

SUNDAY MORNING

EDITORIAL Prevention of Disease.

When the Titanic went down with more than sixteen hundred souls a storm of grief and indignation-swept this continent. There was sympathy for the bereaved families that expressed itself in the immediate formation of a fund sufficient to maintain the sufferers who needed aid. That was a disaster spectacular enough to rouse human feeling which remains entirely unmoved over the scores and hundreds of thousands of men, women and children who die every year from preventable diseases and accidents. Not the testimony of public health officers, nor the warnings of scientific experts, nor the appeals in newspapers and magazines of those that recognize the appalling character of the yearly death roll can evoke a response wide enough and big enough to effect the necessary reforms. Why this indifference to human life, accompanied as it is by constant endeavor to guard the beasts of the field and the produce of the soil from the ravages of epidemic disease? Men will cheerfully dig into their pockets for a subscription to a Titanic fund who loudly protest against a fractional increase in taxation required to protect human lives.

Some remarkable figures and testimonies on this perennially urgent question are presented in an article contributed by Annette Austin to Pearson's Magazine for December. Seventeen hundred people in the United States die unnecessarily every day-last year preventable sickness among its wage earners cost them \$366,000,000 in wage loss alone. Professor Elmer E. Rittenhouse of the Provident Savings Life Assurance Company of New York has calculated that the lives lost from preventable causes every day in the United States total in number the crews of two battleships-that they equal in three months the combined numbers of its whole army and navy. Yet people who read with shuddering horror about the Balkan war with its tale of fire, famine and slaughter and the hapless victims if cholera continue sublimely indifferent to the far greater number hat perish yearly in a country they have been taught to believe the nost highly favored in the world.

In a paper read in 1906 before the Association for the Advancenent of Science, Professor Norton of Yale University, said :--Thousands have been expended in stamping out cholera among wine, but not one dollar was ever voted for eradicating pneumonia among human beings. Hundreds of thousands are consumed in saving the lives of elm trees from the attacks of beetles; in warning farmers against blights affecting potato plants; in importing Sicilian bugs to fertilize fig blossoms in California; in ostracizing various species of weeds from the ranks of the useful plants; and in exterminating parasitic growths that prey on fruit trees. In fact the department of agriculture has expended, during the last ten years, over \$46,000,000. But not a wheel of the official machinery at Washington was set in motion for the alleviation or cure of diseases of the heart and kidneys, which will carry off over 6,000,000 of our entire population. Eight millions will perish of pneumonia, and the entire event is accepted by the American people with a resignation equal to that of the Hindoo, who, in the midst of indescribable filth, calmly awaits the day of the cholera. - During the next census period more than 6,000,000 infants, under two years of age will end their little span of life, while mothers sit by and watch in utter helplessness; and yet this number could probably be decreased by as much as one-half. But nothing is done."

Typhoid fever is admittedly a preventable disease. When Wilbur Wright, the man who created the new science of aviation died

THE TORONTO SUNDAY WORLD

A BLIGHTED "PLANT."

The Sunday World has inaugurated a new movement to spread a little sunshine around at the Christmas season. It is going to give every body a chance to do a little personal work and those who send their names to The World Good Fellow will be forwarded in due time, the address of one or more children of less favored people than themselves. It is suggested that in order to make this a real Christmas the individual Santa Claus should visit the home and ascertain at first hand in what manner he can lighten the hearts of the boy or girl given into his care for the time being. Many of our people who have already signified their intention of joining the movement propose to take full charge of the benchiciary, seeing that he gets what he needs most in the way of a present, a full dinner, and some form of entertainment down town. We believe that this way of spreading Christmas cheer will give infinitely more satisfaction than many of the ordinary methods now in vogue. It is the real personal touch.

The Good Fellow Movement.

Many have written commending the idea and offering to help. It need not stop the contributions to the regular organizations. They are all doing good work. The Sunday World's move-ment is merely supplemental. Help it along.

Prevention of Typhoid Fever.

States there are diseases which are as life-de-assistance. And here I would remind stroying:

population is two and one-half times greater." He further points out that in four years in week soon makes a library.

CRUSTS & CRUMBS Albert Ernest Stafford.

