Presented 19th April, 1892.—*Mr. Brodeur*..... *Not printed.*
- 65.** Return to an order of the House of Commons, dated 18th June, 1891, for a return showing the amount of money expended, and the year of expenditure, in each electoral district since confederation, under the following heads: 1. Public buildings. 2. Harbours and rivers. 3. Roads and bridges. Presented 26th April, 1892.—*Mr. Landerkin*..... *Printed for sessional papers only.*
- 66.** Return to an order of the House Commons dated 1st July, 1891, for a return of all correspondence, telegrams, letters, reports, estimates and other documents relating to the surveys for, and construction and cost of a sub-marine tunnel between Prince Edward Island and the mainland. Presented 27th April, 1892.—*Mr. Davies*..... *Not printed*
- 66a.** Return to an order of the House of Commons, dated 23rd March, 1892, for all correspondence, reports, etc., which may have taken place between the government of Canada and Sir Douglas Fox, or any other engineer, since the 1st day of September, 1891, having reference to building a tunnel from Prince Edward Island to the mainland across the Straits of Northumberland. Presented 3rd May, 1892.—*Mr. Perry*..... *Printed for sessional papers only.*
- 67.** Return to an order of the House of Commons, dated 9th March, 1892, that a map of the Dominion be laid upon the table showing the boundaries of townships, counties and electoral divisions in each province, and the number of votes polled in each township for each candidate at the general election in March, 1891. Presented 27th April, 1892.—*Mr. Mills (Bothwell)*..... *Not printed.*
- 68.** Return to an address of the House of Commons to his excellency the Governor General, dated 14th March, 1882, for copies of all correspondence between the government of Canada or any member thereof, and the British government, or between the government of Canada and any person or persons, relating to the admission of live cattle from the United States. Also for copies of all orders in council relating to the same. Presented 29th April, 1892.—*Mr. Somerville*.
Printed for sessional papers only.
- 69.** Return to an order of the House of Commons, dated 14th March, 1892, for a return of copies of all tenders received for engraving and printing since 1882, and of all contracts entered into for the same, including the contract beginning in this present year; also all correspondence relating to the subject since 1882. Presented 3rd May, 1892.—*Mr. Somerville*..... *Not printed.*
- 70.** Return to an address of the House of Commons to his excellency the Governor General, dated 30th March, 1892, for a return of all correspondence, telegrams or other documents between the government of Canada and the imperial government or the government of Newfoundland, or between any member or representative of either of such governments respecting the admission of Newfoundland into the dominion of Canada; including all correspondence or telegrams to and from the high commissioner on the subject; and all reports to and minutes of council thereon. Also copies of any terms or offers which may have been submitted to the government of Newfoundland or any member thereof, with respect to the admission of that island into the dominion. Presented 4th May, 1892.—*Mr. Davies*..... *Printed for sessional papers only.*
- 71.** Return to an address of the House of Commons to his excellency the Governor General, dated 10th March, 1892, for copies of all correspondence, memorials, departmental orders, and orders in council respecting the north-western, northern and eastern boundaries of the province of Quebec, received or passed during the last five years and not already laid before this House, together with all the reports of surveys or explorations ordered thereon by the government of Canada during the same period. Presented 5th May, 1892.—*Sir H. Langevin*.
Printed for sessional papers only.
- 72.** Return to an address of the House of Commons to his excellency the Governor General, dated 9th May, 1892, for a copy of the instructions appended to commission of the lieutenant governors of the provinces of Canada. Presented 9th May, 1892.—*Mr. Laurier*..... *Not printed.*

VOLUME 12—Continued.

73. Return to an order of the House of Commons, dated 14th March, 1892, for a return of all correspondence, engineers' reports, petitions or other documents relating to the survey or deepening of the channel of the Galops Rapids, and for a statement of the work performed by the chain tug "Iroquois," owned by the government, and of the services performed by one John Stitt, in connection with said tug. Presented 9th May, 1892.—*Mr. Somerville*..... *Not printed.*
- 73a. Return to an order of the House of Commons, dated 11th March, 1892, for a return of all surveys, plans, specifications, contracts, reports and papers connected with the new channel in the Galops Rapids. 2. All reports of engineers as to the striking of steamer "Traveller" in Galops Rapids, in October, 1889. 3. All reports from any steamboat captain who may have reported as to the state of said channel. 4. Statement of cost of investigation by engineers in 1891. 5. Reports from engineers sent to investigate said channel in 1891. 6. Copies of evidence given as to the depth, quantities, etc. Presented 30th May, 1892.—*Mr. Reid*..... *Not printed.*
74. Return to an address of the House of Commons to his excellency the Governor General, dated 4th April, 1892, for copies of the original letters patent of incorporation of the Dominion Cotton Mills Company (Limited), and of the supplementary letters patent increasing the capital stock of the said company from \$100,000 to \$5,000,000, and copies of all correspondence, petitions, statements and evidence submitted to the government in support of the issue of such supplementary letters patent. And also for copies of the original letters patent incorporating the Canadian Coloured Cotton Mills Company (Limited), and of the supplementary letters patent increasing the capital stock of the said company from \$100,000 to \$5,000,000, and copies of all correspondence, petitions, statements and evidence submitted to the government in support of the issue of said supplementary letters patent. Presented 9th May, 1892.—*Mr. Edgar*..... *Not printed.*
75. Return to an order of the House of Commons, dated 2nd May, 1892, for all correspondence concerning the appointment of Mr. W. H. Ingram as Collector of Customs at St. Thomas, Ont. Presented 10th May, 1892.—*Mr. Casey*..... *Not printed.*
76. Return to an address of the House of Commons to his excellency the Governor General, dated 2nd May, 1892, for copies of all correspondence, memorials and documents exchanged between the government, or any member thereof, and any persons, companies or corporations as to the propriety or advisability of relieving or recouping the county of Pontiac railway indebtedness. Presented 11th May, 1892.—*Mr. Murray*..... *Not printed.*
77. Return to an order of the House of Commons, dated 2nd May, 1892, for a detailed copy of the certificate of acting chief engineer that \$32,000 paid to Bancroft & Connolly was done in addition to all previous certificates on Kingston Graving Dock, as mentioned in Auditor General's Report, page C—119. Presented 12th May, 1892.—*Mr. Gibson*..... *Not printed.*
78. Return to an order of the House of Commons, dated 14th March, 1892, for : 1. Copy of the circular issued on the 10th June, 1891, by the department of marine, relative to sick mariners' dues in Canada. 2. A list of persons to whom such circular was addressed. 3. Copy of all answers received. Presented 16th May, 1892.—*Mr. Laurier*..... *Not printed.*
79. Report of the Royal Commission appointed to investigate the working of Civil Service Act, and other matters connected with the Civil Service generally. Presented 20th May, 1892, by Sir John Thompson..... *See No. 16c.*
80. Return to an address of the House of Commons to his excellency the Governor General, dated 2nd May, 1892, for a return stating, for the last year (1891) : 1. The number of applications which were made to the railway committee of the privy council for an adjudication, order or direction respecting any of the matters or things which, under the provisions of the Railway Act, the railway committee had power or authority to deal with. 2. Showing in general terms the nature of the application. 3. The names of the members of the honourable the privy council who (a) Heard each of the applications ; (b) Who were present at any one or more adjourned hearings thereof, and at the final adjudication thereof ; (c) In cases in which adjournments took place, the dates of hearing, and subsequent adjournment or adjournments of final adjudication. 4. Statement showing how each of said applications was disposed of, viz. : Granted or refused, or partially granted. Presented 25th May, 1892.—*Mr. McCarthy*..... *Not printed.*
- 80a. Return to an address of the House of Commons to his excellency the Governor General, dated 2nd May, 1892 : 1. For a statement of all applications or complaints made to the railway committee of the privy council respecting the matters or things referred to in sub-sections (k), (l), (m), (n) and

VOLUME 12—Continued.

- (p) of clause eleven of the Railway Act. 2. By or against whom such complaints were made. 3. The manner in which the same were dealt with or disposed of. Presented 25th May, 1892.—*Mr. McCarthy*.....*Not printed.*
- 81.**—(1891.) Return to an address of the House of Commons to his excellency the Governor General, dated 3rd June, 1891, for copies of all correspondence between the imperial government and the government of Canada, on the subject of the copyright laws of Canada, and all other papers relating thereto, not already brought down. Presented 24th August, 1891.—*Mr. Edgar.*
Printed for sessional papers only.
- 81.** Return (in part) to an order of the House of Commons, dated 23rd March, 1892, for a return showing which of the dominion buildings in Canada are lighted by electricity; the respective system used in each such building, whether arc or incandescent; the number of sixteen candle-power lamps or their equivalents used in each such building; the cost per lamp of sixteen candle power or equivalent in each building; and the average annual cost for lighting each such building. Also showing in what buildings the plants are owned and maintained by the government, and in cases where not so owned and maintained, from whom the current is obtained or supplied, and whether from central station or private parties; also whether in cases of leased currents the renewal lamps are supplied at government expense, and if so, in what buildings and at what annual cost; also the names of the parties contracting to light any of such buildings, with the names of the buildings, and the dates and duration of each such contract. Also showing which of the public buildings of the dominion are lighted with gas, and the annual cost of lighting each such building. Presented 25th May, 1892.....*Not printed.*
- 82.** Return to an order of the House of Commons, dated 2nd May, 1892, for a return giving all papers, letters, petitions, applications and every other document relating to the dismissal of the postmaster of Eugenia, and the appointment of his successor. Presented 30th May, 1892.—*Mr. Landerkin*—*Not printed.*
- 83.** Return to an order of the House of Commons, dated 16th May, 1892, for a return showing the names of the mail conductors superannuated, their number of years of service, the salary given to each of them during the last year of service, and also the names of those who have had several years added to their period of service. Presented 30th May, 1892.—*Mr. Brodeur*.....*Not printed.*
- 84.** Return to an order of the House of Commons, dated 1st March, 1892, for a return showing the number of royal commissions that have been issued in each and every year since confederation, and to whom issued, together with the subject inquired into, giving the cost of each and the total cost of all. Presented 1st June, 1892.—*Mr. Landerkin*.....*Printed for sessional papers only.*
- 84a.** Supplementary return to an order of the House of Commons, dated 1st March, 1892, for a return showing the number of royal commissions that have been issued in each and every year since confederation, and to whom issued, together with the subject inquired into, giving the cost of each and the total cost of all. Presented 9th June, 1892.—*Mr. Landerkin.*—
Printed for sessional papers only.
- 85.** Statement of number of hours of setting upon the daily Senate *Hansard*, and number of ems set, including corrections, up to 20th May. Presented 2nd June, 1892, by Hon. Sir J. C. Abbott.—*Not printed.*
- 86.** Return to an address of the House of Commons to his excellency the Governor General, dated 25th April, 1892, for a copy of the petition presented and filed in the supreme court of Nova Scotia, under the Dominion Controverted Elections Act, against the election and return of Joseph A. Gillies, for the county of Richmond, Nova Scotia, at the general election holden on the 5th March, 1891; together with the dates of filing and service of such petition; and also all papers and documents in connection with the following proceedings in the supreme court of Nova Scotia: 1. Application to the honourable the chief justice extending the time for setting the petition down for trial. 2. Application to set the petition down for trial returnable before the Honourable Mr. Justice Weatherbe, and the Honourable Mr. Justice Graham, but heard by the Honourable Judge Weatherbe, sitting alone, on the 19th day of November, 1891. 3. The order made by the said Judge Weatherbe, sitting alone, for the trial of the said petition, fixing the 8th of December, 1891, the date for said trial. 4. The notice of appeal, dated 28th November, 1891, from this decision of the Honourable Judge Weatherbe, to the supreme court of Nova Scotia, the grounds of appeal being as follows: (a) Because there was no jurisdiction to make said order, or the portion

VOLUME 12—Continued.

thereof extending time; (b) Because six months had elapsed since the presentation of the petition; (c) Because the time and place of trial were not fixed within six months from the presentation of the petition; (d) Because the extension of time granted by said order was not made on application for that purpose, supported by affidavits, and it does not appear from such order, and it was not made to appear when the same was made, that the requirements of justice rendered such enlargement necessary; (e) Because the respondent had no notice of any application to extend the time for the commencement of the trial herein; (f) Because one judge has no jurisdiction to fix the time and place of trial; (g) Because the trial of the petition cannot be commenced during the term of the court at which the judges assigned to try the said petition are bound to sit. 5. The notice of motion on said appeal for the 3rd day of December, 1891. 6. The appointment by the Honourable Judge Weatherbe, then senior judge, for a hearing before the supreme court on the said 3rd day of December, 1891. 7. The postponement of this hearing until a later day. 8. The judgment of the supreme court upon this case. 9. The rule of the supreme court, dated the 19th day of December, 1891, setting aside the order of the Honourable Judge Weatherbe fixing the date of the trial of said petition. 10. The date on which the Honourable Judge Weatherbe and the Honourable Judge Graham received a copy of the order of the supreme court setting aside the said order of Judge Weatherbe for trial. 11. The date on which the said judges reported to the Honourable the Speaker of the House of Commons that the said petition had been heard by them, and that they had declared the election of the said Joseph A. Gillies void, and his seat in parliament vacant. 12. The date upon which application was made to the Honourable Judge Weatherbe to defer the decision in the petition pending the decision of the supreme court of Nova Scotia on the question of jurisdiction, and the refusal of this application. Also copies of the several petitions presented and filed in the supreme court of Nova Scotia under the Dominion Controverted Elections Act, against the election and return of Hon. Sir John Thompson, Hon. C. H. Tupper, Mr. C. E. Kaulbach, Mr. J. B. Mills, Mr. N. W. White and Mr. Hugh Cameron, for six of the several counties of the province of Nova Scotia, at the general election held on the 5th March, 1891. Also all papers and documents in connection with the various proceedings in the said cases in the supreme court of Nova Scotia. Presented 3rd June, 1892.—*Mr. Gillies and Mr. Forbes.*

Not printed.

87. Return to an address of the House of Commons to his excellency the Governor General, dated 30th March, 1892, for copies of all accounts, claims and certificates presented and transmitted (from 1st July, 1885, to this day) to the dominion government, by each of the judges of the superior court for the province of Quebec, in his capacity as such, for all travelling expenses and hotel expenses, in any place other than that in which such judge had orders to reside, or did in fact reside, either for sitting or for acting therein, or for holding therein (in such capacity) any court in civil, criminal or other matters; together with a detailed statement of the several sums paid in conformity with such accounts, claims and certificates. Presented 3rd June, 1892.—*Mr. Flint.*

Not printed.

88. Further supplementary return to an address of the Senate, to his excellency the Governor General, dated 14th September, 1891, for all correspondence between his excellency the Governor General and the Lieutenant Governor of the province of Quebec, in connection with the Baie des Chaleurs Railway, and all other papers and correspondence in the possession of the government on that subject. Presented 31st May, 1892.—*Hon. Mr. Miller*.....*Not printed.*

89. Return to an order of the House of Commons, dated 25th April, 1892, for a return of the amount of crude cotton-seed oil imported into Canada during the year 1891; also the amount of refined cotton-seed oil imported into Canada during the year 1891. Presented 7th June, 1892.—*Mr. McKay.*

Not printed.

90. Return to an address of the Senate to his excellency the Governor General, dated 5th May, 1892, for copies of all letters, communications and reports in the possession of the government, having relation to the fixing of a standard of time, and which have been received subsequent to May, 1891. Presented 14th June, 1892.—*Hon. Mr. Sullivan*.....*Not printed.*

91. Return to an order of the House of Commons, dated 10th June, 1892, for a copy of the Reports of the British Farm Delegates, Messrs. McQueen and Davey, on the Maritime Provinces. Presented 15th June, 1892.—*Mr. McMillan (Huron)*.....*Not printed.*

92. Return to an order of the House of Commons, dated 15th June, 1892, for a copy of the minutes of the evidence taken at the trial, under the Dominion Controverted Elections Act, of the case of A. Sturton *et al*, petitioners, vs. P. V. Savard, defendant, in relation to the election for the counties of Chicoutimi and Saguenay, in the year 1891. Presented 15th June, 1892.—*Sir John Thompson.*

Not printed.

VOLUME 12—*Continued.*

93. Return to an order of the House of Commons, dated 18th June, 1891, for copies of all papers and correspondence in the department of marine and fisheries, relating to the saving of the lives of part of the crew of H.M.S. "Lily," wrecked on the coast of Labrador, in September, 1889. Presented 17th June, 1892.—*Mr. Edgar*..... *Not printed.*
94. Return to an address of the House of Commons to his excellency the Governor General, dated 10th August, 1891, for copies of all orders in council, memorials, correspondence and documents respecting the rock-slide from the citadel at Quebec, on the 19th September, 1889. Presented 24th June, 1892.—*Mr. Frémont*..... *Not printed.*
95. Return to an order of the House of Commons, dated 4th April, 1892, for : 1. Return of all correspondence, papers, complaints or memoranda of any kind in relation to "The Temperance Colonization Society," received since or not included in a return furnished the House in 1890. 2. List of all stockholders of the company, 1st May, 1885, with amounts paid on calls of the shares, whether in cash, land credits, or otherwise, each year to date, stating what shares were forfeited, when and why. 3. List of stockholders at date of return, showing when they became such, with dates and amount of shares purchased, with price per share. (a) Number of calls on all shares, with details, dates, etc. 4. Amount earned in fees by directors each year to date. 5. Amount of money invested each year, and in what. (a) Total amount received on account of scrip and land sales to date. 6. List of scrip holders, with post office address, who purchased from the company (scrip issued) prior to 1st June, 1882, and since that date, giving date of issue, amount of land purchased by each, price per acre, amount paid thereon to date; showing if cancelled, when and on what conditions. 7. List of all other contracts for purchase of land issued, whether exchanged for scrip, amounts paid to date, whether contract is still in existence, why cancelled, and when. 8. Amount and details of land sales now current and for which land is to be supplied by the company. 9. List of all persons whose scrip was located on even-numbered sections in 1883, showing where located, new location subsequently, if any, with form of contract of even-numbered location. 10. List of homestead settlers in 1885. List at date (actual residents). 11. When contract with the company and government expired, with conditions of extension, if any; conditions of final settlement. 12. List of lands to be conveyed to the company under such settlement. The foregoing information to be furnished, if practicable, under affidavit of the president and accountant. Presented 30th June, 1892.—*Mr. Sproule*..... *Not printed.*
96. Census of Canada.—Bulletin No. 11. Nationalities. Birth places of the people. Presented 30th June, 1892, by Hon. J. Carling... *Not printed.*
97. Return to an address of the House of Commons to his excellency the Governor General, dated 2nd May, 1892, for a copy of location ticket granted to John Alexander McLellan, of Cockburn Island, for lot 15 in the 5th concession, Cockburn Island; copy of all affidavits or declarations, letters and other papers from any person or persons to the department, or any officer of the department, in any way relating to said lot or the cancellation of the said ticket; and copy of any order made for the cancellation of said ticket. Also for a copy of the location ticket granted for lot 16 in the 4th concession, Cockburn Island, and any assignment or transfer thereof to Peter McLellan; copy of affidavits or declarations, letters and other papers from any person or persons to the department in any way relating to said lot or the cancellation of the said ticket, and copy of any order made for the cancellation of said ticket. Presented 5th July, 1892.—*Mr. Lister*..... *Not printed.*
98. Return to an order of the House of Commons, dated 28th March, 1892, for a return showing : 1. The number of Indian reserves in British Columbia. 2. The location of each and name of tribe to whom allotted. 3. The area in acreage of each. 4. The area cultivated on each reserve. 5. The population of each tribe when reserves were first established. 6. The present population of each tribe. 7. The area (estimated) of pastoral land on each reserve. 8. The number of horses, cattle and sheep owned by each tribe. 9. The estimated area of timber land on each reserve. Presented 5th July, 1892.—*Mr. Barnard*..... *Not printed.*
99. Copy of a report of a committee of the honourable the privy council, approved by his excellency the Governor General in council, on the 17th June, 1892, on the subject of a despatch dated 4th November, 1891, from Lord Knutsford, inviting an expression of the views of the Canadian government upon the complaint of alleged discrimination on the part of the government of Canada against citizens of the United States in the matter of canal tolls. Presented 6th July, 1892, by Sir John Thompson..... *Printed for sessional papers only.*

VOLUME 12—*Continued.*

- 100.** Return to an address of the Senate to his excellency the Governor General, dated 10th June, 1892, for a return of subsidy paid the Albert Southern Railway Company, showing the dates when paid, and to whom paid; also copies of all correspondence in reference to the payment of the said subsidy, and of all letters or telegrams asking for payment of same or relating thereto; also copies of all returns or reports of government engineers or inspectors, who inspected or reported on said road. Presented 6th July, 1892.—*Hon. Mr. Power*..... *Not printed.*
- 101.** Return to an order of the House of Commons, dated 9th May, 1892, for a return showing: 1. The total number of acres of public lands granted in Manitoba and the Canadian North-West in aid of railway construction, up to 26th April, 1892. 2. The name of each railway company or line to which a land grant has been made; the length of each line thus aided by land grant, and the number of acres granted to each company or line. 3. The total number of acres of land in Manitoba and the Canadian North-West which have been earned up to 26th April, 1892, under provisions of grants through completion of lines or portions of lines to which land grants have been made. 4. The name of each railway company or line which has earned the whole or a portion of its land grant, with the number of acres earned by each of such lines. Presented 9th July, 1892.—*Mr. Charlton*..... *Not printed.*
- 102.** Return to an order of the House of Commons, dated 21st March, 1892, for a map of Canada showing the areas of spruce and white pine timber, respectively, now standing. Presented 9th July, 1892.—*Mr. Ives*..... *Not printed.*
- 103.** Return to an address of the House of Commons to his excellency the Governor General, dated 25th April, 1892, for copies of all resolutions and memorials passed by the North-West Assembly at its last session and addressed to the government. Presented 9th July, 1892.—*Mr. Davin*... *Not printed.*
- 104.** Return to an address of the House of Commons to his excellency the Governor General, dated 21st March, 1892, for copies of all letters, correspondence, petitions, etc., relating to the claims or settlement, or proposed settlement of claims of settlers on the Waldron Rancho Company's territory; copies of all complaints made regarding the treatment settlers have been subject to by the company. Presented 9th July, 1892.—*Mr. McMullen*..... *Not printed.*
- 105.** Return to an order of the House of Commons, dated 28th March, 1892, for a return showing the quantity of binding twine imported for consumption in the Dominion, from the 1st of July, 1891, up to the first day of January, 1892; the country from which the same was imported, and the amount of duty paid thereon. Presented 9th July, 1892.—*Mr. Campbell*..... *Not printed.*

REPORT
OF THE
DEPARTMENT OF INDIAN AFFAIRS

FOR THE
YEAR ENDED 31st DECEMBER, 1891.

DEPARTMENT OF INDIAN AFFAIRS,
OTTAWA, 27th January, 1892.

To the Right Honourable Sir Frederick Arthur Stanley, G.C.B., Baron Stanley of Preston, Governor General of Canada, &c., &c., &c.

MAY IT PLEASE YOUR EXCELLENCY :—

I have the honour to submit the report of the Department of Indian Affairs for the year ended on the 31st December, 1891.

In presenting this report it is my pleasing duty to state that the past season has been one of uninterrupted tranquillity among the Indians of the Dominion. The "Messiah Craze," which affected so many of the Indian tribes in the United States, occasioned little or no excitement among our Indians: and the "Ghost Dances," which were so freely indulged in by the Indians of the former country, were not celebrated by any of the Indians of Canada, so far as the Department has heard: nor was this because their sympathy was not sought by their relatives and acquaintances on the other side of the line. On the contrary, there is sufficient cause for believing that runners or messengers were sent from the disaffected Indians of the United States to some of our Indians, in the hope that they might be induced to lend their aid to the movement, but their overtures were rejected and met with no response.

Gratifying progress towards becoming wholly self-supporting has been made by such of the numerous bands of Indians of whom this Department, through its agents, has the supervision, as are not already able to maintain themselves.

The examples of increasing industry and thrift are more noticeable in the North-West Territories and Manitoba than in the case of Indians of the older provinces, owing to the contrast which the present settled condition of the majority of the Indians of those parts, as tillers of the soil and herders of cattle, presents to the continual unrest which but a few years ago characterized them, when as painted and feather-bedecked warriors they traversed the vast plains which they are now assisting to reduce to a state of cultivation, one tribe at continual war with another, or when as hunters they sought for a precarious subsistence from the buffalo chase.

The transformation of character which has taken place in so short a time in these Indians, through the civilizing influences brought to bear on them, gives hopeful augury of their further advancement under like management, combining as it does fairness and perseverance with kindness and patience. The policy pursued in the management of the subjects of the same has called for the exercise in a marked degree of these qualities on the part of their agents and instructors, and the fruits of it are perceptible in the improved condition of and the progress towards the white man's plane being made by these aforetime Ishmaelites of the desert.

This transition is all the more gratifying when, as Your Excellency will observe on reference to the report of the Indian Commissioner for Manitoba and the North-West Territories, as well as to the reports of the Indian agents for the various localities in that province and in the territories, the same is being effected not only at no increased, but at a diminished annual cost to the country, and it is hoped that in each year the Department, by improved methods of management, and as a result of the additional progress towards self-sustentation which may be looked for from many of the Indians, will be able to curtail expenses to a yet greater degree.

Education.

The item of expenditure in connection with Indian management, to meet which will probably necessitate in the future continued and increased drafts upon the generosity of the country, will be one in connection with and for the furtherance of which it is believed a favourable response will readily be given, namely, the education, in its broadest sense, of the Indian youth of the Dominion. In this connection I need hardly add that the sacred trust with which Providence has invested the country in the charge of and care for the aborigines committed to it carries with it no more important obligation than the moral, social, literary and industrial training of the Indian youth of both sexes; and money expended with this object in view must surely be regarded as well spent, accomplishing as it will, through the education and training imparted, not only the emancipation of the subjects thereof from the condition of ignorance and superstitious blindness in which they are, and their parents before them were sunk, but converting them into useful members of society and contributors to, instead of merely consumers of, the wealth of the country. And from an economic standpoint, therefore, apart from all considerations of a philanthropic character, which, however, would, I submit, be sufficient of themselves to justify the expenditure, the money, large though the amount required may be, which is expended in the instruction and enlightenment of the Indian youth of the country, will be money well and profitably invested in the interests of the public at large.

The consideration of this important subject naturally conducts to a description of what is now being done in this direction.

The institutions in the North-West Territories and in Manitoba which combine industrial training with ordinary educational subjects have, with one exception, namely, the Elkhorn establishment, been filled to their utmost capacity during the year, and to the number in operation in 1890 of these institutions was added during the past season the industrial school at Regina, which, as stated in the report of the Department for 1887 would be the case, has been placed under the charge of the Presbyterian body.

The inauguration of these institutions is of too recent a date to justify the expectation of important results in the completion of the education of many of the children who have attended them; nevertheless, instances are not wanting of success having been the result of the subsequent course of some of the ex-pupils. The Reverend Principal Clarke of the Battleford institution says on this head:—"You will be pleased to know that several pupils have left the school during the year, and are now termed sub-students.

"From reports received from their guardians or masters I have much pleasure in stating that they are giving general satisfaction.

"One main object before us is a watchful care over those who leave the institution, and following them through life to be able to judge of the results of this training.

"Two boys are running the grist and saw mill at Onion Lake. Another has been transferred to Emmanuel College, Prince Albert, to be further instructed as a teacher.

"Those who were trained as farmers have taken up land on the reserves, and are retaining the civilizing influences and doing well."

The Rev. J. Hugonnard, the able Principal of the Qu'Appelle institution, reports:—"The girls are making progress in class and in all sorts of house work. More than twenty have been hired out during the year. At present fourteen are out at service, earning from \$4 to \$10 dollars a month. I have a few more demands for them.

"If placed in a good family and properly overseen their stay in service is very useful to them, as they have every facility for learning English and housework."

The Indian Commissioner for Manitoba and the North-West Territories makes in his report, under the heading "Results already appearing," the following statement:—"From Qu'Appelle school, which has been more favourably situated than the St. Joseph's, and was not so greatly disturbed by the Rebellion as the Battleford institution, better results might be expected, and in this we are not disappointed; for despite the difficulty, which it shared in common with the others,—of getting suitable children at the outset, it is beginning to turn out no small number of pupils prepared to make their own way in life.

"From the Qu'Appelle school there are now fourteen girls out on service in neighbouring settlements, and they are all doing well.

"Battleford has made a start in the same direction, having sent out three girls to service, and this is the beginning of a movement which, in the near future, will be much extended.

"Comparatively few boys have gone out into service or to work at trades.

"The majority of those who have left the institutions have returned to their reserves, no doubt more or less benefited by such training as they had, although, for reasons already stated, it was necessarily far short of what the present inmates are gaining. Such boys as have gone into service or worked at trades have been doing well. I may instance a lad from St. Joseph's school, who works as a carpenter at the Black-foot reserve, two from the Battleford institution, who have been doing excellent work as assistant millwrights at various points in the territories, one from Qu'Appelle, who is employed as a blacksmith at the Muscowpetung agency, and another from the same institution, who is engaged in the Department's warehouse here (Regina)."

The institutions in Manitoba, namely, those at St. Paul's, near Winnipeg, known as the Rupert's Land Indian school, at St. Boniface, and at Elkhorn, are of too recent origin to have as yet turned out any pupils sufficiently educated and trained to do for themselves.

The industries taught at the various institutions referred to are as follows :—

At Battleford instruction is given to the male pupils in carpentering, blacksmithing and agriculture. The female pupils are taught sewing, cooking, washing, ironing, general house work, &c. At the Qu'Appelle institution carpentering, blacksmithing, shoemaking and farming are taught the boys, while the girls receive instruction in sewing, tailoring, knitting, cooking, baking, and general household duties.

At St. Joseph's institution the male pupils have imparted to them a knowledge of shoemaking, carpentering and farming ; while the girls receive instruction in tailoring and shirt-making, mending, knitting, cooking, baking, dairy and laundry work.

At the institution recently started at Regina carpentering and agriculture are taught the boys ; and the girls are instructed in laundry and kitchen work.

At the Rupert's Land institution carpentering and blacksmithing, printing and farming are taught the boys ; and lessons in cooking, laundry and general kitchen work and sewing are given to the female pupils. At the institution at St. Boniface, which was only opened last year, similar instruction in trades and agriculture will be given when it has been got fairly under way.

At the Elkhorn schools the boys are taught carpentering, blacksmithing, boot-making and farming, while the girls receive instruction in the various duties connected with household work, sewing, knitting, &c.

The institutions in British Columbia at Metlakahtla, Kuper Island and Kamloops have, with the exception of the one at the first named place, limited the instruction imparted to boys in industries to agriculture, in acquiring a knowledge of which the Principals report that the boys have displayed proficiency. At Metlakahtla carpentering has been taught with successful results.

The female pupils at the institutions on Kuper Island and at Kootenay are taught sewing, knitting, cooking, baking, washing, ironing, dairy work and gardening.

The mention of one important feature in connection with the industrial instruction imparted to the pupils, male and female, at the institutions in Manitoba, the North-West Territories and British Columbia, should not be omitted, namely, that the efforts of those receiving instruction are, as far as practicable, made available under the direction and with the aid of their instructors for the benefit of the institution and of the Indian reserves and agencies nearest to which they are situated : for instance, the carpenters and their apprentices are employed in repairing, and, when it can be done, in making additions to the buildings, in the manufacture of school furniture, building school houses, &c., &c. The shoemaker and the pupils under him engage in manufacturing and repairing the boots of the pupils and in turning out such other leather goods as the requirements of the school demand, and as they may be capable of manufacturing. The blacksmith and his apprentices manufacture and repair such articles in that line as the institution or the neighbouring reserves and agencies need.

The work done by the farm instructors and by the pupils who are learning to farm, and the crops raised, wood cut, and other outside work done, all accrue to the benefit of the institutions.

The instructresses in tailoring, dressmaking, the manufacture of shirts and under-clothing, mending and knitting, and the girls under them, direct their efforts towards meeting the requirements in those lines of their respective institutions.

As in the case before mentioned of the institutions in Manitoba, so also in respect to those in British Columbia : their establishment is of too recent a date for evidence to be afforded by those who have attended thereof of practical benefit having been received such as would enable them to be successful in their efforts at becoming self-supporting. The reports, however, of the Principals of these schools, which are published herewith, encourage the hope that in some, if not in many instances, such will be the result of the instruction they are receiving.

Next in importance to the larger and more effectively equipped industrial institutions, the boarding schools, several of which are in operation in Manitoba and the North-West Territories and a few in British Columbia, take rank as levers in the social and moral education of the Indian youth of the country ; and while instruction in mechanical arts is not afforded the pupils at these institutions, they are nevertheless taught by other, though less expensive means, the value of time (a most important factor in the instruction of Indians), and that there should be an object for the employment of every moment ; even, therefore, the routine of rising, dressing and washing themselves daily, reading the Word of God, receiving instruction in the great truths of christianity, the recurrence of the hours for meals, classwork, outside duties, such as gardening, wood cutting, watering and feeding live stock, when any such are kept, recreation, studying their lessons for the next day—are all of great importance in the training and education, with a view to future usefulness of children who would, as a rule, never have received the benefit of the same at their homes.

Moreover, the instruction given the male pupils in gardening and other outside work, and, though more rarely, in farming, and the females in sewing, knitting, mending, dressmaking and household duties generally, entitles these boarding schools to be regarded as at least of a semi-industrial type. The class instruction given at these schools is of as advanced a grade as that imparted to the pupils at the industrial institutions.

The class of schools known as the semi-boarding and day schools is that which is next best calculated to accomplish effectually the education morally, socially and intellectually of Indian children. These schools are necessarily, owing to their being partially of the day school type, situated on Indian reserves. They are of more recent origin than any of the others, and consequently the lapse of time has not been sufficient to admit of a judgment being formed of their success as a means of educating such of the Indian children in attendance as are likewise lodged and boarded at these institutions. But there can be little question, obstructed though the education of the children undoubtedly is by the propinquity of the schools to the residences of the parents and other relations of the children, that this type of school is superior in many respects to the day school. Regular attendance, which is the greatest difficulty with which schools of the latter class have to contend, is, on the part at least of the children in residence insured ; as are also their daily food and sufficient clothing. Orderly habits are acquired,

personal cleanliness is insisted on, and the routine followed in the school room and the household affords practical instruction to them in regard to the value of time and in other important respects. Then the moral and religious training received should be of invaluable benefit to the pupils.

As respects the institutions of the industrial type in the Province of Ontario, namely, the Mohawk institute, near Brantford, the Wikwemikong industrial schools on Manitoulin Island, the Mount Elgin institution at Muncey, on the Indian reserve in the township of Carradoc, in the county of Middlesex, and the Shingwauk and Wawanosh homes at Sault Ste. Marie, in the district of Algoma, of the beneficial results which have followed the education and industrial training of Indian youths who have completed their course in whole or in part at those institutions, numerous instances are to be found; ex-pupils of the same are engaged in following some of the learned professions or occupying lucrative positions in other lines of life. There are three of them employed as clerks in this Department, and they discharge their duties in a creditable and intelligent manner; one of them being a Dominion land surveyor and civil engineer, having graduated at McGill University, Montreal, is attached to the technical branch of the Department.

Many of the ex-pupils of these institutions are also filling positions as teachers of Indian day schools; others are following the trades taught them at the institutions, or, having returned to their reserves, are quietly cultivating farms in accordance with the principles of agriculture learned by them thereat.

A tabular statement affixed to this report, which contains particulars respecting the numerous schools of all classes in operation for the benefit of the Indian youth of the Dominion, will supply information relative to the number of children enrolled and average daily attendance at the Industrial institutions, as well as at the boarding, semi-boarding and day schools.

It may be here stated that the two industrial schools in the north which, as mentioned in previous reports, it is intended to place under the charge of the authorities of the Methodist Church, have not yet been established. The sites have, however, at length been finally selected; the one in Manitoba being at Brandon and the other in the North-West Territories, in the Red Deer River country. The contract for the erection of the buildings for the latter has been let, and tenders will at an early date be invited for the construction of the buildings for the former institution.

It is greatly to be regretted that there are no industrial institutions in the Province of Quebec or in the Maritime Provinces, for the education and training in useful occupations of the children of the Indians of those Provinces. The superior condition of the Indians of Ontario as an industrial class to that of the Indians of Quebec and the Maritime Provinces is in a considerable measure due to the training received by so many of the former at such institutions, of which the latter have not had an opportunity to avail themselves, being dependent for what little education they get upon day schools, which, as a rule, are very inferior as a medium for imparting instruction to Indian children, and indeed it is very questionable whether the expenditure incurred in keeping up such schools is not so much money wasted.

The establishment of two industrial institutions in the Province of Quebec and two similar schools of instruction in the Maritime Provinces seem to be advisable in the

interests of the Indian youth of those portions of the Dominion, and, as stated in the preceding part of this report, economical considerations would appear to justify the expenditure which such an undertaking would involve, as the ultimate results in transforming useless into useful members of society and consumers into producers of wealth would certainly be to the advantage of the country at large, as well as benefit the immediate subjects of the education and industrial training given them at the public expense, and their children after them would be likely to imitate their parents, and thus future generations, as well as the present, would benefit.

The following table will show the number of Indian schools of the various types before described in operation in the Dominion, the number of children enrolled as pupils at the schools of each type, and the daily average attendance :—

Number of children of school age.....	13,420
Number enrolled as pupils, at 231 day schools.....	6,202
Daily average attendance at day schools,.....	3,112
Number enrolled at 19 industrial schools.....	1,045
Daily average attendance at industrial schools.....	857
Number of pupils enrolled at 18 boarding schools.....	307
Daily average attendance at boarding schools.....	225

Sanitary Condition.

With the exception of the epidemic of influenza commonly called "La Grippe," from which the Indians in every portion of the Dominion, in common with the rest of the community, suffered severely, the general health of the Indians has been satisfactory.

The sanitary measures adopted by direction of the Department, with a view to the prevention of disease, which require the destruction by fire in each spring of all garbage which may have accumulated during the Winter around the dwellings of the Indians, the thorough whitewashing of the latter, and, when necessary, the use of more potent disinfectants, and the systematic vaccination of all Indians, young and old, who may have not been successfully operated upon within the previous seven years, are, it is believed, in some places producing beneficial results in the improved condition of the general health of the Indian communities, and in the absence of the epidemic of small-pox which used to so often attack them. The Indians appear to appreciate the efforts made by the Department to prevent disease among them, as the officers of the Department report that there is a ready compliance on their part with the regulations.

The most serious barrier, however, to the establishment of a complete hygeian system among the Indians has yet to be removed, and this is comprised in the badly ventilated and overcrowded houses which they occupy. This is a difficulty for which, up to the present time, the Department has found no remedy, but on moral and social as well as sanitary grounds it is most desirable that the one-roomed house, which is, as a rule, the kind of domicile occupied by them, should be replaced by a building sufficiently commodious to admit of separate apartments being provided for the different sexes to sleep in and for the family to cook and eat in.

There are, however, individual instances on a number of the reserves of departure in this respect from the general rule limiting the capacity of the residence to one room, and when enterprise in this direction is displayed the individual is praised and held up

as an example to the other members of his band to be followed by them. The evil arising from their overcrowded houses is much aggravated in the cases of Indians who have substituted stoves for the old-fashioned fireplaces, the chimneys of which of themselves were good conduits for both fresh and foul air.

It is hoped that in the course of time, and with the change in their ideas which will gradually be effected, the Indians will recognize the great importance, from every point of view, of substituting properly-partitioned, well ventilated dwellings for those which the majority of them at present occupy.

Eleemosynary Assistance.

The sick, aged, widows of advanced years, and orphans of tender age are the especial objects of the Department's solicitude, and, so far as the means at its disposal will admit of its being done, care is taken that none of them suffer from want of the necessaries of life. It is possible to prevent such being the case, and it is, it is believed, prevented, when the afflicted ones are members of bands who have money at their credit in the hands of the Government, or when provision has been made by parliamentary appropriations to meet such cases in particular localities, but occasionally distressing instances come to the knowledge of the Department of sick or aged Indians who, as well as their parents before them, have been always nomadic, and belong to no particular band, or who, from long dissociation from their people, are not recognized as belonging to them, and are therefore refused assistance from their funds. In such instances it is most difficult to know what to do. They are not entitled, or their right is disputed by the band, to share in or obtain relief from any funds held in trust by the Department for the benefit of any Indian band, nor are the appropriations for relief purposes made by Parliament apparently available for such cases: the result generally is that the applicant for relief, being a non-descript, has, notwithstanding his condition may be such as to call for assistance, to be denied the aid sought for.

In dispensing gratuitous assistance the Department exercises great caution; otherwise more harm than good would be done by an injudicious extension of succour to able-bodied Indians, or even to the sick and aged members of a household, the head of which is able, and should be required to keep them without charge to the band or the country; and it is only under very exceptional circumstances that those who are able to work receive gratuitous aid from the Department, and generally when it is given it is relieved, as much as possible, of that character by something in the shape of work being required from the recipients in return.

The principle is inculcated in the minds of the Indians that they are expected to work for their subsistence, whether it be by hunting, fishing, farming or pursuing some other industry, and they are given to understand that the Department will not support them in idleness, and that when, owing to unavoidable circumstances, it has to extend relief to them, it expects them to work, while being supported, in their fields, or in such other line of industry as will give the best return for the succour rendered them, and which at the same time will be most beneficial for themselves.

Moral and Social Status.

The influences which are brought to bear upon Indians who are settled upon reserves through the labours of the representatives of the various religious denomina-

tions by the medium of the different classes of schools, the constant presence with them of the agents of the Department and their families, and other resident employés, and the example thus set them of well-ordered households ; the attention that they are made to bestow on their outside premises, the requirement at the schools that the children in attendance shall present themselves daily in a cleanly and neat condition, washing utensils being provided at each school for this purpose, are no doubt contributing gradually towards the elevation, morally and socially, of the Indians ; but that curse of the red man, liquor, is in the case of the occupants of reserves situated at all near white centres, the great obstacle to the progress of some of them ; for although the prohibitory liquor clauses of the Indian Act are sufficiently stringent, the difficulty so often encountered of obtaining a conviction when parties accused of violating them are brought to trial evidently serves as an encouragement to the vendors of spirits to incur the risk of selling intoxicants direct to the Indians or to others for them.

Many of them, however, situated though their reserves are in proximity to places where liquor can be obtained, resist successfully the temptation to indulge in the same, and are respected by the community at large for their sobriety and uprightness of character.

The proneness of the Indian to run into debt, if he can at all obtain credit, attended as it subsequently is with a total inability and, it is feared in some instances, disinclination to discharge his liabilities, has a very demoralizing effect upon him. And unhappily there are traders and merchants who encourage the Indians in this pernicious practice, with the object, it is feared, of thus getting rid of useless articles at excessive prices, regulated by the risk they run of being paid at all, or if paid by the time they will probably be obliged to wait for their money.

It is gratifying, however, to observe that even in the North-West, where the Indians have been for but a comparatively short time under civilizing influences, they are learning to expend their money in the purchase of useful articles, food, cattle and sheep, and that the gew-gaws, of which they are naturally so fond, form but a small portion of their purchases.

The law which prohibits any person from trading or bartering with the Indians on reserves in Manitoba or the North-West Territories without a special license from the Department is strictly carried out, and in the licenses issued there is a clause forbidding the holder to have in his possession for traffic or sale any trinkets or useless articles, and he is required to submit a list of the articles to be sold or bartered, with the prices to be charged therefor, to the chief officer of the Department in Manitoba or the North-West Territories, as the case may be, and the same must be approved of by him before the licensee may trade on the reserve which his license covers.

The Department has been always strongly opposed to the system of credit under which Indians are encouraged by traders and merchants to anticipate the payment of their annuities or of their dividends of interest by obtaining goods on credit. In some instances to such an extent has this been carried on that the moneys of the Indian debtors have been mortgaged to their creditors, in so far as the same can be done, for years to come.

During the past season, in order to further demonstrate the Department's disapproval of this system, and to prevent this system being continued, a circular letter was

addressed to all Indian agents, instructing them to notify all parties who were in the habit of trading with the Indians, or with whom the latter have dealings, that the Department would be responsible for no debts incurred by Indians, whether the same were by virtue of orders from agents, chiefs, Indian councils, or otherwise.

In order to effectually put a stop to the pernicious system, it is thought there should be legislation prohibiting, under severe penalty, the giving of credit to Indians, except under special permission.

The more Indians are brought into contact with white men the more exposed they are to and the less able they seem to be to resist the temptation of running into debt; therefore, the prohibition would appear to be more necessary in the case of Indians of the older Provinces, where their reserves are surrounded by white settlements and many of them in close proximity to cities, towns and villages, than it is in that of Indians residing in the more recently acquired sections of the Dominion, where white settlement is more sparse, and comparatively very few of the reserves are situated near centres of white population.

Progress towards becoming Self-supporting.

As stated in my report on Indian affairs for 1891, the Indians of the several provinces, as well as those of the district of Keewatin, are for the most part already able to support themselves without assistance from the Government, the exceptions being the aged and sick.

In British Columbia agricultural implements in limited quantities are occasionally given to encourage Indians commencing to farm, but as a rule the energy of the Indians of this province and the ample resources they possess for obtaining a livelihood relieve the Government of all expense in providing for able-bodied Indians.

The expense to which the Government is therefore put in connection with the administration of Indian affairs in the parts referred to consists mainly in keeping up what may be termed in one sense a preventive force for the protection of the Indians from imposition and their reserves from encroachment, and in another sense an advisory staff to advise the Indians in regard to matters in general affecting their welfare, and to encourage them to perseverance in obtaining a living.

The agents of the Department fill this two-fold position, as well as serve as mediums of communication between the Indians and the Department.

In the North-West Territories a different state of matters exists, owing to the circumstances in which the Indians were found when the Department undertook their management.

But gratifying indications of a gradual advance toward self-support are every year more manifest. Not a few of the bands are now able to contribute in part towards their own support from the crops raised by them. The fact, however, must not be lost sight of, that as regards many of the Indians of the North-West they have not yet settled upon their reserves, and that when they do make up their minds to take up land and become agriculturists the same process of instruction will have to be repeated as regards them as those who preceded them were subjected to, and, therefore, to enable them to become successful tillers of the soil and herdsmen, the expense of imparting practical instruction to them will have to be incurred.

Moreover, the greater number of those who have been subjects of instruction in these arts have but half learned their lesson, and in order to prevent retrogression on their part it is necessary that close supervision of themselves and their work should be constantly exercised.

As respects those Indians in the North-West who have not yet turned their attention to the cultivation of the soil as the principal means of obtaining a subsistence, their dependence is still, to a considerable extent, on hunting and fishing, besides upon what they obtain from the Department; and the instructions given the Indian agents in regard to these Indians are to supply them with ammunition when necessary where-with to provide their own subsistence by hunting, and to encourage them to pursue this avocation, coupled with fishing, as much as possible, only giving them rations of food when, owing to a failure of the hunt, they cannot procure the wherewithal to support themselves and families. By following this course a saving to the country is effected, and the Indians are saved from the demoralization which would attend their being fed in idleness. It may here be remarked that the large majority of the Indians of Manitoba, Keewatin and that portion of the territory embraced in Treaty No. 3, which lies within the Province of Ontario, earn their subsistence by hunting and fishing.

The latter resource being their principal dependence, it is gratifying to be able to refer to the wise regulations which have recently been made by Your Excellency in Council, on the recommendation of the Department of Fisheries, under which licenses to persons to catch fish in Manitoba, Keewatin and the North-West Territories for trade or sale are restricted to the deep water in the lakes, and by the same regulations fishing within a fixed distance from the mouths of rivers and streams is also prohibited. These regulations reserve the fishing within a certain distance from the shore to Indians and white residents of the country, and they provide for the issue to them of a class of permits termed "domestic licenses," as well as grant the privilege to Indians of catching fish for their own consumption, but not for barter or sale, during the close season.

The wise reservation made of the Lake of the Woods as a fishing ground for Indians exclusively is greatly in the interests of the country, as all of the Indians of that portion of Ontario, as well as those of the Rainy Lake and River district, have from time immemorial obtained the most important part of their sustenance from the waters of the former lake, which were becoming so rapidly depleted of fish previously to the reservation thereof for Indians, by the extensive fishing carried on by parties engaged in the export of fish to the United States, that in a very short time the fish would have been completely exterminated, and, as a consequence, the Indians would have been thrown upon the country for their support.

It is hoped that the measures adopted to prevent the further over-fishing of this body of water, as well as of the larger lakes and their tributary rivers and streams in Manitoba, Keewatin and the North-West Territories, coupled with such measures as may be taken to re-stock with fish the waters referred to, which have been depleted to so serious an extent by the past operations of large fishing establishments, may in time restore them to their pristine capabilities as sources of food supply for the Indians.

The exhaustive reports on Indian affairs made in previous years contain such full particulars in regard to the position geographically of the various Indian reserves in the

different territorial divisions of the Dominion, as well as in respect to the names of the bands in occupation of the same, as to render a repetition of information on these points unnecessary.

I shall consequently confine myself, in dealing with the Indian affairs of each province or other division of territory, to matters in general relative to the Indian population thereof.

PROVINCE OF ONTARIO.

Indian matters in this province continued in the same satisfactory condition during the past year that characterized them in previous years.

The increasing interest taken by the Indians on many of the reserves in agriculture and in raising cattle, as evidenced by their keen competition for prizes at the agricultural exhibitions on their reserves, and occasionally also at fairs where they have to compete with agriculturists of white origin, is indicative of their progress towards assimilation of ideas with those of the more advanced members of society.

The Indians residing on reserves situated in the central part of the province are, as a result no doubt of their being brought into frequent contact with other classes of the community, and observing the methods of farming followed by agriculturists of other origin who live in the vicinity, more advanced in their ideas, and engage more extensively in cultivating land and raising stock than those whose reserves are located in the more remote parts of the province. Added to this is the fact that the Indians of the central portion of Ontario are not now able to obtain a subsistence from hunting, as the tracts which formerly comprised their hunting grounds have been taken up and settled upon by the agricultural and other classes of the community, and the former Indian owners find themselves therefore forced to resort to agriculture in order to obtain a subsistence.

In the more remote parts the Indians are still largely dependent upon the chase; but the nearer their reserves are to white settlements the less do the Indians devote themselves to hunting as a means of securing a livelihood.

For example, not to mention Indians more centrally situated, the Indians of the Great Manitoulin Island, whereon there are extensive white settlements, and the Indians of the Parry Sound and Muskoka districts, where several saw-mills are operated, lumbering establishments carried on, and large quantities of timber handled and shipped, are not so wholly dependent on what they can procure with the trap and gun as are those living in the interior at distant points from Lake Huron and from agricultural settlements.

And for similar reasons the Indians of Fort William, on Lake Superior, depend less upon the hunt for fur-bearing animals and game than do those at more remote points from civilization, situated upon or inland from the coast, or in the Rainy River and Lake country, or in the region of the Lake of the Woods.

The quantity of game and fur-bearing animals obtainable in these remote regions, while it is not by any means as large as was formerly the case, is sufficiently so, supplemented by their catch of fish, to at least render the Indians self-supporting.

The Honourable the Hudson Bay Company and other fur traders afford them a mart for the furs secured by them, and they use as food the flesh of the fur-bearing animals they capture, as well as the game and fish they kill.

Efforts are to a certain extent being made by some of these bands to cultivate land and raise crops, and the Department encourages them in doing so; for apart from the important consideration that when white people become more numerous, and the present hunting grounds of the Indians, which have all been ceded by them, excepting their reserves—are monopolized by settlers, the game and other animals on which they now subsist will disappear, as they have done elsewhere from similar causes, and the Indians must therefore look to the products of the soil for their subsistence, the farinacious food secured by them by the cultivation of portions of their reserves supplies them with a wholesome change of diet, or, rather, is an important addition to the diet of flesh with which the hunt and angling alone supply them.

Educational matters among the Indians of the province have been fairly successful. The Indians on a number of their reserves have through their councils passed rules and regulations for ensuring more regular attendance on the part of the pupils, and in respect to school matters in general on the reserves concerned. These rules have, with slight emendations, been confirmed by Your Excellency in Council, and they have, therefore, under the provisions of the Indian Act, the authority of law.

Several additional day schools were brought into operation during the year on different reserves.

The crops in all the reserves in this province whereon the cultivation of land is to any considerable extent attempted were bountiful during the past season.

A considerably larger area was also brought under tillage than was the case in the preceding year. As a consequence, the means of the Indians situated on reserves where this is the case have been proportionately augmented, and their prospects for passing the winter in plenty and comfort are assured.

QUEBEC.

The Indians of this province, although not as progressive as their brethren of the sister Province of Ontario, nevertheless contrived to support themselves for the most part without assistance from the Department during the past year.

They farm much less extensively than the Indians of Ontario, seeming to prefer engaging themselves as shantymen and raftsmen when they do not follow hunting and the manufacture of Indian wares, which very many of them still do, for a livelihood.

In the lower portion of the St. Lawrence some of them derive quite a considerable revenue by acting as guides and boatmen for tourists and anglers.

They, as well as some of those in the western section of the province, do also quite a lucrative business by the sale, at seaside resorts in Canada and the United States, of their manufactures.

The Indians of the Saguenay district, and those of the more easterly regions on the lower St. Lawrence, engage largely in the fur hunt. The former met with fair success last season, but the latter were not so successful, and both suffered greatly from the epidemic of influenza called "La Grippe."

The Indians of the Upper Ottawa derive the greater portion of their subsistence from hunting. The prices obtained by them for their last season's hunt were remunerative.

Their valuable reserve in the township of Maniwaki is sufficiently extensive to accommodate all of them when hunting gives out, and when they, like their brethren elsewhere, will be forced to look to agriculture as a means of procuring a living. Not a few already reside upon the tract during the open season, and evince considerable enterprise in farming, raising cattle (supplying themselves for the more successful prosecution of the former avocation with improved machinery), and in making public improvements on the reserve by the construction of roads and bridges.

The day schools on the various reserves of the province were kept in operation during the year; but, as intimated in a previous part of this report, until industrial schools are established but little substantial progress in the educational line appears possible, as day schools have proved a poor means by which to impart instruction to Indian children, when unaided by the superior advantages obtainable at schools of the industrial type.

NOVA SCOTIA.

The Micmacs of this province pursued during the past year their normal course of honesty and industry.

The occupations in which they principally engage, namely, fishing, hunting, cooperating, cutting timber, porpoise shooting, manufacturing baskets and other Indian wares, working at mills and on railways, coupled in most cases with gardening, and on some of the reserves in Cape Breton with farming to a small extent, enabled the able-bodied among the Indians to support themselves and families; while the Department extended the usual amount of assistance to the sick and aged.

All of their agents agree that the Indians of Nova Scotia are a very honest, law-abiding class. One of the agents, the Rev. D. McIsaac, of Glendale, in the county of Inverness, speaking on this topic, makes the following remarks:—"There is one trait in the character of the Micmacs which cannot be too highly praised. Living as they do, they frequently suffer many privations. This evening they may not have to-morrow's breakfast in reserve for themselves and families, and yet a case of theft from their white neighbours is, I believe, utterly unknown. The gradual elevation of a race with a fair characteristic like this so firmly impressed on them ought not to be despaired of."

The same gentleman again states:—"I am happy to be able to report an unmistakable improvement in the condition of all the Indians in my agency. Each succeeding year shows more clearly than the preceding one that it is only a question of time to find them good and useful citizens, provided only that they are well treated and have fair opportunities of advancement."

The prevailing epidemic of influenza appears to have afflicted very many of the Indians of this province during the past year. Pulmonary complaints also claimed their victims among them.

The schools mentioned in previous annual reports as being in operation on the more important reserves continued to be conducted with a fair amount of success.

NEW BRUNSWICK.

The Amalecites of the western counties of this province, and the Micmacs of the eastern counties, prosecuted with considerable vigour and with a fair amount of success their different avocations of mixed farming, fishing, manufacturing Indian wares, hunt-

ing, manufacturing timber, rafting, acting as guides for sportsmen, and as day labourers, &c. Altogether the Indians of this province may be described as maintaining themselves in independence, and, for the most part, in comfort. They appear to be, as a general thing, a thrifty and industrious class of people, the contrary being the exception and not the rule with them.

The aged and sick received the usual amount of assistance and attention from the Department through its agents during the past year.

The health of the Indians of this province in general was fairly good. "La Grippe," however, was prevalent among some of them, but it was not attended with fatal results.

The schools referred to in the reports for previous years continued their operations during the past season with a greater or less degree of success in each case, those on the St. Mary's reserve, near Fredericton, and on the reserve on the Tobique river, being the most favourably reported of.

The Amalecites are described by their visiting superintendent as a temperate, law-abiding people, and as commanding, by their general conduct, the esteem of those who employ them.

I regret to say that, in so far as relates to temperance, so good an account is not given of the Micmacs by their visiting superintendent. That officer reports that "notwithstanding the stringency of the regulations regarding the sale of liquor to the Indians they do procure it, and are made miserable by its use."

In the successful prevention of the use of intoxicants by and the traffic in the same with the Indians a great deal depends on the activity of their agent, and the interest taken by him in protecting the Indians under his charge from becoming victims of the habit of indulging in the use of spirituous liquor.

It is invariably found that when an agent energetically exerts himself in the endeavour to suppress the traffic in intoxicants with the Indians, and to bring to justice parties engaging in the same, his efforts are crowned with success, and the Indians become sober, and, as a consequence, greatly benefited morally and socially by the suppression of the traffic.

PRINCE EDWARD ISLAND.

There is but little to remark respecting the condition of the Indians of this province; it remains practically the same as in previous years. An improvement in the moral sentiment, especially in the younger portion of the community on Lennox Island reserve, is reported by the Indian superintendent for the province.

A temperance society has been formed by them which promises to be productive of benefit to their people.

The Indians of this reserve added considerably to the area of land brought under cultivation during the past year.

The farming operations of the Indians upon the smaller reserve at Morell appear to be more restricted than those of the Indians on Lennox Island. The school on the latter reserve has received fresh impetus by the appointment of an excellent teacher, and the attendance thereat is reported to be larger.

Sickness, attended in some cases with fatal results, was very prevalent among the Indians of this province last season. Disease of the lungs and pneumonia were the most serious complaints.

These Indians were for the most part able to support themselves and families without more assistance from the Department than the usual supply of seed to plough in the spring; any other relief given was, as a general thing, confined to the sick and aged.

MANITOBA AND KEEWATIN.

The wise restrictions elsewhere alluded to in this report, imposed by recent regulations of the Department of Fisheries on the catching for sale or barter of fish, especially whitefish, in the lakes and other waters of this province and district, are the cause of great satisfaction to the Indians, their minds being relieved thereby from the apprehensions which before filled them, that were fishing on the extensive scale on which it was carried on previously to the passage of these regulations to be continued, the lakes and streams would be very soon entirely depleted, and thus the most important item of their food supply would be forever lost to them. It is, however, hoped that, as previously stated, the harm that has been done in the past by over-fishing will be soon remedied by the restrictions referred to, and by re-stocking with fish fry the partially depleted waters in the above province and district, as well as those in the North-West Territories.

While the proximity of some of the reserves in Manitoba to towns and villages is prejudicial to the interests of the Indian occupants, in so far as the facility for procuring intoxicants is concerned, it is, on the other hand, favourable to many of them, by enabling them to obtain remunerative employment at those places; but on the whole the Indians on reserves more distant from white centres, who have to devote their energies more exclusively to cultivating the soil, fishing and hunting, are more comfortable in their circumstances, and are not exposed to such temptations as are the others above referred to. The energetic measures, however, taken by the Indian agents to bring to justice all parties guilty of infractions of the liquor clauses of the Indian Act appear to be bearing fruit at last; few, if any, reports having of late reached the Department of the sale of liquor to Indians in Manitoba.

The circular letter which, as mentioned in my report for 1889, was addressed by the Department to all police and other magistrates in the Dominion, requesting them to cause the law prohibiting the sale or gift of intoxicants to Indians to be stringently enforced, has no doubt likewise had a beneficial effect in restraining this traffic in Manitoba and in the other provinces.

A pleasing report of progress on the part of the Indians of the St. Peter's reserve has been received. They are said to be, as a people, in a more prosperous condition than are even the residents of other origin in many of the older settlements on the Red River and the River Assiniboine.

The schools, which are six in number, on the reserve, were kept up during the past season with varying success. The great drawback to the success of these institutions, and to their being of greater benefit to the children of the reserve, consists in the irregularity and small attendance of children thereat.

The council of chiefs of the band has, however, in accordance with the provisions of the Indian Act, recently passed stringent rules and regulations to compel the general and regular attendance of all children of an age to attend; and it is hoped that good results will follow.

The school attendance on all the reserves in Manitoba, upon which day schools have been established, is similarly defective; and it is hoped that the injunctions of the Department, that rules and regulations to remedy matters in this respect should likewise be passed by the councils of the bands owning the reserves, will be obeyed.

The resources possessed by the Indians of the eastern reserves of Manitoba for making a living, namely, fishing, farming and hunting, are sufficient to enable them to keep themselves and families in comfort. Some assistance has, however, to be extended to the sick and aged from time to time.

The Indians of the Lake Manitoba reserves, residing as they do in a good hunting and fishing country, were likewise able last season, as they had done in previous years, to obtain their own subsistence from these resources without any difficulty.

They own a considerable number of cattle, and as the land on their reserves is for the most part unsuitable for farming, should their other means of procuring a livelihood give out, which is, however, not likely to be the case for some years, these Indians would probably have to turn their attention to stock raising, their reserves being better adapted for that enterprise than they are for agriculture.

The Indians of the central portion of the province continue to be, as they always were, strongly addicted to wandering about from place to place, and averse to settling on their reserves. The condition of matters in this respect is certainly very unsatisfactory. Their lands have to be planted, as well as their crops reaped for them. The only improvement that has taken place is an apparent, and which it is hoped will prove to be a permanent, reformation of moral character on their part, which consists in their not being so much given to over-indulgence in intoxicants as was formerly the case. The agent of these Indians reports that during the payment of their annuities last year no intoxicants were brought on any of their reserves, and that there was no indication of any Indian being under the influence of the same.

With the exception of the cost of putting in and reaping their crops for them, no assistance, except to the sick and aged, is given to these Indians. Some of them obtain their living by the sale of seneca-root, which grows abundantly in that part of the province, is valuable for medicinal purposes, and commands a ready purchase at good prices. Others are employed as labourers by white farmers of the locality, and they obtain good wages for their services.

The Indians of the western part of the province are for the most part tillers of the soil and raisers of cattle. Of the four bands of Sioux in that section three of them engage extensively in agriculture, occupy their farms in severalty, and possess quite large herds of cattle. Their progress during the past season was most satisfactory.

The fourth band is, I regret to have to state, making no progress. Their reserve being situated close to the boundary line between Canada and the United States, is a rendezvous for Indians from the latter country; and for a similar reason visits by these Sioux to the United States are so frequent as to interfere with their success as agriculturists.

The other band of Indians in this agency are of the Cree tribe. They are treaty Indians, and dependent to a considerable extent on the chase and fishing for their sustenance. They, however, farm to some extent, and own quite a number of cattle.

The Indians of the district of Keewatin continue to depend principally on hunting and fishing. The land on their reserves being of a rocky nature and covered thickly with trees, tillage of the same is extremely difficult. They, however, make brave attempts to overcome their difficulties, and, in addition to what they procure by fishing and hunting, they manage to grow some root crops.

These Indians, as well as those of Manitoba, viewed with serious apprehension and dismay the rapid destruction which went on for several years of the formerly ample fisheries of Lake Winnipeg and other waters from which they had from time immemorial derived the principal portion of their sustenance; and their delight and satisfaction were proportionately intense when they were informed of the wise and humane preventive measures recently established, ensuring, as it is hoped they will, aided by the steps that will doubtless be taken to replenish the partially depleted waters with fish, a subsistence for themselves and their children after them.

These Indians are a peaceable, quiet class, and very industrious. Excepting the relief extended to the sick and aged, and seed supplied them every spring, they receive no assistance from the Government. They are practically, therefore, self-supporting.

They own a considerable number of cattle, and the number is annually increasing.

NORTH-WEST TERRITORIES.

The report of the Indian Commissioner for the North-West Territories and the reports of the inspectors of agencies and of the Indian agents and industrial school inspectors, as well as the tabular statements showing the quantities of grain and roots planted and harvested, respectively, on the various reserves, and the quantities sown and harvested by individual Indians, all of which are published herewith as appendices to Part I of this report, contain such full information in respect to Indian matters in each locality that a description of their condition would necessarily be a repetition of the statements contained in those reports, and therefore superfluous.

It is gratifying to observe, from the various reports and statements referred to, that the past year has been one of peace and quietness on the one hand, and of increasing prosperity, as the result of thrift and industry, on the other hand.

Numerous instances of individual effort on the part of Indians having been rewarded with success are recorded.

The increasing spirit of enterprise, as evidenced by the eagerness of many of the Indians to compete at agricultural exhibitions, is most encouraging; and it is all the more pleasing when, as has been the case in a number of instances, the exhibits offered for competition by them have obtained prizes as against those of white competitors.

The natural instinct of the Indian for gambling, or earning gain by chance, is by these exhibitions directed into a healthier channel, as he can, at them, have an opportunity of competing for and, if successful, obtaining prizes far exceeding in value that of the article or articles exhibited.

The emulation between Indians of different reserves aroused by the consideration that by raising superior grain and roots they may snatch prizes at the fairs from one another, as well as from other exhibitors, has a most beneficial effect.

They thus learn much more rapidly than they otherwise would to distinguish between superior and inferior products, and they are stimulated to do their utmost to secure prizes by giving careful attention to their crops.

Some of the Indian women have also become so skilful in dressmaking, knitting, the manufacture of butter, baking of bread, and in making hats, baskets and mats, that they likewise compete for prizes at the exhibitions.

The wives of the farm instructors on the various reserves act as instructors of the Indian women in these industries, as well as in household duties generally, and some of the former have been very assiduous in the performance of this duty, and that they have been successful with their pupils in many instances is evident from the style of articles and manufactures exhibited by the latter at the fairs, which have won prizes and elicited words of commendation from all parties.

It is also most satisfactory to know that by the instruction of the Indian women in these avocations they are being led to employ themselves in what is not only more profitable to themselves and families, but in what is more becoming to their sex than continuing to be "hewers of wood and drawers of water," as they all previously were, and too many of them still are.

The work of endeavouring to elevate morally and socially men, women and children, and to stimulate them to aspire to better things, thus goes on.

What is being done for the education and industrial training of the children of Indians of the North-West Territories has already been described, under the heading "Education," in a previous portion of this report.

The condition generally of the health of the Indians of the North-West Territories during the year was more satisfactory than in the year 1890. This better condition of sanitary matters may possibly be due to some extent to the erection on some of the reserves of a better class of buildings for residences, which by being partitioned off into two or more apartments afford more accommodation, as well as secure better ventilation; and the necessity for all the occupants of the house to sleep, eat in, and otherwise use the one room is done away with.

The rules of the Department in regard to sanitary precautions are likewise universally observed.

The more general use of vegetable and farinaceous food, as supplementary of a meat diet, is also no doubt conducive to a better condition of health.

The subdivision by survey of the land, or a portion of it, upon the reserves into individual holdings, so as to admit of the occupation of the latter in severalty by Indians, is proceeding each season. Last year four reserves, two at Peace Hills, in the district of Alberta, a third at Indian Head, and a fourth reserve in the Moose Mountains, were similarly subdivided.

As stated in previous annual reports, the occupation of land in severalty is an important factor in the civilization and training of Indians to habits of independence and self-support; it also promotes among them a healthy spirit of emulation; and the fact that the work they bestow upon and the products grown in their fields are for their own exclusive benefit gives them a deeper interest in their holdings than they would take in land in working which they would be merely contributing by their labour to the common good of the band, as is the case when Indians on a reserve cultivate the land in common.

The following are the aggregate quantities in bushels of the grain and root crops harvested during the season of 1890 on the various reserves in the North-West Territories. The grain crop for 1891 had not been threshed when the annual reports and returns were received:—

	Bushels.
Wheat.....	67,726
Oats.....	21,592
Barley.....	19,761
Potatoes.....	44,284
Turnips.....	14,788
Carrots.....	1,340
Rye.....	413
Garden produce.....	2,337

A large proportion of this produce is the result of the individual labour of Indians upon their respective holdings.

A return showing, in the case of each agency, the crops sown and harvested by individual Indians, will be found appended to this report.

The population of the Indians resident upon reserves in the territories surrendered under Treaties 4, 6, 7, all of whom are under the management of the North-West Superintendency, as distinguished from those under the management of the Manitoba Superintendency, is in round numbers about fifteen thousand.

BRITISH COLUMBIA.

The Indians of this province have always been distinguished for their industry and energy; and the record of their conduct during the past year, as described in the reports of the visiting Indian superintendent for the province and the Indian agents for the various sections into which for Indian purposes it has been subdivided, shows that they fully maintained their reputation in those respects.

The Indians whose reserves are situated in the Cowichan, Kamloops, Okanagan, Fraser river, William's lake or Lillooet and Kootenay districts during the past season combined the occupations of farming, and cattle, sheep and swine raising, fruit culture, hop-picking and mining with fishing and hunting; while the Indians of the west coast of Vancouver Island, as well as those known as the Kwawkewlths, and those of the north-west coast of the mainland, including Queen Charlotte islands, and the Indians of the Babine district, depended more exclusively on fishing, hunting, killing seals and trapping. They all engaged more or less in the fish-canning industry; and salmon having been very abundant, they were able to secure a plentiful supply for their winter's requirements, besides obtaining remunerative wages at the canneries while the latter were in operation.

From one end of the province to the other prosperity and contentment reigned among the Indians during the past year. Even on the north-west coast, where but a few years since considerable difficulty was experienced in managing the Indians, owing to exaggerated ideas instilled into their minds as to their land rights by evil counsellors and mischief-makers, actuated no doubt by sinister motives, the Indians having become pacified and assured that the Department was doing all it could for them, tranquillity undisturbed prevailed during the year.

The health of many of the tribes was seriously affected by the epidemic of influenza which has been and is still so prevalent everywhere in the Dominion. Many of them died from it, or from the consequence which followed an attack of the disease.

The four schools of the industrial type established at Metlakahla, Kamloops, Kuper Island and Kootenay, continue to give unqualified satisfaction, and so pleased are the Indians with the prospect thus presented to them of having their children educated and trained in a knowledge of trades and agriculture that the Principals of these institutions report that had the buildings double the lodging capacity they now possess there would be no difficulty in filling them. It is hoped that the industrial institution which, in my report for 1890, it was stated it was proposed to establish on Cormorant island, in Alert Bay, for the purpose of instructing the Indian youth of the Kwawkwalth tribe in industries, will be brought into operation during the present year.

The condition of Indian matters in the various provinces and territories having been reviewed, I shall close this report with the usual statement in respect to the work done at headquarters by the various branches of the Department during the past year.

ACCOUNTANT'S BRANCH.

The amount at the credit of the numerous trust fund accounts on the 30th June, 1891, aggregated in principal and interest \$3,515,233.67; being an increase of \$36,032.68 over the sum at the credit of the same accounts on the 30th June, 1890.

The expenditure from these funds during the last fiscal year amounted to \$285,490.39, being \$8,160.42 less than was expended during the preceding year.

The expenditure from the Parliamentary appropriations for Indian purposes in Manitoba, Keewatin, the North-West Territories, British Columbia and the Maritime Provinces, consisted of the following amounts:—

Manitoba, Keewatin and the North-West Territories...	\$833,187 77
British Columbia	85,054 93
Nova Scotia	5,820 23
New Brunswick	6,152 13
Prince Edward Island	1,997 68
	\$932,212 74

The number of accounts kept by this branch increased from 278 in 1890 to 476 in 1891.

This large increase was mainly due to a necessity which arose for opening a number of accounts with individual lessees to whom lands upon the Indian reserve in the township of Tyendenaga, in Ontario, had been leased for the benefit of the individual Indian locatees of the same.

The pay-cheques prepared and issued during the year numbered 12,494, being 385 more than were issued in 1890.

The number of certificates for credit issued by the branch was 80, and the number of statements prepared for the Auditor General was 60.

Statement C and the subsidiary statements, 1 to 128, contain full particulars in respect to the revenue placed to the credit of and the expenditure charged against the trust fund accounts; while similar information as respects the Parliamentary appro-

priations can be obtained on referring to Statement B, 1, 2, 3, 4, 5, and the fifteen subsidiary statements thereto from A to O. The documents referred to are published as appendices to this report.

LAND AND TIMBER BRANCH.

The quantity of surrendered land sold during the past year for the benefit of the Indians concerned was eighteen thousand nine hundred and fifty acres, and the amount for which they were sold was \$26,477.43.

There still remain unsold 457,866 acres of surrendered lands.

From old and new sales of land and timber there was realized \$79,979.65, and from leased lands \$18,195.68.

There remained unpaid on the 30th June last on account of lands sold arrears of purchase money and of interest thereon to the amount of \$223,343.03.

The quantity of land sold, as well as the area remaining unsold in each Township are described in Statement 1 attached to this report.

The following statement describes the principal work done in this branch during the year :—

Agents' returns examined and entered.....	614
New sales entered.....	197
Sales cancelled.....	81
Cancellations revoked.....	2
Leases prepared and entered.....	23
Payments entered.....	1,011
Notices to purchasers in arrears.....	3,029
Assignments examined and entered.....	286
Assignments registered.....	299
Descriptions prepared for patents.....	303
Patents engrossed.....	318
Patents registered.....	318
Patents despatched.....	332
Patents cancelled.....	6
Location tickets prepared and entered.....	27
Files dealt with.....	3,600

STATISTICAL, SUPPLY AND SCHOOL BRANCH.

Files dealt with, many of them entailing reports and other work.....	2,300
Quarterly school returns examined.....	960
Requisitions for teachers' salaries, being 306 over those received in 1890, checked and scheduled for payment..	926
Blankets forwarded to Indian agents for Ontario and Quebec.	898
Requisitions on Queen's Printer and Stationery Department for printing, stationery and school material.....	563
Acknowledgements of above supplies.....	563

Much work was involved in checking the numerous requisitions, which were heavier than those of the previous year, received from the agents of the Department for school material and books, and in the preparation of orders for the same, as well as in preparing requisitions for stationery and printing for the agencies and for the Department.

All statistical and school returns and all statements respecting supplies issued, cattle and implements owned, elections of chiefs and councillors, &c., &c., are examined and reported upon by this branch.

The special appendix attached to this report, and the tabular statements respecting schools and population, which likewise form appendices hereto, were prepared by this branch.

TECHNICAL BRANCH.

The following is a statement of the work done by this branch during the year :—

Engineering.

Plans and tracings prepared	14
Reports made	94
Examinations made	172
Specifications drawn	3
Estimates, &c.	7

Architecture.

Estimates and specifications	43
Drawings	26
Reports made	55
Examinations	146

Surveying.

Maps and plans drawn	91
Tracings and sketchings drawn	125
Reports made	141
Examinations made	496
Plottings made	51
Instructions prepared	7
Copies made of field notes	5

Accounts.

Examinations	88
Reports on same	17

Miscellaneous.

Examination of papers	63
Reports made	26
Contracts prepared	12
Calculations, &c., &c.	160

CORRESPONDENCE BRANCH.

The number of letters drafted, transcribed and entered during the past year was 18,546, being in excess of the correspondence despatched in 1890 by 809 letters. These letters covered 22,920 folios of letter books of foolscap size; a number of them were written and entered by the stenographic staff attached to the office of the deputy head of the Department, for whom they likewise transcribed reports, &c., upon matters of importance which required the decision of Your Excellency in Council or of myself as Minister at the head of the Department.

REGISTRY BRANCH.

The number of letters received and registered during the past year was 20,913, which shows an increase of 545 letters over the number received and registered in 1890.

I have caused to be prepared, and I have the honour to submit with this report, a lithographed map, on which is shown the position of the numerous Indian reserves in the Dominion, which have been allotted and surveyed up to the present date. There are, however, quite a number of reserves in British Columbia, and a few in that portion of the territory covered by Treaty No. 3, commonly known as the North-West Angle Treaty, which falls within Ontario, which have yet to be allotted to the Indians entitled to the same. This map does not purport to show the extent of the reserves, as the scale of the same would not admit of this being done; it merely therefore shows approximately the position of the reserves.

I have the honour likewise to attach hereto, as a special appendix, the usual tabular statement showing the number of Indians resident on the various reserves within each superintendency and agency, their real and personal property, the crops raised during the season of 1890, and the value of the other industries followed by them.

I have also the honour to place herewith reports from the officers of the outside service of the Department, and from the Principals of the various Indian industrial institutions; likewise the usual tabular statement respecting the schools of all classes in operation, the census of the Indians, the agricultural operations on the numerous Indian reserves in the North-West Territories, the crops sown and harvested by individual Indians, the earnings of individual Indians, and the number of Indians belonging to the North-West Territories and their whereabouts.

The financial statements of revenue and expenditure previously referred to will also be found herewith.

All respectfully submitted.

E. DEWDNEY,
Superintendent General of Indian Affairs.

Kettle Point and Rivière aux Sables; the 2nd division of that superintendency embraces the Chippawas the Moravians or Delawares of the Thames, and Nipissingas of Manitoulin and Cockburn Islands, and the Ojibwas of the north shore of Lake Henvey Inlet, Lake Nipissing, French River, Lake Témiscamingue and the Iroquois of Gibson; the 3rd and Michipicoten; and the 4th division of the said superintendency takes in all the Ojibwas of Lake north-east of that Province. The 1st division of the South-Western Superintendency of that Province and Madawaska, which form the 2nd division of that superintendency.

PART I

OF THE

REPORT OF DEPARTMENT OF INDIAN AFFAIRS.

INDIAN OFFICE,

BRANTFORD, 14th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I beg to transmit my annual report in duplicate, on the Six Nations, of the Grand River, with tabular statement for the year ended 30th June, 1891.

I have experienced considerable difficulty in obtaining the required information, as I have been here such a short time, but I endeavoured, from a personal house to house visitation on the reserve, to obtain such accurate statements as was possible. As a number of the Indians were absent from the reserve, I had in many cases to obtain my information from neighbours. The Indians are very reticent in regard to their affairs, consequently I do not feel certain in every instance of the correctness of the figures given in the tabular statement; I hope, however, before another report is required, I shall be able to give an accurate statement regarding the reserve.

The crops for the past year were generally good. There are but few good farmers, and these always manage to have good returns from their farms; if they fail in one direction, they succeed in another. Generally, the Indians do not look ahead. They can live on very little during warm weather, and make no preparations for approaching winter.

Stock is being raised in greater numbers every year, but great difficulty has been experienced in sheep raising, on account of the number of dogs on the reserve. These are, however diminishing in number, and more sheep are being raised, and it is hoped that in a few years the Six Nations will be successful in stock raising generally.

Some of the Indians are raising a larger and heavier class of horses than formerly, and these will at any time be marketable.

Eight threshing machines are owned on the reserve. Some are the latest steam traction engine threshers, and managed exclusively by Indians.

There are industries on the reserve which give constant employment to a number of people. There are also some general stores, all managed by Indians.

The health of the Indians during the summer and autumn months is generally good; but during the winter and spring there is a great deal of sickness, principally influenza and malarial diseases. These were of a mild type last winter. They are due, principally, to the small, over-heated and badly ventilated dwellings, the want of wells, and imperfect drainage; while their diet, consisting so largely of pork, hot biscuits and corn bread, is not conducive to health. The Indians, however, are gradually providing better ventilation in their dwellings, digging wells and growing and keeping for winter use greater quantities of potatoes and other vegetables and consuming more wheat bread and oatmeal.

Educational matters have been fairly satisfactory during the past year, although the attendance was not so large as in the previous year, owing to sickness among the children. There are ten schools under the control of the Six Nation School Board, and one school under the control of the chiefs, and a new school house is now in course of erection.

There are four Episcopal churches on the reserve, and services are held in two school houses. There are also two Methodist and three Baptist churches, all well attended.

There are about 790 members of the Six Nations, belonging to the Cayuga, Seneca and Onondaga bands, who do not identify themselves with any Christian Church.

I have the honour to be, Sir,

Your obedient servant,

E. D. CAMERON,

Visiting Superintendent.

WALPOLE ISLAND AGENCY,

WALLACEBURGH, ONT., 31st August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit herewith my annual report and tabular statement on the Chippewas and Pottawattamies of Walpole Island, for the year ended 30th June, 1891.

In my report for 1890 I had to say that I did not think the Indians were quite as well prepared in the way of provisions, &c., for the winter as they were the previous year, but I am able to report that notwithstanding this they have got through the winter without suffering in any way. The planting and cultivating were attended to better this year than ever before, and the harvest just gathered was the best that Walpole Island ever saw.

There has been a general turning to the land as a means of support, and many, very many, who never sowed a bushel of grain before last fall, have got wheat enough for their bread and some to sell. The corn crop this year is not quite up to the usual mark, owing to the cold weather about planting time, but it will nevertheless be a very good one.

The potatoes and vegetables are a fine crop, and there is scarcely a family on the three Islands who has not a pretty fair outlook in the way of provisions for the winter.

I am glad to be able to report a substantial increase in the population since taking the census for 1890. I visited every house within the last month, and have taken the census with as much care as possible.

The health of the people has been better during the past year than it has ever been during my term of office. Partly owing to the change in the mode of living from camping out to living in houses, and partly to the attention paid to the suggestions of Dr. Mitchell as to the proper cooking of food and other matters respecting which they had no previous instructions, there are fewer deaths among the young children, and longevity is becoming a characteristic among the older portion of the people.

The schools have been regularly kept during the year, with a fair attendance of scholars. The teachers are all well trained, two of them having been educated at the Mount Elgin Institute and the other at the Shingwauk Home.

Divine service is held in both churches every Sunday, and the morals of the people are improving, especially in the matter of drinking. In this particular there is a great change for the better, there being not more than three habitual drunkards on the reserve at this time, and they are becoming ashamed to be seen drunk.

There have been some improvements in the way of drainage, roads and bridges; there has also been a new ferry established at the High Banks, which is quite a convenience to those who live at that end of the Island.

I hope that another school will soon be established at the head of the island, as the distance from that point to the school is too great for the children to travel, while there are children enough of school age there to warrant the establishment of another school.

I have the honour to be, Sir,

Your obedient servant,

ALEX. MCKELVEY,
Indian Agent.

WESTERN SUPERINTENDENCY,—1ST DIVISION,
SARNIA, 15th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit my annual report and tabular statement for the year ended 30th June, 1891. The three reserves in my agency are the Sarnia Reserve, in the township of Sarnia, on the banks of St. Clair River, and the Kettle Point and Aux Sable Reserves, on the shore of Lake Huron, in the township of Bosanquet, all in the county of Lambton. The crops last year were very light, but I am pleased to say that they are excellent this year; the only difficulty has been to get them saved during the wet weather. Improvements in building have not been numerous, but there have been considerable improvements made on the farms. The Indians on the Sarnia Reserve have started an agricultural society for the first time and are preparing for what they hope will be a successful show. The school on the reserve has been taught since January by Miss Walsh, and the improvement she has effected in the attendance is marvellous; the school house is well filled every day. The Rev. Mr. Edwards, the Methodist Missionary, and his wife are doing a good work, as they both take an active part in school matters and also look closely after the spiritual interests of the Indians. The school on the Aux Sable Reserve is taught by Miss Vance who is very energetic and has a fair attendance every day. The spiritual wants of the Indians of that reserve are looked after by Rev. Mr. Pesant, Methodist Missionary. He holds service once each Sunday. The Kettle Point School is taught by Henry Fisher, an Indian, but the attendance is not as satisfactory as it should be. The Methodist and English churches both hold services on this reserve. I am able to report a small increase this year in population. There have been twenty-one births and thirteen deaths, making eight of an increase, and producing the total of 508 Chippewas on these reserves. The Pottawatomies on the Aux Sable Reserve, number thirty-four, an increase of eight since last year.

I have the honour to be, Sir,

Your obedient servant,

A. ENGLISH,
Indian Agent.

WESTERN SUPERINTENDENCY—2ND DIVISION,
STRATHROY, 26th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit herewith my annual report and tabular statement, with statistics of the Indians within this agency, comprising the Oneidas, Chippewas and Munceys of the Thames, for the year ended 30th June, 1891.

ONEIDAS OF THE THAMES.

The members of this band felt themselves very much honoured by a visit of the Deputy of the Superintendent General of Indian Affairs to their agricultural exhibition last season.

The progress of this band has been steady. They are a quiet, industrious people.

[PART I]

3

CHIPPEWAS OF THE THAMES.

This band is also prospering. Their farming operations have been fairly satisfactory for the past year; many of them have done well, while a very few, as usual, appear to be rather indifferent about farming, and wander about making baskets and axe-handles and such like for a living, only remaining upon the reserve for a short time occasionally.

MUNCEYS OF THE THAMES.

The Indians of this band have, during the past year, pursued their usual avocations with little or no variation.

There are living upon the Caradoc Reserve four families of the Pottawattamies, who are located for land, but have no claim to any money for distribution to the other Indians living upon the reserve, as they do not belong to either of the bands living thereupon. They number ten souls and are very quiet and inoffensive people.

All the schools within my agency have been kept open during the year, and have been duly visited by the Public School Inspectors for Middlesex. Four of the teachers employed are whites and three are Indians.

The Mount Elgin Institute and Industrial Farm, under the able care of the Rev. W. W. Shepherd, is doing a good work among the Indians.

Divine service in the several churches within the agency has been regularly held during the year.

The sanitary condition of the Indians has been good, there being no contagious diseases prevalent among them.

In general the affairs of the bands are prosperous, and the Indians, with a few exceptions, are doing ordinarily well.

The usual supply of blankets to the aged and infirm among the Chippewas and Muncey bands, have been distributed, as directed by the Department.

The total population of Indians within my agency is one thousand two hundred and ninety-nine. There are a few illegitimates living upon the reserves who are not included in any of the bands, neither are they in the number given as the total population.

All of which is respectfully submitted.

I have the honour to be, Sir,
Your obedient servant,

THOMAS GORDON,
Indian Agent.

WESTERN SUPERINTENDENCY—3RD DIVISION,
HIGHGATE, ONT., 18th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit herewith my annual report and tabular statement respecting the Moravians of the Thames for the year ended the 30th June, 1891.

The population of the band now numbers three hundred and three, being an increase of eleven since last census; at least one-half of this increase is from immigration. There has been also an increase in the number of births.

I have to report a good harvest in all kinds of grain; the greatest improvement being in the quantity of hay raised; this crop far exceeds the quantities raised in previous years.

This band made a fine exhibit of farm and other products at the Western Fair held in the City of London last fall, and again succeeded in carrying off the silver medal for the best exhibit of any reserve exhibiting at the Fair.

This is an agricultural reserve and that only, and all things considered the advancement in that line during the last few years has been marked, although there is room for greater improvements still.

There are two good schools on the reserve, one taught by an Indian teacher, and the other by Miss Millar of the Moravian Mission ; they are fairly well attended.

There are three churches on the reserve, and if earnest work can accomplish anything, all should prosper.

The health of the Indians of this reserve has not been good during the past year. Consumption seems to be on the increase, a number of deaths having occurred from this disease, which, according to medical opinion, being infectious, has spread to a great extent among the Indians of this band, so much so that a number of the old log houses have been pulled down and others will have to follow.

At present there are only two cases on the reserve, and we hope thorough sanitary measures will stop (or at least check) the disease.

The roads and bridges are in a fair state and where required they are being repaired as fast as possible.

I have the honour to be, Sir,

Your obedient servant,

JOHN BEATTIE,

Indian Agent.

NORTHERN SUPERINTENDENCY, ONTARIO—1ST DIVISION,
INDIAN OFFICE, MANITOWANING, 14th September, 1891.

To the Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit my report and tabular statement, with statistics of the Indian bands under my charge for the year ended 30th June, 1891.

The Indians of Manitoulin Island continue to maintain their reputation as good and successful farmers and fishermen ; their crops having been remarkably good. They have also been fortunate in their fishing ; their material condition is one of comfort and prosperity.

The general health of the Indians during the year has been satisfactory.

Sixteen schools have been in operation during the year, the new schoolhouse at Thessalon Indian Reserve has been completed and the school is in operation. The combined church and schoolhouse at White Fish River Indian Reserve has been completed but has not been opened, a suitable teacher not yet having been obtained.

The usual distribution of blankets to the sick, aged and infirm Indians has been made, and grants in relief have been made to the blind and crippled.

Ojibways and Ottawas of Manitoulin Island.

The Sheguiandah Band are intelligent and industrious, prosperous and contented ; they have been visited three times during the year. The census shows an increase of four during the year. They have a handsome church, also a school, on their reserve under the auspices of the Church of England.

The West Bay Band occupy an extensive reserve containing some of the most productive land upon this island, excellent crops are raised and the Indians are well-to-do and contented. Three visits have been paid to their reserve during the year. They have a school and church on their reserve, which are under the auspices of the Roman Catholic Missionaries at Wikwemikong. The census shows a decrease of five during the year.

The Sucker Creek Band possess a small reserve near Little Current, which contains some excellent land. They number one hundred and ten, an increase of one during the

year. They have a combined church and schoolhouse on their reserve under the auspices of the Church of England.

The Sheshegwaning Band number one hundred and sixty-five, a decrease of four during the year. They have a school and church on their reserve, and are under the spiritual care of the Reverend Missionaries at Wikwemikong. They are industrious and well-to-do.

The Obidgewong Band occupy a small reserve on the west side of Lake Wolsey. They number twenty-four, an increase of one. They pay much attention to their farms and are successful agriculturists. The band are all pagans.

The South Bay Band number seventy, the same as last year. They are farmers and fishermen, and are prosperous. They have a church and school at their village under the auspices of the Roman Catholic Church.

The Cockburn Island Band number thirty-six, an increase of one. They follow farming and fishing, and are fairly prosperous.

The Ojibways of Lake Huron.

The Thessalon Band are still very much scattered, a part only of the Indians live on the reserve. They are principally fishermen and devote but little attention to farming. The census shows a decrease of one. The school on their reserve is under the auspices of the Roman Catholic Missionaries.

The Maganettawan Band are settled on the West Bay Reserve, Manitoulin Island. Their farms contain some excellent land and are very productive. Their children attend school at West Bay. The census shows an increase of one.

The Spanish River Band have increased fifteen in number during the year. They are separated into three divisions. The first division live on the reserve at Sagamook; the second on the reserve on Spanish River, and at Pogamasing on the Canadian Pacific Railway; the third on the Manitoulin Island.

The first division farm and fish, but seem to lack industry and energy. The second are hunters, with the exception of those who live on the reserve, who are farmers. The third division live on the Manitoulin Island and are very well-to-do. There are two schools on the reserve.

The White Fish Lake Band follow hunting as their main support. They are commencing to do a little farming and have added some three acres to their clearings; at my recent visit to their reserve the potatoes, corn, oats and pease looked remarkably well. The census shows a decrease of two since last year.

There are two schools, one at White Fish Lake Village, under the auspices of the Roman Catholic Church. The other in the immediate neighbourhood of the reserve controlled by the Rev. Mr. Huntingdon of the Methodist Church.

The Ojibways of Mississauga River are another band of hunting Indians; they are usually very successful. The census shows an increase of six during the year. Agriculture receives but little attention at their hands. The school on the reserve is under the auspices of the Roman Catholic Church.

The Point Grondine Band have decreased three in number. They farm, fish and hunt for their support; they earn considerably money by gathering blueberries and cranberries. The fall of 1890 was a very successful season for them in this respect.

The census of the Serpent River Band shows an increase of eight. They are good hunters and are beginning to farm a little and are slightly increasing the area under cultivation. The school is under the auspices of the Roman Catholic Church. The band enjoy a considerable degree of prosperity.

The French River Band have increased five in number during the year. They live at Sheguiandah, Manitoulin Island, and are prosperous and contented.

The White Fish River Band numbers seventy-nine an increase of three; about two-thirds of these Indians live on their reserve, the remainder at Sucker Creek and Sheguiandah. They have recently completed the erection of a combined church and school house at their village. The building is highly creditable to its builders and is a fine and commodious structure.

The Tahgaiwinine Band live on the unceded part of Manitoulin Island. Their census shows a decrease of one. The men follow farming and fishing, and are industrious and prosperous. The children attend school at Wikwemikong.

The Manitoulin Island Indians (unceded) number one thousand and seventy-nine, an increase of eighteen during the year. The births were fifty-eight, deaths thirty-nine; emigration two and immigration one. They got out and sold timber to the value of \$25,000; this, in addition to their earnings as farmers and fishermen, has rendered them very prosperous.

They continue to improve their dwellings; new and more commodious houses are continually being built and their village presents a highly creditable appearance.

The industrial and other schools on this reserve are doing good work.

The annuity and interest payments made to the Indians of this superintendency during the year just past amount to \$12,819.56. Their earnings from other sources have been satisfactory.

The general condition of the various bands is highly favourable, a large degree of material prosperity being enjoyed by all.

I have the honor to be, Sir,

Your obedient servant,

JAS. C. PHIPPS,

Superintendent.

PARRY SOUND, ONT., 12th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report and enclosed tabular statement, showing the condition and progress of the various Indian bands within my superintendency for the year ended the 30th June last.

Parry Island Band.

This band, during the past year, has pursued an even course. There have been the usual petty variances incident to all communities, but nothing has occurred either to seriously disturb the general harmony or to obstruct a quiet steady progress. The crops of last year were fair and there was no distress in the band during the year, and while attendance at the two schools might have been better, there is little to complain of in this respect.

The close proximity of this island to the town of Parry Sound with its large lumbering establishments affords, at almost all seasons of the year, abundance of labour to those of the band who are disposed to work, and most of the band freely avail themselves of these facilities. Consequently, with fertile soil, plentiful fishing, and abundant and remunerative work at almost all times, the lot of this band is unusually fortunate.

Shawanaga Band.

The habits and methods of this band show little, if any, improvement. Indolence and procrastination are still the characteristics of the older members. The severe lesson which sickness should have taught them during the year 1889-90, has not produced the hoped-for results, and only a very slight addition has been made to the number and size of their houses.

In one respect, however, a notable improvement has taken place. Some of the younger men are showing a disposition and ability to adapt themselves to civilized means of earning their living. In addition to working in the lumber woods in winter, several of them now, with skill, endurance and success, fish in the deep waters of the Georgian Bay with nets and boats the same as white fishermen.

The health of the band during the year has been fairly good, notwithstanding that an epidemic of scarlatina again broke out last spring and caused several deaths.

The school has made some improvement during the year, but it has been deemed expedient to substitute a white for an Indian teacher, so as to promote the learning of English by the pupils.

Henvey Inlet Band.

The past year has to this band been one requiring care and circumspection. The crops of last year were not over abundant, and to make matters worse many of their potatoes were destroyed, so that on the approach of spring they were short even of seed potatoes. In their need, however, assistance was rendered to them, and now they have crops that compare favourably with those in other parts of this district. To compensate for this there has been a good hunting season and good fishing, consequently another year has passed without any untoward event.

I am glad to have to report that considerable improvement has taken place in connection with the school, and that the progress of the pupils has been very good. Unfortunately the teacher after holding the position for nine months resigned it at the end of last June quarter, and it was only at the beginning of this month that another was secured to take her place.

Like their Shawanaga neighbours, though not to so considerable an extent, some of the members of this band are beginning to seek employment at deep lake fishing. It is to be hoped that this beginning is the prelude to their entering generally and systematically into this class of work. With ready markets at Point aux Barrie and the Bustard Islands for all the fish they can take, there is every opportunity for them to make money at this lucrative and, to them, congenial occupation.

Nipissing Band.

With one exception, there are none but favourable circumstances to report in connection with this band. That exception is the unfenced or only partly fenced condition of the Canadian Pacific Railway which runs through the full length of the most populous part of the reserve. This is a serious grievance, for when an Indian of this band becomes possessed of a cow, he also becomes seized with a constant anxiety lest he should, on looking for her, find her mangled carcass on the railway track.

Though several infants and children have died during the year, only one adult (killed on the railway track) has passed away; consequently the general health of the band may be considered to have been fair.

The crops of last year were below the average, but as labour was abundant and hunting successful there was no privation or destitution complained of.

The school operations for the year were not all that could be desired, owing entirely to the frequent changes in the teachers. The progress of the pupils, notwithstanding, has been satisfactory.

Dokis Band.

Little if anything can be reported concerning this band. Reticence and independence characterize its leading members, and as these seem to exercise a dominant influence over the rest, it is almost impossible to approach them for any other purpose than that of paying them their annuities.

On the question being again brought before them, they again decidedly refused to surrender their timber with the object of its being sold for their benefit. Owing to extensive lumbering operations going on all around their reserve, their timber is in great danger from fire, and it seems most expedient that it should be sold; but the obstinacy of one or two in refusing to surrender, blocks the way of this being accomplished, with the result that \$50,000 worth of pine timber is liable to be destroyed any dry summer.

Temogamingue Band.

I am happy to say that I generally receive a cordial welcome from all the bands, but my reception by this band may be termed enthusiastic. As soon as my canoe

rounded one of the points of Bear Island, in the centre of Lake Temogamingue, quick movements among the snow-white tents that dotted the shore showed that we had been seen and recognized, and then a general movement was made to the usual landing, where, by the time I set foot on shore, every male member of the band was waiting to give me a firm grasp of his hand and a glad and smiling greeting, and for an hour or more I had ample evidence that the coming of their Superintendent with the "Shooneyah", was a welcome event.

It was soon evident that improvement was taking place in the condition and prospects of this band. One of the first things I was spoken to about, when in council assembled, was the best means by which a whip-saw could be obtained. This band, which hitherto lived chiefly in tents all the year round, now desire to build houses, and at once consulted me as to the best way to obtain the means of manufacturing lumber at a place where saw mills are unknown.

Another sign of improvement is that more attention is being paid to agriculture, but owing to the want of a reserve the effort does not promise the satisfactory results that would otherwise accrue. Each man who turns his mind to tilling the soil clears up a piece of land on the shores of the lake where he thinks best, frequently isolated and far distant from any neighbour or neighbourly assistance.

The earnest hope that the question of their reserve would be speedily and satisfactorily settled was again expressed.

Gibson Band.

As usual this band stand foremost of all others in this superintendency in the matter of material welfare. They are happy, contented and prosperous. Their personal property, as shown on the enclosed tabular statement, is increasing in a most satisfactory manner, and their crops this year at the time of my visit (1st instant) were simply splendid, and if securely harvested should abundantly supply all the year's needs. It was on this reserve that I saw the finest fields of oats, turnips and Indian corn that I have seen in the district.

During the year, one death and ten births have taken place.

I visited the school and found that it had been wainscotted and lathed preparatory to plastering. The educational condition of the pupils was not satisfactory.

I have the honour to be, Sir,

Your obedient servant,

THOS. F. WALTON,

Indian Superintendent.

NORTHERN SUPERINTENDENCY—3RD DIVISION,
SAULT STE. MARIE, 13th October, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward you my report for the year ended 30th June, 1891, of the three Indian bands under my charge.

Garden River Band.

On the 23rd December, 1890, Chief Augustin, head of this band, died at a good old age, and was buried in the Church of England cemetery, Garden River. A subscription was taken up to erect a monument over his grave to his memory, and, I believe, the sum of \$70 was collected for that purpose, one firm, the Marble Mountain Company, subscribing \$20 towards it. It then became a question of having a new chief, and by your instructions an election was held at Garden River, on the 10th March, for that purpose, and four members of the band came forward to contest the honour. Seventy-six votes were polled and it resulted in the choice of one of the late Chief's brothers—Pequit-

chenene—being elected by a majority of two. Four sub-chiefs were also elected, and matters have gone on very well under their rule. Regarding the state of the reserve the appearance of the houses continues to improve, fences are kept in better condition, crops have not been so good as usual; the hay crop was the best had for some time back. The members still continue to earn their living in the old way, in the winter time working in the shanties, in the spring at Hollister & Co.'s mill, and in the summer going out with American fishing parties; but this last occupation has greatly fallen off. The liquor traffic, I regret to say, still continues. I have made several attempts to prosecute, but it has never gone further than to serve the summonses, and just before the case comes on they go over to the American side. I am glad to be able to note an improvement in the attendance of the children at the Church of England school, but there is still room for more. The members of this band are divided, part being adherents of the Church of England, and part belonging to the Roman Catholic Church. Each have a school and also a church. The Roman Catholic school is attended by the Batchewana Band. The Garden River and Batchewana Bands are so mixed up on the one reserve that it is difficult to speak of them apart.

Batchewana Band.

The greater part of this band reside at the bay west of the Garden River Reserve, and earn their living much in the same way as the Garden River Band, except that they do not participate in the cordwood-cutting during the winter on the reserve. They are great explorers, but as yet no great discoveries have been made. Their chief, Nubenaigooching, has shown his people a good example by building himself a very good frame house. Most of the houses on this portion of the reserve are good. Their crops were much the same as the Garden River Band, in fact, it is difficult to make a distinction between them, both living, as they do, on the same reserve. A good many of this band work for Hollister & Co. during the winter, and they do more fishing than their neighbours. The school is pretty well attended from this end. All of this band are Roman Catholics. They have only a small reserve of their own, about twenty-three acres; they are more scattered than the Garden River Band, some of them living at Goulais Bay, where they have a church; some at Batchewana, and a little settlement at the Hudson's Bay post, Agawa River. These last get their living by hunting and fishing; the last are very poor, but they all appear to be very contented.

Michipicoten and Big Head.

The Indians have for Chiefs Sanson Legard and Gros Jambette. The former resides with thirteen families of the band on the Michipicoten River, on the land bought from the Ontario Government, about three hundred acres. They have a Roman Catholic Church and schoolhouse, and fourteen houses. They raise very little, merely a few vegetables and about one hundred and thirty bushels of potatoes. They live by hunting and fishing, and working for the Hudson's Bay Company. On each of my visits I gave a dinner to thirty-eight or more. This year it was the number mentioned. I gave them blankets and tobacco. The rest of the band live in the interior by hunting; the Big Heads live most at Chapeau; these are Methodists, numbering about fifty.

I have the honour to be, Sir,

Your obedient servant,

WM. VAN ABBOTT,
Indian Lands Agent.

NORTHERN SUPERINTENDENCY—4TH DIVISION,
PORT ARTHUR, 31st August, 1891.

To the Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present my annual report upon Indian affairs within my agency, together with my annual tabular statement covering the period for the year ended 30th June, 1891.

Fort William Band.

This band, I may say, are prospering each year more and more. About five hundred bushels of seed potatoes, oats, and pease in addition to smaller seeds such as turnip, &c., were planted by them last spring. They are also giving more attention to stock-raising of late. They have altogether three horses, seventeen milch cows, thirty head of young cattle and fifteen working oxen. On account of the increasing scarcity of fur and fish, they are obliged to turn their attention to agriculture and other modes of gaining a livelihood. During the last winter they got out a lot of different kinds of timber off their reserve for the Canadian Pacific Railway Company, and the most industrious of them made money. They did their statute labour this year in a creditable manner, each man working two days, and they have their roads and bridges in good order. They have three schools, an Indian day school, girls' school, and St. Joseph's Orphanage, all well attended and well supplied with stationary from your Department. Those among the girls at the Orphanage who have some genius and musical ability are taught fancy and other needlework and piano music. There has been a good deal of sickness, principally "la grippe," and several deaths in this band. They have good medical attendance. They now number three hundred and fifty-nine, an increase of nine over last year. Their religion is Roman Catholic; they have one church and a resident priest, and are very regular in their attendance at the church services. The appointment of two constables by the Department has had a good effect upon their morals, and has assisted to a great extent in their general improvement. During the past year four whites who came to the reserve with liquor were arrested and imprisoned, at hard labour, for two, three, and six months.

Red Rock Band.

The Indians of this band are divided. A portion of them settled on the Catholic Mission Ground some fifteen years ago, where they built their houses and made other improvements, and now object to moving on their reserve, five miles away across Lake Helen. Another portion are settled on the English Church Mission Reserve on Lake Nepigon; a few others are scattered about; and the remainder are on their Red Rock Reserve at the mouth of the Nepigon River, Lake Helen. At each of these settlements they make yearly improvements in the way of garden grounds and clearing new land, vieing as to who will do the best. They, too, have to pay more attention to agriculture on account of the scarcity of fur. This band makes considerable profit during the summer season, out of the tourists who visit the Nepigon River, renowned for its beautiful scenery and fine speckled trout fly-fishing; these fish are plentiful, and run from two pounds to seven pounds in weight. The Indians get from \$2 to \$3 a day and canoe hire, which assists them very much. They have a good Roman Catholic school and church at Lake Helen, also an English church and school on Lake Nepigon. The teacher remains on the reserve, but the pastors move about on their missions to different points. This band numbers two hundred and five, the same as last year; the deaths have been equal to the births.

Pays Plat River Band.

The Indians of this band are gradually improving. They have cleared about three acres of new land, and seeded it down with timothy. They have a good working bull to do their ploughing, draw fuel, and do other work; they have also three cows and

some calves. Their crops of potatoes and turnips are good; altogether they will have about three hundred bushels, enough for their own use and seed for next spring. They dress neatly, and their houses are neatly kept. They number only fifty-three persons, a decrease of two from last year. The river runs through the centre of their settlement and abounds with fine trout and whitefish, a great assistance to them in living comfortably. They have a Hudson's Bay store, kept by their chief, Joe Fisher, who is a very industrious man, and a good example in every way to his band. This portion of the country is noted for good fur. They have no school, but are striving to get one; it is their intention to build a schoolhouse next year, after which they will ask the Department to supply a teacher. They are Roman Catholic in faith.

Pic Band.

This band succeed well in agriculture; they have good crops of potatoes, turnips and other vegetables, which, together with a few barrels of trout and whitefish, which they catch every fall, keep them comfortably over the winter. Their fur catch is getting less every year, and they begin to see that in a very short time they will have to depend entirely on their land for a living. The oxen advanced them by the Department last fall, and for which they have partly paid, were well wintered and are doing good work. They have placed money with me to make another good payment on them, which will leave but a small balance to pay next year. They feel very thankful to the Department for the accommodation. This past year they have been much afflicted with "la grippe," twenty-six of them having died of the malady. I paid them every attention personally and gave them good medical care, otherwise many more would have died. The death of several heads of families and the inability of others, through illness, to pursue the chase last winter has greatly impoverished many families, some of whom will require assistance to live through this winter. I have received letters giving me notice of coming distress. The band numbers 253, only one less than last year, despite the many deaths, owing to the increase of children.

Long Lake Band.

This band live entirely by the chase. This year, for the first time, however, they planted potatoes and sowed turnip seed furnished by the Department to give them a start, with the understanding that they should afterwards provide their own seed. But they have not had a fair trial this past summer, the weather having been very wet and cold the crop does not appear promising; if it should prove a failure, however, they will try again next year. They number 253, an increase of twelve over last year. They, too, have lost some by "la grippe." There are many more widows in this band than in any other in this part of the country, there being 91 women and only 57 men. Pressed by force of circumstances the women become good hunters, and it is said they stand the fatigue and exposure better than the men do. In all the bands under my agency there are more widows than widowers. The fur catch of the band last winter was worth about \$12,000; but the fur is found far from the frontier, principally between Long Lake and James' Bay and near the Atlantic coast. They live altogether in wigwams and have less consumption among them than those living in houses. Their lakes and rivers abound with fish, upon which they live in the summer season, but they subsist on animal food during the winter.

Nepigon Band.

This band numbers 513 persons, one less than last year. They, like the Long Lake band, live principally by the chase. Some of them made money this summer by attendance upon tourists. Their land is good and productive; many have potato gardens with good crops and will have several hundred bushels. They begin to see, by example of the frontier Indians, that it pays them well to work their land, as in the spring their hunting season is over and they have nothing else to do. Their fur is decreasing yearly, and they will soon have to procure their living by agriculture and fishing. I assist them and give them every encouragement in working their land. The Nepigon Lake abounds with

the finest fish, perhaps, in America. It is about 100 miles long by 50 wide, and will always be a source of revenue to them so long as white fishermen are kept off this and other inland lakes, as they have been, so far, very wisely, by the Provincial Government. This band has also been afflicted by "la grippe," and several deaths have occurred. They have divided into four different settlements for farming purposes, namely, Gull River Reserve, Jackfish Island, Trader's Bay and Poplar Lodge, where they are building houses and making improvements. They consider that if they should all settle at Gull River Reserve the fish in that locality would soon give out, and they would have to go too far to get them. Their school at Jackfish Island is well attended. In religion they are Roman Catholic, with the exception of a few pagans, but have no church. They are a very law-abiding people, the two constables appointed by the Department having a good effect upon them.

English Church Reserve Band.

These Indians have good houses and gardens; their land is productive and yields well. This year they failed to put in as many potatoes as formerly, but promise to do better another year. They keep their bull in good order, and he is very serviceable to them, ploughing and in other ways. They have been whipsawing lumber to rebuild the parsonage and schoolhouse burnt down two years ago. For about two months during the summer season they are employed by the fly-fishermen tourists, and thus they make some money. They are located on Nepigon Lake side, with plenty of fine fish close to their doors, and nothing to prevent them from living comfortably, if they choose to be industrious. They, like others, have been much afflicted with "la grippe." Their school is well attended according to the number of their population; and they have also a fine church. Their minister has not been constantly with them since he was burnt out; his absence is not a good thing for them, but he expects before long to be able to remain steadily with them.

I have the honour to be, Sir,

Your obedient servant,

J. P. DONNELLY,

Indian Agent.

COUNTY OF RENFREW, GOLDEN LAKE AGENCY,
SOUTH ALGONA, 2nd October, 1891.

The Honourable

The Superintendent General of Indian Affairs.

Ottawa.

SIR,—In submitting my annual report for the year ended 30th June, 1891, I beg to state that I have very little information to communicate to the Department beyond that contained in the tabular statement herewith enclosed.

It is noticeable that there has been very little sickness among the Indians of this agency during the last two years. Signs of greater comfort among them are perceptible. They seem to be contented and happy.

I have the honour to be, Sir,

Your obedient servant,

EDMUND BENNETT,

Indian Agent.

COUNTY OF HASTINGS, TYENDINAGA AGENCY,
SHANNONVILLE, 12th October 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891. This band now numbers one thousand and seventy-six, being an increase of thirteen during the year, the result of twenty-four births and twelve deaths, while one person was admitted into the band.

Since my last report the general health of the band has been good. The crops last year were good and provisions plentiful. The four schools on the reserve are in operation and are progressing favourably. A number of children from this reserve are attending the high school at Deseronto, while others are attending the institution at Brantford and the Shingwauk Home at Sault Ste. Marie.

The interest money distributed during the year amounted to \$2,143.78 and the usual supply of blankets has been distributed among the aged and infirm Indians.

I have the honour to be, Sir,

Your obedient servant,

MATTHEW HILL,
Indian Agent.

INDIAN AGENCY, GEORGINA, 10th August, 1891,

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

The population is now one hundred and twenty-five, an increase of two since last census.

During the first quarter of the present year the band suffered severely from serious illness which involved a larger medical bill than usual. The succeeding quarter happily more than made up for this, the health of the band having been restored, and the medical account was only a trifle.

The harvest on the reserve, last year like that of the white man, was poor indeed. The present outlook is most cheering, and never before was there such a prospect, and I made every effort to supply seed grain this spring with this expectation.

Root crops and vegetables are being more and more cultivated every year with good results. Gardens and fields are alike flourishing; houses and premises well looked after. The large stock of horses and cattle, as shown in the tabulated statement, in excellent condition, is another evidence of prosperity.

The sobriety and morality generally of the band is all that could be desired.

The Methodist Mission Board has built a very substantial and pretty cottage on Georgiana Island at a cost of about \$800.00 for Mr. Mayes, who is back at his old post as teacher, and the Indians are putting up a neat board fence and digging a well to complete the surroundings. The school is well kept, and Mr. Mayes spares no pains to make it a success.

The contract for a new council house is let and work will be proceeded with at once.

The Rev. Mr. Wilkinson of the Methodist Church is a most energetic man, anxious and diligent in his duties among the Indians, and by far the most useful man the Methodist Church ever sent here.

I was especially pleased, on my last visit to Snake Island, to notice the well-kept gardens and premises of the two families there.

I have the honour to be, Sir,

Your obedient servant,

J. R. STEVENSON,
Indian Agent.

CAPE CROKER AGENCY, 26th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement on Indian affairs for the year ended 30th June, 1891.

There has been an increase of two in the population of this band, since last year. They now number three hundred and ninety-four persons. The health and sanitary condition of the people is good. There have been several deaths during the year, but nearly all from natural causes. The hay and grain crops last year were excellent. But the prospects are not so good this year, on account of drought in spring and early summer months. The seed did not germinate, and hay is a total failure, and many will be forced to dispose of their stock for want of feed. The catch of fish last fall was bountiful. The fishing industry adds greatly to the welfare of this people. The three schools have been open most of the year, and the pupils who attended regularly made good progress. But I am sorry to say that some of the parents are careless and neglect their duty in this respect. Under the new regulations which were passed in council here, and assented to by the Department of Indian Affairs, I trust the attendance of pupils will be better in the future. There are two churches here: one belonging to the Methodist body and the other to the Roman Catholic denomination. Services are held in both every Sabbath. The presiding ministers are doing a work amongst the people, which I trust in due time will have a good effect.

I am much pleased to be able to state that this year several of the Indians show a desire to give more attention to agricultural pursuits than last year, and if they can be persuaded to adopt farming for a living, there is no fear for the future. All that is necessary to make this people prosperous and wealthy is application to industry and economy; and I hope this result will, in time, be attained.

I have the honour to be, Sir,
Your obedient servant,

J. W. JERMYN,
Indian Agent.

SAUGEEN RESERVE,
CHIPPEWA HILL, 29th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my report and tabular statement of the Chippewa Indians of the Saugeen Reserve for the year ended 30th June, 1891.

This band now numbers three hundred and eighty-five, being an increase of twenty-one over last year. The sanitary condition of the Indians has been remarkably good for the last year, there being only two deaths to record. They have great cause for renewed gratitude to the Giver of all good who has blessed them with another bountiful harvest.

The fishing interest on their extensive fishing grounds at French Bay is becoming a source of increased revenue to them, and their art in this industry is annually increasing, so that they can now compete with the most expert white men.

I have the honour to be, Sir,
Your obedient servant,

JAS. ALLEN,
Indian Agent.

ALDERVILLE AGENCY,

ROSENEATH, ONT., 3rd August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I enclose herewith tabular statement in connection with the Mississagua Indians of Alnwick, for the year ended 30th June, 1891.

This band now numbers two hundred and forty-two, an increase of six since last year. We had during the year twelve births, seven deaths, two immigrations and one emigration.

Considerable improvement in agriculture has been made by the band during the present year. The Indians have a much greater extent of land under their own cultivation than in any previous year. I assisted them to a considerable extent to procure their seed grain and potatoes.

In addition to farming, large quantities of baskets and other articles were manufactured by the women, for which they found a ready sale.

Many of the Indians earned large amounts of money during the past year in wages, catching frogs, working in the lumber shanties and river-driving. From the best information I could gather, after making careful enquiry, they earned \$6,872, while from fishing and hunting they only made \$589. The general health of the Indians is good. The school is still taught by the Rev. J. Lawrence, and the children on the whole are doing fairly well; one of the pupils of this school recently passed the entrance examination to the high school, being the first from the Alderville school.

I have the honour to be, Sir,

Your obedient servant,

JOHN THACKERAY,

Indian Agent.

RICE AND MUD LAKE AGENCY,

GORE'S LANDING, 31st August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report and tabular statement showing the state of the Indians under my charge, for the year ended the 30th June, 1891.

Rice Lake Reserve.

The Indians have given more attention to farming, and have been rewarded by excellent crops. The wild rice that grows in the lake was also a good crop, and they were well paid for the time spent in gathering and disposing of it. They also made considerable out of fish and fur, and some of them did well as wage-earners. Some of the Indian women are very industrious and make fancy baskets and other articles out of the bark of the birch trees and porcupine quills; they also make market and clothes-baskets for which there is always a demand. There has not been any serious illness. The year has passed away quietly and pleasantly.

Mud Lake Reserve.

The year at Mud Lake has been one of quietness and prosperity, and the Indians have enjoyed good health, except in two or three cases of pulmonary diseases of long standing. This is no doubt due to their growing tidiness and cleanliness and the improved sanitary condition of things in and around their homes.

Those who will do what is right are encouraged and assisted to help themselves, and those who have been turning their attention to farming have been very prosperous and are doing well.

All those who are willing to work may receive constant employment at good wages either with pleasure seekers on the lakes or with the farmers, at least during the summer months.

Those who occupy holdings are gradually tidying; stoning and otherwise improving their places.

By the free labour of the Indians, the roads from the mission house to the church and from the church to the wharf have been straightened, graded and greatly improved. A new wharf has been built of two piers nine feet square and twelve feet apart.

The children are becoming more regular in their attendance at school and make very good progress, but some parents are yet negligent, and of course the children suffer in consequence.

There are two services in the church every Sunday, and both are fairly well attended. Most of the young people attend Sunday school regularly all the year round.

I have to honour to be, Sir,

Your obedient servant,

EDWIN HARRIS.

Indian Agent.

RAMA AGENCY, ATHERLY, 18th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891. The population is now two hundred and twenty-six, being a decrease of nine since my last report. There has been considerable sickness, but no particular epidemic. Several old people have died from the effects of "la grippe," and others from consumption. I am glad to inform you that the Indians are turning their attention more to agriculture, and are making decided progress. Some of them are sowing fall wheat and others are busy fall-ploughing at the present time. The steam thresher will have several days work on the reserve. One man has threshed and has got over three hundred bushels of wheat and about five hundred bushels of oats and some pease and barley; another has got over three hundred bushels of oats and a nice quantity of wheat, sufficient to make flour for his family all the year. For the most part they are very comfortable and clean in their homes, many of them having all the necessaries, and, in fact, some of the luxuries found in the homes of their white neighbours. The Chief and several others have made some nice board fences along the fronts of their places, which give them a nice, tidy appearance. Statute labour was performed by the band, and the roads on the reserve are much improved. The usual supply of blankets has been received and distributed among the aged and infirm. I am glad to state that drinking, or the use of intoxicants, amongst the Indians is decreasing; of course there are always a few who will drink when liquor can be had during the year. I prosecuted one person for supplying intoxicants to some of this class; the case was proven and the offender fined \$100. The school is presided over by Miss Hattie Taylor, who deserves great credit for the way in which she gets the children to take an interest in their work. She teaches reading, writing, arithmetic, geography, dictation, drawing, recitation and singing. There are thirty children on the roll and an average attendance of fifteen for the year.

I have the honour to be, Sir,

Your obedient servant,

D. J. MCPHEE,

Indian Agent.

NEW CREDIT AGENCY,

HAGERSVILLE, 24th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to report upon the affairs of this agency for the year ended 30th June, 1891, and also to enclose my tabular statement.

The Census.

The population has decreased since my last report by one. The increase was four, by birth, and three by marriage into the band ; total, seven. The decrease, six by death, and two by marriage out of the band ; total, eight.

Of the deaths two were phthisis, two infantile disease, one old age (Chief David Sawyer) and one killed upon the railroad.

Education.

Miss Mary Murray, who for several years so successfully presided over the school, resigned last December, and her place has been filled by Miss Maggie Meehan, who is very satisfactorily conducting the school.

Last May the question for or against the erection of a new schoolhouse was submitted to the vote of the electors and carried for the erection. The plans and specifications are now under the consideration of your Department, and it is probable the children will enter their new schoolhouse after the Christmas holidays. The school by-law has been amended to suit the Advancement Act, and will hereafter be strictly enforced.

Agriculture.

Those who had sown wheat last fall have reaped an abundant crop, and although the hay and other spring crops were not so good as usual, still the extra wheat crop has made up for that deficiency, and the crops are fully as good as those upon the surrounding white farms.

General Remarks.

An investigation has been held into several disputed cases by Mr. Inspector A. Dingman and will be continued to completion.

The council have passed a resolution that hereafter all culverts upon the roads must be replaced by stone instead of wood, and a new bridge with stone piers is to be built over Spring Creek.

I have the honour to be, Sir,

Your obedient servant.

P. E. JONES, M.D.,

Indian Agent.

MOUNT ELGIN INDUSTRIAL INSTITUTION, MUNCEYTOWN.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit to you a brief report of the condition and prospects of the Mount Elgin Industrial Institution, for the year ended 30th of June, 1891.

Over one hundred pupils, representing fourteen reserves, have shared the advantages of this institution during a part or all the year. The average attendance being eighty-one and a fraction. The advancement made by the pupils in their regular studies and in the various branches of industry has quite maintained its former high record. At the end of our tenth year of management we are glad to say, that for several years, the pro-

ceeds of the farm and shops, together with the amounts paid by the Department for each pupil (\$60) per annum, have been sufficient to cover all current expenses, and to assist in making large improvements. To secure these improvements, the Department has paid for most of the material, while the institution has largely performed the labour. The new steam laundry and dry-house, a building 28 by 40, completed and furnished during the year, adds greatly to our comfort and is highly prized.

Our school hours are similar to the public schools, with the addition of Saturday afternoon, and one hour each evening for home work under the care of a teacher. Our system of having the pupils two days in school and one out, gives us all the advantages of a graded school; while it means to the pupil four days each week in school and two days at some branch of industry.

During the past six years, some fifteen pupils have obtained certificates entitling them to teach on any reserve in the Province. Most of them have taught or are teaching, while others will continue their studies in hope of gaining a higher certificate.

These pupils have quite sustained their high reputation for good moral character. They have been regular in their attendance at public worship and have been greatly helped through our excellent sabbath-school.

W. W. SHEPHERD,
Principal.

WIKWEMIKONG, 15th July, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—As a scholastic year has just expired, it is my duty, as Principal of the Wikwemikong Industrial School, to furnish your Department with a report of the working, management, &c., of this institution.

I shall state in the first place that, as it was meet to do, the main efforts of all who had authority over the pupils have been directed towards their moral training, and I am happy to be able to say that we have not laboured in vain. Edifying, indeed, has been the general behaviour of the pupils in both departments, boys and girls, and very encouraging the eagerness with which they availed themselves of the opportunities procured for them for the thorough understanding of the teaching of the Church, and of the obligations imposed upon them. Hence the facility experienced by the officers of the establishment in enforcing its rules and in maintaining, the whole year round, perfect order and discipline among the pupils. To bring the children entrusted to our care not only to comply with the requirements of cleanliness and polite manners, but moreover to a true appreciation of those two important social qualities, has been the object of our constant endeavours. With what results could be ascertained in divers ways, but especially from the sympathetic consideration and admiration often shown by the people for our pupils, whenever they chanced to meet them on the street on the occasion of public school exhibitions or other like occurrences. It is the first year that something like a uniform has been introduced among the boys, and we do not intend to stop halfway.

I now come to the subject of class instruction, that is to that of the development of the pupils' mental faculties. This year the number of the inmates has been on an average about one hundred, nearly equally divided among the boys' and girls' schools. Well, I do not hesitate to say that, in general, there has been among them very marked progress in the different branches of study to which they were applied. Special mention, however, should be made of English composition and arithmetic. Mr. White, one of the School Inspectors, tried them in both when visiting our school last fall, and he declared himself very well satisfied with the results, the boys of course showing greater proficiency in the science of numbers. Still greater, indeed, would have been his satisfaction had he been present at the last public school exhibition given by the boys a

short time before the end of the year. On that occasion the most advanced among them gave such answers in mental arithmetic, that one who was present would not believe they were extempore, but thought that the teacher must beforehand have made known to the pupils the questions he would ask them. Such however was not the case, but the answers were *bonâ fide*, the result of constant and thorough training, a fact which is so much the more worthy of notice as it is well known that Indian children naturally have little taste and aptitude for that branch of learning. Truth has forced me to declare the boys superior to the girls in arithmetic, and it obliges me likewise to give a contrary judgment concerning the use of English in conversation. In this respect, the girls are considerably more advanced than the boys, though these also have made progress during the last year. We attach great importance to this point and are determined to insist on it very much. The very reason of the existence of industrial schools being the teaching of trades or industries, this subject should by no means be neglected in a report like this. The last year has given very satisfactory results, indeed, in this branch of teaching. We had ten apprentices among our boys, and they, in general, applied themselves earnestly to the respective trades they were taught. I will give a few proofs. A young shoemaker apprentice was able to make a tolerably good pair of shoes after only four months of apprenticeship. Another apprentice in the same industry left the school at the end of June, after having spent three years in it. He is now earning his living by his trade in a neighbouring village, having received a set of tools from the institution. Two other lads will soon receive their sets of tools and probably begin to work at their trades on their own account.

This report I would consider incomplete were I to omit speaking of certain accessory studies and exercises. The first mention is due to music, of which Indians are very fond, and for which they exhibit considerable talent. Our boys can already sing with taste and precision, and a few among them are able to play the organ. But again in this respect they yield to the girls, who are very proficient both in vocal and instrumental music. The children have also been taught the first rudiments of drawing. Judging by these beginnings, I believe this is the study in which they could obtain the greatest success.

It would not do to neglect in a school like this the hygienic exercise of the Indian clubs; our children (the boys especially) have had it, I might say, daily, and it is probably in a great measure owing to it that their health has generally been so good the year round.

Finally, the boys have had military drill, not occasionally, but hundreds of times. To say that they liked that exercise would be saying too much; nevertheless, it was very pleasing, indeed, to see with what precision and exactitude they could manœuvre at the end of the year and how military were their mien and appearance.

In conclusion I will say that we have every reason to be thankful to God for the blessings with which he has deigned to favour our labours during the past year.

I have the honour to be, Sir,

Your obedient servant,

D. DURONQUET,

Principal.

24th OCTOBER, 1891.

The Honourable

The Superintendent General of Indian Affairs.

SIR,—I will now state what has become of some of the ex-pupils of this Institution.

Ex-Pupils of last year.

Charles Maiangowé has become school teacher at Bapwa village.

Louis Tillison keeps a shoemaker's shop at Killarney.

Jean Jabokwam works as shoemaker at Wikwemikong.

Ignace Osawaminiki works as blacksmith at Wikwemikong.

Ex-Pupils of former years.

NAMES.	AVOCATIONS.	PLACES.
J. B. Wakekijik	School teacher	Shishigwaning
Joseph Jabokwam	Weaver, expects a situation as school teacher	Wikwemikong
Joseph Peltier	Merchant	do
J. B. Peltier	Blacksmith	South Bay.
Moses Wibokamigak	do	Wikwemikong
Stephen Kiniwikijik	Farmer	do
Joseph Trudeau	do	do
Wm. Kinojameg	Shoemaker	do
Lucy Kinojameg	Taught school several years at West Bay and Serpent River, expects soon a similiar situation	
Agothe Aljoe	Storekeeper, taught school for years, until lately	do
Sophie de La Morandière	Wife of Joseph Peltier merchant, taught school over 10 years until lately	
Magdeleine Atchitawens	School teacher	South Bay.
Harriet Atchitawens	do	Sagamok.
Victoria Wakekijik	do	Thessalon.
Lucy Assiniwe	Married to good farmer of Wikwemikonsing, expects soon situation as school teacher	
Elisabeth Proulx	School teacher	Wikwemikon-sing.

I have the honour to be, Sir,
Your obedient servant,

D. DURONQUET,
Principal.

HOMES FOR INDIAN CHILDREN,
SAULT STE. MARIE, 4th July, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present to you my report of the Indian Homes under my charge for the year ended 30th June, 1891.

At the Shingwauk Home, Sault Ste. Marie, we have accommodation now for seventy-four boys, and everything is in excellent trim for carrying on the work on a more extensive scale than we have been able to do hitherto.

Our buildings consist of the main Shingwauk Home, in which are the dormitories, dining hall, kitchens, and officers' quarters, including my own residence; the hospital, with beds for six patients; the industrial building, in which are rooms for teaching weaving, tailoring, shoemaking, besides office and storeroom; the chapel; farm cottage, barn and stables; carpenters' cottage and factory, with engine, boiler and machinery for planing, turning, sash-making, etc; lastly, the new "Shingwauk Hall"—of which the lower storey is a drill hall and recreation room and the upper storey is used as a school room. This latter building occupies the highest part of our property and has a small observatory on the roof, from which a splendid view is obtained of the surrounding country. All the buildings are connected by telegraph wires, and five or six boys are able to operate the instruments.

At the Wawanosh Home, which is nearly three miles distant from the Shingwauk, our buildings consist of the main Wawanosh Home, with accommodation for twenty-six girls; laundry, laundresses' cottage, stable, and girls' playroom.

At Elkhorn, Manitoba, our buildings are the Washakada Home, with accommodation for thirty-five girls; the Kasota Home, with accommodation for thirty-five boys; the central building, with superintendent's rooms, dining hall, schoolrooms and kitchen; the laundry, connected by a passage-way to the Washakada Home; and the industrial building, containing stable, carpenter shop and bootmaker shop. Four miles away from the institutions is our farm of six hundred and forty acres.

On this we have just erected a farm house, with room for the farm instructor and his wife, and a dormitory for six boys, also barn and stables.

