London, Nov. 20 .- A Reuter des patch from Athens, dated Sunday,

says the situation in Greece is of the gravest importance. "The nature of the allied demands, formulated Saturday, says the corres-

pondent, is concealed, but it is inferred that they took the form of an ultimatum, expiring tomorrow." Reuter's Athens correspondent, un der date of Nov. 20, says that Vice-Admiral Dufournet, has notified the

Austrian, German, Bulgarian and Turkish ministers to Greece that they must go aboard a steamer which has been placed at their disposal, otherwise they will be taken forcibly.

Special to The Toronto World.

Montreal, Nov. 20.—The name of Sir Henry Pellatt of Toronto is freely mentioned in financial and military circles as a competent and available man for the position of minister of militia. Sir Henry has been identified with the militia of Canada for over 40 years now, has had a great deal of experience, has high business capacity, and would approach the duties of office if they were to come his way absolutely free of any political bias and solely for efficiency in connection with the war.

It is said here that his organizing capacity would find a way of completing the enlistments necessary, and providing men for all wastages, and this is one of the serious problems of

Contention That Arabia Was Armed Transport Can Be Dismissed.

Washington, Nov. 20.-Announcement by the semi-official Overseas News Agency, that a German submarine sunk the British liner Arabia made a deep impression in official quarters here today, and apparently removed all possibility that this case might take its place with that of the Persia, sunk in the Mediterranean ong ago in some manner never cleared up. The British admiralty said the Persia was torpedoed without warning, but none of the central powers would admit responsibility for it.

Louisville, Ky., Nov. 20.—Testifying before the interstate commerce commission today O. F. Clerk, genéral superintendent of the Grand Trunk lines within the United States, advocated an increase in freight rates, the proceeds to be used by the railroads in the purchase of equipment and in making other betterments.

Mr. Clark was the first representative of any of the Canadian roads whose lines cross into the United States to appear at the present hearings. A majority of the questions put to him were calculated to show the situation of that road as regards coal car equipments. Of this class of cars, Mr. Clark testified, the Grand Trunk has on its lines approximately two cars for each of its ownership. This large excess, he said, had been drawn northward as a result of large shipments of coal and munitions for export.

Aid. Maguire defended the expenditure on the ground of public health.

Fire Secretary.

Ald. McBrids made still another effort to have a returned scidler replace W. G. Webber in his appointment as secretary of the fire department.

The board's recommendation on his motion that the board of control be instructed to find out if a returned soldler cannot be found with proper qualifications, was that it be not adopted. The appointment, Aid. McBride declared, was flegal in the first place. He urged that all the young men in civic departments eligible for military service be discharged and their places filled by returned soldiers.

Controller Foster agreed that the city should strain every point to help the returned soldiers.

This is unregenerated politics. It is the kind of politics that the people of this country will not stand. They want truth and frankness."

The speaker said that the great bulk of the nickel of the world, about 70 or 80 per cent., camef rom Canada. He referred to the sale by the Liberals of the mineral land containing nickel without attaching any restrictions. The Liberals then did not know anything about refining nickel, and certainly did not know what the Germans intended to do in 1914. The blaze is believed to have started in Brickey's boathouse, in which a number of roptor, and rowboats were

The alarm was rung in about midnight, and downtown fire sections responded. Five lines of hose were laid
from hydrants on Front street, the
distance being so great that extra hose
had to be requisitioned from fire headquarters. Owing to the canton of the
buildings, the firemen were compelled

In addition to Canada, thore were two sources of supply to the United States, New Caledonia, in the Pacific Ocean and small quantities obtained by a by-product in the manufacture of copper.

Nickel had been brought to the United States since war began as the French Government, the owner of New Caledonia, had never placed any restrictions on the ship, ent of this metal from the island. Thus it was possible to get a small supply of nickel not affected by the nickel regulations of Great Britain which he said effectively by controlled the Canadian supply throut the *ar.

The British Government was perfectly satisfied with the arrangement of the Canadian Government in regard to nickel. "The eye of the British Government and of the British admiralty had been on every pound of nickel, under certain restrictions, that has gone from the United States within the scope I have mentioned and they know where every pound has gone.

"There is made in the United States "There is made in the United States every day \$10.000,000 worth of munitions containing nickel for the allies and Great Britain knows where every pound is used." The speaker stated that the situation was of such a character that Great Britain could not piace before the public the papers and documents which had been drawn up in regard to regulating the nickel supply.

Germany before the war was using 12,000,000 pounds of steel annually, and would be glad if she could get double that amount now. The Deutschland, a commercial submarine, so-called, was able to take on 70 tons. This was not only an infinitesimally small amount, but it came from other sources than those controlled by Great Britain.

Laying Floors of Hard White Oak

The Polished Hardwood Floor is the first essential in the modern scheme of furnishing a house. Artistic effect demands it. Household health urges it. The long, satisfactory service which means real economy is one of its chief inducements. The universal vogue of rugs insists upon it.

