeals, where it was observed ([1862] 25 N. Y. 562) that the responsibility of the master was a debatable question. But it was declined on the evidence that there was, at all events, no negligence as regards the selection of the delinquent servant.

These decisions may be regarded as having discredited *Kidwell* v. *Houston & G. N. R. Co.* (1877) 3 Woods, 313, Fed. Cas. No. 7,757, where, in discussing a contention of plaintiff's counsel that the averment in the petition, charging that the "master mechanic was advised of the habitual negligence and general bad habits of said car inspector, and that he failed and refused to discharge him," takes this case out of the general rule, as being equivalent to a charge that the company had employed an unskilful or incompetent car inspector, the court said: "The charge thus vaguely made, seems to me only to amount to a charge of negligence on the part of the master mechanic in not reporting the character of the car inspector to the officers of the company, and does not, therefore, constitute an exception to the general rule that a railroad company is not liable to one of its employees for the mere negligence of another employee. It does not appear that the master machinist was anything more than a fellow servant of the car inspector and the plaintiff without the power of appointment or removal. Under these circumstances the defendant company could not be made liable."

A complaint framed on the theory of negligence in retaining an incompetent servant need not contain a specific averment that he had authority, by virtue of his employment, to do the act which produced the injury. *Gulf, C. & S. F. R. Co.* v. *Pierce* (1891) 7 Tex. Civ. App. 597, 25 S. W. 1052.

[3] *McMahon* v. *Davidson* (1867) 12 Minn. 357, Gil. 232.

review. In such a case the inference of liability follows immediately upon proof that the official who made the transfer was acting within the scope of his powers.[4]

In the doctrine now under review, which was adopted at a very early stage in the development of the law of employers' liability, we find the first recognition of the fact that there is a logical inconsistency involved in declaring a master to be subject to an absolute duty, and yet not responsible for the negligence of the person to whom that duty has been delegated.[5] That the principle to which this fact points was applied to the duty of hiring suitable servants several years before the courts advanced to the conception of a generalization on the same lines, with respect to the entire class of absolute duties, seems to have been a result of the prominence which, from the very outset, was given to the conception that the doctrine of common employment is subject to the qualification that the servant, "when he engages to run the risks of his service, including those arising from the negligence of fellow servants, has a right to understand that the master has taken reasonable care to protect him from such risks by associating him only with persons of ordinary skill and care."[6]

[4] *Blackman* v. *Thomson-Houston Electric Co.* (1897) 102 Ga. 64, 29 S. E. 120; *Harper* v. *Indianapolis & St. L. R. Co.* (1871) 47 Mo. 567, 14 Am. Rep. 353 (engineer viewed as a vice principal in permitting a fireman to run his engine); *Lyttle* v. *Chicago & W. M. R. Co.* (1890) 84 Mich. 289, 47 N. W. 571 (promise of yard master that a fireman should not run an engine, held to be binding on a railway company).

[5] See the opinion of Shaw, Ch. J., in *Farwell* v. *Boston & W. R. Corp.* (1842) 4 Met. 49, 38 Am. Dec. 339.

[6] *Hutchinson* v. *York, N. & B. R. Co.* (1850) 5 Exch. 343, 119 L. J. Exch. N. S. 296, 14 Jur. 837, per Alderson, B.

See *note* to 48 L. R. A. p. 369. The connection between the doctrine considered in its positive form and as a mere qualification of the doctrine of common employment is clearly indicated in *Walker* v. *Bolling* (1853) 22 Ala. 294. There Phelan, J. (p. 3[illegible], after stating the two doctrines established by the earlier cases to be that the master is bound to use ordinary care in providing competent servants, and that the servant impliedly stipulates to run the ordinary risks of the service, among which are to be considered acts of negligence on the part of a fellow servant, proceeded thus: "But the master does not discharge this duty—or, in other words, does not use due care when he exposes the servant to danger by associating with him, in a service of peril, those who are wanting in ordinary skill and prudence; and if the master chooses to do this, or his agent does it, the former will be held accountable, and it is no excuse for him to say, 'I delegated a duty arising from the relation I occupy, to a third person, who was in all respects competent to discharge it, and his neglect was one of the risks which the servant took.' The answer would be that the agent must be regarded as the master, and not as the servant, so far as this duty was concerned. In the present case, the evidence shows gross negligence and a criminal inattention to his duties, on the part of the engineer. It was the duty of the captain to protect the subordinate agents, employed in the common business, from the probable consequences of such neglect by the prompt discharge of the person who, by his carelessness and recklessness, was endangering the lives of all on board; and this duty, as we have already said, devolved upon him, not as the servant, but as the master—as the representative of the owner. This duty he did not discharge; and for the injurious consequences of this neglect the owner is responsible. . . . But

In one English case it was held that the master was not chargeable with the knowledge of his foreman that a subordinate was incompetent. The negligence of the foreman in retaining the subordinate, under such circumstances, is simply that of a fellow servant.[7] This ruling is an exemplification of the general principle established by *Wilson* v. *Merry*. See § 529, *ante*.

The non-delegable quality of the duty to hire competent servants is usually considered in connection with injuries received by a fellow servant of the one alleged to be incompetent. But this duty is also treated as absolute where the master has set a young and inexperienced servant to a task beyond his strength and skill. In such a case

an important inquiry meets us here, not embraced by these principles, and which we do not find to be covered by any of the adjudicated cases. It is this: When there is a general manager or superintendent of the service, with inferior agents or servants, or classes of agents or servants, under him, and such general manager or superintendent is invested by the common employer with the duty and authority of employing and dismissing those who are under him, are acts of negligence on the part of such general manager to be considered as falling within the ordinary risks of the service, for which the common employer is not responsible? And again: Even if other acts of negligence will be so regarded, are we so, likewise, to regard his acts of negligence in not exercising reasonable care and diligence, in not employing competent inferior officers and servants, or in not dismissing such as prove incompetent? In regard to all other acts of negligence on the part of the general manager or superintendent, I decline to express an opinion until the case arises. But with respect to the last-mentioned kind of negligence,—namely, that of failing to exercise reasonable care in procuring competent inferior officers and agents, where that falls within the scope of his duty, or in dismissing such as prove to be incompetent, I must hold that they cannot be included among the risks for which the master or common employer shall not be held responsible. To hold otherwise would be, as I maintain, to destroy the valuable general principle recognized and established in the very cases which have been quoted, in which it is held to be the duty of every master or principal to provide men of ordinary care and skill for each particular station, for the safety and protection, not only of strangers, but of those engaged in his service. This duty of the master is expressly retained in the very cases where he is held not to be subject further than this for injuries which may result to one servant from the acts of negligence of his fellow servant. Whether the master will do this or not is no part of the ordinary risks of the service; he is strictly held to the performance of it at all times. . . . It follows, also, that the law will not allow any shift by which that may be done indirectly which cannot be done directly; in other words, the law will not allow a master, whose duty it is to employ none but men of ordinary care and skill, in all branches of the service, to devolve the duty of making such employment on his general manager, who may be irresponsible, and by such means become irresponsible himself, for the neglect of this important duty. As to that much, the general manager must, upon principle, be held to be the agent of the master, not only to the work at large, but to his inferior officers and servants; and his neglects in this regard will be the neglects of the common employer, even as to them. If he employs or retains incompetent subordinates, the master will be responsible for such an act of negligence on the part of his general manager, even to a person engaged in the same service with the general manager."

See also the comments on this case in *Tyson* v. *South & North Ala. R. Co.* (1878) 61 Ala. 554, 32 Am. Rep. 8.

[7] *Smith* v. *Howard* (1870) 22 L. T. N. S. 130.

he cannot escape liability on the ground that the person directing the servant where to work was a fellow servant.[8]

573. Duty to employ servants sufficient in number for the work in hand.— Another absolute duty is that of seeing that the number of persons employed is sufficient to prevent each of them from being exposed to that class of risks which results from an inadequacy of the force available for the work in hand.[1]

Where no employee at all has been assigned for the performance of a duty connected with the operation of machinery the master cannot take advantage of the rule that the neglect of an employee who is furnished with the means and conveniences for keeping machinery in proper condition for safe operation, and charged with that duty, is not chargeable to the master in case of an injury to another employee.[2]

[8] *Noblesville Foundry & Mach. Co.* v. *Yeaman* (1891) 3 Ind. App. 521, 30 N. E. 10.

[1] In *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545, the leading case on this doctrine, it was contended by counsel for defendant (1) that the company was not liable, because the agent had, in fact, employed a third brakeman to go with this train, who, by reason of oversleeping, failed to get aboard in time, and hence, that the injury must be attributed to his negligence; and (2) that such negligence, if attributable to the general agent in not supplying his place with another man, must be regarded as committed while acting in the capacity of a mere coservant. But the court said: "Neither of these positions is tenable. The hiring of a third brakeman was only one of the steps proper to be taken to discharge the principal's duty, which was to supply with sufficient help and machinery, and properly despatch, the train in question, and this duty remained to be performed, although the hired brakeman failed to wake up in time, or was sick, or failed to appear for any other reason. It was negligent for the company to start the train without sufficient help. The acts of Rockefeller [the head conductor] cannot be divided up, and a part of them regarded as those of the company, and the other part as those of a coservant merely, for the obvious reason that all his acts constituted but a single duty. His acts are indivisible, and the attempt to create a distinction in their character would involve a refinement in favor of corporate immunity, not warranted by reason or authority. As well might the company be relieved if the train was started without an engineer, or without brakes, or with a defective engine. The same duty rested upon the company, though every man employed had died or run away during the night, and, if negligent in discharging it, either by acts of commission or omission, whether in employing improper help, or not enough of it, or in not requiring their presence upon the train, it is, upon every just principle, responsible for the consequences. Nor is the company relieved, although negligence may be imputed to the defaulting brakeman. The only effect of that circumstance would be to make the negligence contributory with the brakeman, but would not affect the liability of the company."

This case was followed in *Booth* v. *Boston & A. R. Co.* (1878) 73 N. Y. 38, 29 Am. Rep. 97 (involving similar facts); *Heiner* v. *Heuvelman* (1879) 13 Jones & S. 88.

See also, to the same effect, *Boden* v. *Denwolf* (1893) 56 Fed. 846; *Chveney* v. *Ocean S. S. Co.* (1893) 92 Ga. 726, 19 S. E. 33.

On the authority of this last case it has been held that an employer does not discharge his full duty in keeping a place reasonably safe by giving warnings of threatened or impending danger, when the employee charged with the duty of giving the warnings is so engrossed and busy with his other duties that he cannot properly and efficiently give the necessary warnings. *The Pioneer* (1897) 78 Fed. 600.

[2] *Prescott* v. *J. Ottman Lithographing Co.* (1897) 20 App. Div. 397, 46 N. Y.

574. Duty to frame rules and regulations for the conduct of the business.—All the American courts hold that the duty of framing such general rules and regulations as a prudent man would, under the circumstances, consider necessary for the elimination of dangers of certain classes, belongs to the category of those which the master cannot, except at his peril, assign to a servant.[1] If, therefore, he chooses to leave to an employee the regulation of matters which he ought to have provided for by specific rules, such employee will be regarded as his representative.[2]

Supp. 812 (no oiler appointed for machinery), Distinguishing *Webber* v. *Riper* (1888) 109 N. Y. 496, 17 N. E. 216, and similar cases. See § 621, *post*.

[1] "It is the duty of the master to supervise, direct, and control the operation and management of his business, so that no injury shall ensue to his employees through his own carelessness or negligence in carrying it on, or else to furnish some person who will do so, for whom he must stand sponsor." *Hunn* v. *Michigan C. R. Co.* (1889) 78 Mich. 513, 7 L. R. A. 500, 44 N. W. 502.

To the same effect, see *Northern P. R. Co.* v. *Peterson* (1896) 162 U. S. 346, 40 L. ed. 994, 16 Sup. Ct. Rep. 843; *Dana* v. *New York C. & H. R. R. Co.* (1883) 92 N. Y. 639; *Sheehan* v. *New York C. & H. R. R. Co.* (1883) 91 N. Y. 332; *Slater* v. *Jewett* (1881) 85 N. Y. 61, 39 Am. Rep. 627; *Ford* v. *Lake Shore & M. S. R. Co.* (1891) 124 N. Y. 493, 12 L. R. A. 454, 26 N. E. 1101; *Bosworth* v. *Rogers* (1897) 27 C. C. A. 385, 53 U. S. App. 620, 82 Fed. 975; and the cases cited below.

The earliest suggestion of the doctrine seems to be that reported in *Little Miami R. Co.* v. *Stevens* (1851) 20 Ohio, 415, where the Ohio doctrine as to superior servants was laid down. Chief Justice Hitchcock thought that, on the facts, the case might be decided in the same way without running counter to *Farwell* v. *Boston & W. R. Corp.* 4 Met. 49, 38 Am. Dec. 339, and others of a like character. He considered that the negligence was really that of the company itself, or its immediate agent, the superintendent, in omitting to see that the engineers and conductors of both trains had the same time cards.

[2] *Hannibal & St. J. R. Co.* v. *Fox* (1884) 31 Kan. 586, 3 Pac. 320 (car repairer held entitled to maintain an action, where the company had made no rules, and furnished no flags as signals, and left everything which concerned the work to the management of the foreman); *Pool* v. *Southern P. Co.* (1899) 20 Utah, 210, 58 Pac. 326 (similar facts); *Louisville, E. & St. L. Consol. R. Co.* v. *Hanning* (1892) 131 Ind. 528, 31 N. E. 187 (foreman of car repairers did not set a signal flag to protect a workman—no rules on the subject); *Luchke* v. *Chicago, M. & St. P. R. Co.* (1883) 59 Wis. 127, 48 Am. Rep. 483, 17 N. W. 870 (employee not, as matter of law, free from liability, where the injury was due to a lack of proper precautions, though the immediate cause of the accident was his obedience to the order of his foreman, a fellow servant, in directing him to work, without seeing that he was protected in some way); *Redington* v. *New York, O. & W. R. Co.* (1895) 84 Hun, 231, 32 N. Y. Supp. 535 (no rules provided for the loading of cars in such a manner as to prevent unnecessary danger to servants coupling them)

In *Tuttle* v. *New York & T. S. S. Co.* (1906) 10 App. Div. 463, 42 N. Y. Supp. 29, the plaintiff, owing to there being no light between the decks of a ship, fell into an uncovered hatchway, and it was contended, in behalf of the defendant, that, as it had provided sufficient lamps for the use of employees, the want of light was attributable, not to its negligence, but to theirs. But the court said: "There is evidence tending to prove that, when a vessel arrives at the dock, men appearing about there are employed to take off the cargo and to reload it with freight, and that they may have had no experience in the work they are called upon to perform in that service. They, misadvised, may not know of the facilities which can be afforded them when circumstances render their use and application desirable for safety. Conditions like that which caused the failure of the plaintiff to avoid the danger which he encountered, it may be assumed, are liable to arise and be pro-

Apparently the same principle is accepted in England, though the specific authority on this point is somewhat less explicit than that with regard to the non-delegable quality of the duty of supplying safe instrumentalities. See § 567, *a, supra*.[3]

It has also been intimated that, if the servants whose acts caused the injury were "acting without any known rule or regulation, and simply following a dangerous practice sanctioned by time and custom, the result might be imputed to the neglect of the defendant in omitting to change the method of doing the work, and adopting a safer one."[4]

duced in like manner. It would, therefore, seem to be reasonably incumbent upon the defendant to have some system by way of rules or regulations. The availability of protective means and appliances to the workmen is not necessarily of any benefit to them unless they are advised of it. It may be that, if the defendant had provided rules which required those in charge of the work to advise the workmen of the precautionary means of protection which could be had, the plaintiff's misfortune might not have occurred. . . . It does not appear that the defendant had, by any rules or regulations whatever, required or directed the agents to advise workmen temporarily employed to work upon the steamships, in loading and unloading, of any precautionary means which it might, for their safety, be or become desirable to use. For this reason we think that the question whether the defendant was chargeable with negligence was for the jury."

In *Bushby* v. *New York, L. E. & W. R. Co.* (1887) 107 N. Y. 374, 14 N. E. 407, where the plaintiff was injured through the defective loading of a railroad car, the defendant relied upon its "system," which was to let the shipper load and stake, while, as to inspection, its evidence only tended to show that if, in the general performance of the duties of their employment, the station agent found anything out of the way, he should correct it, or if the conductor or brakeman saw a defect, he should report it to the station master. No special duty was imposed on either in regard to inspection, nor direction given as to its manner. The court said: "The . . . proposition of the defendant is that 'it is not necessary in this case to decide whether the stakes in question were or were not appliances or machinery within the meaning of the rule invoked by the supreme court at the general term.' . . . 'for the reason that the system under which they were furnished, inspected, and employed was perfectly well known to the plaintiff, and he took the risks of the consequences of that system.' There was no system as to this matter. If the evidence shows that such practices had obtained before, it merely shows that the defendant chose to delegate a duty to the shipper which the corporation should have performed. It is equally responsible for his negligence; his negligence is its negligence."

[3] In *Smith* v. *Baker* [1891] A. C. 325, 353, 60 L. J. Q. B. N. S. 683, 65 L. T. N. S. 467, 55 J. P. 660, Lord Watson laid it down that the master is "no less responsible to his workmen for personal injuries occasioned by a defective system of using machinery than for injuries caused by a defect in the machinery itself." This remark was made in a case tried after the passage of the employers' liability act. But the authorities cited were the statements made by Lord Chelmsford in *Bartonshill Coal Co.* v. *McGuire* (1858) 3 Macq. H. L. Cas. 310, 4 Jur. N. S. 773, and by Lord Wensleydale in *Wilkins* v. *Wathieson* (1861) 4 Macq. H. L. Cas. 226, both decided under common-law principles. The observations of Lord Cranworth in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, in which the master's liability for an unsafe system is recognized, are also pertinent in this connection.

[4] *Doing* v. *New York, O. & W. R. Co.* (1897) 151 N. Y. 579, 45 N. E. 1028.

This is the rationale of the decision in *Sword* v. *Cameron* (1839) 1 Sc. Sess. Cas. 2d series, 493, where the master was held to be liable to a quarryman who was injured by the firing of a blast before he had time to reach a place of shelter, the evidence being that the shot

A servant who, acting upon the authority conferred on him, has made a rule which is reasonably necessary for the protection of his subordinates, is, of course, a representative of the master in regard to the suspension or abrogation of that rule.[5]

575. Duty to bring rules and regulations to the knowledge of employees.—The duty of framing suitable rules being certainly non assignable, it would seem to be a necessary inference that the subsidiary duty of publication, without the performance of which the framing would be an idle formality, must also be nonassignable. The authorities upon the subject, however, are very meagre, and, such as they are, conflicting.

On the one hand it has been held that a section foreman, on whom is devolved the duty of informing his hands of the contents of a rule that extra trains may be expected at any time without notice, is *pro hac vice* the representative of the company.[1]

On the other hand the supreme court of West Virginia has quoted[2] with approval the following passage from a recent textbook: "It is not required that the master should see to it personally that notice comes to the knowledge of all those to be governed thereby. If there is due care and diligence in choosing competent servants to receive and transmit the necessary orders, the negligence by them in the performance of it is a risk of the employment that the coemployee takes when he enters the service."[3]

The learned author considers that, "after the person whose duty, on the part of the master, it is to promulgate rules, or to communicate them to those engaged in the service, has performed his duty, by communicating them to a servant, who in turn is to observe them, or communicate them to another, then the omission or neglect of such other is the omission or neglect of a fellow servant, to the same extent

was fired in accordance with the usual and inveterate practice of the quarry. This case was cited in *Bartonshill Coal Co.* v. *Reid* (1858) 3 Macq. H. L. Cas. 266, 4 Jur. N. S. 767, in support of the proposition that the doctrine of common employment was unknown to the law of Scotland, but Lord Cranworth pointed out that the decision did not turn upon the negligence of the fellow workmen who fired the shot, and expressly stated that it was justifiable, on the ground that "the injury was evidently the result of a defective system not adequately protecting the workmen at the time of the explosions." A similar construction was put upon the case by Lord Chelmsford in *Bartonshill Coal Co.* v. *McGuire* (1858) 3 Macq. H. L. Cas. 310, 4 Jur. N. S. 773.

Richmond Granite Co. v. *Bailey* (1896) 92 Va. 554, 24 S. E. 232.

[1] *Olson* v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866.

Compare the argument of the court in *Tully* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29, as quoted under the preceding section, note 2.

[2] See *Oliver* v. *Ohio River R. Co.* (1896) 42 W. Va. 703, 26 S. E. 444.

[3] See Bailey, Master's Liability for Injuries to Servant, pp. 77, 85.

as his disobedience of an order or rule, after receipt or knowledge, . . . would be such an act." Yet, at the same time, he declares that, "as to those orders or rules relating to the appliances and ways, it being the absolute duty of the master to see that such appliances and ways are reasonably safe, the master should be held to a strict liability to see that they were actually received and known." With all deference it is submitted that the distinction here relied on is logically unsound, and wholly inconsistent with the theory which makes the duty of protecting the servant by suitable rules an independent obligation, co-ordinate with the obligations of seeing that the material substances which compose the instrumentalities themselves come up to the required standard. If the master is bound at all to prescribe a certain system for the guidance of his servants, it surely can make no difference whether the object aimed at is that the instrumentalities shall be of a certain quality or that they shall be used in a certain way. In either case the obligation is referable to the general principle that he must use proper care to secure the safety of his servants, and it seems impossible to argue, with any show of reason, that one obligation arising out of that principle can be less absolute than the other. The true doctrine, we take it, is that the duty of bringing the rules to the knowledge of the servants is equally nonassignable, whatever the subject-matter may be, and that the question whether it has been performed is to be determined, not by considering the rank or number of subordinates through whom they are transmitted to the persons concerned, but by considering whether the steps taken are such that the servants, if they exercise ordinary care, cannot fail to ascertain that the rules have been framed, and that obedience to them is expected.

It may be remarked, moreover, that if this duty be removed from the class of those which are non-delegable, there will be considerable difficulty, not to say impossibility, in avoiding the virtual nullification of another doctrine which regards the subject from the standpoint of the servant's obligation to observe the rules made for his benefit, *viz.*, that his failure to comply with a rule not brought to his notice is not contributory negligence. See §§ 365, 366, *ante*.

576. Duty to carry out regulations, how far absolute; generally.— In some cases it is laid down in quite general terms that the master is absolutely bound "to exercise such supervision as will make it reasonably certain that the business is being carried on pursuant to the rules," as framed.[1] But a more exact statement of principles would

[1] *McElligott v. Randolph* (1891) 61 Conn. 157, 22 Atl. 1094, Quoted in *Ger-*

seem to be this: The quality of the duty in question depends upon the essential objects of the regulations which the alleged representative of the master has failed to carry out. All regulations, it is manifest, may be divided into two categories. In one we have a statement of the method by which the employer proposes to discharge some non-delegable obligation. The other relates to matters of detail with which servants may legitimately be left to deal, except when the unusual complexity of the business organism creates a duty on the master's part to inform them in what manner they should perform their respective functions, to the end that they may avoid injuring themselves and their coworkers. The propriety of applying a different standard of responsibility to each of these categories is sufficiently obvious. It cannot be contended, with any show of logic, that the obligation of the master in respect to the supervision of mere details is rendered more extensive by the mere fact that, under the circumstances, he was bound to systematize the execution of those details by issuing general orders for the guidance of his servants. Such general orders do not alter the character of the acts to which they relate.[2]

The situation which supervenes upon the issuance of regulations

rish v. *New Haven Ice Co.* (1893) 63 Conn. 9, 16, 27 Atl. 235.

It has been laid down, *arguendo*, that a railroad company is not only bound to adopt proper rules for the running of its trains, but is bound to enforce them. *Nolan* v. *New York, N. H. & H. R. Co.* (1898) 70 Conn. 159, 43 L. R. A. 305, 39 Atl. 115. The question, however, was not actually involved here.

[2] This consideration seems to have been ignored in *Hasc* v. *Northern P. R. Co.* (1893) 57 Fed. 283, where the court took the broad ground that any servant to whom is delegated the duty of seeing that a rule is observed is a vice principal, and held that the duty assigned to a railroad employee by the rules of the company, not to leave a switch which has been opened until it is closed or he is relieved by another employee, is one of the non-delegable duties owed by the employer to its employees.

Another decision which appears to be of dubious correctness for the same reason is one to the effect that a railway company is not, as matter of law, free from liability, where a car repairer is injured by a car which a conductor negligently shunted onto the repair track without any brakeman upon it. *Murphy* v. *New York C. & H. R. R. Co.* (1890) 118 N. Y. 527, 23 N. E. 812. (The correctness of this case is doubted in *Potter* v. *New York C. & H. R. R. Co.* [1892] 136 N. Y. 77, 32 N. E. 703).

Other questionable rulings are those cited at the end of the next section.

Some of the language used by the court in *Gerrish* v. *New Haven Ice Co.* (1893) 63 Conn. 9, 27 Atl. 235, might also seem to lay the court open to the same imputation as the cases just noticed. The point decided was that an ice company was guilty of negligence rendering it liable to an employee injured by the starting up of the machinery in a slide, while he was at work therein, under orders from the superintendent and general manager, where the evidence showed that the latter went away from his post at a bell cord intended to notify the engineer when to start, and failed to conform to a rule of the company requiring the engineer to be notified when any person was in the slide, so that the engine would not be started at a signal from the bell without such orders, and that the injury was caused by the falling of a piece of material which, being thrown by such employee from the slide, struck the bell cord, rang the bell, and caused the engineer to start the machinery. But the case was, it would seem, really decided

expressive of the methods by which the master thinks fit to perform a personal duty is precisely the converse of this, and may reasonably be regarded as entailing entirely different consequences. There would be a palpable inconsistency in asserting that the obligation to perform the acts prescribed by such regulations is not as absolute as the obligation to afford the servants that particular kind of protection which they will receive if the duty to which the regulations have reference is adequately discharged. Hence the accepted doctrine is that, "whether the act is that of the master, or the duty to be performed is particularly his duty, the liability resting upon him for the proper performance of the act or duty is not shifted by the adoption of rules or regulations providing for the performance of the act or duty by the agent of the master."[3] Or, as the doctrine has also been put in another case, a master cannot relieve himself from liability for an injury to an employee, resulting from a failure on his part, through his agents, actually to use such care for the safety of employees as the law makes it necessary for him to use, by any regulations, however stringent and however completely enforced, which do not actually result in the use of such care by his agents.[4] A master, therefore, is liable for the negligence of an employee to whom is deputed the performance of the one special act without which a rule prescribed with a view to making the place of work safe would be wholly ineffacious.[5] The great extension which the master's responsibility for dangers of the transitory class receives as a result of conceding a right of action on such a ground is made especially manifest by the decisions adverted to in the following sections.

Attention may here be drawn to the fact that in any case where the delinquency complained of was that of an employee who, according to the view accepted in the jurisdiction where the accident occurred was a vice principal by virtue of his superior rank (see chapter XXX.

on the ground that the negligent act was done by the superintendent in his official capacity. See § 542, *ante*.

[3] *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466.

[4] *Missouri P. R. Co.* v. *McElyea* (1888) 71 Tex. 386, 1 L. R. A. 411, 9 S. W. 313.

[5] See *Evansville & T. H. R. Co.* v. *Holcomb* (1894) 9 Ind. App. 198, 36 N. E. 39, where a railroad company was held liable for the injuries received by a car repairer in consequence of the negligence of a brakeman, who was directed to notify him, in accordance with a rule of the company, that an engine was about to enter upon the track where he was working.

Compare *Chicago & N. W. R. Co.* v. *Taylor* (1873) 69 Ill. 461, 18 Am. Rep. 626, where the servant recovered, where the injury was to a station agent and switchman at a way station, and was caused by the negligence of other servants of the company, whose duty it was, under the rules, to see that cars in passing trains should not go out upon the road without proper lights and proper brakes, the common master being held liable.

ante), the master's liability is referable indifferently, either to the theory that the enforcement of rules is a non-delegable obligation, or to the theory that negligence in carrying out rules is reckoned among the official acts of a vice principal."[6]

It should also be noted that by thus segregating regulations into two categories, determined by their subject matter, a fairly satisfactory ground is obtained on which to meet the point made by some courts,—that the "superior servant doctrine" is legitimately deducible from the doctrine that an employee who promulgates or carries out regulations is a vice principal.[7] The analogy thus emphasized exi

[6] Thus, if one of the rules of the railroad company furnished to a section foreman for his guidance, provides that "extra trains may pass over the road at any time, without previous notice, and the foreman [of a gang of trackmen] must be always prepared for them;" and another rule provides that "he must run the hand cars with great caution, and he must not permit them to be used unless he accompany them;" and another rule requires him "to compare his time each day with the clock at the nearest telegraph office, or with the conductor on the train,"—these rules, as well as the law, require him to use the opportunities thus duly afforded, or any other opportunities, to ascertain what trains are expected to run over his section of the track by previous arrangements, and when, so that he may be prepared for them as well as he can be, and thus diminish the risk of a collision between extra trains and the hand car. If he neglects this duty, and, without any fault of one of the laborers under him, his hand car comes into collision with an extra train, which, had he performed his duty, would not have occurred, and the laborer on the hand car is killed or injured, the railroad company will be liable for the damages so sustained. *Criswell* v. *Pittsburgh, C. & St. L. R. Co.* (1888) 30 W. Va. 798, 6 S. E. 31.

So, also, in *Moore* v. *Wabash, St. L. & P. R. Co.* (1885) 85 Mo. 588, where it was held that the servant of a railway company may rely on the vice principal's promise to protect him while at work on a side track, notwithstanding the existence of a rule of the company requiring servants to protect themselves by putting out flags while engaged in such work. The court said: "It being conceded, as it must be, that the company owed a duty to the men under the car to provide for their safety, can it be that the foreman had no authority in an emergency to use any other means than those adopted by the company? That the red flags, and nothing but the red flags, was the means he was to employ? If, for any reason, that would clearly, in a given case, have been insufficient as a warning, can it be possible that the foreman would be restricted to the use of the red flags? Or if, in such case, he had had the red flag set up, and one of the men was injured, in consequence of its insufficiency to give the warning, that the company would not be liable to the injured party? Has it discharged its duty by simply adopting a means of protection, ordinarily sufficient, when the person in charge of the work knows that, in the particular case, it is not a sufficient warning? If the foreman has authority in such an emergency, that authority results from his general authority to perform the duty of the company in protecting the employees under his control in the performance of a dangerous work for the company, and he was authorized to make the promise to the plaintiff for the company, and undertook to set out the red flags in his possession, or to adopt any other means necessary to secure the safety of the men, thereby absolving them from the duty of setting out the flag, or setting the watch."

[7] See § 522, *d, ante*. In *Cord* v. *Ebbs* (1893) Mo.) 24 S. W. 746, it was held that a section foreman in charge of a gang of laborers at work along a railway is not a fellow servant with a locomotive fireman, while the latter is delivering a message from the road master, by throwing it, while tied to a lump of coal, from a passing train, as, in so delivering the message, he represents the master. Replying to the argument of defendant's counsel, that the fireman, as

dently loses at least a part of its force, when we advert to the fact that the quality of the master's obligations with respect to general directions for the conduct of the work varies according to circumstances.

577. Duty to carry out regulations with respect to the movements of trains.— The principles explained in the preceding section have been extensively discussed in that important class of cases which deal with the liability of railway companies for the negligence of employees concerned with the movements of trains. The cases referred to below show that, on the whole, the courts are agreed as to the propriety of making a distinction between the officials who are ordinarily known as train despatchers and the employees who communicate the directions of those train despatchers to the servants operating the trains. But it is often quite difficult to say whether the act which caused the injury should be treated as one incident to functions of control, or to the discharge of ministerial duties merely.

a. Doctrine that train despatchers are vice principals; generally.— It is a settled law in most jurisdictions in the United States that any employee who is invested with a discretionary power to regulate the running of the trains over an entire railway system, or one of its subdivisions, represents the railway company in respect to anything which he does in the exercise of that power, whether the despatch of trains is his sole function,[1] or that function is combined with the

to the act in question, was temporarily in the road department, and thus a fellow servant of the section foreman, the court said: "But this line of argument is intercepted by another proposition. It is the master's personal duty to give direction to the work in hand, and in the matter of communicating necessary directions for that work, by authority of the master, all employees represent the master. For a want of ordinary care in the transmission of such directions or orders the master is liable, if injury results. It has been expressly so held in this state, where the negligent act was performed by a train despatcher in transmitting an order for the movement of trains. *Smith* v. *Wabash, St. L. & P. R. Co.* (1887) 92 Mo. 359, 4 S. W. 129. The principle underlying that judgment is applicable to the facts now before us. There is positive proof here that for many years the practice had prevailed to deliver orders to the section foremen, while engaged at work along the road, by the intervention of employees on the trains to pass the points where the foremen were working. This practice was so general and long continued that it might fairly be found that the master was chargeable with knowledge of it. The proof, however, goes further than that, and positively shows that the practice was part of the method adopted by the road master himself for communicating orders to his subordinate foremen. Such being the case, it seems to us that in delivering such messages through the agency of the trainmen, the road master represented the defendants, and that the latter should be held answerable for negligence in the transmission of such orders, whereby the plaintiff suffered the injury which forms the basis of this action."

[1] *Felton* v. *Harbeson* (1900) 44 C. C. A. 188, 104 Fed. 737; *Oregon Short Line & U. N. R. Co.* v. *Frost* (1896) 21 C. C. A. 186, 44 U. S. App. 606, 74 Fed. 965; *Crew* v. *St. Louis, K. & N. W. R. Co.* (1884) 20 Fed. 87; *Clyde* v. *Richmond & D. R. Co.* (1895) 69 Fed. 673; *Little Rock & M. R. Co.* v. *Barry*

duties of some other office.[2] They are regarded as agents to whom is "delegated supreme authority in the special service,"[3] and to whom is given full control in the management of trains through the telegraph.[4] Their duty pertains to management and direction, while the duty of trainmen pertains to obedience.[5]

The plaintiffs in most of the cases in which the company's liability is affirmed were train hands, but the right of other employees,—such as track repairers,—to recover for negligence in directing the movements of a train is equally unquestionable.[6]

b. Train despatchers represent the company as to special orders suspending regular time-tables.—Most of the accidents due to the negligence of train despatchers are naturally the result of special orders, rendered necessary by the movements of extra trains not provided for in the regular time-tables, or by the failure of the trains specified in such time-tables to arrive at certain stations at the hours appointed. That such orders are issued by train despatchers as

(1893) 58 Ark. 198, 25 L. R. A. 386, 23 S. W. 1397; *Darrigan* v. *New York & N. E. R. Co.* (1885) 52 Conn. 285, 52 Am. Rep. 590 (Granger, J., dissenting); *Chicago, B. & Q. R. Co.* v. *Young* (1888) 26 Ill. App. 115; *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988 (Overruling *Robertson* v. *Terre Haute & I. R. Co.* (1881) 78 Ind. 77, in so far as it recognized no distinction between train despatchers and mere telegraph operators); *Hannibal & St. J. R. Co.* v. *Kanaley* (1888) 39 Kan. 1, 17 Pac. 324; *Louisville, C. & L. R. Co.* v. *Cavens* (1873) 9 Bush. 559; *McLeod* v. *Ginther* (1882) 80 Ky. 399; *Goodman* v. *Delaware & H. Canal Co.* (1895) 167 Pa. 332, 31 Atl. 670; *Madden* v. *Chesapeake & O. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695; and the cases cited in the following notes.

A word sometimes used to designate train despatchers is train master. *Goodman* v. *Delaware & H. Canal Co.* (1895) 167 Pa. 332, 31 Atl. 670; *Crew* v. *St. Louis, K. & N. W. R. Co.* (1884) 20 Fed. 87.

[2] As that of superintendent. *Lasky* v. *Canadian P. R. Co.* (1891) 83 Me. 461, 22 Atl. 367; *O'Laughlin* v. *New York C. & H. R. R. Co.* (1887) 27 N. Y. Week. Dig. 109, 9 N. Y. S. R. 384; *Haynes* v. *East Tennessee, V. & G. R. Co.* (1866) 3 Coldw. 222; *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784; *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125.

Compare *Darrigan* v. *New York & N. E. R. Co.* (1885) 52 Conn. 285, 52 Am. Rep. 590, which also dwells on the fact that, in emergencies, such an employee must promptly obey the orders of his superiors.

[6] *Haynes* v. *East Tennessee & C. R. Co.* (1866) 3 Coldw. 222 (plaintiff was a track repairer); *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13

agents of the companies is recognized by all the courts which regard them as vice principals. In fact there would be little or no utility in holding them to be vice principals if the doctrine were taken to be inapplicable under such circumstances.[1] No trainman has any voice

S. W. 502 (plaintiff was a laborer traveling on a work train).

[1] In *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 511, the court reasoned thus: "It is . . . clear that it was its [the company's] duty to frame and promulgate such rules and schedules for the moving of its trains, as would afford reasonable safety to the operatives who were engaged in moving them. This is a direct, positive duty, which the company owed its employees, and for the failure to perform which it could be responsible to any person injured as a consequence thereof, whether such person be a passenger or an employee. It would be a monstrous doctrine to hold that a railroad company could frame such schedules as would inevitably, or even probably, result in collisions and loss of life. This is a personal, positive duty; and, while a corporation is compelled to act through agents, yet the agents, in performing duties of this character, stand in the place of and represent the principal. In other words they are vice principals. If it be the duty to provide schedules for the moving of its trains which shall be reasonably safe, it follows logically that, when the schedules are departed from, when trains are sent out without a schedule, such orders should be issued by the company as will afford reasonable protection to the employees engaged in the running of such trains. I am not speaking now of collisions caused by a disobedience of orders on the part of conductors and engineers, but of collisions or other accidents the result of obeying such orders. At the time of the collision referred to, Wellington Bertolette was the general despatcher of the defendant company, and from his office in Philadelphia had the general power and authority of moving the trains. In this he was not interfered with by the company or anyone else. For the purpose of sending out the trains, he wielded all the power of the company. He could send a train out on schedule time, or he could hold it back. He could change the schedule time or make new schedules as the exigency of the case required. He could send a train out without schedule, and direct its movements from his office in Philadelphia. When he issued an order the train was bound to move as he directed. The engineer and conductor had but one duty, and that was obedience. . . . It is true the order in this case was sent by John J. Sellers. But Sellers was the assistant of Bertolette, and in his absence was clothed with all his powers. For the purposes of this case Sellers was Bertolette and Bartolette was the company. The distinction between a general despatcher—one who has the absolute control of all the trains upon the road and the conductor or engineer of a train is manifest. The latter have the duty of obedience. Their business is to run their trains under orders from the despatcher, and if an employee is injured, as the result of their negligence the company is not liable. They are in the same common employment, and are laboring together to the same end, under orders from superior authority. The argument for the plaintiff in error, if carried to its logical conclusion, would wholly obliterate all distinction between railroad employees from the president down; as they may all be said to be, in one sense, in the same common employment and paid by the same corporation."

The same view has been adopted in New York, where a railroad company has been held liable for the negligence of a train despatcher, the reasoning of the court being as follows: "In this case the evidence would seem to be quite conclusive that the defendant had fully discharged the duty which it owed its employees in the way of establishing and promulgating appropriate and sufficient rules and regulations for the government and operation of the various trains upon its road, and its furnishing general time-tables pertaining thereto. Whether the train despatcher violated one or all of such rules is not material in the view we take of the case, because the defendant had not performed its whole duty in promulgating rules; nor is a defense made out when it is shown that, if the train despatcher had obeyed the rules, the accident would not have occurred. If the defendant owed a duty, as master, to give correct orders to these

trains, or at least to take due and reasonable care to give them, the failure to perform that duty is the failure of the master in his character as such, although he intrusted the performance of the duty to the train despatcher. These trains were being run without regard to their ordinary time-tables; they were several hours late, proceeding in opposite directions, and each was approaching the other in entire ignorance of the other's whereabouts. Both were necessarily dependent upon the special orders they received from Hornellsville. As was said in *Slater* v. *Jewett* (1881) 85 N. Y. 62, 29 Am. Rep. 627, the master had the right to vary from the regular time schedules laid down for these trains. It was part of the details incident to the operation of the road; but when a variation, or, in other words, when a special time-table is made out for two trains, by which they are to run, it is the duty of the master, not alone to take reasonable care that the alteration shall be made known to the parties interested, but also to take reasonable care that the variation ordered, and by which the trains are run, shall not necessarily or probably lead to disaster when obediently carried out. Reasonable care in originating and formulating the order is necessary, and is the duty of the master. When the train despatcher originates and promulgates such orders as were given in this case, he is acting as the master, or, as it is said, his *alter ego*, and the master is liable for the negligence of the agent he has employed to do his, the master's, particular work." *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 486, Reversing (1889) 55 Hun, 51, 8 N. Y. Supp. 272.

Similarly it is held in Connecticut that, where one rule as to running trains by special orders provides that all orders shall be given by a superintendent, or by a despatcher under the direction of a superintendent, and another provides that superintendents are supreme in their own divisions, and responsible only to the management for such orders as they may give, the effect is to delegate to the train despatcher the whole power of the corporation in respect to moving the trains safely, and therefore to make him the representative of the company in that regard. *Darrigan* v. *New York & N. E. R. Co.* (1884) 52 Conn. 285, 52 Am. Rep. 590. The court said: "It is the duty of a railroad corporation to prepare a time table and adjust the running of its trains so as to avoid collisions. It must also devise some suitable and safe method by which to run special and irregular trains, and regular trains when off their regular time. That cannot be done by general rules. Emergencies will arise which no system of rules can anticipate and provide for, in which the company must act, and act promptly and efficiently. In this case the scheme devised was to have these trains controlled by one who knew the position and movement of every train on the road liable to be affected by them,—a train despatcher acting in the name and by the authority of the superintendent. Is there not a wide and manifest difference between the duty of such an agent and the duty of a locomotive engineer?"

In *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 75 Tex. 611, 13 S. W. 562, the court said: "Upon the hypothesis that the company is bound to inform its servants and warn them of what is necessary to avoid collisions with trains, and that it cannot shift its own duty to a servant, and then, in case of injury, claim that it was the result of negligence of a fellow servant, the foregoing cases will stand upon the same principle. A failure to perform this duty increases the risk of employees on and operating trains, and exposes them to risk not embraced in their implied contract. The company ought to know where its trains are, and if the operators do not know, it is the duty of the company to inform them and give such orders as are reasonably necessary to avoid increased peril."