I have one reader at all events who think this correspondent is easily has appreciated the spirit of this ef. pleased if he is satisfied with Spurafort to bring some of the heim's pronouncement on souls. What fort to bring some of the would he think of Spurzheim if that would he think of Spurzheim if that philosopher had said: "Sound may be reader. It is not meant for scholars, the vibrations of matter or something who have other resources, nor for any essentially different." Very clear, is who are satisfied-I will not say with it not? He ought to be overwhelmed their own conceits-but with any with the lucidity. Why is a philsystem or form of thought which they honored, when a scientific man must find themselves allied with and see no deliver the goods or be canned? Exreason to abandon. Thirty-five years cuse the slang. And what is all this ago I would have given much, to learn about the atom? Twenty years ago the things I have learned since, which my correspondent would have fought I try now to share with others who tooth and nail against his present desare in a plight similar to my own. cription of an atom. He would have been willing then to split up his mole-My correspondent writes:-"I thank cule to some extent, but his atom then you sincerely for enlightening was absolutely one and indivisible like me as to the difference between the French Republic. It was in that reincarnation and metempsychosis. twenty years old sense that my other It is a common mistake to accept correspondent used the word, I have It is a common mistake to accept no doubt, and most people, I fancy, so them in one's mind as one. My mind understood him. Our scientific men is now clear on the difference. I' are less dogmatic than they were and acknowledge my mistake, which is one will not even assert of the ion or the of the hardest things in life to do, and electron what they once asserted of the tho not making excuses, for excuses atom. They are face to face with the the not making excuses, for excuses are a sign of weakness. I will explain that nothing material is permanent, by telling you that my time is very that nothing material is permanent, limited. In fact I must steal the two hours in the twenty-four that I have stant change;, that the secret of the to study in, and then must read just universe is an Eternal Becoming. "Our In a bulletin on sewage pollution of inter- what my finances will allow. Then, shadows fleet and vanish. Only the too, I am working, working, working, Self forevermore endures." The scienstate and international waters, Dr. Allen T. Mc- toward a literary career, and you tific man knows, if he be willing to Laughlin, a United States investigator, makes doubtless know what that means admit it, that the only unchanging Laughlin, a United States investigator, makes some rather startling statements with regard to typhoid fever. The following comparison will cause a great many people who hold up their hands in horror at the ravages of the plague in India to consider that in Canada and the United and Crumbs" can be of any further Spurzheim is a back number.