Hence the interest in the fact that the Floorcoverings Department makes a special feature of the laying of hardwood floors in both new and old houses. Quarter-cut white oak is employed for the purpose, every piece carefully selected with a view to obtaining absolute uniformity of grain and color. Only skilled workmen are employed in the laying of it, and, when laid, it is waxed according to a particular process which makes possible the easy restoring at any time

of such parts as receive most constant wear. The veneering of stairs and stairways with the same quarter-cut white oak is also a popular undertaking of the same staff of workmen.

HERE IT IS

The Price of Bread Down Today

On the 30th day of September last I advertised in the Toronto papers that "when I could reduce the price of my bread I would gladly do so." That time has come. I have taken advantage of an opportunity. I recently made a lucky CASH purchase of a large quantity of beautiful, high-grade flour. I have just figured out my costs, and find that by cutting down my own remuneration, and by largely increasing my output, I can sell bread for 8 cents a loaf. I have not lost a day in making the reduction and the new price takes place IMMEDIATELY. My drivers are out today under instructions that Lawrence's Bread is 8 cents a loaf. I am taking a step still further-I will not only save the Toronto public 2 cents a large loaf, but an additional 4 cents on every dollar's worth of tickets. That means that I now propose to save the people who patronize me 17 cents on every dollar they spend for bread.

Lawrence's Bread 8 Cents a 24 Ounce Loaf

13 Tickets for One Dollar

These Are the New Prices. Buy Tickets and Save 4 Cents Extra

People who bake their own bread are subjected to a cost exceeding 9 cents a loaf, without counting their time and inconvenience. So the "bake-at-home" people now have no foundation for any complaint against the bake shop if they will patronize Lawrence.

For Twenty Years Lawrence Has Kept Down the Price of Bread in Toronto and is Doing It Yet

There never was a time in the history of Canada when there was such a critical condition affecting the welfare of the people. Under the present circumstances a voluntary reduction in the price of the "staff of life" for the benefit of the public is an act that deserves commendation from pulpit, press and people, and merits the tangible support of every citizen. It may be frankly stated that the price of 8 cents for a 24-ounce loaf is only possible on a very large turnover, and can only be maintained if there is a great and generous response from the bread buyers of Toronto.

To Keep Down the Price of Bread I Must Have 10,000 New Customers. Will You Be One?

If the Toronto public respond as they should to this effort of mine I shall be able to keep down this price. I ask every reader of this paper to consider the question seriously. The principal backers of the "bake-at-home" propaganda are the flour millers, who are quite delighted to sell flour at a price to retail at \$1.50 for a 24-pound bag to the householder, and the repeated slogan "bake bread at home" is a deception and a snare, and a dear experiment which costs, in real money, without allowing for labor, more than buying my bread does. Why should the people of Toronto boost the interests of the big milling concerns, who are located hundreds of miles away, when they can save money and labor by supporting a Toronto baker who is a fellow-citizen? It is well to consider that there are very few housewives who can make one batch of bread in three come up to the standard of quality which my Home-made Bread comes up to every day. One bad batch of bread means a considerable loss in most households. Be advised; investigate; you will find that statement true. I want to help the public, and to do so the public must support my effort.

Help This Good Cause. Co-operate With Me in My Endeavor to Keep Down the Price of Bread By Sending Your Order

I am not so much asking a favor of the public as I am giving them one. Eight cents a loaf means a desperate chance for me, but I rely on the public opinion of this city to support my move to bring down the price of bread.

By ordering from the Lawrence Bakery you not only get the best bread that can be baked by any baker, public or private, but you save 2 cents on every large loaf, and 4 cents more on every dollar's worth when you buy tickets.

You Save 17 Cents Every Time You Buy a Dollar's Worth of Tickets

That 17 cents means that much saved for butter, eggs or milk, and it all comes by ordering your bread from

Democracy is Efficient.

As for social efficiency, democratic France was proving herself more efficient than despotic Germany. If one

democracy could achieve this, so could another. Germany was socially effi-

were the most efficient persons in the world. Socially they were the most in-efficient. They had the greatest fire-

together unless someone answered the question, "What is there in it for me?"

Then, too, the democratic state must be prepared for its world duties

WOMAN SUFFRAGE PLAN THORO CANVASS TO RAISE RED CROSS FUNDS AIDS EFFICIENCY

Cornwall Mining Man Contributes Again to Patriotic Fund and Red Cross.

Cornwall, Ont., Nov. 19.—The executive of Longue Sault Chapter, I.O. D.E., has decided to hold a house-to-house canvass in aid of the British Red Cross. William A. Craig has consented to assist the women in the business section of the town. The women will canvass the residential district. It is hoped that Capt. S. N. Daucey of the 207th Battalion. Ottawa, will be here to speak on behalf of the Red Cross, as he is a forceful speaker. John McMartin, well-known mining man of Cornwall, has made another contribution of \$1000 to the Canadian patriotic fund and \$100 to the British Red Cross fund for the collection now being taken up on behalf of these funds here. The coming canvass will materially increase Cornwall's contribution GOOD FOR THE WOMEN Wilson's Attitude on Lusinillion broadsides for the murderers aterially increase Cornwall's contri-So Lawrence F. Abbott instanced Australia's decision on conscription. "I am so burned up with passionate hope for the success of the cause of liberty in this war that I regret that decision very deeply. I think Australia has made a mistake," said he. But that is better than that kind of despotism which is sending the free men of Belgium to work in the mines of Germany.