About forty acres of land have thus far been broken, and of this about ten acres are already in crop.

At Medicine Hat, Assiniboia, we have within the past year purchased a very excellent site for another institution, and have partly erected one of three proposed buildings. The building in course of erection is to be the central one of the group, and the contract price is \$4,000, but only \$2,000 has as yet been expended on it; the walls are concrete and the roof is a mansard one. The ground is fenced in, and about three acres of land are already in crop. The school will accommodate about seventy pupils, when completed.

Our Live Stock.—At the Shingwauk Home we have four horses, a dairy of eleven cows, several young cattle, pigs, poultry, etc. At Elkhorn we have a pair of light horses, a pair of heavy horses, a herding pony, a yoke of oxen, two cows, and some calves and pigs.

The total attendance at our schools, during the past year, has been one hundred and sixty-four. During the winter we were obliged to reduce our numbers at the Shingwauk to thirty, and at the Wawanosh to sixteen, in order to economize funds. The attendance at Elkhorn has usually averaged about forty. At the present time there are fifty at the Shingwauk Home, twenty-six at the Wawanosh Home, forty-three at Elkhorn, one hundred and nineteen in all. We had four deaths during the year—two boys died at Elkhorn, one boy at the Shingwauk, and one girl at the Wawanosh—all from pulmonary complaints.

Besides the pupils in residence at our Homes, we have one ex-pupil a student at St. John's College, Winnipeg, and another attending Trinity College School, Port Hope. Both these pupils are still dependent on us for their support.

We have recently made a little change in our school arrangements and holidays. According to our present plan, the year is divided into six school terms of about seven and a half weeks each. At the close of each school term there is an examination, followed by seven or eight days holidays, the regular Christmas and summer holidays are thus done away with, but if any children living at a distance are desirous of going home for several weeks they are still permitted to do so, and by so doing they miss either a whole or the part of one of the six terms. Our object in adopting this new plan is to avoid the inconvenience of the pupils being all away just at the busiest time of the year, and also to save the trouble and expense that is often caused getting them back when they have gone in large numbers to their homes. The Indian parents do not seem at all to object to the new plan.

Since the Homes were first started, seventeen years ago, I have received five hundred and eleven pupils in all. Of these, three hundred and twenty-one were boys, and one hundred and ninety girls. They belonged to the following tribes: three hundred and thirty-three Ojibways, forty-six Crees, twenty-three Delawares, thirty-three Ottawas, thirty-nine Sioux, three Blackfeet, two Bloods, thirteen Mohawks, fifteen Pottawatamies, two Assiniboines, one Abenaki, one Muncey. And of the number received, two hundred and fifty-three reported themselves members of the Church of England, ninety-seven Methodists, fourteen Presbyterians, ninety-six Roman Catholics, seven Moravian Church, forty-four heathens. Our chief, and indeed I may almost say only drawback during the past year has been want of funds.

I am sorry to say that the Church of which I am a member and a minister, has, in my opinion, been doing but scant justice to the cause of the Indians, whom God in His Providence seems to have placed specially under our care and protection. I have been

vainly endeavouring to induce the Canadian Church Missionary Society to take a more active interest in the work, but am compelled to say that I have been and am still left too much alone in my efforts to build up what I hope may one day prove itself to be an important and useful work.

I desire to thank the Department for the very great encouragement it has given me during the last two or three years in my arduous undertakings, and although disappointed somewhat about the expected grants for this year, I trust that the way may yet open, before another year speeds round, for me to carry out my plans, both for extending our work at the Shingwauk Home, and also for establishing another institution at Medicine Hat.

I have the honour to be, Sir,

Your obedient servant,

EDWARD F. WILSON.

SAULT STE. MARIE, 12th November, 1891.

The Honourable

The Superintendent General of Indian Affairs.

Ottawa.

SIR,—In compliance with your request in your letter (No. 82390) of 16th September to add to my annual report of this year some particulars as to what has become of the pupils that have left us during the year, I beg to submit the following:—

1. Albert Lahgij, aged nineteen, completed his course satisfactorily at the Shingwauk, passed the High School entrance examination, and when he left us—a year ago—expected to teach an Indian school, but I have not yet heard that he has one.

2. William Riley, aged nineteen, completed his five years at the Shingwauk, became a good carpenter, and when he left us received an order for tools for \$42.54, that being the amount to his credit in our savings bank. Is supposed to be now following his trade on Walpole Island.

3. Matthew Sampson, aged eighteen, completed his time at the Shingwauk; had become a good shoemaker; received order for tools for \$20.88. Has not been able to follow his trade (at Sheshegwahning, Manitoulin Island) owing to sickness. If well enough, he is to come back and take charge of our shoe-shop this winter, as our funds do not allow of our employing a white man.

4. Frank Maggrah, aged fifteen, completed his five years at the Shingwauk; learned shoemaking; earned \$10. Would have done better to remain longer with us, but expected to get employment at his trade at Little Current, Manitoulin Island.

5. Philamine Sampson, aged seventeen, was three years at the Wawanosh; was out in domestic service for several months after leaving, and is now married.

6. Charles Gilbert, aged twenty-one, completed his time at the Shingwauk; became an excellent blacksmith; received order for tools for \$71.11. Agent McIntyre, of Fort William, undertook to look after him and get him started in life.

7. Nancy Petahnungund, aged nineteen, was three years at the Wawanosh. Since then has been several months in domestic service and done well, but I believe is now at her home, Christian Island.

8. Daniel Imoyin, a Blood Indian, aged twenty-one, was at our Elkhorn school for about a year; returned home a year ago. Is prepared to enter the Medicine Hat school as soon as started.

9. John A. Maggrah, aged twenty-two, was five years at the Shingwauk. Is now a Divinity student at St. John's College, Winnipeg, giving every satisfaction. (Still dependent on us for support.)

10. Joseph Loney, aged seventeen, was five years at the Shingwauk. Is now a student at Trinity College school, Port Hope, and making most satisfactory progress. (Still dependent on us for support.)

11. Arthur Miskokoman, aged twenty, completed his five years at the Shingwauk. Tried the High School entrance examination this summer, but failed to pass; so, at his own request, he has been admitted to the Shingwauk as a boarder, and attends the public school in the town. Papers are at present being got out for this boys' enfranchisement.

12. Sylvester Kezhig, aged seventeen, completed his five years at the Shingwauk; learned farming; received an order for farm tools for \$19.22, and is now farming at his home, Cape Croker.

13. Dora Jacobs, aged fifteen, completed her five years at the Wawanoshi, but at her own request has been admitted again, and is now studying for next year's High School examination.

14. Joseph Sampson, aged twenty, completed his five years at the Shingwauk; has become a very good shoemaker and has \$42.25 in the saving bank. Is anxious to improve his education before following his trade, so, at his own request, has been received back at the Shingwauk, and is studying for the next High School entrance examination.

15. John Solomon, aged nineteen, completed his five years at the Shingwauk; had become a good carpenter; has \$37.48 in the saving bank; but, at his own request, has been admitted again to the Shingwauk, to improve both his education and his proficiency at his trade.

16. Nancy Henry, aged seventeen, was four years at the Wawanosh. Has been nearly a year in domestic service and gives every satisfaction.

Trusting that the above report may be adjudged satisfactory.

I have the honor to be, Sir,

Your obedient servant,

EDWARD F. WILSON.

MOHAWK INSTITUTION,

BRANTFORD, ONT., 11th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to transmit to you a report on the Mohawk Institution, for the year ended 30th June, 1891.

Attendance.

During the year fifteen boys and thirteen girls entered, and sixteen boys and fourteen girls left the institution; the number on the books 31st December, 1890, being ninety.

The periods of attendance of the pupils who left during the year, were as follows:—

Under 1 year	1
From 1 to 2 years	7
do 2 to 3 do	14
do 3 to 4 do	5
do 4 to 5 do	2
do 5 to 6 do	1

Average attendance of boys, two and a-half years; girls, two years and five months.

The attendance has become more uniform; only one pupil attended less than a year (she went home sick), and only one remained longer than five years. In 1880 eight pupils attended less than a year, and five more than five years.

The applications for admission continue to exceed the accommodation of the institution.

The average number of pupils boarded and clothed was ninety-one.

The following improvements have been made:—

(a.) Building a brick basement to the boys' play-house with lavatory, hot and cold shower baths, dressing room, in which each boy has a separate locker, a boot shelf and towel rack.

In the upper floor are a reading room, clothes press, play room and trunk room, forming altogether a most complete home for the boys, whilst it is so situated as to afford a refuge in the event of a conflagration in the main building.

(b.) Putting electric (incandescent) lights into the class rooms and sewing room.

(c.) Constructing an officers' dining hall in the basement of main building.

(d.) Building a furnace room in boys' department, so as to remove furnace from dining hall.

(e.) A new cooking, baking and hot water apparatus in kitchen and scullery.

(f.) Adding a third organ for the girls to practice upon. Every girl in the upper school now receives daily instruction in instrumental music.

Health and Conduct.

An epidemic of influenza visited the school early in the year and caused interruption to the usual routine, as few pupils or officers escaped its attack. Though in some cases the sickness was severe, no fatality occurred. One girl (a pagan Indian) positively

refused to take the medicine prescribed for her, on the ground that "white medicine no good for Indian." I was obliged to ask her friends to remove her. I regret to say she did not recover.

Beyond this the general health of the inmates has been good and no death has occurred in the institution during the last ten years.

The conduct of the pupils has been fair. Six boys absconded immediately on the reopening of the school after the summer holidays, for which, I believe, the system of allowing partially trained lads a period of unrestrained license is responsible, as no others ran away during the previous twelve months, nor have any done so since.

All pupils are now admitted upon written agreements that they shall remain for not less than two years and without any vacation; that those who go home upon the completion of their term must, if they wish to re-enter, make application within thirty days. By this system undesirable characters are eliminated and those only who are deserving are re-admitted. The result is already apparent, and I am convinced that more lasting effects will result from even two years continuous training than from four years attendance under the old system of an annual return to former habits and evil surroundings, which entirely unfit the majority of pupils for further training and in all cases greatly retarded their progress in English speaking.

Education.

The class work has been well done and good progress effected. Four pupils passed the examination for entrance to the Collegiate Institute, and are now taking their special course of training as teachers of Indian schools, viz. :—Francis Styres, Christie Anderson, Reuben Tobias and David Benedict.

Farm.

The results of the farming operations for the year have been most gratifying to me—in fact, they have far exceeded my most sanguine expectations.

The rainfall was above the average and especially benefited the light and gravelly soils of which this farm is chiefly composed. We harvested one thousand two hundred and seventy-five bushels of wheat, one thousand four hundred and ninety-five bushels of oats, two hundred bushels of pease, one hundred and fifty tons of hay, nine hundred and ninety bushels of corn (unshelled), and six hundred bushels of potatoes, besides other roots, corn fodder and garden vegetables.

Trade Shop.

The balance in favour of this department is small, as there has been very little work done in which profit could be gained, nearly the whole operations being confined to improvements and repairs at the institution, which are charged at actual cost.

It is a great disappointment to me that I cannot induce more lads to remain long enough in the trade shop to gain a fair knowledge of the business, As soon as they obtain a little experience in the use of tools they imagine they are worth more than they get and, are easily led by their friends (?) to seek employment elsewhere, so that few attain to anything like a fair knowledge of their trade.

In reviewing the results of the year's work I am on the whole satisfied, finding, as I do, that substantial progress has been made and that the outlook affords encouragement for future effort.

There is great improvement in the condition of the Indian dwellings, but the advance is most marked in the dress and manners of the younger women and girls.

Formerly it was very rarely that a girl came to the institution provided with under-clothing and night dresses; these are now becoming necessities. The highly-coloured

cotton kerchiefs have been replaced by hats; jackets are taking the place of blankets and shawls, and neatness is considered more attractive than flashy colours and tawdry ornaments.

Increasing necessities demand a wider range of, and more continuous, employment, and this results in a large increase in the number of youths of both sexes seeking occupation away from home, the boys as farm-hands and the girls as domestics; in the latter class the increase is very marked.

I have the honour to be, Sir,

Your obedient servant,

R. ASHTON,

Superintendent.

To the School Board of Six Nations' Indian Reserve:

GENTLEMEN,—I beg to submit my report for the year ended 30th June, 1891.

FINANCIAL STATEMENT.

Receipts.

To Balance brought forward	\$ 675 99

The two schools, "Stone Ridge" and "Red Line," formerly under the control of the Methodist Mission Board, were transferred to this Board on 1st January, 1891, the Methodist Conference to pay the sum of \$250 per annum towards the general fund of the School Board, and to appoint one representative at the same.

W. Wilkinson, Esq., M.A., Principal of the Brantford Public Schools, was appointed a member of the Board by the Methodist Conference.

The "Stone Ridge" school was not re-opened by the Board, as it is situated within Section No. 5.

The "Red Line" school becomes No. 1 on the list of Board Schools, and its condition during the past six months is shown on the tabular statement. The school-house is not fit for the purpose. It is situated on the northern limit of the reserve and is very poorly equipped. It is recommended that a new schoolhouse be immediately erected on the north half of Lot 30, Concession III.

School No. 2 was not opened during the first half of the year, the Board having decided to remove it. On petition, however, of the residents of the School Section it was reopened on 1st January, 1891, with Miss Kate Maracle as teacher.

Though there is an increase of fifteen on the roll of the schools, the average attendance for the year was one lower than last year. This was owing in part to an unusual amount of sickness during the spring months.

The superintendent has visited each school once a fortnight, and reported upon the same at the meetings of the Board. His report on buildings and grounds at the end of the year is as follows:—

Nos. 2, 5, 6, 7 and 11—in good order.

Nos. 3, 8, 9 and 10 require some little repairs, chiefly to fences, and at No. 6 the closets should be masked. It is recommended that all necessary repairs be immediately executed.

Lieut.-Col. J. T. Gilkison, Visiting Superintendent of the Six Nations, and for several years chairman of this Board, having been placed upon the retired list by the Indian Department, ceases to be a member of this Board. Upon his retirement, the members of the Board passed a resolution expressing their appreciation of his long and valuable services and the deep interest he has shown in the schools under their control.

Members of the School Board:—

REV. R. ASHTON,	} <i>Representing the New England Company.</i>
REV. D. J. CASWELL,	
E. D. CAMERON, Esq.,	<i>Representing the Indian Department.</i>
CHIEF JOAB MARTIN,	} <i>Representing the Council of the Six Nations.</i>
CHIEF LEVI JONATHAN,	
CHIEF NELLES MONTURE,	
W. WILKINSON, Esq.,	<i>Representing the Methodist Conference.</i>
REV. I. BEARFOOT,	<i>Superintendent.</i>

I have the honour to be,

Your obedient servant,

R. ASHTON,
Honorary Secretary.

Read and adopted as the report of the Board, 29th August, 1891.

R. A.

CAUGHNAWAGA, QUE., 31st August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my report for the year ended 30th June last, together with a tabular statement on the affairs of the Iroquois Indians of Caughnawaga.

There were seventy-seven births and forty-nine deaths during the year, resulting in an increase of forty-five. This increase, however, includes the return into the tribe of several of its members who had absented themselves.

Both our schools, boys' and girls', have given great satisfaction; but the progress achieved by the girls was greater owing to their regularity in attendance at school.

I am very happy to be able to state that the Indians are far more zealous in the tilling of the land than heretofore. Quite a number of them now reside on their hold

ings, and it is hoped that with the good harvest they expect to realize this fall, they will be able to live comfortably next year.

In general the affairs of the tribe are prosperous and flourishing. The reserve has been free from all kinds of diseases during the year.

I have the honour to be, Sir,

Your obedient servant,

A. BROSSEAU,

Indian Agent.

ST. REGIS, QUE., August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit my report and tabular statement for the year ended the 30th June, 1891.

The crops on the reserve and on the different islands for the last year were not as good as usual. The grain crops were a general failure through this section, but the Indians in general managed to get through the winter without asking for any assistance from the Government. They have a ready sale for all the baskets, lacrosse sticks, bead work, etc., which they manufacture, the proceeds being from eight to ten thousand dollars a year; this amount, with the products of the soil, keeps them in very good circumstances.

Many of the Indians and their families travel from one place to another, berry picking, hop-picking, and basket-making where wood can be easily had; and many of them are employed as pilots to run the Long Sault Rapids with rafts or drams of timber; some go as far as Quebec, for which they receive good pay.

I am much pleased to report that the Indians for the last three years have greatly improved in farming, and in building fences, repairing and putting up new houses.

The sanitary condition of the Indians has been satisfactory, there having been no contagious disease on the reserve. The number of the band at the last distribution of interest money was twelve hundred and two, being an increase of seventeen. The five Indian schools have been kept open regularly, with a fair average attendance. I must also mention that the Rev. M. Mainville is, as usual, still attentive to the interests of the Indians under his charge.

I have the honour to be, Sir,

Your obedient servant,

GEORGE LONG,

Indian Agent.

CACOUNA, QUE., 1st September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit to you my report, together with a tabular statement, for the year ended the 30th June last.

There were seven deaths during the year, mostly all the result of pneumonia and pleurisy.

The many tourists who come to our water resorts every year, never fail to purchase a quantity of Indian curiosities; but unfortunately the number of widows is increasing and the population proportionately decreasing, so that progress is retarded. The wood required for the manufacture of Indian curiosities is becoming every year more scarce, and with only a few men able to work, it is not an easy matter for those to support their families. Our Indians have also to compete with the Indians of the surrounding localities, who come here when the tourists are here, to sell their own wares. The men

are often engaged by the tourists to guide them to the different fishing and hunting places.

The Government has made these Indians very happy in having purchased a reserve for them at Cacouna Point.

They will now be able to improve their houses and build others.

I have the honour to be, Sir,

Your obedient servant,

NARCISSE LEBEL.

Indian Agent.

MARIA AGENCY, QUE., 2nd October, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report on the affairs of the Micmac Indians of Maria for the year ended the 30th June last, together with a tabular statement for the same period.

The Indians of my agency have suffered greatly during the past two years from "la grippe" and other ailments.

The crops look very well and promise an abundant harvest.

I have the honour to be, Sir,

Your obedient servant

J. GAGNÉ,

Agent.

LAKE ST. JOHN, QUE., 17th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my report, together with a tabular statement, for the year ended the 30th June last.

Consumption and "la grippe" have caused several deaths among the Indians during the year, and this circumstance, together with the absence from the reserve of two Indian families, caused a decrease of 11 in the population.

In general, hunting has proved successful, but no progress has been made by the Indians in agriculture since my last report. Hiring themselves as guides to tourists, and the manufacturing of birch canoes during the two months they spend on the reserve, form their chief occupation. Some, however, made small clearings on their land. Two horse-rakes have been purchased by two of them, and others intend to band together to procure a mower next year.

The crops this year are most promising, except hay, which has suffered from drought. Last year's harvest was an average crop. The prosecution of liquor sellers and the exercise of strict watchfulness to secure observance of the law is securing peaceful lives to the Indians. The school has been better attended this year than usual.

A number of patients were treated in the hospital, and five adults and three children died during the year.

Not having visited the Indians of the Lower Saguenay, the relief grants which were sent for them have been duly and economically distributed among them by the Curés of their respective parishes. According to reports received from these gentlemen these Indians are contented.

I have the honour to be, Sir,

Your obedient servant,

L. E. OTIS,

Indian Agent.

AGENCY OF STE. ANNE DE RESTIGOUCHE,
PROVINCE OF QUEBEC, 24th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report, with my tabular statement, concerning the affairs of my agency, for the year ended 30th June last.

The Indians generally live comfortably, particularly those who till the soil ; some of them are even well off.

The grain crop last year was fairly good, but potatoes were partially destroyed by insects.

With the exception of some Indians who always manage to procure intoxicants, their greatest barrier to advancement, and which they succeed in procuring notwithstanding all efforts made to prevent their doing so, they were sober in their habits. It is almost impossible to reach the vendors of intoxicants in such a way as to secure their conviction, for the simple reason that the Indians will not reveal their names.

The Indians of this agency have suffered from the effects of "la grippe" or influenza, during the greater portion of the summer, and some have died from its effects. Fortunately the disease has now disappeared, but those who have suffered from it are still very weak.

The Indians in general are very remiss in sending their children to school ; this is the reason why the pupils are progressing so slowly.

There were twenty-four births and twenty-five deaths during the year.

I have the honour to be, Sir,

Your obedient servant,

S. POIRIER.

Indian Agent.

RIVER DESERT AGENCY, MANIWAKI, QUE., August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report with tabular statement for the year ended 30th June, 1891.

During the past year the sanitary condition of the Indians of this band has been very good, there having been but five deaths, as against twenty-five for the previous year. One of these was a woman aged ninety-one whose death was caused by accident, having been severely burned by a "smudge" fire whilst hoeing potatoes.

During the year there were fourteen births, and nine members were dropped from the pay list, having been absent for three years from the reserve, which leaves the members on the pay list the same as on the date of my last report—three hundred and thirty-six. There are also about one hundred and twelve members of the band who are habitually absent, making the total membership four hundred and forty-eight.

The Indian school on the reserve continues in operation with an increasing attendance. The progress of the pupils is satisfactory.

The crops last season were good. Potatoes, however, rotted after being dug.

The new bridge over the Bitobee Creek, which was under contract to ex-Chief Otjik, was completed last fall at a cost of \$500. Two hundred and twenty dollars was expended on wire fencing, and \$85.00 on the repairs of the Bitobee Road last season. This summer the Desert Road was repaired and extended, at an outlay of \$191. The labour on these public works was performed by members of the band under the supervision of an Indian foreman.

Last winter's hunt was successful. Prices for the different sorts of fur continue remunerative and there seems to be no perceptible diminution in the number of fur-bearing animals.

The Indians engaged in hunting receive from \$200 to \$500 for their winter's work. With these returns attainable from this source it is not surprising that farming is considered merely as a pursuit auxiliary to their main occupation of hunting.

The term of the chiefs having expired, an election was held on 23rd August, 1890, when Peter Tenisco, Louis Pezzendewatch and Louis Comondo were chosen by the band to replace Simon Otjik, Joseph Menass and M. Tehenene the retiring chiefs. Peter Tenisco had previously been Head Chief for three consecutive terms. He is one of the most progressive members of the band and gives an excellent example of sobriety and industry to his people.

Evidences of material progress on the reserve are perceptible. Clearings are being extended, new dwelling houses are being erected, whilst several of the Indians have recently acquired horses, cows and farm machinery.

The great drawback to the advancement of some members of this band is their habit of using intoxicants to excess. It is almost impossible to suppress this owing to the facilities for obtaining whiskey in Maniwaki and vicinity, the Quebec Government having licensed eight places in the village for the sale of liquor.

I have the honour to be Sir,

Your obedient servant,

JAMES MARTIN,

Indian Agent.

AGENCY OF LA JEUNE LORETTE, QUE.,
29th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit to you my annual report together with a tabular statement for the year ended the 30th June last.

The Huron Band of Indians is composed of two hundred and ninety-nine members, being an increase of six over last year.

The sanitary condition of the band has been satisfactory, and the reserve has been free from all contagious diseases.

The trade in snow-shoes and mocassins was not as good as in the previous year—and consequently less remunerative. A certain number of families visited the different watering-places in the Province of Quebec, to dispose of their fancy work and Indian curiosities, but sales were not remunerative.

The operation of vaccination on those Indians who required to be vaccinated last winter, was very successful.

No progress has been made in agriculture since last year, and the harvest was considerably less.

The school was better attended this year than last, and some progress has been made. The average number of the pupils who attended was about sixty.

Those Indians who went hunting last winter were successful, and their beaver-skins and other furs were sold at remunerative prices.

Some of the Indians were again engaged by American tourists as guides, to take them to the hunting and fishing places.

Although the Indians are improving in their habits and in sobriety, there have been, nevertheless, several disturbances in the village owing to the great number of strangers who were drawn to this reserve by the construction of the Quebec and Lake St. John Railway.

I have the honour to be, Sir,

Your obedient servant,

ANTOINE O. BASTIEN,

Indian Agent.

NORTH TEMISCAMINGUE, QUE., 27th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward my annual report and tabular statement for the year ended 30th June, 1891.

The Indians had good crops of potatoes last fall. Owing to high prices for furs and scarcity of work, the Indians have been hunting and, therefore, have not enlarged their clearances during the past year.

I regret to say that some of them obtain intoxicants at the Baie des Pères.

The school has been fairly attended, and the pupils made good progress.

The new schoolhouse being erected on the reserve is nearly completed and will be ready for commencement of school on the 1st September,

I have the honour to be, Sir,

Your obedient servant,

A. McBRIDE,

Indian Agent.

PIERREVILLE, QUE., 11th July, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present to you my annual report, together with a tabular statement, for the year ended the 30th June last.

The Indians composing this band are steadily progressing in the manufacture of baskets, canoes and other articles, which they export every year to places within the United States visited by tourists. They generally leave in the month of June and return about the middle of the autumn.

Some of those Indians employ their money in improving their residences and in the liquidation of their debts, but others—these, however, are the exceptions—spend it in useless things and sometimes squander a portion of it in liquor.

I am glad to be able to say that the general conduct of the Abenaki Indians is very good and that there is little intemperance among them. Were it not for the neighborhood of the whites, some of whom, for the sake of gain, care very little whether they destroy the good effect of civilization, those Indians would be examples of sobriety.

I have the honour to be, Sir,

Your obedient servant,

P. E. ROBILLARD,

Indian Agent.

BECANCOURT, QUE., 20th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit to you my annual report and tabular statement for the year ended the 30th June last.

The Indians made very little progress this year, and some of them experienced great difficulty in getting through the winter, because of the poor harvest of last year, and also because of their improvidence; but thanks to the Department for the assistance given to those who were most in need, their suffering was considerably lessened.

Only one Indian went out hunting this year. They mostly all cultivate the soil to some extent.

Some have been hired by sportsmen to show them the fishing places in the lakes of the Upper St. Maurice.

The Abenakis of Becancourt are great manufacturers of baskets, which they sell with profit.

These Indians suffer nothing in the summer season; they all find something to do; and I am very happy to be able to report that they are now by far more temperate in their habits than they formerly were.

I have the honour to be, Sir,

Your obedient servant,

H. DESILETS,

Indian Agent.

NOTRE DAME DE BETSIAMITS,

SAGUENAY DISTRICT, QUE., 29th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June, last, in connection with the affairs of my superintendency, together with a tabular statement for the same period.

Owing to delay in starting on my tour of inspection, having been taken sick with "la grippe," I could not see the Indians of Maskharo. They had left for the woods when I arrived there, their Missionaries having advised them to leave to avoid exposing themselves to the disease I suffered from, and which was then prevailing all along the coast. None of these Indians, I have heard since, caught the disease.

These Indians and those of the neighbouring localities, were not more successful this year in hunting for fur-bearing animals; but having managed to kill a large number of cariboo, the did not suffer from hunger. They are generally sober in their habits. I left instructions with the agent of the Hudson's Bay Company to distribute to them provisions to the amount of their annual grant when they return to the post, and handed to that gentleman a list of the names of the aged and widows who should participate therein. I will transmit to you the vouchers in connection with this distribution as soon as I shall have received them.

Mingan.

I met all the Indians of this place when I arrived here. Some were suffering from the effects of "la grippe." One woman died for want of proper care, and had it not been for the Missionary, the Rev. Father Arnaud, to whom our thanks are due, there would have been several other victims of that fell disease.

The hunt for fur-bearing animals was not of much account, but having succeeded in killing a large quantity of cariboo, none of the Indians suffered from hunger. Blankets and provisions were distributed to the sick, the aged and the widows. These Indians also keep sober in general, but they are very lazy.

Sept Isles.

Nearly all the Indians of this place were here attending the mission and awaiting my arrival when I reached here. Some were down with "la grippe." Two women and three young men died from pneumonia after I had left the place. The hunt for fur-bearing animals was not very successful, but no one suffered from hunger. Good prices were paid to them for whatever fur they had by the Hudson's Bay Company and other traders. The traders of this and of the neighbouring localities watch closely for those Indians who return home by the River Moisie; they actually go from wigwam to wigwam in order to secure the furs, and they bring intoxicants with them. Liquor it would appear was sold on the reserve in four different places, at night. I had not the good fortune to come across the Stipendiary Magistrate of this district and was consequently

[PART I]

33

unable to prosecute the delinquents. When I passed here cod was plentiful, the same at Sept Isles and at Moisie, but owing to the epidemic then raging the Indians could not fish. I have since heard that they were all in good health. Three families remained at Sheldrake for the purpose of fishing for cod, which was plentiful. Provisions were distributed among the sick and the aged Indians and to the widows.

Godbout.

All the Indians of this place were gathered here awaiting the arrival of both the Missionary and myself. When I visited them their health was good, but in June they had suffered from the effects of "la grippe." These Indians are clean in person and in their houses, and generally sober in their habits. An old widow died during last autumn of old age, and two others, also very old, died, it would appear, from sheer fear of catching "la grippe."

The hunt for fur-bearing animals was not much better than in the previous years. The Indians succeeded, however, in killing quite a large number of sea calves, and none of them suffered from hunger. They could catch fish and porpoises in quantity were they not so indolent. I gave provisions to an old man and to several widows.

Escoumains.

The Indians of this place also suffered from the effects of "la grippe," but in a very light form, during the month of May. Seal hunting was poorly rewarded this year, the same with regard to fur-bearing animals. One of these Indians went out salmon fishing, and he was very successful.

The potatoe crop last year was poor. The Indians had just enough to keep them through the winter, and I had to give them some to use as seed in the spring.

I gave provisions and one blanket to an old widow who has been sick for the last three years, I also gave some blankets to other aged Indians.

The Indian family residing at Tadousac are well behaved ; and none of them were sick during the year.

Betsiamits Reserve.

The hunt by the Indians for fur-bearing animals was not very successful, but they have squandered less money than usual on intoxicants. They sold their furs at good prices to the Hudson's Bay Company and other traders, and no one suffered from hunger. They are all well clothed.

Nearly all those who left for the woods escaped the epidemic, whereas those who remained on the sea coast were all stricken down with it. I have observed that the disease was less severe by far among the children than with grown up people, and of shorter duration.

The medicines which were given to me last autumn by the Department were most useful during that period of sickness, and when I made my tour of inspection I was very careful to take with me all that I had, and I could have made use of more had I had more with me.

I have noticed quite a change for the better with the Indians of this reserve ; they have kept very sober and quiet. None of them went to Quebec or crossed over to the south shore for intoxicants this year ; they were too much afraid of imprisonment. The traders are also more careful as regards giving them liquor, nevertheless, some of these Indians succeeded in obtaining some at Bersimis. It is sold there under license and they use third parties to procure it ; they also got some from trading schooners. I expect that the Stipendiary Magistrate of the district will be here before the departure of the Indians for the woods, and if I can obtain convicting proof, I will prosecute the delinquents.

The potato crop last fall was almost a failure, caused by the drought of last summer, and but few will be harvested this year. The Indians as a rule prefer eating the potatoes which are given to them for seed purposes, and they keep but a very small quantity to put in the ground.

Salmon and trout, on the sea coast and in the rivers, were in abundance this year, but the Indians would not take the trouble to fish. They are as improvident now as they formerly were.

The two Indians accused of murder last year, man and woman, were released on their own recognizance for want of sufficient proof to convict.

The distribution to the sick, aged, widows and orphans was duly made in the course of the year.

I did not mention in the tabular statement this year the families who, for some years past, have been absent from Maskharo, Mingan, Sept Isles, Escoumains and Betsiamits, nor shall I make any mention of them in the census which I am about to make in compliance with your instructions.

I have the honour to be, Sir,

Your obedient servant,

L. F. BOUCHER,

Indian Agent.

SOUTH WESTERN DISTRICT 1ST DIVISION,
FREDERICTON, N.B., 31st August 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present my annual report and tabular statement relating to the Indian affairs of this agency for the year ended the 30th of June, 1891.

St. Mary's Reserve.

This band in the month of May past numbered one hundred and twenty one—fifty-nine males and sixty-two females. During the year there have been five births and two deaths, one of these an adult. This band as in former years derive their living mostly from woodboat loading in the summer season at the Nashwaaksis River and the manufacture of Indian wares. Amongst the latter are the manufacture or building of canoes, which are readily sold to parties in and about Fredericton, and usually realize fair prices. Hunting is only engaged in by a few, as it is not as profitable as in former years. The moccasin trade for the last year or so has been very unprofitable, as the shoepack which is manufactured extensively at Fredericton by a company is preferred amongst lumbermen and has driven the Indian make out of demand, so that basket making etc. are almost their sole dependence for a livelihood. In spring past I supplied them with the usual allowance of garden seeds and potatoes, which were neatly planted in patches about their dwellings, and adds not only to the appearance of the reserve but will also prove beneficial to their families. In view of your letter of instructions regarding sanitary regulation I have to report that this duty was attended to on the approach of fine weather, by the removal of all nuisances from their premises. The health of the band was very good, excepting in April, last, when some fifteen families had "la grippe," and who would have suffered at the time had it not been for the timely aid rendered by the Department; the only sickness this year being from natural causes, and none of a contagious character, and whilst for several reasons I can not report this reserve as a desirable locality for Indian life, yet it must be admitted that there is a marked improvement in the habits and customs of these people. Intemperance is not as prevalent as in former years; only a few are addicted to the use of liquor, and these can only procure it by the most indirect means, as those engaged in the business will not sell to any Indian for fear of prosecution.

The school for the past year has been under the supervision of Miss M. H. Martin. The teaching sessions are three hours in the forenoon and two in the afternoon. The number on register ranges from twenty to twenty five. Their studies consist of writing, arithmetic, geography, catechism, drawing, &c. A number of children are

[PART I]

35

making rapid progress, and all are doing fairly, the average for the year being thirteen and three-quarters. Excepting the holiday season, the school has been regularly taught. The school is also regularly visited on Friday of each week by the Rev. Father Kiernan, their Missionary, who is ever watchful of their religious training and knowledge of catechism. The cleanness of the school room and surroundings and the comfort of the children have also been carefully seen to.

King's Clear Reserve.

This reserve, situated eleven miles distant from Fredericton, had in May last a population of one hundred and one. The births for the year were four, and the deaths three; one of the latter, familiarly known as "Capt. Tomar," aged ninety years, came to his death by accidental drowning. These Indians are well situated, their lands are good and very productive. Last year they gave considerable attention to farming; but owing to the dry season and the heat during harvest weather, their crops were almost a total failure. This season they have again farmed their respective lands; and I am pleased to report that, should there be good harvest weather, there will be an abundant crop, including hay, grain and potatoes. The other pursuits engaged in by this band are the manufacture of Indian wares. A few of the young men engage as labourers in the lumber woods, river rafting and stream driving, from which they secure immediate returns, that are always much needed. Sanitary measures, directed to be enforced by you, received the proper attention in the latter part of April last. The dwellings are all situated on a hillside, and in close proximity to the river, where the drainage at all seasons is good. These Indians were free from sickness of a contagious nature during the past year, the ordinary sickness prevalent amongst them being entirely the result of natural causes. In matters relating to school attendance and their religious affairs, they are especially favoured. Their church, priest's residence and cemetery are situated in the centre of reserve. The Rev. Wm. O'Leary is the resident clergyman, and at all times manifests the deepest interest in all matters appertaining to their moral and temporal welfare. Amongst the improvements noticeable at this reserve for the past year are the erection of one dwelling and the shingling of several others. In addition to this they have been enabled, through the kindness of friends in the vicinity of Fredericton who subscribed some one hundred and fifty dollars to commence the erection of a temperance hall. The building is now framed, boarded in, and the roof shingled; work, however, is suspended for the want of funds, which is to be regretted, as the building would prove useful in stimulating temperance principles amongst them.

The school, in which the Indians take a deep interest, has been taught by Miss McNulty for the past term. The attendance for the year has been very regular. The number of children on the reserve who are entitled to attend school is eighteen; these for the year have made an average of fourteen and two-thirds. The school is in session five hours per day; the subjects taught are reading, writing, geography, arithmetic, etc., in which the children are making fair progress. Due regard is always had to the health and comfort of the children. Occasionally the building is whitewashed, the floors, wood-work and outside premises cleaned, making the schoolroom both pleasant and healthful for those in attendance.

Carlton County.

The Indians in this county number eighty-four. The births for the year were three and the deaths three, the latter were adults; the cause of death in two instances was old age, the other from accidental burning. Seven families live on the reserve situated three miles below Woodstock; the remainder of the Indians live in shanties at Upper Woodstock and in other sections of the county. Those living on the reserve and elsewhere derive their sole living from the manufacture and sale of Indian wares. A few are very indigent, requiring, as shown by provision returns, considerable assistance. Yearly I supply them with a few seeds, to induce them to raise more or less potatoes, &c., but, as a rule, they prefer trading in their natural employments to that of any kind of farming.

The balance of the Indians of this agency are located as follows: At Oromocto, Sunbury County, there are forty-four; at Upper Gagetown, Queen's County, twenty-seven; at Opahauqui, King's County, twenty-eight; Charlotte County, twenty-nine; and St. John County, fourteen. Mostly all of these subsist from the sale of Indian wares, which are generally sold to farmers and traders, the Indians taking in return either trade or money. A few in each place, excepting St. John, receive seed potatoes that are planted on friendly white neighbours' lands, and whatever produce is raised is usually divided amongst their relatives. Owing to exposure, particularly in winter season, considerable sickness often occurs amongst them. At Oromocto the Indians were taken down with "la grippe" in April last, and it was fully a month before they recovered from this epidemic. In the meantime their wants, like those of St. Mary's, had to be provided for by the Department. In summer, however, they enjoy life, and are seemingly a happy people.

The total population of this agency for the current year is four hundred and fifty-five. During the year there were fourteen births and sixteen deaths. Last year I reported the total number four hundred and seventy-four; consequently there is a falling off of nineteen, which is accounted for by the removal from my agency to the United States and border Provinces of this number.

I have the honour to be, Sir,

Your obedient servant,

JAMES FARRELL,

Indian Agent.

NORTHERN DIVISION,

FREDERICTON, N.B., 26th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the Counties of Madawaska and Victoria, for the year ended the 30th of June, 1891.

Tobique Reserve.

This reserve, situated at the junction of the Tobique and St. John Rivers, has a population of one hundred and eighty-nine, the births exceeding the deaths by two. The occupations of the band for the past year were confined chiefly, with the exception of the aged and infirm, to the lumbering business, namely, axe-men, stream driving, rafting, acting as guides to sportsmen, and in the manufacture of Indian wares, from which they derive remunerative wages. In the latter part of May last, and on receipt of seed allowance, they devoted considerable attention to planting and sowing, and whilst they cannot be classified as practical farmers, they, as a rule, plant sufficient potatoes to supply their needs for each season. The facilities for farming in connection with this reserve cannot be surpassed in New Brunswick. The Indians, however, with but a few exceptions, are not prepared to devote their whole time to agricultural pursuits.

Sanitary measures for the preservation of health receive yearly attention by those Indians, for on the approach of fine weather the past spring, all garbage, noxious weeds, etc., were removed from the yards and premises surrounding their dwellings. The water supply in connection with the reserve for domestic purposes is carried in pipes from the adjoining hills and is of the purest quality. I have also to add that the Indians of this reserve display considerable taste in their respective holdings. Their houses are kept clean both within and without—they are neatly painted—and when added to this, the new hall, and recent repairs and painting of their church, make Tobique Point one of the most picturesque spots on the River St. John.

The school, in which the Indians are deeply interested, has been under the supervision of Miss Davis, a competent and earnest worker, for the year past. A few of the children are not regular attendants; those, however, that attend regularly are

progressing rapidly in their respective studies. The daily sessions of teaching were three hours in the forenoon and three in the afternoon. The teaching consists of both secular and religious instruction. Frequent examinations of this school are held by their spiritual director, the Rev. J. J. O'Leary, who at all times manifests a deep interest in the welfare of the band. The average attendance of the pupils was fourteen.

Edmundston Reserve.

The band comprises but five families; their total number is thirty-eight. Their lands are very productive but not farmed to advantage. Yearly they receive \$30.00 worth of seed potatoes, oats and buckwheat; this for want of horses is usually farmed on shares by their white neighbours, who as a rule, reap the most benefit. This year I have succeeded in suppressing, to some extent, this mode of farming, and have to report, as witnessed during my recent visit to their reserve, that their crops are fully a third more than last year, and from every appearance, if carefully harvested, will be sufficient, with their other industries, for the maintenance of their families the coming winter.

The Indians of this agency were very free from sickness, except cases arising from natural causes, the past year. The total number of births for the same period was eleven, and the deaths nine; two of whom were adults, the remainder being children.

In closing my remarks, I beg to report that the Indians of this agency, with but rare exceptions, are a very industrious and thrifty people. Their habits are temperate and law-abiding, and wherever engaged as labourers, in matters of dealing or otherwise, they always command the respect and esteem of their white neighbours.

I have the honour to be, Sir,

Your obedient servant,

JAMES FARRELL.

Temporary Indian Agent.

ANNAPOLIS, N.S., 30th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit herewith my tabular statement on the Indians of my agency, for the year ending the 30th day of June, 1891.

I have very little change to report as to the condition of the Indians of this agency. None of them live on the reservation. They are very industrious, making baskets and other fancy work; the men are coopers and make mast hoops when required. There was some sickness during the winter; but I am pleased to report that they have been almost entirely free from sickness during the past summer. One Indian, who did not belong to my agency, died here. There have been three births, increasing the Indian population from eighty to eighty-three, of whom sixteen are away from home.

I have the honour to be, Sir,

Your obedient servant,

GEO. WELLS, Sen'r,

Indian Agent.

BEAR RIVER RESERVE, DIGBY Co., N.S., 25th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour of again submitting my annual report and tabular statement for the year ended June 30th, 1891.

There are no changes of importance to note in the affairs of the Indians of this district, as they still pursue the callings of former years, with some improvement in farming on the reserve this spring. They have taken more interest in getting their

planting done than formerly, and have more crop in the ground than usual. Every family on the reserve, with one exception, has a good field of potatoes and other vegetables, which promise a large crop.

The Indians suffered much from sickness the past winter and spring, the children with whooping cough, the adults with la grippe; in consequence there were ten deaths, all young, except two.

There has been but three births, which leaves the population one hundred and forty-seven, three less than last year, with the addition of two families that have taken up their residence on this reserve from the County of Annapolis.

The Indians have enjoyed good health of late, and have plenty of employment as guides for sportsmen, in shooting porpoises (which are plentiful this spring), and in making mast hoops, jib-hanks and baskets.

The school on the reserve has not been as efficient as would be desired, owing partly to the teacher being disabled by a fall, which closed the school for some time, and partly to want of interest manifested by parents and pupils; but the Department has procured the services of another teacher who will give his whole time to the work, and the Indians have promised to assist in making the school better by sending their children more steadily and promptly, which it is hoped they will do in future.

I have the honour to be, Sir,

Your obedient servant,

F. McDORMAND,

Indian Agent.

YARMOUTH, N.S., 8th July, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

I have but little change to report as to the condition of the Indians of this agency, very few of them remain permanently on the reserve; consequently little is done in the way of planting. Last year the potatoes suffered from blight, which was very disappointing to those who had planted for the first time, and they are, therefore, more inclined to seek employment among the whites. They are very good labourers when employed by white men, and they work much better for them than they do for themselves.

The health of the Indians for the past year was good. There were but three deaths during the year.

I have the honour to be, Sir,

Your obedient servant,

GEO. R. SMITH,

Indian Agent.

AGENCY No. 2, KENTVILLE, N.S., 26th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to enclose to you tabular statement and report for this agency for year 1891. The Indians of this agency are quiet and peaceable, and, as a rule, industrious. There is but very little drinking going on amongst them, as it is very difficult for them to procure liquor. They are inclined to settle upon land of their own lying in the neighbourhood of some town or village. They will manage to procure from one to six acres, and, with the seed obtained from the Government, put in a small crop, enough generally for their own consumption, and work at different employment during

the rest of the time, such as labourers, guides, team driving, coopering, basket making, etc.

I have the honour to be, Sir,
Your obedient servant,

CHARLES E. BECKWITH,
Indian Agent, District No. 2.

CALEDONIA, N.S., 27th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891. I have little change to report this year regarding the Indians of this county. The crops so far look exceedingly good.

The Indians of Mill Village and Milton are an industrious class of people and earn considerable money during the summer and autumn fishing and working about the mills.

Those at Greenfield and Caledonia Corner are ever ready and willing to do anything that will bring them fair wages. I know of no cases of destitution amongst them. The health of the Indians of this county during the past year has been very good.

In Lunenburg County there has been much sickness and several deaths during the past winter.

Farming is carried on with the usual vigour at New Germany and Gold River. At Bridgewater the Indians work at the mills and at basket-making.

The Indians of both counties are an industrious, quiet and sober class of people.

I have the honour to be, Sir,
Your obedient servant,

THOMAS BUTLER,
Indian Agent.

SHUBENACADIE, N.S., 10th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I enclose herewith tabular statement for the year ended 30th June, 1891.

I have nothing particular to report, there being no noticeable difference in the condition of the Indians of this district.

During the past year there has been considerable sickness among them. I think they are generally improving in their habits, there being not nearly so much drunkenness as formerly among them.

Some of them are getting quite aged and unable to work, and several young men do not seem disposed to farm, but prefer to shift about from place to place.

The crops this year, with the exception of potatoes, are good.

I have the honour to be, Sir,
Your obedient servant,

JAMES GASS,
Indian Agent.

TRURO, N.S., 13th October, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour of submitting my annual report and tabular statement for the year ended 30th June, 1891.

The Indians of this county are still progressing. Whilst not increasing in numbers, as a body they are much more comfortable. Truro being a railway centre, they get employment on gravel trains, at railway fencing and in the surrounding mills; this helps them to tide over the long winter.

They only raise potatoes, which this year, owing to a rot, has not been a good crop. The past winter was one of much sickness and several deaths occurred, principally from pulmonary diseases.

On the whole they are a quiet and orderly class, and are improving slowly but surely.

I have the honour to be, Sir,

Your obedient servant,

D. H. MUIR,
Indian Agent.

DISTRICT No. 7,

PARRSBORO', CUMBERLAND Co., N.S., 28th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit for your inspection my annual report and tabular statement for the year ended 30th June, 1891.

While I have tried very hard to make this statement as accurate as possible, I feel that it is only fair to myself to remind you that at the end of the fiscal year I had been agent for only two or three months, and to inform you that my predecessor had left the country when I had received my appointment, and as a consequence I had to gather my information as best I could, mostly from the Indians themselves.

These Indians are as a rule industrious, but improvident. Some of them work for the white people at chopping during the winter, and in the mills and farms during the summer season; more of them make baskets and tubs. A few of the young Indians earn considerable money by acting as guides for hunting parties.

Most of them planted the seed furnished by the Department and raised very fine crops. There are none of them, however, who put by anything for a rainy day, and as a consequence the aged and sick and disabled would be in a wretched condition were it not for the food and clothing supplied to them by the Department.

During the last few months of the year there was a great deal of sickness. A large number of the children and some grown up Indians suffered from measles, and afterwards "la grippe" affected very many of them. From the latter disease a number have never fully recovered, and, as a result, several of the young Indians are in the second or third stages of consumption. During the year there were seven births and six deaths, making an increase in population of one.

I have the honour to be, Sir,

Your obedient servant,

F. A. RAND,
Indian Agent.

PICTOU, N.S., 1st October, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following as my annual report upon the condition of the Indians and Indian affairs within my district.

I am happy to report an improvement among them in the way of adapting themselves to the methods of civilized life. The wigwams are fast disappearing, and houses comparatively comfortable taking their place. Other domestic comforts are also being introduced. The instinct of independence and self-respect is showing signs of life; for

they depend less for a livelihood on begging than in former years. The majority of the men are industrious, and look for work, as other labourers do, and command the same wages. Their indigence, as a rule, does not arise as much from not earning as from a lack of domestic economy. The Indian seems to take to a labour that shows immediate results; and I consider this a reason why he takes comparatively little interest in farming. Farming under present circumstances is necessarily unsatisfactory; they have no cattle to enrich the soil with manure, or to restore its exhausted strength, and they are too poor to invest in artificial fertilizers.

The principal occupation of the Indians in this locality is in making butter tubs and pick handles for the coal mines, to provide material for which they seem to lay undisputed claim to the forest far and wide. In morals, I must say that their lives are commendable—there are a few drunkards, but not so depraved that they do not make an effort to reform. They are essentially religious. They assemble annually on Indian Island, on the feast of St. Anne, their patron Saint, and remain there for about two weeks; on which occasion they attend specially to their religious duties, and also to temporal matters which concern the whole tribe. It is on this occasion that the influence of the Priest and Agent is most effective, and it is for this reason that I wish to offer all the inducements possible to have them assemble there.

We have no school on the reserve; because it is not remunerative enough for any teacher to open a school.

There has been no contagious disease among the Indians for some years. It may be remarked that the population given in the census of this year is in excess of last year's. Some of those who were absent from the reserve for two or three years have returned, and young men getting married in other districts added in each case one more to the population of this reserve, and it is possible also that some escaped being marked down.

The crop promises a fair yield. Fishing is, I may say, abandoned by them, for it is so uncertain on this coast.

I have the honour to be, Sir,
Your obedient servant,

RODERICK McDONALD,
Indian Agent, District No. 8.

HEATHERTON, ANTIGONISH COUNTY, N.S., 25th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

The condition of the Indians of this district has not materially changed since my last report. Their health, as a general rule, is not good. Three of them died this year from the prevailing ailment—consumption; and many more are suffering from the same complaint. Their progress in agriculture is slow; they raise a considerable quantity of potatoes, but with regard to other crops their efforts are not very successful. The crops look very well this year, however. The Indians of this district are, with few exceptions, sober and industrious, but even with the best of their providence is the cause, at certain seasons of the year, of their being in want.

I have the honour to be, Sir,
Your obedient servant,

W. C. CHISHOLM,
Indian Agent, District No. 9, N.S.

GLENDALE, RIVER INHABITANTS,
INVERNESS COUNTY, N.S., September, 1891.

The Honourable
The Superintendent General of Indians Affairs,
Ottawa.

SIR,—It again becomes my duty to inform your Department of the state of the Indians under my supervision. The tabular statement, which I forward herewith, contains information regarding them which would be superfluous to produce here.

I am happy to be able to report an unmistakable improvement in the condition of all the Indians of my agency. Each succeeding year shows more clearly than the preceding one that it is only a question of time to find them good and useful citizens, provided only that they are well treated and have fair opportunities of advancement.

Among them agriculture is yearly being better attended to; but they do not yet devote as much attention to that important industry as I would wish. Their hay this year is very good. Their other crops, particularly potatoes, promise an excellent yield; but I am sorry to say their grain fields are yet very limited in extent. Considering the failure of last year's crops throughout Nova Scotia and Cape Breton, their thrift and contentment was admirable.

Those who were more likely to suffer for want of seed in the early part of the summer received timely relief through the funds so generously placed at my disposal by your department, for which they felt very grateful.

Some of the white people, contiguous to the band of Whycocomagh, to whose trespasses I had occasion to refer in some former reports, are still using valuable portions of the Whycocomagh and Malagawatch Reserves.

It is a matter of regret that whites, who profess to be Christians, should invariably, when an opportunity presents itself, do their utmost to impose upon and defraud of their rights the Indians who never trespass against them. There is one trait in the character of our Micmacs which cannot be too highly praised. Living as they do, they frequently suffer many privations. This evening they may not have to-morrow's breakfast in reserve for themselves and families; and yet a case of theft from their white neighbours is, I believe, utterly unknown. The gradual elevation of a race with a fine characteristic like this so firmly impressed ought not to be despaired of.

The children attending the Indian school on the Whycocomagh Reserve are under the tuition of Mr. John McEachen, an excellent teacher; and those who attend regularly are making satisfactory progress.

During last year there were six births, and three deaths among aged people.

As a class, the Indians with whom I have to deal are sober and very well conducted and very industrious. Cases of drunkenness are of very rare occurrence among them.

I have the honour to be, Sir,

Your obedient servant,

D. McISAAC,

Indian Agent.

CHRISTMAS ISLAND, CAPE BRETON, 7th October, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I enclose herewith the tabular statement for the year ended 30th June, 1891.

There is but very little to remark in regard to the condition of the Indians of this agency since my last report. Their health, in general, has been good. They were free from infectious diseases, but pulmonary troubles and hemorrhage are, I think, getting more frequent among them. They, themselves, attribute this to heavy loads they have to carry long distances. All kinds of wood suitable for coopering, basketmaking, etc., are exhausted on their reserves, and they must now go a long way in search of proper material. In consequence thereof they overload themselves when they find it; and to

this they ascribe the frequency of chest and lung complaints among them. One regrettable thing I have to mention in connection with this is the tendency on their part to leave the reserve and settle in the vicinity of towns, villages and mines. On the reserve, they are as far away from market as from material necessary for prosecuting their handicraft. None of them live exclusively by farming, and as they find it almost impossible, for the reasons above stated, to ply their trade and continue farming at the same time, many of them forego the latter, remove to places within easy reach of a ready market and confine themselves wholly to an occupation more congenial to their nature than that of farming. Some of these are doing very well; but some, I regret to say, are neither morally nor materially benefitted by the change. Proximity to danger has been the downfall and ruin of not a few.

I have the honour to be, Sir,

Your obedient servant,

A. CAMERON,

Indian Agent, District No. 13.

DISTRICT NO. 15, BARRINGTON, N.S., 26th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement in connection with the Indians in this agency for the year ended 30th June, 1891.

The condition and circumstances of the Indians here have not undergone any material change since my last report, except that during last winter and spring there was an unusual degree of sickness amongst them, "la grippe," rheumatism and weak lungs being their chief enemies. I have to report two deaths and a few removals, but those who have removed will likely return. Last winter some of the saw mills in which they sometimes found employment were closed, which rendered the assistance they receive from the Government doubly acceptable. Their little gardens and potatoes look excellent.

It is very difficult to persuade Indian children to attend the public schools with white children, but there are exceptions, and one worthy of special mention is Rosie Mooney, a very bright and intelligent girl of seventeen years, who is well advanced in her studies. This summer she attended a teacher's examination here, and she is very sanguine of receiving a teacher's license, in which I trust she may succeed.

I have the honour to be, Sir,

Your obedient servant,

E. T. FERGUSON,

Indian Agent.

EGMONT BAY, P.E.I., 25th July, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my report together with a tabular statement for the year ended 30th June, 1891.

There was no remarkable change or progress amongst the Indians of Prince Edward Island since my last report.

Those who live on the reserve extend their farming operations every year, but I regret to have to report that the oat crop of last fall was almost a failure; from present appearance, however, the crops this fall will be very good.

I am very happy to be able to report great improvement in both the moral and social condition of the youth of Lennox Island. They have established a temperance society, each member having to pay 25 cents yearly.

Those who took the initiative in the formation of this beautiful society were the first pupils of the school of the island. They already number twenty members.

The school is now well attended ; there were no less than thirty pupils present on the occasion of my last visit. I succeeded in securing the services of a good teacher. He resides on the island and is much esteemed by all the Indians.

There was considerable sickness amongst the Indians during last winter, and several died from inflammation of the lungs and pneumonia, causing a slight decrease in the population this year.

Morell Reserve.

There are only five families on this reserve. Two of these families are well-to-do. They live from the produce of their lands, and from all appearance the crops this year will be good.

I have the honour to be, Sir,
Your obedient servant,

JEAN O. ARSENAULT,
- *Indian Superintendent.*

MANITOBA SUPERINTENDENCY,
PORTAGE LA PRAIRIE INDIAN AGENCY, 22nd August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit for your information my annual report, with tabular statement, showing the state of the Indians under my charge, with an inventory of Government property and the approximate value of the same, for the year ended the 30th June, 1891.

The Rosseau River Bands.

In reference to these bands I have very little to add to my report of last year, as far as agricultural pursuits are concerned. These Indians pay very little attention to farming ; the occupation of farming to them seems to be too slow in bringing in the returns which they look for. They prefer working at something for which they can realize every evening the value of their day's labour, such as digging seneca (snake root), &c.

The crops on this reserve were fairly good. The yield of wheat was nearly twenty bushels to the acre. The potatoes were very good, but very few of the Indians remain on the reserve to put in crop. Antoine, one of the Councillors, raised two hundred and fifty bushels of a very fine quality. The hay crop was very good, but for want of a mower they did not put up much themselves. If it were not that I got farmers in the neighbourhood of the reserve to cut the hay on shares, taking two-thirds and leaving one-third in stack for the Indians, it would be difficult for me to get the Indians to cut enough to keep their stock, as they are generally away digging snake root at the time they should be making their hay. When I was at the reserve on the eighth of this month there was only one man on the reserve besides the Chief, who is too sick to leave.

The crops on this reserve this year look very well—there are one hundred and thirty-four acres of wheat, and about twenty-seven acres of wheat at the Rapids. The wheat on the reserve proper looks very well, and there are thirteen acres of barley—the barley is very heavy.

The Long Plain Band.

The Indians of this band are given more to roaming about than formerly ; only a few of them remained on the reserve last spring. I could not get the threshing done on this reserve until this spring. All the machines in this part of the country are run by steam and are very heavy, and while there is anything to be done in other places, it is impossible to get any of them to go there—the distance is fifteen miles, over a pretty rough road.

There were eleven hundred bushels of wheat from the thresher: eighty of this belonged to three of the Indians. The potatoes were a very good crop; there were altogether on the reserve over three hundred bushels. These Indians put up a sufficient quantity of hay to keep their cattle, and had some to spare.

The crops on the reserve this year are not looking very well. With the exception of about sixteen acres of the newest part of the land the soil is very sandy, and has been cropped too long without rest, and the month of May and greater part of June were too dry to bring on the crop on this soil.

The hay lands on this reserve are too wet to allow of cutting until after harvest, and it will be very difficult for them to get enough for their cattle. This band of Indians are getting quite a stock of cattle, there being now about thirty-five head of cattle, young and old, on the reserve, and the Indians of this band have thirty ponies.

The Swan Lake Band.

The Indians of this band are still divided; nine or ten families live on the reserve at Swan Lake and the balance of the band remain at the Gardens at Hamilton's Crossing of the Assiniboine River.

The wheat crop on this reserve was almost a failure owing to the dry spring and the excessive hot winds in the month of June, which brought the growth of crops to a standstill until the rains fell in the beginning of the month of July, and, although the crops revived very much and became a very heavy crop of straw, it was too late for the grain to mature. There were seven hundred and forty bushels as it came from the thresher, but it is only fit for feed.

The Indian Gardens.

There were thirty-four acres of wheat here put down by the Department. The crop was heavy, but did not ripen in time. The quality of the sample was not very good, and the very bad harvest weather injured it still more. There were over eight hundred bushels as it came from the thresher. Five of the Indians had of their own over five hundred bushels. The Chief, Yellow Quill, and son had four hundred bushels, and three others had over over one hundred bushels, but all of inferior quality.

At the time of making the payments this year the Rosseau River Indians disposed of some eight thousand pounds of snake root; the other bands, with the exception of a few of the Swan Lake Band, do not work at it. The Long Plain Indians work a great deal for the farmers and get good wages.

During the time of making the annuity payments this year I do not think that there was any intoxicants brought on the reserves, as I saw no appearance whatever of any Indian being under the influence of liquor.

I have the honour to be, Sir,

Your obedient servant,

FRANCIS OGLETREE,

Indian Agent.

CLANDEBOYE INDIAN AGENCY, TREATY No. 1, 29th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit the following report, and tabular statement in triplicate, for the year ending 30th June, 1891.

St. Peter's.

During the year this band has been fairly prosperous. The young men could get plenty of work in the woods during the winter taking out cordwood, ties, etc.

These Indians are advancing in civilization and worldly wealth ; they now own one hundred and twelve waggons and bob-sleighs, sixty-eight mowers and rakes, sixty-eight horses, nine hundred and five head of cattle and seventy-seven pigs. They planted this spring one hundred and two bushels of wheat, one hundred and twenty bushels of barley, one hundred and twenty-four bushels of oats, and eight hundred and ten bushels of potatoes, and a lot of corn, and a garden truck, so that it is remarked that they are in a worldly sense ahead of many of the old settlements along the Red and Assiniboine Rivers.

The six schools on this reserve are not attended as they might be, for out of three hundred and thirty-eight children of school age, there are only one hundred and sixty-two on the rolls, with a daily average attendance of seventy-one ; and the present Chief and Council have considered the advisability of having a compulsory law of some kind to compel parents to send their children. The Chief and Council, four of whom can read and write, see that education is, and will be, the great factor to elevate their people, and are trying, by precept and example, to encourage the schools in every way, the Chief in particular having three of his children at the Rupert's Land Industrial School ; Councillor Sinclair also has one at that institution.

Statute labour has been done on this reserve. Each member of the band between the age of eighteen and sixty worked for a day and a half, and the condition of the roads is greatly improved.

The Chief, with a number of his band and thirty teams, put up over four miles of fencing at their hay grounds at Devil's Lake, to prevent outside ranche cattle from spoiling this meadow ; and the consequence is that they have hundreds of tons of hay, where, without this fence, they would have had none. This is a beginning, and I hope that in a short time they will have all their hay fields fenced.

This band have also cut thistles ; but it seems almost a hopeless task as there are hundreds of thousands of acres of thistles on Government land to the north, east and west, which are not or never will be cut.

Broken Head.

The Indians on this reserve, are poor farmers, but as they have good hunting and fishing they make a fairly good living. They have one hundred and eleven head of cattle and five horses. They planted eighty-nine bushels of potatoes, eighty of which were supplied by the Department, some of which on my visit had never been hoed.

From some cause sixteen of the calves died on this reserve this spring, in fact every year a number die. I have an idea it is from want of salt, as the Indians never have any to give them, and there are no salt patches there, as there are on the prairies.

There are sixty-seven children of school age, and twenty-nine on the roll, with a daily average attendance of eight, but a number of these people never live on the reserve, and those that do are away hunting and fishing so much that the attendance is poor.

Fort Alexander.

The crops on this reserve are not quite up to the average, the potatoes suffered from excessive rains, and from this cause all along the river landslides have occurred, and in some cases gardens and fencing have settled down some ten or fifteen feet, and as this happened when some of the people were away the cattle and pigs have destroyed several gardens.

The Indians now own fifty-seven cows, twenty-three oxen, fifty-nine young cattle, four horses, and twenty-three pigs. They planted six hundred and seventy-five bushels of potatoes, and a few bushels of wheat, oats, barley and corn, besides vegetables. Some of the gardens are beautiful, and a number have been looked after since seeding time.

One of the Government oxen turned out breachy, and did much damage. I exchanged him for a good young three-year-old ox, and the breachy one was killed.

The Indians of this band caught over twenty-five thousand whitefish last fall, which was a little better than the previous year ; but their winter fishing was almost a failure, so that if it had not been for a good fur hunt and their potatoes they might have suffered.

There are three schools on this reserve, two Protestants and one Roman Catholic. There are one hundred and seventy-nine children of school age, with seventy eight on the rolls, and a daily attendance of thirty eight. The attendance is not as good as it should be, and as it used to be, particularly at the lower Protestant and Roman Catholic schools. This is accounted for by the fact that there is no work or money to be made on the reserve since the saw mills were removed; and the men with their families go off to Selkirk, Whitemouth, Rat Portage, and Winnipeg, to work: this has made the difference in the attendance, as for the greater part of the year the children are not on the reserve.

General Remarks.

The catch of whitefish by Indians near the mouth of the Red and Broken Head Rivers last fall was better than for years past, but the fish were small and of rather poor quality. One man with four nets, inside of two weeks, caught over two thousand.

At Fort Alexander those who fished near home had fairly good fishing, but those who went north hardly got any.

A large number of jack or pike were caught near the mouth of the Red River during the winter, but the fishing at that season for pickerel and other fish, in the lake between St. Peter's and Fort Alexander, was almost a failure.

Sturgeon and catfish have been plentiful during the spring, and other fishing fairly good.

While the pound and trap nets were allowed the whole shore of the lake was strewn with dead fish, now, when their use is not allowed, no dead fish are to be seen; still some persons argue that this kind of net is not destructive.

There has been no epidemic amongst the Indians, but there has been a great deal of sickness of the nature of relapse of "la grippe," which they had the winter previous. At the agency there have been daily, almost hourly, calls for medicine on week-days and Sundays during office hours and after; in fact it would take up the time of one man to attend to the Indians of my agency in this respect.

The sanitary condition of the Indians is fairly good. They gathered up the refuse about their houses and burnt it, and almost every house has been whitewashed.

I have the honour to be, Sir,

Your obedient servant,

A. M. MUCKLE,

Indian Agent.

TREATY NO. 2, MANITO-WA-PAW AGENCY,

THE NARROWS, LAKE MANITOBA, 17th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

The Indians comprising the different bands inhabiting the nine reserves under my supervision are in a fairly prosperous condition, and by fishing and hunting manage to be self-supporting with few exceptions, as in the case of old and infirm Indians to whom some relief is granted during the winter months.

The potato crops are generally good, but I regret to say that most of the land in some reserves is not adapted for farming purposes; stock-raising could, however, be successfully carried on, as hay is to be had in abundance and of the very best quality.

There are nine schools in operation, with a good average attendance; the progress made by the pupils is encouraging, with few exceptions. The teachers are competent, and those found lacking we hope to have replaced shortly.

A new church was built, solely by the Indians, on the Water Hen River Reserve and was opened for service in January last.

A number of new houses are also in course of erection on the different reserves.

A new schoolhouse is being built at Ebb and Flow Lake and at Pine Creek, and when finished it will be a credit to these reserves.

The cattle are increasing rapidly and get very good care, evidence of which is apparent.

With few exceptions the health of the Indians is fairly good.

In conclusion, I am happy to say that the Indians under me are prosperous, peaceful and contented.

I have the honour, to be, Sir,

Your obedient servant,

A. MARTINEAU,
Indian Agent.

RAT PORTAGE AGENCY—TREATY No. 3,

LAKE OF THE WOODS, 14th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June, 1891. The tabular statement has already been sent in by Mr. McPherson, who paid the annuities to the Indians of this agency.

On 5th September I left this agency to visit the several bands on Shoal Lake and Lake of the Woods, and branded several of their cattle. They had good crops of potatoes, but the crop of wild rice was almost a total failure. Two schoolhouses were built last fall, one at Assabasca Reserve and one at Whitefish Bay. I inspected the buildings, and they are good and substantial. In October I visited the reserve at Islington. The schoolhouse is old, the Indians mucked it; and I have asked for tenders to have it put in repair. The children are improving, but from October till May most of the children are absent with their parents hunting. Several bands lost their seed potatoes by frost and water getting into the pits. They were supplied with two hundred and eighty-six bushels this spring. They had sufficient hay for their cattle, and when I visited the reserves in April their cattle were in good condition. The Assabasca Band lost one cow, and the Indians at Dalles one, both by sickness. The Chief of Rat Portage Reserve, who resides at Dalles, has taken the contract to build a schoolhouse, and it is now almost completed. The Indians of this agency only plant potatoes and corn. In sanitary matters most of these bands are improving, and they are putting up more substantial dwellings. The general health of these Indians has been good (Dr. Hanson visited the several reserves during the winter), nor did they suffer for want of food. They are self-supporting with the exception of a few old and infirm Indians, who have been supplied during the winter, and a small quantity given to some of the bands, who were in want towards spring. The Indians of the Lake of the Woods still complain of the scarcity of fish, and I have heard that on Rainy River, where the sturgeon were always numerous in spring, very few were caught, in fact barely enough for present use.

I have the honour to be, Sir,

Your obedient servant,

R. J. N. PITHER,
Indian Agent.

COUTCHECHING AGENCY, 30th June, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my tabular statement and inventory of Government property under my charge in this agency for the year ended 30th June, 1891.

I arrived here on the 1st of November, 1890, having been ordered to take charge of the agency during the late Agent's leave of absence and regret having to report his

[PART I]

49

death at Rat Portage in the early part of the year, which necessitated my remaining in charge ever since.

The different reserves being so scattered it has taken me some time to get accustomed to my new work, but in the spring of this year I was able to visit all the river reserves and two on the lake during seeding time, and so gave them all the help I could in the way of advice and practical instruction. The Indians on the river have some nice fields, and their potatoes were well put in, with some exceptions. On the Little Forks Reserve the Department assisted in the matter of seed grain; it was well put in and I trust there will be a fair return. At the time of writing it looks promising. The farming on the lake consists almost entirely of small gardens, containing potatoes, corn and other vegetables. I was also able, during this visit, to brand all the Government cattle on the reserves mentioned, and will have to finish on the lake at some future time.

The cattle passed through the winter well and the Indians had put up a sufficiency of hay. There has been some trouble with the Little Forks Indians cutting hay on the American side, but they have promised me that in future they will not repeat the offence.

The winter's hunt was a successful one, and the Indians, when I saw any of them at that time, appeared to have a sufficiency of food and did not complain. Some assistance was given to the very old and destitute.

There are five schools in working order and two in course of erection. The Coutcheching and Little Forks schools are doing well. The one at the Long Sault will improve as the present teacher becomes better acquainted with the Indians. Those at the Manitou and Hungry Hall are backward and show little sign of progress.

The reserves have been visited by Dr. Hanson, and the health of the Indians generally has been good—nothing worse than coughs and colds.

I find these Indians backward in regard to their houses and have taken every opportunity of telling them so. They are too fond of building close together small houses and not enough of them. I want each head of a family to remove on to his own plot of land, and in fact live like white people. There are some better houses being built now on the Coutcheching Reserve, and I trust it will be the case generally before very long.

Mr. Inspector McColl visited this agency on the 23rd of June last.

I have the honour to be, Sir,

Your obedient servant,

F. C. CORNISH,

Indian Agent.

SAVANNE AGENCY, TREATY No. 3,
FORT WILLIAM, 24th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

Lac des Mille Lacs.

I left Fort William on the 3rd July and met my assistant, Mr. Tait, on the following day at Savanne. On the 6th I paid the Indians of the Lac des Mille Lacs Band their annuities, examined all supplies furnished and found them of full quantity, in good order and up to the samples. The Indians were perfectly satisfied with everything supplied. The cattle were in good condition, but the gardens backward. Doctor Hanson accompanied us to this reserve and vaccinated all those Indians who had not been operated upon during the last seven years. He also vaccinated a number of children.

Sturgeon Lake.

I paid this band on the 10th July, after examining supplies and distributing the same. This band has made no improvement since last year. They have no cattle or

gardens, but have a plentiful supply of game and fish. I furnished them with potatoes and seeds. I inspected the goods offered for sale by the Hudson's Bay Company and found them satisfactory.

Wabigoon.

I arrived on this reserve on the 16th, inspected the supplies and paid annuities. The gardens were looking well and the cattle in good condition. I examined the school; there were twenty-five children present. There is a marked improvement since my visit on the 24th March last. They have a better knowledge of the English language, and their writing and arithmetic are particularly good. The parents seem to take greater interest in the education of the children and manifest it by making them attend school more regularly. The Chief and Council were informed that the school teacher wished to build an addition to his house and required their assistance. They were willing to help, also to bring sufficient firewood for the school for the winter.

Eagle Lake.

On the 18th we reached this reserve and after examining and distributing supplies, I paid the annuities. On this reserve the houses are better built and the gardens better laid out and cultivated, and the people themselves neater and better clad than on any of the other reserves. The chief's house in particular will compare favourably with many farm houses in Manitoba.

Lac Seul.

We reached Frenchman's Head on this reserve on the 21st and inspected the school. There were forty-seven children present. They are making good progress in the various studies, and sang the national anthem in the Indian language in a very creditable manner. The gardens and cattle were looking well.

On reaching Lac Seul we found the Indians awaiting us, and were saluted by them. Messrs. Pritchard and Prewer held prayers at night, which were well attended. Rev. Father Allard was also at Lac Seul.

Early the next morning (the 22nd) the Indians assembled for the distribution of provisions, which were examined and found in good order, but owing to rain the greater part of the day the distribution was postponed; about 5 o'clock, p.m., it cleared up, and the flour and the bacon were divided. The goods exposed for sale by the Hudson's Bay Company were examined, and such as were not in accordance with the provisions of the license were ordered to be removed, which was done. In the morning the remainder of the supplies were divided, after which I paid annuities until 9.30, p.m. Next morning I paid the balance of the annuities, finishing by noon; after which a council was held, at which a number of petty grievances were discussed and amicably settled. Mr. Pritchard married three couples here to-day.

I examined the school at Lac Seul on my return from Grassy Narrows; there were thirty-five children present, and I noticed quite an improvement since my visit to this school in March last.

The gardens were looking well, and the cattle are in excellent condition. The dwellings were clean and neat, and a general air of thriftiness prevailed the settlement.

Wabuskang.

We arrived at this reserve on the 27th, examined and distributed supplies, and paid annuities. I examined the school and was much pleased with the progress made by the children, especially in the English language. Mr. Wood has them under perfect control, and his methods of imparting instruction are admirable.

The gardens are well advanced, and we had lettuce, radishes and potatoes furnished from them. We held a council, at which the Indians expressed themselves satisfied with everything furnished them, and had no complaints to make.

Grassy Narrows.

On the 30th we arrived at this reserve, and found supplies in good order and of full quantity; after they were distributed, we paid annuities. The gardens here are

looking well, especially the potatoes, of which there should be a good crop. I inspected the school; the present teacher had only been in charge two weeks. The Rev. Father Cahill is building a new schoolhouse, which will be very comfortable when completed.

In conclusion, I would say that the physical comforts of the Indians under my supervision may be considered assured for the next winter. The crops promise well, the cattle are in good order, and the game and fish may be estimated as being fully up to the standard product.

I have the honour to be, Sir,

Your obedient servant,

JOHN McINTYRE,

Indian Agent.

INDIAN AGENT'S OFFICE,

TOUCHWOOD HILLS, 26th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June, 1891, accompanied by the tabular statement and an inventory of all Government property under my charge at that date.

The crops on Poor Man's and George Gordon's Reserves turned out fairly well both as to yield and quality. The following quantities were threshed out:—

Bands.	Wheat.	Barley.	Oats.	Rye.	Total.
	Bush.	Bush.	Bush.	Bush.	Bush.
Poor Man's.....	1,214	222	100	20	1,556
Day Star's.....	422	148	570
Muscovequan's.....	321	160	362	843
George Gordon's.....	1,134	247	48	58½	1,487½
Totals.....	3,091	777	510	78½	4,456½

The Indians of George Gordon's and Poor Man's Bands kept themselves in flour the most of the winter, having about three hundred and fifty sacks between them. The fact of the distance of the mill from the reserves, viz.: fifty-five and sixty-six miles, is much to be regretted; it is a long way to haul grain during the cold, severe weather. The Indians make their own sleighs for this purpose, carry hay with them, camp out during the coldest weather and undergo considerable hardships, but never complain, so glad are they to see the fruits of their labours in the shape of flour.

Hay was very plentiful; one thousand and seventy tons were stacked on the different reserves, which was more than was required for the cattle. Nearly two hundred and fifty tons were kept over for the following year.

On the whole we have had fair luck with the cattle, the increase since last year was one hundred and twenty-three calves from one hundred and sixty-six cows, and many of our oldest cows went farrow.

During the winter the Indians busy themselves, in addition to feeding and attending to their cattle, in making such articles as rush mats, baskets, brooms, hay fork and axe handles, ox collars, harness, sleighs, besides hand-sawing boards for building purposes. The women dress all the beef hides for leather for moccasins.

The following areas were sown as indicated on the different reserves, and, up to the time I write, the crops, both grain and root, look very promising indeed :—

Bands.	Wheat.	Barley.	Oats.	Rye.	Potatoes.	Turnips.	Gardens.	Totals.
	Acres	Acres	Acres	Acres	Acres	Acres	Acres	Acres.
Day Star's.....	11	3	5	3	2	24
Poor Man's.....	133	8	6	1½	4	2	2	156½
George Gordon's	99½	19½	13	7½	3	3	144¾
Muscowequan's	30	19	21	6½	4	3	83½
Yellow Quill's.....	7	1	8
Totals	262½	57½	43	1½	29½	13	10	416¾

This is a smaller aggregate area than last year. The Indians are improving a good deal in their method of farming, and summer-fallow half of their cultivated lands nearly every year.

The Indians burnt a kiln of lime for plastering and sanitary purposes.

A good deal of butter has been made ; the Indians are commencing to see what a help this is to them. With any money they get they appear anxious to buy such articles as milk pans, pails and churns.

I am glad to be able to report that since the establishment of schools, and owing to the work of some of the instructresses, a great change for the better has taken place, and is very noticeable in the Indians' houses, also on their persons ; they keep themselves and their houses very much cleaner and tidier than before. With the lumber they saw themselves they make some rough furniture and cupboards, all of which make their places look more snug and home-like.

The health of the Indians has only been fairly good. An epidemic of measles broke out last winter amongst the children : medical assistance was procured, and no cases of this terminated fatally. There have been thirty-five births and forty-two deaths during the year. Indians take much more care of themselves than they did, but there is room for a deal of improvement yet. Carelessness still causes many cases of consumption. Cod liver oil has been used pretty freely by such as are suffering from lung trouble, with the best of results.

Treaty payments took place on the 18th July, and passed off in the usual quiet way.

In conclusion let me add that it is pleasing to notice the sure and steady improvement amongst the Indians, who on account of the unfavourable seasons, absence of a market for disposal of farm produce, hay, wood, etc., have many discouraging things to contend with ; and I also take pleasure in testifying to the cheerful and earnest manner the employés of this district have fulfilled their respective duties.

I have the honour to be, Sir,

Your obedient servant,

HILTON KEITH,
Indian Agent.

TREATY No. 4,

MUSCOWPETUNG'S AGENCY, 29th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my report for the year ended 30th June, 1891.

The Indians of this agency are steadily advancing in civilization and becoming more independent every year, thereby reducing the assistance required from the Department. The returns from the harvest were very good, and some Indians are still using their own flour.

Pasquash's Band were almost entirely self-supporting from October to April. During the winter they were kept busy selling firewood at Fort Qu'Appelle. Muscowpetung's and Piapot's Bands also supported themselves for several months, but they have not had the advantage of the sale of wood during the winter on account of the distance from their reserves to the towns.

During the year we sold and delivered at Regina and other points five hundred tons of hay.

The individual earnings of the three bands, viz.:—Piapot's, Muscowpetung's and Pasquah's, for the year, amount to \$6,021, an increase of \$804 over last year.

The general health of the Indians has been very good; they are visited monthly by Dr. Seymour, the medical officer.

The prejudice against education is fast dying out, as will be seen by the number of children attending the industrial schools: Fort Qu'Appelle, fifty-one, Regina, twenty-six. The Muscowpetung Boarding School, managed by the Presbyterian Church and removed from the old site to the Qu'Appelle Valley, north of Pasquah's Reserve, has not been a success, and the children have been transferred to the Regina Industrial School.

Two churches are in course of erection on Pasquah's Reserve, one by the Roman Catholic Mission and the other by the Presbyterian Church.

The old farmhouse on Pasquah's Reserve has been turned into a storehouse and granary, and a new house has been built for the farmer.

Our Indians made a very good display at the Regina Exhibition last fall, and carried off a number of prizes.

The stock wintered well, and the increase this year is quite satisfactory.

The supply of fish was plentiful, and large quantities of ducks were taken during the season.

The Sioux (Standing Buffalo's Band) continue to support themselves by working off the reserve. This year they have increased the acreage under crop.

The attendance of scholars at the boarding and day school combined has been much larger than in past years.

The crops this year are the best we have ever had; the harvest commenced on the 22nd instant and it is hoped that the returns will be very large.

My staff have ably assisted me in carrying on the work.

Tabular statement and inventory of all Government property under my charge are enclosed herewith.

I have the honour to be, Sir,

Your obedient servant,

J. B. LASH,

Indian Agent.

BIRTLE, MAN., 16th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June last, together with a tabular statement and inventory of all Government property under my charge.

The Bird Tail Sioux Band, No. 57, have this season two hundred and ninety-one acres of wheat, fifty-three acres of oats, seven acres of rye, nine acres of potatoes, six acres of corn, and about three acres of turnips and garden stuff, all of which at present gives promise of a good return, excepting a field of early sown oats. Moses Bunn has this season the largest individual crop, he having put in about forty-five acres of wheat; but he is closely followed by Simka-Ho-Dah'on, who has forty acres under wheat. Part of this reserve was, as you know, divided into eighty-acre lots five years ago, since which time I have been gradually getting them to square up their fields to the surveyed lines. Simka-Ho-Dah'on has now about seventy-five acres of his lot broken, the remaining five acres he has retained for his buildings and a pasture field that he has fenced in for his working oxen; and others are each season improving the appearance of their farms by ploughing up odd corners of new land, thereby squaring their fields. Several progressive ones are this season building storehouses for their grain and sheds for their implements. They have one hundred head of cattle in good order and are now putting up hay for them for next winter.

The Sioux at Oak River Reserve, No. 58, have broken this season over four hundred acres of new land, and have four hundred and seventy-one acres of wheat, four acres of oats, twenty-two acres of potatoes, seven acres of corn, and four acres of turnips and garden stuff. The turnips were a failure in most instances, but all other crops, from present appearances, will turn out well. They have one hundred and fifty head of cattle in good shape, and are putting up sufficient hay for next winter.

The Oak Lake Band of Sioux, No. 59, are each year showing progress. Waoke has this season broken about thirty acres of new land, and did it well. He has twenty acres under wheat and about an acre of potatoes and corn. There is a total of fifty-eight acres of wheat sown on this reserve, and I saw no better grain this season than that of the Indians of this reserve. They have now good stables, and seem to be interested in their cattle.

The Turtle Mountain Sioux Band, No. 60, remain about as they were. No visible progress has been made during the past few years. They have now twenty head of cattle, and have sown about five acres of oats, and have three acres of potatoes, corn and garden stuff.

Kee-see-ko-Wenin's Band, No. 61, Riding Mountain, have this season sown ten acres of wheat, eighteen acres of oats, twenty acres of barley, six acres of potatoes and over an acre of turnips and garden stuff, all of which at present promises a fair return. They have fifty-nine head of cattle in good order, for which they have provided good stables and are now putting up hay for the winter. This band will have some difficulty in getting sufficient hay this season, part of their meadows being low and flat and having been partly flooded by heavy rains. Part of this band yet follow fishing and hunting for a livelihood, and do not seem to favour the idea of settling down to farming.

Way-way-see-cappo Band, No. 62, yet depend too much on the Government for assistance instead of relying on their own exertions for a livelihood. They have some fifty acres of wheat, nine acres of oats, thirty-four acres of barley, nine acres of potatoes, and two acres of turnips and gardens. The soil of this reserve is very strong and is liable, particularly in seasons like the present—with more than an average rainfall—to produce too much straw, and as a consequence is late in ripening, but this season wheat was fully headed out on the twentieth of July, and I hope to see their wheat safely harvested and this band encouraged thereby to do more work for themselves in the future. They now have one hundred and nineteen head of cattle, for which they provide fairly good shelter and sufficient food.

At the Silver Creek Reserve, No. 63,—late Gambler's—there are only four farming heads of families, several having gone over to Way-way-see-cappo's several years ago, and one removed to the Crooked Lake Agency last spring. The others yet reside at Valley River, where they have good buildings and earn a good living by hunting, fishing and the sale of dressed pelts made into clothing, foot wear, etc. Those on the reserve

have about seventy acres under crop this season, which will yield fairly well, and all have good houses and stables.

John Tanner of this reserve has a bank stable sufficiently large to hold thirty head of cattle, with a horse stable partitioned off to hold three horses, a good root cellar, milk house, a large implement shed in which he has his grain binder, ploughs, harrows, harness, mower and rake, all carefully stored and all procured by his own exertions, excepting the plough and harrow which were loaned to him by the Department.

The Rolling River Band, at Reserve No. 67, have remained on this reserve during the past year much better than formerly. Two members of the band have sown eighteen acres of wheat, and besides this they have about five acres of potatoes, turnips and garden stuff.

SCHOOLS.

There are two day schools on reserves within this agency, one at Riding Mountain of the Presbyterian Mission, under the charge of Miss M. S. Cameron, and one at the Oak River Sioux Reserve of the Episcopalian, taught by Mr. H. Hartland. At the former the attendance has been fairly good and regular. A great deal of credit for this is due to the teacher who appears to have the skill to make the school room attractive to the children, and more of a pleasure for them to attend than a duty. The children now appear at school tidy in their dress and personal appearance, and the school room at all my visits was neatly and cleanly kept. I am sorry to report that little or no interest is taken in the school by the parents of the children at Oak River. The attendance has not been regular or as large as it should have been.

The Boarding School at Butte has done good work for a number of children who have attended from Way-way-see-cappo, Riding Mountain, Bird Tail Sioux and Rolling River Reserves. The average attendance has been about twenty. It is under the auspices of the Presbyterian Church, with Mr. Geo. G. McLaren as Principal and Miss McLaren as Matron.

A number of Sioux children from this agency are attending the Indian Home School at Elkhorn and a number from the Silver Creek Reserve the Industrial School at Qu'Appelle, both of which, I am led to believe, are improving the minds and manners of the Indian youths under their charge.

The general health of all bands has been fairly good during the past year.

I regret I cannot report that the conduct of every individual has been above reproach—such a result can hardly be looked for among nearly one thousand Indians; but I think it is a matter for congratulation that so many of the Indians at this agency have become largely self-supporting, having only issued twenty-one thousand pounds of flour and one thousand and twelve pounds of bacon, being but little more than an average of twenty pounds of flour and one pound of bacon to each Indian in the district.

Before closing my report, I would like to bear testimony to the able assistance rendered me by Mr. Dickinson, of this office, whose services have always been cheerfully at my command, and whose work has been of the most efficient character.

I have the honour to be, Sir,

Your obedient servant,

J. A. MARKLE,

Indian Agent.

INDIAN AGENT'S OFFICE, FILE HILLS, 4th August, 1891.

The Honourable,
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year ended the 30th June last, with a tabular statement and inventory of Government property under my charge on that date.

I took charge of this agency on the 17th July, 1890, at which time the annuity payments were being made by my predecessor, Mr. Reynolds.

The Indians have done fairly well during the past year. They have received from their crop fifty-four thousand five hundred and fifty-five pounds of flour and eighteen tons of bran and shorts. The Department assisted them to the extent of \$437.86 in paying for threshing and gristing, and they have sufficient flour on hand to last until next November, when I trust they will have this year's crop threshed.

They have also purchased, by the sale of oats, two sets of bob-sleighs, and from the sale of beef three mowers, two horse rakes and one set of bob-sleighs.

The following is a comparative statement of food supplies furnished this agency by the Department during the past two fiscal years, for employés and Indians, viz. :—

	Supplied during 1889-90.	Supplied during 1890-91.	Decrease for 1890-91
	Lbs.	Lbs.	Lbs.
Bacon	15,591	14,856	735
Beef	24,042	13,951	10,091
Flour	60,100	27,500	32,600

And there is every prospect at the present time that the decrease in the expenditure for the fiscal year 1891-92 will be much larger.

The crops on Peepeekeesis Reserve, which were owned in common by Okanees and Peepeekeesis Bands, were fairly good. The hay crop on all the reserves was very heavy. We finished seeding on the 27th April last, being about two weeks earlier than the previous year. All the crops are now looking well, and there is every prospect of a good harvest. Owing to the past two months being very wet, a large number of our best hay sloughs are now covered with water: but I think we will have sufficient even if they do not dry up.

The following is a statement of the crops under cultivation this year viz :—

	Acres.
Wheat	150
Oats	31
Spring Rye	10
Potatoes	29
Turnips	6
Carrots	2 $\frac{3}{4}$
Corn	2 $\frac{1}{4}$
Onions	1 $\frac{1}{4}$
Gardens	3 $\frac{1}{2}$

We have been very fortunate regarding prairie fires, there not having been one on these reserves during last summer and fall. One ran over Peepeekeesis Reserve this spring, but as it was early in the season very little, if any, damage was done.

The stock on the different reserves came through the winter in excellent condition, and the increase of Indian cattle has been very large. The calves dropped this spring numbered one hundred and fourteen, with a number of cows yet to calve. There are now on these reserves four hundred and sixty-eight head of cattle and seventy-seven ponies in charge of Indians, and three cows and two calves in charge of agent.

The following statement gives the description of Indian cattle :—

Oxen	67
Bulls	5
Cows	137
Heifers	41
Steers	104
Bull calves	58
Heifer calves	56

Total 468

As we can get a sale for cream at the creamery at Fort Qu'Appelle, we propose devoting more attention to stock raising and selling cream, than to farming in future; but as it is necessary to have ice and proper milkhouses, I do not expect to do more than make a start this year. But I intend this winter to have everything ready to go into this industry on a large scale next spring, and trust that in my next annual report I shall be able to give satisfactory results regarding this industry.

The general health of the Indians has been fairly good during the year. There have been eleven births, and seventeen deaths, being thirty deaths less than the previous year. The principal cause of death was consumption. It was thought at one time last winter that small pox had broken out in the boarding school here, and every precaution was taken to prevent its spreading, by quarantining the school and premises and vaccinating all the Indians, but fortunately it proved to be only a severe form of chicken pox.

The attendance at the Presbyterian Boarding School here, has been better during the past six months than it has ever been before, and the progress made by the pupils is very encouraging.

There are fifty-five children of school age belonging to these reserves, thirty-five of whom are attending school: Twenty-six at Qu'Appelle Industrial School; one at the Regina Industrial School; and eight at the Presbyterian Boarding School here.

Chief Star Blanket and his Councillors will not allow their children or any children in the band to go to school.

My staff, consisting of R. McConnell, farmer, and Peter Hourie, interpreter and issuer, has given every satisfaction in the performance of their duties and I have always found them very efficient and trustworthy officials.

I have the honour to be, Sir

Your obedient servant,

JNO. P. WRIGHT,

Acting Indian Agent.

INDIAN AGENT'S OFFICE,

ASSINIBOINE AGENCY, 12th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my annual report, tabular statement and inventory of Government property under my charge, for the fiscal year ended 30th June, 1891.

The Indians in this agency are doing remarkably well. The progress made since my last report is most encouraging. They worked extremely well in putting in their crops last spring, doing it willingly. All wheat land was prepared last fall and all the work was done by the Indians, as we keep no white labourer on this reserve. I have taught many of the young men to sow wheat by hand. They do the work fairly well. Some of the young Indians are good ploughmen and take pride in competing with each other. They are able to do this kind of work as well as many white men.

The following grain and roots were harvested last fall in good condition and stored for winter use:—Wheat, nine hundred and forty-three bushels; potatoes, one thousand one hundred and fifty bushels; turnips, three thousand one hundred and sixty-eight bushels; beets, seventy-five bushels; carrots, fifty-four bushels; onions, twenty-five bushels. There were also a large quantity of potatoes and other roots consumed during the summer months.

These Indians exhibited farm and garden produce at the Regina Agricultural Show last October, and also at Indian Head. The Indian women sent a quantity of knitting and other domestic work, and were very successful in taking prizes at both exhibitions. This encourages them to cultivate their land and take more interest in their crops, and it encourages the women to renewed effort in acquiring a knowledge of domestic pursuits.

I am pleased to be able to report that these Indians are steadily improving in all their farming operations and in many other industrious habits.

The grain and roots raised were a great help to them last fall and winter, as well as to the Department, as it was found unnecessary to issue rations generally to them for about three months, as well as to old men, widows' and orphans who were destitute; there are always a few of this class who must be helped.

All Indians who had wheat threshed, paid for it out of their crop and stored with me a sufficient supply for seed. The remainder was ground into flour. The cost of grinding was paid in wheat. Some took my advice and paid for grinding in firewood. This left them the full benefit of their crop.

The Indians are employed during winter, chopping rails and firewood for their own use. Some chop cordwood, haul it to the mill and take flour in payment. This is a great benefit to such as have no flour of their own. I do all in my power to keep this market for this class of Indians, and make others who have flour lend their oxen to these during winter time, which helps them very much and keeps all employed.

Other Indians are nearly all the time busy attending to cattle and sheep, and keeping stables in proper order. The Indian women knit socks, comforters and mitts, and sell large numbers of those articles to white settlers. The women are kept busy at this work and making moccasins during winter time, while some card and spin wool, and do the work fairly well.

All Indians who have no wheat to harvest of their own, go out to work for white men during harvest time, returning to take up their potatoes and other roots in the fall. This leaves those who have wheat to harvest short-handed in many cases, but we wish each Indian to do his own work and be independent of others. These Indians put up last fall four hundred and twenty-five tons of hay in good condition, and secured it by ploughing a double fire-guard and burning the grass in the centre to protect it from prairie fires. The cattle on this reserve were well wintered, being stabled, watered and fed regularly. The increase last spring of both calves and lambs was most satisfactory. The month of May is early enough for Indian cattle to have their young, and the chances of loss is lessened by a late season.

The health of the Indians has been fairly good during the past year, there having been no contagious diseases among them. Every precaution is taken in the spring time to avoid sickness. All Indians who have tents move out of their houses, and all refuse is then raked up and burnt, and the houses are then whitewashed inside and out. This keeps them healthy to return to in the winter.

I am sorry to have to report the death of Chief Jack, which took place last April. He had been in poor health for some time, but he took influenza last winter and was so weak from other sickness that he never got over it. He will not be easily replaced. He was always ready to give good advice to the young men, and to assist me in carrying out the wishes of the Department.

I have, with the assistance of the Indians, put up two log buildings, one to be used as a carpenter's shop, and the other as a blacksmith's shop. These buildings are to enable the Indians to make sleighs and other things during winter time. A large root-house has also been built to keep seed potatoes in during winter for Indians, as it has been found that they cannot be trusted to keep them over winter themselves.

All this work has been done by Indians without any cost to the Department, except the rations issued to them while doing it.

The following crops of grain and roots were planted last spring:—Wheat, one hundred and thirty-six acres; turnips, fifteen acres; oats, fifteen acres; potatoes, fifteen acres; carrots, five acres; onions and other garden seeds, nine acres. All the land was well prepared and the seed put in at the proper time.

These Indians are improving in hoeing and thinning out their root crops. It is a hard matter to make them understand this very necessary work, and much trouble must be taken to compel them to do it properly, as they think it a loss to thin out onions, carrots and turnips to the proper distances; but they will be convinced of this in time.

This spring a thoroughbred polled-Angus bull was purchased by order of the Commissioner for the purpose of improving the cattle on the reserve. The Indians think a great deal of this bull. They will be more likely to take extra care of all next spring's

calves on this account. They say he looks like a buffalo without horns, that his hide would make a good coat.

The Individual earnings of these Indians during the past year was \$833.60. This money was spent in the following manner: Some purchased lumber to floor their houses with, and others purchased blankets, stoves and clothing; a few purchased beef, tea and tobacco. One man paid for a wagon out of his own earnings during last fall and early part of winter.

Some children were sent from this reserve last spring to the Industrial School at Regina; they are doing well. Their parents visited them during the past month, and on their return they expressed themselves as being much pleased with the treatment the children are receiving. There are also a few children from this reserve at the Qu'Appelle Industrial School, who are doing well. They often write to me, stating how they are treated; they seem thankful for the kindness they receive.

The supplies received for the Indians are of good quality and are equal to samples. The behaviour of the Indians during the past year has been very good.

I have the honour to be, Sir,

Your obedient servant,

W. S. GRANT,

Indian Agent.

INDIAN AGENT'S OFFICE—TREATY No. 4,

COTÉ, ASSA., 24th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year 1890-91, with tabular statement and inventory of Government property.

The agency buildings on Coté Reserve were finished last fall, when I removed from Fort Pelly, and have since occupied them; this brings me much closer to the larger part of my outside work.

Potatoes, turnips and carrots gave us a very fair return, and I believe that we will do well to give our whole attention to the growing of root crops and the raising of cattle. The cattle are doing exceedingly well, the increase is good, and, having three thoroughbred bulls, the grade is markedly improved. The hunt has greatly diminished; small game has totally disappeared; still two hundred and twenty-five Indians are supporting themselves, one hundred and fifty of whom live at Lake Winnipegosis, where they get plenty of fish.

The schools, four in number, are doing fairly well. The children are most intelligent and anxious to learn, and their attendance is regular. On Coté Reserve there is a boarding school under the auspices of the Presbyterian Church. Rev. Mr. Laird is Principal. The average attendance is forty-five. This includes children from the other reserves. The day schools in operation in this agency are:—On Kisickouse Reserve, Roman Catholic, Mr. Jordens, teacher; average attendance, eight. On Keys Reserve, Church of England, Rev. Mr. Cunliffe, teacher; average attendance, eight. At Shoal River (Lake Winnipegosis), Church of England, Mr. Bassing, teacher; average attendance, fifteen.

The health of the Indians has not been so good as usual. We had an epidemic of influenza last spring. The deaths have been twenty-eight and births seven, a decrease of twenty-one.

Many of the Indians have worked industriously and are trying to help themselves; they fully understand that the Department cannot always continue to help them as it has done.

I have the honour to be, Sir,

Your obedient servant,

W. E. JONES,

Indian Agent.

DISTRICT OF ASSINIBOIA, N. W. T.
CROOKED LAKE AGENCY, TREATY No. 4, 12th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit to you my annual report, with tabular statement, and inventory of all Government property under my charge, up to the 30th June, 1891.

The last year's crop was the best we have had since these Indians commenced farming. We threshed out five thousand nine hundred and thirty-two bushels of wheat, six hundred and thirty-seven of oats, two hundred and eighty-six of rye, ninety-eight of pease and thirty of barley. Of roots we got two thousand four hundred and sixty-one bushels of potatoes, one thousand three hundred and twenty-five of turnips, one hundred and eighty-six of carrots, and four hundred and eighty-three of garden stuff. In addition to this the farmers raised four hundred and sixty bushels of oats for use of farm teams ; and I harvested two hundred and twenty for the agency team.

The Indians sold during the winter, four thousand and fifty-eight bushels of wheat, realizing the sum of \$2,000, which was expended in the purchase of provisions, principally flour. One thousand bushels were sown this spring, two hundred are still on hand, a few bushels were gristed at our mill, and the balance, which was tailings, was fed to stock and poultry.

Of the root crop, two hundred and sixty bushels of potatoes were sold, and eight hundred planted this spring, the balance, with garden stuff and carrots, was consumed by the Indians, as well as some of the turnips, which were also fed to stock.

The provision returns show a saving of \$2,124 during this year as compared with the previous one.

The hay crop was much better than last year, but owing to unfavourable weather there was not much made for sale.

The stock got through the winter in good condition. The following is the number of cattle in the hands of the Indians :—

	Under Gov. control.	Private Property.
Oxen.....	103	7
Cows.....	109	59
Bulls.....	2	..
Young cattle.....	210	83
Total.....	424	149

In addition to the above private property of the Indians, there are four Canadian horses (two geldings and two brood mares) held by Indians on Reserve No. 73, Cowesses' Band ; and throughout the agency there are one hundred and seventy-one native ponies, some improved by crossing with Canadian horses.

The pedigree bull supplied this agency by the Department has already shown, by the calves dropped this spring, a decided improvement in stock.

The individual earnings of each band respectively, amounted to :

Ochapowace's Band, Reserve No. 71	\$ 834 35
Kah-ke-wistahaw Band, Reserve No. 72.....	1,275 19
Cowesses " " " 73.....	1,426 33
Sakimay's " " " 74.....	1,088 57
Total.....	\$4,624 44

being an increase of \$1,812.18 over last year.

There was very little realized from furs during last winter on account of some of the old trappers being obliged to remain at home and attend to their stock.

Seeding commenced on the 7th of April, one week earlier than last spring, and all the work was finished by the 20th of May.

The area under crop on the several reserves is as follows :—

	Acres.
Ochapowace's Reserve, No. 71.....	145
Kahkewistahaw " " 72.....	120
Cowessess " " 73.....	251
Sakimay's " " 74.....	122
Total.....	<u>638</u>

distributed in the following manner :—

	Acres.
Wheat.....	494
Oats.....	50
Pease.....	5½
Potatoes.....	36
Turnips.....	8
Rye.....	22
Corn.....	4½
Barley.....	4
Chicory.....	3¾
Gardens.....	10¼
Total.....	<u>638</u>

In addition to the above, thirty acres were put under oats by myself and the farmers for the use of the Government teams, and one acre in potatoes.

The spring work was commenced with spirit and continued so until all the seed was in the ground, immediately after which the Indians turned their attention to the repairing of old and the making of new fences, after which, for two weeks, all those who could spare the time went to collect "seniga," or snake root, realizing the sum of \$600, and benefiting by the change from farm work to camp life.

In the month of June one hundred and sixty-three acres were summer-fallowed, and one hundred and twelve acres of new land were broken.

As I write I am glad to be able to report favourably on the appearance of the crops throughout the agency. It is hoped that the returns of the wheat crop will not be less than twenty bushels to the acre.

The Indians still continue to keep their fences in good order, in proof of which no cattle have broken into their crops.

A marked improvement has also been made in some of their houses; a large amount of their individual earnings has been devoted to the purchase of lumber for flooring, windows, stoves, chairs, etc.

Several Indians have taken up their farms in accordance with the surveys, or subdivisions, made by Mr. Nelson last year, the benefits of which they are commencing to appreciate.

The number of children attending school on the 30th of June was as follows:—Qu'Appelle Industrial School, thirty-three; the Round Lake Indian Boarding School, twenty-five, being eleven less than shown in last report, six having gone to the Qu'Appelle Industrial School, and five to Regina.

Since my last report a grist mill has been erected at this agency, thirty inch burrs, with bolt, smutter, etc., complete. The power in use is the steam engine supplied to this agency, with the separator, four years ago. The buildings are of hewed logs, supplied and put up by the Indians assisted by the farmers. The machinery was put in position by Farmer Sutherland assisted by the other employés. Sutherland attends now to the milling, and Farmer Pollock, whom I got in place of Farmer Nicol

(the latter having been transferred to Muscowpetung's Agency) attends to the engine, by which arrangement there is no extra cost in working the mill. The Indians have to pay in wheat bran or cordwood, at the rate of eight cents a bushel, for grinding, to cover the cost of working expenses, and settlers will be charged twelve and a half cents, if we have time to do their work. The amount expended by the Department on the mill is \$1,301.55, and the labour of Indians and employes amounts to \$300, which makes the value of the mill as it stands, without the engine, \$1,601.55. The advantages the Indians will derive from this mill will be very great should fair crops ensue.

The payments of annuities were held from the 16th to 21st July, both days inclusive. Ochapowaces and Kahkewistahaw's Bands, Reserves Nos. 71 and 72, were paid together. Cowessess' Band, Reserve No. 73, was paid at my office, whilst Yellow Calf's and She Sheep's parties received their annuities on their respective reserves. The number of Indians paid was six hundred and eight, the annuities amounting to \$3,230 and arrears to \$315—total, \$3,545.

The general behaviour of the Indians under my charge has been very good. I have no complaint to make as to the conduct of any individual.

A few of the Indians exhibited cereals and roots at the agricultural shows held at Whitewood, Broadview, Grenfell and Regina, and were very successful, even in competition with settlers.

The health of the Indians was much better than during the previous year. There were thirty-two births and twenty-six deaths, showing an increase of six.

The agency and reserve were thoroughly inspected during the year by Mr. Wadsworth. Whilst inspecting the agency books every assistance was given to him by Mr. Pierce, the agency clerk.

I have the honour to be, Sir,

Your obedient servant,

A. McDONALD,

Indian Agent.

MOOSE MOUNTAIN INDIAN AGENCY—TREATY No. 4,
28th July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report and accompanying tabular statement for the year ended 30th June, 1891.

Early in July last the agency headquarters were removed from the Striped Blanket's Reserve to a point thirty-four miles distant, on the south-eastern part of White Bear's Reserve, rendering it possible to give to that band the amount of supervision which it required without an increase of staff and increasing the convenience of the management of the whole agency.

The agency office having been raised on beams attached to the axles of waggons, was drawn safely by the Indians' oxen to its new situation; and the storehouse having been taken down, was removed in waggons and re-erected.

The house occupied by Mr. Farmer Lawford having been turned into a granary for Pheasant Rump's and Striped Blanket's Bands, the old agency house was devoted to his use (its position being very convenient for the oversight of the bands just mentioned), and an agency house was erected at the new headquarters. A house was also built for the agency clerk, for whom there had been previously only makeshift accommodation, and a stable for the agency was built of logs with a shingle roof.

These buildings were all erected by day labour, and the result, as compared with contract work, is entirely satisfactory; better material having been used, more thorough workmanship secured, much more Indian labour employed, and the cost to the Department having been, I believe, some hundreds of dollars less.

The advantages expected from the removal of the agency to its present situation are, I think, being realized, and as one instance, I may mention that, between the seed-

ing and haying seasons this summer, in addition to ploughing summer fallows, fencing pasture and breaking new fields, the Indians have earned by freighting between Moosomin and Cannington Manor over \$500, which employment I would not have obtained and could not have superintended if resident at the old headquarters.

The area of land in crop last season was as follows :—

	Acres.
Wheat	194
Oats	47
Flax	1
Rye	13
Potatoes	6
Turnips	12
Gardens	4
Total	<u>277</u>

The yield was seven hundred and thirty-one bushels of wheat, two hundred and fifteen bushels of oats, three hundred and seventy-one bushels of potatoes, seven hundred and nineteen bushels of turnips and ten bushels of rye.

Pheasant Rump's and Striped Blanket's Indians have under crop this year one hundred and ten acres of wheat, eighteen acres of oats, five acres of potatoes, eight acres of turnips, which are all looking as well as possible, the season having been most favourable. They have ploughed ninety-five acres of summer fallow, and are looking forward hopefully to harvest time.

It having been decided to abandon all the fields under cultivation on White Bear's Reserve, and to break new fields on the south-eastern part of the reserve (near the agency) which was sub-divided by Mr. Nelson last summer, no grain was sown by that band, but eight and a half acres of potatoes and turnips were sown and eight small fields were broken.

Two hundred and ninety tons of hay were put up by the Indians last summer, which provided sufficiently for their own stock and enabled them to earn money by wintering twenty-one cattle for white farmers, and, owing to the mildness of the winter, left a surplus for sale.

The cattle of all the bands are well cared for, and are increasing satisfactorily, there being now one hundred and eighty-three head, of which number thirty-eight are spring calves. Many of the Indians have returned all the loaned cattle to the Government, and were, able to sell last fall beef to the value of \$434, in addition to some carcasses retained for their own consumption. The practice of milking the cows is steadily gaining ground, and the quality of the butter made is improving.

The principal industries of the Indians, besides farming, are freighting, tanning cow skins, at which the women are skilful, cutting and drawing firewood, &c., and fishing. The firewood selling industry was only adopted after some years of urging, but, since the removal of the agency it has become the principal means of support during the winter. A number of the women have learned to scrub and to wash clothes so well that they obtain a good deal of employment in the neighbouring settlement. There was an abundance of wild fruit last summer, the gathering and sale of which profitably employed the women and children.

The individual earnings of the Indians during the year aggregated about \$2,200 ; and and they have been better off, have lived more comfortably and with less assistance in provisions from the Government than during any previous year since I have been stationed here.

The fatal after effects of " la grippe " on constitutions weakened by scrofula increased the death rate in Pheasant Rump's and Striped Blanket's Bands, but there has not been much general sickness. A case of measles occurred on White Bear's Reserve last summer, but the spread of this disease, so fatal to the Indians, was prevented by the enforcement of strict quarantine regulations. There are at present a number of cases of whooping

cough among the children, which are receiving medical attention. The Indians were visited on several occasions during the year by Dr. Hardy, who informed me that chronic diseases of scrofulous and syphilitic origin are so common among them that it is strange that more deaths do not occur.

All sanitary precautions, such as the cleanliness of house and premises, the free use of lime wash on buildings and the frequent moving of tents to fresh camping grounds, are attended to, and every effort is made to cultivate cleanly habits, and discourage the use of paint on the persons of the Indians.

Some more children have been sent to the Qu'Appelle Industrial School, and, owing to the small number left on any one of the reserves, it is improbable that a day school will be established.

During last month about one hundred Sioux, who had been living in Manitoba, but who had not been settled on a reserve, were sent to this agency.

They ploughed and fenced a field on White Bear's Reserve, and planted potatoes and and turnips, and have since been engaged in fishing. No definite arrangement has been made regarding them, pending a visit from the Indian Commissioner.

The excitement arising from the "Messiah Craze" troubles in the United States caused no corresponding feeling among these Indians, and the alarm felt by the settlers in the district near to the reserves was caused by rumours either false or exaggerated.

In conclusion, I beg to testify to the industry and efficiency of Mr. Graham, the agency clerk, who also acts as agency storekeeper and ration-issuer to White Bear's Band; of Mr. Lawford, the farmer in charge of Pheasant Rump's and Striped Blanket's Bands, who, now that he has a blacksmith's outfit, does a great deal of repairing; and of Mr. Buchanan, the agency interpreter, who is a handy carpenter. Mrs. Lawford gives the women of the bands under her husband's supervision instruction in knitting, butter-making, etc., and visits the sick.

I have the honour to be, Sir,

Your obedient servant,

J. J. CAMPBELL,

Indian Agent.

OONIKUP, THE PAS, TREATY No. 5,

CUMBERLAND, N.W.T., 6th July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—In accordance with instructions, dated the 10th of April last, I have the honour to submit my eighth annual report on Indian affairs in this agency, together with the accompanying tabular statement and list of Government property, for the fiscal year ended the 30th of June, 1891.

In taking a general glance at the various reserves under my charge in this agency, the thought naturally occurs to the mind—would that the Indians advanced in the industries of civilization as they do in years, and as the latter rapidly roll on; but as the sun rises and sets, and the beasts of prey rove through the forests seeking their meat from God, and then when satisfied return to their slumbers, so, in measure, it is to be feared, the established wanderer whiles away the term of life until the silver cord is loosed, and golden opportunities for improvement in the things of this world are things of the past. The natural resources of the country entirely at his disposal, and the assistance he receives from the Department and others, in various ways and at various times throughout the year, affords the Indian ample means for advancement, and give sufficient reason to his benefactors to look for decided steps in that direction. But to state in this report that one is satisfied with the progress made during the past year would be to give an unfaithful testimony, and calculated to produce a false impression. Still, it is a matter for thankfulness on my part that despite the innate propensities and established modes of living derived from their forefathers, and still generally adhered to,

[PART I]

65

there are among these sons of the forest some who have evinced, since my last annual report, manifest signs of industry and a tendency to more settled habits in exchange for those of a nomadic character. But that which gives considerable interest and encouragement in seeking to raise these once benighted people is the decided advance made among the rising generation. The schools in operation are doing well, the monthly examinations have had good effect and the teachers are hard at work. But more of this in due course.

I will now review the reserves in order.

Grand Rapids, situated at the mouth of the Saskatchewan, some hundred and thirty-five miles from my office, is well supplied with fish from Lake Winnipeg. Here the Indians earn fair wages by working for the fishing and steamboat companies. The band generally is therefore in fair circumstances. They have done a little farming; but when not hired they appear to prefer hunting to steady working with the grub hoe.

The school on this reserve is, I think, the most important branch of the work. The teacher, Mr. James Settee, jr., has taken the children thoroughly in hand, and they on their part appear to appreciate his services, for the school has the largest average attendance (over thirty) of any in this agency. I cannot speak too highly of Mr. Settee's indefatigable labours on this reserve, not only among the rising generation at the school, but also in giving good advice to the Chief, and in writing his letters, as well as assisting me in any matter on the reserve where his services are valuable. Mr. Settee, knowing thoroughly the Cree language and having a fair knowledge of English, is thus in a position to reach the intellects of his pupils and of the Indians generally. Such teachers do well in a district like this.

The next Reserve, Chemawawin, is situated on the north-western shore of Cedar Lake, and is some eighty miles from the office. The Indians here are now in better circumstances than formerly, owing to the Hudson's Bay Company having removed their fort from Moose Lake to this point. An energetic Hudson's Bay Company officer keeps them employed to some extent both in winter and summer. The number of muskrats killed by this band during the past season has enabled those who worked well to supply themselves and families with the necessaries of life, while they had, in addition, the fine sturgeon, usually plentiful in Cedar Lake. Lack of energy, however, stands much in the way of these Indians. Still there is hope for future prosperity, but it probably lies in Chemawawin School. It is both interesting and encouraging to examine Mr. Robert Bear's orderly pupils. Though young himself, he conducts his school with a decorum and gravity not often found in a man of his age. The children, naturally backward and slow, are nevertheless making fair progress under his tuition, and by the numbers in attendance show their appreciation of his valuable services.

The soil on this reserve, though rocky, is excellent for root crops. Potatoes, are cultivated to some extent, but not sufficiently to meet the requirements. Still, as a whole, I consider this band in better circumstances than formerly.

Moose Lake Reserve comes next, and is situated about east from the office. It can be approached either by the river and Moose Lake proper, a distance of some eighty miles, or *via* Clear Water Lake, where it is probably sixty miles from the office. Moose Lake itself is an excellent water for fish nearly all the year round. The Indians, therefore, at this point do not exert themselves to any great extent to cultivate the soil. During the past year they have been in fair circumstances, as the muskrat has been numerous; but they are tardy in adopting habits of civilization.

The soil on this reserve is good for root crops and some potatoes are cultivated, but not sufficient to meet the actual requirements.

The school at present is not in operation. But of all the bands in this agency who have opportunities for improvement I have no hesitation in saying that the Pas stands first. The Church Missionary Society has its headquarters in this district at this reserve, and much is done by its agency for the spiritual and temporal welfare of these Indians. Again, there are two schools here conducted by Messrs. Hart and Pritchard, the former of whom is noted for his educational abilities and the latter for his indefatigable energy of spirit, carrying him altogether beyond his bodily powers. The attendance at these

schools is fair, but not what might be expected, especially at the Eddy. This is owing to the fact that a number of the parents do not winter on the reserve, owing to the poor fishing thereon during the cold season. No doubt the comparatively limited attendance is very detrimental to the permanent success of the school. Still, notwithstanding all the disadvantages the teachers certainly have to contend with, a fair show of progress is made. I consider that the writing and arithmetic of some of the pupils at the Eddy and the Pas would compare well with some English schools of pupils of the same age. If the parents do not remove their children from the advantages of education I anticipate a fair show of intellect from the rising generation of the Pas Indians.

Again, these Indians have the advantage of an important trading post belonging to the Hudson's Bay Company, where they can (but not invariably) obtain the necessaries of life in exchange for furs and work of various kinds.

And, lastly, the Pas Band has the advantage of frequent visits of the agent, so that if they do not profit by all the machinery at work for their benefit the fault probably lies with themselves.

On this reserve agricultural operations are becoming more general and are prosecuted with more fervour than formerly, notwithstanding the many difficulties met with in very stony land.

Another sign of progress is the building of new and better houses by some of the chief ones of the band. It is also so far satisfactory to see a few leaving the low, marshy parts and selecting sites on high and healthy ground. I have noticed, too, of late, that in a few cases small stockade fences have now superseded the former rude protection around the gardens. Perhaps, therefore, it is not in vain that the Pas Band possess advantages for progress beyond any of the other Indians in this agency.

Leaving the Pas, and ascending the Carrot River, we come to the two fragments of this band settled at the foot of the Pas Mountain. Shoal Lake Reserve lies south-west of the office at a distance of some eighty-five miles, while Red Earth is situated about fifteen miles farther up the river. The Indians at these two places are, strange to say, characterized by opposite tendencies; for while the Shoal Lake Band makes but little progress in cultivating the soil or in general improvement, the Red Earth Indians are thrifty, have a good supply of potatoes for food in winter and summer and for seed in spring, and present at the agent's visit of inspection tidy houses and premises generally. It is remarkable what these Indians have done, so far removed from the outside world. There is no school as yet at the Pas Mountain.

The next in order is Birch River Reserve; but it still remains as last year—unoccupied.

The last band visited, and probably the last in advancement on the reserve, is Cumberland. There is, however, an excellent Chief there; but his Indians for the most part are established wanderers, living almost entirely by means of the net, the trap and the gun. This band is much smaller than it was formerly, owing to those who had a desire to farm having been allowed to remove to a more fertile reserve at La Corne. Save the Chief and a few others, those remaining do but little on the reserve, spending most of the year in hunting pursuits. There is, therefore, no school on this reserve.

I am thankful to be able to report that the sick and destitute have been cared for both by the Department and the Missionaries. Medicines have been dispensed by those appointed for that purpose, and there has been no serious calamity throughout the year.

It should also be reported that the visit paid by Dr. Orton last fall to the various bands within easy access was quite an event, and his valuable services were highly appreciated. The operation the doctor performed on one of the school children was successful. Mrs. Hines, who dispenses the medicines at the Pas, carefully attended the child from the time the operation took place until its recovery. The child was also well supplied with nourishing food by the Department, and is now, I am thankful to report, again attending school.

Lastly, it is a matter of encouragement to be able to report that the sanitary instructions of the Department have made themselves felt, and the Indians are gradually awaking to the fact that such measures are for their benefit. But repeated drilling has

been the order of the day ere the bands could be persuaded to adopt the principle that "prevention is better than cure." These Indians are, however, by no means perfect—far from it in fact. But I am persuaded that a beginning has been made. Piles of rubbish have been given to the flames, and premises, generally, are assuming a more tidy appearance. It is much wished that the Indians themselves may become really interested in this matter, perceive that they are the gainers, and that by the observance of cleanly habits they are, in a measure, warding off disease, and thus preventing the too frequent sorrows of bereavement.

Since the summer commenced I have visited all the bands (except Grand Rapids and Cumberland—the two termini) in the agency for the purpose of enforcing the sanitary instructions just referred to, and trust it has not been without good effect.

This brief report which began somewhat discouragingly closes with hope for the future; while it is the writer's earnest wish and prayer that the latent faculties of these sons of the forest may be so aroused and cultivated, at least in the rising generation, that not a few may in the near future rise to fill important positions in this vast Dominion. Above all, may these once benighted people enjoy the light of the gospel of the Grace of God, find Eternal Life in Christ, and eternally enjoy all the fruits of an Eternal Redemption!

This report is most respectfully submitted.

I have the honour to be, Sir,

Your obedient servant,

J. READER,

Indian Agent.

BERENS RIVER INDIAN AGENCY, 23rd July, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th June, 1891.

As circumstances prevented my usual winter visits to some of the bands under my supervision, I took the earliest opportunity of inspecting the schools and reserves as soon as navigation opened.

I am happy to state that notwithstanding the severe winter I found almost all the Indians doing fairly well, some had their gardens planted and others were hard at work when I saw them. Seed had been supplied to a number of the bands, which was much appreciated.

Progress in farming, or even in planting, is kept back very much on account of the wooded and rocky nature of this part of the country as well as by the cold lingering springs. But if the land was once cleared and brought to a state for cultivation, I doubt not that the Indians would take more interest in it, and plant more than they do at present. Although self-supporting—excepting the small supply of provisions allowed to the sick, and destitute widows—some of the bands are, at times, badly off during winter, especially if the fur hunt turns out badly, as it did last winter, and the fishing in the southern part of the agency nearly a failure. The Indians in this agency are much pleased to hear that the Government is likely to exclude certain portions of the lake and rivers from the operations of practical fishermen.

The health of the Indians was generally good during the last winter. Medicines are supplied to almost all the bands.

The increase of the population in this agency during the last year is about two per cent.

Notwithstanding the nomadic habits of the Indians, especially some of the bands, the day schools are doing much good, and progressing favourably; but the Indians object to sending their children to industrial schools situated a great distance from their reserves.

The bands are becoming more observant of the sanitary regulations established by the Department.

The cattle on the different reserves were looking very well. Some of the bands are very anxious to increase their stock.

Although their agricultural implements are now better taken care of, they are, at some of the reserves, becoming worn out and useless.

As the number in each band does not vary much, and as there is little change in building, etc., on the reserves, I do not give statistics in this as I did in my last report.

I have the honour to be, Sir,

Your obedient servant,

A. MACKAY,

Indian Agent.

INDIAN AGENT'S OFFICE, TREATY No. 6,

DUCK LAKE, 18th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my fourth annual report for the year ended the 30th of June, 1891, with accompanying tabular statement and inventory of Government property under my charge.

The prospects of an abundant harvest, with which the last fiscal year closed, I regret to say, were not realized, yet after threshing, the following returns, in bushels, were produced: wheat, two thousand nine hundred and twenty-nine; oats, seven hundred and eighty-three; pease, ten; barley, nine hundred; turnips, seven hundred and two; and potatoes, one thousand two hundred and sixty-nine bushels: an increase over the previous year of: wheat, one thousand six hundred and sixty-nine; oats, four hundred and fifteen; pease, three; barley, six hundred and thirty; turnips, seven hundred and two; and potatoes, five hundred bushels. The Indians managed to supply themselves with tea, tobacco and a little clothing out of the proceeds, while from the flour made the majority of One Arrow's, Okemassi's, Beardy's and John Smith's bands supported themselves for from four to six months, thereby reducing the rations very materially during the winter months. Hopes of a good harvest this year are entertained.

It is gratifying to be able to report favourably of the condition and increase of the live stock. In spite of the prevalence of anthrax in the early part of the year, which caused considerable loss in this neighbourhood, the increase in this agency amounts to the handsome figure of one hundred and two animals since my last report. The Indians certainly show a great deal of zeal in the raising of cattle, and during the winter, be it said to their credit or otherwise, seem to concern themselves more about the comfort of their stock than of their own. Mild weather favoured them in the early part of the winter, but when severe weather set in and the stock had to be stabled, watering and feeding was regularly attended to, and the condition in which the animals were brought out in the spring reflects great credit both on the Indians and the farmers in charge, it being considerably better than that of the stock of their neighbours.

An ample supply of hay was put up last summer, of which the surplus was sold to white settlers this spring whose supply was exhausted. I may add that the Indians worked hard in putting up hay for themselves as well as for the agency, and the energy they displayed in preserving their stacks from destruction by prairie fires, indicates their desire to preserve what their labour has gained them, and I think shows that considerable progress has been made in this direction, some of the white settlers having lost heavily, while the Indians suffered comparatively little.

The present indication is that we will have a good crop of hay this year, but recently, skunk or spear grass seems to overrun the hay fields, which I am afraid will materially damage the quality as well as lessen the quantity.

Some of the most industrious of the Indians occupied themselves during the winter in getting out building logs and several good houses are in course of erection. The energy shown by two or three is really a pleasure to see and every assistance at my dis-

posals is cheerfully given them. A few hunting Indians had moderate success, while others fared badly.

The health of the Indians is fairly good, there being very little sickness beyond a few cases of consumption and scrofula. Some four hundred and fifty-one persons were vaccinated during treaty payments, the majority proving successful.

Sanitary precautions receive careful attention and the keeping of the houses and surroundings clean is insisted upon.

The practice of painting the face, which I consider is one of the causes of disease and sore eyes, is, I am pleased to say, fast disappearing as well as most of their former habits.

The school at One Arrow's Reserve has not yet proved a success. The majority of the Indians, being pagans, are averse to the school, but I hope soon to succeed in surmounting the difficulty. The school at Beardy's and Okemassi's, I am pleased to say, has made good progress and the Indians are taking much greater interest in it than heretofore.

The school on John Smith's reserve is advancing well and I am pleased to say that the teacher, Miss M. Wilson, takes a great interest in her work and is doing her utmost to make it a success.

The progress of the school on James Smith's reserve is not as satisfactory as could be desired, on account of the Indians of this band being of such an erratic disposition, still Mr. Parker the teacher is very painstaking and hopes ultimately to secure a better attendance.

In January the Rev. Thomas Clark, accompanied by myself, visited John Smith's, James Smith's and the Cumberland Reserves, and were successful in getting seventeen children for the industrial school at Battleford.

Mr. Inspector McGibbon made a thorough inspection of this agency in August and seemed surprised to see how far advanced the Indians of this district were. I may add that I derived much benefit from the Inspector's visit, especially in matters connected with the office and the storehouse.

In January the Indian Commissioner paid the agency a visit, which, though a short one, had its usually good influence, as the Indians are always glad to see him.

In October Mr. School Inspector Betournay and in November Mr. School Inspector Macrae paid their annual visit to the schools. The former I did not see, being absent at Fort à la Corne. The latter I accompanied to John and James Smith's Reserves, and he appeared satisfied with the progress made, more especially at John Smith's.

On the 6th of October our annual harvest home was held at the agency and proved a great success at little expense. Races and other athletic amusements were indulged in and prizes distributed to the amount of \$85, provided by private subscription. Good humor pervaded the whole assembly and the day closed amidst evidences of satisfaction from all present.

Treaty payments commenced on the eighth and closed on the eighteenth of October, and passed off quietly.

Mr. Louis Marion, farmer at One Arrow's Reserve, works hard to advance the Indians of that band, and is a man suited to his work. Mr. Lawrence Lovell, farmer at Okemassi's and Beardy's Reserve, is an energetic, hardworking and painstaking man and gets on well with the Indians.

Mr. Justus Wilson, at John Smith's Reserve, deserves credit for the manner in which he has advanced this band since he has been in charge.

My interpreter, Sandy Thomas, although an Indian, deserves special mention as being a good man, both honest and trustworthy.

I have the honour to be, Sir,

Your obedient servant,

R. S. McKENZIE,

Indian Agent.

INDIAN AGENT'S OFFICE, TREATY NO. 6,
BATTLEFORD, 17th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my report for the year ended 30th of June, 1891, together with tabular statement and inventory of all Government property under my charge.

I am pleased to be able to make, on the whole, a favourable report of the general prosperity of the Indians of this agency, although the crops of the past year did not turn out so well as was expected, but, notwithstanding that, many of the reserves supplied their own flour for half of the year, and the Indians of Moosemin Reserve, which have by far the best grain producing reserve in the district, will supply their own flour until the new crop comes in.

This spring being an exceptionally early one, the Indians set to work with renewed vigor to put in their crops, and by the first of May had finished seeding. The vegetation being rapid the grain, in many cases, covered the ground as early as the tenth of the month.

With the steady increase of cattle, which now number one thousand head, the question of supplying hay for them becomes a serious one.

Last winter being a mild one and hay being plentiful we experienced no difficulty in bringing the stock through in prime condition. I have sent the Indians to the Turtle Lake country where they have put up eight hundred tons of hay, and will build stables in that locality to winter.

The schools, eight in number, are doing fairly well. The trouble heretofore in getting the children to attend has, to a great extent, been overcome, and a regular attendance may be seen on every reserve. Two new schools have been erected lately and some useful repairs done on the school on Sweet Grass Reserve. The new school on Little Pine's is under the auspices of the Episcopalians, and the school on Thunderchild's is under the Roman Catholics. The school on the Stoney Reserve was closed last fall and has not since been opened; the cause was the resignation of the teacher.

The sanitary condition of the Indians on the different reserves has, on the whole, been good, no serious diseases having visited either the children or adult population. "La grippe" carried off a few children but not to any alarming extent.

The desire on the part of the Indians to help themselves and become independent is quite apparent. Last year and the year before, the Indians clubbed together and subscribed sufficient money to pay for a sixteen-horse power engine and separator; and the last crop was threshed and stored for the first time in this agency in proper order.

The staff of employes continue the same as last year, and they vie with each other in striving to show the best results.

A. J. McNeill is the agency clerk, and the value of his services to the Department may be estimated by the correctness of the agency work.

S. T. Macadam, M.D., is still in charge of the sanitary branch of the agency and industrial school, and is a most painstaking and efficient officer.

I have the honour to be, Sir,

Your obedient servant,

P. J. WILLIAMS.

Indian Agent.

UNION LAKE AGENCY,

SASKATCHEWAN, 1st July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement, with inventory of Government property, for the year ended 30th June, 1891.

Union Lake Reserve

Composed of See-kas-kootch Band, 119; Wee-mis-ti-coo-see-ah-wasis Band, 120; Oo-nee-pow-hayos Band, 121; Pus-kee-ah-kee-wins Band, 122; Kee-hee-wins Band, 123.

Since my report of 30th June last the bands of Indians under my charge are making noticeable advancement towards civilization. In no former year have I noticed such an improvement. The blanket of former years has been abandoned, and both men and women make it an object to dress as respectably as their limited means allow.

As I had occasion to mention in my last annual report that none of my Indians attended a thirst dance held by non-treaty Indians in this district a year ago, I have pleasure in again being able to inform you that although they received many invitations from the same quarter this year to attend a similar gathering, none responded to the call or even asked permission to go.

The health of the bands under my charge has been extremely good during the past year. Vital statistics show eleven deaths and thirty-two births recorded during the year. Five deaths were of children from natural causes; the remainder died from scrofula and consumption of long standing. The Indian women, I am happy to say, take particular pains to keep their dwellings neat and clean; this, in a great measure, accounts for the good health enjoyed by the Union Lake Indians.

The services of the medical officer were not required during the year, the simple remedies provided by the Department having proved quite sufficient for the treatment of the maladies prevailing.

At the round-up, a short time ago, of the reserve cattle, the total number of animals was 248. The majority of the Indians take particularly good care of their animals and do not abuse them in any way. During the winter months they feed and water them regularly; this accounts for the steady increase, and the Indian understands it is to his advantage to care well for his stock.