Nor can we get any real help from him that the poor man's university, the atomizers of today. Even the "Over the whole of the United States the number of cases (typhoid fever) which were preventable by means within our grasp would prob- ference department on College street the chemist another, the biologist ably reach 175,000 and deaths so avoided would total 16,500. In 1909 there were more cases of literature, all the best books in the other wants it elastic and resilient; typhoid fever in the United States than cases of world are being published in "Every- one wants a force-vortex and another typhoid fever in the United States than cases of man's Library." Cassell's "Popular a material particle: one wants to en-plague in India, in spite of the fact that India's Library." and other cheap series at dow it with intelligence and another 25 cents a volume and less. One a would make it a blind plaything of unconscious forces. Science can only in-He further points out that in four years and the four period of the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out that in four years and the fourther points out the atom. No wonder our correspondent who has probably been fed up on science, finds the fourther points out the atom. No wonder our correspondent who has probably been fed up on science, finds rest for his weary brain in Spurz-heim's intellectual feat over the soul. According to another authority typhoid fever he be sufficiently in earnest. There is heim's intellectual feat over the soul, is 80 per cent, preventable, but it kills 25,000 people a strange magnetism of the soul which "Souls may be emanations from God," in the United States every year and costs many draws all things to it in the realm of or something essentially different." "keepers' on our souls so that they was taking no chances. But as he died Surely this is a subject to which the minds of can draw nothing, and perhaps barely as far back as 1832 we must not be too the medical fraternity should be directed. The conserve their own power for the fu- hard on him. He may have foreseen pollution of our water and disposal of our ture. But one must not work a meta- the trouble the scientific men were sewage to prevent this disease should be the first phor too hard. The soul which is alert going to have over the atom, and had and active, freed from mental, intel- the virtue not to fall into dogmatism; lectual or sentimental prejudice, will And at any rate if a thing isn't one always certainly find what it needs. thing it may be something else. One This is the testimony of the race as could almost start a new system of well as the promise of its greatest Euclid on axioms like that. But I'm Teachers. "Seek and ye shall find, glad my correspondent has taken Ask and ye shall receive. Knock and Spurzheim 'rather than swallow a ask how this is to be reconciled with creed. You can chew on Spurzheim, but you couldn't swallow him. That's the assertion that all real teaching comes from within. I can only say the difference between Spuscheim and the soil, ruined the fisheries, pawned the mines that the guidance and the guarantee a creed. You can swallow a creed, come from within. Whatever is found but it won't stand chewing. Well, without must be submitted to the poor Spurzheim has been dead these inner test. And the outer-conscious- eighty years, and I'd advise my cortries. He has seen young people emigrate to lands ness can only be harmonized with the respondent either to come down a litinner by the development of the outer tie nearer modernity, or to go back a instrument; and it is to accomplish little farther into antiquity. I'd redition of affairs he proposes that the remedy is that development and to gain the con- commend Allan Upward's book aforesequent experience that the Word is said for the former, or Prof. Deussen's made flesh, that the soul incarnates "Philosophy of the Vedanta," just upon earth at all. Even to this day, published (translated by Charles Johnmonplace, scarcely anyone seems to know what it is that evolves. And I am not going to recommend Spurzdollars a year expended in this way would within few realize that there can be no heim to my first correspondent, nor evolution without a corresponding involution. Allen Upward in "The New correct his views about atoms until front of the nations in industry, efficiency and Word" has told us a great deal about the scientific men are agreed about the whirl and the swirl, the coincident what kind of atom they want. When The Dominion Government has, we all know, forces which make the universe what the scientific men have agreed they appointed a commission to investigate the question it is, macrocosm and microcosm. All will probably find themselves in disthe great things of the world come agreement with the mathematicians from within. All art and music and who require an entirely new kind of poetry and philosophy and religion atom for their problems. I find the come from the inner world of the atom of the occulists meets the revestigation is known and their recommendations heart; and all that is done in the guirements of all the rest, and not havbrought into effect we will have made a good start outer world that brings light, or en- ing any scientific prejudices. I naturtowards the improvement of which Prof. Saloan dures for a little while, has been ally use it as it is offered, as a workspeaks. Germany, France and Denmark have cre- dictated by the Master Soul within. ing hypothesis. And similarly with ated great wealth and stopped the dissipation of "Alast" cries the arcient scripture, the soul. Accept the idea as a work-"that all should bear the Master Soul the soul. Accept the idea as a work-within, and know it net!" The final nical training. The United States is moving slow test to which everything we seek or astonished to find that it works. That is y along the same lines and we in Canada have find or ask must be brought, is the is the all-sufficient testimony. If a arrived at the point where we are disposed to copy test of the Master Soul-that which man tells me the road to go and I arrive at my destination by following the for evermore endures. instructions it is nothing to me wheth-

from it The New York Times said that the general sorrow for his death is, or should be, increased because he would still be alive except for the fact that we are not yet civilized enough to use the known and effectual means wholly to stamp out the fever of which he was the untimely victim and for the other fact that, instead of so protecting men of this kind as to let them give all their time and energy to the work that only they can do, we compel them to spend much of both in struggles in which their genius is rather a disadvantage than an advantage." In a hygiene bulletin on "Sewage Pollution of Inter-State and International Waters, With Special Reference to the Spread of Typhoid Fever," Dr. Allan T. McLaughlin "calls attention to the fact that in Northern Europe, the thirty-three principal cities, with an aggregate population of 33,500,000 had an average typhoid death rate of 6.5 per 100,000 in 1909 and 1910, while fifty registration cities in the United States with a combined population of 20,000,000 had a typhoid death rate of 25 per 100,000." On a conservative estimate Dr. McLaughlin places the deaths from typhoid fever at above 50,000 in the United States. Yet every one could be prevented as could the 250,000 cases of that disease that do not end fatally, but are accompanied by loss of earning capacity and impaired efficiency.

In the same bulletin this statement is made :- "Chicago is the only city on the lakes that does not turn its sewage back into the source of its water supply. All other lake cities draw their water supply from the same source where they empty their sewage." On Wednesday last at Washington, Dr. C. A. Hodgets of Ottawa called attention to the constant increase in the deposit of sewage and factory waste in the great lakes and declared that "as a result of this gross pollution their waters have been year by year less suited as sources from which the inhabitants adjacent thereto can derive water supplies for domestic purposes." Concurring in this view Dr. McCullough, representing the Ontario Board of Health, said that Lake Ontario, in the neighborhood of Toronto, shows contamination to be carried from the polluted Toronto Bay by winds and currents to varying distances and had been found fifteen miles out. The typhoid death rate in communities on the St. Clair River is the highest in America and all cities on the lake and river highway show abnormal conditions. What would be said of a man who put a deadly poison into a glass of water and then attempted to extract it in order to make it safe for his use. His sanity would be questioned with reason, yet that is just what is being done by cities that pride themselves on their calightenment and progressive spirit. The time will surely come and cannot come too soon when all communities will be compelled to dispose of their sewage by scientific processes and to maintain the purity of all lake and river waters.

