AVID BURKE, A.I A., F.S.

It is impossible to forecast Mr. Fielding's tariff proposals to the new session of Parliament. His speech at Montreal, on Tuesday, indicated no notable departure from his former declarations that the tariff would continue to be based on the principle of maximum, minimum, and preferential duties-maximum for hostile fiscal countries; minimum for neutral countries; and preferential for Great Britain and other parts of the Empire. No radical change of principle is expected, Mr. Fielding has already shown that he is careful of the industrial welfare of Canada. The new tariff, if it meets the needs of the most important industries will be drawn up with minute consideration of the effect of each detail, with fairness to every class as its underlying principle, and with a due consideration of the necessities of the Dominion treasury.

Since the appointment of the Tariff Commission and the commencement of its labors in the fall of 1905. agricultural classes. Wherever the commission held revenue only

the contest at Ottawa and will be ready when the higher, duty on the foreign. time comes.

The personnel of the commission is interesting. Mr. Fielding has been reporting annually increased expenditure, but his attitude during the sittings of the commission gave the advocates of lower tariff more confidence than they had before. It is partly due to this, that the manufacturers thought it necessary to prepare the most thorough cases they could and present them to the commission, with much wealth of detail. Mr. Paterson and Mr. Brodeur, Ministers of Customs and of Inland Revenue were apparently predisposed to the continuance of such a tariff as will bring in a good revenue. Sir Richard Cartwright, the least active of the commissioners is the man who, in opposition, said the Conservative government was bleeding the farmers white. If public utterances and political inclinations count for anything, a commission thus composed ought to do something in the way of putting into practice the professions of the Liberal party in the direction of tariff for revenue only.

Since 1897, when the first Liberal tariff commisthere has been controversy between manufacturing and sion did its work matters have changed. Predictions were then rife, that a lower tariff would ruin the counsittings the claims of one or both sides were presented. try. Such fears are not unheard to-day. The manu-Champions of agriculture have made a preliminary at- facturers have put forward strong arguments to show tack on the tin plate industry. They have published that they would suffer seriously. They ask for lower a general denunciation of high tariffs and declare that duties on raw materials and higher duties on finished as proof of their sincerity they will gladly assent to products. There are cases in which the requests of the abolition of all duties on agricultural imports, if one industry for higher duties on the finished product the government will observe the principle of tariff for have clashed with those of another for lower duties on the same products, which happened to be, in some The manufacturers have kept quiet. Custom form or other, its raw material. Woolen manufacturhas made the people of Canada look upon the protec- ers want a higher duty on cloths. They complain that tive tariff as a natural condition. Prosperity has come the British preference has harmed them. Tailors are to Canada under a protective tariff and manufacturers opposed to high duties on cloths, and think that the think it is up to the farmers to prove their case for low woolen manufacturers ought to be content with things tariff before it will be necessary to appear busy. But as they are. Dealers in foreign leaf tobacco want a unostentatiously, the manufacturers are preparing for lower duty. Dealers in the home-grown leaf want

During the sessions of the commission there were The tariff commissioners gathered mountains of a half dozen or more questions about which most of information from one end of the country to the other. the discussion and evidence centred, such as agri-

cultural implements, humber, coal, woolens, cottons, materials and rolling stock. It opens up more delightcultural implements, lumber, coal, woolens, cottons, iron and steel, tobacco and market gardening produce. British Columbia, Ontario, and Ottawa Valley lum-bermen united in asking for a duty of \$2 a thousand feet on rough lumber. British Columbia mill owners declare that they were compelled to close down for these months in the scan because of United States three months in the year because of United States Of course, it is easily objected that Mackenzie competition. Settlers and western farmers denounced and Mann have been in the railroad business for Mac the proposal and said they would be unable to pay the kenzie and Mann, first, last, and all the time; and that high prices resulting. The real situation is comparatively simple. The far east and the far west of Canada produce their own coal. Ontario is dependent upon Pennsylvania coal. No Canadian coal fields would suffer by removing the duty on American coal and the large Canadian mines would find a market in the states if the American duty were abolished. Market it is this which actually counts—that the Canadian States if the American duty were abolished. Market it is this which actually counts—that the Canadian perdeners complain of American competition in early Northern has done more for the three thousand miles vegetables and other produce which can be grown in the States before Canada, and destroy the market for Canadian stuff by the time it arrives.

\$ 738

Mr. Fielding knows the impossibility of pleasing everybody. His own predilection is obviously for a low tariff. In high import duties he sees a serious menace to political contentment in the West. It happens that the Government's party interest and the national interest are identical in that respect. Mr. Fielding would have the prices of manufactured goods kept down so that the prairie farmer may give large orders, and so enlarge the output of Eastern mills and factories. There is much political wisdom in the counsel.

TWIN BRETHREN OF THE ROAD.

Some railroads are great from the beginning; and know they are great from the moment of their christening. Some just grow and get baptized almost by accident, and are astomshed at their own capacity for expansion. The Canadian Northern has just grown. Its brain has been in Toronto since its in-ception, nearly a decade ago. Its foot has only just arrived. It has upset many theories. It will upset more. It constantly wins its widening way. It will presently be a transcontinental system. It will have fleets upon Eastern and Western waters. It is a great asset of Toronto. The master-builders of it will soon be banqueted in the city of their adoption. For the running of the first trains between Toronto and Parry Sound over the rails of what was the James Bay line, and is now the Canadian Northern Ontario, marks an epoch in Toronto expansion which, seeing that the Canadian Northern did not care to celebrate it openly; the business men must celebrate for them.

Hyperbole of praise is worse than no appreciation at all. But truth is really often stranger than fiction. Those of us who knew Western Canada from awenty to twenty-five years ago are aware of the great gulf that divides the depreciation of those days from the sober truth of these. The Canadian Northern is hauling abundance of first-class wheat from lands on which it was believed, in the early eighties, that wheat would seldom ripen. It is, of all lines on this continent which serve agriculture, the nearest to the North Pole. has obtained the capital for its construction more cheaply than any other pioneer line in the Republic or the Dominion. The common stock is held by two men, whose partnership has become synonymous for twentieth century Canadian enterprise. Ask levelheaded Winnipeg business men to estimate the worth of the Canadian Northern to that metropolis, and they will say that at least one-third of its rapid enlargement is due to it. Which means that the builder of

a railroad is veritably greater than he who takes a city. The Toronto to Parry Sound line is a comparatively isolated section of the transcontinental that is to be. It has taken longer to reach the operating stage than was anticipated—which is a habit new railroads which has no perfunctory attributes, and which has have in times of over-driven producers of building demonstrated its rugged independence in Imperial

Volume 40.

Of course, it is easily objected that Mackenzie they represent the apotheosis of corporation aggres-It unquestionably true that railroads sion. brought into being by men who make money at the business. That is a misfortune of human nature; and not a malefaction of the men who make the m It is equally true-and from the public point of view of territory which it covers than had been done for it in all the cycles of its existence. The philanthropist who inveighs without ceasing against the deeds of capital, is a valuable scourge for the faulty; of who alas, there are too many in a materialistic world. But he doesn't open up new country in which men may transform their poverty into affluence. Whatever Mr. Mackenzie and Mr. Mann have made out of their foresight, courage and persistence they deserve. They are as open to criticism as other people. Nobody admits that more readily than themselves. They are entitled to public appreciation in large measure. The new communication with Georgian Bay offers a fitting op-portunity to exhibit it. The Toronto Board of Trade is taking advantage of it with proper enthusiasm.

ACCORDING TO EXPERIENCE.

The small change of the Dominion is worth more than a whole year's revenue was when Mr. Courtney entered the civil service. The country spends on its administrative machinery a quarter of a million dollars every working-day-a sum beyond our fathers' dreams of extravagance. Mr. Courtney has retired on a pension he earned three times over as Deputy-Minister of Finance. He, above all men, is qualified to be the paternal friend of the tax-payer, for he has worked with every Finance Minister since Confederation except Sir Alexander Galt. The nation should turn to the best account the accumulated discretion of highlyskilled, long-tested public servants.

Mr. Courtney addressed the Canadian Club of Toronto this week on the Finance Department. All that he said makes you wish for more. He touched lightly some of the affairs which too few Parliamentarians heed. There is prospect that we may, a little later on, learn a great deal from the stores of his unique experience. At present, with a tariff session just beginning, for the trend of which Mr. Courtney no doubt has a certain responsibility, the ex-deputy finance minister, obviously is not inclined to assu the heavier parts of the candid friend. His speech with its admonition against extravagance, and its appeal for Parliamentary service less affected by prospects subtractions from the public treasury, gives of promise of extensive teaching in fulness of time upon the vital problems of national finance.

Mr. Courtney would have the country take more thought over its housekeeping expenses; prepare to obviate an impairment of its credit through the pending maturity of heavy loans; guard against excessive obligation to foreign capital; and pay its servants beter wages. There, surely, is a vigorous, working creed from one who might have been excused if he had sought instant escape from the associations of years of faithful drudgery, and honest subordination to me visible financiers. But blood will always tell. Mr. Courtney comes of a sturdy west of England stock

QUESTIONS OF POWER.

It is said that the Niagara power situation is in they say the whole thing is in crisis. The Hydrohave made a deal with the Ontario Power Company for the supply of electricity at Niagara at something under \$12 per horse-power per annum. The case of served by a Government-municipal scheme, cities like Brantford, Guelph, and London can be supplied. If figure-a little man in a big position to the magnitude the Hydro-Electric Commission becomes impotent in of which he can never raise, or a man of large, the provincial capital, it will be expected to retire

The Commission is acting upon lines which can the typical Canadian belongs to the second category easily be defended as businesslike, if it be safe to assume that the deal believed to be arranged with the Ontario Power Company is all that the admirers of the Commission like to think it is. Contracts for the purchase of electricity are sometimes as elusive as the fluid itself. The mysteries of the step-down have before now been learned, at great expense by purchasers. Until the terms of the bargain are disclosed it will be from arriving. It is at the bottom of inefficiencies, best to believe that the Commission has made a new record among governmental institutions for business acumen.

It was first estimated that Toronto city would take 30,000-horse-power, and Toronto Junction 10,000. The Commission, mindful of the risks involved in penditure, as Mr. Courtney, with a certain grim having to pay for a stated quantity purchased from humor, reminds us, is sanctioned by Parliament; which the generating company, advises a demand for a 18 the creature of the people. Restraint in spending minimum of half these quantities, which, it gives out, can only issue from the same source as the prevailing can be supplied to the municipalities in bulk, at about strenuousness in getting rid of the revenue. Where \$16.65 per horse-power per annum, twenty-four hour is the process of exacting value for public money spent, load, or \$17.75 for half load. Answering newspaper to begin? It is easier to propound conundrums than to demand, and a request from the Toronto branch of the solve them. But the longer some solutions are de- Manufacturers' Association, the City Council will problayed the more costly are they. Does Ottawa give ably submit a by-law on January 1st, authorizing the much sign of retrenchment? Precious little. The council to contract for a minimum of 15,000 horseapostolate of economy is sleeping or, peradventure, it power at a cost not to exceed \$18.10. To distribute to is on a journey. It is not utterly dead. The Govern- the private consumer would cost about another \$4. ment has undertaken to hand out an additional three Roughly, this is about half the price which it is be-

740

The scheme of making a firm contract for only half the quantity of power for which demand has already been made is sound enough. The price would information thus obtained, the Government will be ensure everincreasing demand for power. But so many considerations enter into the application of the made. Until the timber is removed from the limits no calculations which predicate an industrial revolution mining can be done. It will be the middle of the that it is reasonable to ask for greater elucidation of them. The Toronto Railway system is run with about 13,000 - horse-power. The report of the Municipal Commission, which ante-dated, the Hydro-Electric Commission, estimated the demand of Toronto at about 50,000 horse-power; including the supply for thing depends upon the valuation of the minerals as the Street Railway, and the Electric Lighting Company, which cannot be switched out of existence in a jiffy. Are the Street Railway and the Electric Lighting Company, the allies of the Electrical Development Co. and the Toronto-Niagara Power Company, going to break their contracts? Do not those contracts pro-vide for the prices to be adjusted to what are found to be market rates? How long will it take to build a to be market rates? How long will it take to build a second transmission line, that can compete with the private companies, if and when they cut rates to de-feat municipal operation? Will a war be provoked by the municipalizers while they are commencing to organize a market of scattered users of power, in com-petition with the interests which have the biggest customers in the city for their initial purchasers? Will a municipality have to pay for the excessive optimism of its neighbor?

critics sav the prices were based upon the cost of steam power-that the limit of the consumer's purse and not the cost of production fixed the rates. The figures authorized by the Commission give a certain inspection question by the attack on existing condireasonableness to this contention. Much more is tions, by Mr. McLeod, general manager of the Bank know about electrical transmission than had been of Nova Scotia, which appears on another page. It discovered when the Electrical Development Company was launched. It seems that whatever happens, five per cent. of Canadian chartered banks have come thene will have to be considerable revision of prices by the parties at present in possession. Once they recognize that necessity, there should be no difficulty in reaching a modus operandi that will give the com-panies excellent return for their investments, and secure permanently to the public cheap light, heat and power.

The general development of commerce is vastly more important financially than one or two per cent. to one or two companies. Though the Toronto case is the most exigeant, it is not, of course, on all fours with those of municipalities further west, to which transmission lines from Miagara Falls have not been constructed. Commitments to private enterprise directors. Government inspection would give them elsewhere are not so enormous: either proportionately props which they should not be supplied with. Directors or otherwise; and it may be easier to carry through a municipal power policy under the ægis of the Government Commission. The submission of a uniform bylaw is a step in the right direction. Let ample credit be given to public men for every wise, cautious move, they make. It is good that they are not so excited as some of their newspaper friends. The event will prove that there is as much reasonableness in Canadian power companies as in other institutions, and that it is better to accommodate than to confiscate.

EDITORIAL NOTES.

tion from a reliable source makes it certain that facts which any bank fails to deal with.

has not considered any of them. The Department of Mines is making careful explorations and examinations of the property with a view to determining as far as possible the value of the minerals. With the information thus obtained, the Government will be winter at least before the timber is off. Whatever action the Government takes it will proceed very slowly and cautiously. The Government has not yet formed any conclusion as to what policy it will adopt in regard to the disposition of the property. Everydisclosed by the examinations now under way.

In Newfoundland the appointment of a special commissioner for Labrador is proposed. Sug-gestions are made that Labrador should be repre-Sugsented in the Newfoundland Legislature. There are educational and physical difficulties which make this impossible at present. Labrador's resident population of about 4,000 people is cut off from the rest of the world for more than half the year. Newfoundlanders handle about a million dollars' worth of Labrador products annually. These figures refer to fish and fish products alone. If the timber and mineral possibilities were exploited the sum would be much larger. The possibility of Canadians coming in by the back door and securing the trade which Newfoundland has not cultivated, is making the people of Newfoundland Of its heighbor? Questions like these suggest themselves integ-minably. They point to two alternatives—either the existing companies will supply the city on some re-vised plan, or they will have to be expropriated. The companies' inconvenience is in their contracts which, obviously allow remarkably handsome profits. Their from June to October.