Similarly he regretted the re-election of President Wilson, whose stand on the Lustiania matter was, he said, "selfish, timid and comfort loving in the face of one of the greatest interpall bearers.

A private service will be held in the residence and a public one at 2.30 pm. in the Presbyterian Church, where Rev. W. G. Hanna, of Cookstown, and Rev. Mr. Cree, of Alliston, will preach. Many floral tributes from public bodies and public men connected with the late minister of agriculture have been received. The department of agriculture, the Ontario Agricultural College, and the Ontario Veterinary College will be closed today.

In the latest casualty lists there are names of 23 Toronto men. One officer has been killed in action, and one is believed killed. Two men have died of wounds, one is a prisoner of war, 17 are wounded, and one is reported back on duty.

Lieut. Leonard E. Porter, who went overseas with the 75th Battalion, has been wounded after being in the sellsh, timed and comfort loving in the face of one of the greatest international murders recorded in history." But the people of the United States thought passionately on these things, they were able to vote peacefully upon them, and that was infinitely better than fighting with almost superhuman ingeniaty to impose their rule on others as Germany was doing in Europe.

Democratic efficiency must be founded on authority, on education, on agriculture, and on a political bureaucracy, for administration of government should be recognized as a career. There Mr. Abbott hesitated, then he added to his list of necessities for an efficient democracy, woman's for an efficient democracy, woman's anything and the addition was greetical.

for an efficient democracy, woman's suffrage. And the addition was greeted with applause.

The speaker did not know whether woman's suffrage would do the state any good, but he was centain it would be good for the women, would make them more interesting to the men and less engrossed in fashions and petty things. To exclude half the populathings. To exclude half the popula-tion from the vote in a democracy was inconsistent and irritating.

There is no reason why the labor men of Toronto, who are as intelligent and public-spirited as labor men anywhere, should not have equal success in what they have undertaken. At the present moment they will be somewhat handicapped by the large number of their comrades absent at the front, but this fact in itself may tend to broaden their sympathies and sharpen their perceptions. A great deal depends apon the discretion of these who take the leadership in the movement, but at least as much, if not more, depends upon the loyal support of the men themselves, without which the

THE BAKERS' FIGHT HOUSEHOLDERS BENEFIT

Drop of 1c Per Loaf in Effect Today Not Justified by Price of Flour

Prices of wheat and flour are at the high water mark today. There has been no drop in the price of any other ingredients used in making high quality bread. The cost of labor is as high as it was a month ago. Yet today we announce a onecent drop in the price of Canada Bread-the recognized leader for quality and value.

On Oct. 31st flour sold at \$10.00 per bbl., and all the Toronto bakers found it necessary to raise prices. Since then flour has gone as high as \$10.40. The list price vesterday was \$10.20, with a 7c advance in wheat.

On account of these conditions bakers in Toronto who baked bread which for many years has sold for 1c per loaf less than Canada Bread, found it necessary to come to our prices. The result was such a tremendous falling off of business in favor of Canada Bread that other bakers became panicky after losing thousands of customers. The public have shown their appreciation of the high quality of Canada Bread, so we are now prepared to reciprocate and sell Canada Bread at the same price as other inferior bread is selling at, "BUT THE QUALITY STILL GOES IN BEFORE THE NAME GOES

8c Per 24 oz. Loat

13 Tickets for \$1

There's no getting beyond the facts. Canada Bread is superior in quality. Whenever prices of Canada Bread are the same as other makes, we gain customers by the hundred. The first week of even prices our sales increased by 21,000 loaves, in spite of the fact that some of our former customers baked their own bread. Under present conditions the spirit of wishing to devise methods of reducing the cost of living is to be commended, though it will hardly pay to bake at home when Canada Bread sells for 8c per loaf.

The Toronto public want Canada Bread. They have endorsed it by a majority vote. Their liberal patronage is ample evidence of this fact. In offering Canada Bread-the standard of quality and value-at the same price as other inferior varieties we are actuated not only by a desire to give our customers the very best at the lowest price, but we also believe it to be good business judgment to retain our large volume of trade, with good bread and good service, in the hope that when the war is over and prices are normal we may again be entitled to a small profit.

The 204th (Beaver) Battalion had a squad of twenty men out at the Arena last night. They are preparing for their patriotic game with the 228th Battalion. Herbie Birmingham, the old St. Georges and Marlboro player, is looking after the team, and has some promising material. Green, a member of the 227th Battalion, showed a lot of speed last night. Toy, a former UkC.C. man, and Adams, from the 70th Battery, should make a place on the team. All soldiers in the Exhibition Camp are eligible, and a big turnout is expected for the next practice.

