when the stricken vessel broke in two, eight men could be seen from the shore clinging to a piece of wreckage from the afterpart of the ship, and it is assumed that they were swept to their death in the bolling sea.

Rain was falling in torrents, a gale was blowing and the seas were mountainous when the vessel hit the rocks. Distress rockets immediately flared above the Rohilla, attracting the coast guards, but as the sea continued violent it was possible to launch only two boats from the shore. These boats brought back all the people they could carry.

Most of the ship's boats were crushed in the attempt to launch them, and only one got away bearing a handful of survivors. Even these had to be dragged upon the beach, as the boat capsized in the breakers.

A despatch, however, received in Vienna from Cairo and forwarded to London by the correspondent at Amsterdam, of the Central News Agency, says that the entire Turkish fleet is reported to have left the Black Sea in which Odessa is an important grain port: It is also said that strong Turkish cavalry divisions have arrived in the neighbordhood of the Gulf of Akabah on the Red Sea about 200 miles from the Suez Canal.

Russian Gunboat Sunk

Reports to Lloyd's agency in London today were that the Russian gungoat Donitz was sunk by a Turkish terpedo boat in a raid on the fort of Odessa on Thursday and part of the crew drowned. The Russian steamers Lazareff, Willaz and Whampoa, and the French steamer Portugal were damaged by shell fire and a number of sailors killed or wounded.

The suburbs of Odessa were shelled and some civilians killed. Some American property was damaged.

It was also stated that the Russian ambassador at Constantinople has been withdrawn and all Russia consuls ordered to leave Turkey.

Speculation was rife as to the consequences which Turkey's action would have on the European situation. ENEMY COMPELLED TO WITHDRAW.

The French War Office issued the following statement this afternoon: "On the extreme left inundations brought about by the Belgian army in the lower valley of the River Yser have compelled the forces of the enemy which had passed the river to withdraw. They were subjected to a violent cannonade by the Belgian and French artillery during their movement of retreat.

"The Germans endeavored yesterday to deliver very violent counter attacks on the French and British army corps which were progressing to the northeast and east of Ypres.

"At the end of the day our troops had, notwithstanding, continued their forward movement in the direction which had been assigned them, and had also taken possession of various points of support.

grum. It may be stated positively that the German offensive on the coast is definitely ended. However, no one believes for a moment that the kauser's commanders will relax their efforts to cut a way thru to the French coast. The next operation, it is thought certain, will be directed against Boulogne. For this purpose heavy reinforcements are arriving at a point not far from Ypres. North and northeast of that town allied forces won favorable positions today, emphasizing their successful advance of the last three days, which has resulted in pushing the German front backwards a good distance from the town.

GERMANS PREPARE FOR RETREAT.

Dutch correspondents declare that the German base at Aix-la-Chapelle, across the river from Liege, is being heavily fortified, and that the invaders are preparing for a retreat by way of Namur and Liege in the event of complete disaster. Great stores of war material are arriving at Aix-la-Chapelle. Information from Holland also says that many German soldiers, disheartened by their losses and the ineffectual attempt to take Dunkirk, are striving to reach Holland and surrender to the Dutch.

Every village between Nieuport and Dixmude has been completely obliterated. The allies are taking such sanitary precaution as the exigencies of the situation will allow.

GERMANS ARE TROUBLED.

The French advance in Alsace and Lorraine is seriously troubling the German plan of strategy. The armies of the republic are now menacing Strassburg, where hurried preparations are under way to withstand a siege. All wounded Germans at St. Louis have been removed across the Rhine. Applications for safe conduct in Upper Alsace are denied.

TURKEY CASTS THE DIE.

That Turkey has cast the die and will attempt to retrieve her ebbing fortunes by war against the allies, overshadows all other developments in the present conflict which is sweeping thru Europe, and will now involve a part of Africa and Asia. Altho Turkey's first hostile acts have been directed solely against Russia, it is fully expected that England and France will take up the gauntlet thrown down to their ally.

A 2.30 Thursday morning a Turkish warship opened fire on the Black Sea port of Theodosia, and for an hour dropped shells into the town. Later in the day the Hamidish, the Turkish cruiser which figured conspicuously in the recent Balkan conflict, eteaned into the harbor of Novorousiak and demanded the surrender of the town. Two Turkish officers who went ashore with this ultimatum were imprisoned. The Hamidish drow off and shelled the city, mflicting a good dead of damages. Kertch, another Black Sea port, was also shelled during Thursday. The Gooden and Brealau, German cruisers which fied to quently "sold" to Turkey, are reported to have taken part in a tatack on Kertch. The Russian steamship Yalts, lying in the rocateless of the war, and which were subsequently "sold" to Turkey, are reported to have taken part in a tatack on Kertch. SITUATION IMPROVES.

There is a persistent rumor here that the allies have re-occu Ostend, but this is regarded as premature. But the situation in Flanders and northwestern France is steadily improving. Early today the Bélgians opened the dykes of canals west of the River Yser and flooded a great area. When the surging waters approached the German trenches the men scrambled out and started a retreat. Immediately the allies' warships and a number of the French land batteries opened on the fleeing foe. The loss of life is said to have been appalling. Rain is falling steadily in this zone.

is falling steadily in this zone.

Fresh regiments of the reserve and several Prussian footguard regiments were thrown back from Couckelaere toward Bruges. Between Lepe and Middelkerke fierce fighting has taken place. The German batteries in this region could not be trained on the allies without sweeping their own advanced lines, and the fighting has been at close rifle range, interspersed with desperate bayonet charges.

PROMINENT BRITISH OFFICERS KILLED.

An additional casualty list was issued by the war office tonight. It is dated Oct. 25, and gives the names of 24 officers killed and 50 wounded. LPH, Ont., Oct. 30.—Roused by the alleged opposition of Prof. C. A. itural College, to the organizatudent body, undergraduates of the ion have drawn up a petition Hon. James Duff, Ontario's minis-

that he did not agree with the proposal to form a company on account of his personal convictions against war, and they also assert that he refused to allow the students to hear an address by Lieut.-Col. Brown, who is in charge of a class of military instruction at the Guelph armories.

Text of Petition.

The following is the text of the petition which will be presented to Hon. James Duff next Monday:

"Whereas a large number of students and instructors of the Ontario Agricultural College believe if to be their duty in the present imperial crisis to do something toward the general preparation for defence of the empire, that is being carried on thruout the Province of Ontario and the Dominion;

WASHINGTON, Oct. 30 .- Turkey's attack on Russia, reports of which were confirmed in official despatches to the American Government and the Russian embassy here, was viewed by officials, and diplomats generally here today, as likely to produce the gravest complications thruout the Balkar States, Northern Africa and Asia

sary, and to set in motion measures of relief for Americans similar to those begun when the first nations of Europe were plunged into war.

The far-reaching effect of Turkey's bombardment of Russian ports was everywhere admitted. While it was suggested in some quarters that the Ottoman Government might repudiate the raid of the Turkish destroyers and the former German cruisers Goeben and Breslau, attributing the acts to the initiative of the German officers and crews manning them, the belief prevalls that Russia would not passively accept this view, but would consider herself in a state of war with Turkey.

FIRSTLY—There is no better high-grade Woolen Underwear made, either in Canada or abroad than "CEETEE"—in other words, our own good Canada makes the best Underclothing you can wear—yet many people still retain the old-fashioned idea that imported goods are best.