Both the United States and Canada are behind the countries of Europe in the matter of the prevention of disease. Life's lengthening in Germany at the rate of twenty-seven years per century. In Massachusetts, the only American state with reliable statistics, life is lengthening at just half the rate in Germany altho matural conditions are much more favorable. According to Dr. Charles W. Stites, the United States is just seven times dirtier than Germany and ten times more unclean than Switzerland. If the cleansing process were carried thru, even to the extent that Germany has done, says Professor Fisher, at least fifteen years in one generation could be added to the average life span in the United States, by simply supplying the public with purer air, water and milk. The pressure of scientific belief based on incontrovertible evidence has created a national movement in the States for the establishment of a Federal Public Health Service, such as is now supported by the governments of France, Germany and other European nations. Reforms of this kind should not wait upon public agitation, when they are demonstrably advisable in the 'general interest. The mass of the people is inert on subjects that do not appeal to them individthe people is inert on subjects that do not appeal to them individ-ually and preventive methods are too much of an abstraction. But vogue, would fieet all the requirements of the or-enjoyment from their Christmas holiday. prevention can alone effectively overcome preventable disease,

Tariff Reduction in United States

Business interests thruout the world, especial ly in the United States, will watch with interest the movements of the Democratic party which comes into power in the United States on the 4th of next March. Before going away on a vacation President-Elect Woodrow Wilson announced that he would call a special session of congress immediately after his inauguration to carry out the promises he and his party made previous to the election, for an equitable revision of the tariff.

It is not expected that Mr. Wilson proposes to make any radical changes in the tariff, but the business people of the United States have never been better prepared for a tariff revision than at present. Those interests have known for some time what was coming; even had the Republican party been returned to power it was a foregone conclusion that the moderate tariff wing of that party would prevail. Mr. Wilson had many supporters among the manufacturing classes who knew that there must be reductions in the event of his election.

The Philippines.

It is expected that the Democrats will early bring forth a measure providing for the independence of the Philippine Islands. At the last session of congress such a bill was offered and Governor Wilson favored it. If it pass congress it will receive the sanction of the majority of people in the United States as they regard the Philippine Islands as something of an incubus. There is widespread opposition to imperialism in the States, but outside of that the islands have been regarded as a bad business proposition and Uncle Sam is a business man before anything else.

Christmas Giving.

With only a month 'till Christmas the spirit of giving is abroad in the land. It would be satisfactory if all those who intend to increase the joy of living by making Christmas gifts were well endowed financially, but we fear that too promiscuous giving at this season may be a heavy drain upon the pocketbooks of a good many people We have thousands of young girls, for instance, employed in department stores and offices, who earn barely sufficient to keep them in clothes, pay for their board and allow them a little pocket money. They are thinking probably of how they can return the favors that they will themselves receive. In an office where a dozen or more are employed the practice of swopping gifts at Yuletide has gone so far that many clerks are compelled to deny themselves many of the necessities of life. The exchange of neat, but inexpensive Christmas cards, which in the olden days was the

times what it would cost to prevent it.

concern of the health authorities of our city.

Technical Training.

Principal Saloan of the Nova Scotia Normal School proposes a remedy for the blight upon the maritime provinces which in the past has depleted to the monopolists and left the producing class incapable of carrying on skilfully the staple indusless favored by nature, and in laying bare this contechnical education, vocational training and the diffusion among the people of knowledge that will enable them to reclaim resources that have been when evolution has become a comweakened and neglected. He says that ten million twenty years place the maritime provinces in the culture.

of technical training. This commission has probed conditions in European countries, but has not yet reported. No doubt when the result of their intheir natural resources by modern methods of techthe ideas of the older lands in this direction.

Shop Early.