See also the following cases to the same general effect: *Missouri, K. & T. R. Co.* v. *Elliott* (1900) 42 C. C. A. 188, 102 Fed. 96; *Nolan* v. *New York, N. H. & H. R. Co.* (1898) 70 Conn. 159, 43 L. R. A. 305, 39 Atl. 115; *Cincinnati, I. St. L. & C. R. Co.* v. *Lane* (1889) 118 Ind. 579, 21 N. E. 317 (company bound to see that a section hand sent by a special order on a hand car along the track is not exposed to the danger of a collision with a wild train); *Missouri, K. & T. R. Co.* v. *Elliott* (1899) 2 Ind. Terr. 407, 51 S. W. 1067; *McLeod* v. *Ginther* (1882) 80 Ky. 399 (telegram worded so as to mislead the conductors of two trains); *Haas* v. *Michigan C. R. Co.* (1889) 78 Mich. 513, 7 L. R. A. 590, 44 N. W. 502 (instruction to engineer to wait for another train at a certain point); *Smith* v. *Wa-*

in running a train by special order, but is simply charged with the duty of carrying out the orders that come to him from the train despatcher's office.[8]

The mere fact that the orders given by the train despatcher were verbal instead of written, where the rules call for the latter, makes no difference, so far as the company's liability is concerned.[9] But the right to rely implicitly upon the propriety of a special order from a train despatcher cannot be extended to cases in which the circumstances are such that a prudent man would feel bound to seek some further information as to the reason why the regular routine of the business has been, in the given instance, departed from.[10]

One form of special order consists in the substitution of a temporary, for the regular, time-table. The promulgation of the former, no less than the latter, is deemed to be an act done in pursuance of the company's absolute duty.[11]

The company is, of course, no less liable where the train despatcher

lash, St. L. & P. R. Co. (1887) 92 Mo. 359, 4 S. W. 129; *Sheehan* v. *New York C. & H. R. R. Co.* (1883) 91 N. Y. 332; *Wetherbee* v. *Panama R. Co.* (1892) 49 N. Y. S. R. 148, 21 N. Y. Supp. 207 (irregular train so run as to cause accident); *Goodman* v. *Delaware & H. Canal Co.* (1895) 167 Pa. 332, 31 Atl. 670 (wild train sent out, collided with another); *Washburn* v. *Nashville & C. R. Co.* (1859) 3 Head, 638, 75 Am. Dec. 784 (superintendent started a train out of time, without any precaution to avoid a collision with a train coming in the opposite direction); *Hogan* v. *Missouri, K. & T. R. Co.* (1895) 88 Tex. 579, 32 S. W. 1035; *Galveston, H. & S. A. R. Co.* v. *Arispe* (1893) 5 Tex. Civ. App. 611, 23 S. W. 928, Rehearing denied in (1893) 5 Tex. Civ. App. 617, 24 S. W. 33 (conflicting orders caused collision); *Houston & T. C. R. Co.* v. *Stuart* (1898; Tex. Civ. App.) 48 S. W. 599. Reversed on other grounds in (1899) 92 Tex. 540, 50 S. W. 333; *Phillips* v. *Chicago, M. & St. P. R. Co.* (1885) 64 Wis. 475, 25 N. W. 544.

By some rules it is expressly stated that they may be suspended by the special order of some particular agent of the employers. See *Pittsburgh, C. & St. L. R. Co.* v. *Henderson* (1882) 37 Ohio St. 519, where the rule under discussion, which regulated the movements of freight trains, provided for its suspension by the company's superintendent and for the precautions to be observed during such suspension.

[8] *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 25 L. R. A. 396, 37 N. E. 466. Compare also, as to this consideration, the language used in the Pennsylvania and Connecticut cases cited in the last note.

[9] *Smith* v. *Wabash, St. L. & P. R. Co.* (1887) 92 Mo. 359, 4 S. W. 129.

[10] In *Westcott* v. *New York & N. E. R. Co.* (1891) 153 Mass. 460, 27 N. E. 10, the conductor of a train was held to be negligent in starting a train, when he knew that, under the rules, he had no right to do so until the arrival of a certain train, without inquiring of the despatcher on that section of the road whether he had received any special information which would make it safe to leave the station. The court said that even supposing that it was ordinarily his duty to obey the orders of the despatcher, even if they were in violation of the rules of the road, this particular order was so obviously wrong, and was likely to involve such dreadful consequences, that it was manifestly negligent to act upon it without inquiring the reason for it.

[11] *Frost* v. *Oregon Short Line & U. N. R. Co.* (1895) 69 Fed. 936, where it was held that a telegraph operator, in giving notice to an engineer of a temporary change in the running time of his train, was performing a duty of the company. The distinction taken in *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952 (see *infra*), was disapproved.

has failed altogether to issue the orders required by the emergency,[12] or to give obligatory information as to the movements of trains,[13] than it is for his negligence in sending improper orders.

The single prerequisite of liability under the above doctrine is that the delinquent should have been an employee intrusted with such discretionary powers to regulate the movements of the trains as might seem most conducive to the interests of the company.[14] Hence, a train despatcher who is clothed with the powers of a general train despatcher in the latter's absence is no less a vice principal than the official whose place he takes.[15] Nor is the company allowed to escape responsibility simply because the party who sends the orders respecting the trains issues them in the name of some superior official, such as a division superintendent,[16] or an assistant superintendent.[17] Still less is such a circumstance a bar to the action where the ordinary routine of a railway office, acquiesced in by the general superintendent and other officials, is that the despatches are sent in such superintend

[12] *Chicago, B. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109; *Sutherland* v. *Troy & B. R. Co.* (1889) 28 N. Y. S. R. 201, 8 N. Y. Supp. 83 (despatcher should have sent orders to have a train stopped by signal at a certain station); *McChesney* v. *Panama R. Co.* (1892) 49 N. Y. S. R. 148, 21 N. Y. Supp. 207; (1893) 74 Hun, 150, 26 N. Y. Supp. 245 (injury partly caused by the instructions actually issued, and partly by the lack of full instructions); *Louisville, C. & L. R. Co.* v. *Carens* (1873) 9 Bush, 559 (despatcher failed to stop a train following another which had been "stalled" on a gradient).

[13] *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988 (holding that a train despatcher's disregard of a rule prescribing that an extra train despatched after a work train has already gone out on the road shall be notified to protect itself against such work train is such negligence as will render the company liable for injuries caused by a collision between the two trains); *Clyde* v. *Richmond & D. R. Co.* (1895) 69 Fed. 673 (engineer injured owing to the fact that a station master was not notified as to the coming of an extra freight train); *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 562.

See also *Northern P. R. Co.* v. *Charless* (1892) 2 C. C. A. 380, 7 U. S. App. 359, 51 Fed. 502, where it was laid down in general terms that it is the duty of a railroad company to keep the hands employed on a certain section informed as to the movement of trains over it, and that it is therefore liable for injuries resulting to one of them from the neglect of a telegraph operator to communicate such information. The question of the responsibilities generally of a telegraph operator was expressly waived, the case being decided on a demurrer to a complaint which alleged the existence of the above duty and its breach.

[14] This conception is emphasized in *McChesney* v. *Panama R. Co.* (1892) 49 N. Y. S. R. 148, 21 N. Y. Supp. 207. See also the extracts quoted in note 7, *supra*.

[15] *Lewis* v. *Seifert* (1887) 116 Pa. 628, 11 Atl. 514. Compare also the cases cited in the following notes.

[16] *Louisville, N. A. & C. R. Co.* v. *Heck* (1898) 151 Ind. 292, 50 N. E. 988.

[17] In *Chicago, B. & Q. R. Co.* v. *McLallen* (1876) 84 Ill. 109, the court reasoned thus: "As between the conductor and the company, the assistant superintendent, to whose orders the trains are all subject, is the representative of the corporation. His orders to the conductor of a train are essentially the orders of the employer. This rule applies as well to all orders issued by his assistants in his office and issued in his name. These orders were all signed in the name of Chappell, the assistant superintendent. If those intrusted by him with the management of the business of

ent's name, and the evidence is that he was absent when the despatch in question was sent.[18]

Another way of arriving at the same result is to say that, for the purpose of fastening liability on the company, any officer acting by the authority of the superintendent is put upon the same footing as the superintendent himself.[19]

c. Doctrine that train despatchers are not vice principals.—The decisions in which superintendents and train despatchers have been held to be mere coservants of trainmen are either rulings by courts in which the general doctrine of common employment was relied on, and the effect of the distinction between the master's assignable or non-assignable duties was not adverted to or discussed,[20] or are cases in which the negligence alleged had no relation to the operation of trains,[21] or which turned upon some special ground,—as, that the plaintiff did not offer evidence tending to show that no coservice existed.[22]

d. Liability of railway companies for the negligence of servants who transmit the orders or see that they are carried out.—In a case already cited it was laid down that a train despatcher, in devising a temporary time-table, which, in a sudden emergency, is to take the place of the regular time-table, and in issuing telegraphic orders for the operation of the trains under the new schedule, acts as a vice

the corporation by orders issued in his name neglect to issue a necessary order, that is his neglect and the negligence of the corporation."

[18] In *Lasky* v. *Canadian P. R. Co.* (1891) 83 Me. 461, 22 Atl. 367, the court said: "The defendants assail the plaintiff's case from another position, inasmuch as the despatch to the plaintiff was really sent in the superintendent's name by the train despatcher at Brownville, the superintendent not being there at the time and not cognizant of it, the plaintiff himself being fully aware of the facts, it is contended that the plaintiff cannot prevail in the action because he and the train despatcher were fellow servants in the same employment. We do not assent to this position. It appears that it was customary for the train despatcher thus to use the superintendent's name, and that the practice was acquiesced in by the superintendent and other officials connected with the road. An act done for the superintendent, by his authority, either general or special, is his act. The employee is not required nor permitted to investigate the question of authority. The superintendent's name conclusively imports authority, unless it be forged. The servant must obey, or be discharged from his employment. It would greatly demoralize the service if it were otherwise. Performance of duty to the road places all consequent liabilities upon the road."

[19] *O'I* [illegible] *v. New York C. & H. R. R. Co.* [illegible] N. Y. Week. Dig. 109, 9 N. Y. [illegible].

[20] *Robertson* v. *Terra Haute & I. R. Co.* (1881) 78 Ind. 77, 41 Am. Rep. 552 (overruled, as noticed *supra*); *Willsaps* v. *Louisville, N. O. & T. R. Co.* (1891) 69 Miss. 423, 13 So. 696; *Wonder* v. *Baltimore & O. R. Co.* (1870) 32 Md. 411, 3 Am. Rep. 143.

[21] *Norfolk & W. R. Co.* v. *Hoover* (1894) 79 Md. 253, 25 L. R. A. 710, 29 Atl. 994.

[22] *Blessing* v. *St. Louis, K. & C. N. R. Co.* (1883) 77 [illegible] 410. It seems doubtful whether, [illegible] in Missouri itself, this case would now be followed. See *Smith* v. *Wabash, St. L. & P. R. Co.* (1887) 92 Mo. 359, 4 S. W. 129. But, at all events, it carries a useful warning to practitioners.

principal; but that a telegraph operator, who merely transmits to the trainmen the directions he receives from the train despatcher as to the movements of the trains, is a fellow servant of the engineer.[23] As already remarked, the line which separates the two breaches of duty here contrasted is sometimes rather thin, but it seems more than probable that the cases referred to in the subjoined note would not be approved in all jurisdictions.[24]

578. Duty to impart information as to permanent dangers normally incident to the work at the time it is entered upon.— (Contrast § 609,

[23] *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952. To the same effect, see *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125.

"When the proper servant is so informed and ordered, and he then neglects his duty or violates his orders, causing injury to another servant, the negligence would be his, and the doctrine of fellow servants would apply." *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 618, 13 S. W. 562, where it was held that, if the delinquent road master had control of the trainmen operating a work train and its movements, and was guilty of negligence in moving the train from a certain station, without notification as to the approach of specials with which there was danger of collision, or if his neglect consisted in having the train stopped at another station for such a time as rendered the danger of collision with other trains imminent, the negligence would be his own, as a servant of the company, and not the negligence of the company.

[24] The omission of a telegraph operator at a way platform to see that a despatch was understood by the conductor of a train, by whose negligence the plaintiff, the engineer of another train, was injured, is an act for which the company is responsible. *Madden* v. *Chesapeake & O. R. Co.* (1886) 28 W. Va. 610, 57 Am. Rep. 695.

Neither the conductor of a train coming into collision with a car having section hands on board, standing upon the track at a station, because of such conductor's disregard of signals displayed at the station, nor a telegraph operator at such station who displays improper signals, can be regarded as a fellow servant of such section hands. *Haney* v. *Pittsburgh, C. C. & St. L. R. Co.* (1893) 38 W. Va. 570, 18 S. E. 748.

The telegraph operator in charge of a signal station, who controls, by signal orders, the running of trains over a block section of a railroad, is not the fellow servant of a brakeman injured on such section by the operator's negligent management of the running of trains. *Flannegan* v. *Chesapeake & O. R. Co.* (1895) 40 W. Va. 436, 21 S. E. 1028 (following the last-cited case). The court said: "In this case the defendant, seeking to discharge its personal duty, and provide a safe track and at the same time facilitate the rapid movement of trains, established the signal station and placed the operator in charge, with full authority, by means of a code of signal orders equally as effective as any other kind could possibly be, to control the running of all trains over this block; and all trainmen of every train were under absolute rule to watch for and obey her orders before they dare enter upon the block. If she had been attentive to her duties, she must have known the block was occupied and obstructed, and her knowledge was the knowledge of the master; yet, in the face of that fact, she negligently gives a peremptory signal for the train to proceed. In what way could she possibly be the fellow servant of the train men who are entirely at her command, and who can neither influence nor control her own independent actions? She is as much the master of her section block as the master is of the whole road."

A station agent charged with the duty to see that all cars were so placed on the side tracks as to be clear from trains passing on the main line is not a fellow servant of a section hand upon a work train passing such station. *St. Louis, A. & T. H. R. Co.* v. *Biggs* (1894) 53 Ill. App. 550.

Some other doubtful decisions are noted in the preceding section.

post.)—In any case in which, for one or other of the reasons explained in chapter XVI., *ante*, a master owes his servant the duty of explaining to him the nature of the dangers to which the work will regularly and normally expose him, and the most effectual means by which to avoid them, that duty is not discharged by delegating the performance of it to an agent. If he cannot perform the duty himself he must provide a competent person to give such necessary instruction; and whether the person selected for that purpose be a coemployee of the servant or not, the employer must see to it that he is a competent and trustworthy instructor; otherwise, he will be liable for the consequences of his incompetence or negligence. The person to whom the duty of giving the necessary instruction in such cases is delegated represents the employer, and *pro hac vice* occupies the position of vice principal.[1]

[1] In *Wheeler* v. *Wason Mfg. Co.* (1883) 135 Mass. 297, the question was presented, whether the master's duty of giving notice to his servant of risks and perils to which the latter will be exposed in the course of his employment, when such duty exists, is an absolute one, or whether it is merely the duty of taking reasonable and proper pains to inform the servant of them. This question arose in three forms: (1) In the refusal to instruct the jury that, if the defendant's foreman directed a coservant of the plaintiff to give proper instruction and caution to the plaintiff, the latter could not recover by reason of such coservant's failure to do so, if he was a competent person for that purpose; (2) in the instruction that, if there were dangers in the business known to the defendant, which by reason of the plaintiff's inexperience were unknown to him, and which by the exercise of ordinary care he could not have known, the defendant was bound at its peril to give him reasonable warning of them; and (3) in the exclusion of the evidence of what the foreman told the coservant to do, in instructing the plaintiff. The court said: "That question was somewhat considered in *Coombs* v. *New Bedford Cordage Co.* (1869) 102 Mass. 572, 596, 3 Am. Rep. 506. But the question here is the more general one, whether it is an affirmative, positive duty resting upon the master, for the nonperformance of which he will be liable, or whether it can be delegated to a proper substitute, and he be thereby relieved from responsibility. We are of opinion that the duty resting upon the master is not merely one of reasonable care and diligence to give proper notice; but that he is responsible in case the servant suffers through a want of receiving proper notice of the risks to which he is exposed. The servant does not assume, and is not to bear the risk of, unknown and undisclosed perils; but he is held to take those risks which he knows, or which, by the exercise of ordinary care, he ought to know, to be incident to the nature of the business in the place where and the manner in which it is carried on. The master's duty is to provide machinery which is reasonably safe and proper; and if the use of it is attended with special peril, such as his servants ought to know, and if there is, accordingly, under the circumstances of the particular case, a duty resting upon him in respect to giving notice to the servants of such special peril, that duty is not discharged by delegating the performance of it to a third person. The servants should not be held to assume and undertake to bear the risk of latent and concealed perils, merely because the master takes reasonable care and pains to give notice of them. It is more reasonable to hold that, where the danger is known to the master and unknown to the servant, the master should be held to see to it that the servant, when put upon work which exposes him to danger, should be informed of it. The master must not expose his servant to an unreasonable risk. Where the servant is as well acquainted as the master with the dangerous nature of the machinery or instrument used, or of the service in which he is engaged, he cannot recover.

It follows, therefore, that in cases where the injured employee is an infant or inexperienced, the rule as to fellow servants "only holds good when it appears that such employee has been properly instructed by his employer as to the dangers of his employment, or has acquired knowledge of such dangers from other sources,"[2] and that the mere fact that a defect in a machine is due to the fault of a coemployee will not absolve a master from the duty of instructing a servant, where the

But where the master employs a servant in the use of machinery which he knows, but the servant does not know, to be attended with peculiar danger, we are all of opinion that he must be held responsible for an injury which occurs in consequence of his failure to see to it that a proper notice is given."

In *Brennan* v. *Gordon* (1890) 118 N. Y. 489, 8 L. R. A. 818, 23 N. E. 810, it was held that there was error in a charge given at the request of defendant that "if the jury find, as matter of fact, that the plaintiff was put under instruction of a competent instructor, and that the instructor was as well acquainted as defendants with the nature and character of the service which he undertook to perform, he cannot recover." The court said: "The jury could not otherwise understand this instruction than to mean that the defendants' whole duty to the plaintiff was performed when they assigned as competent an instructor to plaintiff as the defendants were. This was erroneous in two respects. The degree of the instructor's competency was gauged by the competency of the defendants. The plaintiff was entitled to have, and the defendants were bound to provide him with, an instructor competent to teach the art of managing an elevator, regardless of the competency of the defendants in that respect, and of which there was no proof whatever in the case. But the defendants were not only bound to furnish plaintiff with an instructor absolutely competent to manage an elevator, but the defendants were also bound to provide such an instructor for a reasonable length of time to teach the plaintiff how to manage the elevator, and that the instructor should be guilly of no negligence to the injury of the plaintiff while he was being instructed. These relations spring from the fact that during this period the instructor is doing the work and standing in the place of the defendants, the masters."

To the same effect are the following cases: *Sullivan* v. *India Mfg. Co.* (1873) 113 Mass. 396; *Verdelli* v. *Gray's Harbor Commercial Co.* (1897) 115 Cal. 517, 47 Pac. 364; *Felice* v. *New York C. & H. R. R. Co.* (1897) 14 App. Div. 345, 43 N. Y. Supp. 922; *Enna Cotton Seed Oil Co.* v. *Hale* (1892) 56 Ark. 232, 19 S. W. 600; *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285; *Keller* v. *Goskill* (1898) 20 Ind. App. 502, 50 N. E. 363; *Olson* v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866; *Consolidated Coal Co.* v. *Wombacher* (1890) 134 Ill. 57, 24 N. E. 627; *Thomas* v. *Cincinnati, N. O. & T. P. R. Co.* (1899) 97 Fed. 245; *Addicks* v. *Christoph* (1899) 62 N. J. L. 786, 43 Atl. 196; *Lebbering* v. *Struthers* (1893) 157 Pa. 312, 27 Atl. 720; *Smith* v. *Hillside Coal & I. Co.* (1898) 186 Pa. 28, 40 Atl. 287; *Strauss* v. *Haberman Mfg. Co.* (1897) 23 App. Div. 1, 48 N. Y. Supp. 425; *Eastland* v. *Clarke* (1901) 165 N. Y. 420, 59 N. E. 202 Reversing (1898) 28 App. Div. 621, 51 N. Y. Supp. 1140. *Telford* v. *Los Angeles Electric Co.* (1901) 134 Cal. 76, 54 L. R. A. 85, 66 Pac. 76.

[2] *Jones* v. *Florence Min. Co.* (1886) 66 Wis. 268, 57 Am. Rep. 269, 28 N. W. 207 (minor); *Western U. Telg. Co.* v. *Burgess* (1901) 47 C. C. A. 168, 108 Fed. 26 (inexperienced servant not instructed as to the proper method of sawing off sections of poles which were being taken down); *Louisville & N. R. Co.* v. *Miller* (1900) 43 C. C. A. 436, 104 Fed. 124 (inexperienced servant not instructed as to new and dangerous duties); *Nuback* v. *Champagne Lumber Co.* (1901) 48 C. C. A. 632, 109 Fed. 732 (inexperienced servant not instructed as to method of operating a slab-cutting machine).

danger resulting from the defect is one which is not within his comprehension.[3]

Ordinarily the employee who was in control of the injured servant will be regarded as the person upon whom, as the master's agent, the duty of instruction devolved.[4]

As in the case of other absolute duties the control exercised by the employee upon whom devolved the function of giving instruction may be of such a character that he is a vice principal simply by virtue of his position of superiority. Wherever the delinquent is deemed to be a representative of the master on this ground, the liability of the master may, it is obvious, be referred either to the theory that the duty of instruction is non-delegable, or to the theory that the function of instruction is one of those which are official in the sense explained in chapter XXX., subtitle G.[5]

Indeed, a third basis of liability is predicable in such cases, since an order to do work for which the subordinate is unfitted by reason of his ignorance is itself a negligent act of a manifestly official character, and it is therefore not necessary to rely upon a specific duty of instruction.[6]

Under the general rule stated above, the superior employee will

[3] *Bjbjian* v. *Woonsocket Rubber Co.* (1895) 164 Mass. 214, 41 N. E. 265.

[4] It was doubtless this customary apportionment of functions which has influenced the choice of phraseology in the remark of the supreme court of Indiana that, "if the agent or servant upon whom the power to command is given exercises the power, and fails to discharge the obligation, to the hurt of the servant who is without fault, the failure is that of the master, and he must respond." *Atlas Engine Works* v. *Randall* (1885) 100 Ind. 296, 50 Am. Rep. 798.

[5] Thus, in a state where the doctrine of departmental control is applied, one that has power to employ and discharge laborers, and is the foreman in his department, has the duty of the master devolved on him to instruct employees as to the danger of the employment. *Ft. Smith Oil Co.* v. *Slover* (1893) 58 Ark. 168, 24 S. W. 106.

Similarly, in courts where vice principalship is inferred from the mere exercise of control, the master is deemed answerable for the failure of controlling employees to instruct the subordinates. *Norton* v. *Volzke* (1895) 158 Ill. 402; 24 N. E. 1085; *Alton Paving, Bldg. & Fire Brick Co.* v. *Hudson* (1897) 74 Ill. App. 612, Affirmed in (1898) 176 Ill. 270, 52 N. E. 256; *Consolidated Coal Co.* v. *Wombacher* (1890) 134 Ill. 57, 24 N. E. 627.

In another state where the effect of vesting a superior servant with the power of employing and discharging his subordinates is to make him the master's *alter ego* as to them, it has been held that the superior servant is none the less a vice principal in respect to the duty of instruction because the employing and discharging are subject to the consent and approval of the superintendent. *International & G. N. R. Co.* v. *Hinzie* (1891) 82 Tex. 623, 18 S. W. 681, where the plaintiff was ordered to paint cars without being instructed as to a rule requiring men working on side tracks to set out signal flags.

[6] See, for example, *Missouri P. R. Co.* v. *Peregoy* (1887) 36 Kan. 424, 14 Pac. 7, where the court, while adverting to the duty to instruct an inexperienced boy, seems also to consider the defendant liable on the ground that the foreman was negligent in directing the boy to obey an unskilled mechanic in the performance of work which demanded expert knowledge.

necessarily be treated as the representative of the master in respect to the duty of instruction, even though he may be, for other purposes, a mere servant in the jurisdiction where the cause of action arises.[7]

The failure of an agent to instruct a fellow servant as to his duties naturally results in putting an incompetent employee in a position in which his want of skill will be dangerous to his colaborers. Under such circumstances it is clear that the liability of the master may be referred to his breach of either one of two non-delegable obligations.[8]

As there is no duty to instruct a servant as to the special dangers of work which is outside the scope of his original employment and to which his superior has no authority to assign him, the negligence of the superior in ordering him to perform such work is that of a fellow servant merely. In such a case the immunity of the master is obviously the result of a consideration which renders it wholly unnecessary to advert to, and impossible to rely upon, the non-delegable quality of the duty of instruction.[9] One conjunction of circumstances in which this principle operates in the master's favor is presented in those cases where an uninstructed servant undertakes a duty which he was not authorized to undertake.[10]

[7] "The master having subjected the servant to the command of another, without information or caution with respect to all such obligations as the master owes, the other stands in the master's place, and this is so notwithstanding the two servants are, as regards the common employment, fellow servants." *Atlas Engine Works* v. *Randall* (1885) 100 Ind. 293, 50 Am. Rep. 798.

See also *Olson* v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866 (foreman of gang shoveling snow,—vice principal in regard to the duty of notifying his subordinates of rules); *Bibjian* v. *Woonsocket Rubber Co.* (1895) 164 Mass. 214, 41 N. E. 265 (man in charge of machine like that which plaintiff was handling, held to be vice principal, when deputed by the foreman to instruct the plaintiff); *Wallace* v. *Standard Oil Co.* (1895) 66 Fed. 260; *Klochinski* v. *Shores Lumber Co.* (1896) 93 Wis. 417, 67 N. W. 934; *Camp* v. *Hall* (1897) 39 Fla. 535, 22 So. 792; *Voilon* v. *Marinette & M. Paper Co.* (1899) 75 Wis. 579, 44 N. W. 772 (foreman); *Strauss* v. *Haberman Mfg. Co.* (1897) 23 App. Div. 1, 48 N. Y. Supp. 425 (foreman); *O'Connor* v. *Barker* (1898) 25 App. Div. 121, 49 N. Y. Supp. 211 (floor foreman in factory).

"The doctrine which exempts the master from liability arising out of the negligence of fellow servants is based upon the assumption by the servant of the ordinary risks of his employment, but has no application to risks which are not contemplated by him in entering upon the service." *Burke* v. *Anderson* (1895) 16 C. C. A. 442, 34 U. S. App. 132, 69 Fed. 814 (where the explosion of a stick of dynamite under a blow from the pick of a common laborer, who had been set to work after a blast, without any warning as to the possibility of peril from unexploded shots, was held to be an extraordinary risk).

[8] Such was the situation in *Sullivan* v. *Metropolitan Street R. Co.* (1900) 53 App. Div. 89, 65 N. Y. Supp. 842.

[9] See *Crown* v. *Orr* (1893) 140 N. Y. 450, 35 N. E. 648. Contrast with this case *Union P. R. Co.* v. *Port* (1873) 17 Wall. 553, 21 L. ed. 739 where the authority of the foreman in the premises was taken for granted. Compare also § 457, *ante*.

[10] Plaintiff, a street car driver, in crossing an excavation, was obliged to unhitch his team, and leave the car, under the control of the conductor, to come down the grade of its own weight, past the excavation. In getting the team around the excavation, plaintiff stumbled and fell across the track, and

579. Duty to impart information as to permanent dangers superadded to the environment after the work has begun.—Some courts have deferred to the force of the consideration that there is apparently no logical ground upon which it is possible to ascribe a non-delegable quality to the duty discussed in the preceding section, and at the same time to refuse to predicate such a quality to the duty of imparting to a servant such information as is proper under the circumstances with regard to new dangers, which are of such a nature that his safety will be continuously imperiled until the normal conditions of his environment have been restored. A master, it is held, cannot, by delegating to a servant the duty of notifying another servant of increased danger, absolve himself from liability for the non-transmission of the requisite information.[1] The rule is the same whether the increase of danger arises from some extrinsic alteration in the character of the environment itself,[2] or from the fact that the

the conductor, who had just been hired, and had received no instructions as to the use of the brake, turned it the wrong way, whereby the car ran over plaintiff and injured him. It was shown on the trial that the contractor making the excavation provided men to protect cars going up grade past the excavation. Held, that this fact did not tend to show that it was not the duty of the conductor to take charge of the car while coming down grade. *Sullivan* v. *Metropolitan Street R. Co.* (1900) 53 App. Div. 89, 65 N. Y. Supp. 842.

[1] *Pullman Palace Car Co.* v. *Laack* (1892) 143 Ill. 242, 18 L. R. A. 215, 32 N. E. 285 (negligence of persons who, under a license from the master, put in new burners in a brick kiln for the purpose of testing their advantages).

[2] See the case last cited, and also *Cerrillos Coal R. Co.* v. *Deserant* (1897) 9 N. M. 49, 49 Pac. 307 (a fire boss in a mine is a vice principal as to the performance of the duty of informing miners where they may work without being endangered by accumulation of gas); *Elledge* v. *National City & O. R. Co.* (1893) 100 Cal. 282, 34 Pac. 720 (foreman supervising work of excavation held to be a vice principal in regard to warning laborers as to any special danger of a subsidence).

A railroad company is liable to any one of its employees operating its road, for the negligence of either one of its officers or employees whose duty it is to keep the road in a reasonably safe condition, and who culpably fails to perform such duty or to give notice or warning of a sudden change in the condition of the company's premises, which introduces insecurity into a place which, from his previous acquaintance therewith, an employee has reason to believe to be free from danger. *Kansas City, Ft. S. & G. R. Co.* v. *Kier* (1889) 41 Kan. 661, 671, 21 Pac. 770 (brakeman injured by stumbling in the dark upon a pile of cinders deposited beside the track since he had passed the spot a few hours before).

The testimony of the foreman of a factory that a trap door in a passageway was used, on an average, about three times a week, and from five to ten minutes at a time, justifies an inference that it was expected to be used, and that the act of a servant in opening it was not unauthorized in such a sense as to prevent recovery from the employer by a fellow servant injured by falling through the trap door, upon the ground of the employer's negligence in maintaining the door in the passageway and failing to notify him thereof. *Johnson* v. *Field-Thurber Co.* (1898) 171 Mass. 481, 51 N. E. 18.

In *Smith* v. *Oxford Iron Co.* (1880) 42 N. J. L. 467, 36 Am. Rep. 535, it appeared that one Scranton, the president of the defendant company, to whose care was committed the superintendence of the business of the corporation, introduced the use of giant powder. It was clearly shown that it was a highly dangerous explosive, and that the proper manner of using it was not made known

servant has been transferred to a new place of work, where he will be exposed to some abnormal risk of the kind now under discussion."

to the plaintiff, although printed instructions were in the possession of the company. The court said: "Before allowing this new compound to be introduced, it was a duty which the company owed to the plaintiff to ascertain and make known its properties and the mode of using it, either to the plaintiff himself or those under whose direction he worked. The obligation to do so rested upon Scranton, as the head officer of the company, and his neglect in that respect was the neglect of the company itself. It was gross negligence in the company to furnish such an article for a laborer's use without giving him the requisite information. Whether the company was aware of its dangerous quality, or furnished it for use without having taken steps to obtain such knowledge, it is equally liable. It was a duty which the company, through Scranton, was bound to perform, to see that such reasonable care as the exigency of the case demanded, was taken, and to impart to the subord[illegible]s full information as to the manner o[illegible] applying the new compound, before placing it in the hands of an ignorant laborer. This obligation resting on the company itself, the president could not shift its liability by referring the matter to one of his subordinates."

See *Bolter* v. *Ross Lumber Co.* (1899) 103 Wis. 324, 79 N. W. 263.

It would seem that, if there were any object in doing so, all the cases in which the master has been held liable for the failure of a servant to discover defects in an instrumentality which he has to supervise might be brought under this principle.

[3] In *McMahon* v. *Ida Min. Co.* (1897) 95 Wis. 308, 70 N. W. 478, it was held that a master was "not to set a man at work among latent and extraordinary dangers, of which the employee knows nothing and which he cannot ascertain by experience or observation," and that, "in taking the plaintiff from one part of the mine in which he had been at work and setting him at work in a different place," and not warning him as to certain unexploded blasts, the shift boss was plainly and palpably acting in the capacity of the master.

This phase of the master's obligation to warn was recently considered at great length in *Carlson* v. *Northwestern Telephone Exchange Co.* (1896) 63 Minn. 428, 65 N. W. 914, where the court reasoned thus: "If the nature and magnitude of the master's work, whether it be that of construction or otherwise, and the number of men engaged in its execution are such that the exercise of ordinary care for the safety and protection of the workmen from unusual and unnecessary dangers requires that they be given reasonable orders, and that they be not ordered from one part of the work to another, without warning, into places of unusual danger and risks, which are not obvious to the senses and known to them, but which might be ascertained by the master by a proper inspection, the absolute duty rests upon the master to give such reasonable orders. Considerations of justice and a sound public policy impose this duty upon the master as such, which he cannot delegate, so as to relieve himself from the consequences of a negligent discharge of it. Where a large number of men are employed upon the same work, it is essential that reasonable orders, regulating their conduct, and assigning to them proper places in which to work, should be given. It is the duty and the right of the master to give orders and direct the places where his servants shall work. Their duty is instant and absolute obedience, unless it be obvious to them that such obedience will expose them to unusual dangers. Dispatch, discipline, and the safety of person and property in the execution of work imperatively require that the master should order and the servant obey. It would be practically impossible to carry on a work of any magnitude on any other base. A workman, when ordered from one part of the work to another, cannot be allowed to stop, examine, and experiment for himself, in order to ascertain if the place assigned to him is a safe one; and therefore, in obeying the order, while he assumes obvious and ordinary risks, he has a right to rely upon a faithful discharge of the master's duty to use ordinary care to warn and protect him against unusual dangers. Any rule or doctrine which deprives the workman of this right and protection when the master delegates the power and duty of giving such orders to a subordinate, no matter how high or low his rank or grade, is unsupported by reason, violates all considerations of justice, and is not support-

In some instances it is difficult to say whether, from a purely logical standpoint, the liability of the master should be referred to this rule

ed by the weight of authority." The standpoint of the court will be made somewhat clearer by quoting the following passage from the concurring opinion of Mitchell, J.: "The principle which this court has always announced as the test is that it is not the mere rank or grade of the superior employee, but the nature of the duty or service which he was performing, which determines the question; that, whenever a master delegates to another the performance of a duty which he owes absolutely to his servants, or which would fall within the line of his duty, as master, if personally present, then, in the performance of such acts such other person would be, as to other servants, a vice principal, and not a fellow servant. Whether we have always correctly applied this test to the facts is another question. For example, in hiring and discharging workmen the foreman in the present case would represent the master, and his negligence in the premises would be chargeable to the master. So, also, in the matter of selecting or inspecting implements and other instrumentalities for the performance of the work, assuming that this duty had been delegated to him. And where, as in this case, he had been given entire control of the work, and of all the workmen engaged in it, with absolute and supreme authority to give them orders how to do the work and where to work, I think that, on exactly the same principle, in giving these orders, which the workmen were bound to obey, he represented the master, and was performing a duty which would have devolved on the master, if personally present."

In *Burke* v. *Anderson* (1895) 16 C. C. A. 442, 34 U. S. App. 132, 69 Fed. 814, where a superintendent of the work of excavating for a railway was held to be a vice principal as regards his negligence in failing to notify a laborer that a portion of the explosives has not been exploded, the court said: "The master provides the place for his servant to work, and if his acts create a special danger he is not alone chargeable with the positive duty to exercise the utmost care and every available precaution against possible injury to those who are to work there, but, if danger impends, notwithstanding the precautions taken, he is further obligated to give due information and timely warning to those in his service who are ignorant of it, to the extent, before calling upon them to incur the risk. In respect of the employment of the plaintiff and the directions for his work, it is unquestionable and conceded that the superintendent represented the master as vice principal. In the same relation he is chargeable with knowledge of the danger in using the explosives, and with the duty to protect employees and notify them of risk. If the plaintiff was not informed of the peril which compliance with the order involved, or if it was not clearly apparent, the risk thus created cannot be held to have been contemplated in the service in which he engaged, and therefore it was not one assumed by him in his employment. The instructions requested on behalf of the principal defendant, and the theory of the whole defense as well, rest upon the claim that the operation of blasting was common labor, and not the work of a superintendent or vice principal; that its performance by this superintendent was in the character of a fellow servant, and the master was not liable for any neglect therein beyond the exercise of ordinary care in selecting his servants. In the same connection it is argued that the use and care of the explosives were not a personal duty of the master. Whether these claims could be maintained by the master in any case in which he brings into his work the dangerous means which produce injury, and whether the rule of strict care does not impose a positive obligation which he cannot evade by delegating the performance, are questions of interest, but they do not require consideration here. It is sufficient that the risk was created by the master or for his purposes; that there is legitimate finding by the jury of negligence on the part of those engaged in the performance, causing the injury; and, finally, that the plaintiff was ignorant of the risk and had not assumed it. The doctrine which exempts the master from liability arising out of the negligence of fellow servants is based upon the assumption by the servant of the ordinary risks of his employment, in which the negligence of fellow servants is included, but it has no application to risks which are not contemplated by him in entering upon

or to that which requires him to answer for the negligence of persons deputed to carry out regulations. See §§ 576, 577, *supra*. The intimate association between the two conceptions is especially manifest in cases turning upon the master's obligation to control the movements of trains.[1]

The advantage which the servant receives from the doctrine explicated in this section is necessarily, however, greatly curtailed by the construction which has been put upon the doctrine as to detail of work (see especially § 611, *post*). A portion of the cases cited in this section would undoubtedly have been decided differently in some jurisdictions.

the service (*Northern P. R. Co.* v. *Hambly* [1894] 154 U. S. 349, 357, 38 L. ed. 1009, 1012, 14 Sup. Ct. Rep. 983), and certainly cannot govern for this extraordinary risk interposed by the master without warning."

See also *McMahon* v. *Ida Min. Co.* (1897) 95 Wis. 308, 70 N. W. 478 (miner sent without warning to work in a place where there were a number of unexploded blasts).

[1] *Moon* v. *Richmond & L. R. Co.* (1884) 78 Va. 745, 49 Am. Rep. 401 (section foreman failed to signal train to stop at a place where track had become dangerous).

The same state of facts appeared also in *Torian* v. *Richmond & L. R. Co.* (1887) 84 Va. 192, 4 S. E. 339, where we find the court laying down the law thus: "It was the duty of the defendant company . . . to use all reasonable precautions, including necessary signals to moving trains, essential to the protection of the lives and limbs, not only of employees, but to the protection of all persons lawfully on its road. The defendant company, by and through the negligence of its agent, Herndon, in failing to signal the approaching train, and warn it of the danger in its path, was guilty of culpable negligence, which caused the accident that resulted in the death of the plaintiff's intestate, and for that negligence and that result the company is liable in damages. That negligence was the proximate cause of the death of plaintiff's intestate, who was not the coemployee of Herndon, by whose negligence the accident was caused, in the sense which relieves the employer from liability for injuries to one servant, by and through the negligent act or omission of his fellow servant."

In *Turner* v. *Norfolk & W. R. Co.* (1895) 40 W. Va. 675, 22 S. E. 83 it was held that though, in some respects the engineer and fireman of a special engine are fellow servants of a section hand, yet in giving him warning of the use of the track by a special train they discharge a nonassignable personal or positive duty of the railroad company in its corporate capacity. The court said: "It has been well said that it would be a monstrous doctrine to hold that a railroad company could frame such schedules as would inevitably, or even probably, result in collisions or loss of life. *Lewis* v. *Seifert* (1887) 116 Pa. 647, 11 Atl. 514. Having prepared and promulgated its schedule, it must adhere to it, and if it makes a change or violates such schedule, it is its positive duty to notify all who may be affected thereby of such change. When, in contravention of its schedule, it sends a 'wild engine' over its track unexpectedly, it is in duty bound to warn all its employees who are rightfully on and using the track about its business, whether in charge of engine, train, or hand car, of the change in the schedule, and if it intrusts this duty to others, by bell, whistle, or otherwise, it makes such others its vice principals to that extent, and if they fail to discharge this duty the company must answer for their negligence, unless it be shown that the injured person contributed thereto. For instance, if the company had failed to notify Foreman Alley, by bell, whistle, or otherwise, of the presence of a special train or obstruction on the track, and he had been injured thereby, he could recover unless the defendant showed that he was under express instructions to be on the lookout for such special trains, and, as a matter of precaution, to flag around curves and through cuts. In such case he would

580. Duty to warn as to dangers of the transitory class, occasionally supervening during the progress of the work.— In some instances the master's liability for the failure of one employee to warn another as to a peril of the merely transitory class may be predicated on the ground that the dereliction of duty was an official act of an agent who was a vice principal by virtue of his rank as a general or departmental manager.[1] But wherever there is no such superiority of rank, and the plaintiff must rely solely on the character of the negligent act itself, as a ground of recovery, it seems clear that, in the absence of some special consideration bringing the facts within the domain of some duty conceded to be non-delegable,[2] the master cannot be compelled to indemnify a servant for injuries caused by this kind

foil, not because of being a fellow servant with the engineer, but from contributing to his negligence. The company must protect its employees from all dangers created by itself or its authorized agents or agencies which such employees cannot themselves foresee, or, by the use of ordinary prudence, avoid. For it must furnish them a safe place to work. To send 'wild engines' and trains, without any manner of warning or precaution, over tracks already rightfully occupied by other employees, is negligence, in the highest degree criminal, in utter disregard of human life or limb, and worthy of the severest penalties the law can possibly inflict; and it is made less criminal by the degree of precaution taken to give the necessary warning, and only becomes excusable when the measures adopted are sufficient to protect such employees from threatened danger, provided they are free from fault themselves."

[1] The general principle applicable to such a case has been stated thus: "It is a wrong on the part of the agent having the right to order a servant to do certain specific work, to increase the peril of the service by his own negligence. The employee acting under the specific order has a right to assume, in the absence of warning or notice, that his superior who gave the order would not, by his own negligence, make the work unsafe." *Taylor* v. *Evansville & T. H. R. Co.* (1889) 121 Ind. 124, 6 L. R. A. 584, 22 N. E. 876.

See also § 542, *ante*.

[2] Such a case is presented where the real gravamen of the action is the failure to conduct the work upon a safe system. See *Grace & H. Co.* v. *Connolly* (1900) 40 C. C. A. 69, 99 Fed. 879, Affirmed in (1899) 92 Fed. 116, where a person employing men to work on tall timbers above a sidewalk, which are required to be supported by guys across the street, was held liable for his failure to furnish watchmen to warn drivers in charge of vehicles upon the street to avoid the guys, so as to be liable for the fall of a workman caused by a vehicle striking a guy, although fellow workmen, in moving the guy as the work progresses, are also negligent in placing it where it will be struck by passing wagons. In the lower court the rationale of the decision was that the "place was made unsafe by the lack of warning, with which the work in which the plaintiff was engaged had nothing to do," and it was observed that the duty of providing for the safety of the place of work rests as a non-delegable obligation upon the master, "except as it may be changed by the progress of the work itself." In the court of appeals the liability was predicated rather from the lack of a proper system, and it was laid down that the master cannot escape liability under the rule that the duty of the master to provide safe places does not apply where the place originally furnished is safe, and becomes unsafe in the progress of the work, or because of the manner in which the work is done, since it cannot be said that the place (the street) originally furnished was safe, unless it was protected by danger signals or watchmen.

Under the theory that the master's

of negligence, without breaking in upon the principle that the master is, at all events, not liable for any dangers which are due to the manner in which the servants themselves deal with instrumentalities which are intrinsically safe and suitable. So far as the writer knows, there is only one case in which the master has been held liable on the broad ground that he must answer for the negligence of a servant charged with the function of warning other employees that the instrumentalities are about to be used in a way which will render their environment unsafe for a brief period, of uncertain duration.[3] The doctrine applied in the larger number of the decisions is stated in § 601, *post*.

581. Duty to inspect instrumentalities; generally.—Since neither the duty of seeing that the instrumentalities of work, as originally supplied, satisfy the legal standard of safety, nor the duty of seeing that they continue, while in use, to satisfy that standard, can be

duty to enforce rules is non-delegable it is also possible to justify the decision of the Indiana court of appeals, which has also held that a railroad company is liable to a car repairer for personal injuries received by him while making repairs, where a brakeman to whom the company has intrusted the duty of notifying the workmen that a switch engine is about to enter upon the tracks fails to give such notice, if a rule of the company requires the notice to be given, and does not require the repairer to take any steps for his own protection. *Evansville & T. H. R. Co.* v. *Holcomb* (1894) 9 Ind. App. 198, 36 N. E. 39.