SECONDLY—On account of the War, imported underwear will be difficult to get, therefore, this is a good opportunity for you to prove to yourself the superior quality of "CEETEE" Underclothing, made in your own country.

Practice economy this winter by purchasing "CEETEE" all pure wool Underclothing. Charge Not Proven.

A charge was preferred against Thomas Lowther of having liquor conveyed to the licensed premises of John O'Mara at New Toronto and taking it from there to his home. Rev. Stuart Ferguson swore that he had spoken to Lowther, who had a parcel under his arm, which contained bottles, and was told that they contained liquor. To make sure, he had asked Lowther for a drink, but this was refused. The defendant said he had sent the liquor to the stables without Mr. O'Mara's knowledge or without knowing that he was committing an offence against the was committing an offence against the license law. The commissioners pressed for a conviction on the evidence of Mr. Ferguson, but the magistrate held that, altho there was a grave suspicion of guilt on the part of Lowther, it had not been proved to his satisfaction and he would give him the benefit of the doubt.

W. H. Farrell of G.T.R. Held Conference With Mimico Board of Trade.

A special meeting of the Mimico Board of Trade was held last night with the president, James Gormaly, in the chair, and Reeve J. J. Harrison and members of the council present. The meeting had been called to confer with W. H. Farrell, the Toronto terminal superintendent of the G.T.R., and to discuss plans for improving the station facilities at Mimico.

The correspondence setting forth the danger of the present arrangement to those boarding or alighting from trains was read, and the inadequacy acknowledged by Mr. Farrell, who suggested a site on the southwest side of Church street, close to the subway, as a suitable position for a new station. This was agreed to by the meeting, and Mr. Farrell will send a recommendation to the headquarters of the G.T.R. at Montreal, and if satisfactory, work would be commenced on the new station in the spring.

RED CROSS CONCERT

About 200 young people attended the concert under the auspices of the McNab Red Cross League at McMurrich School last evening, when patriotic songs were rendered and samples of work for the soldiers done during their spare time were submitted for inspection. A class of about fifty girls from Jesse Ketchum School, under the direction of their teacher, Miss Peters, rendered the national anthems of various countries. W. Wright sang a splendid dityy entitled "We Won't Stand the Kaiser's Bluff," which was leadly applauded.

The gathering was the final of a series of four concerts held under the auspices of the league in McMurrich School. The huge attendance at the last one bore witness to their popularity among the young people of the district.

The pupils of the Humberside Collegiate Institute held a Hallow'een masquerade in the assembly hall of the school last night with nearly 200 in costume present. was there, but your food doesn't work and stick, and the plain truth is you hardly get enough nourishment from your meals to pay for the cost of cooking. This is true of thin folks the world over. Your nutritive organs, your functions of assimilation, are sadly out of gear and need reconstruction.

Cut out the foolish foods and funny sawdust diets. Omit the flesh cream rub-ons. Cut out everything but the meals you are eating now, and eat with every one of those a single Sargol tablet. In two weeks note the difference. Five to eight good, solid pounds of healthy, "stay there" fat should be the net result. Sargol charges your weak, stagnant blood with millions of fresh, new, red blood corpuscles—gives the blood the carrying power to deliver every ounce of fat-making material in your food to every part of your body. Sargol, too, mixes with year food and prepares it for the blood in easily-assimilated form. Thin people gain all the way from 10 to 25 pounds a month while taking Sargol and the new flesh stays put. Sargol tablets are a scientific combination of six of the best flesh-producing elements known to chemistry. They come 40 tablets to a package, are pleasant, harmless and inexpensive, and all druggists sell them subject to an absolute guarantee of weight increase or money back.

Owing to the almost absolute helplessness of so many of the patients, a large staff of nurses is required more accordingly than for any other insultation. The staff now consists of graduate nurses, 17 in training, 5 orderlies and 29 domestics. There is an excellent medical staff of 50 in constant attendance on the 202 patients reported at present in the hospital by Miss Green, lady superintendent. The secretary-treasurer's report showed an overdraft of \$3303, only a deficit of \$602, however, being chargesble the past year. Addresses were given by Mr. Hanna, Mr. Smith. Noel Marshall in the absence of Mr. Kent, extended a welcome to the guests, who enjoyed a most pleasant social tea in the cosy dining-room.

When they have untangled the string and have followed it to the end they may find an envelope containing a number of an envelope containing a number of separate letters. By arranging the

A WOMAN'S RIGHT TO HEALTH

To every woman belongs the right to enjoy a healthy, active, happy life, yet nine out of ten suffer, often in slience, from splitting headaches, tor-turing backaches, violent heart palpi-tation or some other of the many evils that follow anaemia or bloodless-

That is why one sees so many women with pale, thin cheeks, dull eyes and drooping figures—sure signs that the blood is out of order. All suffering women should win the right to be well by refreshing their weary bodies with the new, rich blood of health that with the new, rich blood of health that transforms them into the test of experience. This has been shown by the steadily increasing demand among local buyers, and this has led in turn to a recognition of Toronto as a leading distributive centre in North America. The war, however, will probably materially affect the sources of supply. with the new, rich blood of health that promptly transforms them into healthy, attractive women. There is no other medicine can supply this new, rich blood so speedily and so surely as Dr. Williams' Pink Pills for Pale People. Through this medicine thousands of tired, suffering women have found new health and strength. Mrs. James Drost, Chipman, N.B., says: "For years I did not know what it was to be entirely free from head." says: "For years I did not know what it was to be entirely free from headache or backache. My hands were cold and clammy all the time. It was difficult for me to get my work done, and to walk even a short distance would leave me completely worn out. My life was one of constant worry and I thought I would never be better. I was doctoring all the time but without a bit of benefit, and finally the doctor stopped giving me medicine as he said he could not help me. Do you wonder that I was in despair? My mother urged me to take Dr. Williams' Pink Pills, but I said, 'What's the use? Pink Pills, but I said, 'What's the use? Medicine can't help me.' However, my husband got six boxes of the pills, and to please him I began to take them. By the time I had finished them I undoubtedly had improved, and there were the signs of returning

HOW CAN THE UNITED STATES PAY ENG-LAND HALF A BILLION DOLLARS?

From "Commerce and Finance," New York, we get our first real information respecting the purpose of the visit of Sir George Paish to the United States. The American newspapers have not been telling their readers the pain truth about Sir George's mission and our Canadian papers have been necepting their statements at par. Sir George Paish may have discussed an international clearing house and the re-opening of the stock exchange, and he may have given his advice, if it were asked, on a great many subjects to the secretary of the treasury and to the bankers who conferred with him at Washington, but he came to the United States and he is there today to see how much of the \$500,000,000, due and ewning to England from the United States, can be at once liquidated in gold.

Naturally the United States does not want to part with this huge amount of money and would prefer to settle the debt with shipments of wheat, corn, ton, tobacco and articles of manufacture. Ordinarily England would be ling to trade out the account, but just now she is in a big war and must have all the available specie she can collect. She may not be able to get the trie \$500,000,000, but Sir George Paish has crossed the Atlantic to get all of the can by convincing the United States that they will benefit instead of safer in the end by making the largest possible payment in gold.