It seems that Corbett Denneny is not satisfied with the contract offered him by the Toronto Club and has refused to

An Ottawa despatch says: Art Ross, star defence man of the Ottawa team last year, and one of the most-talked-of players in N.H.A. hockey, is not only a possibility, but a probability to lead the Canadiens this year. According to advices received here tonight, Ross is to head the Flying Frenchmen. The local club, so it is understood, has practically released Ross, because it considers itself in a position as being unable to pay him anything like the salary he received last year. He has virtually been declared a "free agent" by Ted Dey. Nighbor is likely to sign this week, and there is a probability of several others of last year's team attaching their signatures to contracts. Benedict, it is said, will draw about \$750, and will stick. The Ottawa salary list will Week! about \$750, and will stick. The Ottawa salary list will likely range from \$700 to \$900, with a probability of a "bonus" clause

Ottawa sends the following: Rumors to the effect that Messrs. T. C. Bate, Martin Rosenthal, et al., with the exception of Pete Butler, are the real geniuses who will guide the destiny of the Ottawa Hockey Club franchise in the N.H.A. this season, are in circulation in Ottawa. E. H. (Ted) Dey, who has generally been reputed to be the sole operator of the Ottawa franchise this year, it is said by some, is but an agent of last year's hockey body. Little else than general official denial of such a rumor is about all anyone could expect to get from Mr. Dey or last year's directors, but there are some of the players and several of the sporting public that think the "change-over" in management for this year was done with the object to get the players to sign cheaper.

Some agreement with Gerard at suitable terms, in consideration of his likely being engaged in a triple capacity—coach, playing manager and player—will likely be made this year or early next. Benedict, Darragh and Nighbor are almost sure not to sign up at the first figures offered them.

Goldie Prodgers, who broke his ankle at Camp Borden, has fully recovered and will be a fixture on the 228th N.H.A. team.

New York, Nov. 20 .- The ease with which Battling Levinsky a few nights ago took a decision from the man-killing Jac't Dillon of Indianapolis, followed by the "Giant Killer's" defeat by Mike Gibbons. has led several fight critics in the east to come forth with a statement that east to come forth with a statement that unless Dillon begins to take better care of himself he is likely to soon be down among the second raters.

Dillon is notoriously fond of the white lights and the easy-going life that hangs with it. He is up late many lights of the week, but always manages. Into his splendid vitality, to keep himself in condition for the heavy fights he is carded for.

for.

In his fall before Levirsky, who later took a beating from Billy Miske, a small light heavyweight, the critics believe they see the beginning of a down-grade path for Dillon and predict that unless he begins getting home carlier and gets a few more winks of beauty sleep daily, he will not find his services so greatly in demand.

Dillon is a hard man to handle, as Sam Murbarger has remarked. He is one of the sort who listens and then does as he pleases when his manager makes a suggestion.

An Indiana man, who knows Dilion well, once made the assertion that he would like to have charge of Dillon for a few months, to take him to a farm and there put him to work under a contract which would assure that Dillon would do everything he was told.

"I'd soon have a man who would eat Jess Willard alive," he declared.

alert, football." Yale thumphed over Princeton in the annual game, by a score of 10 to 0.

The result of the contest, which attracted the largest gathering of spectators that ever thronged into the Palmer Stadium, was a bitter disappointment to Tiger adherents. Errors of play and the generalship of the orange and black team virtually presented opportunities for Eli scoring, and the New Haven combination was quick to take advantage of the openings, with the result that the blue won her third straight victory from the orange and black since 1914.

The contest fell far short of man: of its predecessors in this, the most ancient of all American football classic series. The play was slow and uncertain for the greater part of the game, and both combinations repeatedly failed to advance or retain possession of the ball at critical moments. Princeton showed the same defensive strength which has marked her play against strong elevens all season, but little or no effective offence.

Yale, with a more erratic but betterbalanced combination, swung loose a fair attack when scoring appeared possible, and, with a field goal and touchdown, routed the Tigers for the second time in the new Princeton football arena.

More than 45,000 spectators filled every seat and available foot of standing room in the huge concrete horseshoe, and the Yale cohorts went wild with joy when the Ell team, led by Captain Black, emerged victorious from a contest in which it was thought Yale had an outside chance of winning. Undergraduates and gray-haired alumni poured down on the Princeton turf and celebrated with cheers and snake dances the triumph, while overhead two aeroplanes spiraled and volplaned.

At Cambridge Mass.—The Brown football team furnished a substantial setting for a gridiron star. Fred Pollard its negro half-back, whose brilliant attack counted most of the twenty-one points by which Brown defeated Hervard. Brown, undefeated during the season, prevented a Crimson score and completed its record of having held its line clear in every game.

prevented a Crimson score and completed its record of having held its line clear in every game.

Altho Pollard was the special object of Harvard's defence, which at times was so forceful as to draw official warnings, and, in one instance, a penalty for unnecessary roughness, he was effective in every department of the play.

He rushed from close formations, ran wide or dodged his way thru broken fields for gains of from four to forty yards. He received forward passes cleanly, not only those of his own team, but also Harvard passes, which he intercepted. Defensively, he was a sure tackler, who often downed the runner.

The Harvard team as it faced Brown today was largely one of secondary strength, regulars being saved for the game with Yale next Saturday. Except in flashes it was without consistent powers of attack, altho the call of time in the second period stopped a Crimson advance, which was still unchecked twelve yards from Brown's goal. Bond was 'he factor of greatest force in the Crimson back-field.