Wise givers should accept the advice so freely tendered at this season of the year and "Shop possessing the same substance and is the strong hold that the hypothesis Early." Early buying has many advantages. It affords a better opportunity for selection, and it relieves the tremendous strain which must be sand or more smaller souls. when properly stocked with leeches, become worth \$5000. Bechade collected the leeches by buying all the worn-out horses he into the markes five or six times a month, especially in April, May, Junc, October and November. Bechade's business flourished and he left a large fortune when he died.

business flourished and he left a large fortune when he died. After a while the French leech trade was ruined, not only on account of the great decline in the demand, but on ac-count of the accessibility of other scurces of supply brought about by the improved facilities of transport, fast trains bringing them in a short time from Turkey, Bohemia and Dal-matia, and to a more limited extent from Algeria and Russia.

tween 300,000 and 400,000 monthly, and for which they received on an average \$50 per thousand. Today, says a writer in the definition of a Houston (Tex.) man contemplates the use of nitrolycerin as

exists a system by which the alphabe-tical key to the English print is English; they spell it R, O, M, A, and brought up to date without interfering they call it Napoli."

silently, and victation of the remarks: T all convinced that the the matter of orthotype needs only to be the version of orthotype needs only to be chosen to achieve a great success and is system of orthotype needs only to be chosen to achieve a great success and is system of orthotype needs only to be chosen to achieve a great success and is sponder time." It is high time, therefore, that our educational authorities should bestire the massives and insist upon the printer reforming his art, and doing away with the anomaly of a fifteenth centrest is such as the masters of christ's College and as the masters of Christ's College and at heart, and aeroplanes. If I have trespassed on your space, as the masters of Christ's College and at heart, and as an exponent of "the art pre-actional eligently. The invaria le international words such as philosophy, science, nation, armist ce withe humanity, form the basis of modern civil'zation, and to preserve these invaluable idiographs for the use of humanity were well international English" can easily be solved in the Province of Ontario hypereading books into the bilingual schools. The notation can be learnt in four

tongue, as soon as he recognizes the word as one in constant use around him it is very difficult to prevent him from premouncing it in the manner, right or wrong, in which he hears it pronounced in his home. This is un-fortunately too true and for this rea-son the study of pronunciation rather than phonetics should be the care of the teacher and the formation of correct vocal habits while the child is learning to speak, and this art of learning to speak, and this art of articulation is acquired far more quickly and better in a foreign, than in a native tongue. ^o For this reason, every child in the British Empire should learn the pronunciation of at least one foreign language, at an early age when sound rather than sense is extremely attractive and build that is changed. The lecturer on his motorcycle is able to reach every nook and cranny of the state. Early in the morning he visits some creamery, the milk. By noon he has gathered an audience in some little cross-roads village miles away, and before evening he is in some larger place, ready to the morning he visits were evening in the some larger place, ready to tion.

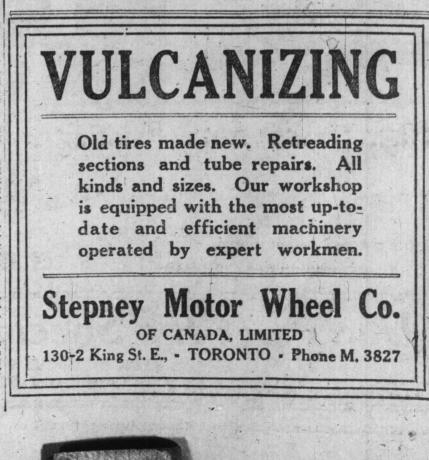

The increased flexibility of the vocal organs, thus acquired, will fa-

t life may have occasion to practise. There is no advantage to be gained in forcing the child to repeat in school in the world is that at Nara, the former capital of Japan. The museum was es-tablished in 756 with a marvelous collec-tion, comprising about 3000 specimens, while the interested minority. who profit directly by the abuse, the ad-vertising men and the farmers who rent their barns or their land for the displays, are ready to fight bitterly against any remedial legislation. New York had a law, excellent so far as it poes to be of a more exotic origin. All, however, come of a time prior to the public light advertisements while the interested minority. Who profit directly by the abuse, the ad-vertising men and the farmers who rent their barns or their land for the displays, are ready to fight bitterly against any remedial legislation. New York had a law, excellent so far as it goes, under the terms of which no origin of the majority of the articles is uncertain; some came from China, and the offending sign down. But the offending sign down. But this law does not react the great pro-portion of the display advertisements which stand on private land, rented for the exocal organs) which lends a step in advance and a development of the vocal organs) which lends a

repetition is indelibly imprinted upon the brain for future use. The orthotype notation was invent-e i for the purpose of preparing Italian men for emigration to America. Im-nediately on arriving at their destina-tion, these all obtained lucrative em-