The Indians are fully alive to the benefit they will derive from the grist and saw mill which has been erected on the Union Lake Reserve by the Department. Four families saved sufficient barley to make flour enough for their own use for twelve months, and, in addition to this quantity, sold 120 bushels to the Department. I will not particularize any further cases, but would respectfully point out that the contract for flour was reduced from 1,070 sacks in 1889-90 to 600 sacks in 1890-91. There would have been a much greater reduction had the crops been better.

The flour made from the barley is of a dark colour. The Indians at first did not like it, chiefly because they did not understand properly how to cook it; however, after a few lessons they overcame this difficulty and they now like it very well. Only a few days ago one of the Indians told me he liked the barley bread equally as well as the wheat flour bread. It is certainly a good wholesome article. The grist mill will, I trust, soon repay the sum which was expended on it by the Department.

The Indians are particularly well pleased at having a saw mill, so much so, indeed, that every man turned out last winter and helped to cut and haul to the mill one thousand seven hundred fine logs for lumber. All the families are desirous of improving their dwellings, in fact, one man has already had his house shingled, and I venture to say that in a few years thatched houses will be a thing of the past.

The spirit of competition manifested during the spring, in getting their seeding done, is to be commended. Greater care was taken, and the work was never done so well by the Indians as it was during the spring of 1891, every man being anxious to do better than his neighbour.

The schools on Onion Lake Reserve were fairly well attended during the year, but owing to the innate bashfulness of the Cree children, it is almost impossible to get one of them to speak in the English language even words that they understand.

All the reserve Indians attend their places of worship twice every Sunday.

Owing to the isolated situation of the reserve there is no outside labour for the Indians. Many of the families make butter and sell it to the few surrounding settlers.

Chippewayan, Band 124, Beaver River, Cold Lake.

This band of Indians received very little assistance from the Department during the year, and anything given them was paid for by the recipients in making shingles for the Department. These Indians have now a fine herd of cattle, numbering one hundred and ninety-seven head, also forty-two native horses, all their own property. They purchased several head of cattle during the year and fourteen horses. As this band live chiefly by the chase and cattle raising, they take no interest in farming, and consequently have put down no grain this year. They, however, planted a few acres of turnips and potatoes.

Generally the health of this band is very good, although there are several cases of scrofula and consumption amongst them.

The clean and neat appearance of the dwellings on this reserve show that the Indians have not neglected the many lessons on cleanliness given them. They have also followed the example of the Crees at Onion Lake in having their houses whitewashed inside and out. They dress entirely in civilized costume, bought with their own money. The births are in excess of deaths.

Since this school was opened (almost eight months ago) the progress made by the children in speaking English is extraordinary. They are all anxious to learn and pay great attention to their teacher. They are not at all ashamed. If the present rate of progress continues it will not be long before all the young members of the band will be able to converse in the English language.

All the members of this band belong to the Roman Catholic Church, and all attend the services regularly.

Onion Lake Agency.

During the year the herd was augmented by the purchase of fifty-nine three-year old cows and one bull by the Department. The herd now numbers one hundred and ninety-five animals and eighty-five calves. I will be able to reduce the 1892-93 beef contract to a minimum, and the following year, if everything goes well, no contract beef will be required. The animals are all in good condition.

A grist and saw-mill was erected during the year, also a blacksmiths' and carpenters' workshop, all frame buildings. Various other improvements were made at the agency during the year, all the work being performed by Indians.

I have the honour to be, Sir,

Your obedient servant,

GEO. G. MANN,

Indian Agent.

INDIAN AGENT'S OFFICE, SADDLE LAKE, ALBERTA,

TREATY NO. 6, 30th June, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to transmit herewith my report for the fiscal year just ended, together with tabular statement and inventory of all Government property under my charge.

As I did not enter into full charge until the month of May, 1890, I was unable, within the limited period that intervened, to become sufficiently conversant with the working and details of this agency, to give, when I had the honour to submit my former report to you, more than a general outline.

Band No. 125, Saddle Lake Reserve.

The Indians of this reserve, as well as those of Blue Quill's and the Whitefish Lake Reserves, appeared to have thought that they should be regularly rationed, not in proportion to their industry, but because they resided on these reserves. On my first arrival here I informed all the Indians that I was authorized to assist—excepting the old, the incapable and the sick—those only who showed a disposition to assist themselves, and that the object of the Department was to raise them to a self-supporting condition similar to the position of the white man, and to which they could only hope to attain by cultivating frugal and industrious habits. When the Indian Commissioner visited this agency in July last, in talking to the bands, he sustained what I had said to them and with happy results, and the majority of them are making creditable efforts in laying a foundation for future independence.

I found that the Indians of this reserve were constantly entertaining a horde of visitors, and in consequence, though the issues were ample, they were continually in want. I remedied this by ordering all strangers off the reserves, and the result is that few demands have since been made for any beyond the normal issues allowed to working Indians.

The acreage under crop on this reserve is in excess of that put in last spring. The yield of barley and roots was very fair. I found the cultivated lands very dirty, and they can be brought to a fit condition to raise crops only by a continued and systematic course of summer fallowing, which I am now endeavouring to carry out.

These Indians are excellent stock men. They take every possible care of their cattle and give them all the attention that white men would do. I have seen them early in the season, wrap the young calves in blankets, take them into their houses and keep them there till they had gained sufficient strength and vitality to withstand the rigor of the weather, and I am of opinion that stock raising will become the principal industry of the Indian bands of this and the other reserves in this agency.

Band No. 126, Wahsatanow.

This reserve lies fifty-seven miles west from Saddle Lake and at present numbers twenty-eight souls. I found this band in no very flourishing condition, as, owing to its limited number, a farmer could not be placed in charge. I regularly visited the reserve fortnightly and issued rations to them at these intervals. During the past year I have been constantly urging them to remove to Saddle Lake but met with continued opposition from Bear's Ears, the Chief and the other old people, who are averse from leaving their old hunting grounds. I have succeeded in partially breaking up the band by the removal of three of its families to Saddle Lake Reserve, and I hope during the autumn to induce the remainder to remove thither, where they can be properly looked after, as the majority of the males are simply cripples and unfit for any hard or sustained labour. These Indians, too, pay particular attention to their cattle.

Band No. 127, Blue Quill's.

This band last year numbered only twenty-seven souls, but by the transfer of several Roman Catholic families from Thos. Hunter's Reserve at Saddle Lake, it gains a considerable increase and now numbers sixty-four souls, fifty-nine of whom belong to the Roman Catholic Church. The area under cultivation will be very much increased next year, and four good new dwelling houses will be completed this summer. The houses and farms formerly occupied, on Saddle Lake Reserve, by the families transferred to this band, I propose to hand over to the families from Wahsatanow when they leave their present reserve.

Band No. 128, Whitefish Lake.

This reserve is forty miles west from Saddle Lake and is the chief one in the agency, as the band numbers three hundred and ten persons and the only chief, Pakan, resides there. This reserve, commencing on the south end of Goodfish Lake, runs along its

easterly shore, thence along Whitefish Lake to its northerly end and has a frontage of about ten miles. Owing to the nature of the land on the reserve, which is both hilly and rocky, the cultivation of the ground is difficult and the area under crop is comprised in a succession of small patches, extending from one end of the reserve to the other. Last autumn both barley and roots were successfully harvested and the yield of both was satisfactory. This year a much larger crop was put in, and on my last visit, a few days ago, I found the crops looking so well that an abundant return may be looked for.

There are excellent workshops on this reserve, and Mr. Farmer Ingram instructs his Indians in blacksmith and carpenter work, and he is making many of them passable mechanics. The livestock on this reserve, of which, including native ponies, there are about three-hundred and seventy-five head, are well attended, and the band has still in stack forty-five tons of hay cut last summer.

Band No. 129, Lake Labiche.

Almost all the members of this band have been discharged from treaty, and it comprises now fourteen souls only, of whom the majority are children.

Band No. 130, Chippewayans.

These Indians reside at Heart Lake, a place about one hundred and twenty miles north-east from Saddle Lake. They are expert hunters and live chiefly by trapping, hunting and fishing. They are industrious, better clothed, and appear much farther advanced than any of the outlying bands. Their farming operations do not extend beyond the cultivation of potatoes and garden seeds. I saw the band twice during the year, once when paying them their annuities, and a second time when they visited the agency in February. They came with their dog-trains for provisions, and, as the fishing during the winter had been a partial failure and the trapping poor, I issued them eighteen sacks of flour and a little ammunition to carry them through the remainder of the winter. These Indians are good cattle men, and they have been increasing their herd by purchase.

Band No. 131, Beaver Lake.

These Indians live at a point about half way between Whitefish Lake and Heart Lake, and, like the Chippewayans, subsist on the product of the chase. They belong in the fullest sense to the hunter class and as such recoil from the restraints of a life passed on a settled reserve. When paying them their annuities, I attempted to induce them to move into Saddle Lake to begin a more settled and industrious life, but to no effect. I visited the band a second time in February. They were in a condition of actual want, as the fishing was poor and trapping, in comparison with previous years, unprofitable. I shipped to P. Pruden, who is employed by the Department every spring to look after these Indians and to see that they plant potatoes and garden seeds, sixteen sacks of flour and ammunition, for weekly issue to the destitute among them until spring opened and the wild fowl arrived. Pruden succeeded not only in tiding them over the winter with this supply but has also sufficient flour over to feed them during the haying season. These Indians will cling to their idle, nomadic life till destitution forces them to begin a more active life.

As the majority of the cattle, when they were handed over to me by the previous agent, were without the Department's brand, as soon after they were stabled for the winter as possible I commenced branding and met with but little opposition from the Indians after I had explained the objects in view, and I induced them to have all their private stock similarly branded, but on the hip opposite to that on which those under the control of the Department were stamped "I. D.," and the Indians now understand that they can neither kill nor trade off even their own private cattle so long as they receive support from the Department, without first obtaining the consent of the agent to do so; and they are aware that before sale the "I. D." on the animal they desire to sell must be vented by the farmer. I have pointed out to the Indians that there is more profit to be derived from raising beef cattle than milch cows. As these Indians possess

quite a large number of private animals, many of them, if restrained from killing off the young stock, ought in a few years to be comparatively well off.

The health of the Indians on the reserves has been fitful. In some months there would be little or no sickness, while in others there would be a great deal, but none at all of a serious nature. A few are suffering from pulmonary complaints and others are affected with the irrepressible scrofula. During the year the death rate has been three per cent., and the births show an increase of 5 per cent.

There are four day schools on this agency, one at Saddle Lake, two at Whitefish Lake and one at Lake Labiche, the latter Roman Catholic and the other three Methodist schools. The average daily attendance at the latter has not been so good as could be desired; but as the Chief and headmen have taken the matter in hand and are forming a local board of education with a view to compulsory attendance of all children of a fit age, better attendance may, in the future, be expected.

Altogether I have every reason to be satisfied with the general conduct of the Indians of this agency. During the winter they got out and prepared the materials for a large warehouse. This is now on the ground, and I purpose to put them to work this winter at its erection. An equal quantity of material was prepared at Whitefish Lake for stables and an implement house. It, too, is on the ground, and these buildings will be erected this winter. I secured for my Indians the contract for bridging Whitemud River, between Saddle Lake and Victoria. The grant was one hundred dollars which was supplemented by forty—twenty dollars from His Lordship Bishop Grandin and twenty dollars from the Hudson's Bay Company. The work was completed this month, and the structure is well built and substantial.

The following changes have, during the year, been made in the staff of agency: Mr. T. O'Brien, clerk, transferred to Onion Lake Agency; Mr. Farmer Grasse, transferred to Sarcee Agency.

I have the honour to be, Sir,

Your obedient servant,

JOHN ROSS,

Acting Indian Agent.

INDIAN AGENT'S OFFICE,

PEACE HILLS, 28th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit for your consideration my first annual report and tabular statement, together with inventory of all Government property under my charge, and approximate value of same, for the year ended 30th June, 1891.

Although I have only been in charge since December last, I have had an intimate knowledge of the working of the agency during the whole year, as previous to my taking over the entire supervision, I was in charge of the farms at Bears Hills as instructor, and will therefore be able to furnish you with a report of the agency for the whole year; and I am glad to be able to report progress in a few particulars, and furnish you with such information as will prove to you that the Indians are making rapid strides towards becoming self-supporting.

During the year Sampson's, Ermineskin's and Louis Bull's Indians have done a good deal towards supporting themselves, besides engaging in farming operations more extensively than ever before. During the present fiscal year these three bands have used less provisions furnished by the Government than in the previous years by three hundred and eighty-seven sacks of flour, ninety-five hundred and fifty-six pounds of bacon and five thousand and ninety-eight pounds of beef, thus saving the Government \$3,172.60; and from the present appearance of their crops I am satisfied that they will do much better during the succeeding year, so that I confidently hope that, with the same energy displayed by them, in about two years from now to see this agency self-supporting.

Last November the Commissioner closed up farm 18c, Sharphead's Reserve. These Indians (the Stonies) had dwindled down to a mere handful, and as they were doing very little in the way of farming it was much wiser to do so, as it will be a large annual saving to the Department, and a benefit to the Indians themselves. There were not children enough in the band to make it an object to keep a school in operation; this and other advantages they will have when they locate themselves elsewhere. As yet, they have not settled down, but since the reserve has been closed, they have made their own living, fishing and hunting; at times, however, they have received a little aid from this agency.

Sampson's, Ermineskin's and Louis Bull's have each purchased a combined seeder and drill, the three cost \$240 in Calgary, besides this they have purchased three cows and one steer; they also purchased thirty beef hides, nails and shingles for two houses, and still have \$235, which amount they have placed in my hands, asking me to purchase some more machinery for them next year. The hides were tanned and the leather made into moccasins for themselves.

The drills they purchased have done them good service this season, as they planted the grain two or three inches deep, thus enabling it to find moisture enough to keep it growing during the two very dry months of May and June. Had these crops been sown broadcast, they would have been a failure.

A great deal of the land is very dirty; there have been one hundred and fifty-five acres broken and summer fallowed, which will place them in a better position for crops next season than ever before. "La grippe" spread over this agency during the months of April and May, which retarded somewhat the farming operations, two deaths occurred during this time, but both patients were consumptive. Aside from this epidemic, they have been fairly healthy.

During the present year a log building thirty by twenty, formerly attached to the agency house and used as a kitchen, was removed to a more convenient site, and put in order for the agency clerk; it has been boarded throughout on the inside and partitioned at the small cost of \$250.

Chief Sampson's house has been completed, floors, windows and doors having been put in. Two new houses have been erected on Ermineskin's Reserve and covered with good shingle roofs.

There are three Missionaries and two teachers in this agency. Rev. C. E. Somerset is in charge of Louis Bull's Reserve and also teaches the school, which all the children attend. Mr. Somerset has great influence with his Indians, and takes an interest in their temporal as well as in their spiritual welfare; whenever he sees any of them neglecting their work, he at once remonstrates with them, and they look to him as their adviser in all matters.

Rev. Father Gabillon is Missionary to the Indians of Ermineskin's Band, and what I have just said regarding Mr. Somerset is true also in his case. His influence with his Indians, not only makes the work of the instructor easy, but is leading them on to prosperity in temporal as well as spiritual matters.

Rev. E. B. Glass is Missionary to the Indians of Sampson's Band.

Miss LaTulippe is teacher on Ermineskin's Reserve. She is much liked by the children, and a decided improvement in the school has taken place under her management. The attendance is fair.

Miss DeGraff is teacher of Sampson's school. She is much beloved by the children, and I no longer require to speak to them about neglecting to attend; they are learning very fast, especially to speak the English language.

The cattle are not of a good grade, inferior bulls have been used for years past; but this year four pure bred pedigreed bulls have been purchased, which will make an improvement in the stock. There are three hundred and seventy-seven head of cattle in the agency; the crop of calves this season is fairly good, and the cattle are healthy and in good order.

Among the employés there have been some changes. After the Wolf Creek Reserve (Farm 18c) was closed, Farmer Robertson was placed in charge of Farm 18a., but it was

soon thought advisable to make a change, and Gilbert Whitford, the Interpreter, was placed in charge. He is doing well; his wages are \$30 per month, with rations for himself and wife. Previous to this year the wages paid at this farm was \$95 per month, and five and a half rations. The Department thus effects a saving of \$65 and three and a half rations per month.

Donald Whitford, Agency Interpreter, was being paid \$40 per month and rations for five and a half. I reduced his wages and rations, and he resigned. His place has been filled by Alfred Whitford at \$25 per month and rations for two. The Government thus effects a saving by these changes, in wages and rations, of about \$115.50 per month, and the work has in no way suffered or been retarded thereby.

Mr. Sanders, who has been a long time in the service, and is thoroughly master of his work in the office, also issues the rations to Sampson's Band, and assists me in whatever way he can in outside affairs at the agency, so much so, that I am able to spend nearly all my time with the Indians while they are engaged at work on their reserves.

A part of the agency has been sub-divided into forty-acre lots. The Calgary and Edmonton Railway has passed through it.

The Indian Commissioner visited the agency twice during the year.

I have the honour to be, Sir,

Your obedient servant,

D. L. CLINK.

Acting Indian Agent.

EDMONTON AGENCY, 9th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to present my annual report, tabular statement and inventory of Government property, for the fiscal year ended 30th June, 1891.

There are at the present time five reserves within this agency, which I will proceed to deal with individually, touching on such points as appertain to the progress made by the Indians.

Enoch's Band.

This band harvested close upon five hundred bushels of wheat. The barley crop yielded nearly eight hundred bushels and was very good grain. The potatoes and turnips were also a success. The Indians have broken seventy-one acres, since last fall; have fenced thirty acres, and seeded a total acreage this spring of one hundred and ninety-eight acres, which at the present time promises a bountiful harvest. They have also put up nine dwelling houses, five stables, and dug six wells. During the winter months they sawed about five thousand feet of lumber and made five thousand shingles, besides hauling and squaring a number of logs, two hundred and fifty of which were for the agency. It should also be stated that they ploughed sixteen acres of land at the latter place. When it is remembered that this band is mainly made up of women, many of whom are very old and decrepit, I think it will be conceded that the amount of work performed during the year is by no means inconsiderable. There are a few suffering from ill-health, but other than this can hardly be expected, owing to the large percentage of the aged and infirm. The stock of this band are well attended to, and show a good natural increase. The schools continue to have a fair attendance.

Michel's Band.

This band has but few members, all of whom are well advanced in farming. The barley and potatoes both were good crops. The seeding done this spring consists of thirty-six acres of wheat, forty of oats, fifty of barley and seven of garden produce. In the winter they cut and hauled a quantity of logs. The earnings by the sale of furs have been small, owing to the scarcity of the fur-bearing animals in the vicinity of this reserve. The stock belonging to this band are healthy and in good condition.

Alexander's Band.

This band is under the direct supervision of Mr. Farmer O'Donnell and to him no doubt is attributable in a great measure the work performed by it in the past twelve months. The Indians worked energetically at their seeding this spring, putting in fifty acres of wheat, fifteen of oats and one hundred and twenty-three of barley, eight of potatoes, two of turnips and two acres of gardens, which, although not looking so well as the crops on Enoch's Reserve, still will give them a fair reward for their labour under favourable weather. They have also erected seven dwelling houses, six stables, one root-house, and have made three wells. besides cutting and hauling logs and rails and fencing three hundred and twenty-five acres of land. The catch of furs has been about the average, the earnings derived therefrom being for the most part spent in clothing and provisions. The cattle are in good order, and the pigs given by the Government this spring are well looked after, and show a natural increase of twelve. The health of the Indians is, and has been very good. The schools on this reserve are doing satisfactory work.

Alexis' Band.

The old Chief Alexis has been replaced by Yosé, who received his appointment in April last. He makes a very good chief, being intelligent and industrious. This band, although considered a hunting one, has managed to get through a fair amount of work. The acreage put under crop this spring equals twenty-seven acres, consisting of three of wheat, eighteen of barley, three of potatoes and three of garden produce. Several dwelling houses and stables have been erected, and sixty-five acres of land fenced. The cattle in the hands of this band are looking well. A school has been opened on this reserve, under the auspices of the Roman Catholic Church, and is a great success. The teacher is an Indian, having been formerly a pupil of the St. Albert Industrial School. This band has suffered but little from ill-health.

Paul's Reserve.

This band, formerly known as Ironhead's, is a detachment of Alexis' Band, and is located at White Whale Lake. Its number of members has been considerably augmented by the reception of some of Sharphead's Band (in the Peace Hills Agency) which is to be done formally as soon as the reserve is surveyed. The barley and potatoes gave a fair yield. Twenty-nine acres of crop were put in this spring, which bids fair to give a good yield. The stock are all in first rate order and are well attended to. The mortality in this band has been very small, very little sickness having visited the reserve.

St. Albert's Industrial School.

This institution deserves special mention, as it is doing most excellent work. It is very well kept by the Sisters of Charity, who are untiring in their efforts to advance the general welfare of the school. The premises are kept scrupulously clean, and would be a credit to any institution. The boys, apart from the ordinary scholastic duties, are taught farming, and the girls sewing and other useful domestic duties.

In connection with the work at the agency, which is by no means inconsiderable, it may be stated that it has all been done by the employment of Indian labour, including the carrying of the mail, thus reducing very materially the cost in connection therewith.

It may also be a matter of interest to the Department to learn that the trees sent last year from the Experimental Farm at Ottawa have proved a success to the extent of about 75 per cent. The maple and ash sown this spring have grown very well, the former being nearly two feet high and the latter one.

In conclusion, I may say that the Indians throughout this agency appear to be happy and contented, and are much more amenable to advice and authority than formerly.

I have the honour to be, Sir,

Your obedient servant,

CHAS. DE CAZES,

Indian Agent.

CARLTON AGENCY, 1st August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward my annual report, together with tabular statement and inventory of Government property, for the year ended 30th June, 1891.

The usual contract supplies for the destitute and for the different schools of the agency were rendered here in the course of the summer in good order and condition.

The first treaty payments were made at Green Lake on the 4th September, 1890, and were satisfactorily conducted. The Indians were greatly elated at receiving two years' arrears of annuity.

On my way back from Green Lake I met the Pelican and Stony Lake Indians at the Devil's Lake, where they were paid on the 8th of the same month. Seventy of the former band were not paid. These still make a living by hunting and have not yet availed themselves of any of their privileges under the treaty.

The Sturgeon Lake Band (101) were paid on the 17th, and those of the Mistawasis, Atakakoop and Petequakey on the 9th, 10th and 11th of October.

The wheat when ground produced flour of inferior quality, but by mixing it with good flour it was made eatable, and no complaints were made by the Indians of its fitness for consumption.

Our millwright did a good deal of gristing for the Duck Lake Indians, as well as for several of the settlers in the vicinity of Carlton. The wheat received as toll from these latter was issued to the Indians for seed grain in spring. The millwright was ordered to Onion Lake and took his departure from this agency on the 7th February.

Seeding this spring was completed at a much earlier date than usual. The grain crops are very heavy and regular in growth, and their appearance gives promise of an abundant harvest.

The cattle of this agency were well fed and cared for during the winter, with the result that they were turned out in capital condition in the spring, and the number of calves has been unusually large.

The schools of the agency have been conducted in such a manner as to reflect credit on the teachers. The health of the children, who appear to be happy and contented at their work, has been good, and their attendance regular. The school rooms are kept clean and tidy.

Although the winter was favourable for hunting fur and larger game, none but the Stony Lake Band (106) were successful in killing the latter, the Pelican Lake Band depending mostly on fish for their livelihood.

I have to state that the Indians are becoming more attentive than heretofore to sanitary measures, even Indians living north of the settled reserves show a good deal of improvement in this respect, their houses, such as they are, being clean.

I have the honour to be, Sir,

Your obedient servant,

J. FINLAYSON,

Indian Agent.

SARCEE AGENCY, TREATY No. 7, 17th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I beg to submit my annual report for the year ended 30th June, 1891, together with tabular statement and inventory of Government property.

I took charge of this agency in February, in compliance with instructions received from the Indian Commissioner, relieving Mr. Swinford, who had been previously in charge.

I found everything connected with the agency in good order, and the Indians healthy and contented.

The spring opened early. Farming commenced in March on the Sarcee Reserve, and in April on the Stony. A good crop was seeded on both reserves. The crop was put in well and in good season, the Indians working willingly. A large acreage of potatoes and turnips was sown. The weather during the spring and summer has been extremely dry, and the crop prospect is not at present encouraging.

The winter was comparatively mild and without snow. Stock on the Sarcee Reserve wintered well. The Stony cattle were poor, but the increase better than usual.

As soon as the seeding was over, the Sarcees left the reserve to visit their relations amongst the Blackfeet, Bloods and Piegans. The Stonys left for their summer hunting grounds; but a sufficient number of Indians were left on both reserves to attend to the growing crops.

The school attendance is not large, and is very irregular, the parents taking their children with them when they go hunting or visiting.

I have not yet visited the McDougall Orphanage; but it is evidently doing good work, as the pupils whom I meet speak English fluently and without hesitation.

The Sarcees earn a considerable amount by their labour among the settlers in the vicinity, but their earnings do not contribute greatly to their support.

The Stonys, whose chief dependence is hunting, did not have as successful a season as usual.

I have the honour to be, Sir,

Your obedient servant,

SAMUEL B. LUCAS,

Indian Agent.

BLOOD AGENCY,

DISTRICT OF ALBERTA, 22nd July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present the following report for the fiscal year ended 30th June, 1891.

The hay crop was poor, still good work was done by a few Indians. I succeeded in securing a contract to put up forty tons of hay for the Mounted Police detachment at Stand Off, Chief Old Moon, eldest son of Red Crow, undertaking to fill the contract, which he finished in October. Other Indians, notably Eagle Shoe and Heavy Gun, cut hay on shares with white settlers, the latter supplying mowing machines, rakes and, in some instances, horses, for the machines. The Indians sold their hay at a fair price. They worked well, this being the first attempt at this industry. As these Indians did so well, I am in hopes that others will follow the good example next season.

The payments, as is the usual custom now, were conducted in an orderly manner, and even though a great reduction was made in the number paid, there was very little grumbling. It has been tedious work getting the Indians down to their present number, occupying several years of close scrutiny. I am satisfied that we have now a correct census. Mr. Assistant Commissioner Forget visited this agency during the payments.

On visiting Macleod the day after the payments were completed, I noticed the Indians were purchasing mostly staple goods, scarcely any money being spent in paint or jewellery.

Thanks to the precautions taken by Major Steele of the Mounted Police, little or no whiskey was sold to the Indians during their annual trade, nor was there a single case of drunkenness brought to my notice.

I am pleased to be able to report that during the "Messiah" craze south of the boundary line these Indians remained quiet, and stated again and again to me that the trouble was in a different country and was none of their business, that the Sioux were their enemies, and that they would have nothing to say to it.

[PART I]

81

I saw it stated that Sioux visited the Bloods with a view to enlisting their sympathies. I can assure you that there was absolutely no truth in the reports. No Sioux or foreign Indians visited this reserve during the trouble.

These Indians are working out more during the year than formerly, many finding employment with the Mormons and other white settlers, and giving satisfaction.

Until Christmas the weather was fine, enabling Indians to work outside, building houses, repairing and so forth. The new houses built during the last twelve months by the Indians are a great improvement on those of former years, being larger, higher in the walls, and in many cases board or slab roofs are taking the place of poles and mud. Day Chief, White Calf, Mike and Chief Old Moon have each built houses with shingled roofs. Two of them have partitioned their houses into sleeping and living rooms. About thirty new houses were built of pine logs, replacing the old cotton wood log houses.

Red Crow's (Head Chief) house is kept scrupulously clean and neat. I was much surprised to see clean white sheets and pillow cases on his bed on one of my visits last winter. The Department presented him with a bed room set, of which he was inordinately proud.

The early months of the year were stormy, and though we did not experience any extreme cold the winter was severe for several weeks.

Spring being exceptionally late we were unable to commence ploughing until the 9th of April. After that date the reserve presented a busy appearance. The Indians turned to with renewed vigour, ploughing the land deeper and better than at any previous time. They have entirely got over their fear of the oxen, and handle them well. Many of the Indians used their own ponies in putting in the crops. It is very gratifying to be able to report that during the spring work not a rod of land was ploughed by hired help. Indeed the ploughing was as well done as that of the average white settler. The land under crop this season consists of the following: Oats, ninety-six acres; pease, four acres; potatoes, thirty-two acres; carrots, turnips, onions and beets, twenty-three and one-half acres. The rains were plentiful during June, and the prospects of a bountiful harvest are, I hope, assured. The oat crop was somewhat damaged by the cut-worm in the early part of the season, but has, I think, recovered to a great extent. Potatoes will, for present appearances, be the best crop for years.

For the greater part of the year four schools were in operation; two Church of England, respectively at Bull's Horn and Red Cow's villages; Roman Catholic near the Upper Agency, and Methodist at the Lower Agency. The last named finally closed its doors in November for lack of scholars. I am unable to report much progress; this is mainly owing to the very irregular attendance of the scholars. In some instances progress has been notable. The teachers are apparently indefatigable in their efforts to secure regular attendance. The Department supplies beef, biscuits and rice for a midday meal, yet a regular attendance cannot be assured. I have spoken repeatedly to the parents urging them to send their children, they promise to do so but say the children run off. I have noticed on my monthly visits to the school that some of the children are particularly bright and, for a time, industrious, getting on rapidly, then for some inexplicable reason, perhaps some imaginary cause of complaint, they are not seen at school for days and weeks, when they have forgotten all they had been taught.

In July last the coal seam on the St. Mary's River was opened up by a practical miner. The coal for use at the agency was procured from that source. Several Indians have moved to this point with a view to getting out coal. One named Heavy Gun mined and delivered a few tons for the Church of England Missionary here, doing his work capitally. I anticipate working this industry considerably this year. The wood on the river is scarce, which will necessitate the use of coal.

Reviewing the conduct of the Indians during the year, it has greatly improved. There have been fewer known cases of cattle killing, and not an instance of a single horse having been stolen from the south. The older Indians have assisted in bringing wrong-doers to justice on more than one occasion. The Mounted Police patrols have

been of the greatest possible assistance in putting down horse stealing and cattle killing. I have received much assistance and courtesy from the officers, non-commissioned officers and men in this and the Lethbridge district. Attached to the Stand Off detachment are some half dozen Indian scouts; these have done good service. To give an instance about barter, an Indian named "Medicine White Horses" had been arrested by scout "Owl Child" for having killed a calf; one "Good Young Man" by name attempted to rescue the prisoner, in which he succeeded, when the scout promptly arrested "Good Young Man," and he now languishes in the guard room at Macleod, undergoing a six months' sentence for interfering with the scout while in the execution of his duty.

Two whiskey runners were captured on the reserve with whiskey in their possession by the Indians, and both were convicted.

I have to report a good deal of sickness during the winter among the children, a mild form of bronchitis being the trouble, also a few cases of influenza, all of which were well cared for by Dr. Girard. During the year there were forty-seven birth and fifty-three deaths.

My staff has given me every assistance in carrying out the work of the agency.

I have the honour to be, Sir,
Your obedient servant,

W. POCKLINGTON,
Indian Agent.

BLACKFOOT AGENCY, DISTRICT OF ALBERTA, 22nd July, 1891.

The Honourable,
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my tabular statement, and inventory of Government property under my charge in this agency, for the year ending the 30th June, 1891.

Three Bulls, brother of the late Chief Crowfoot, is now head chief of the lower reserve. He seems desirous of carrying out the instructions of the Department. When a minor chief dies, no one is appointed in his place, so eventually there will be only the two head chiefs, which will be sufficient.

A new house has been built by the Department for Chief Old Sun on the north reserve; the work was done by one of the High River Industrial School scholars, who is a fair carpenter, and is now employed by the Department as agency carpenter.

The farmer at the North Reserve has attended to all his duties, assisted only by Indians who help to ration, and any other necessary work. The farmer and issuers are the only white men at the Lower Reserve, they being assisted by Indians, the employment of Indian labour being taken advantage of in all cases as much as possible. All my assistants have given good satisfaction.

We have opened a new drift in the coal mine, and it is now in good working order, having a track and a coal car and coal house covered in. Having received eight yoke of oxen, we are in a position to supply more coal, and of a better quality, to the industrial school, and other points. The Indians receive considerable money for driving oxen and working in the mine, which they expend in clothes, baking powder, tea and sugar, and other useful articles. I find the young Indians more willing to work every year.

The health of the Indians has been generally good, but consumption and scrofula is prevalent amongst them, and cause a decrease in their numbers. They have been attended regularly by Dr. N. J. Lindsay, and seem to have considerable confidence in him.

Last July during the sun dance the Indians were preparing to have some braves made in the usual way by torture. When the Rev. Mr. Tinis and myself arrived on the ground, I explained to the chiefs that it was against the wishes of the Department to have anything of that kind done and asked them to do away with that part of the performance, which they agreed to at once. As this is one of the principal attractions of the

sun dance they will not take much interest in it in the future, and the dance itself will gradually die out.

Treaty payments passed off in an orderly manner, there being a decrease in the number paid.

There are four day schools on the reserve. I cannot notice much improvement in the scholars, as they do not attend regularly during the whole year. The Indians move away from the vicinity of the houses part of the summer for change of feed for their horses. The teachers are all painstaking, and do the best they can. A boarding school is also started at the North Reserve, under the supervision of the Rev. Mr. Tinis, the English Church Missionary, which I have little doubt will be a success in the future. During the year a good number of Blackfoot children have been sent to the High River Industrial School, where they will receive a good useful training.

The reserve was visited at different times during the year by Indian Commissioner Reed, Assistant Commissioner Forget, and by Inspector McGibbon, who made his usual rigorous annual inspection.

The Indians have built two small villages across the river, both at the North and South Reserves, and have new land broken and fenced at those points. All the Indians worked exceedingly well. They have white-washed their houses, which present a neat appearance, and they also keep the premises clean. Altogether they have continued to improve in different ways. Some of them now wish to keep cows, but it will be well for them to purchase them by selling some of their ponies, as by doing so they will better understand their value, and so take more care of them.

The farmers' wives have been teaching the Indian women to knit, make bread, and other useful work, and they are very quick in learning.

A supply of house logs and rails was received from the Stony Reserve. The Indians here are much pleased to get good timber to work with, and it will make a great improvement in the general appearance of the reserve. Any Indian who breaks five or ten acres of land has sufficient logs given to him to build a house on it.

The accompanying tabular statement will give all the necessary information in reference to the number of houses built, land broken and fenced, and other matters in connection with the reserve.

The conduct of the Indians has been good, only a couple of cases requiring the interference of the law, and they were not serious. The Indians are endeavouring to improve, and paying more attention every year to advice from the Commissioner and myself.

I have the honour to be, Sir,

Your obedient servant,

MAGNUS BEGG,

Indian Agent.

PIEGAN AGENCY, MACLEOD, 5th July, 1891.

The Honourable

The Superintendent-General of Indian Affairs,

Ottawa.

SIR,—I have the honour to make the following report for the fiscal year ended 30th June, 1891.

Matters on the reserve generally can again be reported to be in a satisfactory condition. But little crime has occurred during the twelve months among the Indians, who have shewn themselves tractable and in many cases industrious.

It is to be regretted that the crops were not good; oats in the district were almost an entire failure, while potatoes were by no means a full crop. The agency field was worked by an Indian on shares, but unfortunately the growth was so unsatisfactory that the crop was only cut for hay. Undismayed, however, the same Indian again this spring made a similar arrangement and has ploughed and sown the field; he is to have his payment in portion of the crop. Up to the date of writing the growth this spring

has been satisfactory. There have been heavy rains and, with the exception of gardens which were much damaged by cut-worms, all crops look promising. The rain has made the grass on the prairie exceptionally abundant, and there will doubtless be a good hay crop. Considerable summer-fallowing is this season being done by those Indians who take a real interest in their fields.

It is gratifying to be able to say that the Indian herd of cattle has kept in good health. The increase has been most satisfactory; practically no losses occurred during the winter. The increase in calves this spring all through the district is the largest known for several years. The Walrond Rancho Company have supplied the Indians with beef during the year; the beef supplied was of the best quality.

The treaty payments took place during the month of October and passed off quietly and with no disputes. The number paid was ten less than in the previous year.

A new house has been erected on the reserve for the agent, and is a comfortable and well-built residence. Indians hauled the lumber from Macleod, and the Department's own carpenter, with the assistance of one man, did all the work. The site chosen is considerably higher than that of the other agency buildings, and from it a fine view, both east and west, is obtained.

Many new Indian houses have also been erected, all of pine logs cut and hauled from the Porcupine Hills, and the building of stables and hay and stock corrals now give many of the Indian dwellings more of the appearance of farms than they formerly had. I am glad to say that these Indians as a whole keep both the inside and outside of their houses much cleaner than they used to do.

Three Indians last autumn under the supervision of the Department's foreman on the reserve built a lime-kiln as an experiment. There is an abundance of limestone at a convenient distance, and the small kiln burnt proved a success. Each of the Indians took a quarter of the lime burnt as his share and I took a quarter to repay the Government for the foreman's time spent on the work and for other small assistance rendered.

The bridge now being built by the Government over the Old Man's River at Macleod will be of great service to us here on the reserve. At present, during times of high water, in order to cross, it is necessary to go several miles out of the way and then cross on a ferry.

A good deal of hay was put up by Indians last summer, some for themselves and some for sale. One Indian took a contract to supply a livery stable in Macleod and put up seventy tons, while another took a small contract for the police. There will be a greater number of mowers at work this summer. Three waggons, one mower and fifteen heifers were purchased by Indians from the proceeds of killing steers for beef on the reserve during the year, and in addition two heifers and a mower and rake were purchased with money obtained from the sale of ponies.

I regret to say that the Indians at times obtain liquor from white men and half-breeds in Macleod and Pincher Creek, especially at treaty time; and although, several arrests have been made, it has proved very hard to secure evidence sufficient for a conviction.

There are three chiefs on this reserve, one head chief and two minor chiefs. No elections have been held to fill the vacancies caused by the death of North Axe and Morning Plume.

The attendance of children at the schools has not been what could be wished. It was thought, however, that the establishment of a boarding school by the Rev. Mr. Bourne would bring together the children whose homes were too far off to allow them to attend daily. The experiment is too new yet to allow one to speak of its probable success. Two boys, brother and son of the late Chief North Axe, were sent down to the Mohawk Institute at Brantford, and the latest accounts report their doing well. North Axe, who had visited the Institute on his trip to the east some years ago, expressed a wish just before his death that this should be done.

The health of the Indians has been very fair throughout the year, although the deaths outnumber the births. I regret to say that Takes-the-gun-last, our most advanced

Indian, succumbed to consumption in April, and that his loss is much felt, his industry and general conduct having afforded an excellent example to all around him.

In conclusion I may say that the employés on the reserve have worked willingly and well in the Department's interests throughout the year and given satisfaction.

I have the honour to be, Sir,

Your obedient servant,

A. R. SPRINGETT,

Indian Agent.

DUCK LAKE AGENCY, 26th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my sixth annual report of my inspection of Indian Agencies and Reserves in the North-West Territories.

My last report ended with Battleford Agency and Battleford Industrial School. I then proceeded to Onion Lake, arriving there on the 22nd October, 1890. Mr. G. G. Mann is agent, Mr. McFeeters, clerk, and Mr. Baudreau, interpreter. The agency consists of Band No. 119, population, four hundred and forty-six; and Band 124 (Chipe-wayan), population, one hundred and fifty-three.

The following improvements have taken place since last inspection: A very substantial building, 40 by 18, shingled roof, to be used as a carpenter and blacksmith shop. The foundation and logs are laid for an addition to the agent's dwelling. The labour in connection with these buildings has been performed by the Indians under the direction of the agent. A grist and saw-mill was about being completed. The mill proper is 20 x 25, the engine and boiler-room is 20 x 25, and the saw-mill is 30 x 14, solid foundation, frame and shingled roof.

The crop put in this season, 1890, was: Home farm, twenty-one acres, yielding sixty bushels oats, eighteen bushels barley, one hundred bushels potatoes, two hundred bushels turnips, fifty bushels carrots, with the usual variety of other garden produce.

The Indians (Seekaskootch Band, No. 119) had under crop three hundred and eighty-five acres, yielding one hundred and sixty-nine bushels wheat, two thousand three hundred and twelve bushels barley, nine hundred and sixty-four bushels potatoes, six hundred and eighty-seven bushels turnips, besides the garden produce, which was a very good yield. The fields looked clean and neat; fences were good. The cattle were in fine condition. Seekaskootch's Band (No. 119) has a total of two hundred and three head, besides a number of pigs and ponies.

Kinoosayo's Band (No. 124) has a total of seventy-one head. This band has also, in private property, twenty-eight horses, twelve oxen, four bulls, thirty-two cows and thirty-six young cattle. The agency herd consists of one hundred and thirty-seven head, also three horses, sixteen native horses, nine colts and eleven pigs. One thousand four hundred tons of hay has been stacked for winter feed. There was also a good supply of straw. Four large stables and three sheds have been built at Long Lake, where the agency herd will be wintered.

Five new houses and six stables have been built by Band No. 119; and a school-house, three dwellings and two stables by Band No. 124. The houses were all newly whitewashed, and they looked very tidy and comfortable. The houses are of a very good class and are comfortably furnished. There are two churches, one Roman Catholic and one Episcopalian. It is a very pleasing sight to see, on a Sunday morning, the people wending their way from almost every house to their respective churches. There are also two schools.

The grain was threshed at the mill as it was carted from the fields, causing no delay or extra labour. Many of the women make butter, the police being supplied by them with this article. The Indians on this agency are making rapid progress under the able

management of Mr. Mann. They are all good workers. The usual audit of the books was made and an inventory of supplies taken.

The births and deaths since last inspection have been: Seekaskootch's Band, No. 119: Births, twenty-nine; deaths, sixteen. Kinoosayos Band, No. 124: Births, eleven; deaths, twelve—Total, forty births and twenty-eight deaths.

The whole work of this agency is in splendid shape and the Indians are peaceable and contented. The usual detailed report, with statements, were forwarded to the Commissioner, at Regina.

My next point was Saddle Lake, arriving there on the 28th October, Mr. John Ross, acting agent, Mr. O'Brien, clerk.

The agency consists of—

Band No. 125, Saddle Lake; population, one hundred and sixteen.

Band No. 127, Blue Quill; population, thirty-six.

Band No. 128, Whitefish Lake; population, three hundred and eight.

Band No. 126, Wah-sat-a-now; population, forty.

Band No. 130, Heart Lake; population, sixty-six.

Band No. 131, Beaver Lake; population, one hundred and fourteen. Total population, six hundred and eighty.

Saddle Lake and Blue Quill's Reserves are under the charge of Mr. Grasso, farmer. The crop put in on these two reserves was eighty-five and one quarter acres. The grain was not yet threshed. Potatoes and turnips were very good. The Indians had a good supply of vegetables during the season. The fields were tidy and free from weeds. Fences were good. The houses are of a good class, and seemed to be cleanly kept, they had been all newly whitewashed. They are fairly well furnished with bedsteads, tables, stoves, etc. The girls are making good progress in knitting and sewing; and many of them can make their own dresses. It is not uncommon to notice in the houses, cooking stoves, tables, clocks, lamps, dishes, brooms and the usual small things about a kitchen. Some very good bob-sleighs were noticed, made by the Indians. The stables and corrals were very good. Signs of thrift and advancement could be seen all around, especially among the younger men. Five hundred tons of hay were stacked at different points for winter feed.

A new Roman Catholic Church has been built on Blue Quill's Reserve. A new house has been built in connection with the Methodist Mission. Religious services are held every Sunday in the schoolhouse, the Rev. Mr. German, Methodist Missionary, preaching in Cree; the attendance is very good and many of the Indians take part in the services; the singing is hearty. An English service is held every Sunday evening in the Agent's house. Some of the Indians attend this service also.

Saddle Lake Band, No. 125, has thirty-five head of cattle under Government control, and in private stock sixty-four head, nineteen horses and colts.

Blue Quill Band, No. 127, has twenty-two head of cattle, and in private property eight horses and colts. This band purchased a new mower and paid for it out of treaty money and what was earned by carrying the mail.

Band No. 125, contracted to supply hay for the telegraph company to the amount of a hundred dollars. This sum was left in the hands of the agent to purchase a new mower and horse-rake.

White Fish Lake, Chief Pakan, is under the charge of J. E. Ingram, farmer. The reserve is forty miles from the agency. The houses are of a good class, they were newly whitewashed and had a tidy appearance. Some of the women were knitting, others making moccasins. Some make butter and bake bread. Very good hay-racks and bob-sleighs were noticed of their own make, also some sets of harness. They make their own canoes for fishing purposes. The crop put in on this reserve was one hundred and twelve acres. The grain was in stack ready to be threshed, the potato crop was very good. The fields on this reserve are chiefly small. Six hundred tons of hay were stacked ready for winter feed, the stacks were well made and strongly fenced. The cattle were in fine condition. This band have sixty-eight head under Government control, and in private stock eighty-four head and one hundred and twenty-one horses and

colts. There is a blacksmith and carpenter shop in connection with the farm buildings. Everything about the place was exceedingly tidy and neat, and the best possible care seemed to be taken of tools and implements. The Indians on this reserve are advancing rapidly, as a proof, two of the band subscribe for the *Montreal Witness* and the *Edmonton Bulletin*.

A new mission house was built during the year, and regular services are held every Sunday by the Rev. Mr. Steinhaur. The mission is under control of the Methodist Church. I was told that the Indians were very regular in attending the various services. Rev. Mr. Steinhaur is one of the band.

Wah-sat-a-now Reserve, No. 126, is half way between the agency and Edmonton. Only a few families live here. Thirteen and one-quarter acres, were under crop. The band has eighteen head of stock, and in private property ten horses and colts.

The agency and farm books were audited and inventories taken of supplies on hand. Mr. Ross is working hard to get all his Indians interested in the general improvement of the agency, and he is meeting with encouraging success. The Indians on this agency seem to be above the average in intelligence, not an idle man could be noticed. Mr. Ross does not spare himself any labour or trouble whereby he can advance those under him.

The usual detailed report and inventories and statements were forwarded to Regina.

I now proceeded to Edmonton Agency, arriving there on the 18th November. Mr. Charles de Cazes is agent, J. V. Kildahl is clerk, Henry Blanc is interpreter.

The agency consists of :—

Band No. 132, Michel, Sturgeon River ; population thirty-seven.

Band No. 133, Alexis Lac, Ste. Anne ; population one hundred and eighty-five.

Band No. 134, Alexander, Sandy Lake ; population two hundred.

Band No. 135, Enoch, Stony Plain ; population one hundred and sixty.

Total population five hundred and eighty-two.

The agent's house has been repaired during the year, and it is now a very comfortable dwelling. The whole of the agency buildings, excepting the office, were in the best possible order. The agent had a splendid garden in which all kinds of vegetables in abundance were raised. The agent supplied the Indians with cabbage plants, enabling them also to raise a good supply, for their own use. The gardens were kept free from weeds. No. 135, Enoch, is under the immediate care of the agent. There is a Presbyterian Mission and boarding school here. There is also a Roman Catholic Mission and day school.

The Indian houses are of a very good class, and many of them have shingled roofs. A good many new houses and stables have been put up during the year, and most of them were newly whitewashed.

The crop put in on this reserve was one hundred and thirty-one acres, being thirty-three and one-half more than in the previous year. The yield was very fair ; root crops were particularly good. The grain was in stack ready for the thresher. The fields looked as if well cared for.

A number of the old women who usually lived in tepees have now nice little cabins. The agent had these built and he also gave each one a garden and prepared it ready for a crop. So these old women can now raise a few potatoes and vegetables for themselves, and the cabins will be more comfortable than tepees to live in during the winter. Every one has to do something on this agency ; no idlers are assisted in the way of getting rations.

Two hundred and thirty tons of hay have been stacked on this reserve, which, with the straw, will be ample for winter feed. The herd number sixty-four, all in good condition. The band has also in private stock fifty ponies, three cows and three young beasts. It was pleasing to notice in going through the houses that many of the women were making moccasins, mending clothes, and washing could be seen at many of the homesteads hung on the fences and on clothes lines to dry. This shows a tendency

to cleanliness. The Presbyterian Mission distributes a good deal of clothing to the children, which is sent for the purpose by ladies and societies in Ontario.

Reserve No. 132, Michel, was next visited. This band consists of a few families, in all thirty-seven souls. They are well-to-do. They have nice houses and out-buildings, and some had good stack yards well filled with grain, ready to be threshed. Some have milk-houses, hen-houses and piggeries. The women make butter.

I met here some boys and girls who had been at the High River Industrial School, and it could easily be seen that the training the girls got was put to good use in their homes. One boy who had learned carpentry was to follow his trade on the reserve, and to enable him to do this the agent supplied him with the necessary tools; another boy was helping his father on the farm. Both boys and girls spoke English.

Altogether, this band is in a most comfortable position. The crop put in was fifty-seven acres; the yield was very fair. The herd numbers thirty-three, and twelve pigs. In private property they have sixteen horses, seven cows and fifteen young cattle. They make their own hay-racks, bob-sleighs, fork handles and harness. Chief Michel has a mower, horse-rake and a reaper. Two hundred tons of hay were stacked for winter feed. The houses were all whitewashed.

The next reserve visited was Alexander's, No. 134. Mr. O. Donnell being farmer in charge.

The farm buildings here are commodious, and were tidy and in good order. A new implement shed had been put up during the year. They had under crop one hundred and ninety-eight acres, fairly good yield. The fields were in good shape and the fences were good. The herd numbers forty-seven. Three hundred tons of hay for Indian cattle and fifty tons for the farm stock were stacked ready for winter use. Sixty acres of new land were broken and seventy-five acres of fall ploughing was done. Four new houses and nine stables were built during the year, also five small store houses for holding implements and tools.

The women were making good progress in knitting and sewing, and some of them make butter. Mrs. O'Donnell, wife of the farmer, gives lessons twice a week to the Indian women and young girls. Mr. O'Donnell has his reserve and his work in splendid shape.

The crop put in at Alexis Reserve, (No. 133) was thirty and one-half acres; yield fair. The herd numbers eighteen. The usual audit of the farm and agency books was made and inventories taken. The warehouse is kept in good order and the goods carefully placed. The flour and bacon were up to the standard.

Mr. DeCazes has entered on his work with great energy, and has an intelligent idea of the work required to be done, namely, to elevate the Indians and bring them as fast as possible to the point of being self-supporting. He is very kind in his dealings with the Indians; at the same time he is very firm and insists on his orders being strictly carried out in every particular. He has already won the confidence and respect of the Indians, and they do not hesitate to go to him for advice when they feel they need it. I have pleasure in informing you that a great improvement is observable in this agency, and that the work is going on systematically and peaceably.

The births and deaths since last inspection have been: Enochs: births, four; deaths, twelve. Alexander: births, twelve; deaths, six. Alexis: births, eleven; deaths, nine. Michel: births, 1; deaths, naught. Total births, twenty-eight. Total deaths, twenty-seven.

The usual detailed report, with inventories and statements, was forwarded to the Indian Commissioner, Regina.

The next Agency reached was Peace Hills, arriving there on the 8th December. S. B. Lucas, agent; C. W. W. Sanders, clerk; Donald Whitford, interpreter.

Since last inspection the horse stable has been roofed and shingled, a new hen-house has been put up, the outbuildings have been whitewashed and the house and kitchen painted, the fence around the buildings has been repaired; the whole place was exceedingly tidy and neat.

No. 141, Sharphead, population eighty-six. Very little crop was put in by this band—seven acres in all. They all have potatoes enough for their own use. The herd numbers thirty-one, all in good order. Forty-five tons of hay were stacked.

No. 140, Louis Bull, population sixty-six, was the next reserve visited, Mr. D. L. Clink being the farmer in charge. This band had thirty-two acres under crop. The yield was satisfactory. One hundred tons of hay were stacked for winter use. Twenty-six acres of new land were broken and most of the fall ploughing had been completed. The herd numbers sixty-three, an increase of nineteen since last inspection. These Indians are making very good progress; they are capital workers.

The next reserve visited was Erminskin's, No. 137, also under the charge of Mr. Clink; population one hundred and twenty-six. The houses are of a good class and were tidily kept. Thirty-seven acres of new land were broken during the season. Some summer fallowing and most of the fall ploughing had been completed. The crop put in was forty-two acres—yield very fair. One hundred and fifty tons of hay were stacked for winter use. The stables were in good order. The herd numbers eighty-one as against sixty-four last inspection. This reserve is in very good shape.

The last reserve inspected was "Sampson's," No. 138, population two hundred and seventy-four. This reserve is under the immediate care of the agent.

The crop put in here is one hundred and sixty-seven acres—yield fair. The temporary stables put up in 1889 have been replaced with very substantial buildings. One stable is one hundred feet long, twenty-two feet wide; it is divided into fine compartments, two wings, each fifty by twenty two, and a square in the centre. The whole will afford accommodation for two hundred head of cattle. A sufficient quantity of hay was stacked near the stables as well as at other points in the reserve. The herd numbers one hundred and forty-nine against one hundred and twenty-one at last inspection. This band has made good progress during the past year. The warehouse is kept in good shape. The bacon was of choice quality and the flour was equal to sample. The usual audit of the farm and agency books was made. The agency books are neatly and correctly kept and reflect credit on the clerk, Mr. Sanders. As Mr. Lucas was being transferred to the Sarcee Agency, I handed the agency over to Mr. Clink, who accepted the inventories and statements as correct. The births since last inspection a year ago were twenty-three, and the deaths during the same period nineteen. The total population is five hundred and fifty-two. Total number of cattle, three hundred and thirty, being an increase of forty-six in the year. Detailed report, with inventories and statements, was sent to the Commissioner, Regina.

I then drove to Calgary and inspected the Sarcee Agency, arriving there on 26th December. Mr. S. Swinford, acting agent; Mr. A. K. Tynte, agency clerk.

The agency premises have been improved during the year by being enclosed with a wire-fence. The old root-house has been re-roofed. The crop put in was seventy-two acres, giving a fair yield. A new schoolhouse has been built at the upper village, and logs were on the ground for two new houses. Two new houses were built at the lower village. The Indians supplied twenty-five tons of hay to the police in Calgary, for which they received \$10 a ton delivered; seventy-five tons of hay were stacked for winter use.

Two of the band are employed as scouts under the control of the police. They receive \$25 a month each, also rations for themselves and oats for their horses. These scouts are doing a good work, and there is less heard now of cattle being killed and stolen by Indians, when the guilty parties were found in every case to be white people.

The total population of this band is two hundred and eighty. The births during the year have been eleven, and the deaths, eighteen. Dr. Lindsay, of Calgary, visits these Indians once a month regularly, and oftener when specially required. The beef supplied by the contractors, Messrs. Hull Brothers, was of good quality.

The total number of animals killed during the year was one hundred and sixty-eight; average weight of the four quarters, after removing the offal, was six hundred and twenty-five pounds; average percentage of offal, 7.41.

Mr. Tynte is doing his best to have things in good shape. Mr. Swinford's experience at the Blood Agency serves him in his present position as acting agent here. He is already well informed, and is familiar with the working of the agency.

I now proceeded to Morley to inspect the Stony Reserve, which forms part of the Sarcee Agency.

Mr. William Graham is farmer in charge here. Everything was found in splendid shape. Since last inspection the ration-house has been completed, excepting the shingling of the roof. A new root house has been put up affording a safe place to store the seed potatoes. The walls of a new house for the former were put up. Twenty acres of new land have been broken. Ten tons of hay were stacked for the farm houses. The crop put in was ninety acres, chiefly oats, potatoes and turnips. The results were fairly satisfactory. Seventy-five tons of hay made from oats cut green and seventy-five tons of grass hay were stacked for winter use. Twenty new houses have been built during the year and some old ones removed and rebuilt. The Indians are spreading over the reserve more and more. The Indians get out logs and rails for the Blackfoot Agency. They were shipping a lot of dry timber to be sold in Calgary as firewood. There was an air of comfort about all the houses which was pleasing.

The total population is five hundred and seventy. The births for the past year were fourteen, and the deaths twenty-seven. The beef supplied by Messrs. Leeson & Scott, contractors, was of good quality and was well butchered. The total number of animals killed from 1st January to 31st December, 1890, was one hundred and fifty-four; average weight of the four quarters, six hundred and ninety-three pounds; average percentage of the offal, 7.43½.

I visited the new McDougall Orphanage. They have now thirty-three head of cattle, besides four Government work oxen. Seventy loads of oat hay, and thirty-one loads of grass hay, were secured for winter feed. The crop put in gave a fair yield. The new building is a very handsome one. It is well built and well laid out; the main portion is thirty-eight by forty-four, with a wing eighteen by twenty-four. This is divided into girls' and boys' dormitories, dining room, school room, sewing room, kitchen, bed rooms for employees, bath-room, cellar and recreation room, stone foundation. It is heated with hot air; the furnaces were working very well at the time of my visit, 2nd and 3rd January, 1891. Good care has been taken in regard to proper ventilation. There is accommodation for forty pupils. The old building is now used as a workshop for the boys.

I audited the farm and agency books, and took inventories of all supplies, which forwarded to Regina, along with detailed reports.

I next drove to the St. Joseph Industrial School, High River, arriving there on the 6th January, 1891. The Rev. Father Naissens is acting Principal, Rev. Father Claude having left for France in November. Mr. Charles Denneky is teacher and attends to the office work, Andrew Pigeon is carpenter, Edward Pigeon is farmer, Sister Superior Cleary is matron, Sister Kelly, teacher for the girls, Sister Sicard is cook, Sister Damitilda, assistant cook, Sister St. Mathurian is seamstress.

The main building has been veneered with brick since last inspection, a neat cottage has been put up as quarters for the men, a new roof has been put on the root-house, and a windmill has been put up to pump water into the house. The tank in the house contains one thousand one hundred gallons. Ten acres of new land were broken during the year. The crop was twenty-five acres, giving a fair yield of oats, wheat, barley, pease, potatoes, turnips and mangold, besides a plentiful supply of vegetables for the use of the house. The herd now numbers thirty head and thirty-nine sheep. Seventy-five tons of hay are stacked on the prairie and will be hauled in as required. The coal used here is from the Blackfoot mine, and it burns very well. The Indians make some money in hauling it. Five of the boys are learning carpentry and are making good progress. Three of the boys were sent to work on the McDougall building at Morley, and they gave great satisfaction. They were good workers and were well behaved. Six are learning harness and shoe-making. The balance, except the very young ones, are learning farming. The total number of pupils on 6th of January, 1891, was fifty-four—thirty-six boys and eighteen girls. There was no sickness at the time of my visit.

Most of the worn-out articles of clothing are used in mending and patching others. This is not only economy in behalf of the house, but it is teaching the girls habits of thrift in housekeeping which will be useful to them in after life when they have houses of their own to look after. An inventory of all supplies on hand was taken, including household effects. The books were carefully audited and were found well kept and very correct. This, with detailed report, was sent to the Commissioner. The acting Principal is taking an active interest in the school and it cannot but succeed under his able management. Sister Superior Cleary continues to oversee the house with her usual ability, and I have great pleasure in stating that the work is going on in a most satisfactory manner.

My next point was the Blackfoot Agency, arriving on the 15th January, 1891. Mr. Magnus Begg, Agent ; Mr. W. S. Richardson, Clerk ; Mr. J. L'Heureux, Interpreter.

The agency buildings are in the best possible order, everything in and around the premises being tidy and arranged with taste.

The North Reserve was the first visited, Mr. W. M. Baker being the farmer in charge. The buildings here were also in good order, and all the tools, implements and machinery were carefully stored away for the winter.

The crop put in was nine and three-quarter acres, results fair : fifteen acres of new land were broken and twenty acres were summer-fallowed. A new house was under way for chief Old Sun.

The new building for a boarding-school, under the control of the Reverend Mr. Tims, has been completed. It is 20 x 30, but can be enlarged when more room is required. A number of new houses have been put up by the Indians on both sides of the Bow River. A number of new fields were opened last season. The Indians are spreading out over the reserve. One new village, "Many-shot-at," consists of fifteen houses, a very pretty village, and the houses were neat and tidy ; another, "Running Martin," has six houses. Piles of wood could be seen at almost every house. A marked improvement is their general tidiness as compared with former years. In some can be noticed tables, chairs, bedsteads (factory-made), box and cooking stoves, cupboards, dishes, and looking-glasses. In some the beds are enclosed in print curtains. Some have almanacs hung up, with the days crossed out as they pass, and pictures on the walls. In one house I noticed a splendid photograph of Sir John A. Macdonald. Some have clocks. Their cellars were well filled with potatoes, and altogether there was an air of comfort and contentedness about the whole of them. Four of the Indians worked mowers for the Canadian Coal, Colonization and Agricultural Company, for which they were paid at the rate of \$2.50 a week each, with partial board. One man saved enough to buy boards and shingles to roof his house. The number of ponies and colts belonging to the Indians is six hundred. The Indians, men, women and children are warmly and comfortably clad. The women were busy making moccasins ; they were exceedingly pleasant and friendly, and they had no complaints. The beef supplied by Messrs. MacHugh Bros. was of good quality and delivered in good style. The total number of animals killed here from 1st December, 1889, to 31st December, 1890, was four hundred and twenty-six ; average weight of the four quarters, seven hundred and fourteen pounds ; average percentage of offal, 8.95. Mr. Baker is a very careful man and he does his work in a business-like way.

I now went to the South Reserve ; J. H. Wheatly, farmer ; T. B. Lander, issuer. The house occupied by Mr. Lander has had a back kitchen added to it. The work was done by the boys from High River School, and could not have been better done by white men. All the buildings had been whitewashed and everything was in apple-pie order. A new root house had been made and it was well filled with potatoes. The crop put in here was one hundred and fifty-four and one-half acres, the results being five hundred and twenty-five bushels oats, three thousand six hundred and ninety-five bushels potatoes, and one hundred and thirty bushels turnips. The fields looked very well, and the ploughing was neatly done, fences were good and straight. Mr. Wheatly allows nothing of a slipshod style to go on. Mrs. Wheatly is teaching the women and girls to knit and sew.

Some new villages have been started up the river, and a number of new houses put up. At Running Rabbit village there are seven new houses. Eagle Ribs is a very pretty village, on the banks of the Bow River; eighteen houses are in this village. The crops were very good at this point. The houses are small but comfortable, not a particle of dust is allowed to lie around the houses, a practice that might with profit be imitated by many white people.

Three Bulls, who succeeded Crowfoot, lives about five miles south-east of the farm buildings. This is where Chief Crowfoot resided; his house is now occupied by Weasel Calf, a very sensible man. He talked very nicely, and said he was doing his best to carry out the orders given him by Chief Crowfoot from his dying bed. There are twenty houses in this village, and I visited every one of them; many of them had just been scrubbed; this was not done for effect either, as none of them knew of my visit until I went there. They expressed themselves as pleased so see that the Government took such an interest in them as to send one to see them. I told them that my duty was to report how they were getting on, and that the Department was always pleased to hear of the welfare of the Indians, and that they were carrying out the instructions of the agents. Piles of wood could be seen at nearly every house. I saw the late Chief Crowfoot's mother, now over ninety-five years of age; the poor old lady wept like a child when speaking of her son. Three Bulls, the present chief and brother of Crowfoot, seems a sensible man; being in mourning for two of his sons, who had lately died, he was very quiet. His wife was on top of a hill near the village, crying for the death of her two sons—the most sorrowful expression of sorrow one could listen to. In going through this village one passes the grave of Chief Crowfoot. It is situated on the top of the highest hill in the place.

Eighty tons of hay have been stacked about eight miles from the farm buildings for winter feed. Thirty acres of land were summer fallowed. The beef supplied by McHugh Bros. was of good quality and was well butchered. The total number of animals killed from 1st December, 1889, to 31st December, 1890, was four hundred and eighty-five; average weight of the four quarters, seven hundred and ninety-six pounds; average percentage of offal, 8.51. The number of ponies on the reserve is nine hundred and thirty.

The births from October, 1889, to October, 1890, were seventy-three. The deaths during the same period were fifty-six.

The agency and farm-books were carefully audited and inventories taken of all supplies, which, with detailed report, were sent to the Commissioner, Regina.

The Agent, Mr. Begg, continues to discharge his duties with care and discretion, and deservedly enjoys the confidence and respect of the Indians, as well as the respect and good will of the settlers and residents in the vicinity generally. I left my team and company outfit here for the winter, and I have to thank Mr. Begg for taking good care of my horses.

I now proceeded to the Blood Agency, going *via* Dunsmore and Lethbridge, arriving at the agency on the 27th January, 1891.

W. S. Pocklington, agent; S. Swinford, clerk (at present acting agent at the Sarcee Agency); F. X. Girard, physician; Dave Mills, interpreter; James Wilson, farmer; F. D. Freeman, issuer; T. B. Watson, cook; C. H. Clarke, labourer; M. Hughes, labourer; Charles Delaney, labourer.

The following improvements have been made since last inspection at the lower agency. The flour store has been renewed, the walls straightened and strengthened with iron bars, and a new shingled roof put on. The building is now a dry and safe place, in which flour or other articles can be stored. A stable has been built in rear of the agent's house.

The crop put in on the home farm was thirty-six acres, oats, barley and garden produce. The Indian crop was two hundred and twenty-two acres, an increase of twenty-four acres over 1889. Owing to exceptionally dry weather in this district the yield was not so satisfactory as usual. One hundred and twenty-five tons of hay have been stacked for winter feed, and forty tons were supplied by the Indians to the Police,

for which they received \$12 a ton delivered. The Indians have also stacked some hay for the use of their ponies. Twenty-eight acres of new land have been broken during the year, and fifty acres have been fenced. Sixteen new fields were started by new beginners during the season.

I attended the slaughtering of cattle on several occasions and the work was well done. The killing, dressing, cutting up and issuing being performed in a business-like manner. The quality of the beef was first class. The total number of animals killed at the lower agency from 1st November, 1889, to 31st January, 1891, was four hundred and forty-eight, two hundred and ninety-seven steers and one hundred and fifty-seven cows. Average weight of the four quarters after being dressed and hung up for thirty minutes is eight hundred and twenty-one pounds; average percentage of offal, 8.90. The total number of the upper agency during the same period was six hundred and eighty-two; one hundred and twenty-nine steers and five hundred and fifty-three cows; average weight of the four quarters, six hundred and fifty-six and one-half pounds; average percentage of offal, 10.26. The greatest care is taken in receiving and in issuing the beef.

Twenty-five new houses have been built during the year and some old ones repaired and enlarged. Many of the new houses are well furnished with beds, stoves, tables, &c., and at nearly every house a good pile of wood could be seen. The surroundings were in the best possible order, no dirt being allowed to accumulate. One man, Dead Sarcee, who earns fifty cents a day when butchering and who works for Mr. Pace, the trader, occasionally, has built himself a very nice house. He has also a nice field neatly fenced. He purchased a stove for \$12, pipes and zinc for \$8, and he has also a black walnut bedstead and bureau which cost \$14. In the house I noticed bracket lamps, looking glasses, pictures, tables, quilts for the bed, the floor had been lately scrubbed and everything was as tidy as possible. Not having any time to whitewash, he paid \$5 for cotton to cover the walls. This is but a sample of many more. The Indians are now putting their earnings to good use, and few of them spend money now on paint and beads. They have good warm blankets, and appear very comfortably situated.

Chief Red Crow has a good house and it was in perfect order, a fine iron bedstead with brass mountings, the sheets, pillows-slips, quilts, as white as snow. The Chief was very friendly. He said he was sorry to hear that the people in the east were talking about them giving trouble. He said many of the Indians on the South Piegans (American side) were friends of theirs and they often visited each other, but that they had no reason to give trouble, as they were well satisfied with the treatment they were receiving. He said in former years they went to war with the Crees, and sometimes fought amongst themselves; but he added "these days are past and we have settled down and wish to do as white men do." Bulls Horn and about fifteen other minor chiefs were present. Bulls Horn said they paid no attention to any bad news from the other side. They expressed themselves well pleased with the quality of the beef and flour. Tea and tobacco were also good, only they did not get enough of them.

A coal mine has been opened on the reserve, it is about twenty miles from the agency. One hundred and forty tons were taken out to supply the agency and the schools.

Thunder Child called and wished to talk; he said the flour was not black nor was it white. I told him the flour they were getting was much more wholesome for them than the very white flour. I asked him what about the beef. He said half of it was good, and the other half was not so good. I told him that the beef they were getting was better than seven-eighths of the people of the country generally were getting, and that the flour was better than many white people used, and that white people had to pay taxes in order to furnish funds to pay the rations for the Indians. He shook hands and said he was quite satisfied. The number of Indian ponies branded by the agent is one thousand five hundred and thirty-seven, and there are still some to be branded.

The register for births and deaths shows the following: Births from 1st November 1889 to 31st January 1891, seventy: Deaths during same period one hundred and thirteen. The total population, as per last pay-sheets, is one thousand seven hundred and three.

The beef registers were carefully checked and everything was found to be in order. The agency and farm books were audited and not an error was detected, reflecting credit on the clerk, Mr. Swinford. An inventory was taken of all supplies, copy of which, with detailed report, was sent to the Commissioner, at Regina.

The agency as a whole is in splendid shape. The Indians are peaceable and contented. The agent, Mr. Pocklington, has the Indians well under control, and he has a watchful eye on all that is going on in the agency generally, the result being that no omissions or errors could be discovered.

My next and last agency to inspect was the Piegans, Mr. Pocklington kindly driving me to that point. I arrived at the agency on the 5th of February—A. R. Springett, agent; G. F. Maxfield, clerk and issuer; J. W. Smith, farmer; E. Larkin, cook and assistant issuer.

The agency buildings have been improved by the addition of a new corral for the cattle, with a shed for shelter on one side, also a new hay corral. The whole of the buildings are fenced in, so that the cattle cannot roam about. All the buildings were tidy and in good order. A new dwelling has been put up for the agent since last inspection. It is on the beach, a little north of the farm buildings. It is frame, and contains a sitting and a dining room, kitchen and pantries down stairs; there is also a good cellar. There are four bed rooms upstairs. The house is well built and is very warm and comfortable, with coal and wood sheds and closets attached. There is a verandah on the front, and a very good well with plenty of water at the foot of the bank in front of the house. One stove heats the whole building, besides the cook stove. The crop put in on the Indian fields was one hundred and sixty and one-half acres; results, owing to dry weather, poor. One hundred and fifty tons of hay were cut and stacked by the Indians, out of which they filled some contracts and otherwise sold to parties in Macleod. Forty-five tons are stacked for the agency stock.

The Indian fields looked clean and neat; fences were good. Some have very good corrals and stables. A large number of new houses have been put up during the year. These are in connection with the small villages along the banks of the river. The Walrond Ranche Company (Dr. McEachren) gives annually \$25 for prize money for the best houses, and the competition for the prizes has had a good effect. First, second and third prizes were given, and this year the competition was so close that the third prize was divided among three or four, who were equal. "Crow Eagle," who is Chief, got first prize this year; "Commodore's" house got second prize. It is a double house, with a covered passage leading from one side to the other. One end was very tidy, it contained two bedsteads (factory made), looking glasses, pictures, clock, tables, on which there were covers, washstands, chairs, lamps, sieve for sifting flour, curtains on the windows, cupboards with curtains hanging on front. The other end is used as a kitchen, in which there is a large double "Three Rivers" stove. He has also a large new stable which will accommodate thirty ponies. He had a good crop of potatoes, and was selling some at \$2 a bag. Piles of wood could be seen at many of the houses. Big Swan has a new house, 22 feet x 25, not yet floored, but it was comfortable. Big Swan had a small hay contract from the police, which yielded him \$40.

The village of "Takes-the-gun-last" was the last inspected. This man has a fine herd of cattle, ninety-five head; he has two stallions and some horses and ponies, thirteen cows give milk regularly, and butter is made and sold in Macleod. He has a very nice milk-house. He cut hay and filled a contract in Macleod which yielded him \$210.

The total number of new houses put up during the year is twenty-five, and a number of stables. General improvement could be noticed all along the line.

The crops, of course, were deficient, but through no fault of the agent or the Indians.

The cattle looked well. The herd in March, 1888, numbered eighty-eight; in December, 1890, the total was one hundred and ninety, or an increase of one hundred and two in three years. This is a favourable showing, and is a proof that cattle-raising is a safe and profitable industry when properly managed.

During the year thirteen head of cattle were killed for beef, and these were replaced by younger beasts, generally heifers, and the difference in value given to the Indians, with which they purchased for themselves two waggons, one stallion colt, one set new harness and a mowing machine, half the cost of the latter to be paid next year.

The beef supplied by the Walrond Rancho Company is of the best quality, and is delivered according to contract. The total number of animals killed from 1st December, 1889, to 31st January, 1891, was five hundred and seventy-seven; three hundred and forty-three steers, two hundred and thirty-four cows; average weight of the four-quarters, seven hundred and five pounds; average percentage of offal, 8.65.

The births during fourteen months ending 31st January, 1891, were twenty-nine, and the deaths during same period were thirty-four. The total population is nine hundred and fourteen. Dr. Girard is regular in his attendance both here and on the Blood Reserve.

A number of the Indians were at the timber limits getting out logs and some whip-sawing boards to fix and build houses. An effort was made to burn lime on the reserve and will be continued on a larger scale. The Indians here have a very good reputation for morality; when they visit Macleod, they seldom stay over night. They are comfortably clad. Their treaty money is spent in purchasing blankets and house utensils such as tin ware, pots, pans, etc.

The usual audit of the books was made, inventories taken and sent to the Commissioner.

I have pleasure in reporting general progress in the whole agency, and Mr. Springett is to be commended for the splendid shape in which the agency stands to-day. He is untiring in his desire to see the Indians advance in general prosperity.

This concluded my inspection of Treaties Six and Seven. Mr. Springett drove me to Macleod and Mr. Packling drove me to Leithbridge, where I took the train for Regina, arriving there on the morning of the 19th February.

On the 7th of March I proceeded to Winnipeg to select standard samples for 1891-92. After returning to Regina, I audited the warehouse books and took an inventory of the contents of the warehouse, balancing all the accounts, etc.

On the 12th of May I left for Calgary to attend to some special matters at Red Deer in connection with the new industrial school about to be built there. I also visited Morley Reserve, Sarcee Agency and High River schools and Blackfoot Agency. Special reports on all these points being sent to the Commissioner.

I returned to Regina on the 5th of June, since which time I have been occupied in receiving and inspecting supplies, which have been very tardy in coming in this season.

On the 22nd of August I left Regina for treaty No. 6, having sent on my team ahead with camping outfit to meet me at Duck Lake.

I inspected Moosewoods Reserve, No. 94, White Caps, on my way out. I visited the reserve on Monday the twenty-fourth instant. The reserve is a small one, about two square miles. The population is about fifty (Sioux). Mr. Tucker is in charge. The Indians have twenty-nine acres under crop. Potatoes were very good, turnips very irregular, wheat on the high land—about five acres—was very good, it was cut and was in stook. The grain was very plump and of good colour. The wheat on the bottom was not so good.

The herd numbered fifty head and the cattle were in good order. The increase in calves is satisfactory, being fifteen calves from sixteen cows. The Indians make good use of the milk and some make butter. I saw some very good. One woman has three head of private stock. The band has about thirty ponies. The men were busy putting up hay. Seventy tons had been stacked, and they were going to increase the quantity to one hundred and twenty tons. The houses are very fair and seemed to be comfortably furnished. I only noticed one with a wooden floor, but nearly all had raised beds, tables, &c. One new house has been built this year. The stables were very good and some new ones were being erected. These Indians have the reputation of being thrifty and well behaved. The children attend school

very regularly. Mrs. Tucker is the teacher. The band has given up the "Pow-wow" dances, formerly so frequently held. The reserve on the whole is in a satisfactory shape.

I now left for Duck Lake, arriving at the agency on the evening of the twenty-fifth, but my report on this agency will appear in next annual report.

My man, Mr. Martin, continues to give me good satisfaction. He is of the greatest use in taking inventories, and copying statements, besides taking care of the horses and cooking our meals.

I have the honour to be, Sir,

Your obedient servant,

ALEX. MCGIBBON,

Inspector Indian Agencies.

REGINA, 21st August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to make my annual report on the inspection of Protestant Indian Schools in the North-West Territories, Manitoba and Keewatin, covering the period between 12th August, 1890, and the present date,

During that period four industrial schools, twelve boarding schools and thirty-four day schools were inspected; six weeks were spent in industrial school organization; progress reports and reports on special subjects were furnished to the Indian Commissioner; and much information was gathered and applied.

No directions were received to visit the schools in Keewatin or Manitoba, excepting seven in the last named province. In this portion of my inspectorate, thirty-one schools were not inspected during the year.

In the North-West Territories, all the schools, numbering forty-five, with exception of three not included in the treaties, were inspected.

In private and spare moments a primer, designed specially for the use of Indian-speaking children, was prepared. It is hoped that this will be but one of a series.

Attached hereto is a statement showing the condition of the schools inspected, which, however, does not represent much that is being done in boarding and industrial schools, or indicate the treatment or training of pupils in such establishments. The aim of institutions of these classes is to remove children from native surroundings and influences, and to develop capacity and inclination for the pursuit of such a life as the white man leads.

No very marked line has yet appeared between the boarding and industrial schools. The latter have not yet assumed the character that their name suggests. Small children of too tender years for industrial training (as such training is coming to be known in the world's schools) and children physically unfit for training that requires strength, have been taken into these institutions. The consequence is that in many instances they continue to be little more than boarding schools, though supplied with instructors and appliances for carrying on industrial work. The Government provides means, directly or indirectly, and expects pupils to be trained as artizans or agriculturalists. But the Churches control the schools and aim often primarily at the formation of religious character, to this end obtaining as pupils children of most tender years. These, fit inmates as they are for boarding, are quite unsuitable for industrial schools. The age at which the mind is most plastic is not the one best suited for manual training which involves physical labour. Observation daily teaches that very young children might be boarded at less expensive schools than the industrial, and that these latter to be effective should be made more exclusively and distinctively of that type which their appellation suggests.

The treatment of pupils in most of the boarding and industrial schools is, so far as their bodily welfare is concerned, good. No instance has been met with in which an insufficiency of food was supplied. Good clothing and warm quarters are found to be

the rule. In some instances neglect of hygienic conditions, more or less serious in extent, has been noticed and made the subject of reports to the Indian Commissioner, who, no doubt, promptly had, or will have, the causes of complaint removed.

A wider idea of education is commencing to permeate teachers' work, but much enlargement of this idea is still needed. Until it is clearly felt that the primary aim is to produce a moral, industrious, white character—even unlettered—with a cultivated antipathy to that which stands against, and sympathy with that which stands for, civilization, rather than a lettered, savage nature with increased capacities for doing, but without desire to do and to do well, education of a true sort is not even conceived. And until good means are found of achieving this aim the methods of Indian education remain imperfect. The teaching that the home and home surroundings give the white child must be given in the schools, if our Indian children are to receive it at all.

Generally it may be said that the year has, in some directions, been one of progress ; in others of little advancement ; but in none of retrocession.

An increase of school facilities will be needed before all the children of Indian parentage can be brought under training ; and to ensure their education, some measure of compulsion will probably be found necessary.

It is my opinion that some better means of determining the qualifications of teachers than those now in use should be adopted.

Religious controversies have continued to effect educational work in greater or less measure, and sectarian control of the schools has become a marked feature of it, making the grants more of the nature of subventions to the religious bodies than they formerly were.

The new buildings that have been erected in the course of the year show a great improvement on those of former times, and mark a change which puts many facilities at the command of teachers that were not before enjoyed.

Altogether as a result of my inspections a feeling of satisfaction exists, and assurance is felt that the wise and liberal policy of the Government will ultimately attain a very marked success.

The action of the Indian Commissioner in bringing, in some districts, unwritten laws of compulsion to bear upon those parents who do not avail themselves of school privileges, shows good results, and has acted without exciting such a sentiment against education as would probably have sprung from putting statutory enactments into force with any strictness. The principle that acts is the same, viz., that the parent shall lose by neglect to have the child educated ; but there appears to be less objection to inflicting this loss upon him by withholding gratuities than by fine or imprisonment.

A gradual diminution of the once general sentiment against the education of their children is observable in most of the tribes.

Respectfully submitting this report, and attached statement,

I have the honour to be, Sir,

Your obedient servant,

J. ANSDELL MACRAE,

*Inspector of Protestant Indian Schools in Manitoba,
Keewatin and the North-West Territories.*

§ Many pupils absent.

WINNIPEG, MAN., 17th August, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following, my general report of inspection for the fiscal year ending 30th June, 1891.

MANITOWAPOW AGENCY.

I left Winnipeg in the beginning of July in company with Mr. Martineau, Indian Agent for the above agency, to visit the Roman Catholic schools therein situated, whilst he was making the annual treaty payments.

Dog Creek Day School.

This school I inspected on the seventh of July and found eleven pupils present, about two-thirds of the possible attendance. Most of the children were Roman Catholics. The average attendance I found rather small on the register, which appeared to be well kept. Some complaint about the situation of the school interfered with the attendance. The curriculum was followed closely enough, and the examination of the pupils resulted in their gaining about sixty per cent. of the possible number of marks. The stationery supply was about sufficient. Slight defects in the furniture were noticed. The school teacher was found well qualified enough for the position. The building used was found satisfactory.

Dog Creek Boarding School.

This is kept in connection with the above day school. The progress of the pupils was not found very great, and the accommodation rather defective. It has since been closed.

Water Hen Day School.

I reached this school on the 27th of July and inspected it. I found twenty-four children present, including some not belonging to the Treaty. Attendance had been satisfactory for several months and the progress was remarkable. Both the English and French languages were taught. The course of studies had been closely followed. The teacher was found quite competent. The supply of stationery though large, was found somewhat defective. It is difficult to have on hand at all times certain necessary materials, the school being quite a distance from Winnipeg. The furniture is not of the kind that would be desirable. The building is not at all that which could be expected for a school that has existed for some time and been progressing very much.

Water Hen Boarding School.

As in the case of Dog Creek, there is a boarding school in connection with the day school. Five girls have been received as boarders; they have been very well cared for in all respects, and their success both in class-work and household duties has been great. Mr. Adam and wife, in charge here are, deserving of praise.

From Water Hen I proceeded to Pine Creek where I arrived on the 31st of July and proceeded to inspect the school on the same date.

Pine Creek Day School.

I found thirty-nine children present, being treaty and non-treaty children and also some from Water Hen Reserve. The attendance had been averaging eighty-five per cent. of the child population for the last few months. Although the progress was not as marked as at Water Hen it was still very satisfactory. English had been added to the programme of studies, and the children were getting on fairly. A fair attempt had been made to follow the Department's programme of studies. Rev. Father Dupont

was doing his utmost in this respect. There is no school building as yet, and school is taught in the church; steps have been taken towards building a school.

As in the case of Water Hen and Dog Creek, a boarding school is kept in connection with the day school.

Pine Creek Boarding School.

There were twelve boarders kept, and they were doing well, if not quite as well as at Water Hen. The boarders all could speak the French and English languages. The accommodation was satisfactory and was to be put even on a better footing with time.

This last inspection completed my voyage on Lakes Manitoba and Winnipegosis. I failed to find water-closets at any of the schools but these have been placed everywhere since. I reached Regina on my return on the 15th of August. I again left towards the beginning of October and proceeded to the Duck Lake Agency.

DUCK LAKE AGENCY.

One Arrow Day School.

I inspected this school on the 13th of October. There were only three pupils present. The number of children on the reserve was nineteen; only four were enrolled. The average attendance had not been over three for several months. Only the Roman Catholic children, of whom there are only five, attend. The school had only been recently opened. The school house is well situated. School was taught at the time in the farm instructor's residence. On account of the little time since school has been opened, there was no noticeable progress. The stationery supply was sufficient. There was no furniture worth speaking of. Mrs. Lafond, the teacher, appeared competent to fill the position.

Beardy and Okemasis Day School.

On the 15th October I inspected this school. Seven pupils were present. There were only seven Catholic children on the reserve. The approximate number of children on the reserve is forty. The average attendance was ten, and the number of children enrolled, twelve. Some of the parents were opposed to the school. The progress has been very satisfactory. The children were in the three first standards. There was a sufficient supply of stationery. I detected slight defects in furniture. The teacher, Mr. Ladect, is competent enough and has improved in his way of teaching. The building is not very good. There has been some trouble with the Indians on account of the fuel supply.

From here I immediately proceeded to the Carlton Agency.

CARLTON AGENCY.

Petequahey Day School.

This was then the only Roman Catholic day school in this agency. There are thirteen children on the reserve, all Roman Catholics. They were all enrolled and twelve were present for the examination. The attendance is very good and the progress satisfactory. The programme of studies has been followed. The furniture was far from being what it could have been. There was a sufficient supply of school material. The Rev. Father Paquette was teacher, but expected to get somebody to take his place before long. The house used for the school belonged to the Rev. Father, but a new building was in course of erection for school purposes.

Petequahey Boarding School.

This is kept in connection with the day school, and two boys are kept here. They have been progressing very satisfactorily.

I then proceeded to the Battleford Agency.

BATTLEFORD AGENCY.

There were at that time two Roman Catholic day schools in this agency, one on Poundmaker's, the other on Sweet Grass's Reserve.

Poundmaker's Day School.

I inspected this school on the 28th October. Out of eighteen children on the reserve sixteen were present for examination. All the children on the reserve are Roman Catholics. The average attendance for three months amounted to ten, and might have been better, there being no reason why the children should not attend regularly. The examination was very satisfactory, the children obtaining an average of about seventy per cent. of the whole number of marks that it was possible to gain. The class organization I found very good. The stationery supply was sufficient, and the school is provided with proper school furniture. Mr. Dandelin is a very good teacher and has several times been awarded bonuses given for the best managed schools. The schoolhouse is a good log building.

Sweet-Grass Day School.

I inspected this on the 29th of October. Out of the total number of children on the reserve, twenty-seven, sixteen were present for the examination. They are all Roman Catholics, and are all on the school roll. The average attendance is good, but the progress not so good, probably on account of the teacher having frequently been changed here. There was a good supply of stationery. The furniture was of the proper kind. The stove and pipes were found defective. Mr. Pritchard, the teacher, is not a very brilliant one, but might be used in a new school like this.

I then left for Fort Pitt; arrived there on the 2nd of November, and on the next day inspected the Roman Catholic school of Onion Lake, in the Onion Lake agency.

ONION LAKE AGENCY.

Onion Lake School.

Twenty-one children were presented for examination. There are about sixty-five Roman Catholic children of school age on the reserve, of whom thirty-seven were on the school roll. The average for the preceding quarter had been twenty-three. The children were fairly advanced, and were graded in the first four standards, besides eight not graded. The attendance is generally good in winter; in summer, however, on account of the hunting season it is much smaller. The class organization was satisfactory. The furniture is good enough, although some few things are still wanted. The supply of school material is sufficient. The school teacher, Mr. Dodd, does his best, but has not, perhaps, all the energy required for his position. The house is not very good, but at the time of my visit there was an intention of getting Sisters to keep this school, in which case an altogether new building would have to be erected; on that account it was not thought advisable to make any great improvement on the old building. There is another school in this agency, situated at Cold Lake; but the roads were reported so bad by the Indian Agent that I could not inspect it. It is situated about one hundred miles from the seat of the agency. Passing through the Saddle Lake Agency, I expected to find a school opened there, but it was not so on account of various difficulties in the way, and I left immediately for the Edmonton Agency.

Edmonton Agency.

In company with Mr. Indian Agent deCazes I visited the schools of the district, three in number, one on Enoch's Reserve, one on Alexander's Reserve, and the St. Albert Orphanage at St. Albert.

Alexander's Day School.

This school I visited on the 14th of November. Only three pupils were present, out of a possible attendance of twenty-seven children enrolled. There are thirty-nine children on the reserve, of whom seventeen are Roman Catholics. The Indians here are very often away hunting and fishing, and it interferes greatly with the attendance. It was proposed to establish a boarding school here, when, in case of absence of the parents, the children could be kept as boarders. The examination of the pupils present

was satisfactory. The supply of stationery was sufficient. Better furniture was required. The teacher, Mr. Varin, had been there for a short time, and it was expected to have Sisters there before long. The school building is the same as it was at prior visit.

Enoch Lepotac's School.

I inspected this school on the 15th November. Eleven children were present. There are thirty-eight Roman Catholic pupils on this reserve, of whom twenty-five are enrolled. The average attendance was about thirteen. The Department's programme of studies was not followed, and the children were not graded accordingly, although the progress was satisfactory enough. The school material was sufficient, and the furniture about what would be desired. The teacher, Mr. Ridsdale, and Rev. Father Tessier, were doing their best to promote the success of the school. The building used for school purposes is the Roman Catholic Church.

St. Albert Industrial School.

This I inspected on the 17th and 18th of November. The progress of the pupils was very remarkable. Both the French and English languages are taught, and amongst various subjects taught I may mention reading in the fifth reader, and all the elements of grammar in both languages, free translation at sight from English into French and French into English, History of Canada in French and History of England in English, geography, arithmetic, composition, correspondence, elements of physiology, &c. The pupils are graded as follows: seven in first standard, fifteen in second standard, six in third standard, twelve in fourth standard, seven in fifth standard.

The progress of the pupils in hand-labour has also been very satisfactory. The whole of the clothing required at the institution is made there. The absence of necessary sewing machines obliges them to do a good deal by hand, when it could be done at great economy of time by machinery. The girls are kept busy with household work, cleaning, washing, sewing, making butter, etc., whilst the boys are kept on the farm or about the buildings doing chores.

Of the whole number of pupils thirty-four are engaged in class work only, three farming, four sewing, two cooking, one spinning, three spinning, weaving and carding. Two of the pupils were sick.

There are sixty pupils in all at the institution, but only fifty are paid for by the Department. The others are old pupils of the Institution who have not been disposed of yet, and in the meantime help the reverend Sisters a great deal. The boys are not kept here after they are twelve years old, but are transferred to the Roman Catholic Mission and employed on the farm.

The clothes used by the pupils are very good, the diet wholesome and sufficient.

The health was quite satisfactory. At the worst of the influenza epidemic, there was only one case of death.

The various buildings used for this institution are all very good. The various rooms allotted to the pupils, such as dormitories, classes, dining room and recreation rooms are all roomy enough and ventilated sufficiently. A large play ground has been given to the pupils, the same being surrounded by the bakery, icehouse, carpenter's shop, stable, sheds, etc. All the buildings are kept very clean.

This institution, although receiving a smaller appropriation than the larger industrial schools can compare in results very favourably with them.

Returning after this inspection to Edmonton, I shortly afterwards left for the

PEACE HILLS AGENCY,

where there is one Roman Catholic School on Ermine Skin's Reserve.

Ermine Skin's Day School.

At the time of my visit most of the Indians were away from the Reserve, and the school was accordingly closed. This school has never been at any time very successful

on account of the apathy of the Indians. It was hoped that after a certain time Sisters would be procured to take charge of it, and it would then probably give better results.

From this Reserve I drove to Calgary, and from there proceeded to the St. Joseph's Industrial School, which I inspected during the latter part of November.

St. Joseph's Industrial School.

Some improvement had been made on the main building, but it was far from answering the wants of the institution as well as at the Battleford and Qu'Appelle Industrial Schools. The furniture in many instances was found defective. Some of the rooms were large enough for the requirements, but others were very inadequate in some respect or other, such as the dormitories for boys, girls and Sisters, and the girls' class-room. The roof of the building was very bad, leaking during rainy weather. The ventilation was generally defective, and in certain rooms the light supply was altogether insufficient.

A new building was at that time contemplated, and the necessity for this was shown by the crowded rooms of the old one.

Besides the main building there were several buildings in the vicinity. An infirmary had just been completed, of good size, and properly fitted for that, and a house for the tradesmen employed had also been erected, and the men were just then fitting up their quarters. The shops for baker and carpenter were in good condition; the oven in the baker's shop a little damaged. There were besides, a general store, a washing and drying room, coalsheds, etc., all more or less adequate to the needs, also stables, sheds for carriages, etc. Improvements on several of the above were contemplated. The fences about the place were not as good as might have been, and several accidents happened, such as cattle breaking into gardens.

Very little land has been broken for the past year. There had been a satisfactory yield of oats and wheat and of garden roots.

The horses were in poor condition, on the contrary cattle, sheep, pigs, etc., are all doing well.

Fire escapes have been built at several places and the fire protection has been very much improved.

The staff, composed of Reverend Father Naessens, W. M. Pidgeon and Denneby, Reverend Sisters Cleary, Sicard, and others, has been giving much satisfaction, as a rule. There has been a change in the principalship since a prior visit, and it is quite probable that the new principal will be successful.

The health has been very good; no serious case of illness has happened. Excepting a few cases of scrofula, which is a general disease with the Indians, there is nothing in this respect to be complained of.

The examination was very satisfactory. There were separate classes for the boys and girls.

The boys are graded as follows:—Seven in the fifth standard, four in the fourth standard, three in the third standard, eight in the second standard, and five in the first standard. This grading was strictly according to the Department's programme.

The following grading of the girls was also according to the Department's standards:—Seven in the fifth standard, two in the third standard, six in the second standard, three in the first standard.

Both with the girls and boys the progress was marked, although during the preceding season much of the time had to be devoted to outside labour.

Amongst the boys there are some who have become very good carpenters and farmers. The carpenters in the course of the summer were sent to other places, for the purpose of building for the agencies, and they got through their work much to their credit. The farmers are of course kept at home, there being a great deal to do on the school farm, and in the stables and gardens. The boys have also charge of the bakery, having to make the greater part of the bread necessary for the institution, the small number of the girls allowing them to do just enough for the sake of learning how to

do it. The girls have to do a great deal of sewing, knitting, mending, making clothes, besides household work, cooking and cleaning. All water to be carried in and out is attended to by the boys; and it takes a great deal of time on account of the distance where the water is got and the defective system of pipes for the evacuation of foul water.

On the whole the children are doing very well in these various works, but the number is small and class work suffers from the excess of outside work.

The recruiting of pupils up to the time of my visit had not been attended to very extensively by the various agents of the district, and it was coming to a point when the oldest pupils would leave the school without being replaced by others, which would show a small proportion of competent trade-boys after a time.

Owing to circumstances in general, the school is doing much better than could be expected, considering the difficulty of getting pupils, and sometimes the poor class of those that were got.

Being through with the agency I returned to Calgary and from there went to Gleichen, where there is a school on the

BLACKFOOT AGENCY.

Blackfoot Roman Catholic School.

This I inspected on the 2nd of December. There were ten children present. Ten children are claimed to be Roman Catholics. There are ninety children living in the vicinity of the school that could attend. But the attendance is very poor, and had averaged twelve for the three previous months. On this account the examination was not very satisfactory. The furniture is very good and there is a sufficient supply of school stationery. Mr. Robbe, the teacher, has been here for some years and is doing very well. A new room had just been added to the Roman Catholic mission house, and it was used as a school house. It was an improvement on the room used in previous years. From Gleichen I returned to Calgary, and from there I took the stage to Fort McLeod to visit the schools of the Peigan and Blood Agencies.

BLOOD AGENCY.

Blood Roman Catholic School.

I visited this school on the 7th of December. There were present twenty-seven pupils. There are at least one hundred Roman Catholic pupils in the vicinity of the school. Only forty are on the roll and the average attendance for the preceeding five months was sixteen. The attendance is not regular, but were all the children attending that could attend the school room would likely be too small. Although the children are not very advanced the examination was very satisfactory owing to the great efforts made to instruct the children according to the line set forth in the Department's programme. The furniture is of a good class, although in small quantity. Mr. Jones had been teacher there for some time and had given very much satisfaction. The house recently finished was very good and had a nice appearance.

PEIGAN AGENCY.

Peigan Roman Catholic School.

I visited this school on the 9th of December. Sixteen children were presented for examination. There are about thirty children of school age, of whom twenty-five can attend. Thirty-three children altogether are enrolled, including some living at a great distance from the school. The average attendance for a year was only ten. The attendance was not very regular. The Indian parents do not care to send the children to school, and the children do not care to attend. The examination could not be very satisfactory; enough so, however, under the circumstances. The supply of school material was small. The furniture is of the proper kind. The teacher, Reverend Father Foisy, is quite competent. The house is very good.

This inspection concluded my western tour. The next day I left Fort Macleod for Lethbridge, and from there to Dunmore and Regina, where I arrived on the 11th of December.

In the early part of the spring I came to St. Boniface to inspect the St. Boniface Industrial School for girls and the St. Boniface Industrial School for boys. Although these institutions rank as a single one, they are wholly separated and situated at some distance from each other. Only a few girls are kept at the boys' school for the purpose of helping the reverend Sisters in the household duties and attending an evening class for school work.

The first of these institutions existed some time before the boys' school, and was kept in connection with the St. Boniface Orphanage, where a separate building, not quite detached, was devoted to the Indian girls. This building contained good class rooms, recreation rooms and dormitories for the girls, well ventilated and lighted. This was used temporarily as building funds had not been received from the Department, and there is the intention of having a good building erected later on.

The building for the boys school is one far larger than the one above mentioned, built in solid brick, containing large rooms, dormitories which have no rivals in any of the larger industrial schools under the whole control of the Department, and very good class and recreation rooms. The property had not yet been fenced in, but was shortly after my visit.

Owing to the boys school having been opened some time after the other, the boys were not quite as advanced as the girls.

There were twenty-nine girls and forty-one boys at the time of my visiting these institutions.

The Department's programme of studies had been strictly followed in the classes, and in less than a year some of the pupils were fairly in the fifth standard, and the examination showed perfect equilibrium between the various branches of the programme.

As to manual labour, the boys school not yet being provided with shops, it consisted for them merely in chopping wood, carrying water and few other chores, whilst in the girls school the girls were concerned with all the duties the girls had to do in other schools.

The Government grant for furniture had not been very large at that time, and the school was scantily furnished, with very good furniture however.

As far as the reverend Sisters are concerned, and the school work in its various branches, nothing could be more satisfactory, and my visit was decidedly pleasant to report.

Having, on my return, received no further orders the rest of the fiscal year passed without any other inspections.

Hoping that this report will be found satisfactory.

I have the honour to be, Sir,

Your obedient servant,

J. A. BETOURNAY.

Inspector of Roman Catholic Industrial Schools.

INDUSTRIAL SCHOOL,

QU'APPELLE, 28th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual reports, for the fiscal year ended 30th June, 1891.

The full number of pupils, viz., one hundred and sixty, provided for in the estimates, has been attained, which shows that the Indians appreciate the advantages of the education that their children receive here. The decrease in the cost per capita has been

in proportion to the increase in the number of pupils. In no other similar institution, wholly supported by the Government, has the cost per capita been less than here. We certainly aim at economy consistent with efficiency.

The sanitary condition of the establishment has been remarkably good, owing undoubtedly to the good care taken of the pupils by the reverend Sisters, the medical attendance of Doctor Seymour, the suitable site of the school; and the abundance of vegetables given to the pupils is also a factor to the good health.

The attendance has been more regular than heretofore, and means are now being taken with success to prevent children visiting their homes, and more or less losing the habits of cleanliness and industry and the knowledge that we are endeavouring to inculcate in them. The visits of parents are less frequent, and, consequently, pupils are more attentive to their studies and work.

The number of girls is in excess of the number of boys. Many parents prefer to get a little help from their sons rather than send them to school, while they part more willingly with their daughters to procure them a moral education under the reverend Sisters, and to keep them away from the reserves until they are married.

The number of boys being too large, a second teacher was provided for last winter. Although there is more outdoor exercise in the summer, it is not often that a large number can be occupied outside, and they require as much teaching and overseeing as in the school room. Eighty boys, of whom sixty are in the school summer and winter, are too many for one teacher, but some parents complain that the smaller boys in the lower classes are taught by the more advanced pupils. The pupils of the higher class, who have consequently received more teaching from Mr. Dennehy, the teacher, have made good progress under his efficient teaching, and compare favourably with white scholars of the same age. We endeavour to make them all learn and speak English; a few pupils can now write very fair English compositions. During recreation they play cricket and seem to enjoy it thoroughly; it is now their usual game.

The condition of the small boys could be considerably improved if they were separated from the bigger boys and placed under the care of the reverend Sisters. It would be an economy to the Department; and the health, cleanliness and morality of the boys would gain by the change.

The recreation-room has been re-floored with maple, the old pine floor having been completely worn out.

The trade-boys are receiving a thorough training in the shops and on the farm. Each instructor has eight apprentices, but the farmer often takes a larger number of boys. The carpenter and his apprentices have put up the following buildings during the year, grainery, shed, addition to wash-house, milkhouse and shoemaker's shop, besides making furniture and repairs. The blacksmith, besides teaching his apprentices, has been ironing sleighs, wagon-boxes, making verandah railings, bedsteads, and many other articles, as well as doing all repairs for the institution, besides many for the surrounding reserves. A shoemaker's shop has been fitted up above the blacksmith's shop, and a shoemaker was hired last July. The repairing of the boots has proved an economy to the institution, and a knowledge of the trade will be of great use to the pupils hereafter. New boots will also be made here.

Mr. Miles, the furnaceman, during the summer was kept busy kalsomining, repairing and painting buildings, and doing all necessary mason work, and saved the Department much more than his salary.

The farm is kept in good order, under the able management of our farm instructor, Mr. Redmond, and the crop of grain and vegetables is a great credit to the institution, which is now well known for the good farm training given to the pupils. Last year we sold over five hundred bushels of potatoes, and this year we will at least have all the grain and vegetables required for the institution; all the hay required has been put up by the farmer and his boys.

The office work is increasing with the size of the institution, and it takes a skilful man to make the returns and to keep the books and stores in order.

All the employees have faithfully discharged their duties and are an example to the pupils; none are allowed to give less than ten hours' work a day.

The girls are making good progress in class and in all sorts of housework. More than twenty have been hired out during the year. At present fourteen are out at service earning from four to ten dollars a month. I have a few more demands for them. If placed in a good family and properly overseen, their stay in service is very useful to them, as they have every facility for learning English and house work.

The cooking, washing, knitting, making of the clothes, and mending, have become a large undertaking in such an institution, and still it is all done by the girls and reverend Sisters.

We have visitors to the school almost every day; the public seem interested in this institution. The progress of the children and the good order kept in the school and outside seems to satisfy them that the public money is spent to best advantage.

I have the honour to be, Sir,

Your obedient servant,

J. HUGONNARD.

Principal.

INDUSTRIAL SCHOOL,

REGINA, 16th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward my first official report, together with an inventory of the Government property under my charge.

On the beginning of April of this year I reached Regina to take charge of the school. In the few subsequent months there is no scope for an extended report of work accomplished.

The Staff.

I was fortunate in securing as Assistant Principal the services of Mr. C. D. McKenzie, a man of experience in Indian work, and I would here bear testimony to his valuable services in effecting the organization of the school. There seems a likelihood of Miss Walker, of the Portage la Prairie Indian School, being appointed matron. In the meantime Mrs. McLeod is efficiently discharging the duties of that office.

Pupils.

Our first pupil was registered on the 15th April, and during the remaining days of that month seven more pupils were received. In May we had an addition to our numbers of twenty-one, and in June an addition of three, making a total of seventeen boys and fifteen girls. The largest number (twenty in all) was received from the reserves to the north—Piapot's, Muscowpetung's and Pasquah's. Of the others, seven are Assiniboines, and came to us from the Indian Head Reserve.

The School Room.

No time was lost in organizing the classes and placing the school on a good working basis. We arranged that each pupil, as far as strength permits, should spend at least three hours in the school room, and three hours in one of the industrial classes. In addition to this, an hour in the evening has been set apart as a study hour. The afternoon classes are conducted by Mr. McKenzie, and the forenoon by myself.

Work.

The boys under the carpenter and the farm instructor have not shown any great aptitude or eagerness for hard work, but under patient and competent instructors, such as we now have, we expect to see a steady improvement in all our apprentices.

The material for a laundry has been placed on the ground, and the building is partially constructed.

The boys have shown themselves very useful in the garden, and in cleaning up the grounds of the institutions. The girls have done good work in their special departments. In the laundry, the kitchen, and, under the matron's direction, they have shown cheerfulness and a willingness to learn.

General Remarks.

In spite of all the comforts provided for them, some of the pupils have shown at times an inclination to forego the advantages they here enjoy, and return to the uncivilized life of the tepee. In every case these runaways have been brought back to us. We anticipate no serious trouble from this cause when the children have become a little better acquainted with us and with each other.

The moral and religious training of the pupils is not forgotten, but will receive greater prominence when English has become the common speech of the school.

On the whole we consider the outlook for the coming year full of promise.

I have the honour to be, Sir,

Your obedient servant,

A. J. McLEOD,

Principal.

ST. JOSEPH'S INDUSTRIAL SCHOOL,

DUNBOW, ALBERTA, 30th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith the annual report on the affairs of the above institution for year ended 30th June, 1891, together with inventory of all Government property in my care.

The Principal, Father Claude, having resigned, I took charge of the institution towards the end of October, 1890, and found the inmates to number sixty-two, ten officers and fifty-two pupils.

During the year we received thirty-three new pupils. Of this number, twenty-four were full blooded Indians of the Blackfoot and Blood tribes, seven half-breed Bloods and two Crees.

Twelve children left the school since last report was made. Four of these were here only for a few days when they deserted, and as they were somewhat too old to make promising recruits, no efforts were made to recover them. Three boys were returned to their parents; one was partly blind, and his father, who had also lost the use of his eyes, needed his help. The parents of the other two had left treaty. Two of the others discharged are doing remarkably well; one died shortly after leaving the school; another is in very poor health; and one has returned to his Indian habits.

The health of the pupils has been very good. Speaking generally, they have suffered from nothing more serious than colds. This happy state of affairs is due, in a great measure, to the care taken of them by Dr. Lindsay, and the matron, the Rev. Sister Cleary.

In January the shoemaker's shop, which was closed in July, 1890, was reopened. The apprentices in this shop are progressing favourably under the present instructor, Mr. Compain. The following articles were manufactured by the shoemaker and apprentices from January to the end of June: Boots, boys, 67 pairs; boots, girls, 26 pairs; moccasins, 29 pairs; leather laces, 1 gross; bridles, 2; halter shanks, 3; halters, 25; martingales, 1; pole straps, 6; surcingles, 6; breeching straps, 6; tie straps, 12; tugs for ox collars, 32; hames straps, 20; ox back straps, 5; hobbles, 24; calf muzzles, 3; 20 sets of ox cart harness were doubled in thickness, and average of about 35 pairs of boots were repaired each month. The value of the above work is estimated at \$360, exclusive of material.

The carpenter instructor employed when I arrived remained here until beginning of May, when Mr. Thibault took his place. The boys in this shop have made good progress at their trade, especially the older ones. Three of these boys worked at Blackfoot Crossing, and at Morley last year. They now have nice tool chests, sets of tools, and an account in the Dominion Post Office Savings Bank. The tools were purchased out of their own earnings, of which they also spent a share, and the balance was banked for them. The following shows the work performed by apprentices and instructor. The new building erected for employees was finished and painted, all the doors and window sashes being made here. The carpenters then worked with the plumbers, casing up pipes, sheathing closets, &c. Two tables, 2 bedsteads, 2 benches, 1 wash stand, 2 large cupboards and one small one were made. Fifteen hundred pickets for garden fence were sawn out, and a neat fence valued at \$200 built. Twelve combination benches and desks were made for the MacDougal Orphanage. The roof of the main building was stripped off and resingled, and addition built to girls' apartments and the whole roof painted. The work on the addition and resingling of roof is estimated at \$600, exclusive of material. Besides this, all the necessary repairs were made to tools, furniture and buildings.

Mr. G. Lacombe, farm instructor, resigned and had left the institution before my arrival. His place was taken by Mr. E. Pedgeon, who is a good instructor and a very handy man around an institution like this, as he has a slight knowledge of blacksmithing, &c. Five hundred bushels of potatoes, five hundred and eighteen of turnips and one thousand four hundred and twenty-eight pounds of vegetables were put by for winter.

The following quantities of grain and roots were sown this spring: Twenty-six acres of oats, half-an-acre of wheat, six acres of potatoes, five acres of other roots, such as turnips, beets, mangolds, carrots, etc., and one acre of garden seeds. There was no growth up to July. We had little or no rain, and high winds prevailed most of the time, and the outlook for a fair harvest is poor. Only about one-third of the potatoes sown have come up. The seed rotted in the ground. The farmer and boys broke fifteen acres of new land, built a quarter of a mile of new fencing and put up one hundred tons of hay. The boys did all the mowing.

The live stock at the institution consists of the following, which are in good condition: four horses, one mare and three geldings, one bull, ten cows, two oxen, and nineteen head of young stock ranging from three years old down. The sheep were transferred to Morley, as they could not be raised with advantage here.

The girls continue to improve and give satisfaction. In the sewing room, with the seamstress, they have made during the year ninety-one pairs of trowsers, eighty-four coats, fifty-one aprons, thirty-seven dresses, ninety-six shirts, eleven chemises, sixty night dresses, thirty-six pairs mitts, sixty pairs socks, fifty-eight pairs stockings, forty-eight towels, twenty-five garters, thirteen mattresses, eleven pillows, sixteen pairs of drawers, fourteen petticoats, two blouses and two cassocks. The making of these articles, and the repairing of their own and the boys' clothing, is estimated at \$500, exclusive of material. They are also employed at, and receive instruction in cooking, baking, dairy and laundry work and all other household duties. In the schoolroom they have advanced well under the able tuition of the Reverend Sister Kelly.

The boys have not had as much schooling as heretofore, as more of the assistants' time has been occupied with the office work, stores, and overseeing. Four boys do the baking for the institution alone, and for boys they do their work creditably. The boys not employed in the shops, bakery, or on the farm, work in the fields, weeding and hoeing. They also perform all fatigue duties, such as cutting wood, carrying coal, cleaning up around the premises, picking stones off fields and watering garden.

The main building has been veneered since the last annual report, and a system of waterworks has been placed therein. The water is pumped by windmill to a large tank in top of house. These improvements have added greatly to the comfort and value of the building.

The infirmary has been raised, a stone foundation placed underneath it, and brick veneered. It is now a very comfortable building.

In conclusion, allow me to express my thanks to the Agents, Missionaries, and others, who have helped us to obtain children, and to the Commissioner and Inspectors who take such an interest in our work and who have helped us by their kind advice.

I have the honour to be, Sir,

Your obedient servant,

ALB. NAESSENS,

Principal.

RUPERT'S LAND INDIAN SCHOOL,
MIDDLECHURCH, Man., June 30th, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to report as follows on the work of this school for the year ended June 30th, 1891.

When I reported last year, we had been at work barely six months, and it was uncertain how far the Indians would be ready to avail themselves of the advantages of the school. I am glad to be able to report that any misgivings as regards this have been proved groundless. There have been many applications for vacancies, and the school could have been filled to its utmost capacity, had we been ready to receive all who applied. We have been obliged to reject some because of physical unfitness, or as being either under or above school age. We have also kept some vacancies for children to come in from distant and rather inaccessible points, as it is desired to make the school as widely beneficial as possible.

At the present date we have 28 boys and 32 girls, ranging between the ages of 9 and 17 years. In class work and industrial employment they are arranged as shown in the accompanying schedule.

The school was inspected, as to class work especially, by Mr. Ansdell Macrae on August 29th and 30th, and his report is no doubt in your hands. At that time we had just promoted the pupils to new work as a result of our examination in June. Since then the work has gone on in a fairly satisfactory way, and the results of our June examination just ended are on the whole encouraging. The study of English has received special attention, but I have felt, with, I have no doubt, all others engaged in such work, the need of readers specially adapted to the use of these children. There is much in those now in use, to discourage the pupils in their efforts to overcome the difficulties of the English tongue. Many of the subjects treated of in these books cannot be understood without a wider knowledge of the world than Indians of any age are likely to have.

The industrial side of the work has been much extended since last June. All the boys strong enough for such work have taken turns on the farm. Last year we had 28 acres of crop, yielding 450 bushels of oats and barley, 700 bushels of potatoes and 416 bushels of other vegetables. The meadow yielded 50 tons of hay. The dairy supplied almost all milk required and 150 lbs. of butter. This season we have 55 acres under crop and are breaking up new land. Owing to the ravages of local grasshoppers the yield is likely to be very light.

Considerable labour has been spent in making the grounds attractive, and we have again to thank the Director of the Central Experimental Farm for parcels of trees, plants and tree seeds.

The carpenters have been under a skilled instructor since November. They have erected the following buildings. A new laundry 18 by 25, an icehouse and refrigerator, a fowl house, a set of dry earth closets, a girls' playroom 18 by 20, a barn and implement shed, a printing shop with staff rooms combined, and have in addition done a great amount of work in finishing and equipping the main building.

In addition to the above improvements the Department has by contract erected a windmill for pumping and other purposes, and an outside tank for various purposes.

A large tank with hose on each flat has been put in the main building as a safeguard against fire, and an artesian well has given an additional supply of water for drinking and house use.

A printing shop was opened in January, which has proved a success in every way. A challenge foot press is used and every effort made to send out only first class work. We are now printing the *Rupert's Land Gleaner*, a monthly paper of eight quarto pages, and do a considerable amount of job work, comprising letter heads, bill heads, circulars, municipal returns, legal forms and pamphlets. Mr. Lawler, the very efficient instructor in this branch, reports as follows on the boys' progress in this work :

"All begin on plain newspaper composition from printed copy, and as soon as possible are given manuscript. After this they do composition work on circulars, notices, etc., and next such small job work as their stage of progress warrants. The large boys being the only ones physically able to do press work have received some instruction in this branch, while the juniors are being taught to wash type, rollers, etc. It is difficult to compare the progress of these pupils with those in regular printing offices, owing to their imperfect knowledge of English, but there is no doubt that, taking the average pupil in both cases, the progress of our pupils is quite as rapid as that of ordinary printer-apprentices."

The blacksmith shop was opened in May, under the efficient management of Wm. Ozard. Four boys are engaged in the shop, and have assisted in the construction of an excellent land roller, and many necessary tools, and in the repairing of agricultural implements, horse-shoeing and general work. Considerable aptitude is shown for this branch of work.

A small but useful amount of work has been done by the younger boys in the repair of shoes.

The domestic work has afforded ample instruction for the girls, the seniors doing the cooking, laundry and heavier house-work, the juniors taking lighter work, and all alike receiving instruction in sewing. On the whole the work has been well done, though at times those in charge of it are far from satisfied with it. It is not always easy to remember that a true estimate of the girls' progress can only be made by remembering what they were when they came to us and the character of the surroundings amid which they have been reared. Giving these things due consideration, there is much to encourage the Department and ourselves in this important work.

I have only to add that the health of the children has been exceptionally good. Excepting two cases of pneumonia and one of cystites, the few cases of sickness have been attributable to hereditary scrofula.

I have the honour to be, Sir,

Your obedient servant,

WM. A. BURMAN,

Principal.

COWICHAN AGENCY, INDIAN OFFICE,
QUAMICHAN, B.C., 5th September, 1891.

To the Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to enclose my annual report, together with tabular statement, the list of Government property under my charge having been already sent in.

The death rate has been rather large during the year. Out of a population of 2,047 Indians the deaths were 78. With the exception of "la grippe" there has been no particular epidemic. Several young men have died from the effects of severe colds contracted by exposure at the Canneries and Hop Fields. Several also have been accidentally drowned, and many children die annually from mesenteric disease. The young men between the age of sixteen and thirty seem particularly liable to lung diseases, and from the want of proper nursing it often proves fatal with them.

The census of the agency as a whole shows a decided increase of population, and this year the census is a reliable one, having been taken carefully and at once, not on occasional visits as formerly. One village shows a decrease of seventy-two, another an increase of seventy. But this must not be taken as a proof that deaths exceeded the births by seventy-two in the one case, or that births exceeded the deaths by seventy in the other. This is not actually the case, but at the time the census was taken the Indians were residing at the villages named. Many families own a share in the large ranches in different villages, some from the father's side, some from the mother's, and their movable effects not being many, they reside at either place occasionally as the fishing, mill work or agricultural pursuits may offer the best inducements, hence the difficulty of classing many of the families to a particular band.

The number of blind people in the agency is large. Medical men account for it by the way they have of squatting over pinewood fires, the constant smoke causing ulceration of the cornea, ending in total blindness. And in favour of this theory is the fact that no new cases occur amongst those who live in houses provided with good chimneys.

The crops last year were in excess of any previous year. The Cowichan and Saanich Bands sold between nine and ten thousand bushels of oats. The former bands

own two threshing machines, and besides threshing their own grain they earn considerable in threshing for neighbouring farmers. Many still, however, lose all their crops by being absent at the time the harvesting ought to be done.

The small Band at Tooke have made quite a start at the improvement of their reserve. Two very good frame houses have been erected during the year, and other improvements made on the land. When I was there in April I found four of the older children attending the provincial public school, and making good progress.

The Indians at Ché-erno are compelled to be fishermen. Their reserve, though large, is rocky and only suitable for pasture, hence there is very little attempt at cultivation.

The Songhees at Victoria and Discovery Island continue to build houses and fence in garden patches. Many of the young men find work in the city, and the women compete with the Chinese in washing and charwork, but forming part of the city it is impossible to prevent the introduction of liquor into the village.

The five Bands on the Saanic Peninsula are as a rule well off, growing a good many fruits and grains for sale, and labouring on other farms. Several own spring waggons and take their fruit twice a week to Victoria. In May I saw an acre of strawberries splendidly cultivated from which the owner expected to realize several hundred dollars. There are, of course, many exceptions to the rule, and some young men are idle and worthless, while others are destitute through ill-health.

The different Bands in the Cowichan Valley continue to cultivate a large area, but many suffered greatly last winter by the floods, and the running of saw logs down the river at that time, by which a large area of beautiful land was carried away, besides barns, houses and fencing, for which there appears to be no redress. One man who had sown eight hundred pounds of grain lost the result in a few hours by the banks of the river and the barn being carried away before the grain was threshed. Many others lost in smaller proportion, especially in fences. And I have experienced great difficulty in persuading the Indians not to retaliate by appropriating the stranded saw-logs and converting them into fence-rails and firewood. At present there are some fourteen million feet of saw-logs awaiting the rise of the river to be sent down; and, as no attempt has yet been made to protect the banks of the river from damage or to prevent large jams forming, it is highly probable that very serious loss of property on the reserve will take place.

On the night of the 11th of July, during a high wind, a fire broke out in the Lomenos village by which all the large ranches were swept away. Very few Indians were at home, and the fire was so fierce that, although many white men were soon at the place to give assistance, scarcely anything could be saved. Houses, barns, waggons, buggies, tools, blankets, rifles, food and cooking utensils were destroyed in an hour, leaving the band, which had been possessed of several thousands worth of property, entirely destitute and without shelter. The old chief was severely burnt and it is doubtful if he will recover. Several little children also were slightly injured but have all recovered. There is little doubt that it was the work of an incendiary, and the general belief is that it was started by some Chinese living near the reserve who had recently had some trouble with the Indians. Several parties have kindly sent in assistance to the sufferers in the form of clothing, and one gentleman generously sent \$50 towards a fund to assist them in rebuilding.

Owing to the saw-mills at Chemainus being closed for rebuilding these bands have found no regular work near home, which has had the effect of making some of them think more seriously of cultivating their land.

In February and March I spent some days in surveying allotments for different families in Oyster Harbour, on some of which considerable clearing has been done.

The Kuper Industrial Schools, which were opened last year, have so far been successful, and under the Rev. Father Douckele's management all seem happy and contented. At first there was a tendency to run away on the part of the boys, and to make complaints on the part of parents, but at present there are more applications for admission than we have room for. The girls' branch of the school has just been opened, and as soon as the necessary furniture arrives the vacancies will be filled. At my last visit I found twenty-four boys and three girls looking healthy and happy, (ages from eight to fourteen

years). I was surprised at the advancement in reading and arithmetic, while the writing on slate and copy-book is remarkably good.

The Rev. Principal has generously provided fourteen expensive instruments for a brass band, and a competent instructor, and their progress has been such that the Cowichan Agricultural Society paid all expenses to get them to play at their Horticultural Exhibition in July, and all conceded that they did great credit to their instructors.

Their appearance in public as musicians will have a good effect on the other Indians. The buildings on the island have been kept clean, and great care is being taken as to the health of the pupils. At present no trades are being taught, and the outside work consists chiefly in garden work and in clearing the land near the buildings. They have however regular fire drill with the hose supplied, and there being a plentiful supply of water there is little fear of a serious fire. The stock of clothing and provisions is in good order and well attended to, a regular account of all receipts and issues being kept.

The young men of the Penelakut, Lyacksun and Comeakin Bands have raised two other brass bands by subscription and pay an instructor; but some of the old people are very much opposed to them, as they think it will interfere with their dances.

There is very little change in the Nanaimo Indians. Three or four have since my last report enlarged and improved their houses and lots. In several houses sewing machines are to be seen; in one I saw an organ and the girls taking lessons.

Those who have worked hard on the River Reserve have good crops and will have at least fifty tons of hay to dispose of, besides grain, to thresh which they have just purchased a machine. On the 4th August a fire broke out in the Wesleyan Church school and dwelling-house (which was unoccupied at the time); the buildings were entirely destroyed, and but for the assistance of the neighbours the fine house belonging to the Chief, Louis Good, would also have been burned. Since then the village has been set on fire in three different places, and there can be no doubt that in each case it has been the work of an incendiary, but up to the present time the guilty party has not been discovered.

Under the auspices of the English Church, and with assistance from the Government, a school is now nearly completed; and it remains to be seen if they will have more success in securing a regular attendance than their predecessors have.

The few Indians at the Qualicum River continue to improve their reserve and have quite a number of fruit trees looking well. Their stock of cattle also is on the increase, but at present their only communication with the outside world is by boat and canoe and very often it is impossible for them to go out to the weekly coasting steamer.

The Como Bands have made no improvements; they own no cattle, and cultivate very little land. Two years ago they seemed to be making a start in improving and clearing their allotments, ordering fruit trees, etc., but when there in May last half finished fences seemed to be the rule. They live chiefly by hunting and fishing, the young men occasionally working on farms and steamboats, but their relationship and proximity to the Euclataws (who are the most depraved on the coast) make it very difficult for them to improve.

With the exception of the last named bands the morality of the Indians of this agency is good, and were it not for the liquor traffic the name of an Indian would scarcely ever appear in the police court records.

There are some few Indians who have never tasted an intoxicant; some who never take it unless pressed to do so by their friends; some who will have a bottle in their possession for weeks, never taking to excess; others again who constantly crave after it; but in nine cases out of ten I am inclined to think that this is because "stolen fruit is sweet." In the towns, with their cosmopolitan inhabitants, Indians wishing liquor can obtain all they can pay for, and the fines daily imposed on them, and on the purveyors of the intoxicant form no small item in the Provincial and Municipal revenues. In almost every village on the coast there are some halfbreeds deserted by their fathers, and the law allows these to take what liquor they wish. The result is of course that they are made a kind of middlemen to procure liquor; but, though there are occasional cases of drunkenness in the village, we never hear now of the drunken orgies which used so often

to occur. It is a problem often discussed by men who take an interest in Indians, and who have been on the Pacific coast, whether it would not be better to place white men and Indians on the same footing in respect to liquor, punishing more severely drunkenness.

At the Fraser Canneries the Indians have not earned as much as usual, and to make up for this, large numbers have gone to the hop-fields in Washington, but as many of these are proving an entire failure this season, the amount of ready money in the hands of the Indians will this year be very small.

I have the honour to be, Sir,

Your obedient Servant,

W. H. LOMAS,

Indian Agent.

WEST COAST AGENCY, VICTORIA, B.C., 11th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to forward my annual report and tabular statement, also list of Government property in my possession on the 30th of June.

I am sorry to be obliged to report that these tribes are steadily decreasing in numbers, the decrease in the last ten years being more than one-sixth of the whole population. The average number of children, in proportion to adults, is also considerably less in most tribes than formerly, when the Indians lived more at home; the Heshquiahts are the only exception, they do not travel so much as the other tribes, and have given up Indian doctoring and its accompanying superstitions.

The schooner catch, on the coast, of fur-seals was small this season, but the Tshaht Tribe particularly, and other Indians on Barclay Sound, did well sealing from shore, as the seals came close inland. Probably 1,500 skins secured in or near the mouth of this sound by Indians were taken to Victoria, and realized \$12 apiece. Some of the young men bought lumber with the money so earned, and are putting up frame buildings on the reserve at Alberni.

The Rev. Father Verbeke has built a new church, residence, and school-house at the summer village of the Oiahts, but, as elsewhere on this coast, it is very up-hill work trying to teach, as what the children learn in the winter months' or when they are at home, is forgotten by the time they return from the salmon fisheries and hop fields. Three boys from Heshquiaht are at the Industrial School at Kuper Island, and are making good progress.

The Rev. Father Brabant has just completed the erection of a pretty and commodious church at Heshquiaht. The young men of the tribe have now a row of twelve neat frame cottages on the frontage of the mission land. The Rev. Father hopes to build a school-house and hall shortly, where the Christian part of the tribe may hold meetings and the boys may play in bad weather. He proposes to have evening classes for the young people during the coming winter.

At the Claoquaht, Ahousaht, and Kyukaht Villages, the Indians are improving in the style and number of houses they are building. The Claoquaht Village at Opitsat is now entirely deserted, owing partly to the death of Chief Shewish, which happened last March. The gold medal given to him by the American Government some years back for saving the crew of a wrecked barque, was buried with him. The late Chief left no son; so his brother takes his place, and as he is a Christian it may be hoped that he will help both Church and school in his tribe. A resident priest is again at Kyukaht Mission, and the school will be opened as soon as the tribe returns to the village.

The death rate has been high for the present year. A severe form of influenza was prevalent in the spring, from which some old people and young children died. A canoe, with a family of five, was lost in a gale of wind crossing from the American side last spring; and a man was shot and killed at Port Gamble, W.T., by a white man, because

he refused his wife for purposes of prostitution. A canoe with two men was lost in Behring Sea, and one man committed suicide.

The closing of the Behring Sea to British sealing vessels will be a loss to the Indians in my agency. The tribe of Heshquiahts alone made \$9,000 by sealing in Behring Sea last year, and many of the young men depend on this as a means of support, neglecting dogfish oil and canoe making.

Some liquor is brought from Victoria to this coast by canoes, returning in the fall, a few bottles at a time; and at Pacheena, Port San Juan, where the Nitinats congregate at sealing time, a few Indians fetch liquor from Victoria for sale; but the west coast is fortunately free from any white whiskey traders. There was a little trouble at Claoquaht between Indians and whites, the result of liquor having been brought on one of the schooners this spring; but I went there at once and fined a man for giving liquor to Indians and for assault, and there has been no repetition of the offence. Gambling with cards is also an evil indulged in by some of these tribes, owing to a few Indians who make a business of it and sometimes gain several hundred dollars in the winter months. And I am told that gambling is carried on to a great extent at the Fraser River canneries. It is a difficult thing to stop, as the young men have little to engage their attention in the way of amusement, and nearly all seem fond of gambling, and when I have tried to stop it by imposing fines, they go away and hide in the bush to carry on their favourite game.

I have the honour to be, Sir,

Your obedient servant,

HARRY GUILLOD,

Agent.

KWAW-KEWLTH INDIAN AGENCY,

ALERT BAY, 27th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report with tabular statement and list of property under my charge on 30th June.

The health of the Indians has been generally good, but the influenza, so prevalent last year, still lingers among them, but with few fatal results.

I am glad to be able to report the good conduct of all the tribes in this agency during the last twelve months. There is a better feeling among the Indians and a desire for improvement. They still obtain small quantities of liquor, and will do so till a more stringent law is in force regarding the sale of intoxicants to Indians; but no disturbance has taken place even where they have managed to obtain it.

This year has not been a very prosperous one for the Indians, owing chiefly to the light catch of salmon at most of the canneries where they go for work. Here, at Alert Bay, where a good deal of employment is generally given, the salmon catch was almost a total failure. Numbers of them have gone to the hop fields, where they will, no doubt, earn large sums of money, of which a great deal is usually spent in liquor and some in merchandise, which is very cheap on the American side. The old people fare badly during this emigration to the hop fields, as they are left to take care of themselves.

A school was built last winter by the Rev. A. J. Hall, Church Missionary Society, at Gwayas-dumo, the winter village of the Tsa-waw-te-neuh Indians, Mr. A. W. Corker being in charge. During the winter I stayed a week with Mr. Corker while visiting the village. The attendance at the school was all that could be desired, as many as fifty children often attending in the morning, all seeming eager to learn. The discipline was very good, considering the short time the school has been in operation. Mr. Corker seems to have gained the confidence of the people, who send their children to school and come themselves on the Sunday to church. It is unfortunate that this tribe only remains about five months at their winter village. In the spring they, with the

Ta-nak-teuk Indians, go in a body to their summer villages at the head of Kingcomb and Knight Inlets, respectively, for the oolachan fishing, which is a source of considerable revenue to both these tribes—more so now than formerly, as few Indians fish themselves, but buy from these tribes all the oolachan oil they need. Mr. Corker has followed the tribe this year to Kingcomb Inlet, but having no school house there, he is labouring under great difficulties. The reserve for the industrial school at Alert Bay has been, I am glad to say, satisfactorily settled, and the erection of the school is anxiously looked forward to. One young man has already built a very good house, and another is clearing the ground to build, and I am in hopes more will soon follow their example. It will be a great thing if some of the young men will break away from the old people and make a start for themselves.