The editor of Commerce and Finance, Mr. Theo H. Price of New York, sended the conference at Washington on the 23rd instant, presided over by scretary McAdoo, between Sir George Paish and Basil B. Blackett, representatives of the British treasury and the leading American bankers. He does not deal at liberty, so he says in his paper of this week, to publish what occurred that commends, as an able and accurate summary of the situation, an article with the part of the Market World and Chroniels of New 1000.

tommends, as an able and accurate summary of the situation, an article litten by Arthur R. Marsh, editor of The Market World and Chronicle of New rk. We herewith reproduce it and ask all Canadians to read it in order to get a oper idea of the situation in the States and which must, more or less, affect nada. This article of Mr. Marsh's helps to illuminate our article of yestery on "The Financial Nightmare of the United States": ANGLO-AMERICAN FINANCE.

[Arthur R. Marsh (editor) in The New York Market World and Chronic

ctober 28, 1914.] ngland Wants to Get Her Money. It is impossible not to follow with great interest the newspaper accounts of the purposes and reports of the utterances of the distinguished English financial authority, Sir George Paish, who is now in the United States on a mission to arrange with our government and with our representative bankers and business men such an adjustment of the financial obligations of the United States towards Great Britain as will facilitate the resumption of normal financial and credit operations in the latter country. It may be assumed that more than one of the plans which it is asserted Sir George Paish has in mind to propose or has actually proposed in a tentative way, are more fanciful than real. In the nature of things, the true object of his visit must be to see what can be done here in the way of strengthening England in her vast undertaking to can be done here in the way of strengthening England in her vast undertaking to carry her war to a successful conclusion. Suddenly and, as we believe, most unexpectedly to herself, England has found herself in a position in which she needs to have in hand a very large part of the resources which she has been accustomed to leave in other countries employed there to her profit and to the accustomed to leave in other countries, employed there to her profit and to the prosibility of those to whom she entrusted if. And, in so far as this is humanly possible, she needs these resources, not in the shape of the commodities she has customarily taken in payment of interest or of such portion of her capital as she might choose to call in, but in actual money, at least at the start. All the nations of the earth, except possibly France and the Scandinavian countries, are debtors to England; and the chief of these debtors is the United States. Here she has invested more of her capital than anywhere else; here she sells more of her own products than anywhere else; here talgances from other countries, like Brazil, to which she advances capital and sells goods. For so many years that we have forgotten any other order of things she has been able and willing to accept in payment of what we annually owe her, our cotton, our grain, our provisions and a great variety of our specialized manufactured articles. She has seldom called upon us for money is co-extensive with the possibility of borrowing in money. The same principle appears as between borrowing and lending nation. In so far as it is possible, without the possibility of borrowing in money. The same principle appears as between borrowing and lending nation. In so far as it is possible, without the possible, and the debtor nation to pay its debts to the creator nation in the present time of the earth, except possibly France and the Scandinavian countries, like Brazil, to which she advances capital and supply the possible portion of its indebtedness consistent with the maintenance of a sound economic and credit situation in the United States itself. Nor it it a sound economic and credit situation in the United States is not fire the past have been as a significant of the countries of the supplementary of the we her, our cotton, our grain, our provisions and a great variety of our pecialized manufactured articles. She has seldom called upon us for money a any amount. But in her present situation, she feels that, except for our modstuffs, it is unwise for her to take and carry more than day-to-day stocks

of our commodities and manufactured products. Like the sound business nan who foresees and prepares for heavy drafts upon his resources, England

Thy United States Hesitates to Pay. The first impulse of the debtor, when any change is proposed, not in the ipulated, but in the usual and expected method of meeting his obligation, is resent the fact and to feel that his rights are being invaded by the creditor. He attributes his own embarrassment to the unreasonableness and arbitrari-ness of his creditor. Economic history is full of illustrations of this truth, of the most striking being the free silver agitation here in the United one of the most striking being the life said to the belief of western bor-states, which was attributable in the last resort to the belief of western borowers of Eastern money that the decline in the prices of agricultural com modities in terms of gold, so severe in the last years of the past century, substantially altered the conditions of the indebtedness and made it niquitous for the lenders to demand payment of interest and principal in gold. illarly, there is no denying that on the present occasion there has been a videspread feeling among American business men, bankers, and even officers the government, that England, no matter what her necessities, has no right to change suddenly her practice of accepting payment from us in kind and to urge that we pay her in money. It has been only too apparent that the change is disadvantageous to us in at least two important regards: In the first place its immediate effect is to weaken our own financial and credit osition; and, in the second place, it leaves our commodities, such as cotton, n our hands, to the serious depreciation of their market value, instead of giving us the most important of the usual remunerative outlets for them. And his latter burden upon us happens at this time to be the more grievous, because the war has absolutely deprived us of other outlets hardly less indespensable. In short, large numbers of people in this country can and do point to what appear to them to be substantial reasons why it is not equitable that we should be pressed by England for payment of our indebtedness, or a large portion of it, in the form that now best suits England's own situation. They resist in principle the remittance of large sums of gold to England; they dige that it is the first duty of this country to protect its own business interresist in principle the remittance of large sums of gold to England; they ests and that the credits required by those interests should not be exposed to danger of restriction by reason of the withdrawal of gold in quantity; they

ect to pay no inconsiderable part of the cost of it. There Must Be a Compromise. It is obvious that there are questions here, which, treated tactlessly, might sive rise to no small amount of bad blood on both sides. Thus, the fundamental question of the absolute duty of debtors to creditors, or of a debtor mation to a creditor nation, is one of infinite complexity in fact, in spite of its aplicity in appearance. The bald principle that creditors are entitled to be ad what is owed them and that it is the duty of debtors to pay what they owe, when called upon to do so, will not bear a moment's critical examination from the point of view of the present economic organization of the world. And this is the more true because those who assert the principle as governing are invariably found to have implicit in their thought the notion that because debts are stated in terms of money, therefore it is always money which lebtors owe and ought to pay. How fallacious this notion is appears immediately if debtors as a class are set over against creditors as a class, and t'is argued that in principle the former may be called upon to settle with the atter in money all at the same time. There is not money enough in the world to make this possible. It is not even possible for limited classes of btors to settle all at once, or within a short space of time, with their creditors in money. The savings banks in the United States, for example could not do it in a period of many months without causing general ruin.

And a fortiori a great borrowing country like the United States could not undertake to settle in money with a great lending country like England, without otter economic disaster to both countries.

for applying to our obligations to England the same moratorium which

gland herself applied in the first weeks of utter confusion consequent upon

outbreak of the war; and they argue that, as we are not immediately

cerned in the war, it is highly improper that we should be compelled in

No Full Settlement Possible at the Moment. The very possibility of the settlement of obligations between debtors and creditors in money, then, is completely dependent upon having only a relatively small number of such settlements take place at the same time. En masse these settlements are impossible and even unthinkable in the modern economic world as it has come to be. General settlements of indebtedness between large classes of individuals or between nations can only be accomplished thru

"NOTHING DOING"

credits, which are really the values of commodities or services in course of exchange, but translated into terms of money. And so evident is this truth that it must be assumed that lenders as a class, or the citizens of a great lending nation like England, are fully aware of it; and that it is indefensible for them to set up the claim that what was lent by them was money and that they are absolutely entitled to money in repayment of their loans. Indebtedness today, in a general economic sense, is immeasurably removed from indebtedness in the Middle Ages when only actual money was lent and when equivalent money might with some show of equity be demanded in payment of the debt. Today, in the overwhelming majority of cases, credit—i. e., the value of commodities of some kind—is lent; and the debtor may fairly expect to repay with credit, if money is not available.