that there was much need in the rural scenery by vulgar and objectionable sections of Wisconsin for a fuller un- billboard advertising. Now the Tourderstanding of the ordinary laws of ing Club of France has taken up the sanitation, but owing to the impos- fight against this abuse, and that orsibility of reaching the bulk of the ganization, with its 130,000 members, farmers, under the disadvantages of has a reputation of successfully carrythe old-fashioned methods of trans-portation, little could be done except by a letter campaign. Now, however, all that is changed. The lecturer on his motorcycle is able to reach every

willage miles away, and before evening he is in some larger place, ready to deliver a stereopticon lecture as soon as it is dark. The light for the fanters is supplied by the same gas that drives the motorcycle, and the pictures are thrown on a white curtain, which is part of the equipment. When one remembers that one-half the population of Wisconsin is rural and that the word 'sanitation'' is practically unknown among them, the true significance of this campaign appears.
What is undoubtedly the oldest museum in the word is that at Nara, the former capital of Japan. The museum was established in 756 with a marvelous collection, comprising about 3000 specimens, while the interested minority. Who will specimens of decorative work which have ever been produced by human hand, such harive tongue, they become mono-tonous and tiresome as they become familiar, but the ever-increasing fa-cility of pronunciation in a foreigh tongue (renders every repetition a step in advance and a development of the vocal organs) which lends a charm to the study and a feeling of progress inspiring to the student and at the same time the subject of the tee.

GOLDEN WEDDING. Mr. and Mrs. R. J. Score, both of whom

have spent their fives in Toronto, celebrated the fiftleth anniversary of their wedding by a large reception at McConkey's last week. Mr. Score and Miss

Clarissa Metcalf were married at the re-

sidence of the jater's father. Mr. Thos,

Metcalf, on John street, on November 18,

1862, when the snow was so deep that it

was impossible to see across the road. Mr. and Mrs. Score lived for many years

Was impossible to see across the road. Mr. and Mrs. Score lived for many years in University avenue, in the building now occupied by the Ontario Medical Council. Later they moved to their present home, at 312 Huron street. They have five chil-dren living, and five grandchlidren. Their children are Mr. Thomas Score, of St. Paul, Minn.; Mr. Frank Score, of Ken-dal avenue, Toronto: Mrs. R. T. Shilling-ton, of Halleybur. Mrs. J. Edward Potts, of Toronto, and Mr. Frederick Score, of Toronto. Mr. and Mrs. Score have re-ceived many beautiful gifts from their relatives and friends, including a gold receptcale for flowers and an illuminated address from the staff at the tailoring establishment founded by Mr. Score. At the reception last week only two witnes-ses of the wording 50 years ago were present. They were Mrs. Reford and Mrs. William Fahey. When the guests had been received a grand march was lormed, with Mr. and Mrs. R. J. Score leading, and their youngest grand daugh-ter acting as flower girl. A halt was made while Mrs. Score cut a large wed-

leading, and their youngest grand daugh-ter acting as flower girl. A halt was made while Mrs. Score cut a large wed-ding cake at the end of the room and Mr. Score make a brief speech. Mrs. Score wore a handsome gown of white satin velled with black Chantilly lace, and car-ried an old-fashioned bouquet of yellow roses and forzet a e-nots. Receiving with her and her husband were Mr. and Mrs. T. W. Score, of St. Paul: Mr. R. T. Shillington, M.P.P., Mrs. Shillington and Miss Shillington, of Halleybury: Mr. Frank Score, Mr. and Mrs. Fred L. Score and daughter, and Mr. and Mrs. E. J.

in the Stock Markets — Prospects as Viewed by Wall Street. The European situation, which has long been a vital factor in the market, shows decided improvement. The Balkan war appears to be practically ended, and diplomancy may safely be dpended upon to work out its results without serious difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction may ensue, but it is very evident that Enclass difficulties between the great powers. Temporary friction the great powers is to be practically the great powers is the provident that the set of the provident the set of the provident that the set of the provident the set of the provident that the set of the provident the set of the prov may ensue, but it is very evident that and non-sensational lines, should be England, Germany, Eussia and France encouraged. We have had altogether England, Germany, Eussia and France are all strangesting opposed to war. Calm consideration of the problems to be solved plainly shows inducture oc-casion for any such calamit. The great bankers of Europe are in nu-way disposed to figure a ruinous European war, and they are likely to control the situation, for vpcn them depends the raising of the sinews of