[3] In New Jersey it has been held that the failure of a quarry foreman to give warning of a blast, as it was his duty to do, in time to permit the workmen to get out of danger, is negligence which is imputable to the employer, and is not one of the risks assumed by the employee, the result being the same whether the negligence arose from a defective system with reference to warnings, or from the foreman's failure to properly observe such system. The theory of the defendant that the giving of the warning was only incidental to the foreman's work in preparing the blast and lighting the fuse was rejected by the court, which thus explained its position: "When we consider the general duty owed by an employer to his employees to exercise reasonable care that the place where he sets them to work shall be kept safe (*Van Steenburgh* v. *Thornton* [1895] 58 N. J. L. 160, 33 Atl. 380), the propriety of including therein the duty of giving warning in such circumstances as those now before us becomes at once apparent. The danger of blasting was one frequently recurring, and its occurrence could always be foreseen, not by the workmen scattered about the quarry, but by any person charged with the duty of watching for it. If the danger was not foreseen and the proper warning given the quarry became an unsafe place for the workmen; but it was made reasonably safe if such warning was given. It seems clearly to follow that on him whose duty it was to take care that the place was kept safe was cast the duty of giving timely warning. We conclude, therefore, that it was part of the defendant's duty to the plaintiff that proper care should be exercised in giving warning of an expected blast." *Mooney* v. *Belleville Stone Co.* (1897) 61 N. J. L. 253, 39 L. R. A. 834, 39 Atl. 764, Affirming (1897) 60 N. J. L. 323, 38 Atl. 835.

Considering the rigor with which the doctrine of common employment has usually been construed in New Jersey to the servant's disadvantage, the attitude of the court in this particular instance is somewhat surprising.

adequately performed without a proper examination of the subject-matter, it would seem that, in any case in which an absolute quality is ascribed to these duties, a like quality ought as a necessary logical consequence, to be ascribed to the duty of examination, both as respects the time when the instrumentalities are first furnished, and as regards the period during which they remain in use. But a comparison of the decisions cited in the following sections with those noted in § 568, *supra*, and in chapter XXXII., subtitle D, *post*, shows that the courts have not always deferred to the logical force of this consideration.

582. Duty to inspect instrumentalities at the time they are first brought into use.— So far as regards the original addition of such instrumentalities as are furnished, an entirely symmetrical doctrine prevails. If a master undertakes, or is legally bound, to supply certain instrumentalities to his servant, he must, at his peril, see that they are properly inspected before being brought into use. (See § 152, *ante*.) "Inspection to discover whether an appliance is defective is as much a part of the work of furnishing safe appliances as reparation after the defect is discovered."[1] So, also, if articles which are stored, after being purchased, and then brought into use as the necessities of the work may demand, are liable to deteriorate with the lapse of time, the person who has them under his charge is regarded as the master's representative in respect to the duty of seeing that none which have become unfit for use are turned over to the servants.[2]

The doctrine that a master is liable for a defect in one of the constituent parts of a machine, which is substituted for a discarded one, obviously involves, in the present connection, the corollary that the master is liable for the careless performance of the duty of inspecting the new materials thus introduced into the machine.[3]

On the other hand the effect of the decisions cited in §153, *ante*, is that, to the extent there shown, the master is not required to answer for the inadequacy of an inspection, where the person who made or ought to have made it was a manufacturer or dealer, on whose skill

[3] *Toy* v. *United States Cartridge Co.* (1893) 159 Mass. 313, 34 N. E. 461. (See extract in § 570, *supra*); *Hoes* v. *Ocean S. S. Co.* (1900) 56 App. Div. 259, 67 N. Y. Supp. 782 (inspection of machinery a part of which had been renewed, for the purpose of seeing whether it is in good order, was distinguished from that inspection which is made in the ordinary routine of work).

and judgment he was entitled to rely. Compare also §§ 558, 559, *supra*.

583. Duty to inspect instrumentalities during the time they are kept in use.— Except in so far as the servant's rights of recovery may be limited by the application of the doctrine as to details of work (see next chapter, subtitle D), the duty of inspection is, by most courts, treated as non-delegable. It may be said that, as a general rule, the duty of inspection is absolute, in so far as it has relation to intrinsic defects, and delegable in so far as it has relation to defects which arise in the daily use of the instrumentalities, and which are of such a nature that the necessary remedy can, without difficulty, be applied by the servants themselves. A differentiation based upon a theory so extremely vague as this is naturally anything but satisfactory, and a comparison of the cases cited in the subjoined and following notes with those tabulated in §70, *ante*, shows that, between the two zones of facts, with respect to which the theory yields definite and logical results, there lies an extensive debatable ground, which forms the subject of decisions which reflect little more than the tendency of the various courts to favor either the master or the servant in the choice of the particular principle to which the rights of the parties shall be referred.[1]

[1] The following cases were decided on the broad ground that, in the language of the court, in *Bailey* v. *Rome, W. & O. R. Co.* (1893) 139 N. Y. 302, 34 N. E. 918, "proper inspection to discover defects is a part of the master's duty:" *Texas & P. R. Co.* v. *Barrett* (1895) 14 C. C. A. 373, 30 U. S. App. 196, 67 Fed. 214, Affirmed in (1897) 166 U. S. 617, 41 L. ed. 1136, 17 Sup. Ct. Rep. 707 (weakness of boiler which exploded might have been discovered by a proper test); *Atchison, T. & S. F. R. Co.* v. *Mulligan* (1895) 14 C. C. A. 547, 34 U. S. App. 1, 67 Fed. 569 (engineer, charged with duty of inspecting his engine, not a fellow servant of a hostler injured by a defective footboard); *Texas & P. R. Co.* v. *Thompson* (1895) 17 C. C. A. 524, 30 U. S. App. 549, 70 Fed. 944. Reiterating the doctrine of *Texas & P. R. Co.* v. *Barrett* (1895) 14 C. C. A. 373, 30 U. S. App. 196, 67 Fed. 214 (boiler exploded—Speer, D. J., dissented, but only on the ground that the theory of the defendant as to the cause of the accident had not been brought to the attention of the jury by proper instructions); *Gowen* v. *Bush* (1896) 22 C. C. A. 196, 40 U. S. App. 349, 76 Fed. 319 (employees charged with "the duty of going through a mine inspecting it and seeing whether it is free from explosive gas and discharging a personal duty of the master, and are not fellow servants of a miner in that respect"); *Western Coal & Min. Co.* v. *Ingraham* (1895) 17 C. C. A. 71, 36 U. S. App. 1, 70 Fed. 219 (owner of a mine cannot escape responsibility for neglect to make timely inspection of the timbers, walls, and roofs by the devolution of the duty on a competent mining boss or foreman; *McCauley* v. *Southern R. Co.* (1897) 10 App. D. C. 560; *Baltimore & P. R. Co.* v. *Elliott* (1896) 9 App. D. C. 341 (error to direct a verdict for the defendant, where there is evidence of negligence in inspection); *Wells* v. *Coe* (1886) 9 Colo. 159, 11 Pac. 50; *Chicago & E. I. R. Co.* v. *Knoirim* (1894) 152 Ill. 458, 39 N. E. 324; *Cleveland, C. C. & St. L. R. Co.* v. *Ward* (1897) 147 Ind. 256, 45 N. E. 325, 46 N. E. 462 (defective locomotive); *Blazenic* v. *Iowa & W. Coal Co.* (1897) 102 Iowa, 706, 72 N. W. 292 (employee appointed to inspect the roofs of tunnels in a mine); *Atchison, T. & S. F. R. Co.* v. *McKee* (1887) 37 Kan. 592,

The nature of the liability imputed to the master for negligence in regard to inspection is sometimes defined by saying that the em-

L. 626, 44 Atl. 647 (employment of an expert mill architect and builder in the reconstruction of a mill, not a sufficient discharge of the master's duty); *Cerrillos Coal R. Co.* v. *Deserant* (1897) 9 N. M. 49, 49 Pac. 807 (fire boss in a mine, whose duty it is to inspect the working places and inform miners who work by contract as to the safety of their working places); *Egan* v. *Dry Dock, E. B. & B. R. Co.* (1896) 12 App. Div. 556, 42 N. Y. Supp. 188 (boiler exploded); *McKnight* v. *Brooklyn Heights R. Co.* (1898) 23 Misc. 527, 51 N. Y. Supp. 738 (inspectors of harness used by street car company not fellow servants of drivers); *McKnight* v. *Brooklyn Heights R. Co.* (1898) 23 Misc. 527, 51 N. Y. Supp. 738; *Chesson* v. *John L. Roper Lumber Co.* (1896) 118 N. C. 59, 23 S. E. 925 (carpenters employed to inspect and make any needed repairs in a platform upon which servants are required to work are vice principals); *Fisher* v. *Oregon Short Line & U. N. R. Co.* (1892) 22 Or. 533, 16 L. R. A. 519, 30 Pac. 425 (section foreman held to represent the master in not discovering a dangerous defect on a railway track); *Mullan* v. *Philadelphia & S. Mail S. S. Co.* (1875) 78 Pa. 25, 21 Am. Rep. 2, Reversing (1872) 9 Phila. 16; *Gates* v. *Chicago, M. & St. P. R. Co.* (1892) 2 S. D. 422, 50 N. W. 907 (derrick, not being properly fastened, swung round so as to obstruct railway track); *Houston & T. C. R. Co.* v. *Marcelles* (1883) 59 Tex. 334; *Sabine & E. T. R. Co.* v. *Ewing* (1892) 1 Tex. Civ. App. 531, 21 S. W. 700 (defective locomotive); *Forduce* v. *Culver* (1893) 2 Tex. Civ. App. 569, 22 S. W. 237; *Missouri, K. & T. R. Co.* v. *Lorch* (1898) 18 Tex. Civ. App. 46, 44 S. W. 317; *Houston* v. *Brush* (1894) 66 Vt. 331, 29 Atl. 380 (defective tackle block pin not properly fastened); *Newton* v. *Vulcan Iron Works* (1901) 199 Pa. 646, 49 Atl. 339; *Baltimore & O. R. Co.* v. *Mc Kenzie* (1885) 81 Va. 71 (section master and night watchman failed to discover a rock which had fallen on a railway track); *Re California Nav. & Improv. Co.* (1901) 110 Fed. 670 (defect in steam drum on ship was not discovered, owing to want of proper inspection); *Tracy* v. *Western U. Teleg. Co.* (1901) 110 Fed. 103 (foreman intrusted with the duty of inspecting telegraph poles held to be a vice principal).

In a case where the plaintiff was injured by the fall of a pile of timber in a railway lumber yard, it was held that, if the charge of the foreman (here treated as a departmental manager) involved the duty of maintaining an inspection of the piles so as to prevent their becoming dangerous to the workmen, he was in the performance of such duty as superior. An instruction that the plaintiff could not recover unless the foreman's negligence had relation to the employment of other servants or the furnishing of improper materials was accordingly held too broad. *Baldwin* v. *St. Louis, K. & N. R. Co.* (1885) 68 Iowa, 37, 25 N. W. 918.

In the following cases car inspectors were held not to be fellow servants of trainmen or other employees exposed to danger from defective cars: *Union P. R. Co.* v. *Daniels* (1894) 152 U. S. 684, *sub nom. Union P. R. Co.* v. *Snyder*, 38 L. ed. 597, 14 Sup. Ct. Rep. 756, Affirming (1890) 6 Utah, 357, 23 Pac. 762; *Macy* v. *St. Paul & D. R. Co.* (1886) 35 Minn. 209, 28 N. W. 249; *Ohio & M. R. Co.* v. *Pearry* (1891) 128 Ind. 197, 27 N. E. 479; *Little Rock & M. R. Co.* v. *Moseley* (1893) 6 C. C. A. 225, 12 U. S. App. 514, 56 Fed. 1009; *Cincinnati, H. & D. R. Co.* v. *McMullen* (1889) 117 Ind. 439, 20 N. E. 287; *Missouri P. R. Co.* v. *Dwyer* (1886) 36 Kan. 58, 12 Pac. 352; *Carpenter* v. *Mexican Nat. R. Co.* (1889) 39 Fed. 315; *Cooper* v. *Pittsburgh, C. & St. L. R. Co.* (1884) 24 W. Va. 37; *Illinois C. R. Co.* v. *Hilliard* (1896) 99 Ky. 684, 37 S. W. 75; *Long* v. *Pacific R. Co.* (1877) 65 Mo. 225; *Condon* v. *Missouri P. R. Co.* (1883) 78 Mo. 567; *Illinois C. R. Co.* v. *Reardon* (1894) 56 Ill. App. 542; *Braun* v. *Chicago, R. I. & P. R. Co.* (1880) 53 Iowa, 595, 36 Am. Rep. 243, 6 N. W. 5; *St. Louis, A. & T. R. Co.* v. *Putnam* (1892) 1 Tex. Civ. App. 142, 20 S. W. 1002; *G. H. Hammond Co.* v. *Mason* (1895) 12 Ind. App. 469, 40 N. E. 642; *Atchison, T. & S. F. R. Co.* v. *Seeley* (1894) 54 Kan. 21, 37 Pac. 104 (here the duty was predicated on the manner in which the car was loaded); *Kentucky C. R. Co.* v. *Carr* (1897) 19 Ky.

ployment of a competent inspector of its appliances does not relieve the master from liability for injuries resulting from defects in the

Co.* (1882) 11 Biss. 362, 14 Fed. 277; *Galveston, H. & S. A. R. Co.* v. *Nass* (1900; Tex. Civ. App.) 57 S. W. 910; *Norfolk & W. R. Co.* v. *Ampey* (1896) 93 Va. 798, 25 S. E. 226 (here the duty of inspection was delegated to the conductor).

In *Tierney* v. *Minneapolis & St. L. R. Co.* (1885) 33 Minn. 311, 53 Am. Rep. 35, 23 N. W. 229, it was held that where, by a regulation governing the employees in the transfer yard of a railway company, car inspectors were required to inspect incoming cars immediately upon their arrival, and, if out of repair, to mark them "in bad order," indicating that they were to be sent to the "repair track," negligence on the part of the inspectors in failing to properly discharge this duty, by reason of which plaintiff was injured while attempting to couple a damaged car, without notice of its condition, and without fault on his part, may be imputed to the company. The court said: "In respect to patent defects in the coupling apparatus, brakes, wheels, etc., we may assume that the defendants had undertaken the duty of inspection, and intrusted it to the proper agents. As a rule, also, there is a distinction between the special duties of such persons and the service of other employees who are engaged in handling cars and operating trains. It is not the same in kind as that of the switchman, brakeman, or other operative. *Wedgwood* v. *Chicago & N. W. R. Co.* (1878) 44 Wis. 44; *Schultz* v. *Chicago, M. & St. P. R. Co.* (1879) 48 Wis. 375, 4 N. W. 399. The service of the former class relates wholly to the matter of the care and repair of machinery, the use of which is attended with constant danger to other employees unless maintained in a safe condition; and they represent the master, not in the capacity of superior officers placed over other employees, but because performing the master's duty in respect to safe instrumentalities."

See also the cases in the following section as to foreign cars.

In an action by an employee to recover for injuries caused by the giving way of a grab iron of a ladder on the side of the car, an instruction which deals with the method of inspection adopted by the company is properly refused, where the issue is, not whether the system of inspection was the proper one, but whether the inspectors properly executed the system. *Thompson* v. *Great Northern R. Co.* (1900) 79 Minn. 291, 82 N. W. 637.

It is not error to refuse an instruction that the master was not liable if it furnished a sufficient number of arms for telegraph poles from which workmen could select; that, if the defect was visible, the workmen who selected the arm was negligent, and the master was not responsible; and that, if competent inspectors were employed, the master was not liable. *McDonald* v. *Postal Teleg. Co.* (1900) 22 R. I. 131, 46 Atl. 407.

Two cases, *Flood* v. *Western U. Teleg. Co.* (1892) 131 N. Y. 603, 30 N. E. 196, and *Melsnac* v. *Northampton Electric Lighting Co.* (1898) 172 Mass. 89, 51 N. E. 524, were distinguished on the ground that there had not been any breach originally of the duty of inspection. This circumstance is surely not a sufficient differentiating element, as it might conceivably have been the duty of the employer to have made a subsequent inspection. It will be seen, however, by referring to § 414 ¶ (4), *ante*, that the real rationale of the decisions referred to was that the servant was himself charged with the duty of inspection.

appliances, which would have been discovered by a reasonably careful inspection, but which were not in fact discovered.[2]

The master will not be allowed to escape on the theory that the person who actually made the negligent inspection was not the employee appointed by him to discharge the duty of inspection;[3] and if he chooses to devolve the duty of inspecting an instrumentality upon the employee whose function it is to use it for the purpose of his work, and provides no other method of inspection, he must respond in damages for the negligence of the employee in continuing to use the instrumentality after he has learned that it is dangerously defective, and has had an opportunity of discarding it or reporting its condition to the employee whose duty it is to make the needful repairs.[4]

A conclusion similar to that stated in the text is reached under the theory that inspectors are in a different department from the servants who use the instrumentalities inspected. Thus, in one case it was laid down that the negligence of the servants of a railroad company having charge of the inspection and repair of cars is, as regards a brakeman, the negligence of a superior in another department. *Chicago & N. W. R. Co.* v. *Jackson* (1870) 55 Ill. 492, 8 Am. Rep. 661. In another, the conductor of a freight train was denied to be a fellow servant of a car inspector by whose negligence in failing to inspect the ladder of one of the cars the former is injured. *Illinois C. R. Co.* v. *Hilliard* (1896) 99 Ky. 684, 37 S. W. 75 (servants said to be "acting in different spheres").

[2] *Cleveland, C. C. & St. L. R. Co.* v. *Ward* (1896) 147 Ind. 256, 45 N. E. 325, Rehearing Denied in 147 Ind. 265, 46 N. E. 462; Following *Durkin* v. *Sharp* (1882) 88 N. Y. 225, where it was held that the inspection of a railroad track was a duty of the master, and that, if it was carelessly and negligently performed, even by a [illegible] inspector, the master would [illegible] liable. To excuse him from [illegible] the track must have been carefully inspected by a competent inspector.

The sufficiency of the number of inspectors of railroad cars, and their competency, furnish no defense to an action for injuries caused by a defect which could have been detected by a proper inspection. *Union P. R. Co.* v. *Daniels* (1894) 152 U. S. 684, *sub nom. Union P. R. Co.* v. *Snyder* 38 L. ed. 597, 14 Sup. Ct. Rep. 756.

Where a servant of a railroad company is injured or killed in consequence of the giving way of a defective bridge, the company cannot escape liability from the fact that the bridge was reconstructed properly in the first place, and it employed skilful and competent subordinates to inspect and repair its bridges. *Toledo, P. & W. R. Co.* v. *Conroy* (1873) 68 Ill. 560.

For other examples of the same form of statement, see *Egan* v. *Dry Dock, E. B. & H. R. Co.* (1896) 12 App. Div. 556, 42 N. Y. Supp. 188; *Bushby* v. *New York, L. E. & W. R. Co.* (1887) 107 N. Y. 374, 14 N. E. 407; *Elmer* v. *Locke* (1883) 135 Mass. 575; *Ohio & M. R. Co.* v. *Ivarey* (1891) 128 Ind. 197, 27 N. E. 479; *Texas & P. R. Co.* v. *O'Fiel* (1890) 78 Tex. 486, 15 S. W. 33; *Indiana Iron Co.* v. *Croy* (1897) 19 Ind. App. 565, 48 N. E. 803 (facts indicated that a proper inspection would have disclosed the danger).

[3] *Sabine & E. T. R. Co.* v. *Ewing* (1892) 1 Tex. Civ. App. 531, 21 S. W. 700.

[4] In *McDonald* v. *Michigan C. R. Co.* (1895) 108 Mich. 7, 65 N. W. 597, a railway company was held liable to one of its brakemen for an injury received through the failure of the engine to respond promptly to the air brake, which defect was known to the engineer, who continued to use the engine after knowing of the defect. The court said: "The record shows that there was no provision for inspection other than inspection by the engineer operating the train. He was expected to inspect his engine at all practicable times, and to report defects. This was no more than common prudence dictates should be required of all operatives of railway trains, and it is to be considered as a part of their du-

The antithesis between inspection which concerns matters of detail and inspection which has relation to intrinsic defects (see § 619, *post*) is the basis of the decisions cited below.[5] In other cases the consideration upon which stress is laid is the analogous one that the

ties in and about the operation of their trains; and this is as true when the railroad company makes no other provision for inspection as when it has another regular inspector. Such inspection, in the ordinary operation of the road, is the act of a fellow servant, as between the engineer and brakeman, and, as between them, does not constitute the engineer a representative of the master. To say that an engineer who should err in attempting to make the next station, after his engine became broken, acted as the representative of his master, thus holding the latter liable to the fireman, who was injured, would be carrying the rule too far. An unreported injury of the brakes, known to the brakeman, would be another illustration. The duty that the master owes to his patrons requires vigilance and care upon the part of the crew, and the master should be permitted to require it without subjecting himself to all the consequences following negligence by an inspector proper. . . . But if the company makes no other provision for inspection, and chooses to rely upon the reports of its men, deferring repairs until breaks occur, or until the operators, in due course of business, report defects, we must either say that it has neglected the duty of inspection altogether, or that it has imposed one of its duties upon its operatives, and that it does not fall within the limits of fellow service; or that it may avoid the duty which the law imposes by invoking the rule of fellow servant. So long as operatives do report, and the master repairs promptly, the jury may properly say that there is no negligence on the part of the master; but if defects are not seasonably repaired, the master neglects a duty, and we should not split hairs to determine whether it was his personal carelessness, or that of the agent whom he appoints to apprise him of his impending duty to repair, although such agent be a fellow operative of one who is injured by reason of a want of seasonable repair."

The reasoning in this case seems to be sounder and more in conformity with general principles than that of the following passage in *Thcleman* v. *Moeller* (1887) 73 Iowa, 108, 34 N. E. 765, where the court said: "It is the rule of this court that an employee cannot, in an action against his employer, recover for the negligence of a coemployee engaged in the prosecution of a common business. But this rule does not extend to an employee who is charged with no other duty than to inspect the machinery, in the operation of which the injury occurs. *Brann* v. *Chicago, R. I. & P. R. Co.* (1880) 53 Iowa, 595, 36 Am. Rep. 243, 6 N. W. 5. But the engineer, it will be seen from the statement of the evidence just made, was not confined by his duty to the mere inspection of the machinery. He had it in charge, was required to see that it was in good condition, and to repair it when broken or defective. These duties were not separated from the operation of the machinery. The engineer and plaintiff together operated it. The engine furnished the motive power propelling the saw, which did the work of sawing, — the very purpose for which both engine and saw were used. The saw could not be operated without the engine. The engineer was engaged in operating the saw. He was therefore a coemployee of plaintiff in the common business of both." There is no reason why the engineer should not have been regarded as occupying the dual position of a vice principal and of a mere servant. See § 561, *supra*.

[5] *Mayer* v. *Liebmann* (1897) 16 App. Div. 54, 44 N. Y. Supp. 1067 (owners of a brewery held liable for an injury to an employee caused by the fall of a beer keg through a run in which the kegs were lowered into a cellar, resulting from the rivet holes in the rods and brackets of the run becoming enlarged by use and rust, where the defect could have been discovered by proper examination).

In *Foa* v. *Le Comte* (1896) 2 App. Div. 61, 37 N. Y. Supp. 316, the court remarked: "As to the defendant's negligence, it is undisputed that if the plunger moved without pressure on the treadle, the press was defective. It was alleged that, though this was the case, the defendant had no knowledge of the fact. It was not necessary that the de-

fendant should personally have such knowledge. The repair of the press was not a mere detail of the work, as in *Webber* v. *Piper* (1888) 109 N. Y. 496, 17 N. E. 216, but a part of the master's duty to use reasonable care to provide safe appliances for his servants. This duty was committed to the machinist, but, being the master's duty, the machinist in the discharge of it was not a coservant, but represented the master. For his neglect the master was liable."

The improper adjustment of a brake rod constitutes a "defective appliance," and not a mere "neglect or failure in the detail of the work," within the rule relating to the liability of the master for defects in appliances, where, according to the regular course of the business, it was the duty of inspectors to make the adjustment, and not the duty of the train employees. *Woods* v. *Long Island R. Co.* (1896) 11 App. Div. 16, 42 N. Y. Supp. 140.

In *Bushby* v. *New York, L. E. & W. R. Co.* (1885) 37 Hun. 104, it was argued by the defendant's counsel that, as car stakes are uniformly furnished by the shipper, the defendant was under no obligation in respect to them, except to inspect them, and that that duty was performed in the present case; but the court held that the defendant could not divest itself of the duty it owed to its employees by leaving that duty to be performed by the shipper, or by making an arrangement with him whereby he undertook to perform it. This view was adopted by the court of appeals in (1887) 107 N. Y. 374, 14 N. E. 407, Danforth, J., remarking that the defect complained of was not in the loading, but in the preparation of the car to receive the load,—that is, in the car as a "lumber car."

Compare also *McIntyre* v. *Boston & M. R. Co.* (1895) 163 Mass. 189, 39 N. E. 1012, where the defendant was held liable for defective side stakes, the court saying: "The case is not one where an implement designed for repeated use had been weakened and made unfit for further service by such use; it is rather the case of the furnishing of an implement never fit for use, and evidently unfit. Such a stake could not, without negligence, have been placed where stakes were kept to be used for the purpose to which this was put. We need not inquire whether, if it had been taken from a number of sound and suitable stakes provided for that purpose by a workman whose duty it was to equip the car, the careless taking of this stake would have been negligence of a fellow workman the risk of which the plaintiff must stand, or whether negligence in equipping the car with stakes is something for which the defendant is responsible, whether it intrusts the work to one person or another."

A master cannot escape liability to servants for the nonperformance of his duty to use reasonable care that overhead shaftings shall be supported and maintained so as not to endanger their safety, by delegating its performance to an engineer placed in charge of the machinery in the factory. *Rustis* v. *James A. Banister Co.* (1899) 63 N. J. L. 465, 43 Atl. 651. The court disposed as follows of the contention that the case fell within the distinction drawn in certain cases cited, *viz.*, that inspection or repair, incidental to use by a servant of machinery or implements, is the servant's, not the master's, duty: "Of negligence in the performance of such incidental duty, other servants, as in case of any negligence of their fellows, take the risk. To illustrate,—an engineer while running his locomotive must not only watch its steam-gauge and the working of its mechanism, but may also need to have resort to his repair kit. For neglect of such duties his master is not liable to other servants in common employment with him. Simple or complex, the use of any instrumentality of human action involves some inspection, and may involve repair because of that very use. It is with such inspection and such repair only that the law charges the servant to the relief of the master, and it is plain that the use must be direct. The engineer runs, and therefore must inspect, his engine, but not the shafting or machinery to which he transmits power. The turner runs, and therefore must inspect, his lathe, but not the shaft that brings him power. Inspection while in use and inspection incidental to use are not convertible expressions. There may be inspection of moving mechanism devolving on no servant, but on the master. If so, negligence in that inspection or failure to properly repair defects discovered will be chargeable on the master, although he may select as the agent to perform his duty a fellow servant of those to whom he owes such duty. The test is always whether or not the duty left unperformed was the master's duty. In the case in hand it was properly left to

defective appliance was permanent, and not one merely for temporary use.[6]

584. Duty to inspect instrumentalities belonging to another person, but temporarily used by the master.— As regards instrumentalities not belonging to the master, but temporarily placed under his control for the purpose of facilitating the transaction of business in which both he and the owner have a common interest, the only rational and logical doctrine seems to be that a servant, inasmuch as he has nothing to do with the arrangements which the master may make with a third party for their mutual convenience, should be entitled to hold the master responsible for the negligent inspection of the thing so transferred, in all cases in which he would have been able to recover if that thing had been owned by, or permanently in the possession of, the master. And this is the view adopted in several jurisdictions.[1] The

the jury to say whether reasonable care for the safety of the workmen in the defendant's factory required inspection and repair of the line of shafting that fell and injured the plaintiff. If so, that duty could not be discharged by delegation, except at the master's peril, although the agent chosen was a fellow servant of the plaintiff. Properly, this case should not be considered as one involving the operation of machinery, but as one involving a place of working. That the support of a suspended piece of iron was rendered precarious by its motion in connection with machinery is an immaterial circumstance. The question for the jury was whether or not the defendant used reasonable care that what it set up over the heads of its servants should not fall down upon them."

[6] *Dougherty* v. *Milliken* (1898) 26 App. Div. 386, 49 N. Y. Supp. 905 (duty of an employer to see that an eyebolt to which a guy holding a permanent derrick in position is fastened is a reasonably safe and proper appliance cannot be delegated to a servant).

When a spur track is constructed for permanent use, it is an instrument for the use of those who conduct and manage the trains, and the liability of the master is referred to the principle that he cannot escape responsibility where it is his duty to supply suitable structures, instrumentalities, or appliances, by proving that he delegated to a proper agent their construction, superintendence, or repairs, and not to the rule under which it is held, in regard to temporary stagings erected for the repair or completion of buildings, that if suitable workmen and materials are provided his obligation is discharged. *Elmer* v. *Locke* (1883) 135 Mass. 575.

[1] That a car inspector is a vice principal, whether the cars whose condition is in question are foreign or domestic, has been declared in *Terre Haute & I. R. Co.* v. *Mansberger* (1895) 12 C. C. A. 574, 24 U. S. App. 551, 65 Fed. 196, Rehearing Denied in (1895) 14 C. C. A. 306, 24 U. S. App. 687, 67 Fed. 67; *Hobson, T. & S. F. R. Co.* v. *Myers* (1894) 11 C. C. A. 439, 24 U. S. App. 295, 63 Fed. 793, disapproving the Massachusetts doctrine (see § 618, note 1, *post*); *New Orleans & N. E. R. Co.* v. *Clements* (1900) 40 C. C. A. 465, 100 Fed. 415; *Fay* v. *Minneapolis & St. L. R. Co.* (1883) 30 Minn. 231, 15 N. W. 241; *Jones* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 212, 37 Atl. 1033; *Felton* v. *Bullard* (1899) 137 C. C. A. 1, 94 Fed. 781 (declining to follow Massachusetts decisions); *Louisville, N. A. & C. R. Co.* v. *Bates* (1896) 146 Ind. 564, 45 N. E. 108; *Chicago & N. W. R. Co.* v. *Gillison* (1897) 72 Ill. App. 207; *Galveston, H. & S. A. R. Co.* v. *Templeton* (1894) 87 Tex. 42, 26 S. W. 1066; *St. Louis, A. & T. R. Co.* v. *Putnam* (1892) 1 Tex. Civ. App. 142, 20 S. W. 1002; *Galveston, H. & S. A. R. Co.* v. *Voss* (1900; Tex. Civ. App.) 57 S. W. 910.

See also *Baltimore & P. R. Co.* v. *Hackey* (1895) 157 U. S. 72, 39 L. ed. 624, 15 Sup. Ct. Rep. 491; *Texas & P. R. Co.* v. *Archibald* (1898) 170 U. S. 665, 42 L. ed. 1188, 18 Sup. Ct. Rep. 777, where, although the precise point decided is merely that a railway com-

duty extends, of course, to defects inherent in the original construction of the appliance, as well as to defects which may have supervened while it was in use.[2]

In Massachusetts, while mere ownership is probably not regarded as being, of itself, a differentiating factor, the doctrine which will be explained at length in § 619, *post*, that a master is not liable for negligence in the inspection of instrumentalities in their ordinary use from day to day, involves the consequence that the employees deputed to examine foreign cars are merely fellow servants of the trainmen.[3] Under this theory it is conceded that the receiving company may be held responsible where it has omitted to provide for a proper system of inspection, and for its negligence in the selection of an inspector.[4] This represents the full extent of its liability.[5]

pany owes employees a duty to have foreign cars as well as its own inspected, the facts involved and the language used by the court show that the duty was regarded as one of the non-delegable class.

The Indiana case cited above overrules the suggestion to the opposite effect in *Cincinnati, H. & D. R. Co.* v. *McMullen* (1889) 117 Ind. 139, 20 N. E. 287, and explains *Neutz* v. *Jackson Hill Coal & Coke Co.* (1894) 139 Ind. 411, 38 N. E. 324, 39 N. E. 147 (see § 619, note 4, subd. (c), *post*), as a case in which the rule as to the liability of railway companies for the defective condition of foreign cars was not applicable, as the defective car was merely delivered to a coal company to be loaded with coal.

[2] Thus, a railway company is absolutely bound to use ordinary and reasonable care to see that a foreign car is constructed safely,—as, for example, that it is furnished with such appurtenances as handles, ladders, or other safeguards in common use. *Donner* v. *Delaware & H. Canal Co.* (1894) 164 Pa. 17, 30 Atl. 269.

[3] In *Mackin* v. *Boston & A. R. Co.* (1883) 135 Mass. 201, the court reasoned thus: "Although, perhaps, the mere ownership is not material, a car so received, while in transit to its destination, and until ready for such inspection as would be suitable and necessary in preparation for its return, would not come within the rule applicable to machinery and appliances furnished by the defendant. According to the course of business, well known to the plaintiff, and notorious, the defendant was in the habit of receiving many such cars daily, and drawing them over its road as a part of its freight trains. Even in the absence of any statute or special contract, regulating the terms of receiving and drawing such cars, the defendant was bound, as a common carrier, to receive and draw them. *Vermont & M. R. Co.* v. *Fitchburg R. Co.* (1867) 14 Allen, 462, 92 Am. Dec. 785. The obligation of drawing cars over its road would not extend to such as were in an unsafe condition: but, as to cars so received, the duty of the defendant is not that of furnishing proper instrumentalities for service, but of inspection; and this duty is performed by the employment of sufficient, competent, and suitable inspectors, who are to act under proper superintendence, rules, and instructions; and, however it may be as to other cars, the inspectors must be deemed to be engaged in a common employment with the brakeman as to such cars, while in transit, and until ready to be inspected for a new service." To the same effect, see *Keith* v. *New Haven & N. Co.* (1885) 140 Mass. 175, 3 N. E. 28; *Little Miami R. Co.* v. *Fitzpatrick* (1881) 42 Ohio St. 318; *St. Louis, I. M. & S. R. Co.* v. *Gaines* (1885) 46 Ark. 555.

[4] *Keith* v. *New Haven & N. Co.* (1885) 140 Mass. 175, 3 N. E. 28.

[5] *Thung* v. *Fitchburg R. Co.* (1892) 156 Mass. 13, 30 N. E. 769.

CHAPTER XXXII.

EXTENT OF AN EMPLOYER'S LIABILITY FOR NEGLIGENCE IN REGARD TO THE DETAILS OF THE WORK.

A. GENERALLY.

585. Difficulty of defining boundary line between the domains of liability and nonliability.

586. Supervision of details, not a master's duty.

587. Merely transitory perils, master not bound to protect the servant against.

588. Dangers caused by the progress of the work, master not bound to protect servant against.

589. Preparation or care of instrumentalities, master not responsible for, where these functions are a part of the work to be done.

590. Negligent use of safe appliances by fellow servant, master not responsible for.

591. Rationale of doctrine exempting master from liability for negligence in carrying out the details of the work.

592. Pleading.

a. Declaration.

b. Plea.

593. Instructions.

594. Functions of court and jury in passing upon the evidence.

595. Explanation of the classification of the cases cited in the ensuing sections.

B. NEGLIGENCE OF COSERVANTS INVOLVING MERELY THE USE OF THE INSTRUMENTALITIES, MASTER NOT RESPONSIBLE FOR.

596. Orders respecting the use of the instrumentalities.

a. Generally.

b. Order accompanied by an assurance of safety.

597. Choice of particular methods of work.

598. Disposition of the force of employees available for the work in hand.

599. Assigning servants to work for which they are unfitted.

600. Negligence in sending servants into abnormally dangerous places without warning.

601. Failing to warn servants as to dangers arising from the execution of the details of the work.

602. Absence from the post of duty.

603. Selecting an imperfect appliance from the stock available.

604. Failing to use the instrumentalities furnished by the master.

605. Negligence in failing to discard a defective for a suitable instrumentality.

606. Using instrumentalities in a manner not contemplated or authorized by the master.
607. Giving of signals.
608. Negligence in carrying out the express orders or regulations of the master.
609. Failure to give instruction.
610. Manipulation of the instrumentalities during the progress of the work.
611. Negligence in the transmission of the master's orders to other servants.

C. Negligence of coservants in respect to the preparation or structural modification of instrumentalities or their parts, when not imputed to the master.

612. Introductory.
612a. Negligence which produces structural unsafety of a temporary character.
613. Negligence in failing to adjust or secure instrumentalities or their parts while in use.
614. Negligence in the preparation of temporary structures or other instrumentalities as a part of the work; general rule.
615. Rationale and limits of a master's exemption from liability for the adjustment or preparation of instrumentalities.
616. Special circumstances not affecting the extent of the master's liability.
a. Superior rank of the delinquent employee.
b. Similarity or dissimilarity of the work in which the delinquent and injured servants were engaged.
c. Completion of appliance before plaintiff entered the employment.
617. When the delinquency is deemed not to be in respect to the details of the work.

D. Negligence of coservants whose duty it is to keep the instrumentalities in proper condition, when not imputed to the master.

618. Theory that a master is never liable for negligence in regard to inspection and repairs.
619. Theory that the liability of the master depends on the subject-matter of the inspection or repairs neglected.
620. Master liable where the delinquent servant was engaged in a different class of work.
621. Negligence in failing to replace an unsound by a sound appliance, when master not liable for.
622. All employees engaged in repairing regarded as coservants of each other.

A. Generally.

585. Difficulty of defining boundary line between the domains of liability and nonliability.—By dint of numerous decisions during the last thirty years with respect to the same or similar groups of facts, the boundary line between the respective domains of the doctrine of common employment and the doctrine of non-delegable duties may

now be traced with reasonable precision along a large part of its extraordinarily devious course. But its actual position is still so largely a matter of controversy in any jurisdiction in which the facts to be passed upon are not covered by a precedent so close as to be decisive, that the volume of litigation relating to this department of the law of employer's liability seems to be [illegible] ily growing. Nor, when we consider the extreme vagueness of the tests propounded for the purpose of distinguishing acts which are, from acts which are not, done by a servant as the master's representative, is there any ground for expecting that the further elucidation of principles in the future will be materially accelerated.[1]

[1] "The boundary line between the act of a master and the act of an employe is sometimes quite vague and shadowy." *Hankins* v. *New York, L. E. & W. R. Co.* (1894) 142 N. Y. 416, 421, 25 L. R. A. 390, 37 N. E. 466; *Vitto* v. *Kroga* (1897) 15 App. Div. 329, 44 N. Y. Supp. 1.

In *Fraser* v. *Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785, the court, after referring to the rule that the question whether the servant is a vice principal must be determined by the nature of the duties which he is performing, proceeded thus: "While we have no disposition to impinge upon the just and salutary rule that makes it the primary duty of the master to furnish to his servants safe instrumentalities and places for work, yet we are satisfied that, in many cases, the courts, by indulging in too much refined and artificial reasoning, have carried the rule altogether too far, and have often held the master liable in cases where the untutored minds of laymen, in the exercise merely of common sense, would unhesitatingly say that the master had not been derelict in the performance of any duty towards his servants. When it is considered that, where numerous employees are all engaged in prosecuting the same general object, there is hardly one of them whose duties do not, in part, at least, in some way relate to or affect the safety of the instrumentalities with which, or of the places in which, the others work, it is easy to see that the rule referred to may be, as it often has been, carried so far as to practically arrogate the whole doctrine of 'common employment.'"

The following passage from the dissenting opinion of Mitchell, J., in *Tierney* v. *Minneapolis & St. L. R. Co.* [illegible] 31 Minn. 311, 53 Am. Rep. 35 [illegible] W. 229, is worthy of notice as [illegible] one of the difficulties of ex[illegible] precision "the division [illegible] delegated duties and the [illegible] ... duties [illegible] understood as meaning [illegible] 's responsible to [illegible] servant for the negligence of every employee, however subordinate his station [illegible] is engaged in performing the [illegible] common executive duties in the matter of repairing, examining, or watching the instrumentalities intended for the use of other servants. I think this is a misapprehension of the rule, which has sometimes arisen from losing sight of the distinction between one who is clothed with the powers of the master in the control and supervision of some department of the business, and who is *pro hac vice* the representative or *alter ego* of the master, and one who simply performs what may be termed mere executive details. . . . The management of an extensive business, like that of operating a railroad, includes so many departments and so many grades of service that it may not always be an easy matter to draw the line between those who are to be deemed 'vice principals,' or representatives of the master, and those who are to be deemed 'fellow servants,' as to other employees; but the fact of such a distinction is everywhere recognized. To hold that the master is responsible to his servants for the negligence of every employee of the most subordinate rank who is engaged in the department of repairing, examining, watching, or guarding the instrumentalities used by other employees would virtually abrogate the whole doctrine of 'common employment.' There is hardly

It is sufficiently evident that, for the determination of the question what work may ordinarily be intrusted to servants without liability to their fellow servants for their negligence, the essence of the problem is to discover some rational basis upon which the theory that the master is under an absolute obligation to use due care in providing and maintaining a safe environment for his servants shall be adjusted to the practical situation which results from the fact that any delinquency of a servant which actually eventuates in injury to a fellow servant must, in the very nature of the case, operate so as to render the environment of the sufferer unsafe.[2] It is clear that the problem is not susceptible of the simple solution sometimes explicitly submitted by counsel, and still more frequently repudiated by judges in their opinions, that a delinquency may constitute a breach of the master's duty to furnish a safe place of work, merely because the place of work is thereby made unsafe for the time being.[3] All

an employee in the service of any railroad whose duties do not, in part, at least, relate to the matter of maintaining in safe condition the track or rolling stock. If the rule be that all these *pro hac vice* represent the master, and are performing his duty, the same rule must be applied to all masters alike. Such a rule, if applied to farmers, manufacturers, and others, would, I think, effect a radical change in what has been supposed to be the law. And yet this is, I think, the logical result to which the opinion in his case would seem to lead; for I can see no distinction in principle between these 'car inspectors' and switch tenders, station agents, guards, watchmen, and the like, in so far as their duties relate to maintaining in safe condition the machinery and other instrumentalities of the master, designed to be used by his employees."

[2] In a very recent case we find the New York court of appeals commenting upon the fact that "under the guise of an application of the rule requiring a master to furnish a reasonably safe place for his servants to work in, other attempts before this have been made to deprive a defendant of the benefit of another equally well-settled and just rule of the law of negligence, that a party shall not be held responsible to a servant for an injury occasioned by the neglect of a competent coemployee." *Perry* v. *Rogers* (1898) 157 N. Y. 251, 51 N. E. 1021.

[3] In *Hermann* v. *Port Blakely Mill Co.* (1896) 71 Fed. 853, the court said with regard to such a contention: "The word 'place,' in my judgment, means the premises where the work is being done, and does not comprehend the negligent acts of fellow servants, by reason of which the place is rendered unsafe or dangerous. The fact that the negligent act of a fellow servant renders a place of work unsafe is no sure and safe test of the master's duty and liability in this respect, for it may well be said that any negligence which results in damage to someone makes a particular spot or place dangerous or unsafe. To so hold would virtually be making the master responsible for any negligence of a fellow servant which renders a place of work unsafe or dangerous. It would be doing the very thing which it is the policy and object of the general rule not to do. It would create a liability which the master could not avoid by the exercise of any degree of foresight or care."