A somewhat new complexion is given to the bank tions, by Mr. McLeod, general manager of the Bank is not pleasant to be reminded that since 1883, twentyto ignominious ends. But facts must be faced. If Government or other independent inspection would secure the object aimed at, it should, of course, be adopted. But, Mr. McLeod's argument, strong, and ably presented though it is, seems to us to make out a case for direction by directors, rather than for any examination by outside interests. Mr. McLeod says that examination by a competent banker into the accounts of any of the banks which failed, would have disclosed their unsoundness years before collapse Which means that incompetence is the occurred. original and persistent offence against good business. What is needed is the most direct responsibility of Government inspection would give them cannot count the cash in a hundred branches, or pass upon every trivial loan. But they must provide double checks against incapacity and trickery. The Ontario Bank case is the result of monumental incapacity; which alert shareholders should have observed. Though Government inspection is not the solution of the problem forced upon the Bankers' Association and the Government; some new middle course must be devised. It will probably be found in an enlargement of the declaration made to the Government; and an increase in the signatories. The mere presenta-tion of figures is not enough. The Finance Depart-> ment should be supplied with definite assertions as to A story has been current that the Ontario Gov- a bank's position; be clothed with definite assertions as the ernment has received an offer of \$15,000,000 for the specific inquiries; and be saddled with direct, unmineral rights on the Gillies timber limits. At she annual meeting of the skareholders of the Stan-stead, Shefford and Shambly Railway, at Waterloo, the fol-lowing directors were elected for the ensuing year: Hon. S. W. Foster, Hon. E. C. Smill and Messrs. Chas. M. Hays, E. H. Fitzhugh, G. C. Jones, Gen E. Robinson, Gardner Stevens, A. H. Moore and J. P. Nores. The new board of directors elected the following officers: Hon. S. W. Foster, president: Mr. E. H. Eitzhugh, vice-president; Mr. C. H. Parmalez, secretary-treasurer, and Mr. W. H. Chaffee, as-sistant secretary-treasurer. sistant secretary-treasurer.

sistant scoretary-treasuper. The Winnipeg Jobbers' Gredine Clearing House, which was recently incorporated by A. B Keut, with a capital of \$20,000, and which carries on a general financial agency to to make investigations, act as arbitrators, adjusters and trustees, have found it necessary tosseek larger premises in the Bank of Ottawa building, Winnipeg. There are nearly one hundred members, which number will shortly be largely increased by Eastern subscribers. Mr. G. L. Salter, formerly with the National Trust Company, is now associat-ed with the house ed with the house.

The first issue of monthly payment accumulative shares of the British Columbia Permanent Loan and Savings Company has been paid, within the time originally estimated—a somewhat unusual occurrence in loas company shares. The shares were issued on May 1, 1898, and estimated to mature in 815 years. A payment of Si a arouth wes required on each share. The total payments have amounted to \$102, and the amount of \$48 on each share, and heures out at the rate of \$14 per cent per annum interest, compounded, monthly.
Last week saw the launching in Winnipeg of a new real estate and mortgage company, under the name of the Coward Investment & Mortgare Corporation, Limited. A charter has been secured, the tapital stock of the company being fixed at \$200,000. The officers of the corporation are: —President and general manager, J. G. Coward, formerly of the Coward Land Exchange; vice president and director, George Creagh, formerly director of the W. F. Law Co., Limited; secretary-treasurer and director, Duncan A, MacDonald, formerly director of the W. F. Law Co., Limited; directors, D. R. White, barrister at law, and H. Kennason, barrister at law.

barrister-at-law.

barrister-at-law. A reminder of the old times when it was customary to announce events at the parish church door, or through the cure in Quebec province, was given last Sunday at the Church of St, Jean Baptiste. A teller in a branch bank in Montreal was applied to by a stranger to have \$300 in Canadian bills changed into American money. In accom-modating him the teller paid over by mistake \$550. The cure of St. Jean Baptiste related this story from the pulpit, and asked the person who had thus profited to restore the \$250. But no one came forward, it is supposed that the man went at once to the States.

SHAREHOLDERS SEEKING PROXIES.

The Ontario Bank Shareholders" Association is working quietly in its endeavor to obtain enough proxies to control the general meeting on December with. There are 15,000 shares of the bank's stock. If we thousand belong to the bank and cannot be voted upon. This leaves a balance of 13,000, and it will be necessary for the shareholders to obtain the voting power of more than 6,500 to have control of the meeting. There are 1,802 shares in the hands of brokers. The Shareholders' Association hopes to have the brokers' co-operation in the election of a joint ticket of directors. If they elect their own directors, the manage-ment of the bank's affairs will be materially altered. The first thing then to be considered will be the sale of the bank to ' c Bank of Montreal. The shareholders are determined, if possible, to prevent ratification of the sale. The meeting The Ontario Bank Shareholders' Association is working to 'e Bank of Montreal. The shareholders are determined, if possible, to prevent ratification of the sale. The meeting will probably develop a strong fight for control. A meeting of the shareholders will be held prior to the general meeting to receive a report from their courses. Mr. Scott. In order to enlist the sympathy of the brokers the shareholders will be prepared if necessary to submit three names for the directorate and let the brokers submit the other two.

POST OFFICE INEFFICIENCY.

Serious complaint of the Montreal Post Office has been laid before the Board of Trade by the Montreal Dry Goods Association. The handling of the mail, it is said, is unre-liable, almost every member of the Association and many other business men having suffered from delay and other forms of annoyance. Individual complaints having brought no redress, the Board of Trade is urged to report to the Postmaster-General the need of reform. The members of council present ten in number were manimous as to the council present, ten in number, were unanimous as to the need for reform in the local post office.

ON THE LADDER.

Mr. Arthur Gunn, Manager of the Crown Bank at Aylmer for the past two years, has been promoted to the man-agership of the Rideau street branch of the bank in Ottawa. Mr. Gunn was for some years in a London. Ont nany's office.

Mr. Gustaf Gylling, who has been vice-consul for Swaden in Montreal for nine years, has been appointed consul for Sweden in British North America, with headquarters in Montreal. He succeeds Mr. Folke Cronholm, who he consul for Sweden, with head office in Quebec City.

Mr. G. L. Salter, who for thirteen years has been con nected with the National Trust Company, latterly as secre-tary at Winnipeg, and who has a wide acquaintance in the financial business of the West, is now associated with Mr. A Ancial business of the West, is now associated with Mr. Kent, of the Winnipeg Jobbers' Credit Clearing House. 18

Mr. E. W. Cox, General Manager of the Canada Life Assurance Company, has been appointed Vice-President of the company. Mr. Cox has been actively identified with the the company. Canada Life for over 20 years. He has served the Com-pany as agency cashier, agency manager, branch manager, assistant general manager, and for four years as general manager

STOCK EXCHANGE THIS WEEK.

Monetary Times Office, Friday, November 23rd.

Saturday, November 17th.—The market here was gen-erally steady, but dull. Mackay preferred was the most active stock, but was steady at 6934. Mackay common was steady at 72^{1/2}. Dominion coal was down a point, selling at steady at 72^{1/2}. Dominion coal was down a point, selling at 56^{1/2}. Dominion Steel, was easier, with 23^{3/2} as the closing bid. Banks were steady and quiet. C. P. R. was especially strong. A few shares sold here at 178^{3/4}, an advance of 3^{3/4} from yesterday's closing bid. In New York it touched 179^{4/4}, and closed at 179^{4/8}.

Monday.—C. P. R. was again a feature. In London it moved up 478, and in New York, after opening 1% higher, at 181, it rose to 18234. The close there was at 18154. Locally the stock was not active, only a small lot selling at 181/2: Markay preferred was active but steady around at 101/2: Mackay preferred was active but steady around 691/2 to 697/8. Sao Paulo was also active but steady around 141, closing at 141/2. Banks were quiet and steady. Mming stocks were not in much demand.

Tuesday .- The local market was a little firmer to-day and there was more activity. Dominion Coal and Nova Scotia Steel were stronger. The former advanced from 63/2 bid yesterday to 65 bid to-day. There were no offerings to meet the higher price. In Montreal Coal was heavy selling at 63/4. Nova Scotia Steel here sold up to 69/2, an advance of 3/2 on last night's closing bid. Rio and Mexican were firmer, the former at 44 and 43%, and the latter at 52%

hrmer, the former at 44 and 43%, and the latter at 54% Wednesday.—A steady general market and renewed activity in mining issues were the features to-day. Sao Paulo commenced a little down, at 139, and sold off to 138%. Later, it recovered to 141. There was a good demand for Northern Navigation, which opened at 108% and sold up to 110%, closing at the high figure. The good season's busi-ness is responsible for the movement. Nova Scotia Steel sold steadily at 69%. Dominion Coal opened at 65%, but sold off a point to 64%. The offerings were light. Toron-to Electric Light, which sold at 169 yesterday, was not active and the bid was down to 167. active, and the bid was down to 167.

Thursday .- Mackay preferred was the subject of con-Thursday. — Mackay preferred was the subject of ton-tinued pressure to-day. The opinion prevails that the trus-tees are putting out more stock. Common was a little stronger on the assumption that if stock is being sold, the company's funds will be invested in outside profitable stocks. In New York preferred dropped to 687% and closed at 68% bid. Common in New York sold at 72% to 73. Sao Paulo was active at 140 to 140%. Rio went up a point to 45 and the bonds were active at 76 to 76%. Northern Navigation sold treadile at New York and closed at 68% bonds were active at 76 to 7614. Northern Navigation steadily at 110. C. P. R. was quiet here, only 50 selling at 18154. In London vit was stronger and in ares in New York remained at 182 most of the day, but dropped to 1814 higher, but reacted 20 cents from the day's highest, which was 2.68. North Star rose from 18 to 28, Nipissing and Green-Meehan were firmer, and Foster and Silver Queen Friday Marine Links before the Mines

Friday.—Mexican Light and Power was the feature to-day. The bonds were selling at one time at \$1, an advance of a point over last night's closing bid. The stock was selling at 54¼, an advance of 134. The story is being eir-culated that the stock will be on a dividend basis within 0 months. Rio fanciro bonds and stock were strong. Do-minion Coal was selling at 63 and 63½. The close was at 63. In the mines Trethewey and Foster were weaker and Green Mechan was stronger. Foster sold down to 3.56 at the close and Trethewey sold as low as 2.35, closing at 2.38. For Green Mechan, as high as 168 was bid. Friday .- Mexican Light and Power was the feature to-

STORM-BOUND WEST.

Traffic Has Never Been so Badly Tied up as by 48 Hours' Snow.

Winnipeg, Nov. 20th.

The West has been having its full share of the big storm and traffic is more field up than it has ever been at the same season of the year. The storm started on Thursday night and in many parts of the West continued without abatement until midnight Sunday. Over a foot of snow fell, and so carry in the season that the ranway companies had no snow ploughs ready, and this occasioned delay in clearing the tracks. So far no loss of life has been reported, though unfortunately that may come later.

The Grain Commission.

November 24, 1906.

Your correspondent had the misfortune to be with the Your correspondent had the misfortune to be with the Grain Commission at Deloraine, and had to suffer a two days' delay in reaching Winnipeg, which explains so brief a letter.' The Commission are sitting in Winnipeg, and to-day E. A. Partridge, of the Grain Growers' Grain Company, Stated his grivvance against the Winnipeg Grain Exchange. This is interesting wherever an exchange exists, because the Grain Growers' Grain Company was suspended for violation of the rule that no member of the exchange shall offer an inducement for any one to trade with him. The Winnipeg Exchange claim that the Grain Growers' Grain Company violated this rule by an offer of a pro-rata division

company violated this rule by an other of a pro-rate division of profits of the company on the co-operative plan. Beyond the statement of the suspended company and cross-examination by counsel for the Grain Exchange noth-ing has been done. The question of the alleged combine to restrict trade is ostensibly the reason of the sittings here, but little evidence has been produced along that line. Insurance Interests.

The pipe of the Winnipeg high pressure system is prac-tically complete. The underground system comprises about five miles of extra heavy water mains. A few hydrants have still to be placed, and this may be slightly delayed by the cold weather, but is only a matter of days. The pumping station is nearly completed, and it is expected that the first unit will be in operation by January first. This is good news to insurance men, as it is a well-known fact that during January and February have occurred the worst fires in the history of the city.

The aldermen are busy seeking re-election, and there is little reportable in civic business. It is generally considered a matter of honor for a retiring council not to introduce anything startling during its closing month. The civic elec-tions promise more of interest than ever before. Not only the election for mayor, which is no longer a walk-over for Mr. Ashdown, but several of the aldermanic contests are of more than passing interest.

Small Supplies of Coal.

The sudden drop in the temperature has emphasized the small stocks all over the Province of Saskatchewan and in parts of Manitoba, due to the Lethbridge and Fernie strikes. Fuel is likely to be scarce and dear before Christmas.

The Winnipeg Grain Exchange has placed a direct wire to Minneapolis from their grading room , and the Minneapolis quotations are now posted direct, and the Winnipeg quotations are similarly posted in Minneapolis. This is a great improvement. It should have been made last year.

There is a lull in trade, due partly to the storm and rtly to the fact that wholesalers have got through the Christmas sorting trade, and things are very much on routine lines. There will be something to say next week as to how paper has been met during the past month.

B, 10, having been granted by letters patent, dated 22nd June. 1005, to the Canada Iron Furnace Company, Limited, and J. B. 11 having been granted by letters patent, dated 20th June, 1005, to Jacob A. Jacobs, said portion of lake hereby offered for sale con-taining by admeasurement twenty-there acres, more or less. taining by admeasurement twenty-three acres, more or less.

Parcel Number 1 carries with it the right to mines and minerals in the adjacent one-half of the road allowance on the east shore of Cobalt Lake, and lying between the Mining Locations R. L. 401 and R. L. 404 and the water's edge, provided the veins or deposits extend from the bed of the lake into or under the said road allowance. (See 4 Edward VII., Chapter 22, Section 30.)

The boundaries of both parcels will be surveyed and delimited on the ground before the day of sale. Tenders are to be for each parcel separately, and are to

name a lump sum for each parcel, without royalty, payable in full within fifteen days of acceptance of tender.

A marked cheque for ten per cent. of the price offered must accompany each tender, to be forfeited upon non-payment of the balance of the purchase money within the prescribed time.

Tenders to be enclosed in sealed envelopes, marked on the outside in plain letters, "Tender for Cobalt Lake," or "Tender for Kerr Lake," as the case may be, and to be addressed to the Minister of Lands, Forests and Mines, Toronto, Ont.

The highest or any tender not necessarily accepted.

F. COCHRANE,

Minister of Lands, Forests and Mines. Toronto, Ont.,

22nd November, 1906.

All litigation against the Beaver Cobalt Silver Mining Co. has been withdrawn, and all claims of Frank A. Ma-Donald, Gillespie, and others claiming an interest in the property are settled. The Erie Cobalt Silver Mining Co... Limited, has secured a controlling interest in the mine, the title being now clear. A complete equipment of mining machinery has been ordered, and will be installed within a few weeks.

For the past few years Halifax fish dealers have been invading the Newfoundland market and buying on the ground. The other day it caused some comment that a prominent fish dealer of Newfoundland had bought twelve At a meeting of the Customs House clerks at Hamil-ton on Monday, at which nearly every part of printario was represented, it was unanimously agreed to ask e govern-ment to raise the minimum salary of custom casks from Son to Sons to Son be encouraged by the incident quoted above.

NEWS OF MINES.

COBALT.

744

Since January 1st, this year, 158 mining companies have en out provincial charters, and most of these are, for rations in the Cobali silver field. taken out provincial charters, and most of these are, for operations in the Cobalt silver field.