This is the large economic truth of the matter: and if England, because of her present need of money in the bank, were to revert to the mediaeval conception of her rights as a creditor, the result in this country could only be growing indigmation and resistance. And yet it is just as true that the debtor is under the most imperative obligation not only to pay his debt, but also to accommodate the payment, within the bounds of reason and human possibility, to the desires and needs of the creditor. In normal times, the individual debtor is unquestionably in duty bound to repay his creditor in money, if he desires; and the duty of repayment in money is co-extensive with the possibility of borrowing in money. The same principle appears as between borrowing and lending nation. In section of the severest of all judges dependent upon the fortunes of the lender. He must be prepared to suffer loss, if need be, in case the situation of the lender becomes such that the latter requires for his own use what he has lent. This truth is seen illustrated on all sides at all times. A Debt of Half a Billion Dollars.

ow wants cash to put into the bank; and there can be little doubt that the real coasion of Sir George Paish's trip across the Atlantic is to ascertain how arge a part of our indebtedness to Great Britain can be met by us in this venture to deny. Equally undeniable, on the other hand, is the fact that this venture to deny. indebtedness could not be paid in full in gold, without eco ruin to the United States. Somewhere between paying the ndebtedness in gold and paying none of it in gold, lies the presen duty of the United States. Sir George Paish, as financial adviser of the British Government, has come to us to ascertain, if possible, how much of our debt-we can pay in gold, and how much of it England must expect to get in other forms of payment. This is a wholly reasonable quest, and deserves to e treated by us as such. And there is all the more reason so to treat it ecause Sir George Paish himself is a widely and deeply experienced man of affairs, completely familiar with all the commercial and financial inter-relations between this country and England, conservant with the most intimate details of our credit and banking situation, and probably better able than any other man living to bring about wise co-operation between those who are loing the constructive work in restoring normal economic, activity in the United States and those who in England are bearing the double burden of making adequate and dependable provision for the awful cost of the war and of setting in order the disturbed machinery of world-wide credit, whose funcioning is of such inestimable importance to every people on the globe.

We have no information, other than that contained in the newspaper reports, as to the proposals which Sir George Paish is making or is prepared to make to the officers of our government or to our financial and commercial leaders with respect to the adjustment of our obligations to England. As has been indicated above, we cannot think that all which the newspapers have said on the subject can be correct. We do not think, for instance, that there can be substantial truth in the intimation that Sir George Paish is holding out the prospect to us of paying a large part of our present matured or maturing debt to England in cotton, to be bought en bloc and stored as a cotto reserve by the British Government. However much we might wish this to be rue, for the sake of American cotton producers, we cannot believe that at this juncture England is prepared to embark on what after all would be a gigentic speculation in cotton. We assume rather that he is discussing appropriate means for making available some portion of our vast supply of superfluous gold-not by drawing it from our banks, but by wringing it out of our gold saturated circulation—and getting this gold to London, where it will serve the double purpose of paying a part of our indebtedness to England and of serving as a basis for many fold its own amount in international credits, of which we as well as England herself will get the benefit. suppose, further, that Sir George Paish is studying ways and means for co-operative action between the London securities market and our own stock schanges, so that on both sides of the water dealing in securities may be esumed under such supervision and control that there may be no danger of nsensate trading, with its possibilities of an irrational collapse of prices spreading technical, even the not intrinsic insolvency in all directions. These are the lines of fruitful activity for Sir George Paish to pursue in this country at the present moment; and we are willing to believe that his sagacity, so often demonstrated in the past, has led him to them. He can do both us and England great good in these matters; and we deem it of good augury that it is the general opinion that this is the case.

J. J. ROWENS CHARGED WITH HIGH TREASON

Appeared in /Police Court and Was Remanded — Offence is Punishable With Death.

On the charge of "having assist public enemies at war with his majesty's Dominions, by attempting to assist them out of Canada," James J Rowens pleaded not guilty before Rowens pleaded not guilty bester Magistrate Denison in the police court yesterday. When the case was called Crown? Attornew Corley explained that this charge of high treason could only be tried by indictment, but the preliminary hearing could be held in the police court. The charge is pun-

ishable with death. Rowens was remanded for a week.

The police allege that Rowens obtained railway tickets for thirty Austrians to the United States, and that he accompanied them as far as Ni-agara Falls, where they were stopped by the immigration authorities.

Mrs. Gooderham, Deancroft, gave a very charming tea yesterday afternoon for the Janet Carnochan Chapter, I. O. D. E., which includes nearly all the public school teachers in Toronte, about 250 of the members being present. The hostess received in the beautiful drawingroom of the house, which was most artistically decorated with chrysanthemums and pink roses. Mrs. Gooderham wore a flowered chiffon gown over gray satin, with black velvet and jet sash, and diamond ornaments. She was assisted by Mrs. Burson, who was in pale blue flowered ninon, and a very smart French hat of crystal and feathers, and Miss Marietta Gooderham, in a white and pink muslin, with coral embroidery. The mahogany table in the dining-room was centred with duchesse lace, and a silver basket of the most beautiful pink roses, violets and lilles of the valley, four bouquets of the same flowers surrounding it. There was also a tea table in the sun-room, decorated with bronze chrysanthemums. A few of those present included Mrs. Cowley, Mrs. Packenham, Mrs. W. E. Groves, Miss Eubank, Miss Mackay, Miss Cullen, Miss Hyndman, Miss McGregor, Miss Burger, Mrs. Spence, Miss Ender, Mrs. Bruce, Miss Elizabeth Dixon, Mrs. Bruce, Miss Elizabeth Dixon, Mrs. E. F. B. A New Principle in Complexion Treatment

AMSTERDAM, Oct. 30.—According to The Frankfurter Zeitung, a Swedish paper published at Gothenburg declares that on Wednesday of this week a Zeppelin dirigible balloon flew over Paris and dropped six bombs on the city. Three of the missles, according to this account, did considerable damage, killing eight persons and wounding several others. French airmen, the newspaper adds, attacked the Zeppelin, but without success.

Toronto Water Rates.

Water takers are reminded to pay their water rates early, and to secure the 10 per cent. discount; payment must be made not later than Oct. 31. Water rates may be paid at branch banks throughout the city until Oct. 30. but as the last day of payment, the 31st, falls cn Saturday, payment of rates on that day must be made at the city hall, as the banks decline to accept incem on a Saturday.

Sporting Editor World: During the match of billiards now in progress at Massey Hall between Inman and Hoppe, it was my privilege to see Inman bring the evening session to a close by playing in his best form at the English game.

After losing the white ball on his first shot, he ran to his points for the day with an unfinished effort of 175. He has, therefore, made 171 points off the red ball alone, which I think I am right in saying is a Canadian record.

The red is still in perfect position for a continuance of the break, and with the master we all know Inman to be, a further large score should be added to the already record break.

Mrs. Courtice Says Deputation of Women to Controllers Was Misreported.

The following letter has been received from Mrs. Courtice, one of a deputation from the Local Council of Women, which waited on the board of control Thursday:

"The report of a deputation of women to the board of control Thursday morning conveys an erroneous impression. As one member of the party, who accepted an opportunity to visit the Jail Farm and the Toronto Jail, I went to the board of control to express thanks for the privilege extended us and to make such recommendation as impressed me most. The little reference made to health and cleanliness, rats, etc., was exaggerated, and the rats, etc., was exaggerated, and the nain purpose of the visit was over coked in the report of Thursday even ag papers and Friday morning vorld.

g papers and Friday morning's Vorld.