The mission saw-mill still affords plenty of work for those who want it, but the young men do not sufficiently appreciate this endeavour for their welfare; they might earn large wages by getting logs, but only a few avail themselves of the opportunity.

The school at Alert Bay is not as well attended as it ought to be. The Nimkeesh Indians, who live here, have been absent at different times for more than five months during the past year, but even when at home, few children attend the school. In this respect they are behind nearly all the other tribes, who, when they get the opportunity, seem desirous that their children should learn.

Our Visiting Superintendent, Mr. Vowell, paid a visit to this agency during the latter part of June, and I accompanied him on his tour through the agency, travelling over three hundred miles during the first ten days by canoe. Unfortunately the weather was very wet during nearly the whole of our journey. The Indians seemed very pleased to see Mr. Vowell, and expressed a hope that it would not be long before he paid them another visit.

The census returns show considerable decrease, almost all, however, being old people, who died of influenza during the winter months.

I have the honour to be, Sir,

Your obedient servant,

R. H. PIDCOCK,

Indian Agent.

KAMLOOPS AND OKANAGON AGENCY,

KAMLOOPS, B.C., 18th August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—In accordance with the regulations of your Department I have the honour to submit, for your information and consideration, the following, my report on the affairs of the Indians belonging to this agency.

Since I sent in my last annual report there has been a slight increase in the usual death rate amongst the Indians of this agency, owing mainly to the effects of "la grippe." There is a decided improvement in the material condition of these Indians, they having enlarged their fields and added to their domestic properties and comforts.

The following is a detailed statement of their present condition:—

KAMLOOPS DIVISION.

NHLAKAPMUK TRIBE—SPUZZUM GROUP.

Spuzzum Band.

These Indians have taken to fruit culture; and some of their apple trees are beginning to bear. Most of their land is too rocky to be ploughed, but by irrigation they can raise fruit trees and root crops to great advantage. Those who have not taken regularly to gardening find constant employment as section hands on the Canadian Pacific Railway, and in cutting firewood for the Canadian Pacific Railway Company. They secure an

ample supply of salmon. Their Chief is old, and is in his dotage; his band is much exercised at his very eccentric behaviour, as he occasionally exhibits symptoms of insanity.

Kekalus Band.

Although these Indians have but a small area of arable land, they maintain themselves in fairly comfortable circumstances. They work for the Canadian Pacific Railway Company and are preparing their land for planting fruit trees.

Skuhuak Band.

This small band continues to progress favourably as far as its individual members are concerned. Only one family holds the small patch of arable land belonging to the reserve. The other members spend most of their time at Spuzzum and work for the Canadian Pacific Railway Company.

Chataway Band,

These people cultivate very little land, only one family residing permanently on the reserve. It is, however, during the salmon season, the resort of numbers of families from the Cold Water region of the Nicola.

BOSTON BAR GROUP.

Skuzzy Band.

The Skuzzy Indians secured an abundant supply of salmon, and provided well for themselves during the past year.

T-kua-yaum Band.

These Indians have added to the extent of their cultivated lands and are cultivating fruit trees successfully. Their live stock is increasing. The band is now divided; about half its members live on the Cold Water River at Kuin Saatin, where they have a grass reserve, the other members reside at Boston Bar and at North Bend Station where they work for the Canadian Pacific Railway Company. They keep themselves in good circumstances.

Kapatsitsan Band.

These Indians are gradually replacing their old log dwellings by comfortable frame cottages. They are improving in cleanliness and personal comforts, and provide themselves abundantly with good food.

M-pak-tam Band.

Only one family belonging to this band now resides permanently on the reserve. The others live at Sheyam and work for the Canadian Pacific Railway Company. They are well provided for.

BOOTHROYD GROUP.

Chomok Band.

These Indians have some small patches of gold diggings on the foreshore of their reserve, which, after the recessions of the annual freshets of the Fraser, appear to yield about the same return of gold yearly. They have a very small extent of flat land, but make the best of what they have. They were well provided with the means of subsistence during the past year.

Speyam Band.

The Canadian Pacific Railway passes through the Speyam Reserve. There are some good hydraulic diggings on the reserve, which, if skilfully worked, could be made to yield good returns. The Speyam Indians added to the extent of their gardens during the past year, but a very small area of their reserve is fit for cultivation. Two small streams flow through the reserve, along the bank of which fruit trees might be grown to

advantage. These Indians had ample supplies of food and clothing during the past year.

Kamus Band.

The Kamus Indians are badly provided with cultivable lands. I have arranged for some of them to take up plots of land of the Suuk Reserve, where there happens to be some land to spare. These Indians are industrious and energetic, and provided well for themselves during the past year.

Suuk Band.

This small band does not improve much. It is not, however, retrograding, and is well provided with the necessaries of life. Some vacant land belonging to this band is being occupied by members of the Kamus Band.

Nkatsam Band.

These Indians have extended their fields and are steadily improving. Some of their fruit trees are bearing, and besides the crops enumerated in the tabular statement they last year raised good crops of melons, cucumbers, tomatoes, currants and gooseberries. They washed out the usual quantity of gold and are well provided with the necessaries of life. One family will this year have apples for sale.

SKAPPA GROUP.

Skappa Band.

These Indians form a thriving little community on the Stickanny Reserve at the base of Jack-ass Mountain, where they are providing themselves successfully with the necessaries of life.

The reserve at Skappa proper is being settled by Lytton Indians.

Hlak-hlak-tan Band.

These Indians have added to the area of their fields. They are at present somewhat stinted in their water supply, and they contemplate the construction of a new ditch before the opening of next farming season. They took a large quantity of salmon last year and are well provided for.

Siska Band.

Most of these Indians earn their livelihood as common carriers and by working on the Canadian Pacific Railroad and on the Provincial Government waggon roads. They also wash successfully for gold. They provide well for themselves.

Halaha Band.

The remnant of this band is represented by one family, the patriarch of which is an industrious, enterprising Indian, who supports his family, keeping them well provided with the necessaries of life.

LYTTON GROUP.

Kittawat Band.

This small band has added a little to the area of its cultivated lands, and having provided themselves with a large stock of good salmon, these Indians had abundant means during the past year.

N-ky-a Band.

The N-ky-a Indians are steadily enlarging their fields. They had good crops last year, and are very successful in growing beans, for which they find a steady market at Lytton. They are well provided for.

Tl-kam-cheen Band.

These Indians are highly gratified at the assistance given them by the Department in supplying them with lumber for fluming the water of their irrigation ditches, and

thus affording them the opportunity of watering their fields at the Tako-zap benches. They have not as yet built the flume above mentioned, but will do so as soon as the dry season is over. They this year took advantage of the waste water which escapes from the Canadian Pacific Railroad Company's water tank at the Lytton station, and by judiciously leading this water over the reserve at Lytton they have surrounded their dwellings with neat gardens bearing vegetables of luxuriant growth. There was no falling off in their gold returns during the past year. They cut a large crop of hay at the Bitany Reserve. They laid in a large stock of salmon, partly sun-dried and partly salted. Of the latter they had thirty-three barrels. A large number of the young men found employment on the Canadian Pacific Railroad.

Spapian Band.

These Indians increased the area of their fields to a small extent. They have, however, nearly reached the limits of the land they can plough. They had some trouble with their Chief, who having absented himself from them for five years, during which time he led the life of a vagrant in the Similkameen and Nicola Valleys, returned last summer to his band and assumed possession of the best ground which his people had cleared and brought under tillage during his absence. I explained to the contending parties the sections of the Indian Act which refer to the lawful possession of reserve lands by Indians. They had fair crops, made the usual return of gold by mining, and secured a good winter's stock of salmon. They make the growing of beans a speciality.

N-kuakin Band.

The lands of the N-kuakin Reserve are poor, the cultivable portions being very limited in extent. Game is, however, abundant with them. They collected some gold by mining, and had an ample supply of salmon for their winter's consumption. Although by no means progressive, these Indians are happy and contented.

Stryne Band.

These Indians have brought in a large ditch and have added a little to the size of their ploughed land. They had good crops; fair returns of gold; a good catch of salmon; and plenty of employment on the Canadian Pacific Railroad. They are steadily improving in their circumstances.

N-kaih and Yeot Bands.

These two small bands have good crops; they collected some gold; they secured an ample supply of salmon; their fruit trees yielded a fair crop of good fruit.

N-kl-palm Band.

These Indians have not as yet repaired, in a proper manner, their irrigation ditch which broke away two years ago. Their crops suffered from want of water and were very deficient, excepting in the item of beans, of which they had fair returns. They caught a large number of salmon and were well supplied with food.

Nesykep Band.

This has been somewhat broken up owing to the death of two chiefs in two years. Thus being left without leaders, the band scattered for over a year, leaving only about one half of its members on the reserve. They are however again mustering at their old home and added a few acres to their cultivated lands. Their fields are productive; they have an ample supply of water; and they took a full supply of salmon. They take annually a large number of trout at the La Fontaine lakes, and keep themselves well provided with the means of subsistence.

NIKAOMIN GROUP.

Nikaomin Band.

The Nikaomin Indians have not materially altered their circumstances since my last report. An application was made to me for the right to mine for iron ore on the

Nikaomin Reserve, and I was in hopes that a mine would there be successfully worked and would afford constant employment to industrious young Indians at their homes. The mine has not proved a success. The young Indians are consequently obliged to take service at more distant places. These Indians collected about the usual return of gold ; they had good crops of potatoes, and had throughout the year sufficient means for their support.

Sh-ha-ha-nih Band.

These Indians are industrious and energetic and fast increasing the value of their reserve and of their moveable effects. They have extended the acreage of their fields. They took a large quantity of salmon and sold their surplus stock to good advantage. Their live stock is multiplying. They are in a prosperous condition.

SPENCE BRIDGE GROUP.

N-kamcheen Band.

This band is also doing well. They brought under cultivation a large plot of new land this spring, which will be accounted for in next year's report. They got the use of an abandoned ditch from Mr. John Murray, a trader residing at Spence Bridge. The crops on the new ground took well. They took out the usual quantity of gold from the foreshore along the Thompson's River, and largely increased their returns of hay. The Chief has a flock of twenty head of sheep, in good condition.

Piminos and Pakeist Band.

The lands which these Indians have on the bank of the Thompson's River are very difficult to improve ; the Indians are, however, making the best use they can of them. A reserve which was lately allotted to them by Mr. Reserve Commissioner O'Reilly at Rolintin in Highland valley has proved a great boon to them, as it has given them meadow lands, without which they could not winter their live stock.

OREGON JACK CREEK GROUP.

Paska Band.

The want of irrigating water prevents these Indians from extending their farming operations ; the supply of water in their neighborhood is very limited. Their live stock however thrives well, and they are able to sell of the yearly increase a number of sufficient value to furnish the means with which to buy all the food and clothing they require.

Nepa Band.

The Nepa Indians are still short of water. There has been delay in arranging for their water supply, owing to irregularities in the early water records of some of the settlers. These difficulties are likely to be satisfactorily adjusted, before the end of the present year.

BONAPARTE GROUP.

Stlahl Band.

These Indians are still restricted in their farming operations by the scarcity of water. As, however, the neighboring settlers are inclined to lend their assistance to bringing in a large supply of water on a comprehensive system, there appears a fair prospect of their being furnished with the water they so much require, at an early period. The Chief of this band is old and useless.

Tluh-taus Band.

This band is also hampered by the want of water. The same system which will furnish the Stlahl Indians, will also increase the present water supply of the Tluh-taus Indians. Notwithstanding the water difficulty they have increased their acreage under cultivation and maintain themselves by their industry in comparatively comfortable circumstances.

KAMLOOPS GROUP.

Skichistan Band.

These Indians did not increase their acreage under cultivation. Their crops were a little under the average owing to drought. They supplied themselves well with provisions and clothing, and have had nothing to complain of.

Kamloops Band.

The Kamloops Indians having a good market at their doors for all kinds of farm produce are steadily improving their lands and dwellings. Their water supply is deficient; but this may be doubled in volume by storing the water at the sources of supply and at convenient places along the water courses. The only Indian school in this agency is established on the Kamloops Reserve. The pupils, twenty-four in number, are making good progress. The school is a boarding school of the industrial class. Its establishment is a convincing proof of the good-will of the white people towards the Indians, and has had a good effect on the minds of the Indians of this agency. The Kamloops Indians provide well for themselves there being only one case of real destitution on the reserve, that of an Okanagon woman who spent the best part of her lifetime under the protection of a whiteman, who is now dead. She is blind and cannot do any work.

There has been a large expenditure for medicines and medical attendance, which I have entered under the heading of the Kamloops Band. Much of this expenditure is, however, on account of Indians from various distant bands who come here when ill to be attended to, and to be cured of their ailments.

Chuk-chu-kuak Band.

This band continues to support its members on the products of the chase; and until the wild animals be destroyed they are not likely to take steadily to farming. They are peaceable, well provided for, happy and contented.

SHUSWAP GROUP.

Halaut Band.

These Indians have nothing of which to complain. They are improving their houses and fields. They must add to their water supply before they can extend their farming operations. They are clearing their lands at the Salmon Arm for the purpose of growing more hay.

Halt-kam Band.

The Halt-kam Indians have extended their acreage under cultivation and have increased the number of their livestock. They are clearing their lands at the Salmon Arm in order to enlarge their hay grounds.

Kuaut Band.

These Indians are not so advanced as their neighbours at Halaut and Halt-kam. They are, however, progressing favourably. They cleaned and seeded four acres of ground, took a large supply of salmon, and were well provided with food and clothing.

OKANAGON DIVISION.

SIMILKAMEEN GROUP.

Chu-chu-way-ha Band.

These Indians wintered their live stock well. They had fair average crops for that locality: most of their land is too sandy to be productive. Game is, however, plentiful. They make enough money in the carrying trade, during the summer, to provide themselves with an ample winter's stock of flour and other groceries.

Kcremeus Band.

These Indians are well provided with live stock, which wintered well. They do not farm much. Their land is highly impregnated with alkaline compounds, which, in dry

weather, cake on the surface of the ground and check the growth of cultivated plants. These salts may be eliminated from the soil by systematic rotations of certain root crops; but the Indian will not undertake a new plan on advice only; he must see the work successfully performed before he will believe in its efficiency.

Shennoskuankin Band.

These Indians failed to produce sufficient winter forage for their live stock, and lost some of their horses in consequence. They do not attend so well to their farms as they should. They waste much of their time in visiting their friends of the American side and in receiving their visits; and as is usual with people who over-indulge in hospitality, the Chief is the poorest man in the community. They have means enough to live without want.

OKANAGON GROUP.

N-kam-ip Band.

These Indians continue to decrease in number. They have plenty of means, and appear happy and contented.

N-kam-ap-lix Band.

These Indians had large crops of grain, hay and roots, the surplus of which they sold to good advantage. They have as many live stock as their reserve can feed until it be fenced in. They are at present too much divided in sentiment on questions of precedence, and this division prevents them from uniting and organizing to work out a system of fencing and of making other requisite improvements within their reserve. They are energetic and industrious, each for himself, and have made striking advances since their reserve was allotted to them.

Penticton Band.

The Penticton Indians continue to progress favourably. Their Chief was very ill last spring. He was treated by Doctor John Chipp and is recovering his health. Many of these Indians' horses have become wild. Their fruit trees are thriving. A steamer now plies regularly on Okanagan Lake, giving them cheap means for carrying their surplus products to market.

Spahamin Band.

These Indians are enclosing their lands, and have built over six miles of fencing. They have comparatively little land adapted for tillage. Their live stock thrives well; and they have a good market for their surplus animals. The young men earn good wages as herders.

NICOLA GROUP.

Kuinsaatan Band.

These Indians had good crops, and they are arranging to extend their fields. Their live stock passed through the winter without loss. They secured a sufficient stock of salmon for their winter provision at Boston Bar, and sold their wheat at good prices.

Kwiskanahb Band.

The crops belonging to these Indians were very indifferent, having suffered from want of water. When their arrangements for getting water out of the Nicola prove successful, they will be in a position for farming on a large scale. They secured their winter's provision of salmon at Skappa.

Naaik Band.

The Indians of this band had good crops. They wintered their live stock successfully. They had a good carrying trade. Their religious animosities are cooling down, and they appear to be in a fair way towards increased prosperity. The Nicola valley

coal measures appear to extend under the Naaik Reserve, and two applications have been made for licenses to search for coal therein.

Nziskat Band.

This band is much reduced in number and is not making much forward progress. Two applications have been made for the right to search for and mine coal on this reserve.

Zoht Band.

This band made fair progress. Their crops were good, and the Indians appear to be comfortable and contented.

Spellamcheen Band.

These Indians are Sushwaps, the remnants of a band that were driven northward from the Mission Valley by the Okanagon Indians. They continue to extend and improve their fields. They had good crops of wheat, oats and roots, the surplus of which they sold for good prices. They have increased the number of their agricultural implements. They have improved the interiors of their dwellings, and are learning to enjoy privacy and comfort at home.

I have the honour to be, Sir,

Your obedient servant,

J. W. MACKAY,

Indian Agent.

FORT STEELE, KOOTENAY, B.C., 28th July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward you the tabular statement for the past year, showing census and other statistics of the several bands of Indians occupying the reserves of the Upper and Lower Kootenay Valleys.

The year 1890 was by no means a pleasant one, the uneasiness amongst the Indians south of the international boundary communicating itself to the young men amongst these Indians. Fortunately the prompt action of the United States civil authorities (aided by a force of volunteers and a small body of regular troops) in arresting the American Indian Chief Eneas, and a large number of the Indians south of the boundary, and the execution of four of their number, had a very quieting effect on both sides of the line. Since that time there has been little to complain of in the behaviour of the Indians on either side.

The construction of the Great Northern Railway, and the influx of a large white population south of our border, will stop these almost annual Indian alarms and excitements at the Flathead, which had such a bad and disquieting effect upon our own Indians.

During the winter and spring of the present year much distress occurred amongst a large number of the Indians, not only at the mission, but amongst those belonging to the Columbia Lakes and at the Tobacco Plains, owing to the prevalence of influenza and a long period of distressing illness.

I have had the Indian cabins at the Mission whitewashed inside and out and disinfected. At this moment the general health of the tribe is good, though still some lingering illness remains in a few of the families.

The crops of the past year were more than usually good at the Columbia Lakes and the Tobacco Plains. The St. Mary's Band had but little seed grain, and consequently a smaller area under cultivation. The summer frost and the unfavourable weather this spring have also much injured the present year's crop.

In August last Sister Pacifique and three Sisters as assistants arrived to take charge of the Indian Industrial School. The school was opened by them in October. The Indians are very anxious to have their children taught reading and writing. It was necessary for the Missionary, Father Cocola, to refuse many children, as

under the present arrangement provision has been made for only a limited number. The school buildings are large enough to accommodate twice the present number of children.

It is impossible to speak too highly of the kindness and care the Sister Superior and her assistants take of the Indian children under their charge. The improvement, both in the appearance and manners of the children, has been very great. They have already made some progress in reading, writing and spelling; fully as much as could be expected, considering that they were quite ignorant of the English language at the opening of the school. The school did not escape the influenza this spring; it appeared everywhere throughout this section of the country.

An effort was made this spring to encourage the Lower Kootenay Indians in planting a crop. The swampy nature of their reserve, which, like nearly all the valley land in the Lower Kootenay country, is subject to an overflow from the Kootenay River, makes it impossible at present to cultivate more than a small acreage.

I have the honour to be, Sir,

Your obedient servant,

MICHAEL PHILLIPPS,

Indian Agent.

WILLIAMS LAKE AGENCY, B.C.,

LESSER DOG, CREEK, 31st August, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit for your information the following report of the various bands in this agency, together with tabular statement and list of Government property in my charge on the 30th of June, 1891.

Quesnelle Band

numbers fifty-six, the births and deaths since last report being equal. These Indians are the most worthless in the agency. There is plenty of good land on the reserve; but, as it is situate three miles from the village, they are too indolent to cultivate it. The Town of Quesnell is distant three miles from the village, and they seem to make a living by wandering about the Chinese quarter and begging for food. This reserve unfortunately has four half-breeds belonging to it; and, as these are allowed by law to purchase whiskey, it stands to reason that some is conveyed to the village and given to the rest of the band, thereby giving a taste for intoxicants. This reserve was visited by me twice since last year.

Alexandria Band

numbers fifty-one, being a decrease of four since last report. This band has never adopted the village mode of life. Their houses are scattered according to where their patches of land are situated, and each family is quite independent of all tribal rules or interference of chiefs. The Chief himself is always absent, trapping or hunting, and cares as little for his subjects as they do for him. They are all industrious, and are always working, either as farm hands for the whites or at trapping and hunting. They also cultivated fifty-five acres of grain and roots. Unfortunately they have all a liking for intoxicating liquor, and, by means of half-breeds living on the reserve, are able to obtain all they want. I visited this reserve twice during the year.

Soda Creek Band

numbers sixty-six, being the same number as last report. This band continues to preserve its name for industry and good behaviour. They are much pleased that their reserve is to be surveyed this summer. A new church has been built this year, and the scattering houses are to be pulled down and rebuilt in one street. I paid two visits to this reserve since last report.

Williams Lake Band

numbers one hundred and thirty-seven, being a decrease of two since last report. An Industrial Indian School is to be opened immediately at the Roman Catholic Mission three miles from this reserve. This band has a good reserve, both as regards agricultural and hay land; and they are able to maintain themselves well. The young men get plenty of work at good wages from the farmers around. I visited this reserve twice during the year.

Alkali Lake Band

numbers one hundred and fifty-four, a decrease of twelve since last report. These Indians are by no means industrious and often refuse to work on the farms when asked. Their delight is to ride about on horseback, and they are always ready to work at driving cattle or horses when they would refuse other work even at higher wages.

Dog Creek Band

numbers ten, no increase or decrease. This small band is amply provided with agricultural and hay land.

Canoe Creek Band

numbers one hundred and thirty-nine, a decrease of five since last year. This band is fairly industrious, and they work the most of the small extent of agricultural land which belongs to the reserve. The young men obtain employment occasionally as cattle herders. They are all good hunters and by that means chiefly make a living.

High Bar Band

numbers thirty-nine, a decrease of two since last year. There is very little water for irrigation on this reserve, and consequently not much land is cultivated. They have not finished their church yet. They are fairly industrious, and it is a pity that the large tract of good land which belongs to the reserve has not more water for irrigation. I visited this reserve twice since my last report.

Clinton Band

numbers thirty-seven, being the same number as last year. The village and part of this reserve adjoins the town of Clinton; and it is surprising how well these Indians behave themselves. It is seldom any of them are seen in the street, and hardly ever any of them get drunk.

Pavillon Band

numbers fifty-eight, a decrease of two since last report. This reserve has plenty of good agricultural land for the wants of the Indians. They are good workers; and many of them are hired out on the farms of the whites during ploughing and harvest.

Fountain Band

numbers two hundred and four, a decrease of seven since last year. At the request of the band, the Indian Department furnished the lumber and nails necessary to flume a mining ditch which passes through the village, and the leakage from which rendered many of the houses unhealthy from dampness. The lumber used was three thousand four hundred feet, and twenty-five pounds of nails. This band is industrious and well-behaved; but the scarcity of water for their crops is a drawback to their being well off.

Lillooet Band

numbers ninety-three, a decrease of three since last year. The land of this reserve is of the poorest quality, and the supply of water very small; but these Indians leave no means untried by which to make a living. The village is close to the town of Lillooet and as there are several Half-breeds on the reserve, there is occasionally some drunkenness amongst the Indians. Very few, however, escape being taken and punished, through the vigilance of the chief.

Bridge River Band

numbers eighty-four, a decrease of two since last report. This reserve extends up Bridge River for a distance of thirteen miles on both sides. The agricultural land is in patches of two or three acres each all along the reserve. The rest of the reserve is all placer mining ground, which has been worked only in spots, and which the Indians will some day be able to surrender for mining purposes for valuable consideration. These Indians do a great deal of mining with pan and rocker, but they seem to have no ambition to undertake heavy work where sluicing is necessary. They are blessed with having no Half-breeds on their reserve.

Cayoosh Band

numbers thirty-five, a decrease of one since last year. This reserve has a plentiful supply of water for the lower part of the land, but little for the rest. Although the soil is almost pure sand, yet, with abundance of water, fairly good crops are raised. There are no young men in this band, infants and elderly people forming the male population. They mine a great deal along the banks of the Fraser, and make about from 25 cents to \$1 a day.

Pacelqua Band.

numbers forty, the same as last report. Having been allowed the use of a small stream of water—belonging to a neighbouring farm—this reserve was enabled to raise a fairly good crop on its small patch of agricultural land. These Indians maintain themselves chiefly by mining along the Fraser River.

Chuack Band

numbers nine, the same as last year. They are provided with plenty of good land and with sufficient water.

Mission Band,

situate on Seton Lake, numbers sixty, an increase of three since last year. No crop was put in at this reserve. These Indians leave their reserve during the summer, and try to make a living as best they can. Were it not for the large Mission Church here, this reserve would have been abandoned many years ago. This is where the Lillooet Bands assemble for religious instruction under the Roman Catholic Missionaries twice a year, during a week or ten days each time. I reported last year on the poverty of the land of this reserve.

Elias Band,

situate four miles from the last reserve, and also on the lake shore, numbers nine, the same as last year. Chief Eneas and his family are the only permanent residents of this reserve. They have land and water enough to raise vegetables for their support.

Schloss Band,

situate at the head of Seton lake, numbers twenty-nine, a decrease of five since last year. The land here is good, and there is plenty of water for irrigation. There are many very old people on this reserve who are not able to work, and the chief supports them from what he raises.

Necuit Band,

situate only two miles from the last reserve, numbers forty-five, a decrease of seven since last year. The land here is almost worthless and the water supply small.

The Chief of Schloss, two miles distant, has often proposed that this band should join his and form one village, as he says that there is enough land for both of them, if some work were done in clearing off bush. But the Indian love of birthplace is too strong, and I really believe they would rather starve than leave the home of their ancestors.

Nequatqua Band

is situated at the head of Anderson Lake, and numbers sixty, a decrease of two since last year. The land here is good, and potatoes, corn and other vegetables of excellent quality are raised in abundance. Some of this band proceed every summer to New Westminster to work in the salmon canneries, and earn enough to keep themselves and families in comfort during the winter. Mountain goats are plentiful in this neighbourhood, and at certain seasons form the chief food of these Indians.

Kunim Lake Band

numbers forty-five, a decrease of one since last year's report. The Chief of this band died during the summer, much to the regret of his tribe. These Indians have an excellent reserve, both as regards agricultural and hay lands. It is, however, subject to summer frosts, and some years their wheat is badly frozen. They are great trappers and hunters, and the value of their yearly catch of furs is considerable. The reserve is situate fifteen miles from the waggon-road, and consequently whiskey is not introduced there.

Toosey Band, Chilcotin,

numbers fifty-five, a decrease of four during the past year. They own three good waggons, two mowing machines and two horse rakes, together with good harness; also a threshing machine which cost \$600, but which, I am sorry to say, is a disgrace to the firm which made it. Each of these articles is the property of one Indian, not of several combined. These Chilcotins are quite different from the other bands in the agency in this respect, viz., that they invest their money in useful articles, instead of in articles of show. This reserve will be surveyed immediately, much to the satisfaction of the band, as it is just four years since it was laid out by the Reserve Commissioner.

Anahem Band—Chilcotin.

This band is situate fifty miles west from the last, and numbers one hundred and eighty-eight—the same as last year. These Indians do not trap as much as formerly. They devote most of their time to cultivating and improving their land. There is a good flour mill within ten miles of the reserve, which is able to grind during the winter as well as the summer, a great convenience, as the winter is the season when every one has more spare time for hauling his wheat to mill. This band owns five waggons with good harness, and will soon purchase mowers and rakes. When it is remembered that ten years ago this band was little better than wild, living in the mountains, in detached bands, during all the year, it may be said with truth that they are progressing rapidly towards civilization.

Stone Band—Chilcotin,

is situated ten miles from the last, but on the other side of the Chilcotin river, and numbers one hundred, the same as in last year's report. This band has good land on their reserve, and their fencing and cultivation are a credit to them. They have a good Chief, who by his example induces them to work. This reserve, as well as the last, will be surveyed this summer. There being no seed potatoes for this spring's planting, Indian Superintendent, Mr. A. W. Vowell, kindly authorised the purchase of two thousand pounds, for which the band was most thankful.

The total decrease by death in all the bands in this agency has been fifty-six, since last report. In nearly all cases, except those of old age, of adults, the cause of death has been consumption. With Indians this disease carries them off in a few months after it has developed. There is no doubt that the Indians were far more healthy when they did not live in houses; and I attribute the cause of pulmonary affections to the excessive heat of their houses in winter, and the sudden chill caught when going outside. In cases of broken limbs and fractures, an Indian will recover sooner than a white man, though often crippled for life by the bad setting of the limb; but when the former once takes to his bed from serious internal illness, the chances are that he will never recover.

They seem in such cases to wish to die, and their friends never try to encourage them to have heart to battle with the disease.

A great injury has been done to the Indians in some reserves by the large credits allowed to them by the store-keepers in the vicinity. I have known Indians to owe from one to two hundred dollars each to one store—not for necessaries but for luxuries such as many a white settler would think too extravagant to indulge in. As an example: I was present in a store when an Indian—already fifty dollars in debt to the same store—bought, on credit, the following bill of goods, viz.: Syrup, sugar, tea, coffee, rice, peaches (dried), lard and candy. As long as an Indian, and in many cases a white man, can get credit, he will not be much inclined to work, and even were he so inclined, how could he ever save enough to pay even fifty dollars? But a worse feature is that they get accustomed to such luxuries and are ever hankering after them. I know two store-keepers who used to have each about \$3,000 of Indian debts on their books, and, I have no doubt, they have not very much less to-day. Had all the luxuries been required to be paid for in cash, the Indian would not have acquired the taste for them as he now has. But, although during his life the Indian does not trouble himself about his debts, yet when he dies his wife or children immediately find out what amount, and to whom he was owing, and they sacrifice even their last horse to pay the debts. It is probable that the Missionaries have taught them that the soul must be in a solvent state both temporal as well as spiritual, in order to obtain admittance at the gates of St. Peter.

The salmon run has been fairly good this summer and consequently there will be no want during the coming winter.

There has been no crime of a serious nature in this agency the past year, and the general conduct of the Indians has been good.

I have the honour to be, Sir,

Your obedient servant,

WM. LAING MEASON, *Indian Agent.*

BABINE AGENCY, HAZELTON, B.C., 30th June, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit the following report on Indian affairs, together with tabular statement and list of Government property in my charge on 30th June, 1891.

THE KIT-KHSUNS.

Kit-wau-ragh Band

numbers one hundred and forty-one. There are forty-two houses and some under construction. There is an Anglican church, Missionary Society's church and the building of a school under contemplation. The people find employment in the canneries of the coast, do some boating, chopping cord wood and trapping. There are about seventeen acres of land under cultivation and about eleven cleared.

Kit-wau-cool Band

numbers sixty-five. There are twenty-three houses. This band, with the exception of a few of the oldest people, generally abandon the village during the salmon canning season to find employment at the different canneries of the coast. During the winter they hunt and trap.

Kitse-gukla Band

numbers eighty-three. There are twenty-two houses, seven of which belong to New Kitse-gukla. This village contains those following the Methodist doctrine. The surrounding land is especially adapted for cultivation. The people as a whole follow various occupations during the summer; hunt and trap in winter.

Got-au-max Band (Hazelton)

numbers two hundred and thirty-seven. This population is swelled by the conflux of members of other bands, who, through the inducements of the facilities in finding employment, settled. This band proper counts only sixty-three. There are sixty-two houses, of which three are frame and were built since last year. Hazelton is the head centre of all communication and trade. Indians of the remotest parts of this agency are to be met there. The Indians here have twenty-eight acres of land under cultivation and about fourteen under clearing. They follow packing into the interior, boating, mining, sawing lumber, getting out cord wood, and some are employed in the canneries of the coast during the season.

Kits-pious Band

numbers two hundred and thirty-five. There are thirty-four houses. This band depends mostly on fishing, hunting and trapping. They cultivated nineteen acres of land and are breaking up some more.

Kits-go-gaas Band

numbers two hundred and ninety-five. There are thirty-eight houses. This band depends mostly on fishing, hunting and trapping. They cultivated eleven acres of land and are clearing more.

Gal-Doe Band

numbers thirty-six. There are seven houses. This band fishes hunts and traps. They cultivated three acres of land, breaking up some more. The population is given upon careful count, showing an increase.

All the bands of Kit-khsuns have improved their condition since last year. They are of progressive tendencies and anxious to learn. For the first time they abstained from tearing and eating live dogs during the festivities of last winter. There has been an abundance of salmon this year. The potato and wild berry crop gave a plentiful yield. The winter was mild. The Indians enjoyed excellent health. Their conduct was admirable.

The Hoquel-gots.

The habitations and hunting grounds of these Indians range about the lakes of the interior. They as a whole belong to the Roman Catholic faith. They entirely depend on hunting and trapping and fishing for subsistence.

The Indians of Fraser's and Stuart's Lakes, Stony Creek and Fort George own horses and cattle, but the numbers of these are not easily ascertained.

The enumeration of the Hoquel-gots of the interior is given according to the best information and approximately correct.

The general health of the Indians was excellent; their conduct very good.

I have the honour to be, Sir,

Your obedient servant,

R. C. LORING,

Indian Agent.

INDUSTRIAL SCHOOL,

KAMLOOPS, B. C., July 27, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my annual report of the Kamloops Industrial School, for the fiscal year ended June 30, 1891, with an inventory of Government property in my care.

The attendance for the year has been twenty-four pupils, eleven girls and thirteen boys, with a few omissions from illness or absence at home, caused by deaths in the families of pupils. Such occasions of grief are honored, having all children at home. The fact that this school is located on Kamloops Reserve and along the highway to Shuswap Reserve, with frequent visits to the pupils by relatives, has caused considerable uneasiness to the girls and boys and inconvenience to the officers in charge. Experience proves that pupils coming from localities away from towns or fronting upon the railway, are much easier managed than those who are familiar with scenes in white settlements. Hence preference to get pupils from rural districts, not likely to be often heard from; such are more settled in their habits and more apt to profit by instruction.

The female pupils reported heretofore have continued during the year, except short absence, and a week at home by Shuswap girls. Two of the Shuswap boys, Martial and Daniel, brothers, ran away and after a time were brought back by parents; same boys left again and no effort was made to have them return. In their places are Allan and John McLean, aged 12 and 9 years, Nicola tribe, father Halfbreed and mother native, both dead. June 18, Louis and Francis ran away, having acted as jockies at races they became excited as Dominion Day races approached. They are still absent from the school. The former is nephew to Chief Louis, who said he would send after the boy.

The Sisters in charge of females at last report finding that a clergyman could not attend as often as the rules of their Order required gave notice of withdrawal. Accordingly they left the school the last week in February, and Mrs. Mary Ann Richardson, of Lytton, was secured (having formerly been an applicant) for the position of matron, and her daughter, Nellie Richardson, engaged as cook. The female pupils now attend the same classes with the male pupils, under the teacher, Mr. McMillan. The arrangement is satisfactory, being to the advantage of both the female and male pupils, and necessitating less help than before the change.

The working hours, half time, of the female pupils are turned to the best account in household work, sewing, knitting, etc., and the conscientious discharge of duty by the matron is noticeable in the improvement of those under her instructions, and their general appearance in dress.

The outdoor work by the male pupils has been attended to by the Principal, and the amount of useful improvements during the year attracts attention. There are in use five acres fenced for gardening, twenty-five acres for pasture under fence, and underbrush cut away leaving twelve acres ready for meadow, to be fenced as soon as convenient. Other improvements have also been made during the year, such as a lumber fence around girls' building, temporary stable, outbuildings, etc. Considerable garden work has been done, but expectations not realized, owing to, perhaps, inferior seed, want of irrigation and too much alkali in the ground. However, a quantity of vegetables were raised for use of the school, which, with the liberal supply of milk enjoyed, prove very acceptable to officers and pupils. This being the first year for gardening, better results may be looked for another season.

The greater part of the wood used for the past year was procured by the Principal and boys, cut at the timber limits of the school property, and made ready for stoves when drawn to the buildings.

During the week of the mission at the Reserve near the school, Bishop Durien visited the school twice and expressed his pleasure at what he witnessed.

Mr. Mackay, Indian Agent, has made frequent visits of inspection since last report and rendered important service to the school. Numerous visitors have called from time to time and spoken in friendly terms of what came under their notice, not unfrequently giving high praise for the liberality of the Government for the good work of the Industrial School.

I have the honour to be, Sir,

Your obedient Servant,

MICHAEL HAGAN,

Principal.

KUPER ISLAND INDUSTRIAL SCHOOL,

CHEMAINUS, B. C., 21st July, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit for your consideration my first report on the work of this institution, with an inventory of Government property in my charge on 30th June, 1891.

On the 11th July, 1890, the day on which Mr. Inspector J. Ansdell Macrae installed me as Principal, there were 13 boys at the school. Considerable dissatisfaction concerning the school seemed to exist amongst the pupils as well as amongst the Indians in general. It is difficult to say whether their uneasiness was grounded on any real cause, but due allowance must, of course, be made for the many difficulties incidental to the organization of an institution of this kind amongst various tribes of Indians unaccustomed to school life and discipline.

In order to overcome some of the difficulties I thought it advisable to combine pleasure with duty, and to make the school a happy and pleasant home for the children. For that reason I purchased an organ, procured a fine set of brass instruments and organized a band. Gradually the number of complaints diminished, the Indians, seeing their children contented, began to gain confidence in the school, and as a natural result became anxious to take advantage of the opportunities offered for the education of their children.

In the month of November, as soon as the Indians had returned from the hop fields the number of pupils increased to 25, and had we not been limited to that number we might have got many more pupils.

The health of the children was very good until the beginning of the summer, when the epidemic commonly called "la grippe" made its appearance at the school. Thirteen children suffered from that disease; happily all have recovered under the careful treatment of the matron, Sister Mary Joachim.

The children have made considerable progress at school and there is already a marked improvement in their deportment and general appearance, especially when they don their uniform. The rapid knowledge of vocal and instrumental music which they acquired in such a short period has elicited many favourable comments from our white neighbors. There are 16 boys in our brass band, and every one displays a deep interest in it and seems to have a natural talent for that kind of music.

Our greatest difficulty at present consists in making the children speak English. Although they understand a good deal of it, they are always inclined to speak the Indian dialect amongst themselves.

For want of shops no attempt has yet been made to teach particular trades. The outside work was confined to cutting down the bush around the premises, building fences, levelling the ground, and making a reservoir for the water supplied to the hydraulic ram. Of the 30 acres of land connected with the school, there are now two used for a vegetable garden and three for pasture. Besides the work on the land, the pupils have also helped the foreman in building a barn, a chicken-home, a pigsty and boathouse.

Several applications for admission have been made by female pupils, but, as we were not fully prepared to receive them, their admission had to be postponed for a few weeks.

I have the honour to be, sir

Your obedient servant,

G. DONCKELE,

Principal.

INDUSTRIAL SCHOOL, KOOTENAY, 11th July, 1891.

The Superintendent of Indian Affairs,
Victoria.

SIR,—I have the honour to submit the following report on the industrial school opened here in the beginning of October last, under the charge of four Sisters of Charity.

It is a matter of gratification to state that the twenty-seven Indian pupils, twelve boys and fifteen girls, have given full satisfaction to those in charge of them, as much by their good conduct as by their application in learning whatever has been taught them.

The girls have been taught housework, cooking, baking, washing, ironing, sewing, mending clothes, dairy work and gardening. Five of the largest girls have become able to bake good bread, also to cook ordinary victuals. Their progress in sewing is no less worthy of mention. Three of them, apart from the cutting out, can make their clothes well, whilst the others are trying to improve in that branch of education. The boys have been taught sawing and splitting firewood, clearing land, gardening, and housework in their own apartments. Their attempts in gardening give them credit. They have been taught neither trade nor farming work, for want of tools and farming implements. The latter can be rented here only at a very high price, expense which the income of the school does not permit us to sustain.

Their progress in the study of the English language is also very satisfactory. They are happy and contented at school; not one wishes to leave. The parents, who at the opening of the school were on the eve of breaking out into war with the whites, objected to send their children at first, but seem now highly pleased, and come and offer their children, more than we are allowed by the Government at present to take.

The "grippe" has severely affected several pupils, although the best care has been taken by the Sisters to avoid all fatal results; still one boy became a victim of it.

The cleanliness of the school would be greatly promoted by having the interior of the houses painted and having boardwalks between the different buildings.

The children should have such games as gymnastics. The laundry lately built is suitable, but it has not been furnished, except with a stove and caldron.

On account of the difficulty of transportation, all goods and provisions are valued very high when reaching this place, thus the Government allowance for the schools, after trial made, is found inadequate to pay the expenses, as the following account of three quarters will plainly prove:—

Food.....	\$1,632 80
Clothing.....	775 00
House furniture, for which Indian Department could not provide at the time.....	188 35
Foreman's wages.....	375 00
Light, school books, &c., &c.....	217 50
Travelling expenses.....	125 00

I have the honour to be, Sir,

Your obedient servant,

N. COCCOLA, O. M. I.,

Principal.

STOBART, SASKATCHEWAN, 11th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my report for the year ended 30th June last.

A report has already been submitted to the 4th of November last, covering my last season's work.

During November and the early part of December I remained at headquarters preparing accounts and report of the summer's work, and at general draughting.

In December I made a trip to the Prince Albert district with the object of selecting a suitable reserve for the Lac la Ronge band of Indians and also a small reserve for the Sioux refugees living about the town of Prince Albert. Certain lands were recommended as suitable for these bands and a report submitted.

On my return to Regina I resumed office work, preparing my returns of plans and field notes for the summer of 1890.

I left Regina 7th January, 1891, for Morley, where I inspected the industrial school there, nearing completion, and after a consultation with the Rev. John McDougall with reference to the proposed industrial school at the Red Deer River Crossing, I proceeded by stage to that point. On my arrival at the Red Deer Crossing I proceeded to establish the boundaries of the land selected for the school, located hay lands, let contract for digging the well and inspected the sandstone found on the school site, with a view of its being utilized in the building, a report on which was submitted.

I reached Calgary on my return the 26th January.

At Calgary I received instructions to proceed to Blackfoot Crossing and investigate the alleged trespass on the coal seams of the reserve, a report on which was submitted.

From Blackfoot Crossing I returned to Calgary with the object of ascertaining the cost of quarrying sandstone at Red Deer Crossing, and after interviewing contractors returned to Regina on the 1st February.

From 2nd February to 7th April I was engaged in the preparation of plans and field notes of the various surveys made during the summer of 1890, and other general draughting as occasions required.

On the 8th April I accompanied the Commissioner to Calgary and the Peace Hills agency, stopping *en route* to inspect work done in connection with the Red Deer school.

Remaining at the Peace Hills agency, I was engaged for the remainder of the month and the early part of May sub-dividing Sampson's and Ermine Skin's reserves.

Receiving instructions desiring my return to headquarters, the Department requiring my plans of surveys made in Treaty No. 3 during the summer of 1890, I made arrangements for my assistant to complete some mounding remaining to be done, and proceeded at once to Regina.

I may mention my intention of having sub-divided a much larger area than was done, had not circumstances required my recall to Regina, however, more than sufficient for present purposes has been completed.

From 11th May to 12th June I was engaged in the completion of plans and field notes of reserves in Treaty No. 3.

From 12th to 21st June, preparing various accounts, reports and general draughting occupied my attention.

Having applied for and obtained leave of absence from the 21st June, nothing further occurred to report on until the fiscal year expired.

Respectfully submitted.

I have the honour to be, Sir,

Your obedient servant,

A. W. PONTON,

Indian Reserve Surveyor.

MOSOOMIN, N. W. T., 26th September, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to present for your information, my thirteenth Annual Report of my inspection of the Indian Agencies and Reserves in the North-Western Territories of Canada.

Starting from the point at which I left off last year ; I arrived on 17th November at the

Moose Mountain Agency—White Bear Reserve No. 70.

These people are of the Salteaux Tribe, and the full strength of the Band is one hundred and eighteen souls, of whom about ninety-three are at present on the Reserve, the remainder are reported to be in the vicinity of Turtle Mountain, U.S., and they return here from time to time.

Their total acreage in crop this year was about fifty acres, forty-five being in wheat, the remainder in potatoes and turnips. The wheat is not as yet threshed. I examined the stacks and found the samples of some of them excellent, while others are damaged by rain, the harvest having been very wet.

The crop is estimated to yield four hundred and fifty bushels ; the yield of potatoes and turnips was only moderate ; they have been carefully stored away for the winter.

On account of the rainy season it was with difficulty that sufficient hay was secured, they have about seventy tons, the stacks are fenced and fire guards ploughed around them.

Thirteen Indians—heads of families—farm, one man having nine acres in crop, four men have seven acres each, two men five acres each, one man three acres, and four men only one acre or less each.

They have thirteen houses, and eleven stables, the timber in this part of the country being only poplar their buildings are not much to look at from the exterior, although they are all neatly whitewashed : upon closer inspection, and going into them, I found most of them fairly comfortable. As yet many families are still living in their tents, where they dwell during the summer.

They have thirty-four head of cattle, fourteen oxen and nine cows. The cattle are in the hands of eleven of the above Indian farmers ; one having seven head ; one six head ; one five head ; two three head each ; and six men have two head each ; the cattle are all on loan from the Department,

During the past year there have been six deaths in this band, two children and four adults, the latter being the result of la grippe. There were three births recorded, two boys and a girl.

Striped Blanket Reserve No. 69.

This is a Band of Assinniboines and have a total strength of ninety-one souls, of whom some sixty-seven only live on the Reserve permanently, the others, I am informed, visit with their friends south of the line.

They had one hundred and six acres in crop, seventy-nine acres being wheat, fourteen acres oats, six acres rye, two acres potatoes, four acres turnips, and the remainder gardens. A hail storm passed over this reserve when the grain had just formed, and almost totally destroyed the whole crop, out of the wreck some was saved and is in stack.

I examined the stacks the sample of both the wheat and the oats is good, and when threshed there will be, probably, one hundred and fifty bushels of the former, and two hundred bushels of the latter grain ; the rye was entirely destroyed.

The yield of potatoes was something over one hundred bushels they were safely stored away.

The above crops were put in by thirteen Indians, one of them Lone Child—having eighteen acres, two sixteen acres each ; one twelve acres ; one ten acres ; one eight acres ; two seven acres each ; one six acres , two five acres each ; one three acres and one less than an acre.

They have summer fallowed thirty acres, part having been plowed twice and part three times ; this summer fallowing is as creditable work of the kind as can be seen in this country.

The band have eighteen houses, fourteen stables, and three root houses, I visited each house and examined the stables, I found them put in thorough order for the winter ; the dwellings are much similar in appearance outside to those of the Salteaux, but more

commodious ; inside some taste was shewn in decoration ; their few ornaments, each as beaded bags, belts, head dresses, fire bags, bridles, guns, bows and arrows were hung artistically upon the walls, and made the most of ; the floors were clean, a few had cooking stoves which were freshly black leaded, and white wash had been freely used, both outside and in.

The stables also had been put in complete order, the walls freshly mudded, the roofs repaired and doors rehung, stalls cleaned out, the manure hauled away, stack yards have been made and a good sized stack is near every stable.

The band have fifty-two head of cattle, fifteen being oxen and twelve cows, the oxen are somewhat thin from their severe summers work, for in addition to the large summer fallow, they have done a great deal of freighting in connection with the Agency.

The cattle are owned by ten men : They received their first cattle under the loan system ; having repaid all loaned them, these are now their own property.

One man owns twelve head, one ten head, one eight head, one seven head, two four head each, one three head, two have two head each, and one one head ; they have in stack ninety tons of hay.

The recorded deaths in this band during the past year are eight, four adults and four children, the former all from consumption ; the births were only one boy and two girls.

PHEASANT RUMP RESERVE NO. 68.

This is also a band of Assiniboines ; their full strength is eighty-nine souls, fifty only living on the Reserve, the remainder going south to Turtle Mountain, U.S.

Fifteen men have farms, four of them having thirteen acres each : one eleven acres ; three eight acres each ; two seven acres each ; two two acres each ; and three less than an acre each.

Their crops aggregated seventy acres wheat, nineteen acres oats, two acres rye, three and a half acres potatoes, five acres turnips and two acres gardens.

These crops were almost totally destroyed by the same hail storm that destroyed Striped Blanket's ; that which was spared has been carefully harvested, the grain stacked and the roots stored away. There may be one hundred bushels wheat when threshed, and there was about the same quantity of potatoes.

The band put up one hundred tons of hay, all saved in good shape and well stacked ; they summer fallowed in a workmanlike manner twenty-five acres.

They have twenty-two houses, sixteen stables, and three root-houses. The houses are similar in design to Striped Blanket's, and as with that band, lime has been freely used outside as well as inside. They are fairly comfortable, the floors clean, stoves freshly black leaded and door-yards neatly swept ; the stables also are freshly mudded cleaned up, and put in good order for the winter, stack-yards built and filled with hay.

Live Stock.—This band own two horses and seventy-seven head of cattle, all free of Department lien (but under the Agent's control), they are in the hands of twelve Indians, one man owning eleven head ; one, ten head ; two, eight head each ; one, six head ; one, five head ; one, four head ; one, three head ; and one, one head. The work-oxen here are also rather thin for similar reasons as those of Striped Blanket.

The animals not at work herd with Striped Blanket's, and I have seldom seen finer cattle or cattle in better condition ; they show high breeding. Two year old steers will weigh up to fourteen hundred pounds live weight.

The registered deaths during the past year are two adults, one from consumption and one from the result of an accident ; only one birth is recorded—1 boy.

The farm work of this agency is under the immediate supervision of Charles Lawford, and his wife instructs the women in housewifery. As they live on Striped Blanket's reserve, which directly adjoins Pheasant Rump, these two bands come in for a greater share of their personal attention than the White Bear Band, forty miles away ; for this reason primarily these Indians are in better condition than the latter.

Farmer Lawford has thirty-five tons of hay in stack, and he had fourteen acres of oats, five acres of rye, and an acre of flax, but these suffered the same fate as the Indians' crops.

There is a Farmer's dwelling house, storehouse, three stables, and a blacksmith's shop. The Farmer was engaged repairing the Indians' waggons.

The Indian women on these reserves are great knitters, making mitts, socks, stockings, toques, mufflers and petticoats, they also manufacture a rough willow basket, but are not skilful enough to make the finer and more salable qualities.

This Farmer keeps no separate stores from those of the agency. I went over his list of articles in use; after examination I condemned and wrote off the list such as are of no further use.

These Indians are commencing to reap substantial benefits from their farming operations. They sold the Department or killed for their own use (under permit), during the past year, twenty head of cattle, and gristed their own wheat to the extent of fifty-five sacks of flour.

Agency Buildings.

The headquarters of this agency have recently been removed from Striped Blanket's Reserve to White Bear's. Such of the buildings as it was convenient to remove, have been brought away, namely, the office and the storehouse. New houses have been built for the Agent, the Clerk and the Interpreter, also a new stable and root-house. The buildings are all well built and suitable, particularly the Agents house, which is a very commodious, well arranged, self-contained, and well finished building.

Agency Storehouse and Office.

I took stock of the goods in the store and compared the same with the balances shewn in the books, and went over the list of goods in use in the Agency, striking off such as are worn out and of no further use in the service.

I made an audit of the books in the office, and found the same well kept and written up to date, and the general work had been performed in a satisfactory manner.

The agent, Mr. J. J. Campbell, is an undefatigable worker in the interests of his Indians, and has their progress at heart, he was being ably assisted by the clerk, Mr. Graham, and Farmer Lawford.

CROOKED LAKES AGENCY.

I arrived at this Agency on the 4th of December, and immediately commenced my inspection.

O'Chay-pa-wace Band, No. 71—E. McNeil Farmer—Farni 3a.

There were paid on this reserve last annuity payment, one hundred and forty-six Indians; in addition to those then paid it is reported that twenty-three members of this band are living south of the line in the vicinity of Turtle Mountain, and thirty-two others have opposite their names, "Gone South with Chuckachasse," the Farmer returns one hundred and thirty-six as living on the reserve, forty being by him classed as working Indians.

They have twenty-eight houses and fifteen stables, these were all freshly mudded and in good order for the winter.

They had one hundred and twenty-seven acres in crop, and one hundred and nine acres being grain, the balance—eighteen and one-half acres—potatoes, turnips, carrots and gardens, of the ninety-five acres wheat, about fifteen acres were a total failure, the remainder yielded thirteen hundred bushels, they also harvested seven hundred and sixty bushels potatoes.

This farming was performed by twenty-one heads of families, fifteen of whom grow both grain and roots, and six of them, roots only; the most land was sown by Pierre Belanger—seventeen acres—but his yield was very light on account of his land being very dirty, the best crop was grown by "Little Assinniboina," who from eight acres harvested nearly two hundred bushels wheat. The potatoes of the band yielded an average of less than one hundred bushels to the acre.

The Farmer himself had a few acres of oats, and half an acre of potatoes for his own use; the oats yielded sixty bushels only, and the potatoes seventy-five bushels, he also put up twelve tons of hay.

A few improvements have been made since the last inspection, the more noticeable are Pierre Belanger's new house and Ochap-pa-wace, Mrs. Loud Voice and O-sow-wasten each a new stable. Pierre Belanger has been working on the new road running through to Whitewood.

The band sold about seventy loads wood in Broadview, at from one dollar to one dollar and fifty cents a load, fifty tons of hay at an average price of six dollars a ton, also nine hundred and thirty dollars worth of Seneca root; they had done very little fall ploughing.

Live Stock.—This band have eighty-four head of cattle under Government control and twenty-eight head of private cattle, also twenty-five horses. The cattle under Departmental control are in the hands of eighteen Indians, which is a more even division than I usually find, the largest number—ten—being held by Kee-hen-amango, Mrs. Loudvoice coming next with nine head, the cattle are all in fine order, the band have in stock two hundred and sixty tons hay.

I inspected the farmers books, and examined into the receipts and issues. I found the same to be correct and regular. I also examined the goods in use and struck off the list all articles worn out and of no further use.

The records show there were nine births and eleven deaths in the band since October, 1889; the deaths were, all but five, infants, from consumption.

Ka-ka-wis-ta-haw Band, Reserve No. 72,—J. Nicol, Farmer—Farm 3b.

There were paid on this Reserve at the last annuity payments one hundred and twenty-four souls. With the exception of those at the Industrial and Boarding Schools, these are all living on the Reserve, thirty-four families occupying thirty-one houses.

Seventeen men farm, and had one hundred and eighteen acres in crop, one hundred and five acres being grain; eighty-seven acres wheat yielding fifteen hundred bushels.

The crop was more evenly divided among the families than is usual, the largest farmer Wah-sa-case having only fourteen and a half acres, the next in size of farms came Alexander and Cas-su-was-a-mat with eleven acres each, and from these growing gradually smaller until Ka-na-now-oo-way-oo with two acres wheat and half an acre potatoes is reached.

Live Stock.—This Band have one hundred and ten head of cattle under Departmental control, they have no private cattle, but have twenty-five horses; the cattle are held by twenty-one different Indians—Wah-sa-pase having fifteen head, Alexander ten head, Francis seven head and so on, until the lowest number of one cow is held by Te-tic-hay.

They have nineteen stables, and they put up over two hundred tons of hay—the cattle are all in the finest condition.

Since the last inspection there have been four houses and three stables built, and the houses and stables have been freshly mudded and put in order for the winter; they are not a very good description of house on account of there being no good building timber on the Reserve.

They own of private farming implements one waggon, two mowers, two horse rakes and one binder, having purchased the waggon, one mower and rake this year.

They have a few resources for making a living besides farming. During the past year they sold forty-tons hay at an average price of three dollars per ton, and forty loads of wood averaging one dollar and a quarter a load, also one hundred and twenty-five dollars worth of Seneca root.

Since October, 1889, there have been six births and seventeen deaths on this Reserve—cause of death consumption and effect of la-grippe, nine were adults.

I audited the farm books, and confirmed the balances therein brought down, examined the ration sheets, and checked the same, also the receipts. I checked the list of goods in use, and have written off articles worn out and useless.

Cow-e-ess Reserve, No. 73,

J. A. Sutherland, Farmer and blacksmith ; Mrs. Sutherland, Instructress—Farm 3a.

This band has a strength of one hundred and fifty souls on the pay-sheet, while the farm roll contains but thirty working heads of families, and one hundred and eight souls.

The absentees are accounted for by a few at Turtle Mountain, U.S., and a good many children away at the Industrial School at Fort Qu'Appelle, and at the Presbyterian Boarding School at Round Lake.

It differs somewhat from other bands from the fact that within it are found the opposite sides of life, riches and poverty (both viewed from an Indian standpoint). The former state is unique in Indian life now-a-days, while the latter is generally chronic. O'Soup, Gaddie, Ne-pa-pa-ness, and Andrew Delorme represent the former class. In this generation of Indians few of them will ever be any better off than the above-named men now are, but their riches are of a fleeting and casual nature, consisting as they do of horses and cattle, agricultural implements and annual crops, for they have no improvements on their land of a very permanent character, the timber on the reserve not being very good for building purposes, consequently their buildings are not very good, O'Soup's being somewhat better than any of the others.

The band had two hundred and twenty-two acres in crop, two hundred and six being grain. The yield of wheat was very fair, averaging seventeen bushels to the acre, or a total of nearly three thousand bushels. Their oats yielded eight hundred bushels, or only thirty-four bushels to the acre, and their potatoes eleven hundred bushels, or the very moderate yield of one hundred bushels to the acre, while peas, barley, rye, turnips and carrots were comparative failures.

They cut and stacked over two hundred tons of hay. The fields are well fenced, and their farming is conducted upon modern principles. Threshing is over, straw stacks are fenced in and the grain stored away.

With the exception of O'Soup not any of them have proper granaries. Fortunately the grain will be all disposed of before the rainy season sets in or damage would occur to it.

They have thirty-seven dwellings, thirty-three stables and as many stores and root-houses. I visited them at their homes. I found the richer ones living very comfortably, being well supplied with the necessaries of life, having in store vegetables, wheat, flour, and meat. The poorer ones were being cared for and looked after by the farmer.

Sixteen heads of families have farms ranging in size from forty acres down to five acres, the largest farmer being Alexander Gaddie ; O'Soup farms twenty-one acres ; Ne-pa-pa-ness has nineteen and one-half acres ; and Ambrose Delorme has over nineteen acres, and so on down to the smallest farmer of five acres.

The band have a few other resources of livelihood besides farming. They sold the past year one hundred and twenty-five dollars worth of seneca root ; also some horses and cattle and about fifty tons of hay.

They have purchased farming implements with their private means to the extent of one light waggon, three buckboards, eight farm waggons, five mowers, five horse rakes and four binders. O'Soup owns a span of Canadian horses.

Their private stock consists of eighty-three head of cattle, forty-three horses and eighteen pigs.

They have ninety-one head of cattle under Government control. These are in the hands of fifteen different Indians : Aswecan having eleven head ; H. Peltier, ten head ; Jacob Bear and Nepapaness, nine head each ; Joseph LeRat and Edward Peltier, seven head each ; Ambrose Delorme and Wah-pee-see-coose, six head each ; O'Soup and Augustus Peltier, five head each ; M. LeVallée, four head ; Esquequunap three head the balance are held in trust by the farmers ; Alex Geddie is only charged with one head cattle under Government control, but he is the largest owner of private cattle, on this reserve.

I audited the farm books, checked the receipts and examined into issues and rations sheets, the work was performed in a regular manner. I also checked the list of goods in use and wrote therefrom those worn out.

The farm buildings present a neat appearance, and are kept in good order.

In addition to a strict supervision of his work, Farmer Sutherland performs all the blacksmithing for the agency and is engineer of the steam thresher; he is also superintending the erection of and placing the machinery in the new grist mill which is now in course of being built. The farmer did a little gardening upon his own account growing potatoes for his family, and some oats for the farm horses; of the latter he reaped about one hundred and sixty bushels; and he puts up fourteen tons hay.

There were four births and nine deaths on this Reserve since October 1889, the deaths were seven adults and two infants.

Sakimay Reserve, No. 74.—A. J. Coburn, Farmer; Mrs. Coburn, Instructress, Farm 3d.

I visited this reserve on 10th December, the Indians were all in their winter quarters, having abandoned their teepees until warm weather comes again.

Several of the men were away from home, with their teams, hauling coal from Broadview to the Agency.

The houses and stables were freshly mudded and repaired. Akoose has finished his new house and is living in it, it is quite a pretentious building and is neatly white-washed and decorated; a peeled pole fence surrounds it. This band had in crop this year ninety-nine acres, eighty-five being wheat; six, rye and peas; and eight, corn, potatoes and turnips; they have threshed out their crop, and the yield of wheat is very good, being over fourteen hundred bushels, and the sample is fair, the yield of roots, corn and potatoes was small. They are taking good care of the latter for seed which will be greatly supplemented by a quantity grown by the farmer. The rye did not yield worth mentioning.

The numerical strength of the band is one hundred and ninety-seven, with forty-one heads of families; an average of one hundred and fifty souls live on the reserve, farm, and receive more or less assistance from the Department, while a number of them under a head-man called She-sheep are practically self-supporting, seldom applying for anything.

Fifteen men have land under cultivation, the largest number of acres belongs to Acoose, he having this year twenty-five acres of wheat. Ten other men had from two to nine acres each in crop, and four growing roots only.

They have thirty dwellings and twenty-three stables, I visited them at their homes and observed great improvements since my last visit six years ago, at which time they lived nearly all in teepees; the scarcity of building timber is given as a reason for the rather poor class of houses and stables, however they have made them fairly comfortable.

They have done a good deal of fall ploughing, and have one hundred and fifty tons hay in stack.

The farmer cultivated a small crop upon his own account namely, nine acres oats, which yielded only one hundred and twenty bushels; one and a-half acres potatoes yielded one hundred and fifty bushels, and ten and a-half acres rye yielded only thirty bushels; he also stacked fourteen tons of hay for the farm horses.

The band have eighty-six head of cattle under Departmental control, also eighteen head of private cattle and fifty horses; the cattle under control are held by thirteen Indians, two of them having thirteen head each, one ten head, one eight head, three seven head each, one six head, two five head each, two two head each, and one man has one head only; the cattle are all in good order, and this year there were twenty-two calves from twenty-three cows.

The most noticeable improvements during the year are: Acoose, a new house and stable, and the following named parties built new stables, Muskago, Insacompetung, Penepekeesick and Yellow Calf.

These Indians are building a bridge over the Qu'Appelle River (on the Reserve) and are grading the hill.

They have some other slight resources for making a living besides farming; they trade in dry cord wood with the town of Grenfell, having sold last year five hundred

loads at one dollar and fifty cents each load ; they burn lime, and they sold and traded in 1889-90 about twelve hundred bushels at thirty-five cents a bushel ; they take a few furs, principally fox, lynx, musk-rat, a few black-tailed deer, also two bears ; they also trade in seneca root, having sold during the past year to the extent of eighty-eight dollars.

They spend their money in agricultural implements, provisions, clothing and household necessaries ; they purchased during the past year four lumber wagons and a mower ; they now have in this line, of private property, a binder, five lumber wagons, five mowers, and three horse rakes.

The Farmer had no stock in his storehouse of any kind, I examined his books and compared them with those of the Agency, they have been kept accurately ; the ration lists supported the issues of provisions and agreed therewith.

I examined the articles in use about the farm and struck off the list those worn out.

The farm-house and buildings are in good order and repair.

Since July 1889 the births have been eight and deaths eleven.

Indian Agency.

There are four bands of Indians and four Farming Instructors in this Agency ; six hundred and twelve Indians were paid their annuities at the last payment.

To report generally of the work of the agency, considerable advancement has been made in the civilization of the Indians since my former visit in 1885. At that time many of them had but returned from the plains, and those longer settled were still restive under the restraint of reserve limits.

That this generation of Indians will become self-supporting, as understood by a white man, is not my belief, but if each son and daughter can be advanced a stage—made a little more civilized than their parents—time will overcome all difficulties, old traditions will die out and they will get to live as white people do.

The grist mill in course of erection will prove a boon to the Indians, for although Wolseley, where there is a department subsidized mill, is not very far distant, the charge of sixteen cents a bushel for grinding is more than an Indian can afford to pay.

The mill building, now nearly completed, appears to be very suitable for the class of machinery to go into it,

The agency buildings are kept in order. A small and very necessary addition was made to the agent's house this year.

I took an inventory of the goods in store. Upon comparing it with the balances of each account shown on the books, I found discrepancies in only four accounts and these very slight ones.

I examined the goods in use and struck off the list those worn out.

I made a thorough audit of the books, comparing them with the receipts at the farms, way-bills, etc. I also checked the additions and balances brought down from month to month. I also examined and checked the cattle registers of the different bands and found them well kept.

The system of bookkeeping is well conducted, and the work of the office is promptly performed. The following books are kept in the office : Order-book, containing receipts and issues ; agency ledger, beef receipt book, letter book, contract book, invoice book, voucher register, record of individual issues, cattle record, letter register, standing orders, vital statistics, cash book, receipt book, Indian passes, record of religious denomination of Indians, accounts of agricultural implements purchased by Indians, earnings of individual Indians, reports of Indian Councils, record of vaccination, permits to sell wood, hay, etc., and to purchase ammunition ; copies of farm returns, way bills, vouchers, agency store returns, ration lists from instructors ; letters and circulars received were all docketted and filed.

The storehouse was kept in good order, and the goods are arranged in such a manner as to facilitate stock taking.

With regard to the individual earnings of the Indians, an unusually close account has been kept. The gross amount earned by all the bands during the past fiscal year amounts to \$2,812. This amount also includes sales of cattle, horses, fish, lime, grain, potatoes, seneca root, firewood, and freighting performed.

There are no day schools in operation in this agency, most of the children attending either the industrial school at Fort Qu'Appelle, or the boarding school at Round Lake.

Divine service is held every Sabbath day at one or more Indian houses in the agency, and the regular attendance of the Indians thereat is highly commended by the missionaries.

Colonel McDonald, the Indian agent, speaks most favourably of all the members of his staff, both for the great interest they take in their work and their ability for performing the same.

INDIAN HEAD AGENCY.

I arrived at this agency on Saturday evening, 20th December, and on the following Monday morning proceeded with my work.

Mr. W. S. Grant has been in charge here, first as farming instructor and then agent, since 1884, and James C. Halford, acts as farmer, clerk and interpreter.

There were paid at the last annuity payments two hundred and thirteen souls.

These Indians have fairly good houses, several of which are floored, and all of them were clean.

Each house contained a good supply of flour, some had also meat; the flour had been earned by them delivering firewood at the Wolseley grist mill.

In a few houses there were stoves; in two cases the women were engaged knitting socks and mitts. A few were thinly clad, but on the whole they appeared very contented.

Chief Jack (since deceased) had a good modern style house, which the Department gave him assistance to build. He also had a large and comfortable stable, sheep and pig pen, and a poultry house.

These Indians continue to live in groups of houses, and instead of there being but one group, as they were at my last visit, the agent has induced them to divide, and they now form six groups, at long distances from one another.

One hundred and ninety-three acres were under crop this year, and seventy acres have been summer fallowed.

This crop was owned by forty-nine persons, sixteen of them having grain and root crops and the remainder roots only. As there are only forty-six men and four women on the pay-sheets who can be classed as heads of families, it shows that the agent has nearly every one of them at work providing for his or her family. This general distribution of farm work and ownership is to be greatly commended.

The largest farmer was Chief Jack, who had fifteen acres of wheat, five acres of oats, half an acre each of potatoes and turnips, one-eighth of an acre each of carrots and onions, besides a garden. Wee-see-con came next, with fifteen acres of general crop; E-chas-ho-pah next, with over fourteen acres, but he was so unfortunate as to have his whole grain crop destroyed by a hail storm; Big Darkness next, with about thirteen acres in crop—and he has made good provision for next year, by having twelve acres summer-fallowed and eight acres fall-ploughed; Rabbit Skin next, with twelve acres in crop, and a summer-fallow of ten acres.

The one hundred and thirty-one acres wheat yielded nine hundred and forty-three bushels grain—threshers' measure. The ten acres oats failed entirely, also the five acres barley. From the fifteen acres potatoes eleven hundred and fifty-four bushels were gathered and put away for winter use and seed. Twenty acres turnips yielded over three thousand bushels, which were stored for winter use.

There are eighty-four dwellings, thirty-eight stables and three root houses on the reserve. A good many of the dwellings are poor, and barely habitable in winter. I found thirty-eight of them were occupied, sixteen of which are floored, and twenty-two have earthen floors.

I visited every one of these houses, and left them with the general impression that the circumstances of the Indians are very good; that they are living in a fairly comfortable manner (for Indians), and that they are contented.

I could see that the agent, who accompanied me, was no infrequent visitor, and that he was intimately acquainted with them, their families and their condition. Fuel was plentiful, and each family had made stacks of it close to their doors. They had roaring fires on, which gave cheerfulness to their homes.

After the chief, the following named Indians were also in good circumstances, having houses, made as comfortable as their condition will permit, built after one pattern, namely, one room, low ceiling, fire places, mud roof, but with floor, windows and door:—Charlie, house, two stables and stack yard; Big Darkness, house, with cooking stove, three large stables, stack yard and pig pen; he owns, by private purchase, one waggon, one sleigh, one mower and a set of double harness. E-ches-ko-pah and Pretty Man have each a house, stable and stack yard; Moon Face, ditto; Arrow Head has house, two stables and stack yard; Wa-see-can is similarly provided, and, in addition, has a mower of his own; Crooked Arm has a house, sheep pen and stack yard; Gee-gus has a comfortable house, a cooking stove, stable and stack yard; Rabbit Skin has a house, three stables, stack yard, corral, pig and sheep pens, and the following agricultural implements, namely, horse rake, sleigh and waggon; Dry Walker has a house, with a cooking stove, three stables, stack yard and a waggon; Pretty Shield has a house, with cooking stove, a stable and stack yards; Carry-the-Kettle has a house with two rooms, both floored, cooking stove, rocking chair, lamps and two stables; The Runner and Crooked Legs live together in a good house, with two rooms, both floored; they have two stables and a stack yard. Little Wolf has a house, stable, stack yard and a farm waggon.

These Indians were competitors at the agricultural shows held at Regina and Indian Head last fall, and were successful in winning many prizes. At the former place they carried off thirty-one, namely, seven first prizes in the classes of wheat, bread, knitting &c.; nine second prizes; eight third prizes; four fourth prizes, and three extra prizes. In wheat the competition was with white settlers.

At Indian Head they won sixteen first prizes, in wheat, barley, oats, potatoes, turnips, onions, butter, bread, knitting; also fifteen second prizes, and one third prize.

The ordinary industrial pursuits at this season of the year are: attending to their stock, chopping cordwood, and hauling the same to Wolseley, for which they receive \$2 a cord. Part of the payment for the same is made in flour and part in cash. Also getting out logs, which they sell at the same price; making moccasins for the Industrial Schools, for which they receive twenty cents a pair; tanning hides for white settlers, at \$2.50 each; knitting mitts, socks and comforters for their own use, and also some for sale. There are no game, pelts, furs or fish to be had in this vicinity; there are a few rabbits.

Live Stock.

The band have at present ninety-four head of cattle, namely twenty-one work oxen, two bulls, seventeen cows, twenty six steers, eleven heifers and seventeen calves. Four years ago they had but thirty-nine head, which have been increased by direct purchases of twenty head. Twenty head have been killed for beef and six died thus making a natural increase of sixty-one head.

The present cattle are owned by twenty different Indians, namely: Dry Walker owns eleven head; Big Darkness owns thirteen head; Jack owns nine head; Carry-the-Kettle owns seven head; We-see-can and Rabbit Skin own six head each; Mrs. Long Lodge and Moon Face five head each; Black foot, Pretty Shield, We-a-gos-han four head each; Crooked Legs also owns four head; Gee-gus owns three head; Little Wolf, E-chas-no-pah, Come First, Wee-sa-han, Hy-oh-ke, and Charlie, two head each; and the Runner one head.

They have had a fine year for stock, for until just now the animals have run out. In one respect the want of snow has been a drawback, as the cattle had to be watered daily at the different wells, and it is very difficult to keep the Indians sufficiently atten-

tive in such matters. The lack of natural springs and lakes in this agency is a great drawback to stock-raising by the Indians.

They put up an estimated quantity of three hundred and forty tons of hay. I am pleased to say they had all large stacks of hay in the yards adjoining their stables.

Their sheep are held in four hands, namely, Jack, Rabbit Skin, Wa-se-can, and Crooked Arm. The original number given them was twenty; these were augmented by seventeen sent from File Hills. They have now fifty seven, and as three died and five have been killed for mutton the natural increase is shown here to be twenty-eight.

There are eleven sheep in addition to the above, held by Rabbit Skin, in trust or on shares for the Industrial School, Qu'Appelle.

The pigs owned are the Indians' private property; Chief Jack has a boar and two breeding sows, and rears several every year; Rabbit Skin has four, Big Darkness has six and Carry-the-Kettle has two.

I took stock of the goods in the storehouse, and of those unused I found everything in good shape; there were neither shortages nor discrepancies; they were in order and care was taken of them.

I made a careful audit of the agency books; the clerical work was accurately performed. I struck off a few articles from the goods in use, as they were worn out and useless.

The usual books are kept in the office; the work had been promptly done, and all written up to date.

There is no religious instruction or missionary work of any kind being done among these Indians. At the time of this inspection three of the children were attending the Catholic Industrial School. The Indians themselves, excepting seven, are classed as pagans. A school was kept under the auspices of the Presbyterian Church from 1887 to 1889—nearly two years—but the last teacher left about fifteen months ago and has not been replaced.

Qu'Appelle Industrial School.

I commenced my inspection of this school on 13th January. The previous inspection was up to the 31st August, 1891; therefore, this one covered a period of sixteen months.

I made an inventory of the goods in store and in use, and checked the items of each account, both as regards the receipts (as they are entered in the books) and the issues.

The goods in store were carefully kept, and appeared to have been issued with system, and there were but few discrepancies between the stock and the books.

I closed each account in the ledger, and brought down the balance—if any—and initialed the same, to 1st February.

I checked the copies filed here of the monthly store return, comparing them with the books, also the material made up into garments, since the last inspection.

The clerical work of this institution has been performed by Mr. J. A. Farrell, who has also charge of the stores. The business details are numerous; the storehouse, as well as the store-room, was kept in proper order. Beef and flour are issued daily, and groceries in the original packages; clothing and material as requisitioned for by the Matron.

The following is a list of the account and record books in the office:—Order book for receipts and issues, journal, ledger, voucher register, letter book, register of letters received, register of receipts, invoice books, cash book. The following were regularly placed on file: Letters and circulars received, quadruplicates of vouchers, monthly pay-sheets, ration lists, list of manufactured goods, blacksmith's work, farm and store returns.

The office work had been regularly performed, and was in a satisfactory condition.

I also made an inspection of the industries connected with the institution.

Farming.

This work is under the supervision of Thomas Redmond, who was appointed to the position in 1884. He is assisted by a regular staff of eight boys, four of whom work every forenoon and the other four every afternoon.

He has one span of horses and one yoke of oxen for the work. The crops harvested in 1890 were two hundred and forty-seven bushels wheat, eight hundred and forty bushels oats, two thousand two hundred bushels potatoes, eleven hundred and fifty bushels turnips, nine hundred bushels mangolds, and some pease, which, as yet, are not threshed. Besides the above, they cultivated Indian corn, beets, onions, and a large vegetable garden; they also cut and stacked fifty tons of hay.

The live stock under the Farmer's charge consists of six horses, thirteen milch cows, one bull, two steers, three heifers, five spring calves and seven pigs, a total of thirty-six.

At the season of the year when my inspection was made the farm work of each day commenced with milking, then watering and feeding stock, cleaning stables; then, as the day advanced, they took out the teams to haul stone from across the lake; also saw wood, take out ice, then in the evening milking and attending to stock.

Carpenters' Shop.

This trade is under the direction of Robert Mehan, a first-class mechanic, who was appointed to the position fourteen months ago. He has six boys learning the business; three of whom work in the forenoon and three in the afternoon.

During the past year they have done a great deal of work, much that is not visible to the casual observer.

They refitted the inside of the large stable, sixty feet by thirty-two feet, with stalls, staunchions, &c., in such a manner that the cattle can stand head to head, with a passage between; they also fitted up the cellar of the same building with root bins; they built a granary twenty-four feet square, fitting it up with bins; built an implement shed, fourteen feet by twenty; converted the old milk-house into an Indian waiting-room; built a new dairy twelve by fourteen feet; an addition to the wash-house or laundry eighteen by twenty-two feet; an addition to the poultry-house twelve by fourteen feet; a large meat safe in the corner of the ice house; a porch over the back entrance; a summer house in the garden; an arch over the entrance to the garden; a high, close board fence around the stable, stack and cattle yards; inside sash for green-house; cased the inside of the green-house; eight new desks and seats for the school room; three checker tables with fixed seats on each side, ten feet long; new maple floor in recreation room, thirty-two by fifty feet; cupboards, nine by twenty-four feet, with twenty panelled doors and eighty shelves (partitioned) for girls' clothing; cupboards with fifteen panelled doors, and eighty partitioned shelves for boys' clothing; cupboards for boys' lamp room; closets for boys attached to the house for winter use; made and cased fire tanks and connections; made benches attached to walls in school and recreation rooms; made sixteen tables, four of them being thirteen feet long; made hot bed frames and sash for same; extended the verandah platform; made a large cupboard for File Hills agency; a bread safe; shelving and open cupboards in the bakery, also in recreation room for the boys' caps; cupboards, with doors, in the carpenter's shop for keeping tools and working supplies in; made six storm sashes; thirty benches, seven to sixteen feet long; clothes hangers around the garret, twenty by eighty feet; playing tables, with seats; fitted up the gymnasium; curbed two wells, and covered cess-pools and wells; wainscotted several rooms; repaired fences, doors, wheelbarrows, vehicles, farming implements, windows, benches, stools, stands, sidewalks, tools, bucksaws, floors, partitions, roofs, hayracks, furniture, shelves, slates; made pigeonholes, writing desks, shelves in storehouse and storeroom; floored storeroom; made woodwork for boys' and girls' skates, and laid down a sidewalk.

Blacksmith's Shop.

This is in charge of D. McDonald, a skilful workman, who was appointed to the position nearly two years ago. He also has six boys learning the business. They work the same hours as the carpenters' boys do.

Their work performed during the past year is less conspicuous than that of the other trades, as it consists so much of repairing.

They have made seventy-five iron bedsteads, fitting them up with springs ; also iron railing for two verandah's. They iron-braced all the tables and benches ; kept in order all the stoves, furnaces and ranges, all iron-work and plumbing, and all the tin-smith's work ; repaired all vehicles and farming implements ; shoeing horses ; covered the stairs with sheet lead. They made bread-cutters, hinges, and twenty pairs skates for the other Industrial Schools. Also for the agencies in Treaty 4, they have repaired the Indians' vehicles, sharpened plough points, harrows, and shod horses.

Bakery.

This is in charge of G. Goff. He is assisted by two boys, who are learning the business. Besides doing all the baking, they cut the meat for the kitchen, and in summer time their spare hours are spent working in the gardens.

Furnace and Night-watchman.

This position has been held by C. Miles since October, 1888. Besides performing his regular duties, attending the furnaces and stoves and patrolling the buildings and premises during the night, being a stone-mason and plasterer by trade he does all such work connected therewith that requires to be done. He has repaired the plastering and kalsomined the whole of the boys' school building, sixty by ninety feet, three stories. He built the stone foundation under the stable and the stone wall around the stable cellar ; the stone foundation under the granary ; the chimney for the pig-house ; put down two cement floors ; and built a soft-water cistern of brick and cement. He does all the painting of furniture, all new articles and repairs done by the carpenter. He built an additional coal-bin in the cellar. He attends to the green-house, and has repaired several chimneys, and all breaks in the plastering in the boys' and girls' schools. He attends to the supply of water in the fire tanks ; sees that the hose and fire buckets are always in order and fit for emergencies.

Those boys not in the work-shops or with the farmer are worked on fatigues, under the supervision of the teacher, Mr. H. Denehy. They saw wood, carry wood and coal ; do the sweeping, shovelling snow from the paths and roads, and in summer time keep the walks and grounds in order ; do weeding and hoeing, and assist in gathering the root crops.

Matron's Department.

The Matron has furnished me with the following information regarding her department :—

She has a staff of two teachers, two tailoresses and two cooks, all under salary.

Twelve girls have been taught, and know how to use the sewing machine, four only working each week.

Eleven can use the knitting machines, making mufflers, socks, stockings, mitts, &c.

Eighty-five can do hand-knitting, and do all the darning of stockings ; besides, each one can make a complete pair of stockings.

Thirty-one have been taught cooking and work in the kitchen by turns. They do all the washing, excepting boys' underclothes.

All the clothing, dresses, etc., are made in the Matron's department, except a brown duck suit for each boy and a coat for each girl, which are sent in ready-made. They also do all the mending.

I have much pleasure in stating that the interior of both the boys' and girls' schools are marvels of cleanliness and order, commencing with the reception rooms, the several class rooms, dining rooms, dormitories, kitchens, pantries, &c.

The children present a well-dressed, clean and healthy appearance, and are evidently well contented to be where they are. The doctor (Seymour) reports most favourably of their state of health.

The farmer, carpenter, blacksmith and baker have families, and do not live in the institution, but receive one daily ration each in monthly issues.

The several workshops have a business-like appearance. All engaged therein appeared to be kept busy. The yards, stables and other farm buildings were kept in good order, and the live stock were in good condition.

The grounds surrounding the schools are tastefully laid out, and are enclosed by neat fences. The roads and walks are kept clean.

The reverend Principal has a good word to say of each member of his staff, and speaks hopefully of the future progress of the institution and its greatly-increased favour among the Indians of the reserves; and says that so far as the Indians themselves are concerned, he now meets with little or no difficulty whatever in gaining their consent to take their children into the school as soon as they are old enough.

TOUCHWOOD HILLS AGENCY.

I commenced my inspection of this agency on 7th February.

The officials and employes engaged within this agency number fourteen, and the five bands within its jurisdiction numbered at the last annuity payments seven hundred and seventy souls, as follows:—Poor Man Band, one hundred and three; Day Star, seventy-eight; Muscowequahn, one hundred and fifty-four; Gordon, one hundred and fifty-one; Yellow Quill, two hundred and eighty-four.

The Yellow Quill band do not engage much in agricultural pursuits as yet, and may be called hunting Indians.

Day Star Band, No. 78.

This band of seventy-eight souls are under the supervision of Farmer Gooderham; labourer Charles Favel lives on the reserve and works with the Indians; and Catherine Slater, wife of the school-teacher, instructs the women in household duties.

They have made considerable progress since it was my lot to inspect their work in 1884. I was happy to find the old chief hale and hearty, and in his old age enjoying a comfortable home.

With the exception of a few individuals who have private gardens, this band farms in community, all working in the same fields and sharing the crops. Seventeen families share in this way.

Their principal crops were forty-three acres wheat, which yielded four hundred and twenty-two bushels, machine measure; six acres barley, yielding one hundred and forty-eight bushels; five and a-half acres potatoes, yielding three hundred bushels; three acres turnips, yielding six hundred bushels. Some pease and rye sown did not come to anything. The band put up three hundred tons hay.

In addition to the regular routine of farm work, this band have, since the last inspection, fenced forty-three acres new land, built seven new stables and three new dwellings, and have taken out logs for two other houses; also, made five sets of bob-sleighs.

With their own means they have purchased a mower and horse-rake.

Seventeen families inhabit fifteen houses. I visited each one of them.

The houses were fairly comfortable, but considerable sickness prevailed among the inmates. Four elderly persons and two children were seriously ill; bed clothing appeared to be scanty among them, but they were well supplied with both flour and beef.

There were seven births and four deaths on the reserve during the past fiscal year.

The day school is kept by J. Slater. There were nine children present; they looked clean and healthy, and the teacher informed me that the attendance of the children was very regular.

They have one hundred and thirty-two head of cattle under Government control, namely, fifteen oxen, fifty cows, thirty-two steers, twenty-nine heifers, two bulls and four calves. These are held by nineteen persons, with the exception of twenty heifers, and two bulls, which as yet are kept together for the benefit of the whole band; they have also fifteen private horses.

I inspected the byres and stables. I found them to be in good order, clean and comfortable; the animals were all in good condition.

Poor Man's Band, No. 88.

At the time of my inspection there were twenty-six families, or one hundred souls, on the ration list, but as the Indians were using their own beef and flour the list was not in practical use.

Farmer Gooderham resides on this reserve, and they receive more of his personal attention than Day Star's band. They farm almost entirely in severalty, and the families live at a considerable distance from each other.

They had a total of one hundred and thirty-eight acres in crop, divided among twenty-four persons. It consisted of one hundred and two acres wheat, fourteen acres of barley, five acres potatoes, ten acres rye and seven acres turnips and carrots, and smaller vegetables.

The yield was twelve hundred and fourteen bushels wheat, two hundred and twenty-two bushels barley, twenty bushels rye, three hundred and thirty bushels potatoes, and seven hundred bushels turnips, carrots and other vegetables. They had already gristed a large quantity of their wheat; consequently, each family had a good stock of flour on hand.

There are eighteen houses on the reserve. I went from house to house and observed the condition of the inmates.

There are fourteen stables on the reserve these, with hay corrals at each, formed perfect farm yards. I cannot praise too highly the clean and comfortable condition in which I found all of these to be, which shows plainly that the men attend to their part of the business.

The cattle were fat. They have, all told, one hundred and one head of cattle distributed among twenty Indians; they are pretty evenly divided; eleven head being the largest number held by any one, and three the smallest number; they consist of twenty work oxen, forty-two cows, twenty steers, fourteen heifers and three calves. They had abundance of hay, having had two hundred tons when the winter set in.

As I before remarked, the men are diligent at their work, and the more noticeable improvements since the last inspection are: the brothers Fox have built two new houses, newly fenced six acres, and summer fallowed four acres; Stonis has built a new house, a new stable, broken five acres, and newly fenced eleven acres; Mackegoness has taken out timber for a new house, built a new stable, fenced twenty-three acres, and fall ploughed twenty acres; Widow Mary's son built a small house, a new stable, and fenced eight acres; Bill See-wes-tecken has taken out timber for a new house and stable, built a new stable and fenced ten acres; Uwestack newly fenced ten acres; Chief Tuh-wee-kee-see-quake and Tobacco's son built a granary and an addition to their stable, newly fenced twenty-five acres, and summer fallowed ten acres; William Favel fenced eight acres, and summer fallowed eight acres; Worm has built a new stable, fenced eight acres and summer fallowed four acres; E-wee-nin has built a small dwelling and fenced three and a-half acres; E-nin-oo-wiss has built a house and stable and fenced one and a-half acres.

The band have purchased with their own money one binder, two mowers and two horse rakes, and one lumber waggon; seven men have made themselves very excellent bob-sleighs.

The farmhouse, stable and storehouse, are in excellent order. The farmer has built a new granary and raised four acres oats for his horses, and cultivated a large vegetable garden, which, besides being profitable to his own family, was a good example to set before the Indians. I checked his inventory of Government property in his hands, and wrote off the list such articles as are of no further use, being broken or worn out.

I examined and audited his several account books, checking the cattle returns and stock registers, looking closely into the manner in which these have been kept. I checked his receipts and issues of all classes of goods, comparing his receipts with the charges against his farm (6a) in the agency books. His ration lists were regularly kept and forwarded to the agency along with his monthly provision return.

Mrs. Gooderham is Instructress in housewifery to the women of the band. She is exceedingly faithful in performing her duties, but her greatest drawback in accomplishing much is the extreme poverty of the Indians, their lack of almost everything apper-

taining to domestic comfort in their houses, and with little or no material to work upon.

During the past fiscal year the births were seven and the deaths four on this reserve.

Gordon Reserve, Farm 6c.

T. J. Fleetham, Farmer ; Mrs. Fleetham, Instructress.

This band numbers one hundred and fifty-one souls, under thirty-two heads of families, twenty-three of whom cultivate more or less land. Twenty-four are owners of cattle, and twenty-seven are householders.

They had nearly two hundred acres in crop, the larger proportion being of wheat, which yielded (threshers' measurement) eleven hundred and thirty-four bushels ; of barley they threshed two hundred and forty-seven bushels ; of rye, fifty-eight bushels ; they lifted three hundred and eighty-five bushels of potatoes, and of carrots and turnips they had five hundred and seventy bushels.

They gristed a larger quantity of their wheat (three hundred and fifty bushels), and in consequence every family had, at the time of my visit, a good supply of flour on hand.

This band is made up of plain Indians and a large proportion of Half-breeds. Among the latter are many intelligent men, who are fairly successful farmers. Their houses are comfortably furnished, their wives and families are well clothed and their houses tidy and bright.

Among the pure Indians (and with them I must include one of the sons of Chief Gordon and another Half-breed) the case is very different. This class is very short of bed-clothes, and their sleeping places (I cannot call them beds) are but a bundle of rags on the floor in the corner of their one room.

Their farming has been carried on with system, and considerable success ; their fields are well laid out and well fenced ; their stables were clean and comfortable ; hay was plentiful, and carefully fenced stack-yards protected it from being wasted. Water holes were open on the different lakes where the cattle were accustomed to drink.

In addition to the routine of farm work, a good many permanent improvements have been made by different Indians during the past year. Alex. McNab has built a new stable, broken seven acres of land, and summer fallowed four acres. Widow Sears built an addition to her house, summer fallowed five acres, and purchased with her private means a new mower and a horse-rake. White Bear has built a new stable. Henry Bird has built a new house and new stables, and broken two acres of land. Fisher, or Coojack, has broken five acres and taken out rails to fence the same. Alfred McNab has broken four acres of land. Josiah Pratt has built a new stable ; it is an excellent building, having a thatched roof ; also, he has built a new milk-house and an addition to his house, and broken five acres of land. Tom McNab has taken out logs for a new stable, broken five acres, and taken out rails to fence the same. John Cochraine has built a large new stable and a new milk house, and broken three acres. David Anderson has built a new milk-house. John Anderson has built a new house and a new stable, and broken seven acres of land.

Individual members of the band are now owners of a number of farming implements, purchased with their private means. These are in addition to those received by them from the Department. The following is a list:—Eight farm waggons, seven buckboards, six sets of double harness, three bob-sleighs, seven cooking stoves. In addition to the above, each farming Indian has a set or more of home-made bob-sleighs.

This band has one hundred and thirty-one head of cattle under Government control, namely, twenty-eight oxen, one bull, thirty-six cows, eighteen steers, fifteen heifers and thirty-three calves, and one not issued.

As I remarked before, these animals are owned by twenty-four Indians—two having twelve head each ; the balance are distributed in numbers from eight to one head each.

Their cattle are domesticated ; they are let out of the stables every morning to water and range during the day, returning at night to their own stables, where they

are again tied up and fed hay. Some of the cows were still giving milk, and eight families make butter regularly.

The farm house and other farm buildings on this reserve are in good order, and are both suitable and very comfortable. They consist of a dwelling, one and a-half stories, eighteen by twenty-two feet, with kitchen attachment sixteen by twenty-two feet; an office, storehouse, stable, implement shed, cow stables, extra stable, and a new granary built this year. The farmer cultivates an excellent vegetable garden.

The Indians here have no other resources but farming, and there is no sale for their surplus products, neither is there any demand for manual labour. Fur-bearing animals are almost extinct; an occasional fox is killed, and Asson killed about \$20 worth of fur before Christmas. There are no fishing lakes near. Rabbits are plentiful.

I audited the farmer's books and checked them with those of the agency. I found them regularly kept, and the balances correct. Ration sheets were used and sent in with the monthly provision returns.

I carefully examined the live stock register, and found that the quarterly stock return agreed with it.

I checked the list of articles in use on the farm, and condemned any that were worn out and useless.

During the past fiscal year the births were five and the deaths ten on this reserve.

There is a boarding and day school on this reserve, conducted by the Rev. Owen Owens and his wife. It is under the auspices of the Church of England in the Episcopal Diocese of Assiniboia. I was greatly interested in going through the school building; there were twenty-six children present, looking bright and clean, and becomingly dressed; the dormitories were comfortable and wholesome. Mr. Owens informed me that his allowance from the Department was not sufficient to properly feed and clothe the children, but he was enabled to do so through the assistance he received from churches and kind friends in the east.

A deaf mute on this reserve is a subject for any charitably disposed person of sufficient means. He is a bright, intelligent boy, ten years old, and perfectly healthy. If he could be entered as a pupil in some deaf and dumb institute, and educated, he would probably become an intelligent Christian man and a good Indian.

Muscovequan Band—Farm 6c—Louis Couture, Farmer.

In 1885 two hundred and eighty-two souls received their annuities as members of this band, while in 1890 one hundred and fifty-four only were paid, nearly all the half-breed families belonging to it having taken their discharge from treaty.

In 1890 the births were eight, and the number of deaths twelve.

There are nineteen houses on the reserve and sixteen stables, but only twelve of each are used this winter, as several families live together in the same houses. Fourteen heads of families farm.

The crops of 1890 were seventy-four acres wheat, seven acres oats, nine acres barley, seven acres potatoes, and seven and one-half acres turnips, carrots, onions and smaller vegetables. The wheat threshed out was three hundred and twenty bushels, but the sample was inferior, and only fit to feed stock. Of oats and barley, the thresher's measurement returned two hundred and sixty-two bushels and one hundred and sixty bushels, respectively. These were good and merchantable.

The yield of potatoes was three hundred and fifty bushels, and of carrots and turnips they had eight hundred and thirty-five bushels.

Some new work has been done, and new buildings erected since the last inspection. The most noticeable are Little Wolf's two new stables, and he has taken out logs for a new house, and newly fenced twelve acres. Henry Bear has newly fenced ten acres and built a new milk house. Pierre Desjarlais has built a new stable. Michael has built an addition to his house and fenced six acres. Inquanope has built a small house and taken out a large number of rails. Moyese has fenced ten acres. Old Hunter has built a new house. Muscovequan and Moyese have broken three acres of new land, and summer fallowed five acres. Little Wolf and son have broken four

acres. Que-que-zance has broken five acres. Pierre Desjarlais has broken three acres, and last summer fallowed four acres. Peeyaces has summer-fallowed ten acres, and Inquenope has broken two acres.

These Indians, like the other bands of this agency, have very few opportunities of earning money to help them in being self-sustaining. Henry Bear makes jumper sleighs, and occasionally sells one. He also does carpenter's work when he gets the chance. Mrs. Old Hunter makes very good mats, but the demand for the same is not very great.

The band has seventy-seven head of stock. Seventeen work oxen are on loan during the good behaviour of those Indians holding them. Fourteen Indians have cows—four having two each. Three cows and one steer are not as yet distributed.

They have eleven head of private cattle, namely, four cows, one ox and six head of young cattle. They have also fifteen horses.

I inspected the stables and byres, they were very well attended to. They had in stock at the beginning of the winter two hundred and twenty-five tons of hay.

I visited the Indians at their homes. I did not receive the impression that they are well off, but I consider them more comfortable than the poorer families on the three other reserves, the women and children were badly clad, and they are also very destitute of bed clothes.

I visited the boarding school under Mr. Denehy: there was a good attendance of children, they were well and cleanly clad, and appeared to be in good health; the dormitories were fresh and clean, and the children appeared to be contented and happy; this school is under the auspices of the Roman Catholic Church.

I audited the farmer's books and checked them with those of the Agency, and with a few exceptions they agreed therewith.

I checked the list of articles in use on the farm and struck therefrom such as are worn out and of no further use.

The farm buildings were in good repair and were kept in a very creditable manner.

The farmer raised for feed for the farm stock, one hundred bushels oats, twenty bushels barley, sixty bushels potatoes and one hundred bushels turnips and carrots; he put up twenty-five tons hay and built a new fence around the farm premises.

Yellow Quill's Band.

The Indians of this band live almost entirely by hunting and fishing, and although the issues of food and other supplies appear on Farmer Couture's returns, his supervision of them is entirely nominal, and as a matter of fact he does not handle such supplies at all.

The annuity pay sheet of 1890 for this band contains two hundred and eighty-four souls, with forty-five returned as absent, being reported "up north hunting." By reference to earlier pay sheets these do not appear to have been on their reserve since 1886 when three hundred and twenty-seven souls were entered as paid.

The births in 1890 are set down as thirteen, and the deaths at eleven; there are forty-eight men, sixty-five women, eighty-five boys, seventy-eight girls and eight not classified; of the men forty three are heads of families; also seven women.

Of the one hundred and sixty-three boys and girls, it is to be regretted that none of them as yet attend school.

They have six habitable houses at Fishing Lake and two stables, and at Nut Lake three habitable houses; they planted eight acres potatoes in two fields from which they had the very moderate yield of three hundred bushels.

They have twenty-three head of cattle, of which two oxen, four cows and four calves are at Fishing Lake; they have thirty private horses, they cut and stacked sixty tons hay. During the year at Fishing Lake they broke four acres of new land and fenced it; they built three new houses and three new stables.

At Fishing Lake the Indians were exchanging their surplus fish for flour.

At Nut Lake they were taking large numbers of fur-bearing animals, among them a good many bears.

Agency Office.

I checked all the inventories with the stock on hand, both of the articles in use and those in store ; I also made a close audit of the books and checked the monthly returns with the same.

I found the following books kept in the office in connection with the business therein transacted : Daybook, journal, ledger, register of vouchers, letters received, births and deaths, contractors' receipts, earnings of Indians, daily shipping book, circular book, invoice book, agricultural implements to Indians, letter book, official diary. They were kept with regularity ; all letters received were fyled, also quadruplicates of vouchers ; farmer's ration sheets ; also copies of agency and farm returns.

The agency buildings were in good order and in proper state of repair.

Since the last inspection the following new buildings have been erected : a clerk's house, blacksmith's shop, and ice house ; the root house was rebuilt and a new roof put on it.

FILE HILLS AGENCY.

I commenced my inspection of the File Hills Agency on 28th February.

The staff there consists of Acting Agent Wright, Interpreter Hourie and Farmer McConnell.

This Agency has under its supervision the following bands : Pee-pee-kee-sis, No. 81 ; O-kee-neese, No. 82 ; Star Blanket, No. 83 ; and Little Black Bear, No. 84.

Pee-pee-kee-sis and O-kee-neese bands, farm as one band in community, and were most successful with their crops the past year.

Pee-pee-kee-sis band has a population of eighty-seven souls, namely : nineteen men, thirty-three women, seventeen boys and eighteen girls. The O-kee-neese band numbers fifty-nine souls, namely : sixteen men, twenty-six women, eight boys, and nine girls ; of the above thirty-five men, only twenty-two are strong enough to do farming work ; in this they are assisted by seventeen women and boys ; by these all the work is performed, and the fruits of their labour goes to support the others as well as themselves.

They had in crop last year fifty acres wheat, which yielded sixteen hundred and sixty-seven bushels (thresher's measure) ; twenty acres oats yielded six hundred and nine bushels ; six acres potatoes yielded about one thousand bushels ; eight hundred bushels being placed in the farm root house, and two hundred bushels in their private cellars, for consumption during the winter.

The quantity of hay put in stack by these two bands was estimated at three hundred tons.

In addition to the above crops raised in community, nearly every householder had a private garden, in which he raised a few potatoes and smaller vegetables.

There are twenty-one houses occupied on these Reserves, I visited each one of them, some of the houses are quite new, and a few families are in very fair circumstances, while the greater number are very destitute of wearing apparel and bed clothes.

In the O-kee-neese band, Mustooseco is the most comfortable in a domestic way of any on the reserve, his one and a half story house is well floored, up stairs as well as down, it was clean and well ordered he has cooking and a box stove, chairs, table, bedsteads, lamp, dishes, &c. This year he built an addition to his stables, also cattle corrals, he owns a mower and horse rake ; his wife makes bread and can knit.

Es-cu-e-han has a very good story and a half house, neatly whitewashed outside as well as inside, floored upstairs as well as down, cooking stove and a box stove, bedsteads, table, chairs, lamp and dishes. Had this house been orderly I would have considered it as comfortable as Mustooseco's, but it was not. This man owns a pair of bob-sleighs. His wife is said to be an excellent housekeeper, she makes bread and butter and can knit.

Kewatin has a fairly comfortable house, this year he built a new cattle corral, he also owns a mower ; his wife makes butter and knits.

Kah-ke-ka-as-se-me has a very good, but small, house, it contained a bedstead. He put a new roof on his stable, and built a new cattle corral this year.

As-sin-a-wa-sis has built an addition to his stable and a cattle corral. His house is fairly comfortable, being floored, in it are table, cooking stove and lamp. His wife can make butter, and she knows how to knit.

Tuck-wah-now has a comfortable house, floored, with windows, and bedstead ; he has a new stable and corral.

Pis-quat-ah-pew has a new house, and stable and corralls. The house has windows, bedstead, tables, and lantern. This man's wife makes butter and knits.

Day Walker has a new house ; it is floored, but only with flattened logs.

PEE-PEE-KEE-SIS BAND.

Nah-tah-toose has in his house table, bedstead, chairs ; he owns a pair of bob-sleighs.

Kee-wish has a cooking stove, bedstead, table and lamp.

Os-ky-sis has built a new stable and cattle corral ; he owns a mower, he has also a pair of bob-sleighs of his own make.

Ah-toose has built an addition to his stable, a new corral, and owns a pair of bob-sleighs. His house is comfortable, and contains a cooking stove, table, bedstead and dishes.

The Stony has built a new stable.

Red Bird has repaired his house.

Mrs. Buffalo Bow makes butter and knits.

Widow Pee-pee-kee-sis has a fairly good, but small, house, it contains a cooking stove, bedstead and table.

The houses were all floored, mostly with flatted logs, and were fairly comfortable, but there was a striking deficiency of bed-clothes in some of them, and some had too many occupants for their size.

Live Stock.

The O-kee-neese Band have eighty-nine head of cattle, namely, fifteen oxen, twenty-eight cows, twenty-six steers, five heifers, ten bulls and five heifer calves ; they have also fourteen private horses. The cattle are owned by eleven persons, divided as follows : one has seventeen head, one has sixteen head, one fourteen head, one thirteen head, one eleven head, one ten head, one four head, and two have two head each.

The Pee-pee-kee-sis Band own eighty-one head of cattle, which consists of fifteen work oxen, one bull, twenty-eight cows, twenty-five steers, two heifers, thirteen bull and six heifer calves ; they have also fifteen private horses. The cattle are owned by thirteen persons, and are divided as follows ; one person owns eighteen head, another has seventeen head, two have seven head each, three have six head each, one has five head, two have four head each, one has two head, and the bull is owned in common by the whole band.

I made a close inspection of the stables, byres and corralls, and found them all in a most satisfactory condition of order and comfort.

Star Blanket Band, No. 83.

This band numbers forty-seven souls, namely, eight men, seventeen women, ten boys, and twelve girls ; seven men, and three women are heads of families ; the eight men are reported able bodied, while only seven women and boys are able to do field work ; they occupy nine houses.

This year they had thirty-one acres in crops, consisting of twenty acres wheat, six acres rye, three acres potatoes, one acre in beets, turnips, carrots, and onions, and one acre in gardens.

The wheat was badly frozen and yielded only one hundred and forty-eight bushels, thresher's measure, this when properly cleaned was reduced to sixty bushels of rather poor sample, the rye sown did not yield anything, they placed one hundred bushels potatoes in the farm root house, and the Indians stored a similar quantity in the cellars of their houses for winter consumption ; they had in stock at commencement of winter one hundred and twenty-five tons of hay.

I visited the Indians at their homes. The Chief--Star Blanket's--house is comfortable, it is large and airy with both a cooking-stove and fire-place, the house is in good repair; one of his wives is a butter maker. O-hoo has a new house and stable, the house is floored and it has a bedstead. Stern Child has a new house and new stable, the house is floored and has a bedstead. See-Coose, lately from Little Black Bear's Band, has a new house and stable, the house is not floored, no bedsteads or any furniture whatever. Pow-asson's house is comfortable, it is floored with slabs, he has built a new stable.

The band has five stables, occupied by thirty-five head of cattle, namely, seven oxen, one bull, eight cows, nine steers, two heifers, one bull calf, and seven heifer calves, they are owned by five persons, one owning eleven head, two seven head each, two five head each; they also own ten horses.

The cattle were in good condition and there was abundance of hay.

Little Black Bear Band. No. 84.

This band numbers eighty souls, namely, twenty-four men, twenty-eight women, fifteen boys and thirteen girls; of the men, fifteen only are able bodied, and ten women and boys only are able to work in the fields; seventeen men, and one woman, are heads of families, and they occupy twelve houses.

I visited each house, in some houses there appeared to be too many occupants for their size and for health, but as Indians visit each other a great deal in winter, that may account for the overcrowding.

Pee-cutch is the leading man of the Band, since the death of the Chief; he has built a fairly comfortable house with floors and windows, it contains a cooking-stove, chairs, table and lamp; he has turned his old house into a stable; his wife makes butter; together with his Band he newly fenced one hundred acres of land this year; he purchased a new binder this year. Nock-a-we-na has built a new stable and floored his house. Bellegarde, has a comfortable house, large, airy, clean and neatly arranged inside, containing most of the necessary articles of furniture; he has built new stables and has a new house in course of erection; he owns a mower and horse-rake, his wife knits and makes butter, also bread. O-na-pen has built a new house and stable; he also purchased a mower. Oh-kee-mah built a new house and stable; the house is floored, and contains a cooking-stove. Chee-wee-in built a new house and stable, the house is floored, his wife can knit and make butter. Peet-wa-ke-sa-in has a story and a half house, neatly whitewashed outside and inside, it contains a cooking-stove, chairs, table, bedsteads and lamp, altogether it is very comfortable; he has good stables. Old Rook has a new house, it is floored. Blood, this woman has a new house and stable. Pierre has a new house, it is quite small, but it is floored, and contains a cooking-stove, chairs, table, and bedstead; he owns a pair of bob-sleighs, he does not farm much, preferring to freight and hunt, he built a new stable and cattle corral. Big Sky built his house two years ago, but he has made some additions and improvements, it is now floored, it contains a table, bedstead and a lantern; his daughter can knit. Chee-mah-kase has a new house, it is floored.

All of the above named householders have a small garden adjacent to their houses, in which they raise a few potatoes and the smaller vegetables; their farm work is done in community in the large one hundred acre field.

Live Stock.

The band owns one hundred and twelve head of cattle, namely, twelve work oxen, two bulls, thirty-four cows, twenty-six steers, fifteen heifers, eleven bull and twelve heifer calves; of private animals they have thirty horses, two cows and three head of young cattle.

The cattle under Departmental control are owned by fifteen persons; one having fifteen head, another thirteen head, two have twelve head each, two have eight head each, three have six head each, one has five head, three have four head each, one has three head and one two head and two cows; and two bulls are undistributed.

The above animals are being wintered in eleven stables; these stables were clean and comfortable.

Farm Work.

The band had under crop the past year sixty-eight acres of land, this was farmed in one field, excepting gardens, by all the band working together, it consisted of fifty acres wheat, which yielded five hundred and two bushels, thresher's measure; three acres potatoes yielded three hundred and fifty bushels, of which one hundred have been placed in the agency root-house for seed, and the remainder in the cellars of the Indians' houses for winter consumption; twelve acres of rye did not yield anything; half an acre each of beets, turnips, carrots, onions, and an acre of garden stuff was consumed by the Indians as it grew.

In addition to the farming of the Indians, the agency had an excellent garden. From it was taken two hundred and fifty bushels of potatoes, which were stored for seed.

I made a careful audit of the books, and found such as are in use written up to date and balanced. I examined into the receipts and issues, and took an inventory of the goods in store. I inspected the goods in use, and wrote off the list those worn out and useless.

The Indians were being fed with their own flour—product of their grists. It was issued to them in the usual manner from the storehouse. They were also using their own beef. During last autumn they killed twelve of their own animals for keep.

There is a boarding and day school at this agency. It is kept by Mr. and Mrs. Skene, under the auspices of the Presbyterian Church. There are ten Indian children, inmates of the school. Some others attending are not classed in this list. The children were clean, becomingly dressed, and looked intelligent. Some were still rather delicate, having but recently recovered from the chicken pox; one pupil having died from the same complaint. I was taken into the dormitories, and was pleased to note their cleanliness, and comfortable as well as airy condition. The building is large, two and a-half stories, built of solid stone, and well plastered on studding and lath inside. It is quite comfortable, and must have been erected at considerable outlay by the church, and it could very well accommodate double as many children as the present attendance.

Muscowpetung Agency.

On 18th March, I commenced my inspection of this agency. Agent Lash being away "on leave," I received every assistance during my inspection from the clerk, Mr. H. R. Halpin, who appeared to be efficiently performing the duties of agent, together with those of his own position.

The agency is composed of four bands of Indians, namely, Piapot No. 75, called Farm 9a; Muscowpetung No. 80, called Farm 4b; Pasqua No. 79, and Standing Buffalo (Sioux) No. 78, called Farm 4a. These farms are respectively under the direction of farmers McKinnon, Stewart and Hockley.

In population the agency numbers seven hundred and eleven souls; one hundred and seventy-five being non-treaty Sioux.

Piapot's Band.

This band numbered at the last annuity payments, two hundred and thirty-five souls, namely, sixty-four men, one hundred women, thirty-six boys and thirty-five girls. The average number living on the reserve during the past six months, two hundred and twenty-four. There are fifty-eight men and eight women heads of families, who occupy thirty houses.

Since July 1890, there have been eighteen deaths among them, (fourteen adults and four infants), and nine births in the same period.

In former years Piapot had a great number of followers, nearly fifteen hundred having been fed and paid their annuities under his standard at one time; they dwindled away, through desertions and disease, and in 1887 his band numbered two hundred and ninety-six only, then each year has shown a steady decrease in its numbers.

Farm Work.

The band had one hundred and twenty-six acres under crop the past year, namely, seventy-one acres wheat, nine acres rye, seventeen acres potatoes, five acres turnips, and four acres gardens, from which they harvested eight hundred and five bushels wheat, no rye, one thousand bushels potatoes, and five hundred and thirty bushels turnips.

The above crops were grown on sixty-three acres fall plowing, eight acres summer fallow, and fifty-five acres spring plowing; all the crops were light in yield, and there was little if any difference between the systems of farming; the potatoes could almost be counted a failure, as those harvested were small and immature.

The crops were owned by thirty-eight Indians only, who may be called Master Farmers, and they were assisted by eighteen others who worked for them as farm laborers.

The acreage of crop was pretty evenly divided among these thirty-eight; the largest farmers being Lame Fox and partner, they have twelve acres wheat, one and a-half acres potatoes and half an acre turnips, total fourteen acres. George Howe, as an individual farming alone, came next with six and a-half acres wheat, half an acre potatoes and garden, and a quarter of an acre of turnips, total seven and a quarter acres.

During the winter they have taken two grists of wheat to the Qu'Appelle Valley Mills, two hundred bushels and one hundred bushels respectively, receiving total returns of fifty-four sacks flour or eighteen pounds of flour per bushel.

I made a house to house visit, the women have yet a great deal to learn in the way of housekeeping; there were a good many down sick but the Doctor was visiting them.

Of the thirty dwellings, twenty-four are floored, and all have mud roofs, and are low, one story, one roomed structures; some families are accumulating a few domestic utensils, I counted five cooking stoves, and five box stoves, in as many different houses. Some have coal-oil lamps, most of them have their beds raised on bunks from the floor, and some have tables. I did not observe any destitution, the sick ones and their inability to properly nurse and feed them, was the most conspicuous black spot in their surrounding at the time of my visit.

Through their large trade in hay, for which they have ready sale in Regina, individual members of this band have acquired a number of farming implements, vehicles, harness, &c. Chief Piapot owns two lumber wagons, two buckboards and a set of harness; Rock Chief owns a lumber wagon, a buckboard and a bob-sleigh; Thunder Rock owns a wagon and a bob-sleigh; Naked Widow owns a wagon; Charles Fox owns a wagon; Big Sky owns two wagons, a mower and horse rake and bob-sleighs; Lame Fox owns a wagon, mower and horse rake and bob-sleighs; Two Horns owns a wagon, a mower and horse rake and bob-sleighs; Ka-moot-ah-hen owns a wagon and bob-sleighs. The following own a farm wagon only: Sitting Back, Pee-ay-soo, Suranip, Archir Rock, and Spy Glass, Na-ah-tre; Young Headman owns a wagon and mower.

The earnings of this band by the sale of hay is a remarkable feature of their industry, but as I intend to treat of the agency as a whole in this matter, I will make no further allusion to it here.

Live Stock.

They have one hundred and five head of cattle, namely: Forty-three work oxen, one bull, eighteen cows, eight steers, nineteen heifers, nine bull and seven heifer calves. These animals are in the hands of twenty-four Indians, seven of whom have oxen only, Among them they own one hundred and five horses.

This having been rather a mild winter, most of their cattle ran out, they look pretty well, some oxen are thin, having been hauling hay to Regina nearly all winter. The stables here have not the farmer-like appearance of those of the Wood-Crees, and are more used for their horses, than for their cattle; if a storm is brewing the Indians immediately hunt up their horses and drive them into shelter, leaving their cattle to remain out.

I audited the books and examined into the issues, I found them quite correct. I examined the tools and implements in use, and condemned and wrote off the books such of them as are worn out.

The farmer keeps a horse and a cow, he also has in his charge two steers and a bull calf. He is living in a house which was built for the purpose of a boarding and day school, by the Presbyterian Church; it is admirably suited for a farm house, being commodious and comfortable; the other buildings are in a good state of repair, and are kept in an orderly manner.

The farmer had a crop for the use of his establishment, namely, eight acres oats, one acre potatoes; quarter acre garden, yielding seventy bushels oats, and sixty bushels potatoes; he put up twenty-five tons of hay for his animals.

Pasquah Band, No. 79, Farm 4a.

Farmer Hockley has been in charge of this band since 1882; he was assistant to Farming Instructor Newlove in 1881, and upon his being retired from the position Mr. Hockley was allowed to take his place, and he has managed the work very creditably, and with more or less success, according to the season being favourable for farming or not, ever since.

The band has not been so easily managed, as it was composed of a chief (Pasqua now dead two years) who had a mind of his own, and who, when prosperous, would have his own way, and when a year of adversity arose, wished to dictate the management. A good many of his band are Halfbreeds, and partly civilized Indians, who are naturally improvident, and trust to luck, but since the death of the chief, they are doing better, and with a good crop this year, and a ready sale for dry cordwood in the town of Fort Qu'Appelle, they have got along very well.

They numbered at the last annuity payments, one hundred and seventy-six souls, one hundred and twenty-four of whom are now on the reserve. The absentees are, in a measure, accounted for by a family living at Skunk Bluff, and another family at Turtle Mountain, United States. Nineteen of the children are at the Qu'Appelle Industrial School, and ten are at the Presbyterian Boarding School.

Since 30th June last, the births are entered eleven, and the deaths six.

Farm Work.

The band had ninety-five acres in crop last year, namely: seventy-seven acres wheat, two acres oats, six acres rye, six acres potatoes, two acres turnips, and two acres gardens. The yield was one thousand four hundred and seventy-five bushels wheat, one hundred and two bushels oats, forty-five bushels rye, six hundred and eighty-four bushels of potatoes, two hundred and forty-two bushels turnips. The produce of the gardens was eaten as it grew.

They have gristed a good deal of their wheat, the result being a yield of flour from fifteen to twenty-four pounds to each bushel.

The crops are owned by thirty-six different Indians, the largest farmer being George Asham, who had eighteen acres wheat, one acre oats, quarter acre potatoes, and an eighth of an acre turnips. Coming next to him is Tom Stevenson and Wah-chaw, who had twelve acres wheat and a quarter acre of potatoes. Following these are nineteen with four acres wheat or less, and potatoes, and some turnips, and fourteen raised roots only. The crops were grown upon thirty-seven acres summer fallow, three acres back-setting, and the balance spring plowing, the back-setting proved to be the cleanest and best crop.

There are twenty-nine men on the reserve fit to do a day's work; in this number are included some boys over seventeen years old.

The forty families live in thirty-one houses. Some of the houses may be called comfortable dwellings, while others of them are by comparison mere huts. Tom Stevenson's new house is the best Indian house in the agency, being a story and a half, floored upstairs and down, and comfortably furnished. He has also good stables and a good granary. Although he is "treaty," he is an intelligent half-breed. His wife is a daughter of deceased Chief Pasquah, and owes her domestic knowledge to Mrs. Hockley, who taught her to be a civilized woman.

The following Indians have built new houses since the last inspection : E-chu-was-ce-qua-poo, Wah-chau, Josiah Matoney, Tom Stevenson. These houses are finished with floors, windows, &c., and two of them are story and a-half with thatched roofs. Peter Dubois, James Dubois, Au-ta-pah have new houses, but they are not floored, and have only the ordinary mud roof.

If these Indians had good building timber available, I have no doubt but their buildings would assume a more substantial appearance : as it is, they do pretty well in this way under the circumstances.

Most of them are accumulating useful farming implements, which they have purchased from the proceeds of the sale of farm produce, animals, wood and hay. Tom Le Mack has a waggon and two sets of bob-sleighs. Assinacppo has a waggon. John Asham has a waggon, a share in a mower, a bob-sleigh, and a good set of harness. Go-to-wess has a waggon and bob-sleighs. Ka-kee-ke-sick has a mower, horse rake and bob-sleighs. William Dubois has a waggon. Peter Dubois has a waggon. Albert Asham has a waggon and bob-sleighs. E-cha-was-com-e-qua-poo has a waggon and bob-sleighs. Josiah Matoney has a waggon. Sam Seers has a waggon and bob-sleighs. Antoine Seers has a waggon, bob-sleighs, mower, horse rake. and a light waggon. George Asham has a waggon and bob-sleighs. Tom Stevenson has a waggon, bob-sleighs, cutter, light waggon, plow, harrows, double harness, mower and horse rake. Charley Asham has a share in a mower along with his brother John.

Most of the men of this band are handy about making bob-sleighs, wooden ox collars, &c., and some of them are fair rough carpenters.

The following women of this band have profited by the domestic instruction of Mrs. Hockley, to the extent that they can knit, cut and make dresses, men's clothing, make butter and bread, and perform general housework satisfactorily : Mrs. Stevenson, Mrs. Echias, Maggie Le Mack, Mary Pasqua, Mrs. Tom Le Mack, Mrs. Sam Seers, Mrs. Antoine Seers, Mrs. Thomas Daniels, Mrs. John Le Mack. Nearly all the other women can do rough housework with more or less expertness.

Live Stock.

This band has one hundred and seventeen head of cattle under departmental control, and Tom Stevenson has five head, his own private property. They own seventy horses.

The cattle are in the hands of thirty individuals and are pretty evenly divided. Tom Le Mack has seven head. Wah-chan (Pasquah's son) coming next with six head. The cattle consist of forty-one oxen, twenty-six cows, twenty-two steers, twelve heifers, eight bull and eight heifer calves.

The animals are all domesticated and stabled during the winter, each owner of cattle having a stable which I found to be in good repair, clean, and well provided with hay.

Individual Indians were allowed to kill twelve animals for their own use during the winter, and three were killed and taken into store for general issue.

Standing Buffalo Band, No. 78 (Sioux).

Farmer Hockley has charge of this band also.

It is eight years since I visited this band. They still continue to live in a village in the gulch running up from the lake. Some of the houses have had additions built to them, others have been entirely rebuilt ; a good many of them are now floored ; some contain cooking stoves, chairs, tables, lamps and sleeping bunks. The houses generally were clean. The women and children were fairly well dressed, and appear to be in easy circumstances.

Some eighteen or twenty of the men were at home ; those away were chopping and hauling firewood to the town of Fort Qu'Appelle. They are all strong looking fellows, and look well able to do a good day's work.

When all are at home, there are about one hundred and seventy-five souls in this band, but as they are not paid annuities, and hold their national objection to being

counted, it is difficult to arrive at their exact numbers. Some families visit about a great deal, going away for a week, a month, a year at a time. The working Indians are about one-sixth of the population on the reserve, and number from fifteen to twenty-five.

There are forty dwellings, ten of these have no floors, twenty have the ordinary mud roof, and twenty have thatched roofs; three contain cooking stoves, and four have box stoves.

Some improvements of a permanent nature have been made since the last inspection. Chas-che-cha has built a new house, it has a mud roof, but it is floored. James's son-in-law has a new house; mud roof, no floor. Although this house has no floor, it was particularly clean, and neatly arranged. Chands-pah-wah-tah has a new house and a new stable, the house has a thatched roof and is floored. Pah-dah-nah has a new house; mud roof and a kind of floor. Wee-ah-mah-tappe has a new stable with a ridge pole roof. E-ne-tah-do-tah, a new stable and corral. Moses rebuilt his house; it has a thatched roof, is floored, and very clean. U-ze-che rebuilt his house; it has an ordinary mud roof, and is floored. O-cow-o-pah rebuilt his house; it has a thatched roof, and is floored.

All the fences have been rebuilt, and nearly all the stables. A number of the stables are furnished with staunchions, which is the most convenient and economical manner for confining cattle in their stables.

The band sold large quantities of dry cord wood to the flour mills in Fort Qu'Appelle, the price received was \$2 a cord in trade, or \$1.75 in cash.

There are several Indians who have already commenced to purchase useful articles to assist them in farming. Susie Patrice owns a farm waggon and bob-sleighs and a buggy. My-came-how and Doctor each own a farm waggon. Frank and Moses have each bob-sleighs, and nearly every family has a light waggon.

Farm Work.

They had in crop last year twenty-seven acres of wheat, four acres oats, five acres potatoes, two acres turnips, one acre gardens; total, thirty-nine acres.

Six acres of this wheat was on breaking, and the balance spring plowing. The wheat yielded six hundred bushels, one hundred bushels is being saved for seed, the oats yielded two hundred bushels, twenty are being kept for seed and the balance has either been sold or fed. Turnips yielded seven hundred bushels, and the potatoes a like quantity, of the latter one hundred and fifty bushels have been stored for seed, and the balance are being used by the band.

They have made some preparation for the spring seeding, having thirteen acres summer fallowed. Susie Patrice has six acres, Luswiss six acres, Chunk-how one acre, and four acres fall ploughed.

Thirteen of these Indians farm in severalty, and fifteen others (men and boys) had a common field, containing two acres potatoes, and one and a-half acres turnips. Potatoes and turnips were grown in the gulch, the wheat on the high bench land. The frost came about the same time in both situations.

The births entered since July, 1890, are four, and the deaths eleven. The deaths were principally among children, there being nine between the ages of one and three years.

They have forty-seven head of cattle, under Departmental control, namely, nineteen oxen, eight cows, seven steers, six heifers, three bull and four heifer calves. They are in the hands of fourteen persons, ten having a yoke of oxen and one cow each, the others are distributed in numbers of two, three, four, five and six animals each.

Although the oxen have been worked hard, hauling cordwood to Fort Qu'Appelle all winter (the band's principal source of sustenance), they were in fair condition. The cows and young stock also looked well. They had abundance of hay, having stacked one hundred and twenty-two tons.

Each farmer has a stable and some of them corralls also, they were clean and had the appearance of being well looked after.

They have forty-five private horses. They killed, by permission, six head of their cattle during the winter, for beef.

There is a boarding and day school here, under the supervision of the Roman Catholic Church, it is directed and taught by Mr. and Mrs. Norman Leslie. I visited the schoolroom, there were eighteen pupils present, ten of them were boarders.

Home Farm.

Farmer Hockley raised three hundred bushels oats and twenty bushels potatoes for the use of his farm. He has two horses, two calves and a native mare and colt in his charge, and he put up twenty tons of hay.

He has been living in his new house only a short time. It is a very suitable house for a farmer, being of moderate size, frame, on a stone foundation, having a good cellar. It is situated on a living stream or creek, but he has also a good well with a pump in it.

I audited the farmer's books and checked them with those of the agency. I found both the receipts and issues entered regularly and accurately.

I examined the goods in use and condemned those worn and useless. I also examined the cattle registers, and found them kept according to form, and to agree with the quarterly returns sent in to the commissioner's office.

Instructress Mrs. Hockley makes regular weekly visits to the Indian houses, and encourages the women and girls to come to her for instruction in housewifery. It is well known how difficult they are to deal with being so generally indolent, improvident and naturally of dirty habits, but she has done much to ameliorate their condition. Her influence would be greater had the Indians means to build better houses, for it is hard for them to be neat and tidy housewives in a seven by nine log hut without a floor, and where the whole family live, cook, eat, sleep and use it as a nursery.

Divine service is held every second Sunday by the Presbyterian clergyman at the house of Tom Stevenson. The attendance of Indians is very good; and every second Sunday service is held at the Presbyterian boarding school, where they attend in large numbers.

Muscowpetung Band, No. 80.

E. C. Stewart, farmer, Farm 4b,—This band numbered 125 at the last annuity payment, namely 34 men, 53 women, 16 boys and 22 girls; the number resident on the reserve 96, the absentees being reported at Long Lake; 20 men are classed able-bodied, and able to do a day's work.

They live in 16 houses. These houses are low buildings of logs, with mud roofs, containing one room only. Some of these houses are of fair size, clean, and exhibit an appearance of comparative comfort, while others are small, dirty and overcrowded.

Since 30th June the vital record shows: Births six, and deaths seven (four of them children).

Farm Work.

The band had 63 acres in crop, namely, 52 acres wheat, 7 acres potatoes and 4 acres gardens; yielding 440 bushels wheat and 250 bushels potatoes; 100 bushels of wheat and fifty bushels of potatoes are being kept for seed.

There is a great drawback to farming operations on this reserve on account of the failure to get water on the bench land at a reasonable depth. For this reason it becomes necessary for the Indians to have their houses and stables in the valley. They did not do any fall plowing.

The band had 274 tons hay in stack in October. From this quantity they supplied 76 tons to the Department for the Government herd of cattle, and 71 tons on contract to the Mounted Police. They have not fed much to their own cattle as they regularly stabled only their working oxen.

The farmer planted a small crop, but the yield was insignificant; seven acres oats yielding only seventy bushels, and seven acres rye and half an acre potatoes were a total failure. He put up twenty-five tons of hay for his horse and cow.

The band have ninety head of cattle, namely twenty-five oxen, twenty-three cows, seventeen steers, eleven heifers, six bull and eleven heifer calves, they are on the hands of eighteen Indians. Every ox was worked more or less all winter hauling hay to Regina. They have thirteen stables, which are badly constructed, few of the Indians stable more of their cattle than the working oxen and they do this more to have them handy, than for any kindness towards them. Their ponies receive all their attention of this kind. They have thirty-two horses.

The farmer has a comfortable residence, the premises are kept in a neat and orderly manner. I audited his books, and checked them with those of the agency, I found all goods entered regularly, and the issues agreed with the ration sheets. I examined the goods in use, and struck from the list those worn out.

I checked the cattle registers, and observed that it will take a "round up" to reconcile them with the returns.

Indian Office and Agency Buildings.

The agency buildings consist of agent's house, clerk's house, office storehouse, carpenter and blacksmith's shop, stables &c., they were all freshly painted last summer, and are in good repair. They are kept in a manner creditable to the department.

I audited the books, and after taking stock compared the same with the balances of the different accounts.

I also examined the goods in use and condemned those worn out.

The office work had been performed in a regular manner, and systematically, Letters and circulars received, copies of farm returns and agency returns were properly filed.

Vital Statistics.

The records for the fiscal year 1890-91 shows total births twenty-four, total deaths seventy-seven.

An account is kept of the individual earnings of the Indians of this agency; from 30th June 1890 to 31st March 1891, the gross earnings of all the bands are entered, and amount to \$5,527, this amount is made up as follows, for sales of fire wood, \$1,081, for sales of hay, \$3,407, for sales of beef, \$228, miscellaneous earnings \$810.

In reviewing the work performed in this agency, I would wish to give honour where honour is due. Mr. Lash is a most efficient Indian Agent, and the Instructors are experienced men in the management of Indians. The present standing of the Indians has been reached by years of patient teaching and good example. The families of the officials have not been without their good influence, upon the women of the bands, kind measures have been at work in that direction, and their good effects can be seen in every Indian household.

I have the honour to be, Sir,

Your obedient servant,

T. P. WADSWORTH,

Inspector Indian Agencies.

SCUGOG RESERVE.

SCUGOG, ONT., 26th, October 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement for the year ended 30th, June 1891.

I have no material changes to note in the affairs of the Scugog Band since my last report. Farming operations have been carried on as usual, and have proved fairly successful, some of the Indians raising large crops of wheat, oats and peas, the crops turned out much better than last season. I have never seen their garden crops looking as well

as this year, large quantities of potatoes and corn were raised by several of the Indians, the result of care and industry. I also report with pleasure, that the use of liquor among the band is becoming less every year only a very few of the Indians are addicted at all to drink, and I yet hope to see this degrading and injurious habit thoroughly and completely stamped out. The hotel keepers and dealers will not sell any Indian intoxicants, but a few besotted wrecks of white men still run the risk of procuring them whiskey occasionally, but I will sooner or later convict these parties, and when caught I intend punishing them so severely, it will prove a lesson to others.