It is stated that E. B. Savage, son of the president of the International Stock Food Company, of Minneapolis, has offered \$3,000,000 for the Larson mine at Cobalt, and that Chas. Millan, on behalf of proprietors, refused.

It is stated that three-fifths of the stock of the Silver Leaf mine at Cobalt, formerly controlled by Toronto and New York men, has been sold to a syndicate of United States capitalists. The price is said to be in the neighbor-hood of a million dollars.

The Colonial Silver Mines Company, of Cobalt, has 50 tons of high-grade ore sacked ready for shipment. The company has not intended to ship until its tunnels were fin-ished, but the ore sacked was all taken out of the development work

MISCELLANEOUS.

The output of gold at the Rand, South Africa, in October was officially announced as 540,600 fine ounces, the greatest in history. It compares with 565,111 fine ounces in September, and 415,527 in October, 1905.

From Cobalt comes the news that a deal for the Gleason

The development of the several new ore shoots found on the 850-foot level and elsewhere in the White Bear con-tinues with good results. Eighty tons of first-class ore and the several new ore shoots found on the so-foot level and elsewhere in the White Bear con-tinues with good results. Eighty tons of first-class ore and to tons of concentrates have recently been shipped to the smelter smelter.

Dr. Roughsedge, of Roughsedge, Short and Ramsay, has stopped work on the dredges at Prince Albert, Sask, for winter. The company has been operating most successfully during the summer a few miles west of Prince Albert, and the output of gold has exceeded their expectations.

Klondike gold mined since January I amounts to \$5,700,ooo. This is a good showing considering the fact that so much property is shut down incidental to changing hands. It is expected that the annual output will be increased as soon as the purchasing capitalists get their ditches and fleets of dredges installed.

GOVERNMENT RIGHTS FOR SALE.

The Ontario Government has decided to sell for cash its mining rights in the beds of Gobalt Lake and Kerr Lake. Ten per cent, is to be paid with the tender and the balance within 15 days of the acceptance. Unsuccessful tenderers will receive their money back. All tenders must be in by December 20th. This action was decided upon as a result of the conflicting claims to the remaining portions of the beds of the lakes. It was concluded that none of the claims could be allowed, and the most practical way to overcome the difficulties was to offer the properties by public tender beds of the lakes. It was concluded that none of the claims could be allowed, and the most practical way to overcome the difficulties, was to offer the properties by public tender. Cobalt Lake has an area of about 50 acres, 40 of which are still vested in the Crown, the balance being owned by the McKinley Darragh mine. Of Kerr Lake 23 acres are still vested in the Crown and 17 have been sold to the Drum-mond Mining Company and the Jacobs mine owners.

Weekly Albertan, Calgary - Who said that we shall not have 100,000 people in 1910? Here is the way that we are doing it & In 1901 we had 4,000 people. In 1903 we had twice that many, 8,000. In 1905, we had, we believe, twice that again, or 10,000, though the census did not give us quite that many. In 1907, we shall double again and by the end that again, or recovery we shall double again and by the end of it we shall have 32.000 people. All 1909, we shall double again and that will bring us up to 64,000. In 1911, when the census man comes around if he does his duty, we shall have 128,000. But in 1910 our population will be about 100,000, and not very much either way from that.

Mr. Nicholformerly manager of Swift & Company's plant at S ph, Mo., has succeeded C. N. Aldrich as president and son, Joseph, general manager of the Griffin Company.

SUPERINTENDENT FITZGERALD'S VIEWS.

Mr. Fitzgerald, Superindent of Insurance, concluded his evidence before the Insurance Commission at Ottawa on Thursday. He agreed with the memorial of the Life Offi-cer's Association that fuller information should be included in the returns to the Department. Terms of forfeiture should be specified on all policies. The present act placed no limit on the purchase of securities of a certain class. The moment a company within this class had been formed an insurance company could invest in its stock, whether it had paid div dends or not. The Department's draft bill would limit in vestments to the stock of companies which had paid div dends for five years. He would rather not see so sweeping a clause, but some limit had to be fixed. A good board of directors could manage it much better than any one else. An incompetent board could not be trusted any way.

He could not say whether insisting on the publication of a loss and gain exhibit, would force British and United States companies to leave Canada. Personally he approved States companies to leave Canada. Personally he approved of such an exhibit, but doubted the advisability of practic-ability of publishing it. He was not prepared to disagree with the Officers' Association on the question of reserves. but was strongly opposed to canvassing on estimates. Com-panies statements should be certified by a chartered accounts ant. Limitation of taxes was beyond the control of Parliamen

Dealing with the Underwriters' Association's recom-mendations, he disapproved of a standard policy and approv-ed of an accounting by the companies. It would be fairer ed of an accounting by the companies. It would be fare to the policyholders if the companies had to value their re to the policyholders if the companies had to value their re-serves on Government standards, so far as the returns were concerned. Mr. Fitzgerald presented an opinion from the Department of Justice that he had no power under the exist-ing at to cancel the license of any insurance company except for insulvency. That II the funds of an insurance company, other than capital, were trust funds was a statement that he would not endorse, but he was not disposed to specify where the di-ference existed. Wider investment powers should be given to insurance companies, as they could not find sufficient

to insurance companies, as they could not find sufficient market for their funds if restricted to trust fund investments. He had not enquired into the question of expense ratios as ne had no power to act upon it. He believed that policy-holders should have representation in the management of the companies the companies.

The annual dinner of the Dominion Commercial Travel-lers' Association, one of the half dozen societies of the kind into which our travelling salesmen have formed themselves, is to be held on 20th December in the Windsor Hotel, Mon-real. Mr. E. D. Marceau will be in the chair. The Oueber Government will be represented, and the presence of Lord Grey and Sir Wilfrid Laurier is also counted upon.

THE MONETARY TIMES

By J. M. Courtney.

(Until recently Deputy Minister of Finance.*)

When your worthy secretary did me the honor of asking in your behalf that I should be this day your guest I told him that it was a change to come from behind the scenes and advance towards the footlights, and that in the novel position, besides being untried, no doubt there would be many imperfections. For these you must forgive me while I try to say something on the subject of the Finance Department of Canada.

I served under every Prime Minister of Canada since friendly relations. I shave served under every Finance Minister but one, Sir Alex. Galt, since Confederation, and with them also my intercourse has been frank and confidential. The one I did not serve under, Sir Alex. Galt, asked me to become the Secretary of the office when he was High Commissioner, and in his case as in his successors, Sir Charles Tupper and Lord Strathcona, the Finance Department has received and continues to receive the greatest aid when matters touching Canadian finances are being dealt with in London.

Valuable Work of John Langton.

When I entered the public service of Canada in 1869 the revenue of the Dominion was about \$13,000,000, last year it was over \$80,000,000-over six times as great. But although the scale of transactions was lesser, yet it was not altogether the day of small things. There were kings before Agamemnon, and the men who laid the foundations of Confederation, who thought out, and thrashed out the details of the measure were men not to be despised. The result of the work is the Dominion of to-day. And while we hear of vas, yet no one as far as I know has given a thought to the members of the public service who gave their assistance in framing the measure. I believe I am correct in saying that the financial clauses of the British North America Act were largely the work of John Langton, a man of great ability who, besides his work in the public service, did much in dein your university, of which he was at one time the vicechancellor

Time would be too short to tell the tale of the financial progress of Canada-how stage by stage it has reached its present dimensions. All this is very interesting, and was not arrived at without labor and pain-sometimes the prospect seemed hopeless. In 1885, during the construction of the Canadian Pacific Railway the Dominion had obligations to all the leading banks in Canada; it had obligations in London; it had a \$25,000,000 loan immediately falling due, and on the arrival of Sir Leonard Tilley and myself in London to arrange matters, the first news we heard was of the resignation of the Gladstone administration, with a possible war prospect, and a heavy drooping money market. I just mention this to show that to run matters smoothly requires constant thought and care.

Tide of Remittances Turned.

But it is with the present and the future more especially l propose to-day to call your attention. In ten short years the Canadian Budget has doubled. The progress is real and substantial. But with this great expansion new conditions have arisen and are constantly arising. To recall my first, remark, the scenes require constant shifting. , In one respect alone, the money order business of Canada, in the last three or four years there has been a transformation. Formerly, many of our people went to the States and made small remittances to their families and relatives in Canada. As a result the United States postal authorities had to remit to this side funds to meet the orders as presented. The reverse is now the case. To Great Britain, the United States, to the Scandinavian countries, to Italy large remittances have to be sent to meet the money orders largely

Monday, November 19th, 1906.

THE FINANCE DEPARTMENT OF CANADA. procured by immigrants for remittances to their families in the home lands. To Italy alone I estimate there will be sent over \$700,000 this year-these constant evidences of progress entailing new conditions require care and provision to be made by the Finance Department.

But beside the \$80,000,000 revenue and the \$81,600,000 expenditure of which I will treat later on, there are other matters which require the attention of the Finance Department. The Dominion is a common carrier running a railway; the Dominion is a banker, having savings bank deposits of about 60,000,000, against which the law compels a reserve of gold to be held of ten per cent.; the Dominion issues notes against a gold reserve, the reserve being 25 per cent. for an issue up to \$30,000,000, and dollar for dollar beyond that amount. The present issue on the 31st October Confederation. With each of them in turn I had the most was \$58,080,025, of which \$15,324,060 was in \$1 and \$2, the small change of the Dominion-and in that regard it may be stated that the circulation of \$1 and \$2 on the 31st October, 1896, was \$7,583,712. Another instance of the wonderful pro-

gress that has been made during the last decade. A Million Dollars a Day.

The Dominion to meet the payment of interest on the loans domiciled in London is throughout the year largely in the market as a purchaser of sterling exchange, letting alone the amounts required for payments for stores, the postal exchanges and other services. In fact the turnover in cash under the control of the Finance Department runs to about \$1,000,000 each working day. To gather in the revenues the Department keeps some 24 bank accounts in Canada. Besides all these matters the Treasury Board, of which the Minister of Finance is the chairman and the Deputy Minister is the secretary, keeps guard over every appointment, promotion, retirement or superannuation in the public service; it looks after the refunds and remissions of duties; it settles differences between the Departments and the Auditor General; it reveiws all deposits and exchange of the fathers of Confederation and see their faces on the can- securities made by the licensed insurance companies with the Government; it grants certificates to banks on commencing business.

And here I may say that to the Department are rendered monthly the statements made by the chartered banks of the conditions of their affairs. While Parliament is in session the Minister of Finance brings down the estimates of veloping the higher education of Canada, as can be shown the expenditures required by the several departments, which have been duly collated and put together by his officers. The officers of the Department also prepare the statements required for the budget speech. Two of the great Parliamentary committees are the subject of the concern of the Finance Department, the Public Accounts Committee and the Committe of Banking and Commerce. All bills referred to this latter committee are carefully reviewed by the officers of the Finance Department to ascertain if any of the powers sought are inimical to the public interest, and I may say that the financial clauses of bills referred to the Miseellaneous Private Bills Committee are also carefully scrutinized.

Target for Many Enquiries.

Rarely a session passes that the Department has not to bring in legislation regarding matters under its control such, for instance, as currency. But the Finance Department besides attending to all these matters is a Department of reference and enquiry, and does a lot of silent work in all directions. Many are the imaginary claims that are enquired into; many are the letters received during the year from England and the United States that a son or a brother had left England half a century ago and is believed to have left money in some bank in Canada, and asking for advice or assistance; many are the batches of students in colleges and universities on both sides of the border who are filled with ideas as to the best methods of governing the bodies corporate, and who ask for copies of all legislative enactments respecting banks, currency et id genus omne. To all are sent to the best of the ability of the Department the grave and courteous replies. These other matters incidental thereto daily occupy the attention of the Department.

If this is the condition of affairs now what of the future? * An address delivered to the Canadian Club of Toronto, If in ten years the figures have doubled what may not happen as time rolls on. Sir Wilfrid Laurier has said the

As the years roll on Canada will make out a higher destiny. in what shape we know not, but, I believe, that the millions who will occupy our land will be true to the traditions of the mighty Empire of which this canada of ours is a part. for one moment say that iniquity should not be exposed. The budgets of future Finance Ministers will deal with Perhaps it might be possible to keep the large committee at figures beyond our present conception; and to my mind, beyond the occasional drawbacks incidental to development tee, who might make and receive suggestions and lay down such as tight times, moderate harvests or over-speculation, I can see only in the future steady and universal progress.

For Less Materialistic Elections.

I now come to another subject and here I wish to speak carefully. I mentioned that with a revenue of \$80,000,000 Canada spent last year \$81,000,000. Now all this expenditure has been sanctioned by Parhament. Each item was duly submitted and passed. If any division occurred in any vote it was so infinitesimal as to be put aside and forgotten. I wish to emphasize that all this expenditure was sanctioned by Parliament. Now, Parliament represents the people, and in no country in the world have the people such control as in Canada. In their municipalities, in their provincial legislatures and in the Dominion Parliament the people, through their elected representatives, govern. There is no troublesome closure and the discussion of grievances precedes the granting of supply.

Occasionally the people rise and shake off their rulers:" but, as a rule, when the time of an dection approaches what do we see in the cartoons, what are the phrases in the elec-, tion addresses, what is the talk of the man in the street. mainly that so and so is a strong man who can get favors for the district. Nearly all the arguments used in behalf of a candidate are materialistic. And when the turmoil is over and Pathament is called together and a vote is taken for a drill hall here, or a wharf there, or for a Custom House or a Post Office in some other place, however doubtful or perhaps unnecessary the vote may be, it is not for anyone to oppose and so the game goes on.

Better Sense of Responsibility Coming.

1 am not blaming this Government or any Government, nor do I blame all electoral districts, but as long as the average voter considers that the great impossonal thing called Parliament, is created to find money to be spent in his own locality, so long will present conditions exist. But I see signs of a change. I think recent events will make thoughtful people sit up and think, and, I believe, the day is fast coming when members will be sent to Parliament who will consider that a great trust has been placed in their hands to be used for higher things than securing votes of Parliament

Now mil this \$81.000.000 was spent under conditions haid down in the statute book. The money was placed under the control of the departments charged with the several services certificates were given by the proper officers that the services were performed and the prices charged were fair and just. The expenditure was reviewed by an independent official, the Auditor General, an official accountable to Parhament, and who can only be removed by Parliament. He had to see that all the gross revenues were paid into the Treasury and not the net, as in Great Britain, when large payments are deducted before each is paid over. For much of the expendature there is a pre-audit, and not, as in the motherland where all expenditures are audited after payment.

Beyond all, there is a great Committee of Parliament, the Public Accounts Committee, whose duty it is to examine into expenditures.

Contrast With Saint Stephen's.

Now there is a great difference between the Public Accounts Committee of the Imperal Parliament and the same committee here. At Westminster the Public Accounts Committee is made up of 15 members and is more of the keep Canadian credit at a high level. Any enterprises nature of a judicial committee. The chairman is always a ed outside Canada should be undoubted in every way. member of the opposition. The present chairman is Mr.

twentieth century belongs to Canada. From my heart I frequently and reviews the expenditures seriatim. It is very believe it to be true, and not a mere rhetorical phrase. To interesting to see the members at their horseshoe-shaped my mind Canada is now in a similar position to that of the table. The Secretary of the Treasury at one end, the members-everything is calm, business-like and judicial,

At Ottawa the committee is made up of more than third of the House it sits when it can at the call of the chair, and its business is apparently to exploit scandals. I do not Ottawa, and out of its number appoint a small sub-cor principles regarding public finance,

But leaving that question, as regards the public expenditure, there are three sets of people concerned-there is first the authorizing the expenditures, there is second the finding the moneys, and in the third place the spenders, In other words there are the givers, the finders and the spenders. Now I suppose that the mere fact of having to find funds develops and hardens the faculties of resistance and restraint which are characteristic of treasury officials all the world over. They are generally unpopular, even a man so great as the late Lord Salisbury flouted and jeered at the Treasury.