All three goals from touchdown were kicked by Devitalis, who has booted thirty-one such goals this season without a miss. The line-up:

Springfield secured a safety when Cole, an Army substitute, was thrown behind his line after a poor pass. The Army rushed many substitutes into the fray, playing their first string men for only a part of the second period.

At Ann Arbor, Mich. Howard Berry dadged, plunged and kicked his way to a Pernsylvania victory over Michigan, 1 to 7.

Pherson did likewise. Mr. Collins definitely stated, however, that he would positively retire at the end of the sea-

son.

The directors refused to reopen the Ulster v. Eaton case at the request of the Sunderland Club, unless they produced entirely new evidence having a direct bearing on the protest.

CANADIEN PLAYERS WANT MORE MONEY

Montreal, Nov. 20.—Several members of the champion Caradien hockey team of a year ago have joined the list of holdouts for this season. Few, if any, contracts have been returned to the club management with the signature of players attached, so that as the hockey pracers attached, so that as the hockey practice season approaches there will be a fusciling for players unless those holding out decide to sign up. Jack Laviolette, Didier Pitre and Newsy Lalonde have not yet signed their contracts, while Corbeau is also another of the holdouts. Some of these players claim that the cut in salaries this season does not warrant their giving up their positions to play hockey, and unless they receive as much as a year ago they will not come to terms.

as a year ago they will not come terms.

The average salary a year ago was about \$800, while this year the players clain the average will be far below that amount. With the loss of McNamara and Prodgers on the defence, and Arbor on the line, the Canadiens require the services of all the old members of the club.

peclusion of a mine up in the Ebundary country. Jim Scaborn is already in town and ready for the fray. Thus Barney Stanley and Duncan are the absent ones, Stanley sticking to his job in Edmopton, and Duncan being with the 223th Battalion team in the N.H.A.

In the meantime, Frank Patrick is pulling a string or two for a couple of prairie amateurs who are highly touted by the scouts and the press, and who, if they come to terms and make good, will just about settle the troubles of the Vancouver team. Then the player needed to strengthen the Spokane cutifit can be spared. Just whom the Vancouver manager has in mind for the berth with brother Lester has not been divused, but there is a fair chance that either Seaborn or Cook will be the man.

The Resignations

A Vancouver despatch says:
In connection with the present bright prospects for a good amateur are hockey season in Vancouver this winter it is interesting to nete that Frank Patrick is to take distinctly more interest in the amateur game than in the past few years. The reason is not far to seek. While the P.C.H.A. and the N.H.A. were in a state of warfare or suspended hostilities, as their special meeting called last night, showed their confidence in the three officials who had resigned by refusing to accept their resignations.

At the unanimous request of the delegates, Secretary Spencer, after explaining his position, withdrew his resignation. Treasurer Collins and Director McPherson did likewise. Mr. Collins defi-

it makes me teel proud of the O.H.A."

Another "Soldier" Amendment.

To encourage recruiting, the O. H. A. last year at its annual convention decided to automatically reinstate all suspended players (not professionals) who enlisted for overseas service. The association also amended the residence rule as follows: "In case of an enlisted soldier who has not been a continuous resident under this rule, he shall have the following options: (1) He may play with the team in his home town, or (2) he may play with a soldiers' team in the town or regimental district in which he is located, or (3) he may play with any team in the town in which he is located."

At this year's convention, Mr. J. Ross Robertson, chalamian of the suo-committee, will introduce another "soldier" amendment, which reads as follows:

Add to Clause 38 of the regulations: "In the case of a returned or honorably discharged soldier who does not qualify under the residence rule, he may play either in his home town or wherever he may desire to locate, after first receiving permission of the executive committee, who will pass upon his credentials."

This covers the soldier situation pretty thoroly, and the amendment is likely to carry.

JOHNSON FAVORS THE

American League Head Likes the Idea and Tells It Plainly.

Chicago, Nov. 20.—Ban Johnson, president of the American League, "would not oppose the formation of a third major league," he said today, when recent gossip concerning such an organization was brought to his attention.

"In fact," said Mr. Johnson, "I rather like the idea."

As Mr. Johnson was the foremost foe of the Federal League, his attitude was regarded with unusual interest.

Cities suggested in connection with a third league are Baltimore, Buffalo, Newark and Toronto, Toledo, Indianapolis, Louisville and Milwsukee. The plan, as at present discussed, is to raise these cities to major league standing by placing them outside the draft.

PITCHER DELL IS DOING

Pitcher Wheezer Dell, once of the Northwestern League, and now of the Brooklyn Dodgers, with \$2700 world series money in his pocket, lost his head and became a reckless spender. He bought a Ford roadster and set out for Fforida in it, with his lunch stowed away under the seat. Reports from along the Atlantic coast report a "Tin Lizzie," piloted by a tall, gangling young man, making good headway southward, with occasional stops for water and gasoline. The marquis would not discuss his mission beyond saying he bore a personal message from the mikade to the Roccasional stops for water and gasoline.

by the chief command of the central allies. The Serblans had crossed the River Cerna and advancing northward with superior forces, had reached the height north of Chegel after engagements in which the tide of battle fluctuated and during which Gen. Otto Von Bulow, at the head of the German riflemen, stormed and recaptured a height.