The good fishing still proves a source of considerable profit to this band, not only during the summer months, but all through the winter as well. They succeeded in taking with hook and line through the ice large numbers of fine bass, all they wanted for home consumption, besides shipping every week quantities to Toronto and other points, getting for them eight and nine cents per lb. (whole) for all they could ship, fully supplying the Toronto market. I have tried to make as careful an estimate of fish taken, as possible, but owing to the large quantities used for home consumption, it is hard to arrive at an exact estimate.

I am glad to report, that most of the Scugog Indians are almost free from debt, and with a very few exceptions are comfortable, contented and happy.

I have the honour to be, Sir,

Your obedient servant,

GEO. B. McDERMOT,

Agent.

RIVER BOURGEOIS, N.S., 1st October, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—In forwarding my annual report, with tabular statement, on the state of the Indians of this district, I regret to have to say that the Indians suffered severely the last winter and spring from the ravages of "la grippe," which has been epidemic among the Indians, as well as among the white people, in this part of the country. The services of two physicians were required for a time to render needed medical aid to the plague-stricken people; and, notwithstanding the best efforts of these gentlemen to save life, a number of children and three or four adults succumbed to the disease. At present all are well, and no traces of the sickness are to be found among them.

In regard to their circumstances, I do not know that any improvement can be reported; and there is no indication, at far as I can see, of any increased interest being taken in the work of cultivating the land. I find these Indians more inclined to the occupation of fishing than that of farming. They own a few large boats, which they built themselves, and those who are able to get the necessary outfit make a fairly successful fishing.

The school on the reserve continues in operation. Those children who are regular in attendance make fair progress. A number of families move away during the summer months into neighbouring towns and villages, and their children are on this account deprived of the benefits of the school for a considerable portion of the year.

The new church on Indian Island has been opened this year for divine service. It is a neat and commodious edifice, well built and comfortably furnished—a lasting credit to the faith and religious zeal of the Indian population and to all others who contributed towards the good work. The Indians of the whole island are sincerely grateful for the substantial aid granted by the Department—at this time so much needed. And I also beg to take this opportunity of thanking the Government for the timely assistance thus afforded the poor Micmacs of Cape Breton.

I have the honour to be, Sir,

Your obedient servant,

M. McKENZIE,

Indian Agent.

NORTH-EASTERN SUPERINTENDENCY,

CHATHAM HEAD, N.B., 17th October, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my report for the year ended 30th June, 1891, and tabular statement of Indian matters in connection with the lands under my superintendency.

Eel River Reserve, Restigouche County.

There is little to report different, from my last, in connection with this band; they follow the usual avocations—fishing, labouring for white men, and a little farming, the latter not receiving as much attention as it might, although the chances for farming are not very good.

They have been cut off from their fishing by changes in the local fishing regulations, but are fairly comfortable.

Papineau Reserve, Gloucester County.

The Indians who remain on this reserve and exert themselves are very comfortable; they can earn a great deal acting as guides, the Nepisiguit being famous for its salmon and trout fishing. Their land is good, and they are able to cultivate it. Some of them hunt in the winter, and do well with the pelts they have to sell. The Indians who have left the reserve are not doing well.

Red Bank Reserve, Northumberland County.

This settlement, on the Miramichi, lies at the mouth of the Little South-West River, on the Main North-West, both fine rivers for fish, but the laws are so stringent the Indians derive little benefit from fishing.

Their land is good, and any of them who give it their attention can make themselves comfortable.

There is quite a village near, with saw and grist mills, and they have good opportunities of helping themselves if so disposed. They have also a neat chapel and resident priest.

Eel Ground, Northumberland County.

This reserve has a large population. It is nicely situated on the Main North-West branch of the Miramichi; the land is very fair and yields good crops. There are a number of comfortable houses, a neat church and school-house. The priest of the district visits them at stated times, and the school teacher, Mr. Michael Flinn, endeavours to impress upon the children the necessity of attention to their studies. A number of the men work in the ships and mills during the summer, earning a good deal, but they suffer from the use of liquor, which it seems impossible to keep from them.

Burnt Church, Northumberland County.

This band is not as comfortable as it ought to be, considering its many advantages. This land is fair, and they have fishing nearly all the year round. They have an old church, which is kept in good repair, and a very good school-house, under the charge of a young lady.

This reserve has the largest population of any in my superintendency, and at their great festival of Ste. Anne they have a number of visitors, and all work is suspended for a week for its celebration

Big Cove, Kent County.

This is a fine reserve, and the Indians are in good circumstances; their land is very good, and they give a good deal of attention to fishing, and to the manufacturing of rustic furniture, for which they are well paid. They also work in the mills in summer and in the lumber camps in winter. There is a nice church in good repair, and they are determined to keep it so

Indian Island, Kent County.

This band depends chiefly on fishing. The reserve is small, and the land not very good, but they raise more or less crop every year. They have a nice church, and deserve credit for the use they have made of their opportunities.

Buctouche, Kent County.

This is as good a reserve for farming purposes as any in the superintendency, but it is now partly settled by white men. Many of the Indians have left, but those who remain are fairly comfortable, and can do very well by fishing and farming.

Shediac, Westmoreland County.

This band is not improving. The Indians as a rule do not try to improve, and their roving propensities are fostered by the ease with which they can move about by rail, and the bad effects are seen in their condition. A few of them living on the Abonshagan, below Shediac, try to farm a little, and were more comfortable than the majority.

Fort Folly, Westmoreland County.

This band has a poor chance, the land being poor and no firewood on it. The Indians manufacture their wares, and fish a little. They also have a church on the reserve. There is a stone quarry quite near, but that is work which they do not appear to try.

I cannot say that this band is improving. There is little or no change; they move along in the usual way, and will always do so. There appears to be a little ambition and a desire to improve in some sections, but the majority are careless, thinking only of the present, and feel as if the Government should give them whatever they want.

Notwithstanding the stringency of the regulations regarding the sale of spirituous liquor to the Indians they do procure it, and are made miserable by its use. I trust we may by some means be able to put a stop to it.

I have the honour to be,

Your obedient servant,

CHAS. SARGEANT,

Indian Agent.

BATTLEFORD INDUSTRIAL SCHOOL,

BATTLEFORD, 29th September, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit herewith my eighth annual report of the Battleford Industrial School, also inventory of all Government property under my charge.

It is most gratifying to report that the instruction imparted to the Indian youth in all departments during the past year has been attended with excellent results.

In the class-rooms the pupils continue to make good progress under the able tuition of Mr. and Mrs. Ashby, who have worked faithfully in the discharge of their respective duties. The half-time system has worked admirably, thereby giving all the pupils half a day in the class-room and half a day at industrial training, thus making the best possible use of the time.

Attendance.

We commenced the year with fifty-six pupils on the roll and closed with one hundred and twenty, thus materially augmenting the number in a few months. A number of these children were procured from the Duck Lake and Carlton agencies by the Commissioner and myself during the winter.

No objections were raised by the Indians on account of the long distance, as they were willing to send their children in the coldest season of the year.

The fact that the Indians are becoming more and more civilized and christianized is very evident, together with the fact that they have an ardent desire to acquire knowledge, and to have their children trained to become useful citizens. This system of industrial schools appears to be the best channel through which to convey this knowledge.

TRADE INSTRUCTION.

Carpenter's Shop.—Mr. Gatley continues to be in charge of this department. During the past year the total earnings amount to \$630, that is for work done for the institution, reserves and agency. The pupils worked well, were obedient, and exhibited their skill in the work accomplished by them, our main object being to give them a thorough practical training.

Blacksmith's Shop.—During the early part of the year our blacksmith, Mr. McKinnon, was suffering from consumption, and could not devote full time to his work. He was a faithful, skilled and energetic man. He expired in the month of January. Since then the shop has been kept regularly open, and the pupils made good progress. As in previous years, all blacksmithing for the reserves and agency has been performed by our boys and smith.

You will be pleased to know that several pupils have left the school during the year, and are now termed "out-students."

From reports received from their guardians or masters, I have much pleasure in stating that they are giving general satisfaction. One main object before us is to keep a watchful care over those who leave the institution, and follow them through life, to be able to judge of the results of this training.

Two boys are running the grist and saw-mill at Onion Lake. Another has been transferred to Emmanuel College, Prince Albert, to be further instructed as a teacher.

Those who were trained as farmers have taken up land on the reserves and are retaining the civilizing influences and doing well.

Female Department.

The female pupils have made excellent progress in sewing, cooking, washing, ironing, general housework, etc., under their respective teachers, performing their duties cheerfully and satisfactorily; those in service are doing remarkably well and are highly spoken off by their guardians.

With increased accommodation, a greater number of girls could be advantageously trained, as there would be no difficulty in procuring them from the Duck Lake and Carlton agencies, and a great many more could be found in this district. An addition of forty by fifty feet would meet our requirements.

Improvements.

During the year the following improvements have been made:

A new laundry, with drying-room upstairs, properly fitted up.

Principal's residence, thirty-four by twenty-two feet, two stories and a kitchen twenty by sixteen feet. This was built by our carpenter and boys, with the assistance of one man for a short time. The work was performed in a neat and workmanlike manner. The building is warm and comfortable.

The windmill also was completed and works admirably.

A first-class system of fire protection was also laid throughout the whole building, a large tank being placed in the attic of the main building, with over-flow pipes to fill other tanks, thus enabling us always to have a good supply of water on hand.

The boys' and girls' lavatories have also been fitted up with baths, wash basins and a good supply of water. The attic of the new addition has been lathed and plastered, and made into a comfortable sewing and knitting room. The basement has also been lathed and plastered, and is now a comfortable play-room for the girls.

The drain which was laid last fall seven hundred feet in length has been a great boon to the institution, and rendered it much more healthy.

All the improvements have been made in the right direction, and show the good judgment of the Commissioner in expending the money to the best possible advantage, and the results are very marked.

The sanitary condition of the children has been generally good. There has been only one death during the year and that from consumption.

To complete the requirements of the institution we need a new hospital, blacksmith's shop and recreation room for the boys.

The pupils have made good progress in speaking the English language, and still continue to improve in this respect.

I cannot close without expressing my appreciation of the great interest taken in the institution by the Commissioner, and for the valuable aid rendered by Agents Williams and McKenzie in obtaining pupils for the school.

I have the honour to be, Sir,

Your obedient servant,

T. CLARKE,

Principal.

METLAKAHTLA, B.C., 28th October, 1891.

To the Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward to your Department my annual report and tabular statement for the North-West Coast Indian Agency for the year ended 30th June, 1891.

The Indians of this district are as quiet and peaceable as they can be after such a turbulent time as existed for many years amongst them.

Those of the northern portion of the district have not earned quite as much money at the salmon canneries this year as formerly, owing to a partial failure of the salmon run on the Skeena and Naas Rivers.

Many of these Indians went to the hop fields of Puget Sound for employment, where they also failed to obtain much labour, and realized but little profit.

The high price of furs, however, and the many new employments furnished for Indians by white settlers, and new salmon canneries being constantly built, together with the ease with which Indians can procure abundance of shell fish and venison, renders their subsistence practically safe at all times.

Of course there are always a few destitute helpless ones requiring slight assistance by the Department.

The reservation of Indian lands in this district having been completed this year by the Reserve Commissioner, the land agitation and consequent hostile feelings will gradually vanish.

These Indians are amply provided with land.

The little steamer *Vigilant*, belonging to the Department here, has been very useful this year, not only to your agent, but also in otherwise assisting Government work on the coast.

The steamer has been greatly improved this year by the addition of a new brass propeller and some alterations which were made to the machinery.

The Metlakahtla Industrial School has been most successfully conducted this year also, the Principal Mr. Scott having secured the entire confidence of even the educated agitators amongst the Indians, who at first proclaimed aloud that the "Government school would prove an additional snare to the poor Indian."

There were many deaths amongst the Indians of some bands last spring by influenza, notably the Hydah, the Kitkahtlas and the Kitek-shaus.

The missionary doctors and teachers deserve great credit for their enthusiastic work among and attention to sick Indians, one doctor having had no less than eighty patients daily for about three weeks, and attending to them at their different cabins. The missionary teachers provided many necessaries and comforts for the sick people.

The principal place of sickness was at the Skeena River canneries.

The completion of a new hospital at Metlakahla for Indian and white patients has already been a great blessing to many sick Indians.

The deaths caused by "la grippe" are, partly, the cause of a decrease in the numbers of some of the bands.

The notable increase to the populations of Bella Bella and China Hat is caused principally by the absorption of the entire band of Coquettes, whose village was destroyed by fire last year.

Several buildings at Metlakahla were unfortunately destroyed by fire last May, causing the destruction also of the agency building and office, together with some Government property of small value.

Another new and commodious agent's residence and office is being constructed at Metlakahla.

The Indians of this district have been supplied this year with the usual amount of free medicines from the Indian Department through the missionaries and medical men here, also with such garden seeds as they require, and they have no reasonable grounds for complaint in any respect, either against the white settlers and traders in the district or against the Government.

I have the honour to be, Sir,

Your obedient servant,

C. TODD,

Indian Agent.

INDUSTRIAL SCHOOL,

METLAKAHTLA, B.C., 2nd November, 1891.

The Honourable
The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward herewith an inventory of the Government property under my charge, and also to submit the following as my report for the fiscal year ended the 30th June last.

At the commencement of the year twenty-two pupils were in the school. Three more were shortly afterwards admitted, and the increased number, twenty-five, was maintained until about the end of the year, when it was reduced to nineteen.

In the beginning of April the epidemic influenza known as "la grippe" visited the Indian village here, and shortly afterwards extended to this institution, attacking all officers and pupils, except the trades instructor and two of the boys. Charles Wesley, a bright little Hydah, the first attacked, although tended with much care, died after a month's illness. Trade and class instruction was suspended for three weeks. The want of sufficient accommodation was much felt. My office and sitting-room had for three weeks to be set apart for the treatment of the worst cases. Bishop Ridley, the Rev. R. W. Gurd, Mr. Agent Todd and Miss Dickenson kindly extended to the school their sympathy and assistance.

Under class instruction the progress of pupils, with two or three exceptions, has been satisfactory. The elder boys, who were admitted during the first year of the school's existence, understand and speak English fairly well.

Thirteen boys received some instruction in carpentry—the trade likely to be of the greatest service to them on leaving—and the most of these exhibit an aptitude for the work. The instructor with their help, built a work-shop, drying-room, fowl-house and wood-shed, besides making clothes-presses and other articles of furniture; and with the

help of the pupils generally, kept our roads, etc., in repair, and attended to the fatigue work of the institution.

Such changes as have been made in the *personnel* of the staff have much improved the working efficiency of the school, besides effecting a saving in payments under "salaries and wages."

Dr. Ardagh, on many occasions during the year, kindly visited and prescribed for the pupils without making any charge.

The conduct of the boys continues good, and a spirit of contentment prevails in the school.

I have the honour to be, Sir,

Your obedient servant,

JNO. R. SCOTT,

Principal.

VICTORIA, B.C., 16th November, 1891.

P. O'REILLY, Esq.,

Indian Reserve Commissioner,
Victoria, B.C.

SIR,—I have the honour to present the following report, covering the past season's work.

In obedience to your instructions of the 3rd of April, I organized a party and left Victoria on the 15th of that month for Nass River, for the purpose of completing the surveys of the Kincolith, Stony Point and Grenville reserves, arriving there on the 20th.

Having finished the above mentioned work, I proceeded to Observatory Inlet on the 2nd of May, and there continued the surveys which were begun by me last season.

On the 21st of May I started for the head of Portland Canal, and surveyed the three reserves in that locality. This completed the survey of all the allotments which had been made to the Nass River Indians.

On the 6th June I took passage per steamer "Danube" for the Skeena River, where I surveyed three small reserves for the Tsimpsan Indians.

I was greatly detained through stormy weather, both on the Skeena River and while *en route* to Lowe Inlet, and did not arrive at that place until the 19th of June. Here I surveyed the Kumowa reserve for the Kitkahtla Indians.

I then moved camp to Hartly Bay, and surveyed the Kul-ka-yu reserve belonging to the Kitkahta Indians, and thence to Kitkahtla Bay, where I surveyed all the reserves which had been allotted to this tribe.

On the 15th of July I moved camp to Kitimat, and completed the survey of the reserves for that tribe.

From Kitimat I moved to the head of Gardner Inlet, where I surveyed three reserves for the Kitlope Indians, and then returned to Hartly Bay, where I arrived on the 18th of August.

While at Hartly Bay, I received instructions from you regarding the survey of additional reserves allotted to the Kitkahtla Indians, and I decided first to survey all those which were in exposed positions on the coast, and on the 19th of August I left Hartly Bay with this end in view and surveyed Pa-aat, Klap-thlon, Kul and Key-ar-ka reserves, returning to Dolphin Island on the 3rd of September.

I had great difficulty in carrying out my work on this island, owing to the continuous stormy weather and the roughness of the coast line, which I found greater in extent of mileage than I anticipated. I also surveyed Grassy and Sand Islands for this tribe.

Owing to the inclement state of the weather I deemed it advisable to strike camp and move to Hartly Bay, but while *en route* for that place I was picked up by the steamer "Princess Louise," where I met you, and having explained how inadvisable it would be to retain the party in the field longer, I received your instructions to report at Victoria, after completing the survey of the Alert Bay industrial school reserve.

This I did, and arrived in Victoria on the 1st of November, where I paid off my party, having first carefully stored the camp equipment.

I have enclosed a schedule showing the reserves surveyed and the number of miles run. This return is not very large, owing to the great distance which the reserves are apart, the total distance covered by canoe for the season being 825 miles.

I have the honour to be, Sir,

Your obedient servant,

F. A. DEVEREUX,

Indian Reserve Surveyor.

VICTORIA, B. C., November 16th, 1891.

HON. P. O'REILLY,

Indian Reserve Commissioner, Victoria, B.C.

SIR,—In obedience to your instructions of the 8th May last I left Victoria on the 13th of the same month with a party of five men via Canadian Pacific railway for Ashcroft where I took the British Columbia Express company's stage and travelled over one hundred and fifty miles north to Soda creek on the Fraser river, and surveyed the reserves at Soda creek and Deep creek.

On the 15th June I crossed the Fraser river and proceeded to the Toosey Indian Reserve in the Chilcotin District forty-five miles from Soda creek. Here I surveyed the reserve and hay meadow for these Indians, and also examined the ditch at the head waters of Mackin river to report on the practicability of diverting the head waters of said creek into the north fork of Riskie creek.

On 3rd July I left Riskie creek and travelled forty-five miles west to the Anahan Reserve on the Upper Chilcotin river. I surveyed the main reserve of these Indians, and as they strongly objected to the survey of their hay meadow, claiming that they should get it all, I deemed it advisable to defer this survey until I received further instructions.

On 20th July I crossed the Chilcotin river to the west side a few miles above Hanceville. The river at that time of the year being very high I experienced great difficulty in crossing my outfit which I managed however without accident. I then surveyed the reserves for the Stone Indians, and recrossed the Chilcotin river, where with my party I proceeded in accordance with your instructions recently received to the hay meadow of the Anahan Indians and surveyed this reserve.

On 14th August I left the Anahan Reserve in Upper Chilcotin and started for Canim lake in Lillooet District. On my way there I laid over one day (18th August) to survey the Toosey Indian Fishery situate on the Fraser river a few miles below the mouth of the Chilcotin. Then continued via Chimney creek and the Cariboo road, reaching Canim lake, over one hundred and sixty miles from the Anahan Reserve, on 18th August. I there surveyed the reserves for the Canim Lake Indians.

On 15th September I started with my party by the Cariboo waggon road, and travelled eighty miles to the Bonaparte river a few miles above Cache creek, where I surveyed an addition to the old reserve for the Bonaparte Indians.

On 28th September I left the Bonaparte Reserve and travelled by team and the Canadian Pacific railway, via Ashcroft to Spatsum. Here I also surveyed an addition to the old reserve, and made some alterations in the old surveys, then proceeded with pack horses eighteen miles east to Highland Valley, where I surveyed the hay meadows for the Cook's Ferry Indians.

On 17th October I left Highland Valley and travelled by pack horses to Spence's Bridge, where I surveyed an addition to the old reserve of the Cook's Ferry Indians, situate about one mile south of Spence's Bridge on the Canadian Pacific railway, and completed my season's work on 2nd November.

Leaving Spences' Bridge the same day with my party, I arrived in Victoria the following night and stored my outfit as instructed.

During the season the weather was favourable throughout, as we did not lose more than five days altogether. We had frequent summer frosts in the high lands, but nothing occurred during the trip to delay the progress of the survey.

Appended hereto is a schedule showing the reserves surveyed and mileage chained by me during the season.

I have the honour to be, Sir,

Your obedient servant,

O. FLETCHER, *D.L.S.*

RETURN of Indian Reserves, showing mileage during season of 1891, as surveyed by
O. Fletcher, D.L.S.

Date Commenced.	Tribes and Reserves.	Chains.	Miles.	Remarks.

O. FLETCHER,
D.L.S.

VICTORIA, 9th November, 1891.

INDIAN RESERVE COMMISSION,

VICTORIA, B.C., November 17th, 1891.

The Honourable

The Superintendent General of Indian Affairs,

Ottawa.

SIR,—I have the honour to forward, for your information, my report of the work performed during the past year by the Reserve Commission and by the two parties employed in the survey of Indian Reserves in British Columbia.

As previously reported to you, Mr. Devereux and party, acting under my instructions, on the 5th April proceeded to the north coast to complete the survey of reserves for the Nishgar tribe of Indians which were left unfinished last year. Mr. Devereux commenced his work on the Nass River, and from thence proceeded to Observatory Inlet and Portland Canal. He was afterwards employed in a similar manner at the mouth of the Skeena River and at Douglas and Gardner Inlets, where he completed the work entrusted to him. I had intended that Mr. Devereux should survey the several allotments for the Kitkahtla Indians, in which case the work on the entire coast of the mainland would have been completed, but owing to the boisterous weather prevalent at the time he was unable to visit some of the outlying fishing stations, and the rainy season having evidently set in, the party could no longer be worked to advantage. I therefore directed him to return to winter quarters. It is to be regretted that this course was necessary, as it will entail the expense of sending a party to that district next season for work that will occupy only a month or six weeks, should the weather prove favourable.

Taking into consideration that the weather during the whole summer has been so unpropitious to surveying operations, Mr. Devereux's returns show that he accomplished a fair average of work, and I have reason to be satisfied with him in every respect.

As directed in your letter of 13th April last, I informed Mr. O. Fletcher, D.L.S., that he had been appointed surveyor to the Indian Reserve Commission, and that gentleman reported himself for duty on the 1st May. With as little delay as possible I furnished him with the necessary instructions to enable him to commence operations, and having formed his party he proceeded to the interior of the mainland. He subsequently took the field, and surveyed the various reserves for the bands of Indians resident at Chilcotin, Soda Creek, Canim Lake, Bonaparte and Cook's Ferry, returning to Victoria on the 3rd November.

Your telegram of 13th June having conveyed to me your approval of my suggestions with regard to defining reserves for the Kitkahtla tribe of Indians on the various islands situated in Queen Charlotte Sound, I proceeded to Lowe Inlet in the steamer "Sir James Douglas," and having taken on board Mr. Agent Todd and an interpreter, I visited the island situated in the archipelago between the coast of the mainland and the Queen Charlotte group of islands, and I set apart fourteen reserves for the use of the above named tribe, in addition to those previously defined by me in 1882.

The allotment of reserves for Indians on the entire coasts of the mainland and of Vancouver Island is now finished.

To further carry out the arrangement approved by you, I again left Victoria on the 17th August in the steamer "Islander" and went in her to the mouth of the Skeena, and ascended that river in canoes to Hazelton, a distance of 190 miles. At this place I was joined by the local agent, Mr. Loring, who accompanied me during my stay in his district.

I visited and completed the allotment of reserves for the several bands of Indians resident at Babine Lake and on the Howgwilget River, and I also made reserves on the Skeena River at Hazelton, Kitsegucla, Kitselas and Kitsumkaylum. I found the distances to be travelled far greater than I had been led to expect, and the trails in many places were almost impassible, which is to be accounted for by the fact that this part of the country is very little travelled by white men. These unforeseen difficulties, and the absence of the Indians from some of the villages, rendered it impossible for me to accomplish all that I had intended to do.

While a few of the Indians objected to reserves being made at all, on the ground that the whole country was virtually theirs, by far the greater number appeared glad that the land question was about to be finally settled, and expressed themselves well satisfied with the extent of the reserves I defined for them.

I append the reports of the surveyors, Messrs. Devereux and Fletcher, together with schedules showing the reserves surveyed and mileage run.

I have the honour to be, Sir,

Your obedient servant.

P. O'REILLY,

Indian Reserve Commissioner.

PENETANGUISHENE AGENCY, 23rd November, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report and tabular statement of the Chippewa Indians of Beausoleil Band, for the year ended 30th June, 1891.

The population is now three hundred and fifty-seven, an increase of nine since last year. The increase by birth was thirteen, by immigration eight; decrease by death six, by emigration six. The deaths were all from natural causes, there being no epidemic of any sort on the reserve.

Their farm products are a little in advance of last year, and I believe they will now give more attention to farming than heretofore, being so much encouraged by the good returns they got and the excellent quality of the grain and potatoes.

The school on the reserve is still conducted by the same Indian teacher, Alfred McCue, and he takes great pains, and is certainly bringing the children on well who attend regularly.

Chief Samuel Assance has been elected for another term, and I must say I approve of the choice. I have always found him to be most honourable and painstaking, and of good moral character.

From the appearance of this year's crop, together with the fish they usually take, I think they will be amply provided for during the coming winter.

I am much pleased to find, from year to year, that there is much less intemperance, and during the past year only two cases of intoxication by Indians of this band came under my observation.

I think in every respect they are becoming more prosperous and comfortable.

I have the honour to be, Sir,

Your obedient servant,

H. H. THOMPSON,

Indian Agent.

MANITOBA SUPERINTENDENCY, OFFICE OF THE INSPECTOR,
WINNIPEG, 28th November, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to enclose herewith my fourteenth annual report of inspection of the different Indian agencies and reserves under my supervision in Treaties 1, 2, 3 and 5.

I am pleased to inform you that the advancement in civilization of the Indians within this superintendency is reasonably satisfactory, considering their inflexible adherence to the wandering and improvident habits inherited for generations unknown

[PART 1]

177

from their untutored ancestors, who followed a roaming life over boundless prairies and through interminable forests in pursuit of a precarious subsistence. It is therefore evident from their nomadic habits that they had neither gardens nor dwelling-houses until the advent of fur-traders and missionaries among them two centuries ago, when the first glimmering rays of civilization penetrated through the clouds of ignorance and superstition which overshadowed their mental horizon for countless ages. Those intrepid English and French pioneers endured untold privations in establishing trading posts, missions and schools among these hostile savages, who attributed any calamity befalling them to those enthusiastic adventurers, and therefore frequently cruelly massacred them. Under those unfavourable and discouraging circumstances, these wild hunters and implacable warriors were gradually instructed in cultivating the ground for their livelihood, and in building rudely-constructed log-cabins, thatched with native grass or covered with cedar bark, for their protection from the severity of their hyperborean winters. Hence, when the Government negotiated with them, about twenty years ago, for the surrender of their lands, many of them were domiciled in the vicinities of the principal trading posts established throughout the country, and were annually raising considerable quantities of potatoes and corn, especially at St. Peters, Fort Alexander, Norway House, The Pas, Fairford, Islington, Lac Seul, and at some other trading centres ; but their transition from barbarism to civilization has been materially accelerated since the Government assumed the management of their affairs, in allotting them valuable reservations, giving them a stipulated amount of annuity money, supplying them with cattle, seed-grain, carpenters' tools, agricultural implements, dispensaries and schools ; and appointing teachers, physicians, agents, inspectors and superintendents to provide for their mental and physical requirements. The progress made by them under this intelligent policy resulted in their possessing at present three hundred and nineteen horses, two thousand six hundred and thirty head of cattle, six thousand five hundred and forty-seven bushels of wheat, seven hundred and sixteen of corn, two thousand eight hundred and fifty-two of oats, two thousand three hundred and forty of barley, fifty-one thousand two hundred and twenty-eight of potatoes, six thousand four hundred and fifty-nine tons of hay, one thousand four hundred and fifty-seven dwelling houses, seven hundred stables, fifty school houses, two industrial institutions, some mowers, reapers, threshing machines, and a large number of tools, implements, boats and canoes. There is no authentic history nor reliable tradition to enable us to determine the origin of the Indian race, but it is evident from the grammatical construction of their language and the perfection of its conjugations and declensions that they, at some remote period, had been a highly-cultivated and enlightened people, but subsequently degenerated to barbarism, and all their literature was ruthlessly obliterated by the waves of time. It is therefore difficult for them to regain the social and intellectual position once happily occupied by them, and consequently the utmost patience and perseverance are absolutely necessary in developing their dormant faculties and in elevating them to the moral, physical and intellectual plain of an independent, enlightened and prosperous community. The sudden disappearance of the buffalo and the fast-approaching extermination of game and fur-bearing animals are accomplishing a wonderful revolution in compelling them reluctantly to abandon the unprofitable pursuits of the chase and follow the example of those enterprising settlers who are beginning to extensively cultivate these fertile, undulating prairies, destined before many years to supply the markets of the world with their magnificent productions of horses, cattle, sheep, hogs, fowls, cereals, roots and vegetables.

The opportune and judicious restrictions placed upon fishermen by recent regulations of the Fishery Department, in limiting their operations for commercial purposes, to the northern port of Lake Winnipeg, where they can carry on immense traffic in the finest white-fish in the Dominion, without interfering with the fisheries of the Indians in other parts of the lake, have largely protected the interests of the Indians without diminishing those of fishermen, who I am credibly informed have exported more white-fish during the present season, than in any previous one, and the Government is to be congratulated on having so admirably succeeded in effecting an amicable solution of

this intricate question which seriously threatened the most disastrous consequences to our impoverished Indian population who were apprehensive of starvation if this unrestricted traffic continued much longer, unless they were supported out of the public treasury, like their dependent kindred in the North-West Territories inasmuch as the lakes and rivers of the north lands from which they obtained their principal supply of food would, before many years elapsed, be utterly depleted of their choicest fish. I consider that not only the Indian agents are deserving of the everlasting gratitude of the Indians for their faithfulness in reporting to the Department the improvident destruction of their fisheries by American fishermen, or their accredited agents, but also his honour, Governor Schultz for the profound and uncompromising interest he manifested in the protection of their valuable fisheries from depletion, before they would be irretrievably ruined, and towards everything pertaining to their temporal welfare. Mr. Superintendent Wilmot likewise deserves a passing allusion for the invaluable services rendered by him in ably reporting to his minister the actual condition of the fisheries here, and in suggesting practical remedies for their better protection.

The position of the Indian agents in the superintendency had formerly been only a sinecure in comparison to what it recently has been, as the various duties incumbent upon them are annually increasing, such as visiting schools, examining quarterly returns from teachers, dispensing medicines to the sick, issuing rations to the destitute, giving instruction in agriculture, preventing trespasses on fishing and other reserves, making payments of annuities, obtaining statistical information preparing estimates for the next ensuing year, attending to the general correspondence of their respective agencies, etc., but notwithstanding these accumulated responsibilities, I am happy to inform you that those disciplined officers are performing these multifarious and laborious duties in so commendable and satisfactory a manner, that it is very exceptional now when any irregularity is discovered in all their transactions. I cannot omit in this connection to pay a passing tribute to the sterling worth and uncompromising integrity of the late lamented Indian Agents, Messrs. George McPherson, sen., of Assabaskasing, Lake-of-the-Woods and James McCracken of Coucheching, Rainy Lake, who laid within the present year, their unsullied official garments aside in death.

Since the appointment of Drs. Orton and Hanson as medical superintendents for the Claudeboye, Rat Portage, Contcheching and Savanne Agencies, they have been periodically visiting the different Indian bands immediately under their charge, and occasionally those of other agencies; prescribing treatment to those requiring it, and performing surgical operations when considered necessary. It is certainly due to Dr. Orton that I should mention a remarkable instance of a successful operation he performed at the Pas, in 1890, on a little Indian girl who was suffering from increase of the knee-joint and of the entire femoral bone, which he carefully removed without injuring the periosteum in which, he assured me, another bone was forming, but I doubted his judgment in attempting such an undertaking considering the surroundings unfavourable to the recovery of his patient, until I visited the Indian school there last summer and observed her standing in her class apparently in excellent health.

Messrs. Macrae and Betourney, the Inspectors of Protestant and Roman Catholic Indian schools, report that the majority of the teachers employed are incompetent; that the schoolhouses are generally inferior structures; and that many of them are provided with unsuitable furniture; and therefore recommend that more capable and enthusiastic educators be secured, and that better, more attractive and commodious buildings, supplied with patent seats, desks and other modern improvements, be substituted in place of those now in use. Now, although these representations are mainly correct, yet it must be remembered, that it is utterly impossible to secure, at the present salary of three hundred dollars per annum offered for a daily average attendance of up to twenty-five pupils, the services of efficient teachers to isolate themselves from congenial surroundings and live on remote reserves, with nothing except their own wandering thoughts to entertain them and while away the dismal hours, and with only that blessed hope for better days which springs eternal in the human breast to reconcile them to these solitudes, when they can easily obtain double the remuneration for conducting pro-

vincial schools where the enjoyment of kindred society, and all the advantages of civilization are accessible to them. I beg respectfully to submit in vindication of the inferiority of the schoolhouses and furniture complained of, that I venture the assertion without the slightest apprehension of any successful contradiction, that no public money has ever been expended more economically and advantageously by any Government of the Dominion, than in constructing and furnishing these buildings for the small amount of one hundred dollars appropriated by Parliament for the purpose, and I consider, that they were admirably adapted for the temporary purposes for which originally they were intended in opening schools on the reserves in compliance with the obligations in the conditions of the treaty made with the Indians. It would, in my opinion, be most unwarrantable for the Department to incur enormous expenses in supplying every reserve in this Superintendency with elegant and elaborate schoolhouses before it had any reasonable assurance of a sufficient attendance of pupils to justify such an outlay, more especially as the Indians were generally scattered all over the country fishing and hunting and would not, therefore, in all probability permanently settle on their reserves to any extent until many of these buildings would be rotten. It is a recognized physical law that it is necessary for children to creep, before they are capable of walking, so likewise it is equally absolutely essential in the intellectual development of the Indians, that primitive log schoolhouses should precede elegant structures with modern improvements and conveniences, but as the usefulness of many of these schoolhouses is gone, I respectfully would recommend that more substantial buildings, furnished with all modern conveniences be substituted in their places wherever the attendance will justify the Department in incurring the necessary expenses in connection therewith.

The number of Indians within my inspectorate receiving annuity at present is nine thousand one hundred and forty-six, of whom three thousand four hundred and sixteen are heathens ; three thousand one hundred and eighty-six are Episcopalians ; one thousand four hundred and ninety-two Methodists ; one thousand and thirty-eight Roman Catholics ; and fourteen Brethren. The number of children in the sixty-seven bands under my supervision is four thousand eight hundred and forty-six ; of legal age to be admitted to school, two thousand five hundred and twenty-two ; attending school, one thousand one hundred and ninety-eight ; of daily average attendance, five hundred and ninety-eight ; of schools established on the different reserves, fifty ; of schools in operation now, forty-six ; of acres under cultivation, one thousand eight hundred and fifty-five ; of acres of new land broken, one hundred and eight ; of agricultural implements in possession of the Indians, two hundred and thirty-five plows, two hundred and fifty-seven harrows, two hundred and five waggons and carts, ten fanning mills, twenty-five mowers and seven thousand four hundred and three other implements. The number of official letters received during the year, is three thousand six hundred and twenty-three ; of letters dispatched, three thousand four hundred and ninety-four ; of vouchers forwarded for payment, seven hundred and fifty-four ; of annuity pay-sheets checked, eight ; and of school returns examined, one hundred and fifty.

The estimated value of land improvements on the reserves is twenty-eight thousand, three hundred and seven dollars ; of personal property, one hundred and sixty-six thousand, four hundred and fifty-eight ; of real and personal property, nine hundred and sixty-four thousand, three hundred and seventy-two ; of fish taken during the year, forty thousand nine hundred and thirty-five ; and of fur caught, ninety-six thousand one hundred and forty eight dollars.

The Industrial School established in the Parish of St. Paul under the management of the Bishop and Synod of the diocese of Rupert's Land is ably conducted by the Rev. W. A. Burman, the principal of the institution. The number of Indian children in attendance is sixty-three who are thoroughly instructed in theoretical and practical knowledge by an efficient staff of teachers. The principal industries taught are mixed farming, printing, blacksmithing and carpentering. The result of the labour performed in these various industries amounts to several thousand dollars.

The Industrial school at St. Boniface, under the patronage of His Grace Archbishop Taché is efficiently conducted by the Sisters of Charity, who, in addition to the

ordinary curriculum, impart instruction to the Indian girls in washing, ironing, sewing, knitting and cooking. The building is most comfortable and commodious, and admirably furnished with all modern improvements, for the convenience of teachers and pupils. The ground around the building was plowed in the fall in order to be ready for extensive gardening in the spring. It is highly creditable to the authorities of the institution the excellent discipline maintained in it, and the tidy and attractive appearance of everything in connection therewith. The children are elegantly clad in warm comfortable suits made in the school.

For further particulars in reference to the condition of Indian affairs in this Superintendency, I would respectfully refer you to the enclosed tabular statement, and to the annual reports of the different Indian agents already forwarded to you.

I have the honour to be, sir,

Your obedient servant,

E. McCALL,

Superintendent and Inspector of Agencies and Reserves.

INDIAN OFFICE,

VICTORIA, B. C., 2nd December, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to forward herewith my report upon Indian Affairs for the year ended 30th of June, 1891, which should have been sent in at an earlier date had I received the returns from the Indian Agents in time to admit of my doing so.

Throughout the Province of British Columbia the Indians have been peaceably inclined and well conducted; and with a few trifling exceptions seem contented with their condition which is, to a satisfactory extent, improving steadily under the directing power of an increased enlightenment, and the consequent better knowledge of such industries as are common to civilization and conducive to the advancement of all communities.

When engaged upon my official visitations to the following agencies viz:—North West Coast, Babine, Williams Lake, Cowichan, Kamloops and Okanagan, Kwaw-kewlth, Fraser and Kootenay I was much pleased with the many signs of progressiveness observable and with the nature of my reception on every occasion; the different bands expressing their appreciation of my visit, which they considered a practical indication of the kindly interest taken in their well-being by the Government.

With the exception of "la grippe" which during the winter continued to hang round certain localities, the sanitary condition of the various bands has been satisfactory.

The Indian Industrial schools, of which separate reports have been forwarded, are doing good work, and are having a highly beneficial effect upon the Indians generally. Some of these schools have not as yet had a fair trial, as they are still, to a certain extent, "in the rough," being built in some instances upon uncleared and unreclaimed land, which cannot be put in order and made fit for cultivation at once. The separation of the children from their parents and friends is also a "new departure" in the experience of the aborigines, to which time alone and a proper understanding of the benefits bestowed upon their offspring by such training, can reconcile them.

The reserve for the Indian industrial school at Alert Bay has been laid off, but owing to circumstances; construction has not yet been commenced.

The Kootenay Indians have been less discontented and apparently better satisfied with their circumstances than they have been for years; and the uneasiness noticeable during the winter, which arose from intercourse with their connections and friends south of the line, who were at one time very troublesome, has almost entirely disappeared.

The rapid increase of white settlers south of the border, brought about by the construction of the Great Northern Railway, will, it is thought, put a stop to the Indian

alarms and disturbances hitherto of frequent occurrence along the boundary line, and proving so injurious to the welfare and quiet of our own Indians.

It is satisfactory to be able to report that the hostile feeling which has for several years been exhibited towards the Government on account of land troubles in the North-West Coast agency seems to be dying out, and that the Indians, to an encouraging degree, are progressive in the pursuit of such objects as tend to their permanent advancement.

In the vicinity of the Canadian Pacific Railway many of the natives in the Kamloops agency find employment as section hands on that road, and on the occasion of my visit I learned that they gave every satisfaction to their employers.

Freighting by waggons and teams in the Nicola country is mostly carried on by the Indians, who, out of their earnings, have purchased excellent outfits.

At Metlakahla a new hospital has been built and opened to the public. The building is a great improvement upon that used for the purpose of harbouring and tending the sick in former years, and will be of inestimable service to such of the whites and Indians as may haply require its healing shelter.

Several buildings, including that occupied by the Indian agent, were destroyed by fire last May at that village. Fortunately there was no loss of life.

The closing of Behring Sea will be a serious loss to the natives on the West Coast who have for many years past derived annually a large income from the fur-seal taken by them.

The Indians throughout the Province continue to be supplied from time to time with intoxicants in greater or less quantity, notwithstanding the strenuous efforts made by the Indian agents and others to check that nefarious traffic. It is well known that half-breeds are to a great extent the medium through which the liquor is procured, but there being no acknowledged law prohibiting the sale of liquor to them, it is impossible to stay the practice to any extent.

Were the law so framed as to preclude the half-breeds from purchasing intoxicants in quantities greater than that which may be consumed on the premises of the vendor, there would be some hope of keeping the evil within reasonable bounds, and the half-breeds would also be benefited.

Several attempts have been made to induce the Indians of Victoria to consent to the sale of the Songhees reserve for their benefit, but without avail; and although they have been fully informed of the advantages which would accrue to them by such an arrangement, they still persist in their determination not to acquiesce in any such change.

The day school opened upon that reserve is doing well; the children are diligent in their studies and regular in their attendance, which is partly owing to the interest taken in their progress by their teacher, Mr. Raynes.

The department steamer "Vigilant" has proved very serviceable in navigating the inland waters in the North West Coast agency, and has been much improved by the new propeller supplied, as well as by some slight alterations that have been made in her machinery.

The reports and statistical returns of the Indian agents have been duly forwarded to the Department.

NORTH-WEST COAST AGENCY.

The salmon run has been a partial failure this year, which has caused a falling off in the amount of wages earned at the canneries. As a compensation, however, for such losses, high prices have been obtained for furs, and the advent of white settlers to the neighbourhood has afforded additional employment. There is also an abundance of shell and other fish, and of venison and other game, to be had without much labour.

During the winter months there was much suffering from the attacks of an aggravated type of influenza.

The missionary doctors and teachers, while the epidemic lasted, were untiring in their attention and kindness to the sick who, in many cases, owed their recovery to the careful tending thus bestowed upon them. The usual consideration has been shown these Indians by the liberal supply of medicines and garden seeds granted by the Department for their use.

I append the statistics :—

Value of personal property.....	\$204,770
Acres under cultivation.....	86
New land broken, in (acres).....	5½
Total value of real and personal property—(Indian reserves not yet apportioned to the different bands).	
Number of implements.....	287
Horses.....	14
Pigs.....	10
Number of young stock.....	4
Value of fish taken.....	\$ 80,110
Value of furs taken.....	41,640
Other industries.....	194,780
Potatoes, bushels.....	3,600
Turnips, bushels.....	100
Vegetables, bushels.....	950
Hay, tons.....	6

COWICHAN AGENCY.

In this agency the Indians are comparatively well off; they are for the most part industrious and intelligent, well-conducted, and moral in their habits.

The agent reports that the death rate has been in excess of other years, although they have been visited by no particular epidemic. He also states that the census, which has been most carefully taken, shows a decided increase. The above statement seems somewhat paradoxical, but may be accounted for by the greater number of children, which, if so, is the best indication that can be given of an improvement in the moral status of the aborigines.

During the winter of 1890–91 many Indian families sustained heavy losses by the floods which then visited the valley. Saw-logs, which had been collected at Cowichan Lake, were swept down the river in large numbers, and in their passage quite an extensive area of cultivated land was washed away, as were also houses, fencing and, in some instances, the crops raised during the previous summer. At the present time I am informed that logs aggregating several millions of feet of lumber are collected at the lake awaiting a rise in the river, and as no steps have been taken, as far as I can learn, to protect the land during the passage of these logs down stream, it is difficult to estimate what damage may yet be done. Several efforts have been made by the Indian agent to induce the owners of the logs to take measures for the prevention of future damage, but I believe no such measures have been attempted, and it appears that no redress can be had regarding such injuries.

The statistics show a considerable increase in the products of the soil, viz., wheat, oats, pease and potatoes, and are appended.

Value of personal property.....	\$78,600
Acres under cultivation.....	2,158
New land broken in, (acres).....	32
Value of real and personal property.....	\$519,020
Ploughs.....	102
Harrows.....	56
Waggon and carts.....	109
Fanning mills.....	1
Threshing machines.....	4
Number of other implements.....	3
Horses.....	381
Cows.....	313
Sheep.....	404
Pigs.....	198
Oxen.....	106

Number of young stock	462
Value of fish taken and value of furs taken and other industries (not enumerated by agent, he stating that it was impossible to obtain the same).	
Wheat, bushels	500
Oats do	9,280
Pease do	500
Potatoes do	5,000
Hay, tons	700

KOOTENAY AGENCY.

The crops in the Kootenay country have been exceptionally good at the Columbia Lakes and at Tobacco Plains. The St. Mary's band, not being prepared with sufficient seed grain for their wants, had but a small yield. Considerable effort has been made by the Indian agent to induce the Lower Kootenais to cultivate their land, but owing to the swampy nature of the reserve it was found that there was very little capable of cultivation.

The prevalence of an aggravated form of influenza caused much suffering during the winter. With the coming of summer, however, that trouble had almost entirely disappeared.

The statistics, which, among other things, show an encouraging increase in stock, are given below:—

Value of personal property	\$56,600
Acres under cultivation	180
New land broken in (acres)	34
Value of real and personal property (not given).	
Ploughs	29
Harrows	9
Waggons and carts	4
Horses	2,068
Cows	455
Pigs	3
Oxen	127
Number of young stock	542
Value of fish taken (not given).	
Value of furs taken	\$1,100
Wheat, bushels	235
Oats, do	1,700
Pease, do	140
Potatoes, do	1,230
Hay, tons	68

BABINE AGENCY.

The native people of this agency mostly make a living by fishing, trapping and hunting, by packing in the interior, by boating on the Skeena River, by earnings at the mines and by working at the canneries on the coast.

These people are advancing in the knowledge of agricultural pursuits and the benefits arising therefrom, the result being a considerable increase in the number of their garden patches, and in the quantity of land being cleared and prepared for cultivation.

There is also an improvement in the class of houses erected during the year, and the Indians are becoming more settled and industrious in their habits.

The general health throughout the agency has been good and the conduct of the Indians satisfactory.

The Statistics are given beneath:—

Value of personal property	\$15,500
Acres under cultivation	107

New land broken in, acres	53
Horses	14
No. of young stock	2
Value of fish taken	\$31,730
Value of furs taken	58,800
Other industries	8,550

No account of agricultural operations given.

KAMLOOPS AND OKANAGON AGENCY.

Within the year embraced in this report a decided advance has taken place in the condition of the Indians, who have been industrious in the cultivation of their land, and in such pursuits as add generally to their welfare.

They have had an abundant supply of salmon; have been fairly successful in those sections where placer mining for gold has been carried on: have had average crops and have with few exceptions wintered their stock without loss.

The Il-kum-cheen Band, as well as others assisted in a like direction, have been largely benefitted by the aid given them by the Department towards the construction of flumes for the transport of water for irrigating purposes: the kindness thus extended to them has been much appreciated and has helped to supply a long felt want and enabled them to cultivate to advantage land hitherto almost worthless.

Following will be found the statistics:—

KAMLOOPS AGENCY.

Value of personal property	\$46,134
Acres under cultivation	828 $\frac{1}{2}$
New land broken in	158 $\frac{1}{2}$
Value of real and personal property	\$188,708
Plows	87
Harrows	40
Waggon and carts	19
Fanning mills	2
Mowers	7
Number of other implements	1,293
Horses	2,202
Cows	234
Sheep	20
Pigs	251
Oxen	92
Number of young stock	283
Value of fish taken	\$8,093
Value of furs taken	\$11,330
Other industries	\$47,600
Corn, bushels	528
Wheat "	953
Oats "	1,831
Peas "	350
Beans "	1,752
Potatoes "	16,144
Onions "	287
Fruit trees each	116
Hay tons	563

OKANAGON AGENCY.

Value of personal property	\$64,274
Acres under cultivation	1,384

New land broken in, acres.....	90
Value of real and personal property.....	\$183,030
Plows.....	93
Harrows.....	33
Waggons and carts.....	21

Fruit trees, each.....	60
Hay, tons.....	657

WEST COAST AGENCY.

In this agency the Indians, especially the children, are reported to be decreasing.

Of late years many of these Indians have got into the way of visiting distant places in search of employment at the canneries and hop-fields, which has resulted in irregular habits, to which may be attributed, to a great extent, the decrease in the number of children, and the dying out of the older Indians.

The change in their manner of living has also much to do with the increasing mortality among them.

The catch of fur seal during the year has, on the whole, been large and of considerable value.

In the dwelling houses erected lately a great improvement has taken place, and there are many signs of an ameliorated condition noticeable. The statistics are given below :

Value of personal property.....	\$75,000
Plows.....	1
Horses.....	18
Cows.....	4
Sheep.....	30
Pigs.....	76
Oxen.....	2
Number of young stock.....	5
Value of furs taken.....	\$62,310
Other industries.....	\$13,950
Potatoes raised (bushels).....	1,500

WILLIAM'S LAKE AGENCY.

During the year these Indians have been well conducted and free from the commission of any serious offences.

The death rate has been higher than usual. Amongst all the bands only one showed an increase for the twelve months reported upon, in that one case the increase was three only.

The chief cause of death, except in cases of extreme old age, has been consumption, which is supposed to be brought on by change in mode of living. In winter their dwellings, mostly overheated, expose them to the extremes of heat and cold; and their food is now different altogether from that to which for generations they had been accustomed.

With the exception of the Chilcotins, these Indians have very poor reserves, and but little water for irrigating purposes. They mostly maintain themselves by trapping and hunting, by desultory mining, and wages earned by working on whitemen's ranches.

The salmon run has been good, and such limited patches as they had cultivated yielded fairly. The Chilcotin Bands are industrious, have good reserves, and are well provided for.

The statistics are given herewith :

Value of personal property	\$ 53,900
Acres under cultivation	1,155
New land broken in (acres)	40
Value of real and personal property	\$145,882
Plows	51
Harrows	42
Wagons and carts	13
Fanning mills	6
Threshing machines	1
Number of other implements	276
Number of horses	3,244
Cows	531
Pigs	1,020
Number of young stock	203
Value of fish taken	Not given.
Value of Furs taken	\$12,550
Other industries (wages and mining)	\$13,150
Wheat, bushels	9,725
Oats, do	3,130
Barley, do	1,585
Potatoes, do	5,955
Pease, do	1,125
Hay, tons	966

KWAW-KEWLTH AGENCY.

The Indians in this Agency have been noted for their tardiness in availing themselves of the means placed within their reach by the Government and the Missionaries for their advancement.

Within the year now reported upon, however, a pleasing change has taken place which is evidenced by more exemplary conduct and by a general improvement in their condition.

A school has been built at Gwa-yas-dams village by the Reverend A. J. Hall which has, under the able management of the teacher, Mr. A. W. Corker, given the greatest satisfaction and encouragement to those interested; the attendance of pupils has been large, the children obedient and anxious to learn, and the parents most desirous for the education of their offspring.

"La grippe" which prevailed with such disastrous results during the winter has almost entirely disappeared, and very little sickness in any other form has visited them. To such of the natives as are willing to work the Mission saw-mill continues to offer remunerative employment.

The Alert Bay salmon cannery owned and managed by Mr. S. A. Spencer, has been a source of considerable revenue to the Indians for several years, the average payments disbursed among the native employees amounting to about four thousand dollars per annum.

The salmon catch has been very light, but fortunately from other sources the food supply has been sufficient to meet the wants of the people.

The statistics are as follows :—

Value of personal property	\$85,430
Acres under cultivation	7½
Value of real and personal property	\$95,730
Value of fish taken	\$3,150
“ furs taken	\$4,450
Other industries	\$500
Potatoes harvested, bushels	460
Hay harvested, tons	2

The following schools have received the Government grant during the past fiscal year, viz. :—

Kamloops, Industrial.	Alert Bay, Anglican,	Coqualeetza, Methodist.
Kuper Island, “	Yale, “	Port Simpson, “
Kootenay, “	Hazelton, “	Lakalsap, “
Metlakahtla “	St. Mary's, Roman Catholic,	Bella Bella, “
Masset, Anglican.	Clayoqaht, “	Port Essington, “
Kincolith, “		

These Schools are paid through the Methodist Society at Toronto.

MEDICINES.

The various Agents and Missionaries in the Province who have made application for medicines have been liberally supplied and much suffering has been alleviated thereby.

FISH AND FURS.

The following are the statistics of fish and furs passed through the Custom House at Victoria for the fiscal year ending 30th June, 1891, viz. —

Furs, marine, value	\$513,471
Furs, land “	\$198,563
Salmon, canned, 12,391,046 lbs	\$1,347,490
“ pickled, 1,158 brls	\$9,134
Other fish	\$525

I have the honour to be, Sir,

Your obedient servant,

A. W. VOWELL,

Visiting Indian Superintendent.

OFFICE OF THE INDIAN COMMISSIONER,

REGINA, N.W.T., 1st December, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the fiscal year 1890–91, and am glad to be able to present a considerably more favourable showing than for last year, which, owing to causes beyond control, was, as reported, in some respect, far from a prosperous one.

This year has been marked by decided progress, but I will not further anticipate what will be described in detail as the various matters affecting the Indians in these Territories are considered in succession.

Loyalty of our Indians.

There is no desire to make invidious comparison between the condition of Indian affairs on this and the other side of the line which separates us from our neighbours in

the United States, and allusion to the trouble caused by the Messiah craze would gladly be omitted were it not necessary in vindication of the policy pursued by our Government, which has often been much misrepresented, and in justice to our Indians, who are not infrequently maligned, to point out how admirably they behaved during the exciting events which took place at no great distance from them, and with the progress of which many of them were well acquainted. There was good reason to suspect that emissaries from the revolting bands were sent to some of our reserves, but, while a strict, although unobtrusive watch was kept, there was at no time during the progress of the stirring events referred to, the slightest apprehension felt by those in charge that our Indians would swerve from their accustomed loyalty, of which in several cases they voluntarily proffered fresh assurance when made aware that unfounded, although perhaps not unnatural, apprehension existed among some of the settlers.

Government's Influence not Dependent upon Chiefs.

When it is remembered that by the death of Crowfoot last year, the Government was deprived of a powerful auxiliary in controlling the warlike tribes of the Blackfoot nation, and by the loss of North Axe, the chief of the Peigan bands, of another staunch supporter, and that these Indians were, by position and ties of kindred, most susceptible to influences from across the line, it must be conceded that the Government has gained the confidence of the bands most recently taken under its guardianship and naturally most impatient of control.

General Progress—How Estimated.

In my last year's report mention was made of the many matters requiring to be taken into account in endeavouring to estimate the progress made by our Indians, and of the various aspects under which it had to be considered. It was asserted that probably the fairest criterion by which to gauge advancement was to be afforded by examination of the extent to which Indians have succeeded in providing for their own support.

Individual Earnings Increased.

It is therefore gratifying to be able to direct attention to the following summary of results, which will be found given in greater detail in the statement of individual earnings, attached to this report, and it should be noticed that earnings of hunting Indians, from whom such returns cannot be obtained, and which would considerably increase the aggregate, are necessarily excluded.

Sale of cattle, sheep and ponies	\$ 4,886 12
“ grain and roots	4,619 22
“ fish	143 50
“ furs	6,667 02
“ wood and hay	9,729 24
“ lime, bones and charcoal	424 50
“ seneca root	500 00
By labour, freighting, &c	11,225 44
Sale of berries and small manufactures	609 13
“ beef	2,071 18
	\$40,875 35

Comparison of this with the amount earned last year, viz. : \$24,075.55, shows an increase of \$16,799.80, or of about two-thirds.

Encouraging Features of Increased Earnings.

A very encouraging feature connected with this progress is that it has been more marked with regard to the industries of preparing and selling hay and firewood, than in directions which might depend to a greater extent upon more favourable natural con-

ditions, and the proceeds from the two sources mentioned have increased by very nearly one hundred per cent.

Another special feature in connection with these earnings, which is of too great significance to be passed over without notice, is the new departure made by Indians in Treaty 7, in the direction of taking, for the first time, some small contracts for the supply of hay, which they completed creditably.

Coal Mining begins in Treaty 7.

Another industry has been opened up in this Treaty, afforded by the coal deposits on the reserves. The mine at the Blackfoot Reserve has been worked by these Indians, who have supplied the Department's requirements for agencies and industrial schools, within a radius which permits of this being profitably done. The Bloods have made a beginning in the same direction, and it is hoped that what has been described, is but the beginning of greater things.

Indians produce more of their Food Supplies.

It will not be supposed that what is included in the table just referred to, represents, by any means, the whole contribution of the Indians towards their own support. For various reasons it was considered advisable to sanction the sales of farm produce (as shown in the statement), and to allow the investment in food and other necessaries, but the bulk of such produce has been directly consumed, and the Government relieved to a corresponding extent, of the burden of providing food-supplies.

Assistance in Food Reduced.

The amount of such assistance is being steadily, and, all considered, rapidly reduced.

The following table will, at a glance, make clear the extent to which assistance of the staple articles of food, viz: flour, beef and bacon had decreased during the year under review, as compared with the preceeding one. It deals with what are known as destitute supplies, and does not include rations for employees, which are foreign to the comparison being instituted.

	1890-91.			1889-90.

Onion Lake.....	557	19,300	4,400	131	24,700	18,979
Saddle Lake.....	1,125	15,842	30,000	1,535	23,471	39,929
Edmonton.....	995	22,697	40,800	1,374	38,577	45,809
Peace Hills.....	819	21,075	20,800	1,193	32,018	35,852
Sarcee.....	1,100	7,981	188,500	1,171	7,717	221,075
Blackfoot.....	2,641	626,000	2,491	616,653
Bloods.....	2,391	632,000	2,279	693,908
Peigans.....	1,046	332,400	1,027	43	349,068
	16,728	226,030	2,090,197	20,661	290,567	2,286,743

From the above it is seen that the reduction aggregates 3933 sacks of flour, 64537 lbs of bacon, 196546 lbs. of beef. The certainty expressed a year ago that, should the harvest give as good results as then anticipated, the end of another fiscal year would show a saving effected of several thousand bags of flour, with a proportionate quantity of beef and bacon, has thus been vindicated; and what is more gratifying still is that the saving has been effected independently of the fulfilment of the condition premised.

It was pointed out last year, when making a forecast of the then existing prospects that over sanguineness required to be guarded against. The wisdom of this caution has been proved by the event, for, although root crops were, on the whole, a fair success, and wheat, in one or two districts, did unusually well, in other parts of the country it fell far short of its promise, whole fields having been destroyed by hail storms in some localities, and by drought in others.

Indians become more Provident.

Under these circumstances, the possibility of the decrease of assistance shown, may surely be, to some extent at any rate, attributed to greater providence upon the part of the Indians themselves, which habit is one of the most difficult to inculcate.

Game Disappears.

This will be the more readily conceded when it is remembered that game has continued to steadily disappear, and that as cattle increase in the hands of farming Indians, the necessity of tending them through the winter, compels many, who heretofore have been in the habit of going in quest of such game as may yet be found, to stay at home.

Where the conditions are favourable, the Indians, in proportion to the length of time they have been under tuition, are providing for themselves to quite as great an extent as can reasonably be expected.

Many Bands largely Self-Supporting.

In the Birtle Agency, the average per capita assistance given, during the past year, has been about 20 lbs. of flour and one lb. of bacon, and probably there exist but few communities of whites of equal numbers, where relief to the destitute has been on a less liberal scale.

Space permits of mention of but a few reserves, and I will pass on to Indians in another stage of progress, and notice that, for a period extending over three months, no rations were issued on the Assiniboine Reserve, excepting to a few aged and infirm.

Again, the bands of the Muscowpetung Agency were self-supporting during several months of the year, and Pasquah's almost entirely so, for rather more than half the year.

To take another district, it has been found that George Gordon's and Poor Man's Bands, in the Touchwood Hills Agency, provided their own flour for the greater part of the winter, and the File Hills Indians did the same thing for a considerable part of the year.

In the vicinity of Battleford, Moosomin's Indians found themselves in flour for the whole year, and even at Onion Lake, where the effects of drought were so disastrous, some few families managed to do the same.

The Policy pursued proves Successful.

In the face of facts which have just been recorded, it must surely be clear to any but deliberately prejudiced minds, that the policy pursued by the Government, is rapidly attaining its intention, and turning out what not so very long ago were hordes of savages, into communities of industry, whose members promise, at no far distant date, not only to cease to be a burden upon, but to become a source of strength to the commonwealth.

Limit of Economy Reached.

It is however out of the question to expect, for some time to come, that any very marked reduction, save in food supplies, can be made in the annual expenditure upon the

Indians of these territories. The limit of economy possible for some time to come has been nearly if not quite reached.

Aged and Infirm Must be Fed.

No doubt if matters continue to progress as there is every reason to expect, further and considerable saving will be made in so far as assistance in food supplies is concerned, but even with regard to this it must be borne in mind that, until those of the generation originally taken into treaty, who, through infirmity or age, can not be made to do anything for their own support shall have disappeared, it will be impossible to discontinue the calls upon the country, which have to be made for their relief.

More Indians Being Reclaimed.

It has to be remembered furthermore, in the same connection, that Indians who have heretofore maintained themselves by hunting, are gradually being forced, by the disappearance of the game, to come in and settle down to farming, and to these there must of necessity be given the same assistance as has been required to enable those who are now becoming self-sustaining to arrive at that condition. In five years, between 1885 and 1890, there have been added some 1,400 to the number of Indians resident on the reserves. The largely increased facilities for education necessarily consume a large proportion of what would otherwise constitute no small reduction of the aggregate expenditure.

Danger of further Reducing Staff.

To impair the machinery by which the transformation of savages into citizens is being affected would have a most disastrous result. The day will doubtless come, as it has elsewhere, when, with comparatively little supervision or assistance, the Indians will be able to hold the ground they have gained, but before that can be done they must be brought a considerable step further on their road to individuality and self-reliance. To leave them to themselves now would result in a sure and speedy relapse into comparative barbarism, and be ruinous to them and to the country at large.

Difficulty in advancing a stage further.

To get them beyond their present stage is a task fraught with as much if not more difficulty than has been experienced in landing them where they are.

To do this is taxing to the utmost the energies of those engaged in carrying out the Government's policy. Constant watchfulness to discover where a step in the desired direction may be made, has to be exercised, and every effort concentrated to have the advance made, when the opening has been found. Length of service, which gives experience to the Department's employees, invaluable in the work of handling Indians, carries with it an element of danger when it comes to forcing Indians off the ground already gained, and compelling them to further progression. Human nature is conservative and employees as well as Indians are naturally prone to "rest on their oars", and remain satisfied with the long strides already made, instead of being encouraged to fresh efforts by success.

White Employees already much Reduced.

The staff of white employees now engaged under our agents in the Territories, has, between 1885 and 1890, been gradually reduced from 159 to 58, but no further material reduction can apparently be made at present, without incurring consequences which have been indicated.

Department acts as Police Force.

It must be remembered that the Department officers and employees not only perform the duties of guardians and instructors, but practically act in the additional capacity of a police force, and that they admirably perform the preventive functions of the latter, is proved by the comparative absence of crime among the Indian population,

and the immunity from danger to person and property enjoyed by the settlers, whose environment renders them so open to attack in these respects.

Agricultural Operations.

Farming operations were vigorously entered upon when the Spring opened. Seed had, wherever possible, been kept over the winter, and, as a consequence, the quantity contributed by the Department cost but a trifling sum, about one-fourth of the provision made the year before, and that went to supply Indians farming for the first time, and those who either had no grain to save, or none worth preserving for seed.

Area of Cultivation Extended.

Last year the area under cultivation was shown to have increased by something over a thousand acres and that under crop by rather more than four hundred acres. During the year now under review, the area under cultivation has been extended by about half as much again, or fifteen hundred acres, while that under crop has been added to, by something in the neighbourhood of one thousand acres.

Policy Relative to Extending Cultivation.

This extension is fully as large as is consistent with the policy laid down, which may be described in the following extract from a letter of instructions addressed two years ago to our Agents, written to serve as a reminder to old, and for the guidance of new officers and employees in the service.

“No doubt however, the mainstay of the great majority of Indians must be farming, and it is therefore most important to teach this industry in the manner best calculated to render them self-supporting when left to their own resources, as well as at the present moment. Suppose, therefore, that an Indian confine his operation to a single acre. From this he should, in an ordinary year raise, at a moderate computation, some eighteen bushels of wheat (where this can be successfully grown) which, after making all necessary deductions, will give him nearly, if not quite, five bags of flour.”

“Assisted by his family there is nothing to prevent his planting a portion of a second acre, with roots and vegetables, sufficient to supplement his flour to the degree of making it last for a good portion of the year.”

“Add to this the product of a cow or two, and the man has made a long stride towards independence.”

Use of Labour-saving Implements Discouraged.

“Yet this is commonly accomplished by peasants of various countries, with no better implements than the hoe, the rake, cradle, sickle and flail.”

“The necessary use of these instruments can never be acquired if Indians be encouraged to contemplate the performance of their work by such labour saving machinery as can rarely be obtained and kept in repair entirely from their own resources.”

Although it would seem that the policy here outlined should at once commend itself to common sense, no small amount of difficulty is encountered in having it carried into effect, for it is only natural that Indians should infinitely prefer to have their work done for them by machinery, and that their overseers should be disposed to give way to this desire, rather than subject themselves to the labour of overcoming it.

However, despite all obstacles, and without straining the policy too far, it is being carried out, although there are individual Indians who have arrived at the stage of being so far independent of the Government's assistance, that they can not well be restrained from purchasing machinery out of their own earnings.

At the date of writing I am glad to be able to state that it has now become an assured fact that, with few exceptions, the bands have had their full share of the bountiful return which has this year crowned the efforts of agriculturists in the territories, but as this falls, strictly speaking, outside of the limits of the year now under consideration, nothing further will be said about it, beyond an expression of confidence that the effects will be marked in the direction of enabling a still larger reduction to be made in the

distribution of food supplies, and in giving the Indians the encouragement to persevere in their agricultural efforts, which they so greatly stand in need of.

Stock.

In no direction has the progress made been more marked and satisfactory than with regard to stock.

Difficulty in Teaching Indians to Care for Cattle.

The extent to which Indians derived their support from the slaughter of the buffalo naturally and strongly predisposed them to kill their cattle, nor could they be easily taught to recognize any wrong in thus disposing of animals which they considered their own property, to be dealt with as might seem well in their own eyes. When this tendency had been overcome, there yet remained the difficulty of instilling the economy and humanity of carefully tending stock into natures, the brutality of which continues to manifest itself towards the dumb creation long after some adequate conception of the value of human life has been acquired.

Difficulties Overcome.

Bearing these facts in mind it will be admitted that there is ample ground for satisfaction in regarding the care bestowed upon their stock by the majority of Indians, some of whom actually take more pains to secure the comfort of their cattle during the winter, than of themselves and families.

Increase of Stock.

In the face of the drawbacks indicated, the cattle in the hands of Indians, under Government control, increased between the years 1885 and 1890 from 2,225 head to 5,617 or by 3,492. In addition to these the Indians possess a by no means inconsiderable number of stock, classed under the head of private property, and held independently of the Government. During the past year the increase has been more marked than ever before, and the introduction of several well-bred bulls, has had the best effect upon the herds with which they have been placed.

Effect of Loan System.

In bringing about this satisfactory state of affairs, the loan system has worked wonders.

Sales Allowed for Encouragement.

Some of the Indians who have, by means of this system, acquired a fair amount of stock, have, as an encouragement to themselves, and to stimulate their fellows, been allowed to dispose of some steers, but when this is done, the stipulation is generally made that a portion of the proceeds shall be invested in the purchase of a heifer, so that an ultimate advantage in the increase of stock accrues. No doubt had such sales or the home consumption of stock been allowed on a larger scale, the burden of supplying food might have been materially decreased for the last few years, but this would have been a very short-sighted effort at economy.

As it is, from small beginnings, the cattle have so increased that, in the near future, their stock will have reached the limit, at which it will be desirable to keep it stationary, and they will be able to do this, and yet supply themselves with beef, and, to some extent, procure other necessaries through the sale of it.

Success of Government Herds.

The success which has attended the experiment made some three years ago, when some cattle were sent out to the Muscowpetung's and Onion Lake Agencies, as nuclei for the formation of Government herds, has been such as to produce the conviction that the plan could be greatly extended with much profit. The object had in view was to make the Agencies produce their own beef, and to furnish economical means of dis-

tributing more cattle among Indians. So successful has the result been, that the two Agencies referred to are confidently expected next year to be off the assisted list, so far, at any rate, as beef is concerned.

Stock-Raising the Future Mainstay in Treaty 7.

In no direction could this system be more profitably extended than with regard to Treaty 7, and there exists the following cogent reasons why this should be the case :—

In the first place the quantity of beef consumed is proportionately much greater in that Treaty than in any other.

Again, while the self-maintenance of all farming Indians must depend upon stock-raising to some extent, in Treaty 7 it must do so almost, if not entirely.

Situated as they are, little, if any, dependence can be placed in agriculture, even supposing the strong disinclination of these Indians to such a pursuit, could be overcome.

This was foreseen when the Treaty was made with them, and to meet their peculiar circumstances additional cattle, in lieu of other things given in other Treaties, were promised them.

That stock-raising can be made a success by these Indians has been proved experimentally on the Peigan Reserve, since the institution of a system of close-herding.

Naturally enough these Indians would prefer being fed, to undertaking the care of stock, but it is manifestly impossible to continue to maintain them in idleness, not only on account of the cost to the country, but because to do so will surely be followed by the loss of the finer traits of Indian character which they possess. Able-bodied men, if treated as paupers, will, before long, become demoralized, and a continuation of such treatment would ensure a yet worse condition for the rising generation. The time would therefore seem to have arrived to compel them to take over and tend their cattle.

Many of them would be perfectly willing to do this now. The Peigans, who have learned in the manner just referred to, the value of stock, agreed to my suggestion to sell some of their ponies and purchase more stock, but unless some one from the east can be found with capital to purchase the ponies, the idea cannot be carried out. By the furnishing of cattle, this Treaty would before long supply its own beef, have animals to sell, the proceeds of which would be applied to the maintenance of Indians, and contingent industries would spring up, such as the establishment of cheese and butter factories in the neighbourhood.

Failing this, little result can be expected from the necessarily limited and uncertain agricultural operations possible, including the sale of hay, or the only other industry so far discovered, coal mining, which, as already stated, has been commenced on a small scale.

Agricultural Exhibitions.

The agricultural exhibition held here this year excited the usual interest among the Indians of the district. The Crooked Lakes, Assiniboine, Touchwood Hills and Muscowpetung's Agencies were all well represented.

Regina Exhibits.

Lest I may be suspected of speaking too highly of their exhibits, I may quote the opening and closing sentences of the local press report of the Indian exhibit. The report begins. "To report what has now become almost a time worn saying, the Indian exhibit was the best part of the show," and concludes with "there was not a poor specimen in the whole exhibit." The wheat grown by an Indian at Crooked Lakes was pronounced by the judges to be the best in the show, although, through a misunderstanding, he failed to exhibit a sufficient quantity of it to entitle him to the prize. The potatoes shown were described as superb, onions ranged about two to the pound, butter was good, bread of excellent quality, especially some sent all the way from Moose Mountain Agency. Mitts, socks, gloves, comforters, shirts, dresses and so forth elicited much praise, one of the judges remarking that the workmanship would not disgrace any white woman in Ontario.

The Touchwood Hills Indians while not behind in other industries seemed to have made a specialty of work in mats, baskets and straw hats.

A significant departure in the direction of the ornamental, as exhibited in the manufacture of some few articles such as lamp stands and table mats was observed with pleasure.

A Touchwood Hills Indian, to his surprise and pleasure, found that he had carried off the first prize against all competitors, for a yoke of work oxen.

Battleford Exhibition.

At the Battleford Exhibition this fall, an Indian took the first prize for the best yoke of oxen, another secured second prize for a pair of fat cattle, while a third secured the first and second prizes for sheep. Here too, as at Regina, the best wheat at the show was exhibited by Indians.

Winnipeg Exhibition.

Some few exhibits, hurriedly got up, were sent to the Winnipeg Exhibition from Birtle, Crooked Lakes and Assiniboine Reserves, and from the Qu'Appelle Industrial School.

Had competition at this show been contemplated before the last moment, a much better showing could have been made, but even as it was, the Indian exhibits proved a revelation to the visitors, the majority of whom had, until then, but little idea of the progress attained by our Indians in the territories.

The greatest interest centered in the children from the Industrial school, and visitors thronged round the little girls to watch them sewing, knitting by hand and by machine, carding and spinning wool, and doing crochet work. Specimens of the boys' carpentering and blacksmithing work were greatly and universally admired. The *Winnipeg Free Press*, referring to a first prize for vegetables taken by the school, remarked "such a prize is a credit to any one, but more so to an Indian Industrial institution, specially when it is in competition with all the gardeners of Winnipeg and Manitoba."

It occurs to me that I have omitted to mention that at the Regina Exhibition this school, in open competition, carried off for vegetables three first prizes, two second and one special.

The effect of these exhibitions upon the Indians is a most excellent one, because members of bands are not only stimulated to a healthy competition among each other, but one reserve is excited to try and surpass another, and to find that they can hold their own with the settlers has a most encouraging effect, and strongly tends to mitigate any disappointment arising from poor crops: it would greatly discourage them did they feel that poor crops were an evidence of their inferiority to the white race.

Industries.

Great stress is laid upon the duty devolving upon farming instructors and their wives, to teach the Indians of both sexes to employ their spare time in some useful manner. If nothing more than the prevention of idleness and of the mischief which surely emanates from that condition were thus secured, unquestionably a great deal would have been gained.

However the articles which the men are encouraged to manufacture are of practical benefit to them, and would otherwise have to be purchased. They comprise handles of axes and hay forks, brooms, sleighs, ox-collars, harness and so forth, and if somewhat crude, they answer the purpose sufficiently well and the making of them for themselves teaches the Indians to depend upon their own resources.

The women are taught to cut out and sew plain garments, and some of them can make dresses, shirts and other articles of clothing in a way which would not disgrace a white woman.

They are particularly quick at knitting such articles as mitts, socks and comforters, and some of them are quite expert in the manufacture of baskets, mats and hats. Butter making and tanning cow hides are also among the useful occupations of the women.

It is not intended to convey the impression that the skill in the various directions indicated is very generally possessed, but every year some addition is made to the number of Indians who occupy thus usefully time which would otherwise be passed in idleness, if nothing worse.

Dress, etc.

In dress and habits of personal cleanliness improvement continues to be noticed. The women are encouraged to practice tidiness in their houses, and in washing their clothes and dishes and other kindred details of domestic economy, but inculcation of habits of personal cleanliness is uphill work.

Buildings.

Every year sees some advancement with regard to the erection of new buildings or the improvement of old ones. The progress in this direction naturally depends, to a considerable extent, upon the facilities for getting logs and lumber, but the Indians are not slow to avail themselves of such facilities when afforded them. The Blackfoot Indians have perhaps been under greater disadvantages in these respects than any other, but owing to arrangements made to supply them with logs, which have been given as a reward and encouragement for the cultivation of a certain quantity of land, a number of good houses have been put up.

Among the Peigans many new buildings have been erected, and marked improvements have taken place, in the way of shingling roofs and partitioning into rooms the houses of the Bloods.

The production of lumber by the saw mills established at the Carlton and Onion Lake Agencies respectively is creating a transformation in the buildings.

Throughout it is found that a not inconsiderable proportion of earnings is expended in the purchase of doors and windows, and of lumber for the improvement of houses or manufacture of furniture.

Nor are these effects by any means confined to increasing their own personal comfort, but are extended to securing that of their stock.

Health.

With regard to health, a much more satisfactory report can be given than was possible for last year. The effects of the epidemic of "la grippe," which invaded every reserve last year, with hardly an exception, were felt during a part of the year now under review, particularly upon those of consumptive constitutions; however, they may be said now to have ceased. On some reserves measles and whooping cough made their appearance, but were attended with but few fatalities. At File Hills, chicken pox of so virulent a character as to have at first been mistaken for small pox broke out. Until the true character of the disease was ascertained, a good deal of apprehension was felt, and a detachment of Mounted Police was promptly put at our disposal by the Commissioner of that force, with a view to the establishment of a strict quarantine. One effect, which need not be regretted, was the opportunity afforded, during the prevalence of the alarm, for vaccinating a number of Indians, who, so long as they thought the danger of that scourge remote, had obstinately resisted efforts to have them submit to that operation.

As usual, at the time of making treaty payments, great attention was given to the vaccination of Indians not already operated upon, and no relaxation has been allowed with regard to other sanitary precautions about the dwelling houses. Excepting a mild form of bronchitis among the Bloods, and a skin disease in the Battleford District, little sickness, beyond what has already been described, has prevailed, but scrofula and consumption continue only too successfully to resist all efforts made to eradicate them.

Conduct.

The conduct of the Indians has been, generally speaking, most exemplary. In fact, unless in Treaty 7, little or nothing in the way of crime has required cognizance on the

part of the police ; active measures adopted by them to put a stop to the raids over the border, which used to be too common among the Bloods, have been crowned with success, and few, if any, stolen horses have been brought into the country by these Indians.

Comparatively little has been heard of the slaughter of cattle on the ranches, and there is no doubt that the employment of some Indian constables, by the Mounted Police force, has not only resulted in putting a stop to this practice on the part of the Indians, but has served to prove the truth of what has all along been contended, that much of the cattle killing attributed to them, has in fact been perpetrated by white criminals.

Agency and Farm Buildings.

With regard to agency and farm buildings not much has been done, because the requirements in these directions have already been fairly well provided for. At Moose Mountain, the agency headquarters have been removed from Striped Blanket's to White Bear's Reserve. The agency house at the former reserve is now occupied by the farmer, a new one having been erected at White Bear's for the agent. This arrangement permits much better supervision of the agency, and is in every way much more convenient than the old one.

The agency buildings for the Fort Pelly District have been completed at Cote's Reserve, and the agent finds that he can handle his work in consequence with greater ease to himself and benefit to his reserves. A comfortable dwelling house has been built for the agent on the Peigan Reserve.

Blacksmith and carpenter shops have been built at the Onion Lake and Assiniboine Agencies, respectively, and a much needed new dwelling for the farmer at Pasquah's Reserve put up.

Mills.

The mills at Onion Lake and Carleton, the erection of which was noticed in my report for last year, have proved of the utmost benefit in the production of lumber, and in providing the means of gristing grain, the want of which was so severely felt by the Indians in both these districts.

The plan of giving bonuses for mills, although probably the best that existing circumstances admitted of, in the cases where it has been tried, cannot be said to have proved so successful as to invite any extension of its adoption. The opposite has been the experience with regard to the establishment of mills on agencies, and during the past year one has been erected at Crooked Lakes. That at Saddle Lake, referred to last year as unfinished, is now on the point of completion and will be ready in time to grind the recently gathered harvest.

By the establishment of these mills the excessive toll which is taken in the Territories is avoided, the Indians get the full benefit of their industry, are saved the loss of time consumed in going to the mills and hanging about them waiting for their grists, and a feeling of pride and independence is engendered.

Surveys.

The assistant surveyor was engaged during the summer and autumn in Manitoba in making alterations in certain reserves as originally defined, in changing the location of others, and in the establishment of their boundaries by means of iron posts.

Subdivision of Reserves.

In the spring he was occupied with the subdivision, into forty-acre lots, of parts of Erminekin's and Sampson's Reserves, in the Peace Hills Agencies. Another surveyor, temporarily engaged, made similar subdivisions of reserves at Moose Mountain and Indian Head.

The Indians now begin to recognize for themselves the advantage of thus having their improvements secured to themselves and their heirs, and feel much more interested

in making permanent improvements than when there was nothing to distinguish between lots farmed in severalty and the lands held in common by the band.

The chief surveyor subdivided the Paspasschase Reserve at Edmonton, with a view to its being offered for sale. This, as you are aware, was subsequently done, but after a few lots had been disposed of the remainder were withdrawn from auction, because the prices realized failed to reach the value which the lands are expected to attain to before long.

Contract Supplies.

Full value has been received for the contracts let for supplies, and, as a rule, they have been obtained without trouble or dispute, although contractors sometimes feel disposed to accuse us of being a little too exacting with regard to the fulfilment of agreements in minute details.

The successful working of the plan by which deliveries are made by contractors at Regina, and thence distributed to the agencies, tried for the first time last year, has now become assured, and not only have the advantages then pointed out been realized, but a very considerable saving in quantities formerly consigned to agencies has been rendered possible.

Education.

During the fiscal year now under review, there has been a large increase in the number of children who have been brought directly under the educational influences of the several classes of Indian Schools.

In 1889-90 the number who attended school for some portion of the year was two thousand and eighty-eight, during 1890-91, two thousand seven hundred and forty-six, showing the large increase of six hundred and fifty-eight. The aggregate average attendance has been one thousand six hundred and fifty-three, as against one thousand one hundred and eighty the year before, the increase of four hundred and seventy-three proving that, in no direction, has the general progress been more marked than with regard to education, upon which rests the hope of the rising generation.

The grading of the two thousand seven hundred and forty-six pupils was as follows :—

Standard 1	1,635	as against	1,165	in 1889-90,	gain	470
do 2	501	do	425	do	do	76
do 3	316	do	271	do	do	45
do 4	213	do	160	do	do	53
do 5	81	do	67	do	do	14

It will be seen from this that progress has not been in numerical attendance only.

Schools Opened and Closed.

Schools closed during the year are as follows :—

At Big Plume's village in the Blackfoot Agency, at Blood Reserve, at Stony Reserve, Battleford, or three schools in all.

On the other hand there have been opened the Presbyterian Industrial School at Regina, day schools at Eagle Rib's village in the Blackfoot Agency, Cold Lake in the Onion Lake Agency, Joseph's (late Alexis') Reserve in the Edmonton Agency, Little Pine's Reserve in the Battleford Agency, Meadow Lake in the Carlton Agency, One Arrow's Reserve in the Duck Lake Agency, (Boarding School) at the Peigan Reserve, Sturgeon Lake in the Carlton Agency, for the Sioux at Prince Albert, Thunderchild's Reserve in the Battleford Agency. A grant has also been given to the school at Lac la Ronge, and allowance made for the reception of a number of Indian pupils into Emmanuel College at Prince Albert.

Thus it is seen that thirteen schools have been added to our number, against three closed, making a total gain of ten.

Industrial Schools.

It may be remarked with regard to the three Industrial Schools (for that recently opened in Regina may be left out of consideration in this connection) established in the Territories, that, although in a very satisfactory condition, and making quite as much progress as could, from their age and the circumstances of the Territories, be reasonably expected, it is too soon to look for any considerable results.

Premature to Expect much Result.

The St. Joseph's Institution has only been in operation since 1884, and it has been a most tedious and labourious process to try and overcome the prejudice so strongly felt by the Indians of Treaty 7, for whose benefit it was established, to parting with their children and sending them to the Institution. In so far, however, as the Blackfoot Indians are concerned patience and perseverance have at length been crowned with a large measure of success and the school is now filled to the extreme limit of its accommodation.

The Battleford Industrial School, although founded in 1883, to all intents and purposes only dates from after the Rebellion in 1885, for by the disturbance caused by that unfortunate event, the labour expended prior to that date was thrown away, and a fresh start had to be made. This school, however, is to-day filled to its utmost capacity.

It must be remembered too that at all these schools, in order to get them established and set in operation at all, it was necessary to take pupils without regard to their suitability in respect of age and health, which, under other circumstances would have been carefully considered. Many of those originally received have died from the effects of hereditary disease. Some who were admitted were too old to be influenced, and consequently had to be allowed to go without having received any marked permanent benefit. On the other hand the great majority have been received at a considerably younger age than is desirable for industrial training, and consequently it is only recently that any number of them have begun to receive distinct instruction of that nature.

Results Already Appearing.

From Qu'Appelle School, which has been more favourably situated than the St. Joseph's and was not so greatly disturbed by the Rebellion as the Battleford Institution, better results might be expected, and in this we are not disappointed, for despite the difficulty—which it shared in common with the others—of getting suitable children at the outset, it is beginning to turn out no small number of pupils prepared to make their own way in life. From the Qu'Appelle School there are now fourteen girls out at service in neighbouring settlements, and they are all doing well. Battleford has made a start in the same direction having sent out three girls to service, and this is the beginning of a movement which, in the near future, will be much extended. Comparatively few boys have gone out to service or to work at trades. The majority of those who have left the Institution have returned to their reserves, no doubt more or less benefitted from such training as they had, although for reasons already stated it was necessarily far short of what the present inmates are gaining. Such boys, however, as have gone into service or worked at trades have been doing well. I may instance a lad from the St. Joseph's School, who works as a carpenter at the Blackfoot Reserve, two from the Battleford Institution who have been doing excellent work as assistant millwrights at various points in the Territories, one from Qu'Appelle who is employed as a blacksmith at the Muscowpetung Agency and another from the same institution who is engaged in the Department's warehouse here.

Danger of Letting Pupils Return to Reserves.

As already stated however, the majority of the boys have returned to their reserves, and if this is to be the case with lads now undergoing the more extended course

of training, which the firm establishment of the schools now renders possible, it is much to be regretted because the benefits of their training will necessarily be to a considerable extent lost.

Of course the case is very different in parts of Canada and the United States, which have been settled up for many years, and where the Indians are pretty well on a par with their white brethren in respect to civilization. There no difficulty exists about finding employment for lads turned out by the Industrial Schools, for in fact their services are in no small demand.

Colonies for Pupils after Leaving School Proposed.

Years must necessarily elapse before even under the most favourable conditions, that can become the case in a new country of such extent as this, and consequently it is difficult to see how their return to the reserves, with the attendant waste of benefits can be avoided, unless lands can be set apart at a distance from the Reserves, and the pupils established on them in colonies, after leaving the institutions.

No doubt, if necessary, it could be arranged to return to the Government an area of the existing reservations to compensate for what would be required for the establishment of such colonies as suggested, and while without doubt the eventual gain to the commonwealth would be comparatively great, the first cost of giving the discharged pupils a start in life would be no more than that of providing them with the means to become self-supporting as farmers on their reserves.

In this connection it may be remarked that by banking the annuities of pupils, when parents will consent to this course, and encouraging them to deposit at any rate a share of what they may make in work outside of the school, provision is being made to furnish them with an outfit to enable them to prosecute their trades or otherwise start in life when they leave the institutions.

Accounts have thus been opened with seventy-eight pupils, and the amounts deposited by them already aggregate \$918.98.

Parents Unsettling Pupils.

Before passing from the subject of these Industrial Schools wholly supported by the Government, I must not forget to notice the success attained in preventing Indian visitors hanging about the schools, and so unsettling the minds of the children, as well as too often insisting upon carrying them off for visits to their homes, from which they would only be recovered with much difficulty if at all. It was constantly represented to me by those in charge of the institutions that to prevent such visits and to refuse to let parents take away their children as the whim might seize them, would bring the schools into bad repute, and render it impossible to secure new pupils.

I felt convinced, however, that the Qu'Appelle and Battleford Institutions have now been so firmly established that such risk might well be incurred in view of the advantages to be derived from putting a stop to the practices referred to, and I am glad to say that the measures taken to that end have been attended with considerable success, without the direful consequences anticipated in some quarters.

Industrial Schools receiving a \$100 per capita Grant from the Government.

These are at Elkhorn, St. Paul's, Winnipeg and St. Boniface respectively, and the assistance given to Emmanuel College, Prince Albert, on account of Indian boarders, is on the same scale. It is perhaps unnecessary to particularize with regard to these schools, and it may suffice to say that they are doing excellent work, and are in a flourishing condition.

Boarding Schools.

The McDougall and St. Albert Orphanages, the boarding schools at Round Lake, Birtle and Crowstand continue the good work done by them in the past years.

The Muscowpetung boarding school moved last year to Lake's End has been largely drawn upon for pupils who have been transferred in order to afford them the necessarily superior advantages to be obtained at the Regina Industrial Institution.

A marked improvement has taken place with respect to the boarding school at File Hills. The Indians at that agency have, as a rule, evinced a strong dislike to having their children educated, but in so far as securing pupils for the boarding schools is concerned, this has been overcome, and the means available could now be more than utilized.

Conclusion.

In conclusion I beg to inform you that the several statements accompany this report.

Mr. Inspector McColl will make his customary annual report on Indian Affairs within the Manitoba Superintendency.

The work in the territories which has necessarily kept increasing as more Indians have settled on the reserves, more agencies been sub-divided and more schools opened has rendered it at times difficult to keep abreast of the press of business at head quarters with the staff available, but extra exertions demanded by the strain have always cheerfully been responded to by my assistant and others of my staff, and so the work has been kept from going behind.

I have the honour to be, Sir,

Your obedient servant,

HAYTER REED,

Commissioner.

LOWER FRASER AGENCY, B.C.,

NEW WESTMINSTER, 1st December, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to submit my annual report for the year ended 30th June, 1891, with tabular statement and list of Government property under my charge at that date.

I am glad to say that the Indians belonging to this agency are progressing very favourably. They have during the past year made many and substantial improvements, not only in building houses, but in clearing new land, fencing and planting fruit trees, as well as road making. At Chehalis village fourteen new houses have been built since my last report.

The Indians of To-yle have built a bridge across the Chilliwhack River, and a road from this bridge to their reserve, at an expenditure of fifteen hundred dollars. This band has also purchased a threshing machine, which cost them six hundred and fifty dollars.

The Ohamelle Band have also made very satisfactory progress during the past year, more especially in planting fruit trees. The different bands in Chilliwhack and Sumas districts have also made considerable improvements in clearing, fencing and ditching. The Matsqui, Sangley and Towassen, as well as the Musquim bands, are all doing well; so are the Yale, Hope, Ewa-hoose and Skowall bands.

The above-mentioned bands I have called special attention to as being the most progressive.

Other bands are making some slight progress, but nothing compared to those specially mentioned. I have to report (with a feeling of regret) that there are a few bands making very little progress in any shape on their reserves.

The Keitsey, Capitaou Creek, Seymour Creek, False Creek, Popcum and Squattetts, are neither building, fencing nor clearing.

A considerable number of Indians have been employed at the canneries during the fishing season. They did well, and purchased a good supply of provisions for the winter, so that there is nothing to be apprehended on the score of scarcity of food.

They have plenty of fish, potatoes and other articles for their comfort, and there is apparently no element of discontent amongst them.

The prompt manner in which the white squatters on Sea Bird Island reserve were removed, and the visit of Superintendent Vowell seems to have given general satisfaction.

I have the honour to be, Sir,

Your most obedient servant,

P. McTIERNAN,

Indian Agent.

WHITE WHALE LAKE, N.W.T., 16th December, 1891.

The Honourable

The Superintendent General of Indian Affairs,
Ottawa.

SIR,—I have the honour to transmit the following report on the surveys of Indian Reserves in Manitoba and the North-West Territories this season.

In pursuance of instructions from the Department, I left Ottawa on the 18th July, for Regina, where I arrived on the 23rd, and consulted with Mr. Reed, Indian Commissioner, in reference to contemplated surveys.

In order to save the expense of obtaining a new outfit, consisting of camp equipage and transport, for Mr. Assistant Surveyor Ponton, who was detailed for sub-division work on the reserves north of Carleton, it was thought desirable to hand over to that gentleman the outfit I had been using myself for some years back in making surveys of reserves; seeing that the work under my own immediate supervision, lay for the most part near the railways, which now make remote parts of the country easy of access it was found to be less expensive and more expeditious to hire transport when necessary, than to take an outfit from Regina to the various points where work had to be done. In consequence of this I remained at Regina until Mr. Ponton's return from Saskatoon and Prince Albert, where he had been examining some land, in order to give him instructions, and to hand over to him the outfit.

On the 1st of August I proceeded to the Rockies for the purpose of selecting a timber limit for the Blackfoot Indians. I was accompanied by Mr. Begg, the Indian Agent, who met me at Calgary. We went to Castle Mountain, where I had seen much timber, suitable for building and fencing purposes, some years ago. An inspection of the country was made and we found that, although a great deal of timber had been taken off, there is still enough for the Indians on the tract selected on this occasion. An objection, which I have already pointed out, is that this limit is far from the reserve, and there would be a considerable expenditure involved in transporting the timber. It was thought some years ago that a limit might be acquired for these Indians at the gap or entrance to the Rockies, beyond the Stoney Reserves at Morley, on the ground covered by Major Walker's license, in the event of its being abandoned; but that gentleman informed me last summer that he had timber enough yet on these limits for three years' lumbering operations. A report accompanied by a sketch of the timber lands selected has been already submitted.

I returned to Regina on the 6th August and left for Oak River the following day to define the limits of the Sioux Indians' Reserve, and to sub-divide it into forty-acre

lots. The boundaries of this reserve were originally surveyed in 1876, by Mr. William Wagner, D.L.S. I found that a discrepancy in plotting Mr. Wagner's survey of the Assiniboine River, which forms its westerly boundary, made the area of the reserve appear on the plan much smaller than it really is, as will be seen by comparing the plan of the original survey with the re-survey of the boundaries made this season; or with the plan now on file in the Department, prepared for the purpose of being lithographed. I also found that a re-survey of the westerly boundary was made in 1884, by which a triangular piece of land, the whole length of that boundary and adjacent thereto, was improperly added to the reserve. The line of mounds of the last mentioned survey, together with the marks placed on the westerly limit of the road allowance, left along the west side of the reserve by the contract surveyor who sub-divided the adjoining lands, made the matter perplexing to the Indians. As a consequence the Indians have encroached upon this road allowance, and some of the white settlers, not only upon the road allowance but also upon the reserve. Mr. Wagner's original lines are now defined by posts and mounds and the complications no longer exist.

Indians only were employed on the survey.

These Indians have large fields of grain. Some of them harvested six hundred to one thousand bushels this year.

I found that it would probably be unsatisfactory to the Indians to proceed with the subdivision whilst the grain was standing, as we would necessarily have to chain through the fields. I therefore considered it better to postpone the work until after the harvest, and I proceeded to Regina to report the state of affairs to the Indian Commissioner.

On the 30th August, at the request of the Indian Commissioner, I went to the Industrial School at High River for the purpose of laying out a new road towards Calgary, as it was feared by the principal of the school that the ascent from the river bottom or flat on which the buildings stand to the plains, would be difficult by the surveyed trail, and that an easier grade and a safer road could be found by way of a certain *coulée*. At my request I was accompanied by Mr. Dennis, Inspector of Dominion Land surveys. We carefully examined the surveyed trail and the *coulée*. A better road might be made *viâ* the *coulée* than the one proposed, but the grade of the surveyed trail is comparatively easy, and if the road were properly constructed there would be no danger of vehicles tumbling over the bank, as feared by the principle of the school.

After being hospitably entertained we were shown over the institution by Père Merens, the principal. Everything seemed in splendid condition and the children remarkably well.

I returned to Regina on the 4th September, and received further instructions from the Indian Commissioner in reference to the survey of a strip of land along the Qu'Appelle River (on Indian Reserve No. 71, Chief "Ochapawace") in order to ascertain the exact extent of such land as will be affected by damming the river a mile and a half below Round Lake for milling purposes by Mr. Alfonse Beason, of White-wood. I left Regina on the 7th September and on my arrival at the place selected by M. Beason for a mill site. I found that the dam was nearly completed. I examined the lands indicated and duly reported on the matter when I returned to Regina. A grist mill at this point would be a boon to some Indians, as well as to the neighbouring settlers; and the lands bordering the river would be improved by the increased volume of water.

In accordance with instructions from the Indian Commissioner, I proceeded to Brandon on the 19th September and conferred with Mr. A. M. Patterson, barrister-at-law, in regard to a half-section of land adjoining the Experimental Farm there, which has been selected for the location of an Indian industrial institution, under the auspices of the methodist church. Mr. Patterson informed me that the half-section indicated had been purchased from the owner by the municipal corporation of Brandon, and that it would be transferred to the Department in exchange for the section in Southern Manitoba, set aside by order in council for industrial school purposes. Mr. Patterson and I carefully examined the land and fixed upon a site for the main building. This

site has the approval of the Indian Commissioner; and, I am told, the same spot was also chosen by Dr. Sutherland, of the methodist church. A survey was made to ascertain the differences of level between the Assiniboine River and the site selected for the several buildings, as well as the springs for water supply, and various other points about which information will be useful. A report and original plan of the above survey were prepared and forwarded to the Indian Commissioner at Ottawa by his request.

I left Brandon on the 28th September and went to Oak River where, after engaging a party of Indians, I resumed the sub-division of the Sioux Reserve. A few days of snow and rain retarded surveying operations by rendering the work difficult and unpleasant. Mr. Green, D.L.S., who had been sent by the department to assist me, arrived shortly after, but his theodolite was delayed on the way from Ottawa, and did not come to hand until the 10th October. In the meantime I carried on the work assisted by Mr. Green.

On the arrival of the instrument I proceeded to Regina, to which point I had been ordered to report myself to receive instructions then on the way from Ottawa in reference to certain surveys in the Edmonton district. Before proceeding to Edmonton, it was thought desirable to fulfil instructions already given to me to visit the Blood Indian Agency, and re-define the boundaries of the timber limit on Belly River, as it had been reported by the North-West Mounted Police that the lines could not be found by them, and that trespass was being committed. On my arrival at the timber limit I pointed out the boundary lines to Corporal Alexander, who, in accordance with my request, was sent with me by Major Steele. Mr. Interpreter Mills also formed one of the party. These boundary lines were run four years ago, and do not require to be re-surveyed. The country is much burnt and grown over with young poplar and spruce, yet the lines are easily recognizable. I did not see any trespass.

On my return to the Blood Agency, I visited the coal banks on the St. Mary's River, where some Indians are mining. I located the position of these mines and pointed out to Mr. Agent Pocklington the method of staking off claims for individual Indians, on which subject he had received instructions from the Department.

Having concluded what I had to do in the Macleod District, I left for Edmonton. Whilst at Calgary I made arrangements with Mr. Donald McLeod, of Edmonton, for transport for the work in that district. On my arrival at Edmonton I organized a party and purchased the necessary supplies from the Hudson's Bay Company. Final instructions were received on the 20th November in regard to the surveys already referred to, and in consequence of severe weather and recent snow storms. Sleighs were procured, after some delay, from Mr. McLeod, instead of the waggons with which I was already supplied for the expedition, and we started for White Whale Lake on Monday the 23rd. The road, although heavy, was fairly good as far as the agency, which is situated on Sand Lake, near the centre of La Potac's reserve, where we stopped the first night out from Edmonton. Snow and sleet fell during the afternoon and evening, and the party was glad to camp in a snug vacant house, which M. le Comte de Cazes, Indian agent, kindly placed at our disposal.

In driving through La Potac's Reserve it was pleasing to notice the marked improvement that has taken place during the last few years. Where a short time ago scarcely a building was to be seen there is now quite a settlement, and the wilderness has become a smiling plain. The houses, too, are well and substantially built, the fences strong and in good repair. What is also gratifying is the neatness of all the workmanship and the general tidiness everywhere discovered. It was also observed that a great deal of fall ploughing had been done.

The route then lay across Stony Plain. This is gently rolling prairie, with occasional bluffs of poplar and spruce. The soil is a rich, warm loam, suitable for wheat growing, and there are several well-cultivated homesteads, chiefly of Germans. The prairie chicken is plentiful.

About sixteen miles from the Agency we entered heavy woods, consisting chiefly of white and black poplar and spruce of good size and excellent quality. Other trees

noticed were the white birch, balsam and black cherry. All throughout the bush the wild pea grows in the greatest profusion and the utmost luxuriance, many of the vines being six feet high, and some of them still green even at this late period of the year. Partridge and prairie chicken were plentiful and we also noticed deer-tracks and rabbit-runs. The distance through the heavy woods is about twelve miles, the westerly portion of which is hilly. On emerging from the thick bush the trail passes over a roughly rolling strip of comparatively open country for about seven miles, now *brulé*, but recently covered with heavy timber, with which the country is clothed as far as the eye can reach. After crossing a corduroyed muskeg we travelled over a comparatively level tract bordering Mink Creek for about a mile and a half, and arrived at the Indian settlement four miles to the east of White Whale Lake, and made Paul's shanty, temporarily vacant, our headquarters.

On the following morning, Thursday, the 26th, I proceeded over some very rough country to White Whale Lake to make a survey of the reserve and fishing station for the members of Chief Alexis' band, to whom a reserve had not yet been allotted. These for the most part are followers of Paul, one of Chief Alexis' headmen. I began the survey of the eastern shore, the ice being sufficiently strong to bear a team. My party halted at noon near a half-breed's house, which, the weather being cold, was offered to us in which to prepare and partake of our luncheon. He also gave me useful information, and extended to us other other marks of kind attention. The survey of the eastern shore was continued the two following days, and on my return to camp on the Saturday, I found M. de Cazes had arrived in accordance with an arrangement previously made by us that he should meet me here. M. de Cazes was accompanied by Major McGibbon. I immediately prepared a plan of the eastern shore of the lake. This, with information I had gathered from an examination of the country for some miles around, together with the knowledge of the locality possessed by the Indian Agent, enabled us, after ascertaining the views of the Indians, to show them precisely on the plan, which they said they perfectly understood, the land that would be a fairly good reserve and fishing ground. Paul and the others present at the conference expressed themselves well-pleased with the reserve purposed to be set aside for them.

It may be well to observe that in 1880, Mr. George Simpson, D.L.S., surveyed a reserve at Lake St. Anne for Alexis and ninety one souls. Mr. Simpson reported that the other members of the band, who were then absent, had elected to take their portion of the reserve at White Whale Lake, where they have always hunted and fished. The yearly average number of Indians in Alexis' band, including Paul and his followers, for the last ten years, I find by the pay-sheet to be 208; last year the number was 219, and upon this basis the allotment of land has been made.

M. de Cazes left the following day, and on Monday I proceeded to define the boundaries of the reserve and fishing station, and continued to do so day by day until to-day, when the work was completed.

Two Indians were employed on the survey, so that the band might know the boundaries, and afterwards Paul joined the party, but unfortunately he cut both his legs severely with his axe on the second day and for the time being was incapacitated from further usefulness, either as guide or axeman. I may add that the Indians rendered every assistance in their power to facilitate the work.

The reserve and fishing station adjacent thereto are bounded as follows: Beginning at an iron post, ninety-one chains and seventy-five links, more or less, due north of the north-easterly corner of Township fifty-two in Range four, west of the Fifth Initial Meridian; thence south ten (10'75) chains and seventy-five links, more or less, to an iron post; thence east fifty-nine chains and ninety-eight links, more or less, to an iron post; thence south eighty-one chains, more or less, to an iron post; thence east four hundred and twenty-six chains, more or less, to an iron post; thence south three hundred and twenty-one chains, more or less, along a line of posts to the intersection in a lake of the said line of posts with the line of the posts forming the southern boundary of the reserve; thence west along the said boundary seven hundred and twenty-two chains and fifty-eight links, more or less, to a point on the eastern shore of White Whale

Lake, five chains and forty-six links due west of an iron post ; thence north-westerly and north-easterly along the said shore, as shown on the plan of survey to a point thereon fifty-eight links due north of the point of beginning and thence due south to the said point of beginning, containing an area of thirty-two and three quarters square miles, more or less.

Iron posts were also placed on the southern and eastern boundaries of the reserve, near the intersection of these boundaries with the westerly and northerly shores respectively of the lake situated at its south-easterly corner.

The land within the limits of the Reserve may be described generally as rough and hilly. It is heavily wooded with poplar and spruce ; fine specimens of the latter were frequently met with, having a diameter of thirty inches. There is also some white birch and tamarack. The undergrowth is principally willow. Nearly one-half of the Reserve has been over-run by bush fires. There is a tract containing an area of about seven square miles of level to undulating land, partially open *brulé*, in the easterly part, bordering White Whale Lake Creek and Mink Creek, and extending north-easterly across the Reserve, passing into true muskeg as the high lands are approached. In the muskeg water rose within a foot of the surface in the pits chopped out to mark the position of the posts on the boundaries. In the south-westerly part small patches of rich level land occur, but these are heavily wooded. The soil generally is a sandy clay loam, supporting a thick growth of tall grass, mixed with pea vine wherever the bush fires have destroyed the timber. The Reserve is well watered by creeks and numerous lakes and ponds of good water. Small hay swamps and muskegs are frequently met with. Extensive hay lands are found bordering Mink Creek, near the north-easterly corner. The Indians are settled near the centre of the easterly half of the Reserve, not far from the junction of White Whale Lake Creek and Mink Creek, on the level tract already mentioned, which is the spot selected for them by the Department, and is by far the best part for agricultural purposes. Paul and others showed me some fine samples of wheat, barley, oats, potatoes and turnips, but as yet their farming operations are on a small scale. Prairie chickens, partridges and rabbits were seen, but not in very great numbers. White Whale Lake abounds in whitefish and large pike, though the Indians say that the quantity is diminishing. Geese and ducks are also plentiful in the hunting season. A good sized lake near the north-easterly corner of and partly in the reserve, called Johnny's Lake, from which flows Mink Creek, and another large and irregular sheet of water, also partly in the reserve at the south-easterly corner, are said to contain large quantities of pike. Large game is very scarce, though bear is occasionally killed, of which I had an interesting proof. One day whilst at luncheon on the line we were joined by the wife of one of the Indians (Thomas) working on the survey, and another squaw. Cold as it was they had been out three days hunting with gun and dogs, and each one had a papoose on her back. Among the spoils of the chase they were bringing to camp were thirty partridges and a three year old bear that had been killed by Thomas' wife with an axe. Some of the party partook of the bear, a portion of which was kindly offered, and we were also presented with a few partridges. The bear had been cut up, and was being carried by three pack dogs. The hide was valued at twenty dollars.

I hope in a few days to close the season's operations by visiting Chief Alexis' reserve at Lake St. Anne, and also by surveying the claim of Mr. L'Hirondelle in the reserve of Chief "Michel."

I have the honour to be, Sir,
Your obedient servant,

JOHN C. NELSON,

In charge Indian Reserve Surveys.

A salary of \$300 per annum is paid to the teacher of each school wholly supported by the Government, and \$12 per annum for each pupil over the number of 25, and up to the number of 42; the whole not to exceed \$504 per annum. The teachers of such of those schools as receive aid from Missionary Societies receive from the Department, in addition to such aid, the sum of \$12 per capita per annum on an average daily attendance, not to exceed 25 pupils, nor \$300.

AND ROOTS SOWN AND HARVESTED.

AGENCY.

Buildings Erected.	Acres Summer Fallowed, 1891.	Acres Fall Ploughed, 1891.	Remarks.
4 houses ; 2 stables ; 5 store houses ; 1 root house. 87 houses ; 21 stables ; 24 root houses.			Oats and potatoes a fair crop ; small acreage, on account of scarcity of seed in spring. Garden stuff a poor crop, owing to cutworms. Garden stuff consumed as grown.

AGENCY.

9 houses ; 3 stables ; 8 store houses ; 3 root houses.			The horses and work oxen are loaned to Indians during the spring, fall and other work, but at other times are under charge of the Instructor.
216 houses			Pea crop a failure ; eaten by grub.

RESERVE.

2 houses ; 2 stables ; 4 store houses ; 1 root house 30 houses ; 1 stable ; 6 store houses 38 do 15 do 48 root houses 58 do 20 do 57 do 36 do 12 do 45 do			Five old houses taken down and new houses erected. The Sarcees store their potatoes in the cellars of their dwellings.
--	--	--	---

FOOT RESERVE.

20 houses ; 1 stable ; 1 root house ; 1 pig-stye.			Some of the houses were built to replace old ones ; about 12 additional new houses have been put up. Turnips, carrots, beets and onions were sown in gardens. These were a partial failure, and were consumed by the Indians during the summer months.
--	--	--	---

FOOT RESERVE.

107 houses ; 2 stables ; 6 root houses			The oats, and all other root crops, except potatoes, were a failure, on account of drought in the early part of the season. 15 old houses were rebuilt during the year ; and 4 new ones.

ANNUAL REPORT

OF

COMMISSIONER L. W. HERCHMER

NORTH-WEST MOUNTED POLICE, 1891.

NORTH-WEST MOUNTED POLICE,
OFFICE OF THE COMMISSIONER,
REGINA, 31st December, 1891.

The Honourable J. J. C. ABBOTT,
President of the Privy Council, Ottawa.

SIR,—I have the honour to forward herewith my annual report for the year ended the 30th November, 1891, together with the annual reports of the following officers for the same period:—

Superintendent Cotton,
do McIlree,
do Gagnon,
do Steele,
do Perry, with reports from Inspectors Primrose, McGibbon,
Wilson and Constantine,
do Deane,
do Griesbach,
do Jarvis.

Inspector Howe,
do Begin, on duty performed by the detachment in district of Keewatin.

Senior Surgeon Jukes,
Assistant Surgeon Ayles,
do Paré,
do Dodd,
do Fraser,

Acting Assistant Surgeon Bain,
do Mewburn,

Hospital Sergeant Braithwaite,
Veterinary Surgeon Burnett,
Assistant Veterinary Surgeon Wroughton,
Veterinary Staff Sergeant Poett,
do do Pringle,
do do Barry,
do do Mitchell.

PATROLS.

The patrol system as carried out during the last few years has been followed this season, with such changes as experience has proved advisable, and has worked to the satisfaction of the settlers generally. The result has been that very little crime of any kind has taken place, and horse-stealing has almost ceased, speedy arrests and prompt convictions having followed in all cases in which we received information in anything like reasonable time. In one or two instances the owners of stolen horses have talked considerably about the slowness of the police, but in all these cases the thieves had several days' start before we received information, and were across the line before we were aware of the theft. Several of these thieves have, however, been brought back and are now undergoing sentence.

Four Blood Indian horse thieves who made a marauding trip into United States territory this autumn were captured in Montana, and sentenced to eight years' imprisonment. This will have a salutary effect on our Indians.

Our detachments in the west are all so well acquainted with most of the troublesome members of the various Indian bands that we have less difficulty every year in keeping track of delinquents.

Very few additions have been made this year to our outposts, but many of them have been repaired, and in several instances taken down and re-erected. The large stable at Wood Mountain, owing to the wet weather and a subsequent landslide, was in great danger of falling down; to save further damage the building was taken down and re-built at a cost of \$300. The stable at Touchwood which was burned down in the autumn has since been re-built. New buildings at several detachments—specifications for which will be sent in later—are urgently required, and I trust you will approve of their construction at an early date.

One officer and twenty-nine constables are still employed in southern Manitoba assisting the Customs and Interior Departments, and I believe have done good service.

Inspector Begin and a small party on the opening of navigation were sent to Lake Winnipeg for patrol duty, and at the request of His Honour the Lieutenant Governor of Manitoba and Keewatin, their services were extended to a point considerably east of Winnipeg. The report of Inspector Begin is attached, from which it will be seen that a large tract of country was covered.

His Honour the Lieutenant Governor of the North-West Territories has on several occasions visited some of our posts, and on every occasion we have supplied him with transport, &c.

INDIANS.

The Indians all over the Territories have behaved remarkably well, and the fine crops raised on many of the reserves, outside the south-western district, have more than ever brought home to them the advantages of attempting to farming.

Some cattle have been killed near Macleod. In endeavoring to arrest a party of depredators Constable Alexander was shot and slightly wounded, Constable Ryan, who was with Alexander, returned the fire, severely wounding the Indian who shot Alexander. The Indian very nearly died in consequence, and may die yet. He will surrender as soon as fairly convalescent. It was considered necessary to strengthen the detachments in the west during the excitement resulting from this shooting, but I am happy to say nothing occurred beyond a little talk. I still consider that Indians should not be allowed to carry arms off their reserves in the western country, as there is no game to shoot and cattle are sure to suffer. These Indians, viz., The Bloods, Blackfeet and Piegans, receive beef and flour daily for every soul present on the reserve. This privilege is not a treaty obligation, however, and they should, I think, in consideration of this handsome allowance, be kept on their reserves, except under very stringent conditions. A desire to cut hay for sale is spreading even among the Indians in the south-western portion of the Territory, and as they were successful this season in their hay-making, I have no doubt this practice will obtain next year to a still greater extent. The best hay this year that we received was put up by Indians, but their delivery gives us more trouble here than that of white settlers, as the former are generally wretched hands to unload.

The usual assistance has been given the Indian Department, treaty money having been conveyed and payments attended when required.

LIQUOR QUESTION.

This is still a burning question, and gives us more trouble than ever; a speedy solution of the difficulty is, however, expected from the North-West Legislative Assembly, now in session. In all probability a license system will be adopted, which, if it is a strict one, and no exceptions under any consideration are allowed, will work well.

Beer is still imported, and I cannot understand why, when it is allowed in under permit, it cannot also be brewed here under permit, as barley is a safe crop and of very excellent quality.

HORSES.

We are still buying only western horses, not a single eastern horse having been bought for several years. We still fix certain dates to buy at certain central points, and buy the most suitable animals for our work offered. A good horse at a reasonable price is, however, taken at any time, and we have great difficulty in securing enough suitable horses to mount the force. Every year is improving, however, and with the progeny of imported horses coming into market next spring I expect to be only obliged to buy horses adapted in every way for our service.

One hundred horses will be required next year, and enough cast ones will be sold to furnish half the money required for the purchase. We pay about \$118 per horse on an average, and the heavier ones after a short time under saddle are used as team horses, and answer very well, standing hardships better than eastern animals, although not so fine in appearance.

A great deal of good stock has been imported this year, but generally of the heavier breeds. I think better care has been taken of our horses than formerly, and with better stables on the lines of patrol we will, I trust, lose fewer horses in the future.

I attach a list of horses purchased, and their cost, together with a list of those cast and sold, with the prices they realized:

RETURN of Horses Purchased between 1st December, 1890, and 30th November, 1891.

SADDLERY AND HARNESS.

Our saddlery is in very fair order, and with a few new saddles added would be quite equal to our requirements. Our harness is good and generally excellently kept. A few new sets will put us in good shape for another season.

All our saddlery and harness is now made in Manitoba and the North-West, and is quite equal to eastern make.

FORAGE.

I am pleased to report that there has been a decrease in the cost of forage all over, and even at Lethbridge, Macleod and Battleford both hay and oats are cheaper than last year, although at Battleford the famine prices of oats die hard.

The price of oats ranged from 23 cents at Prince Albert to 57 cents at Battleford; hay, from \$3 at Batoche to \$15 at Lethbridge.

TRANSPORT.

This year we have for the first time had all our light transport made in the Territories. Last year we tried the firm of McCurdy & Tucker, of Moosomin, in a small order; this was so very satisfactory that this year I obtained permission to give them a larger order, which they completed entirely to the satisfaction of all

officers who have tried their waggons. The price compared favourably with that of those hitherto supplied from the east, and we had the advantage of constantly overlooking the work in course of construction. I hope next year to be permitted to order the few waggons and buckboards we require from the same firm.

ARMS.

The Winchester carbines are in about the same condition as last year. We are still supplying new barrels, but the great difficulty is in the sighting, which is very poor. However, we can use them for a time, and when it is settled what is the best carbine we can replace them by divisions.

The ammunition made by the Dominion Cartridge Company, although inspected by Superintendent Perry, a competent and careful officer, has turned out badly. It looks as if a quantity rejected by Superintendent Perry had been packed through the boxes before delivery, to the extent of about one-fifth of the whole. A board is now sitting on this ammunition.*

We are using Morris tubes for recruit practice during the winter with great success.

BARRACKS.

Very little improvement has been made in our barracks this year—in fact, we have only about held our own. Next spring most of the barracks will require painting, and a considerable number of new buildings will be required, especially at Calgary, where new officers' quarters are urgently required—both inspectors now living in town, which seriously interferes with discipline.

New stables are very much required at Fort Saskatchewan, and I have already asked authority to get the timber out at once, as it can be done at reduced cost during the winter months.

A large sum is required next year for both new buildings and repairs, and it will, I think, be found much more economical to provide the amount at once than to spread it over several years.

We are still using bed-boards and trestles instead of iron beds.

PHYSIQUE.

The physique is about the same as last year and will now hardly improve, as we have very few men much below the standard found most suitable for our work, and it is not desirable to take on too heavy men. The average height is about 5 feet 9½ inches, and chest measurement about 38½ inches. There are very few men in the force not capable of full mounted duty and equal to hard and continuous service.

DISCIPLINE.

The discipline is about the same as last year, with a still further decrease in drunkenness. There have been thirty-six desertions during the year, an increase of fifteen. Most of these were, however, recruits who left before learning their work. I regret to say that several re-engaged men deserted almost immediately after re-engagement; women in at least three cases were the cause. A staff sergeant, a day after his promotion, deserted, and so far no reason has been assigned for his departure except ill-health. He was on leave in Winnipeg, and was under the impression he was threatened with Bright's disease.

DRILL.

Drill has been carried out at all posts whenever practicable. In the spring every man was put through a course. At Macleod, where there are two divisions, there was a great deal of drill all through the summer. At Regina drill has constantly been going on, and I have been able to keep the recruits this summer a much longer time before drafting them to other divisions. The previous summer, owing to being under strength, many recruits left here before they were really sufficiently instructed to do their duties.

*NOTE.—This has been corrected at the company's expense.

KITS.

The articles issued have been generally of excellent quality, but some improvements can be made in the boots. The legs of the long boots are too limp and light. The ankle boots are complained of, and I think the contract price is too low for a really serviceable article. Felt hats have been generally used this year on patrol, but it has been found difficult to get a hat that will keep its shape in bad weather, at a reasonable price.

PAY.

I can make no alterations in my report of last year on increase of pay, and I beg to repeat my remarks here. The senior sergeant major and supply sergeant at headquarters are both underpaid, in comparison with other staff sergeants. I would again strongly recommend that their pay be raised to \$2 per diem. I still consider that the paymaster, adjutant, quartermaster and Commissioner's secretary should get extra pay, as their work is infinitely greater and more responsible than that of duty inspectors. I hope that both inspectors' and superintendents' pay will be graded according to service. At present an inspector on joining gets the same pay as the senior inspector, who frequently is in charge of a district, while a superintendent, no matter how long his service may be, can never under the present Act get an increase.

The salary paid the Assistant Commissioner is also very small for his responsibilities, while the salary of the Commissioner, in command of some thousand men and horses, remains the same as it was when the force only contained about 300 of each. The influx of settlement, daily mails, newspapers and lawyers have vastly increased the business, and the increased responsibilities are enormous.

The veterinary surgeon's position I would again bring to your notice, as while the senior one has been made an inspector at \$1,000, this salary is still not sufficient for the head veterinary surgeon of a force of this class.

The salary of the senior surgeon, \$1,400, is also very small for his responsibilities, and assistant surgeons might be graded on the same rule as is proposed for inspectors.

DEFERRED PAY.

I would again bring to your notice Superintendent Steele's suggestions on this matter:—that instead of adding a man's good conduct pay to the amount handed him every month, it be held over as deferred pay, so that at the expiration of his term of service there would be, in spite of himself, quite a sum of money coming to him. This would also have a salutary effect in putting a stop to desertions; \$15 a month is quite sufficient for a constable's needs in this country, and as a rule the balance if spent at all is practically thrown away. Men, however, who happen to be married might be permitted to draw their full pay.

SAVINGS BANKS.

The amounts deposited by the men of the various divisions during the year are as follows:—

A.....	\$2,299 00
B.....	2,095 13
C.....	1,251 35
D.....	1,919 86
E.....	866 15
F.....	2,209 60
G.....	1,547 95
H.....	1,586 66
K.....	868 10
Depot.....	1,937 90
Total.....	<u>\$16,581 70</u>

Withdrawals amounted to \$21,853.39.

RATIONS.

The rations this year have been very satisfactory, and the prices lower than ever in many articles.

FUEL AND LIGHT.

Coal is still too dear in the south, considering its abundance; but it is very cheap at Edmonton, viz., \$2.40 per ton; while wood is very reasonable at Saskatchewan, Prince Albert and Battleford.

The consumption of fuel is very large, owing to the construction of our older posts, and the cost is still enormous at Macleod, owing to the cost of transportation.

The electric light has been introduced at Calgary barracks with marked success. In all future contracts I would recommend that abundance of light be provided, which need only be used when required.

Regina has now a good system, and I would strongly urge that it be forthwith extended to the barracks, in which about 300 lamps are used, which from the temporary nature of many of our buildings are a constant source of danger.

All barracks should be lighted with electric light as fast as circumstances will permit.

The coal oil supplied under contract at the different posts gives only a very indifferent light. I consider it would be more satisfactory if a better grade of oil were tendered for.

CANTEENS.

Canteens are now working at Regina, Macleod, Lethbridge and Calgary, and are found to be a great convenience and saving to the men. The profits reduce the cost of messing, and afford the men recreation which they could not otherwise enjoy.

I find that there has been a sensible decrease of crime and in the number of breaches of discipline at those posts where canteens have been established; and that these posts compare favourably in this respect with those where no canteens exist.

I would draw your attention, in this connection, to the remarks made by Surgeon General Sutherland, of the United States Army, in his annual report just issued. He says: "The cases of treatment of alcoholism numbered 40.73 per thousand for the army, as against 41.43 in 1889, and 56.68 the average during the previous decade. From Fort Niagara, N.Y., the report comes: 'A remarkable change has taken place in the habits of the men as to sobriety. Since the establishment of the canteen signs of intoxication are rarely seen and the guard-house is without occupants.' Nearly all the other reports are to the same effect, and on the other hand, the commandant at Fort Leavenworth notes an increase in the number of cases of alcoholism since the sale of beer in the canteen was stopped. The canteen has relieved our military posts of one-third of the cases of alcoholism that formerly tended to the demoralization of the individual, the infraction of discipline, assaults, injuries and deaths."

No wines or spirits are allowed in our canteens.

PRISONS.

The opening of the Regina gaol has relieved us of a great many prisoners in the eastern portion of the Territories. At Calgary, Edmonton, Battleford, Macleod and Lethbridge all prisoners under two years' sentence are still confined in the police guard room.

I would suggest that the Regina and Prince Albert gaols be utilized for the detention of all prisoners undergoing under two-year sentences.

ROADS AND BRIDGES.

The approaches to the Lethbridge bridge are still unimproved and the bridge is almost useless in consequence. Some other bridges in the country off the line of railway are in bad condition, notably that over the Battle River, on the old Edmonton trail, which is positively unsafe. The abandonment of through travel on many

of the old trails, caused by the use of the railway, will naturally cause these trails to be overlooked, unless some special arrangements are made for their repair.

A bridge has been built over the Old Man's River at Macleod, but all the other places mentioned in my last year's report are still unbridged.

FIRE PROTECTION.

Our fire appliances are still not as good as they should be, and constant watchfulness is our best protection. In cold weather our small hand engines invariably freeze up, and we have to depend on Babcocks and fire pails, which are efficient if got to work immediately a fire starts. Very little damage has been done this year by fire.

TELEPHONES AND TELEGRAPHS.

These are in the same condition as last year, and I still think that these systems should be extended to all police outposts.

EQUIPMENT.

Our equipment is good and sufficient and we are ready to turn out at any time.

PRAIRIE FIRES.

We are still perfecting our system for the suppression of prairie fires, and we have increased the number of men sent out this year on special duty to look after them. Their efforts have been very successful in prosecuting offenders, but the law is practically a dead letter, as the fine generally levied by civilian magistrates is so small—about \$2 being the average—that the penalty deters very few from starting a fire if their selfishness prompts them to improve their own places. Most disastrous fires have occurred this season, and will continue to occur until the ordinance is amended. The fine for a wilful case should be at least \$100, and in aggravated cases imprisonment should follow. The great trouble we have to contend against in order to secure convictions—which, however, owing to the above cause, do not frighten much—is the difficulty in getting witnesses; unless they have been damaged themselves few settlers care to interfere. The origin of one prairie fire which caused the death of a settler's wife and her two children is, I consider, still unknown to us from this cause.

The Canadian Pacific Railway have ploughed a good many fire-brakes this year and the fires from that source have been greatly decreased. The general superintendent, Mr. Whyte, and all his employées, and General Superintendent Barclay and his employées, of the Galt road, have evinced commendable determination, as far as they are concerned, to stop prairie fires.

ASSISTANCE TO RAILROADS.

The construction of the Calgary and Edmonton and the Calgary and Macleod railways was closely watched by the police and every assistance was given the contractors in enforcing the absence of liquor from the camps. Several arrests were made for illegally leaving employment, but, on the whole, the best of order was maintained all through. One officer was in charge of constables on railway construction all the time.

To the railroads in running order no particular assistance was given, as none was asked for or required.

RANCHES.

The season has been particularly favourable to ranchers; the increase of cattle, horses, and sheep, particularly the first and last, has been exceptional, and to my knowledge there has been little or no anthrax. McHugh Bros., ranching near the Blackfoot reserve, lost a number of colts from a disease that had all the symptoms of anthrax, but, beyond this, there was little or none.

Wolves have done considerable damage, particularly in the Porcupine Hills and in the vicinity of the foot-hills of the Rockies. In the Porcupine Hills Mr. Cross

lost about twenty colts, as many as eighteen large timber wolves having been seen in one pack. A good many wolves have been run down by dogs, but the inaccessible nature of the country allows them to increase faster than they can be killed. There is an almost universal cry for the Government to offer a bounty for their destruction. I think if the ranchers would organize and show united action, coupled with a Government bounty, that the country would soon be cleared of these pests.

Next year I expect to see a great improvement in horses offered for sale, as many of the colts from imported sires will then be four years old. Some of these colts are very promising.

A good many horses have been sold in Manitoba and large numbers of cattle and sheep have been sold out of the country, most of the former being shipped to England and the latter to British Columbia. The dead meat trade to British Columbia is developing rapidly, and several firms are making arrangements to go largely into the business next year, one company erecting a large building for cold storage at Calgary.

The Indians, as usual, have killed some cattle and have been caught with beef. Whether the animals had died or had been actually killed has not yet transpired.

SETTLERS.

The enormous crops that have been harvested all over the Territories, with the solitary exception of Battleford, where very little crop was put in, has had a very cheering effect on the settlers, and the friends of many of them are making preparations to come in next year. A large area of land has already been taken up this year, and many new settlers have made a fair start for next season's work. Edmonton has received the greater bulk of the new settlement. I beg to refer you to Supt. Griesbach's exhaustive report for full information. That country is, in my opinion, about the best portion of the Territories for the ordinary working settler, and with plenty of timber, hay and coal, good land and a fine climate, together with fair gold mining in the fall, I cannot see why its progress should not be rapid. The district north-west of Saltcoats has probably secured the next largest quota of settlers, and as it is a fine country for both stock and farming, it should settle up fast. Most of these settlers are hardy, experienced farmers, who have already gone through all the phases of pioneer life in Dakota, and are consequently not liable to the mistakes of new settlers. A good many Germans who have come in this year have taken hold without delay, and many of them have enough grain and potatoes of their own raising to put them through the winter.

The Mormons at Lee's Creek are progressing rapidly, are preparing to irrigate their land and are erecting a grist mill. They had a fine crop this year, and have reduced the prices one-half since their arrival. They are apparently living within the law, and are very industrious and frugal.

The half-breeds are generally better off than usual, and should get through the winter without assistance, except in the case of a few aged people.

Superintendent Cotton reports that some at Cumberland, who left treaty, are very destitute, but as their treaty only gave them \$5.00 per head and a little grub during payment, I cannot see why they should be worse off than before; muskrats, prairie chicken and rabbits are fairly plentiful this year, and they should have no difficulty, if they rely on themselves, to make a living. If they wait for Government aid they will be hard up, but not otherwise. If any relief is required, I would recommend that it be administered by the police, as they are better acquainted with the really destitute than even the clergymen of the various denominations. Take it altogether, the prospects of the settlers at large were never so bright as they are to-day.

GAME.

Prairie chickens are more numerous than ever; rabbits are fairly plentiful in most districts and very scarce in some. Black-tailed deer were very plentiful in the fall, but the early snow has enabled hunters to track them, and a

great many have been killed in consequence. One police scout killed seven in one day. Bears are plentiful in some districts, and I am sorry to report that there is a very large increase in the number of timber wolves in the west. Muskrats are increasing rapidly, and with another wet summer and the filling up of the numerous lakes, dry for some years, they will be as plentiful as ever. This will be an immense boon, not only to the Indians and half-breeds, but to many of the settlers. The former eat the rats as well as sell the fur, and in a good season there is consequently plenty of food.

Now that the Fishery Department has taken hold of our fishing interests in the North-West in earnest, and appointed local men to look after them, there will be a large increase in the catch in a short time. Pickerel are not, however, sufficiently protected, as they undoubtedly spawn long after the close season is opened.

TREES.