Canada Is Spending Too Much.

I do not for one moment wish to lay down any rule respecting expenditure. There are certain expenditures which properly regulated are eminently desirable to be made, as, for instance, the bringing into the Dominion a good class of immigrants; the working out the schemes connected with griculture, such as experimental farms, dairying, butternaking, cold storage; the protection and development of fisheries; the watching over our forests; all these are productive expenditures and should be encouraged. I can even allow that in the recent great development there may be excused a little swagger and possible extravagance. But allowing all this I am afraid Canada is spending too much. I am not a politician, but it would seem to me that either of three methods, to use Mr. Gladstone's favorite formula, might be adopted. Canada out of its abundance might redeem its indebtedness, or Canada might reduce its taxation, or it might, without adding to its debt, pay for its great national works. At the present time every effort

should be made to save. It is true the debt has not been materially increased of late, but to repeat, every effort should be made to save. The times are hard, the Bank of England rate is six per

cent., there, are no immediate prospects of cheaper money, for all the world, especially on this continent, is bent on expansion. The Canadian credit ranks high, very nearly equal to that of England. There are large maturing liabilities to be met of loans made some 25 to 30 years back and it will require all the wisdom of Government to meet the iuture and preserve our high credit. For these reasons think that expenditures should be critically scanned and that a halt should be called in many instances. In all this I have made no remarks respecting capital or ordinary expenditures, for time is too short, and the distinctions began long before I entered the services. But there is a tendency in dealing with capital expenditures to forget that they add to the debt.

Be Careful About Foreign Capital.

If time permitted I would enlarge upon what may possibly become dangerous to Canada, and that is a possible undue exploitation of foreign capital in developing Canadian interests. In a normal state of affairs the floating of highclass securities, such as Dominion, Provincial or municipal ssues in England. France or other countries where generally a low rate of interest prevails, is good. But I have seen the bad effect in India in the sixties, when owing to the war in the States large amounts of rapital were poured into the country. In recent times the same evil effect happened in Australia, when only two banks, I believe, survived the crash. It behoves Canadian financiers to be careful in floating Canadian, enterprises abroad; and above all things to keep Canadian credit at a high level. Any enterprises float-

ideals in Canadian public affairs, need not, I think, require any apology. Canada, although a magnificent and lavish spender in many directions, is towards those who serve her a beggarly paymaster. I have tried to show you what the Finance Department is like. Can you imagine that the man who sets its policy is paid less than many a manager of a branch of a chartered bank. If this is the case with its political chief, what of the permanent officials.

Much Work; Little Reward.

What are the hours of work of a Finance Minister in ment; the session? He is generally in his Department at ten; he goes to a Parliamentary committee at eleven, where he remains until one. He is with his colleagues from two to three, then to the House where he may be till the small with his officers out of the session; he has to consider his constituents and aid his friends in making speeches-at all times there is the possible danger of reverse, and for this agriculturists, as a rule, feel that their interests will be pro-moted by low tariff, at all events by much lower tariff than exists. Our public service, although perhaps I Sught not many of the manufacturers desire. to say so, is a magnificent service. It stands well with any Element of Danger in West. service in the world, but it is miserably underpaid. It lives attracted many to it has been removed in the doing away with the Superannuation Act. One of the problems of the I would like to live to see a less materialistic community and a better remunerated service. It is for you, gentlemen, and set forward these aims. To act rightly and to have the this combination of right and wise living tends to righteousness, which, by the best authority we are told, is that which exalts a nation.

TO DEVELOP GRAND FALLS.

Power Company Seeking the Right; Lumber Business Increased at Fredericton.

(From Our Own Correspondent.)

St. John, November 2nd. The Canadian Pacific Railway Company's winter mail port for the Empress steamers, has been the principal sub-

with the landing of passengers and the China mail here to be made. We are about to ask Parliament to join us in

The Eastern Steamship Company, controlling the water rates between this city and Boston, has just added a turbinc steamer, the "Governor Cobb" to its fleet. This is the first turbiner built for the coast trade. She has only been on the route for a couple of weeks, and despite the heavy weather cut down off a couple of weeks, and despite the heavy weather çut down all records.

holders of the People's Bank of Fredericton to ratify the erally, it will be our aim to have such rates of duty as will sale made some months ago to the Bank of Montreal, give a reasonable degree of encouragement to the industries holders Delay in calling this meeting has caused many rumors

Power for St. John.

The Grand Falls Power Company, a syndicate of Canadian and American capitalists, who have secured the right to develop power from Grand Falls, on the St. John River, They-promise to make the betore securing the right, and suggest from \$35 to \$55 per horse is developing the Company Another Aroostook River falls, and installing two 900 horse power units. This company will not be a competitor of the Grand Falls Company for the St. John business, but expects to sell power in Maine and New Brunswick towns.

There are indications that the carpenters of St. John will ask for considerable advances in wages.

THE MONETARY TIMES

TARIFF CHANGES.

Finance Minister Desdribes the Main Lines of the Government Policy,

Mr. Fielding, Minister of Finance was banqueted by Montreal Liberals on Tuesday, in honor of his re-election as member for Shelburne and Queen's. His speech contained the following adumbration of the tariff policy of the Government to be submitted to the present session of Parlia-

There is danger of a line of division being drawn be-tween East and West. There is a conflict of opinion, perhaps not between East and West, but between the West and large and powerful manufacturing interests in the East. No doubt, as the years roll on, manufacturing interests will grow up in hours. He has somehow to receive deputations, and confer the West, and there will be greater variety of opinion within with his officers out of the session: he has to consider his that region than there is at present. But for the present, and for a very long time to come, the agricultural interest must be the predominating one in our western country, and the

Probably if the western farmers were to consult their up to the ideal that the highest form of service is to save the State. It is not even a stable service for the tie which the state. It is not even a stable service for the tie which treme protective views which prevail in some quarters would undoubtedly lead to a disturbing and perhaps dangerous agiinture is to attract and keep able men in the public service. tation in the West. In many parts of the East such a policy would be no less objectionable. But I am speaking now particularly of the West, because there the agricultural industry is the overshadowing one. I have repeatedly urge members of this Club and for members of your sister clubs, upon my manufacturing friends that whatever policy would men who are actuated by a high degree of patriotism, to help best fill up our North+West lands with prosperous and contented people is the best policy for the whole country, the wisdom and strength to do so is the highest form of life, and best policy even for manufacturers themselves, for the settlers in those new lands should naturally be the customers of the eastern manufacturer.

We have labored at the same time to show the western farmer that he must not expect to have things entirely as he would wish them, but that he must be prepared to give and take, and have a reasonable regard for interests and views of the eastern section, which has hitherto contributed so much towards the opening up of the western country. I think our efforts in these directions have not been in vain. I think that most of the manufacturers of the country disposed to recognize that the policy of moderate tariff is, on the whole, a better one, even from their point of view, than a very high tariff, which would at once challenge the hostility of the greater part of our population.

Experience of Ten Years. For ten years we have had such a moderate tariff. Many people, no doubt, were alarmed by the changes which w ject of discussion this week. Much local feeling has been made in 1897. The country has undoubtedly prospered under expressed; but if the people of, St. John will be content that tariff. The time has arrived when some changes have with the landing of passengers and the China mail here to be made. We are about to ask target mean that great and with the expectation of better luck when tenders are called for again. This does not mean that great ehanges are to be made. For reasons which have been fully explained in Parliament we have determined to change the

down all records. Early in the new year there will be a meeting of share- known, and can be stated here. Dealing with the tariff generally, it will be our aim to have such rates of duty as will f the country without imposing unreasonable burdens upon the consuming class. Then it is our intention to adhere to that principle of British preference which in the face of much secured the right adverse criticism we laid down in 1897, and which we believe has done much for the advancement of Canada in the eyof the empire and of the civilized world. The degree of have asked the New Brunswick Government for an exclu-sive right to furnish power in St. John, subject to existing preference may have to be varied in some cases as compared with the present rates, but the principle will remain. It will continue to be our purpose to give a substantial preference to the goods of the mother-land as compared with the goods of foreign countries.

Will not Satisfy Extremists.

Then, we shall have another tariff column which shall

to open we shall have our tariff revision ready to submit,

and invite the judgment of the House and of the country upon it. That it will satisfy the extremists of either the high tariff school or the low tariff school we can hardly hope. But we do hope and believe that, as in the past, our tariff policy will find favor with the great mass of the people, and that it will be found to be the policy under which Canada will be able to continue the splendid growth and progress of the past ten years the past ten years.

FAIR CROPS IN NOVA SCOTIA.

Government Report Favorable-Cape Breton Trade Extending.

Halifax, N. S. Nov. 19th.

Halifax Tram has made a good showing for October. The earnings increased nearly \$5,000. The sentiment in favor of municipal ownership of the lighting privileges (now controlled by the Tram Company) may have something to do with keeping the price down. The stock pays six per cent.; and sells around 105. A special meeting of the Nova Scotia Fire Insurance Company has been called for November 26th to discuss an extension of the company's business to Western Canada. Acadia Suras's Good Vers

Acadia Sugar's Good Year.

Acadia Sugar's Good Year. The annual report of the Acadia Sugar Refining Com-pany shows net profits of \$210,681.14 after setting aside \$30,000 for depreciation. In addition there was a balance of \$58,578.93 from 1905. After paying interest and dividend requirements and adding \$50,000 to contingent account, \$90,774.07 was left for dividends on preferred and common stock. The half-yearly dividend of 3 per cent, was paid on preferred. Three per cent, for the half-year was paid on the common, as compared with one per cent, last year. Common has been selling at 50, to 55 and preferred around 100 around

Earnings of the Cape Breton, Electric Co, continue to to come, no dividends having we been paid. Nova Scotia Crops. their

748

The Government Crop Report, which will shortly be published, is on the whole favorable. On the basis of 100 for an average crop, the results are as follows: Hay, 06; oats, 80; wheat, 83; barley, 81; rye, 95; buckwheat, 83; beans and peas, 91; Indian corn, 64; potatoes, 71; mangels and turning, 85. Apples are about 70 of an average, with a wide difference in different localities. In Gravensteins, Physical Physics and 10 percent of the start of for example, the estimate runs from 20 to 05. Plums and pears are 62, and small fruits 85. Much stricter attention is being paid to the grading and marking of fruit as a result of the stricter enforcement of the Fruit Marks Act. Cape Breton's Trade.

Many wholesale grocery of Halifax are opening branches in Sydney, two leading firms having decided to do so during the past two weeks. Sydney has been made a competing point by the Maritime Grocers' Guild, and the equalization of freight rates has encouraged the exten-

sion of trade. The Board of Trade Council has called a meeting of commercial travellers for Halifax houses to obtain their views on South Shore trade. The board has also decided to appoint a strong committee to study civic taxation and

report on a system suitable for this city. *A. & W. Smith*, wholesale grocers, are erecting a large brick building in Sydney with the intention of opening a branch there.

Lunenburg fishermen will go extensively into the winter herring fishing this season, a new departure for them. Many of the Lunenburg schoonirs are being chartered by Cloucestar parties Gloucester parties.

COPY CANADIAN PACKERS.

A United States consular report advises apple export-ers of that country to imitate Canadian methods of grad-ing the fruit to suit the British market, and so strengthen their had upon the trade. The United States apple crop of 1905, according to that authority, was 1.631.819 barrels, valued at \$4.084,005, or \$2.87 per tharrel; while the Canadian crop was 1.247,166 barrels, valued at \$4.519.750, equal to \$3.62 per barrel. per barrel.

The American crop offers, practically, only two varieties. These have not come up to the standard of improved Canadian grades. The Liverpool Journal of Commerce learns that the reported unisual supply of Canadian fruit learns that the reported uniqual supply of Canadian fruit this year is not borne out by facts, saying that the apple crop is only a moderate one, as figures of imports and ex-pected shipments show. The crops of New England and California are about an average. In Hudson River districts the crop will be nil, though the yield of the Western States is large. Nova Scotia shows about an average yield.

FROM ALL OVER THE COUNTRY.

Volume 40.

Fort Frances, Ont.-Winter operations in the lumber camps are well under way. All operators complain of a scarcity of men.

Seaforth.-The Robt. Bell Engine & Thresher Co., of Seaforth, owing to increase of business, is making additions to its present plant. It now employs 80 to 90 hands.

Nelson, B.C.—The Drummond Lumber Co., of Daveluy-ville, Que., has bought limits near here for \$70,000, and secured a site 20 miles below the town for a saw mill.

Airsworth, B.C.—The price received by A. D. Wheeler, owner of the Krao mine at Ainsworth, B.C., from capitalists in Butte, Montana, is \$40,000 cash and 5 per cent. in stock of the new company.

Dundas.—The Hardwood Fittings and Door Company has sold its factory to the Jones Bros. Co., Limited, of Tor-onto, who will continue at Dundas their manufacture of barber supplies and interior fittings.

New Westminster .- The volume of transfers at the land registry office in October has been exceeded but once in the last twelve years. The real estate market has quieted down this month. There was only one sale of city real estate last week

Penticton, B.C.—Building operations are active. Since the summer 40 residences have been erected, and 12 buildings are going up now. There is an opening here for a good hotel. Land buyers continue to arrive by each boat and sales are good.

Parry Sound .- Lumbering is active, the mills all making record cuts, and prices are well maintained. Pine is selling at \$24 per 1,000 and hemlock at \$15. Lumbermen are arranging for a large cut this winter, they expect the high prices to continue, but the price of pine logs of smaller dimensions has gone up \$7 per 1,000 in a few weeks.

Portland, Oregon .- In spite of the hatchery output of millions of Chinook salmon in the waters of Columbia River there are signs that the supply of adult fish is diminishing. A curtailment of the open season and longer retention of the hatchery fry are recommended if the industry is to be preved.

Dauphin, Man.-Barnhill and McLellan of Amherst, N.S., bought Shaw Brothers' timber limit at Etiomami, Sask, for \$120,000. The timber is mostly spruce. The limit is 32 square miles, and contains 60,000,000 feet of timber. It is reported that some of the trees are three feet through at the butt and six logs long.

Souris, P.E.I.- A local firm has just sent \$700 worth of sheep to the French islands St. Pierre and Miguelon, and quantities of dattle have been shipped thither monthly, all year. In the fish trade, the Government drier and curer has to compete with the Whitman Fish Co., of Canso, which opened here this year. The competition is doing good

Carman, Man.—The electric light plant will be taken over by the town on December 1st, Messrs. Robinson and Aylwin, the owners, will be paid \$17,000 for the plant, the price having been arranged by arbitration. The Board of rade and town council are working to get J. J. Hill's Midland Railway to locate its shops here. A deputation will go to St. Paul to interview Mr. Hill on the matter.