In *Stourbridge* v. *Brooklyn City R. Co.* (1896) 9 App. Div. 129, 41 N. Y. Supp. 128, the court, in discussing the contention of the plaintiff that the case fell within the principle that a master is bound to furnish a reasonably safe place for his servants to work, said: "If this rule is applicable to the present case, then it would follow that for the negligence of any servant to whom the master had committed the duty of providing a safe place the master himself would be liable. I think, however, that this is not the case of 'a place' within the meaning of the rule. As stated in *Butler* v. *Townsend* (1891) 126 N. Y.

the authorities are agreed as to the general proposition, that a master who has furnished a reasonably safe place to work in, and reasonably safe appliances to work with, cannot be held liable to a servant whose coservant has, by his negligence, rendered that place or those appliances unsafe, without the master's fault or knowledge.[4] But there are too many latent ambiguities in such a statement to admit of its being used as a serviceable differentiating test of liability or nonliability. Nor is the situation rendered at all clearer by laying down the rule that, if the negligent act or omission of a servant was in the discharge of the servant's duty, the master is not liable to coservants in the same employment for such negligent act or omission.[5] Equally

105, 26 N. E. 1017, doubtless in one sense of the term the employee must always be in some place, and doubtless, also, the place, in a certain sense, is not safe if an accident occurs there. But the rule that the master must provide a safe place for work only applies where the work and the place are not connected; where the work is not in the construction of the place."

"The negligent use by one employee of perfectly safe machinery will seldom be adjudged a breach of the master's duty of providing a safe place for other employees. Such a construction would make any negligent misplacement of a switch, any negligent collision of trains, even any negligent dropping of tools about a factory, a breach of the duty of providing a safe place." *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

"That it was the duty of appellant to use ordinary care in furnishing appellee a suitable track and other appliances upon and with which to do his work, there can be no question; but, if his fellow servants negligently encroached upon this track while he was at work, it must be regarded as their negligence, and not the negligence of the master. Were the rule different, every servant, properly engaged in operating cars upon the track, who receives injury through the negligence of another servant in improperly running thereon, would be entitled to recover against the master. In other words, in every case of collision of two trains, those employees receiving injury who were not in fault would be entitled to recover against the master, by reason of the negligence of those who were in fault, upon the theory that the duty of the master in reference to the track applies as well to the acts of fellow servants as to strangers. We incline to think, as an original proposition, that this would have been the proper rule for our courts to have adopted, but the adverse decisions are now too numerous to undertake to overturn them." *Texas & P. R. Co.* v. *Campbell* (1894; Tex. Civ. App.) 39 S. W. 1104.

Compare the language used in *Jarman* v. *Chicago & G. T. R. Co.* (1893) 98 Mich. 135, 57 N. W. 32; *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603; *Richmond Locomotive & Mach. Works* v. *Ford* (1897) 94 Va. 627, 27 S. E. 509; *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182; and also the cases as to the adjustment of railway switches cited in § 610, note 1, subd. (d), *infra*.

[4] "When, however, it appears that the working place originally, and when the employee was sent to do the work there was reasonably safe, but became unsafe at the particular time of the accident by causes that could not have been anticipated, by exigencies created in carrying out the details of the work, or by the neglect of a fellow servant, a different rule is applicable." *Baird* v. *Reilly* (1899) 35 C. C. A. 78, 63 U. S. App. 157, 92 Fed. 884.

"If a master provide a safe place for work, it is the duty of a servant by attention to details of arrangement and execution, to guard it against insecurity; and if a servant be injured by neglect of such details, no matter by whom, the negligence is that of a fellow servant." *Geoghegan* v. *Atlas S. S. Co.* (1893) 3 Misc. 224, 22 N. Y. Supp. 749.

[5] *Sofield* v. *Guggenheim Smelting Co.* (1900) 64 N. J. L. 605, 50 L. R. A. 417, 46 Atl. 711.

indefinite is the doctrine that the negligence of a coservant which relieves a master from liability is the omission of such coservant to perform some act which it is his duty to perform.[6] In practical litigation therefore, the courts have been accustomed to rely rather upon certain subsidiary conceptions which, when it is analyzed from various points of view, the general principle underlying these and similar formularies is found to involve. The varieties of phraseology in which the results of this analysis find expression are quite numerous, but may all, it would seem, be grouped under one of the heads indicated in the following sections.

"One distinguishing feature which is often helpful in doubtful cases is that of stability; if the implement, appliance, or structure is permanent in its character the duty of exercising a reasonable degree of care in its selection and maintenance is one from which the master cannot escape. Whereas, if it be portable, its erection, location, and operation may be, and generally are, regarded as mere details of the work, which pertain to the employee."[7]

586. Supervision of details, not a master's duty.— The most general form in which the limits of a master's obligations are susceptible of being stated is that he is not bound to supervise the merely executive details of the work to be done by his servants.[1]

[6] *Gates* v. *Chicago, R. & St. P. R. Co.* (1892) 2 S. D. 422, 50 N. W. 907.

[7] *Vaw* v. *Whitmore* (1899) 46 App. Div. 425, 61 N. Y. Supp. 731.

One indicium of a "detail" is that the appliance was not permanent, but temporary and movable, to be altered as the work progressed, by the workmen themselves, as their needs required. *Maher* v. *McGrath* (1895) 58 N. J. L. 469, 33 Atl. 945.

A "temporary contrivance" was opposed to a "permanent attachment" in *Kiffin* v. *Woolf* (1899) 39 App. Div. 229, 57 N. Y. Supp. 109.

Permanent conditions and temporary changes are also contrasted in *Vaw Pittsburgh Coal & C. Co.* v. *Peterson* (1894) 136 Ind. 398, 35 N. E. 7.

[1] "It would be extending the liability of the master beyond any established rule, to require him to oversee and supervise the executive detail of mechanical work carried on under his employment, and there is no rule of law which authorizes it." *Hassey* v. *Cooper* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556.

The master is under no duty to make regulations as to matters of executive detail. *Reed* v. *New York C. & H. R. R. Co.* (1877) 70 N. Y. 171 (not culpable to omit to prescribe how many men should be sent with a train of cars on their way to the repair shop).

The master does not insure his employees against each other, nor is he bound to supervise and direct every detail of their labor. They must exercise their own senses in the selection of material out of the mass provided for them; they must use their own judgments as to the manner of handling it. No employer could bear the burden of legal responsibility for every blunder or neglect on the part of each and all of his employees. The fact that one employee is more skilful than another, or, has had greater experience, and is so deferred to by others, does not change his relation to his employer or to his fellows. Nor does a difference in rank or grade of service change the rule. When the character of the business requires it, the master is as much bound to provide his workmen with a reasonably competent foreman as to provide them with tools; but, in either case, his liability ceases when he has made a suitable selection. What remains to be

A detail of the work in this sense has been defined as anything so "connected with work being done as to be an essential part of its performance" and "necessary to insure its safe completion."[2] But this definition is not of much assistance except in so far as it is explained

done is that each workman, whatever his rank or skill or experience, shall, with reasonable diligence and intelligence, discharge his duty towards his employer and his fellows.

"We are not disposed to discuss the question, on which some courts have differed, how far down in the chain of delegated appointments the master is to be held as bound to personal supervision. The starting point—that he is only liable for his own neglect—is one from which we have no right to depart. And it is plain enough that, when he is held to any personal supervision which, from the nature of his business, is impracticable, the rule is violated, and there is no tangible distinction left between liability to servants and liability to strangers. We think some of the decisions have led very far towards destroying all means of discernment." *Michigan C. R. Co.* v. *Dolan* (1875) 32 Mich. 510.

"It would be absurd to say that the owners owed a duty to the seamen that too long a hawser should never be used, or that signals in a fog should be properly given by their own vessel." *The Queen* (1889) 40 Fed. 694.

A railway company is under "no positive duty to supervise the details of the operation of switching cars" in its yard. *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269.

A railway company cannot be held liable for the negligence of the foreman of a gang of track repairers in failing to set a lookout, as prescribed by a rule of the company, upon the theory that some one else should have looked after him and seen that he did his duty. *Duthie* v. *Caledonian R. Co.* (1898) 24 Sc. Sess. Cas. 4th series, 934.

In *Ryan* v. *Cumberland Valley R. Co.* (1854) 23 Pa. 384, the court, in discussing an allegation of the plaintiff (a laborer on a construction train who was injured by the carelessness of the engineer), that the neglect of the engineer in failing to see that all the cars were safely coupled before starting his train was chargeable to the company, observed: "This alleged duty did not grow out of any contract between the plaintiff and the defendants, else the contract would have been charged as an essential and relevant bond of their relation, which has not been done. If it was a duty which the engineer owed to the plaintiff in any way, then the action ought to be against him for the breach of it. If he owed it to the defendants, then they alone can complain of its nonperformance. The duty must therefore be alleged as that of the defendants to the plaintiff. In what form shall we put it, or how shall we define it? Is it that, when persons are employed to work for others, the employers are bound to see that the instruments of their work are and shall continue in a condition to be used with safety? Then the coachman, the wagoner, and the carter, who ought to know more about the vehicles which they use than their employers do, have a practical warranty that they are in good order, though practically we know that many of them are nearly worn out; the wood chopper and the grubber are insured that their axe or mattock shall not injure them by flying off the handle; the engineer, the miller, the cotton spinner, and the wool carder have a guaranty for the accidents that may befall them in the use of the machinery which they profess to understand, and which they ought so to understand as to be able to inform their employers when it is out of order. If this be so, then the care and skill required of workmen is reduced very much below what is ordinarily expected of them. If there be any distinction between any of the cases put and the one in hand, it is too narrow to be made the foundation of a new rule, or to cancel the force of the analogy which they afford. Certainly such a duty has never been considered as belonging to these relations, and therefore it cannot be law."

Other illustrations of the same phraseology may be found in *Doncaster* v. *Baumann* (1899) 40 App. Div. 502, 58 N. Y. Supp. 110; *Hart* v. *New York Floating Dry Dock Co.* (1882) 16 Jones & S. 460; *Frazee* v. *Stott* (1899) 120 Mich. 624, 79 N. W. 896.

[2] *Golden* v. *Sieghardt* (1898) 33 App. Div. 161, 53 N. Y. Supp. 460.

by the more categorical statements of principles in the following sections.[3]

In nearly all the cases in which this rule as to details of work constitutes a protection to the master, the evidence shows actual negligence on the part of the fellow servants of the plaintiff. But it is a mistake to lay down without qualification that "the negligence in such a case is said to resolve itself into the negligence of a fellow servant."[4]

Sometimes the circumstances seem to be such that the master's immunity may be referred indifferently to any one of three conceptions, *viz.*, that the servant was himself a participant in the acts of negligence, that his fellow servants were negligent, or that the negligent act was an incidental detail of the work, as to which no duty on the master's part can be predicated.[5]

587. Merely transitory perils, master not bound to protect the servant against.—(See also § 601, *infra.*)—A form of expression which is often met with in recent cases, particularly in Massachusetts, is that there can be no recovery where "the danger to which the plaintiff was exposed was merely a transitory one, existing only on the single occasion when the injury was sustained, and due to no fault of plan or

[3] It may be remarked that by predicating the nonexistence of a duty on the part of an employee alleged to be a vice principal to supervise his subordinates in the performance of their work, the necessity of inquiring into the correctness of that allegation is sometimes dispensed with. A conductor, for instance, is bound to give orders as to the movement of the several parts of a freight train at a station, but he is not in duty required to follow up each brakeman, and see how each movement is executed. *Relyea* v. *Kansas City, Ft. S. & G. R. Co.* (1892) 112 Mo. 86, 18 L. R. A. 817, 20 S. W. 480, where it was held not to be negligence for the conductor to leave to the brakeman the work of seeing that the brakes were properly set on each of the cars which were left standing on a grade.

[4] *Jones* v. *St. Louis, A. & P. Packet Co.* (1891) 43 Mo. App. 398, citing *Bowen* v. *Chicago, B. & K. C. R. Co.* (1888) 95 Mo. 268, 277, 8 S. W. 230. Compare also the following passage from the opinion in *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860.

"Assuming that his attention was so called to the matter, as testified to by this witness, was the foreman guilty of negligence attributable to the master, in permitting the workmen to go on with the work upon the platform that they had erected to suit themselves? If his judgment was wrong with respect to the sufficiency of the platform, so was that of the workmen. They knew as much with respect to the safety of the place where they stood as he did. None of the masons suggested to any one that the scaffold was unsafe. Whatever was said on that subject was by one of the plumbers when he saw the men using their scaffold. If, under these circumstances, the foreman had refused or declined to interfere with what had been done by the workmen, and he trusted to their judgment, it was not such negligence as to charge the defendants with the result of the accident. It was, at most, [an] error of judgment on the part of the foreman with respect to a detail of the work in which the masons were engaged. He concluded, as the workmen themselves did, that the place was safe, and in determining that question they were all coservants."

[5] In *Hogan* v. *Field* (1887) 44 Hun, 72, the action was held to be barred on the first of these grounds; but, upon the evidence, the other two would apparently have been available as valid defenses.

construction, or lack of repair, and to no permanent defect or want of safety in the defendant's works, or in the manner in which they had been ordinarily used."[1] Or, as the rule has also been enunciated, "the absolute obligation of an employer to see that due care is used to provide safe appliances for his workmen is not extended to all the passing risks which arise from short-lived causes."[2]

588. Dangers caused by the progress of the work, master not bound to protect servant against.— One special application of the general conception underlying the rule stated in the preceding section is that, where the work is of such a character that, as it progresses, the environment of the servant must necessarily undergo frequent changes, the master is not bound to protect the servants engaged in it against the dangers resulting from those changes.[1] The cases in which this

[1] *Meehan* v. *Speirs Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518.

[2] *Whittaker* v. *Bent* (1897) 167 Mass. 588, 46 N. E. 121, per Holmes, J.

[1] Where the place as it stands when the work begins is perfectly safe, and the danger can only arise as the work progresses, and be caused by the work done, it is not the duty of the employer to stand by during the progress of the work, to see when a danger arises. It is sufficient if he provides against such dangers as may possibly or probably arise, and gives the workmen the means of protecting themselves. *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102.

The duty of a master to provide his servants a safe place in which to work does not attach "where the place becomes dangerous in the progress of the work, either necessarily or from the manner in which the work is done." *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 26 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970.

"The employer's obligation towards an employee does not oblige him to keep the working place in a safe condition at every moment of the work, so far as its safety depends upon the due performance of the work by fellow servants of the employee." *Baird* v. *Reilly* (1899) 35 C. C. A. 78, 63 U. S. App. 157, 92 Fed. 884.

"It makes a vast difference in the question of the liability of the master whether, when a servant meets with an accident from a defect in the previous work, occurring through the negligence of a servant engaged in its construction, the negligence is to be deemed as arising from a failure to provide a safe place, or as negligence in the general enterprise in the prosecution of which all the workmen are engaged. If the first, the master is liable, even though the negligence is that of a servant; because the duty is that of the master. If the second, it is the negligence of a co-servant, and the master is not liable for it." *Stourbridge* v. *Brooklyn City R. Co.* (1896) 9 App. Div. 129, 41 N. Y. Supp. 128.

The rule that a master is bound to furnish his servant a safe place in which to do his work does not apply "where the prosecution of the work itself makes the place and creates its dangers." *O'Connell* v. *Clark* (1897) 22 App. Div. 166, 48 N. Y. Supp. 74.

The rule that the duty of furnishing and maintaining a safe place and safe appliances is non-delegable "cannot apply to a condition of dangers brought about by the negligent acts of a servant or a fellow servant, for whose acts he is responsible, nor to the hazards and dangers arising from the employment and belonging to the peculiar occupation in which the servant is engaged, and which he assumed when he entered the master's service." *Anderson* v. *Daly Min. Co.* (1897) 16 Utah, 28, 50 Pac. 815.

In *Petaja* v. *Aurora Iron Min. Co.* (1896) 106 Mich. 463, 32 L. R. A. 435, 64 N. W. 335, 66 N. W. 951, the court commented upon the failure of counsel to cite any cases supporting the theory of the plaintiff "that a master is obliged to make safe the place which the servant makes and occupies as a means of doing his work, or which results as an

principle is most usually applied are those involving the various kinds of construction work.[2]

It should be observed that in some cases of this class the element of a fellow servant's negligence is not involved at all, and recovery is denied on the broad ground that there is no breach of duty on the master's part.[3]

589. Preparation or care of instrumentalities, master not responsible for, where these functions are a part of the work to be done.—(See also subtitle C, *infra*.)—The cases determined by the conception adverted to in the preceding section often involve facts which may also be discussed with relation to the principle that the master is not liable as for negligence in failing to provide or maintain safe instrumentalities in any case where the preparation or care of these instrumentalities constitutes a part of the work which the injured servant or his coemployees undertook to do.[1] Both aspects of the master's nonlia-

incident of the work, although it necessitates his presence in a place to a greater or less degree unsafe;" and asked: "In such cases, must the master stay with, or follow up, the servants, to be certain that they make the place safe, so that they or some of them be not injured?"

In another case a contrast is drawn between permanent conditions and conditions in the place of work created by the workmen themselves, as the work progresses, which are continually changing in the course of the work. *Foley* v. *Brooklyn Gaslight Co.* (1896) 9 App. Div. 91, 41 N. Y. Supp. 66.

Compare also § 585, note 7, *supra*.

[2] "The obligation of a master to provide reasonably safe places and structures for his servants to work upon does not impose upon him the duty, as towards them, of keeping a building which they are employed in erecting in a safe condition at every moment of their work, so far as its safety depends upon the due performance of that work by them and their fellows." *Armour* v. *Hahn* (1884) 111 U. S. 313, 28 L. ed. 440, 4 Sup. Ct. Rep. 433.

"The duty of a master to furnish a safe place for the performance of work does not require it to keep that place safe under the constantly changing conditions which the performance of such a work as the construction of a sewer necessitates." *Minneapolis* v. *Lundin* (1893) 7 C. C. A. 344, 19 U. S. App. 245, 58 Fed. 525.

See also *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102; *Donnelly* v. *Booth Bros. & H. I. Granite Co.* (1897) 90 Me. 111, 37 Atl. 874, and the cases cited in subtitle C, *infra*.

[3] Thus it has been held that the danger to workmen walking on the keelson of a barge which they were engaged in unloading, owing to the rounding top thereof, is not one for which the master is responsible, as it is a condition which the workmen create as the work progresses and the keelson is exposed. *Foley* v. *Brooklyn Gaslight Co.* (1896) 9 App. Div. 91, 41 N. Y. Supp. 66.

So, a master is not liable as for a failure to furnish a safe place of work, where he ordered the injured servant to push a draft of bales, which, while it was being hoisted, had caught in the coamings of a hatch, and one of the bales fell on the servant. *O'Connell* v. *Clark* (1896) 6 App. Div. 33, 39 N. Y. Supp. 454 (1897) 22 App. Div. 466, 48 N. Y. Supp. 74.

[1] In *Robinson* v. *George F. Blake Mfg. Co.* (1887) 143 Mass. 528, 10 N. E. 314, the court thus criticised an instruction: "It is not a universal rule of law that an implied duty rests upon an employer to furnish suitable means, machines, implements, and instrumentalities for doing his work. This may depend on the nature of the employment and the circumstances of the case. The natural inference from these might be that the servant or person employed was to furnish his own tools and appliances. Or the nature of the work to be done might be such that it would be natural and

bility are sometimes associated closely together, as where a court speaks of a place in which conditions are constantly changing, and of which the furnishing and preparation was in itself part of the work the employees were required to perform.[2]

The consideration of this principle from a slightly different stand

reasonable to infer that both parties understood that the servant should procure whatever might prove to be needed, according to his own judgment, as a part of his employment. If a person is employed to do a piece of work himself, with the understanding that he shall procure such means, materials, or implements as he finds to be needed, and if he enters upon the execution of the work and procures insufficient or defective means, materials, or implements, it might be found that the master did not assume any responsibility to such servant for the sufficiency or quality, even though he was to pay for them. Nor is the case necessarily different if the person so employed is authorized to engage others to help him do the work, as well as to procure means and appliances. If, for example, the work to be done with the use of a simple fulcrum ing of a heavy article, which could be done with the use of a simple fulcrum and lever, and the employer's foreman, in charge of the work, should be left to provide them at the place where the work was to be done, and he should take a common stone for the fulcrum and a piece of scantling or a rail from a neighboring fence for the lever, and the stone should roll, or the lever break, and one of the men engaged in the work should be hurt thereby, a jury would naturally find that such selection of materials and appliances was a part of the work to be done, and not within the implied duty and undertaking of the employer."

"The rule that the master must provide a safe place for work only applies where the work and the place are not connected: where the work is not in the construction of the place." *Stourbridge* v. *Brooklyn City R. Co.* (1896) 9 App. Div. 129, 41 N. Y. Supp. 128.

"A distinction has, however, been made, so that where it appeared that as a part of or an incident to the work which the employee was to do, such employee was required to erect a scaffold or other appliance necessary to do the work, neglect in the erection of such scaffold was not a neglect to perform a duty that the employer owed to his employee." *Richards* v. *Hayes* (1897) 17 App. Div. 422, 45 N. Y. Supp. 234.

"The rule that a master must furnish suitable tools and appliances and a safe place to work is qualified by another,—that where the master furnishes suitable appliances, and the duty to adjust them properly to work of a temporary character is neglected by a workman whose business it is to attend to that detail, the master is not liable to a fellow workman injured by that neglect." *Dwyer* v. *Hall* (1897) 21 Misc. 452, 47 N. Y. Supp. 630.

"We shall not attempt to do what no court has yet been able to do, *viz.*, to formulate a statement of the rule that will furnish a test by which to determine every case; but we may suggest that, in our opinion, an important consideration, often overlooked, is whether the structure, appliance, or instrumentality is one which has been furnished for the work in which the servants are to be engaged, or whether the furnishing and preparation of it is itself part of the work which they are employed to perform. If it be the latter, then, as is well settled by our own decisions, the master is not liable." *Fraser* v. *Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785.

The rule as to non-delegable duties does not apply to a case "where several persons are employed to do certain work, and by the contract of employment, either express or implied, the employees are to adjust the appliances by which the work is to be done." *Barnes* v. *Sennett* (1893) 99 Cal. 363, 33 Pac. 916.

To the same effect see the following cases: *Beesley* v. *F. W. Wheeler & Co.* (1894) 103 Mich. 196, 27 L. R. A. 266, 61 N. W. 658; *Retaja* v. *Aurora Iron Min. Co.* (1896) 106 Mich. 469, 32 L. R. A. 438, 66 N. W. 951, Affirming on rehearing 106 Mich. 463, 32 L. R. A. 435, 64 N. W. 335; *Sims* v. *American Steel Barge Co.* (1894) 56 Minn. 68, 57 N. W. 322; *Marsh* v. *Herman* (1894) 47 Minn. 537, 50 N. W. 611; *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017; and the cases cited in subtitle C, *post*.

[2] *Coal & Min. Co.* v. *Clay* (1894) 51 Ohio St. 542, *sub nom. Consolidated*

point yields the rule that it is always a condition precedent to the exemption of the master from liability that the operations which were the immediate cause of the injury were a part of the regular duties of the servant themselves.[3]

590. Negligent use of safe appliances by fellow servant, master not responsible for.—(See also subtitle B, *infra*.)—Another ground of distinction adverted to by the courts is based upon the theory that the master, while responsible for intrinsic defects in the instrumentalities, which would not have existed if the servants intrusted with the functions of supplying or maintaining them had exercised proper care, cannot be held liable for injuries caused by the manner in which the servants use those instrumentalities for the performance of their work.[1] That is to say, the master is deemed to have performed his whole duty, where he has supplied an instrumentality which is reasonably safe if it is carefully used by the fellow servants of the injured

Coal & Min. Co. v. *Floyd*, 25 L. R. A. 848, 38 N. E. 610.

[3] *McGinty* v. *Athol Reservoir Co.* (1892) 155 Mass. 183, 29 N. E. 510.

[1] The duty of the master "does not extend so far as to require of him that he should be responsible for the negligence of his servants, if of competent skill and experience, in using or managing the means and appliances placed in their hands in the course of their employment, if they are neither defective nor insufficient." *Snow* v. *Housatonic R. Co.* (1864) 8 Allen, 441, 85 Am. Dec. 720.

"For the management of his machinery and the conduct of his servants a master is not responsible to their fellow servants." *Gilman* v. *Eastern R. Co.* (1866) 13 Allen, 433, 90 Am. Dec. 210.

"The master has done his whole duty when he supplies the proper appliances, the care and use of which must be necessarily intrusted to his servants. *Jones* v. *Granite Mills* (1878) 126 Mass. 84, 30 Am. Rep. 661.

A master is not liable for acts "incidental to the management and use of the appliances furnished." *McKinnon* v. *Norcross* (1889) 148 Mass. 533, 3 L. R. A. 320, 20 N. E. 183.

"One line of distinction between vice principals and coemployees is in the duty, in one instance, to supply or maintain instrumentalities of the service, and, in the other, of using the instrumentalities supplied." *Vents* v. *Jackson Hill Coal & C. Co.* (1894) 139 Ind. 411, 38 N. E. 324, 39 N. E. 147.

A master is not liable for the "negligence of those engaged with the plaintiff in making use of a place admittedly safe." *Baron* v. *Detroit & C. Steam Nav. Co.* (1892) 91 Mich. 585, 52 N. W. 22.

"It is no part of the duty of the master to direct workmen in the use of the tools with which they perform their work." *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556.

"The line of demarcation here between the absolute duty of the master and the duty of the servants is the line that separates the work of construction, preparation, and preservation from the work of operation. Is the act in question work required to construct, to prepare, to place in a safe location, or to keep in repair the machinery furnished by the employer? If so, it is his personal duty to exercise ordinary care to perform it. Is the act in question required to properly and safely operate the machinery furnished, or to prevent the safe place in which it was furnished from becoming dangerous through its negligent operation? If so, it is the duty of the servants to perform that act, and they, and not the master, assume the risk of negligence in its performance." *St. Louis, I. M. & S. R. Co.* v. *Needham* (1894) 25 L. R. A. 833, 11 C. C. A. 56, 27 U. S. App. 227, 63 Fed. 107.

After rejecting the theory that the negligent use of materials can be, in the majority of cases, a breach of the master's duty, the court said: "The true idea is that the place and the instruments must in themselves be safe,

person.[2] Or, in other words, where an appliance is reasonably safe to operate, and its operation necessarily rests upon the care, intelligence, and fidelity of the fellow servants of the person injured, the master will not be held responsible for an accident the nature of which indicates that it must have been due to the manner in which the appliance was operated by one of those workmen.[3]

The cases decided on this theory may sometimes involve facts which show the master to be free from culpability for the reason that the instrumentality in question was applied to the purpose of the work without his authority. Compare § 567, *ad finem, ante*.

Negligence as regards the use of instrumentalities may, it is clear, be committed in one of the following ways. It is often difficult to say precisely under which of the categories the delinquency in question should be classed, but in practical litigation this is not a matter of any importance, since the result is the same, whatever may be the strictly logical designation of the negligent act.

(a) The delinquent coservant may have handled or placed a safe instrumentality so carelessly as to convert it, for the time being, into an injurious agency.[4]

(b) The delinquent may have created the abnormal danger by his negligence in selecting the defective instrumentality from the stock of materials supplied.[5]

for this is what the master's duty fairly compels; and not that the master must see that no negligent handling by an employee of the machinery shall create danger." *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837.

In *Hard* v. *Vermont & C. R. Co.* (1860) 32 Vt. 473, the court adverts to the difference between the master's obligation as to equipping and as to operating a railway.

See also *Smith* v. *Empire Transp. Co.* (1895) 89 Hun, 588, 35 N. Y. Supp. 534.

[2] *Fowler* v. *Chicago & N. W. R. Co.* (1884) 61 Wis. 159, 21 N. W. 40; *Hogan* v. *Smith* (1891) 125 N. Y. 774, 26 N. E. 742.

[3] *Dana* v. *Crown Point Iron Co.* (1893) 51 N. Y. S. R. 238, 22 N. Y. Supp. 455.

[4] See the cases cited above, and also the following: *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970; *Peirce* v. *Kile* (1897) 26 C. C. A. 201, 53 U. S. App. 891, 80 Fed. 865; *The Queen* (1889) 40 Fed. 694; *McDermott* v. *Boston* (1882) 133 Mass. 349; *Treka* v. *Burlington, C. R. & N. R. Co.* (1896) 100 Iowa, 205, 69 N. W. 422; *Worhide* v. *Missouri Car & Foundry Co.* (1888) 32 Mo. App. 367; *McLaughlin* v. *Camden Iron Works* (1897) 60 N. J. L. 557, 38 Atl. 677.

"Any machine may be made dangerous if wrongfully or negligently used." *Calloway* v. *Allen* (1894) 12 C. C. A. 114, 24 U. S. App. 388, 64 Fed. 297.

[5] See especially the cases cited in § 605, *infra*, and the following: *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017; *Daley* v. *Boston & A. R. Co.* (1888) 147 Mass. 101, 16 N. E. 690; *Young* v. *Boston & M. R. Co.* (1897) 168 Mass. 219, 46 N. E. 624; *Kennedy* v. *Spring* (1893) 160 Mass. 203, 35 N. E. 779; *McKinnon* v. *Vorcross* (1889) 148 Mass. 533, 3 L. R. A. 320, 20 N. E. 183; *Fraser* v. *Red River Lumber Co.* (1891) 45 Minn. 235, 47 N. W. 785; *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 697; *Boaz* v. *McNeil* (1898) 35 App. Div. 323, 54 N. Y. Supp. 956; *Guggenheim Smelting Co.* v. *Flanigan* (1898) 62 N. J. L. 354, 41 Atl. 844, 42 Atl. 145; *Willis* v. *Ore-*

(c) The delinquent coservant may have failed to use the instrumentalities furnished, and so created the abnormal danger which caused the injury.[6]

(d) The delinquent may have been in control of the injured servant, and caused the injury by giving his fellow servants some direction as to the use of the appliances, or by sending the injured servant to work in a specially dangerous place without due warning, or with a positive assurance that he would not be put in peril by complying with the order.[7]

591. Rationale of doctrine exempting master from liability for negligence in carrying out the details of the work.— Viewed from the standpoint of the extent of a master's obligations to his servant, the doctrine that there can be no recovery for the negligence of a coservant in respect to the details of the work has been regarded as one deduced *ex necessitate rei*.[1] It seems difficult, however, to concede that

gon R. & Nav. Co. (1881) 11 Or. 257, 4 Pac. 121; *Ross* v. *Walker* (1891) 139 Pa. 42, 21 Atl. 157, 159.

"To provide these supplies (*i. e.*, new wicks) for use was the master's duty: to take them as they were needed for use was the servant's duty." *Simpson* v. *Central Vermont R. Co.* (1896) 5 App. Div. 614, 39 N. Y. Supp. 464.

[6] See, for example, *Griffiths* v. *Gidlow* (1858) 3 Hurlst. & N. 648, 27 L. J. Exch. N. S. 404; *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970; *Keane* v. *Troy Steel & Iron Co.* (1893) 139 N. Y. 369, 34 N. E. 901; *Hulson* v. *Ocean S. S. Co.* (1888) 110 N. Y. 625, 17 N. E. 742; *Dicer* v. *Hall* (1897) 21 Misc. 452, 47 N. Y. Supp. 630, Reversing 20 Misc. 677, 46 N. Y. Supp. 533; *McAndrews* v. *Burns* (1876) 39 N. J. L. 117 (omission to deliver here); *Lapale* v. *Cook* (1899) 21 R. I. 158, 42 Atl. 519, and the cases cited in §§ 604–606, *infra*.

The duty of a foreman in using the means and appliances provided for safely and properly carrying on the work is that of a servant engaged in the same business with the plaintiff, even if he acted as the representative of the master in furnishing such means and appliances. *Floyd* v. *Snyden* (1883) 134 Mass. 563.

[7] See *Hodgkins* v. *Eastern R. Co.* (1876) 119 Mass. 419; *Harlan* v. *Chicago & A. R. Co.* (1895) 65 Fed. 37; *McBride* v. *Indianapolis Frog & Co.* (1892) 5 Ind. App. 482, 32 N. E. 579; *Tullo* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29; *Craig* v. *Chicago & A. R. Co.* (1893) 54 Mo. App. 523; and the cases cited in §§ 596–600, *infra*. Compare also §§ 435, 448, *ante*.

[1] "Some of the details must necessarily rest upon the intelligence and care of the servants." *Sullivan* v. *New York, N. H. & H. R. Co.* (1892) 62 Conn. 209, 25 Atl. 711.

"That appellee did not owe to appellant, as its employee, under the circumstances, the legal duty to support the rims in question by the hands of some one of its agents or representatives in the manner as Huey was doing just previous to the accident, is certainly evident. If it could be said to be charged with that duty, then every corporation engaged in the same line of business as it was would, in legal contemplation, be required to be present at all times and places at its factory when lumber, timber, or iron or other heavy material of like character was being handled or moved by some of its employees, and by the hands of such agent or representatives prevent such iron, timber, or lumber, or other material connected therewith from slipping and falling upon said employees, and thereby injuring them." *Hodges* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 686, 52 N. E. 391, 54 N. E. 383.

"When proper tools and appliances are provided upon the premises for the use of employees, no authority can be found for imposing upon the employer

such a consideration has any real weight, except in so far as it may be a step towards the conclusion that the servant assumes the consequent risks. See below. Taken by itself it may be said to be equally potent as a reason for insisting that the master should be chargeable with the negligence which, under the arrangements which he has chosen to make for carrying on his business, he knows to be occasionally inevitable. *Qui sentit commodum idem sentire debet et onus.* In whatever cloak of verbiage it may be wrapt up, a doctrine having no more solid foundation than the hypothesis that one of these inferences rather than the other should be drawn from the existence of the conditions adverted to is merely one formulated *ex cathedra*. Compare remarks at the end of § 475, *ante*.

A much more satisfactory reason for absolving the master from liability for negligence of this description is, that the servant is chargeable with an assumption of such risks because he knows them to be incident to the performance of the duties voluntarily undertaken by him. This is equivalent to saying that in cases in which the servant's right to recover is denied on account of the nature of the injurious act, this conclusion is, in the last analysis, referable to precisely the same elementary conception as that which underlies the doctrine of common employment itself. See § 472, *ante*.[2] In this point of

the further duty of seeing that the servant does not select from among a number of appliances the one not adapted to the work in which for the time he may be occupied. If such a responsibility is cast upon the master, it would be necessary in his protection to have an *alter ego* to attend constantly upon every workman in his service, to see that he did not use an implement unfitted for his work." *Guggenheim Smelting Co.* v. *Flanigan* (1898) 62 N. J. L. 354, 41 Atl. 844, 42 Atl. 145.

In a Delaware case the court speaks of a "duty ministerial in its character and of executive detail in the operation on the road which must, of necessity, be vested in [and trusted to] the faithfulness of the employee." *Wheatley* v. *Philadelphia, W. & B. R. Co.* (1894) 1 Marv. (Del.) 305, 30 Atl. 660.

See also to the same effect, *Kudik* v. *Lehigh Valley R. Co.* (1894) 78 Hun, 492, 29 N. Y. Supp. 533.

[2] "The master is not responsible for the negligent performance of some detail of the work intrusted to the servant, whatever may have been the grade of the servant who executes such detail. If it is the work of the servant, and he volunteers to perform it, and the master is not at fault in furnishing proper materials, there is no breach of duty on the part of the latter." "The scaffolding having been constructed by the workmen themselves, or under their direction, if appliances which they made use of for that purpose were in any respect defective or insufficient, they had, so far as appears, the same means of knowing that fact as the defendants." *Kimmer* v. *Weber* (1897) 151 N. Y. 417, 45 N. E. 860.

In another case the same court speaks of "a detail of the working or management of the business, the risks attending which have been assumed by the party taking employment." *Cullen* v. *Norton* (1891) 126 N. Y. 1, 26 N. E. 905.

In *Hatton* v. *Hilton Bridge Constr. Co.* (1899) 42 App. Div. 403, 59 N. Y. Supp. 272, the court, after citing several cases as to details of work, said: "Those authorities refer to accidents occurring during the progress of the work, where the servant is necessarily aware of the danger: where he knows, or ought to know, as much in regard to the safety of the place where he is called to work as the master; to cases where the master has performed his duty of furnishing and

view it will obviously be material in doubtful cases to inquire whether the operation which was the cause of the injury was ordinarily intrusted to the employees themselves.[3]

592. Pleading.—*a. Declaration.*—A declaration alleging facts which show that, if there was any negligence, it consisted in the omission of some duty characteristic of a mere servant, acting as such, is demurrable.[1] The operation of this rule cannot be prevented by the

maintaining a safe place for the servant to perform his work in, and safe and proper instrumentalities therefor. After that duty has been performed, they determine that if a servant is injured because of the manner of the performance of the work, the master is not liable."

In *Hogan* v. *Field* (1887) 44 Hun, 72, the plaintiff was held not entitled to recover for the reason that while the construction of the defective scaffold was no part of the business of the gang of workmen to which he belonged, they, without objection, undertook the erection of it, and had the control and management of the work.

In *McCone* v. *Gallagher* (1897) 16 App. Div. 272, 44 N. Y. Supp. 694, the fact was emphasized that the servant's knowledge of the details and requirements of the temporary appliance which the servants were left to construct as a part of the work was as complete as that of the master.

In *Maher* v. *McGrath* (1896) 58 N. J. L. 469, 33 Atl. 945, the error in the construction of a scaffold was said to be one "committed by workmen with whom he [the plaintiff] was working in a common employment, subject to a common danger which all equally knew must result from a negligent construction."

In *Brothers* v. *Carter* (1873) 52 Mo. 372, 375, 14 Am. Rep. 724, the court said: "If a workman or servant is to work in conjunction with others, he must know that the carelessness of one of his fellow servants may be productive of injury to himself, and he must know that neither care nor diligence by the master can prevent the want of due care and caution on the part of his fellow servants. The servant, on entering upon the employment, is supposed to know and assume this risk." This statement was adopted in *Brown* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 162, 38 Am. Rep. 285, 6 N. W. 484.

"As between themselves, no one more than another in the ordinary work of navigation represents the owner, or performs an owner's duty; and therefore each takes the risk of the other's negligence." *The Queen* (1889) 40 Fed. 691.

See also *Armour* v. *Hahn* (1884) 111 U. S. 313, 28 L. ed. 440, 4 Sup. Ct. Rep. 433, the effect of which is stated in § 612a, note 1, subd. (d), *supra*; *Minneapolis* v. *Landin* (1893) 7 C. C. A. 314, 19 U. S. App. 245, 58 Fed. 525; *Oregon Short-Line & U. N. R. Co.* v. *Frost* (1896) 21 C. C. A. 186, 44 U. S. App. 606, 74 Fed. 965; *Soutar* v. *Minneapolis International Electric Co.* (1897) 68 Minn. 18, 70 N. W. 796; *Slater* v. *Jewett* (1881) 85 N. Y. 61, 29 Am. Rep. 627; *Tully* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29; *Donnelly* v. *Brown* (1887) 43 Hun, 470.

[3] This was the conception present to the mind of the court in a recent New York case when it used the phrase, "One of the details of the business that is generally left to the workmen themselves." *Kimmer* v. *Webber* (1897) 151 N. Y. 417, 45 N. E. 860. So, a Federal court speaks of acts which "may be all performed, and, for the most part, usually are directed and performed, by others than the master." *The Queen* (1889) 40 Fed. 694.

[1] *Dwyer* v. *American Exp. Co.* (1892) 82 Wis. 307, 52 N. W. 304; *Baxter* v. *Abernethen* (1893) 21 Sc. Sess. Cas. 4th Series, 159; *Carolan* v. *Southern P. Co.* (1897) 81 Fed. 81; *Davis* v. *Muscogee Mfg. Co.* (1898) 106 Ga. 126, 32 S. E. 30; *Kerr* v. *Crown Cotton Mills* (1898) 105 Ga. 510, 31 S. E. 166; *Kodil* v. *Lehigh Valley R. Co.* (1894) 78 Hun, 492, 29 N. Y. Supp. 533; *Frawley* v. *Sheldon* (1897) 20 R. I. 258, 38 Atl. 370; *Bourne* v. *King* (1900) 40 C. C. A. 545, 100 Fed. 561; *Baxter* v. *Abernethy* (1893) 21 Sc. Sess. Cas. 4th series, 159.

A complaint in an action to recover from a contractor for the mason work of a building for injuries caused by the fall of a wall is demurrable, when it alleges (1) that the mortar was badly mixed, but does not aver any want of due supervision; (2) that stones of an insufficient size were used for headers, but does not aver that the defendant

device of an averment ascribing the injury to the negligence of the master himself.[2] When the complaint positively alleges that the acts and omissions complained of were by the defendant, it cannot be presumed that they were those of a fellow employee of the deceased.[3]

b. Plea.—Where a complaint is demurrable because it shows that the plaintiff was injured by the negligence of a fellow servant, that fact need not be pleaded in an answer.[4] Upon a plea traversing negligence by the defendant, the defense that the injury complained of was caused by the negligence of a fellow servant is open.[5]

593. Instructions.— (See also § 611, note 1, subd. (b); § 615 *ad finem*, and § 617, note 2, *ad finem, infra.*)—Where upon the evidence, the injury may possibly have been due to an act of the kind for which the master is not responsible, it is error to refuse instructions embodying the rule appropriate to such a case.[1] It is also ground for reversal if such instructions are omitted where the state of the evidence is such that the jury may have been misled by such omissions.[2]

did not supply suitable stones; (3) that the contractor for the carpentry work drove "dooks" into the wall before the wall was properly set, but does not aver that the defendant knew of this being done and failed to take steps to prevent it. *Rae* v. *Milne* (1896) 24 Sc. Sess. Cas. 4th series, 165. See also the first of the Alabama cases cited in § 618, note 1, *infra*.

[2] From an allegation that the injury was caused by the negligence of the defendant in allowing a train to attain a dangerous rate of speed, it will be inferred that the injury was due to the negligence of the servants of the defendant. *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574. Affirmed in (1858) 17 N. Y. 153. A similar inference will be drawn where the averment is that the plaintiff was injured by the manner in which cars were loaded. *Indianapolis & St. L. R. Co.* v. *Johnson* (1885) 102 Ind. 352, 26 N. E. 200.

[3] *Bruce* v. *Central P. R. Co.* (1885) 68 Cal. 171, 8 Pac. 828.

[4] *Maan* v. *O'Sullivan* (1890) 126 Cal. 61, 58 Pac. 375.

[5] *M'Carthy* v. *Bristol Shipowners' Co.* (1883) Ir. L. R. 10 C. L. 384; *S. P. Byrne* v. *Fenaell* (1882) Ir. L. R. 10 C. L. 397.

[1] *Reichel* v. *New York C. & H. R. R. Co.* (1892) 130 N. Y. 682, 29 N. E. 763.

[2] In *St. Louis, I. M. & S. R. Co.* v. *Needham* (1894) 25 L. R. A. 833, 11 C. C. A. 56, 27 U. S. App. 227, 63 Fed. 107, it was argued that, if the court erred in its charge, that error did not prejudice the company, because there was uncontradicted testimony that there was no target on the switch which was left open, and the jury were charged that if the switch was not in proper order because it had no target upon it and for that reason the injury and death were caused, the company was liable. But the court said: "This position cannot be successfully maintained. The testimony was such that the jury might well have found that the injury was neither caused nor contributed to by the absence of the target, and that it resulted solely from the negligence of the conductor who left the switch open. The defendants in error charged two acts of negligence upon this company, the failure to provide the target, and the failure of the conductor to close the switch. Issues were raised and submitted to the jury to determine whether either of these acts caused or contributed to the injury. The verdict was general, and its generality prevents us from discovering upon which of these acts of negligence charged it was founded. A general verdict cannot be upheld where there are several issues tried, and upon any one of them error is committed in the admission or rejection of evidence, or in the charge of the court, because it may be that the jury founded their verdict upon the very issue to which the erroneous ruling related, and that they were controlled in

On the other hand, where the evidence clearly shows that the injury was caused by negligence in respect to a detail of the work, it is error to give an instruction to the effect that a master is bound to provide a safe place of work.[1]

594. Functions of court and jury in passing upon the evidence.—(See also § 195, *ante*, § 617, note 5, *ad finem*, *infra*.)—It is primarily for the jury to say whether the injury resulted from negligence in furnishing the materials, or in using them.[1] But where the evidence offered by the plaintiff is such that it is not reasonably susceptible of any other construction than that the injury was caused solely by an act belonging to the category of those deemed to be characteristic of mere servants, the case should be taken from the jury by a dismissal of the complaint,[2] or by a nonsuit,[3] or by directing a verdict for the

their finding by that ruling." *West Chester Coal Co.* v. *Johnson* (1893) 6 C. C. A. 118, 12 U. S. App. 190, 56 Fed. 810; *Maryland use of Barkley* v. *Baldwin* (1881) 112 U. S. 190, 28 L. ed. 822, 5 Sup. Ct. Rep. 278.