Conditions at the moment favor continued fluctuations in securities, but

As a result of more peaceful tendenno very positive advance in view of cles conditions have improved in the the above circumstances. The decis-international money markets. There ion of the arbitration board regarding international money markets. There is less fear of financial disaster and the situation has been materially strengthened by the liquidation of un-wholesome speculation. Firm rates are ruling in all the foreign money markets, the great banks being dis-posed to maintain present high dis-court rates; an attitude which of course discourages the possibility of sold exports to the United States. A better feeling, however, has resulted from Europe's repurchasing some of from Europe's repurchasing some of fect on prices. Altogether conditions our stocks sold a month ago. In the are favorable and in time will make local money market somewhat more their presence effectually apparent.

RANSCONTINENTAL AUTOMOBILE RUNS are now of not unusual occurrence in the United States. Because road difficulties have been charted-the determining factor there is speed.

The first transcontinental run across Canada was essentially one of ENDURANCE. More so when it is known that a boy of 23 was at the wheel, who did not even know the geography of the country-without a chart, or directions-who had to meet all the great difficulties of the trip, far surpassing those of any other part of the world, blindly, and overcome them at their worst by sheer sturdiness of this ordinary stock car alone.

What does this run mean to YOU-who desire a car for everyday use?

It means-that in a Reo-there is the positive assurance of mechanical and structural reliability-minimum upkeep-adaptability to all-no matter how unusual-road conditions. If an ordinary stock Reo car stood a Canadian transcontinental trip it would surely meet any test that you can put it to.

What does it mean to the man who has already bought a car?

It again means-that the

Reo is the Car of Experience

SEND your name and address for the Illustrated Book that tells of the trip. Read how the sturdy little REO ploughed the treacherous muskeg, and pertinacious gumbo. How bridges were improvised, how chasms were block and tackled, and how triumphantly she dipped her wheels in the Pacific, 4,200 miles to the good—with mechanism perfect and running as smooth as the "purr of a contented

The All Red Route Reo and a number of Reo 1913 models will be on exhibition in the Montreal Motor Show, January 4th to 11th, 1913, and the Toronto Show, February 6th to 15th, 1913.

STRENGTHEN UNITS OF EMPIRE AND SAFEGUARD MOTHERLAND

Hon. Martin Burrell Approaching the Task of Developing

Breeding Industry Along Imperial Lines.

When the Hon. Martin Burrell was | That he did not do more was probably chosen as Federal Minister of Agricul-ture there were some four estromation to give wider scope to his ture there were some few retrospective

individuals who asked the question: "What has this gentleman ever ac-complished for agriculture" Now, too much retrospection is a bad thing in a country. We all know where it left the Chinese. It is worse, even, than introspection, and the eu-

even, than introspection, and the eu-rendsts show us that too muck intro-ing great national problems. And the Department of Agriculture is confront-ed by many problems of vital interest spection degenerates the race. Retrospection is a bad thing in any country. and is particularly harmful in a new country like Canada, which must look ahead and go forward. Of course, the answer to the foot-ish question quoted above, is that the Martin Burrell performed a great to every man, woman and child in this

Left question quoted above, is that the Hon. Martin Burrell performed a great deal for agriculture in the special call-ing which occupied his time before he was appointed minister of agriculture. A minister of agriculture is entrusted

with this foundation, and with the plant and animal wealth which it can produce. The greatest need in handling such a task is energy, and the new minister has shown undoubted energy. Energy is the greatest thing in the world. Take that away from the uni-verse and there is nothing left but ther. It is responsible for every liv-ing thing on the face of the earth. It is the food of boundless thought-the greatest attribute of man. Without energy there would be no such thing as creative genius, and without creative genius man would long since have disappeared. Because of a sensori-motor called the brain, man controls everything on the earth. Without brains he would be a puny specimen, if not food for stronger ani-mais. To energy is due the fact that every-thing in the universe advances. From

To energy is due the fact that everything in the universe advances. From the individual cell in a blade of grass to a nation of mighty human beings.