Mèdicine Hat.—A campaign of publicity for Medicine Hat is to be opened in January by the Board of Trade. Two subjects the board has discussed lately are freight delay in the Crow's Nest and fire insurance in Western towns. It has decided to send a resolution to Sir Wilfrid Laurier; the Dominion Parliament and the Local Legislature, asking for an investigation into the rates of insurance premiums.

MacLeod, Alta.-The Raymond sugar refinery had 2,000 cres under beets, which have averaged 15 tons to the acte. The estimated cost of cultivation and production is \$32 an acre. Beets are worth \$6.35 per ton delivered at the re-finery. This gives a profit of 200 per cent. less the cost of setting the bests to the refinery. There is a shortage of There is a shortage getting the beets to the refinery. There is a shortage of cars and labor. Indians are employed at \$6 an acre for pick-ing. Payment of the Treaty money is deferred until mid-December in order to keep them at work until the beets are picked.

Considerable activity is reported from the mines near White Horse. A steam hoist for use on the Carlisle pre-perty, owned by Byron White of Spokane, has been shipped and is expected to be installed within the next few weeks. The Belcher mine people, numbering 35, have made a thorough inspection of the claim. The party is composed principally of Manitoba capitalists. The Belcher property is situated between Republic and Curlew in Washington, near the Kettle Valley Line Railway. At present a steel tramway is being built from the mine to the railway, and will shortly be completed, when shipping to the Granby Smel-ter will be commenced.

MONETARY AFFAIRS IN MONTREAL.

Coal and Steel Prospects: Cotton Enterprise for Lachine? Floating of the Bavarian.

(From Our Own Correspondent.)

Montreal, November 22nd.

I called on Mr. Mathewson, manager in Montreal of the Bank of Commerce, with reference to a somewhat startling story sent from Montreal, and appearing in some of the New York papers. The story was to the effect that Mr. J. H. Plummer was about to resign the presidency of the Domin-ion Iron and Steel Company, to be succeeded by Mr. Mathewson. The latter had already had his attention called to the report and was not a little annoyed. To my question respecting its truth, he said: respecting its truth, he said:

"There is not a word of truth in it. I never thought of such a thing. What qualifications would a banker have to take charge of the manufacture of steel, I would like to know? There is no good excuse for a person who would send away such a story when he could easily ascertain the truth or falsity of it."

Mr. Plummer and Mr. Ross.

To enquiries respecting the same matter, Mr. Plummer gave an equally emphatic denial, saying that he had no inresigning, and that the story was absolutely withtention of out foundation. Mr. Plummer only reached Montreal from Halifax at the

beginning of this week, having come straight here, where he landed upon his return from England. He has been working hard, since he arrived, in order to acquaint himself fully with the complications between his company and Dominion with the complications between his company and Dominion Coal, as well as with the negotiations carried on between them for the settlement of the difficulties. That the settle-ment announced a week ago, after the series of meetings held in the National Trust offices here, was not very decisive, might be inferred from the tenor of the correspondence which has passed between the two companies. Mr. Plum-mer addressed Mr. Ross personally in the matter, "Dear Mr. Ross" with the avident desire of avoiding autagonism. Ross," with the evident desire of avoiding antagonism.

Coal Company Independent.

It is clear that Mr. Ross is acting on the assumption that the Steel Company has broken the contract; and is not influenced by the Steel Company's impending action for damages. He tells the company that it is not necessary for him to take the time limit they have given him in order to find out what quality and quantity of coal the company can supply, as neither he nor anyone else can tell in advance what will be the result of mining operations. His stand, throughout, is very firm, and anything but conciliatory. Standing with him are J. R. Wilson and R. B. Angus, Prac-tically the whole of the rest of the prominent capitalists are It is clear that Mr. Ross is acting on the assumption tically the whole of the rest of the prominent capitalists are on the other side, Sir Wm, Van Horne having taken the initiative by resigning from the coal directorate as a pro-test. Although there is much talk on the stock exchange and in financial circles, to the effect that the Coal Company B. Beckeart & Co.'s office stationery:is sure to lose in the end, it certainly looks as though Mr. Ross had the whip hand just now. New Cotton Concern.

Although no details have been given out, there seems to be much truth in the rumor that a new cotton company is being formed here. There is every reason to believe that Lachine will be the site of the new mills, the council there having been approached for terms recently by a group of capitalists—many of them Montrealers. The councillors of the town, it is understood, are very loth to grant a bonus, it is bonus in the line with the line of the bonus it being their opinion that Lachine, being on the line of both C. P. R. and G. T. R., as at the mouth of the Lachine Canal, and being situated only a few minutes ride from Montreal, has sufficient other advantages to attract new industries.

Mr. H. M. Marler being one of the organizers of the concern, I asked him what he could tell me of the project. He shook his head, "Nothing yet," said he. From other, sources, however, I am told that the capitalization will be not less than a million. Get-Rich-Quick Scheme.

The Companie de Pret et d'Epargne was a get-rich-quick proposition. Alas, it is now no more, and many victims lament the loss of the hard-earned savings they entrusted to it. At the Court of King's Bench this week, Ald. Alex. Millette, of Longueuil-opposite Montreal-who was manager and secretary-treasurer of the defunct lottery-bank concern—the English name of which would be the Loan and Savings So.—was found guilty of having obtained money by false pretences. Action was taken against him by an old crossing-sweeper, who had entrusted \$5000, the savings of a lifetime to the savings

its subscribers to return the money with a dazzling interest in about 16 months. Very little was ever returned. Further actions against representatives of the company have been taken by its victims. It is the old story of locking the stable

North Atlantic Wrecking Company.

The floating of the SS. "Bavarian" from Wyc Rock this Ine noaling of the 55. "Bavarian" from wyc Kock this week has been one of the most important events in Canada for some time. The "Bavarian" went on the rocks over a year are, and after having been examined by experts, was abandoned, both by the Allan Line, her owners, and by Lloyds. Capt. Wm. Leslic, of Kingston, then proposed to a number of moneyed men that they form a syndicate to undertake the floating of the "Bavarian," she having been abandoned. It later transmired that his method of raising abandoned. It, later transpired that his method of raising her would be to fill her full of compressed air. The public generally did not think that he would be successful, but a few days ano the "Bavarian" floated off and was towed to Levis, where she had to be beached, owing to the air pumps

Levis, where she had to be beached, owing to the air pumps giving out. She will remain there all winter. The syndicate which undertook to float her has now formed itself into a company, Charles Hosmer being the organizer. Mr. T. J. Drummond is president; W. E. Stokes, New York, vice-president; A. B. Rainsford, New York, sec-retary; and others connected are Percival Milson, R. G. Reed and A. Whitehead, of this city; J. D. Reid, Prescott, and a number of others, including some New Yorkers. It is claimed that the "Bavarian" can be sold as she lies for

\$100,000. The success of this venture, would indicate that the method adopted of raising the vessel having proved successful, will become general, and that this pioneer of all compressed air wrecking companies will have a big future.

EMIGRATION CHANGES IN BRITAIN.

Several changes in the placing of Canadian agents in Britain have been made. Mr. Webster woes to Glasgow from Dublin, which office will be temporarily closed. Offices will be opened at Aberdeen, Londonderry and York. The Aber-deen agent's territory is the country north of Perth. Mr. Murray, the agent at Cardiff, goes to Exeter. Mr. Walker recommends a motor omnibus to carry the products of Canada throughout Midland Counties and the North of England; also three light democrats for use in the Welsh

The humorous side is certain to show itself in connec-

| CHIGAGO, AND SALMON SALES. |

No.

There has been a falling off in the Vancouver canned salmon exports to the United Kingdom, and a corresponding increase in the amounts held in storage. Apparently the English salmon consumer has not yet recovered from the Chicago canned goods scare, and still views with suspicion the article which comes from Canada.

Market conditions, however, now show that these fears are gradually being overcome and salmon exports from Van-couver are likely to increase before the end of the year. Seventy-five thousand cases have been shipped by water from here to England, up to the present time, and prices have held strong despite the poor demand. Last season the pack was comparatively small, and costly to procure, prices of fish varying from twent, five to forty cents. On account of this large cost of production, the canners cannot afford to sell as cheaply as during the years of large runs of fish and lower

an old crossing-sweeper, who had entrusted \$000, the savings of a kifetime, to the institution, and lost it. The trial lasted almost for a week, with the result mentioned. It is some time since the company halled, the cause of the failure being partly attributed to the failure of another company. Liabilities were about \$22,000, with assets \$500-not sufficient to pay the liquidator. The company promised 511

Toronto, Nov. 21.

ASKS FOR OUTSIDE INSPECTION.

General Manager of the Bank of Nova Scotia Writes Strongly of Canadian Failures.

Editor Monetary Times:

Sir, Through the press and from the platform the banking system of Canada is lauded as being the best in the world. In many particulars the system is admirable, our elastic bank currency and the readiness with which the banking requirements of new districts are met by branch extension being its strongest features. However, it is not with-out defects, some of them of vital importance. Of these the most prominent is the lack of external inspection, which experience in the Western hemisphere has demonstrated to be essential. The public have been reminded of this necessity by the recent failure of the Ontario Bank and the leading papers of the country are almost a unit in demanding reform in this particular.

The reasonableness of this demand is made clear by a review of Canadian Banking history since 1880 and before, and is, confirmed by the experiences of our near neighbors prior to the civil war. In 1880 there were in existence in

it collapsed. In each of the two most recent disasters a correct diag-nosis could have been made ten or more years ago. Some urge that the Government should call for special returns, but what value should attach to special returns from the Bank of Yarmouth, from the Omario Bank, or trom any of the other wrecks gone before? They would simply have enlarged the piles of incorrect and deceptive, bank returns in the Finance Department. What is written by one having unusual facilities for observation is eminently true: "It is extremely rare to find a bank has failed without some of the officers committing fradulent or illegal acts to hide it. There is at least sufficient truth in the above to dispose of There is at least sufficient truth in the above to dispose of the suggestion of special returns and to dispose faith in the

the suggestion of special banks, returns of badly managed banks, Some Canadian bankers, including one writer, whose some Canadian bankers, including one writer, whose Some Canadian bankers, including one writer, whose words are entitled to great weight, contend that Govern-ment inspection has failed in the United States. Under the National Bank Act of that country there has been a some-what imperfect system of bank examination, and a more imperfect system by some of the State, Bank Departments. I say imperfect, for under the national system there were employed last year 78 examiners, whose duties required the making of, no less than '11,516 inspections each year! For the fortychile years' during which the National Bank' Act has been in operation there have been established 7,966 banks. Of these 466 have failed, the failures being equal to 5½ per cent, of the whole number for the period. As for the banks other than national, with a more imperfect system of inspection, or no system at all, the tailures reached 1712 per cent. The comparison of the percentages appears as follows: "

National banks failed in 13 years. 5½%: other United States banks failed in 43 years. 5½%: Canadian banks failed in 26 years. 25%: National banks failed in 26 years (same period), 5%

External inspection must not be regarded as an unfail-ing cure; it has its limitations, and the best that can be said of it is that it is a preventative that, if properly applied, will make bank failures almost unknown. An inspector can-not discover an embezzlement until after the act is committed; neither can be avoid a ruinously bad debt made before his visit, but the progress toward failure is generally slow and in the majority of cases a prudent inspector would by his advice and authority, save the situation and direct the management into safe channels.

the management into safe channels. The subject of the establishment of an effetive bureau

of inspection is one of the utmost importance, for unless it is founded on conservative lines, in which the interests of all sound institutions are carsfully conserved, much more all sound institutions are carefully conserved, much more in too large supply; of planks there has been near many harm than benefit would ensue. Bank shareholders are the and good consumption with values slightly improved, parties with the major interest at stake, and for the present Planks sold during the month at about £7 c.i.f., and sprace the subject would be better left to them and to their repre- deals from St. John and Halifax at from £8 to £8 25. bd.

centatives, in the hope that a satisfactory solution of the problem may be reached.

H. C. McLEOD.

FOR GOVERNMENT BANK INSPECTION.

Mr. W. I. Bell, district manager of the Federal Life Assurance Company at Guelph, writes to the Monetary Times, disputing the claim that bank failures in Canada are fewer than in the United States; and criticizing various aspects of Canadian bankin~ practice. He says:-"The United States has fourteen times the population of Canada, yet the t tal liabilities of all the banks in the

"The United States has fourteen they banks in the of Canada, yet the t tal liabilities of all the banks in the United States which failed in 1905 were only \$18,046,055 (in tool they were \$21,153,054), or only slightly more than the United States which rance in 1905 were only \$10,040,055 (m 1904 they were \$21,153,054), or only slightly more than the liabilities of the Ontario Bank alone, to say nothing of the recently failed Bank of Yarmouth, Nova Scotia,

"While in Canada we have but thirty-five chartered banks (with over 1,000 branches), in the United States there are 16,247 banks, none of which have branches. The failure of one of our Canadian banks, with its many branches, is of one of our Canadian Danks, with its many Drancnes, is equivalent to the failure of, say, fifty ordinary American-banks with a head office only. In the States they do not permit branches to be opened in the smaller towns, to obtain deposits to be sent to head office, for speculation or any other purpose. Had our Ontario Bank had no depositcollecting branches, its gambling career would have been

and is continued by the experiences of our near neighbors prior to the civil war. In also there were in existence in Canada forty-one banks; since them seven have been incor-porated and have commenced business, r king a total of forty-eight banks. Of this rotal we've have failed and some others have saved themselves by amalgamation. The failures are, therefore, twenty-five per cent, within a period of twenty-six years, the last ten of which were years of mexampled prosperity, with steadily rising deposits, condu-tions under which even insolvent banks seldom close their doors. Most, if not all, of the above mentioned failures an insolvent condition in any one of the banks, years before an insolvent condition in any one of the banks; years before an onsolvent condition in any one of the banks, years before an onsolvent condition in any one of the banks, years before an onsolvent condition in any one of the banks, years before an onsolvent condition in any one of the banks, years before an onsolvent condition in any one of the banks, years before but what value should attach to special returns from the Bank of Y armouth, from the Omario Bank, or trom any of the other wreeks gond before? They would simply have enlarged the piles of incorreer and deceptive, bank returns in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in suble for the piles of incorreer and deceptive, bank returns in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Finance Department. What is written by one having in the Fin consider Government inspection feasible. On the other side, for forty-two years it has been feasible. Bankers should accept the inevitable and submit to Government inspection gracefully, as our life insurance companies have done for

graces. "Canadian banks are too large and unwieldly for Gov-ernment inspection, we are told. The National City Bank of New York has the largest surplus reserve of any bank in the world" (\$,000,000 more than the Bank of England), and the deposits in its one office are double the total deposits of the Bank of Montreal, with its too branches. This bank is more than the supersected is regularly inspected.

Let the head offices and all branches be inspected simultaneously. A large staff of examiners will be neces-sary, but, as in the United States, make the banks pay for their own examinations, as life insurance companies do here. It would be money well spent, in the light of past events. "Canadian life insurance companies have passed through an investigation, and, althouth many faults have been found, have proven themselves a credit to the country. Is it not possible to regulate our banks so as to bring them up, to a similar high standard? This cannot be hoped for under our present Canadian Bank Act. A change seems imperative."

TIMBER IN BRITAIN.