"The height taken by the Serbians was upon the same level as Monastir, so that the Serbians were able to Jbserve the Germano-Bulgarian posiserve the Germano-Bulgarian positions and were able to shell them from the flanks. Simultaneously strong French forces advanced upon the positions on the Monastir plain. The maintenance with heavy sacrifices, of a position without any importance as regarded the general strategical situation would not have been justifiable. Therefore the evacuation of Monastir was a matter of course, as it was lacking in military importance. "The Germans and Bulgarians occupied positions on the hills north of pied positions on the hills north of Monastir from which they dominate the basin of the Cerna. Monastir is

under the range of our guns, which means that its position is insecure. "The occupation of Monastir doe not in the least change the strategical situation in the Balkans. Gen. Sarrail's task which was to accomplish a junction with the Russo-Roumanian junction with the Russo-Roumanian army advancing from Dobrudja, has falled and now never can be accompolished. The broad strategical plan of the entente would have been compiled with if General Sarrail had advanced on his eastern flank, but as he was unable to break up the Bulgarian pressure in this sector his principal attacks was corried out more and more tacks were carried out more and more to the westward. Altho he thus obtained minor local successes, he there-by made open avowal of the fact that the original plan for joining hands with the Russo-Roumanian armies had been entirely abandoned."

BIG BAVARIAN LOSSES

One Division Practically Annihilated by Roumanians, Who Fight Fiercely.

London, Nov. 26.—The Bucharest correspondent of The Daily Chronicle, in a despatch dated Nov. 14, says:

"During last week I had the opporturnity of visiting the Roumanian front line trenches on the Moldavian and southern Transylvanian fronts. Two days were passed in the neighborhood of the Vulcan Pass and Tirgujiuli fronts, where the Germans a fortnight ago sustained a temporary defeat. "North of Tirgujiulij the Eleventh Bavarian Division was practically annihilated by the Roumanans. It had been sent specially from Kovel, on the Russian front, with the kaiser's tele-

graphed benediction."

"Much equipment was abandoned when the Bavarians fled toward the frontier, broken and panic-stricken. German military paraphernalia still litered the battlefields. Motor cars, machine guns, and field pieces fell rophies to the Russians. The German general in the haste of retirement lost his pickethaube with its zilt spiked top. Judging by the number found on the battlefield, a blank recommendation for the Iron Cross seems to form an essential part of the field kit of every German regimental commander.

Hungarian Atrocities.

"The humane treatment by Roumanans of enemy wounded was in marked ians of enemy wounded was in marked contrast to the savage crueity exhibited by the Hungarians when some Roumanians fell into their hands. In one hospital I saw two Roumanians, parts if whose tongues had been amputated by their Hungarian captors.

"These maltreated soldiers were captured by a patrol, and because they efused to give information of essential importance to the enemy the tips of heir tongues were hacked off with sword bayonets. They were then set at liberty. The victims are now recovering from their terrible injuries, tho hey have lost the power of speech and, it is feared, may be dumb forwer.

Berlin, Nov. 20—"Monastir's evacuation by the Germans and the Bulgars," says the semi-official Overseas News Agency, "was a measure which had been prepared for several days by the chief command of the central plies."

The Roumenian is a splendid soltier. In the difficult passes of the Carathians they have held back a powerful and well-organized enemy.

They defended their fatherland with tenacity and heroism. In the trenches, I saw and admired the soldiers who, for over two months, have successfully defied the armed might of the central powers. Practically ever since the beginning of Roumanian bostilities, these men have been fighting night and day with little respite."

RUSSIANS RESOLVE TO CONTINUE WAR

Douma Members Want Crushing Defeat of Teutons.

MISCHIEF YET BREWS

Prompt Appearance of Minisisters in House Frustrates Obscure Plot.

When the full tale of this week's doings in the douma comes to be told, it will form one of the strangest chapters in the history of the war. At present, it cannot be put into print in enything like its entirety. Those whose business it is to settle things decided that to give complete publicity to this remarkable episode would not be in the interest of the country; consequently there are many blank columns in the papers where the debates of the first three sittings of the Russian Parliament would otherwise be printed. However, what is said in the presence of 600 or 800 peopie cannot perminently be bottled up. The substance of the speeches has already become widely known, and it is the sole topic of political conversation. Presently it will spread to the farthest corners of the empire.

Counsel Presents Final Arguments in Famous Legal Conflict.

LAUDS HON. J. S. DUFF

Justice Lennox, Presiding, Pays Tribute to Late Agriculture Minister.

The case will be resumed this morning, when I F. Helimuth, K.C., will open the arguments in the famous million dollar case of Taylor against Davies. commenced yesterday morning before Justice Lennox at Osgoode Hall. The testimony was taken nearly a year ago, but for one cause or another the arguments were postponed from time to time. His lordship said yesterday, he would like to attend the funeral of his old friend the late Hon. J. S. Duff, but he did not feel justified in again adjourning this case which should have long ago been disposed of. He took occasion, however, to pay am eloquent attribute to the lete minister of agriculture. Mr. Duff was a man of ideals, his lordship observed, but not an idealist. He was a man of strong ambitions, of unflagging energy, and at the same time of a most kindiy disposition.