"The Toronto Local Council of Women have gone into the matter of incestigation at the Toronto Jail, and he deputation which went to the board control Thursday morning went expecting to strengthen the local countil as well as to offer suggestions. The report of Thursday indicates that our main purpose was to declare the jail mealthy and clean. As a matter of fact the Toronto Jail can never be a proper place for the various purposes for which it is used at present.

"As stated in the board of control on Thursday, we visit a jail for two reasons: To see how present conditions can be improved and to find the cause of the greatest number of imprisonments. The liquor habit is undoubtedly the cause of the majority of offences in the jails and reformatories. One of our appeals is to help remove these things that make all reform work so difficult and so expensive, especially in time of war.

TRUSTED TURK TO BANK THEIR MONEY

Foreigners Complain Ahmed Adeosy's Dealings With Them Were Not Above Board.

Because they could not speak English, a number of foreigners, including Turks and Maltese, gave their savings to Ahmed Adeosy, 172 West Adelaide street, to place in the bank for them. Detective Twigg yesterday arrested the Turk, Adeosy, on a charge of obtaining on false pretences \$470 from Bernardo Fenech of the same address. Adeosy has been getting the money from a number of his boarders for some time to place in the bank, and the police claim has failed to do this. On April 29 he gave a cheque for \$132 the police claim has failed to do this. On April 29 he gave a cheque for \$132 to Fenech as his bank account. When Fenech went to the Sterling Bank, at the corner of Adelaide and Simcoe streets he was told that the account was closed some time previous. Since that time Adeosy has been able to make Fenech wait, telling him, the police say, that his money would be paid back.

The police have information that he has obtained in the same manner \$53 from Paul Cravuana, 255 Maria street; \$32 from Tony Portelli, 172 West Adelaide street; \$21 from Paul Vella and Philicea Camilleri, boarders at his house. The police expect that two more complainants will appear in the police court in the morning, which will make seven in all. He has obtained, the police claim, nearly \$400 in this manner.

LACK OF WORK CAUSED BY WOMEN'S ECONOMY

Canadian Press Despatch.

LONDON, Oct. 30, 9 p.m.—The economy being practised by English women at present is causing lack of work in certain branches of trade. At a meeting of relatively unemployed people here tonight it was stated that one-third of the 66,000 dressmakers in London are en short time, because even the well-to-do are buying cheap ready-made clothing. It was also said that one-fourth of the 14,000 millinery workers are on short time, owing to women buying hats which are cheaply trimmed.

ing the M.A.A. squad right in Hamilton today. Argonauts should win away off.

The double blue will trot out their pest team against the strengthened Ottawa outfit this afternoon to make it sure. Zimmerman will replace Matt Gonter on the back division, and this will be the only change. The teams:

Argos—Flying wing, Murphy; halves, O'Connor, Holmes, Zimmerman; quarter, mills; inside wings, McFarlane, Foster; middle wings, Burkart, Motley; outside wings, Murray, Knight; scrimmage, Simpson, Dandson, Patterson.

Ottawa—Flying wing, Conyers; halves, Frith, McCann, Boucher; quarter, Snelling; inside wings, Vaughn, Davies; middle wings, Cassells, Stalker; outside wings, Ryah, Tubman; scrimmage, Raith, Walters, Emmerson.

Game called at 3 o'clock.

A Kingston despatch says: Queen's senior Rugby team had a light workout on the lower campus this afternoon to get into condition for the game against Varsity. Quigley's shoulder, severely injured in Toronto, has improved a great deal, and it is possible that he will be tried out for the first quarter. Dunsmore may play in the scrimmage instead of White, the latter player taking the inside wing position of Dunsmore. Freida is in the General Hospital suffering with a severe cold. He will not likely be out for today's game, but as his condition is not at all serious he will be sure to go to Montreal. Gilhooley and Box, who were replaced on Saturday because of injuries received from hard tackling, are both out practising and will be on the lineur against the Toronto team. The team will likely line up as follows:

Flying wing, Gilhooley; halves, Rowlands, Hazlett, Hill; quarter, McQuay, Quigley; scrimmage, McLeod (capt.), Kennedy, Dunsmore; outside wings, Box, MacDonnell; middle wings, White, Berwill; inside wings, Ellis, Pilgrim.

Harriers Race Today

Varsity Harriers hold their annual cross-country race over the Rosedale course today. The Rugby Cup is awarded to the man who finishes first, and the Brotherton Medal to the man who crosses the tape second. Cluff, Dykes and Kennedy of Trinity and Clark of Meds look to be the likely ones to make the team which will compete against McGill and Queens at Kingston on the following Saturday.

at 2 o'clock. The following players are instructed to meet at their home dressing room at Scarboro Beach Park, as early as 1.15 to get into uniforms for the game at Kew Gardens at 2 o'clock: Russell, Mitchell, McKenzie, Boyd, Bradley, Ormerod, Henshak, Balley, Kirby, Smith, Peer, Young, Marsh, Patton, Bundy, Waters, Gravelle and Capt. Cahill,

Capitals Junior O.R.F.U. team play Kew Beach at Jesse Ketchum Park at 3 o'clock, and 115-pound team play Kew Beach at 1.30 at Ketchum Park. The junior and senior city teams both play High Park's two teams at Trinity campus at 1.30 and 3 o'clock, and Senior Boys' Union team play West End Y. at field No. 1 in High Park entrance from the Bloor street gates via Dundas street cans. All players and supporters are urgently requested to be at their respective games sharp on time.

Morris Reid and Mooney Gibson are expected to be the stars of the gridiron for Caps senior city team this afternoon against High Park.

Jockey Forbes and Filbert Garlick have been out three nights this week, and seem to be in extra good condition for this afternoon's game against the Beaches. Jim Andrews and Lefty Garnett will also turn out.

and jolts.

The Tigers are primed for their big game in Hamilton today with Montreal. Altho it has been practically settled that they will be without the services of Captain Sam Manson, who is out of the game with a very sore heel. Billy Mallett will be on the job and will complete the back field line-up, with Tout Leckie, Johnny McKelvie and Dug Palmer in reserve. Manson is in bad shape. His heel, which has bothered him all season, was put under the X-rays last evening, when it was found that the bone was very badly injured. Bob Isbister will be at his position at rover, and will direct the team's play, while Red Dixon will hold down the quarter-back job. The team held a fine signal practice last evening in preparation for the game.

HOPPE IMPROVES AT ENGLISH GAME

Inman Has Lead of Eight Hundred After Three Days' Play-The Score.

It was Inman's turn at the table yesterday in Massey Hall, but Hoppe showed improvement at the English game, scoring 576 in the two sessions, the best of the three days for the loser. In fact, both during the afternoon and evening shows, the American player held leads in the early stages. In the afternoon Hoppe gathered the ivories on the rail, jumped the corner pocket, and was clicking off the caroms at a lively rate, when boisterous applause seemed to upset him, and a prolific-lookin run was stopped at 38. Inman's best score of the afternoon was 179, collected in the Englishman's usual rapid and brilliant style.

PARKDALE AND TECH RUGBY GAME A TIE

High School Teams Play Even Game Before Big Crowd at Stadium.