We are still planting trees, but the only sorts that appear, so far, to thrive here, are the native maples—both those transplanted from the ravines in the vicinity and those grown from seed are doing fairly well. Those that are in any way sheltered from the winds are growing rapidly. At Calgary and Lethbridge where a lot of trees from the east have been planted, the wind is particularly trying, the trees have made little progress, and most of them will, I think, die this winter.

GENERAL.

The force has been slightly under strength during the last year, but the police duties have been carried out well. The almost total absence of crime in the Territories and the prompt arrest and conviction of delinquents, I think, shows this conclusively.

The behaviour of the rank and file during the year has again been excellent, and I have received the hearty support of nearly all the officers of my command.

Alterations in the strength of the force, by General Orders, from 30th November, 1890, to 1st December, 1891 :—

Men.

Enlisted.....	220
Re-enlisted without actually leaving.....	141
do after having actually left.....	32
Re-joined from desertion.....	2
Discharged by purchase.....	36
do as invalids.....	12

Deserted.....	36
Dismissed.....	14
Died.....	6

Horses.

Remounts.....	99
Cast and sold.....	83
Died.....	18
Destroyed.....	11

I have the honour to be, Sir,

Your most obedient servant,

L. W. HERCHMER.

Commissioner.

APPENDIX A.

ANNUAL REPORT OF SUPERINTENDENT JOHN COTTON, COMMANDING
" F " DIVISION, 1891.NORTH-WEST MOUNTED POLICE,
PRINCE ALBERT, 30th November, 1891.

SIR,—I have the honour to make the following report for the year ended this date:—

INDIANS.

It is very gratifying to report that the Indians on the different reserves in this district have been quiet and well-conducted during the year, and on no occasion have we been called on to render assistance to the Indian agent.

I am informed that on some of the reserves the Indians have managed to secure enough grain to keep them in flour during the coming year.

Escorts were furnished to the Indian agents paying treaty, and no disturbance of any kind occurred.

HALF-BREEDS.

It is difficult to premise in what state the half-breeds will find themselves during the coming winter. No doubt those who were thrifty enough to put in crops will be infinitely better off than they have been for years. It must not, however, be presumed that thrift has shown itself in a majority of cases. The nomadic nature of the half-breed prevails; many of them gather buffalo bones in summer, which they sell at fairly remunerative rates at the Canadian Pacific Railway sidings; in the autumn a fairly good living can be made from the game of the country, and many of the half-breeds are expert hunters; then, again, in winter they have the fisheries to fall back on. Still, taking all this into account, there are a large number of families too poor to help themselves in any way.

In the average half-breed the Indian nature largely predominates, and it is not to be expected that they can turn themselves into farmers at will. As freighters they were willing to work and could work. The advent of a railway deprived them of this mode of earning a living. It is not in their nature to be provident, and doubtless by the time mid-winter arrives many cases of absolute destitution will present themselves as deserving aspirants for Government aid, particularly in the Cumberland district, where, unfortunately, a large number of families, some years ago, obtained leave to withdraw themselves from the Indian treaty under which they had previously lived. By such withdrawal they obtained scrip and alienated themselves from the Government, whose wards they had previously been. That unprincipled traders benefited by such issue of scrip I do not doubt, but the unfortunate half-breeds, instigated by these very traders, now find themselves in sorry circumstances, and it may be that for some years to come the Government will annually find itself compelled to give aid. It can, however, always be given in the shape of work, which the half-breeds are willing to perform.

The system of obtaining work in return for the relief issued has been tried with very satisfactory results for the past few years. In the past winter relief was granted to the amount of \$1,350, for which we obtained 432½ cords of wood and had 416 cords of firewood split ready for use.

CRIME.

No serious crimes have been committed in the district; this you will observe from the return enclosed herewith.

LIQUOR LAW.

I need not remind you that this subject has given rise to much controversy during past years. It may, however, now be accepted that such controversies are at an end, as by the recent amendments to the North-West Territories Act the matter has been placed in the hands of the Legislative Assembly for final decision. It is apparently safe to presume that a license liquor law will be substituted for prohibition.

PATROLS.

The system of patrolling the district has been regularly carried out. As each patrol returned to barracks another went out; thus a flying patrol was always on the move—this in addition to the systematic patrolling from permanent outposts.

I can fearlessly assert that never in the police history of Prince Albert has the patrolling of the country received greater attention than during the past year.

TRAINING.

As soon as the weather permitted spring drill was commenced, and continued until every member had gone through a thorough course. On the completion of the drill, musketry practice was taken up and all members completed their course. Some very good shooting was made, particularly that of Sergt. Bailey, who made 305 points out of a possible 360.

Several members of the division competed in the matches of the Saskatchewan Provincial Rifle Association, and carried away some valuable prizes.

The division entered a team of five men in the North-West Rifle League, and took first place, securing a trophy cup.

The division formed itself into a rifle association and subscribed the sum of \$100 in prizes. In addition to this, several handsome special prizes were donated. Five matches were shot and a keen interest taken in the competition.

Some official encouragement should be given to shooting. I would respectfully suggest that a grant of at least \$50 be made annually to each division, to be awarded as prizes on the results of the annual target practice.

CONDUCT.

I am proud to bear testimony to the fact that the conduct of the men has been most exemplary. I have no serious charges to report, and the crime of drunkenness is quite unknown.

DESERTIONS.

No desertions have occurred in this division.

HEALTH.

No deaths have taken place, and the general health has been all that could be desired.

I would again point out that we are without proper hospital accommodation at this post, and in event of a serious outbreak great inconvenience would necessarily be entailed. I hope that some steps will be taken to remedy this matter during the coming year. I would call attention to the senior surgeon's report of last year, which reads as follows :—

"The building of a small hospital at this post, capable of holding not less than 10 beds, should not be deferred, as under existing conditions an outbreak of any epidemic or contagious epidemic disease, from which this post has hitherto been so happily exempted, would be attended with very serious consequences."

RATIONS.

On the whole, the supplies furnished are of excellent quality, although I consider that better tea and coffee should be obtained. It must be remembered that in the North-West Territories tea is a very important article of diet.

I am of opinion that properly-trained cooks should be employed at each post; this would ensure the full benefit of the rations being obtained and do away with a large amount of waste, which, under the present circumstances, must always exist.

KITS AND CLOTHING.

The quality of the kits and clothing supplied is very good, though I am still of opinion that in many cases a change in pattern should be established—this without a loss to Government—*vide* my annual report of last year :

“I would again repeat my previously-made recommendation in favour of a prairie suit of some neutral colour. A loose Norfolk jacket (lots of pockets), made of light, soft cord, with riding breeches of same material, would, I think, answer our purpose admirably.”

I would also recommend that a free issue be made of pea-jackets; one would last for five years.

DISCHARGES AND ENLISTMENTS.

During the year seven men of this division severed their connection with the force, while sixteen re-engaged for a further term of service.

I copy the following from my report of last year:—

“I earnestly trust that some plan may be adopted by which all non-commissioned officers and men will have, on giving, say, six or seven weeks' notice, the unconditional right of purchasing their discharge.”

FORAGE.

The hay and oats supplied are of exceptionally good quality and were received at very reasonable rates, only \$5.75 per ton being paid for hay and about 30 cents per bushel for oats.

SADDLERY AND HARNESS.

The saddlery and harness are in good condition. Several small articles will be required during the year.

TRANSPORT.

With the following exceptions, viz., one light spring waggon and two buckboards, our transport will be sufficient for another year.

SAVINGS BANK.

The sum of \$2,209.60 was deposited in Government savings bank during the year.

FIRE PROTECTION.

To guard, as far as possible, against loss by accidental fire, we have at this post one good hand fire engine and a supply of Babcock fire extinguishers. These are always kept in a thoroughly efficient condition. Fire parades are held frequently, and detailed regulations have been drawn up giving minute instructions as to the duty to be performed by each member of the division on the “fire call” sounding. Every man has his post and knows what is demanded of him.

On the “fire call” sounding a supply of water has been brought to bear on the scene of a supposed conflagration in two minutes.

We have two wells in barracks—one in the vicinity of the guard room, and the other east of the men's barrack rooms. In connection with the last-mentioned well there is a supply tank capable of holding a large water reserve. This tank is always kept full. Both wells, however, are of limited power.

I would, therefore, recommend that a really good well be sunk upon some commanding point at such a distance from the stables and other outlying buildings as to prevent the percolation of filth into the water. This would not only give a good supply of water in case of fire, but would also supply drinking water for the post. At present drinking water has to be drawn from the river.

HORSES.

The horses of this division are in good condition. They have received every care and attention, but I cannot say that they are a useful lot of animals.

Many of them, I have no doubt, originally cost the Government comparatively little; but I have great doubts if poor horses are cheap at any price.

We now have in this division 26 saddle and 23 team horses. During the year nine horses were cast. For our work these cast horses were absolutely useless.

Among the saddle and team horses alluded to above there are several animals that I am satisfied you will cast on inspection. Speaking generally, I have never seen a division as badly horsed as this one is.

When the Assistant Commissioner made his recent inspection he expressed it as his opinion that though the horses were in good condition they were the worst lot he had ever seen in the force. In this I quite concur.

BAND.

At one time this division had a good band. It has, however, become inefficient by transferring the most efficient musicians to Regina.

That such transfers were rendered necessary by the exigencies of the service I do not doubt.

I have given up all hope of maintaining a divisional band. The band instruments are now in store. They are the property of the division, and as we can no longer hope to put them to any legitimate use, it would, I think, be well to offer them for sale by public auction, and utilize the proceeds for the benefit of the recreation room.

CROPS.

This year's harvest has been a most abundant one. The wheat and oats are of an exceptionally good quality.

GENERAL REMARKS.

The general prosperity of this district is apparent on all sides; particularly is this the case in the town of Prince Albert, where the municipal authorities have expended a very considerable sum of money.

The town can boast of good telephonic and electric light systems.

The Commissioner,
North-West Mounted Police,
Regina.

I have the honour to be, Sir,

Your obedient servant,

J. COTTON,
Superintendent, Commanding "F" Division.

APPENDIX B.

ANNUAL REPORT OF SUPERINTENDENT J. H. McILLREE, COMMANDING
"E" DIVISION, 1891.

"E" DIVISION, NORTH-WEST MOUNTED POLICE,
CALGARY, December, 1891.

SIR,—I have the honour to forward my annual report for the year ending 30th November, 1891.

GENERAL STATE OF DISTRICT.

During the past year this district has prospered, as a general rule. I have not yet received a list of new settlers, but the number has been fairly large, though, to a great extent, newcomers have gone north into the Red Deer and Edmonton districts. The past winter was mild, with little snow; stock did well, and the increase was large. Rain was scarce in the spring, but later enough fell to ensure good crops. A couple of heavy hail storms did a great deal of damage to some parts of the district.

Calgary continues to grow and prosper; several new stone blocks have been built; waterworks are in operation, also sewers; the electric light system has been much extended; telephones are in general use; a small foundry has been started, and a grist mill is, I believe, shortly to be built. One of the chief needs of Calgary is a good hospital, the present temporary one being wholly insufficient for the needs of the town and surrounding country.

Coal mines are being worked at Anthracite and Canmore, from which places large amounts of fine coal are being shipped to many points. The mines at Knee Hill Creek, south fork of Sheep Creek, High River and Blackfoot reserve are being worked to a limited extent, the latter by the Indians. The coal in all these mines is of a good quality and only needs capital to develop it. A railway is projected to the Knee Hill Creek mine. There has been a large number of travellers to the National Park, where improvements have been made on the roads and mountain trails. The Calgary and Edmonton Railway has been completed; the extension south was commenced on the 1st August, and the grade finished to within eight miles of Macleod and rails laid to Mosquito Creek, a distance of about fifty miles from Calgary.

CRIME.

I have nothing to record of a very serious nature. The most serious have been house-breaking, larceny and cattle-killing. As far as I have been able to judge, horse-stealing has not been nearly so prevalent as in former years. There has been some cattle-killing, but not to any great extent. As I have reported before, a good detective is much needed. Our men do detachment work to the best of their ability, but their movements are always known, which neutralizes their usefulness.

I think the Stock Association would be willing to pay part of a detective's salary.

Selling intoxicants to Indians is still very common. It is sold usually in the shape of Florida water or doctored beer. Several half-breeds and Indians and one white man have been convicted of this offence.

Over 100 prisoners were confined in the guard room at Calgary during the past twelve months.

Of these, 37 served various sentences; 10 were sent to the penitentiary; 2 lunatics also were sent to the penitentiary, and one prisoner to Regina gaol. Of the balance, some were fined and the rest discharged. 180 cases were disposed of—return attached, which, classified roughly, shows:—

Keepers of disorderly houses, inmates and frequenters.....	41
Cattle-killing.....	1
Robbery.....	1
Assaults.....	25
Breaches of liquor laws.....	38
Unlawfully setting out poison.....	2
Vagrancy.....	6

Many minor cases have been settled where complaints were made without resorting to law.

OUTPOSTS AND PATROLS.

Outposts are maintained at Morley, Canmore, Banff, Anthracite, north fork of Sheep Creek, industrial school, Gleichen, north fork of Fish Creek and near crossing of High River, the latter having been moved from Pekisko. These outposts patrol their several districts continuously, visit settlers, inquire into and settle matters in dispute as far as lies in their power, and do general police duties.

Patrols, both daily and of a longer duration, were sent out from Calgary frequently, Indian reserves were visited frequently, and all points of the district have been patrolled either by members of the permanent outposts or by flying patrols. In all cases where Indians are met by men on patrol it is ascertained if they have passes or not. If they have not they are sent back at once to their reserve. I should recommend the erection of detachment buildings at some point on High River, also at Gleichen, Canmore and Anthracite. At all these points rent for quarters is being paid, and the total amounts to a considerable sum in the course of a year. The number of miles travelled by horses of division was 174,226.

ASSISTANCE TO INDIAN DEPARTMENT.

At the request of the agent of the Sarcee Indians I allow none of them to camp near Calgary. If they have no pass they are warned to leave. If they do not do so they are arrested and treated as vagrants. The same applies to the Blackfoot Indians. An escort attended at the treaty payments at the Blackfoot reserve. The members of detachment at Gleichen visit the Blackfoot reserve constantly and aid the agent whenever called upon.

ASSISTANCE TO RAILWAYS.

During the construction of the Calgary and Edmonton Railway an officer and detachment were constantly on the works, every part being visited daily,

and no trouble of any serious nature was encountered. Work was practically finished on this line in July, when the detachment was moved to the southern extension of the railway, and they continued their duties until the line reached Mosquito Creek, when they were relieved by an officer and party from Supt. Steele's command. A large force of men was employed on this construction work. With the exception of the usual cases of men deserting their employment, there was a marked absence of crime, and this is, in a great measure, due to the constant vigilance exercised by the detachment on duty.

DRILL, TARGET PRACTICE, ETC.

During the winter months members of the division, as far as possible, were put through a course of setting-up drill, manual and firing exercises. In spring and summer mounted and foot drills were carried out. Members of the division were put through, with a few exceptions, a full course of carbine and revolver target practice, both mounted and dismounted. A general foot parade and drill is held once a week.

RECRUITS.

A good many men have presented themselves for engagement. A large proportion proved to be physically unfit. Of the balance, most were sent to Regina for a course of instruction, and a few were retained here.

PHYSIQUE AND HEALTH.

The general physique of the division is very good, and the general health of its members has been excellent. There have been no serious cases of fever since my last report. No. 2086, Constable Reading, met his death in a very deplorable manner on the 14th December, 1890. He was exercising a horse which fell with him on the street. He died in less than 24 hours, never recovering consciousness. A post mortem examination showed that his spine was dislocated in three places. We all felt his death very much. He was our best cricketer, and a general, good, reliable man. It is also my painful duty to report two cases of suicide, both from revolver wounds, viz., No. 2060, Constable Byron, and No. 1710, Constable Harris. Several members of the force from other stations have been sent to Banff for treatment, in every case with good results.

KIT AND CLOTHING.

The only article of clothing that I have had complaints about is the stable shoes. These certainly have been of poor quality and last but a short time. The balance of articles of kit appears to be of a generally good quality. The new prairie hat is in use, and appears to be satisfactory. Kits are, for the most part, well filled; a few small articles, such as button brasses, are scarce.

ARMS AND ACCOUTREMENTS.

Many of the 1876 pattern Winchester, with which the division is armed, are the worse for wear and have to be sent to headquarters for repairs. Many are more or less honeycombed and sights not true. The revolvers are in good condition and a good weapon.

GAME.

The season was a favourable one for the breeding of winged game, and when the open time arrived game was very plentiful, but the slaughter has been something immense. The number of those who shoot increases largely every year, and, at the present rate, game in a few years will be very scarce in this district. More stringent measures will have to be enacted for their protection. Numbers of people come into this country to shoot, and notwithstanding that the ordinance provides that no game shall be taken out of the Territories, large amounts are. For instance, one

party took thirteen sacks of prairie chickens from Morley to British Columbia. Now, Manitoba has a prohibitory license against non-residents of, I believe, \$25, and British Columbia one of \$50, and I think it is quite time that the Territories took steps in the same direction. A good deal of agitation is going on amongst game protection clubs in different parts of the country as to prohibiting entirely the sale of game, particularly prairie chickens.

In my opinion it is a difficult matter, and perhaps not altogether just, to prohibit entirely the sale of prairie chickens and other grouse; but I think the season for sale should be a short one, say in months of September and October, and that no game be allowed to be exhibited for sale or sold before the second day that the open season begins. I would also suggest that the close season be extended to a much longer period than at present, and that game be not allowed to be hawked about the streets for sale, but only sold by those licensed to do so; that stringent laws be enacted for the protection of game in the close season and for the protection of eggs and young of wild fowl, and that every constable be empowered to act as a game and fish guardian. I have been in the Territories for many years and have closely watched the game, and unless very different methods of protection are at once enacted and enforced game will be a thing of the past in a very few years, except in isolated sections of the country. There has been a large increase of ruffed grouse and wood hares, but they are being slaughtered by the hundreds for sale. Wild fowl have been scarce, owing to nearly all the lakes and sloughs being dried up. Of large game there is very little in this district, except in the mountains, and no where there in large quantities or easy to get at. The few deer along the foot hills are cleaned up annually by the Stony Indians. The Indians say that there will be no beaver in five years time. Lynx are on the increase and badgers very plentiful. It would be a very advisable measure if the Government would add a large tract of country to the National Park as a preserve for large game, and strictly preserve it, in imitation of the Yellowstone Park. In that park there is quite a large herd of buffalo, vast numbers of elk, quite a number of antelope, moose, deer and mountain sheep. These animals have found the park to be a safe retreat; they breed there, unmolested, are a source of great interest to the many tourists, and the overflow that wanders outside the limits of the park affords sport to many.

The fish are also rapidly disappearing. There is really no legislation on this subject for the Territories. Every one catches them as they please. Indians, half-breeds and some white men build fish-traps and depopulate whole streams. Nets are also used and other poaching and illegal methods of catching fish resorted to. Numbers of fingerlings are exposed for sale. As a result, the supply of fish is not nearly as large as it was. The streams and rivers are mostly pretty well fished out. Measures should be at once taken to protect what supply is left and increase it by artificial stocking. A fishery inspector was all over the district during the past season examining the different rivers and investigating matters generally, with a view, I believe, of reporting upon measures to be taken for the protection of fish in the Territories, and the means to be taken to increase the supply. Such legislation is badly needed and cannot come too soon.

RATIONS AND LIGHT.

The rations supplied have all been of a good quality, and no complaints have been made about them.

The barracks are lighted by electricity. The company supplying us have not so far succeeded in giving us a good, steady light, but I believe in a short time, when improvements now under way are finished, that we will have no cause of complaint.

DESERTIONS.

There have been two desertions from the division during the past twelve months. Veterinary Staff Sergeant Raban I sent to Banff on duty on 12th December, 1890, and he went through to the coast. He had been in the force but a few weeks. He is practising on the other side of the line.

Regt. No. 2513, Constable McLarin, deserted on the 19th April last. He had been in the force but a short time and came from the States.

FORAGE.

Last year's hay was good and kept well. Owing to a rather dry season and damage caused by hail, the supply of hay was much lighter than usual and a larger price had to be paid. However, an ample supply of hay has been procured, of good quality, all delivered, except at Banff, and well stacked.

Oats are cheaper on this year's contract than last, and what have been received have been of good quality and well cleaned.

STABLES.

There are three stables in barracks at Calgary—officers' stable, one end of which is divided off for a sick stable, containing four stalls and two loose boxes; a saddle horse stable, with two loose boxes; and a team horse stable with five loose boxes. They are all in a fair state of repair, except that the windows fit very badly and let in a great deal of cold. They all require to be lined as far as pitch of roof. At present the logs have to be chinked and mudded, and about as quickly as it is done the horses pull it out again. There is no drainage, and the floors being for the most part of plank, in hot weather, particularly, it is not easy to keep the stables sweet. The stable at Banff is a very poor affair, being too low in the roof and the passage much too narrow between the stalls. If barracks are to be kept up in the same place a new stable should be built without delay. Logs are easily procurable in winter and the cost of erecting a stable should not be great. A sick stable is badly needed at Calgary—a building thoroughly isolated from other stables, and warmly built. If this were done the veterinary staff sergeant in charge would be able to do much better justice to sick horses than he can do at present, as he now has his sick horses in a stable where constant noises occur day and night, and it is impossible to keep a sick horse in an even temperature.

GENERAL EQUIPMENT.

The division is complete in most details of its equipment, and articles required to complete are, if not wanted at once, requisitioned for on headquarter store; if required for immediate use they are bought in Calgary. Two wall tents were made last season by a local maker. They appear to be well made, of good material and prices reasonable.

BARRACKS AND BARRACK FURNITURE.

The large barrack building has had a good many small jobs done to it which were left undone by the contractor. The building appears to have settled greatly, as the plaster has cracked a good deal and fallen down in some places. Where water used to run into the cellar has been remedied by building the stone coping higher; gutters and pipes to carry off the rain water are much needed. At present each rain washes away the banking and makes a general mess. This applies to all buildings. The recreation room was completed by our own labour and serves its purpose very well. The canteen requires to be enlarged, lined, ceiled and roofed, and cellar enlarged. The quartermaster's store is in a good state of repair. I have mentioned the stables elsewhere. No. 2 officers' quarters are scarcely habitable. It was built in winter of 1882-83 of green lumber, which has shrunk to pieces; the foundations are rotten; at all times dust blows in in clouds, as the door and windows are all very ill-fitting, and in winter it is very cold. It should be pulled down.

The old orderly room is too cold to be occupied in winter and we have moved to a room in the new barrack building. The whole building in which the orderly room is is very cold. It could be much improved by having good windows and doors put in and inside well plastered, and a new floor laid down. The old guard room is also the worse for wear. Both guard and prisoners complain continuously of suffering

from colds and drafts. It requires the same repairs as enumerated for orderly room. The hospital is comfortable, but requires a bath-room.

The new guard room requires sundry alterations and the accommodation for the guard is insufficient. I believe plans for an addition have several times been sent in, but up to date nothing has been done.

A new latrine was built, which should be only temporary, as water being now available from the water works, good latrines should be built and the drainage carried into the river. There is an abundant supply of cold water in the wash and bath-rooms, but the supply of hot water is insufficient.

New barrack buildings at Banff have been talked of for some years. The building occupied by the men is small and dark.

The detachment at Gleichen are in hired quarters, which are comfortable.

The furnaces at Calgary are working much better this year, using coal from Cammore and Anthracite. Two officers still live out of barracks, there being no accommodation inside for them. Our barrack furniture is still the same—bed-boards and trestles and home-made tables. It is to be regretted that we cannot be supplied with regulation cots and tables.

TELEPHONES.

Two telephones are in barracks, one in quartermaster's store and the other in orderly room, both in connection with central office. The barracks at Banff have a telephone in connection with the park system.

HORSES.

The strength of horses in division is 92. Fifteen remounts were received during the year, fifteen cast and sold and three died. Of these three one was destroyed suffering from glanders, another from blood poisoning, and the third bolted when on exercise ride, fell and broke his neck. Of horses on present strength thirty are on herd, the remainder in stables at Calgary or on detachment. They were, with a few exceptions, born and raised in the Territories. Many of them are good looking horses and the remounts so far have done well. They were easy to break and free from vice. They do not appear to stand work as well as horses we got in earlier days from the east and Montana. I cannot state reasons, but I suppose enough care is not exercised by the breeders in mating the parents. The horses sold realized good prices, and in some instances the cast horses were exchanged for young sound horses. The horse that I mentioned as having been lost last year from herd was recovered.

TELEGRAPH LINES.

A new telegraph line has been built from Calgary to Edmonton where it connects with the Government line, and is now in operation, having stations at Innisfail, Red Deer and Edmonton.

FIRE PROTECTION.

The barracks at Calgary are connected with the waterworks system. There are four hydrants in barracks. At present we have only the small hose belonging to the hand engine. Graduates had to be made to attach this hose to the hydrants, and the hose is not strong enough to stand the pressure. The day it was tested with only part of the pressure on two lengths of the hose burst. The nozzles are also too small. Suitable hose and branches and nozzles have been requisitioned for. In addition there is a hand fire engine; and a large tank, holding 3,500 gallons of water, is always full in saddle room. There are also a few Babcock extinguishers, and every occupied room has a number of fire buckets always full of water. A fire parade is held once a week, when the men are practised at fire drill.

WATER SUPPLY.

In connection with the waterworks system there are four domestic hydrants in the barracks. From these we obtain our water supply for general purposes.

Water is laid on in the wash and bath-rooms, and also in the division kitchen and scullery.

ROADS AND BRIDGES.

Roads are good as a rule, though as the country has settled up so thickly and so much has been fenced, the concession roads have to be followed, and a good deal of work will have to be done on them in the way of grading before they can be of much use. The rivers and streams have not been very high as a rule during the past season, and travel has not been much impeded. A new bridge has been built across High River, a good way below the Macleod trail. A traffic bridge is very much required across Sheep Creek, also one across High River.

FERRIES.

Ferries are the same as last year at Morley, Mitford, Blackfoot Crossing and High River. A ferry was put on late in the fall on the Bow, just below the junction of the Elbow, to enable people to get on to the three islands. It is intended, I believe, to make these islands into a public park.

CROPS.

A larger acreage of ground was cultivated than last year, and everything promised an abundant crop of grain and roots, but a great part of the country was visited by two very destructive hail storms in the latter part of July, and the crops in the area where the hail fell were completely destroyed. The hail stones were an immense size and killed numbers of prairie chickens, ducks and smaller birds. Elsewhere the crops were good and the yield large. The average yield, as far as I can learn, is—

	Per Acre.
Wheat.....	40 bushels.
Barley.....	42 do
Pease.....	20 do
Oats.....	60 do
Rye.....	25 do
Potatoes.....	300 do

Turnips not a very good crop as a rule, owing to a succession of dry seasons. Most of the sloughs and swamps being dried up, hay was a light crop in this district.

LIQUOR LAWS.

There is little to be said on this subject that has not been already reported upon, and as a new system is to be shortly inaugurated it is needless to make any suggestions. Regarding the present system, I found it quite impossible to check the sale of intoxicants in the numerous saloons in the district for reasons I have reported on, and our efforts were centred in preventing as far as possible the importation of liquor in large quantities, and in keeping the railway construction free from it. A great part of the liquor brought into Calgary comes on the passenger trains, chiefly in the Pullman cars. As our men are not allowed to enter these cars, except under extraordinary circumstances, and as the passenger trains both pass through the district at night time, the people in this line of business have it pretty much their own way. Numerous small seizures have been made and the liquor destroyed. There have been thirty-eight cases of infraction of the liquor laws tried by police officers in this district during the past year. Of these, twelve were dismissed, fourteen paid fines of various amounts, eight cases were appealed; of these, three of the convictions were quashed, three sustained and two not yet decided. The remaining four were awarded terms of imprisonment under the Indian Act, the offenders being a white man, a half-breed and two Indians.

RANCHES AND RANCHERS.

Last winter was a very favourable one for stock and there was a large increase this year, amounting to about 80 per cent in cattle and 60 per cent in horses. Feed was generally good and flies not bad, so that the cattle at present time are fat. There has been no disease to any extent amongst stock. The principal stock owners are:—

Name.	Horses.	Cattle.	Sheep.
J. Robertson.....	300	600	
Hull Bros.....		1,500	1,000
D. McDougall.....	300	500

T. C. Langford.....		200	
R. Greig.....		200	
Miles & Minesinger.....		300	
J. Ware.....		400	
J. Thorp.....		150	

Besides the above, there are numerous ranchers who own small bands of cattle and horses, from a few to 150 head. A good many valuable stallions were brought in and some brood mares. Two Clydesdale stallions from Turner Bros.' rancho on north fork of Sheep Creek took first prizes in their class at Winnipeg this fall.

About 1,200 head of beef cattle have been shipped to England and some shipments to the coast. Home consumption becomes larger every year and the beef is of first-rate quality. Wolves, especially the big ones, have increased very much of late years and have done much damage during the past season. One old wolf which had destroyed thousands of dollars' worth of stock, and for the capture of which \$50 reward was offered, was roped a short time ago by a man who had followed it up for nearly a month. A short time ago wolves got into a cattle corral on Mosquito Creek and killed eighteen big calves. The ranchers are taking every means to kill off these pests, but have not had much success up to to date.

FIRES.

On 19th and 21st December, 1890, fires started near Sheppard, on the Canadian Pacific Railway, presumably from sparks from an engine. Parties were sent out from barracks and fire got under. There have been three fires near Gleichen. The men of detachment turned out on each occasion, doing good work. Two were supposed to be started by Indians, the other by an engine. On 22nd April a large fire started on Sarcee reserve from a rubbish heap some Indians were burning. Men were sent out from barracks and helped materially to put it out and save property. On 12th May a party from barracks were out fighting a large fire on east side of Nose Creek and checked it. Cause of fire unknown. A good deal of the country north of Calgary has been burned this fall. One man was tried for starting one of those fires, but was acquitted. A considerable amount of hay was burned. On 21st January a fire was put out by the Sheep Creek detachment. It started from a fire left burning by some Indians.

A house belonging to E. McAbee was burnt in Sheep Creek district. Origin of fire has not been discovered, but it was generally supposed to be incendiary. A fire started on 5th October near the coal mine on south fork of Sheep Creek. It burned over a large area, about a township in extent, between the forks of Sheep Creek and up to the mountains, ruining a great extent of winter feed for stock, and destroying quite a large amount of timber and some hay.

In Morley district the following fires occurred:—On 11th October a fire started on Stony reserve from a spark from an engine; burnt over about 150 acres; put out by section men. On 12th October another fire started on reserve from same cause, burning over about 100 acres, and was put out by section men. On 5th December a fire started on west side of Ghost River, burning some old fallen timber, and was finally put out by the settlers. In High River district the following occurred:—A fire started near Sullivan's place on north fork High River on 15th May. The police detachment and Messrs. Ings worked for two days at this fire and eventually got it out. None of the settlers turned out; origin of the fire not ascertained. On 24th October a fire was started on the Little Bow from a spark from an engine on construction work. It burnt over a considerable area, but all the construction hands were turned out and the fire was suppressed.

In connection with prairie fires, I find that Indians are getting very careless and often when leaving their camping grounds leave their fires burning. With the exception of the Stony Indians, they will not help to put a fire out.

INDIANS.

The Indians in this district have been very quiet and exceedingly well behaved. There has been no very serious crime amongst them, and not a single case of horse-stealing by them has come to my notice. At the Blackfoot reserve Sergt. Straton reports that he never had any trouble in making arrests, and the chiefs always aided him to the utmost. The crops on this reserve were not very good the past season. They are still working the coal mine on reserve. Two scouts are employed from this reserve and they have done fairly well.

The Sarcee Indians are too close to Calgary for their own good. They are continually coming into town where unprincipled white men and half-breeds sell them liquor, and there is a good deal of drunkenness amongst them. They have, however, worked well on their reserve and raised fair crops and put up considerable hay. Two scouts are also employed from this reserve. I have tried quite a number of these Indians, but have so far only found one who is much good.

The Stony Indians have been quiet and well behaved. The reserve is not suitable for much agriculture but they grow considerable quantities of potatoes and root crops. They are absent a good deal off the reserve hunting in the mountains and make considerable money by the sale of furs, meat and heads for mounting.

HALF-BREEDS.

There are not many half-breeds in this section. What few there are are mostly living on their own places and work for settlers. The railway that has been built north has deprived them of their chief means of livelihood—freighting.

CANTEEN.

A canteen has been operated in a small way during the past year. Articles sold were principally beer and tobacco. It has not worked as well as could be desired, but it has now been thoroughly reorganized, and it is the intention to carry a more varied stock. I think in future it will prove a benefit to the division.

TREES.

A supply of young trees was received from the Experimental Farm at Ottawa. They were carefully planted according to directions, and, with a few exceptions, took well. Last winter they were protected by manure, but a large proportion are dead, and those that grew at all for the most part just threw up shoots from the ground.

GENERAL WORK.

There has been the general routine of police work carried out throughout the year and nothing of any particular importance to mention.

At Laggan there have been a couple of men stationed to endeavour to minimize the liquor traffic. They have been continually up and down the line between Calgary and Field. The work is arduous and tiresome.

At Banff the park has been patrolled daily, the park regulations enforced, all trains met, general police duties carried out, and Inspector Harper has done a considerable amount of magistrate's duties. At Anthracite the detachment keeps order amongst the miners and meets all trains. Extra men are sent there on pay days. The same work is done at Canmore, and a patrol goes out occasionally to White Man's Pass and towards the Gap. At Morley the detachment makes about five patrols a week, and visits the reserve frequently.

At north fork of Sheep Creek the detachment makes daily patrols except Sundays, visiting all points in its district.

At Fish Creek the same kind of duties are done, and two Indian scouts work in conjunction with detachment.

At High River the detachment have a large extent of country to patrol, and make about seven patrols a week, and meet patrols from Mosquito Creek once a week.

At the industrial school the man stationed there has to prevent Indians from taking their children away. They give a great deal of trouble in this respect, and the Rev. Father in charge speaks very highly of the aid that Constable Todd has afforded him. This constable made a couple of very plucky arrests of Indians single-handed, one of them the renowned "Deerfoot," and brought them to barracks. In addition he patrols the country surrounding the school, visiting all settlers.

The detachment at Gleichen makes ten patrols a week, to north and south Blackfoot camp and agency each twice a week and once to Rosebud River, Queens-town, Bow River and Namaka, making an average of miles travelled each week about 364. Besides, all trains are met and general police work done in Gleichen.

At Calgary all trains are met by the man on town duty, Supreme Court attended by escorts and orderlies, assistance given to the civic authorities when required, frequent patrols sent out around adjacent country and general police work and routine carried out. Long distances have been travelled in making arrests and serving legal papers, and, as will be seen from list of cases tried, a great deal of magistrate's work has been performed.

DISCIPLINE, CONDUCT, ETC.

I have had the hearty co-operation of all ranks in my division as a rule in carrying out the multifarious duties required to be done. There have been more cases of breaches of discipline than in former years, nearly all caused by too much indulgence in intoxicants. There are great temptations for men in this place, and a few succumbed to them. Most of the offences if occurring in private life would not be thought much of, but amongst a body of disciplined men of course they are looked upon as serious and have to be treated severely.

SAVINGS BANK.

Owing to the many temptations to spend money in Calgary, the deposits in the savings bank have been small, amounting to \$866.15.

SETTLERS.

The number of settlers coming into this district has not been as large as usual. A good many, however, have taken up homesteads, and others have bought improved farms.

As a rule, I believe they are doing well. The greater part of the newcomers went north to Red Deer or Edmonton districts. Most of the Mennonites who settled at Gleichen have left there and gone north. The old settlers are mostly prosperous. Of course, some have made a failure, and a number got a bad set-back in the total loss of all their crops by hail. I append a return of settlers who have been registered at Calgary, kindly furnished me by Mr. Miquelon, the immigration agent at Calgary.

RETURN of Immigrant Arrivals at Calgary for Alberta Immigration Agency for the year 1891.

Via Ocean Travel	141	71	49	40	301	Effects \$106,950 Cash..... 178,600
Via United States	144	66	71	68	349	
Provinces	394	175	130	102	801	\$284,950
Total	679	312	250	210	1,451	

INSPECTION OF DIVISION.

The division has been inspected on various occasions by yourself during the past year; also by the Assistant Commissioner. I have made the usual inspections, and the orderly officer inspects rooms daily. All outposts are inspected weekly by a junior, and at intervals by a senior officer. The herd is visited once a week by an officer, and at least once a week by Vety. Sergt. Barry.

SADDLERY AND HARNESS.

The division has seventy-five saddles on charge, which in the main are in a good serviceable condition, parts, such as cinches, stirrups, &c., requiring to be renewed. They are all California saddles, most single cinche. The saddler goes over all saddles frequently, making necessary repairs.

MILEAGE RETURN of "E" Division, commanded by Superintendent J. H. McIllree,
for the Year ended 30th November, 1891.

Month and Year.	Miles Travelled.
December, 1890	12,873
January, 1891	14,518
February do	10,727
March do	12,129
April do	12,972
May do	15,078
June do	14,907
July do	12,058
August do	22,292
September do	14,497
October do	16,757
November do	15,418
	174,226

I have the honour to be, Sir,

Your obedient servant,

J. H. McILLREE,

Superintendent Commanding "E" Division.

The Commissioner,
North-West Mounted Police,
Regina.

APPENDIX C.

ANNUAL REPORT OF SUPERINTENDENT S. GAGNON, COMMANDING
DEPOT DIVISION, 1891.

REGINA, 15th December, 1891.

SIR,—I have the honour to forward this, my report, for the year ended 30th November last.

This division having been managed during the year entirely as a depôt; no duties have been performed out of barracks under my supervision. When required for outside work, men of depôt division have been detailed for duty under the officer commanding "B" division.

The principal work in this division has been to form recruits, and equip them for service in the force. Under a very efficient staff, men and horses have been drilled regularly, and good and well-trained men have been sent out to fill vacancies in all the divisions.

The discipline has been kept rigidly in the division, and the conduct of the recruits has generally been very good.

The health of the members of the division has been fairly good. One officer died during the year and another had to retire on account of ill-health.

The Winchester rifles in use are deficient. It requires a recruit a good deal of practice and judgment before the proper elevation of the sight can be found at all ranges.

All working hours being taken up with drill for recruits, a rifle club was formed to enable the men to get some experience in this branch of the recruit's education. This club would meet for practice in the evenings under a good instructor and the result has been very satisfactory.

The exercises of the club were ended by a general match, in which over \$200 were offered in prizes.

The saddlery in use in Depôt division is kept in good repair, as also the harness.

The transport is also in fair order. Remounts, purchased during the year, have been found well adapted for the service.

The strength of the division on 30th November last was:—

Officers	14
Non-commissioned officers and constables.....	186
Special constables.	7
Guides and interpreters.....	1
Horses.....	91

The alterations in Depôt division during the year have been as follows:—

	Officers.	N.C.O. and Constables.
Engaged or joined.....	1	217
Re-engaged.....	...	28
By transfer.....	4	95
From desertion.....	...	2
Specials.....	...	7

	Officers.	N.C.O. and Constables.
<i>Loss.</i>		
Died.....	1
By transfer.....	4	236
Discharged {	Time expired.....	6

		<u> </u>

I have the honour to be, Sir,
Your obedient servant,
S. GAGNON,
Superintendent Commanding Depot Division.

The Commissioner,
North-West Mounted Police,
Regina.

APPENDIX D.

ANNUAL REPORT OF SUPERINTENDENT S. B. STEELE, COMMANDING
MACLEOD DISTRICT, 1891.NORTH-WEST MOUNTED POLICE,
DISTRICT OFFICE, FORT MACLEOD, 30th November, 1891.

SIR,—I have the honour to submit this, my annual report, for the year ending 30th November, 1891.

My report of last year covered nearly all the ground to be reported on.

During the year just ended everything in this district has gone on with almost monotonous regularity. Crime generally has been less; the Indians have, with few exceptions, been exceptionally well behaved. Many new settlers have come, more especially towards the south, and the magnificent crops this year will, beyond doubt, draw in a rapid influx of immigration from the United States and eastern Canada. The Mormon settlement at Cardston, on Lee's Creek, has increased, both in numbers and prosperity, and has been orderly beyond praise. The Macleod branch of the Calgary and Edmonion Railway is now graded within a few miles of Macleod, and will be of great value in settling up this district. A large and substantial bridge has been built this year across the Old Man's River, about two miles west of this town, and will be a great boon to the inhabitants and to the settlers from the north side of the river. As will be seen from the appended comparative table, the population of Macleod and Pincher Creek has not varied materially, but there are signs all around us that the annual report of next year will show a large increase of settlers, both in town and country, and, I believe, increased prosperity in every direction.

The two great questions that constantly claim attention of a superintendent of police in command of this district, outside the interior economy of his command, are the progress and disposition of the Indians, and the working of our present liquor laws. The latter question is, I believe, shortly to be legislated upon by the Assembly; and as by the time your report is made public some action in the best interests of the Territories will have been decided upon, I have no wish to intrude any personal opinion further than is justified in reporting the condition of my district for the past twelve months, and the large influence the liquor question has naturally had upon it both directly and indirectly.

In my opinion, there is far more liquor consumed under the present system than would be the case under a properly regulated license system, for the reason that as long as the present permits legally cover liquor wherever found the police are powerless to prevent the traffic. Under these conditions, keeping a saloon is the first and last recourse of men who are natural loafers. Too lazy and dissipated to work, they naturally turn to what appears the most easy and lucrative manner of making a living and start a small saloon, allured by the prospects of large profits on illicit whiskey, and what they can make by secret and not over-scrupulous gambling. The saloon-keeper, protected by his permit, obtained before he started the business, is careful not to sell openly in the presence of any one likely to report him. The gambling is ostensibly merely a game of cards with "chips" for counters. The cash part of the transaction is done privately. The police know by experience that it is but lost labour to bring such cases into court. Without taking into consideration the obvious advantages that would accrue to the Territories from a license system, it would be a great advantage to the police, as the legitimate vendors would, in their own interest, assist them to hunt out all illicit saloons. A certain

and very common class of men who have attached themselves like parasites to any one selling liquor, and who by a system of blackmail, consisting in purchasing liquor they never intend to pay for, obtain all the liquor they want for little or nothing. The seller, on account of running an illicit business, is powerless to collect his debts, and for fear of being reported, has to submit to their extortions. As a natural consequence, he fails, and in turn joins the army who live on his successor. Under a high license system, good liquor would be imported from the East, the seller would be in a position to demand cash—a rare commodity amongst the class who at present give us the most trouble—and smuggling would be at an end, were the restrictions on bringing liquor into the country removed. All these points and many more on both sides of the question will undoubtedly be debated by the Assembly, and I trust the result will be either a properly controlled license system or total prohibition. Anyway, rather than the present hybrid state of things where the spirit of the law is constantly broken without our being able to interfere.

I am happy to be able to report most favourably on the behaviour and progress of both Blood and Piegan Indians. I am strongly of the opinion that the time has come for disarming the Indian. Game is too scarce to be longer a valid reason for Indians to carry the Winchester rifle. We have narrowly escaped serious trouble from this cause, and as long as they are permitted to do so the safety of the country is constantly menaced. The proclamation of the Superintendent General of Indian Affairs, prohibiting the sale of fixed ammunition to Indians, has not worked altogether satisfactorily. The same men who for the sake of a dollar will pander to an Indian's craving for intoxicants will not hesitate to procure him all the fixed ammunition he wants, though the safety of the country be at stake. To make a dollar or two is their only consideration in either case, and the risk in supplying ammunition is almost *nil*. When an Indian gets whiskey or beer, he is almost certain to land eventually in the guard room, and is generally a willing informant on the source of supply, but a box or two of ammunition is slipped under the blanket and no one the wiser. The sale of all fixed ammunition in the vicinity of Indian reserves should be restricted by permit granted by the police officer in charge of the district. Such a system would not interfere with any one whose business was legitimate, and by prohibiting ammunition being brought in from the United States the Indians' supply would be practically cut off. Directly this is done cattle-killing would be almost unknown.

I would also urge that some alteration be made in the present law as regards cattle-killing. At present the onus of proof of the ownership of any slaughtered beast found on the prairie is on the prosecution; if the Indians have removed the hide or obliterated the brands, it is impossible to make out a case against them if defended. The proof of the animal killed being the property of the person killing should be on him, whether white man or Indian.

This year both Bloods and Piegans indulged in the time-honoured Sundance. From personal observation and careful enquiry I am convinced that this festival has almost entirely ceased to have any significance, except to the old people. The vanity of the ancient warrior is no doubt gratified when he recounts his scalps, but there seemed very little interest, and no enthusiasm, on the part of his audience. The young Indians of both sexes seem to look on the whole thing as an excuse for a picnic. Many Indians on the reserve did not take sufficient interest in the festival to attend it. Two braves were made at the Blood dance and none at the Piegan's.

I am again happy to record that perfect accord exists between the Indian Department and the police as represented by the Indian agents on the various reserves. The United States Indian Department through Major Steel and myself have most willingly rendered all possible mutual assistance. I have the honour to report more explicitly under various headings.

INDIANS.

In spite of the fact that our Indians were perfectly cognizant of the fact that trouble was going on between the Sioux and United States soldiers they were not in

the least excited, and did not seem to treat the matter as one that affected them in the most remote degree. They were as well posted as to what was occurring as we were. Special precautions were taken to prevent runners from the other side visiting the Bloods and Piegans and unsettling their minds, and I have every reason to believe that we were successful in our object. Our Indians were constantly crossing the line to visit friends and relations on the south Piegan reserve, and when there met Gros Ventre runners who gave them particulars.

It was reported that one small party left the Blood reserve to go horse-stealing, presumably from the Gros Ventres; either their medicine was bad or better councils prevailed, for they turned back before reaching the Sweet Grass hills.

In addition to the observation of the members of my command, who are in the best possible position to obtain information, the foreman of the Cochrane ranche, whose cattle are the nearest to the reserve, and others in that neighbourhood, all agree that there has been less cattle-killing this year than ever. It is useless, however, for us to flatter ourselves that such a thing has entirely died out, as an occasional beast is seen at every round-up with bullet marks to bear witness to the fact that depredations do occasionally occur when a favourable opportunity presents itself; but it is unfair to let the Indians bear all the blame for what white men are often responsible for. We can, however, congratulate ourselves that the evil bears no comparison to former years.

"White Top Knot," who escaped from his escort early one morning over a year ago, and to whom all Indian prisoners are indebted for wearing a ball and chain when working outside, was heard of on the Piegan reserve about the middle of February, and a party sent out to arrest him. He was hunted from one reserve to the other and finally captured by Staff Sergeant Hilliard on the Blood reserve. He was in a very bad state from privation and exposure, and the Crown prosecutor entered a *nol pros.* and released him.

On the 26th March two of our Indian scouts "Owl Child" and "Black Eagle," came across "Medicine White Horse," who had been wanted for over a year for killing cattle. They arrested him and were taking him a prisoner to our Stand Off detachment when he was rescued by an Indian named "Good Young Man," assisted by his squaw, and the prisoner succeeded in making his escape. Staff Sergeant Hilliard promptly secured "Good Young Man" and his squaw, and so close a pursuit was kept up after the escaped prisoner that he was forced to give himself up to "Iron Shield," a "K" division scout at Whoop Up. He was tried by Judge Macleod for cattle-killing and sentenced to two years in the penitentiary, but while awaiting the sheriff's convenience to convey him to Stony Mountain to serve his sentence he, in company with two other prisoners, succeeded in sawing a hole in the wall of the corridor in the guard room and escaping; "Medicine White Horse" succeeded in getting across the boundary line. The other two were recaptured.

The arrest of "Good Young Man," mentioned above, and his subsequent sentence by two justices to six months' hard labour, caused a slight commotion among the Indians, as he is particularly useful when a Sun dance is in preparation in superintending the erection of the medicine lodge. Several of the chiefs and sub-chiefs called on me a day or two later to talk the matter over, and went away expressing their opinion that I had done my duty.

There have been a few cases of horse-stealing, principally amongst themselves; the delinquents have in every case been captured and punished. I am happy to report that the Indians are grasping the power of the law, and appeal to it both to recover their lost property and to punish the offenders.

More Indians than ever have sought employment amongst the ranchers, and do good and faithful work. They have purchased new reapers and other farm implements, and put up hay both for themselves and for the police. It is getting more common every day to see Indians driving into town in good farm waggons, and every year their prosperity and civilization are more marked.

A full report has been forwarded to you concerning the recent trouble on the Blood reserve, in which Constable Alexander was slightly wounded and his

Indian assailant, "Steals Fire," shot through the breast by Constable Ryan. As my report would be incomplete without some mention of this affair, I will recount it as briefly as possible.

On the 19th of October a party of police under Staff Sergt. Hilliard left the Stand Off detachment soon after dark to intercept a party of whiskey smugglers that our scouts had located about ten miles up the river. Soon after the party started they separated, Alexander and Ryan being instructed to scout down the river and cross at the Cochrane crossing; if they did not meet the rest of the party they were to go up to the eight-mile rock and await them. Alexander and Ryan carried out their orders and crossed the river at Cochrane's crossing, ascending on to the high land on the other side, all the time on the alert to catch a glimpse of the smugglers. Soon after reaching the high ground Alexander caught sight of something moving in the distance, which on a nearer approach proved to be horsemen with two pack animals. The constables immediately gave chase at full gallop, and on coming up with them discovered them to be Indians with fresh-killed meat. As they galloped up to make the arrest one of the Indians threw his rifle into the hollow of his arm, pointing it at Alexander, and as the constable dashed in to seize him, fired point blank at his head, the bullet taking effect on the constable's neck, who was only about three feet from the muzzle of the rifle. Constable Ryan, seeing Alexander reel in his saddle and imagining him very seriously wounded, if not killed, drew his revolver and opened fire on the Indian, who returned it, one bullet passing very close to Ryan's head, while one of his shots struck the Indian in the back, passing through his lungs and coming out at his left breast. Alexander then rode into the detachment for a waggon to convey the wounded Indian in, Ryan staying with him till assistance arrived. In trying to put the wounded Indian, who is named "Steals Fire," on his own horse, the savage tried to draw his knife. He was too weak to do anything, and Ryan took the knife away. As the man's cries had attracted a small party of Indians who took cover in the brush close to where Ryan was, he got on his horse and galloped for help to remove the Indian, who, however, was removed by other Indians before he returned. Dr. Ayleen, the police surgeon, was at once sent out to render assistance. Alexander's wound was very slight and the Indian refused all offers of assistance, placing his faith in a medicine man to whom he paid ten ponies to ensure his recovery, and, strange to say, in a fortnight's time he was riding round. As soon as the news of the occurrence had spread, the Indians who were working around at Lees Creek and elsewhere came into camp and, for a day or two, there were signs of excitement and sulkiness, with threats of retaliation. Without allowing the least trace of excitement to be visible on the part of the police, I took what I considered sufficient precautionary measures—*assembled the chiefs and pointed out to them that the police were only doing their duty and that as long as the young Bloods went after mischief such an occurrence was bound to take place sooner or later. Red Crow, the head chief, was sulky during the interview, but the others who spoke echoed my sentiments. I am now able to report that all signs of uneasiness have completely subsided and the resolute part taken by the police has produced a good effect.*

CRIME.

I am happy to report an increased improvement in the state of this district as regards the maintenance of law and order. With the exception of a few cases of horse-stealing by Indians, and the one of firing on a police patrol above referred to, no cases of a serious nature have come before the magistrates.

A good many of those who composed the tough element have gone over to the other side of the line, probably in the hope that they will not be so closely watched, and the benefit of their departure has been distinctly felt.

The smuggling of illicit liquor has to a great extent been put a stop to. The men employed in this business took such infinite precautions to escape detection, employing outriders to go ahead of the cargo and see all clear, and friends in town to give them timely warning, that detection became almost impossible. On account of the precautions taken by the smugglers, we were unable to effect an arrest, but

we so effectually closed the country against them that they were obliged to return with their cargoes to the United States. The death of Gus Brede, a noted smuggler, who for years has been a thorn in the side of the police, has put an end to a good deal of smuggling on both sides of the line. This man, from his accurate knowledge of the country, and possessed as he was of a characteristic amount of daring and cunning, was a most successful free-trader. He and his associates were perfectly impartial which revenue they evaded, carrying over Chinese into Montana and returning with whiskey. Though frequently captured and his outfit confiscated, and he himself heavily fined, nothing seemed to daunt him. On the 11th of August, while conveying a party of smuggled Chinese into Fort Benton, Montana he was struck by lightning. His body was found on the trail, with that of one of his horses, which had shared his fate.

As previously stated, there have been several cases of selling liquor to Indians. Wherever this has been proved, the crime has been severely dealt with, and I trust a salutary lesson taught. On the 5th February a constable named Jones was detected making away with Government oats and immediately placed in the guard room, with an ex-policeman, who was the receiver. They were both brought before Judge Macleod and sentenced to six months' imprisonment, with hard labour, Constable Jones (the thief) being sentenced to an additional six months' imprisonment with hard labour, under the Police Act. Nearly all the other cases have been breaches of the Vagrant Act.

PATROLS AND OUTPOSTS.

The following detachments were supplied from this post during the year :—

NAME.	Officers.	Staff Sergeants.	Sergeants.	Corporals.	Constables.	Scouts, White.	Scouts, Indians.	Horses.	Pack Ponies.	Remarks
Stand Off	1	1			9	2	6	10	1	7 scouts' ponies.
St. Mary's	1		1		8	1		8	1	do
Kootenai			1		3			4		
Big Bend				1	3	1		5	1	
Leavings					2			2		
Kipp				1	3			5		
Lee's Creek					3			3		
Milk River			1		3			4	1	
Porcupine Hills				1	3			4	1	
Pincher Creek	1	1			7			10		
Boundary Creek					4			4	1	
Mosquito Creek				1	2			3		
Town of Macleod				1	2					
Totals	3	2	3	5	52	4	6	62	5	8 ponies, property of scouts.

I am happy to report that I have not received a single complaint from any settler of neglect of duty or misbehaviour on the part of either non-commissioned officer or man on outpost duty, but all have been unanimous in praising the manner they have performed their duties.

Inspector White-Fraser has been in charge of the Pincher Creek district, including Pincher Creek.

KOOTENAI, BIG BEND AND PORCUPINE HILLS.

Inspector Macpherson, who has been in charge of the southern detachments, is now stationed at Stand Off, our most important outpost. Inspector Matthews is in charge of St. Mary's, Lee's Creek, Boundary Creek, and, during the summer, of Milk River.

Six Indian scouts with an interpreter are stationed at Stand Off under the immediate orders of Staff Sergt. Hilliard. Scout Denny, who speaks Blackfoot, usually accompanies them on their patrols. I have found these scouts trustworthy and useful during the past year.

ASSISTANCE TO INDIAN DEPARTMENT.

In addition to the regular assistance afforded by the police to the Indian Department in preserving law and order and arresting criminals, we have this year as usual escorted the treaty money to the reserves, and assisted during the payment. At the request of Mr. Springett, of the Piegan reserve, a non-commissioned officer and party were sent to remove a party of Chippewas—three lodges that had encamped on the Piegan reserve, and were complaining that the Piegan bucks were stealing their squaws. A police team was at the disposal of Indian Commissioner Reed during his visit here in July.

ASSISTANCE TO CUSTOMS DEPARTMENT.

In addition to taking a description of all stock, household effects, etc., entering the Territories from the United States, and forwarding the requisite forms to the collector of customs in Macleod, the men on the southern detachments have on occasion herded horses and stock till duty has been paid on them. A non-commissioned officer accompanied a band of horses to Calgary, remaining in charge until the duty was paid. Teams have been placed at the disposal of Inspector of Customs Young when in this district, Inspector Macpherson having accompanied him on his official tours.

DESTITUTE HALF-BREEDS.

Early in March Inspector White-Fraser reported that several families of half-breeds who were camped near Pincher Creek were in a destitute condition, and that it was imperative that some speedy means should be taken for their relief. With your approval, rations were sent to Inspector White-Fraser for distribution, and that officer took great pains to investigate every case. In order to prevent pauperizing the recipients of the rations to too great an extent, Inspector White-Fraser insisted that they should cut a certain number of posts and rails as payment. These posts and rails have since been used to fence in the Pincher Creek reserve.

DISCIPLINE AND CONDUCT.

I have again much pleasure in recording my satisfaction of the conduct of the non-commissioned officers and men under my command. There must naturally be a few black sheep in every fold, but I may congratulate myself that the percentage here is less than might reasonably be expected. A few men who were either incorrigible or who, by reason of their conduct, were not worthy to wear our uniform, have been dismissed the force. Owing to the vigilance of Corporal Greenacre and the town patrol, the offence of breaking barracks is a very rare one, and, in my opinion, this says a great deal for the discipline of the command. The barracks contain nearly one hundred and fifty men and are within a few hundred yards of the town, where there are all sorts of temptations for young men. From the location on the open prairie there is no trouble for any man so disposed to go out or in. In spite of all this, the offence is comparatively rare.

There have been no cases of insubordination, and, though the men have been hard worked all the year, they have ever exhibited a cheerful obedience to those in authority.

Besides one or two cricket matches, the only relaxation in my power to give the men was an athletic meeting and military sports held here on the 3rd of July. I am happy to report that this was a great success and did a great deal of good, both by way of relaxation and physical training. The performance was greatly appreciated by the onlookers, who came from all parts. The mounted events were particularly appreciated, and were most creditable to all who took part in them. I

would suggest that a portion of the fine fund be devoted to providing for an annual event for the future.

Several members of this command, in conjunction with some of the civilians in this district, inaugurated a polo club this year, and were successful in the matches they played. The great difficulty in obtaining stabling for the ponies acts as a hindrance to its being thoroughly successful. This is to be regretted, as it affords splendid exercise, and, as an aid to horsemanship, cannot be surpassed.

DRILL, TARGET PRACTICE, ETC.

This year I have had every man of my command put through a thorough course of drill, both mounted and on foot; I have carefully supervised it myself, and no man has been dismissed until passed by me as proficient. Inspector Matthews has taken the greatest pains with the equitation of the men and the training of the horses, with most satisfactory results. With the exception of men in the guard room and one in hospital, every man in this command has completed his annual target practice. Inspector Matthews has acted as musketry instructor to my satisfaction. The shooting of the men has been creditable.

SADDLERY AND HARNESS.

The saddlery in both divisions is complete and in good order. Both divisions are well supplied with four-in-hand harness, which is all in serviceable condition with the exception of one light set in "D" division.

PHYSIQUE.

The physique of the men of both divisions is particularly good, the average height being 5 feet 10 inches and the chest measurement over 39 inches. The men as a whole are young, active and hardy, and present a fine appearance.

PROVISIONS, ETC.

Up to the 1st of July the contracts for provisions, fuel and light were in the hands of Messrs. I. G. Baker & Co.; since that time our supplies have been received from the Hudson Bay Company.

HAY, FORAGE, ETC.

Hay of superior quality has been put up on an average of \$10.50 per ton; oats on an average of 49 cents per bushel.

COAL.

Our coal for this year has been principally from the Sheran mine, and has so far proved satisfactory.

CLOTHING AND KIT.

The clothing received is of fair quality, with the exception of socks. I would suggest that more breeches be sent up to this post as early as possible in each year. We have for some time now been short of the number required for issue.

I beg to recommend that if possible a more regimental boot be issued. The ones at present in use are flabby on the leg, and being grained, do not take the blacking like smooth tops.

ARMS, AMMUNITION AND ARTILLERY.

This command is fully supplied with the Winchester carbine and Enfield revolver. The carbines, with the exception of a few at headquarters undergoing repairs, are in good order, though a good many are honeycombed. I can only reiterate my remarks of last year on the advisability of substituting another weapon for the Winchester.

Our artillery branch, consisting of two 9-pounder M.L.R. guns and two bronze mortars, are in serviceable condition. The gun carriages have been scraped, painted

and thoroughly overhauled this spring. We are well supplied with ammunition of all kinds.

INSPECTIONS.

The post, stores and command were inspected by the assistant commissioner in December, 1890, and September, 1891, when the store books were carefully audited and examined by Staff Sergeant (since inspector) Hopkins.

The post was visited by yourself in September and October, 1891.

The detachments were regularly inspected by the officers in charge of St. Mary's district and by Inspector White-Fraser, who is in charge of the district of Pincher Creek. I have visited and inspected all the detachments in my district during the year, some of them frequently. All the detachments were inspected by the Assistant Commissioner in December, 1890, and September, 1891. I believe they were found in a highly satisfactory state.

The assistant surgeon inspects the sanitary condition of the barracks and guard-house every week and reports the result in writing.

I have personally inspected the barracks once a week, visiting the men's messes, barrack rooms, guard-room, stables, hospital and workshops. I have also frequently inspected them at uncertain times. The result of these inspections has been satisfactory, and there have been no complaints.

The orderly officer inspects the barracks, hospital, messes, shops and stables daily, and is present at the issues of rations and forage. He also inspects all waggons and teams leaving or arriving, as well as all mounted parties. All horses arriving at the post are carefully inspected by the assistant veterinary surgeon before being put in the stables.

The officers commanding divisions inspect their saddlery and harness weekly and the kits as frequently as possible.

The herd is visited daily either by the orderly officer or the assistant veterinary surgeon.

DEATHS.

During the past year only one death has occurred. On the 2nd March Regt. No. 913, Constable Herron, left Kipp detachment to patrol to St. Mary's, "K" division detachment. Although there is a district order that patrols shall always travel in pairs, Constable Herron, who, in the absence of the corporal in charge of the Kipp detachment, was himself in charge, refused to allow another man to accompany him. He also refused to take goggles with him. There is little doubt but that Herron must have become snow blind and lost his way. Word was received on the 4th that the poor fellow was missing and search parties were immediately sent out. Indian scouts tracked the horse Herron was riding along the St. Mary's river, and his body was found by Interpreter Ben de Roche on the bank of the river within a mile of Brown's ranche. From the condition of the body and the fact that one chamber of Herron's revolver was empty and the weapon lying beside him, it is almost certain that his sufferings from snow-blindness and cold, the fact that he was frozen and the knowledge that he had lost his way, drove him to desperation and he ended his agony by his own hand.

GARDENS.

The gardens both at this post and at the detachments were an unqualified success. All kinds of fresh vegetables were raised in abundance and were much appreciated. A large supply of turnips of our own raising have been put in the root house for winter use. We have saved sufficient seed potatoes of a superior kind for next year's planting.

DESECTIONS.

I am pleased to report that no desertions have taken place from the two divisions under my command. On the 17th July Regt. No. 2230, Constable Lally, of "H" division, while in Lethbridge, attempted to desert, but was captured at Coutt's station, on the Lethbridge and Great Falls Railway. It is only fair to this man to say that he was under the influence of liquor at the time he made the attempt, and was over

persuaded by bad company in which he found himself. The man is now undergoing imprisonment.

BARRACK FURNITURE.

Our home-made barrack furniture is kept in good repair by the troop carpenters. I would again recommend that if possible iron cots be procured. The tables and benches should have iron legs, and iron truck wheels should be provided for the coal boxes, so that they could be moved when the rooms are scrubbed out.

A new linoleum oil cloth has been provided for the sergeants' mess anteroom, and two easy chairs. Their mess and ante-room have been painted throughout, and now look very well. The wards and corridor of the hospital have been painted.

HORSES.

The actual strength of the horses of this command is as follows:—

"D" division, saddle.....	55
"D" do team.....	32
"D" do pack animals.....	17
"H" do saddle.....	50
"H" do team.....	38
	192

The total mileage travelled by horses of both divisions while on duty has been 424,603 miles.

"D" division.....	218,902
"H" division.....	205,701

SAVINGS BANK DEPOSITS.

During the year the following amounts have been deposited by the non-com. officers and men of this command, through the department, at the different banks:—

"D" division.....	\$1,919 86
"H" division.....	1,586 66

GENERAL EQUIPMENT.

Our general equipment is good. I must again refer to the practice in vogue at this, and I believe other posts, of carrying the carbine across the horn of the saddle. It is very much in the way in close order, and prevents steadiness in the ranks and perfect dressing. It is also most objectionable in mounting a restive horse.

I would strongly urge that the sergeants of this command be supplied with steel scabbards instead of wooden ones, as at present in use. They detract from the men's military appearance, especially in a mounted corps, and in crossing rivers or if subjected to heavy rain they swell and become worse than useless.

AGRICULTURAL PROSPECTS.

The crops in this district and I believe all over the country have been unusually abundant. The enormous increase over last year can best be appreciated by reference to the subjoined comparative table. Some slight damage was done by the cut-worm, principally on old ground. Their ravages were generally local. Two agricultural exhibitions were held during the fall, one at the Mormon settlement, the other in Macleod. The exhibits in both cases were wonderfully fine, especially the roots. Were irrigation once introduced into this country it would be unsurpassed from an agricultural point of view.

The reports from the round-ups are most encouraging, the lowest estimate of the increase being 50 per cent. Very few calves were dropped during the cold weather, but as is usual in this country, a number of cows died in calving in the early spring. The increase of horses is reported on every hand to be most satisfactory. A good deal of damage has been done to young stock by wolves, which seem to be on the increase, and settlers are clamouring for the Government to take some steps toward their suppression by offering a bounty for their scalps.

CENSUS of Macleod District, November, 1891.

District.	POPULATION.				RELIGION.								NATIONALITY.								Number of Acres under Cul- tivation.	Number of Acres broken this Year.	Horses.	Cattle.	Pigs.	Sheep.

TRANSPORT.

There has been no addition to the transport since last report, except one shuttler, one platform spring waggon and one buckboard, rebuilt at this post. I consider the transport sufficient if two double buckboards are supplied.

FIRE PROTECTION.

The fire protection is the same as last year; 300 feet of hose is still required to enable the hospital to be reached.

PRAIRIE FIRES.

There was a strong expectation that the country would this year suffer severely from prairie fires, but I am happy to state that these fears have to a great extent been unfounded. There have certainly been a few fires, principally in the early part of the year, but the area burnt bore no comparison to former years. This is the more extraordinary on account of the luxuriance of the grass.

I would suggest the advisability of amending section 4 of the Prairie Fire Ordinance, and in place of the words "any person refusing to do so" substitute "any person not so proceeding at once," as it is found that persons do not *refuse*, but nevertheless do not go, pleading want of transport and other excuses. I would further suggest that all members of the force be invested with the powers of a fire guardian, as far as warning settlers and others to turn out and help to fight prairie fires.

AMERICAN CATTLE.

A careful watch has been kept by our patrols along the southern border for American cattle on this side of the line and very few have been reported. Occasionally, after a heavy storm, a few drift across, as Canadian cattle drift on to the American side from the same cause; but I am convinced that the American cattle owners do their best to prevent their stock from trespassing on Canadian territory and take the most prompt measures to drive back any that stray across.

GAME.

Game of all kinds has been far less plentiful this year. Black-tail deer are becoming very scarce, and I fear will soon become altogether extinct unless some steps are taken to restrain the Stony Indians from killing game out of season. These Indians are, I am informed, allowed to purchase fixed ammunition and come through the hills in this district just when the deer are heavy with fawn and kill all before them.

MACLEOD EXTENSION, CALGARY AND EDMONTON RAILWAY.

The Macleod extension of the Calgary and Edmonton Railway has been graded to within about nine miles of Macleod, but yet no one has received any definite information how much nearer it will approach the town. If it is decided not to cross the river at this point, it is probable that the town site will be moved to meet it on the other side.

PRISON ACCOMMODATION.

I must confirm my report of last year on the insufficiency of prison accommodation at this post, and must urge the importance of taking early steps to strengthen it. Early in June three prisoners escaped by sawing their way out through one of the corridors with a dinner knife hacked into a saw. Two prisoners were recaptured, but the third, an Indian, sentenced to two years in the penitentiary and awaiting the sheriff's convenience to take him to Stony Mountain, escaped across the line. The present insecure state of the guard-room is a constant temptation to prisoners. Considering that prisoners have to serve comparatively long sentences, it is imperative that the accommodation be improved. I would suggest the erection of a kitchen and latrine for their use, the present accommodation being altogether inadequate.

CANTEEN.

I have much pleasure in reporting favourably on the canteen at this post. It is a great boon to all the members of the force in this district. In addition to the men being able to get a glass of good wholesome beer at a comparatively small cost, and thus being kept away from the temptations of town, groceries and other requisites are retailed at almost cost price. The profits accruing are necessarily small, but out of them the canteen committee have been already able to add additional means of recreation for the men's comfort, and were able to supplement the subscription for the annual sports by \$200. The canteen will soon be out of debt, and able to pay cash for everything, after which it will be in a position to give larger bonuses for the benefit of the command.

OFFICERS.

I am happy to report that as a rule my officers have given me their most cordial support. Inspector Matthews, in charge of the riding drill, has been most painstaking, and under his instruction the men have made great progress. Inspector Baker, who has been acting quartermaster, has taken a personal interest in his work, the result of which has been apparent in every branch of his department and increased economy throughout. Superintendent Macdonell, in command of "H" division, left for the east on leave of absence and was absent nearly five months, during which time Inspector Morris was in command. Inspector Sanders relieved Inspector Wood early in July in command of "D" division.

I cannot speak too highly of the support I have received at all times from Superintendent Macdonell and Inspector Sanders, commanding respectively "H" and "D" divisions.

NON-COMMISSIONED OFFICERS.

With the exception of two sergeants and one corporal, reduced to the ranks for breaches of discipline, I can speak in the highest terms of the conduct of non-commissioned officers of this command, who have been in every respect a credit to the force.

BUILDINGS.

Herd.

Since my last report, we have built for the accommodation of the herders a substantial frame house and kitchen; stable for six horses, hay corral, coal shed, latrine, horse corral; and also fenced in the whole reserve with a good wire fence.

Stand Off.

Hay corral enlarged and the whole reserve fenced in with wire fencing.

Boundary Creek.

House 18 x 20, kitchen 12 x 16, stable 26 x 30, oat shed 12 x 18, all built since last report by our own men, of logs, with mud roofs, and properly floored. A pole hay corral 45 x 45.

Kootenai.

Stable for 14 horses, to replace one beyond repair.

Fort Macleod.

New blacksmith shop; work shop lined and divided into two distinct shops, one for saddler and one for tinsmith; root house 18 x 28, lined and ceiled with slabs. Hospital painted throughout; anteroom and dining room in the sergeant's mess painted; quartermaster's offices painted throughout; the post and all the buildings put in good repair. The rented buildings at the Leavings and Mosquito Creek have been put into good repair by our men on the landlords supplying the material. A good wire fence has been put round the police reserve at Pincher Creek.

A brick chimney is badly needed for "D" division saddle room.

I have the honour to be, Sir,

Your obedient servant,

S. B. STEELE,

Superintendent, Commanding Macleod District.

APPENDIX E.

ANNUAL REPORT OF SUPT. A. B. PERRY, COMMANDING "B" DIVISION, 1891, WITH REPORTS OF INSPECTORS PRIMROSE, MCGIBBON, WILSON AND CONSTANTINE.

REGINA, 14th December, 1891.

SIR,—I have the honour to forward, for your information, the annual report of the headquarters district, for the year ending 30th November last.

GENERAL.

I was posted to the temporary command of "B" division, serving in the headquarter's district, on the 19th of September, relieving Superintendent G. B. Moffatt, who had up to that time been performing the onerous double duties of commanding the district and acting as paymaster of the force.

Not being perfectly acquainted with the details of the work performed during the year, I called upon the different inspectors commanding portions of the district for reports, which I now forward, as follows:—

Inspector Primrose, Wood Mountain.
do McGibbon, Manitoba.
do Wilson, Saltcoats.
do Constantine, Moosomin.

These reports have been carefully prepared and contain much information.

The headquarter's district comprises eastern and a portion of western Assiniboia, the Manitoba boundary and Keewatin territory.

"B" division is scattered over this vast stretch of country in some thirty-six detachments, varying in strength from one to thirty constables.

The detachments are divided into two classes, those on the boundary charged with the protection of the revenue, and those in the interior at centres of settlement, where they perform the ordinary police duties of enforcing the law.

They are to some extent associated in groups, under the control of an officer. The organization of each group varies largely—in some the officers have full and responsible control, and in others only partial.

I would recommend that the district be divided into sub-districts, with officers placed in command thereof with full control and responsibility for all their detachments. This system would materially lessen the clerical work in the district office, give the officer commanding the district time to frequently inspect and visit the detachments, and would perfect the chain of responsibility, and cause the work to be more effectually performed.

I propose that the following sub-districts be formed:—

Wood Mountain.
Regina.
Saltcoats.
Moosomin.
Manitoba.

I trust that my proposal may meet with your approval.

The past season has been a most fruitful one in all portions of the district.

Some localities suffered from early frosts, but it is generally conceded that the yield and the quality of the grain have never been surpassed in any year. Pheno-

menal yields are reported from many points—55 to 60 bushels to the acre have been threshed.

It is to be hoped that this season is the forerunner of many favourable ones, and will result in establishing the people who are already in this country, in attracting a large and healthy immigration, and in placing the North-West on a strong financial basis.

CRIME.

A horrible murder was committed north of Whitewood by an unfortunate Swede, who had become crazed with grief from family affliction. The victim was his little daughter. The jury acquitted him on the ground of insanity.

There have been a few isolated cases of horse-stealing, but none present any startling features, nor do any of the felonies which have been committed indicate that there is a dangerous element in the country. We have happily as yet no dangerous criminal class, and I hope that we may always be free from them.

There was a great demand last summer for labour. Farmers were much delayed in saving their crops. A large quantity of grain was cut in October, and the greater part was stacked late in October and the beginning of November. Female help is in great demand—servants readily receive from \$10 to \$15 in any town in the country.

The largest immigration has been in the Saltcoats district, on the Manitoba and North-West Railway.

Inspector Wilson reports that some 160 families have settled there. Many of these are from Dakota, United States, and many more are expected next year. They are a most desirable class of settlers, having already a knowledge of western farming.

The immigrants hail from every country. Near Whitewood seven different languages are spoken.

The different detachments have prepared and forwarded to me statements of the number of settlers who have located in the territory during the past year.

The following is a summary of these approximate statements in the headquarters district during the summer of 1891 :—

APPROXIMATE Statement of the new Settlers in the Headquarter's District during the Summer of 1891.

Place.	Number.	Value of Property.
		\$
Moosomin	41	7,000
Broadview	8	3,000
Wood End	11	4,150
Fairmede	11	4,400
Fleming	19	3,500
Whitewood	171
Wolseley	39	4,800
Grenfell	56	4,000
Qu'Appelle	23	11,100
Regina	122	18,800
Moose Jaw	108	24,600
Carsdale	30	14,890
Crofters	3	500
Saltcoats	328	38,650
Dakota Settlement	130	27,815
Total	1,100	167,205

STATEMENT of Settlers who came into Manitoba from the United States by trail during the Summer of 1891.

Place.	Number.	Value of Property.
Manitoba.....	114	\$ 11,764

During the past few years I have been stationed in Prince Albert and Battleford, as well as in this district. I have gained extensive knowledge of the resources of these vast provinces, and I am amazed at the potentiality of these fruitful millions of acres. A vigorous railway policy has provided ready communication. People only are required.

PATROLS.

The work of this division has altogether been confined to patrolling and detached duty.

The patrol system is an extensive one, and the patrols during a year cover an immense lot of ground—the horses of the division travelled 343,631 miles on this work. The patrols are of two kinds, those along the boundary line, and those through the settled portions. The former prevent smuggling, the exit and entry of questionable characters, and forbid that the frontier should be used as a base for the commission of crime in either country; the latter render assistance to the settler, give information to the immigrant, enforce the laws, and especially the prairie fire ordinance, &c.

The boundary system of this district extends from the Roseau River, Manitoba, on the east, to Pinto Horse Butte, west of Wood Mountain, a distance of 584 miles.

In Manitoba the patrol passes over every portion of the country daily, at irregular hours; and at certain points, Emerson and Gretna, a night patrol is established. In the thinly-settled portions, in the vicinity of the coal fields, patrols are not so frequently made. A regular weekly patrol was kept up between Wood End and Wood Mountain during the summer; in September and October it was changed to a fortnightly one.

A glance at the map will show that the ordinary patrols cover all the settled portions of the district. They are no doubt beneficial, as they reassure the isolated settlers.

The Indian reserves were visited weekly.

DUTY IN MANITOBA.

An erroneous impression prevails that the detachments perform the same duties as in the North-West Territories. The North-West Mounted Police are in that province solely by the order of the Federal Government for the protection of the Crown revenues.

The administration of justice in that province is the right and duty alone of its Government. Some modified agreement would perhaps be in the interest of justice.

At present we aid only in the execution of the criminal laws when requested by the local authorities, and then only in serious criminal cases. The members of the force, as citizens, individually attempt to aid in suppressing crime, and detecting criminals.

Our irresponsibility for the maintenance of law and order in Manitoba should be clearly understood, as there is a tendency, locally, to blame us for laxness in the enforcement of the laws in the vicinity of the boundary.

A return is attached to this report giving all cases of a criminal nature where we have taken action. A few cases of felony have been dealt with.

The work required of the 28 constables extended along the line from Roseau, on the east, to the North-West Territories on the west, some 255 miles, is sufficient to keep them well employed.

There are 13 outposts, and as every portion of the line must be passed over daily, each performs an average daily patrol of 20 miles.

All these are Customs posts for minor purposes, such as collecting small duties and issuing "let passes." These posts are a great convenience to the public—an average of 400 "let passes" were issued by each during the year.

Customs duty is also performed at Wood End and Wood Mountain posts.

Our frontier guard has recently attracted the attention of the American Government. The smuggling of opium and Chinese across the boundary is prevalent, and a force such as ours is said to be necessary to check it. The *New York Herald*, in a late number, pointed out our system, and declared it to be most efficient. It gave a succinct account of the force, and called upon its Government to organize a similar one. Should such a force be organized and work in harmony with ours, as it doubtless would, the frontier would be anything but a comfortable place for wrong-doers.

THE UNITED STATES SIOUX WAR.

The Indian troubles in the United States last January caused an uneasy feeling in some parts of this district. A few Sioux Indians, related to those in rebellion, reside in this country.

They are the remnants of the Minnesota massacre and Sitting Bull's band who took refuge in Canada in 1876. It was expected that, in case of defeat and escape, the American Sioux would attempt to repeat their action of 1876 and cross the line.

The prompt measures taken by the Government of the United States quickly quelled the rising, and compelled the submission of all those engaged.

A temporary scare was created by the action of the sheriff of Bottineau county, Dakota.

The following extracts are taken from Superintendent Moffatt's report to you on this subject:—

"On Thursday the 8th of January, in the afternoon, it was reported to me (at Deloraine, Man.) that the Indians were dancing the 'Ghost Dance.' I sent two men out there to investigate. They returned and reported that there was nothing of the kind going on—there had been a small 'tea dance' the night before. The Indians on this reserve, which comprises one section of land, number about 25. The reserve is about ten miles from Deloraine. They are hard working and inoffensive people, making a livelihood by farming a little and hauling and cutting wood.

"Inspector McGibbon (on 9th) received a telegram from the sheriff of Bottineau county, Dakota, giving alarming accounts of Indians from this side of the line threatening settlers on the other side.

"I did not credit the story in the least, looking at it in the light of information received when at Deloraine the day previous. I sent the message on to Corporal Will with instructions to send Scout Winters around the west end of Turtle Mountain into Dakota to investigate, and to ascertain whether there was any truth in it. At the same time I repeated the message to Regina.

"About 8 p.m., just after the train had passed (Cartwright), I received a telegram from Corporal Will to the effect that the sheriff's telegram was true; that 60 armed Indians were threatening settlers and holding a 'war dance.' I at once decided to return to Deloraine, and hiring a team I left at 8 p.m. I obtained relays of horses at Killarney and Boissevain and reached Deloraine at 7.30 a.m. on Sunday. I then sent Inspector McGibbon and Scout Winters to investigate the matter and report. They found there was no truth in the report, and that it was only a 'scare.'"

Inspector McGibbon reports on the same subject as follows:—

"The settlers on the American side of the line had a scare last January. They received a report that the Deloraine Indians were on the 'war path,' and that 72

were having a 'Ghost Dance' at Fishing Lake. I patrolled the mountain on the 11th of January with the interpreter and an Indian guide named Paul Jones. I could not find any Indians. On account of a blizzard coming on I stopped over night on the American side of the line at Kirk's summer hotel. At this point the scare started. The settlers hearing that it was only a scare returned to their homes from Bottineau, Dakota."

The foregoing illustrates how easily settlers become terrified by Indian war rumours, and shows how necessary it is to have a force at hand to give them confidence.

ASSISTANCE TO THE INDIAN DEPARTMENT.

On 1st September an escort was supplied from Saltcoats for the conveyance of the annuity money to Fort Pelly. On the 3rd the money was conveyed to Côté's reserve.

A constable attended the Indian agent at these reserves during payments.

Weekly visits were paid to these reserves by the Kamsack outpost.

The annuity money was conveyed to the following reserves and constables attended during the payment: Moose Mountain, Crooked Lakes, Touchwood, and the reserves along the Qu'Appelle valley.

PRAIRIE FIRES.

Early in the season, acting by your instructions, I established special stations and patrols for the purpose of checking fires.

Men were stationed at Caron, Carsdale, Evett's ranche, Qu'Appelle valley, Crofter settlement, Pheasant Plains, Sunnymede, Fairmede, Rocanville, Fleming, Sumner and Dakota settlement. These with the regular detachments formed a network over the whole district. His Honour the Lieutenant Governor was requested to appoint the seniors of each detachment fire guardians under the ordinance, which he was pleased to do.

Fires occurred in every locality, and in nearly every case the cause of the fire was ascertained. A fire which started at Moose Jaw was caused through the carelessness of a couple of boys. Another which sprang up north of here, near the valley, was undoubtedly caused by the folly of a man, in throwing a lighted match to the ground as he was travelling along the trail. This fire burned fiercely and was only extinguished by the efforts of every settler in the vicinity, all of whom were promptly warned by our men. This case was referred to His Honour, who decided that the evidence we were able to obtain was not sufficient to convict.

A fire was caused at Pheasant Plains by some young children. It burned over a large portion of the country, but no extensive damage was done.

No action could be taken in this, on account of the age of the children.

A settler, near Broadview, allowed a fire to escape when burning stubble. He was fined \$2 and costs for the offence by a local magistrate.

Fires raged south of Qu'Appelle, Indian Head and Wolseley. Considerable property was destroyed. This fire came from the south-east, in the vicinity of Moose Mountain.

The most disastrous fires occurred in the Moosomin district. One started from a point south of Fleming, on the 20th October. It escaped from a man named Campbell who was burning stubble. It burned south-east until it met one which started near the deserted Jewish colony. It was through these fires that Mrs. Dallas and her two children met their death.

Several fires occurred in the Saltcoats country last spring. This fall a severe fire raged for several days, and was only put out by a heavy snow storm after it had destroyed much valuable property. The settlers fought this fire for four days and nights. The culprit was convicted before a local magistrate, and a fine of \$3 and costs was imposed.

I desire to point out that in all cases the origin of the fire was discovered by our men, except that in the Jewish colony. Convictions were obtained and the heaviest penalty inflicted was \$3 and costs.

Inspector Constantine makes the following suggestion: "A great means of prevention would be to plough the road allowances in thinly-settled townships, all non-residents to pay a double tax, as the greatest danger is from uncultivated lands."

All the fires have been caused by carelessness. No effort on our part will prevent them. Only extreme care on the part of every resident of the country will stop them. The Canadian Pacific Railway took great precautions to prevent fire from their locomotives. The section men burned both sides of the track for a distance of 200 to 300 feet wide. I know of only one case where the fire was caused by their engines. It was put out before it spread.

BUILDINGS.

Inspector Primrose reports that several buildings are required at Wood Mountain post—a hospital, guard room, barrack room, sergeants' mess and kitchen and saddle room.

As Wood Mountain post is likely to be occupied for a long time to come as a police station, I would strongly recommend that these buildings be erected early next spring.

At Qu'appelle and Touchwood only are any of the detachments of "B" division living in Government quarters. For all others rented houses are now occupied, which in very few cases are suitable for our use.

Mr. McGibbon complains that along the Manitoba boundary it is impossible for him to secure quarters that are comfortable for the men and horses during winter. The outposts must be at certain points, and it is plain that the necessary accommodation cannot be always obtained.

"If the force is to be kept in Manitoba, I am convinced that it will be necessary to erect buildings at several points. It will be economy in the end, as we are now spending large sums for the boarding of men and horses."

Both Inspector Primrose and Inspector Constantine agree in asking that more posts be erected along the boundary: The points recommended are the following:—Pinto Horse Butte, at a point a little east of where the Big Muddy Creek crosses the boundary; Willow Bunch, at a point where the Wood End and the Willow Bunch patrols meet; and at a point midway between Buffalo Head and Wood End.

It is proposed that Wood End post be removed from its present position in the valley to the Bench. Extensive repairs are required next spring before the buildings will be fit for occupation.

Accommodation will also be required at the Coalfields. This district is now opened up by the Souris branch of the Canadian Pacific Railway, and mining will be pushed there next spring.

The buildings at all the above points will not be of an expensive nature, as they will be wanted for summer use only, except those at the Coalfields, Wood End and Willow Bunch, which will be used the year around. Accommodation at most is required for 5 men and horses at each.

As the last service performed in the North-West Territories by this force will be along the frontier, and that work is more likely to increase than to diminish, I trust that you will agree with my proposals.

The cost of none of this work would be excessive, only that building material will have to be hauled from a great distance. I have no doubt that most of the work can be done very cheaply by the half-breeds.

If the present system is to be maintained of keeping small detachments in all the little towns and villages, I think suitable huts should be put up. Efficiency and economy would result.

LIQUOR LAW.

The force has persevered in trying to execute the law, but in the face of what difficulties is well known. It is a matter of fact that little or no blame has been attached to the police for the ineffectiveness of the law.

It seems to have been well recognized that the force on the whole has tried to perform its duty, no matter how unpleasant it might be.

As it is certain that the law will be changed within a short time, it might be well to observe that no law, in my opinion, ever existed on the statute-book which effected so much good in so short a time. To it can be credited the quiet, peaceful opening up of this territory by the North-West Mounted Police.

Only the old officers and men of the force know what a hold it gave over the western roughs. The whiskey traders were the strong element in the country in its early days, but a rigorous enforcement of this law soon extinguished them.

The development of our Territory presents a strong contrast with that of the western States. No lynch law has disgraced us; no wild excesses nor frightful disorders have made our western towns notorious, as those of the States were in the early days.

This result was due to the execution of this salutary law, by a powerful constabulary, armed with exceptional powers. Mr. Bryce, in his "American Commonwealth," declares that a mounted gendarmerie in the western States would have prevented disorders which exist.

The following is a tabulated statement of the liquor seized and destroyed in the Headquarter's district during the last year:—

Spirits.	Wine.	Whiskey.	Brandy.	Gin.	Beer.
952 galls.	3 galls.	623 galls.	7 galls.	6 galls.	260 galls.

A large seizure was made at Moosomin; 260 gallons of whiskey were destroyed. The estimated loss to the parties concerned was \$1,000. Another large seizure was made at Broadview in March. Numerous consignments of liquor were discovered going through to western points without permits. The police nearest the point of destination were notified and the liquor was allowed to go on.

It is to be hoped that the new license law will provide for its enforcement by means of special officers, and that the North-West Mounted Police will have no special responsibility in the matter.

It will be to the advantage of the force and will hamper it less in the execution of its proper duties.

We will require to watch the Indians more carefully to prevent them from obtaining liquor. The reserves remain forbidden ground, and will demand closer watching than ever.

I apprehend that it will take some time for a portion of the people to become accustomed to the open sale of intoxicating liquor, and that increased disorder may follow in the small towns. This is not to be accepted as the permanent result, but must be regarded as temporary excess.

The change will be an interesting one, and whether for better or worse only time can decide.

DRILL.

I have already remarked that no drill has been performed in "B" as a division. Owing to the call for men, it was found necessary to send some on detachment duty who had been only a very short time in the force and who had not yet received complete training. Detachment work should be looked upon as a reward for good conduct, knowledge of constabulary duty and ability. If men are to be smart and efficient on detached service they must be thoroughly drilled and well grounded in the duties of a police constable.

No target practice was performed, except at Wood Mountain.

HEALTH.

There have been no deaths in the division during the year. Little or no sickness has occurred.

The detachments in Manitoba, Saltcoats and Moosomin are looked after by civilian doctors.

At Wood Mountain and Wood End competent hospital sergeants were stationed.

RATIONS, ETC.

At Wood Mountain, Wood End and Touchwood rations are drawn; at all other posts the men are boarded at private houses or hotels. The rate per month varies from \$16 to \$20, according to locality.

KIT AND CLOTHING.

I have in previous annual reports (and many other officers also), referred to the want of a serviceable prairie dress. It is generally acknowledged that our equipment in this respect is very faulty.

Inspector Constantine refers to the cut of the collars of the fur coats. The rolling collar should be exchanged for a square-cut one, coming up well around the throat and face.

SAVINGS BANK.

The deposits have fallen off much the last year, due to the difficulty in withdrawing money. Many of the men prefer to place their money in local banks, where they can get hold of it readily.

HORSES.

The horses of this division do a great deal of heavy work during the summer. The mileage for the year, which I have already quoted, means a big expenditure of horse flesh. Early in November the horses on summer patrol at Wood Mountain and Wood End were brought in to headquarters. A considerable number were turned out for the winter, in hopes they would recruit for next year's work. A number will be cast in the spring and new horses will be required. The team horses receive especially heavy work, as the patrol distances are long and oats and rations must be carried.

During the year 7 horses died, and 7 were cast and sold.

I am unable to give you any definite information as to how many new horses will be wanted in the spring, as I have seen only a very few of the division horses as yet, but it is probable that at least 15 will be required.

BARRACK FURNITURE.

I need offer no excuse for bringing this matter up again. The want of it has again and again been reported on.

STRAY STOCK.

Inspector Constantine asks that certain changes be made in the ordinance. A pound-keeper has only to keep impounded stock a few days, then advertise them by putting up three written notices in conspicuous places, when he is able to sell, retain his expenses, and remit the balance to the Lieutenant Governor. He suggests that advertisement be compelled in the nearest paper, and that a list of all impounded stock which is unclaimed be handed the nearest police post, in order that they may know if this stock has already been reported to them as lost.

INSPECTIONS.

The Manitoba detachment was inspected by the Assistant Commissioner in May. Supt. Moffatt visited the same detachment last January. He also inspected Saltcoats in August, Wood Mountain in September, and Touchwood and Fort Qu'Appelle in October.

The railway outposts were inspected monthly by Mr. Constantine.

Constant and careful inspection is required where men are so scattered as in "B" division.

CONSTABLE'S MANUAL.

A constable's manual specially prepared for the use of this force is much required. If duty is to be properly performed it is absolutely necessary that some printed instructions be furnished, giving concise rules to guide the men on detached duty. I have recognized this particularly since taking command of "B" division where the duty is altogether of that nature.

CIVILIAN MAGISTRATES.

Some trouble has been experienced during the past year in getting civilian magistrates to act. Before accepting the honour they should recognize that the duties are important and sometimes very unpleasant, and that they are to a certain extent bound to act when called upon, unless they may have an interest in the case; they should do so especially when much inconvenience is caused to the police by their refusal.

Both Inspectors Wilson and Constantine have reported on this subject.

THE DETACHMENT SYSTEM.

I believe it will be possible in the near future to contract our present extended system. The present liquor law has compelled us to watch every little village and railway station. I think all municipalities should be asked to preserve the peace in their localities and execute municipal laws. Our outposts could then be reduced in number, but be more fully equipped with men and horses for service on the open prairie.

PATROL MAP.

I attach to this report a corrected map showing last summer's patrols.

I would strongly recommend that the townships and ranges be outlined. The most common direction one receives when searching for a settler is the section, township and range on which he is located. The topography of the map should be improved if it is to be of use; main trails should be distinguished from branch ones; the broad white line should not obliterate the trails—as now printed it is not possible to say whether the patrol follows a trail or not; the map should be printed on good paper which will stand use; and it might be divided into four sections, so that a man could easily carry the section covering the ground in which he was serving.

All officers on patrol duty might be required to fill in with care as many of the main features of the district in which they are serving as possible. This work would require several years to complete, but if carried out systematically a really serviceable map would be produced in time.

DESERTIONS.

There were eight desertions during the year. The greater number took place from the detachments serving in the vicinity of the international line. They may be attributed to the restlessness which affects some men, the ease with which their purpose could be accomplished, the loneliness of the life on the frontier, and the constant monotony of the work.

RETURN OF CRIME.

I attach to this report a return of crime committed in the district, of which the following is a summary:—

Injuries to the person.....	11
Larceny; horse-stealing.....	13
Malicious injuries to property.....	4
Prohibition of intoxicants.....	9
Miscellaneous.....	43

I have the honour to be, Sir,

Your obedient servant,

A. BOWEN PERRY,

Superintendent, Commanding "B" Division.

NORTH-WEST MOUNTED POLICE,

REGINA, 28th November, 1891.

SIR,—In accordance with your instructions of the 29th October, 1891, I have the honour to make the following report on the work performed in the Wood Mountain district during the past season.

ARMS AND AMMUNITION.

The carbines, with the exception of those which are honeycombed, are in good order, considering the rough usage they receive on constant patrols in being exposed to all sorts of weather. The Winchester ammunition might be better and the boxes so built that they could be opened without tools. Good boxes could always be returned to the factory to be refilled.

The revolvers and the ammunition for the same are both good.

BUILDINGS.

Part of the "dug-out" or bank stable having collapsed on the 6th August, and the remainder, with the exception of the south end or "sick stable," being unsafe, it was taken out of the bank and erected on the bench land, with a pitched roof instead of the old lean-to roof, and with all the old and unsound wood removed. The stable is 137 x 17 feet, holds 30 horses, and will now last for years. The cost of the foregoing work was \$300. The cellar of the quartermaster's store has been floored and lined throughout by police labour and is now frost-proof. A log building 18 x 20, with board and shingled roof, also built by police labour, has been added to the No. 3 barrack-room, to be used as a kitchen, as the old kitchen is quite unsuitable.

With regard to the new buildings required, I would refer you to my report on the buildings of the 29th June, 1891, which goes fully into detail.

I attach an estimate of the lumber, etc., required to provide board and shingled roofs, and also to ceil those buildings at present covered with mud roofs. The new buildings required at Wood Mountain post are as follows, in order of most importance, viz. :—

- 1st. Hospital.
- 2nd. Guard-room.
- 3rd. Barrack-room.
- 4th. Sergeants' mess and kitchen.
- 5th. Saddle-room.

CRIME.

This district has been free from crime.

CUSTOMS.

Customs duties have been collected from all parties importing goods into the country through this district.

Casualties—None.

DESERTIONS AND DISCIPLINE.

Constable Gillespie deserted from Wood Mountain post on the 26th April, 1891. Constable Kane deserted on the 3rd June, 1891, while on patrol to Long Creek. Constable Hood deserted from Pinto Horse Butte on the 21st July, 1891. Constable Endicott attempted to desert from Willow Bunch on the 17th July, 1891, but was captured by Corporal Vickers at the Little Woody Lake. He was sentenced by me to 12 months' imprisonment with hard labour, and has since been invalided from the force, being of feeble mind. With the exception of one other case and the above desertions the conduct of the men has been good.

FENCE.

A fence around the post is very much needed and has already been asked for.

FORAGE.

The forage is excellent. Good hay was very plentiful this year, even on the upland, and the hay supplied to the force was cheaper than it has been in any of the preceding years, costing only \$6 per ton.

FUEL.

Wood is becoming more scarce every year and is now nearly exhausted. It will be only a short time before it will be necessary to open up some of the numerous coal beds along the line, as previously recommended by Superintendent Jarvis.

GAME.

Game was much more plentiful this year than it was for several years past. The Indians kept up their reputation and killed quite a number of deer and antelope.

HEALTH.

The health of the men was excellent, there having been no serious cases of illness or accidents.

HORSES AND CATTLE.

The horses, particularly the teams, have had rather a hard time from various causes. The heavy waggons without brakes and over a rough and hilly country made it almost impossible to keep down the sick list. Again, there having been no shelter (with the exception of Wood Mountain post) between the White Mud River and Buffalo Head, our horses had to stand out in all sorts of weather. I would strongly recommend the employment of four-horse teams, and also that the waggons be fitted with brakes. Two horses died during the summer, viz., No. 1045, at Willow Bunch, on the 12th August, from enteritis; No. 1841, on the trail near Wood Mountain, on the 10th October, from pulmonary apoplexy. Typhoid fever broke out at Wood Mountain post on the 22nd September. I think it was partly due to the bad water at Willow Bunch, and also to these horses having been run down in condition. Horse No. 1749 succumbed to the disease in November. Anthrax made its appearance amongst the cattle at Willow Bunch early in the spring, and although visits were made by Veterinary Surgeons Creamer and Wroughton, the steps taken to stamp out the disease were not sufficient, as a number died during the summer. A calf died of this disease at Wood Mountain on the 18th August, but after all the young stock had been setoned by Corporal Perry there was no further appearance of the disease at that point.

MILEAGE.

The mileage of the horses of the detachment for the six months was 60,247 miles, and as there was no allowance made for sick or other casuals, some of the horses had to perform an unfair amount of this mileage.

HARNESS AND SADDLERY.

The harness and saddlery are good.

INSPECTIONS.

Superintendent Moffatt inspected the post on the 21st September and held "quarterly board" on the accumulation of old and other stores.

INDIANS.

Most of the Sioux Indians who live at Regina and Moose Jaw during the winter spend the summer in this vicinity, in order to hunt and keep their ponies out of the settlers' crops. They give no trouble.

OUTPOSTS.

The only outpost is Willow Bunch, and I would recommend the building in the spring of a house, stable and corral, with a good fence surrounding the whole, as with the large number of horses and cattle running around the tents and horse lines it is impossible to keep the camp in anything like order, to say nothing of the annoyance caused by the same.

Small detachment houses and stables are also required at the following points, viz., Pinto Horse Butte, at a point a little east of where the Big Muddy Creek crosses the boundary line, also at the point where the Wood End and Willow Bunch patrols will meet.

PATROLS.

During the season regular connection was kept up with "A" division on the west and with Wood End party on the east. I would recommend that the present line of patrol from Willow Bunch east be changed, and that the Willow Bunch patrol follow the Big Muddy Creek to the boundary line, and from there strike straight across the line to meet the Wood End party. This route would save the men and horses considerably, as it is shorter than the present line of patrol. Furthermore, I think that by this route the work could be better performed. In addition to the regular patrols many others were sent out during the summer in all directions, but principally following the main features of the country.

PRAIRIE FIRES.

The abundant rains and the early snow-storms were a great preventive of fires, and I am glad to be able to say that we were entirely free from them.

RATIONS.

The quality of the rations was good, with the exception of some of the flour, "Perfection" brand, which was apparently made from frozen wheat, and made poor bread.

TRANSPORT.

The heavy loads which have to be carried, owing to the long patrols and the scarcity of wood, necessitate the use of the heavier half-spring waggons. A number of these waggons had the reaches shortened last spring, without having the boxes cut, and this threw too great a proportion of the weight of the load on the hind axle; consequently three of the axles gave way during the summer. The brakes were at some time or other taken off our waggons, and though they may be of little service around Regina, still they would be of great benefit in this section of the country.

TARGET PRACTICE.

Whenever the weather permitted and the men could be got together target practice was carried out, and nearly all the men went through the course. The shooting was not good, but I think that with a different weapon and ammunition much better results could be looked for.

TELEGRAPH AND MAIL SERVICE.

The telegraph line has not worked satisfactorily, and I would refer you to my several letters on this subject, which fully explain the cause of the troubles.

A good mail service could not be expected of a carrier who has to travel 240 miles—remain 2 days in Moose Jaw and do the work for \$15 per trip besides having to carry up to 300 lbs. if required.

GENERAL.

No settlers have located in this district during the past year. The employment of half-breed scouts I found to work very satisfactorily, and recommend that the practice be continued next season. There are no post offices in the district.

I have the honour to be, Sir,

Your obedient servant,

P. C. H. PRIMROSE,

Inspector.

NORTH-WEST MOUNTED POLICE,

MORDEN, 30th November, 1891.

SIR,—I have the honour to submit my annual report of work performed by the North-West Mounted Police on the Manitoba frontier for the past year.

The nature of the duty performed is as follows:—

Watching the Dominion lands to prevent timber and hay-stealing, preventing smuggling, issuing "let passes" to people passing to and from the United States. "Let passes" are granted for three days, and are often extended for a greater length of time. There is an average of 400 passes issued at each detachment per year. Collecting duty on all articles of a dutiable nature imported by settlers and others. The duty money is forwarded to me at Morden from the different detachments and by me to the collector at Winnipeg.

All animals arriving from the United States are inspected by the Government veterinary surgeon, and a certificate with the fees forwarded along with the entry papers to the collector at Winnipeg.

CUSTOMS.

Number of entries made at police detachments: 366 duty entries, 5 free entries, 37 settlers' entries; value of settlers' effects entered free, \$13,614²⁷/₁₀₀.

Settlers from Dakota, U. S.: Male adults, 36; female, 19; children, 54. Total, 109.

Nationality.—English Canadians, 20; Irish Canadians, 1; Canadians, 44; German Americans, 2; German Canadians, 1; English, 3; Americans, 19; Irish, 14; French Canadians, 5. Total, 109.

Constable Keays acted as sub-collector at Killarney the greater part of the summer. Entries, &c., made before him were sent direct to the collector at Winnipeg.

Number of Customs seizures made during the year, 12.

CROWN TIMBER DEPARTMENT.

One hundred and twenty-seven requisitions for timber permits were sent to Winnipeg from the Morden office for settlers.

INDIANS.

There is a small Indian reserve near Deloraine, with about 25 Indians residing on it. Sergeant Pennefather, Constable Cumming and Interpreter Winter, of Deloraine, arrested two Indians named "Bear Bull" and "Good Horn" for shooting a squaw. Judge Walker, of Brandon, sentenced "Bear Bull" to two years' imprisonment with hard labour in the Brandon gaol.

The settlers on the American side of the line in the Turtle Mountain had an Indian scare last January; they received a report that the Deloraine Indians were on the war path and that 72 were having a "Ghost Dance" at Fish Lake. I patrolled the mountain on the 11th January, with Interpreter Winter, and an Indian guide, "Paul Jones." I could not find any Indians. On account of a blizzard coming on I stopped over night on the American side of the lake at Kirk's summer hotel, at the point the scare started; the settlers hearing that it was only a scare returned from Bottineau, Dakota.

HALF-BREEDS.

There are only two or three families in the district. They reside at Morden.

CRIME/

List of Cases.

Cutting and selling wood without permit.....	5
Cutting hay without permit.....	5
Smuggling.....	12
Larceny and horse-stealing.....	4
Selling liquor to Indians.....	1
Shooting at and wounding a squaw.....	1
Setting fire to a barn.....	1
Removing settlers' effects to United States.....	1
Crossing boundary line without reporting.....	1
Forgery.....	1
Drunk and disorderly.....	1
Ill-treating a child 7 years old.....	1
Importing a threshing machine made by convict labour.....	1

PATROLS.

A very effective patrol service was kept up during the Indian fighting at Pine Ridges, Southern Dakota, last winter, in order to prevent any hostiles from crossing to Canada.

With the exception of Morden and Emerson, there are two men at each station, one of whom is at all times at the station; the other patrols east or west at uncertain dates. There is a local patrol every day east and west. Night patrols are frequently sent out for the purpose of looking after smuggling.

Patrol distances: Ridgeville to Roseau River East, 19 miles; Ridgeville to Emerson, 12 miles; Emerson to Gretna, 18 miles; Gretna to Reinland, 10 miles; Reinland to Morden, 24 miles; Reinland to Pembina Mountain, 18 miles; Morden to Mountain, 14 miles; Mountain to Windygate, 10 miles; Windygate to Snowflake, 15 miles; Snowflake to Crystal City, 17 miles; Crystal City to Cartwright, 25 miles; Cartwright to Wakopa, 23 miles; Wakopa to Killarney, 14 miles; Deloraine to Sourisford, 30 miles; Deloraine to Wakopa, 40 miles.

PRAIRIE FIRES.

At Crystal City there was very little or no damage done by a fire that came from Dakota. At Cartwright there was some hay burnt. At Wakopa there was one on the 29th October. It burnt several stacks, but was smothered by a snowstorm. Owing to the fact that the fires have come from Dakota, there has been no criminal prosecutions.

CONDUCT AND DISCIPLINE.

With the exception of two constables, the conduct of the detachment was good.

DESERTIONS.

Nil.

HEALTH.

The health of the men has been good.

BILLETS.

I moved the Windygate detachment from C. Huston's to J. Malhoney's on account of complaints made by the men regarding the meals; also the Wakopa detachment from B. Green's to O. J. Routledge's.

DISCHARGES.

Corporals Baby and Burkett took their discharge at the expiration of their term of service.

HORSES.

Horses Reg. No. 852, 1012, 1423, 1150 were cast during the year. Two remounts were purchased from N. P. Osgood, of Killarney.

SADDLERY.

The harness and saddlery are in fair condition.

TRANSPORT.

A light bob-sleigh is required for the Emerson team.

PHYSIQUE.

The average height of men in Manitoba is 5 feet 11 $\frac{1}{2}$ inches. One-third of the men are 6 feet and over. Average weight, 170 lbs.; heaviest man, 210 lbs.; average chest measurement, 38 $\frac{3}{4}$ inches.

ROADS AND BRIDGES.

Bridges that have been out of repair for the last few years and not used had to be repaired on account of the wet season. Roads are in good condition.

RANCHES.

There are no ranches in the district, that is to say, none of the settlers ranche exclusively, mixed farming being the idea.

SETTLERS.

Generally speaking, the settlers are in good circumstances.

GAME.

Elk are numerous in the Pembina Mountain; quite a few have been killed this fall. Prairie chickens are numerous.

CROPS.

A crop and weather bulletin is forwarded from each detachment monthly, giving a detailed account of the crops, weather, etc.

At Ridgeville the crops are fair.

Emerson District.—Considerable damage was done by frost. The average yield is as follows: Wheat, 24 bushels; oats, 30 bushels; barley, 40 bushels to the acre. Sourisford.—The crops exceed the expectations of the farmer. Wheat, 52 to 60; oats, 55 to 57 bushels to the acre.

Wakopa.—The crops were saved in a very good condition. Wheat averaged 30; oats, 45 to 50 bushels to the acre.

Deloraine.—Crops above the average.

Snowflake.—Heavy crops. Oats and barley very good. Most wheat damaged by frost. Wheat, 25 to 30; oats, 50 to 60; barley, 35 to 40.

Windygate.—The crops were touched with the early frost. The yield is not half what was anticipated.

Crystal City.—There has been scarcely any threshing done in the district as yet. Wheat is touched by frost. A few farmers were hailed out.

Cartwright.—The harvest has been unusually good; the wheat average is 25 bushels to the acre; oats, 40 bushels. Had the crops escaped the early frosts, the yield would have been 25 per cent better.

Morden, Reinland and Gretna.—The crops in the district, taken as a whole, were this year above the average, the yield, as a rule, being from 30 to 40 bushels to the acre of wheat, 75 bushels of oats, and about 50 to 60 of barley, the sample being very good. The threshing will not be finished this fall in the south-western district of Manitoba.

CATTLE.

Messrs. Ironsides and Gordon, of Manitoba and Pilot Mound, have shipped to the old country, during the present year, something like 2,000 head of fat cattle, which has brought into the country over \$90,000.

INSPECTION OF DETACHMENTS.

The Assistant Commissioner inspected the detachments during the month of May. I have visited the detachments frequently, on an average of once a month.

Approximate number of horses and cattle in the district: Horses, 6,643; cattle, 27,281.

I have the honour to be, Sir,
Your obedient servant,

J. A. MCGIBBON,
Inspector, Commanding Manitoba Frontier.

J. A. MCGIBBON.

NORTH-WEST MOUNTED POLICE,
SALTCOATS, 30th November, 1891.

SIR,—In accordance with your instructions, I have the honour to submit the following report for this district under my command for the year ending 30th November, 1891.

I arrived from Regina on 29th August and took over the detachment from Staff-Sergt. Richards on 1st September, Richards having been ordered into Regina.

I am unable to enter very fully on the police work done in this district, owing to the fact of the data, left in this office by Staff-Sergt. Richards, being incomplete. All special reports have been sent to headquarters by the non-commissioned officer in charge, and no copies kept.

GENERAL STATE OF DISTRICT.

The general state of this district has been orderly and fairly prosperous. Farmers were jubilant over the promising outlook of a large yield till an early frost, which visited this district about the first of September, materially blighted their prospects, the wheat being more or less frozen throughout.

The town itself is rapidly increasing, several dwelling houses having been built, besides a large Episcopal church.

I am told that it is the intention of the Manitoba and North-Western Railway Company to make this a divisional point, which will add much to the importance of the place.

Yorkton is also increasing slowly, but, from its location, I do not think that it will ever grow to be a place of much consequence.

CRIME.

The docket of crime for the past year is large, but with few cases of a serious nature, as will be seen by the attached return of cases tried, the most serious being as follows:—

On 23rd May Charles Tanner, a half-breed, was committed to Brandon, Man., gaol, on the charge of stealing a horse at Birtle, Man.

On the same date Charles C. Cree, also a half-breed, was sentenced to five years in the penitentiary by Judge Wetmore for having had carnal knowledge of a girl under fourteen years of age. On 8th October one Mrs. Cook and her daughter, Almira Cook, were tried by jury before Judge Wetmore on a charge of attempted abortion, and acquitted. At the same sittings of the Supreme Court Wilhelm Gauske was acquitted of a charge of maiming cattle; and on 15th November Michel-pay-poom-a-cappo, an Indian, was tried by jury before Judge Wetmore for having had carnal knowledge of a girl under fourteen years. The age of the girl was not proven, so he was acquitted. There have been eleven convictions under the Prairie Fire Ordinance, a few cases of assault, non-payment of wages, and several minor convictions under the Larceny Act.

ASSISTANCE TO INDIAN DEPARTMENT.

On 1st September an escort was supplied, and conveyed the annuity money to Fort Pelly.

On 3rd October, acting under instructions from headquarters, I personally conveyed another consignment of annuity money to Cote's reserve.

At the request of Mr. Indian Agent Jones, Constable Bates, of Kamsack detachment, was sent by me for duty during the Indian payments.

Weekly visits are paid to the Indian reserves in the Fort Pelly district by the Kamsack outpost.

PATROLS AND OUTPOSTS.

The following outposts comprise this district:—

Yorkton, 20 miles north-west.—One non-commissioned officer and two men, with two horses. This detachment patrols east to Rokeby, west to Danish colony, north to Wallace (weekly), and south to Leech Lake, besides making general patrols and visiting all the settlers in their district.

Sheho Lake, 65 miles north-west.—In consequence of a large influx of settlers from Dakota having settled in this vicinity, an outpost has been established here; but, owing to the large demand for men during the prairie fire season, only one man with horse has been stationed here since October last. Now that all danger from prairie fires is past it will be increased to two men and two horses.

This outpost has patrolled north to Fishing Lakes, east to Devil's Lake, south-east to Danish settlement, and visited all settlers in the immediate vicinity.

Kamsack, 42 miles north-east.—An outpost of one man and one horse is stationed here. A weekly patrol has been made north to Fort Pelly and through Indian reserves *en route*; south-west to Wallace, meeting Yorkton patrol; west to White Sand River and east to Manitoba boundary.

Sumner, 30 miles south.—A prairie fire station, consisting of one man, has been posted here since 1st October. Patrolled north to Kimbrae to meet Saltcoats patrol (weekly), south through Esterhaz to Qu'Appelle River, west through Swede colony and the district generally.

Saltcoats.—One officer, one non-commissioned officer and four men, with six horses, are stationed here.

Patrols have been sent north to Wallace, south to Kimbrae, east to Langenburg and the Russian and Icelandic colonies, west to Rokeby, Armstrong, Leech and Crescent lakes. As will be seen by the accompanying maps, this district has been thoroughly patrolled. The number of convictions under the Prairie Fire Ordinance, taking into consideration the small number of men in this district and the vast extent of country which has been patrolled, will show that some good work has been done by the men under my command.

INSPECTIONS.

The district was inspected by Superintendent Moffatt in May last, and monthly by Inspector Constantine until September, when I took over the command.

Since then I have inspected the outposts monthly, and at Saltcoats I have held a weekly inspection of barracks, arms, stables, &c.

HORSES.

The horses of this district are in good and serviceable condition. Horse Reg. No. 1146 was cast and sold on 14th October by order of the Commissioner.

When only one horse is kept on a detachment he necessarily has a large amount of work to do. I would recommend that two extra horses be kept at Saltcoats, so that a change could be made during the summer, as a month's rest will often save a horse from breaking down. This rest, of course, cannot be given where only one horse is stationed.

HARNESS AND SADDLERY.

The harness, with the exception of one set of single (which is old and much worn) is in good order. The saddlery is in good condition, although one will require to be re-lined.

TRANSPORT.

The transport will require considerable repairing during the winter. The boxings of the wheels of the double buckboard will have to be replaced by new ones, while the patrol waggon is worn out. All the transport requires painting.

SETTLERS.

Settlers have not been successful in raising wheat, the greater part of it being frosted, but with oats and roots they have done fairly well.

The older settlers are gradually going in for stock, which, from the class of stock raised in the country and shown at the fairs this fall, proves conclusively this to be a stock-raising district on a limited scale, second to none in the Territories.

Immigration into this district during the past year has been chiefly Germans, Icelanders, Russians and Dakota farmers, there being in all about 162 families. I attach to my report a statement of settlers who have located in this district during the past year, giving value of property, nationality, religion, previous occupation, and their progress since coming into the country, as far as I could gather.

As nearly all these settlers have received loans from the Commercial Colonization Company to start with, it is hardly yet time to judge of their success. Only one case of destitution amongst these settlers has been brought to my notice. I have fully reported on this matter to you.

I consider that the settlers who have come in from Dakota will be a great acquisition to the country; having had previous experience in Dakota, a country so

much like this, they will not be so apt to make the mistakes so often made by new settlers.

Although the immigration into this district has been large, a much greater number of settlers is expected to come in next year. Many locations have been taken up by persons who have visited the country this summer and returned to their homes to make arrangements for moving in in the spring. The extension of the Manitoba and North-Western Railway, now projected, will open up a fine country and greatly increase immigration, making more police in this sub-district necessary, especially during the construction of the road.

QUARTERS AND BARRACKS.

A small house has been built by Buchanan & Co., and leased for officers' quarters at this place. The men's quarters, which are also rented, have been repaired and made comfortable for the winter.

At Yorkton, a house 16 x 24, divided into two rooms, lathed and plastered, with stable for four horses, was built by Mr. Ruttle, of that place, for the detachment stationed there.

At Shebo Lake and Kamsack the men are boarded with private families.

With reference to the Saltcoats detachment, I find the men's quarters much too small, there being no place to keep prisoners, unless in the barrack-room where the men are sleeping.

STABLES.

The stables at Saltcoats have been enlarged, sheeted and ceiled, an oat bin and three extra stalls being built by the owner.

In all stables where police horses are kept I have had part of the floor in each stall taken up and filled in with earth.

PRAIRIE FIRES.

During the month of April fires were seen almost daily in some part of this district, and kept the men at work almost night and day fighting fire; in fact, no other duty could be done. In this month seven convictions were got against parties for having started fires. In May there were only three fires seen, owing to the grass beginning to sprout. The guilty parties were brought to justice in each case.

In September a large fire started about three miles from the town. The police turned out promptly but were unable to discover its origin, although they succeeded in saving several stacks of hay and grain, besides other property, and in getting it out with the assistance of the citizens whom I also ordered out.

On 22nd October a fire was started at Sumner, thirty miles south of here, which swept the country both east and west for over fifty miles, doing considerable damage to settlers. A list of settlers and their losses has been forwarded to you. The culprit in this case was summonsed and fined.

The police, together with the citizens and settlers, fought this fire almost continuously for four days and nights, but owing to the strong wind blowing at the time, and the length and dryness of the grass, were unable to do more than protect the settlers' places in the vicinity. A fall of snow on the night of the 29th effectually put out this great fire, which had been burning fiercely for eight days.

The small fines imposed by the magistrates in this district, under the Prairie Fire Ordinance, only tend to increase carelessness and to discourage the police, who have had so often to make long rides at all hours of the night in order to bring the guilty parties to justice, to find, on so doing, the party dismissed with a nominal fine.

LOCK-UP.

Owing to the distance to Regina gaol and the great expense incurred in sending prisoners committed for trial, or for short sentences, there, a lock-up, under the charge of the police, is very necessary at this place.

GAME.

In the immediate vicinity of Saltcoats there is no big game, although black and cinnamon bears have been killed near Yorkton.

Prairie chickens have been more numerous than for years before, with but few ducks and geese.

At Fort Pelly, north of here, moose, elk and jumping deer, beaver, otter, lynx and foxes are found. Moose, elk and deer are reported by the Indians to be more plentiful now than for years previous.

FISH.

Pickereel and jack-fish are plentiful in the Fort Pelly district.

I have the honour to be, Sir,
Your obedient servant,

JAS. O. WILSON,
Inspector, Commanding at Saltcoats.

The Officer Commanding "B" Division,
Regina.

MOOSOMIN, 30th November, 1891.

SIR,—I have the honour to forward my report for year ending 30th November, 1891.

It has been made out partly under the old boundary, and I have endeavoured to give all information asked for in circular on the subject. It has to be remembered that very few of the reports come through this office, and I do not see the diaries of the different detachments, except when going round them, and therefore my report is not as full as it otherwise would be.

I have the honour to be, Sir,
Your obedient servant.

C. CONSTANTINE,
Commanding Sub-District, Moosomin.

The Officer Commanding "B" Division,
Regina.

GENERAL STATE OF DISTRICT.

The district of Moosomin is large, extending from the Manitoba boundary on the east as far as Moose Jaw on the west, north as far as Pelly, south to the boundary line, along the boundary line to the east as far as Manitoba boundary, and west to Buffalo Head, eighty miles from Wood End.

Since the 29th of August the posts north of the Qu'Appelle have been taken off this district and placed under the charge of Inspector Wilson, at Saltcoats. The amount of crime committed has been small; the offenders have been brought to trial, and in most instances have been convicted and sentenced to terms in the penitentiary or other places of confinement. The extension of the Souris branch, Canadian Pacific Railway, as far as the coal-fields, will open up a large tract of country hitherto not settled, and besides those engaged in farming, there will be a large number of men employed in mining operations, and an influx of "hard characters" may be looked for in the mining region, it being about six miles from the Dakota line. It will therefore be necessary to maintain a strong outpost at this point. A lock-up, strong and secure, will be required, and should be built as soon as possible in the spring. The post at Wood End will require considerable repairs, if continued as a post. The buildings are made of logs. It is situated in the valley of Long Creek, which takes its rise in the Yellow Grass Marsh south of Regina and empties into the Souris near the coal-fields.

This post is distant from the United States boundary line about two miles, the Boundary Commission trail running on the top of the bank overlooking it. It would be better if moved from its present site and re-built on the high ground from where the different trails leading to the United States could be watched. There is a log stable here which would also have to be moved. The line of patrol from Wood End post to Buffalo Head, 80 miles, follows Long Creek after the first 18 miles, at distances varying from 3 to 20 miles from the United States boundary line. Water and grass are abundant, but wood has to be carried by the patrol parties for cooking and other purposes, none growing west of Wood End post, from which fact the post takes its name. Shelter for horses along this line is needed in the early part of the patrol season, as well as in the latter part. Horses suffer much for want of it. "A" tents, which hold two men comfortably, three can squeeze in, have been supplied for the use of patrols in this district. They are much easier handled than the old bell tent, especially in cold and stormy weather. Arrangements might be made whereby old papers, magazines and games could be supplied to these comparatively isolated posts, and be much appreciated by the men. It would add much to the comfort of the men along the line of railroad if, at the permanent posts, substantial and warm huts were built for their use. Many of the buildings now rented are old, cold and generally unsuited for the purpose, requiring a supply of fuel sufficient to heat houses double their size, if well built, and the men still uncomfortable. Qu'Appelle station is an exception to the general rule. The men are there quartered in the court house, late immigration building. The fact of such buildings being built would not necessitate the men having their meals in them. They could still board, and which, taken all in all, is the most economical in the end, as cooking for small outposts requires an extra man, as well as the supplying of proper cooking stoves, utensils, hauling water and extra fuel. Stables are required as well as quarters. Those rented are as unsuited for the horses as the quarters are for the men. No ventilation, drainage or proper floors are found in them. In posts of five men and upwards a saddle and harness room should be provided. Men cannot do their work of cleaning in their living rooms and have them in the state of order required by the rules and regulations.

Moosomin is growing steadily. The class of buildings going up are above the average. Fleming is also making a start this fall. A large quantity of wheat is marketed here. This place is three miles west of Manitoba boundary and the first station in the eastern portion of the territory. A good farming district, farmed by men who know their business, who, as a result, are in prosperous circumstances.

CRIME.

Considering the size of this district, the amount of crime of a serious nature has been small. There have been three cases of horse-stealing; in each case the offender has been arrested, tried and convicted. In one case, that of C. P. Hathaway, extradition was necessary.

On the 20th of June two young lads were arrested for burglary, convicted and sentenced to three years' imprisonment. There were seven cases of infraction of the liquor law. Of these five were convicted, two resulting in an acquittal.

In many cases where horses and cattle have strayed from their owners they at once went for the police station, and without being able to give any grounds of suspicion or reason, except that the horses or cattle could not be found, at once concluded that they had been stolen and expected the police to turn out and hunt for them. In some cases this has been done, and the stock reported stolen has been found in bluffs within a short distance of the owner's place. There appears to be an idea among some of the settlers that the police are here for the purpose of finding their stock for them without any effort on their part.

PATROLS AND OUTPOSTS.

In this district there are thirteen outposts. Up to the time of Saltcoats being a separate district there were sixteen.

The Wood End detachment patrol west as far as Buffalo Head, there connecting with the patrol from Wood Mountain. This was done regularly every two weeks. In the early part of the season it was done weekly, but it was discontinued in September and patrols sent west at irregular intervals. The strength of this patrol was generally three men and four horses, who were furnished with a "let pass" book, for the convenience of settlers who were desirous of crossing the boundary, generally for the purpose of hunting stray cattle.

A weekly patrol from Wood End went east up to the end of October, connecting with the patrol from Winlow at Boscovis, there separating, the Winlow party taking in Carnduff, Antler, and, on alternative weeks, Glen Ewing, the Wood End party visiting the settlements in the Oxbow and Alameda districts, alternate weeks Glen Ewing, returning to Wood End by the coal-fields, each of these patrols being absent, as a rule, three days from their respective fixed stations. Besides these regular patrols, special ones were sent out at various times along the boundary line and through the settlements. The Wood End post was reduced by four men on the 4th November, and the post was finally vacated for the winter on the 7th November, one non-commissioned officer and four constables, with four horses, going into winter quarters at the coal-fields.

The districts of Winlow and Alameda are left as formerly, until such times as the stations along the newly-constructed line of railway are determined.

The patrols, on two occasions only, were prevented from doing the usual work, once by high water, there being no bridges in this part of the district; the second time by a very severe snowstorm.

One man is stationed at Cannington, it being a connecting link between Moosomin (telegraph station) and Alameda, the detachment at the latter place receiving important and urgent telegrams for Wood End, the principal outpost of the southern district. The different detachments along the line of railway each patrol and visit settlers in the vicinity of their respective posts. (A map showing patrols and police stations is attached.) This work is chiefly done in the saddle along the line of the Canadian Pacific Railway; in the southern districts by mounted men and teams, the latter carrying camping outfit, food and wood for the use of the party. The total mileage of the horses of Wood End detachment is 36,642 miles; of the Moosomin detachment, 32,182 miles; the Winlow and Alameda district, 2,500 for four months. The mileage of the other detachments has been sent into division headquarters.

ASSISTANCE TO INDIAN DEPARTMENT.

The money for payments of the Indian treaty for the Moose Mountains, Birtle, Crooked Lakes and Pelly agencies has been taken out and handed over to the different agents who have also been furnished with an escort.

On the 23rd June, 1891, a Sioux Indian and family, said to be from Moose Jaw, was escorted to the boundary line by United States soldiers, and not being able to speak English he and family were taken in charge by the west patrol and handed over to the patrol from Willow Bunch and sent on to Wood Mountain, where there was an interpreter. In July and August a party of Sioux Indians from Oak Lake went to the vicinity of White Bear's reserve and gave some uneasiness to the settlers in that section of the country. Indian Agent McDonald and Corp. Light, from Moosomin detachment, went down to investigate their reasons for being there. Shortly after this they returned to Oak Lake. Assistance has been rendered to the authorities of Qu'Appelle industrial school in recapturing runaway boys from that institution.

ASSISTANCE TO RAILWAYS.

No particular assistance has been rendered to the Canadian Pacific Railway. A party consisting of one non-commissioned officer and two constables was permanently with construction gang during the grading of the Souris extension. This party now consists of two constables at Alameda, who will remain there during the building of the bridge at that point, and the ironing of the road west of there to its

terminus at the coal-fields. A man named John Hodge died on No. 2 passenger train at Wolseley on 13th day of June. His body was taken off the train at Moosomin, coffined and sent east next morning. His wife and daughter were on the same train. Their home was in New Market, Ontario.

DRILL AND TARGET PRACTICE.

The men of the Moosomin detachment had setting up and arm drill at intervals during the summer, the other detachments being small and employed on train and patrol duty were not drilled as much as desired, but the men coming fresh from Regina were well set up and drilled.

There has been no regular target practice. Ammunition has been purchased by the men who have used it in some detachments for practice.

PHYSIQUE.

The physique of the men composing the several detachments is good. A few men are rather light for town duty but will fill out.

RECRUITS.

A few recruits have been sent in to head-quarters of this sub-district.

HEALTH.

The health of the men of the detachments has been good.

RATIONS AND LIGHT.

With the exceptions of the men at Wood End Post all detachments have been boarded. The rations for that post have been supplied by Moose Mountain Trading Co., and without exception were very good and promptly delivered.

KIT AND CLOTHING.

The quality of articles furnished is fair. The underclothing is very good. The cloak and cape now issued will not compare with that issued a few years ago.

The breeches are very heavy for summer, if one of the three pairs issued were of serge it would add much to the comfort and neat appearance of the men during the summer months. The winter coats are varied in quality and material. The dye comes out of the wool when wet and makes the mens faces black. The rolling collars on these coats are very little protection to the men's faces, neck and chest with a front or side wind. Square collars buttoning well up to the throat would be much better and would go far to prevent trouble with throat and chest. Rolling collars are fashionable but not servicable for this force.

ARMS AND AMMUNITION.

The carbines are of the Winchester pattern. Many of the barrels need re-browning, and the majority are more or less "honey combed." The sights are not good as a rule. The revolvers are a strong shooting weapon, and are all in good order in this district.

SAVINGS BANK.

The men of this district complain of the length of time it takes to draw money out of the saving^s bank. Many have withdrawn their money and deposited in savings department of a chartered bank.

INSPECTION OF DISTRICT.

The different detachments have been inspected usually monthly during the year. A report of each has been sent into division headquarters, or included in monthly reports.

HORSES.

The horses are good. A few in this district have been cast and sold, and some sent to Regina for treatment.

SADDLERY AND TRANSPORT.

The saddles in the district are mostly in good repair. A few require new lining. The lacing on saddles requires drawing tighter, the lining being worn out, is apt to give horses sore backs and withers. There is also a diversity of patterns in the stirrups. It would be a good thing to have all saddles on the line of railway sent to the saddler during the winter, and put in thorough repair for the summer work. The new numnahs issued have worn well, but are not intended or fit for long trips. A saddle blanket is used instead. The harness is in a good state of repair.

TRANSPORT.

The transport is good and in a serviceable state. Several buckboards made at Moosomin by McCurdy & Tucker have been issued to the various detachments and have stood the rough work of the prairies well. The double ones will easily carry about 900 lbs. Sheds for transport would be a great saving on paint, and transport would last longer.

FORAGE.

Forage at Moosomin is supplied by contract; at Wood End oats are, the hay used by this detachment being cut, hauled and stacked by the men. These two places are the only ones where large quantities are used. At other posts, except Qu'Appelle and Fort Qu'Appelle, the horses are boarded at so much per day. Bran used at Wood End was supplied from Moosomin. The forage supplied has been good and prices reasonable and less than last year.

STABLES.

With the exception of detachments at Moosomin, Qu'Appelle, Fort Qu'Appelle and Broadview, the horses are boarded either at livery stables or by private parties, and the accommodation is not of the best, plank floors being hard on the horses' feet, both in summer and winter; ventilation and drainage being bad, and in some cases stables cold and draughty.

BARRACKS AND FURNITURE.

The buildings used for the housing of the several detachments, with the exception of Qu'Appelle, are rented and are not fit for the purpose. They are cut up into small rooms, which mean either the men being cold, or an increase of fuel and light. The beds are on three boards and two trestles, which are not only unsatisfactory but difficult to keep clean, in fact in old quarters the only way to clean them is to burn them. Iron cots are needed.