The case of Taylor against Davies has excited great local interest as all parties are well known, and the Droperty involved is immensely valuable, isabella Taylor brings the action as a creditor of the firm of Taylor Brothers which made an assignment in 1901. The firm owned 140 acres northeast of the city which included the Don Valley Brick Works. This property, even at that, time, the plaintiff claims, was worth at least \$500,000, but it was sold by E. R. C. Clarkson, the assignme, to the late Robert Davies for \$45,000. Davies was the brother-in-law of the property. He was also one of the inspectors of the estate. The suit is brought to set aside the conveyance from Clarkson to Davies as in fraud of creditors.

When It is asid could not traffic in any of the property. He was also one of the inspectors of the estate. The suit is brought to set aside the conveyance from Clarkson to Davies as in fraud of creditors.

When It almost of Oscillation and the feel in the defence.

The fall must be the day not brove the day of the post of the conveyance from Clarkson to Davies as in fraud of creditors.

When It almost of Oscillation and the late is at the function of the firm of Taylor against Davies in the for

Mr. Nesbitt, in opening the argument for the plaintiff yesterday, said that Taylog Brothers made an assignment in 1901 to E. R. C. Clarkson. The late Robert Davies, their brother-in-law, held a mortgage upon 140 agrees of land, including a couple 140 acres of land, including a couple of paper mills, and the Don Valley Brick Works, for \$100,000. He was appointed one of the inspectors of the estate. Immediately after the assignment Davies rented the entire property from the assignee for \$25 per month, took possession, ran the business and remained in possession until his death. Subsequently, about February, 1902, the assignee conveyed the property to Mr. Davies upon the latter glving the Taylor Brothers a credit of \$45,000 upon their debt to him evidenced by the mortgage. There was no advertisement that the pro-perty was for sale, nor was it ever attempt to ratify the transaction by calling a meeting of the creditors in June, 1902, but Mr. Nesbitt claimed that the meeting was illegal and that only a small percentage of creditors

attended.
Mr. Nesbitt argued that Mr. Davies, Mr. Nesbitt argued that Mr. Davies, being an inspector of the estate, was disqualified from buying the property of the estate no matter how innocent the transaction might appear. It was not necessary to prove fraud, for fraud would be presumed. As inspector Mr. Davies came into possession of knowledge as to the condition of the estate, and the value of the property which he cunningly concealed from the creditors. The hand of Davies was to be seen in every move made from the time of the assignment urtil he sequestered this "Naboth's vineyard."

ment uptil he sequestered this 'Naboth's vineyard.'

Mr. Nesbitt said the assignee seemed to be entirely under the influence of Davies. He did not advertise the property for sale, nor did he advortise the meeting of creditors called to confirm that sale. If the property had been offered for sale it would have brought \$600,000 in 1902.

M. K. Cowan, K.C., dwelt upon the great value of the property for brickyard purposes in 1901 and 1902. It contained several strata, all of sreat value. There was 35 feet of clay used for buff pressed brick, about 40 feet of wise cut clay and other clay mixed with sand, and below a deposit of shale, said to be 400 feet dept. It is one of the most wonderful pieces of property in the world, and in 1901 the Don Valley Brick Works were known from one end of the continent to the other. Taylor Brothers did not assign because the business did not pay, but because they had been called upon to make up losses to the extent of \$200,000 in outside ventures.

Justice Lennox said: 'T will have no difficulty in reaching the conclusion that this was a magnificent property for the brick business. Of course, there remains the question as to the water of the market, and the salability of the property in 1902."

the question as to the state of the market, and the salability of the property in 1902."

Mr. Cowan argued at length that the property would have brought a good figure had it been placed on the market in 1902. It would have brought at least ten times as much as Mr. Davies purported to pay for it. He called attention to the fact that Mr. Davies had taken possession of the property and business immediately after the assignment and had actually made 9,000,000 bricks within the year. He had taken over the entire working force and selling organization with the goodwill of the business as a going concern. This he had done without asking anybody except Mr. Clarkson. That he intended to hold on to the property was evident from the first. Long before he got the deed from Mr. Clarkson he bought a new boiler and two presses, tone down an old stone kiln and built a new drying shed 120 feet long. Certainly a shrewd business man like Mr. Davies would not have expended money in this way unless he intended to hold on to the property.

to the property.

Justice Lennox said that it was evident that Mr. Davies fully intended from husband and two sons survive.

Anymore, the was also one of the inspectors of the estate and as such of it is said could not traffic in any of the property of the estate. The suit is brought to set aside the conveyance from Clarkson to Davies as in fraud of creditors.

When the trial was on a year ago it was stated that Mr. Davies was unsible to testify, and indeed did not know accounted his physical condition it was not drought to estate that Mr. Davies was unsible to testify; and indeed did not know accounted his physical condition it was not drought to account of his physical condition it was not to testify; and indeed did not know accounted his physical condition it was not drought to account the first testified that Sackuch had been drought. UNIVERSAL SERVICE.