[1] *Lambert* v. *Massisquoi Pulp Co.* (1900) 72 Vt. 278, 47 Atl. 1085.

[1] *Thomas* v. *Ann Arbor R. Co.* (1897) 114 Mich. 59, 72 N. W. 40; *Bomby* v. *Norcross* (1900) 174 Mass. 112, 54 N. E. 374; *Donnelly* v. *Booth Bros. & H. L. Granite Co.* (1897) 90 Me. 110, 37 Atl. 874; *Arkerson* v. *Dennison* (1875) 117 Mass. 407; *Banning* v. *Hogan* (1879) 78 N. Y. 615; *Fitzsimmons* v. *Taunton* (1883) 160 Mass. 223, 35 N. E. 549; *Taylor* v. *Star Coal Co.* (1899) 110 Iowa, 40, 81 N. W. 249.

The question whether a cross piece in a ladder broke under the weight of plaintiff servant because a nail that fastened its left end to the side piece was near such a knot in the side piece as was shown to have existed, is for the jury. *Haniora* v. *Guggenheim Smelting Co.* (1899) 63 N. J. L. 647, 44 Atl. 762.

Where, at the close of the plaintiff's case, it is apparent that the evidence thus far introduced is consistent with the theory that the injury was caused by the negligence of a fellow servant, it is error to rule that the doctrine of common employment is not applicable, and so exclude the defendant from offering any evidence to sustain a defense based on that doctrine. *Cooper* v. *Hamilton Mfg. Co.* (1867) 14 Allen, 193.

It is error to leave it entirely to the jury to determine what acts and duties the defendant was required to perform and discharge as principal. The proper course is to lay it down as a matter of law, that the duty of the defendant is to supply the servant with suitable and safe machinery and appliances, with competent and skilful coworkers, and to make and promulgate sufficient rules and regulations for the conduct of the business in its ordinary run and for any extraordinary occasions that may be reasonably anticipated" (*Slater* v. *Jewett* [1881] 85 N. Y. 61, 73, 29 Am. Rep. 627), and then ask the jury to find whether the defendant had failed in the performance of its duty in any of these respects. *Hart* v. *New York Floating Dry Dock Co.* (1882) 16 Jones & S. 100.

Supp. 910; *Hart* v. *New York Floating Dry Dock Co.* (1882) 16 Jones & S. 460; *Allegheny Heating Co.* v. *Rohan* (1888) 118 Pa. 223, 11 Atl. 789; *Crawford* v. *Stewart* (1887; Pa.) 6 Cent. Rep. 140, 8 Atl. 5; *Van den Heuvel* v. *National Furnace Co.* (1893) 84 Wis. 636, 54 N. W. 1016; *Adams* v. *Swan* (1900) 100 Wis. 152, 81 N. W. 983.

In an action by an employee against a manufacturing corporation for personal injuries received while endeavoring to escape from its mill which was on fire, it appeared that the fire was caused by the heating of a bearing on one of the machines used in the mill, and that it might have been readily extinguished when first discovered; that the defendant had a cistern with pipes leading to each story of the mill, to which were attached lines of hose, but at the time of the fire the water did not run when attempt was made to use it. Held, in the absence of evidence of any reason why the water did not run, that it must be attributed to the negligence of the fellow servants of the plaintiff in failing to keep the apparatus in order, or in failing to put it in operation; and that the defendant was not liable. *Jones* v. *Granite Mills* (1878) 126 Mass. 84, 30 Am. Rep. 661. The court remarked that it was not called on to decide whether an employer was bound to provide precautions for the prevention of fire, or means for facilitating the escape of employees from a fire which had started, and proceeded thus: "Even if we assume that such obligations rest upon the employer, no evidence was offered tending to show that the defendant failed to take proper precautions to prevent fire, or that the hose, tanks, and other appliances for extinguishing it were not all that under any circumstances would be required. The evidence offered was simply that the water did not run when the fellow servants of the plaintiff attempted to use it. This was not sufficient proof of negligence to charge the defendant. The defendant, in any aspect of the case, had done its whole duty when it supplied the proper appliances, the care and use of which must be necessarily intrusted to its servants. The failure of the water to run was therefore be attributed to the negligence of fellow servants either in failing to keep the apparatus in proper order, or in negligently putting it in operation."

Where the evidence merely shows that, whenever the hatchway through which the plaintiff fell was rightfully opened, it was by the order of the defendant or of a particular agent, and that in the latter case such agent always stood by it when it was open to guard against accidents, and that on the occasion in question it was opened without the knowledge or permission of such particular agent or of the defendant, and by the unauthorized act of a fellow servant of the deceased, the conclusion of law is that the plaintiff was injured, not by the

595. Explanation of the classification of the cases cited in the ensuing sections.— The decisions regarding acts of negligence which are not regarded as constituting breaches of the non-delegable duties seem to be, broadly speaking, susceptible of classification under the categories indicated by the headings of the next three subtitles. But in many instances it is obviously impossible to say positively that a case belongs to one category rather than another. The arrangement adopted, therefore, is merely to be regarded as a convenient method of showing the effect of the enormous mass of materials with which we have to deal.

B. Negligence of coservants involving merely the use of the instrumentalities, master not responsible for.

596. Orders respecting the use of the instrumentalities.— *a. Generally.*—The effect of the cases cited in chapter XXVIII., A, *ante*, and § 541, *ante*, is that an order is not deemed to be given in a representative capacity, unless the employee giving it is a vice principal by virtue of his rank. Other cases illustrating more directly the principle that a master is not liable merely for the reason that the negligence was committed in the giving of an order are cited in the following four sections.

b. Order accompanied by an assurance of safety.—(See also § 448, *ante*.)—In an early English case it was laid down broadly that a workman is entitled to rely on the representations of a fellow workman whose province it is to inform him whether he can or cannot safely work in a certain place.[1] As the negligent servant in this case was an underground manager in a mine, and such an employee was

neglect or default of his employer, but by that of his fellow servant. *Kurl* v. *Bullard* (1858) 3 Bosw. 591.

[1] *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559; *Lamblois* v. *Maine C. R. Co.* (1892) 84 Me. 161, 24 Atl. 804; *Jarman* v. *Chicago & G. T. R. Co.* (1893) 98 Mich. 135, 57 N. W. 32; *Reichel* v. *New York C. & H. R. R. Co.* (1892) 130 N. Y. 682, 29 N. E. 763; *Harley* v. *Buffalo Car Mfg. Co.* (1894) 142 N. Y. 31, 36 N. E. 813; *McDonald* v. *New York C. & H. R. R. Co.* (1892) 63 Hun, 587, 18 N. Y. Supp. 609; *McCampbell* v. *Cunard S. S. Co.* (1895) 144 N. Y. 552, 39 N. E. 637; *Peschel* v. *Chicago, M. & St. P. R. Co.* (1885) 62 Wis. 338, 21 N. W. 269.

Where, by agreement of the parties, the facts are left to a trial judge, in order that he, acting as a jury, may find what they were, it is not for a court of appeals to consider whether they would have found as he did, but whether his finding is so far wrong that they might to set it aside. *Charles* v. *Taylor* (1878) L. R. 3 C. P. Div. 492, 38 L. T. N. S. 773, 27 Week. Rep. 32, per Brett, L. J.

Where the nonliability is thus clear, as a matter of law, it is error to instruct the jury that it is for them to say whether any negligence is to be imputed to the master. *Hall* v. *United States Radiator Co.* (1900) 52 App. Div. 90, 64 N. Y. Supp. 1002.

[1] *Paterson* v. *Wallace* (1851) 1 Macq H. L. Cas. 748.

denied to be a vice principal in the more recent decision of *Wilson* v. *Merry*,[2] it would seem that such a ruling is in effect equivalent to a declaration that, as to the function in question, he is the master's agent. The precise grounds upon which the earlier decision proceeds are, however, quite obscure, and it is extremely doubtful whether, upon this particular point, it can be reconciled with the principles laid down in *Wilson* v. *Merry*.

Some American cases also seem to treat the assurances of any employee who is in the exercise of control as being binding on the master, although for other purposes he may be a mere servant.[3] But the opposite conception of the quality of an order accompanied by an assurance has also been adopted in several decisions.[4] In the opinion of

[2] (1868) L. R. 1 H. L. Sc. App. Cas. 326, 19 L. T. N. S. 30.

[3] *Poor* v. *Chicago, M. & St. P. R. Co.* (1882) 56 Wis. 227, 14 N. W. 46 (railway company bound by assurance of a servant in charge of a hand car to a detective in the company's employ that he might safely ride sitting upon the rear end of the car with his feet hanging over); *Bradley* v. *New York C. R. Co.* (1874) 3 Thomp. & C. 288 (track master as incident to his right to employ laborers, held to be authorized to give them an assurance that he will warn them as to the approach of trains); *Floettl* v. *Third Ave. R. Co.* (1896) 10 App. Div. 308, 41 N. Y. Supp. 792 (workman went under track in reliance on foreman's statement that no car would pass until a time much later than that at which the accident occurred); *Mullane* v. *Houston, W. Street & P. Ferry R. Co.* (1897) 21 Misc. 10, 46 N. Y. Supp. 957 (assurance by track master of a street railway company to a workman under his control, to induce the latter to enter a hole which was dangerous while the cable was in operation, that he would order the engineer not to start the cable, held to be a matter pertaining to the duty of a master to provide a safe place of work, and not a mere detail of work within the functions of a fellow servant).

The first of the decisions cited involves, it will be observed, the element of a difference of department, and may be justified on that ground alone. The second is contrary in principle to those collected in § 601, *infra*, and on the facts cannot be reconciled with the rulings of the Supreme and circuit courts of the United States, cited below.

As to the third and fourth, it is difficult to conceive of circumstances in which the injurious negligence could be more plainly that of a fellow servant than the acts of omission here in evidence. The places of work were perfectly safe except in so far as they were rendered insecure by the running of the car and the starting of the cable. If the foreman himself had operated the car or started the cable, the defendant would certainly not have been liable. (See *Crispin* v. *Babbitt* [1880] 81 N. Y. 516, 37 Am. Rep. 521); and it seems impossible to argue that the failure to prevent another servant from doing these acts can be negligence of an essentially different quality.

[4] The orders of a section foreman to a laborer who is with him on a hand car, that he shall not look back to watch for a train, and assurance that the foreman himself will watch and give warning of any danger, do not make the master liable for an injury to the laborer resulting from the negligence of the foreman in failing to watch for the train. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603.

One of two foremen of construction work acts as a mere coservant of a subordinate in directing him to work at the base of an overhanging bank, and assuring him that he can work there in safety. *Balch* v. *Haas* (1896) 20 C. C. A. 151, 36 U. S. App. 693, 73 Fed. 974.

In Missouri it was held, at a time prior to the adoption of the superior servant doctrine, that a railway was not any more bound by the assurances of a conductor that a rope was safe than by those of a fellow laborer of the plaintiff. *Hetherton* v. *St. Louis & I. M. R. Co.* (1876) 61 Mo. 528.

the present writer these embody the correct doctrine, *viz.*, that an assurance of safety is not an act which constitutes the employee giving it a representative of the master *ad hunc vicem*, but merely an act which is official in the sense that an employee who is a vice principal by virtue of his rank is regarded as giving it in the capacity of an agent of the master, and not of a mere servant.[5]

597. Choice of particular methods of work.— (See also §§ 598, 599, 603, 610, *infra.*)—The general rule is that the master is not responsible for the errors which a servant of superior grade may commit in regard to the choice of methods for carrying out the work intrusted to his management.[1]

The last two of the New York decisions cited in note 1, *supra*, have been lately distinguished, not very successfully, in a case where it was held that the fact that, on plaintiff's objecting to descending into a trench, defendant's foreman assured him it was safe and that he would stand and watch, did not render defendant liable, since the foreman's assurance was merely as to the details of the work, given in his individual capacity, and not for the principal. *Schott* v. *Onondaga County Sav. Bank* (1900) 49 App. Div. 503, 63 N. Y. Supp. 631.

[5] In the following cases the assurance emanated from one who was a vice principal in the jurisdictions mentioned, but the question whether it was an official act was not discussed. *Goggin* v. *D. M. Osborne & Co.* (1896) 115 Cal. 437, 47 Pac. 248 (local manager); *Monahan* v. *Kansas City Clay & Coal Co.* (1894) 58 Mo. App. 68 (foreman of mine); *Atchison, T. & S. F. R. Co.* v. *McKee* (1887) 37 Kan. 592, 15 Pac. 484 (superintendent); *Jones* v. *St. Louis, V. & P. Packet Co.* (1891) 43 Mo. App. 398 (second mate of ship); *Nelson* v. *St. Paul Plow Works* (1894) 57 Minn. 43, 58 N. W. 868 (superintendent); *Helfenstein* v. *Medart* (1896) 136 Mo. 595, 36 S. W. 863, 37 S. W. 829, 38 S. W. 294 (superintendent); *Sopherstein* v. *Bertels* (1896) 178 Pa. 401, 35 Atl. 1000 (superintendent).

[1] The conductor of a freight train is a mere fellow servant with a brakeman on the train in determining not to apply for more brakemen, or set off cars from his train before proceeding down a steep grade, under a rule of the company committing to his judgment the question whether he shall make such application where there is nothing unusual about the train. *Wooden* v. *Western N. Y. & P. R. Co.* (1895) 147 N. Y. 508, 42 N. E. 199, Reversing (1891) 43 N. Y. S. R. 218, 16 N. Y. Supp. 840 (1892) 46 N. Y. S. R. 77, 18 N. Y. Supp. 768. The court said: "The duty of the company, as of any other master, to its servants, was performed if it furnished adequate machinery and suitable appliances for the work, and employed competent fellow servants, under proper rules duly promulgated and adapted to the end of meeting possible emergencies of an ordinary or extraordinary character, which might be foreseen to arise in the conduct of its operations. It is only when the duty to be performed is one which the master is supposed to do in person for his servant's safety in his place of work, that it cannot be delegated to another so as to free the master from responsibility for the consequences of some neglect. The duty here was not of that character. It related to the performance of a part of the servant's ordinary work, and was regulated by the rule and published notice."

A railway company is not liable for the decision of bridge carpenters to raise a heavy pile by tackle, rather than in some other way, to fasten that tackle in a certain way, and to omit to brace it while it was being raised. *Ulrich* v. *New York C. & H. R. R. Co.* (1898) 25 App. Div. 465, 51 N. Y. Supp. 5.

Where a large metal appliance called a dust collector was being hoisted, and suddenly fell, owing to its being imperfectly secured when the process of hoisting had to be suspended for a short time, it was held that the master was not liable for the negligence of his superintendent in bringing about the accident. *Small* v. *Allington & C. Mfg. Co.* (1901) 94 Me. 551, 48 Atl. 177.

The failure of a directing machinist who was holding a torch, to suggest the danger of striking a driving spring which

598. Disposition of the force of employees available for the work in hand.— One special application of the general principle embodied in the cases cited in the last section is observable in the rule that wherever the master has employed an adequate force of servants of a sufficient degree of skill and capacity, and furnished them with all the means which are essential for a proper discharge of their several duties, and the circumstances are such that the same number of men and the same degree of care are not always required, he is justified in leaving to them the exercise of their own discretion and judgment in the disposition and distribution of the force available.[1]

599. Assigning servants to work for which they are unfitted.—

was being placed in a locomotive, is not an omission of duty in the capacity of a vice principal. *Kerner* v. *Baltimore & O. S. W. R. Co.* (1897) 149 Ind. 21, 48 N. E. 364.

The mere fact that an employee held a stick of frozen dualin over a fire to thaw it will not support an action by a fellow employee against the master for injuries resulting from an explosion, upon the theory that the act itself showed that the employee was an unsuitable person for the master to have in his employment, where he was employed merely as a common laborer, and was acting at the time in pursuance of a direction for which the master was not responsible. *Hellanus* v. *Staples* (1898) 171 Mass. 150, 50 N. E. 537.

Directing a workman in a gang which is taking down a building, to chop a post at a particular conjuncture, is a mere detail of work. *Cleveland, C. C. & St. L. R. Co.* v. *Brown* (1896) 20 C. C. A. 147, 34 U. S. App. 759, 73 Fed. 970.

The acts of one who is superintending the putting up of an elevator in a building in process of construction, in determining when the measurements shall be taken in the upper floors, and how far the construction of the building shall progress before they are taken, are those of a fellow servant with a workman in the employ of such company, who is injured while taking a measurement under the direction of such superintendent. *Whallon* v. *Sprague Electric Elevator Co.* (1896) 1 App. Div. 264, 37 N. Y. Supp. 174.

Where a servant is injured by the falling of a staging which had been properly constructed, and was adequate for the purposes for which it was intended and had been used, but which fell by reason of the negligence of a fellow servant in taking it down, the master is not liable. *Leborge* v. *Berlin Mills Co.* (1895) 68 N. H. 373, 44 Atl. 533.

A servant cannot recover where he was injured through the act of a fellow servant taking down a trestle as a whole, instead of separating it and taking it down in sections. *Cogan* v. *Burnham* (1899) 175 Mass. 391, 56 N. E. 585.

No recovery can be had against an employer for an injury to an employee caused by the sudden fall of a frozen crust of ground on the employee while undermining the same, where the negligence, if any, which caused the crust to fall without warning, was not that of the superintendent, but of certain fellow servants who were driving wedges into the bank above. *Gorman* v. *Woodbury* (1899) 173 Mass. 180, 53 N. E. 373.

An employer is not liable for the negligence of a foreman in prematurely directing his subordinates to let go a telephone pole which was being taken down. *Morgridge* v. *Providence Teleph. Co.* (1898) 20 R. I. 386, 39 Atl. 328.

A laborer ordered to hold a bent fish plate in a certain position while the foreman endeavors to straighten it with a hammer cannot recover, if he is injured through his compliance with the order. *Lagrone* v. *Mobile & O. R. Co.* (1899) 67 Miss. 592, 7 So. 551.

A direction to put powder into a hole without waiting a sufficient time for the hole to cool after giant powder had been exploded there, is not deemed to have been given by the superior employee in the capacity of a vice principal. *Hast* v. *Kern* (1898) 34 Or. 217, 54 Pac. 950.

[1]No negligence can be imputed to a railway company for an omission to make regulations as to the number of brakemen to be sent on a train of detached cars when on its way to the repair track, and in what positions they should be placed. Hence, an accident

It has been held that there can be no recovery for negligence of this description, either in cases where the unfitness was the cause of injury to the unfit person himself,[1] or in cases where the negligence with which it is sought to charge the master consisted in allowing the unfit person whose acts were the direct cause of the injury to undertake duties which he was incapable of performing properly.[2] It is clear, however, that nonliability cannot, in cases of the latter class, be predicated, except where the change of functions was allowed without any authority, express or implied, from the master. The decisions cited in § 572, *ante*, with regard to such negligence, show that, if the change was made by an official who had the power to make it, the circumstances are controlled by the doctrine that the duty to employ competent servants is non-delegable.

600. Negligence in sending servants into abnormally dangerous places without warning.— (See, however, § 579, *ante*.)—Several decisions embody the principle that an employee who, in the exercise of superintendence, sends a subordinate to perform his duties in a place where he will be exposed to a specific peril due to conditions which have arisen in carrying out the executive details of the work, acts as

due to the fact that there were too few brakemen on a particular train, and none at the rear end, will be held to be attributable, not to the negligence of the company, but to that of one or other of the employees engaged in distributing the cars. *Besel* v. *New York C. & H. R. R. Co.* (1877) 70 N. Y. 171 (car repairer injured).

A railway company is not liable for the negligence of the foreman of a drill crew in sending a detached car along a track where other cars are being coupled, without stationing a brakeman upon it to control its movements. *Central R. Co.* v. *Keegan* (1895) 160 U. S. 259, 40 L. ed. 418, 16 Sup. Ct. Rep. 269.

In *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556, where the plaintiff was injured through the negligence of some of his fellow servants, the court reasoned thus: "It was no part of the duty of the master to remove hatches or direct the particular mode of doing so, any more than to direct workmen in the use of the tools with which they performed their work. There were customary and established modes of performing such services, and each employee was expected to do his work in the manner and style to which he was accustomed, without special directions in respect thereto. It was entirely immaterial whether the superintendent undertook to perform the work of removing hatches, or ordered it to be done by others; he was, in either case, engaged in performing the duty of a workman. The master had furnished abundant help to do the work, and had done all that was required of him; and it was the fault of the servants that a sufficient number did not co-operate to perform it safely, or do it in the manner prescribed by custom."

[1] Where the act alleged to have directly resulted in injury was that of a fellow servant in requiring the plaintiff to lift beyond his strength, no breach of the master's duty to supply a safe place of work or safe instrumentalities is involved. The issue presented is merely one of the manner in which a servant employed a proper instrument of work. *Robertson* v. *Chicago & E. R. Co.* (1896) 146 Ind. 486, 45 N. E. 655.

[2] A railway company is not liable for an injury to a brakeman caused by the negligence of the engineer in placing his unskilled fireman temporarily in the performance of his duties in handling the engine. *South Florida R. Co.* v. *Price* (1893) 32 Fla. 46, 13 So. 638; *Parrish* v. *Pensacola & L. R. Co.* (1891) 28 Fla. 251, 9 So. 696; *Houston & T. C. R. Co.* v. *Myers* (1881) 55 Tex. 110.

a mere fellow servant of such subordinate in giving the order without warning him of the existence of the peril.[1]

[1] "The most important case on this point is *Cullen* v. *Norton* (1891) 126 N. Y. 1, 26 N. E. 905. There the plaintiff's decedent was employed by defendant as a laborer in his cement quarry, and was engaged in drilling rock for blasting purposes under the defendant's foreman. Prior to the accident, eleven holes had been drilled in a piece of rock, and charged and fired, but only ten of them exploded. The foreman examined the unexploded hole, and found the fuse unconsumed, but failed to remove it. The next morning he directed two of the workmen to drill holes in the rock, within 2 feet of the undischarged hole, and at the same time ordered the deceased to drill 20 or 30 feet below. The unexploded fuse shortly after in some way ignited the charge, which exploded and threw a mass of rock on the deceased. Upon these facts the trial judge dismissed the complaint. This judgment was reversed by the supreme court (1889; 52 Hun, 9, 4 N. Y. Supp. 774) on the ground that the foreman was the representative of the employer in regard to furnishing the plaintiff with a safe place of work. At the second trial the plaintiff had a verdict, and the judgment therein was affirmed by the supreme court (1890; 29 N. Y. S. R. 700, 9 N. Y. Supp. 174) on a theory of the evidence thus explained by Landon, J.: 'The rule requiring the master to protect his servant from the known and inherent dangers of the situation includes those reasonably to be apprehended. Because the carelessness of fellow servants in such a situation is not to be reasonably apprehended, the master may escape the consequences arising from that peril. But if it was reasonable to apprehend a premature explosion from some other cause, then the master's care and prudence should have protected the intestate from it. The foreman was his only representative to act for him, and the jury have found that he not only failed to exercise that care, but actually did with respect to the intestate what ordinary care should have restrained him from doing. *Leonard* v. *Collins* (1877) 70 N. Y. 90. It may be conceded that the distinction between the dangerous nature of the employment and the dangerous nature of the place of employment is not always clearly perceived. We . . . hazard the illustration: Suppose the place is a rock in a mine, and the work is the picking out of explosive powder from the hole of an undischarged blast in the rock. The place, aside from the nature of this particular work, is safe, but the work is unsafe and dangerous in the extreme. If an explosion results from the work and injures the servant, the injury is plainly attributable to the work, and not to the place. But suppose, while engaged in this dangerous work an overhanging rock, gradually becoming loosened, now falls upon the servant and kills him. His death is attributable to the place; and the inquiry would be pertinent whether his master was negligent in assigning him to such a place. Again, suppose the workman is extracting the powder from the blast, as in the first supposition, and the danger is incident only to the nature of his work, and the master, with knowledge of the situation, directs a second workman to drill a new hole in the same rock near to the one upon which the first workman is employed. Clearly, with respect to the second workman, the place is a dangerous one, wholly irrespective of his own employment. As is repeated in *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556, the master owes the duty to his servants to furnish a safe and proper place in which to prosecute his work, and to exercise care and prudence in the protection of his servants from the known and inherent dangers of the situation.'

"In the court of appeals (1891; 126 N. Y. 1, 26 N. E. 905), the judgment was reversed on the ground that the 'master furnished the mine as a place for labor, and it was solely on account of the manner in which the foreman, a fellow servant, performed the work or directed it that the accident happened, and happened in the course of the performance of the very kind and character of work which the plaintiff's intestate took the risk of by accepting employment.' The following extract from the opinion shows that the different conclusions arrived at by the two courts were not so much due to a doctrinal disagreement as to the circumstance that the effect of the evidence was considered by each of them from essentially different standpoints: 'If Doran acted as master, the defendant is liable; while if he acted in his capacity as an employee, and not

It is often quite difficult to decide whether cases of this type should be referred to the principle illustrated by the decisions just cited, or to the principle that the duty of instruction is non-delegable. A very

as a representative of the master, his negligence does not rest upon the master. The quarry was the place where the work was to go on, and the master was bound to make it a reasonably safe place for such work, considering its character and the necessarily dangerous nature of the work itself. For the manner in which the persons employed in the quarry should themselves perform their work the master was not liable. It is not claimed that the master did not furnish a proper place to work in the first instance; that is, when the deceased was employed, the quarry was as safe as any quarry is where frequent blasts are being fired off. But the manner of the performance of each of the various details of the work by which, as a whole, it was to be conducted, rested necessarily upon the intelligence and care and fidelity of the servants to whom these duties were intrusted. It can't be that every time a blast was exploded and the men came back, the manner of their distribution for work was a duty of the master, and that the order of a foreman, mistakenly or negligently given, must be regarded as the order of the master in fulfilling a duty to furnish a safe place to work in. It is, as it seems to me, a detail of the working or management of the business, the risks attending which have been assumed by the party taking employment."

A Federal circuit court of appeals has also rendered a similar decision, holding that a foreman of a gang of men engaged in constructing a sewer under the supervision of general superintendents is not a special vice principal so as to render the city liable to one of such men injured in consequence of the negligence of such foreman in directing such man to reload holes drilled for blasting, without telling him that the person who loaded them and was about to clean them out had said that the dynamite in one of them had not exploded. *Minneapolis* v. *Leadlin* (1893) 7 C. C. A. 341, 19 U. S. App. 245, 58 Fed. 525. The court reasoned thus: "The duty of the master to furnish a safe place for the performance of work does not require it to keep that place safe under the constantly changing conditions which the performance of such a work as the construction of a sewer necessitates. The city furnished a street in which it was safe to construct a sewer. The comparative safety of the place where each man worked was necessarily constantly varied by the progress of the work, and the duty of the master did not extend to keeping every place where each workman labored safe at every moment of its progress. It was the duty of each workman to use reasonable care to so render his service that the place in which he and his fellow servants were required to labor should continue to be reasonably safe. It was the duty of the foreman to so direct the work of excavating, of laying the pipe, and of filling the trench that it would continue to be reasonably safe for every man in his crew to render the service assigned to him. But these were personal duties imposed upon the workmen and the foreman by their employment in the common service, and not by the delegation to them of the performance of any absolute duty of the master. The street originally furnished by the city was safe. The trench in which the rock was to be blasted was originally safe for the blasting of rock. If the safe place originally furnished by the city became unsafe in the progress of the work, it was rendered so, not by any negligence of the city or its superintendent in furnishing it, but by the acts or negligence of the foreman and his workmen in discharging the duties imposed upon them by their common employment, and for these acts and this negligence the city was not responsible."

A master who provided a skilful foreman and competent fellow workman, with necessary and proper appliances and tools for the removal of fragments of stone after a blast, is not liable for injuries sustained by an employee, because the foreman omitted to give him notice to pry off the piece of rock that fell and hit him, instead of going to work directly under it. *Perry* v. *Rogers* (1898) 157 N. Y. 251, 51 N. E. 1021, Reversing (1895) 91 Hun, 243, 36 N. Y. Supp. 208.

The fact that a master personally directed a servant to go to work with a gang who cleared up at night the *debris* caused by blasting in the daytime will not make him liable for injuries to the servant occasioned by the fall of a rock

slight change in the standpoint from which the evidence is considered will suffice to throw the facts on one side or the other of the line.[2]

601. Failing to warn servants as to dangers arising from the execution of the details of the work.— The general principle that the ma-

loosened by such blasting, where competent workmen, a skilled foreman, and safe appliances were furnished. *Capasso* v. *Woolfolk* (1900) 163 N. Y. 472, 57 N. E. 760, Reversing (1898) 25 App Div. 234, 49 N. Y. Supp. 409. *Perry* v. *Rogers* (1898) 157 N. Y. 251, 51 N. E. 1021, *supra*, was followed.

In like manner, the negligence of a foreman in directing a common laborer employed to drill holes for blasting, to draw an unexploded charge, without warning him as to the kind of explosive used, or instructing him in the way of handling it, is that of a fellow servant merely. *Litto* v. *Farley* (1895) 15 Misc. 153, 36 N. Y. Supp. 1105. The decision was based on the ground that the direction related to a mere "detail of the work intrusted to the judgment and discretion of the foreman," and that the "method to be employed was left entirely to the foreman."

[2] In a very close case it was held by a divided court that an employer owning a coal dock, the structures and machinery upon which are undergoing repairs and rebuilding made necessary by a storm, is not guilty of negligence in failing to warn a new and inexperienced employee at work upon a chute, of the presence in such chute of the slack of a cable attached to the machinery of the dock, and of the danger of its suddenly lifting by the starting of the machinery, where the machinery is not in regular operation, and such lifting of the cable is not one of the incidents of such operation, regularly or occasionally occurring, but arises from the engineer's adjusting the cable upon the drums and leaving it for a time lying in the chute, and plaintiff's position is safe until the starting of the engine, and the employer has no notice of the presence of the cable in the chute, and cannot reasonably anticipate it,—especially where such employee is not ordered to take a position over the chute. *Porter* v. *Silver Creek & M. Coal Co.* (1893) 84 Wis. 418, 54 N. W. 1019. The majority of the court reasoned thus: "In the course of the engineer's work the cable was for a time lying in the chute. He started the engine and drew it up, and thus made the plaintiff's position over the chute dangerous, while a moment before it was entirely safe. The cable was never in the coal chute in the ordinary course of the business, but was always far above the chute. No official or superintending officer of the company knew of the fact that the cable was in the chute or was liable to be there, or ordered it put there. It was out of the usual course of business, and could not reasonably be anticipated. Nor was the plaintiff directed to take the position which he did over the chute. Certainly, the defendant could not be held to be obliged to warn the plaintiff of a danger which no one could reasonably anticipate."

Two judges dissented on the ground that the master was bound to know that the machinery might start at any moment and imperil the plaintiff. (Compare the reasoning of the supreme court in *Cullen* v. *Norton*, as quoted above.) On the whole, this seems to be the correct theory of the evidence. The rules as to details of work being based essentially on the hypothesis of an assumption of the risks involved in the given operations, it is manifestly a prerequisite to its application that those risks should have been understood by the injured servant. If it is a permissible inference from the evidence that, for some special reason, either *quoad personam* or *quoad res*, he did not understand those risks, and his want of comprehension was excusable, it is difficult to admit that the case is not one in which the jury should at least be called upon to say whether under the circumstances a duty of instruction should be predicated. The objection to the view of the majority of the judges is that the consideration mainly relied upon—*viz.*, that the event which caused the injury was not one which the master had reason to anticipate—was scarcely one which a court of review was, under the circumstances shown by the record, warranted in making the basis of a peremptory inference of fact. If there was no evidence, or insufficient evidence, on this point, the proper course, it is submitted, would have been to send back the case to the trial court for further investigation.

ter's duty to provide a safe place of work is not deemed to have been violated where the unsafety is caused solely by the acts of coservants in carrying out the details of the work clearly involves the corollary that the master is not chargeable with the failure of those servants to warn each other as to the existence of dangerous conditions which have already supervened.[1] Similarly, all the authorities, with the exception of the single New Jersey case cited in § 580, *ante*, seem to be agreed that a master is not liable for the negligence of a servant in failing to notify a coemployee of the approach of a transitory peril which, as the work progresses, will render the environment unsafe for a brief period, but which may easily be avoided if due warning is given. In some of the cases illustrating this principle, the breach of duty was committed by failing to notify the injured servant himself that his safety was imperiled by the particular peril in question.[2]

[1] A railroad company is not liable for injuries to a brakeman, caused by the neglect of a flagman in not giving due notice of rails torn up for repairs. *Cooper* v. *Milwaukee & P. du. Ch. R. Co.* (1869) 23 Wis. 668.

The road master of a railroad, directing the work of tearing down a bridge, is not the vice principal of the employer to the extent that his omission to give a particular warning of a detail thereof which portends danger would render the master liable for his omissions in that respect. *O'Neil* v. *Great Northern R. Co.* (1900) 80 Minn. 27, 51 L. R. A. 532, 82 N. W. 1086 (plaintiff caught by a bolt which had not been drawn from a stringer of a trestle which he was helping to remove).

An employer is not liable for the death of an employee, caused by the blowing off of a door of a blast stove while he was engaged in tightening a nut on it, where there was no danger in working at the door unless the blast was on, and of that fact he was ignorant, solely through the neglect of his coemployee under whose direction he was working. *Dahlke* v. *Illinois Steel Co.* (1898) 100 Wis. 431, 76 N. W. 362.

The negligence of a section foreman in failing to note an approaching train, and to give the proper warning so that a hand car may be taken from the track, is not the omission of a duty which the railroad company owes as master to one of the gang. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603. "We do not perceive," said the court, "that the doctrine as to the duty of the master to furnish a safe place for the servant to work in has the slightest application to the facts of this case. There is no intimation in the evidence, nor is any claim made, that the hand car upon which the plaintiff was riding was not properly equipped and in good repair and in every way fit for the purpose for which it was used. It was a perfectly safe and proper means of transit, in and of itself, from the station at Albuquerque to the point where the plaintiff was going to work. . . . If the car were rendered unsafe, it was not by reason of any lack of diligence on the part of the defendant in providing a proper car, but the danger arose simply because a fellow servant of the plaintiff failed to discharge his own duty in watching for the approach of a train from the south."

A train master who orders cars to be taken out of a train without notice to a brakeman engaged in making a coupling acts as a fellow servant of such brakeman. *Martin* v. *Chicago & A. R. Co.* (1895) 65 Fed. 384.

The duty of warning servants that a blast is about to be fired in a quarry does not belong to the non-delegable class. *Donovan* v. *Ferris* (1900) 128 Cal. 48, 60 Pac. 519; *Gallagher* v. *McMullin* (1898) 25 App. Div. 571, 49 N. Y. Supp. 734 (warning not given in time).

There can be no recovery where an engineer without warning moved cars again after they had come to a stop, against another car to which a brakeman was about to couple them. *Long*

In other cases the delinquency consisted essentially in an omission to convey to the reservant whose act was the immediate cause of the in

v. *Coronado R. Co.* (1892) 96 Cal. 269, 31 Pac. 170.

The negligence of an employee intrusted with the duty of warning other employees of the starting of machinery is not imputed to the employer. *Portance* v. *Lehigh Valley Coal Co.* (1899) 101 Wis. 571, 77 N. W. 875; *Oak Bros.* v. *Wood* (1891) 11 Ind. App. 69, 36 N. E. 1071.

Compare the cases as to starting machinery without warning, in § 610, note 1, subd. (j), *infra*.

One under whose direction a carpenter is working upon a ladder in front of a car stable, who promises to remain at the foot of the ladder to give the workman notice whenever it is necessary to remove the ladder in order to permit the cars, or a cart to pass in or out of the stable, does not represent the master. *Byrnes* v. *Brooklyn Heights R. Co.* (1899) 36 App. Div. 355, 55 N. Y. Supp. 269.

Where a servant undertakes the work of putting damaged cars on a certain track in a yard, the receipt of insufficient notice as to the precise defect in some particular car which he has to handle is to be treated as the neglect of a fellow servant, and the risk must fall within the ordinary rule, inasmuch as it is an incident of the service which was entered upon. That broken cars might be put in the wrong place in the yard, and insufficient notice of the defects in them might be given. Such an omission of notice relates to matters of detail, and is one which cannot be given in advance. It is, therefore, not like an omission to give instructions to an inexperienced hand as to the general danger to which his work will expose him. *Yeaton* v. *Boston & L. R. Corp.* (1883) 135 Mass. 418.

Trainmen engaged in switching cars act as fellow servants in failing to give notice of their approach to a car repairer at work on one of the tracks. *Texas & P. R. Co.* v. *Campbell* (1894: Tex. Civ. App.) 30 S. W. 1104.

A railroad company which has provided watchmen to guard a car repairer from danger while at work is not liable to him for an injury resulting from their failure to warn him of an approaching train. *Luehke* v. *Chicago, M. & St. P. R. Co.* (1885) 63 Wis. 91, 53 Am. Rep. 266, 23 N. W. 136 (on the first appeal [1883; 59 Wis. 127, 17 N. W. 879] the judgment of the lower court had been reversed on the ground that it had not been shown that the company had performed its duty of furnishing a watchman). *Rex* v. *Pullman's Palace Car Co.* (1897) 2 Marv. (Del.) 337, 43 Atl. 216. In the latter case the court said in the course of an oral charge: "The giving of notice of the approach of danger, where it does not enter into the creation of or the maintenance of a safe place, is not necessarily a primary duty of the master but a secondary duty, so to speak, which may be delegated to competent fellow servants under proper rules. Notice is sometimes an incident to the safety of the place, a matter of executive detail, which ordinarily must of necessity, in operating large establishments, be intrusted to some independent human will other than that of the master, upon the faithfulness of which will in the performance of duty it is reasonable to rely."

The negligence of a motorman in disobeying a rule of the company requiring those in charge of its cars to give timely warning of their approach to a track crew is not chargeable to the company as a violation of its duty to use reasonable care to provide a safe place for the trackman to do his work. *Lundquist* v. *Duluth Street R. Co.* (1896) 65 Minn. 387, 67 N. W. 1006.

The failure of a hatch tender to discharge his duty of giving warning to the servants in the hold below that a lade is about to be thrown down is not negligence which is imputable to the ship owner. *Ocean S. S. Co.* v. *Cheney* (1890) 86 Ga. 278, 12 S. E. 351.

An employer is not answerable for the negligence of one reservant in failing to notify another that the operation of pulling down a pile is about to begin. *Geesen* v. *Saguin* (1901) 115 Iowa 7, 87 N. W. 745.

The failure of an employee to perform his duty of giving due warning that a piece of timber has been placed in the chute which conveys it to a ship is the negligence of a mere fellow servant of the workmen on board. *Hermann* v. *Port Blakely Mill Co.* (1896) 71 Fed. 853.

A contractor engaged in the business of altering and repairing vessels is not liable for the failure of his superintend-

jury such information as would have enabled him to avoid inflicting the injury.[3]

That the failure to warn servants as to transitory dangers is regarded as official negligence in an employee who is a vice principal by virtue of his rank, see § 512, *ante*.

602. Absence from the post of duty.—A master who employs a sufficient number of servants is not liable for an injury to an employee caused by the temporary absence of a coemployee from a post of duty without any fault on the part of the employer.[1]

603. Selecting an imperfect appliance from the stock available.—(Compare cases cited in § 597, *supra*.)—It is well settled that, where the master has provided an adequate and readily accessible stock of suitable appliances in good condition, from which to make a selection, and the imperfection of an instrumentality selected therefrom was, or ought to have been, apparent to the servant who selected it, the master cannot be held responsible for injuries which are sustained by the use of that instrumentality, whether the sufferer be the servant himself who made the selection, or a coemployee.[1]

ent to warn the men working in the hold that a hatch is about to be removed. *Hussey* v. *Coger* (1889) 112 N. Y. 614, 3 L. R. A. 559, 20 N. E. 556 (hatch escaped from the hands of the workmen).

The negligence of a superintendent in charge of work under a construction contract, in replying in the affirmative to the question whether it was clear below, by an employee who was throwing down blocks from a height to the workman below, resulting in an injury to such workman, is not chargeable to the master. *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559.

Where an employee was injured in attempting to preserve the property of his master from fire, and the injury resulted from the negligence of the foreman in failing to notify the servant of a peril which had developed during the fire, the negligence is considered to be that of a fellow servant. *Malthie* v. *Rehlen* (1901) 167 N. Y. 307, 51 L. R. A. 52, 60 N. E. 645. Reversing (1899) 45 App. Div. 381, 60 N. Y. Supp. 824.

In the absence of an express agreement, one employed to repair an elevator is not entitled to warning from the master when the elevator is about to start, where he relies upon a fellow servant whom he has requested to give such warning. *Mann* v. *O'Sullivan* (1899) 126 Cal. 61, 58 Pac. 375.

[3] The omission of a foreman of track repairers to set a lookout is not negligence which can be imputed to the company. *Duthie* v. *Caledonian R. Co.* (1898) 23 Sc. Sess. Cas. 4th series, 931.

A railway is not liable for the failure of a yard foreman to place a signal flag in front of the cars upon the repair track, so as to prevent any other train from coupling on to such cars while said signal was displayed, the result being that a car repairer was injured by the coupling of a train. *Peterson* v. *Chicago & N. W. R. Co.* (1887) 67 Mich. 102, 34 N. W. 260.

[1] *Reichel* v. *New York, C. & H. R. R. Co.* (1892) 130 N. Y. 682, 29 N. E. 763.

The absence of a brakeman upon cars shunted without an engine is the negligence of a coservant, and not of the railroad company, where the latter has employed sufficient and competent brakemen to do such work, and they are present in the yard at the time of the accident. *Potter* v. *New York C. & H. R. R. Co.* (1892) 136 N. Y. 77, 32 N. E. 603. The court distinguished *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545, where the missing brakeman did not present himself for duty at all, and intimated a doubt as to the correctness of *Murphy* v. *New York C. & H. R. R. Co.* (1890) 118 N. Y. 527, 23 N. E. 812.

[1] There can be no recovery where the theft superintendent of a natural gas

One common variety of negligent selection consists in the use of an instrumentality which is safe and adequate for the purpose which was contemplated by the master when he supplied it, but which is danger-

company, whose duty it was to shut in and test wells, was injured by an explosion due to his selection of a valve too weak to bear the pressure. *Toohey v. Equitable Gas Co.* (1897) 179 Pa. 437, 36 Atl. 314.

An employer is not liable for an injury to an employee caused by the breaking of a plank while putting a tank in position, where such plank was selected by the employee and his foreman while employed in the same service with him. *Mahoney v. Vacuum Oil Co.* (1894) 76 Hun, 579, 28 N. Y. Supp. 196.