In one of the closest and most keenly contested gridiron struggles of the year, Parkdale and Technical tied in the final of the High School Rugby championship at the stadium yesterday afternoon, in the presence of 2500 supporters of the two teams.

Briefley played centre half for Technical

the presence of 2500 supporters of the two teams.

Brieriey played centre half for Technical, and while he was responsible for the two points in the last quarter which tied up the score, his work was a disappointment to those who expected him to show the calibre enough to make good in senior company. His punts were long, but they were erratic. It may have been that he was not sufficiently protected, but he took too long to kick the ball, and he was downed several times and his kicks were blocked.

Locke did some fine supporting work for Technical, and his work on the line was good at all stages. Parkdale were handicapped by the heavy going. Hall, their captain, got away with some nice runs, and Johnson at centre scrimmage put up a whale of a game before he was compelled to retire at the end of the third quarter. With the score 8 to 8 at the start of the last quarter, Brierley evened it up with a kick to the dead line and a rouge. Another game will be played next week to decide the champlander were the last with the start of the last quarter and the played next week to decide the champlonship.

Harbord Wins Junior H.S. Rugby Honors

Harbord are junior Rugby champions of the High School League as a result of their win over Technical at the game staged at Varsity Stadium yesterday afternoon. Harbord finished out in front by a rouge, which they scored in the last few moments, the final score being 14 to 13. Harbord scored two in the first quarter, on a touch in goal by Proctor and a rouge which Junkin forced Technical to make, Tech. came strong in the second quarter, and Clubine got across for a try which made the count, 5 to 2. At three-quarter time the score read 8 to 7 in favor of Harbord, and when they secured a try the game looked to be cinched. A couple of fumbled punts and Technical was in the game again, and by another try the score was tied up again. Harbord was able to come across with a rouge, which won the game for them.

The teams were:

Harbord (14): Flying wing, Watson; half-backs, Gallanough, Proctor, Junkin; quarter, Troupe; scrimmage, Johnson, Doyle, McNab; inside, Kelliar, Miles; middle, Anderson, Weston; outside, Smythe, Henderson, Weston; outside, Smythe, Henderson, Weston; outside, Smythe, Henderson; inside, M. found that there were practically no members of the Salvation Army in the ranks, and it was decided to send

clergymen whose ministrations would be more familiar to the troops. As to the nurses to be chosen there be done until information is received from the war office. It is stated that only qualified hurses will be chosen. Many girls and women have applied who have not had a thoro training, and while their ofters of service are recognized as highly patriotic, it is certain that the militia authorities will not allow untrained nurses to be sent, and thereby bring about conditions which would result in wounded Canadian soldiers falling into hands of anskilled nurses. There is a scarcity of qualified officers in the militia at present as a result of so many being sent with the first contingent. The government, therefore, will not allow any more officers to serve as privates as was the case with the first contingent.

"On leaving the court house shortly before 6 o'clock last night, I boarded a Bloor street car and in a short time 24 or 25 or 26 people were crowded on the back platform of the car. Samong these was a child, three or four women and some girls. Two girls were on the steps when the conductor, not being able to see as plainly as I lecould, started the car. Fortunately nothing happened, but the lives of those girls were in danger and the comfort of all the passengers was in danger. of all the passengers was in danger.

Doubtless this is a common occurrence.

I have seen similar cases, but were cattle to be herded into cars where they would be overcrowded, there would be an outery and doubtless some one would be punished. But, we, as citizens, must be herded into cars with impunity. The responsibility is not with the Toronto Railway Co., but with you and me to put a stop to it, by making it too expensive for companies to carry on their business in such a manner."

The diatribe followed an argument by I. F. Hellmuth, K.C., against the imposition of a \$5000 fine each upon the Dominion Bridge Company and the Geo. A. Fuller Company. Hellmuth cited a railway case.

ADVERTISEMENT. AN EASY WAY TO STOP HEAD NOISES

Good Advice For Those Who Fear Deafness

Men and women who are growing hard hearing and who experience a stuffy eling of pressure against their ear drums, accompanied by buzzing, rumbling sounds in their head like water falling or steam escaping should take prompt and effective measures to stop this trouble. Head noises are almost invariably the foregruppers of complete or partial. ble. Head noises are almost invariably the forerunners of complete or partial deafness and most deaf people suffer from them constantly. Sometimes these head noises become so distracting and nerve racking, with their never ceasing "hum," they drive the sufferer almost frantic and complete nervous break-down and even violent insanity have been known to result.

Thanks to a remarkable scientific discovery made recently in England it is now possible to almost instantly lessen the severity of these head noises and in a very short time to completely and permanently overcome them. With the disappearing of the head noises, the hearing also greatly improves and very fre-

mappearing of the head noises, the hearing also greatly improves and very freently can be restored to normal. This
agilsh treatment is known as Parmint and can be easily and safely selfadministered at home, and all leading
druggists in Toronto and vicinity now aministered at home, and all leading drugists in Toronto and vicinity now have it in stock. Get from your drugist 1 oz. Parmint (Double Strength) and mix it at home with ½ pint of hot water and 4 oz. of granulated sugar. Stir until dissolved and then take one table-poonful four times a day until the noises diappear and hearing improves. Partis is used double strength in this way not only to reduce, by tonic action, the inflammation and swelling in the Eustachian tube and thus to equalize the air pressure on the drum, but to correct any excess of secretions in the middle ear, and the results it gives are both remarkably quick and effective.

Special to The Toronto World. KINGSTON, Oct. 30.—George Redden, a youth, tried for the fourth time to take his life last night when he went to the Cereal Company's wharf and jumped into the river. The cold water made him change Ms mind, and, clinging to the wharf, he called for help. A watchman pulled him out and handed him over to the police. He was fined \$3 and costs in the police court today for being drunk and disorderly. Two weeks ago he took an overdose of laudanum and was saved by a doc-tor, and before that he drank carbolic acid. On another occasion he jumped in front of an automobile which was traveling at a fast rate of speed, but received only minor injuries.

Committee on Water Rates Will Not Spend Millions on Meters.

A DIVISION OF DUTIES

Board of Control Outlines Work of Projected Financial Expert.

The special committee investigating the water rates of Toronto yesterday requested Commissioner Harris and the city treasurer for full reports as to how matters stand at present and for suggestions as to possible changes for the better. Commissioner Harris stated it would cost about \$5,000,000 to instal meters, and the committee forthwith dropped the plan of reor-

ganization.

The committee agreed that public services should be separate from private services, and it was suggested that consumers in the high pressure district should pay a special tax. When the committee gets the reports it will meet again, probably next week.

Preparatory to the debate in council next Monday night on the advisability of appointing a finance commissioner.

next Monday night on the advisability of appointing a finance commissioner for the City of Toronto, the board of control has handed each of the aldermen details of the scheme, setting forth the duties which would fall on the new commissioner in the event of his appointment, and those which will still be looked after by City Treasurer Patterson.

The Division.

The following are the duties apportioned the commissioner: Bonded debt. maturing debentures, interest coupons, authorized debt, sinking fund and maintenance of and investments, bond sales of every description, loans arranged for, financial, adviser of board of control and council, compilation and supervision of estimates, introduce uniformity of accounting, confer with heads of departments with rewith heads of departments with regard to financing projected works. The city treasurer will continue to look after the following: S'atutory duties, debentures, deeds, leases, contracts, mortgages, agreements, receipts and expenditures duly authorised, administration of justice, insurance on city properties, full control of general waterworks and tax collection debts, licenses and control of all receipts and expenditures and revenues celpts and expenditures and revenues

TO TEACH BULGARIANS ARTS OF CITIZENSHIP

Night Classes Will Be Arranged at Sackville and Niagara Street Schools.