Editor World: Reading your very interesting article in Monday's World, you have struck the keynote of the situation by advocating universal service as the remedy to fill up our Canadian divisions at the front, but something more effective than moral suesion, recruiting meeting, and expensive methods now in vague, should be adopted. The time has passed for political "pussy-footing," and the situation to get the men promised by Canada is entirely in the hands of the gubic, especially the mothers who have given and sent sons, wives who have given and sent sons, wives who have given and sent husbands to defend our hearths and homes. If our women, who are vitally interested, would start a coast to coast petition, addressed to the premier, demanding that the Milita Act be put in force at once, this is the only universal way to fill the ranks, and at the same time, demonstrating one law for all.

Means of Stopping Strike Deemed a Grave Menace.

Baltimore, Nov. 20.—The organized labor forces of the country today avowed extreme hostility to the writ of injunction as a means of stopping a strike. First a resolution was adopted unanimously at the morning session of the convention of the A. F. of L. urging organized labor everywhere to make the injunction question "the paramount issue in all of their future political activities." their future political activities."

A more radical step was taken at the afternoor session when the committee on the executive council's report took up that feature of the report dealing with the decision of the Massachusetts supreme court, classifying labor as property. The committee submitted, and the convention unanimously adonted, a recommendation that any injunction dealing with the relationship of employer and smploye and based on the dictum that labor is property, be disregarded, let the consequences be what they may.

SUSPECTED OF SPYING. Baltimore Youth Enlisted Under Wrong

Baltimore, Nov. 20.—Daniel O'Connor, 19 years old, son of a large leather jobber of this city, has arrived from England, where he was charged with being a spy. He ran away from home, went to Canada and enlisted under the name of Mueller. Why he gave that name his parents do not know. His correct name being discovered when in a camp in England, he was put under arrest. His parents were notified and the state department was asked to intercede. He was released from service.

POTATOES HELD BACK TO MAINTAIN PRICE

Charge is Made Against Certain Dealers at Montreal.

Montreal, Nov. 20.—With potatoes selling at \$2 to \$2.25 per bag of 90 pounds, and dealers advertising, a great scarcity of the tubers, it was learned today that there are on railway sidings in Montreal more, than 300 cars of potatoes, and railway officials state that dealers refuse to accept delivery. Instead they are paying demurrage and the object is deing demurrage and the object is de-clared to be to prevent a s'ump in the price. The majority of the cars are said by railway officials to have been here for at least a week or ten days. and in many instances the frost has played havoc with the contents.

WHEAT SKYHIGHS ON EXPORT CALL

Prices Jump at Chicago, Closing Nearly Five Points Higher.

WINNIPEG LEADS RISE

Reported Curtailment of Canadian Winter Acreage Tends to Lift Prices.

Chicago, Nov. 20.—Reports of foreign government buying under cover did a good deal today to bring about a sharp

upturn in the value of wheat. Altho extreme gains were not held, the market

closed strong, 3%c to 4%c net higher, with December at \$1.83% and May at \$1.83%. Other leading cereals, too, all scored gains—corn 1%c to 1%c, oats 1%c to 1%c, and provisions 32%c to 70c. Winnipeg led the wheat advance, que tations there being up about 6c at one time as a result of big purchases that were generally ascribed to the British Government. There was also liberal buying of future deliveries here, which was apparently for export interests. In this connection decided significance was attached to word from Liverpool that supplies arriving did not meet requirements. Bulls put much stress also on an estimate that the world's surplus at the end of the crep year would be only 46,000,000 bushels. Offerings here dried up as prices advanced, and it was not until announcement was made that the U. S. visible supply total had again showed an unexpected increase that the upward swing of values was checked.

Advices that the winter wheat acreage in Canada showed a curtallment of 13 per cent. as compared with a year ago counted to a material extent against the bears. Chances that an embargo might be proclaimed in Argentina tended likewise to give prices a lift.

Corn climbed with wheat and as a consequence of bullish crop conditions in Argentina. It was said rains in Argentina had proved insufficient. Oats were governed chiefly by the upswing of other cereals. Strength resulted also from buying on the part of houses with seaboard connections. Large exports as compared with last year sent provisions upgrade after an early decline. were generally ascribed to the Britisl

Winnipeg, Nov. 20.—Wheat closed 7%c for November, 6%c for December, and 7%c higher for May. Oats were 1½c to 2%c higher for May. Oats were 1½c to 2%c higher for May. Oats were 1½c to 2%c higher for May. Oats were 1½c was 18c higher for November, 19½c up for December, and 18½c higher for May. As the session grew older wheat gathered more strength and the reaction at the close was very small. December wheat sold at \$1.90, the high point of the day and only about 5c under the high price of the season. The buying was seneral. Much of the buying was credited to the government interests, but it was done largely thru the commission houses.

The most remarkable gain during the day was that in flax. The country liquidation, which appeared during last week had weakened that grain and with buying orders che crushers buying and the speculative element helping, prices went up for a record advance.

Cash trade was a little better. Oats were fairly strons.

The Boys' Store at Simpson's is Keen on Qualit

Merely low prices do not interest us---and they should not interest you. The first consideration in this store is quality of merchandise---the price then must be low or lower than you can get the same quality for elsewhere. But if the quality is not up to our standard we will not handle it at any price. That is why you are safe in outfitting your boys at Simpson's.