Accounts of the condition of the British wood market are not encouraging. There is an overstook of Canadian woods, stocks of which as well as of pitch pine and Oregon pine are increased. The Liverpool report of Farnworth and Jardine, dated 1st November, says the tonnage from Canada has been 499.669 this year as against 434.612 same period of 1005. Imports of almost all seats have increased and the 1905. Imports of almost all sorts have increased and the value of some declined.

value of some declined. Square pine is firm, waney steady, oak quiet and un-changed, elm dull with small demand. Pine deals are in fair constitution at unchanged prices. Of New Brunswick and Nova Scotia spruce and pine deals the greater part have gone to Manchester direct. The stock in market has increased and is now rather heavy with values easier. Birch logs are in too large supply; of planks there has been light import and good consumption with values slightly improved.

THE MONETARY TIMES

AUSTRALIA VIA CANADA

Possibilities of the All-British Mail Route from London to Sydney.

(From Our Own Correspondent.) Sydney, N. S. W., October 15th.

I have been shown an Ottawa despatch, published in To-ronto on the 30th August, which gives an account of the new Australian mail contract, in which it is set forth that the journey between Adelaide and Brindisi is to be done in the journey between Auclande and Drindist is to be done an o36 hours or 261/2 days. It further goes on to say that the best time Canada could do by the way of Liverpool and Canada is 33 days, and it then concludes "faster steamers on both the Atlantic and Pacific Oceans would not appar-ently affect much improvement in our favor."

Brindisi Is Not London. The writer of this paragraph had evidently not consider-ed that Brindisi is not London, nor Adelaide the terminal point of the race. So far as Canada is concerned, the problem is between London and Sydney. The time taken by the new route from London to Sydney at the present this amendment. time would be as follows:-

| Days. 2 26 I | Hours. 3 12 18 | From. London Brindisi Adelaide | To. Brindisi Adelaide Sydney | (overland) | |
|-----------------------|-------------------------|---|---------------------------------------|-------------|--|
| al of 30 landed in | Sydney. | the mail leave | | until it is | |
| The Can | adian comp | etition at pres | ent is: To | | |

| Canadia | | Hours. | A LOUIL | |
|----------|----|--------|-----------------|---------------|
| * | | | | |
| total of | 33 | 17 a c | lifference agai | nst Canada of |

Making a 3 days 8 hours.

The time from Sydney to Brisbane is absurdly great The distance is 725 miles by a roundabout route. Bad as it is the time should be cut down to 24 hours, and rail connec-tion could be made so that the journey could easily be done the distance from Moreton Bar to ship's side in 24 hours. The distance from Moreton Bay to Vancouver is 6.510 miles. With a sixteen knot steamer this distance could be done in 17 days. Giving a day for stoppages. This would land the mail in Vancouver from Sydney in 19 days even under existing rail conditions.

Quite a Money Problem,

Total of land

If Canada could carry the mail from Vancouver to Liverpool in 10 days, allowing 9 hours for transhipment it would enable the through route to Canada to carry the mails from Sydney to Liverpool in 29 days. The whole problem is one of money. Sixteen-knot steamers are not specially fast. The "Maheno," which is a small craft, and which made two trips to V incouver, could have done it if necessary in the time specified easily, but the speed would require money and that is the problem for the two countries to con-sider. The trip has been made by even the present slow steamers in less than 20 days from Moreton Bay to Van-

It may be said that the Canadian route would have the serious obstacle of the winter to contend with, but there is a serious winter on the Suez route in the monsoonal months between March and September. When the fierce monsoons blow—the present mail subsidies and the new one as well allow an extra time up to 36 hours for delays during this period

Passenger Traffic Advantage.

So far as Canada is concerned she has the advantage in the passenger traffic, for with fast steamers on the Pacific, in accommodation to those running between London and Australia to-day, there could be no doubt that tourist travel would infimensely increase over the Canadian route. It should not be a difficult thing to obtain a traffic that would give Canada a million and a half dollars a year as the receipts of tourist travel between Europe and Australia. It is a prize worth contending for. Preferential Tariff Questions.

The Commonwealth Government included three pre-ferential schemes in its policy. The first, with New Zealand, was killed, as I have intimated would be the case, by the New Zealand Parliament. It was a badly devised agreement and involved in it conditions which tied up both parties

and involved in it conditions which tied up both parties against negotiations with Canada or any other country. The second was with South Africa. This was so abso-lutely onesided and in favor of Australia that it went through both Houses with but one little kick. South Africa has no possibility of sending anything but ostrich feathers and possibly in the future, a little tobacco and sugar. It was actually proposed by an anti-preferentialist that tobacco and sugar should be struck out of the list. He got but few supporters in his generous proposition. The agreement with

6

New Zealand increased the tariff upon certain imports into both Australia and New Zealand from Great Britain and as a compensation it was proposed to give a preference to cer-tain English goods in this market, by allowing the present tariff to continue on these line from Great Britain, but in-creasing it upon receipts of goods from any other country, Canada included, by to per cent.

Labor Party's Share.

The Labor party carried an amendment against the Government, to limit the preferential imports to those car-ried by British ships having white crews. An effort was made in the Senate to reject this clause, but the Government was again beaten. The British Board of Trade cabled to the rnor-General that a clause granting preference to British ships was ultra vires, as it was in direct contravention to the sundry treaties in which Australia was included.

Meantime the Senate had sent the bill back to the Legislative Assembly, with a request that the operation of the shipping preference should be deferred until 31st August next. The Government took advantage of the return of the bill to strike out the preferential shipping clause altogether, and sent the bill once more to the Senate, with a message from the Governor-General requesting that it should accept

The Senate had by this time gone into revolt against the Government. An election was at hand and the Labor party, which is the back-bone of the Government support in that House, considered it to be a good opportunity to show independence and the proposed amendment was rejected. The Government next introduced a new bill to amend the bill which had not yet become law, and the Senate threw this out on the first reading and passed the bill in the original form, in which it had received it. In this form it cannot be signed by the Governor-General, and, therefore, cannot become law

Opposed by Freetraders.

The bill was opposed by freetrade and moderate tariff preferentialists on the ground that it gave concessions that preferentialists on the ground that it gave concessions that were only triffing, that its real purpose was to give increased protection to certain Australian industries and that upon the refusal of the New Zealand Parliament to endorse the Aus-tralian preferential proposition, the alleged cause for the in-troduction of the British preference had passed away and the Constitutionists in the Senate opposed the changes because the Government had used the name of the Governor-General improperly in andexyouring to cause the Governor-General the Government had used the name of the Governor-General improperly in endeavouring to carry its proposition. It is well to remember these facts, as it might be considered that the fate of the bill indicates the feeling in regard to a pre-ferential tariff, but this is not so, as there is good reason to believe that the majority of the Australian people would favor a real preference, not only for the goods of the United Kingdom, but also for other parts of the Empire. It was certainly an untoward time to introduce a measure at the tail end of a session, and just prior to an election. It was regarded as an election dodge to secure the support of imperialists in the cheapest fashion.

SAID BY PERSONS AND PAPERS.

London Times .- The Canadian court at the New Zealand Exhibition, which contains a very complete and artistic collection of exhibits, has excited general admiration.

Charles H. Cochrane .- The conditions that permit of the over-valuing of a small fraction of the business, and selling it for cash, are always there in the stock company, and sooner or later are sure to be made use of by some one.

Prof. W. J. Alexander .- The greatest problem of the North-West is to make it a unit and thoroughly Canadian; It is a hopeful sign that the people who are giving tone to the country are native Canadians, but on account of the heterogeneous population it will be no light task to work out national ideals there.

Toronto News.-Banking institutions in the United States lately instructed all their clerks and officials that employees who have knowledge of irregularities, and with-hold the information from the directors, shall themselves be This should be considered guilty partners in the offence. the rule and practice in Canada.

A. M. Lewis in "American Industries."-In determining the selling price of any article there must be a basis of cost, and to that is added the expense of marketing and the profit The cost of insurance is determined on the same desired. basis. It is therefore evident, that the less loss the insurance interests suffer the less will be the cost of insurance of the

communication with the countries of the far East, and dis-turb the balance of power in the Parific Ocean.

752

Industrial Canada.—We have come to think possibly too much that everybody else recognizes how great we are. But a general appreciation of this fact is not sufficient to establish business relationships with individual distributors or consumers. Canada must bring to their attention the fact that she manufactures or consumers the second wanted, and not only produces them, but produces them of the highest quality at a fair price. International exhibitions provide an excellent opportunity for this.

Wall Street Journal.—The public should not forget to remind itself that probably only a few out of every hun-dred mining companies whose stock is hawked through the usual channels of press and curb and brokers' circulars ever reach the stage of dividend payers. There are many chances, but few prizes. There is a legitimate mining in-vestment field, but the vast majority of people were far bet-ter off to wait until the early stages of development of min-ing properties were passed so that the heavy risks might be borne by those who can do so without embarrassing themselves or those dependent upon them. For those who forget this, the old saving is recommended: "Mine, Mine, Minus."

PUBLICATIONS REVIEWED.

INDUSTRIAL CANADA.

The November issue of the journal of the Canadian Manufacturers' Association is full of interesting matter, including articles on the "Strength of Our Banking Sys-tem," the "Advantage of International Exhibitions," "A Relief for Car Shortages," and The Suppression of Indus-trial Smoke." trial Smoke.

trial Smoke." In the editorial columns the question is discussed whether our trade returns are clable. "People note the great growth of American sales of Canada," says the writer. "And they undoubtedly have grown. But enormous quan-tities of British goods are sent to United States seaboard ports and reshipped here by the United States agent (if they are 'duty free) as American goods. Many British houses follow the old practice of giving their Canadian market to their United States agents, and under these circumstances trade goes through the United States. Until some investi-gation is made of these and relative conditions which seri-ously affect the reliability of our Import statistics these trade returns must be regarded as unreliable." This number also contains as interesting account of the Association's recent Western trip.

A GROWING INDUSTRY.

The third number of the "standian Cement and Con-crete Review," an illustrated monthly, "ublished at 18 Court Street, Toronto, at an advance subscription of a dollar, gives to the unfamiliar person a good sica of the growing import-ance of the cement and concrete industry, and to those engaged in the trade, a valuable and indeed a necessary authority on the subject. The chart articles this month are : "Cement Buildings for Canada National Exhibition," "Era of Cement Construction." End "Japanese Cement." The journal is profusely illustrated and bids fair to become the recognized authority in matters concerning Canadian cement and concrete.

IMPERIAL INSTITUTE BULLETIN.

To the person who can conscientiously confess a delight in the mysteries of chemical analyses, Sanservieria fibres, Nigerian sorghum, and subjects of a similar nature, the "Bulletin of the Imperial Institute" should prove a continual feast. A chance through its bundred covers brings to the reader's eve a vision of the solemn corridors of the Institute itself, with its more solemn officials, and its most solemn exhibits. In spite of the "Bulk an's" blazing red covers, one could almost imacine the perior to have been in quite close proximity to a dozen musty mumiles, who perhaps once charmed their weard hours in perusing official bulletins, writ on clay bricks.

bulletins, writ on clay bricks. The last number of the publication includes reports on recent investigations, amongst them those ion wory kernels from West Africa, china clay frigt Queensland, geology of Togaland, and—the "Bulletin" is published quarterly.

It is evident that the former Ganadian Minister of Inland Revenue, Mr. Brodeur, approves the metric system of weights and measures, for while he held that post he caused to be prepared a little work, showing some of its advan-tages over our usual system. This work is to be distributed by the Government in country, schools.

EFFECT OF HIGH MONEY PRICES.

Conditions which Prevailed Fifty Years Ago-A Comparison with Those of To-day.

An interesting comparison with monetary conditions to-day is afforded by an article from the New York Herald of December 22, 1850. After remarking the advance in the price of money in all European centres the article continues:--Those who are disposed to look upon such a general movement as the result of unimportant causes, to be but temporary in their action; soon again to give place to te-duced rates and greater abundance, are doomed to be dis-appointed appointed.

Cause of Expensive Money.

The high prices ruling for all the necessaries of life-the enormous rents demanded by landlords and paid by tenants in all the principal cities of the civilized world-the fabulous advance in the value of real estate, to say nothing of the vast expenses attendant upon comercial pursuits, in the way of extravagant warehouses, &c., &c., all go to prove that the moment has at last arrived when prices of all kinds must fall back to the low prices previously rul-ing for money in the different markets of this country and of Europe, or money must rise in value to a point more in harmony with articles that represent it.

Gold Disappeared Rapidly.

It is shown next that money invariably follows in value the advance in other thangs. Reductions in prices then fol-low and are succeeded by "panics, liquidation and contrac-tion." Money cannot remain cheap while everything clse is dear. Gold from Australia and California were looked to is dear. Gold from Australia and California were looked to to furnish the means for keeping money cheap during the period of war. Commerce expanded rapidly all the time, and used up all the money it could find. Trade more than doubled in ten years. Public securities increased in price. The gold, however, disappeared as fast as it appeared. It was hoarded by thousands of dissatisfied people, who ex-pected great political revulsions as a result of financial and commercial bankruptey. commercial bankruptcy.

Higher Money Still to Come.

Higher Money Still to Come. The New York, Herald's article said in conclusion: "We have no hesitation in expressing our belief in a reduc-tion in the value of money, and we believe at the same time in a reduction in the value of everything else; but first we are to have such rates for money as will be sure to produce the reaction in everything else now fulling at prices so far beyond the ability of the community to support. Money must continue to advance in value in England and upon the Continent for months to come. It will command rates equally high, if not higher, in this country.

THE MONETARY TIMES

TRANSPORTATION NOTES.

It is stated that the C. P. R. will shortly take over the STEAM. Pere Marquette lines in Canada. The first train over the Canadian Northern Ontario

Railway to Parry Sound left the Union Station, Toronto, on Monday morning,

The Canadian Northern Railway proposes to divert the course of the Don River, Toronto, in such a manner as to give them access to twelve and a half acres of land.

So great has been the rush to the New Ontario silver district that the Grand Trunk Railway was compelled to run wo trains instead of the usual one on Tuesday last.

It is thought that the C. P. R. will build a new through line from near Smith's Falls to Toronto, taking in such towns as Belleville. Coburg and other places on Lake Ontario.

The last trip of the C. P. R. Overseas Mail Limited was record, the 3,080 mile journey between Vancouver, and Quebec being made in 79 hours and 59 minutes, 21 minutes ahead of time.

The Grand Trunk Pacific has filed the location of plans with the Railway Commission from Edmonton westward to a point fourteen miles beyond the Yellowhead Pass. The grade is about 21 feet to the mile.

Several C. P. R. officials have recently visited Edmonton, Alta, to confer with the city as to the building of the company's new high-level bridge from Strathcona across the river to Edmonton, which will cost \$1,000,000.

Fort William City Council has decided to proceed with the removal of the C. N. R. depot, which projects on one of the streets, and which the company has refused to do, claim-ing the right to retain the station where it is.

The Transcontinental Railway Commissioner, Sir Wil-frid Laurier, and the Minister of Railways, have conferred as to the advisability of calling immediately for tenders for construction of the remaining portion of the line between Superior Junction and La Taque.

Edmonton City Council has reached an agreement with the C. P. R. as to the company's entrance to the city, who have undertaken to guarantee that the C. P. R. will be repaid the expense of putting a traffic deck on the high-level bridge, the cost of which is estimated at \$250,000, this part of the bridge to become the absolute property of the com-

The Temiskaming & Northern Ontario Railway Com-missioners advertise for tenders for leases for other sec-tions of the railway's right of way, the first being that between the ninetieth and ninety-fifth mile, the second and 83,359 tons over the previous year. and the third between mileage 105 and 108. The lease in cach case will be for 999 years. A cash bonus of not less than \$10000 per mile in every one of the sections must be paid by the successful tenderers, who must also pay a roy-alty of 25 per cent; of the gross value at the mouth of the sections, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and increase of 1,040 vessels and a tonnage of 2,785,551 tons, and 1,040 vessels and a tonnage of 2,785,551 tons, and 1,040 vessels and 3,785 tons of 2,785,551 tons, and 1,040 vessels and 3,785 tons of 2,785,551 tons and 1,040 vessels and 3,785 tons mine of all ore mined.