A molder working by the day in a foundry, frequently called upon to assist in pouring heated metal into molds, is a fellow servant of an employee who made the molds, and cannot recover for injuries sustained by him by the escape of heated metal, due to the use of an imperfect flask in making the mold, where numerous flasks were provided, and the employee was not required to use an imperfect one. *Kehoe v. Allen* (1892) 92 Mich. 464, 52 N. W. 740.

The duty of selecting stakes, and placing them in position on a platform car to hold ties in place, is incident to the work of the servants operating the train and loading and unloading the ties; and the railroad company is not liable if an injury is caused by their carelessness in performing it. *Rounds v. Carter* (1901) 94 Me. 535, 48 Atl. 175.

In *Cregan v. Marston* (1891) 126 N. Y. 568, 27 N. E. 952, where the controversy was as to whose duty it was to observe and examine the condition of a rope, and change it when so worn that it became unsafe, the court explained its position as follows: "It is conceded that the defendants kept on hand and ready for use at any moment an adequate supply of these falls, and of the best and most approved character. . . . If one was wanted, word was sent to the office, and the new fall at once supplied for use at the dock. Usually the engineer or his assistant made the application, but anybody engaged in the work could give the notice and get the new fall. It does not appear that any such application coming from any of the workmen was ever unheeded or refused. The workmen, therefore, were left in a position of perfect safety as to the sufficiency of the falls against everything save their own negligence or error of judgment. The rope was swinging before their eyes, and would disclose its approaching weakness on the surface before it became rotten or pulpy within, and they were able to know how long it had been used, and so whether prudence required it to be changed. They were at liberty, and knew they were at liberty, to supplant one which exhibited marks of weakness with a other both new and sufficient, from the supply kept on hand. They were in the daily habit of observing its condition, and it was specially the custom of the engineer to do so. He had examined it a day or two before the accident, and deemed it safe." On this state of facts it was held that the negligence of the engineer, if it existed, was not that of the master.

In *Ling v. St. Paul, M. & M. R. Co.* (1892) 50 Minn. 160, 52 N. W. 378, the court thus explained its reasons for holding that a master is not responsible to a servant for the act of a fellow servant in negligently selecting from a number of those available an iron hook which was broken and unfit for use, to which to attach a pulley to raise a heavy weight in a boiler shop: "It is very apparent from the case that when, for this or like purposes, it became desirable or necessary for the boiler makers and their assistants to resort to the mechanical aid of a pulley, it was a part of their duty to consider where, under the circumstances relating to its use, they would fasten or anchor the pulley, and the means by which they would do it. To illustrate: It was not the legal duty of the defendant towards these mechanics, as their master, to direct them whether to make their pulley fast to the crown sheet over the fire box, or to use a timber for the purpose, or as to whether they should use a hook of one form or another, an eyebolt, or some other means of making it fast. It was not a part of the absolute duty of the master to provide the particular simple instrument or thing which should be used for such a purpose. That was a part of the very duty which the mechanics were to themselves perform. The defendant provided the means which might be necessary to en-

ons or inadequate when used for the work to which it was actually applied.[2] Compare § 342, *ante*.

The selection of an article from a supply of suitable material, to be taken away and used at a distance, has been held to be distinguishable from the selection of such an article from materials on hand at the place of work, and to be done as an incident of the performance of the non-delegable duty of furnishing appliances.[3]

604. Failing to use the instrumentalities furnished by the master.—

able the mechanics to do what was thus required of them. If there was not at hand such a thing as might be necessary to fasten the pulley in position for use, they could have it made by the blacksmith. But the evidence shows conclusively that there were enough hooks lying about the shop fit for this purpose, which might have been selected and used. The accident occurred from the fact that whoever procured this hook neglected to observe, as he might have done, that it was broken and unfit for use. It does not appear who did this. There is no reason to presume, even as a matter of fact, that the foreman did it, rather than the boiler maker, Brennan, or one of his helpers. But, while much attention is given to this matter in the argument of the appellant, we deem it to be of no consequence whether the boiler maker or the foreman was the person who negligently selected this particular hook and put it in position for use. In either case this was a part, a mere detail, of the work which these mechanics were employed to perform, and, whether done by the foreman, boiler maker, or a helper, whatever negligence there may have been in selecting the broken hook was the negligence of a fellow servant, and the plaintiff cannot recover from this defendant."

Recovery has been also denied where a fellow servant was negligent in selecting the following articles: A rope (*Prescott* v. *Ball Engine Co.* [1896] 176 Pa. 459, 35 Atl. 224); a buggy for conveying iron (*Bemisch* v. *Roberts* [1891] 143 Pa. 1, 21 Atl. 998); a coupling pin that was too short (*Thyng* v. *Fitchburg R. Co.* [1892] 156 Mass. 13, 30 N. E. 169); a defective link for coupling cars (*Young* v. *Boston & M. R. Co.* [1897] 168 Mass. 219, 46 N. E. 624); a defective hammer (*Rawley* v. *Collian* [1892] 90 Mich. 31, 51 N. W. 350); appliances for supporting and steadying a heavy iron structure which was being hoisted (*Ludlow* v. *Groton Bridge & Mfg. Co.* [1896] 11 App. Div. 452, 42 N. Y. Supp. 343, previous proceedings reported in [1895] 71 N. Y. S. R. 510, 36 N. Y. Supp. 452, new trial denied in [1896] 16 Misc. 222, 37 N. Y. Supp. 595); an imperfect plank upon which to walk from a car to a shed into which it is being unloaded (*Van den Heuvel* v. *National Furnace Co.* [1893] 84 Wis. 636, 54 N. W. 1016); portions of a derrick employed in stone-setting (*Harms* v. *Sullivan* [1878] 1 Ill. App. 251); a skid (*O'Connor* v. *Pennsylvania R. Co.* [1900] 48 App. Div. 244, 62 N. Y. Supp. 723); the door of a grain car, to be used as a platform for transferring a bale of wool (*Pennsylvania Co.* v. *Lynch* [1878] 90 Ill. 333); blocking for frogs (*Rojotte* v. *Canadian P. R. Co.* [1889] 5 Manitoba L. Rep. 365).

An employer cannot be held liable on the ground of failure to repair a defect in a gang plank, where it is shown that he kept an extra one which might have been substituted by the plaintiff for that which was defective. *O'Connor* v. *Pennsylvania R. Co.* (1900) 48 App. Div. 244, 62 N. Y. Supp. 723.

[2] *Carroll* v. *Western U. Teleg. Co.* (1893) 160 Mass. 152, 35 N. E. 456; *Meehan* v. *Spears Mfg. Co.* (1899) 172 Mass. 375, 52 N. E. 518; *Dargin* v. *Munson* (1864) 9 Allen, 396, 85 Am Dec. 770; *The Persian Monarch* (1893) 5 C. C. A. 117, 14 U. S. App. 158, 55 Fed. 333, Reversing (1892) 49 Fed. 669; *Maher* v. *Thropp* (1896) 59 N. J. L. 186, 35 Atl. 1057.

An employer who furnishes safe and suitable appliances to the employee with which to do the work on which he is engaged is not responsible for injuries from defects in appliances substituted by a fellow servant for those furnished by the employer. *Campbell* v. *New Jersey Dry Dock & Transp. Co.* (1898) 61 N. J. L. 382, 39 Atl. 658.

[3] *Thomas* v. *Ann Arbor R. Co.* (1897) 114 Mich. 59, 72 N. W. 40.

Another kind of dereliction of duty which is regarded as characteristic of a servant, and not of the master, is that which consists in the failure of a fellow servant to make use of suitable appliances furnished by the master for the work in hand.[1]

[1] A master who provides a proper apparatus to prevent a tub from falling back into a pit from which it is to be hoisted when full of earth is not liable for an injury caused by the failure of a fellow servant to use that apparatus. *Griffiths* v. *Gidlow* (1858) 3 Hurlst. & N. 648, 27 L. J. Exch. N. S. 404.

A brewer cannot be held culpable on the ground that he did not furnish proper appliances, where he sent his men to a customer's cellar with the usual apparatus for elevating barrels, and the men, finding the apparatus could not be used on account of the narrowness of the cellar, proceeded on their own responsibility to lift the barrels without it. *Ramsay* v. *Robin* (1889) 16 Sc. Sess. Cas. 4th series, 690.

A bridge builder is not liable where a foreman of a bridge gang injures a subordinate by his failure to use the braces furnished for enabling the workmen to move a heavy piece of the structure with greater safety. *Ludlow* v. *Groton Bridge & Mfg. Co.* (1896) 11 App. Div. 452, 42 N. Y. Supp. 343.

A servant cannot recover for personal injuries where the defect complained of is the want of a gang plank at the side door of a car into which he was helping to load a machine, when it is not shown that a suitable gang plank was not furnished. *Trimble* v. *Whitin Mach. Works* (1898) 172 Mass. 150, 51 N. E. 463.

A employer is not liable for an injury caused by the breaking of a derrick from the lack of guy ropes to prevent the swinging of the article hoisted, where there was rope on the premises which might have been used as guy ropes, but which the fellow servants of the injured employee neglected to use. *Clark* v. *Riter-Conley Co.* (1899) 39 App. Div. 598, 57 N. Y. Supp. 755.

Under the Pennsylvania statutes of 1877 and 1883, which merely require mine owners to furnish a sufficient number of props for the tunnels, a miner can recover if the evidence shows that a roof which fell and injured him would not have fallen if a single prop had been put in by the "boss." *Reese* v. *Biddle* (1886) 112 Pa. 72, 3 Atl. 813. Compare *Hall* v. *Johnson* (1865) 3 Hurlst. & C. 589, 34 L. J. Exch. N. S. 222, 11 Jur. N. S. 189, 11 L. T. N. S. 779, 13 Week. Rep. 411, where a miner was held not to be entitled to recover for an injury due to the negligence of an underlooker in omitting to see that the roof of the mine was propped safely. Here, however, the point of view was not the same, as the essence of the decision was that the delinquent was not a vice principal by virtue of his rank.

An employer is not liable for an injury to a servant caused by the giving way of a belt fastener, due to the use of an insufficient number of fasteners in splicing the belt, where it keeps on hand a large quantity of such fasteners, and the failure to use a sufficient number is due to the negligence of his coemployees. *Harley* v. *Buffalo Car Mfg. Co.* (1894) 142 N. Y. 31, 36 N. E. 813.

An employer who acts as his own superintendent in the work of excavating a tunnel, and furnishes proper appliances for securing the safety of laborers who are to be lowered into it by a shaft leading into it, is not liable for an injury caused by the negligent omission of one of his subordinates to deliver those appliances at the mouth of the shaft. *McAndrews* v. *Burns* (1876) 39 N. J. L. 117. See, however, § 617, note 1, subd. (c), *infra*.

A shipowner which supplies and has on hand fenders and a gang plank, the use of which will render safe the unloading of the ship, is not liable for an injury to an employee caused by the failure of the stevedore who superintends the unloading to use the same. *Flynn* v. *Maine S. S. Co.* (1895) 14 Misc. 446, 35 N. Y. Supp. 1031.

A railroad employee cannot recover against the company for injuries caused by the neglect of an engineer or fireman in failing to have sand in the dome of the engine, on the ground of the company's failure to provide safe ways and appliances. *Illinois C. R. Co.* v. *Jones* (1894; Miss.) 16 So. 300.

The failure to provide a headlight renders a railway company liable to an employee who suffers injury through such failure; but it is not liable to the person injured for the failure of the men on the engine to light the one pro-

605. Negligence in failure to discard a defective for a suitable instrumentality.—In some cases of the class reviewed in the two preceding sections, the evidence indicates a breach of the duty to discard a defective appliance and replace it by a sound one, as well as a breach of the duty to use the appliances furnished. The effect of considering the master's responsibility from this standpoint is discussed in a later section (621).

606. Using instrumentalities in a manner not contemplated or authorized by the master.—A master who has furnished sufficient and suitable instrumentalities is not liable for the injuries which one servant may receive from the negligence of another in selecting for the performance of the work a particular instrumentality which, though sufficient in itself, is not adapted to the purpose for which it is used.[1] To this head may be referred those cases in which it has been held that a servant who is responsible for a fellow workman's use of a temporary makeshift contrivance during the progress of the work does not represent the master as regards the furnishing of that contrivance.[2] The position of the injured servant is not improved by the

vided. *Collins* v. *St. Paul & S. C. R. Co.* (1882) 30 Minn. 31, 14 N. W. 60.

Negligence cannot be imputed to an employer on account of the absence of lights from the place of work, where torches are furnished which may be used by the employees if they so desire. *Keare* v. *Troy Steel & I. Co.* (1893) 139 N. Y. 369, 34 N. E. 901.

[1] In holding a telegraph company not to be liable for the fall of a pole upon an employee engaged in raising it, due to the slipping of the pole upon a shovel with pointed end, directed by the foreman to be used instead of a crutch, which has broken, the court said: "We assume that the shovel was not a proper tool for the purpose, but it was not furnished for the purpose by the defendant. The plaintiff, as we understand, contends that his party was reduced to using it by the breaking of the deadman and the absence of other tools, coupled with the fact that the pole was to be raised at that time, and thus that the defendant was responsible for the situation. The short answer is that there is no evidence that the defendant did not furnish a sufficiency of proper tools at the depot from which those which were used were taken, or within convenient reach, and that, when proper appliances of this sort are furnished by the employer within convenient reach in a case like the present, he has done his whole duty, and is not bound to see that every gang of workmen take as many tools as the event may show to have been desirable." *Carroll* v. *Western U. Teleg. Co.* (1893) 160 Mass. 152, 35 N. E. 456.

A steamship is not liable for injuries to an experienced stevedore by the giving way of the guy rope of a derrick improperly used by such stevedore and his coemployees in hauling a vessel alongside, where the derrick was not intended for that purpose. *The Persian Monarch* (1895) 5 C. C. A. 117, 14 U. S. App. 158, 55 Fed. 333, Reversing (1892) 49 Fed. 669.

An employer is not liable for injuries to a painter in his employ caused by the breaking of a defective plank which his foreman placed in position and directed such painter to pass over for the purpose of removing a scaffold, where the plank was not furnished by the employer for such use. *Butterworth* v. *Clarkson* (1893) 3 Misc. 338, 22 N. Y. Supp. 714.

[2] A foreman knowing of the existence of a ladder placed upon a roof as a temporary contrivance for a special purpose is a fellow servant with an employee whom he directs to assist in going upon the roof to adjust a collar to a recently erected smokestack. *Kiffin* v. *Wendt* (1899) 39 App. Div. 229, 57 N. Y. Supp. 109.

An employer who furnishes a supply of ladders from which employees are to

fact that he had reason to believe that the defective appliance was one of those furnished by the master.[3]

The evidence in this class of cases is also susceptible of being sometimes viewed from the standpoint of the plaintiff's contributory negligence, and the master's exemption from liability is sometimes predicated on this ground.[4]

607. Giving of signals.—Frequent attempts have been made to bring the negligence of servants deputed to give signals within the scope of the principle that the duty to maintain a safe place of work is non-delegable. But this contention has always been rejected.[1]

select ladders to be used in painting is not liable for injury to an employee caused by the breaking of the lower of two ladders spliced together by the employees in such a manner that the foot of the ladder had to be placed some distance from the building,—especially where it does not appear that the ladder which broke would have been insufficient if used alone. *McKay* v. *Hand* (1897) 168 Mass. 270, 47 N. E. 104.

An employer who furnished a good ladder is not liable for an injury to an employee caused by falling from a defective ladder manufactured by and used at the suggestion of another employee, without the knowledge or direction of the employer. *Bolton* v. *Georgia P. R. Co.* (1889) 83 Ga. 659, 10 S. E. 352.

Where a tree used as a tackle post by workmen engaged in loading a pile driver hammer on a wagon was not an appliance furnished by the defendant, but a mere temporary instrumentality provided by the servants themselves during the progress of the work, defendant is not liable for the injury. *Bell* v. *Lang* (1901) 83 Minn. 228, 86 N. W. 95.

[3] *Guggenheim Smelting Co.* v. *Flanigan* (1898) 62 N. J. L. 354, 41 Atl. 844, 42 Atl. 145. It will be observed that the facts presented by these cases bring us very close to that which is the subject considered in subtitle C, *infra*.

[4] *Moran* v. *Brown* (1887) 27 Mo. App. 487. See also the extract from the opinion in *Durgin* v. *Munson* (1864) 9 Allen, 396, 85 Am. Dec. 770, as quoted in § 608, note 2, *infra;* and the case cited in § 342, *ante*.

[1] An employer is not liable where trainmen cause injury to one of their number by failing to give proper signals to a following train. *Hoover* v. *Beech Creek R. Co.* (1893) 154 Pa. 362, 26 Atl. 315; *Jenkins* v. *Richmond & D. R. Co.* (1893) 39 S. C. 507, 18 S. E. 182 (first train had broken in two); *Wheatley* v. *Philadelphia, W. & B. R. Co.* (1894) 1 Marv. Del. 305, 30 Atl. 660. Nor where a fireman omitted to sound a bell or whistle for the purpose of notifying the injured employee of the approach of a moving engine. *Greenwald* v. *Marquette, H. & O. R. Co.* (1882) 49 Mich. 197, 13 N. W. 513. Nor where one brakeman causes injury to another by giving a signal which causes a sudden reversal of the engine. *Cole* v. *Rome, W. & O. R. Co.* (1893) 72 Hun, 467, 25 N. Y. Supp. 276. Nor where the result of the manner in which a signal was given to a yard hand by his foreman was that he did not understand that the car he was ordered to couple was to be sent to the repair track, and accordingly acted less cautiously than he would have done if he had realized the danger. *Fraker* v. *St. Paul, M. & M. R. Co.* (1884) 32 Minn. 54, 19 N. W. 349. Nor where a conductor or other official in control of a train injures a brakeman by his negligence in signaling to back up cars. *Jackson* v. *Norfolk & W. R. Co.* (1897) 43 W. Va. 380, 46 L. R. A. 337, 27 S. E. 278, 31 S. E. 258; *McCosker* v. *Long Island R. Co.* (1881) 84 N. Y. 77, Reversing (1880) 21 Hun, 500. In the last case the court said: "The yard master, through whose negligence the injury occurred, must be deemed to have been a fellow servant of the deceased as to all acts done within the range of the common employment, except such as were done in the performance of some duty which the master owed to his servants. The act, in the present case, was very plainly not of that character. The yard master was charged with the duty of making up the trains and distributing the cars in and about the yard and the repair shops of the defendant, and the deceased was employed by him to assist in that service.

608. Negligence in carrying out the express orders or regulations of the master.— In any case in which the master has issued directions for the guidance of his servants, respecting the manner in which the work is to be done, whether those directions take the shape of general rules or of specific orders *ad hunc vicem*, any delinquencies of which employees may be guilty in regard to the mere details of the work to which those orders or rules relate are deemed to be committed by them as mere servants.

In many instances it is easy to deduce inability to recover from the conception that a fellow servant's disobedience to orders is not one of those events which a master is bound to anticipate as likely to make the place of work unsafe.[1] Evidence that the master's directions were not followed will, under such circumstances, be viewed as simply negativing the existence of negligence on his part. But a comparison of the cases cited below with those reviewed in the preceding sections shows that all the various

As a necessary consequence, broken and disabled cars had to be handled and moved to the repair shops, and whatever of risk was inseparable from their damaged condition and the inconvenience, and even danger, of getting them to the shops, was an open and palpable risk of his employment, which the deceased assumed. It is, of course, no ground of liability of the company that the bumpers of this car were broken, and it could not be coupled in the ordinary way. The deceased was employed to handle and move to the repair shops damaged and disabled cars, and took the risk of his employment in that respect. While engaged in attaching the broken car to the one in front, with the aid of a chain and by direction of the yard master, the latter negligently and at the wrong moment signaled to the engineer to back his train, and as a consequence the deceased was crushed between the cars. The negligence which caused the injury was in no sense that of the master. In moving this train the yard master was acting, not as the agent of the master in the performance of the master's duties, for it was not the latter's duty to effect the coupling of these cars and their movement to the repair shop. What the yard master was doing was the work of a servant in the department of labor and duty assigned to him as such. No duty which the master owed to his servants was being done by the yard master from the negligent performance of which the injury resulted."

Liability has also been denied where a servant detailed to give warning to the men on board as to the movement of articles which are being hoisted on board a ship omits to perform that duty. *Hermann* v. *Port Blakely Mill Co.* (1896) 71 Fed. 853. And where the plaintiff was injured while assisting in laying iron pipe in a trench, by the pipe swinging against him as it was lowered, in consequence of the negligence of one of his fellow servants in giving the signal to lower the pipe. *Kennedy* v. *Allentown Foundry & Mach. Works* (1900) 49 App. Div. 78, 63 N. Y. Supp. 195. And where the proper signals were omitted in navigating ships. *The City of Norwalk* (1893) 55 Fed. 98; *The Queen* (1889) 40 Fed. 694. Where brake chains were so defective that a brakeman was frequently compelled to go under the car, and while he was there the conductor signaled for the train to start, and so injured him, the conductor's negligence, and not the broken chains, was regarded as the proximate cause of the injury. *Pease* v. *Chicago & N. R. Co.* (1884) 61 Wis. 163, 20 N. W. 908.

A conductor of a train when signaling to the engineer to go forward is a fellow servant of the engineer, and also of the fireman, who was injured by the negligent acts of the conductor in making the signal and the engineer in obeying it. *Grattis* v. *Kansas City, P. & G. R. Co.* (1900) 153 Mo. 380, 48 L. R. A. 399, 55 S. W. 108.

[1] *Healey* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 136, 37 Atl. 676.

groups of facts as to which nonliability has been vindicated on this ground have been of such a character that the servant would have been unable to recover, quite irrespective of the circumstance that the negligence committed constituted an infraction of the master's orders. Indeed, it is clear, both upon principle and authority, that, so far as the availability of the defense of common employment is concerned, the extent of the master's liability is measured by the same standard whether the act which caused the injury was or was not expressly forbidden by him.[2]

[2] Where the evidence is equally consistent with the theory that the injury was caused by negligence in supervising the operation of trains, and with the theory that it was caused by the fault of a coservant, the plaintiff cannot recover. *Rose* v. *Boston & A. R. Co.* (1874) 58 N. Y. 217. The court said: "In the case before us it appeared in proof that the train on which the plaintiff's intestate was a brakeman went out within three or four minutes after another train, and was itself followed by a third train at about the same distance of time. The injury which resulted in the death of the plaintiff's intestate was the consequence, as the jury have found, and as they might rightfully find from the evidence, of those trains being sent out so near together. By what direction they started so nearly at the same time does not appear. All the proof that relates to the point is contained in the single phrase of one of the witnesses, who, speaking, not of the time of the accident, but of the time of his testifying, says: 'The head conductor who has charge of sending out trains is Mr. Rockefeller.' What charge Rockefeller has [illegible] not shown, nor whether he, in [illegible]ded the trains in question. [illegible]ppear whether he was in[illegible]ary discretion upon the [illegible]arting trains, or whether [illegible]as on the subject, either by [illegible]ed time-table or otherwise, had been made by the company. But it is obvious that the company may have prescribed proper and safe rules in respect to the starting of these trains, and that those rules may have been disregarded by the persons who actually started these trains so near each other. It may be conceded that it is the duty of a railroad corporation to prescribe, either by means of time-tables or by other suitable modes, regulations for running their trains with a view to their safety; but it is obvious that obedience to these regulations must be intrusted to the employees having charge of the trains. Such obedience is a matter of executive detail which, in the nature of things, no corporation or any general agent of a corporation can personally oversee, and as to which employees must be relied upon. . . . Nothing appears in the evidence indicating that any distinction exists between the duty of the company in starting trains and in subsequently running them. In the absence, therefore, of any such proof, and of any proof showing negligence in this respect on the part of the defendants, the case must be determined by ascertaining on which party the burden of proof rests."

The principle that the carrying out of rules is a "matter of detail" was also relied upon in *Bryant* v. *New York C. & H. R. R. Co.* (1894) 81 Hun, 164, 30 N. Y. Supp. 737.

When the master has furnished—to be observed by those having the management of his business—such rules as may be reasonably essential to the safety of his employees in any emergency or condition which may be apprehended in the service, he has discharged his duty to them in that respect, and they assume the hazard of the observance of the regulations by those with whom the duty rests to execute them. *Tully* v. *New York & T. S. S. Co.* (1896) 10 App. Div. 463, 42 N. Y. Supp. 29.

See also *Drake* v. *New York C. & H. R. R. Co.* (1894) 80 Hun, 490, 30 N. Y. Supp. 671.

In *International & G. N. R. Co.* v. *Hall* (1890) 78 Tex. 657, 15 S. W. 108, the following charge was approved: "If defendant had established or provided such reasonable rules, regulations, etc., plaintiff cannot recover, though he may have been hurt through failure of one or more of his fellow servants to do what was required of him or them under the rules of that business.

609. Failure to give instruction.—Where a servant has notice of the general risks and dangers of his employment, the master is not guilty of negligence in failing to notify him of each particular defect, as

In other words, if defendant's established methods of management of that branch of its business were reasonably sufficient, had its employees observed and followed them, to have afforded plaintiff reasonable protection against the danger he incurred when working on the repair truck, defendant would not be liable whether its other employees did their duty or not."

In *Durgin* v. *Munson* (1864) 9 Allen, 396, 85 Am. Dec. 770, the defect in the engine, which the plaintiff alleged as the cause of his injury, was the insufficiency of the brake to prevent the engine from running off while it was turned on the turntable. The defendant proposed to show that the person who had charge for him of all the engines on the road had given instructions, before the accident, to the engineers to have the wheels of their engines "chocked" while turning on the turntable, and that this accident occurred by failure of some servant of the defendant to obey such instructions. It was held that the exclusion of this evidence was error, as it was not shown that the instruction was given or known to the plaintiff. The court said: "Proof that the accident which caused the injury to the plaintiff was caused by the neglect of a fellow servant would have been a defense to the action; and the offer went to that extent. The defects of the engine in the abstract were not the gist of the plaintiff's complaint, but its defects at the time and for the service in which the defendant allowed it to be used when it ran on to the plaintiff. If it were fit and sufficient for use in the manner in which the defendant then allowed it to be used, its insufficiency for other service, at other times, would not concern the plaintiff. Now, it is plain that a machine may be safe and fit for one use, when it is not for another. To put an extreme case, by way of illustration: Suppose the defendant had a worn-out engine, unfit for any service, and he had given orders that it should not be run at all; yet some workman had, without his knowledge, undertaken to run it. Could the master be held responsible to the fellow servant? Suppose a car that was not fit to run with steam power was kept for use only when drawn by horses; or an engine which had not the proper appliances for a locomotive was employed solely as a stationary engine. Would an unauthorized change of the use make the master liable? If this engine, when 'chocked' upon the turntable, was absolutely safe against the possibility of running off, so that it needed no brake at all in that position, and it was not permitted to be turned until the blocking was applied to the wheels, it would be a question for the jury whether the want of a brake was the cause of the injury. There is no absolute requirement of law that the injurious action of a locomotive engine shall be prevented by the specific expedient of a brake. If other sufficient means of safety, equivalent in effect were supplied, that is all that is necessary; and the jury were to judge of their sufficiency. The fact that the orders to the engineers were not known to the plaintiff would not be decisive, because the question on that part of the case was whether the engineers were careless, and by their failure to obey instructions the accident occurred. The evidence which was rejected should therefore have been received, as having a direct tendency to show whether the defendant used such precautions and gave such rules for the use of the engine in the condition in which it was at the time of the accident as made it then a proper instrument for the service to which it was to be applied."

Where all the testimony shows that a special order to an engineer to run his train "two hours late" was to be read in connection with the general rule of the company, and was so understood by all the employees concerned, and that such order meant that the train was to run with reference to the schedule of all passenger trains, and never to encroach upon the time of the train which it followed, the company cannot be held liable for injuries which a brakeman on the train in front received through the negligence of the engineer of the following train in running it too fast. *Kennelly* v. *Baltimore & O. R. Co.* (1895) 166 Pa. 60, 30 Atl. 1014.

Where a railroad company has employed a sufficient number of competent servants to shift its cars in a yard, and has promulgated proper rules for the management of the business, it is not

liable for the consequences of a brakeman's failing to take his proper position on the top of moving cars. *Potter* v. *New York C. & H. R. R. Co.* (1892) 136 N. Y. 77, 32 N. E. 603, Distinguishing *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545.

In *Wright* v. *New York C. R. Co.* (1862) 25 N. Y. 568, it was sought to support the judgment on the ground of the improper arrangement of the time-tables at the point where the collision took place. The court, however, held that the time-tables were not in fault, but that the collision grew out of the carelessness of the employees in running the train not in conformity with the time-tables, and that the fault was therefore to be regarded as that of a fellow servant, and that the defendants were not responsible.

An employer is not liable for the death of an employee killed by the fall of a cornice which he was engaged in putting up without anchors, where he voluntarily assumed the risk, and the foreman in charge of the work had no authority to go on with it except in accordance with the plans and specifications, which provided for the use of anchors. *Homersky* v. *Winkle Terra Cotta Co.* (1899) 178 Ill. 562, 53 N. E. 346, Affirming (1898) 77 Ill. App. 42.

The duty of a railroad company to provide its employees a reasonably safe place to work does not render it liable for injuries received by a brakeman in a collision between his train and an engine, resulting from the negligent disregard by the engineer of such engine of his orders to proceed on a track other than that on which the train was running. *Healey* v. *New York, N. H. & H. R. Co.* (1897) 20 R. I. 136, 37 Atl. 675.

Even if it be assumed that rules for signals at crossings and as to speed are available to an employee, the negligence of the conductor and engineer of a train in failing to make such signals, and in running at excessive speed, is that of fellow servants as regards a section hand. *Wright* v. *Southern R. Co.* (1897) 80 Fed. 260.

The defendant is not entitled to a nonsuit where the evidence leaves it uncertain whether the injury was caused by the misconduct of the plaintiff's co-servants in violating a duly promulgated rule, or whether at the time the injury was received they were acting without any regulations and simply following a dangerous practice sanctioned by time and custom. *Doing* v. *New York, O. & W. R. Co.* (1897) 151 N. Y. 579, 45 N. E. 1028.

A railroad company is not liable for the death of a brakeman in a collision, on the ground that the train despatcher should have warned the conductor of the following train of the preceding one, where a despatch had been forwarded to the side-tracking station in ample time to afford an opportunity to side-track the first train but for its delay in reaching the station, and the conductor had been warned to guard against the following train, and knew of the increased danger, and took no precautions to guard against it. *Herrington* v. *Lake Shore & M. S. R. Co.* (1894) 83 Hun, 365, 31 N. Y. Supp. 910.

In one case it was held that the neglect of the duty of a telegraph operator to put out a proper signal for passing trains, so as to prevent a train passing a station within ten minutes of another, in accordance with the rules of a railroad company, was negligence of a fellow servant of a brakeman upon one of such trains, and not a failure to perform a duty of the master, and was not a cause of recovery for the death of such brakeman in consequence thereof. *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125. The court declined to enter into the question whether the telegraphic service constituted a department distinct from that of trainmen, and decided the case on the special and very narrow ground that the display of the signal was an act which did not pertain to the duties of the operator *qua* operator. The ruling in *McKaig* v. *Northern P. R. Co.* (1889) 42 Fed. 288, however, seems to have been approved of. *Northern P. R. Co.* v. *Charless* (1892) 2 C. C. A. 380, 7 U. S. App. 359, 51 Fed. 567, was distinguished on the ground that it was a ruling on demurrer, the court assuming that, under the allegations of the petition, the negligence of the operator was the same as that of a despatcher.

The plaintiff's action was also held not to be maintainable on similar grounds in the following cases: *Pittsburgh, C. & St. L. R. Co.* v. *Vondersen* (1882) 37 Ohio St. 549 (trainmen injured through collision resulting from the negligence of an employee sent to flag an approaching train); *Niles* v. *New York C. & H. R. R. Co.* (1897) 14 App. Div. 58, 43 N. Y. Supp. 751 (engineer ran his train past a block signal so that it came into collision with an

other standing on the track); *Evansville & T. H. R. Co.* v. *Tohill* (1895) 143 Ind. 49, 41 N. E. 709; Rehearing Denied in 143 Ind. 60, 42 N. E. 352 (collision caused by conductor's running train past station, instead of side tracking, as required by the regulations); *Simpson* v. *Central Vermont R. Co.* (1896) 5 App. Div. 614, 39 N. Y. Supp. 461 (same species of accident); *Northern P. R. Co.* v. *Poirier* (1897) 167 U. S. 48, 42 L. ed. 72, 17 Sup. Ct. Rep. 741 (collision caused by conductor's disregard of rule as to running a train closely behind another); *Ford* v. *Lake Shore & M. S. R. Co.* (1889) 117 N. Y. 638, 22 N. E. 916 (disregard by employees of rules regulating the loading of cars); *Byrnes* v. *New York, L. E. & W. R. Co.* (1889) 113 N. Y. 251, 4 L. R. A. 151, 21 N. E. 50 (railroad company not liable for the negligence of its employees in making inspection of loaded cars which is imposed on them by its rules); *Rutledge* v. *Missouri P. R. Co.* (1894) 123 Mo. 121, 24 S. W. 1053, 27 S. W. 327 (brakeman thrown off car by a sudden check in its movements consequent upon a fellow servant's giving a signal to the engineer in breach of the custom in use); *Denver & R. G. R. Co.* v. *Sipes* (1896) 23 Colo. 226, 47 Pac. 287 (railroad company not liable for the consequences of a conductor's negligence in failing to observe a rule of the company with respect to the closing of switches); *Davis* v. *Staten Island Rapid Transit R. Co.* (1896) 1 App. Div. 178, 37 N. Y. Supp. 157 (switch left open by conductor; brakeman injured); *Moeller* v. *Delaware, L. & W. R. Co.* (1897) 13 App. Div. 467, 43 N. Y. Supp. 603 (car repairer injured by fellow servant's failure to put out a signal flag); *Enright* v. *Toledo, A. A. & N. M. R. Co.* (1892) 93 Mich. 409, 53 N. W. 536 (engineer disregarded rule requiring freight trains to approach stations under full control); *Peterson* v. *Chicago & N. W. R. Co.* (1887) 67 Mich. 102, 34 N. W. 260 (no signal flag placed, as required by rules, to protect car repairer); *Re Fro* v. *Chicago, R. I. & P. R. Co.* (1885) 86 Mo. 302 (breach of rules made for the protection of car repairers); *Duthie* v. *Caledonian R. Co.* (1898) 24 Sc. Sess. Cas. 4th series, 934, 35 Sc. L. Rep. 720 (breach of rule requiring foremen of track-repairing gangs to set a lookout); *Whalen* v. *Michigan C. R. Co.* (1897) 114 Mich. 512, 72 N. W. 323 (brakeman or conductor failed to pull automatic cord when brakes were whistled for); *Lanquist* v. *Duluth Street R. Co.* (1896) 65 Minn. 387, 67 N. W. 1006 (warning signal not given, as prescribed by rules); *McDonald* v. *New York C. & H. R. R. Co.* (1892) 63 Hun, 587, 18 N. Y. Supp. 520 (engineer's breach of rule requiring him to examine engine); *Henry* v. *Lake Shore & M. S. R. Co.* (1882) 49 Mich. 495, 13 N. W. 832 (rules requiring engineer to obey certain signals were violated by an engineer); *Terre Haute & I. R. Co.* v. *Lerper* (1895) 60 Ill. App. 194 (signals at switch disregarded); *Miller* v. *Southern P. Co.* (1891) 20 Or. 285, 26 Pac. 70 (breach of rule as to adjustment of switches); *Cooper* v. *New York, O. & W. R. Co.* (1898) 25 App. Div. 383, 49 N. Y. Supp. 481 (freight cars left on a siding without setting brake). A railway company is not liable for an injury due to the neglect of orders, properly communicated by the employer's representative, as to the running of trains. *Galveston, H. & S. A. R. Co.* v. *Smith* (1890) 76 Tex. 611, 13 S. W. 562; *Chicago, St. L. & N. O. R. Co.* v. *Doyle* (1883) 60 Miss. 977, (conductor went on past a station without getting instructions, as the train despatcher had directed, with regard to the future movements of the train).

A railway company is not liable for injuries due to the negligence of an engineer who, against orders, moved a train out of a siding, and thus caused it to collide with another owing to its being provided with a defective headlight. *New York, C. & St. L. R. Co.* v. *Perriguey* (1894) 138 Ind. 414, 34 N. E. 233, 37 N. E. 976.

A railway company is not liable where an injury is received by a trainman, as a result of the road superintendent's taking a train across a defective bridge, in contravention of the manager's express orders. *Carney* v. *Canada P. R. Co.* (1890) 29 N. B. 425.

No action is maintainable where the [illegible] of the accident was the sudden [illegible]ng of a trap door in a passage, [illegible] below, by a coservant of the plain[illegible]n disobedience to express orders [illegible] foreman, the result being that the [illegible] fell through the opening. [illegible] (1887) 105 N. Y. 564.

[illegible] of a brakeman on a train [illegible]man when he sees a fellow [illegible] a railroad bridge in what [illegible] dangerous position if the train [illegible] by reason of which such fellow [illegible]nt is injured, will not render

such duty, if required, is one necessarily devolving on fellow servants, for whose particular acts of negligence the master is not responsible.

Evidence that an employer referred a servant to an experienced fellow employee for information as to the proper manner of dealing with certain dangerous conditions, and that, in consequence of following the instruction given, the servant was killed, is insufficient to support a charge of negligence on the employer's part.[2]

610. Manipulation of the instrumentalities during the progress of the work.—In the subjoined note are tabulated under headings calculated to facilitate comparison with § 567 and § 568, *ante*, a number of cases illustrating the nonliability of the master for negligence in handling the instrumentalities, under various circumstances, during the actual progress of the work. The cases cited under §§ 601, 602, *supra* should also be compared.[1]

the company liable, although he is directed by the superintendent to move the train across the bridge. *Austin & N. W. R. Co.* v. *Beatty* (1894) 6 Tex. Civ. App. 656, 24 S. W. 934.

An employer's order to lower a beam during the construction of a bridge does not render him liable for the act of an employee charged with the execution of the order, in lowering the beam so carelessly as to inflict an injury on a fellow servant. *Ryan* v. *McCully* (1894) 123 Mo. 636, 27 S. W. 533.

In *Grassel* v. *Weber* (1898) 76 Mo. App. 677, a demurrer to the evidence was sustained, as plaintiff's own evidence showed that his injury was caused by a fellow servant's disobedience to the orders of the foreman.

[1] *Chesapeake & O. R. Co.* v. *Hennessey* (1899) 38 C. C. A. 507, 96 Fed. 713 (servant knew that many of the cars which he had to handle as switchman were defective.

[2] *Welch* v. *Grace* (1897) 167 Mass. 590, 46 N. E. 387 (misspent charge of dynamite).

[1](a) *Handling railway cars and locomotives.*—A railroad company may, subject to its duty to provide proper rules, commit the handling of its trains and cars upon its road and in its yards to its employees, so as to avoid liability to employees from negligence in the handling of the same. *Sumner* v. *Atchison, T. & S. F. R. Co.* (1897) 17 Tex. Civ. App. 337, 43 S. W. 533.

Such a company, therefore, cannot be held liable for an injury to a laborer on a construction train, where the plaintiff seeks to recover on the theory of a special duty incumbent on the engineer in charge to see that the cars were safely coupled before starting. *Ryan* v. *Cumberland Valley R. Co.* (1851) 23 Pa. 384.

A trainhand cannot recover for injuries caused by the act of the ordinary servants of the company in making up a train of cars with platforms of unequal height, under the direction of the station master. *Hodgkins* v. *Eastern R. Co.* (1876) 119 Mass. 419. Negligence in making up a train was treated as a breach of a non-delegable duty, in *Norfolk & W. R. Co.* v. *Nuckols* (1895) 91 Va. 195, 21 S. E. 342, explaining on this theory *Moon* v. *Richmond & J. R. Co.* (1881) 78 Va. 745, 49 Am. Rep. 401.

No action can be maintained by a brakeman for injuries caused by a co-servant's neglect to observe the usual custom of chaining up a dead-wood head on a car. *Arnold* v. *Delaware & H. Canal Co.* (1890) 125 N. Y. 15, 25 N. E. 1064.

No action can be maintained where a collision is caused by the recklessness of the engineer. *Wright* v. *New York C. R. Co.* (1862) 25 N. Y. 562. Nor where a train is run at excessive speed and so derailed. *Slather* v. *Chicago & N. W. R. Co.* (1879) 46 Wis. 197, 1 N. W. 112; *Sherman* v. *Rochester & S. R. Co.* (1853) 15 Barb. 574. Nor where an engineer runs his engine against a brakeman. *Fowler* v. *Chicago & N. W. R. Co.* (1884) 61 Wis. 157, 21 N. W. 40. Nor where a conductor of a work train runs it without a light, and injures a trackman. *Coon*

611. Negligence . . . le transmission of the master's orders to . . er servants.—(Compare cases as to signals in § 607, *supra*.) In transmitting the master's orders to other servants, an em-

. *Syracuse & U. R. Co.* (1851) 5 N. Y. 492. Nor where an engineer disregards the signals at a switch, and so runs his train on to a sidiag. *Terre Haute & I. R. Co.* v. *Lee* (1895) 60 Ill. App. 191. Nor where an engi . caused the death of a fireman . . . failure to notice a red light at a switch. *Peoria C. R. Co.* v. *Hosler* (1892) 45 Ill. App. 205.

In *Howard* v. *Denver & R. G. R. Co.* (1886) 26 Fed. 837, the court rejected the contention that, because the locomotive operated by the delinquent was in the wrong and collided with decedent's train while the track was not clear, and the . . . the master had failed in his . . . providing a safe place for the em . . . e to work in and upon. See § 580, note 3, *supra*.

A general charge in favor of defendant in an action by a brakeman against a railroad company for personal injuries alleged to have been caused by a defective appliance for controlling the motion of the engine should be given where the only defect was in the brake of the engine, and the shock causing the injury was caused by putting the engine in motion, and there is no evidence that the defective brake contributed to causing the injuries. *Highland Ave. & B. R. Co.* v. *Miller* . . 398) 120 Ala. 535, 24 So. 955.

A brakeman on a train ordered to run ahead of another train, under circumstances requiring the employees in control to look out for such train and keep out of its way, cannot recover for a collision caused by the failure of the conductor and engineer of his train to side track the other train. *Hoover* v. *Beech Creek R. Co.* (1893) 151 Pa. 362, 26 Atl. 315.

Leaving cars standing on side tracks on each side of the main track in a switch yard, in such close proximity as to obstruct the view of a wagon road crossing the tracks at right angles, in consequence of which a foreman of a gang of men in the yard, whose business it was to locate the stored cars and see that the wagon way was left open, was killed by a collision between an engine on which he was riding and a loaded wagon, is negligence,—either his own contributory negligence or the negligence of his fellow-servants. *Hebert* v. *Delaware & H. Canal Co.* (1891) 41 N. Y. S. R. 86, 16 N. Y. Supp. 661.

An engineer cannot recover where he is injured by running his train against some box cars left standing on the main track owing to the negligence of the station agent. *Brown* v. *Minneapolis & St. L. R. Co.* (1884) 31 Minn. 553, 18 N. W. 834.

Though an engineer may be charged with the duty of instructing an engine wiper when the latter's foreman is absent, the former does not stand in the relation of vice principal to the latter in regard to his work of shifting and making up trains. *South Florida R. Co.* v. *Weese* (1893) 32 Fla. 212, 13 So. 136.

A railway company is not liable for the death of a brakeman who, after a train had separated owing to a defect in the couplings of one of the rear cars, had undertaken to repair the defect, and was killed by the negligence of the engineer in backing up the cars in the forward part of the train. *Course* v. *New York, L. E. & W. R. Co.* (1888) 17 N. Y. S. R. 715, 2 N. Y. Supp. 312, Affirmed (1889) 117 N. Y. 652, 22 N. E. 1133.