Plans were approved by the property committee of the board of education yesterday afternoon for the public school building to be erected at the corner of Colbeck avenue and Runnymede road.

The committee also decided to proceed at once with the erection of a manual training and domestic science school building on the land recently purchased at the rear of King Edward school.

school.

Arrangements will be made for night classes for the instruction of Bulgarians in the English language, and the duties of citizenship at Sackville and Niagara street schools, under the direction of Rev. R. Davidson.

A two-room portable school building is to be placed on the site recently acquired at the corner of Bloor and Jane streets.

Copeland's Cure For Consumption

WINS CONFIDENCE BY ITS WONDERFUL CURATIVE FOWERS.

MR. W. R. COPELAND.

Deem Six—Now that I am well and strong again, I write to state that the fact I am aliye today witnesses to the merit of your medicine.

My doctor, a specialist, said that I had the worst kind of consumption and that it was impossible for me to live. He gave me only eight to ten days before the disease would terminate facily. He also said that I was no use in treating me, as I was too far gone.

I was left to die, but a friend of mine told me about your medicine and procured me a bottle. Without much hope, I tried it. It did wonstayed in the stomach. After a second bottle, I commenced to regain my appetite and was up in a few days of the time that the dector said I should die. Five weeks later I was at work and have been working ever since.

I wish everyone could know the worth of your medicine, especially those afflicted with consumption as I was, for I undoubtedly owe my life to its use. I will at all times observably answer any correspondence, and you are at liberty to publish this letter if you think it will help to recommend your medicine to others. I remain, gratefully yours, DAVID WARNOCK, Street Car Conductor,

The remarkable power of this medicine marks it as one of the greatest discoveries of this century. Its work is only just started, but it is safe to say that its reputation will grow world-wide.

It is a blessing, as all who have used it testify. To the real "down-and-out" consumptive, the chronic sufferers from bronchial and lung troubles—it is something more than a blessing. To them it means the difference between happiness and misery, and sometimes life instead of a grave.

It is a medicine that is honest. No false claims are made for it. It is good most beneficently good for the aliments specified above. These, even consumption, medicine. If you are a consumptive—take this medicine, for a greater medicine and can't sleep at night for coughing—take this medicine. Your trouble will be oome a memory. If your throat or lungs are in any way weak or sensitive—take this medicine, and they will become strong and normal.

Cavities heal under its benign influence. Consention is freed by its action to disconsch—all, these effects of discase are mastered and the system built up under the curative and nourishing powers.

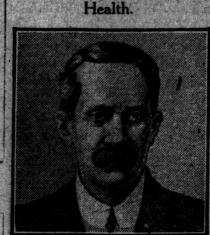

Ask your druggist or send direct to us. Price \$1.00 per bottle. Testimonials of many others can be had on request.

Fruit-a-tives" Keeps Young and Old in Splendid

J. W. HAMMOND, Esq. Scotland, Ont., Aug. 25th, Scotland, Ont., Aug. 25th, 1913. "Fruit-a-tives" are the only pill manufactured, to my way of thinking. They work completely, no griping whatever, and one is plenty for any ordinary person at a dose. My wife was a martly to Constipation. We tried everything on the calendar without satisfaction, and spent large sums of money until we happened on "Fruit-a-tives." I cannot say too much in their favor.

We have used them in the family for about two years and we would not use anything else as long as we can get "Fruit-a-tives."

Their action is mild, and no distress at all. I have recommended them to many other people, and our whole family uses them.

J. W. Hammond

LOST BY THE CITY CANADIAN DRIVER KILLED AT LILLE

William Cockhill, Montreal Chauffeur, With First Contingent's Transport Section.

Canadian Press Despatch.

MONTREAL, Oct. 30.—William Cockhill of Montreal was killed at Lille, in France, while in active service. Messages to that effect have been received here.

Cockhill had been a chauffeur in the employ of Sir/Frederick Williams-Taylor, and went with the Canadian overseas expeditionary force, having joined the mechanical transport section of the Army Service Corps as a driver.

The majority of this part of the contingent at once proceeded to the continent and wined the allied army to serve on the transport section. At Lille a shell struck the car Cockhill was handling and the gas tank exploded, the driver being instantly killed.

Hon. W. T. White Arranges for Supply for Shrapnel

By a Staff Reporter.

OTTAWA, Oct. 30.—Thru the efforts of Hon, W. T. White, minister of finance, the manufacture of shrapnel in Canada is going to be the means of materially benefiting the silver lead industry in the Kootenay. The bullets for the shrapnel are to be made from Canadian lead. Hon, Mr. White took the matter up with the committee of the cabinet, placing orders for stells, and satisfactory arrangements have been made with the smelting companies at Trail, B.C.

The finance minister, with the assistance of Sir Thomas Shaughnessy, president of the C.P.R., a short time ago was instrumental in securing the continuance of smelting operations and of shipments from the leading mines in the Kootenay country, which otherwise would have been largely stopped because of the present business and financial conditions.

Russia Regards Own Position as Affected Comparatively Little.

Canadian Press Despatch.

PETROGRAD, Oct. 29, via London, Oct. 30.—In the highest official sources here it is stated that Russia views the action of Turkey in bombarding two unfortified Russian ports without a declaration of war as infinitely more important to England than to Russia on account of the English communications with India and her position in Egypt.

Egypt.

Altho Russia, it is stated now has a new war on her hands, her policy will not, be one of general aggression against Turkey, but merely a defence of her own interests in the Black Sea. nadian Press Despatch. WASHINGTON, Oct. 30.-War's deand on American granaries, mills and acking houses, as shown today in an nalysis by the department of cor sulted in record exportations of

stuffs, meats and other food articles during September. Many trade currents, broken by the European upheaval, have shifted to the United States, France domanding immense quantities of fresh beef, South America and Europe buying large amounts of flour, while nearly all the markets formerly supplied from other sources are importing millions of pounds of American sugar.

The value of foodstuffs sold abroad last month was \$68,490,389, nearly double that of September a year ago, when the total was \$38,768,624.

The war demand for wheat brought exports for the three months ending with September to the highest point ever reached in any corresponding period. Total exports, including flour in terms of wheat, in the three months, aggregated \$9,250,000 bushels, compared with \$9,000,000 bushels in that period a year ago. For September the exports of flour were about normal, but the wheat sold abroad was more than twice that exported during the month. The wheat total was 26,000,000 bushels.

Many European Loans Renewed in New York at Lower Interest.

Canadian Press Despatch. NEW YORK, Oct. 30 .- Today marked the close of the third month of inoluntary idleness in the stock marbefore the opening of the European war. Most of the loans then negotiated, which are payable between this date and next Monday, were made at 7 to 8 per cent., the higher figure prevailing. Renewals reported today were mostly on the basis of 6 1-2 to 7 per cent., and in some instances, where reduction of interest was not granted, loans were liquidated.