Nelson rates apply plus certain specified arbitrary rates. To Halcyon and Nakusp. Nelson rates also apply

ELECTRIC.

It is stated that the Grand Trunk Railway will file plans for a double electric line between Port Huron and Detroit next year, as the outcome of the electrification of the St. Clair, tunnel. AFLOAT.

It is understood that the dredge "Galveston" will work at St. John during the coming winter.

" The steamer "Kensington," which went ashore last week in the St. Lawrence, has now safely arrived at Quebec.

The Fredericton and Woodstock Steamboat Company has sold its steamer "Aberdeen" to Captain G. H. Perry, of St. John, N. B., for \$4,000.

"The Georgian Bay Ship Canal, from Georgian-Bay to fontrea Montreal, is a thing of the near future," is a statement attributed to Hon. R. Lemieux. This is regarded as a significant announcement, and one that will revive interest in the most gigantic plan ever before the Dominion. The scheme is briefly, to construct a canal from the great lakes to Montreal by way of the French River, Lake Nipissing scheme is, briefly, to construct a canal from the great lakes to Montreal by way of the French River, Lake Nipissing and the Ottawa River, and the present proposal is to make a 22-foot channel at a cost of \$125,000,000. The canal would

save seventy-two hours in traffic from the great lakes to Montreal, and 500 miles in distance. The Canadian steamer, "Strathcona," owned by the Hamilton and Fort William Navigation Company, was blown ashore at Fort William on Monday.

The Canadian steamer 'Seguin," lumber laden, bound down from Georgian Bay to Tonawanda, collided last week with an American barge, and now lies at Sarnia, awaiting orders.

"Theano," which was wrecked at the The steamer entrance to Thunder Bay at the end of last week, had a cargo of 2,044 tons of steel rails billed for delivery at Fort William for the new transcontinental. ,

The steamer "Strathmore," with a consignment of 84,000 bushels of wheat from Fort William to Kingston, was burned to the water's edge near Michipicoten Island, Ont., last week

MONTREAL HARBOR REPORT.

Seeing that almost eleven months of 1006 have gone, the reports of the Montreal Harbor Commissioners for the year 1005, which have just been issued, are quite a surprise. The president's statement gives the revenue of the board for the year as \$364,701, and the expenditure as \$372,662.

The revenue shows an increase of \$35,498.02 over that of the previous year, made up as follows: Imports, \$10,701; exports, \$14,277; local wharfages, \$1,359; rentals, etc. exports, \$14,277; local wharfages, \$1,359; rentals, etc., \$60. The cost of management, maintenance and repairs was \$117,784, a decrease from that of the previous year of \$22,005, and the interest, exclusive of that chargeable to the grain elevator and the new steel sheds, together with the annuity of \$600, was \$254,878, an increase of \$10,171 over that of the previous year. The revenue from the grain elevator was \$12,423, and the expenditure \$43,301. The interest paid on loans on account of the new steel sheds in course of construction was \$19,082.

The harbor master's report contains seven comparative statements, showing respectively for the past ten years the number, tonnage, and classification of sea-going vessels that artived in port; those that arrived from the Maritime Provinces; number and tonnage of inland vessels; the dates of the opening and closing of navigation, etc.; the number and tonnage belonging to the different nationalities; the number and tonnage belonging to the different nationali-ties; the number and tonnage of vessels consigned to the different agents; number and tonnage of sea-going and inland vessels. From these statements it will be seen that 833 sea-going vessels arrived in port during the past season.

paid by the successful tenderers, who must also pay a roy-of 2,785,551 tons, an increase of 1,040 vessels and a tonnage of 430,576 tons, making a grand total of vessels of all classes of 1,040 vessels and a tonnage of 4,725,607 tons, an increase of 1,040 vessels and a tonnage of 4,725,607 tons, an increase of 1,086 vessels of all classes, and 513,035 tons, over the previous vear.

As will be seen from the foregoing figures there has been an increase of 37 sea-going vessels and 83,350 tons, and an increase of 1.040 inland vessels, and 430,576 tons, making a total increase of 1,086 vessels of all classes, and

Many new works were carried out during the year. the enlargement of the deep water areas in the including basins of the harbor.

DINNER TO RETIRING CONSUL-GENERAL.

The banquet on Saturday night in Montreal to Mr. Klecz-kowski, retiring French Consul-General in Canada, was a tribute to the worth of the man. There were 44 English residents of Montreal among the subscribers, who numresidents of Montreal among the subscribers, who num-bered over too. Hon R. Dandurand, speaker of the Senate, presided, and cited the Franco-Canadian treaty, the steam-ship line between Havre and Montreal, the Canadian Eom-mercial agency in Paris, and the extension of Frence-Can-adian trade as having been fostered by Mr. Kleczkowski and having brought him near to the people of Montreal. Sir William Hingston made an eloquent address. In reply the retiging consul telegrad to the privilege inst granted to the retiring consul referred to the privileges just granted to the consular service by the Board of Trade. This, he said, was as wise as it was kind. "for the better way for a nation to hav intercourse with other nations is through its commercial podies."

LIFE INSURANCE.

A correspondent, who begins to feel the pinch of in-creased assessments by his friendly society, asks how much longer such increases may be expected. This riddle is con-stantly offered to members of assessment societies. How can they meet (for they cannot stop) a growing annual death rate per thousand due to the increasing average age of the members. The safe plan is to get into a real life assurance company, whose yearly dues are stable.

It is worthy of remark that the managers of English insurance companies consulted by the counsel for the Cana-dian Insurance Commission are as a rule opposed to having the investments of life companys controlled by Govern-ments or by statute. Publicity is suggested as the safe-guard against improper investments. It is the opinion of two of these English managers that 'it would be a mistake to attempt to regulate the cost of obtaining new business," and Mr. Gerald Ryan, of the Pelevan, thinks a law could not be tramed which would satisfactive regulate the expense of obtaining new business and at the same time allow proper freedom. It is worthy of remark that the managers of English

. . .

Much attention was given by the Commission to the affairs of an assessment society called the Woodmen of the World, head office at London, Ont., the reserve liability of which was computed by a Government officer to be $\$_{1,017_1}$ which was completed by a covernment officer to be \$1,017,-100, and its assets \$157,274, which is \$860,000 less than it should have in order to be solvent. This body had \$11,000,-000 insurance in force in 1905, having lost \$877,000 in the previous year, 14 per cent. of it by death, surrender, can-cellations and withdrawals, but 86 per cent. by lapse. This lapse element is what alarmed the society managers them-selves, and their apprehensions are not lessened, when the official examiner, Mr. Grant tells them, what any sensible person must have long foreseen, that "the rates now in force are greatly inadequate to provide for the promised behefits."

PROPOSED UNITED STATES LEGISLATION.

The United States Insurance Commission, who com-pleted their work at Chicago on Saturday last, have drawn, up sixteen new laws, which the Commission believes will correct most of the abuses in life insurance, and which will be introduced into thirty-seven Degislatures. They are in-tended to achieve the following purposes :--

- Enforce six forms of uniform policies. Direct payment of annual dividends or credit the amount earned to each policyholder.
- Limit the amount of surplus earned. Prohibit discrimination and rebating.
- Prohibit corporations from acting as life agents Regulate the election of directors of mutual c com
- Prohibit the use of misleading estimates and illus-
- trations. Prohibit political contributions. Forbid expenditures of over \$5,000 for any specified purpose without the casent of the directors. Forbid salaries of over \$50,000. 8. 9.
- 10.
- 11
- Regulate investments. Make the policy the entire contract between the interested parties. Define the status of agents. 12. 17.

- Volume 40. Prohibit companies from issuing both participating
- 14. non-participating policies Regulate all disbursements. Regulate assessment companies
- Regulate the retirement of capital stock. 17.

FIRE INSURANCE.

The Star Life office will not amalgamate with the United gdom Temperance and General, but will continue its Kingdom independent existence.

The Connecticut Insurance Department officially states the sums paid out by Connecticut companies by reason of the San Francisco fire as under: Aetna, \$2,710,800; ffart-ford, \$6,530.523; Connecticut, \$2,284,626; National, \$2,415.-016; Phœnix, \$1,675.772; Security of New Haven, \$332,138; total. \$15.963,941. * * * *

Chas. Rhind, the oldest policyholder in the Mutual Life Chas. Rhind, the oldest pointyholder in the Mutual Life of New York, has just realized on a policy taken out $61\frac{1}{2}$ years ago. Mr. Rhind is 94 years old. He took out the policy for \$2.500 two years after the formation of the com-pany, and had paid in \$1,502. On Saturday he drew \$4,315, which he is giving as a present to his sister, as he has no family family

It used to be said that the extensive and excellent Game-well system of fire alarm in San Francisco helped greatly in former years to keep that city's fire loss low. And it is stated that the Pacific Auxiliary Fire Alarm Company, of that city, had the largest number of customers of any aux-iliary company in the country, excepting New York. It had 2,500, and two-thirds were destroyed in the conflagration. By April next it expects to have 1,000 in operation. . . .

The persistent clamor of complaint in San Francisco about fire insurance companies which do not pay in full every claim presented is at last having some effect upon the every claim presented is at last having some effect upon the United States Government. The Department of Commerce has directed the Commissioner of Corporations to investigate the action of fire insurance companies in the settlement of claims for losses resulting from the earthquake and fire in San Francisco and other places in California George E. Butler, of Ross, Cal., will conduct the investigation. ***

 The shareholders of the National Insurance Company of Ireland wanted it wound up in Chancery. Their chair-man warned them that this would add greatly to the "ost, man warned them that this would add greatly to the "osl, and the $\mathcal{L}6$ per share assessment would not then suffice for the liabilities. A circular has been issued, asking share-holders to leave matters in the directors' hands. Much objection has been taken to this proposal. A letter in the "Freeman's Journal" says: "Never in my memory have I heard of a cooler proposition than that the men who brought ruin on an honored company, and who had made a call upon their shareholders amounting to $\mathcal{L}_{240,0000}$, should claim that they were the proper persons to continue the work of closing matters of a technical and complicated nature." chnical and complicated

A New York insurance man, who heard that farmers in Western Canada covered their buildings and growing crops from fire by applying to the public authorities, wrote to the Insurance Superintendent at Ottawa on the subject, who answered: "In reply to your letter of the 10th instant, caanswered: "In reply to your letter of the 10th instant, en-quiring whether municipal or State insurance is being operated in the Dominion, I beg to say the only insurance at present undertaken by the Government of Canada is insur-ance of its civil servants under the Civil Service Insurance Act. Movements looking toward municipal fire insurance have from time to time arisen in Canada, but at present so far as I am aware, there are no such systems in practical operation."

* * * *

All the fire insurance companies in Valparaiso have agreed not to pay or promise to pay any claims on account of the earthquake and fire of last August until the fullest particulars have done. The of the carthquake and fire of last August until the fullest particulars have been obtained about the damage done. The whole disaster will be mapped out and enquiry made as to what damage was caused by earthquake, what by fire breaking out as a consequence of earthquake, and what fire occurred after the earthquake period was over. The total interests of the thirteen British fire companies in Valparaiso amount to £903,000, of which the largest amount held by any one company is £180,000. These figures do not take into account the deductions owing to re-insurances. All the British companies have "earthquake clauses" of varying degrees of stringency, and it is expected that they will be given their full legal weight.

* * * * The losses sustained in the San Francisco fire by the Union Assurance Society of London and the Law Union and Crown Fire Insurance Company of London, as adjusted by November 24, 1906.

ARRAYED FOR THE STRIFE.

Power Companies and Power Commission Face to Face; Their Positions.

The Ontario Power Commission takes one side and The arts. The Offiano Tower Company, together with the the Toronto Niagara Power Company, together with the Electrical Development Company of Ontario, the other. Briefly, the difference between the two is the difference beparts. tween \$34 and \$18 per horse-power. The Ontario Commis-sion states that it will be able to deliver power in Toronto at \$14.15-10 \$17.75 per horse-power, the latter price being for only a half load, and being produced by a development which may possibly be improved upon in another locality. Under the other development scheme, the price would be \$14.15 for a full load and \$15 for a half load. In conjunction with the proposal of the Commission must be taken the decision of the Western Ontario Municipal Power Union to submit uniform by-law to the municipalities which want power

The by-law, if passed, would give the municipality the right to contract with the Commission for one half the amount of power estimated to be needed with the right to take more. A maximum price would also be stipulated by the by-law. This price would vary with the municipalities and be based in the estimated cost as reported by the Commissioners For Toronto it would be about \$18. By contracting for only half the estimated demand and fixing a maximum pri safeguard would be provided for the municipalities which might otherwise find themselves with more power on their hands than they could dispose of, or with power more costly than they could sell. The Commissioners are op-posed to the establishment of a new development and transmission plant for Toronto power, if they can secure those already existing, by purchase or expropriation. They are proceeding on the assumption that they will be able to ex-propriate, but are also preparing, if necessary, to build a cond service

What the Companies Say.

The companies already in the field for supplying To conto power take a radically different stand, and apparently intend to stay in the field so long as they are able to com-

pete successfully. "The Toronto-Niagara Power Company and the Elec-"The Toronto-Niagara Power Company and the Elec-trical Development Company of Ontario are business in-trical Development to depended upon to act in a business stitutions, and can be depended upon to act in a business-like manner." This is the comment of one of the leading members of the company on the position taken at present by the Ontario Power Commission, and those who are back-ing it up. The same opinion, and a good many more along the same line were expressed by another member of the company

The Toronto-Niagara Power Company is leaving noth The first report of the Ontario Power Commissioners has been analysed for the company by experts in New York. The result of the analy-sis would be interesting reading. It is largely to the effect that the Commissioners are being hoodwinked and that the report of the engineers, upon which the Commission's report based, is full of inconsistencies.

C. D. Cory, of Toronto, were reported at the end of Sep- ment of Ontario, have over \$20,000,000 capital. The shareholders of the companies are looking to the directors for proper management, and it is natural to credit the directors with the intention of doing as well for the shareholders as possible.

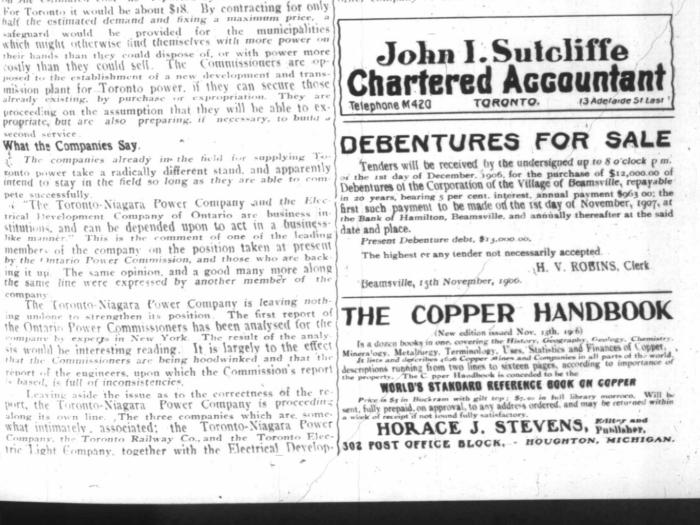

Prices Will Decline With Increasing Demand.