WATER SUPPLY.

The water supply at Moosomin is bad. Water is hauled from a distance and put in an old well for the watering of horses. At other posts the supply is good.

ROADS AND BRIDGES.

The trails in this district are good. Considerable fencing has been done, which lengthens the distance between points. In a short time the road allowance will have to be used entirely. A few bridges are yet required for high water in spring, particularly in the Alameda district. At other seasons the creeks are easily forded.

LIQUOR LAWS.

Along the line of the Canadian Pacific Railway liquor is to be had at nearly all hotels. This is accounted for by the fact that permits are easily obtained, if not by hotel-keepers themselves, by their friends and persons boarding in the house, which are handed over by them to the keepers of these places. What liquor is sold in some places is done very quietly and in a covert way; in others openly.

It is almost impossible to get evidence to convict, as it is not considered wrong for witnesses to perjure themselves in a liquor case, rather to be commended. Many of the local justices will not convict, even where the evidence is clear, or if they do, give the lowest penalty. Little liquor is run in as permits can be had in most cases for asking. No help is given the police in the suppression of this traffic, even from those whose profession and utterances would lead one to expect it.

The principal seizures in this section have been 1,106 gallons at Broadview and 40 at Moosomin, on the 25th January, 1891, and 260 gallons at same place on 23rd September, 1891. In the last case the liquor was brought in overland from Virden, Manitoba, and along with two teams and men bringing it in, captured near the Qu'Appelle valley. The parties were fined, outfit forfeited and liquor spilled. The teams and waggons were afterwards restored to them by order from Ottawa, on recommendation of Crown prosecutor and convicting justice. The importer of this liquor was arrested and fined. In all these cases the fines were paid. The estimated loss to the parties convicted was about \$1,000. Small lots have been seized and destroyed at other places along the line.

The amount of liquor imported into Moosomin, Wapella and Cannington, between the 1st December, 1890, and 25th November, 1891, was 871 gallons. Strong beer, 1,014 gallons, 4 per cent beer, 6,300 gallons, in all 8,385 gallons. Not a bad showing for a small portion of a prohibition country.

A stringent license law strictly enforced would be preferable to the present system.

SETTLERS.

A considerable number of settlers have come into this district.

CROPS.

All through this district the crops have been excellent and well saved. The chief drawback appears to be the want of a sufficient number of threshing machines to get the crops marketed early.

RANCHES.

This district is not a ranching country being more adapted for mixed farming, which is done more and more each year. One ranche has been started near the Yellow Grass marsh with 150 head of cattle and 17 horses. This man came from Montana.

CUSTOMS.

The fact being known amongst the settlers that police non-commissioned officers and constables have the authority and power of customs officers, has been the means of preventing smuggling along the boundary in this district. "Let pass" to settlers have been issued either at the standing posts or by the patrols, who are furnished with blanks for that purpose.

GAME.

Game is abundant and the game laws are carried out by the people many of whom are true sportsmen.

INDIANS.

The Indians in this district remain on their reserves and give no trouble. Those at Moose Mountain agency being chiefly engaged freighting, at Crooked Lake in farming.

HALF-BREEDS.

These people are nearly all living in the valley of Qu'Appelle and are engaged for the most part in farming.

PRAIRIE FIRES.

Constables have been stationed at various points throughout the district for the purpose of protection and looking after persons who may have started fires either by carelessness or accident, and the fact of its being known that men were told off specially for this duty has been the means of making settlers more careful and has prevented many fires which this season would have been especially destructive owing to the heavy growth and the quantity of grass throughout the country. The principal fires were one south of Fleming on the 20th October, which ran through the unsettled country south of the Pipestone Creek. On the 23rd October, at the Jew colony near Moose Mountain (this colony is now deserted.) These fires met about 6 miles from Cannington and swept the country as far as Moose Creek. It was by this fire that Mrs. Dallas and her two children came to their death. The third started near Wapella and did much damage near Red Jacket. The origin of this last fire has not yet been discovered. The fire season this year was short owing to the early snows. The Canadian Pacific Railway has taken great pains in burning the right of way this fall, which prevented many fires which otherwise would have happened. A great means of prevention would be to plough the road allowance in thinly settled districts. The expense to be borne by a special tax, non-residents to pay double as the uncultivated lands are the great danger in sparsely settled districts.

DISCIPLINE AND CONDUCT.

The conduct of the men of the different detachments with a few exceptions has been all that could be desired. Of these cases two only were serious. Drunkenness is about unknown in this district.

STRAY STOCK.

By ordinance No 18 of 85, ordinance No 9 of 83 was repealed. This ordinance gave the police the power to take charge of found or strayed stock. The new ordinance provides that animals found straying on cultivated lands in the pound district may be impounded. All that is necessary for a pound-keeper to do is to keep the animals a few days, advertise them by putting up three written notices in a conspicuous place in the district and then sell. The effect of this is that horses and cattle straying far from home are invariably lost to the owners as these notices are seen only by a few in the immediate neighbourhood of the pound-keeper's residence and the stock is sold for expenses, the surplus if any being sent to the Lieutenant Governor. By the ordinances at present in force in districts where there is no herd law it is illegal to take up any stray animals, these are also lost to the owners. In cases where the owner of an animal impounded is not known the pound-keeper ought by law to be obliged to advertise the stray in the nearest newspaper in the district where the stock is held, for a period of three weeks if a weekly paper, if a daily paper for one week. It would be well if an ordinance was passed to the effect that all pound-keepers furnish the police with a list and description of stock impounded and not claimed. Some of the provisions of ordinances No. 9 of 1885, might be re-enacted with good results to settlers.

I have the honour to be, Sir,
Your obedient servant,

C. CONSTANTINE,
Inspector Commanding Moosomin Sub-Division.

The Officer Commanding "B" Division,
North-West Mounted Police,
Regina.

APPENDIX F.

ANNUAL REPORT OF SUPERINTENDENT R. B. DEANE, COMMANDING
"K" DIVISION, 1891.

LETHBRIDGE, 1st December, 1891.

The Commissioner,
North-West Mounted Police,
Regina.

SIR,—I have the honour to tender my report of "K" division for the past year.

GENERAL STATE OF THE DISTRICT.

The district has been very quiet and fairly prosperous. Business is not so brisk in Lethbridge as it was last winter, but has been improving within the last few weeks owing to the increased output of coal, which, to the south particularly, is considerable.

A well known settler on the other side, when ordering a car-load of Lethbridge coal for his own consumption, told me that that coal is admitted by settlers in his section of country to be the best obtainable for domestic purposes. I understand, also, that the manager of an American competing mine has ordered a car-load of Lethbridge coal for his own consumption.

CRIME.

The following list comprises all complaints which have arisen within the district during the year:—

Offences against the person.....	16
Malicious injuries to property.....	4
Larceny.....	7
Horses lost, strayed or stolen.....	24
Illicit liquor traffic.....	4
Supplying liquor to Indians.....	1
Evading Customs duty.....	2
Perjury.....	1
Miscellaneous	61

The 16 offences against the person were cases of common assault, seven of which were dismissed by the courts and conviction recorded in the other nine.

The four complaints of malicious injury to property were all minor offences—one case being dismissed and conviction resulting in the other three. There has not been one case of cattle killing.

Five of the seven complaints of larceny were dismissed by the courts, the offenders in the remaining two cases being convicted.

Twenty-four horses within the district have been reported missing during the year. Of these 22 have been recovered, some by the police and some by their owners. Of the remainder one was stolen, the offender being convicted and sentenced to three months imprisonment at hard labour, and the 24th is still missing if it ever existed, which I doubt. I think it was a clumsy attempt to "make" a horse. The police at Milk River Ridge had found a stray horse whose owner we could not

discover, and a certain man here, hearing of this, put in a claim for the animal which he claimed to have lost. The description which he gave of his lost horse, however, did not agree with that of the horse which the police had found.

Of horses lost outside this district we have found and returned five; three to Cree Indians at Medicine Hat; one to Mr. Toole of the Sweet Grass Hills, and one to Mr. Reitz of Chinook.

Three Police horses recently strayed away from herd at St. Mary's; two of them were found some three weeks after by the "D" Division detachment at Kipp and one is still at large. It is probable that he has gone back to his old range near Macleod and will be found in course of time.

One of the two cases of evasion of Customs duty is as follows:—

Complaint was made on the 9th April by Mr. Edwin Allen, preventive officer at Coutts, that on the 6th inst., Frank Blois of the Porcupine Hills had sold to Edward Allen of Lethbridge, a team of horses and harness which had been imported and on which Customs duty had not been paid. Blois had left Lethbridge by road for the south before complaint was made. I telegraphed the outposts to look out for him but neither the man nor his waggon trail could be seen, so that it is certain he did not cross the Milk River within the confines of this district.

The second case occurred while I was visiting the outposts recently. Information had been given that a man named Eglington had stolen two horses at Collins, in Montana, and was supposed to be travelling towards Macleod with a waggon and four horse team. While driving with Inspector Chalmers between Writing on Stone and Pendant d'Oreille, we saw, at a rather out of the way coulee where we went to water our horses, fresh wheel tracks crossing the river and followed them. Ere long we came up with Eglington and his outfit, and the following day had him arrested on a charge of bringing stolen property into Canada and sent him to Lethbridge. He was tried in the Supreme Court and sentenced to two years in the penitentiary. The two stolen horses were returned to their owner and the rest of the outfit was handed over to the Customs Department.

The one complaint of supplying intoxicants to Indians was not substantiated and was dismissed by the court.

Five cases of breach of the liquor law have been reported and brought to trial; dismissal resulting in one case and conviction in the other four. As there is every prospect of the abolition of the prohibition law at an early date and as there is nothing to be said which has not been already said over and over again further comment is unnecessary.

The conviction for perjury was had in the case of a constable who was sentenced to two months imprisonment at hard labour and was dismissed from the Force at the expiration of that time.

The 61 miscellaneous cases call for no remark, being minor offences, chiefly drunk and disorderly conduct, &c., and resulted in 56 convictions, 2 dismissals and 3 non-payment of wages cases settled out of court.

INDIANS.

Indians have given very little trouble during the year, but it is in every way desirable to prevent them from roaming the country at large.

A horse stealing party recently left here for the south, they picked up at least one horse in this neighbourhood and rode him to the scene of operations; this horse is now at a cow camp across the line, whence we shall recover it in a day or two.

This party consisted of four Indians, who started from here, viz., Prairie Chicken, Bird-Singing-in-the-Morning, Tall Man and Low Man, and were joined by two more Indians from the reserve, viz., Deadman and another. They went to the Sweet Grass Hills, and on the 18th October, stole four horses from Mr. Toole's ranche, cutting through a four strand barbed wire fence to get at them.

As soon as I heard this, I advised Mr. Toole to cause enquiry to be made at the South Piegan Agency, as it was probable the horses would be taken there and cached

in the first instance, and be brought over to this side of the line as time and opportunity might allow.

The agent on that reservation had recently found three of the animals, and apprehended four Blood Indians, who admit having taken them.

I hear that some of the thieves turned States' evidence, and that the others are likely to see the inside of a penitentiary. The fourth horse, stolen from Mr. Toole's ranche, the property of a man in his employ, is now here with a very sore back, recovered from the Blood Reserve, though I have not been able to discover the name of the Indian who took it thither.

I have now instructed the outposts to allow no Indians to remain in the vicinity of the Milk River.

The Bloods have lately been trading horses with the Gros Ventres on the other side, and the practice should be stopped, as it is an easy way of disposing of stolen property.

To this end I have recently impounded three horses so obtained in trade from the Gros Ventres and brought into this country, and given the Indian importers the trouble of interviewing the Collector of Customs here, who has allowed them to take their horses, but has explained that Indians, like white men, are liable to be called upon to pay duty for any horses so imported in future.

The Gros Ventre Agent has recently written to say that some horses belonging to one of his men disappeared about the time that Running Fisher, a Blood, was over there.

INDIAN SCOUTS.

I have employed one or two Indian scouts when necessary. The two that I have now are as good as any I have had, besides being more constant. They realize that \$25 a month is not to be picked up everywhere and every day, and are always willing to work.

OUTPOSTS AND PATROLS.

The number of non-commissioned officers and men on outpost duty during the summer, was as follows:—

	N.-C. O.	Constables.	Horses.
Milk River Ridge.....	1	5	7
Coutts.....	1	5	7
Writing-on-Stone	1	6	11
Pendant d'Oreille.....	1	5	9
St. Mary's.....	1	4	7
Little Bow.....	1	4	5

In addition to the above, a haying party of two men and 8 horses left here about the middle of July to assist in putting up hay at the several stations along the Milk River, and an occasional flying patrol has gone out from head quarters into the less frequented parts of the country.

The efficiency of the outpost and patrol system is well recognized by our southern neighbours who are agitating for the establishment of a force similar to the Mounted Police on their own frontier.

A correspondent of the "New York Herald" was here in the summer and was much interested in our system.

Large bands of horses are periodically driven off in the States, and the owners seem to think that they come into Canada in large measure, the fact being that the thieves have a regular organization and system: Stolen horses are passed along at a rapid rate from gang to gang, and the favourite hiding place is in the bad lands of northern Dakota, which are entirely untravelled. These horses can be kept and are kept for years if necessary, and are then dribbled off into the eastern states. Nothing short of a Mounted Police force will cope with this evil.

The men and horses at the outposts are comfortably housed, the only requirement now being a small lean-to at Pendant d'Oreille, similar to that which was last

year constructed at Writing-on-Stone, furnishing two small rooms for the non-commissioned officer in charge of the detachment and for a visiting officer. Now that an officer is ordered to remain on the frontier all the winter it is absolutely necessary that some suitable provision should be made for him at Pendant d'Oreille.

In summer he lives under canvas, but in winter, when he may be detained for any length of time by stress of weather, he has no place that he can use by day or by night except the kitchen which is obviously inconvenient.

It is many months since logs were cut for this purpose, but I have received no authority to make the necessary expenditure.

Assistance to the Department of Customs.

We have co-operated with the Customs Department in every possible way. I think it would be a good plan to make the non-commissioned officers in charge of detachments along the Milk River preventive officers.

ASSISTANCE TO THE DEPARTMENT OF AGRICULTURE.

We have devoted considerable time and attention to keeping the quarantine ground north of the Milk River clear of cattle from the United States, and with satisfactory results. I mentioned in my report last year that sundry settlers on this side had complained of certain hay having been destroyed by American cattle, and that I had written to the secretary of the Stock Association on the subject. In consequence thereof a representative of cattle owners on the other side came over in the spring and made a very fair, not to say liberal settlement.

PRAIRIE FIRES.

Prairie fires have during the autumn been very prevalent and fierce, owing to the luxuriant growth of grass induced by abundant rain. Most of them have been started by the railroad, fanned in several cases by a high wind. On the 23rd October the manager of the Circle Ranch asked me to assist in putting out a large fire which under the influence of a very strong wind was threatening his ranch. I sent a party of men under Corporal Edwards to the headquarters of the ranch at the Little Bow, distant about 20 miles, and there he was told that the nearest point of the fire was about 12 miles off. He accordingly went on, but by the time he reached the fire found that he had travelled nearer 25 miles than 12. His party extinguished 7 or 8 miles of fire and then met the men of the Oxley Ranch who had been working from the other end, and who indeed were responsible for the fire, for it appeared that they had set to work to burn a fire-break and the fire got away from them. Corporal Edwards and his party started from here at about 2 p.m., on the 23rd October, and did not return until about noon of the 25th.

On the 27th October, about 3 p.m., a prairie fire was reported to have been started about 2 or 3 miles from town. Sergt. Major Garnham went out with 19 men and two teams at the gallop. A very strong westerly wind had suddenly sprung up. Some section men had been burning the grass between the track and a two-furrowed fire-break on the east side: a defective place in the break, about 5 feet long, where the sods had not been turned, allowed the fire to get through and it very soon became unmanageable. Our men arrived in time to save the house, buildings and farm yard of a man named Cotterill about 4 miles out, but could do nothing more as the fire travelled as fast as a horse could canter. The cribbing of Cotterill's well, near his house was burnt, and he and others lost a good deal of fencing.

This same fire completely burnt out a settler living about 10 miles further eastward, and he himself was considerably burnt in trying to save some of his possessions.

DISCIPLINE, CONDUCT, ETC.

The discipline of the division is good. I am sorry to have lost Sergeant-Major Jarvis, who was transferred from here where his knowledge of the Blackfoot language rendered him particularly useful. Sergeant Macdonell, who has just been

made Acting Sergeant-Major, has the advantage over an outsider of having been in the division for a long while and of knowing the men in it.

Quartermaster-Sergeant Belcher has conducted his department in a highly satisfactory manner.

DRILL, TARGET PRACTICE, ETC.

Weekly drills have taken place throughout the summer, but there has been no target practice for want of a range. I would suggest that the Government reserve some land within a convenient distance, so that we can construct a butt and have a certain amount of practice.

PHYSIQUE AND HEALTH.

The health of the division has been excellent. Special Constable Phillips, who was sent here for hospital treatment from Macleod, on the 28th January last, has been able to resume and is doing very useful light work as carpenter. He of course has swelled the sick list here, so has special constable Hainault, a teamster from Macleod, who recently had the misfortune to break his leg here; so has Constable Brown of "D" Division, who was sent in here for treatment, having sustained injury by his horse falling with and on him while on patrol to Milk River Ridge; so has Constable Pickard who, on transfer here from Maple Creek, was taken into hospital and isolated as suffering from a contagious disease.

RECRUITS.

The following constable engaged here on the 5th February, and was transferred to the depot division at Regina:—No. 2610, William Turnbull.

RATIONS.

The rations are of good quality and there have been no complaints.

KITS, CLOTHING, ETC.

There have been no complaints as to the quality of the clothing issue except as to long boots, the stitching in some of which is decidedly inferior at the welt.

HORSES.

We have lost three horses by death during the year. Reg. No. 1, an old horse, while out for exercise reared up, fell back and died instantly. Reg. No. 1313 died here on the 4th March. He had been on outpost duty for some time and looked well, but was reported useless and incapable of standing a trip. He was sent in here for observation and died from inflammatory diarrhoea almost immediately after arrival. Reg. No. 702 was on the 10th September gored by a savage cow at Coutt's and had to be destroyed.

Fourteen cast horses were sold here by public auction and one was sent to Macleod for sale.

We have received eight remounts. There are a number of horses in the division which should be cast and sold.

Distance travelled by horses during the year, 199,000 miles.

SADDLERY AND HARNESS.

We have enough saddles for our use and they are in good order, except that we want a few stirrups to replace casualties.

We have received one set of wheel and two sets of lead harness, which was asked for last year, and next year we shall require one set of wheel harness and a single set for post use.

The order has been given for the supply of a plain set of double harness for the use of the officer on outpost duty, and this will probably be delivered in a few days.

STABLES.

The headquarter post requires a sick stable, but otherwise the division is well supplied with stable accommodation.

TRANSPORT.

I estimated last year that we should require at least one Schuttler waggon this year, but we have managed to get along without it so far. Some of our running gear, however, will not stand work much longer.

ARMS.

The Winchester carbines are in very poor condition, being old weapons.

GENERAL EQUIPMENT.

The general equipment is good.

DESERTIONS.

Five desertions have taken place during the year. No. 2427, Constable Joshua Waite, a bad character sent here from Maple Creek, whose removal from a frontier post I had previously recommended, deserted from here with a horse on the 25th May, at about midnight, and went into the States. A mounted man followed him within a few minutes, and after a ride of fifty miles found the horse at the Milk River, and it was in the stable at Milk River ridge post at 6.30 a.m. Waite, seeing that he was followed, turned the horse loose at the river, and hid himself till nightfall, when he walked the intervening twelve miles between the river and the boundary.

No. 2388, Constable James Ward deserted from Writing-on-Stone detachment, on the 7th June, for some reason known only to himself, and to his comrades astonishment.

On the 28th August, No. 1566, Constable S. Costello deserted from Coutts, he had just re-engaged on the 14th August for three years service, and was in receipt of extra pay as scout. He went across the line, and persuaded No. 2480, Constable H. Skehan to join him, which he did on the 29th August.

On the 13th September, No. 2029, Constable W. E. C. Gez Van Pittins, who had recently been sent here from Maple Creek, obtained a month's pass to go to Ottawa, and deserted into the States.

INSPECTIONS.

The post has been inspected once by yourself during the year, and the assistant commissioner has once inspected the outposts.

BARRACKS.

Two barrack-rooms have been sheathed this summer, and other small improvements have been made out of some \$250 remaining unexpended out of last year's appropriation. Just now the division kitchen is being similarly lined with wood. As I said last year, the entire barracks require to be sided—the present siding is in many places quite bare of paint.

TELEPHONE.

Telephonic communication has been introduced into Lethbridge, and the barracks are included in the circuit.

FIRE PROTECTION.

I am thankful to say again, that during the past year, we have not had even an alarm of fire, in that we have not even a single household extinguisher in the barracks. * I estimated last year for the requisite number of Babcocks, but none have been received. It is hardly necessary to say, that the water-cart has to be emptied every evening, to prevent its contents from freezing solid. So that in the

* NOTE.—12 Babcocks were supplied in January, 1892.

winter nights our sole fire protection consists in a few pailfuls of water in the different rooms.

ROADS AND BRIDGES.

The bridge over the Belly River here is still useless in unfavourable weather on account of the approaches thereto not having been graded. The hill on the other side of the valley is a very dangerous one to descend in slippery weather.

TREES, ETC.

I am hoping almost against hope with regard to the trees planted near the barracks. I think it is certain that none of the willows will be alive at this time next year, notwithstanding that they have made a brave fight of it for two years. It remains to be seen how the cottonwoods will turn out. The past season with its abundant rain has been very favourable for them but I fear the roots will not be able to make their way through the hard dry clay subsoil.

Some small elms, ashes and maples, sent from Ottawa eighteen months ago are doing fairly well, but the probabilities are when their holes are full of roots the trees will become pot bound.

We found this year that a strong minded carrot had bored into the clay, and if a carrot why not the root of a tree? I am unable to say, but next year should decide the question one way or the other.

CANTEEN.

The canteen here has proved to be a great success and a great boon to the division.

RANCHING.

A great number of calves have been branded this year, and, as I have elsewhere said, there has not been a single complaint of cattle killing in this district.

I have the honour to be, Sir,
Your obedient servant,

R. BURTON DEANE,
Superintendent Commanding "K" Division.

 APPENDIX G.

ANNUAL REPORT OF SUPERINTENDENT A. H. GRIESBACH, COMMANDING "G" DIVISION, 1891.

FORT SASKATCHEWAN, 30th November, 1891.

SIR,—I have the honour to submit my annual report for the year ending 30th November, 1891.

GENERAL STATE OF DISTRICT.

The prospects of the district have greatly improved during the past year.

The population has been increased, to a very large extent, by a most desirable class of settlers.

The crops have been a marked success, both as to quality and yield, the wheat being a particularly fine sample.

No damage has been done by frost or prairie fires.

The crimes list is small, and no very serious crimes have been committed.

There has been plenty of employment, at fair wages, for all willing to work.

Gold mining on the river was carried on while possible, but, as was the case last year, operations in this direction were considerably impeded by high water.

During the season some fifteen to twenty men mined from about 10 miles above Edmonton to about 15 miles below Fort Saskatchewan, the amount of gold taken out being from \$5,000 to \$6,000.

The election for the Dominion house took place in March, and for the Legislative Assembly in November, both were conducted in an orderly manner and no disturbances occurred.

His Honour the Lieutenant-Governor visited the district on two occasions during the year. I supplied him with team and mounted orderly on both occasions.

The Calgary and Edmonton Railway was completed during the summer to a point near the River Bank, opposite Edmonton, where the terminus is for the present, and large numbers of people have visited the district by this means.

Direct telegraph communication between Edmonton and Calgary will be very shortly established, which will be a great convenience.

The future outlook of the district I consider brighter than it has ever been before.

CRIMES.

The list of crimes is slightly heavier than last year, the most serious of which are as follows:—

Four charges of larceny, convictions following in three cases and sentences of from one month to one year's imprisonment with hard labour awarded.

Eight charges under the Prohibition of Intoxicants Act, convictions following in six cases, and fines from \$50 to \$200 inflicted. A man named Carson was fined \$200 for an offence under this ordinance, was unable to pay and served a term of six months hard labour in default.

A man named Graham, living near Edmonton, was sentenced by Judge Rouleau to four months hard labour for maliciously wounding a horse, the property of one of his neighbours, by shooting with a shot gun.

The remaining crimes are made up of minor offences, shown in the return herewith enclosed.

The total number of crimes committed during the year in the district is 47, which, considering its size, the increase of population, and the number of men employed on railway construction during the summer, is very light. Number of crimes in 1889, 50; in 1890, 36; in 1891, 47.

OUTPOSTS AND PATROLS.

Edmonton.

One officer, 1 non-commissioned officer and 6 to 10 constables, as occasions require, besides an interpreter and 1 special constable, are stationed at this post.

This detachment supplies a town patrol for Edmonton, and also patrols the adjacent country.

RAILWAY TERMINUS.

One non-commissioned officer is stationed for permanent duty at the railway terminus of the Calgary and Edmonton Railway on the south side of the river opposite Edmonton, meeting all trains.

ST. ALBERT.

One non-commissioned officer and 1 constable are stationed at this post. Their duties are to keep order in the settlement, which is several miles in length, also to patrol to the Rivière qui Barre and Stony Plain Indian Reserve and the surrounding country. It is found necessary on occasions to strengthen this detachment.

LAC STE. ANNE.

One constable has been stationed at this post, patrolling the settlement, which is scattered round the lake, also patrolling to Alexis Reserve and the Stoney Indian Reserve at White Lake.

BEARS HILLS.

One non-commissioned officer and 1 constable were stationed here during the time railway construction was passing through the Indian reserve, to prevent navvies annoying the Indians. No trouble was given.

RED DEER.

One non-commissioned officer and 5 constables are stationed at this post. They patrol the district regularly. A small town having sprung up at the railroad crossing of the Red Deer River, a constable meets all passing trains and visits the town daily, which is about 3 miles from the police post.

LITTLE RED DEER.

One constable is stationed at this post. His duties are to visit the settlers at Little Red Deer, including the Icelandic Settlement, Poplar Grove and neighbourhood.

PATROLS.

By the map it will be seen that the district has been well patrolled.

From headquarters during the summer there was a regular Patrol to Victoria and Saddle Lake.

Flying patrols visited Lac La Biche, White Fish Lake, Egg Lake, Beaver Lake, Beaver Hills, Bears Hills and Peace Hills. From Edmonton the Battle River settlement was patrolled, also Sandy Lake, Rabbit Hill, and the Calgary Trail. Settlers on both sides of the river were visited.

From St. Albert patrols visited Egg Lake, Rivière qui Barre, Stony Plain, and round the Big Lake regularly, calling upon settlers.

From Red Deer there were patrols to Swan Lake, Medicine River, Tail Creek, Buffalo Lake, Quill Lakes, on the Calgary Trail as far as Battle River, and other places in that portion of the district.

The reports from those in charge of patrol parties show no complaints of any note; crops in all parts of the district were all that could be desired, and the settlers generally in a prosperous condition.

Game and prairie fire laws were well observed, and there is a consequent increase of the former and absence of the latter to record.

During railway construction I had men with the grading, iron and surfacing gangs till the completion of the road.

A constant patrol from camp to camp of the construction was kept up. The workmen were a very quiet lot and gave little trouble.

Very few arrests were made, one being for larceny, for which the man was convicted and sentenced to one month's imprisonment at hard labour.

One or two parties, not connected with the construction camps, were arrested on suspicion of selling intoxicants to the workmen, but the charges could not be sustained.

On the 1st July about 1,000 to 1,500 railway hands came into Edmonton to attend the races and sports, and although a large proportion of them got drunk, they were a very good tempered crowd and easily handled.

I supplied Inspector Piercy with a strong contingent for the purpose of keeping order on the occasion, but only one case of drunk and disorderly was brought up for hearing next day.

The police aided the foremen of the gangs in getting their men back to work, and before the night of the 2nd not one was left in town.

ASSISTANCE TO INDIAN DEPARTMENT.

The treaty payment money for the Battle River Indian agency was escorted from Red Deer and handed over to the agent at that place.

The agent was also furnished with an escort during payments.

The treaty payment money for the Stony Plain agency was escorted out to Stony Plain and handed over to the Indian agent at that place. He was also furnished with an escort at Rivière qui Barre and Lac Ste. Anne during payments.

The treaty payment money for the Saddle Lake agency was escorted from Edmonton to Wah-Sat-E-Now, where it was handed over to the Indian agent. An escort was furnished during payments at that place, Saddle Lake, Whitefish Lake, and Lac La Biche.

Payments were all conducted in an orderly manner, there being very little gambling or horse-racing indulged in.

It is noticeable that the Indians now buy principally blankets, clothing and food, and do not throw their money away on useless articles as formerly.

During the payments at Stony Plain a half-breed named Munroe took advantage of the occasion to sell liquor to an Indian. He was promptly arrested, tried and convicted, and is now undergoing imprisonment for the offence.

It was reported to me by wire in April last, by Indian Agent Ross, of Saddle Lake, that an Indian on the reserve had drugged and raped the daughter of Pakan, chief of the Whitefish Lake Indians. I at once despatched a party, under Sergeant Hetherington, to look into the matter and arrest the Indian. The Indian was arrested and brought before the agent, the matter being ultimately settled by a wedding of the parties chiefly concerned, the nuptials being followed by the usual rejoicings.

During the visit of His Honour the Lieutenant-Governor in September last, he desired me to send my veterinary-surgeon to Bears' Hills to examine the cattle of the Rev. Mr. Glass, which were running on the Indian reserve and reported to be affected with a contagious hoof disease. I immediately despatched Veterinary Staff-Sergeant Joyce, who made a thorough examination of the cattle, with the result that some of them were found to be suffering from sore feet, but there was nothing contagious about it, and those affected were already nearly well. The Indian department cattle were also examined at the same time and found to be in perfect health.

My patrols have visited all the reservations in the district during the year and reported regularly to the different agents.

DISCIPLINE AND CONDUCT.

The discipline and conduct of the division during the past year has been very good. Number of entries in defaulter's book, 84; total amount of fines inflicted, \$237.90. Two men were punished by imprisonment.

DRILL AND TARGET PRACTICE.

The division has been well drilled, both in squad and division drill.

All members of the division went through the usual spring course with very few exceptions, who, from sickness or other good reason, were unable to take part.

The division was also paraded weekly for inspection and division drill, and at the parade which was held under yourself when here in October, you were good enough to express your approval of both the appearance and movements of the men.

The annual course of target practice, mounted, dismounted and revolver, was gone through. The practice all round was very good, showing an average of 54.6 per cent dismounted.

PHYSIQUE.

The physique of the division, it will be seen is good, the average height being 5 feet 9½ inches, and chest measurement 37½ inches.

RECRUITS.

I engaged one recruit only during the year. Three special constables were engaged, and 13 non-commissioned officers and men re-engaged.

HEALTH.

The health of the division has been good, although latterly there have been some cases of quinsy, which I trust will not become epidemic. This is, no doubt, due to the changeable weather experienced during the past month.

As mentioned last year, a new hospital is badly needed, the building at present used, although the best that can be rented, is drafty and not at all suitable.

ARMS AND ARTILLERY.

I have no artillery in my charge.

The carbines of the division are now in fair order. Several have been sent to headquarters and have been returned fitted with new barrels and such other repairs as were required.

The pistols are in serviceable order.

HORSES.

The horses of the division are generally in good serviceable condition, with the exception of four which are pretty well used up, and which it will be necessary to cast at an early date.

During the year I received nine remounts from Calgary—four team and five saddle. I also purchased three saddle horses in the district.

The division lost one horse only by death during the past year, viz.: Horse No. 815, which died at Red Deer of "renal calculi."

The distance covered by the horses of my division during the year was 160,186 miles.

DESERTIONS.

No. 1998, Constable Harvey Stephenson, deserted from my division while on leave in England on 14th August.

This is the first I have had to record for several years.

SAVINGS BANK DEPOSITS.

There is a falling off of depositors this year owing to a number of the old hands, most of whom were regular depositors, having left the force. The recruits who have filled their places will, no doubt, open accounts as their rate of pay increases.

The number of depositors during the year is 95. Amount deposited, \$1,547.95.

INSPECTION OF DIVISION.

The division and its outposts were inspected by the Commissioner on the 5th, 6th, 7th, 8th and 9th of October last.

HARNESS AND SADDLERY.

The harness of the division is in good order, three new sets having been received during the year which will bring it up to the standard for the next year's work.

The saddlery is in fair condition, and will, I think, be adequate to next season's requirements.

TRANSPORT.

The transport is in good and serviceable order, but two spring waggons are required to complete; one to replace a half-spring patrol waggon which is nearly worn out and is hardly worth repairing; and one for the Edmonton detachment which is much required to replace another half spring waggon already condemned.

FORAGE.

The oats supplied the division, which are of good quality, are all grown in the district and, at Fort Saskatchewan and Edmonton, cost 34 cents per bushel, and at Red Deer, 44 cents per bushel.

Hay, this year, is of excellent quality, having been put in quickly and without injury from rain.

The prices at headquarters are \$7.50 and \$8.50 per ton. Edmonton, \$8.00, St. Albert, \$4.00, and Red Deer, \$8.75 per ton.

FUEL.

Wood is still burned at Fort Saskatchewan and costs \$1.45 per cord delivered, including timber dues, with a further charge of 30 cents per cord for sawing into stove lengths by steam saw.

Coal is used at Edmonton except for cooking purposes.

Wood is used at St. Albert and Red Deer.

I had recommended that this year coal be used at Fort Saskatchewan in place of wood but for various reasons, among them being that the price of wood is so very low and the letting of these contracts a great help to settlers, I decided not to trouble in the matter this year.

TELEPHONES.

There is one telephone used in the division, being between the Edmonton Barracks and the telegraph office.

There are two public telephones, one being between the Edmonton telegraph office and St. Albert, and one between the Edmonton telegraph office and the railway terminus.

Besides these there are many private wires in the town of Edmonton.

TELEGRAPH LINES.

There are now two telegraph lines in my district.

One from Edmonton *via* Fort Saskatchewan, Victoria and Saddle Lake to Qu'Appelle, and the other which is almost completed, from Edmonton *via* Red Deer to Calgary.

This latter will be a great convenience whereby I shall be enabled to communicate with the Red Deer Post, and with Calgary direct, as well as with all points along the Calgary & Edmonton Railroad.

FIRE PROTECTION.

I have no fire engine but am well supplied with fire extinguishers and hand grenades which are distributed throughout the posts in barrack rooms and quarters.

Buildings are supplied with fire buckets, barrels, fire axes and roof and wall ladders.

A fire picquet is detailed and there are special and stringent local orders in regard to fire.

Buglers have special instructions about sounding the fire call and the "Assembly."

As the buildings are now arranged, being all furnished with brick chimneys, stove pipes being all in sight and roofs covered with paint, I feel pretty secure from fire.

WATER SUPPLY.

Water is used principally from the Saskatchewan River at Fort Saskatchewan and Edmonton. There is also a good well at Fort Saskatchewan Post from which water is drawn.

St. Albert has a well, and river water is used at Red Deer.

ROADS AND BRIDGES.

Most roads in the district are in fair order.

The new road through the Beaver Hills to Beaver Lake which shortens the distance to that place by some 12 miles is rough and not much used in summer, but in winter is very generally used and being mostly through thick woods, makes a fine winter trail, giving good shelter and plenty of wood for camping purposes.

A new road is in course of construction between Fort Saskatchewan and Clover Bar in a straight line, which, when it is finished, will more closely connect these two settlements.

The road to Lac la Biche through Victoria is much as it always has been, a pretty hard one to travel having innumerable creeks, hills and in some parts of it soft places. The White Mud River however (12 miles north of Victoria) has been bridged by the Indian Department which is some improvement but there is lots of room for work on this trail.

The trail to Athabasca Landing is in very good order it having been improved from time to time by the Hudson's Bay Company, and the principal streams being well bridged.

A recent patrol on the Calgary trail reports the bridge over the Battle River in a very dangerous condition, especially as regards the flooring through which there are several large holes. The Wolf Creek bridge is also complained of.

The trail which requires the most attention in the one north to Lac la Biche.

FERRIES.

There are three ferries in the district: one at Edmonton which has two ropes and two scows, known as the upper and lower ferries, one at Fort Saskatchewan and one at Red Deer.

On the upper ferry at Edmonton a basket or cage has been rigged to cross the river on the wire, when boats are unable to cross owing to ice running. The plan is novel and ingenious and is worked by means of ropes, pulleys and a horse.

It has a carrying capacity of four to five persons with a reasonable amount of baggage, and was worked with success during the time the river was closing this winter.

LIQUOR LAWS.

The permit system is still in vogue, with the results mentioned in previous reports.

The subject has been exhausted and there is little further to say about it.

One of the principal complaints is that under the permit system beer is brought into the Territories and sold, whereas those in the country are not permitted to brew it for sale, thereby closing what would be a large market for barley.

I understand that the North West Legislative Assembly has now power to handle the matter and perhaps some new and more satisfactory state of affairs may shortly be developed.

SETTLEMENT AND AGRICULTURE.

The district has made rapid strides in settlement during the past year. Eastern Canada and Dakota have both largely contributed to the population, besides Germans and others.

The new settlers, who are scattered in all parts of the district, are of a most desirable class and many of them well equipped with farm implements and stock, ready to commence farming in the spring. They appear to be steady and industrious, and as an instance of their perseverance I may state that in the summer, on passing a farm which had been rented for the season by two or three German families, I saw a 10 to 15 acre field of barley being hand-weeded.

Many of those who arrived in the district early enough to put in small crops, rented unused farms and, while the crops were growing, built houses on their claims and put up hay to winter their stock.

The number of entries made in the Edmonton land office for the year ending 30th November, 1891, was 441, and for the year 1890, 130, showing an increase for the present year of 311. These figures are exclusive of Red Deer, which are given further on.

It should be particularly remarked that not much of this increase of population is due to the railway which was finished this year from Calgary to Edmonton, but is to be placed to the credit of the country itself, which has become known to the outside world through the visits of delegates, as also from the efforts of the Edmonton Board of Trade and Agricultural Society. A large number of the new comers used the road and not the rails, driving their stock and carrying their families and effects in waggons.

The full effect, therefore, of the Calgary and Edmonton Railway on settlement is still to be felt, and next year a great influx of immigration may be anticipated.

AGRICULTURE.

This has been a most successful year for crops, both root and grain.

Wheat, of which the yield is large, being from 35 to 40 bushels to the acre, is a fine sample of grain and totally uninjured from frost or any other cause.

Oats, which were rather backward in the early part of the season, afterwards came on rapidly, and it is estimated will yield an average of about 70 bushels to the acre of good grain. In some instances as high as 90 bushels to the acre have been threshed.

ROOTS.

In giving the dimensions of potatoes and other roots displayed at the Edmonton agricultural exhibition this fall, very little need be further said as to roots—

Potatoes,	1 ft. x 1 ft. 7 in. round.	
Cabbage, white,	4 " 1 "	
" red,	3 " 5½ "	
Turnips, white,	3 " "	
" Swede,	2 " 8 "	
Carrots, white,	1 " 1 "	
" horn,	1 " "	
Onions, white,	1 " 3½ "	
" red,	1 " 1 "	
Celery,	1 " 2½ "	at root.
Flat beets,	2 " 4 "	
Mangold,	1 " 8 "	
Pumpkin,	4 " 3½ "	
Citrons,	2 " 1 "	
Sunflower,	3 " 8 "	
White pea vetch,	6 " 11 in. long.	

There were 30 varieties of potatoes exhibited, but none so large as were shown last year.

At the Winnipeg exhibition held this fall this district took first prize for wheat, oats and barley in the straw, and also for native grasses.

Grain was not then threshed out and so there was no exhibit of threshed grain from here.

Unfortunately, the samples of roots sent down were lost or delayed en route, and so the district was unrepresented in this line.

The list given below of farm machinery and agricultural implements sold through local agents during the year, will give some idea of the advancement of farming in the district—

6 threshers,	4 reapers,	7 sulky gang ploughs,
34 waggons,	6 seeders,	156 plows,
26 binders,	17 harrows,	18,000 lbs. binding cord,
33 mowers,	15 disc harrows,	12 fanning mills.
30 rakes,		

Beyond this much has been imported direct by farmers themselves, and many of the new settlers brought their own machinery with them.

The amount of acreage this year as compared with last is as follows:—

1890	6,660 acres.
1891	10,094 do
Increase	3,434 do

The above figures are exclusive of Red Deer.

Taking into consideration therefore the amount of machinery imported during the year, the increased acreage, the splendid crops of last season, the large increase of population, and the completion of the Calgary and Edmonton railroad to Edmonton, I am of opinion that the opening up of the northern part of my district has at length thoroughly commenced, and should the much talked of railroad from the east be materialized and connect with the one already built, giving direct communication with both east and west, then, with these conveniences, this northern or fertile belt of Alberta will hold its own with any grain-growing part of America.

Red Deer, the most southern portion of my district, has also considerably increased in population, 107 new settlers having come in, distributed as follows: About 75 per cent. at Poplar Grove and Little Red Deer, from 15 to 20 miles south and west of the town of Red Deer.

Five settlers went to Tail Creek, near Buffalo Lake, 4 to Quill Lake, and the remainder evenly distributed about the Red Deer Settlement.

The Icelandic Settlement, near Little Red Deer, is fairly prosperous, and the people appear contented.

A small town has already commenced at the railroad crossing of the Red Deer River, and being just half way between Calgary and Edmonton will, no doubt, become a point of some importance.

The crops here were very good, with the exception of oats, which being somewhat injured by frost in August, are rather light and high in price, the contract price at Red Deer being 44 cents per bushel, against 34 cents at Fort Saskatchewan and Edmonton.

Very little new machinery was brought into Red Deer during the year, so I am informed, and harvesting and threshing was greatly retarded on that account.

There was a very large increase in acreage, as will be seen by the following figures: 1890, acreage 677 acres, 1891, acreage 1,527, showing an increase of 850 acres.

I may here remark that the Beaver Hills, near Fort Saskatchewan, require re-surveying, as settlers find great difficulty in locating claims, owing to survey posts and mounds being entirely obliterated. I have rendered what assistance I

could in this direction on several occasions, and brought the matter to the notice of the Edmonton land office.

RANCHING PROSPECTS.

Stock of all kinds is greatly increasing in numbers and improving in quality yearly.

The recent Edmonton agricultural exhibition shewed young stock of a very superior class, both in cattle and horses.

There are now plenty of well-bred bulls and entire horses in the district, and the old scrubby cattle are gradually disappearing.

There is every facility for raising stock: plenty of hay, good pasture, water, and building timber for sheds and stables.

Cattle cannot remain out all winter, but must be taken up and fed when the weather is very severe and the snow deep; it is therefore not wise to have too large a band.

Sheep do well and are most profitable. Horses not required to work can winter out and are very little trouble. They find their own hay in the swamps and shelter in the bush. When the weather, however, becomes extremely cold they are better taken up and fed for a while.

I think the breeding of a good general-purpose horse, with some blood in him, would be a more profitable business than breeding altogether to size and weight, as there is a tendency to do here.

Number of cattle in district in 1890, 5,500 head; in 1891, 8,730 head.

Number of horses in district in 1890, 2,000 head; in 1891, 2,970 head.

GAME.

Fur-bearing animals are becoming scarce, and are no doubt in a great measure killed out, although it is not complained that they are any scarcer this year than last.

A few years ago beaver were killed within two or three miles of the barracks on either side, and numbers were trapped in the Beaver Hills close by. To-day they are all gone from these localities, and so it is almost all over the district, except, perhaps, in the most northern part.

Bear, however, are still fairly plentiful.

Musk-rats are very numerous everywhere in the district, which will help those depending on hunting considerably, as they can both eat the flesh and sell the hide.

Rabbits are also fairly plentiful, and will increase yearly for the next two or three years until they become almost a pest. Then, for two or three years following, there are none, when they again begin gradually to appear and increase for their septennial swarm.

Prairie chickens and partridge are more numerous this year than they have been for a long time, which is due to the strict enforcement of the Game Ordinance, and also the absence of prairie fires during the past season.

Ducks were not so numerous, and as regards their protection I have again to recommend that Indians should not be granted passes to leave their reserves during the breeding season or before young and moulting ducks are able to fly. A camp of Indians travelling through a lake country at this season commit fearful havoc among the eggs and young.

As regards the whitefish, the following extract from a patrol report to Lacla Biche bears on the subject:

"I should like to mention that the Half-breeds here are almost entirely destitute, and have nothing to live on except fish, and should the Government decide on closing down on fishing out of season the Half-breeds would have to be supported entirely during this period. The fish are very scarce here, and I am sure it would pay the Government to shut down on the fishing, for at least three years, and support these poor people during the time."

I may say, as regards these Half-breeds, that they were formerly nearly all Treaty Indians, but took scrip, and so came to their present precarious condition.

GENERAL EQUIPMENT.

The general equipment is equal to present requirements.

BARRACK FURNITURE AND IMPROVEMENTS TO BARRACKS.

A number of arm chairs and other strong chairs have been purchased during the year for the recreation room, which adds greatly to its comfort and appearance.

Other furniture is made within the division. Beds are made of boards and trestles, but as suggested in previous reports, iron-cots would be a great improvement.

I also recommend that a number of strong chairs be purchased for the mess-room, in place of the benches at present used.

IMPROVEMENTS TO BARRACKS AT HEADQUARTERS.

The building 90' x 20' renovated last year, and now used as general store, issuing-room and quartermaster sergeant's office has been painted, the walls, doors, &c., receiving two coats of paint, and roof one of roofing paint.

The building 70' x 20' used as orderly room, division office, sergeant-major's quarters and division store was also painted in a similar manner.

The kitchen erected last year in rear of commanding officer's quarters, was painted in a similar manner.

The men's mess-room and recreation rooms have been also stained and trimmed with white inside.

As suggested last year a new fence of netted wire with tamarac posts and top-rails neatly painted, has been built round the barracks, enclosing about thirteen acres therein.

Brick chimneys have also been built in the inspector's quarters and others overhauled and repaired where necessary.

ST. ALBERT.

The following improvements have been carried out at St. Albert :

A strong netted wire fence, similar to the one at headquarters has been built round the post. The roofs of the quarters have been painted, as well as the doors and windows inside and out.

INDIANS.

There is a most marked improvement in the condition of the Indians on all the reserves in my district. They are becoming good farmers and most of them have fine crops this year, both of grain and roots.

Each agency has now a thresher, which is worked by the Indians themselves, and at Whitefish Lake a flour and saw mill is being erected, one white man alone being employed, and 75 cents per head from the treaty money being paid by the Indians towards defraying the cost.

Their houses are better and more comfortable, and the appearance of the Indians themselves altogether better.

The following is a return of the amount of crops raised on the reserves under the Saddle Lake Agency alone :—

Oats,	about	3,000	bushels.
Wheat	do	1,200	do
Potatoes	do	1,500	do
Hay	do	1,400	tons.

I have not the figures for the other Agencies, but excellent crops are reported.

There are a few Stonies at Bear Hills, being the remnant of old Sharphead's Band, which have been thinned down by sickness and disease. These, I am informed, it is the intention to remove to the Stony Reserve, near Lac Ste. Anne.

They formerly inhabited the Wolfe Creek Reserve which has now been done away with.

Good order is preserved on all the reserves, and with the exception of one or two cases of stealing, no offences have been committed of any note.

The health of the Indians is generally good, and no serious sickness has been reported from any of the reserves.

PRAIRIE FIRES.

In April last the country round Fort Saskatchewan, on both sides of the river, was nearly all burnt. The police had hard work for two days and nights, nearly the whole division being out in waggons and buckboards fighting fires. I am glad to be able to report that beyond an old stable, some old rails and a little hay, no damage was done to the property of settlers.

Other portions of the district did not suffer from prairie fires.

I was kept anxious during the fall, as owing to the rank vegetation a prairie fire might have had disastrous results for new settlers, who now extend far back, but none occurred, and the ground becoming covered with snow early in November, the danger was averted.

The copies of Prairie Fire Ordinance received were distributed throughout the district, and the usual special instructions on this subject were given to patrols and outposts.

RELIEF TO HALF-BREEDS.

No relief has been afforded to half-breeds this year, nor has any been applied for.

The construction of the Calgary & Edmonton Railway gave employment to large numbers, and many found employment in harvesting and haying, which is an increasing source of labour.

CALGARY & EDMONTON RAILROAD.

The Calgary and Edmonton Railroad was completed to the river bank opposite Edmonton, and the last spike driven on the 25th July last.

The benefit to the district was immediately felt in the shape of a bi-weekly mail and the lowering of freight rates; also the ruinous rate of 10 cents per pound on express matter from Calgary to Edmonton is done away with.

Merchants are now able to attend to business in Winnipeg personally with only the loss of five or six days, instead of fifteen or sixteen as formerly.

Large numbers of people have visited the district who have hitherto been deterred by the expense and inconvenience of the 200-mile prairie journey.

It has at once advertised the place and shown its capabilities, and conferred all the benefits that a railway always does to a new country.

Next year may be expected not only a large influx of population, but also an export of produce.

In conclusion, I have to acknowledge the efficient manner in which I have been seconded by the officer, non-commissioned officers and men of my command in carrying out the duties required during the past year.

I have the honour to be, Sir,

Your obedient servant,

A. H. GRIESBACH,
Commanding "G" Division.

The Commissioner,
North-West Mounted Police,
Regina.

 APPENDIX H.

 ANNUAL REPORT OF SUPERINTENDENT E. W. JARVIS, COMMANDING
 " A " DIVISION, N.W.M.P., 1891.

MAPLE CREEK, 1st December, 1891.

SIR,—I have the honour to forward my annual report for the year ended yesterday.

GENERAL STATE OF DISTRICT AND CRIME.

The state of this district is more prosperous than at the time of my last report. The past summer has been favourable to both farmers and stockmen, and a general feeling of satisfaction pervades all classes. Serious crime appears almost unknown in this section of the country, the cases being of the most trivial nature. Court was held only three times in the district, but there were no cases either at Maple Creek or Swift Current, and at Medicine Hat civil cases predominated.

PATROLS AND OUTPOSTS.

Detachments were sent out in the early spring to the same points as those occupied last year, with the exception of the Graburn detachment. This outpost was only occupied during three months this year, the men being more urgently required elsewhere. The situation of the buildings at Graburn is unsatisfactory, the outpost is in a deep and narrow valley, quite hidden from the surrounding country, and entirely off the line of travel in that section. I recommend that the buildings be pulled down, and re-erected about four miles further north.

The district was regularly patrolled, throughout its entire extent (between the line of the Canadian Pacific Railway and the boundary line) twice each week. In addition to the regular patrols, numerous parties were sent out in different directions and on various errands, so that little or nothing happened in the district which was not forthwith made known at headquarters.

The usual weekly connection was kept up with " B " Division on the east, while the patrol of " K " Division reached our western outpost—Willow Creek—every week.

Considerable improvements have been made this year at many of the outposts, in the way of new buildings, roofing, flooring, &c., and they are all in good shape, except Battle Creek. This is one of the oldest outposts, and the buildings are in a state of decay, the logs and roofs in some parts being quite rotten. I recommend the rebuilding of the whole outpost; for which the necessary timber can be got in the Cypress Hills, about twenty miles from Battle Creek. The location of this outpost should be slightly changed, and moved away from the creek to higher ground.

All the work this summer has been done by police labor.

ASSISTANCE TO INDIAN DEPARTMENT.

There being no Treaty Indians in this district, we have not been called upon to render any material assistance to the Department of Indian Affairs. The few families of Indians, who gain a precarious existence along the line of the Canadian Pacific Railway by selling buffalo horns, have received whatever help could be given them in the way of hunting up their stock, when strayed; and in settling some of their personal disputes by arbitration.

ASSISTANCE TO RAILROADS.

None has been required by either of the railway companies in this district.

ASSISTANCE TO CUSTOMS DEPARTMENT.

The boundary line between Canada and the United States has been constantly watched by the various patrols detailed for that purpose, and the movements of all parties either into or out of Canada, made known.

In all cases where dutiable articles have been imported, the customs duty has been promptly collected, and remitted to the proper authorities. The inspector of ports (Winnipeg) was driven from Maple Creek to Pendant-Oreille on the Milk River in August last. He expressed himself satisfied with the way the Customs work was performed.

DISCIPLINE AND CONDUCT.

The discipline and conduct of the members of this division have been satisfactory during the past year. This is all the more praiseworthy, as the men are thrown altogether on their own resources for amusement of any kind, and have not even the attraction of a decent recreation room in which to pass the long winter evenings.

The majority of the infractions of discipline have been of a minor character, only five cases having required imprisonment as a punishment.

DRILL AND TARGET PRACTICE.

All the available men of the division were put through a course of setting-up drill in the early part of the season; and regular weekly parades have taken place whenever enough men could be got together. Considering the very few opportunities the men of this division have for being drilled together, their knowledge of the various necessary movements, and also of arm drill, is satisfactory.

I cannot report so favourably of the target practice, as owing to the difficulty of withdrawing men from detachment during the shooting season, only about one-half of the division went through the dismounted practice; while the mounted and revolver practice could not be attempted. The scores were not up to the average of previous years. I attribute this to the quality of the ammunition supplied, which was an old issue. This, together with the bad sighting of some of the carbines, combined to discourage the marksmen and to render their best efforts unavailing.

I would like to see an increased "free" issue of ammunition, of the best quality procurable; and some encouragement to marksmen, in the shape of a badge or medal in each division.

PHYSIQUE.

The physique of the members of "A" division is generally good, and owing to plenty of exercise in the open air, coupled with an excellent dietary, it is constantly improving.

RECRUITS.

Seven men applied for engagement in this district during the year, and five were accepted. Two of these were men who had formerly served in the force, and wished to return to it.

HEALTH.

The health of the division has been satisfactory. Very few men have been in hospital for any length of time; and only one accident requiring surgical treatment occurred. Regimental N^o 2,447, constable F. H. Thompson, while inspecting the boring for natural gas at Medicine Hat, incautiously entered the gas house with a lighted pipe in his mouth. He was badly scorched about the face and hands, and the building was burnt down.

At Medicine Hat, the Staff Sergeant in charge of the hospital was transferred to another division in May, and an arrangement was made with Dr. Calder to attend

men who might require his services at that outpost. This practically does away with hospital accommodation there; and as a result of this arrangement, constable Thompson (whose case is mentioned above), had to be brought to Maple Creek for hospital treatment.

RATIONS.

The rations supplied have been, as usual, very good. In one case only could any reasonable complaint be made, and this is with reference to a consignment of fifty bags of flour from Moosomin, which was of inferior quality.

The ice obtained at Maple Creek is not good; the creek from which it is cut is too shallow and the water alkaline. I strongly recommend that the ice should be supplied from Medicine Hat, by rail. The slight extra cost would be more than compensated by the superior quality of the ice, which is very essential in a post so badly supplied with drinking water.

KIT AND CLOTHING.

The issue of fur coats "on loan" is very unsatisfactory; this issue should be made a permanent one at the earliest possible moment. All kit and clothing should be issued by divisions, as I have before recommended, either annually or semi-annually.

ARMS AND ARTILLERY.

The carbines now in use are serviceable, and that is all that can be said in their favour; they are not to be depended upon. The revolvers are in good order. More of the small sized "Smith & Wilson" revolvers should be used, the "Enfield" revolver being too cumbersome for "railway" or "plain clothes" duty.

There is no artillery in this district.

TRANSFERS, DISCHARGES AND DESERTIONS.

Forty-five non-commissioned officers and men have been transferred to this division; and twenty-four non-commissioned officers and men from this to the other divisions.

Early in July, Inspector Sanders left for Macleod, and was replaced by Inspector Wood; and at the end of September, Assistant Surgeon Hautain was replaced by Assistant Surgeon Dodd.

Two constables were discharged as bad characters, and ten discharged, time expired. None were discharged as invalids. Four were discharged by purchase.

There were five desertions during the year:

- Constable Martin, S., 20th March, 1891.
- do Kearns, J. V., 11th June, 1891.
- do Roberts, C. A. J., 18th August, 1891.
- do Aldridge, A., 27th September, 1891.
- do Sheppard, C. P., 19th November, 1891.

SAVINGS BANK.

There were thirty-seven depositors in the Government Savings Bank, whose savings aggregated \$2,299. This is a decrease from last year, and is principally attributable to the opening of the Post Office Savings Bank in this town, which numbers several members of this division among its depositors.

STRENGTH OF THE DIVISION.

This division has been considerably under strength all the year. It should be, on the contrary, over strength; having a dozen outposts to supply, besides the ordinary division work to perform. One hundred and twenty non-commissioned officers and men, at least, are required to attend to the wants of a rapidly increasing population.

I am in favour of employing special constables as artisans—where this has been tried, it has worked well. If this system could be adopted, it would release a large number of men for duty, who are now "necessarily employed."

I saved the services of some men (as indeed I was compelled to do, by the smallness of the number under my command) by abandoning the barracks at Medicine Hat during the summer—the work at that place being done by a small “town detachment,” and the rest of the men going on outpost duty.

WINTER DETACHMENTS.

For the sake of taking care of the barracks at Medicine Hat, I considered it advisable to station an officer, with a small number of men there for the winter.

Last winter, detachments were kept out at Battle Creek and Bull's Head only, while the other southern outposts were abandoned. As a result, where there were no men, the buildings were broken into and damaged, the corrals broken down and much of the hay destroyed. I therefore obtained your permission to keep small detachments out this winter. Wherever suitable buildings exist the outposts will be occupied, with the exception of “Stone Pile,” a detachment which is of importance in the summer only, to keep up connection with “B” Division, but which is not wanted in winter.

The personnel of these detachments will be changed from time to time during the winter to prevent their isolation becoming altogether too wearisome; and communication with them will be kept up twice a month.

INSPECTION OF DIVISION.

The headquarters of the division were inspected by yourself on the 11th March and 13th April.

The Assistant Commissioner inspected this post and all the outposts in the middle of September.

The senior surgeon inspected the post and particularly the hospital on 30th May.

The arms, harness, saddlery and transport were inspected by myself or one of the inspectors weekly.

The outposts were also visited by an officer every month.

HORSES AND MILEAGE.

Very few changes have taken place amongst the horses of this division during the past year. Four horses were cast and sent to Regina for sale in April, and five remounts (one purchased here and one at Medicine Hat) were received.

One of the remounts while being “lunged” the day after his arrival here, stumbled and broke his leg, and had to be destroyed.

Horse Reg. No. 1201, died 18th September, from inflammation of the kidneys. These were the only casualties.

Eight or ten of the oldest horses should be cast, as they are past doing the work required of them. They have been on herd nearly all summer. About twenty horses will not be required during the winter and they will be kept on permanent herd at Fish Creek, ten miles west of this post, where they will get a good rest.

There are two small mules in this division, which have been stationed at “Stone Pile” all summer. I cannot speak too highly of these little animals; they are excellent workers, always ready to turn out, require but little to keep them, and never die. I would like to see more of these useful and hardy animals employed in freighting, &c., in the Force.

The general health of the horses has been good and the number “off duty” was not excessive, but the supply of veterinary drugs was very small, as none of our requisitions were filled until late in the fall.

The total number of miles travelled by 85 horses is 153,128. This does not include work around the various posts.

SADDLERY AND HARNESS.

The saddlery is in good order. I would like to see this division supplied throughout with “double cincha” saddles, owing to the hilly nature of the ground traversed by the patrols.

The state of the harness is satisfactory. Several sets of jumper harness are required, for detachments wintering out. The ordinary native or "Shaganappi" harness would suit admirably for this purpose.

This division should also be supplied with half a dozen pack saddles and gearing.

TRANSPORT.

Two new heavy waggons were received this year from Calgary, and the old ones were thoroughly overhauled and repaired. New axles and wheels were also supplied to a spring waggon and a double buckboard, and a new double buckboard and new platform spring waggon were received from Regina.

All the transport has been painted the regulation colours.

Three sets of medium heavy bob-sleighs are wanted for the winter work; I am having half a dozen jumpers made by the scouts at Battle Creek and at Bull's Head.

Difficulty is experienced in procuring parts for the repair of waggons, &c., owing to the various patterns now in use; I would strongly recommend the adoption of a uniform pattern for each kind of vehicle, which would effect a great saving in the cost of maintenance.

FORAGE.

Hay is plentiful this year and of good quality, the prices are consequently lower than formerly. Owing to the abundant harvest, good oats are supplied by local contractors, instead of being imported as last year.

STABLES.

Small necessary repairs have been made in the post stables from time to time, and they are in fairly good order. They require to have new flooring throughout.

The "sick stable," reported last year as having been built, is not yet completed nor handed over to the police; it requires a floor, which should be of cement or concrete.

The roofs of all the stables here received a coat of paint this summer.

GENERAL EQUIPMENT.

I have already, under the head of "Arms," suggested a larger issue of the small sized Smith & Wesson revolvers, and I beg to repeat former recommendations for the issue of an increased number of field glasses, so that there may be one at each outpost. The balance of our equipment is satisfactory.

BARRACKS AND BARRACK FURNITURE.

The barrack rooms and division mess rooms have been floored throughout, and the roofs of all the buildings in the post have been painted. The inside woodwork is now being painted. Nothing has been done to the barracks at Medicine Hat, which were not occupied this summer, and I do not intend to expend any more money at that outpost, as I am in hopes of soon seeing it abandoned.

Part of a new hospital, as reported last year, has been built here, but work on it ceased in the spring. I recommend considerable structural changes in the plan; and also that a hospital of some kind be provided forthwith. The present building, an old patched up portable one, being entirely unfit for the reception of patients.

The bake-shop at this post has been rebuilt and a paint-shop is now in course of erection, the work in both cases being done by police labour.

Considerable repairs are required to the fences and corrals at this post; This work has been authorized, and the posts and rails are now being got out by our men.

There is no barrack furniture, except the home-made (and homely) bed-boards and trestles, and a few tables and benches.

FUEL.

Coal from the Galt mine at Lethbridge has been supplied during the year at Maple Creek, Medicine Hat and Swift Current.

It is good fuel, but very dusty and I repeat my suggestion of last year, that hard coal should be supplied for use in the offices, instead of the soft.

The other outposts use wood, which is cut and hauled by police labour.

Coal exists in considerable quantities in the Cypress Hills and is now being privately mined at the head of Bear Creek, twenty miles east of this post. It appears to be of fair quality, but is, as yet, too near the surface to form an accurate estimate of its value.

TELEPHONES.

The telephones lines here and at Medicine Hat are in good order and have already saved more than their cost, in time, convenience, and horseflesh. I hope before long to see the system extended to all the outposts; as it is, in the present age, a very necessary adjunct to police work.

TELEGRAPHS.

The telegraph system in this district remains unchanged. A police operator is still kept at Battle Creek, on the line of the Rocky Mountain telegraph company, and is very useful in that capacity. Under another head I have recommended the rebuilding of the Battle Creek outpost, and it will be advisable to have the telegraph office in the main building, instead of isolated as at present.

FIRE PROTECTION.

The appliances for extinguishing fire remain as they have been for years past, pails, water barrels and Babcocks. A tank was constructed last year with a small house adjacent, intended to shelter a "manual" fire engine; but the engine has not yet arrived.

A fire gaining headway in any one building must mean the destruction of the whole post; and I am of opinion that it is about time some further precaution should be taken.

WATER SUPPLY.

The water supply is still in *statu quo*, and is obtained by the somewhat primitive method of hauling it in a tank on wheels, from a well half a mile distant.

ROADS AND BRIDGES.

No public money has been expended this year upon roads, (which indeed require little or nothing to be done to them), and one public bridge has been built across Hay Creek, six miles east of this post. The approach to this bridge, however, has not been graded, and the bridge cannot be used.

The police bridge across Maple Creek has been rebuilt in a substantial manner.

FERRIES.

Although but little traffic passed over the old Battleford trail at Saskatchewan Landing the ferry across the Saskatchewan River at that point was kept in running order this season.

The police ferry at Medicine Hat is in good order, with the exception of the "life-boat," which was carried away by a heavy freshet in June last, and has not since been recovered.

If it is intended to continue to occupy the barracks at Medicine Hat some repairs will have to be made to the ferry this winter, and a new life boat will be required.

LIQUOR LAW.

In view of the expected radical change in the liquor law of the North-West Territories, which it is probable will take place very shortly, there is but little to be said about the present system, and nothing at all in its favour. It served its pur-

pose in the early days of settlement, and will soon be, it is generally hoped, a thing of the past.

SETTLERS.

An almost complete exodus of the Germans settled south-east of Dunmore took place last spring (as was expected at the date of my last report.) They have been partially replaced by some more of the same nationality, coming in from Dakota, where their farming venture was not a success.

The largest number of settlers in the district have come to the neighbourhood of Maple Creek, where the best lands are being rapidly located, principally for stock raising purposes.

The attached schedule gives a fairly accurate statement of immigration here:—

STATEMENT of new Settlers, Maple Creek District.

Name.	Location.	Origin.	Stock.	Remarks.
W. C. Gourley	Skull Creek	England	900 sheep	Just come in.
McLeod & Bertram	Bear Creek	P. E. Island	800 do	do
Coil, Hassett & Reid	Maple Creek	Ontario	300 do	Good progress.
Jas. Brown	do	Manitoba	600 do	do
Mac Smith	do	Ontario	400 do	Just building.
S. Hammond	do	England	1 team, 2 cows	do
C. Delves	4-mile	do	8 horses	do
S. Hungerford	do	Manitoba	200 cattle	do
Jas. McBean	McKay Creek	Nova Scotia	A few horses	Good progress.
Fawcett & Mauzer	do	Manitoba	do cattle	do
Trent Bros	do	do	100 horses	do
McAllister	do	do	75 cattle	do

CROPS.

The present season has been exceptionally favourable to crops of all kinds, which have yielded abundantly and of excellent quality. As already mentioned, oats are supplied to the Force by local contractors, and I have also been able to buy potatoes wherever wanted.

The agricultural shows here and at Medicine Hat brought some wonderful specimens of roots to public notice; while the grain exhibit was equally good. This corroborates my former report, viz: that with a reasonable amount of moisture (rain or irrigation) anything will grow and ripen in this part of the country.

RANCHING.

Ranching interests are on the increase in this district and particularly within a radius of thirty miles from Maple Creek. About three hundred head of cattle and two thousand sheep have been imported this fall; while the natural increase was very large. The abundant and juicy grasses, the quantities of natural hay, the sheltered valleys of the Cypress Hills (well watered by ever-flowing streams) all combine to make this particular section a paradise for the rancher who is in a moderate way of business.

Sheep and cattle find a ready market here, the buyer coming to the rancher's door to ask for them. Several hundred sheep and twenty carloads of cattle have been sold at Maple Creek alone during the past summer, realizing good prices.

The cattle of the Canadian Agricultural Coal and Colonization Company on their range southwest of Crane Lake, and their sheep, in the neighbourhood of Swift Current, have done very well. Their wool crop was very heavy averaging 6 lbs. per sheep.

With regard to horses, there has not been so much business done, some of the yearlings raised by the Canadian Agricultural Coal and Colonization Company, have sold well; and Mr. Oxarart of the "Pyrenee ranche" has shipped four or five carloads of horses to Manitoba.

I regret to have to report the prevalence of glanders throughout the whole district. No less than sixteen animals were destroyed by District Veterinary Surgeon Poett in consequence of developing this fell disease. It is no respecter of persons, attacking equally the cayuse of the Indian and the \$2000 thoroughbred stallion of the breeder.

Every effort has been made for years past to stamp out the disease, and although it still exists in the district, I have reason to believe it is diminishing in virulence. Unfortunately the Veterinary Surgeon meets with great opposition (in some cases) on the part of the owners of the horses affected, who go so far as to take away and conceal their animals, apparently not realizing that the first loss will be the least; and that the spread of the disease should be stopped at any cost. In this connection I wish to mention that District Veterinary Surgeon Poett has carried out this unpleasant duty in a very satisfactory manner.

GAME AND FISH.

Small game has been more plentiful this year than last, but deer and antelope are very scarce and require considerable hunting before they can be found. In the matter of killing game out of season, the Indian is almost the only offender; and under the Game Ordinance, as at present constituted, it is only a question of a very few years when the total extinction of all game—except, perhaps migratory water-fowl will ensue.

There is not much fish found in this district: pickerel and gold-eyes in the South Saskatchewan river, a few whitefish in a lake near Swift Current, and the spring run of "suckers" in all the small creeks, make up the total of our supply.

Battle Creek is admirably adapted for a trout stream, and I regret there is no means by which some young fish could be obtained, with which to stock it.

INDIANS AND HALF-BREEDS.

The number of Indians in this district has somewhat decreased since last year, as they have moved away to a better hunting country. Their principal source of income is still the sale of buffalo horns to passengers along the line of railway. They are peaceable, sober, and fairly moral, and give us little or no trouble.

The few scattered families of Half-breeds living along the banks of the South Saskatchewan river at Red Deer Forks, Miry Creek, Saskatchewan Landing, and at Swift Current, lead a very precarious existence. They principally depend upon hunting, fishing, and gathering buffalo bones, as a means of gaining a livelihood. Freighting to Battleford, formerly a sure source of income, is now a thing of the past, and they find themselves at times in sore straits. Assistance in the way of provisions was issued to some at Swift Current last winter, who were quite destitute.

Those, on the other hand, who live in the neighbourhood of Maple Creek and Medicine Hat are fairly well off, and in several instances own considerable stock.

Five Half-breeds are permanently employed in this division as interpreters and scouts, and perform their work satisfactorily.

PRAIRIE FIRES.

Up to the month of October, this district had almost entirely escaped the devastating element. In that month two fires started on the Galt railway and spread

as far as Medicine Hat. All available men were turned out to aid the citizens in fighting these fires.

Another fire burnt the country on the north side of the Canadian Pacific Railway, between Forres and Crane lake, fortunately an uninhabited region.

The railway fire-guards (reported last year) have been of great assistance in removing one of the most common causes of prairie fire; and their utility has been largely supplemented—in the neighbourhood of Maple Creek—by the action of the people who decided to spend the money granted for roads, in ploughing fire-guards along each side of the road allowance round half a dozen townships near here.

GENERAL WORK.

Early in January a considerable amount of drunkenness developed amongst the Indians at Medicine Hat, and it was discovered they were procuring whiskey put off trains near that station. A couple of Indian scouts were temporarily employed by Inspector Davidson, and the Indian camp was patrolled daily by our men. The result was that the scouts made a seizure of about thirty gallons of whiskey, and the traffic soon stopped.

In the middle of that month a Half-breed arriving at Medicine Hat, reported glanders among the native horses at Red Deer Forks. I went out there on the 22nd of January, accompanied by Veterinary Staff Sergeant Poett, returning on the 26th. There were no symptoms of disease among the horses inspected there, and it is probable, if the disease existed at all, that the sick horses had been "cached" before our arrival.

On the 27th April, the body of an unknown man was found in Bear Creek, near the Piepot tank of the Canadian Pacific Railway. The nearest coroner, Assistant Surgeon Dodd, of Regina, was notified, and he arrived the following day to hold an inquest. The body was recognized as that of a tramp who had passed through here early in the winter, and who probably froze to death, but it was not identified.

On the 7th May, the body of a man named Jamieson was found in a coal shed at Swift Current. He had apparently died from natural causes during the night, and no inquest was considered necessary. The body was taken charge of and buried by the police.

Several de-erters from the American army arrived here in the spring, but only one of them brought a horse. This was taken from him, and was sent back to the officer commanding at Fort Assiniboine about the end of May.

This was the only opportunity I had to reciprocate the courtesy so freely extended to us under similar circumstances by the American officers at that post. These gentlemen have always shown themselves ready and willing to assist the North-West Mounted Police by any means in their power.

On 22nd May, a telegram received from Superintendent Perry, notified me that some horses had been stolen by Indians from Battleford, and that the thieves were supposed to be making south to cross the boundary. Inspector Davidson turned out with two parties, who patrolled west of here a hundred miles; another party being sent east. No "signs" were seen, and it was afterwards learnt that the Indians did not pass this way.

On 20th November, two boys named Cochrane and Walton, aged 16 and 10 years respectively, sons of leading citizens of Medicine Hat, were caught in a blizzard a few miles south of that town, and were frozen to death. Two days later, the police patrol from Bull's Head found the bodies. Sergeant Mathewson remaining alone all night on the open prairie to watch them, and protect them from the coyotes. The bodies were brought into Medicine Hat by police teams. No inquest was considered necessary.

As the ferry at Saskatchewan Landing received a subvention from the Government, in connection with its use by the police, it was regularly inspected every month by a patrol from Swift Current.

Hotels and saloons were periodically inspected, and found to be well provided, as usual, with other people's permits.

I have the honour to be, Sir,
Your obedient servant,

E. W. JARVIS,
Supt. Commanding "A" Division.

The Commissioner, N. W. M. Police, Regina.

APPENDIX I.

ANNUAL REPORT OF INSPECTOR JOSEPH HOWE, COMMANDING
"C" DIVISION, 1891.NORTH-WEST MOUNTED POLICE,
BATTLEFORD, 30th November, 1891.

SIR,—I have the honour to forward my annual report for the year ended 30th November, 1891.

I assumed command of this district on 5th April last, and remained in command until the 24th of that month, when I was temporarily relieved by Superintendent Perry. I again assumed command on the 24th July.

CRIME AND GENERAL STATE OF DISTRICT.

The general state of the district has been very satisfactory during the past twelve months, and crime of a serious nature has been rare.

The principal offences occurred in the early part of the year and are as follows:

On the evening of the 3rd February, a man named Emile Richard, reported that a Half-breed named Peter Dacotah, had been shot early that morning, by a man named Fletcher, at Pipestone Creek, about twelve miles from Battleford, and in the farm house occupied by A. J. Prongua.

Superintendent Antrobus, who was then in command of the district after taking Richards' information proceeded to the place and found the body of Dacotah. He had evidently been dead for about twelve hours. After thoroughly searching the place and finding no person about the premises the party returned to barracks bringing in the body. A non-commissioned officer and a couple of men were left in charge of the premises and parties were sent out to search the district for Fletcher, who was arrested the following day and lodged in the guard room. A coroner's inquest was held on the body of Dacotah and the verdict brought in by the jury was one of "wilful murder" against Fletcher. He was accordingly committed for trial.

The case was tried at the spring assizes. The jury brought in a verdict of "manslaughter," and Fletcher was sentenced by Judge Maguire to 20 years imprisonment in Manitoba penitentiary.

The investigation into this murder brought to light three serious cases in which Prongua was implicated: one for cattle killing, one for being illegally in possession of intoxicating liquor, and one case under the Inland Revenue Act for being illegally in possession of a still and worm. There is no doubt that whiskey had been manufactured by Prongua, but it was impossible to procure evidence to prove the case.

Prongua pleaded guilty to having intoxicating liquor illegally in his possession, and on this charge he was fined \$100 and costs, or in default of paying fine, three months at hard labour. The fine was not paid and he was accordingly confined in the guard room at this post.

The charge of having a still and worm illegally in possession was tried before Superintendent Antrobus and myself, Mr. H. A. Costigan, Collector of Inland Revenue, prosecuting. Prongua was found guilty and sentenced to pay a fine of \$200 and costs and double the cost of the license fee. The fine not being paid Prongua's stock was seized and our men remained in charge of his place until the 24th September, when a telegram from headquarters ordered the release of all pro-

perty under seizure, and they were therefore handed over to Mrs. Prongua. Prongua was confined in the guard room to stand his trial for cattle killing. The case was tried before Judge Maguire and he was sentenced to five years' imprisonment in Manitoba penitentiary, to which place he and Fletcher were sent under escort on the 15th May.

In March several saloon-keepers were prosecuted for illegally selling whiskey, but in only one case was the evidence sufficient to secure a conviction. This case was brought against a saloon-keeper named Henault, and he was found guilty and fined \$50 and costs.

The foregoing are the principal cases which occurred in the district during the year. The remainder of the cases were of a trifling nature and may be summed up as follows:—

Offences against the person.....	6
Drunk	4
Supplying liquor to Indians.....	2
Causing prairie fire.....	1

PATROLS AND OUTPOSTS.

There is only one permanent outpost of this division, that at Onion Lake, where a non-commissioned officer and four constables are stationed.

A detachment of one non-commissioned officer and one constable was stationed at Pipestone Creek during the summer months.

Regular patrols are made by the Onion Lake detachment to Cold Lake, Frog Lake and to the Chippewyan Reserve.

Patrols are constantly sent from division headquarters to the neighbouring Indian Reserves, and all outlying ranches and settlers are visited.

Tramping Lake, Sounding Lake and Jackfish Lake districts were visited by our patrols several times. The difficulty of crossing an outfit over the Saskatchewan River during the summer months prevents our patrols going to the last named district frequently.

Trips are made to Saskatoon every month.

A general supervision was kept up over every portion of the district.

Reports are sent in by every patrol party on its return to barracks, and monthly reports are received from the Onion Lake detachment.

ASSISTANCE TO INDIAN DEPARTMENT.

All possible assistance was rendered to the Indian Department. Escorts were furnished to convey the treaty money from Saskatoon to Battleford, also from the latter place to Onion Lake. An escort attended at the treaty payments in the last named agency.

In the Battleford agency an escort was not required by the Indian agent.

On several occasions Indians who had been loitering in town, and leaving their reserves without permission, were at the request of the agent sent back to their reserves. They invariably go when ordered to do so.

ASSISTANCE TO RAILROADS.

None required in this district, there being no railroads at present running through any portion of the district.

ASSISTANCE TO CUSTOMS.

None required as no imports of cattle, &c. arrived without passing the customs officials outside the district.

DISCIPLINE, CONDUCT, &c.

The discipline of the division is satisfactory, and the conduct of the men good. The number of entries in the defaulter's book amounts to fifty-three, but the majority of the cases were of a trifling nature. The amount of fines imposed during the year was \$176.35.

DRILL, TARGET PRACTICE.

Every member of the division went through a regular course of setting-up drill in the beginning of the year. For this purpose one of the barrack-rooms, which was empty, was used.

During the summer months weekly parades of the whole division were held for drill, both mounted and dismounted.

The division was sent out under canvas a couple of times during the summer for a few days at a time to accustom the recruits to prairie work.

Target practice both mounted and dismounted was carried out according to the regulations and a complete course of revolver practice was gone through. Some very good scores were made and great interest was taken in the competition by the members of the division. The Winchester ammunition is of good quality but I consider the revolver ammunition too heavy.

PHYSIQUE.

The physique of the men is good, they are almost all young, of good constitution and are well able to perform the hard work they are called upon to do.

RECRUITS.

No recruits were taken on at this Post during the year. One man who had left the Force last year applied for re-engagement and was accepted. Several non-commissioned officers and constables whose terms of service expired during the year were re-engaged.

HEALTH.

The general health of the division was good. No deaths occurred during the year.

In connection with this subject I would refer you to Assistant Surgeon Paré's report.

RATIONS.

The quality and quantity of the rations supplied on contract is all that could be desired.

KIT CLOTHING.

Is of good quality and the supply has been well kept up. The present issue of winter overcoats is a warm serviceable article.

ARMS, ARTILLERY.

Several of the Winchester Carbines in this division are old and the barrels are honeycombed.

Some were sent to Regina for repairs. The majority of them however are in good order and fit for service.

The revolvers are all in good working order.

The Artillery at this post comprises two 9-pr. M. L. guns and two 7-pr. brass guns, the latter are unfit for use and have been condemned. The 9-pr. guns are in good order.

DESERTIONS.

There were no desertions from this division during the year.

SAVINGS BANK DEPOSITS.

The sums deposited in the Government Savings Bank during the year amount to \$1,251.35. In addition to this a considerable amount was deposited in other banks.

STRENGTH OF THE DIVISION.

The division has not been at any time during the year up to its full strength and is at present about thirty under strength.

INSPECTION OF DIVISION.

The division was inspected twice during the year by the Assistant Commissioner in March, and during the present month. Inspector Burnett, V.S., inspected the division horses in March last.

The Onion Lake detachment is inspected monthly by an officer.

HORSES.

The majority of the horses in this division are serviceable.

There are eight which I would recommend to be cast and sold, they would realize fair prices. Those that were cast and sold last spring fetched very good prices. The serviceable horses are in first rate condition.

Very little sickness occurred amongst the horses during the past year.

The following shows the distribution of the division horses at present.

Battleford.....	32	saddle	18	team
Onion Lake	2	do	2	do
Regina	1	do	—	do
Lost, not yet struck off....	2	do	—	do

Total..... 57 horses

For any further remarks on this subject I would refer you to Veterinary Staff Sergeant Pringle's report.

MILEAGE.

The number of miles travelled by the division horses during the year amounts to 42,603 miles. This does not include the mileage travelled by our post teams.

SADDLERY AND HARNESS.

The saddles in use at the present time are in good order. A few of them require new cinchas. These have been requisitioned for and are now on the road. When they arrive, the saddles will be in first-rate order.

The numnahs are in excellent condition. Some of them which were a little worn on the sides have been strengthened by stitching leather on the parts liable to become worn by the cinchas.

The division is well supplied with Whitman bits.

There is a competent saddler in the post and all saddlery and harness is kept in thorough repair.

We have sufficient horse blankets and surcingles, all in excellent repair.

One set of harness was condemned and sold during the year.

TRANSPORT.

The transport is in good repair; it has been thoroughly overhauled and painted.

One platform spring waggon and one single buckboard are required. Jumpers and flat sleighs can be procured in the district at very reasonable rates. The want of a proper waggon shed was felt, but this will I trust be remedied as soon as possible. We have been using an old log stable but it answers the purpose very badly.

FORAGE.

The forage is of excellent quality. Hay was a good crop this year in the greater portion of the district and the quality supplied on contract was good. We have not received all the hay contracted for yet, as a considerable portion has to be hauled from the north side of the Saskatchewan and the contractors were obliged to wait until the river was frozen to cross it. Each load of hay was inspected by the Veterinary Staff-Sergeant and orderly officer before being stacked. The quantity rejected was very small. No difficulty was experienced by the contractors in saving and stacking the hay as the season was favourable.

Oats were a poor crop in this district and a large portion of our contract will have to be imported.

The oats already delivered by the contractors are of excellent quality, and the price, 57 cents per bushel, is much lower than last year.

STABLES.

A stable for sick horses is very much required at this post. At present we are using for the purpose the end of one of the old log stables; it is not at all suitable for a sick horse stable.

The other log stable is a very old building and should be replaced by a frame building. During the past year it has been mudded and whitewashed both inside and outside. The floor has been repaired and in some of the stalls the front portion has been taken up and an earthen one put down. This is much easier on the horses than having them standing on hard plank flooring.

The only frame stable at this post is roomy and well ventilated.

Another frame stable in place of the log building, and a new stable for sick horses, would give us excellent accommodation at this post.

EQUIPMENT.

The general equipment of the division is good. All articles required have been requisitioned for from headquarters and in all cases have been promptly supplied.

BARRACKS AND BARRACK FURNITURE.

Very little has been done during the past year in the way of improving the buildings at this post. The barrack rooms are still in the same condition as last year, the walls being plastered but the ceilings are covered with building paper. This does not add to the appearance of the rooms.

An addition was put to the wash room so as to form a small bath room. This is a great convenience to the men. The work was done by our own carpenter.

New offices are very badly needed. The building at present used as an orderly room and division office is an old log building. The walls are bad and the roof leaks in several places, although new shingles are constantly being put on. Every storm necessitates additional repairs to the roof.

The windows and doors of all the log buildings have been painted during the year.

Several improvements were effected in the quartermaster's stores by putting up additional shelving and carrying out other arrangements for the better classification of stores.

New barracks are urgently required at Onion Lake. The detachment at that outpost is quartered in an old log building, which is in very bad repair and will not last much longer. The rent we are paying for this house, \$15 per month, is too high. A comfortable house could be put up at a moderate cost, and it would be a saving to the Government to do so, as the monthly rent we have been paying for the past five years would more than cover the cost.

A new stable is also required at Onion Lake. The one at present used is our own property, but the logs are old and I do not think it will last another winter.

The half-way stopping place on the Fort Pitt trail was thoroughly repaired and enlarged last fall by our own men. A warm stable has been put up without cost to the Government. This is a great convenience to our patrols to Onion Lake, as it is the only house on the trail between the Bresaylor Settlement and Onion Lake, a distance of sixty miles.

Our barrack furniture—such as it is—is in good repair. I must again advocate the introduction of iron cots in place of the unsightly wooden trestles and boards which are in use at present and which make our barrack rooms look so untidy.

The cost of these cots would not be very much and the general appearance of the rooms would be greatly improved.

FUEL.

Wood is used altogether for fuel both at this post and at Onion Lake. It can be had for from \$2.50 to \$2.85 per cord delivered in barracks. It is becoming scarcer every year and the distance it has to be hauled is yearly becoming greater.

We use about 800 cords of wood every year as the post comprises so many scattered buildings that a large number of stoves are required.

A new horse power machine is required. The one in use at this post is constantly breaking down, especially in winter, as the severe cold affects the cast iron travelling wheels and causes them to break. This machine is known as the "Level tread horse power." I would recommend the purchase of a circular horse power. I am using one of these at present and I find that it works exceedingly well, there is so little machinery about it that it seldom, if ever, gets out of order. The old "Level-tread" could be put in order, and sold. A fair price could be realized on it as it would answer during the summer months for threshing. Last winter we were obliged to cut all our wood by hand, and axes and bucksaws were kept going constantly to keep up the supply of wood.

TELEPHONES.

The orderly room is connected by telephone with the telegraph office and the stores on the north side of the Battle River, and with the industrial school and Indian office on the south side. It is a great convenience and saves a good deal of travelling between the barracks and town.

There is no central office established in town yet, as there are not sufficient instruments in use.

TELEGRAPH LINES.

There is still only one line passing through this place, the main line of the Government Telegraph Service between Qu'Appelle and Edmonton.

As this line passes through Onion Lake we are able to communicate with our detachment there.

FIRE PROTECTION.

The post is very well protected against fire. Babcocks, fire pails and barrels are in all quarters and offices, and are kept constantly ready for immediate use. A hand fire engine is kept over a tank holding 3,000 gallons, and there is sufficient length of hose to reach to the barrack rooms and stables.

All buildings in which fires are kept have brick chimneys, and the stoves and stove pipes are regularly examined.

Fire parades are held a couple of times every month, and the men are told off to their several positions in case of fire.

WATER SUPPLY.

All water required for drinking and cooking purposes is hauled from the Battle and Saskatchewan rivers, about one mile distant.

The horses are watered from the well in the barrack square.

ROADS AND BRIDGES.

The principal trails in this district are in good order and are bridged wherever necessary.

The Saskatoon trail requires more attention than any other owing to the number of creeks. These have all been bridged over during the year.

The Fort Pitt trail is in very good order. The Swift Current trail is very little used now.

The trail principally used by freighters to Saskatoon is that which passes by Red Pheasant's reserve and Lizard lake. The bridge over Battle river requires painting. I understand an allowance of \$1,000 has been made in the Estimates for this purpose.

FERRIES.

There are no licensed ferries in the district. In the early part of the year hopes were entertained of having a steam ferry on the Saskatchewan river at this place.

Considerable correspondence took place between His Honour the Lieutenant-Governor and the Member of the Assembly for Battleford, with a view to establishing a ferry. The project however, fell through, and nothing definite was done in the matter.

This was a great disappointment to the settlers on the north side of the Saskatchewan, and to many of the farmers of Battleford, as there is considerable danger and difficulty experienced in crossing the river.

LIQUOR LAWS.

No change has been made in the liquor laws during the year. The objections to the present permit system are many, and are so well known that further comments are needless.

There have been a few infractions of the liquor law in this district during the past year. I have referred to these in another portion of my report.

SETTLERS.

Very few settlers have taken up homesteads in this district.

The absence of railway communication is a drawback.

Several families passed through last summer on their way to Edmonton. Such of the settlers who have been in the district for the past few years are doing well and are in good circumstances.

A few settlers have taken up homesteads in the Eagle Hills; and the Jackfish Lake district is rapidly becoming populated by families from various portions of the district who have been attracted thither by the rich land and abundance of hay.

GAME.

Swans, geese and waxies were very plentiful last spring, more so than for many years, ducks were not so plentiful owing to the lowness of water in the lakes; most of their old feeding grounds, large lakes, being dried up.

Chicken and partridge could be seen in hundreds which goes to show that the Game Ordinance has been respected by the white sportsmen.

The half-breeds and Indians made their usual summer hunt, or at least slaughter, killing both geese and ducks in large numbers in the moulting season. If some means are not taken to prevent Indians killing the game out of season, before many years it will be as scarce as it is in many parts of Ontario.

Antelope, black-tail deer and elk were numerous, the first named could be seen in numbers on the plains south and west of here. Last fall, chicken, partridge, and rabbits were very plentiful, but swans, geese and ducks were scarce, of course some good bags were made, but sportsmen had to go long distances.

I attribute this scarcity to Half-breeds and Indian killing them in moulting season.

INDIANS.

The Indians on the various reserves in my district have been well behaved and the instructors have had no cause to complain of their conduct.

There is very little difference in the number of Indians on the Reserves compared with last year, the number of births exceeding the number of deaths by only one. A few Indians left for the South.

The reserves are well managed and a considerable amount of farming is done. The amount of hay put up on each reserve averages about three hundred tons, and there are from 150 to 200 head of cattle on each reserve. The crops raised by the Indians were very successful, amounting to several thousand bushels of wheat and oats. A small quantity of barley and peas were raised. Root crop such as potatoes and turnips were excellent.

HALF-BREEDS.

There is not much distress amongst the Half-breeds in this district. The majority obtain their living by freighting. Some are employed by farmers and settlers, and some manage to eke out a livelihood by hunting and various chance jobs which come in their way. In September last I offered employment mudding the log buildings at \$1 per day. I found that I could not get Half-breeds to do the work and was obliged to send to one of the reserves and employ Indians. This shows that there cannot be very much distress existing when there was difficulty experienced in getting them to work for \$1 per day.

A small amount of provisional relief was issued in early part of the year.

PRAIRIE FIRES.

The district was remarkably free from prairie fires during the year. There were only two occasions on which fires were noticed in the vicinity. On both these occasions parties were sent out and succeeded in extinguishing the fire before much damage was done. One case was brought up under the ordinance respecting prairie fires but was dismissed, the defendants paying costs.

THE CROPS.

The crops this year are very much below the standard owing to the unfavourable season for seeding.

The yield of grain was not up to the amount expected by the farmers.

The following figures show the average yield per acre.

Wheat, about.....	800 acres, average.....	20 bushels.
Oats do	500 do do	30 do
Barley do	100 do do	25 do

The root crop was a good one, potatoes especially being a splendid crop.

RANCHING.

The prospects of ranchers and stock owners for the coming year are very favourable and the number of cattle in the district is steadily increasing.

An impetus was given to this trade last fall. A cattle buyer from the east visited all parts of the district and bought a large number of cattle, giving very good prices per head. The railway being such a short distance off, gives increased facilities for the shipment of stock, and already there are several of the farmers who have imported valuable animals.

Last winter was very mild, and cattle came out in splendid condition in the spring.

The following list shows the principal owners of stock in this district :—

Name.	Residence.	Cattle.	Horses.	Sheep.
R. Wylde.....	Battleford.....	200	15	
W. J. Barker.....	do.....	150	4	
C. M. Daunais.....	do.....	140	17	
Finlayson & Day.....	do.....	150	8	
F. A. D. Bourke.....	do.....	75	15	
W. H. Sinclair.....	do.....	100	4	
L. Bourrie.....	do.....	50	13	
Speers & Son.....	do.....	75	10	50
B. A. Lawson.....	do.....	150	2	250
M. Thibault.....	do.....	40	30	
R. C. Laurie.....	do.....	20	9	50
Beliveau & Robson.....	do.....	68		
S. Warden.....	do.....	60	6	
Richard Bros.....	do.....	80	30	
B. Prince.....	do.....	30	20	
McFarlane Bros.....	do.....		180	
G. Marchand.....	do.....		75	
T. Dewar.....	do.....		60	
H. Applegarth.....	Jackfish Lake.....	75	10	
E. Bourassa.....	do.....	60	8	
M. Cote.....	do.....	60	6	
H. Couture.....	do.....	60	12	
J. Daudelon.....	do.....	30	20	
D. Cooper.....	do.....	50		
Cinnamon Bros.....	Bresaylor.....	130	20	
A. Taylor.....	do.....	30	20	

In addition to the foregoing, there are about 2,000 head of cattle and 800 horses owned in small bands by various persons.

I have the honour to be, Sir,
Your obedient servant,

JOSEPH HOWE,
Inspector, Commanding "C" Division.

APPENDIX K.

ANNUAL REPORT OF INSPECTOR J. V. BEGIN.

LETHBRIDGE, 18th December, 1891.

SIR,—I have the honour to submit herewith my third annual report of the duties performed by the North-West Mounted Police contingent under my command in the District of Keewatin, covering the past summer season.

Having received instructions from the Commissioner, I left Macleod on the 1st of June, and reached Regina the next day. Here I received orders from the Commissioner to proceed to Winnipeg and report to His Honour the Lieutenant-Governor of the District of Keewatin. On my arrival at Winnipeg on the 7th June I reported at Government House for instructions, and received from His Honour, through you, directions as to the duties to be performed in the district. In accordance with these instructions I proceeded to Selkirk on the 8th and inspected the patrol boat "Keewatin." I found her in full repair and ready for the season's work. I then purchased supplies for the Norway House detachment and started the patrol boat on the 11th, with the detachment supplies on board. Mr. Vincent Smith was in charge of her as sailing master, with one man. I found that the steamer was to leave on the 15th for Norway House, and I wired to Regina for the men; they arrived at Selkirk on the 14th.

DEPARTURE FOR NORWAY HOUSE.

I then took passage with the party on the "Red River," which left next morning for Norway House. On Lake Winnipeg, off Big Island, I met the patrol boat returning to Selkirk. The sailing master reported to me that while at anchor about two miles from Egg Island, they had been caught in a squall, and the chain, which was a new one and of proper size for the boat broke, and in consequence the anchor was lost. The sea was very heavy, and through carelessness, as reported to me, the boat was filled with water, and some of the provisions purchased by me at Selkirk were spoiled; the rest were put on board the steamer. Some fittings, such as ropes, canvas cover for the boat, and other small articles, were either lost or ruined by the storm. I placed a constable on board and directed the sailing master to return to Selkirk with the boat for an anchor and chain and the other articles which required replacing, and to report to His Honour upon arriving. I then proceeded north and came to Warren's Landing on the 18th. The captain of the steamer and myself, leaving the steamer at Warren's Landing, went down the Nelson River in a small boat to engage a pilot, the channel in Playgreen Lake being intricate and shallow. The captain returned with the pilot and arrived at the Hudson Bay Company's post next day, with the party on board the steamer.

NORWAY HOUSE.

I placed the detachment under canvas near the Hudson Bay Company's post, with instructions to Corporal Mills, left in charge. The detachment consisted of Corporal Mills, Constables Garean and Bigelow. I then carefully investigated the supposed cause of the death of an Indian, as reported, on which I made a special report to His Honour on my return.

I called a meeting of the Chief, Councillors and Indians of the Norway House Band, and learned from them that during the winter everything had been peaceful and no crimes had been committed. There had been no liquor sold or given to

Indians; I carefully looked into this. This was corroborated by Horace Belanger, Esq., J.P., and by others. One serious charge was laid before me, but upon examination I find that it had been investigated by Mr. Mackay, Indian agent of that district, who came to the conclusion, as I did, that there was no case to justify action.

GAOL.

Referring to His Honour's instructions to expend \$100 on the old Norway House Gaol for a temporary lock-up, and the recommendation afterwards of Mr. Belanger, J.P., and Rev. Mr. Eves, that a building should be put at Rossville instead, as being a more suitable place, I have to report that the grated oak doors and windows arrived in due course, but that meantime the Indian agent of this treaty district had reached this point, and for some reason which I cannot explain objected to its being built on the Rossville reservation, which would have been the most suitable place, and that Rev. Mr. Eves has since decided to place it on an island between the reservation and the fort. This place is not so suitable, but the fact of the Indians knowing ever since I first came that arrangements were being made for a lock-up has had all the good effect which the actual completion of the building would have had. If the building has not proceeded too far, I would recommend to His Honour the using of the flooring, dressed lumber, and other material there in the alteration of the stone powder house at Norway House for this purpose, and to allow the building on the island to be used for the Mounted Police station.

RETURNING TO WINNIPEG FOR FURTHER ORDERS.

I left Norway House on the 22nd for Selkirk, which I reached on 26th June, and next day proceeded to Winnipeg and reported to His Honour for further orders. I brought with me an imbecile from Norway House to be placed in an asylum. As there is no provision for this class of unfortunates in the district of Keewatin, I had a great deal of trouble in placing him in proper keeping: finally I had him admitted at Stony Mountain. I left Winnipeg for Selkirk on the 8th July, and reached that place the same evening. I found the patrol boat waiting there for orders, having been supplied with anchor, chain and other articles. On the 11th I accompanied His Honour on a trip on the lake on board the Keewatin as far as Elk Island; then we left the boat with Constable Grogan in charge, with a guide and one man, and returned in a canoe to Selkirk, arriving on the 17th July. I then received instructions to proceed to the north end of the lake, and left the next day by the steam barge "Sultana." I passed a few days at Horse Island, where there is a station of a fish company and about thirty men are employed. I then patrolled the north shore of the lake, making searches for illicit liquor. My visit to that part of the lake had been expected for some time, and I am pleased to state that the liquor law had not been infringed. I crossed over to Grand Rapids on the 22nd July, where a detachment of North-West Mounted Police had been stationed previously for two years. The settlers were still expecting some police, but were greatly disappointed at not having any; they would feel more protected if a detachment was stationed there. These facts were corroborated by the officer in charge at the Hudson Bay Company. I learned also that people from the east were coming across country by Lake Winnipegosis, crossing at Mossy Portage into Cedar Lake for the purpose of visiting the amber field found on the west shore of the lake (Cedar), about two miles and a-half south of the Saskatchewan River. Thinking that liquor could be brought there and sold or given to Indians, I thought it was my duty to proceed at once to ascertain the state of affairs in that part of the country which is in the North-West Territories. Therefore, I left the same day in a canoe with three men, following up the River Saskatchewan to Cedar Lake, making my way according to the wind by the north side of the lake, and arrived at the amber field on the 25th, about fifty miles from Grand Rapids. I visited the place where amber is found, but saw no one, only traces of persons having worked on the premises shortly before my arrival. I left for Grand Rapids on the 27th. On my return I visited Mossy Portage

and found that people had portaged there previously, but no one could be seen at the time. I reached Grand Rapids the next day, and Horse Island the 29th of July. I left Horse Island on board the same barge on the 30th and arrived at Gull Harbour the next day. Having my Peterborough canoe on board, I left the steamboat, taking one constable in the canoe, for the purpose of meeting the patrol boat, and followed the shore of Black Island and the east side of the lake. On meeting the patrol boat I found her in good sailing order. I left orders with the constable in charge to meet me with the "Keewatin" at Fort Alexander on my return from Lac Seul. I then returned to Selkirk by canoe and thence to Winnipeg, and reported at Government House. On my arrival I found a letter of instructions from His Honour through the assistant private secretary, directing me to visit places on the Winnipeg and English Rivers with a canoe, on account of information received through a Hudson Bay Company's officer that liquor was being taken into Eagle Nest and White Dog reservations, places which are quite near the boundary of the district. After conferring with His Honour it was decided that I should accompany him to Lac Seul, and thence go down to Lake Winnipeg, along the Winnipeg and English rivers, which form the boundary line there, visiting the Indian reserves along the route in the south-east of the district of Keewatin.

LAC SEUL TRIP.

I left Winnipeg on the 7th August by rail, accompanying His Honour on an official visit to Lac Seul. On our arrival at Wabigoon tank at 5 o'clock a.m. the next day, after purchasing the necessary provisions for the trip, we started by making a portage nine miles long over a very rough road, the Indians engaged for the trip portaging the Peterborough canoe brought from Winnipeg. At the north end of the portage the party embarked in three canoes paddled by Indians, and crossed Sandy Lake, six miles long; then made a portage of three-quarters of a mile to Lake Minnetakee; then travelled all the afternoon and camped for the night about 10 p.m. near Moose Rapids. The next day we travelled till noon against a strong head wind, and then camped, it being Sunday. On the morning of the 10th we started as soon as it was light and portaged around Pelican Rapids; then passed Frenchman's Head, where there is an Indian settlement; here we were joined by several canoe loads of Indians, who accompanied His Honour and party to Lac Seul post. In order to save time, although we were in Lac Seul waters, we made three portages from half a mile to one mile long. We passed through a long marsh filled with wild rice, then came on the open waters to Lac Seul again, and passing round a point came in sight of the Hudson Bay Company's post at White Pine Narrows, on each side of which were the houses and gardens of the Indian population, who number about 500.

ARRIVAL OF HIS HONOUR AND PARTY AT LAC SEUL.

James MacKenzie, a retired officer of the Hudson Bay Company, received His Honour and party on arrival. The same afternoon I attended His Honour at a conference held at the Hudson Bay Company's post, where he met the chief and councillors and the Indians of Lac Seul, together with the officers of the Hudson Bay Company. After his explanation to them of the reason for his visit, and after having sworn Mr. James MacKenzie as a justice of the peace for the district of Keewatin, and distributing a gratuity to the Indians, His Honour prepared for his return the next day, and left on the 11th for Winnipeg, having given me orders to go over and patrol the country westward between Lac Seul and Lake Winnipeg.

LAC SEUL,

Lac Seul is about 70 miles long by two or three wide, and contains many small islands well covered with mixed timber. It is also well bordered with timber, which though small is valuable, and will become more so to the prairies of the South and West; it consists of pine, spruce, tamarac, cypress, poplar, birch, balsam, cedar, mountain ash, and a few soft maples.

FISH.

Fish is abundant, principally white and jackfish. The Hudson Bay Company's post has been established there for many years, and at one time was one of the most important stations, with a boat-building shop, where boats were supplied for the service westward to Winnipeg and eastward to James Bay. Mr. MacKenzie, a retired officer of the company, has a beautiful garden, where vegetables of all kinds grow to a large size, and currants do very well. Berries of every kind are found along the shores of the lake. Wheat, oats and barley ripen well here, and are seldom injured by frost; in this part of the country the frost is not so excessive as on the line of the Canadian Pacific Railway south of Lac Seul. Timothy hay and red clover are also to be seen near the Hudson Bay Company's post. This lake is the most beautiful I have yet seen in the district of Keewatin.

DISTRICT INDIANS.

The Indians settled in this district live well, having abundance of fish and fur-bearing animals; each family has a good house and a piece of land cleared round it, where they grow potatoes and other vegetables. Some of them go working on the Canadian Pacific Railway during the summer months.

DEPARTURE FROM LAC SEUL.

Taking one of the bark canoes purchased at Lac Seul, and the canoe brought from Rat Portage, I proceeded down Lac Seul camping near Big Island that night. The next day we camped at Ear Rapids, and the following day arrived at the junction of the Mattawa River, where a Hudson Bay Post is being built. I stopped and saw the officer in charge, explaining to him who I was and what were my duties. I then followed the English River, which is really a succession of lakes with rapids between, for three days; then left the waters of English River, making three portages and passing small lakes intervening, till I came to Sandy Lake, which empties into the Winnipeg River. I then went up the Winnipeg River, and camped on the Indian reserve north of Rat Portage, and arrived at that town the following day, the 18th August. My reasons for going to Rat Portage were first, to get my Peterborough canoe, previously left there, and secondly, to engage men who knew the river to go to Fort Alexander, as the Lac Seul Indians returned by Wabigoon. It was difficult to get men, as the portages are many and the river dangerous, on account of its many rapids. Mr. Matheson, of the Hudson Bay Company, finally engaged for me one Indian, and sent his store-men to accompany me to White Dog reservation, where I would probably get Indians acquainted with the river. I left Rat Portage on the 21st and reached White Dog on the 22nd. There I learned from the Rev. Mr. Spence that liquor had been brought there on different occasions, and some forwarded to Indians on the Keewatin side; but for two years, since they had heard that the police were patrolling the district, no liquor has been seen going in that direction. This gentleman was very pleased to see a preventive officer, as he said it would have a good effect among the Indians not only in the district of Keewatin but also in that part of the country which is in Ontario. At White Dog I engaged two men, and left on the 23rd for Fort Alexander crossing on my journey from Lac Seul forty-two portages and running a number of rapids. Arrived at Fort Alexander on the 27th, where the patrol boat "Keewatin" was awaiting me, and left on board of her with the Indians brought from White Dog the next day for Selkirk. On account of adverse wind we did not reach Selkirk till noon on the 1st September, and Lower Fort Garry in the afternoon, where His Honour had ordered me to take the boat. The Keewatin sailed well, and was in very good working order. We passed the place where one of Captain Robinson's barges was wrecked the week before. At lower Fort Garry I left the boat and men, and returned to Selkirk; next day I drove to Winnipeg and reported at Government House on my arrival, and learned that His Honour had left for Ottawa. At 2 p.m. I was served with a summons from the secretary of the Public Accounts Committee to appear before the committee at Ottawa on Friday, the 4th. I then wired to the Commissioner for

instructions. On his reply I started for Ottawa the same day at 5.45 p.m., and arrived there on the morning of the 5th of September. I then reported to the secretary of the Public Accounts Committee and to His Honour. Owing to the lateness of the season, instructed by His Honour, I made all the necessary arrangements to withdraw the detachment on the Nelson River, and applied to the proper authorities for one month's leave of absence, on the expiration of which I reported at Government House on the 15th October.

ALBANY RIVER.

It was a matter of regret to me that my limited time and the necessity of enquiring into some rumoured breaches of the Act relating to intoxicants down the English River prevented my visiting at least the upper waters of the Albany River. One of the branches of this great river rises within thirty miles of the north shore of Lake Superior, and a more northerly branch, the main one, has its source not far from Lac Seul. Though exceedingly broken in its upper waters by falls and rapids, yet it is said to present 250 miles of uninterrupted navigation from its mouth westward, and as there are numerous small bands of Indians along its course who have communication by water with points along the main line of the Canadian Pacific Railway, north of Lake Superior, it would be expedient for a station to be established near the mouth of the English River to make a visit of inspection over the whole course of the Albany River next summer.

METEOROLOGICAL STATIONS.

In the absence of meteorological stations at northern and north-eastern points where it is desirable to station parties of Mounted Police, it would not, in my opinion, interfere with their other duties to take and record such of the minor observations with a barometer, thermometer, rain and wind gauge as practicable. This, of course, would only apply during the summer months.

I am also of opinion that they might do good service in recording, in a rough way, the depths of water at the entrances to small harbours, along narrows, in rivers and the smaller lakes, as my experience goes to show that boat and canoe service is very popular among the men, who would take an interest in making such works as accurate as possible.

STEAMER REQUIRED ON LAKE WINNIPEG.

With reference to the continued employment of the patrol boat "Keewatin," I would again refer to my report of last year, recommending, for the joint use of the Department of Marine and Fisheries, the Indian Department, and the district of Keewatin, a steamer such as I then gave a general description of. Such a steamer should differ from the steamers at present on the lake in being able to ride out in deep water in any gale on the stormy lake, because until the lake is properly lighted, charted and buoyed, it must be always, as it is now, unsafe for the present class of large craft plying upon it, three of which were this season lost, and I am of the opinion also that the building and maintenance of such a steamer would cost the departments mentioned in the long run very much less than their present method of transportation. With special reference to the North-West Mounted Police service in Keewatin, special use would still have to be made for rivers, portages, and other services requiring light draught, of the Peterborough and other canoes, skiff and boats now employed. It is impossible for the inspecting officer in charge of the police detachments in the district to perform his duties efficiently when having to depend on the uncertain trips of freight steamers and steamers used by the fishing companies. It is quite true that the police have had for their use the patrol boat "Keewatin," which I have found in my many trips on which I have been on board her to be a staunch, safe and well equipped boat; but to use her for the purpose of inspection is necessarily to take her away from her ordinary patrol duties; and my remarks about the want of charts, buoys, &c., apply to her safety in the same way as to that of the steamers and other larger craft. To have an entirely competent

man in charge of her needs one with all the qualifications of a lake pilot; and the sum necessary to secure such a man would secure one for the kind of steam craft I have mentioned.

Corporal Mills, left in charge of the detachment at Norway House, reported to me that during the summer patrols were made frequently to Warren's Landing, and once a week to Roseville mission.

His duties were to prevent the illegal importation of intoxicants, and to do everything in connection with police duties, to give assistance to the Indian Department and to steamers and other small craft plying on the lake.

On the 31st of July he moved his detachment on the treaty ground, so as to assist the Indian agent in making the treaty payments, and remained there till all was over.

The conduct of the Indians in the district was very good; they seemed to be satisfied with the payments and everything in general.

On the 12th of August he left on board the Hudson Bay Company's boat for Poplar River, to visit that part of the district; found everything quiet and peaceful.

Searches were made in the freight which came by steamers and York boats to Norway House.

According to instructions, he broke camp on the 22nd of September, taking the last steamer of the season with his detachment for Selkirk, and then took train for Regina.

It is a great satisfaction to me to be able to conclude my third report to the Commissioner with the assurance that up to this date no serious case of crime has occurred in the district of Keewatin; and I would respectfully submit that this gratifying fact is due, in a large measure at least, to the use which has been made of the small number of men detailed for service under my command. I am much pleased also to hear of Mr. Eves' statement regarding the vigilance and good conduct of the detachment at Norway House, as well as his opinion of the value of the Force in maintaining law and order and enforcing the prohibition of intoxicants. I may also say in this connection that wherever I have been in the district the chiefs, councillors and head men have expressed to me their satisfaction with the police, and the good effect of their influence in the decrease of polygamy and the prevention of intoxicants. As an instance of the former, I may mention that when I last was at Oxford House I was informed that many Indians had more than one wife, while one man had as many as six. I sent him word that his conduct was illegal, and that the first police visit might bring him trouble if he continued his illegal practice. It had been my intention to visit Oxford House, as promised to the settlers and Indians last summer. I was fortunate, however, in meeting at Norway House J. K. McDonald, J.P., the Hudson Bay officer in charge of the Oxford House District, and from him I learned much of the condition of the Indians. Mr. McDonald told me also that during the winter the Indian who had the six wives had separated from all but one, evidently fearing the consequences, thus showing the moral effect of the presence of the police, even at a distance. I intended to make my visit there late in the fall, but the imperfect nature of the steamboat communication and my trip to the head of the lake and the west side, together with my subsequent journey to Lac Seul and down the English and Winnipeg rivers, prevented my being able to do so before September; even then I would have endeavoured to carry out my promise to the settlers there had I not received a preemprary summons to appear before a parliamentary committee at Ottawa, where I was detained until after the departure of the last steamer of the season for Norway House. All this difficulty in inspecting the district would be avoided if there were a specially constructed steamer, as referred to in my report of last year.

The distance travelled on patrol by myself and the Norway House detachment, amounted to 4,844 miles.

I have the honour to be, Sir,

Your obedient servant,

J. V. BÉGIN,

Inspector North-West Mounted Police.

The Commissioner
North-West Mounted Police,
Regina.

APPENDIX N.

HEADQUARTERS,
REGINA, 20th February, 1892.

SIR,—I have the honour to place in your hands to-day the annual reports of the following medical officers, of the North-West Mounted Police, for the year ended 30th November, 1891 :—

Assistant Surgeon	Aylen,
do	Dodd,
do	Paré,
do	Fraser,
Acting do	Bain,
do do	Mewburn,
Staff-Sergeant	Braithwaite.

ANNUAL REPORT OF SENIOR SURGEON A. JUKES.

The unusually late date at which these reports are forwarded must be attributed principally to the circumstance, that for the last three months or more, Dr. Haultain, the assistant surgeon at headquarters, has been continuously confined to his quarters by illness and unable to perform any duty whatever. The whole medical service relating to the headquarters post, in general, and to the headquarters hospital in particular, in addition to the special duties of senior surgeon, which uniformly depends on myself alone, the nature and extent of which are very imperfectly understood and appreciated, involving an amount of labour and responsibility altogether greater than in my seventy-first year, and with impaired health, should have been undertaken by me, have devolved upon myself personally and alone.

The arrival of Assistant Surgeon Fraser, from Calgary, a few days ago, and his prompt assumption of the special duties of assistant surgeon to the headquarters hospital, has afforded me the first opportunity available for office work, and, would time permit, I could in the course of a few days, submit my tenth annual report as senior surgeon of the force. I am, however, informed by the comptroller that your own report, and those of other officers of the force, are now in the hands of the printers, and unless the reports of the medical officers are placed in his hands to-day, they will be too late. He has further assured me, that in consideration of the enormous amount of work which has been thrown upon me during the past three months, no censure can possibly be passed upon me for having devoted the whole of my time to the sick under my charge and other professional duties, in preference to the writing of an annual report.

I have the honour to be, Sir,

Your obedient servant,

A. JUKES, M.B.

Senior Surgeon.

To the Commissioner,
North-West Mounted Police,
Regina.

APPENDIX O.

ANNUAL REPORT OF ASSISTANT SURGEON P. AYLEN.

NORTH-WEST MOUNTED POLICE,
MACLEOD, 1st December, 1891.

SIR.--I have the honour to submit for your information, my annual report for the year ending 30th November, 1891.

The first part of the year I was stationed at Calgary, and had medical charge of "E" Division.

Constable Reading was admitted to hospital at Calgary, unconscious, on the morning of 13th December, suffering from concussion of the brain, and fracture and dislocation of the fifth and sixth cervical, and fourth, fifth and sixth dorsal vertebræ; he died the following afternoon. All these injuries resulted from his horse falling and rolling over him on a pile of stones. Constable Reading was a great favourite with both officers and men, who deeply regretted his death.

Constable Byron committed suicide at Calgary by shooting himself between seven and eight o'clock on the evening of the 8th of June. The bullet entered the head an inch and a half below the right eye, and was found in the brain about an inch above the right ear.

The sanitary condition of this post has been excellent.

On the 6th of August I took medical charge of "D" and "H" divisions, stationed at Macleod. The health of the men of this district has been excellent since my arrival here, the only serious case being that of Reg. No. 2140, Corporal Armstrong, of "D" Division, who had both of his feet badly frozen, and will lose the major toe and two joints of the second and third toes of the right foot.

The drugs, instruments and appliances are in good condition, and with the exception of a few articles, the stock on hand will be sufficient for the year.

The hospital is very comfortable at present, but we are badly in need of two or three invalid chairs. The floors and walls have been painted, which makes quite an improvement in the general appearance of the hospital. The strictest attention is paid to the sanitary condition of the post and surroundings, weekly reports being made respecting the same.

I have the honour to be, Sir,
Your obedient servant,
P. AYLEN, M.D.,
Assistant Surgeon.

To the Commissioner,
North-West Mounted Police,
Regina.

NORTH-WEST MOUNTED POLICE.

Lepoma (removed).	1	30	Still under treatment.
Minor surgery.	152	34 $\frac{1}{2}$	Recovered and returned to duty.

P. AYLEN, M. D., Asst. Surgeon.

APPENDIX P.

ANNUAL REPORT OF ASSISTANT SURGEON L. A. PARÉ.

BATTLEFORD, 5th December, 1891.

SIR,—I have the honour to submit to you my report for the year ending 30th November, 1891.

I am happy to state that we have no death to record in this post this year, and I have also much pleasure in stating that the health of the men has been very good, with the exception of three cases of fever which occurred in July last. This, I think, speaks well for the sanitary condition of the post, considering that there were a number of cases in town and in the country around. The proportion has been reversed this year; in former years (1886 for instance) I am informed that by far the largest proportion of cases occurred in barracks. This year, as I have stated, the proportion is reversed, it being at least as 1 is to 3½ in our favour, and I am only counting the well authenticated cases, but there were others reported which I don't know sufficiently about to take into account. There were no enteric symptoms to speak of in the barracks' cases, but the typhoid type was well marked in three of the outside cases. The temperature in some of the cases reached as high as 105°. The usual anti-periodic treatment was adopted. Quinine was given during the remittance until it produced ringing of the ears and slight deafness, and in the exacerbations a dose of antipyrine, which last remedy generally had the effect of reducing the temperature almost immediately one or two degrees.

The numerous cases of ailment, all accompanied with more or less fever, all offering about the same symptoms, which occurred at that time, leave no doubt as to the existence of a special atmospheric causative agent acting epidemically over this district. This atmospheric influence has much helped to swell our sick list. I may here remark that in most cases no correct idea can be formed as to the average duration of a disease from our sick lists by the usual way of dividing the number of days of a given disease by the number of cases, as for the information of the officer commanding, for the efficacy of the service and discipline and the protection of the men, the name of every man who is not fit for every duty of the post has to appear on the sick list. Thus, for instance, in a case of "Adenitis," the name of a patient who is practically cured and who requires no further treatment, has still to appear on the sick list, if to avoid all chances of another accident (which on account of a first injury would mean grave complications, a permanent enlargement, for instance) you deem it more prudent to exempt this man from riding. In such cases the name of the disease which has been the cause of this excuse continues to appear for three and four weeks after your patient is, as I have said, actually cured, and thus the average duration is greatly increased. I have mentioned Adenitis hap-hazard. What I have said of this disease might be said of almost any other disease which appears on our sick list, of sprains, even of colds, and this will be easily understood. In a case of sprains of knee, foot or ankle, a patient may be practically cured, but to drill in tight breeches and regimental boots may not be quite comfortable. Well, to exempt him wearing regimental boots and breeches and allow him to do whatever duty may be required of him in fatigue or loose breeches, his name appears again. It has been the practice with me to enter on the daily sick list the name of the disease which has at first disabled him, opposite whatever exemption of duty or regulations is deemed necessary as a measure of prudence, not as treatment. In other circumstances there would be no occasion for such consideration. What brings me to give this explana-

tion is the fact that a prominent Montreal physician who is preparing a work on pathology has amongst other questions asked me some information about the influence of the climate of these regions on diseases, injuries, etc. on their nature and duration, and I thought I would caution him in the interest of science and any others who may be gathering statistics (as far as I am concerned at least) against taking these reports as a source of information, without taking into account these exceptional conditions.

We had a case of paralysis (drop wrist) resulting from lead poisoning. The patient Reg. No. 1406, Const. Parson, has made a perfect recovery. In fact, he states he now enjoys better health than he has for many years, but as he shows a great susceptibility (this being a second attack) I would not allow him to return to duty in the paint shop, and he is now doing straight duty.

According to instruction I proceeded to Onion Lake, on 9th April, to attend Reg. No. 2214, Constable Callahan, reported suffering from inflammation of the lungs. A supply of necessary drugs is kept at the detachment, with written instructions how and when to use them, and as I stated in my report of 17th April, anything that could be done, had been done in the case by the time I arrived there, and I was able to proceed back to Battleford in a couple of days, leaving Constable Callahan in a convalescing state.

The general appearance and sanitary condition of the post has been greatly improved in many ways during the last twelve months. Some more of the old log buildings were pulled down, and the old latrines, three in number, were thoroughly emptied, the contents being disinfected, carried well away on the prairie and covered with dry earth, the pits filled in with earth and chloride of lime. One large one has been dug 12 feet deep, lined with boards, and so constructed that earth and disinfectants, &c., can be easily thrown in, so as to prevent any dangerous and obnoxious exhalation. This plan of latrines is not what I have recommended in my previous reports on the subject, and is universally condemned by all the highest authorities, but still is an improvement on the others.

Storm windows with a ventilator in each have been fitted on all the windows in the barrack-rooms, which with our high winds and the nature of the construction here, will allow plenty of ventilation, and will greatly add to the comfort of the quarters. The addition recently made to the wash-room makes it all that can be desired for usefulness and comfort. The men now, instead of having to wash and bathe in the barrack-rooms, a very undesirable state of things (*vide* annual reports for 1889-90) as it not only kept the rooms in a constant damp condition, but gave them a very untidy appearance, have now a good wash-room leading out of the barrack-rooms, and a bath-room leading out again from that where there is a good boiler, and they can have a comfortable bath whenever they desire it; in fact, they have everything in that line they could possibly wish for. The greatest attention has been given to disinfection, and disinfectants were weekly and at times bi-weekly distributed wherever deemed necessary.

The hospital answers all the requirements of the post. The inside requires painting and kalsomining, which would greatly add to its cheerfulness, general appearance and comfort. A couple of invalid chairs, night-shirts, sheets and pillow-cases, &c., requisitioned for would leave hardly anything to be desired.

Before closing, I must beg to express my appreciation of the promptness with which drugs and hospital comforts, that have been requisitioned have been sent us. A small additional supply of drugs will be required for next year.

I am happy to be able to state that my hospital staff (the same as last year) Staff Sergeant West and Constable Harrison continue to deserve all praise for the manner in which they discharge their respective duties.

I have the honour to be, Sir,

Your obedient servant,

L. A. PARÉ,
Assistant Surgeon.

To the Commissioner,
North-West Mounted Police,
Regina.

L. A. PARÉ,
Assistant Surgeon.

APPENDIX Q.

ANNUAL REPORT OF ASSISTANT SURGEON H. DODD.

NORTH-WEST MOUNTED POLICE, "A" DIVISION,
MAPLE CREEK, 1st December, 1891.

SIR,—I have the honour to submit to you my fifth annual report, covering the period of the previous twelve months to the present date.

The health of the men in Regina under my charge, I am glad to be able to report, as usual, leaves nothing to be desired, there being remarkably few cases of accident or illness during the whole year, and the sick parades consequently were very light. This may be attributed to the fine physique of the men generally, that of the recruits being exceptionally good.

I should consider myself failing in duty if I refrained from again drawing your attention to the great necessity of providing *eave-troughs* for catching and saving the rain water from the roof of the Regina hospital. There are two reasons for this: first, I am convinced from careful observation that the foundation of the hospital will permanently suffer if this is not attended to; and secondly, the rain water saved would be a great boon to the service of the hospital.

The side-walk to the hospital made this year is of much benefit and of the greatest practical use.

Since the removal to the territorial gaol in Regina of all civilian prisoners, the light list of prisoners speaks well for the conduct of the men. In my daily visits I found the guard-room in Regina barracks invariably in a perfectly satisfactory condition with regard to cleanliness and sanitary arrangements. The treatment of prisoners was good, calling for no comment whatever.

The only accident of any importance was that of Constable Jenkins, who was admitted into hospital on 14th March, 1891, with fracture of the leg. He was returned to light duty on 28th June and full duty on 29th July, and has since been transferred to another post.

Reg. No. 1920, Constable Outram, suffering from rheumatism, was taken into hospital on 18th October, 1890, and remained until 12th March, 1891, when he was invalided.

Reg. No. 2195, Staff-Sergeant Mason, was taken into hospital on 12th January, 1891, suffering from pleuro-pneumonia. This was a very severe case, but he was, I am glad to say, returned to duty on 17th March, perfectly convalescent and has remained so up to date.

Reg. No. 1820, Constable Rosenberg was admitted into hospital on 13th December, 1890, with enlarged glands in groin and evidences of pelvic abscess. On the 27th of the same month he was taken in charge by the Senior Surgeon, and was ordered to be returned to duty on 12th February, 1891. Three days afterwards he again complained of severe pain in the region of the abscess and was admitted into hospital, the above eventually discharging itself into the bowels. He remained in hospital until 27th April, 1891, when he was invalided.

The foregoing are the only cases of any importance which occurred at Regina up to the date of my transfer.

On 11th August, 1891, the Senior Surgeon went to Ottawa on special duty, and on his return I was transferred to "A" Division, Maple Creek.

I arrived at Maple Creek from Regina on 25th September, and took over the hospital, drugs and appliances from Assistant-Surgeon Haultain the same day. A

careful stock-taking was made, and I found a good many drugs unfit for use from various causes, such as age and frost. This was duly reported to the Commanding Officer and a board was held on 31st October, when the articles in question were recommended to be condemned.

On 3rd October I visited Medicine Hat and took stock of the drugs and appliances remaining in the surgery there. The few deficiencies, which were due to the ordinary expenditure of the previous six months, were laid before the Board of Officers, and a full report has been sent in to headquarters. I am glad to find that Dr. Calder has been retained at Medicine Hat as acting assistant surgeon, as it would have been impossible for me to attend cases properly at such a distance.

I found the general health of this post good, and so far have had only a few cases of minor importance. The severe weather, however, has been very trying to patients in the present hospital here, which is totally unfit for its purpose. It is impossible to keep the beds free from cold draughts, the roof is defective and it is a difficult matter to keep the ward properly warmed. Extra cold nights have been known to freeze drugs in the surgery in spite of the stove. I would strongly urge the necessity of at once finishing the new hospital begun last year, but on which no work has been done since last spring.

On 20th November, acting under instructions, I proceeded to Medicine Hat to see Reg. No. 1380, Constable Miniszewsky. I found him suffering from a severe attack of pneumonia. He had been very ill, but, under Dr. Calder's care, was convalescing satisfactorily.

The various detachments of this Division about to remain out for the winter have been furnished with small medicine chests divided into compartments and filled with simple remedies, plasters, bandages, &c. Plain directions are attached to each article, and instructions as to use in the slighter cases of sickness. These, I trust, will be found of great benefit, and should save many long journeys into barracks.

I cannot close this report without expressing the perfect satisfaction Reg. No. 2574, Constable Claxton, gives me in filling the post of hospital steward. He is very attentive and careful in his duties, has a good knowledge of drugs, and is particularly a good dispenser.

Accompanying this is my annual sick report.

I have the honour to be, Sir,

Your obedient servant,

HY. DODD,

Assistant Surgeon.

To the Commissioner,
North-West Mounted Police,
Regina.

HENRY DODD,
Assistant Surgeon.

APPENDIX R.

ANNUAL REPORT OF ASSISTANT SURGEON S. M. FRASER.

CALGARY, 9th December, 1891.

SIR,—I have the honour to submit the annual sick report of "E" Division for the year.

I find, on looking over the report previous to 1st September—when I took over medical charge of this post from Dr. H. George—that the general health of the men has been good.

On arriving here I found Constable Tryhart in hospital suffering from the remains of a bubo in the left groin. On the fissures being opened it readily healed, he leaving hospital on 7th October.

The sanitary condition of this post is very good, and any suggestions made by me from time to time have been satisfactorily carried out.

A new latrine was built this fall for the use of the men, the old one being found insufficient for their accommodation.

I would recommend, now that there are waterworks and sewage in barracks, that proper water-closets be connected with the same and placed in the wash room; and I would particularly call to your attention the necessity of having one for the hospital, and also a good bath.

Enclosed is an appendix of the diseases treated during the year.

I have the honour to be, Sir,
Your obedient servant,

S. M. FRASER,
Assistant Surgeon.

NORTH-WEST MOUNTED POLICE.

 APPENDIX S.

ANNUAL REPORT OF ACTING ASSISTANT SURGEON H. M. BAIN.

NORTH-WEST MOUNTED POLICE,

PRINCE ALBERT, 1st December, 1891.

SIR,—I have the honour to submit the annual medical report of this post for 1891.

The health of the men in this division has been exceptionally good. There have been no deaths, and none invalided.

The total number of cases treated was 198. The average number on daily sick list was 2·3; the average number "off duty" was ·5. There have been but 12 men in hospital during the year, the average number of days in hospital being 14.

Seventeen men were examined for re-engagement or admission to the force.

The drug supply has been obtained locally, and has been satisfactory both as to price and quality.

We are still without proper hospital accommodation, and as for several years past I have referred to this matter in my annual reports, I will now add nothing further than to quote from the senior surgeon's last annual report: "The building of a small hospital at this post should not be deferred, as under existing conditions an outbreak of any endemic or contagious epidemic disease would be attended with very serious consequences."

I have received every assistance from Superintendent Cotton during the year, and have also found the hospital staff most attentive to their duties.

I have the honour to be, Sir,

Your obedient servant,

HUGH M. BAIN, M.D.

Commissioner HERCHMER,
Regina.

APPENDIX T.

ANNUAL REPORT OF ACTING ASSISTANT SURGEON F. H. MEWBURN.

NORTH-WEST MOUNTED POLICE, "K" DIVISION.

LETHBRIDGE, 15th December, 1891.

SIR,—I have the honour to submit the annual medical report of "K" Division, North West Mounted Police, for the year ended 30th November, 1891.

During the year 116 cases have been under treatment with an average residence in hospital of 13 days per patient; this average is higher than last year. A surgical case transferred to Lethbridge hospital from another post and which has been nearly a year in hospital has materially assisted in causing this increase in the average.

One death has occurred from acute heart disease. Two men have been sent to Regina to be invalided.

Nine men have been examined for re-engagement and passed.

The medical supplies have been sufficient in quantity and satisfactory in quality.

I beg to recommend that the ward in the hospital set apart for isolated purposes, be made completely safe in that respect, by shutting it off from the rest of the building and giving it a separate entrance—this is a pressing necessity.

I have the honour to be, Sir,

Your obedient servant,

F. H. MEWBURN,

Acting Assistant Surgeon.