In connection with the \$10,000,000 French loan negotiated yesterday at a 6 per cent. discount, it was believed that other foreign governments or private organizations were making overtures to bankers for the placing of credits in this market. There was said to be ground for the belief that banks in this country now have on deposit not less than \$50,000,000 of private German capital, much of which was sent here as a precautionary measure in the early days of the war while additional ed, which are payable between this as a precautionary measure in the early days of the war, while additional early days of the war, while additional sums were forwarded later to meet purchases of American commodities. It was also said that at the first indications of a return to normal market operations here, a considerable part of this money would be employed in the purchase of American securities.

EXCITED ADVANCE IN WHEAT PRICES

Chicago Pit Stirred by News of Turkey's Plunging Into Hostilities.

Canadian Press Despatch.

CHICAGO, Oct. 30.—Considerable excitement in the wheat market resulted today from the addition of Turkey to the nations at war. Prices were steady at the close, but 2%c to 2%c higher than last night. Corn made a net advance of %c to %c, and oats of %c to %c. In provisions, the outcome was unchanged to 15c up.

The action of Turkey has dispelled all hope of the Dardanelles being reopened for shipments of wheat from Russian Black Sea ports. Speculators were also inclined to act on the opinion that several other countries of Southern Europe would be involved in the struggle.

Oats went higher with wheat and corn. Offerings were light at the start, but on the bulge selling was more free.

Despite unloading by packers, the provision market responded to the advance of other staples. Most of the dealing was in the January delivery.

VALUABLE THRU WAR

The firm of Charles A. Stoneham and Company have recently issued a most interesting brochure on silver. The main article in the booklet is exceedingly interesting, dealing as it does, with the original basis of money as an exchange and tracing its development down to the present day. The conclusion reached by the writer is that the tremendous determined that is now going on by the writer is that the tremendous determined of the struction that is now going on by the writer is that the tremendous determined of the struction that is now going on by the world war will cause a great and early demand for silver for money purposes, and shows that it will have a good effect on the securities of silver mines of intrinsic value. The book can be nad upon application to the firm, whose Totoronto office is at 23 Melinda street. Interesting statistics, carefully compled, are also given of the world's production, consumption and present holdings of silver.

NOW IN CANADA

Demands Have Stimulated Trade.

Colder Weather and War's

Fair Volume of Business Recorded for Next Year's Delivery.

Exchange yesterday was in Hollinger, 110, shares selling at 18.25 the northwest ideal weather has enabled farmers to make progress with fall plowing, and every indication points to a larger wheat acreage. Farmers are holding wheat. Collections show some improvement, especially at interior country points. Montreal reports that the English government has placed an order for 25,000 fleece-lined coats, for 250,000 pairs of heavy woolen drawers, and a contract for 50,000 pairs of army boots has been awarded. Toronto notes that military demand for leather, steel-sheets and woolen goods causes activity in lines that would otherwise be short of work. Winnipeg reports that large orders have been placed for harness, saddles and horses, but domestic trade is quiet. Bank clearings at sixteen cities for the week ending with Thursday last aggregate \$153,769,000, a drop of 10.6 per cent, from last week, and of 21.4 per cent, from the corresponding week last year. Business failures for the week terminating Thursday, 31 in number, contrast with 64 last week and 51 in the like week of 1913."

Despatches to Dun's Review from branch offices of R. G. Dun & Co., in leading trade centres of the Dominion of Canada, state that sentiment is improving, and that, tho trade generally is still quiet, the trend is towards improvement. Montreal reports little change from a week ago. Sorting business in drygoods is somewhat slow, but there is a fair volume of spring orders. Textile mills, shirt, clothing and footwear factories are busy on government orders, and distribution of groceries is well maintained. Retail trade is not quite so active at Quebec, but wholesale business is fully as good as a year ago. Quiet conditions generally prevail at Toronto, the movement of drygoods, ciothing and other seasonable lines being restricted by the weather. The situation, however, has been helped by large orders for war materials, certain factories having sufficient business booked to keep them employed until spring, and the outlook, on the whole, has improved. Confidence is gradually returning at Hamilton, altho the movement of merchandise does not show much improvement. Winnipeg reports that retail trade has been stimulated by cooler weather, and wholesalers note a decided increase in enquiries and This wk. Last wk. Last yr. Gross earnings of all Canadian railways reporting to date for three weeks of October show a decrease of 27.5 per cent., as compared with the earnings of the same roads for the corresponding period a year ago. Commercial failures in the Dominion of Canada this week numbered 62, as against 82 last week and 30 the same week last year."

LEATHER AND WOOLENS Open. High. Low. Close. Close ARE IN BRISK DEMAND

War Has Stimulating Effect on Certain Industries in Toronto.

Toronto reports to Bradstreet's say that while business on the whole remains quiet there are some commodities, the movement of which has been accelerated by the war. Among these may be noted leather and certain lines of woolen goods. Not only had the domestic demand for leather increased materially, but the volume going for export is now much larger than formerly. The large increase in the number of the active militia has also caused a brisker movement of woolens, khaki cloths moving very fully. Engineering firms having equipment suitable for the finishing of steel sheets or the making of similar goods are also enjoying a liberal degree of activity.

Wholesale drygoods merchants report placing orders for spring to be coming in nicely and to be almost equal in volume to those of a year ago. The colder weather has stimulated the sorting trade in fall goods also, altho as yet to a small degree. Some wholesalers claim that some of the larger retailers who formerly did their own importing are now securing their goods thru the jobbers, which action has been of material benefit to the latter. The grocery trade is slow, the paucity of the usual big construction camps making itself fell in the demand for foodstuffs. Hardware and builders' supplies are moving slowly, as also is sheet metal. The carpet trade is very dull, the general tendency to economize affecting the carpet industry seriously. The live stock markets at the moment are weak, export trade proving disappointing and domestic consumption heing light, Ontario grains are scarce and high in price, owing to light deliveries. Collections are fair.

CONTROLLER CHURCH WANTS INVESTIGATION

Demands Repeal of Bylaw Voting Money for Hydro Extensions.

Controller Church has seized upon the recent Bennett "disclosures" as a means to block the carrying out of the order of the city council at the last meeting, to allow the hydro to spend another million in improving and extending the plant. The controller now says he has been asking for the information as to the missing stores for a long time, but has not succeeded in obtaining it; he wants an investigation and the repeal of the bylaw authorizing the spending of a million dollars on hydro improvements.

BISHOP AT PETERBORO.

The Bishop of Toronto leaves today for Peterboro. He will preach in St. George's tomorrow morning and visit the new mission in the afternoon, and address the men of St. John's at 5.30. He will preach the Jedication sermon in St. John's at 7 p.m., returning to Toronto on Monday.

OVEMBER-

And the Winter Campaign

November is pre-eminently the month in which Canadians prepare for Winter. From now until next May we are apt to get weather with a capital W-therefore this is the time to get ready for all possible weather contingencies.

This page will show you that Monday will be an excellent day to start preparations.

Correct to the Last Detail

It's the little things that count in the making of a well-groomed man. The turn of a lapel, the position of a pocket, will make or mar the effect of the finest suit, the hang of a shoulder or the width of the collar is important to the success of an overcoat.

You can judge best of the fit and materials in suit or coat after it is made; hence our ready-towear clothing has particular claim to your notice. The materials are right, the cut is that authorized by the large tailoring concerns at home and abroad; the values are so wonderful that prices seem almost extremely low. But your class of clothing is here, ready for you to try on and judge. Our staff is always pleased to show you whatever you care to see, and no effort is wasted if you