The natural-way to do this, will be to increase the demand for power. If the Power Company finds it possible to reduce the price of power it will doubtiess do so for the sake of increasing the demand. This is the assertion of one of the company's most prominent members, who at the same time drew attention to one of the clauses in the agreement between the Electrical Development Company and the Tobetween the Electrical Development Company and the To-ronto Railway and Toronto Electric Light Companies. This clause provides that whenever, from any cause, the company shall sell power at Toronto at a less rate than the rate charged to the Railway and Light Companies, the rate to those companies, shall be reduced to the same amount. Whether this clause will be effective is questioned. The company declares that it is intended to be effective and will be Under such conditions and with compatition in the sup-Under such conditions and with competition in the supply of power, the consumers of electric light and of street ar tickets would have little to fear from unfair charges for electricity.

"There is not a dollar of watered stock in the Toronto Electric Company," and the member of the power company already quoted. The company had an expert accountant examine its books for the purpose of proving this to the sat-isfaction of one of its critics, and is prepared to prove it now. That the city could instail a duplicate plant for the distribution of electric light at such a low cost as \$1,500,000, company holds to be absurd.

No Faith in Power Commission.

The origin of the Electrical Development Company and the Toronto Niagara Power Company has not been kept in mind by some of their opponents. The impossibility of obtaining power from United States companies at a reasonable price, caused representatives of the Toronto Railway and Electric Light Companies to get together for the purpose supplying themselves. This resulted in the formation of the development company, which was assured that the Railway development company, which was assured that the Railway and Light Companies would take their power. The inter-est of the Railway and Light Companies is to get power-cheaply and the interest of the Development and Transmission Companies is to sell as much power as possible. The shareholders of the companies and as possible. The shareholders of the companies and the consumers of power are largely interested in the same manner. Moderate prices and increasing business will find favor in all quarters. The Toronto Niagara Power Com-party and the Electrical Development Company of Ontario have come into the field with the intention of making money. Their expressed opinion is that the Ontario Power Commis-sion cannot fulfill its intentions, and that the commission cannot fulfill its intentions, and that the companies themselves will be able to supply power as cheaply as any other company or commission that may come into the field.

THE FIGURE 9.

Arthur Wilson, the clever mathema-tician and one of the ablest American bank examiners, says: There are many funny things about the numeral 9; one that I remember is this :-g times o plus 1 = 1.

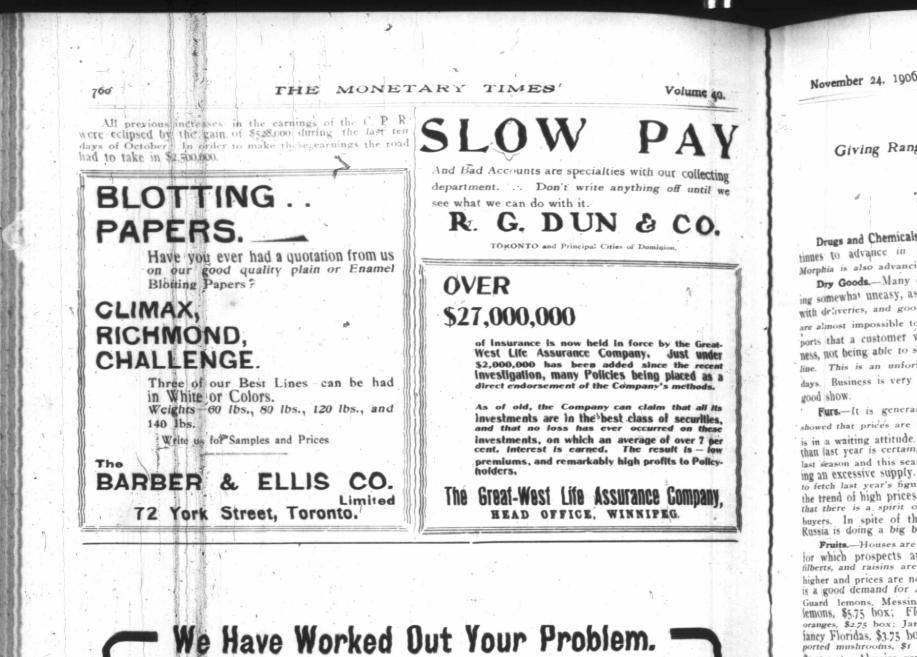

9 times 1 plus z = 11. 9 times 12 plus 3 = 111. 9 times 123 plus 4 = 1111. 9 times 123 plus 4 = 1111. 9 times 1234 plus 5 = 11111. 9 times 12345 plus 6 = 111111. 9 times 123456 plus 7 = 1111111. 9 times 1234567 plus 8 = 11111111. 9 times 12345678 plus 9 = 11111111. 9 times 123456780 plus 10 = 111111111. The Canadian Engineer is THE Journal of Engineering in Canada. " It is a monthly illus-trated publication of eighty-four pages, same size as "The Monetary Times," and is published by the same proprietors, at the corner of Church and Court Streets, Toronto (opposite St. James's Cathedral). The Subscription Rafe is \$1.00 per year, payable in advance. " A new volume begins with the January Num-ber. The December Number will gladly be sent to every reader of " The Monetary Times" who asks for it. Some articles in the December Number, ready next week :-Pump Slippage, By W. Perry New Electric Light & Power Plant at Wellington, By J. Stanley Richmond. The Electric Furnace — its evolution, theory and prac-tice. By Dr. Alfred Stans-field of Mt'Gill University. The International Patent Record. Chemistry of Hydraulic Cements. Measurement of Volume, Pressure and Horse Power at pressures of 1 to 10 lbs. per square inch. J. J. Main (Biography). Draughtsman's Page. "With the Civil Engineers in the West," By the Editor. Book Reviews.

The

Canadian Cement & Concrete Review

a new periodical is devoted to the extension of the most notable phase of modern constructional work. T Specimen copies sent

on request to Cement & Concrete Publishing Co., 18 Court Street, Toronto,

When you go home at five o'clock, there is no reason why you should have your after-dinner ecret smoke spoiled with a lot of worries over little details of your business.

There is no need for you to jot down memoanda on the back of an envelope for to-morrow.

PYSTEM

UCCESS

If your books were arranged on a proper systam, they would shoulder all these petty details for you to-morrow morning they would show you everything you want to know just at the moment you want to know it.

.

Business' Systems leave petty routine to IF BOOKS Business Systems do the work but leave

you time to think and plan and act.

Business Systems leave nothing to cha and allow no possibility of anything being forgotten.

Business Systems enable one clerk to do the work of two and to do it more accurately.

We would like to go into this matter with you either in your office or in ours at your convenience.

A request to know more about Business Systems, will not obligate you.

THE MONETARY TIMES

THE COMMERCIAL MARKETS.

Giving Ranges of Prices in some of the More Important Branches of Trade; their Situation and Tendencies.

TORONTO

MONTREAL.

Montreal, November 22nd.

Toronto, November 15th. Drugs and Chemicals .- Business is brisk. Camphor continues to advance in price, and quinine is still rising. Morphia is also advancing.

November 24, 1906.

Dry Goods .- Many of the wholesale houses are becoming somewhat uneasy, as the mills are driving them up close with deliveries, and goods which are most urgently needed, are almost impossible to obtain. One house this week reports that a customer was obliged to close down his business, not being able to secure a delivery of a most necessary line. This is an unfortunate incident in these prosperous days. Business is very fair and spring orders are making a good show.

Furs-It is generally thought that the October sales

showed that prices are too high. The trade is nervous and is in a waiting attitude. That skunk will be lower in price is in a waiting attitude. That skills will be lower in price that last year is certain, as a large stock remains over from last season and this season's kill is in full swing, thus creat-ing an excessive supply. Mink of a good quality is expected to fetch last year's figures. Canadian business is good, but the trend of high prices has been so pronounced in the past, that there is a spirit of hesitation prevalent amongst big buyers. In spite of the disordered state of the country, Russia is doing a big business this season.

Fruits.—Houses are getting busy for the Christmas trade, for which prospects are bright. New prunes, almonds, filberts, and raisins are arriving. The cranberry market is filberts, and raisins are arriving. The cranberry market is higher and prices are not likely to lower this season. There is a good demand for Almeira grapes. We quote:—Home Guard lemons, Messinas, extra fancy, 4 box; California lemons, \$5.75 box; Florida oranges, \$3.25 box; Mexican oranges, \$2.75 box; Jamaica oranges, \$5 barrel; crate fruit, fancy Floridas, \$3.75 box; California celery, \$4.75 crate; im-ported mushrooms, \$1 lb; Tokay grapes, California, \$3 to bar areas (America oranges, \$4 barrel) \$3.25 crate; Almeira grapes, \$6 to \$6.75 barrel.

Groceries, - Business generally is good. Prunes are firm. California raisins have risen at the Coast, making them prac-tically prohibitive here. Canned vegetables and fruits continue in exceptional demand for this time of the year. Buyers seem to be purchasing as their requirements necessitate, s making demands better all round. Valencia raisins have declined in price considerably, but this will not affect the Christmas trade.

Hides and Skins .- The market has remained steady at last week's prices. In Chicago, where changes are more sudden and of less/duration than here, the prices are easier. Advices from the old country to-day show that the situation has somewhat eased off in European markets. Chicago reports indicate that dealers are buying very carefully, as things are still unsettled. The receipts are light at this time of year, but heavy killing will shortly begin. Small receipts have usually a tendency to send figures down. There is still a deadlock in the situation and it would appear that lower prices is the only satisfactory solution. We quote:-City in-spected cows and steers, No. 1, 1144c.; No. 2, 1044c.; No. 3, olde: country hides, cured, 101/2 to 103/4c., according to con-dition; calf skins, No. 1, city, 12c.; No. 1, country, 11c.; lamb skins, 95c. to \$1; tallow, 51/4 to 53/4c.

Provisions .- Egg sales are very good, and the prospects for a firm market are bright. The meat sales at this time of are not large, as more fresh meats are consumed. Lard is firm. Butter remains steady, and the sales are good, although supplies are not abundant. We quote:-New laid eggs, 27 to 29c.; storage, 23 to 24c.; pickled, 21c.; creamery prints, 26 to 28c.; farmers' choice separated prints—in good demand—25c.; cheese 2131/2 to 133/2c.; twins, 131/2 to 14c.; hreakfart because for the set of th breakfast bacon, 16c.; backs, 16¹/₂c.; rolls, 11¹/₂c.; shoulders, 11c.; long clear, 11 to 11¹/₄c.; lard tierces, 12c.; tubs, 12¹/₄c.; pails, 121/20

less a marked one-to affect the local market. Trading is small, and there are no big sales. Manufacturers are evinc-ing a little more interest in the situation which may mean that they expect prices to rule higher. The next London sales will be held on Tuesday. sales will be held on Tuesday.

Dairy Products .- Light shipments of butter are again Dairy Products.—Light shipments of butter are again reported for last week, the figures being only 747 packages. Exports of cheese, however, were fairly liberal, reaching 58,694 boxes, making the total aggregate for the season to date 2,164,626 boxes. The butter market is exceptionally strong, 2434 to 2514c, being asked for finest townships creamery, and even higher figures have been asked for choicest small selections. Good dairy makes find ready sale at 21c, for best Western, and 19 to 20c, for Manitoba. Actual business in cheese is light, but values are fairly steady at 121/2 to 13c. for early fall Ontarios, and 12 to 121/4c. for Eastern makes.

Dry Goods .- The return of mild weather does not favor the dry goods retailer, but travellers are doing well in securing spring orders, and a fair volume of sorting business being done. There have been no recent changes in domestic fabrics since the late advance in silk ribbons, but all foreign markets are reported very firm, and there is continued com-plaint of the backwardness of manufacturers in deliveries. French makers of fine dress goods are particularly full of orders, and manufacturers of kid gloves can't begin to over-take their orders. Silks are strongly held and Japanese makers will only accept repeats at an advance of 10 to 12 per cent. Linens are also very dear, owing to the great short-ness in the supply of Russian flax, and linen yarns are said to be dearer than any time since the American war.

Groceries .- Navigation is still open and the good movement continues in general groceries, though refiners say sugars are not in so active demand. It was thought several days ago that there might be some shading of sugar prices, as the New York market for raws showed some weakness, but factory prices are yet maintained at \$4.30 for standard granulated in bbls, with \$3.90 the lowest figure for yellows. There are yet some fair holdings of Barbadoes molasses in fact the standard in another while first hands, for which 27 to 28c. is quoted in quantity, while soc. is the general jobbing figure for single puncheons. Teas incline to stiffness. There is really no supply of low grade Japans here, and it is said this class of goods will be grade japans nere, and it is said this class of goods will be largely absorbed hereafter by Manchuria and Korea. Local importers have no good mediums below 17½ to 18c. Ccy-lons and Indians are cabled up a farthing this morning. California raisins are further advanced, being now quoted at 8c. for 3 crown, on Coast, equal to ioc laid down, and seed-ed, in one pound packets, would cost 11c. Under these con-ditions Valencias may again receive more consideration. Canned goods continue to be firmly held. No. 1 tomatoes be-Canned goods continue to be firmly held, No. 1 tomatoes being quoted at \$1.171/2, and corn at 921/2c.

Hides and Tallow. Receipts of beef hides are fairly liberal, but offerings are readily absorbed by tanners, and there is no accumulation of stock. Buyers are quoting 12 to 121/2c. for No. 1, and asking the usual advance to tanners. There is practically nothing now doing in calfskins. Lambskins bring from 90 to 95c. each.

Metals and Hardware .- All houses in these lines report a continued liberal enquiry which they are not in all cases ready to meet, owing to the difficulty in getting deliveries from manufacturers of certain lines. There has been a general adjustment of quotations for sheets, and No. 28 gauge black sheets are now quoted at \$2.60, the same figure being given for Nos. 8, 10, 12, and 14; Canada plates are now \$2.70 for fifty-twos, \$2.75 for sixties, and \$2.85 for seventy-fives; polished Canadas are \$3.85. Tinned iron, 22 and 24 gauge, in sheets up to 3×9 , now quote at \$7.75; galvanized iron, No. 28, \$4.45; Terne plate, \$7.10. Regular galvanized sheets and tin plate remain as last quoted. Iron pipes continue to be very scarce, and \$4.85 is quoted for inch; bars firm at \$2.15, in an ordinary way; coil chain, \$3.85. for three-eights as a base; noils and wire small as holds. Dire tend is form \$2.15. In an ordinary way, con chain, 53.85. For lead is firm as a base; nails and wire remain as before. Pig lead is firm at \$5.40 to \$5.50; zinc a little easier, and 71/4c, might be shaded for a fair lot; antimony, 271/2c; ingot ting 46 to 461/2; copper, 24 to 241/2C.

Oils, Paints and Glass .- The demand for paints is some-Wool.—There has been no great change in the market what abated, now that the season for out-door work is pas-week. The advance of prices in the old country do not this week. The advance of prices in the old country do not seem to have had any pronounced effect here. As a rule, it takes some considerable time for a change in England—un-still higher prices, as dry white lead is now cabled at £23 bulk.