The retention of a car of another road in the yards of a railroad company after it has been ordered to be returned as defective, by the yard master or crews in the yard, is the act of a fellow servant of a switchman injured while attempting to couple such car to another for the purpose of removing it from the yard. *Atchison, T. & S. F. R. Co.* v. *Meyers* (1896) 22 C. C. A. 268, 46 U. S. App. 226, 76 Fed. 413 (previous appeal [1894] 11 C. C. A. 439, 24 U. S. App. 295, 63 Fed. 793).

The court said: "The only vice principal or representative of the railroad company in the occurrences of the day was the inspector, and he represented the company only in the inspection of the car, and in the giving of notice of defects. The company owed to the defendant in error no duty in respect to the time or manner of return. If the car had been retained in the Santa . . yards by the order or authority of . . general superintendent or other general officer of the company, and the plaintiff, being required to work about it, had suffered injury by reason of its defective condition, he would doubtless have

ployee is regarded as being in the performance of a merely ministerial duty. No damages, therefore, can be recovered for injuries caused by negligence in the discharge of that duty, whatever may be the

had cause for complaint; but the crews engaged in the yards at Streator, including yard master, foreman, and engineers, were all his fellow servants, and for what they did with the car after the inspection and after notice that it was to be returned to the other road, the plaintiff in error is not amenable."

A street-railway employee injured in a collision with an empty car which ran down an incline because the brake was not properly set by a fellow servant cannot recover therefor. *Hoover* v. *Carbon County Electric R. Co.* (1899) 191 Pa. 146, 43 Atl. 74.

(b) *Operating hand cars.*—The negligent operation of a hand car by a section foreman is not a delinquency imputable to the company. *Martin* v. *Atchison, T. & S. F. R. Co.* (1897) 166 U. S. 399, 41 L. ed. 1051, 17 Sup. Ct. Rep. 603 (see as to this case, § 601, *supra*); *Northern P. R. Co.* v. *Charless* (1896) 162 U. S. 359, 40 L. ed. 999, 16 Sup. Ct. Rep. 848 (excessive speed); *Olson* v. *St. Paul, M. & M. R. Co.* (1888) 38 Minn. 117, 35 N. W. 866 (foreman took no precaution to secure his hand car against a collision); *Justice* v. *Pennsylvania Co.* (1892) 130 Ind. 321, 30 N. E. 303 (workman struck by lever of hand car).

(c) *Improperly placing the loads on railway cars and other vehicles.*—(Compare § 619, note 4, subd. (f), *infra*.)—That a railway company is not liable for injuries due to the improper manner in which railway cars are loaded has been held in *Conger* v. *Flint & P. M. R. Co.* (1891) 86 Mich. 76, 48 N. W. 695 (carelessly placed side stake allowed log to fall so that train was derailed); *Lellis* v. *Michigan C. R. Co.* (1900) 124 Mich. 37, 82 N. W. 828; *Indianapolis & St. L. R. Co.* v. *Johnson* (1885) 102 Ind. 352, 26 N. E. 200; *Fitzgerald* v. *Boston & A. R. Co.* (1892) 156 Mass. 293, 31 N. E. 7 (bales of hay carelessly stowed); *Sweeney* v. *Page* (1892) 64 Hun, 172, 18 N. Y. Supp. 890 (car jolted, throwing a heavy stone forward, the result being that the plaintiff was pushed off); *Boiley* v. *Delaware & H. Canal Co.* (1898) 27 App. Div. 305, 50 N. Y. Supp. 87 (loaded car, as a whole, not an appliance, as the trial judge laid down in his charge; projecting timber). In the last-cited case the court said: "It is the clear duty of the master to, at all times, furnish the servant safe material with which to do the work required, so far as the exercise of reasonable care in selection and inspection can make them so. But the use of such material is necessarily the work of the servant. Whoever accepts service under the master does so with the knowledge that it is the servant, and not the master, who will cause any injury that may result from a careless use of the material so furnished. And so far as protection against such careless use is concerned, he can, in reason, expect no more from the master than that competent coservants be employed, and a judicious system be adopted for carrying out the work. The car is furnished for the express purpose of being loaded and run over the road, and the brakeman is one of the employees; and the man who loads and inspects the loading is another whose duty it is to carry out that purpose. Each uses, within his own sphere, the car furnished by the master, and both are engaged in carrying out the purpose for which it is furnished. Surely the loading of the car was not an act pertaining to the duty the master owes to his servants, any more than running it over the road was such an act; and hence, within long settled rules, the master is not liable for negligence in loading it."

The failure to ballast a snow plow sufficiently is the negligence of a fellow servant. *Pudsey* v. *Dominion A. R. Co.* (1895) 27 Nov. Sc. 498.

In *Atchison, T. & S. F. R. Co.* v. *Seeley* (1894) 54 Kan. 21, 37 Pac. 104, the court declined to follow *Deacy* v. *Detroit, G. & H. M. R. Co.* (1893) 97 Mich. 329, 22 L. R. A. 292, 56 N. W. 756, and held the company liable for improper loading. See § 568, note 1, subd. (k), *ante*.

A similar principle is applicable with regard to the loading of other kinds of vehicles. Thus, it is held that the supervision of the loading of an elevator is a mere detail of the work. *Denenfeld* v. *Baumann* (1899) 40 App. Div. 502, 58 N. Y. Supp. 110.

So, a proprietor of iron works is not liable for an injury to an employee, caused by the negligent manner in which coemployees loaded iron upon an iron

agency employed for bringing the orders to the knowledge of those whose actions will be affected by them.

Most of the cases illustrating this principle relate to the position of

wagon or buggy. *Benisch* v. *Roberts* (1891) 143 Pa. 1, 21 Atl. 998.

So, an employer is not liable for injuries to an employee through the capsizing of a car having a superstructure for handling timbers, not dangerous if properly used, due to the overloading of such car by coemployees. *Callaway* v. *Allen* (1894) 12 C. C. A. 114, 24 U. S. App. 388, 64 Fed. 297. The court said: "The primary cause of the accident was the careless and negligent use of the car by Anderson and the men under him. The weight of evidence is clear that the car, with the added superstructure, was not ordinarily or necessarily dangerous, if carefully handled and not overloaded. . . . The evidence shows clearly that the car was overloaded. The timbers were too heavy for the counterbalancing weight, and that was the fault of coemployees, and was the primary and controlling cause of the accident."

Cases involving injuries from the improper loading of cars often turn upon the question whether the servant assumed the risk as one of those ordinarily incident to the service. With these we are not concerned in this note. In other cases the liability of a railroad company for injuries caused by foreign cars so loaded that the freight upon them projects over the ends has been referred to the consideration whether it is negligence to receive into a train cars loaded in this manner. In one case the ground has been taken that its acceptance is merely a fact bearing upon the question of the company's negligence. *Louisville & N. R. Co.* v *Gower* (1887) 85 Tenn. 473, 3 S. W. 824. In others it has been held that the court may pronounce the company, as a matter of law, not to be guilty of negligence in exposing a servant to a risk of this character. *Northern C. R. Co.* v. *Husson* (1882) 101 Pa. 1, 47 Am. Rep. 690; *Day* v. *Toledo, C. S. & D. R. Co.* (1880) 42 Mich. 523, 4 N. W. 203.

But this theory of the circumstances involved in cases of this class suggests a standpoint different from that occupied in the cases in which the responsibility of the master has been discussed with special reference to the existence of a duty to ascertain the condition of the cars which the servants are required to handle, and the right to maintain an action is tested by an examination of the question whether that duty is assignable or absolute. This question can only be material when it has been determined that there has been a breach of duty. See §§ 581–584, *ante*.

In a later section it will be shown that the negligence of an employee in inspecting a railway car with a view to ascertaining whether it is properly loaded is that of a mere coservant of the trainmen. See § 619, note 4, subd. (f), *infra*.

A master is not liable where his foreman, in helping to unload lumber from a wagon, allowed a roller to fall off upon a servant. *Lundberg* v. *Sherlin-Carpenter Co.* (1897) 68 Minn. 135, 70 N. W. 1078.

(d) *Manipulating switches.*—The duty of opening and closing a switch in the ordinary operation of a railroad is not one of the personal duties of the master, but a duty of operation. *St. Louis, I. M. & S. R. Co.* v. *Needham* (1894) 25 L. R. A. 833, 11 C. C. R. 56, 27 U. S. App. 227, 63 Fed. 107. The court said: "The roadbed, ties, tracks, stations, rolling stock, and all the appurtenances of a well-equipped railroad, together constitute a great machine for transportation. It is the duty of the railroad company to use ordinary care to furnish a sound and reasonably safe machine, to use due diligence to keep it in proper repair, and to use ordinary care to employ reasonably competent servants to operate it; but, when this duty is performed, the duty rests upon the servants to operate it carefully. In the case before us there is no evidence that the conductor who negligently left the switch open was not selected with reasonable care. There is no claim that there was any defect in the switch that hindered or prevented the conductor from closing it. The company furnished a switch sufficient to move the rails, and used due care in selecting the servant to operate it. Before this servant commenced to operate it, the switch was closed, so that the passenger train on which the decedent was killed might have passed in safety. It became the duty of the conductor, in the operation of the railroad, to open this switch and to run his train through it upon the

the telegraph operators of railway companies. In so far as these employees are not exercising any discretionary powers in regulating the movements of the trains (§577, *a, b, ante*), they are by all the courts

spur track. He did so. It then became his duty to take his train off the spur track, and to close the switch. He took his train off, and proceeded south, but carelessly left the switch open. His negligence was not in the construction, preparation, or repair of the railroad, but in its operation. The railroad was safe before he made it unsafe by his negligence in operating it, and he was discharging none of the personal duties of the master, but one of the duties of the servant, when he became guilty of the fatal negligence. Any other holding would annihilate the now settled rule of liability for the negligence of fellow servants. It will not do to say that the timely movement and fastening of a switch in the ordinary operation of a railroad is requisite to provide a safe place for the next train to be operated in, and hence is one of the personal duties of the master. Under such a rule, it would become the absolute duty of the master to so operate all switches, all turntables, the levers of all engines, all brakes, all cars, and every appurtenance of the railroad that every place upon it should at all times be safe, and no negligence of any employee could ever cause an injury to another servant for which the master might not be held liable. At the instant of the injury, every place in which an injury is inflicted is unsafe. The test of liability is not the safety of the place nor of the machinery at the instant of injury, but the character of the duty, the negligent performance of which caused the injury. Was it a duty of construction, preparation, or repair, or was it a duty of operation of the machine?"

To the same effect see *Pleasants* v. *Raleigh & A. Air-Line R. Co.* (1897) 121 N. C. 492, 28 S. E. 267; *Dares* v. *Southern P. Co.* (1893) 98 Cal. 19, 32 Pac. 708 (train ran through the switch on to the siding, and killed a track repairer); *Corcoran* v. *Delaware, L. & W. R. Co.* (1891) 126 N. Y. 673, 27 N. E. 1022 (car allowed to run on to repair track); *Denver & R. G. R. Co.* v. *Sipes* (1896) 23 Colo. 226, 47 Pac. 287.

In *Miller* v. *Southern P. Co.* (1891) 20 Or. 285, 26 Pac. 70, the special contention was put forward that the effect of a general rule of the company providing that conductors would be held personally responsible for the proper adjustment of switches used by their trains was to create the conductor whose negligence caused the injury vice principal as regards the plaintiff. The court rejected this contention, reasoning thus: "The argument for the plaintiff proceeds upon the assumption that the switch was broken and disarranged when the Lebanon locomotive used it, and that Huston [the conductor] had devolved upon him the duty of seeing that the switch was properly adjusted, which being a personal duty the company owed to Miller, that the negligence of Huston in failing to discover that the switch was out of order was the negligence of the company, and rendered it liable for the injurious consequences which ensued. The rule was a proper and needful regulation, and obedience to it was well calculated to insure safety, but it was not designed to create any new or distinct liability other than the law established. As a rule, it did not operate to change the rule of law which governed the relation of the parties and fixed their liabilities. The conductors were not expected to perform the duties of switchmen; someone under them, usually a brakeman, discharged this duty, by their direction; and the object of the rule in making them responsible was to secure the best possible performance of the duty of a switchman to insure safety in operating trains. It added no new or other element to the legal relation of the parties concerned than already existed. The whole duty combined and to be performed in this regard by conductor and switchman in operating the switch only constituted the proper discharge of the duty of a switchman. It is not the duty of a master, 'as with a personal sight and touch,' to operate the switches on the road. . . . If we take the character of the act performed by such servant to determine whether he is an agent or representative of the company or a fellow servant, what is there in the act of operating a switch so as to properly adjust the rails for the passage of trains which may be considered in any sense to impose or delegate the duty to such employee to furnish, construct, keep, or maintain in repair such switch? How-

ever liberally we may construe the rule as to coservants, it is difficult to perceive, if the rule itself is to remain, that a servant engaged in the operation of a switch is a representative of the master, or other than a fellow servant engaged in a common employment for the successful management of the train. The act he performs involves no duty of construction or repair or other duty in regard to the switches of the road if out of repair or unfit for use, whether by wear and tear or by the criminal interference of strangers, than to promptly notify the company of its condition so that it may be repaired or its place supplied." The facts and decision in *Guthrie* v. *Southern P. R. Co.* (1891; Or.) 26 Pac. 76, were the same as in this case.

(e) *Failing to prevent the movement of heavy pieces of machinery.*—The negligence of a servant in failing to secure railway cars on an incline so far as to prevent their moving is not chargeable to the company. *Kudik* v. *Lehigh Valley R. Co.* (1894) 78 Hun. 492, 29 N. Y. Supp. 533.

A train hand cannot recover for the negligence of a coservant in failing to block the wheel of a railway car so as to prevent its moving. *Dodge* v. *Boston & A. R. Co.* (1892) 155 Mass. 448, 29 N. E. 1086.

An averment which shows that the proximate cause of the injury was the moving of a traveling crane shows that it was due to the act of a fellow servant, and no recovery can be had on the theory that another crane was defective. *Baxter* v. *Abernethy* (1893) 21 Sc. Sess. Cas. 4th series, 159.

A servant who was injured while working in the elevator of a mine which he had been ordered to clean cannot recover where the cause of the injury was the starting of the engine which operates the hoisting machinery, and the accident might have been prevented if the foreman had, as it was his duty to do, detached the endless chains used in running the elevator, and thus disconnected it from the machinery. *New Pittsburgh Coal & Coke Co.* v. *Peterson* (1894) 136 Ind. 398, 35 N. E. 7; S. C. (1896) 14 Ind. App. 634, 43 N. E. 270.

(f) *Operation of hoisting machinery.*—An employer is not liable for injuries to a workman handling the crank of a crane hoisting a heavy weight, caused by the slipping of the shaft from slow gear into fast gear, requiring much greater power, due to fellow workmen stationing themselves upon the side of the crank opposite to the fast gear, and the pressure caused by their position. *Barlow* v. *Standard Steel Casting Co.* (1893) 154 Pa. 130, 26 Atl. 12.

An employer is not liable for the negligence of fellow servants in overloading a derrick, so that it toppled over. *Rosa* v. *Volkening* (1901) 64 App. Div. 426, 72 N. Y. Supp. 236.

The absence of a clutch to a machine does not render an employer liable for an injury to an employee while entangled in a rope, where the injury would have been prevented if the employee had held the rope tightly, or if a fellow employee at the machine had done the same thing, and there is no reason to believe that he would have been more likely to use the clutch if there had been one. *American Glucose Co.* v. *Lavin* (1898) 81 Ill. App. 482.

The death of an employee caused by the failure, either of himself or a coemployee, to take the twist out of a chain on a windlass used in operating machinery, will not render the employer liable. *Delaney* v. *Heartt* (1890) 32 N. Y. S. R. 499, 10 N. Y. Supp. 595.

Plaintiff's intestate was employed by defendants, at the time of his death, at the bottom of a mine shaft; his duty being to fill the ore bucket, which was hoisted by a horse led by a boy. The employee at the top of the shaft, whose duty it was to dump the ore bucket and let it down to deceased, dropped it without looking to see whether the boy had hooked the rope to the horse, as was the custom, in order to let the bucket down steadily, which he had not done; and the bucket struck deceased and killed him. Held, that though the boy was incompetent to manage the horse, such incompetency was not the cause of the accident, but that it was caused by the negligence of deceased's fellow servant at the top of the shaft; and hence there was no error in directing a verdict for defendants. *Adams* v. *Snow* (1900) 106 Wis. 152, 81 N. W. 983.

An employer is not liable for the negligent operation of an elevator which is safe if carefully used. *White* v. *Eidlitz* (1897) 19 App. Div. 256, 46 N. Y. Supp. 184; *Trewatha* v. *Buchanan Gold Min. & Mill Co.* (1892) 96 Cal. 494, 28 Pac. 571, 31 Pac. 561.

The servant's action is not maintainable where upon the evidence the cause of the injury must have been the negligence of one fellow servant in leaving an

elevator suspended at the floor from which it fell when another fellow servant got on it, or in leaving the rope out of gear, or in descending on it while the rope was out of gear. *Kelley* v. *Boston Lead Co.* (1880) 128 Mass. 456.

The mate of a vessel is a fellow servant of a boatswain in managing the chain in lowering the topmast, which the boatswain has gone up to unfasten. *The Miami* (1898) 87 Fed. 737.

An employer is not liable for injury to an employee in the hold of a vessel by the overturning of a loaded bucket which hit the combings of the hatch, where, on reaching the combings, it was pulled sidewise by another employee, to be dumped on the dock, and there is no other showing of negligence. *McDonough* v. *Walsh* (1892) 49 N. Y. S. R. 361, 21 N. Y. Supp. 303.

A foreman of a stevedore gang acts as a fellow servant of a stevedore at work in the hold of a vessel, in stopping a draft of loaded bags as it comes over the vessel's side to have them made tighter in the sling before being lowered into the hatch, and the ship is not liable for injuries caused by their being left unsecured, and falling and injuring the workman below. *The Kensington* (1898) 91 Fed. 681.

Recovery cannot be had for the death of an employee on a steamship, caused by the falling of a barrel from a sling while being lowered into the hold, where the negligence, if any, causing its fall, was that of a fellow servant. *Moy* v. *Ocean S. S. Co.* (1895) 12 Misc. 375, 33 N. Y. Supp. 563.

The captain of a lighter engaged in delivering boards upon a vessel cannot recover for injuries from the fall of boards, due to the insecure manner of fastening the rope holding them while they were being hoisted, where the fault was that of one of the workmen. *The Ravensdale* (1894) 63 Fed. 624.

A ship is not liable for injuries to a longshoreman engaged in the hold helping to unload iron, caused by the fall of iron from a skid through the corner of which a lanyard pulled out when the skid caught through the negligence of the guy-tender or engineer as it was coming up. *The Servia* (1891) 44 Fed. 943.

(g, h) *Operation of machinery in sawmills.*—Plaintiff was thrown on a trimming saw which he was operating in defendant's sawmill, and injured, having been struck by one end of a plank lying on rolls, the other end of which had been caught on the carriage of the main saw. It was the duty of a fellow servant to see that the plank was so placed on the rolls that it could not be caught by the carriage, and of another fellow servant not to run the carriage unless it was clear of the planks on the rolls. Held, that the injury was caused by the negligence of one or both of the fellow servants. *Demers* v. *Deering* (1899) 93 Me. 272, 44 Atl. 922.

(i) *Operating a fire hose.*—The failure of water to run from a hose will, in the absence of positive evidence, be attributed to the negligence of fellow servants in failing to keep the apparatus in proper order, or in negligently putting it in operation. *Jones* v. *Granite Mills* (1878) 126 Mass. 84, 30 Am. Rep. 661.

(j) *Starting machinery without warning.*—(Compare § 601, *supra*.) In several cases the principle is applied that there can be no recovery where the injury was caused by the negligence of a coservant in starting machinery, without warning or notice, at a time when the plaintiff was in such a position that he was safe as long as it was not in motion. *Bergstrom* v. *Staples* (1890) 82 Mich. 654, 46 N. W. 1035; *Dwyer* v. *Nixon* (1901) 47 C. C. A. 666, 108 Fed. 751; *Quigley* v. *Levering* (1901) 167 N. Y. 58, 54 L. R. A. 62, 60 N. E. 276, Affirming (1900) 50 App. Div. 354, 63 N. Y. Supp. 1059; *Fournier* v. *Columbian Mfg. Co.* (1899; N. H.) 44 Atl. 104; *O'Brien* v. *American Dredging Co.* (1891) 53 N. J. L. 291, 21 Atl. 324; *Henshaw* v. *Pond's Extract Co.* (1892) 50 N. Y. S. R. 263, 21 N. Y. Supp. 177 (oiler injured); *Whatley* v. *Block* (1894) 95 Ga. 15, 21 S. E. 985 (elevator); *Porter* v. *Silver Creek & M. Coal Co.* (1893) 84 Wis. 418, 54 N. W. 1019 (sudden starting of machinery tautened a slack cable); *Wilson* v. *Hudson River Water Power & Paper Co.* (1893) 71 Hun, 292, 24 N. Y. Supp. 1072 (water turned on to a power wheel); another case involving similar facts is *New Pittsburgh Coal & Coke Co.* v. *Peterson* (1893) 136 Ind. 398, 35 N. E. 7 (master held not liable for the negligence of a foreman in starting machinery while the plaintiff was working in an elevator which he had been ordered to clean); *Davis* v. *Muscogee Mfg. Co.* (1898) 106 Ga. 126, 32 S. E. 30; *Kerr* v. *Crown Cotton Mills* (1898) 105 Ga. 510, 31 S. E. 166 (petition alleging that steam was turned on from an engine so negligently by the engineer, or some other employee of the defendant, that the plaintiff, who was washing a window, was injured, shows no cause of action).

An operator of a spoke lathe who was injured while oiling it, by the foreman's negligence in starting it suddenly without warning, for the purpose of seeing whether it did the work properly, cannot recover. *Wellman* v. *National Wheel Co.* (1901) 128 Mich. 1, 87 N. W. 75. The court said the result might have been different if the foreman had been engaged in repairing the machine. For the purposes of this case the foreman was apparently regarded as not being a vice principal by reason of his official position. If he had been such an official, he would, according to the authorities, have represented the master as regards the act in question. See § 545, note 3, *ante*.

(k) *Moving heavy articles.*—(See also §§ 597, 603, 604, *supra*.) A conductor of a freight train in helping a brakeman to unload a car acts as a mere servant. *Louisville, N. A. & C. R. Co.* v. *Southwick* (1896) 16 Ind. App. 486, 44 N. E. 263.

A railway company is not liable where injury is received by a section hand owing to the way in which his colaborers lifted a rail. *Coyne* v. *Union P. R. Co.* (1890) 133 U. S. 370, 33 L. ed. 651, 10 Sup. Ct. Rep. 382.

An employer is not liable for the negligent manner in which a foreman conducts the operation of moving a heavy wheel. *Richmond Locomotive & Mach. Co.* v. *Ford* (1897) 94 Va. 627, 27 S. E. 509.

A lumber company is not liable for an injury to a lumberman, caused by the negligence of coemployees in failing to keep rollers at right angles with a piece of timber being moved thereon, in consequence of which it slewed around so that the end struck a lumber pile from which planks fell on his leg. *Wecklund* v. *Southern Oregon Co.* (1891) 20 Or. 591, 27 Pac. 260 (carelessness of workmen in using chute, not negligence in its construction, declared to be the proximate cause of the injury).

There can be no recovery for an accident caused by the slacking of guy ropes in the hands of the plaintiff's fellow servants, while a heavy piece of a bridge was being moved. *Ludlow* v. *Bridge & Mfg. Co.* (1896) 11 App. Div. 452, 42 N. Y. Supp. 343.

A servant has no cause of action against his master for an injury received while assisting to handle a heavy stone, through the neglect of his fellow workmen in letting the stone down too soon. *La Belle* v. *Montague* (1899) 174 Mass. 453, 54 N. E. 859.

(l) *Causing or allowing heavy objects to fall.*—An employer is not liable for injuries caused to a servant by the carelessness of another in pulling away a chocking guard in a pile driver, and thus allowing the hammer to fall. *McPhee* v. *Scully* (1895) 163 Mass. 216, 39 N. E. 1007.

A bridge foreman is a fellow servant of a carpenter in negligently and carelessly permitting a jackscrew to fall, which was set up by the two, and which the foreman agreed to watch. *Peirce* v. *Oliver* (1897) 18 Ind. App. 87, 47 N. E. 485.

A master is not liable for the death of a servant, caused by the fall of a sliding door in a store, where it fell owing to the careless manner in which it was opened by the men in charge of it. *Collyer* v. *Pennsylvania R. Co.* (1886) 49 N. J. L. 59, 6 Atl. 437.

A laborer cannot recover where he is struck by a plank left loose on a scaffold by his foreman, and thrown off by a tank which was being hoisted through a window by himself and his coservants. *Bagley* v. *Consolidated Gas Co.* (1896) 5 App. Div. 432, 39 N. Y. Supp. 302.

A superintendent in answering in the affirmative when a laborer was about to throw down a block of wood and asked if all was clear below acted as a mere servant. *Donnelly* v. *San Francisco Bridge Co.* (1897) 117 Cal. 417, 49 Pac. 559.

The negligence of a foreman in dropping an implement and injuring an employee under his direction is that of a fellow servant, and not of a vice principal. *Frowley* v. *Sheldon* (1897) 20 R. I. 258, 38 Atl. 370.

A mining company is not liable where a miner is injured by the negligence of a blacksmith whose duty it is to sharpen the tools, in lowering them down a shaft. *Snyder* v. *Viola Min. & Smelting Co.* (1891) 2 Idaho, 771, 26 Pac. 127.

A foreman in a machine shop is deemed to be, with respect to his own negligence in the manner of bracing a section of a heavy condenser, a fellow servant of an employee who assisted him and who was injured by the section falling upon him. *Kliegel* v. *Weisel & P. Mfg. Co.* (1893) 84 Wis. 148, 53 N. W. 1119.

An injury caused by the fall of the door of a freight house, struck by a keg of nails which was being rolled out by the plaintiff's coservants, is regard

ed as being due to the negligence of the latter, and not to the negligence of the company, where the evidence shows that the door when rolled back left a space of about 8 feet for the unloading of freight, amply sufficient for the passage of the keg if it had been handled with reasonable care. *Chicago, R. I. & P. R. Co.* v. *Becker* (1899) 38 Ill. App. 523.

An employee engaged with other employees in hoisting ice to the top of a car by means of a large sawhorse placed on the tops of two cars standing side by side cannot recover for an injury caused by the horse tipping over because of his negligence or that of his fellow servants in pulling laterally, instead of perpendicularly, in hoisting the ice. *Tobin* v. *Friedman Mfg. Co.* (1896) 67 Ill. App. 149.

Where a master supplies machinery which, if duly oiled and cleaned, is safe, for the purpose of preventing a trolley from running off a traveler, he is not liable for injuries caused to an employee by failure of a fellow servant to oil and clean it properly, though there may be a standard article in use which would, if the master had procured it, have prevented the accident. *Quigley* v. *Levering* (1901) 167 N. Y. 58, 54 L. R. A. 62, 60 N. E. 276, Affirming (1900) 59 App. Div. 354, 63 N. Y. Supp. 1059.

Injuries sustained by a railway employee who, with other hands, was carrying a rail, caused by the hands at the other end dropping it, upon the section boss's order, before he and the other hands at his end were ready, are not due to the order, but either to his own disobedience of the order, or to the negligence of the other workmen. *Coffman* v. *Louisville & N. R. Co.* (1892) 13 Ky. L. Rep. 866, 18 S. W. 1012.

An employer is not liable for injuries sustained in removing pieces of lumber, the cause of the accident being the act of one left in charge of the work by the foreman while he was temporarily absent, in releasing his hold upon a pile of rims which he was supporting while the employee was removing the lumber. *Hodges* v. *Standard Wheel Co.* (1899) 152 Ind. 680, 52 N. E. 391, 54 N. E. 382.

An employer is not liable for the death of a workman caused by the fall of a large mass of caked lime, which was imbedded in a large pile of cinders which deceased and others were employed as laborers in removing, such fall having been caused solely by the method adopted of removing such mass of lime by digging out the cinders from beneath it. The fact that the mass had been partially undermined by the members of another gang, which had previously been at work was held to be immaterial. *Simone* v. *Kirk* (1901) 57 App. Div. 461, 67 N. Y. Supp. 1019.

The duty of a master to provide a safe place for the employees in which to do their work does not extend to conditions which the employees create in the performance and as a detail of their work,—as, where the employees in shoveling coal leave an overhanging frozen crust of coal which falls and injures one of them. *Miller* v. *Thomas* (1897) 15 App. Div. 105, 44 N. Y. Supp. 277.

Where a servant of a railway company is injured while putting a hose on an engine tender, by the falling of loose coal dislodged by another servant standing on the tender to receive the hose, the company is not liable, its negligence in overloading the coal not being the proximate cause of the accident. *Weisel* v. *Eastern R. Co.* (1900) 79 Minn. 245, 82 N. W. 576.

An employee of a railroad company cannot recover damages of the company for an injury received by the falling of a pile of lumber, caused by the negligence of himself and of his coemployees. *Langlois* v. *Maine C. R. Co.* (1892) 84 Me. 161, 24 Atl. 804.

A laborer injured by the fall of a steel ingot from a mass of such ingots carelessly piled by his fellow laborers in the same employment cannot recover of the employer. *Nash* v. *Nashua Iron & Steel Co.* (1882) 62 N. H. 406.

A laborer engaged in loading boxes on a railway car cannot recover for injuries due to the fact that they were unsafely piled, and fell when he climbed on them. Such a danger is one incident to the progress of the work. *Carolan* v. *Southern P. Co.* (1897) 84 Fed. 84.

An employer is not liable for the negligence of a servant in piling cloth so that a portion of the pile slips and falls on another servant. *Hale* v. *Wayside Knitting Co.* (1901) 59 App. Div. 395, 69 N. Y. Supp. 404.

A servant cannot recover for an injury caused by the fall of bags of cement, which were piled under the supervision of the employer's superintendent. *Page* v. *Naughton* (1901) 63 App. Div. 377, 71 N. Y. Supp. 503. In that case it was also held that, as the piling of bags on a floor is the act of a coservant,

evidence received on the question of the care with which the bags were piled, and going ...ow that the floor was out of level and shaky, would not support a judgment for plaintiff, on the theory that defendants failed to furnish a safe place to work in.

An employee is a fellow servant with a foreman by whose negligence in throwing a box upon a pile of iron posts the former is injured, where the latter was doing nothing which it was the master's duty to do. *Di Marcho* v. *Builders Iron Foundry* (1894) 18 R. I. 514, 28 Atl. 661.

A foreman acts as a fellow servant of his subordinates in moving loose stones which support a large rock, and thereby causing it to fall. *Ross* v. *Union Cement & Lime Co.* (1900) 25 Ind. App. 463, 58 N. E. 500.

Compare cases cited in § 612a, note 1, subd. (e), *infra*.

(m) *Failing to prevent explosions.*—A railroad company is not liable for the death of a fireman, caused by the explosion of the boiler of a locomotive engine, where such explosion was due to the fact that the water was permitted by the engineer to get too low while running at night, if the boiler was properly supplied with gauge cocks to test the height and adequacy of the water. *Leary* v. *Lehigh Valley R. Co.* (1894) 76 Hun, 575, 28 N. Y. Supp. 187.

An employee in a fruit-canning factory does not cease to be a fellow servant of another employee merely because he is directed by the superintendent to look after a barrel used for heating water with steam; and the employer is, therefore, not liable for his negligence in inserting or failing to remove a plug from the pipe through which the steam escapes, causing an explosion of the barrel. *Crowell* v. *Thomas* (1897) 18 App. Div. 526, 46 N. Y. Supp. 137.

(n) *Work of blasting.*—(See also §§ 597, 600, *supra*.) To place and set off blasts in a mine is the function of a mere servant, and the mine owner is not liable for its negligent performance. *Anderson* v. *Daly Min. Co.* (1897) 16 Utah, 28, 50 Pac. 815; *Wiskie* v. *Montello Granite Co.* (1901) 111 Wis. 443, 87 N. W. 461 (blast improperly prepared).

Where a servant of a person engaged in blasting rock was injured by the explosion of an open barrel of gunpowder under which a piece of lighted fuse had been thrown by a puff of wind, he cannot recover on the theory that the employer should have provided small flasks in which to carry the powder from the storehouse. The leaving of the barrel in a dangerous position is not a necessary incident of the system, but rather attributable to the negligence of the workman himself. *Mulligan* v. *M'Alpin* (1888) 15 Ct. of Sess. Cas. 4th series, 789.

(o) *Failing to keep footways secure.*—An employee was injured by falling upon a slippery floor, rendered so by grease left thereon by two other employees who had been directed by defendant's foreman to clean out a pit formerly occupied by the gearing of a machine. Held, that the injury was caused by a fellow servant, for whose carelessness the master was not liable. *Burke* v. *National India Rubber Co.* (1897) 21 R. I. 446, 44 Atl. 307.

No action can be maintained where carpenters had piled planks insecurely during the day, and plaintiff, a night watchman in defendant's mill, on his second passage over them at night, caught his foot and fell. *Bodwell* v. *Nashua Mfg. Co.* (1900) 70 N. H. 390, 47 Atl. 613.

(p) *Exposing the servant to excessive heat.*—An employer is not liable for the death of an employee engaged in cleaning an oven used for heating air to be blown into a blast furnace, by the unexplained opening of a cock letting on through such oven the blast of air heated to nearly 1,000 degrees. *Dana* v. *Crown Point Iron Co.* (1893) 51 N. Y. S. R. 238, 22 N. Y. Supp. 455.

(q) *Failing to keep place of work properly ventilated.*—An employer who furnishes a suitable place for a given machine and a particular kind of work, and instructs his foreman to ventilate the room by opening the windows when the machine is in use, is not liable for an accident to a workman, caused by the foreman's failure on a particular occasion to open the windows. *McGuerty* v. *Hale* (1894) 161 Mass. 51, 36 N. E. 682 (plaintiff became dizzy from the smell of benzine, and was injured by uncovered gearing while he was attempting to adjust the parts of a machine).

(r) *Failing to keep place of work properly lighted.*—Where, in an action by a servant against his master for an injury partially resulting from a dark molding room, it appears that the company furnished an adequate lighting plant, and that the gas could have been lighted by the servant, it is error to instruct that the question of the gas be-

ing lighted, and whether any negligence was to be imputed to the defendant, is for the jury, as the duty to light the gas was not on the defendant. *Hall* v. *United States Radiator Co.* (1900) 52 App. Div. 90, 64 N. Y. Supp. 1002.

There can be no recovery for injuries received by a stevedore or other employee on a ship, who falls through an open hatchway which is left insufficiently lighted through the negligence of a co-employee. *M'Carthy* v. *Bristol Shipowners' Co.* (1883) Ir. L. R. 10 C. L. 384; *Byrne* v. *Fennell* (1882) Ir. L. R. 10 C. L. 397; *Mellen* v. *Thomas Wilson Sons & Co.* (1893) 159 Mass. 88, 34 N. E. 96 (injuries received by falling down a dark hatchway usually lighted by electric lights, because they were not going at the time owing to an accident that might have been remedied by the engineer, and other lights available were not put in place owing to the negligence of another employee).

(s) *Exposing servant to peril from uncovered hatchways or other dangerous openings.*—(See also last subdivision.) *Kraeft* v. *Mayer* (1896) 92 Wis. 252, 65 N. W. 1032 (existence of negligence on owner's part denied, as the stevedore and his fellow servants had, under the customary procedure, full control of the physical conditions).

The owner of a ship is not liable to an employee for negligence of the master, mate, or other officer in failing to close the doors of the gangway at night. *Geoghegan* v. *Atlas S. S. Co.* (1895) 146 N. Y. 369, 40 N. E. 507

The failure to secure a removable section of a ship's railing is the negligence of a mere servant. *Quebec S. S. Co.* v. *Merchant* (1890) 133 U. S. 375, 33 L. ed. 656, 10 Sup. Ct. Rep. 397. Compare the ruling in *Hedley* v. *Pinkney & Sons S. S. Co.* [1892] 1 Q. B. 58. Affirmed [1894] A. C. 222, that to leave a removable railing out of place while a ship is on a voyage (the consequence being that a seaman is thrown overboard by a lurch) is not a breach of the merchant shipping act of 1876, § 5, which imposes on the owner and master of a ship an obligation to put and keep her in a "seaworthy condition."

There can be no recovery for injuries caused by the failure of a fellow servant to replace the planking which is used to cover a pit when it is not in use. *Sofield* v. *Guggenheim Smelting Co.* (1900) 64 N. J. L. 605, 50 L. R. A. 417, 46 Atl. 711; *Filbert* v. *Delaware & H. Canal Co.* (1890) 121 N. Y. 207, 23 N. E. 1104.

There can be no recovery for injuries received from a fall through a scuttle, where the inference from the evidence is that the cause of the accident was a temporary misplacement of the cover, which permitted it to tilt under the plaintiff's weight, and that the cause of the misplacement was the hauling of trucks over the cover by the plaintiff's fellow workmen. *The Thorsina* (1887) 31 Fed. 90.

The leaving open of a hatchway by a squad of laborers is the act of a fellow servant, which will preclude recovery by a member of such squad for injuries from falling through such hatchway, where the duty of covering and uncovering it rested upon such squad. *The Louisiana* (1896) 21 C. C. A. 60, 41 U. S. App. 324, 74 Fed. 748.

A shipowner is not liable for an injury received by a member of the crew through the negligence of an officer or another member of such crew in leaving a hatchway open, the navigation of the ship during the voyage being a common undertaking, for which all the ship's company in their several stations are employed, and in respect of which they are regarded by the maritime law, as well as the common law, as fellow servants. *Olson* v. *Oregon Coal & Nav. Co.* (1900) 104 Fed. 574, 44 C. C. A. 51. Affirming (1899) 96 Fed. 109.

(Compare cases cited in § 520, note 1, subd. (p), *ante*).

Other illustrative decisions with regard to injuries of this sort are *Karl* v. *Maillard* (1858) 3 Besw. 591 (stress was laid on the fact that the hatchway was opened without authority); *Baron* v. *Detroit & C. Steam Nav. Co.* (1892) 91 Mich. 585, 52 N. W. 22.

(t) *Handling ship in docks.*—A foreman of a dock, who at the time the accident occurred was engaged in superintending the raising of a vessel, is not, as to such act, the *alter ego* of the dock company; and it cannot upon that ground be held liable for his negligence or for his errors of judgment in directing the work. *Hart* v. *New York Floating Dry Dock Co.* (1882) 16 Jones & S. 460 (vessel suddenly careened and fell on plaintiff).

(u) *Navigating ships.*—In *The Queen* (1889) 40 Fed. 694, it was sought to hold the ship liable for the negligence of the officers in hanging too long a hawser, in a dense fog, in a fair-way, and in not having any whistle or other signal to indicate her presence in a very

held to be fellow servants of trainmen.[1] But the principle itself is

dangerous place. The court said: "These faults arose in the details of navigation, —a work in which all the ship's company were alike employed in their several grades. As to such details the seamen as fellow servants took the risk of each other's negligence. . . . It would be absurd to say that the owners owed a duty to the seamen that too long a hawser should never be used, or that signals in a fog should be properly given by their own vessel. These details belong to the ordinary work of navigation, and to the men employed to conduct it. As to this work, the owners owe no duty to the officers or seamen to see it properly performed. The duty lies the other way, *viz.*, from the ship's company to the owners. None of such acts, moreover, belong to the master to do as the *alter ego* or special representative of the owner, as in *Chicago, M. & St. P. R. Co.* v. *Ross* (1884) 112 U. S. 377, 28 L. ed. 787, 5 Sup. Ct. Rep. 184. They may be all performed, and for the most part usually are directed and performed, by others than the master. Though there are many acts in the care and management of the ship and of the voyage, in which the master acts as the representative of the owners, and performs the duties and functions of the owners, such as the maintenance of the ship and her apparel in a safe and seaworthy condition, procuring repairs and supplies, freighting the ship, arranging her voyages, her times and places of sailing and stopping, and the discharge of all the general duties and legal obligations of the ship to the seamen, for which acts, if negligently performed, the owners are responsible to the seamen injured, they are not responsible for negligence in the mere details of the ordinary work of navigation on board the ship; because these acts are not at all duties of the master as the *alter ego* or representative of the owner, nor are they acts as to which the owner owes any duty to the seamen. As to third persons, all the ship's company represent the owner in the work assigned them, and their negligence makes the owner liable. As between themselves, no one more than another, in the ordinary work of navigation, represents the owner or performs an owner's duty, and therefore each takes the risk of the other's negligence." The judgment accordingly provided that the seamen on board one of two vessels who had been injured in a collision caused by the negligence of both crews could only recover one half of the sums respectively assessed and allowed to them as damages.

A mate in managing a pilot boat acts as a mere servant. *Carlson* v. *United New York Sandy Hook Pilots' Assn.* (1899) 93 Fed. 468.

(c) *Driving horses.*—An employer is not liable for injuries received by one servant, owing to the negligent driving of another. *Dwyer* v. *American Exp. Co.* (1892) 82 Wis. 307, 52 N. W. 304.