The Commissioner
North-West Mounted Police,
Regina.

Acting Assitant Surgeon.

APPENDIX U.

ANNUAL REPORT OF HOSPITAL SERGEANT, E. A. BRAITHWAITE, M.D.

NORTH WEST MOUNTED POLICE, "G" DIVISION,
FORT SASKATCHEWAN, 1st December, 1891.

SIR,—I have the honour to enclose herewith the annual sick report for "G" Division for 1891. The ailments have only been slight.

From orders received from the officer commanding "G" Division, I submitted to him a plan for the new hospital for this Post. The present building, although the best that can be hired at this place, is unfit in every respect for a hospital, and I hope that something may be done in this matter as soon as the winter is over.

This Post has ever been remarkably free from any serious sickness, but in the event of any graver diseases or accidents arising, this building is totally unfit for the treatment of such from a sanitary point.

I have the honour to be, Sir,
Your obedient servant,

E. A. BRAITHWAITE, M.D., *H. S.*

The Officer Commanding N. W. M. Police,
Fort Saskatchewan.

NORTH-WEST MOUNTED POLICE.

ANNUAL Sick Report for "G" Division from December 1, 1890, to November 30, 1891.

E. A. BRAITHWAITE, M.D.,
Hospital Sergeant.

FORT SASKATCHEWAN, 1st December 1891.

APPENDIX V.

ANNUAL REPORT OF VETERINARY SURGEON JOHN BURNETT, 1891.

NORTH-WEST MOUNTED POLICE,
REGINA, 15th December, 1891.

SIR,—I have the honour to submit to you my annual report for the year ending 30th November. I also attach table of cases treated and deaths during the year.

Although there has been the usual number of minor complaints, the health of the horses has been exceptionally good. Fever cases in the north have been rare the past year, but the disease made its appearance in a district hitherto free from it, viz. Wood Mountain, where one death occurred, that of Horse Reg. No. 1749.

During the year I visited the headquarters and inspected the horses of all the divisions of the force with the exception of "G" Division, stationed at Fort Saskatchewan, and found the horses with very few exceptions in good order and condition, and that they were receiving the care and attention necessary to keep them in the best of health.

The improvements made in the stable accommodation, increased care taken in the purchase and storage of feed, and numerous other little details, have made a wonderful difference in the appearance of our horses.

There are, however, other matters that require attention, and one of the most important is a suitable preparation for remount horses, before being put at regular police work.

I would recommend that all young remounts be brought to Regina, to receive at least one year's schooling and preparation before being attached to any division for regular duty. They should be placed in charge of an officer and picked men who thoroughly understand the handling and training of young horses. By this method they would be fully developed, and when sent to an outpost, would be in a condition to perform any duty for which they would be required.

As it is often the case now, young horses are put at work which they are not fit to perform, owing to their age, and when given to men unaccustomed to handle young half-broken animals the horse is almost sure to suffer, perhaps only a slight sprain, a trivial thing at the time but which will surely tell upon him in after years, and may necessitate his being disposed of at perhaps one-half the original cost, while yet young.

I recommend Regina as the best place to handle remounts, as they can be worked in the school in bad weather. The forage supplied is always good and to be had at low prices.

I would also recommend that the horses be renumbered and a new description taken, with less than one thousand horses in the force, it requires four figures to number the majority.

A new description is absolutely necessary, as a great many of them are incorrect; horses change in appearance as they age, very many of them grow taller and get new markings, such as saddle marks, and scars, and one or two years in the stable makes a wonderful difference in the shade of some colours.

In a number of cases brought to my notice, it was almost impossible to identify the horses by the descriptions given of them.

In the divisions which I visited, I found the stabling good, although the want of sick stables are very much felt. Macleod, in particular, where there are a large number of horses kept, should be provided for at the earliest possible date.

I would also recommend that a small stable be put up for detachment use at Willow Bunch, as there are large numbers of horses and cattle kept at this point. When fall comes on feed in the vicinity is scarce, and as the district is subject to severe storms early it comes very hard upon horses that have to be kept up without shelter of any kind.

With a few exceptions the remounts purchased in the past year have turned out well, although the difficulty in getting suitable horses for saddle purposes increases every year.

I have the honour to be, Sir,
Your obedient servant,

JNO. F. BURNETT, V.S.,
North-West Mounted Police.

List of Horses which have Died and been Destroyed in North-West Mounted Police, between dates 1st December, 1890 and 30th November, 1891.

Register No.	Division.	Age.	Date.	Cause.	Remarks.
1	K	17	Dec. 16, '90	Heart failure.	Dropped dead while being ridden by S. S. Frazer.
1630	B	6	Nov. 17, '90	Destroyed	Tibula fractured, 9th March, 1890, at Mountain, Man.
1576	H	7	Dec. 29, '90	Drowned.	Broke through the ice, St. Mary's River.
1788	B	5	do 9, '90	Destroyed	Had hind fetlock injured by being tramped upon. Laminitis set in opposite foot. Dropping of sole.
1598	D	7	do 18, '90	Enteritis.	Died at the Stand Off detachment.
510	D	13	Jan. 24, '91	Fracture of pastern.	Destroyed at the Macleod Herd Camp.
1789	F	5	do 31, '91	Disease of brain.	Resulting from typho malarial fever.
1313	K	9	Mar. 5, '91	Enteritis.	Taken sick while being driven in from Milk River Ridge.
1535	F	6	do 23, '91	Paralysis.	
815	G	13	do 14, '91	Renal calcute.	Died at Red Deer.
1819	E	5	April 2, '91	Glanders.	Destroyed upon recommendation S. S. Bland.
1820	D	8	do 23, '91	do	Became affected at Kipp.
1781	F	5	do 24, '91	Paralysis.	
1753	D	8	do 25, '91	Glanders.	Became affected at Kipp; destroyed at Boundry Creek.
1834	A	4	do 20, '91	C. C. fracture.	While being lunged at Maple Creek.
1869	E	4	June 5, '91	Fracture of third cervical vertebrae	Put his foot in badger hole and fell.
1455	H	9	do 9, '91	Enteritis.	Taken sick on herd.
778	C	16	do 12, '91	Internal hemorrhage.	Dropped dead while drawing a load up hill at Nineteen-Mile Creek.
851	H	10	May 21, '91	Broken neck	Found dead in Porcupine Hills.
1175	B	9	Aug. 1, '91	Enteritis.	Died at Morden, Man.
1045	B	12	do 12, '91	do	Died at Willow Bunch.
1277	D	10	Sept. 18, —	Albumuria.	Destroyed at Macleod.
1201	A	11	do 18, —	Hepatitis.	Died at Maple Creek.
702	K	11	do 10, —	Destroyed.	Gored by a cow at Coutts.
639	C	15	do 22, —	Heart disease.	Found dead.
1892	D	4	Oct. 23, —	Internal hemorrhage.	Died while being led from Macleod to Kipp detachment.
1785	F	6	do 30, —	Diabetis.	At Prince Albert.
1841	B	6	do 10, —	Pulmonary apoplexy.	On trail between Wood Springs and Mountain.
1183	B	9	do 23, —	Diarrhoea.	Cannington, driven from Wood End.

APPENDIX W.

ANNUAL REPORT OF ASSISTANT VETERINARY SURGEON WROUGHTON, 1891.

NORTH WEST MOUNTED POLICE,
FORT MACLEOD, 30th November, 1891.

SIR,—I have the honour to request that you will forward for the information of the Commissioner, this my report for the year ending this day.

During the past year I have been in veterinary charge of the horses of three Divisions—"D," "H" and "K"—I have constantly visited the horses both at the division headquarters and at the various detachments.

I am pleased to inform you that no contagious or infectious disease exists amongst police horses in this district and that the general health has been wonderfully good throughout the year.

During the year we have lost several horses from various causes; two having to be destroyed on account of glanders—one on detachment and one in Fort Macleod. Every precaution was taken to prevent the spread of the disease, replacing wood work destroyed, the bodies buried; and all the stable furniture which could not be thoroughly disinfected also destroyed. The stables fumigated and thoroughly scrubbed and twice whitewashed with lime mixed with a strong solution of carbolic acid.

No fresh cases have occurred and the horses throughout the command have been carefully and constantly examined, especially the older horses and those known to be of a weakly constitution.

Two horses have died from acute enteritis, one on detachment and the other was brought in from the herd (where he had been on grass), suffering from acute diarrhoea. He was carefully treated but died early next morning from acute enteritis which resulted in gangrene. On making a post mortem, I found large quantities of alkaline earth in the stomach and small intestine, this no doubt being the exciting cause of the disease.

I also recommended the destruction of another horse suffering from "Albumenuria" analogous to Bright's disease in the human subject. This horse had been ailing for some time and gradually grew worse. I examined the urine both chemically and microscopically and found albumen in large quantities and the microscope revealed tubular casts and puss cells. Under these circumstances it was false economy to try to do anything for him as recovery was out of the question—palliative treatment being all that could be resorted to—I recommended his destruction.

On the 9th September, twenty-five remounts were purchased at Macleod; of these nine were posted to "D" division, three to "H" division and eight to "K" division.

The remounts have all done well with the exception of one No. 1892, of "D" division) which dropped dead on the road from rupture of one of the large arteries in the lungs. This was an unfortunate occurrence as the horse was one of the finest taken over this year.

A public auction sale of cast horses was held at Macleod on the 19th September, when seven horses were sold. The prices fetched were not as good as usual, and it was decided to postpone the sale of the remainder of the horses until the 16th October. On the latter date the remainder were sold—five in number. The prices were somewhat low owing to the late season of the year. If possible, all cast horses

should be sold in the spring, as they are then likely to fetch the best prices, farmers and others being on the lookout for horses capable of doing a certain amount of work.

I beg to again draw your attention to the subject of a sick stable at this post. I had been in hopes that one would have been built this fall, but it is still an unaccomplished fact, and every year it is more difficult to get along without one. A stable of this description is also needed at Lethbridge, for reasons which I gave in my last yearly report. I visited all the detachments of "K" division during the summer and found the horses in good order, a few cases of temporary ailments, but nothing of a serious nature. The general state of health of "K" division horses during the year has been remarkably good.

The amount of work done in the Macleod district shows a large increase over last year, as demonstrated by the following figures:—

1890	{	"D" Division	203,814 miles
	{	"H" Division	202,631 "
1891	{	"D" Division	218,902 "
	{	"H" Division	205,701 "

An increase of 18,158 miles over last year. With all this work the horses are in good serviceable condition and in excellent health generally.

The horses not required for use in this post or on detachment are kept on herd about six miles away and are visited by myself twice a week, and are herded by a detachment of men detailed for that duty. I find the herd of inestimable use. Horses a little stale or run down or off duty and requiring a rest are sent out on this herd, where they are allowed to run until they are sound and fit for duty again. By this means we are enabled to keep our horses in excellent working order. The horses on herd are constantly changed as necessity requires, the sound ones being replaced by others requiring a short time at grass.

A large number of horses are now on detachment duty where they are frequently visited by myself, and although worked hard, are in good condition.

I enclose an appendix of diseases from 30th November, 1890, to 30th November, 1891.

I have the honour to be, Sir,

Your obedient servant,

T. A. WROUGHTON, D.V.S.,
Assistant Veterinary Surgeon.

APPENDIX X.

ANNUAL REPORT OF VETERINARY STAFF-SERGEANT PRINGLE, 1891.

BATTLEFORD, 1st December, 1891.

SIR.—I have the honour to submit my annual report for the year ended 30th November, 1891.

The health of the horses of division is excellent.

All requisitions for veterinary drugs and appliances, have been promptly and carefully filled, and there is sufficient until next fall, unless something unforeseen occurs.

During the year I have had under treatment one case of a contagious and one of an epizootic type. I refer to horses Reg. Nos. 936 and 1138, but having been taken in the incipient stages and prompt measures applied for their relief, am pleased to state that the treatment was successful, as also the measures adopted for isolating the cases.

Two deaths have occurred in the division, one a very valuable horse, Reg. No. 778, who died from internal hemorrhage, while *en route* from Saskatoon with freight, the other was a cast horse previous to my arrival, Reg. No. 639, and was so well known in the district as being useless and diseased that no purchaser could be found to take him at any figure. He died at herd from heart failure.

A decided improvement has been made in No. 2 stable, by filling in front part of stalls with clay. It has had a marked effect, in the diminution of lameness and fever in feet. Would strongly recommend that the same improvement be made in No. 1 stable as soon as practicable.

Would recommend that eight horses be cast, as it is false economy to keep them after they have become unfit for duty through chronic disease.

Will require at least fifteen saddle horses, and four teams next spring, would recommend that they get a year's duty at Regina before being sent out.

Our team horses have had an unusual amount of duty to perform. I refer to the freighting of supplies from Saskatoon, the trail being very severe on horses with loads, but notwithstanding, owing to our teamsters being careful and experienced men, our team horses are in first-class condition.

The oats delivered to date are of good marketable quality, free from dust and foreign seeds.

The hay also is of excellent quality and well cured; I had occasion to reject a few tons, which owing to wet weather was improperly cured. My rejection of so large an amount last year had a salutary effect on the contractors.

I supplied the different patrols and parties with requisite medicines, with instructions for use. I also keep a supply at Onion Lake for detachment use.

The improvements you have caused to be made in the sick stable, by the addition of an extra partition, filling in space above box stalls, new door, etc., have, I can assure you, added greatly to the comfort of our invalid horses.

I append herewith my annual report of cases under treatment.

I have the honour to be, Sir,

Your obedient servant,

J. PRINGLE, V. S.,

Veterinary Staff-Sergeant.

NORTH-WEST MOUNTED POLICE.

C. Division.

ANNUAL Sick Report of Horses, for Year ended 30th November, 1891.

Battleford, 1st December, 1891.

J. PRINGLE, V.S.,
Veterinary Staff Sergeant.

APPENDIX Y.

ANNUAL REPORT OF VETERINARY STAFF SERGEANT POETT, 1891.

NORTH-WEST MOUNTED POLICE "A" DIVISION,
MAPLE CREEK, 1st December, 1891.

SIR,—I have the honour to report for your information that the health and general condition of the horses under your command has been, with a few exceptions, good. During the earlier part of last spring, a mild type of catarrhal influenza attacked a large number of our horses but soon gave way to treatment of a febrifuge nature. I would respectfully draw your attention to the fact that there still remains a large number of old horses in this division which have constantly been employed upon patrol duty. The backs of many of such horses present marks of old saddle-galls and cicatrices. I would in view of these facts, and also of statements already made to you suggest that a soft blanket as well as a numnah be issued to men riding these horses.

In my last year's report I mentioned that the detached outposts were all long distances from the head-quarters of this division, and the travelling which has to be done is continually up-hill, through long coulées and circling around hills, as take, for instance, the journey to East Post, a distance of forty-eight miles from the barracks. Now in very hot weather the effect upon the shoulders of our team horses is very bad, many suffer from collar-galls, notwithstanding that all the teamsters are supplied with the most approved collars and sweat-pads. This, of course, I need scarcely add, necessitates horses being taken off duty for some time for the purpose of placing them under a course of veterinary medical treatment. I would respectfully suggest that, owing to the rough nature of the trails in the Cypress Hills country, and the long distances rations and forage have to be drawn to the various detached outposts, one or two teams of four mules each, good, servicable and well-broken animals, be purchased for the use of this division, to be employed upon special work, such as the drawing of rations and forage or of logs and lumber. I am satisfied that were such action taken by the proper authorities it would be the means of saving a large number of valuable team horses. The result, also, would be that a less number of team-horses would be required in "A" division, larger loads could be hauled and fewer trips would be necessary for transport purposes. In fact, were mules once introduced, it would do away with the heavy team-horses savouring of the Clyde breed, and the tall delicate, unsubstantial brocho would become a thing of the past. I would further respectfully add that if the class of horses above alluded to were cast they would be found admirably adapted for ranching and agricultural purposes, and owing to the good condition in which horses are kept in the force, would command a very high price when sold. Before leaving this subject, I think I can be sustained by any one acquainted with this particular part of the North-West Territories, that, were mule teams furnished for this centre frontier division of the force, it would be, from an economic point of view, much to the interests of the public service. I would also remark that a large percentage of young horses reared in this district are being bred for agricultural purposes and are much too heavy for the work they would be required to perform in this force; that is were such animals purchased. The small well-put-up horse, ranging from 15 to 15.2 hands in height, has been found to far excel in endurance the animal ranging from 15.3 to 16 hands high; the smaller horse

being more sure-footed and less liable to stumble with its rider. With regard to colour I would here remark that roan and bay horses are less liable to lameness and less susceptible to disease than horses of other colours.

The new infirmary stable lately built at this post is all that could be desired, but a floor of some description is required owing to the nature of the ground inside of the stable. It would be well adapted for a cement flooring, which is far less expensive than a plank one, and at the same time much easier kept clean, more especially as the declivity of the ground upon which this stable stands is very slight for drainage purposes. I would further state that gravel and sand of a fine quality can be found a short distance from the barracks, so that all that would be required to make a good permanent floor would be a few barrels of cement.

Detachments are furnished with proper veterinary medicine cases. Explicit directions accompany all bottles and packages for the simpler modes of treating sick or lame horses. Standing orders are also sent to the non-commissioned officers in charge of all detachments from this division as to the action to be taken when any serious cases occur.

The hay put up at this post during the summer is of a superior quality, as owing to the heavy rains in the spring and early summer the grasses in the Cypress Hills district have been most luxuriant in growth. The oats are also of good quality, being free from all foreign seed and averaging 40 lbs. to the bushel.

In concluding this report I would respectfully add that a number of horses have been examined by me during the year, some of which I found to be suffering from chronic glanders and some from acute. There was also a case of farcy. I am pleased to inform you that this disease is surely being stamped out, as less cases in number are reported monthly. All animals suffering from these diseases are at once destroyed, and the ordinances relating to contagious and infectious diseases of animals in the North-West Territories have been carried out.

I am, Sir, most respectfully,

Your obedient servant,

J. L. POETT,

Veterinary Staff Sergeant.

APPENDIX Z.

ANNUAL REPORT OF VETERINARY STAFF SERGEANT BARRY, 1891.

NORTH-WEST MOUNTED POLICE, Calgary, 3rd December, 1891.

Sir, I have the honour to submit my annual report for the year ended 30th November, 1891.

The general health of the horses of this division is excellent. I am glad to say not one of them is off duty at present.

When I arrived here from Regina on the 18th December, 1890, to take over the duties as Veterinary Sergeant, I found horse No. 1819, suffering from chronic nasal-gleet. Owing to bad accommodation of stabling at that time I found it impossible to effect a cure, consequently the disease had the upper hand of treatment and in my opinion turned to glanders. I took every precaution where I noticed the symptoms of this disease and had the animals destroyed.

I also had to recommend the destruction of horse No. 1669. This horse was suffering from irregular strangle which turned to blood poisoning. As it was impossible to cure him and owing to the danger of contagion I had to destroy him. Have at present thirty-one horses on herd which I visit frequently. They are in good health and condition.

The horses belonging to the various detachments of this division have been seen and examined, proper supplies of veterinary medicines and instructions for their use have been furnished to the different non-commissioned officers in charge of detachments, also the different parties leaving on duty.

The stock of drugs is full and satisfactory, but we are in need of one pocket-case of veterinary instruments.

The forage delivered by contractors is of good quality.

I enclose a list of sick and lame horses that have been treated during the past year.

I have the honor to be Sir,
Your obedient servant

THOS. BARRY.
Veterinary Staff Sgt.

To the Officer commanding "E" Division, N. W. M. P.

APPENDIX AA.

ANNUAL REPORT OF VETERINARY STAFF-SERGEANT MITCHELL, 1891.

NORTH-WEST MOUNTED POLICE, "F" DIVISION.

PRINCE ALBERT, 30th November, 1891.

SIR,—I have the honour to make the following report for the year ending 30th November, 1891.

I am pleased to be able to state that the health of our horses in general has been remarkably good, and that no disease of an epizootic or contagious character has thus far affected them. Two deaths, however, have to be reported. The first, Reg. No. 1781, shown by the books to have been off duty since November of the previous year, owing to paralysis of the hind extremity. About the middle of April he showed considerable improvement in condition and spirits, but without any corresponding improvement in the paralytic symptoms. Later on, however, symptoms of abdominal complications were presented, from which, after two days of intense suffering, he died on the night of the 25th April. The other, No. 1785, was brought in from detachment at Batoche about the beginning of October, down in condition, and presenting a very unthrifty appearance, but without any apparent constitutional disturbance. It was hoped that a few weeks rest with good care would restore him to usefulness, but these hopes were doomed to disappointment. In a short time febrile symptoms were presented, at the subsidence of which diabetes of an inveterate character set in, which, despite treatment, terminated fatally on the 31st of the same month. Of the ordinary troubles peculiar to police horses we have had a full share, but in the main their treatment has been attended with satisfactory results. I might mention that special attention has been given to the horses feet, the mode of shoeing, etc., and, with the hearty co-operation of the blacksmiths, I think in this important particular the horses of "F" Division will compare favourably with those of any division in the force. And, with a healthful situation, with excellent summer stabling,—though perhaps the troop and team stables are a trifle too cold to afford the best results from an economic point of view in the winter time,—with a supply of hay and oats of excellent quality, with the efficiency of the men in general, in the care and management of horses, we hope to be able to keep the percentage of loss at the lowest possible minimum.

During the summer months several cases of supposed glanders, etc., were reported from various parts of the district, but, in every instance, a careful investigation has shown these apprehensions to have been groundless. Nevertheless, considerable mortality has occurred, chiefly among young horses, the result of occasional outbreaks of the fever peculiar to these parts. For the prevalence of this malady various theories have been assigned. No doubt the water in those shallow, miry bottomed sloughs, impregnated as it must be in the autumn season with decaying vegetable and other deleterious substances, has a good deal to do with it. And, added to this the fact that those horses during the summer months are deprived for weeks at a time of their owner's supervision, left to battle against disease as best they can, exposed to the incessant annoyance of flies, and withal, wasting their strength in their efforts to keep pace with their comrades, no doubt greatly augments the percentage of loss.

The season has been very favourable for stock, abundance of grass, and perfect immunity from anthrax in any of its forms, so far as I have any knowledge.

I have the honour to be, Sir,

Your obedient servant,

W. MITCHELL, V. S.

Veterinary Staff Sergeant.

REPORT
OF THE
SECRETARY OF STATE
OF
CANADA
FOR THE
YEAR ENDED 31st DECEMBER
1891

PRINTED BY ORDER OF PARLIAMENT

OTTAWA

PRINTED BY S. E. DAWSON, PRINTER TO THE QUEEN'S MOST
EXCELLENT MAJESTY.

1892

[No. 16—1891.] *Price 5 cents.*

REPORT

OF THE

SECRETARY OF STATE

FOR THE

YEAR ENDED 31ST DECEMBER, 1891.

TO HIS EXCELLENCY THE RIGHT HONOURABLE LORD STANLEY OF
PRESTON, G.C.B., GOVERNOR GENERAL OF CANADA, &c., &c.

MAY IT PLEASE YOUR EXCELLENCY:—

I have the honour respectfully to submit for Your Excellency's information, and in order that it may be laid before Parliament, the report of the Secretary of State of Canada for the year 1891.

Accompanying the report are the following appendices, viz.:—

A. Report of the Deputy Registrar General of Canada.

B. Schedules of returns to Addresses and Orders passed by the Senate and House of Commons of Canada during the session of 1891, received and prepared by the department and presented through the Secretary of State.

C. Indices to the same.

D. Statement showing the elections under "The Canada Temperance Act" during the past year.

E. A list of the officers, clerks and servants of the department on the 31st of December, 1891, with the date of appointment, rank and salary in each case.

The report of the Board of Civil Service Examiners for the year 1891, required by section 58 of the Civil Service Act, has been prepared, and will be submitted as a separate report.

REVENUE AND EXPENDITURE.

The total revenue of the department for the fiscal year ended the 30th June, 1891, was made up as follows:—

Fees on charters and supplementary charters of incorporation	\$ 3,520 00
Exemplifications of patents, &c.	80 00
Copies of documents and searches.....	95 15

Commissions and letters patent of annuity.....	1,588 00
Passports	208 00
Certificates of legalization, &c.....	151 00
	\$ 5,642 15
Less—Refund of fees paid for charter not issued..	200 00
	\$ 5,442 15

The total expenditure was as follows :—

Salaries.....	\$ 35,773 30
Contingencies	8,235 26
Expense of preparing returns to Parliament.	801 40
Classification of the old records of the late Province of Canada	1,985 24
	\$ 46,795 20

I have the honour to be,

Your Excellency's most obedient servant,

J. A. CHAPLEAU,

Secretary of State.

DEPARTMENT OF THE SECRETARY OF STATE,
OTTAWA, 15th January, 1892.

APPENDIX A.

DEPARTMENT OF THE SECRETARY OF STATE OF CANADA,
REGISTRAR'S BRANCH, OTTAWA, January, 1892.

The Honourable
J. A. CHAPLEAU,
Secretary of State of Canada,
&c., &c.

SIR,—I have the honour to submit herewith, for your information, the following statement of work performed under my supervision in this branch of your department during the past year, viz., from 1st January to 31st December, 1891.

CONDENSED STATEMENT showing the work performed in the Registrar's Branch of the Department of the Secretary of State, from 1st January to 31st December, 1891.

Documents.	Engrossed.	Recorded.	Total.
Agreements		2	2
Board of Trade certificates		6	6
* Bonds	5	116	121
Cancellations		2	2
Certificates of title (Torrens system)		4	4
Charters	50	50	100
Commissions	141	141	282
Contract	1	1	2
Decree of court		1	1
Exemplifications	4	4	8
Leases	8	8	16

do (summoning to Senate)	5	6	11
Licenses of occupation	2	2	4
Orders in Council		3	3
Pardon	1	1	2
Power of attorney		1	1
Proclamations	12	19	31
Releases, surrenders, &c.		282	282
Transfers		1	1
Warrants	32	36	68
Writs of assistance	4		4
do election		209	209
<i>Land Patents.</i>			
† Ordnance land sales	34	34	68
Special grants	11	11	22
Total	313	943	1,256

* An annual statutory return of bonds is submitted to Parliament under chapter 19, section 23, of "The Revised Statutes of Canada," giving full particulars of the bonds registered in the branch since last return.

† A quarterly return of these lands was sent to the registrar of each city and county in the Province of Ontario, and to the secretary-treasurer of each city and county in the Province of Quebec in which patents were issued, and a copy of the several returns in Ontario was also sent to the Provincial Secretary of Ontario.

In addition to the foregoing statement of work done, there have been copied during the year 795 pages of records, manuscripts, &c.

I also submit the annual synopsis of letters patent, with accompanying index, issued during the year to all companies incorporated under chapter 119 of "The Revised Statutes of Canada," embodying the name of the company, the date of incorporation, the amount of capital stock, with the number of shares and the amount of each share, the names of the corporate members, with place of residence, the first or provisional directors of the company, the chief place of business of the company, and the objects or purposes for which incorporation was sought; also, of all companies which have had supplementary letters patent granted them during the same period under the said Act, and the purposes for which such supplementary letters patent were issued.

I also append hereto a list, as submitted to Parliament under section 2 of chapter 19 of "The Revised Statutes of Canada," of all public officers to whom commissions have been issued during the year under the provisions of the said Act.

All which is most respectfully submitted.

L. A. CATELLIER,
Deputy Registrar General of Canada.

SYNOPSIS OF LETTERS PATENT

ISSUED TO

COMPANIES INCORPORATED

UNDER

CHAPTER 119 OF "THE REVISED STATUTES OF CANADA,"

KNOWN AS

"THE COMPANIES ACT"

From 1st January, 1891, to 31st December, 1891.

"BARCLAY CLEMENTS COMPANY" (LIMITED).

Incorporated 23rd December, 1890. - - Amount of capital stock, \$50,000.
Number of shares, 5,000.—Amount of each share, \$100.

Corporate Members :—Arthur W. Eakins, merchant, of Yarmouth, N.S.; Robert Pickford, merchant, of Halifax, N.S.; Henry T. D'Entremont, merchant, of Lower East Pubnico, N.S.; Charles R. Barclay, merchant; Frederick L. Clements, merchant; and John L. Nelson, merchant, all of Boston, Mass., U.S.A.

First or Provisional Directors :—Arthur W. Eakins, Robert Pickford and Henry T. D'Entremont.

Chief Place of Business :—Town of Yarmouth, N.S.

Objects of the Company :—The carrying on throughout the Dominion of Canada and elsewhere the business of carriers, shipowners, warehousemen, wharfingers, barge owners, lightermen, forwarding and steamship agents, ice merchants and refrigerating storekeepers; and the constructing, purchasing, acquiring, chartering and employing steamers, and other vessels of all kinds for the purposes aforesaid, and for the purposes of conveying passengers, goods, wares, merchandise and freight between such ports in any part of the world as may seem expedient, and also the carrying on of a general commission, shipping and brokerage business, and the purchasing, selling, importing and exporting into and from the Dominion of Canada and elsewhere, preparing for market and dealing in coal, timber, lumber, live stock, fish, flour and other produce and general merchandise of all kinds, and the carrying on throughout the Dominion of Canada, and elsewhere, the business of traders and merchants; the purchasing, holding and selling timber lands and other lands in fee or otherwise, and also timber and timber limits by lease, license or otherwise, and the purchasing or otherwise acquiring any letters patent of invention, relating to, or which may be deemed to be of use in connection with any of the above objects, and the selling or otherwise disposing of the same as may be deemed expedient; and the purchasing or

otherwise acquiring any business within the objects of this company, and any lands, property, privileges, rights, contracts and liabilities appertaining to the same; and the constructing, maintaining and altering any buildings or works necessary or convenient for the purpose of the company; and acquiring, holding, alienating and conveying any property, whether real, personal or mixed, requisite for carrying on the undertakings of said company; also the letting or sub-letting any property of the company, or selling or otherwise disposing of the business, property or undertaking, or any part thereof, for such considerations as the company may think fit, and the amalgamating with any other company having objects altogether or in part similar to those of this company; and generally the doing of all such other things as are incidental or conducive to the attainment of the above objects.

Supplementary Letters Patent, issued 24th December, 1890, to
 "THE DOMINION COTTON MILLS COMPANY" (LIMITED).

Increasing the capital stock of the said company to \$5,000,000, being an addition of 49,000 shares of \$100 each to the present capital stock.

"THE CANADIAN LAND AND INVESTMENT COMPANY"
 (LIMITED).

Incorporated 17th January, 1891. - - Amount of capital stock, \$100,000.

Number of shares, 1,000.—Amount of each share, \$100.

Corporate Members :—James Ross, civil engineer, and Herbert S. Holt, contractor, both of Montreal, Que.; William McKenzie, contractor, and Nicol Kingsmill, barrister-at-law, both of Toronto, Ont.; and Jessie Flora Ross, married woman, of Winnipeg, Man.

First or Provisional Directors :—James Ross, William McKenzie, Herbert S. Holt, Jessie Flora Ross and Nicol Kingsmill.

Chief Place of Business :—City of Montreal, Que.

Objects of the Company :—To acquire by purchase, exchange or otherwise any freehold or leasehold lands, and any estate or interest therein within Canada, and the same to hold, sell, exchange, lease, let or otherwise deal with or dispose of for cash, or upon rentals, or for any other considerations, and to take and hold mortgages upon such lands to secure purchase moneys, and the same to assign, sell or otherwise deal with, and to execute and deliver mortgages upon any land or interest therein which may be acquired as aforesaid, and to issue debentures or other securities secured upon the real or personal property of the company, or otherwise, as provided in "The Companies Act," and further to erect buildings upon or otherwise improve, sub-divide or lay out such lands with streets, lanes and squares or otherwise, and to dedicate the same, if so desired, to public uses, and for that or any other of the purposes of the company to enter into contracts and agreements with any person or persons, body or bodies corporate, and upon such terms and conditions as may be agreed upon.

APPENDIX No. I.

CHAPTER 17.

(Revised Statutes of Canada.)

An Act respecting the Civil Service of Canada.

A.D. 1886.

(As amended by 51 V., c. 12 and 52 V., c. 12.)

HER Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:—

SHORT TITLE.

1. This Act may be cited as "*The Civil Service Act.*" Short title. 48-49 V., c. 46, s. 1.

INTERPRETATION.

2. In this Act unless the context otherwise requires,— Interpretation.

(a.) The expression "Head of a Department" means the Minister of the Crown for the time being presiding over such department; "Head of a Department."

(b.) The expression "Deputy," "Deputy Head," or "Deputy Head of the Department," means the Deputy of the Minister of the Crown presiding over such department, and also includes the "Auditor General," in all cases in which such meaning is not inconsistent with his powers and duties under "*The Consolidated Revenue and Audit Act.*" 48-49 V., c. 46, s. 2.

CONSTITUTION OF THE CIVIL SERVICE.

3. The Civil Service, for the purposes of this Act, includes and consists of all classes of employees, elsewhere than in the North-West Territories, in or under the several departments of the executive government of Canada and in the office of the Auditor General, included in the schedules A and B to this Act, appointed by the Governor in Council or other competent authority before the first day of July, one thousand eight hundred and eighty-two, or thereafter appointed in the manner provided by the Civil Service Act for the time being in force, and such officers and employees in the North-West Territories holding positions, which, if held in other parts of Canada, would bring them under the provisions of this Act, as the Governor in Council brings under the provisions hereof. 48-49 V., c. 46, s. 3.

Of whom the Civil Service shall consist.

As to North West Territories.

Two
divisions.

Inside
division.

Outside
division.

Regulations
to be made by
Order in
Council.

Governor in
Council to
determine
number of
employees.

If the actual
number
exceeds that
allowed.

4. The service shall be divided into two divisions :—
The first or inside departmental division shall comprise employees of those classes mentioned in schedule A, employed on the several departmental staffs at Ottawa, and in the office of the Auditor General :

The second or outside departmental division shall comprise employees of those classes mentioned in schedule B, and who are employed otherwise than on the departmental staffs at Ottawa. 48-49 V., c. 46, s. 4.

5. The Governor in Council may, from time to time, make general rules and regulations, not inconsistent with the provisions of this Act, respecting the appointments and promotions of the officers in the Civil Service and all other matters pertaining thereto. 48-49 V., c. 46, s. 5.

6. The Governor in Council shall, from time to time, determine the number of officers, chief clerks, clerks, messengers and other employees that are required for the working of the several departments in each division of the Civil Service, but the collective amount of the salaries of each department shall, in no case, exceed that provided for by vote of Parliament for that purpose :

2. If the number of employees then attached to any department in either division thereof is greater than the number allowed to the department, as herein provided, the Governor in Council shall name the persons to fill the several offices ; and the remainder shall be supernumerary clerks, without being eligible for increase of salary, of that class respectively in which they rank, and shall so remain until promoted in the manner herein provided or until severed from the service 48-49 V., c. 46, s. 6.

7. *Repealed* by 51 V., c. 12, s. 1.

BOARD OF EXAMINERS.

Board of ex-
aminers of
candidates for
the service :
their appoint-
ment and
duties.

Salary of
clerk.

And of mem-
bers of board.

8. A board of examiners shall, from time to time, be appointed by the Governor in Council, who, for the purposes of this Act, shall be known and are hereinafter referred to as "The Board," consisting of three members ; and they shall examine all candidates for admission to the Civil Service, and give certificates of qualification to such persons as are found qualified, according to such regulations as are authorized by the Governor in Council for the guidance of the board : 48-49 V., c. 46, s. 8.

2. The Governor in Council may appoint a person who shall be clerk to the board, at a salary not exceeding seven hundred dollars per annum :

3. Each member of the board shall receive such salary, not exceeding four hundred dollars per annum, as is fixed by the Governor in Council. 52 V., c. 12, s. 1.

4. The members of the board, while engaged in their work, shall be paid such travelling expenses as are determined by the Governor in Council: Travelling expenses.

5. Such persons as are selected by the board to assist them in the conduct of examinations shall receive such sum, not exceeding five dollars a day, as is fixed by the Governor in Council: Assistants.

6. The meetings of the board shall be held at such times, and the proceedings thereof shall be governed by such rules and regulations as the Governor in Council, from time to time, determines: Meetings.

7. The board shall be supervised by the Secretary of State. 48-49 V., c. 46, s. 8. Supervision of board.

9. The board may obtain the assistance of persons who have had experience in the education of the youth of Canada, and with such assistance shall hold, or cause to be held, periodical examinations for admission to the Civil Service, in the cities of Halifax, St. John, N.B., Charlottetown, Quebec, Montreal, Ottawa, Toronto, Hamilton, London, Winnipeg, Victoria and such other places as are determined by the Governor in Council; it shall not be necessary to hold such examinations in all the said places, but the times and places at which the examinations shall be held shall be determined, from time to time, by the Governor in Council; examinations shall, as far as possible, be in writing, and the cost thereof shall be defrayed out of moneys previously voted by Parliament for that purpose. 48-49 V., c. 46, s. 9. Who may be appointed as assistants.

Places and times of examinations.

Expenses, how paid.

2. Whenever the Board are satisfied that any irregularity or fraudulent practice has obtained at any examination held by them or by any person deputed by them to hold the same, they may summon before them by an instrument signed by the chairman or acting chairman of the Board, and may examine under oath or affirmation, any person who, in their opinion, is in a position to give evidence in relation to any such irregularity or fraudulent practice; and if the person so summoned neglects or refuses to appear, or having appeared, refuses to be examined upon oath or affirmation concerning the premises, or refuses to take an oath or affirmation, or having taken the oath or affirmation, refuses to answer such questions concerning the premises as are then put to him, without offering any just and lawful excuse for his refusal, the chairman or acting chairman of the Board shall be vested with all the powers conferred, in like cases, upon a justice of the peace by section thirty-two of "*The Summary Convictions Act*": Inquiry as to irregularities at examinations.

Penalty for refusing to appear, &c.

3. Every oath or affirmation required for the purposes of such examination may be administered by any member of the Board: Administration of oath.

Name of person implicated to be removed from list.

4. If any person is proved by such inquiry to have been concerned in any fraudulent practice or to have been guilty of any breach of the regulations made in virtue of section thirty-one of this Act, the Board shall report the same to the Secretary of State, who may thereupon cause such person's name to be removed from the list of persons who are found qualified :

Penalty for personation.

5. Every person who, at any examination held under this Act, personates any candidate or employs, induces or allows any person to personate him, is guilty of an offence against this Act, and is liable, on summary conviction, to imprisonment for a term not exceeding six months, or to a fine not exceeding two hundred dollars, and, if he is employed in the Civil Service, to be dismissed therefrom :

Penalty for wrongfully receiving or furnishing examination papers.

6. Every person who surreptitiously procures from any printer or other person, and every person who, without authority, furnishes to any other person any examination question paper or any other paper relating to any such examination as aforesaid, is guilty of an offence against this Act, and liable, on summary conviction, to imprisonment, with or without hard labor, for a term not exceeding six months, or to a fine not exceeding two hundred dollars, and if he is employed in the Civil Service, to be dismissed therefrom ; and no such person shall be allowed to present himself at any subsequent examination. 51 V., c. 12, s. 2.

APPOINTMENTS AND SALARIES IN THE SERVICE.

Conditions of appointment. During pleasure and after examination.

10. Except as herein otherwise provided,—

(a.) All appointments to the Civil Service shall be during pleasure, and no person shall be appointed or promoted to any place below that of a Deputy Head, unless he has passed the requisite examination and served the probationary term hereinafter mentioned ;

Limits as to age.

(b.) No person shall be appointed to any place in the first or inside departmental division of the Civil Service other than that of a Deputy Head, on probation or otherwise, whose age exceeds thirty-five years, or who has not attained, in case the appointment is to a lower grade than that of a third class clerk, the full age of fifteen years, or in other cases, the full age of eighteen years. 48-49 V., c. 46, s. 10.

Appointment of Deputy Heads to be during pleasure.

11. The Deputy Heads of departments shall be appointed by the Governor in Council, and shall hold office during pleasure ; but whenever such pleasure is exercised in the direction of removing a Deputy Head from his office, a statement of the reasons for so doing shall be laid on the table of both Houses of Parliament within the first fifteen days of the next following session. 48-49 V., c. 46, s. 11.

Deputy heads.

2. There shall be a Deputy Head for each department ; and no officer shall hereafter be raised to the rank of Deputy

Head except in the case of a vacancy occurring, or when a new department is created by Act of Parliament; but nothing herein shall affect persons who have been heretofore promoted to the rank of Deputy Head. 51 V., c. 12, s. 3

12. The salaries of the Deputy Heads shall be determined by the Governor in Council, according to the duties and responsibilities of their respective departments. The minimum salary of a Deputy Head shall be three thousand two hundred dollars, and the maximum salary shall be four thousand dollars. 48-49 V., c. 46, s. 12.

Salaries.

Minimum.

Maximum.

13. The Deputy Head of each department shall, subject to the directions of the Head of the department, oversee and direct the officers, clerks and employees in the department, and shall have general control of the business thereof, and shall perform such other duties as are assigned to him by the Governor in Council. 48-49 V., c. 46, s. 13.

Duties and powers of a Deputy Head.

14. In the absence of any Deputy Head, a chief clerk named by the Head of the department shall perform the duties of such Deputy Head, unless the performance of such duties is otherwise provided for by the Governor in Council; and there shall be in the office of the Auditor General a chief clerk who shall, at all times, act for the Auditor General in his absence. 48-49 V., c. 46, s. 14.

By whom performed in his absence.

15. A Chief clerkship in any department shall only be created by Order in Council, passed after—

Chief clerkships.

(a.) The Deputy Head has reported that such an officer is necessary for the proper performance of the public business in the department, stating the reasons on which he has arrived at that conclusion;

Condition of creation of office.

(b.) The concurrence of the Head of the department in such report; and—

Concurrence of Head, &c.

(c.) The salary has been voted by Parliament. 48-49 V., c. 46, s. 15.

16. The minimum salary paid to a chief clerk shall be one thousand eight hundred dollars, with an annual increase of fifty dollars up to a maximum of two thousand four hundred dollars. 48-49 V., c. 46, s. 16.

Salary.

17. A first-class clerkship shall only be created by Order in Council, passed on the report of the Deputy Head, concurred in by the Head of the department, setting forth the reasons for creating the office, and after the salary has been voted by Parliament 48-49 V., c. 46, s. 17

First-class clerkship; condition of creation.

18. The minimum salary of a first-class clerk shall be one thousand four hundred dollars per annum, with an annual increase of fifty dollars up to a maximum of one thousand eight hundred dollars. 48-49 V., c. 46, s. 18.

Salary.

- 19.** A second-class clerkship shall only be created by Order in Council passed on the report of the Deputy Head, concurred in by the Head of the department, setting forth the reasons for creating the office, and after the salary has been voted by Parliament. 48-49 V., c. 46, s. 19.
- 20.** The minimum salary of a second-class clerk shall be one thousand one hundred dollars per annum, with an annual increase of fifty dollars up to a maximum of one thousand four hundred dollars. 48-49 V., c. 46, s. 20.
- 21.** A third-class clerkship, or the office of a messenger, a packer or a sorter, shall only be created by Order in Council passed on the report of the Deputy Head, concurred in by the Head of the department, setting forth the reasons for creating the office, and after the salary has been voted by Parliament. 48-49 V., c. 46, s. 21.
- 22.** The minimum salary of a third-class clerk shall be four hundred dollars per annum, with an annual increase of fifty dollars up to a maximum of one thousand dollars. 48-49 V., c. 46, s. 22.
- 23.** The minimum salary of a messenger, packer or sorter shall be three hundred dollars per annum, with an annual increase of thirty dollars up to a maximum of five hundred dollars. 48-49 V., c. 46, s. 23.
- 24.** The salary of a clerk on appointment or promotion to any class shall begin at the minimum of such class, except in the case of third-class clerks, who may receive, in addition, fifty dollars for each optional subject (not to exceed four) in which they have passed before their appointment, and except in the case of lower grade permanent employees who, upon passing the qualifying examination, may be appointed third-class clerks, at the salary they were receiving at the time of such appointment, when such salary exceeds four hundred dollars :
- 2.** The optional subjects in the next preceding sub-section mentioned shall be book-keeping, short-hand, translation and type-writing, composition in French by English candidates, composition in English by French candidates, and précis-writing. 51 V., c. 12, s. 4.
- 25.** The officers, clerks and employees mentioned in schedule B to this Act shall be paid according to the scale thereby established, and the salaries of officers, clerks and employees in the second or outside division of departments other than the Customs, Inland Revenue and Post Office Departments

shall, subject to the provisions of any Act relating thereto, be fixed in each case by the Governor in Council. 48-49 V., c. 46, s. 25.

26. No officer, clerk or employee shall receive any increase of salary except by Order in Council passed on the report of the Deputy Head, concurred in by the Head of the department, stating that such officer, clerk or employee is deserving of such increase : Conditions of increase.

2. The increase of salary of any officer, clerk or employee authorized under this Act for the then current year may be suspended by the Head of the department for neglect of duty or misconduct, and may be subsequently restored by such Head, but without arrears. 48-49 V., c. 46, s. 26. May be suspended for neglect.

27. The increase of salary shall be payable from the first day of the official quarter next succeeding the date on which, from his length of service, any clerk or employee for whom such increase is recommended is eligible for such increase : From what time payable.

2. In case of promotion, the increase of salary shall become payable from the day on which such promotion takes place. 48-49 V., c. 46, s. 27. In case of promotion.

28. No salary shall be paid to any member of the Civil Service whose appointment or promotion, or whose increase of salary after the first day of July, one thousand eight hundred and eighty-two, has not been made in the manner provided by the Civil Service Act in force at the time of such appointment, promotion or increase. 48-49 V., c. 46, s. 28. Appointment must have been according to law.

EXAMINATIONS.

29. Except as herein otherwise provided, no appointment shall be made to either division of the Civil Service unless the person appointed has passed an examination, which shall be of two kinds— No appointment without examination.

The first or "preliminary" examination to qualify for the following appointments :— Preliminary, for what appointments.

Messengers in either division.

Porters,

Sorters,

Packers,

Letter Carriers,

Mail Transfer Agents,

Box Collectors,

Tide Waiters,

Assistant Inspectors of Weights and Measures,

Temporary copyists, and—

For such other officers in the lower grades as are determined by the Governor in Council :

- Qualifying examination. The second or "qualifying" examination to qualify for the following appointments :—
 Third-class clerkships in the first division ;
 Third-class clerkships and the offices of landing-waiters and lockers, in the second division for Customs service ;
 Third-class clerkships and the office of exciseman, in the second division for Inland Revenue service ;
 Third-class clerkships, railway and marine mail clerkships, and the offices in the second division for Post Office service :
- Candidates may pass both examinations voluntarily. But nothing in this section shall be construed to prevent candidates passing both examinations, at their option. 48-49 V., c. 46, s. 29.
- Conditions for preliminary or qualifying examination. **30.** No person shall be admitted either to the preliminary or qualifying examination until he has satisfied the board—
 (a.) That at the time appointed for such examination he will, if the examination is for a place below that of a third-class clerk, be of the full age of fifteen years, and in other cases be of the full age of eighteen years, and if for the inside departmental division, that his age will not then be more than thirty-five years ;
 (b.) That he is free from any physical defect or disease which would be likely to interfere with the proper discharge of his duties ;
 (c.) That his character is such as to qualify him for employment in the service. 48-49 V., c. 46, s. 30.
- Holding of examination. **31.** The preliminary and qualifying examinations shall be held only once a year and during the month of November, under such regulations, not inconsistent with this Act, as are, from time to time, made by the Governor in Council and published in the English and French languages in the *Canada Gazette* :
- Exemption. 2. Graduates of the Royal Military College, and of any University in Canada, shall be exempt from the qualifying examination. 51 V., c. 12, s. 5.
- To whom examinations shall be open. **32.** The examinations shall be open to all persons who comply with the requirements of this Act as to proof of age, health and character, and conform to the regulations made as herein provided, upon payment of such fees as are determined by the Governor in Council ; and all examinations under this Act shall be held in the English or French language, at the option of the candidate. 48-49 V., c. 46, s. 32. *Amended by 51 V., c. 12, s. 6*
- Fees.
- In either language.
- Notice of time and place of holding. **33.** Notice of every examination to be held under this Act for admission into the Civil Service shall be published in the English and French languages in the *Canada Gazette* at least one month before the date fixed for the examination. 48-49 V., c. 46, s. 23. *Amended by 51 V., c. 12, s. 7.*

34. Immediately after each examination a list of the persons who are found qualified shall be made out, and published in the *Canada Gazette*. 48-49 V., c. 46, s. 34.

Lists of persons found qualified to be made.

NEW APPOINTMENTS.

35. Whenever it becomes necessary to make any appointment to any of the classes to which it is herein provided that first appointments shall only be made after qualifying examination, such necessity shall be reported to the Head of the department by his Deputy; and upon such report being approved by the Head of the department, and after the salary to be paid has been voted by Parliament, the Head of the department shall select and submit to the Governor in Council for probation, from the lists of qualified candidates made by the board, a person fitted for the vacant place:

Proceedings when new appointments are required.

Selection of candidates.

2. The person so selected shall not receive a permanent appointment until he has served a probationary term of at least six months:

Probation

3. The Head of the department or the Deputy Head may, at any time during the period of probation, reject any clerk or employee appointed to his department. 48-49 V., c. 46, s. 35.

Rejection during probation.

36. No probationary clerk shall remain in any department more than one year, unless, at or before the end of that time the Deputy Head signifies to the Head of the department in writing that the clerk is considered by him competent for the duties of the department:

Report of Deputy Head as to competency.

2. If he is rejected, the Head of the Department shall report to the Governor in Council the reasons for rejecting him, and another clerk shall thereupon be selected in like manner in his stead; and the Head of the department shall decide whether the name of the person rejected shall be struck off the list as unfit for the service generally, or whether he shall be allowed another trial. 48-49 V., c. 46, s. 36.

Provision in case of rejection.

37. When the Deputy Head of a department in which a vacancy occurs reports, for reasons set forth in such report,—

As to offices requiring special qualifications.

(a.) That the qualifications requisite for such office or employment are wholly or in part professional or technical;

(b.) That the requisite qualifications are not possessed by any person then in the service of that department; and—

(c.) That it would be for the public interest that the examination herein provided for should, as regards such vacancy, be wholly or partially dispensed with;

The Governor in Council may, without reference to the age of the person, if the Head of the department concurs in

Selection and appointment.

From the service if available. such report, select and appoint such person as is deemed best fitted to fill the vacancy, subject to such examination as is suggested in the report; and such appointment shall be made from the Civil Service, if any person employed therein is found available: 48-49 V., c. 46, s. 37.

Appointment without examination in certain cases. 2. City Postmasters and Post Office Inspectors; Inspectors, Collectors and Preventive Officers in the Customs Department; Inspectors of Weights and Measures; and Deputy Collectors and Preventive Officers in the Inland Revenue department, may be appointed without examination and without reference to the rules for promotion herein prescribed: 52 V., c. 12, s. 2

In what cases qualifying examination may be dispensed with. 3. The qualifying examination may be dispensed with in the case of any person actually and continuously employed on and since the first day of July, one thousand eight hundred and eighty-two, if the Deputy Head of the department, with the concurrence of the Head of the department, reports that the said employee has the requisite qualifications for the place to be filled by him; and such person may receive an appointment in the Civil Service for which he is otherwise eligible, if at the date of such temporary employment his age did not exceed thirty-five years. 48-49 V., c. 46, s. 37.

Vacancy in Auditor General's office. **38.** If a vacancy occurs in the office of the Auditor General, the report required as to such vacancy shall be made to the Minister of Finance and Receiver General. 48-49 V., c. 46, s. 38.

PROMOTIONS.

Promotion to be by examination under regulations. **39.** No promotion in either division of the Civil Service shall take place without special examination, under regulations made by the Governor in Council: 48-49 V., c. 46, s. 39.

Subjects for examination. 2. Except as herein otherwise provided, such examination shall be held only once a year in the month of May, and in such subjects as are determined from time to time for each department by the Governor in Council, and in such subjects as, by report of the Deputy Head of the department in which the promotion is to be made, concurred in by the Head of the department, are submitted to the board as best adapted to test the fitness of the candidates for the vacant office. 51 V., c. 12, s. 8.

In inside division. 3. When the vacancy to be filled by promotion exists in the inside division, the examination shall not be open to persons employed in the outside division who, at the date of their first appointment, were of a greater age than thirty-five years: 48-49 V., c. 46, s. 39.

Examination may be dispensed with in certain cases. 4. In the case of barristers, attorneys, military or civil engineers, officers of the artillery in the Militia Department, and architects, draughtsmen and land surveyors, when employed or when seeking promotion in the line of their pro-

fession, and in the case of special class excisemen seeking promotion in the Department of Inland Revenue, the examination may be dispensed with on a report from the Deputy Head, concurred in by the Head of the department, that such examination is not necessary. 51 V., c. 12, s. 8.

5. No such examination shall be required for the re-employment or promotion of excisemen who passed the departmental examinations for the special class in the excise service before the first day of July, one thousand eight hundred and eighty-two. 48-49 V., c. 46, s. 39. Special case of excisemen.

40. Once in each year, and not later than the fifteenth day of March, the Deputy Head of each department shall make and lay before the Board, through the Department of the Secretary of State, an estimate of the number of vacancies likely to occur therein during the ensuing year, in the first division, in the classes of— Estimates to be prepared.

(a.) Chief clerks;

(b.) First-class clerks;

(c.) Second-class clerks. 51 V., c. 12, s. 9.

2. To the number so estimated shall be added such further number as the Deputy Head of the department deems necessary to compensate for any death, failure of health, or other contingency: Additions

3. A similar estimate shall be made at the same time of the number of vacancies likely to occur in the second division, to which promotions can be made: In second division.

4. The numbers so estimated shall be those with reference to which the examinations for promotion shall be held, as herein provided. 48-49 V., c. 46, s. 40. Use of estimate.

41. Notice of each examination for promotion in the service shall be published in the English and French languages in the *Canada Gazette* at least one month before the examination is to be held; and such notice shall state the number of promotions expected in each class in each division. 48-49 V., c. 46, s. 41. Notices of examinations.

42. Except as herein otherwise provided, when any vacancy occurs in one of the higher classes, in either division, the Head of the department shall select from the list of successful candidates for promotion, the person whom he considers best fitted for the office, having due reference to any special duties incident to such office, to the qualification and fitness shown by the candidates respectively, during their examination, and to the record of their previous conduct in the service. 48-49 V., c. 46, s. 42. Selection for vacancies in higher classes.
Amended by 51 V., c. 12, s. 10.

43. Every promotion so made shall be subject to a probation of not less than six months; but at any time during the first year the Head of the department may reject the Promotion subject to probation.

person promoted, or he may be definitely accepted at any time during the second period of six months after his promotion :

If rejected.

2. If the person so selected is rejected he shall then return to the performance of the duties in which he was previously engaged. 48-49 V., c. 46, s. 43.

Further selection.

44. When any clerk who is promoted on probation is rejected, the Head of the department shall select another in his stead from the candidates whose names still remain on the lists of qualified persons, made by the board. 48-49 V., c. 46, s. 44.

His former duties, by whom performed.

45. During the period for which a clerk is promoted on probation the duties of the office previously held by him shall, if necessary, be performed by a person selected for that purpose by the Head of the department. 48-49 V., c. 46, s. 45.

Exchange of positions by officers without examination.

46. An exchange of positions between two officers serving in different departments, or in different divisions of the same department, and the filling of a vacancy in one department by a transfer from another division of the same department or from another department, may be authorized by the Governor in Council, to be made without examination of either officer ; but such exchange or transfer shall be made without increase of salary of either of the persons exchanging or transferred ; and no person shall be transferred from an outside to an inside division, whose age at the date of his first appointment exceeded thirty-five years. 48-49 V., c. 46, s. 46.

Condition.

SUPERNUMERARY AND TEMPORARY CLERKS.

Employment of assistance in cases of temporary pressure.

47. When, from a temporary pressure of work or from any other cause, the assistance of temporary clerks becomes necessary in any branch of the first or second division, the Head of the department may—if he is satisfied that such necessity exists—on the requisition of the Deputy Head of the department, select from the lists of qualified candidates, for whom no vacancies have, up to that time, been found, such number of temporary clerks as are required, or, if the list does not furnish such a person, may employ any other person qualified for the service in question ; but such other person shall not be continued in such temporary employment after the period in which a preliminary or qualifying examination is held, unless he presents himself for examination and obtains a certificate of having passed the necessary examination. 48-49 V., c. 46, s. 48.

Term of employment limited, &c.

Rate of remuneration.

2. The rate of remuneration to be paid for temporary service shall not exceed the minimum salary of a third-class clerk, unless the service to be performed is technical and

requires special qualifications ; and such temporary employment shall not be considered as giving any claim to permanent appointment. 51 V., c. 12, s. 11.

3. The temporary and supernumerary clerks so employed shall be paid only out of money voted by Parliament for payment of the contingencies of the department, division or office of the service in which such clerks are employed, or out of money voted by Parliament for the construction of works upon which they are employed 48-49 V., c. 46, s. 47. Out of what funds payable.

4. Temporary clerks employed continuously since the first day of July, one thousand eight hundred and eighty-two, may be appointed permanently, if otherwise qualified, at a salary equal to their average pay during the two years previous to such permanent appointment, but in no case exceeding the maximum salary of a third-class clerk. 51 V., c. 12, s. 11. Permanent appointment of temporary clerks.

PRIVATE SECRETARIES.

48. Any member of the Civil Service may be appointed private secretary to the Head of a department, and may be paid an additional salary not exceeding six hundred dollars a year whilst so acting : Private secretaries of Ministere.

2. No salary shall be payable to any private secretary unless the amount has been voted by Parliament. 48-49 V., c. 46, s. 48. Salary must have been voted.

GENERAL PROVISIONS

49. The Head of a department, and in his absence the Deputy Head of such department, may grant to each officer, chief clerk, clerk or other employee, leave of absence for purposes of recreation for a period not exceeding three weeks in each year ; and every such officer, clerk or employee, whether in the first or second division, shall take the leave so granted at such time during each year as the Head or Deputy Head of the department determines : As to leave of absence.

2. In case of illness, or for any other reason which to him seems sufficient, the Governor in Council may grant to any officer, chief clerk, clerk or other employee, leave of absence for a period not exceeding twelve months. 48-49 V., c. 46, s. 49. In case of illness, &c.

50. The Head of a department, and in his absence the Deputy Head of such department, may,— Suspension of officers for cause.

(a.) Suspend from the performance of his duty or from the receipt of his salary any officer or employee guilty of misconduct or negligence in the performance of his duties ; In what cases.

(b.) Remove such suspension ; but no person shall receive any salary or pay for the time during which he was under suspension : Removal of suspension.

Report in such cases.

2. All cases of suspension by the Deputy Head of the department shall be reported by him to the Head of the department. 48-49 V., c. 46, s. 50.

No extra remuneration.

51. No extra salary or additional remuneration of any kind whatsoever shall be paid to any Deputy Head, officer or employee in the Civil Service of Canada, or to any other person permanently employed in the public service. 51 V., c. 12, s. 12.

Deduction from pay for unauthorized absence.

2. *Repealed* by 51 V., c. 12, s. 13.

3. When the absence of any officer is not occasioned by his employment on other duties by the Government, by leave of absence, or on account of illness certified by an authorized medical practitioner, appointed by the Governor in Council for that purpose, his salary for each day of such absence, shall be deducted from his monthly salary. 48-49 V., c. 46, s. 51.

Certain payments to be made only under Order in Council.

52. All payments of money to permanent employees, other than salaries, to be made under the provisions of this Act, and specifically stated in the estimates submitted to Parliament, shall be made only under the authority of the Governor in Council. 48-49 V., c. 46, s. 52.

As to officers having resigned and wishing to re-enter service.

53. Any officer, clerk or employee who has resigned, shall be eligible, without examination, under the authority of an Order in Council, to re-enter the service, at the same salary in the class in which he was serving at the time of such resignation, provided that funds are available for the payment of his salary. 48-49 V., c. 46, s. 53.

Act not to prejudice certain officers.

54. Nothing contained in this Act shall prejudicially affect the salary or emoluments of any Deputy Head, officer, clerk or employee in the Civil Service of Canada, appointed on or before the first day of July, one thousand eight hundred and eighty-two, so long as he is continued in office, nor shall anything herein contained affect any salary or emolument granted and fixed by any Act in force on the day in this section before mentioned. 48-49 V., c. 46, s. 54.

Powers of Governor in Council not impaired.

55. No provision herein contained shall impair the power of the Governor in Council to remove or dismiss any Deputy Head, officer, clerk or employee, but no such Deputy Head, officer, clerk or employee, whose appointment is of a permanent nature, shall be removed from office except by authority of the Governor in Council. 48-49 V., c. 46, s. 55.

Proviso.

Attendance books to be kept; their use.

56. There shall be kept in each department, and in the office of the Auditor General, at the seat of Government, and in each office of the second division, a book or books to be called the attendance book, which shall be in such form as

is determined by the Governor in Council, in which each officer, clerk and employee of such office or department shall sign his name, at such times as are determined by the Governor in Council. 48-49 V., c. 46, s. 56.

57. The Deputy Heads of departments and all officers, chief clerks, clerks, messengers, sorters and packers of the Civil Service who have not already done so, and every Deputy Head, officer, chief clerk, clerk, messenger, sorter or packer hereafter appointed, before any salary is paid him, shall take and subscribe the oath of allegiance and also the oath contained in schedule C to this Act, or such other oath as is provided by some other Act, in that behalf:

Oath of Allegiance by officers and employees.

2. In the case of the Clerk of the Privy Council, and all officers, clerks and employees under him, and in the case of any officer, clerk or employee of whom the Governor in Council requires the same, there shall be added to the oath at the asterisks, in the form of the oath in the said schedule C, the words contained in schedule D to this Act:

Addition to oath in certain cases.

3 The Clerk of the Queen's Privy Council for Canada shall take and subscribe the said oaths before the Governor General or some one appointed by him to administer the same:

Clerk of P.C. for Canada.

4. In the case of persons residing or coming to reside at the city of Ottawa, the oaths shall be taken and subscribed before the Clerk of the Privy Council:

Before whom in Ottawa.

5. In other cases the oaths may be taken and subscribed before a justice of the peace or other proper authority, who shall forward the same to the Clerk of the Privy Council:

And elsewhere.

6. The Clerk of the Privy Council shall keep a register of all such oaths. 48-49 V., c. 46, s. 57.

Register.

58. The Secretary of State shall lay before Parliament, within fifteen days after the commencement of each session, a report of the proceedings of the board of examiners under this Act during the preceding year, which report shall include a copy of the examination papers, a statement of all examinations held and of the number of candidates at each, and the names of the successful candidates, and also the rules and regulations made during the year under the provisions of section five of this Act. 48-49 V., c. 46, s. 58.

Annual report by Secretary of State, and what it must show.

2. The Secretary of State shall lay before Parliament in like manner a return of the names and salaries of all persons appointed to or promoted in the Civil Service during the said year, specifying the office to which each has been appointed or promoted. 48-49 V., c. 46, s. 58.

Further particulars.

59. The Secretary of State shall cause to be printed each year a list, to be called the Civil Service List of Canada, of all persons employed in the several departments of the Civil Service, together with those employed in the two Houses of

Yearly Civil Service list to be printed and laid before Parliament

Parliament, upon the first day of July next preceding, showing the dates of their several appointments and promotions, their age, rank in the service, and salary; and shall lay the same before Parliament within the first fifteen days of each session. 48-49 V., c. 46, s. 59.

As to civil servants appointed before July 1, 1882.

60. The provisions of "*The Civil Service Act*," so far as they render promotion in the Civil Service contingent in any degree upon examination as provided in the said Act, shall not apply to any civil servant who entered the Civil Service before the first day of July, one thousand eight hundred and eighty-two, except in so far as regards the duties of the office to which such civil servant may desire to be promoted. 51 V., c. 12, s. 15.

SCHEDULE A.

- (a) Deputy Heads of departments;
- (b) Officers who have special professional or technical qualifications;
- (c) Chief clerks;
- (d) First-class clerks;
- (e.) Second-class clerks;
- (f.) Third-class clerks;
- (g.) Messengers, packers and sorters. 48-49 V., c. 46, sch. A

SCHEDULE B.

APPENDIX No. 3.

CHAPTER 18.

(Revised Statutes.)

An Act respecting the Superannuation of persons employed in the Civil Service of Canada. em-A.D. 1886

HER Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows :—

SHORT TITLE.

1. This Act may be cited as "The Civil Service Superannuation Act." 46 V., c. 8, s. 18. short title.

APPLICATION OF ACT.

2. The Civil Service, for the purposes of this Act includes and consists of—
- (a.) All officers, clerks and employees in or under the several departments of the Executive Government who are paid a yearly salary, and to whom "The Civil Service Act" applies ;
 - (b.) All such officers, clerks and employees of the second or outside division of the Civil Service, as the Governor in Council, from time to time, designates, and to whom "The Civil Service Act" does not apply, and who are paid a yearly salary and employed in an established capacity ;
 - (c.) The permanent officers and servants of the Senate and House of Commons, and the permanent officers and servants employed in the Library of Parliament, who, for the purposes of this Act, shall be deemed to be in the Civil Service, saving all rights and privileges of either House in respect to the appointment or removal of its officers and servants ;
 - (d.) All persons now contributing to the superannuation fund ;
 - (e.) All persons to whom this Act is by some other Act declared to apply. 46 V., c. 8, s. 1.
- Who shall be deemed civil servants.
Persons under Civil Service Act
Certain persons in the outside service.
Officers and servants of Senate and Commons.
Present contributors to the fund.
Certain others

SUPERANNUATION.

3. The Governor in Council may grant to any person who has served in an established capacity in the Civil Service for ten years or upwards, and who has attained the Conditions of allowance.

age of sixty years, or is incapacitated by bodily infirmity from properly performing his duties, a superannuation allowance calculated on his average yearly salary during the then last three years, and not exceeding the following rates, that is to say:—

Rates of allowance.

(a.) If he has served for ten years, but less than eleven years, an annual allowance of ten fiftieths of such average salary, and if for eleven years and under twelve years, an annual allowance of eleven fiftieths thereof, and in like manner a further addition of one fiftieth of such average salary for each additional year of service up to thirty-five years, when an annual allowance of thirty-five fiftieths may be granted; but no addition shall be made for any service beyond thirty-five years;

Maximum rate for 35 years.

Breaks in service not to be counted

(b.) If the service has not been continuous, the period or periods during which such service has been interrupted shall not be counted, and the Order in Council made in any such case shall be laid before Parliament at its then current or next ensuing session. 46 V., c. 8, s. 2.

Governor in Council may add to service of persons appointed on account of special qualifications.

4. The Governor in Council may, in the case of any person who entered the Civil Service after the age of thirty years, as being possessed of some peculiar professional or other qualifications or attainments required for the office to which he was appointed, and not ordinarily to be acquired in the public service, add to the actual number of years' service of such person, such further number of years not exceeding ten, as is considered equitable, for reasons stated in the Order in Council made in the case; and such additional number of years shall be taken as part of the term of service on which the superannuation allowance of such person shall be computed; and the Order in Council in any such case shall be laid before Parliament at its then current or next ensuing session. 46 V., c. 8, s. 3.

Preliminary inquiry by Treasury Board.

5. The superannuation of every civil servant shall be preceded by an inquiry by the Treasury Board—

(a.) Whether the person it is proposed to superannuate is eligible within the meaning of this Act; and—

(b.) Whether his superannuation will result in benefit to the service, and is therefore in the public interest; or—

(c.) Whether it has become necessary in consequence of his mental or physical infirmity:

Report of Board.

2. No civil servant shall be superannuated unless the Treasury Board reports that he is eligible within the meaning of this Act and that such superannuation will be in the public interest. 46 V., c. 8, s. 4.

Deductions from salaries.

6. A deduction towards making good the superannuation allowances hereinbefore mentioned, shall be made from the salary of every person in the Civil Service to whom this Act applies, at the rate of two per centum per annum on such

salary, if it is six hundred dollars or upwards, and of one and a-quarter per centum per annum thereon, if it is less than six hundred dollars, and the sum so deducted shall form part of the Consolidated Revenue Fund of Canada; but such deduction shall be made only during the first thirty-five years of service. 46 V., c. 8, s. 5. Proviso.

7. The full superannuation allowance shall only be granted to persons who have been subject to the said deduction during ten years or upwards,—the superannuation allowance of any person who has not paid it, or has paid it for a less period, being subject to a diminution of one per centum for every year less than ten during which he has not paid it; except that the superannuation allowance of any person hereafter retiring, shall not be subject to any such diminution by reason of his not having paid the abatement hereinbefore mentioned, during any year or years after his first thirty-five years of service. 46 V., c. 8, s. 6. Ten years' contribution requisite for full allowance.
Diminution for less period of contribution.
Exception.

8. Retirement shall be compulsory on every person to whom the superannuation allowance hereinbefore mentioned is offered, and such offer shall not be considered as implying any censure upon the person to whom it is made; nor shall any person be considered as having any absolute right to such allowance, but it shall be granted only in consideration of good and faithful service during the time upon which it is calculated: Compulsory retirement.
Allowance conditional on good service.

2. Nothing herein contained shall be understood as impairing or affecting the right of the Governor in Council to dismiss or remove any person from the Civil Service. 46 V., c. 8, s. 7. Right of dismissal not impaired.

9. If the Head of a department reports with respect to any person employed in his department, and about to be superannuated, from any cause other than that of ill-health or age, that the service of such person has not been satisfactory, the Governor in Council may, as to him seems fit, grant such person a superannuation allowance less than that to which he would have otherwise been entitled. 46 V., c. 8, s. 8. Diminution when Head of Department reports unsatisfactory service.

10. If any person to whom this Act applies, is constrained, from any infirmity of mind or body, to quit the Civil Service before the period at which a superannuation allowance might be granted him, the Governor in Council may allow him a gratuity not exceeding one month's pay for each year of his service; and if any such person is so constrained to quit the service before such period, by reason of severe bodily injury, received without his own fault, in the discharge of his public duty, the Governor in Council may allow him a gratuity not exceeding three month's pay for every two years' service, or a superannuation allowance not exceeding Gratuity when yearly allowance not earned.
Gratuity in case of bodily injury on duty.

one-fifth of his average salary during the then last three years. 46 V., c. 8, s. 9.

Provision for abolition of office, reduction of staff, &c.

11. If any person to whom this Act applies is removed from office in consequence of the abolition of his office for the purpose of improving the organization of the department to which he belongs, or is removed, or retired from office to promote efficiency or economy in the Civil Service, the Governor in Council may grant him such gratuity or superannuation allowance as will fairly compensate him for his loss of office, not exceeding such as he would have been entitled to if he had retired in consequence of permanent infirmity of body or mind, after adding ten years to his actual term of service. 46 V., c. 8, s. 10.

Pensioners under sixty liable to serve if required, under penalty of loss of allowance.

12. Every person who receives a superannuation allowance, and is under the age of sixty years, and is not disabled by bodily or mental infirmity, may be called upon to fill, in any part of Canada, any public office or situation for which his previous services render him eligible, and which is not lower in rank or emolument than that from which he retired; and, if he refuses or neglects so to do, he shall forfeit his said allowance. 46 V., c. 8, s. 11.

Service before Confederation to be counted.

13. Service in an established capacity in any of the departments of the Executive Government or offices of the Legislature of any of the Provinces now included in the Dominion of Canada, before such Province became a portion thereof, by any person who has thereafter entered the Civil Service, shall be reckoned in computing his period of service for the purposes of this Act. 46 V., c. 8, s. 12.

Discretionary power of Governor in Council.

14. In any case of doubt the Governor in Council may, by general or special regulations, determine to what persons the provisions of this Act do or do not apply, and the conditions on which, and the manner in which, they shall apply in any case or class of cases. 46 V., c. 8, s. 13.

Payment of allowances.

15. The allowances and gratuities granted under this Act shall be payable out of the Consolidated Revenue Fund of Canada. 46 V., c. 8, s. 14.

REPORT OF SUPERANNUATIONS.

Annual return to be made to Parliament.

16. The Minister of Finance and Receiver General shall lay before Parliament, within fifteen days after the commencement of each session thereof, a statement of all superannuations and retiring allowances in the Civil Service within the year, giving the name and rank of each person

superannuated or retired, his salary, age and length of service, the allowance granted to him on retirement, the cause of his superannuation and whether the vacancy has been subsequently filled, and if so, whether by promotion or by a new appointment, and the salary of the new appointee. 46 V., c. 8, s. 15.

REPORT

OF THE

BOARD OF CIVIL SERVICE EXAMINERS

FOR THE

YEAR ENDED 31ST DECEMBER

1891

PRINTED BY ORDER OF PARLIAMENT.

OTTAWA:

PRINTED BY S. E. DAWSON, PRINTER TO THE QUEEN'S MOST
EXCELLENT MAJESTY.

1892.

[No. 16b—1891.] *Price 5 cents.*

BOARD OF CIVIL SERVICE EXAMINERS,

OTTAWA, 4th March, 1892.

SIR,—I have the honour of addressing you herewith a report of the proceedings of the Board of Civil Service Examiners for the year ended on 31st of December last, embracing, viz. :

1st. Statements of the Promotion and Entrance Examinations held during the year, showing the number of candidates at each, and the number of those who passed successfully.

2nd. Copies of the Question Papers at the said examinations.

3rd. The names of the candidates who were successful at the Entrance Examinations.

I have the honour to be, Sir,

Your obedient servant,

P. LESUEUR,

Secretary.

The Honourable

J. C. PATTERSON,

Secretary of State.

REPORT

OF THE BOARD OF CIVIL SERVICE EXAMINERS FOR THE YEAR ENDED 31ST DECEMBER, 1891.

The Board of Civil Service Examiners for the Dominion of Canada have the honour to report:—

1. That, as required by the rules and regulations governing their proceedings, they held, during the month of May last, at Ottawa and Toronto, personally, and by means of sub-examiners at Halifax, N.S., St. John, N.B., Charlottetown, P.E.I., Quebec, Montreal, Kingston, Hamilton, Winnipeg, and Victoria, B.C., the general promotion examination for the employés of the Civil Service,—those of the Excise Branch of the Department of Inland Revenue excepted, the Deputy Head not deeming such an examination required in regard of them at that time.

2. But, although the Department of Inland Revenue did not require an examination of the whole Excise staff, they made a requisition for a special class excise examination, to be held in August (it being impossible to spare the men in May), with the view of filling up certain vacancies in that class; and, in order to meet the exigencies of the case, the general promotion examination, so far as it related to that class of employés, was adjourned to the date desired.

3. Accordingly, the candidates of the Excise Branch desirous of competing for those vacancies, were notified to attend at Toronto on Tuesday, the 11th August, when 22 presented themselves and underwent the tests prescribed by the department. The examination lasted five days, and on behalf of the department was attended by two of the chief officers of the branch in that city, the secretary, himself a member of the commission, representing the Board. The candidates' papers were, as usual, submitted to experts named by the department, and, as the result showed, 18 out of the 22 received certificates of proficiency. As a matter of form and legal requirement, these excise examinations are supervised by the Board; but being altogether of a scientific and technical character, the work done by the candidates has to be examined and valued by persons versed in such matters.

4. The regular and general entrance examinations for the whole Dominion, comprising the preliminary for lower grade service, the qualifying for the clerk grade of officers, and the optional for candidates who, in addition to the qualifying curriculum, desired to prove their competency, if English, in the French language, and *vice versa*, if French, as well as in the several other subjects embraced in the list of options, were held during the second week of November at all the places named in the Civil Service Act, and also at Regina, which, by Order in Council, had been added thereto.

5. In their Report for the year 1889, the Board remarked that in 1888, with the view of reducing the number of applicants for examination (which had become excessive) the Civil Service Act, was amended so as to limit the entrance examinations to one in the year instead of two, and the promotion and special examinations, which might previously be held at any time, to one in the year, and that in the month of May. It was assumed that these limitations would largely reduce the number of candidates; but it was found that the expected results were not realized to any great extent, as the number of candidates who came up at the next examination nearly equalled the number who presented themselves when two examinations were held in the year.

6. The Board have now to report that, after much consideration, they came at last to the conclusion that the smallness of the fee—\$2 for one or all the examinations—was, probably the cause, which, in the largest measure, operated in inducing so many to come forward—a large number being evidently ignorant of the fact of their utter incompetency to pass in the subjects of the curriculum. Accordingly they strongly

recommended the adoption of the following scale of fees, which was approved and authorized by the Privy Council, viz :—

1. For candidates coming up to the preliminary or lower trade examination only, \$2.
2. For candidates coming up to the qualifying examination only, \$4.
3. For candidates taking both examinations, \$6.
4. And for candidates coming up for options in connection with the qualifying examination, \$1.

5. For candidates who had failed in one subject as the immediately preceding qualifying examination, and by the Rules, permitted to come up for that one subject only, \$2.

7. The above scale was applied at the last November examination, and notwithstanding the increase in the fees, the number of candidates who wrote on that occasion, as will be seen, was very large, nor had the additional expense the effect of bringing forward a superior class of aspirants, as had been anticipated.

8. In a large number of instances the applications for admission to the examinations are accompanied by letters setting forth that the applicants have the support and interest of strong political friends, and the assurance of employment in the Civil Service if they can only make out to pass. And there seems to be an impression in the minds of many of the candidates that if they should come somewhat short at the examinations these influential friends may be able to procure for them from the Board such measure of indulgence as may be necessary to get them through. And one of the most difficult duties devolving upon the Board consists in dealing with the aforesaid friends who occasionally, through misrepresentations on the part of the candidates, take exception to the decisions arrived at in respect of the performances of their protégés. To give weight to their remonstrances, they bring forward the opinions of outside parties (who can know nothing of the real facts) to the effect that the examiners have done them injustice in the valuation of the papers. This interference has always been a source of trouble, and it is hoped that, for the future, it will cease. The Board can have no possible motive for dealing unfairly, or even unkindly with the candidates, ninety nine per cent of whom, probably, are utterly unknown to them.

9. The Board think it well to say that, in their judgment, it is hardly fair that young men but a few months appointed should be permitted to come up to the next ensuing promotion examination to compete with clerks of several years standing. It is, of course, to be expected that a young man fresh from school, or college, will be able to treat such subjects as arithmetic, geography, composition, &c., with more readiness than the old clerks, who, while faithfully discharging duties (not often embracing these subjects), have naturally become more or less unready in them. The Board are of opinion that a probation of at least two years should be required before civil servants are allowed to come up to the promotion examination. Habits of punctuality, steadiness at work, readiness to aid cheerfully in times of pressure, &c., &c., can only be proven by time, and, when well established, are of great value in determining whether a candidate is deserving of promotion or not,

10. Some difficulty having arisen in regard to the right of employés of the lower grade—messengers, letter carriers, tide waiters, &c.,—to come up to the promotion examination, the question was referred to the Minister of Justice, who ruled that the employés of that class should, if they desired promotion into the higher (the clerk) class, pass the qualifying examination (the examination passed by the clerks), and it will be well that the decision should be understood throughout the service, so as to put an end to troublesome and useless correspondence.

11. The Board have on several occasions detected intentional irregularities and frauds on the part of candidates, at the examinations, and when the offenders could be reached (as for instance when they were already in the public service), some measure of punishment has usually been inflicted. But there was a serious offence, frequently said to have been committed, which had all along baffled the utmost efforts of the Board to establish, and that was the procuring surreptitiously and in advance of the examinations, by the candidates, of the papers to be used thereat. Last summer, however, they

obtained a clue which led to a formal investigation, when, on their own confession, two mail clerks were convicted of that offence. One of them obtained for a pecuniary consideration from a compositor in the Printing Bureau, a set of the papers to be used at the promotion examination of May, 1890. These papers were for his own use and that of another mail clerk who agreed to pay part of the bribery money, and both were assisted by a third person (a man of superior grade in the service and higher ability), in framing the answers. The facts, as established, were duly reported to the Secretary of State, and shortly thereafter, the offenders were suspended from their offices and so continue.

The printer, who supplied the papers, fled and was for some time absent, but after a while ventured to return to the City when he was cited before the Board. He came attended by counsel, but refused to say anything which could be construed into the admission of guilt, and the Board having proceeded as far as they could, relegated the case to the Government.

12. Notwithstanding the utmost vigilance on the part of the examiners to prevent improprieties, cases of copying by candidates from each other's papers are not infrequent, and it would, therefore, seem as if it would be necessary to pass and publish a rule to the effect that persons found guilty of this offence will be debarred from the privilege of attending all future examinations and be declared ineligible for the public service.

13. Owing to the increase in the scale of fees for admission to the examinations, the receipts at the last examination were larger than ever before, and, as shown, the aggregate collected during the year, will be about equal to two thirds of the full cost to the country of the Civil Service Examination system.

FEES RECEIVED.

The fees received during the year and paid over to the credit of the Receiver General were as under :—

Fees from candidates present at the promotion examination in May.....	\$ 314
Fees from the special class excise promotion in August.....	44
Fees collected at the general entrance examination in November.....	2,286
	<u>\$2,644</u>

THE EXAMINATIONS.

GENERAL PROMOTION EXAMINATION.

The number of candidates at this examination was as follows :—

Places.	Present.	Passed.	Failed.	Remarks.
Halifax.....	8	4	4	As at the Entrance Examinations the candidates who fail in one subject only may come up for that one subject at the next ensuing annual examination.
St. John, N. B.	7	2	5	
Charlottetown.....	2	1	1	
Quebec.....	7	6	1	
Montreal.....	28	12	16	
Ottawa.....	60	37	23	
Kingston.....	4	4		
Toronto.....	26	12	14	
London.....	6	1	5	
Winnipeg.....	10	7	3	
	<u>158</u>	<u>86</u>	<u>72</u>	

SPECIAL CLASS EXCISE.

Adjournment of General Promotion.

Held at Toronto ; present, 22 candidates ; passed, 18.

ENTRANCE EXAMINATION.

Preliminary.

Places.	Present.	Passed.	Failed.	Remarks.
Halifax.....	16	13	3	Candidates for this examination do not take optional subjects.
St. John, N. B.....	17	11	6	
Charlottetown.....	2	2		
Quebec.....	25	17	8	
Montreal.....	62	40	22	
Ottawa.....	77	55	22	
Kingston.....	6	5	1	
Toronto.....	103	59	44	
Hamilton.....	49	32	17	
London.....	21	15	6	
Winnipeg.....	9	9		
Victoria, B. C.	9	8	1	
	396	266	130	

The above examination qualifies the successful candidates for employment as messengers, letter carriers, tide waters, lockers, packers, porters and other lower grade offices. Candidates 15 years old are admissible.

QUALIFYING EXAMINATION.

Places.	Present.	Passed.	Failed.	Remarks.
Halifax.....	19	6	13	Of those who failed, 50 failed in one subject only, and are entitled to come up for that one subject at the next examination, but not afterwards.
St. John, N.B.....	8	1	7	
Charlottetown.....	4	4		
Quebec.....	11	1	10	
Montreal.....	50	20	30	
Ottawa.....	105	53	52	
Kingston.....	16	6	10	
Toronto.....	69	35	34	
Hamilton.....	31	10	21	
London.....	28	13	15	
Winnipeg.....	23	7	16	
Regina.....	1	1		
Victoria, B.C.....	16	3	13	
	381	160	221	

In addition to the candidates reported as successful, Mr. J. M. McKenna, graduate of the University of Ottawa, and Mr. C. F. Hamilton, graduate of the University of Queen's College, Kingston, were also, in accordance with the provisions of the Civil Service Act, certified as eligible for employment. They had sent their diplomas to the Board and expressed the desire to be recognized as available for service.

OPTIONAL SUBJECTS.

APPENDIX.

Appended hereto will be found :—

1. Copies of the question papers treated by the candidates at the general promotion examination.
2. Copies of the papers treated by the candidates at the preliminary examination.
3. Copies of the papers treated by the candidates at the qualifying examination.
4. Copies of the papers on optional subjects.
5. A list of the candidates who passed the preliminary examination successfully.
6. A similar list of successful qualifying examination candidates.
7. A list of the candidates who passed in options, specifying the options.

All of which is respectfully submitted,

J. THORBURN, L.L.D., *Chairman.*
 A. D. DECELLES, *F.R.S.C.*
 P. LESUEUR, *Secretary.*

CIVIL SERVICE OF CANADA.

PROMOTION EXAMINATION.

WRITING.

Value. | The value of a paper on writing is estimated by the correct formation of the letters and a well sustained neatness throughout.

100

THE EARL OF GRANVILLE.

He was born in 1815, a month before the Battle of Waterloo. Therefore he is now seventy-four years old ; but what does that matter ? He still retains all the freshness and grace of youth—that is, of elderly youth.

He is, for a man doomed to the House of Lords, an ideal debater. He never speaks at too great length ; he never misses a point ; he always introduces some humorous anecdote or witty illustration ; for all his graciousness and his blandness he can give a sharp cut now and again, that reminds one of a sudden blood-drawing stroke from the paw of a cat who, up to that moment, had seemed the gentlest and most harmless of creatures.

He never even attempts rhetorical eloquence, but his style of speaking is pure, forcible, and graceful. He is one of the few Englishmen who can speak French like a Parisian, and, indeed, there is much about him that reminds one of an accomplished Duc or Marquis in the dead days of the old noblesse.

Lord Granville ought to have been Prime Minister of England some time or other. Twice he was offered the chance ; each time he declined for reasons most honourable to himself.

Now I suppose Lord Granville will never be at the head of an English Government. I am sorry for it. I think it is a pity he should not have held that commanding position.

He is not a man of genius ; he is not an orator ; he is not exactly a wit ; but he has a great deal of talent, a good deal of a certain kind of eloquence, and a good deal of wit and humour. As a professional romancist, I am bound to do all I can to be imaginative ; but I have not imaginative power enough in me to imagine the possibility that Lord Granville might some time do an ungraceful or ungentlemanly act.

In a speech he once introduced a pretty and fanciful conceit, which he modestly said was taken from some French author, but which certainly gave a charming illustration of his own life and his own type of character.

Describing his past career, he said that in his early days he was, when he entered the House of Commons, the youngest member there ; then when in consequence of his father's death he was transferred to the House of Lords, he was the youngest member there.

“ And in fact,” he added—and here came in the pretty little conceit—“ no one ever was so young as I was then.” The words were spoken with a dash of tenderness and melancholy in their humour that made them very touching.—*Justin McCarthy.*

ORTHOGRAPHY.

Correct the spelling.

WUNDERS IN PLANT LYFE.

In the world of plants wee find a grate diversity of form, coler, and sustance, yett awl are created on the saim general plann, each having its oane spere of uzefullness and desined for some spessial perpose in the economy of nature. Plants furnish the support of most animals and at the saime time suspsist upon the waistes of annimal matter. Wile the wun is dependant upon the other, the closest annalogy exists between the too, allike they are provided with the same meens for repare, suply, and develloperment. As annimal lyfe differs matterealley and strangeley onder diferant conditions requyring for its sustennance ellements off an intireley differant caracter, wee finde inn everye locallitty the one fitted fur the other. And the provvishions maid fur each other in many instences awakekin withen us a kean sence off the marvellous; att the saim tyme proving beyownd queshtion thatt creeshion in awl its details is in perfekt harmonny with an iteligenge, of wich the human intelect has nott the slitest konsepshun.

As wee taik a glimps intoo the relm of nature, wee do nott find anny selfish prinnippel, on the contrary every thing is on the brawddest, the moast bennevolent plann. Every plant or flour, fromm the homble litchen on the rocke, to the hiest form off veggettable lyfe, has soam allotted dutye to perform, eether to minnister too the necessities of insex, burds, animals or menn. Some are dezined for foude; others fernish an antedoat fur the varieous ils insident to a given locality, some fernish matterel for owter hoames and others the matterel of aparell we ware. Our morning paypers kan bee fernisht uz butt threa daies from the tyme the fiber waz a groaing trea in the forrest too hundreded myles awaie.

8	2. Add the following :—		
	£	s.	d.
	1763	14	$7\frac{1}{4}$
	684	17	$4\frac{3}{4}$
	1597	4	$8\frac{1}{2}$
	675	13	5
	807	12	$9\frac{3}{4}$
	4975	6	$11\frac{1}{2}$
	9984	17	$9\frac{1}{4}$
	479	29	$6\frac{1}{2}$
	6543	0	$7\frac{3}{4}$
	_____	_____	_____

- 8 3. Convert £177 13 $7\frac{1}{4}$ sterling into dollars and cents @ \$4.87 in the £.
- 8 4. Convert \$1165.37 Canada currency into £. s. and d @ \$4.86 $\frac{2}{3}$ in the £.
- 8 5. Calculate the interest @ $3\frac{1}{2}$ per cent on \$1765.47 for 211 days.
- 8 6. Find the commission due postmasters on \$1795 received and paid by them to the Department, 40 per cent being allowed on the first \$800 and 25 per cent on the balance.
- 8 7. Calculate the allowance for mileage to mail clerks on 211 journeys of 149 miles each, at an average of five-eighths of one cent per mile.
- 10 8. If 14 oz. of wool make $2\frac{1}{4}$ yards of cloth 1 yard wide, how much will it take to make $6\frac{1}{2}$ yards $1\frac{1}{4}$ yard wide.
- 15 9. What will it cost to excavate a cellar 80 feet by 35 feet and 8 feet deep at 42 cents per yard? What will be the expense of building a stone wall round it $1\frac{1}{2}$ feet thick @ \$3.75 a perch—a perch of masonry containing $24\frac{3}{4}$ cubic feet?
- 15 10. A merchant whose stock of goods was valued at \$30,000 insured it for three-fourths of its value @ 3 per cent. In a fire he saved \$5,000 of the goods. What was his loss and what was the loss of the insurance company?

No. 4.

COMPOSITION.

Values.

- 12 1. Express in your own language the ideas contained in the following extract :—

A man who dedicates his life to knowledge, becomes habituated to pleasure, which carries with it no reproach; and there is one security, that he will never love that pleasure which is paid for by anguish of heart—his pleasures are all cheap, all dignified, all innocent; and, as far as any human being can expect permanence in this changing scene, he has secured a happiness which no malignity of fortune can ever take away, but which must cleave to him while he lives, ameliorating every good, and diminishing every evil of his existence,

- 11 2. Substitute other and appropriate words for those printed in the following passage in italics :—
 The *progress* of the English Colonies affords a *striking contrast* to all this *sudden splendour* and *rapid decay*. Their *early struggles*, and *petty wars*, were not for *extensive* power, and a most *countless wealth*. They *landed on a dreary shore* to brave the *rigour* of an *inhospitable* climate; to *combat savages* as fierce as the climate, and *more numerous* than the *intruders*.
- 6 3. Change the following passage from the *direct* to the *indirect* form of speech :—
 “The end,” said Mr. Canning, “which I have always had in view, as legitimate object of pursuit to a British statesman, I can describe in one word. I hope that my heart beats as high towards other nations of the earth as that of any one who vaunts his philanthropy, but I am contented to confess that the main object of my contemplation is the interest of England.”
- 6 3. Punctuate the following, putting in capital letters when necessary :—
 And now great nation what think ye europe says of you you plume yourselves on being the most mighty the most advanced people of the earth the very focus of light intelligence and humanity.
- 5 5. Distinguish between the meaning of the following words, giving an example in each case :—Decided and decisive; falseness and falsity; luxuriant and luxurious; likely and liable.
- 60 6. Write a letter to a friend, of not less than 300 words, “On the elements of success in life.”

GEOGRAPHY.

Values.

- 10 1. Name the Provinces and Territories which compose the Dominion of Canada; name the cities also, distinguishing the Capitals.
- 21 2. Name the principal islands, lakes, bays, straits, peninsulas, mountain ranges, and waterfalls in the Dominion, south of the arctic circle (3 marks for each item.)
- 5 3. Name the fortresses and other military defences of the country.
- 33 4. Specify the localities in the Dominion where gold, silver, copper, iron, nickel, coal, gypsum, salt, petroleum, phosphates, and marble are found (3 marks for each item.)
- 6 5. Is there any fruit exported from Canada? If so, of what kind, whence exported and whither?
- 5 6. Name the place where salmon and lobster canning industries are in active operation.
- 10 7. Specify the principal exports of the country.
- 5 8. Name the nationalities which mostly form our population.
- 5 9. State (approximately) how many post offices there are in the Dominion.

No. 6.

POST OFFICE DEPARTMENT.

DUTIES.

Values.	<i>General paper, to be treated by Candidates from the several Branches of the Inside Service, excepting the Money Order and Savings Bank Branches.</i>
5	1. What rates of postage are fixed by statute? Give a statement of them.
10	2. What treatment do the regulations prescribe for unpaid and insufficiently paid matter posted in Canada: (a) Addressed to places in Canada. (b) Addressed to places abroad?
5	3. If the stamp on a letter that has passed through the Post Office has entirely escaped cancellation, may it lawfully be used again? What is the law upon this point and in regard to the removal of marks of cancellation with a view to a second use of a stamp?
5	4. What check has the Department on the statement made by a Postmaster in his account of the stamps he has on hand?
5	5. What drawbacks attend the purchase of stamps by a non-accounting Postmaster at an office not authorized to supply stamps to non-accounting offices?
5	6. What percentage of the total revenue of his office would a Postmaster receive whose gross collections for a year amounted to \$3,250, and who was allowed 40 per cent on the first \$800 and 25 per cent on the remainder, and who received a further allowance of \$60 for Forward Duty?
10	7. What legal conditions govern the assigning of Mail Contracts?
5	8. What are the arrangements for the exchange of mail matter with the United States?
5	9. Do the regulations require that all letters which cannot be delivered shall be sent to the Dead Letter Office? What exception, if any, is made?
5	10. Mention the principal places situated on the Georgian Bay.
5	11. Describe the course of the Intercolonial Railway and mention ten (10) places situated thereon.
10	12. Mention the counties embraced in the Ottawa, Montreal, and Kingston Divisions.
10	13. Write a letter to a Postmaster who has omitted to enter an outgoing registered letter on his Letter Bill, pointing out his error and the responsibility thence resulting.
10	14. Write a letter to a Postmaster in answer to an enquiry as to whether he was justified in refusing to hand back a letter posted at his office, and applied for shortly afterwards by the sender on the ground that it had been misaddressed.
5	15. Write a letter to a person who complains of having been charged 15c. duty on a few photographs sent to him by post from the United States.

No. 6.

DUTIES.—ASSISTANT P. O. INSPECTORS AND CLERKS IN INSPECTORS' OFFICES.

Values.	
5	1. How may Postage be recovered?
5	2. What protection is afforded by law to United States Mails passing through Canada?

- 10 3. What is meant by "Forward Duty"? Give an example.
- 5 4. Is it necessary to invite tenders for all mail contracts? If not, state the exceptions.
- 15 5. If called upon to report upon the desirability of making a Post Office a Money Order Office, state the points upon which you would consider it your duty to report.
- 5 6. After a letter has been mailed to whom does it belong?
- 5 7. What is the penalty incurred by a Postmaster who fails to render his accounts and pay over the balance at the proper time?
- 5 8. For what term may a mail contract be entered into?
- 5 9. Under what conditions and by whom may Postage Stamps be sold?
- 5 10. Can a toll-gate keeper delay the mail until the toll be paid?
- 5 11. What statutory provision is there for conveyance of mails by railway in Canada?
- 5 12. What statutory provision is there for conveyance of mails by steamboats within the Dominion?
- 15 13. In reporting upon an application for a new Post Office, upon what points would you furnish information?
- 5 14. What is a "Request Letter"?
- 5 15. Can a mail contract be renewed? If so, for how long and on what conditions?

No. 6.

DUTIES—SAVINGS BANK BRANCH.

Values.

- 5 1. Name the Savings Bank Post Offices on the main line of the Canadian Pacific Railway, from Winnipeg to Calgary.
- 10 2. Enumerate the various ways by which an unreported deposit may be discovered, and explain the process by which, after its discovery, it is brought to account in both Branches of the Department affected by it.
- 10 3. Explain, by illustrative transactions, the purpose of the "Proof Sheet," and of the "Schedules" of Deposits and Withdrawals in their relation to the daily duties of the Ledger Staff.
- 5 4. When the transfer of a Dominion Government Savings Banks to the Post Office Savings Bank has taken place subsequently to the 1st of July, in any year, how is the interest on the depositors' accounts calculated and credited for that year?
- 10 5. To whom, and under what conditions, can deposits *in trust* be repaid according to the Statutory Regulations?
- 15 6. Two depositors—one residing in the Province of British Columbia and the other in the Province of Quebec—both die intestate, each leaving the sum of \$900 to be distributed among a widow and three minor children. What steps must the heirs-at-law in each case take to obtain payment?
- 10 7. Three depositors who have, respectively, removed to Stockholm, (Sweden); Cairo, (Egypt); and San Francisco, (United States); apply for the withdrawal of \$200 a piece from their accounts. How, in each case, can the money be remitted?
- 10 8. Write a letter to a Postmaster instructing him how to correct an error in a Withdrawal Entry in a Pass Book, and how, afterwards, to dispose of the book itself.

- 15 9. State, item by item, the percentage of increase in the business of the Savings Bank during 1880, as compared with 1879, when the transactions were respectively as follows :
- Deposits 56,031 and 43,349
Withdrawals 26,043 and 22,326
New Accounts 14,407 and 10,755
- 10 10. Write the following sentence, with the punctuation inserted :—
The intention of the testator was that after payment of the debts and the legacies the residue of the estate should be divided into three parts for the benefit of his three children respectively that out of the part designed for each child five hundred dollars should be paid to each his or her children and that the balance only of such third part was devised to such child.

| 10 | 2. State in detail the directions given to Postmasters in Rules 51 (a) and (b), and Rule 52 of the Book of Money Order Instructions. | | | | | | | | | | | | | | | | | | | | | | | | |
| 10 | 3. Prepare a synopsis of the instructions given in sub-sections (a), (b) and (c) of Rule 62, and state the nature of the several errors that could be avoided if strict regard was paid by Postmasters to those regulations. | | | | | | | | | | | | | | | | | | | | | | | | |
| 10 | 4. John Brown deposited in the Post Office Savings Bank at Ottawa \$35 on the 25th February, 1890 ; \$25 on the 28th June, 1890 ; and \$30 on the 5th January, 1891. On the 22nd of April, 1891, he requested that the total sum deposited, with the interest which had accrued thereon, be remitted him by Money Orders payable at Detroit, Mich. State the amount of the Money Orders required to be sent him after deducting commission fees. | | | | | | | | | | | | | | | | | | | | | | | | |
| 10 | 5. Describe the preparation of the dockets, for Foreign Money Orders by the several Intercolonial Exchange Offices in Canada, and the methods adopted to secure their accuracy. Name the several varieties and the countries to which each is applicable, and give the names of the several Exchange Offices and the kinds of dockets used by each of those offices. State the particular use of, and the treatment accorded to, each variety of docket, from the time of its despatch until it is finally disposed of at the Money Order Branch. | | | | | | | | | | | | | | | | | | | | | | | | |
| 10 | 6. Give a statement in detail of all the duties required to be performed by that division of clerks employed in the Money Order Branch in registering Money Order Accounts, checking Cash Accounts for the Accountant's Branch, and marking off paid orders, and describe the nature of the errors usually discovered and the means adopted to correct each kind of error. | | | | | | | | | | | | | | | | | | | | | | | | |

- 5 7. Write down from memory as full a list as you can of the Money Order Offices in the Provinces of Prince Edward Island and Manitoba.
- 10 8. Prepare an Account Current between Newfoundland and Canada, in the matter of Money Orders, for the quarter ended December 31st, 1890, the transactions during that period being as follows :—
 Orders issued in Newfoundland payable in Canada, \$24,909.66
 “ “ Canada payable in Newfoundland, \$ 9,563.09
 “ of Canadian issue repaid, \$20=—
 Remittances received from Newfoundland by Bills of Exchange for £1232.17.6 and £707.11.—stg.
 By convention each country is allowed credit for the total amount of Orders drawn on it by the other and, in addition, one-half of one per cent commission on such total, and also, each country receives a refund of one-half of one per cent on the value of all Orders of its issue that are authorized to be repaid. It is also agreed, that Newfoundland shall receive credit in Canadian Currency for all Bills of Exchange remitted, at the fixed rate of 9½ per cent premium of Exchange.
- 10 9. Address a letter to the Superintendent, relating the several changes made during the past two years in the administration of, and the work connected with, the Money Order system, showing in what manner and to what extent the general labour and your special duties have increased or decreased.
 Also, suggest any changes that it is now desirable to have made that would improve the Money Order system and at the same time either grant more accommodation to the public or be advantageous to the Department.
- 10 10. The annual statement of the Post Office Savings Bank shows there were 154,678 deposits amounting to \$6,599,896, and 90,151 withdrawals amounting to \$8,575,041.¹⁰ made during the past fiscal year, and that the total expenses for management were \$51,132.⁹⁷₁₀₀.
 Give the average amount of each deposit and each withdrawal during the period and an assumed average of the cost of each transaction.

No. 6.

DUTIES OF RAILWAY MAIL CLERKS AND CHIEF RAILWAY MAIL CLERKS.

5	12. What precautions are taken to ensure the delivery of wholesome flour and reliable dry goods, groceries, and harness, delivered under contract?
10	13. State what you know on the subject of relief grant to the Indians of Nova Scotia, Ontario, and Quebec, giving the methods adopted to reach the poor and sick, and the duties for Agents, both to the Indians and to the Department in the matter of distribution and subsequent presentation of accounts.
5	14. What travelling allowances are permitted the following officials:— Indian Agents, Manitoba; do North-West Territories; do Superintendent, British Columbia; do Commissioner, North-West Territories; do Inspectors, Ontario? What certificate is required to account for travelling expenses.
5	15. State what you know with regard to the payment of:— 1st. Commutation of annuity; 2nd Arrears of interest money.
5	16. Give an explanation and description of the manner in which Industrial Schools and Day Schools are aided, and give a list of the Industrial Schools, with their Principals, and approximately the annual outlay upon each.
100	

No. 6.

Values.	DUTIES (DEPARTMENT OF INDIAN AFFAIRS.—REGISTRY BRANCH.)
5	1. State briefly the mode of recording letters received in the Department.
5	2. Give a statement of the number of branches into which the Department is divided, and the nature of the duties performed in each.
10	3. State the various steps necessary in order to complete action on a Land Return.
10	4. What action is necessary on a "Surrender" received in the Department?
5	5. Give the names of the Agents in Ontario, with the place of residence of each.
5	6. What security is required of Agents of the Department?
5	7. What action is required on a "bond" filed by an Agent in connection with such security?
5	8. What check, if any, has the Department upon its Agents for the answering of its correspondence?
5	9. What Agencies receive Robinson Treaty Annuity?
10	10. Give, approximately, the number of Indians in the various Provinces of the Dominion?
5	11. Name and locate the principal Indian Industrial Schools.
15	12. Summarize the contents of the attached letter.
5	13. What are the conditions of sale of Islands in the River St. Lawrence?
5	14. What are the necessary steps for the enfranchisement of Indians?
5	15. State briefly the terms of the Liquor Law according to the Indian Act.

No. 6.

Values.	DUTIES (DEPARTMENT OF INDIAN AFFAIRS.—SCHOOL, STATISTICS AND SUPPLY BRANCH.)
5	1. Name some of the most important bands of Indians in Ontario ; give the names and addresses of the superintendents and agents in charge.
5	2. What Indian Industrial Schools are in operation throughout the Dominion ; where are they situated, and how are they maintained ?
5	3. How is the condition of the Indian Schools, generally, throughout the Dominion, ascertained, and what steps are usually taken to remedy defects in their management which may be apparent ?
5	4. What are the different statistics the examination and compilation of which are entrusted to this branch of the Department ?
5	5. In what way is the Department advised of the work done day by day, and of the progress made by pupils in the Indian Schools throughout the Dominion ?
10	6. What rates of remuneration are granted to teachers of Indian Schools ; are all teachers paid alike ; if not, state generally what differences in the amounts paid exist, and the cause of such ?
10	7. Give an example of the manner in which the average attendance of pupils during a quarter is ascertained.
20	8. State, approximately, the cost per pupil per annum for maintenance at such Industrial Schools as are entirely under the control of the Department ; to which of the Industrial Schools is a capitation grant in aid of maintenance given ; are capitation grants of similar amount given to each institution so aided ; if not, state the amounts, per capita, paid in Ontario, Manitoba, the North-West Territories, and British Columbia, and the names of the institutions which receive such aid.
10	9. How many pupils are maintained at the Shingwauk Home ; what proportion of these are paid from the Indian School Fund, and what proportion from the Consolidated Fund of Canada ?
5	10. From what source is the fund from which Indian Schools in the Maritime Provinces are built and maintained obtained ?
5	11. At what periods are returns of Government property in the hands of Indian Agents submitted to the Department, and what is the nature of the examination they undergo in order to test their accuracy.
5	12. When the teacher of an Indian School in the North-West Territories requires a supply of school material, to whom should he apply for it ; through what channels will his requisition pass before it reaches its destination, and by whom will the articles required be supplied ?
10	13. May the Chiefs of any band, in council, frame regulations in respect of Indian Schools ; if so, what steps should be taken to confirm such regulations ; state the authority, if there be such, under which Chiefs may frame regulations respecting Indian Schools, and how far they may go in doing so ?

No. 6.

Values.	DUTIES (DEPARTMENT OF INDIAN AFFAIRS.—CORRESPONDENCE BRANCH.)
5	1. After the appointment of an Indian Agent, Indian Superintendent, &c., &c., by Order in Council, what things are required to be done before he can enter upon the duties of his office ?
10	2. Give an outline of the general instructions to a newly appointed Agent or Superintendent.

- 5 3. Can an Indian Chief be deposed ; if so, by whom, and for what cause ?
- 20 4. In what Townships are the Reserves of the Oneidas, Chippewas, Munceys and Moravians of the Thames located ? Who are the Agents respectively, and give their Post Office addresses.
- 20 5. What Indians can become enfranchised ? And what is necessary to be done before an Indian can become enfranchised ? Are there exceptions to the general regulations, if so, what are they ?
- 10 6. Name the different returns which Indian Agents and Indian Superintendents are required to make out and forward to the Department.
- 10 7. In what respect do the provisions of sections 11 and 12 of the Indian Act differ ?
- 10 8. To what penalty is an Indian who deserts his family liable, and if an Indian woman, without children, deserts her husband how may she be punished ?
- 10 9. Are Indians liable to taxation on real or personal property under any circumstances ; if so, state what are the circumstances which render them liable.

No. 6.

DUTIES.—(DEPARTMENT OF INDIAN AFFAIRS, LAND AND TIMBER BRANCH).

Values.

- 5 1. Name the Indian Land Agents in Ontario and Quebec, giving the Post Office address of each.
- 10 2. State the conditions upon which Indian land (agricultural) is sold, giving the maximum and the minimum quantity any one purchaser is allowed to acquire.
- 10 3. State briefly the regulations of the Department in regard to the issue of settlers' licenses.
- 5 4. On what date do all timber licenses expire, and when should renewals be applied for ?
- 5 5. State briefly what is required to be done before any timber license can be renewed.
- 5 6. What security is given by licenses before the issue of a timber license ?
- 7 7. State briefly the regulations of the Department in regard to the granting of a mineral location on surrendered Indian land.
- 5 8. Within what time may a claimant purchase his mineral location, and upon what terms ?
- 5 9. How many mining locations may any individual claimant acquire ?
- 5 10. State the price of coal lands as provided by the coal regulations of the Department.
- 5 11. What royalty is charged on coal, and what area may be sold to one applicant ?
- 15 12. State briefly the action necessary to be taken on a land, timber, and rent return, respectively, in the Lands Branch.
- 5 13. State the requirements, under the Indian Act, of an affidavit of execution to an assignment.
- 8 14. What is necessary to be established and in what way before Letters Patent can issue to a purchaser or assignee of agricultural land ?
- 5 15. State the necessary requirements to be complied with before a location ticket can be issued by the Department.

WASHING PAPER MONEY.

Have you ever washed filthy lucre? I never heard of such a thing until recently, when I happened to be making a social call at the home of a well known physician in this City. Pausing a moment at the door of his office to give him a friendly greeting I noticed a row of "greenbacks" hanging on a string that was stretched from the washstand to the chimney-piece. "I am just washing some money," he said. "Have you ever seen it done? I do it because I get money from all kinds of people, and it is often so horribly dirty that I know it is a breeding place for microbes, so I wash every grimy and ragged bill that comes to me. Give me one of yours and I will show you."

With some misgivings of courage and sinkings of heart I handed him a \$10 bill which was excessively dilapidated and never did anxious hen gaze with more forlorn hope over her duckling about to enter the water than I did over my solitary treasure. Words cannot describe what agony I suffered as the physician lathered its face generously with soap and began a vigorous rubbing. Then rinsing it off in cold water he squeezed it dry and smoothing it out again hung it in the warm sunshine. To my surprise, in a few moments it stiffened itself up and became a clean, crisp, new, self-respecting product of the United States Treasury instead of the limp disgrace that I had been carrying about in my pocketbook. If you don't believe that this is true, try it.—Chicago News'—New York Letter.

Marks.

Of the beautiful women that I have known, but few have attained superiority of any kind. In marriage they have frequently made failures; why, I do not know, unless the possession of great loveliness is incompatible with the possession of an equal amount of good judgment. So much is expected by the woman accustomed to admiration that she plays and palters with her fate till the crooked stick is all that is left her. This we see exemplified again and again. While the earnest, lofty, sweet-smiling woman of the pale hair and doubtful line of nose has, perhaps, one true lover, whose worth she has time to recognize, an acknowledged beauty will find herself surrounded by a crowd of showy egotists, whose admiration so dazes and bewilders her that she is sometimes tempted to bestow herself upon the most importunate one in order to end the unseemly struggle.

Then the incentive to education, and to the cultivation of one's especial powers is lacking. Forgetting that the triumphs which have made a holiday of youth must lessen with the years, many a fair one neglects that training of the mind which gives to her who is poor in all else an endless storehouse of wealth from which she can hope to produce treasures for her own delectation and that of those about her, long after the fitful bloom upon her handsome sister's cheek has faded with the roses of departed summer.—ANNA KATHARINE GREEN.

COMPOSITION.

- 12 1. Distinguish between simple, complex and compound sentences : give an example of each.
- 4 2. Give one example each of an adjective clause and of an adverbial clause.
- 9 3. In the following couplet point out and name the different clauses :—
Beside yon straggling fence that skirts the way,
The village master taught his little school.
- 15 4. Substitute other and appropriate words in the following passage for those printed in italics :—
About two hours before *midnight*, Columbus, standing on the forecastle, *observed a light at a distance*, and *pointed it out* to two of his *people*. All three *saw it in motion as if it were carried from place to place*. A little after *midnight*, *the joyful sound of land! land! was heard* from the *Pinta*. But having been so often *deceived by fallacious appearances* they were *now become slow of belief*, and *waited in all the anguish of impatience, for the return of day*.
- 4 5. Change the following declaratory sentences to interrogative :—
(a.) He came late home last night.
(b.) A full description of the occurrence will soon be published.
- 8 6. Express in your own words the following extract :—
Every manual labourer may see something analogous to the act by which he earns his livelihood operating among the natural objects by which he is surrounded. The sailor may discover the mysteries of his craft among marine animals.
- 48 7. Write a letter to a friend, of not less than 250 words, giving a description of a sea voyage across the Atlantic.

NOTE.—This exercise, as will be seen, is in the nature of a rough draft, the text of which is to be reproduced with neatness and accuracy. Of course the marginal supplementations and interlineations must be taken in at the proper places, and the words scored left out. Blots, erasures, and incorrect spelling will be counted as faults, and from one to ten marks will be deducted from the maximum (100) for each error according to its gravity.

The Examiners will hand one of these slips with the lithographed manuscript paper to each candidate.

N. B.—The transcription paper was a lithographed article equal to about two foolscap pages, and exactly imitated the writing of the Secretary of the Board, who had prepared it.

Value.	WHAT THE BRITISH SCIENTISTS HAVE TO SAY ABOUT MUSKOKA.
100	<p>"Of the enjoyment which we derived from our short excursion to Muskoka it would be difficult to speak in too high terms. The railway journey through the cultivated parts gave us a good idea of your settled districts, which we passed through on our journey here while the gradual transition to the unsettled portions showed us, as it were, an epitome of your short history. The beauty of the sail through the Muskoka Lakes, filled us with astonishment and delight, and will long live in our memories. We have no scenery of this kind in our own country, and those of us who have seen the famous Thousand Islands of the St. Lawrence, prefer the Muskoka Lakes thereto; moreover, the rest and quiet communion with nature, which we have thus enjoyed, has been most grateful to those of us who, having taken a more or less active part in the meetings of the Association at Montreal, came to Toronto somewhat wearied both in body and mind."</p>

No. 15.

PRÉCIS.

NOTE.—In this case the work of the candidates is not to exceed one-fourth of the printed matter, nor fall under one-fifth, but the real pith and substance of the letters must be intelligently given.

Sir E. Thornton to Mr. Cadwalader :

WASHINGTON, 15th April, 1875.

SIR,—I have the honour to invite your attention to the following circumstances which have been communicated to me by the Governor General of the Dominion of Canada.

It seems that the British schooner "Lizzie Dakers," of St. Johns, New Brunswick, owned by Thomas G. Bourne, of St. John, New Brunswick, being on or about the month of October last, under charter to proceed to Philadelphia, took on board 50 cases of preserved lobsters in cans.

On arrival at the port, the master requested entry of these goods under the terms of the Washington treaty as being free of duty.

He states that they were refused entry and that, on personal application to the Collector of the port, he was told that they could only be entered subject to a duty of thirty-five per cent *ad valorem*.

The goods were accompanied by a proper certificate obtained from the United States Consul at St. John, but, in consequence of the decision of the Collector, the Master took the fifty cases back again and they were reloaded.

The owner of the goods claims that the actual loss on the goods in freight, insurance and other expenses has amounted to fifty-two dollars, without any allowance for loss of time on the goods or expenses at Philadelphia.

If the facts are as stated by the Master of the "Lizzie Dakers," it seems to me that the refusal to receive the goods in question free of duty was an infraction of the Treaty of 8th May, 1871, and of the Act of Congress of 1st March, 1873, and that the owner of the goods is entitled to compensation for the loss he has suffered, and I have the honour to ask that inquiries may be instituted.

A representation has also been forwarded to me by the Governor General of Canada relative to a duty levied upon the tin cans containing lobster and other fresh fish imported into the United States from Canada.

I presume that the imposition of this duty is in accordance with the proviso at the end of the fourth Section of the Act of Congress of February 8th, 1875, which enacts that cans or packages made of tin or other material containing fish of any kind admitted free of duty under any existing law or Treaty, not exceeding one quart in contents, shall be liable to a duty of one cent and a-half on each can or package. But I must be allowed to observe that this enactment seems to me to be entirely contrary to the spirit of the 21st Article of the Treaty above mention, which provides for the free admission of fish of all kinds into each country.

The tin can which contains lobster and other fresh fish is not like other packages or vessels containing duty free articles, upon which packages or vessels, such as carboys, casks, barrels, &c., duty is levied; for these are, when emptied, saleable and useful articles, whilst the tin cans containing fish are necessary to the preservation of the contents, but when opened are necessarily destroyed and are unsaleable and useless.

I should hesitate to believe that this particular proviso of the Act of Congress of 8th February, 1875, was especially directed against the fish preserved in cans, the produce of the Dominion of Canada and of Prince Edward Island, which suffers from this duty, whilst on the other hand no duty is levied in Canada upon tin cans containing fish, the produce of the United States.

I venture to hope that the Government of the United States, which I am convinced is imbued with a spirit of liberality upon this matter, will acquiesce in my view and that measures may at least be taken during the next session of Congress for a consideration of the enactment in question.

I have, &c.,
(Signed,) EDWD. THORNTON.

The Honourable
JOHN CADWALADER, &c., &c.

(No. 131).

Sir E Thornton to the Earl of Derby :

WASHINGTON, 19th April, 1875.

MY LORD,—I have the honour to enclose copy of a despatch which I have received from the Governor General of Canada, and in which His Excellency forwards me a report of a Committee of the Privy Council of Canada relative to the refusal of the Customs authorities to allow the import, free of duty, to some tin cans containing lobsters, the produce of the Dominion of Canada, and to the collection of duties upon tin containing fish from Canada.

I also enclose three printed copies of an Act of Congress, passed during the last session of Congress, and approved on the 8th of February last, making certain alterations in the Customs and Internal Revenue Laws. At the end of the fourth section of this Act is a proviso imposing a duty upon tin cans containing fish admitted free of duty.

I at first thought that the refusal to admit the lobsters in tins brought by the "Lizzie Dakers" to Philadelphia was in accordance with this proviso, for I cannot find that there is any such duty as that of 35 per cent *ad valorem* upon lobster in tins, but as the arrival of the "Lizzie Dakers" was previous to the passing of the enclosed Act, I presume that the Customs authorities chose to consider the tin cans as coming under the head of "manufactures of tin," upon which there is a duty of 35 per cent.

I thought it, however, expedient to address a note to Mr. Cadwalader, Acting Secretary of State in the absence of Mr. Fish, in which I have put it that an attempt was made to levy duty upon the fish, and that this was an infraction of the 21st Article of the Treaty of 8th May, 1871.

I also adverted to the proviso of the Act of 8th February, 1875, levying a duty upon tin cans containing fish free of duty, which it appears to me is entirely opposed to the spirit of the Treaty of 8th May, 1871, for it is of course impossible to import fish of that sort without the protection of these tin cans, which are themselves, when once broken open, of no use or value whatsoever:

Your Lordship will observe that the Act impose the duty upon "cans or packages made of tin or other material," so that if this principle is admitted there is no reason why such a duty should not be imposed upon cans, barrels, cases or any other packages containing fish, as would prohibit entirely the importation of fish from Canada, and render stipulation of the Treaty illusory.

I have the honour to enclose a copy of my note above mentioned.

I have, &c.,

(Signed) E. THORNTON.

The Right Honourable
The Earl of Derby, &c., &c.

Mr. Cadwalader to Sir E. Thornton :

WASHINGTON, 19th June, 1875.

SIR,—Referring to your note of the 15th of April last, inviting the attention of this Department to the imposition of duty on an importation of canned lobsters by the "Lizzie Dakers," and also to the importation of a duty on the cans containing fish admitted free of duty, I have the honour to inform you that a communication upon the subject has been received from the Secretary of the Treasury bearing date the 16th June, to whom a copy of your note had been transferred.

In reference to the particular importation by the "Lizzie Dakers," the Secretary of the Treasury forwards a copy of a letter addressed to the Collector of Customs at Philadelphia, under date of 3rd May, requesting a report in reference to the case, and of the reply of the Collector of Customs thereto.

A copy of this correspondence is herewith enclosed. You will perceive from the communication of the Collector the grounds on which he deemed the importation in question not entitled to free entry. The Secretary of the Treasury states in reference thereto that as the importations had been warehoused and withdrawn for immediate exportation prior to his report, that his Department has no means of determining with certainty at the present time, whether the same was or was not entitled to free entry and that he is unable with the facts in his possession to express an opinion as to whether the goods were entitled to free admission.

In regard to the duty on tin cans imposed by the Act of 8th February, 1875, the Secretary of the Treasury is of opinion that it is not proper for him to express an opinion in reference to this legislation in the absence of a request from Congress so to do. He adds that in a case of doubtful construction he would be slow to construe an Act of Congress so that it might be held to do violence to a treaty stipulation, but that in this

instance the language of the Act is so clear as to admit of no doubt, and that he considers the assessment of the duty on tin cans containing fish imported under the Treaty to be required by such Act.

I have, &c.,
JOHN L. CADWALADER.

The Honourable
Sir E. THORNTON, K.C.B.,
&c., &c.

TREASURY DEPARTMENT.

12th NOVEMBER, 1875.

SIR,—I have the honour to acknowledge the receipt of the communication of the Acting Secretary of State, under date of the 2nd instant, transmitting a copy of a note and its accompaniments lately received by you from the British Minister, further in regard to the importation of certain canned lobster in the British vessel "Lizzie Dakers," at the Port of Philadelphia, in the year 1874.

It appears from the papers before this Department that the Collector of Customs at that port declined to admit said importation to free entry, on the ground that the lobsters were presumed to have been preserved in oil, a fact which, if true, would exclude them from the benefit of the provision in the Treaty of Washington, allowing, with certain exceptions, the free entry of fish, the produce of Canadian fisheries.

It further appears that, in consequence of such action of the Collector, the owners of the lobsters returned the same to the Dominion of Canada, under an entry for warehouse and immediate exportation, and, consequently, without any examination by which the fact, whether the same were or were not preserved in oil, could be determined.

Evidence is now presented going to show that the lobsters in question were, as a matter of fact, not preserved in oil, and were therefore entitled to free entry, and claim is made on behalf of Canadian owners for damages alleged to have been sustained by reason of the non-admission of said merchandize to free entry, and the supposed compulsory re-exportation thereof under the circumstances stated.

In reply, I have to remark, that it may be deemed sufficient to state, so far as the action of this Department is concerned, that under the circumstances of the case the Secretary of the Treasury has no jurisdiction of said claim; first, because, it is for construction or equitable damages, and secondly, because, if he could entertain the claim and adjust the amount to be allowed, if any, there is no appropriation out of which he could direct the same to be paid.

It may be proper to add, however, for the information of the claimant, that as the facts appear before the Department, there was no legal stress or compulsion which prevented them from exercising their right to enter merchandize either in bond or for consumption, and therefore to have such examination made as would have determined the precise character of the importation, or would have enabled them to bring the question before the Department on protest and appeal.

It would seem, therefore, that the claimants voluntarily adopted an alternative of their own selection, a course which they may have taken in ignorance of their legal rights, but not of itself affording any grounds for the relief they now seek, and which, if they are entitled thereto, can be afforded only by special Act of Congress.

I am, &c.,
(Signed) B. H. BRISTOW,
Secretary.

Hon. HAMILTON FISH,
Secretary of State,
Washington, D. C.

(N° 18.)

Sir E. Thornton to the Earl of Derby.

WASHINGTON, 24th January, 1876.

MY LORD,—With reference to Your Lordship's despatched, N° 263, of the 28th ultimo, I have the honour to state that I have more than once urged upon Mr. Fish the justice of procuring the repeal of the tariff of 8th February, 1873, as far as it relates to the imposition of duty upon the tins containing fish imported from Canada, on the ground that it was in violation of the 21st Article of the Treaty of 8th May, 1871, Mr. Fish admitting that the duty in question was opposed to the spirit if not the letter of the Treaty, had promised that he would endeavour to obtain a repeal of the objectionable enactment on the meeting of Congress.

Within the last few days I have reminded him of the matter. He excused himself for not having yet taken any steps, on the ground that owing to the multitude of requests for papers by the new House of Representatives he had been more than usually occupied, but he has assured me that he will take an early opportunity of calling the attention of the chairman of the Committee of Ways and Means to the subject.

Your Lordship is, however, aware that the House of Representatives is now so constituted that it is difficult to induce it to pay attention to any representations made to it by the Executive Government nor has it a great desire to rectify the mistakes which may have been made by the last House, in which the majority was of the opposite party to that of which it is now composed.

I have, &c.,

EDWARD THORNTON.

The Earl of Derby, &c., &c.

No. 16.

Value.

BOOKKEEPING by Double Entry.

100
Marks.

As no Day Book is required the Journal entries must be in detail, so that the facts of the business may be clearly understood from them.

The following accounts may be opened but the candidates will take what course they please: Capital, Cash, Rents (may include Taxes, Insurance and License), Wages, Groceries, Bread, Butcher's Meat, Milk, Fruit, Vegetables, Fuel and Light, the Bar, Bills Payable, Petty Expenses, Profit and Loss. This paper covers one year's operations.

STATEMENT.

George Stoner becomes the lessee of a well appointed hotel at a rental of \$5,000 per annum, plus taxes, and at a further rent of 10 per cent per annum for use and wear of the furniture, valued at \$15,000. He has a cash capital of \$10,000. He is to pay the manager \$1,500, the bookkeeper \$1,000, and four other men \$700, \$600, \$500, and \$400 respectively per annum. Also to two call boys \$10 a month each, his head cook \$100 per month, and three assistants \$30, \$20, and \$15 per month respectively. To a lady housekeeper \$30 a month, a head laundress \$20 a month, and ten maids \$10 a month each. The taxes amount to \$1,525, and the insurance is one and one-half per cent on stock and personal effects, valued at \$10,000.

All the above charges he pays regularly during the year.

During the same period he purchases groceries \$9,335, paying on account \$8,120; bread and confectionaries \$2,972, paying on account \$2,200; butcher's meat and poultry \$5,721, paying on account \$4,836; milk and cream \$1,422, all cash; fruit \$2,730, paying on account \$2,000; vegetables \$2,644, cash; wines and liquors for bar \$13,666, paying on account \$12,111;

fuel and light \$4,518, cash ; for a license he pays \$500, and his petty expenses (in cash of course) amount to \$2,795. During the year the House entertains guests who, in the aggregate, make up \$10,375 days at \$3 per day ; 9,102 days at \$2.50, and 7,862 at \$2. Besides the transient guests there are 15 permanent boarders for the year who pay an average of \$30 per month. The bar makes cash returns of \$19,823, and the laundry \$3,419.

At the year's end, Mr. Stoner settles with his creditors by promissory notes at 3 months for the balances due them, less ten per cent discount, which, in consideration of his good custom and his past cash payment, they allow him ; the discount going to profit and loss. On taking stock he finds that he has on hand one-fifth in value of the groceries purchased, two-sevenths of the wines, liquors and cigars, and one-sixth of the fuel, estimated at \$300. He also finds that he has on hand of dry goods and various articles (bought for cash) valued at \$835. Show by means of a profit and loss account the result of the year's business.

No. 17.

STENOGRAPHY.

Value.

100
marks.

NOTE.—The examiner will see that the candidates are comfortably placed in respect to hearing, and supplied with what they need. He will then read the paper to them so that they may know its purport, and then, in exactly 5 minutes, will give the reading for the exercise. The candidates who cannot follow will, of course, drop out. For each word omitted, and for each wrong word used, from 2 to 5 marks will be deducted. The shorthand notes must be given in as well as the extended notes.

QUALIFICATIONS OF A SENATOR.

A notice of motion had been given by Senator Poirier as to the propriety of amending the Act respecting the Senate and House of Commons, so as to render ineligible any shareholder of any incorporated company, holding a contract, &c., from the Government.

In reply to him Hon. Mr. Miller said :

The British North America Act, which is the constitution of this country and the Act under which this House lives and has its being, lays down certain qualifications, the possession of which is necessary to any gentleman desiring a seat in the Senate. These qualifications are as follows :—He shall be of the full age of 30 years ; he shall be either a born or naturalized subject of the Queen ; he shall be possessor of four thousand dollars worth of property above his debts ; he shall be a resident in the province for which he is appointed, and in the case of Quebec shall have his real property qualification in the electoral division for which he is appointed. There are, on the other hand, certain disqualifications with regard to a senator. His seat becomes vacant in case he fails for two consecutive sessions of Parliament to give his attendance in the Senate. If he takes an oath of allegiance to a foreign power ; if he is adjudged bankrupt or becomes a public defaulter ; if he is attainted of treason, convicted of felony or of any infamous crime, or if he ceases to be qualified in respect of property or of residence. Now, these are the qualifications and disqualifications of a senator, and the Imperial Act, which created our Constitution, expressly declares in few and emphatic words in the 29th section, that "A senator shall, subject to the provisions of this Act, hold his place in the Senate for life." I say the Parliament of Canada has no power to pass an Act to contravene that, or to add to the qualifications or disqualifications of a member of the Senate.

No. 18.

Value.

TYPE WRITING.

100
marks.

NOTE.—The examiner will hand this paper to the candidates, and give them five minutes to read it over. All being ready he will start them, and at the end of 10 (Ten) minutes will call "Time up," when the copies must be given in, finished or unfinished. Every defect will be fairly (not excessively) appraised, and deducted from the maximum (100 marks).

CIVIL SERVICE CONTROLLER.

HON. MR. ABBOTT—We have not considered the propriety of having a permanent Civil Service Commission. We propose the appointment of a commission which shall investigate and report upon the best mode of conducting the public business; but I doubt if circumstances would justify the expense of a permanent commission. And I think, moreover, that the measure which I have stated we contemplate would have in a large degree the same effect as a permanent commission—that is to say, the appointment of an official standing independent of party and of the Government of the day, to a large extent, very much as the present Auditor-General does, who might be called the Comptroller, or Inspector, or any other name that might properly describe his office; whose duty would be something analagous to that of the inspector of a bank. He would have a right to enter every department of the service when he chose, and investigate the conduct of the employes and officials; scrutinize the management of the finances of the department, as well as the way in which its work is done—in fact, look thoroughly from time to time into the mode in which the business of every department is conducted, and the mode in which the clerks and employes of that department are doing their duty, and report upon those subjects accordingly. By these means what we hope to arrive at is a better system—by which the affairs of the country will be managed in a business-like way; and if we carry out what we further contemplate, we hope to obtain the service of a person of standing, who will have the confidence of the public, and who will make it his business and duty, from time to time, to supervise the operations and working of every department of the Service.