[1] The whole duty of a railroad company is performed when it has promulgated rules which, if observed and followed by the subordinates who have to carry them out, will bring personal notice to everyone concerned of any special deviation from its time-table in regard to the running of its trains; and it is not liable for an injury caused to a fireman by the carelessness of operators and conductors in executing an order of the train despatcher to stop a train at a certain station. The servant's action cannot, under such circumstances, be maintained on the theory that the order so given was a change of the rules of the road. *Slater* v. *Jewett* (1881) 85 N. Y. 61, 39 Am. Rep. 627. The court said: "It cannot be contended that there was anything required of the conductor that raised him out of his relation to the intestate of a fellow servant. The act required of the conductor at the particular time was to receive an order from an authorized source of command, and in a prescribed mode to acknowledge the receipt of it, and then to follow the direction. This was service merely. . . . There is more plausibility in the position that the act that was to be done on this occasion was so essentially one for the master to do in his duty to his servants, that whatever subordinate was taken by him to do it came to be the master in doing it. It is urged, and with reason, that clearly arranging and promulgating the general time-table of a great railway is the duty and the act of the master of it; that when there is a variation from the general time-table for a special occasion and purpose, it is as much the duty and act of the master, and he is as much required to perform it; that it is the duty and act of the master to see and know that his general time-table is brought to the knowledge of his servants who are to square their actions to it; that the same is his duty and act as to a variation from it, which

is but a special time-table; and that, therefore, whoever he uses to bring those time-tables to the notice of his servants, he puts that person in his place to do an act in his stead hasmuch as the responsibility is upon him to see and know that it is done, and done effectually; and that if, instead of doing it in person, he chooses to do it through an agent, that agent, *pro hac vice*, is he, the master, and he, the master, is responsible for a negligent act therein of that agent, whereby a fellow servant of him is harmed. The rule has been laid down in repeated cases in this court, in terms so broad as to come close to this case. *Flike* v. *Boston & A. R. Co.* (1873) 53 N. Y. 549, 13 Am. Rep. 545; *Fuller* v. *Jewett* (1880) 80 N. Y. 46, 36 Am. Rep. 575; *Crispin* v. *Babbitt* (1880) 81 N. Y. 516, 37 Am. Rep. 521. Attentive consideration, however, will perceive a distinction between the cases. That the master has the right, as regards his servants, to vary from the time-table that he has set, cannot be doubted. It is at times a necessity so to do, and a necessity so frequent as to fall within the occurrences that a railway servant is bound to expect in the course of his employment. Even as regards the public and passengers, a railway manager has a right, when needs press, to vary from his general time-table. All that can then be required from him, by the public and passengers, is that when he makes the variation he acts under it with reasonable care and diligence. *Sears* v. *Eastern R. Co.* (1857) 14 Allen, 433, 92 Am. Dec. 780; *Gordon* v. *Manchester & L. R. Co.* (1873) 52 N. H. 596, 13 Am. Rep. 97. That is to say, due care and diligence in giving notice of the change, and in running the train upon the changed time. A servant cannot ask for or expect more than this. . . . We think that it is a misconception of the case to hold that the order of the train despatcher was a change of the rules of the road as established and promulgated by the superintendent. The train despatcher acted in exact accord with the general rules and regulations, which foresaw and with minuteness provided for such an occasion as this, — much and as fully, so far as we can see from the case, as for the ordinary running of trains on the general time-card. The order of the train despatcher was but a carrying out of those rules, and an application of certain provisions of them to a case for which they were made, and the arising of which had been foreseen as probable. In what other way could they be carried out in the detail of them, but through the service of the servants previously chosen and assigned to their parts? And can it with propriety be said that the parts of that detail are acts of the master, that he must do himself, or be liable for their negligent doing?" After laying down the principle that the master's liability depends on the character of the negligent act, the court proceeded thus: "The query, then, is in the case before us: Is it the duty of the master to give personal notice to every operative of a train of a special deviation from an established general time-table? or is his duty done when he has beforehand prescribed rules, minute, explicit, and efficient, and made them known to his servants, which, if observed and followed by all concerned, will bring such personal notice to every one entitled to it? We think that in the circumstances of this case the latter clause of the query propounds the true rule, and should be answered affirmatively. It is the duty of the master to provide rules and regulations for the running of the trains. He has done so here. One of them is that by telegraphic message sent at any time through operators at the ends of the wires, to the conductor and engineer of a train, that train may be stopped at a station, or hurried forward to another, or made to go out of general order. These rules, with that provision, are made known to all servants. If, when the intestate entered the employment of the defendant, these rules had been read to him, and his especial attention called to this one, and he had agreed to serve under it, would not he have taken the risk of the carelessness of the operators and conductor in carrying it out? Is this case any different in substance from that? Really, by entering the employment with these rules in force, he did in effect agree that special orders might be so sent. The bargain between him and the defendant was not only that special orders might be given interfering with the general time-table, but that they might be givin in this way. It is this feature of the case that distinguished it from some of those that we have cited."

One of the Federal circuit courts of appeals has also held that a local telegraph operator receiving and delivering the orders of a train despatcher to the person in charge of a train, in respect to a change in the schedule, is a fellow servant of the latter. *Oregon Short*

Line & F. N. R. Co. v. *Frost* (1896) 21 C. C. A. 186, 44 U. S. App. 606, 74 Fed. 965 (Dissenting, Hawley, J.). The court in discussing the correctness of the charge of the trial judge that it was the duty of the railroad company to give notice that it had changed the time of running the trains, and that if it intrusted that duty to the telegraph operator, his acts were the acts of the company, and that, if he was negligent in this matter, it was the negligence of the company, said: "The ordinary running of the train is established by a fixed schedule, of which all operatives have notice and by which their acts must be governed. When occasion arises to disturb the regular schedule, the duty rests upon the company to give timely notice to those that are to be affected thereby. This it is the office of the train despatcher to do. But when he has given that information to a local operator, is that duty discharged, or does there rest upon the company the further obligation to see that all of its servants through whose hands that message goes on its way to the [illegible] employees shall deliver it as given, and that in case of any failure in the line of communication, the company shall be liable for the resulting injury? In support of the latter view it is argued that, if the duty to notify the train operatives of a change in the time-table is personal to the company, and cannot be delegated to the servant so as to excuse the company from liability, it follows that such power, since it may not be delegated to one servant, may not be delegated by him to another, and that the reasons which lead to the conclusion that the train despatcher is a vice principal lead directly to the further conclusion that the local telegraph operator stands in the same attitude to the company, and that the duty the company owes of furnishing a safe place of operation to its employees cannot be discharged short of actual notice to those who are to be affected thereby, and whose personal safety is dependent thereupon. After a careful consideration of the question and of the strong reasons that may be urged in support of either view of this proposition, it is our conclusion that the better doctrine is that the local telegraph operator is the fellow servant of those who are in the control and management of the train. It is evident, and the court will take judicial notice of the fact, that a disturbance in the regular time schedule of trains is frequent and necessary in the operation of all railroads. [illegible] then becomes necessary to issue special orders for their direction. Conductors, engineers, and brakemen have knowledge of that fact, and they know when they enter into the employment of the railroad company that their notice of such orders must come through the local telegraph operator at the station, and that they incur the risk of accident through his negligence or mistake. The special orders issue in the first instance from the train despatcher. It is obviously impossible for him to give personal notice to all who are to be governed thereby. The orders must of necessity be conveyed to some one in behalf of the others. The local telegraph operator, the conductor, the engineer, and the brakeman are all engaged in a common employment,—that of moving the train. The operator, it is true, is subject, to no personal risk from [illegible] age in the time card, but that [illegible] not consisting one in depriving [illegible] are his fellow servants. The [illegible] be some point where the [illegible] ity of the company ceases. If [illegible] at the time when information [illegible] given to the operator, who [illegible] Could it be said [illegible] luctor [illegible] received from the [illegible] message from the train despatcher, yet who failed to guide his actions according thereto, stands in the relation of vice principal to the conductor, engineer, [illegible] brakeman of an other train who may be injured by his negligence? Or, that if the [illegible] should receive instructions [illegible] train despatcher to send out [illegible] to signal an approaching train [illegible] pany is responsible for the [illegible] such flagman in [illegible] such instructions. It seems [illegible] principle to hold that the company has discharged its [illegible] where [illegible] information to [illegible] of [illegible] is engaged in [illegible] common [illegible] of the others that are to [illegible] thereby, and has instructed [illegible] tify his coemployees; and [illegible] company has exercised due [illegible] lecting such local operator [illegible] instance, and has not been negligent in employing or retaining him [illegible] it has discharged its duty [illegible] that such operator stands in the attitude of a fellow servant to the trainman."

Very similar is the reasoning in a case decided in another circuit: "He and the engineer and the conductor work together, at the same time and place, for a common employer, with an

immediate common object, namely, the proper running of trains. It is essential, in the operating department of a railroad company, that there should be provision for communicating to those in charge of different trains the whereabouts of other trains, to avoid collision. This information is given by means of the general time table and general rules for the running of trains with reference to each other, which the employees in charge of each train are obliged implicitly to obey. But it often happens that the general time-table must be varied from, and these variations must be communicated to those in charge of trains. This is effected usually by telegraphic orders from the superintendent or the train despatcher, who has supreme control of the running of trains. The information is also communicated by means of flagmen, by means of torpedoes, by red lights and green lights upon trains, by the block signal system, and in other ways. The subordinate employees whose duty it is to transmit the orders of the officer in control, or to give information as to the presence of trains upon any part of the track, without special orders, are engaged at the same time and place with the persons operating the train, in a common employment, having an immediate common object,—namely, that of the running of trains,—and therefore are fellow servants. The man who makes the signal at the station to the engineer on the approaching train to stop is as much engaged in the running and operation of that train as the flagman sent out ahead to signal the condition of a switch. . . . There can be no separation of the signal department and the operating department, for the employees engaged upon the train, in the actual, manual operation of the train, are expected to be part of the signal department of the company. The man who puts out the green light at the back of the train, to indicate that a train is following, communicates to every station agent, every conductor, and every engineer who sees it, knowledge upon which they, each of them, must act; and yet it can hardly be said that the brakeman, in displaying this green light, is acting in a different department from the man who opens and closes the throttle valve of the engine." *Baltimore & O. R. Co.* v. *Camp* (1895) 13 C. C. A. 233, 31 U. S. App. 213, 65 Fed. 952.

See also *Illinois C. R. Co.* v. *Bentz* (1900) 40 C. C. A. 56, 99 Fed. 657 (railroad company is not liable for the death of an engineer in a collision, due to the negligence of an operator in failing to report the passing of a train at his station).

Where an engineer was killed through the negligence of a telegraph operator at one of the stations on the defendant's road, in failing to notify the conductor of the train of a fact telegraphed to him from the station ahead, which would require him to slacken speed and to cross over a switch onto another track at a given point, the consequence being that the engine driven by the intestate jumped the track and caused his death, the court held that the telegraph operator was a fellow servant with the engineer. *Derby* v. *Philadelphia & R. R. Co.* (1886; Pa.) 3 Cent. Rep. 112, 4 Atl. 170. In this case the court considered that the main duty of a telegraph operator is the receipt and delivery of messages regarding the running of trains upon the roadway, in which he is merely the automaton or communicator to give the information as to the condition of the track ahead of the moving train, and part of the general machinery by which the whole roadway was operated.

Recovery was also denied in the following cases: *McKaig* v. *Northern P. R. Co.* (1889) 42 Fed. 288; *Monaghan* v. *New York C. & H. R. R. Co.* (1887) 45 Hun, 113 (the correctness of this decision seems rather questionable, as the operator had the duty of controlling the movements of trains at a particular point under a temporary system organized by the company, in view of the fact that the progress of certain alterations in the track rendered it necessary to run all trains going in one direction on a single track); *Dana* v. *New York C. & H. R. R. Co.* (1881) 5 Hun, 473 (message misinterpreted; case was appealed, but merely on the question of the insufficiency of the company's rules).

See also *Cincinnati, N. O. & T. P. R. Co.* v. *Clark* (1893) 6 C. C. A. 281, 16 U. S. App. 17, 57 Fed. 125, where, however, the nonliability was predicated directly from the fact that the operator was at all events a fellow servant as to the negligent act which caused the injury,—*viz.*, in not putting out proper signals for passing trains,—and thus seeing that no train passed within less than ten minutes of another.

equally applicable where other methods of transmitting the master's commands are involved in the case.[4]

C. Negligence of coservants in respect to the preparation or structural modification of instrumentalities or their parts, when not imputed to the master.

As to cases in which the delinquency resolves itself into negligently selecting, or failing to use, the appliances to be adjusted, see also §§ 603, 604, *supra*.

612. Introductory.— Ordinarily, as has been shown above (§§ 566–568, *ante*), the duty of taking care that the servant is not exposed to danger from what may be called intrinsic defects in the instrumentalities is deemed to be non-delegable. But this principle is subject to some important qualifications. The precise extent of which is, as the authorities now stand, a matter of uncertainty.[1]

It may, perhaps, be taken as a proposition universally conceded, that the rights and liabilities of the master and servant are to be gauged with reference to the principle that, where the master furnishes the materials for securing the safety of the servant, as the work progresses, in a place the condition of which is constantly changing, the use and

[4] In *Card* v. *Eddy* (1894; Mo.) 28 S. W. 979, a section foreman was held not to be entitled to recover, where a fireman undertook to deliver to him a telegraphic despatch by tying it to a lump of coal, and, in throwing the lump off, inadvertently struck him. The court said: "The act the fireman was required to perform was the delivery from a running train of a message to the plaintiff. It cannot matter how important the message may have been, nor that it contained an order the receivers, through their road master, or other agent, were required to give. The injury did not result from the nature of the message, or from a failure to transmit it. The service required of the fireman was that of a servant, which any messenger could have performed, and the manner of its delivery did not pertain to the duty the receivers owed to plaintiff. They owed him the duty only of using reasonable care to select a competent and careful messenger. After the master has discharged the duty he owes his servants, such as proper care in the selection of those with whom they are required to work, providing suitable tools, and machinery, etc., yet the servants must look to each other for protection in the performance of their respective duties. The fireman can be regarded as the agent or vice principal of the receivers under no test which has ever been applied by the courts of this state, or elsewhere, so far as I have been able to discover. He was given no power to superintend, control, or direct the plaintiff,—which is the usual test; nor was he performing a duty the receivers owed to plaintiff, other than such as they owed to every other employee in their service."

[1] In one case it has been laid down that the master's liability may be tested by considering whether the injury was caused by a breach of the duty of construction, preparation, or repair, or by a breach of the duty to operate the appliance with proper care. *St. Louis, I. M. & S. R. Co.* v. *Needham* (1894) 25 L. R. A. 833, 11 C. C. A. 56, 27 U. S. App. 227, 63 Fed. 107 (see § 610, note 1, subd. (d), *supra*). But in view of the decisions cited in the present subtitle, this statement cannot be said to express correctly the doctrine accepted by many judges.

application of those materials according to the exigencies of the work is the function of the servants themselves, unless that function is specially assumed by the master.[2] But the practical construction of a rule so broadly expressed as this obviously affords scope for infinite differences of opinion.

The reports carry us, by gradations sometimes almost imperceptible, from cases involving groups of facts which may be, without difficulty, admitted to be such that recovery could not have been allowed consistently with any reasonable interpretation of the doctrine of common employment, to cases which virtually nullify in some very important respects the theory that the master must answer for the negligence of the employees who provide the place of work and other appliances. Judicial ingenuity has been taxed to the utmost for the purpose of discovering distinctions of sufficient importance to take the evidence out of the operation of this theory.[3] The desperate predicament in which the courts sometimes involve themselves in the attempt to deal with antagonistic principles at places where they overlap has assuredly never been more strikingly illustrated than by the recent remark of a New Jersey judge that "a duty may be ambiguous, or may have a double aspect, and be, in some sense, incumbent on the master and on the fellow servant," and that "such a problem may, perhaps, be solved by determining which duty is paramount over the other."[4] What more "lame and impotent conclusion" could be reached than the conception of a duty which may be regarded as the master's or the servant's according to the standpoint from which it is viewed, and the suggestion that the rights and liabilities of the parties should be settled by an unintelligible method of analysis? When such a confession of helplessness is forced from a judge, it seems to be high time for the legislature to play the part of a *deus ex machina*.

612a. Negligence which produces structural unsafety of a temporary character.— It seems to be well settled that, in the absence of evidence going to show that the conditions which caused the injury were, or ought to have been, known to the master or the employee whose special function it is to see that the instrumentality in question is reasonably safe for use (see chapter XLII., *post*), no action can be maintained for injuries caused by details of work which temporarily result in intro-

[2] *Floyd* v. *Sugden* (1883) 134 Mass. 563.

[3] In *Hamilton* v. *Rich Hill Coal Min. Co.* (1891) 108 Mo. 364, 18 S. W. 977, an eminent judge protested against "whittling away, by refined exceptions," the rule by which the master is required to provide suitable appliances, and no one who has had occasion to carry out any extensive researches among decisions of this class will say that this caution is unnecessary.

[4] *Flanigan* v. *Guggenheim Smelting Co.* (1899) 63 N. J. L. 647, 44 Atl. 762.

ducing some structural modification into the environment of the injured person.[1]

[1](a) *Defects in railway tracks.* — (Contrast cases in § 568, note 6, subd. (a), (b), *ante*.) Where the evidence is that, in the operation of a railroad at a certain point, it was frequently necessary to remove temporarily the planks covering a pit, for the purpose of making repairs thereon, and that the employees were repeatedly instructed to cover the pit when the repairs were finished, the efficient cause of an accident resulting from the pit being left uncovered is the carelessness of coservants, and not an imperfection of the road. *Filbert* v. *Delaware & H. Canal Co.* (1890) 121 N. Y. 207, 23 N. E. 1104.

A brakeman who knows of a lumber pile near the track, and is injured in jumping upon a train moving by the pile, cannot recover if the piling of the lumber was an act of a fellow servant. *Gaffney* v. *New York & N. E. R. Co.* (1887) 15 R. I. 456, 7 Atl. 284.

Where a deposit of sand alongside a railway track results in injury to a brakeman the injury is regarded as being due to the act of a mere fellow servant. *Robinson* v. *Houston & T. C. R. Co.* (1877) 46 Tex. 540.

A brakeman who, in coupling cars in a yard, slips on a pile of wet ashes, dropped from a locomotive fire-box and left between the rails, cannot recover. *Hughes* v. *Winona & St. P. R. Co.* (1880) 27 Minn. 137, 6 N. W. 553.

A railway company which has employed a competent workman to keep its track in order is not liable for injuries received by a train hand, owing to its defective condition, while he was engaged in coupling cars. *Wood* v. *Canadian P. R. Co.* (1899) 6 B. C. 561.

A railway company is not liable for the death of a brakeman who was brushed off the train by a car placed by fellow servants on a side track in dangerous proximity to the main track. *Schaub* v. *Hannibal & St. J. R. Co.* (1891) 106 Mo. 74, 16 S. W. 924.

(b) *Displacement of guards provided for dangerous machinery.*—The negligence of servants charged with the duty, necessarily involved in the ordinary use of machines, of oiling the same and changing the rolls operated in connection therewith, in failing to replace the guard over the gearing after oiling it, is not chargeable to the master, so as to render him liable for injuries to another workman employed to tend the machine, where the oiling of the machinery and the changing of the rolls required no special skill and might properly have been intrusted to the person injured. *Wosbigian* v. *Washburn & M. Mfg. Co.* (1896) 167 Mass. 20, 44 N. E. 1058. The court said: "The men who tended the machines were not accustomed to oil them and change the rolls, but two other men were regularly employed to do this. Were these men doing a part of the work that was within the department of the master, whose duty it was to furnish his servants with tools and machinery as suitable and safe as the exercise of reasonable care would secure, or were they doing the work of mere servants in making necessary changes of parts, incident to the management of the machines in the ordinary use of them? If these changes had regularly been made in the ordinary course of their business by the persons who tended the machines, there would have been no doubt that in making them they would have been mere servants, for whose negligence the master would not be liable, and to whom, if competent, he could trust the work without any other duty than to furnish them proper materials and appliances for carrying it on. The only ground for doubt arises from the fact that the work was done by machinists who were specially employed for that purpose. But it appears that there was work to be done in repairing the rolls which were taken out, and in fitting them for use again, which could not be done by ordinary persons who were only taught to tend the machines, and which called for the employment of machinists. So far as appears, the changing of the rolls and oiling of the machines was a simple kind of work, which the machine tenders might have done as well as others. We are of opinion that these changes were necessarily involved in the ordinary use of the machines, and could properly be left to competent servants as a part of their work of managing the machines, that called for no attention by the master if he kept the workmen properly supplied with suitable rolls and other necessary articles."

An employer cannot be held liable for the negligence of a coservant in displacing a plank which forms part of the

613. Negligence in failing to adjust or secure instrumentalities or their parts while in use.—Another group of cases may be conven

fence by which dangerous machinery is protected, in accordance with the provision of a statute requiring such protection to be furnished. *Honor* v. *Albrighton* (1880) 93 Pa. 475.

(c) *Dangers supervening in excavation work.—trenches, mines, quarries, etc.*—(Contrast cases cited in § 568, note 6, *ante*.) A master is not liable where a foreman or other employee whose duty it is to see that the sides of a trench are properly shored and braced, either fails to use, or uses improperly or unskilfully, the materials provided for that purpose, and causes injury to other servants who are at work in the trench. *Floyd* v. *Sugden* (1883) 134 Mass. 563.

In *Zeigler* v. *Day* (1877) 123 Mass. 152, a case involving similar facts, the court said: "The work was committed to the supervision of a skilful and competent superintendent; it required, for the protection of the men, the frequent use of temporary structures, the location and erection of which, as the digging progressed, was a part of the work in which the superintendent and the men under him were alike employed, and for the preparation of which, as in the case of the scaffold of the mason or carpenter, the master is not liable, unless there is something to show that he assumed it as a duty, independent of the servant's employment."

To the same effect are the following cases: *Dube* v. *Lewiston* (1891) 83 Me. 211, 22 Atl. 112; *Durst* v. *Carnegie Steel Co.* (1896) 173 Pa. 162, 33 Atl. 1102 (plaintiff was himself excavating the trench); *Dwyer* v. *Hickler* (1891) 43 N. Y. S. R. 221, 16 N. Y. Supp. 814 (same facts); *Bergquist* v. *Minneapolis* (1890) 42 Minn. 471, 44 N. W. 530 (plaintiff was laying pipes); *Laporte* v. *Cook* (1901) 22 R. I. 554, 48 Atl. 798 (sides of trench inadequately shored).

It is error to refuse an instruction to the effect that the sheet-piling in a trench was a detail of the work, and that, if the failure of the foreman in charge to use such piling was the cause of the sides of the trench falling in, the plaintiff could not recover. *Golden* v. *Sieghardt* (1898) 33 App. Div. 161, 53 N. Y. Supp. 460.

The negligence of a foreman in charge of workmen engaged in excavating a trench, in continuing to drive curbing timbers into the ground in close proximity to a laborer, after discovering that they were throwing off splinters, is that of a fellow servant of the laborer, whatever may be his relation to him in other respects. *Friedrich* v. *St. Paul* (1897) 68 Minn. 402, 71 N. W. 387.

See however *Kranz* v. *Long Island R. Co.* (1890) 123 N. Y. 1, 25 N. E. 206, § 617, note 1, *infra*.

Since the danger that a bank which is being taken down in a gravel pit may fall at any moment is open and obvious, and the servants engaged in the work have ample facilities for discovering and removing such danger, the master may fairly be allowed to impose upon the servants themselves the duty of providing against such an occurrence. *Larsson* v. *McClure* (1897) 95 Wis. 533, 70 N. W. 662. The court said: "The present case does not seem to fall within the rule that the master must furnish the servant a reasonably safe place in which to work, inasmuch as the plaintiff and his fellow servants practically created the place and its attendant perils from hour to hour, in the prosecution of their labors; and the condition was constantly shifting by reason of their own acts, of which, as well as their probable consequences, they must be held to have had notice. The negligence, if any, in this view of the case, would be that of the plaintiff and his fellow servants, and the risk of it must be regarded as assumed by the plaintiff as incident to his employment; and, in any view that may be taken of the case, it must be regarded as a risk assumed by the plaintiff as incident to his employment."

A tunnel in a mine in course of excavation being a place in which conditions are constantly changing and of which the furnishing and preparation is in itself part of the work the employees are required to perform is not a place furnished by the master for employees within the spirit of those decisions which deny the right of the master to delegate to a servant the duty of providing a safe place for his employees. *Coal & Min. Co.* v. *Clay* (1894) 51 Ohio St. 542, *sub nom. Consolidated Coal & Min. Co.* v. *Floyd*, 25 L. R. A. 848, 38 N. E. 610.

As to the incidents or means of excavating ore, a mine owner has only the duty of furnishing competent men, and

iently referred to the principle that "the duty of the master to see to it that the machinery furnished for the use of his servants is reasonsuitable materials for the use of those engaged in the common employment. Hence, the negligence of a mine foreman in having too large a space mined before preparing to set the supports is that of a fellow servant of a miner. *Petaja* v. *Aurora Iron Min. Co.* (1895) 106 Mich. 469, 32 L. R. A. 438, 66 N. W. 951. Affirming on rehearing 106 Mich. 463, 32 L. R. A. 435, 64 N. W. 335. The court said: "It is apparent that if we are to adhere to the holding that miners and trammers are fellow servants, and that the shift boss, like the foreman of a section gang, is not an exception, there can be no theory upon which the plaintiff can recover, except that, immediately the room was in readiness for timbers, it was the duty of the master to see that they were properly set and maintained. And it is obvious that this claim must be, as it is, planted upon the rule that, in appropriate cases, requires the master to provide a safe place. The operation of mining, in this and similar mines, is to sink a shaft, and from the shaft start a drift, from which stopes or rooms are excavated across the vein, from the lower to the upper or hanging wall. It is accomplished by caving down and removing the ore. It is manifest that this cannot proceed unless the roof is supported behind the miners, and this is done by putting up timbers to support the roof until the ore shall be excavated beyond. It is said that, when the room has been excavated sufficiently large, it is the practice to cave the room down into the mining sets, and place more timbers on top of the first. Now, if this room can properly be said to be a place furnished to the servants in which to carry on the master's business, and which he must, at his peril, keep in reasonably safe condition, as a factory or warehouse, then the case should have gone to the jury; but, if it is not such a place, then it falls within that other rule, that the duty of the master is performed by using reasonable care in furnishing suitable material and employing capable and efficient men to do the work. . . . As we understand from the brief of counsel and the record,—and we do not discover a denial of it,—this stope or room starts from a drift at or near what is called the 'foot wall,' which is the bottom, as distinguished from the overlying stratum of the vein of ore. Both foot wall and top wall depart from the level, and dip sharply, so that, in running the stope on a level, it can go but a short distance until the top or overhanging wall is reached; and then the operation is repeated above the lagging, removing the lagging and caving down the roof, supporting the new roof thus formed by new sets placed upon the first. Thus, so far as the lagging is concerned, it has a temporary use merely to enable the miners to push the breast through to the overhanging wall, by supporting the roof. It is a part of the operation of mining, as much as a blast or a staging, and is not a part of the permanent structure."

A mine owner cannot be held liable for the negligence of his employees in failing to prop a passage securely. *Stewart* v. *Coltness Iron Co.* (1877) 4 Sc. Sess. Cas. 4th series, 952.

On the ground that "the doctrine that a master must supply a safe place for the servant to work does not apply where the place becomes unsafe during the progress of the work" it has been held that a mine owner is not liable for the negligence of a servant in taking down a pillar of coal which supported the roof of a room. *Oleson* v. *Maple Grove Coal & Min. Co.* (1901) 115 Iowa, 74, 87 N. W. 736.

The case is for the jury, where the evidence is conflicting as to whether the plaintiff, a miner, was making his own place of work. *Taylor* v. *Star Coal Co.* (1899) 110 Iowa, 40, 81 N. W. 249. As to respective provinces of courts and juries, see, generally, § 594, *supra*.

One employed by the manager of a mine to take down loose slate which is liable to fall, but not invested with any greater authority than any other laborer, is not a vice principal while so engaged, but is a fellow servant with the miners. *Fosburg* v. *Phillips Fuel Co.* (1894) 93 Iowa, 54, 61 N. W. 400.

A workman employed in a quarry in which, by reason of the constant removal of stone therefrom in the course of its operation by himself and his fellow servants, the conditions and surroundings are constantly changing, assumes the risk of the place becoming unsafe, and cannot recover for an injury due to the falling of a mass of stone

ably safe does not extend so far as to require him to attend to the proper regulation of those parts which necessarily have to be adjusted

loosened by succeeding blasts. *Mielke* v. *Chicago & N. W. R. Co.* (1899) 103 Wis. 1, 79 N. W. 22.

The removal of loose rocks from the edge of a cliff to which they have been thrown in the course of the work in a quarry is a mere detail of the work, and the employer is not liable to a workman who, while working underneath the cliff, is struck by a piece of that rock, owing to the negligence of the foreman. *Di Vito* v. *Crage* (1901) 165 N. Y. 378, 59 N. E. 141 Reversing (1898) 35 App. Div. 155, 55 N. Y. Supp. 64.

Compare also the cases cited in § 610, note 1, subd. (a), *supra*.

(d) *Dangers arising from the changing condition of buildings and other structures while in course of erection or repair.*—The fact that a master failed to comply with a request by an employee for material to make a new floor in one piece, to replace a section of floor which it had been necessary to frequently remove and replace, does not render him liable to a fellow servant of such employee for injuries due to the fact that such employee, in replacing the old floor without instructions to do so, failed to nail down the boards, where, had that been done, the floor would have been entirely safe. *Nemier* v. *Ritey* (1897) 179 Pa. 557, 36 Atl. 335.

The owner of a steam propeller is not liable for an accident to an employee engaged in painting the iron floor, caused by the fall of a section of a plank floor which had been safely placed on end, but which was rendered unsafe after the commencement of the work, owing to the fact that fellow servants removed other sections which helped to support it. *Smith* v. *Empire Transp. Co.* (1895) 89 Hun. 588, 35 N. Y. Supp. 531.

In *Armour* v. *Hahn* (1884) 111 U. S. 313, 28 L. ed. 440, 4 Sup. Ct. Rep. 455, the plaintiff, a man of full age, was, with one of his comrades, directed by their foreman to push a joist out on the sticks of timber projecting from a wall in course of erection. The usual course, as he himself testified, was to put the timber in, and leave it in that way temporarily, and afterwards build the wall up over it. The court said: "If it [the stick of timber] was, at the time, insecure, it was either by reason of the risks ordinarily incident to the state of things in the unfinished condition of the building, or else by reason of some negligence of one of the carpenters or bricklayers, all of whom were employed and paid by the same master, and were working in the course of their employment at the same place and time, with an immediate common object,—the erection of the building,—and therefore, within the strictest limits of the rule of law upon the subject, fellow servants."

The selection of sound beams out of a sufficient quantity of proper and suitable material furnished by an employer for the erection of a structure is the duty of the fellow servants of one employed on such structure, instead of the duty of the master. Hence, there can be no recovery where an employee is injured by the breaking of a cross-beam, upon which he was sitting while engaged in work, where such beam forms part of the structure on which he was at work. *Stourbridge* v. *Brooklyn City R. Co.* (1896) 9 App. Div. 129, 41 N. Y. Supp. 128. There the master procured the timber for a structure from a reputable dealer, and a "lot" or quantity of it was good, but some of the sticks were found defective, or with curls in them. It was therefore necessary to test the timber, so that knots or curls should be cut off or rejected. With respect to this test, the court said: "We think that the master discharged its duty when it supplied a sufficient quantity of proper and suitable material; that the choice of material, the selection of sound beams, the rejection of such beams or parts as were defective, work necessarily involved in the erection of structures of wood, were details of the work, and strictly the duty of the fellow servants. . . . It is here that the vital distinction occurs between the question of a place to work and that of a part of the work itself; a question of liability to employees who might use the structure when built and the liability to those engaged in building it. It may well be that, after the construction of the trolley carrier, the defendant would be liable to any lineman who might be injured from its defective condition; whether occasioned by the negligence of the employees who put up the structure or those who selected the materials. Such rule does not apply to the plaintiff." Discussing the contention of the plaintiff that the case fell within the principle

in the course of the use and with regard to the particular work to be done, and the adjustment of which is incident to the ordinary use of

that a master is bound to furnish a reasonably safe place for his servants to work, the court said: "If this rule is applicable to the present case, then it would follow that, for the negligence of any servants to whom the master had committed the duty of providing a safe place, the master himself would be liable. I think, however, that this is not the case of a 'place' within the meaning of the rule. As stated in *Butler* v. *Townsend* (1891) 126 N. Y. 105, 26 N. E. 1017, doubtless, in one sense of the term, the employee must always be in some place, and doubtless, also, the place, in a certain sense, is not safe if an accident occurs there. But the rule that the master must provide a safe place for work only applies where the work and the place are not connected; where the work is not in the construction of the place,—as in the case of a mill, a factory, mine, ship, well, etc. In the present case the cross-beam was not furnished for the purpose of providing the plaintiff a place to work, but as a part of the structure which he and the other workmen were engaged in erecting. The defendant might have provided a beam of such dimensions as to have been wholly unable to sustain the plaintiff's weight; yet, if good [illegible] ter and sufficient for the [illegible] ended, there could have been no lia[illegible]y on the part of the defendant for that reason alone. I do not mean to say that the defendant owed no duty to its workmen in the premises. If there was a latent danger of which it had knowledge, it should have apprised the workmen. But the distinction I seek to impress is that here the beam was a part of the structure, the common work upon which all the employees were employed, and the use of it by the deceased for support the mere incident. In the case of nearly all buildings or structures it is the common practice to use the part of the structure that may at the time be erected as a means to enable the workmen to obtain positions from which to prosecute the remaining work. It makes a vast difference in the question of the liability of the master whether, when a servant meets with an accident from a defect in the previous work, occurring through the negligence of a servant engaged in its construction, the negligence is to be deemed as arising from a failure to provide a safe place, or as negligence in the general enterprise, in the prosecution of which all the workmen are engaged. If the first, the master is liable even though the negligence is that of a servant, because the duty is that of the master; if the second, it is the negligence of a coservant and the master is not liable for it. If the workman who placed the beams on the flanges of the elevated railroad had been negligent, and improperly fastened them, and from this cause the accident to the plaintiff's intestate had occurred, and if the case is one of a safe place, the defendant would have been liable. Still, I think such a proposition would hardly be contended for. Would it not be clear that it was the negligence of a fellow workman? It is also clear from the same reasoning that the beam was not an appliance the furnishing of which was the master's duty."

To the same effect is *Callan* v. *Bull* (1896) 113 Cal. 593, 45 Pac. 1017, where a laborer was injured owing to the insufficient strength of one of the caps of a jetty in course of construction. It was contended by the plaintiff that, in neglecting to provide a cap of sufficient strength to support the mat upon which he was working at the time of his injury, the defendant failed to comply with the non-delegable duty to provide a safe place of work. After laying down the general principles already quoted (§ 614, note 1, *infra*), the court proceeded thus: "The work upon which the plaintiff was employed in the present case was to construct a jetty extending from the shore several thousand feet out into the waters of the bay. Manifestly, the place at which the work was to be done was not provided by the defendant; nor can it be said that different portions of the work in which the laborers might be engaged as it progressed was the 'place' furnished by their employer, within the meaning of the above rule, or that the bent or trestle, from which was suspended the mat on which the plaintiff was at work at the time of his injury, was one of the appliances to be furnished by the defendant. On the contrary, the making of this bent was a part of the work to be done by the laborers themselves in the construction of the jetty, and the bent was in fact made by them out of materials furnished by the defendant."

If the appliance is furnished by the

the machine."[1] It will be observed, however, that, as regards the facts stated, many of the cases cited below approach quite close to those which are reviewed in the two next sections, while others might, perhaps, with equal propriety be associated with the decisions which treat the duty of maintenance as delegable. See subtitle D., *infra*.[2]

master for the purpose of enabling the servants to perform the work in which they are to be engaged, he is required to see that it shall be reasonably safe for that purpose; but, if the preparation of that appliance is a part of the work which the servant is required to perform, the master is not liable for any defect in its preparation. The rule does not apply to a case where several persons are employed to do certain work, and by the contract of employment, either express or implied, the employees are to adjust the appliances by which the work is to be done.

The owner of a building upon which extensive repairs are being made is not liable for an injury to an employee, caused by stepping upon a roof board which is laid in place on the roof, but which has not been nailed down. *Richardson* v. *Anglo-American Provision Co.* (1897) 72 Ill. App. 77.

(c) *Dangers incident to the demolition of buildings.*—An employer of a gang of men engaged in taking down a building is not liable for an accident caused by the tipping up of a joist from which the support at one end had been removed. *Clark* v. *Liston* (1894) 54 Ill. App. 578. The court said: "In the destruction of a building there is not an attempt or obligation to make it or any part thereof secure: on the contrary, the work of removal is one in which, in turn, each part of the structure is rendered insecure; this, every workman understands."

[1] *Eicheler* v. *Hanggi* (1889) 40 Minn. 263, 41 N. W. 975.

[2] The negligence of a fellow servant on one occasion in failing to readjust the cylinders of a machine after oiling it cannot be imputed to the master, where he was competent when selected. *Bjhjian* v. *Woonsocket Rubber Co.* (1895) 164 Mass. 214, 41 N. E. 265. The ground of the decision was that "the oiling of the machine is one of the daily matters regularly incident to its ordinary use, which must be intrusted to servants." This case was followed in *Woshigian* v. *Washburn & M. Mfg. Co.* (1896) 167 Mass. 20, 44 N. E. 1058. See § 612a, note 1, subd. (b), *supra*.

The change of rollers in a feed mill for those that are sharper is a mere detail of work. *Frazee* v. *Stott* (1899) 120 Mich. 624, 79 N. W. 896.

A machine manufacturing company is not liable for injuries sustained by an employee by the falling upon him of a section of a heavy condenser, caused by the failure of himself and his coemployees to retain wooden braces between the various sections until the complete removal of a header, raised at the ends of the several sections on one side by a crane and tackle, and then coupled or bolted to each of the sections, although if a bolt which he was engaged in driving out had been put in in a different manner by the foreman the injury would not have ensued. *Kliegel* v. *Weisel & V. Mfg. Co.* (1893) 84 Wis. 148, 53 N. W. 1119.

A foreman in a mine whose duty it is to employ and discharge workmen, direct them in their work, look after the machinery, and direct when it shall run, is a fellow servant with a workman employed by him while the two are cleaning the sprocket wheels used in running an elevator in such department; and the employer is not liable for an injury to such workman by the negligence of the foreman, caused by the failure of the latter to detach endless chains used in running the elevator, as it was his duty to do. *New Pittsburg Coal & Coke Co.* v. *Peterson* (1896) 14 Ind. App. 634, 43 N. E. 270.

An employer is not liable for an injury resulting from a defective block and hook selected from a number available and arranged by a fellow servant as "a temporary incident of a particular job." *Harnois* v. *Cutting* (1899) 174 Mass. 398, 54 N. E. 842.

A servant cannot recover for an injury caused by the negligence of a fellow servant in setting him to work on a movable platform without securely fastening it. *Howard* v. *Hood* (1892) 155 Mass. 391, 29 N. E. 630.

Employees engaged in loading or unloading coal are coservants of each other as regards negligence in the splicing of pieces of rope upon buckets in which coal is hoisted, for the purpose of pull

614. Negligence in the preparation of temporary structures or other instrumentalities as a part of the work; general rule.—We now come to the decisions which cut most deeply into the doctrine of non-delegable duties, those, namely, in which the preparation of entire instrumentalities, and not merely their arrangement or the adjustment of their parts, is treated as the function of the servants themselves. The

ing the buckets toward the dumpers. *Ryan* v. *Smith* (1898) 29 C. C. A. 427, 56 U. S. App. 604, 85 Fed. 758.

The task of setting up or rigging appliances for stevedores and safely maintaining them is a part of the duty of the fellow employees of a stevedore who is injured thereby, where they are all under the charge of a foreman, who directs several of them to rig the vessel. *Burns* v. *Sennett* (1896; Cal.) 44 Pac. 1068, Reiterating Opinion on Former Appeal (1893) 99 Cal. 363, 33 Pac. 916.

"Properly to use pulleys, blocks, ropes, and other ordinary tools and appliances which have been furnished by a master to the workmen employed upon a derrick is a part of the duty of the workmen. It is incidental to the management and use of the derrick. working with a derrick the foreman and his assistants are fellow servants, and the master is not responsible to any one of them for the negligence of any other in the use of the materials and implements which the master has supplied." *McKinnon* v. *Norcross* (1889) 148 Mass. 533, 3 L. R. A. 320, 20 N. E. 183.

The work of putting together and setting up a movable derrick in such positions as may be required is a duty which may rightfully be committed to the servants themselves. *Kelly* v. *Jutte & F. Co.* (1900) 44 C. C. A. 274, 104 Fed. 955.

Where the moving, adjusting, and securing of a derrick is one of the regular duties of workmen, any negligence in the manner or place of putting down a post to which one of the guy ropes is fastened is their own negligence or that of the superintendent, and the latter is a mere fellow servant of the workmen in securing the post. *McGinty* v. *Athol Reservoir Co.* (1892) 155 Mass. 183, 29 N. E. 510.

The omission of workmen to fasten a guy rope of a properly constructed derrick which is in process of being moved is negligence which cannot be imputed to the master. *Marvin* v. *Muller* (1881) 25 Hun, 163.

An employer who furnishes with all the necessary appliances a derrick intended for use in different parts of a building in the process of its construction does not owe to his employees the duty of properly setting up and supporting it at each place where it may be required. *Kennedy* v. *Jackson & Agri. Iron Works* (1895) 12 Misc. 336, 33 N. Y. Supp. 630.

An employer is not liable for an injury resulting from the fall of a derrick occasioned by the absence of a check rope which a coservant in charge had forgotten to attach thereto. *Jenkinson* v. *Carlin* (1894) 10 Misc. 22, 30 N. Y. Supp. 530.

In one New York case it was held that the owner of a derrick was liable where a workman was injured by its defective rigging, the ropes having become stretched by rain the night before the accident, the starting being superintended by the foreman who had charge of it. *Courtney* v. *Cornell* (1883) 17 Jones & S. 286. Sedgwick, Ch. J., dissented on the ground that the plaintiff "accepted the risk that would be involved in arranging the derrick and its several attachments from occasion to occasion." This view seems more in harmony with the later cases.

An employee injured by the falling of a derrick on account of the neglect of a fellow servant to fasten a guy rope cannot recover of the master, who had cautioned the man never to let go a guy rope after it was untied until it had been tied again. *Neilson* v. *Gilbert* (1885) 69 Iowa, 691, 23 N. W. 666 (all the negligent acts antecedent to that of untying the guy rope and leaving it unsecured held to be remote causes of the accident).

In *Peschel* v. *Chicago, M. & St. P. R. Co.* (1885) 62 Wis. 338, 21 N. W. 269, the apparatus used for raising a part of the framework for a water tank consisted of a windlass crab, tackle blocks, ropes, the tank itself, and an anchor post set in the ground, the whole of these being placed in position and adjusted under the direction of the foreman. The plaintiff, a mason employed

general rule to which, for reasons to be explained in the following section, the courts have now committed themselves, may be stated thus: If the master supplies suitable material for the construction

with other masons, carpenters, and section men in the erection of the tank, was injured by the fall of the framework, owing to the fact that the anchor post was not set deep enough in the ground.

A verdict for the plaintiff was set aside for reasons explained as follows: The court said: "The stress of the argument is to bring the case within the rule which charges the master with the duty of supplying the servant with reasonably safe and suitable machinery and appliances to do his work. But, as I have said, I see no sufficient reason for saying the defendant was under obligation to furnish the men employed to erect the water tank and windmill with a machine or instrumentality for raising the bents in a complete condition ready for use. There is no claim that the materials and appliances provided were not suitable and sufficient for the purpose intended. They were in a detached condition, and necessarily had to be adjusted on the ground; but the defendant did not contract with the plaintiff that these various appliances should be adjusted and put in order, fit for use, before he went to work. On the contrary, it was what the foreman, Brooks, with his gang of men, including the plaintiff, was employed to do, to take the materials of stone and wood, and all other appliances, and build the piers, construct the tank, frame the bents, adjust the machinery, and hoist the bents to their proper position. All this labor was necessarily involved in what they undertook to do and were paid for doing. It is unsound reasoning to compare this hoisting apparatus to a steam engine, a railroad car, or to some machine which is all adjusted so that its sufficiency can be ascertained before the servant is called upon to use it. Here the materials had to be prepared and put together, frames made, and hoisting apparatus adjusted—which included the setting of the anchor post—by the men themselves; and, to use the forcible and pertinent language of defendant's attorneys on this point, if placing the post in the ground, in this particular case, was a duty which the master owed to the servant, then in doing work of this kind the rule as to nonliability for the negligent acts of fellow servants would be practically nullified. If, in the adjustment of this machinery, a pulley, although perfect in itself, had been improperly placed or secured; if the anchor rope, although proper and sufficient in itself, had been insecurely tied to the post and slipped therefrom; if one of the men, furnished with a proper crowbar, had negligently held it at the foot of the bent; if the framework made by the men themselves, in the shape of timbers underneath the bents and upon which they rested, had been improperly made,—the logic of the position of plaintiff's counsel would make the master liable in all the cases supposed for an injury caused by such negligence of a fellow servant. This is, indeed, extending the liability of the master further than the adjudications of this court have carried it, and further than the law will warrant."

Where a piece of iron used as a counter balance of a lathe flies off and strikes a servant, he cannot recover where the evidence shows that if there was any negligence it was that of the foreman of the lathe in not securing the weight, and that this weight was as safe as any other piece of iron if it had been properly secured. *Faber* v. *Carlisle Mfg. Co.* (1889) 126 Pa. 387, 17 Atl. 621.