To stand still is to perish. This is the law. So that it must be the aim of a country and its ministers to go ahead, create new wealth, and in this way fill the proper niche in this world, and

Work for Mr. Burrell. So the Hon. the Minister of Agricul-ture has his work cut out for him. to prosper. It is particularly necessary that this and, to his credit be it said, that he should be so in a young country which has so much to do, and which is about is approaching the task on imperial lines. His aid to the provinces; his plan for the improvement of the cattle

to take its place in a great empire. Cementing the Empire. We hear some glib talk nowadays

locks.

plan for the improvement of the cattle and sheep industry; his assistance to the National Bureau of Breeding; his help to the fruit and dairy men, are all signs of good, broad-minded com-mon sense, of which the nation and the empire will reap the profit one-hundred fold. about the British Empire, and the cementing of the same. Some men approach the question with the sang rold of a baby building a house of

They reason not that this is the Hearken, ye Knights of the Land,

It means getting the most out of the

greatest task ever attempted by man. If it can be accomplished it will be the greatest stride in the direction of the greatest stride in the direction of the brotherhood of man that has yet been taken. It does not mean the hoisting of one flag over two-fifths of the surface of the earth. That has already been done. The hard part is to unite the different races which make up the empire: unite them, at least in similarity of thought and aim Wake Up! You least, in similarity of thought and aim. It is a far cry from the Malay States to Canada: from India to the West Indies; or from Australia to Egypt. t is a sublime task to make this em the wiping out of race prejudice, which is as much of a fact as race

Race preservation, and not sel preservation, is the first law of nature. Seven or eight months ago I referred to the empire as a giant merger of nations, and a merger which, it completed, would make it unnecessary for England to protect herself by more or less brittle alliances with European powers. This line of argu-European powers. This line of argu-ment has since been adopted by many of the English newspapers, including The Pall Mall Gazette. It is gaining ground. If there is one discordant note in the song of empire now ring-ing throughout Canada, it is placed there by those who state that this country should not be entangled in the theory discourse of the property state. hoary diplomacy of European states. This and race prejudice are the two chief obstancles to be surmounted. They are hurdles which it will take

ner, she need not and will not ask cents a box,

prophesied that in the future Canada will be the center of the empire. This may of may not be so. To at least some extent it depends on Canada and Canadian energy. Energy rightly di-rected means wealth and prosperity.

habit. A retrospective glance' will show that for years and years every good sport and true of this favored burg has been in a position to take in a glove contest, generally - of championship calibre, before turning his thoughts to drumsticks. liver, wings

and the like.

This year it looked for a while as the the Thanksgiving celebration would be incomplete. Promoter Coffroth had an option on lightweight

Lazy Stomach! froth had an option on lightweight champion Wolgast's services but he could not find a suitable opponent.

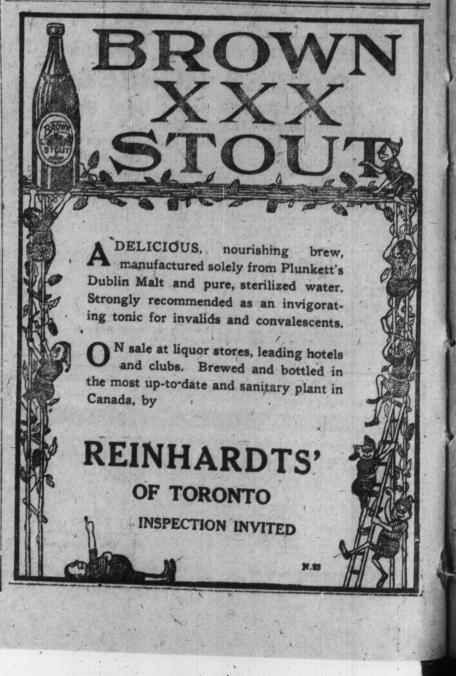

This sounds strange in view of the fact Make Your Stomach Cheerfully Do Its Work-Stuart's Dyspep-sia Tablets Digest Your Food that all the one hundred and thirty-three pound men in Christendom are clamoring all the year round for a crack at Wolgast, but it is true never-theless.

sia Tablets Digest Your Foed and Assist the Stomach.
People who complain they are worn to a frazzle are nearly always dyspeptic and are recommended to use Stuart's Dyspeptic sia Tablets. The stomach gets lazy, food ferments and sours, gas belches up there are symptoms of bloating, the blood becomes thick and sluggish, the liver is blank and the dining room is a chamber of horrors.
One of the greatest evils of our modern life is the quick lunch. To this evil, as much or more than any other may be traced the preponderance of the stomach to do for waile the test stomach food, degluition taking place while it, is only partially mixed with saliva and only half masticated, thus leaving the stomach to do the work the teeth should have done.
Stuart's Dyspepsia Tablets contain di-gespable of digesting 3,000 grains of food including meats, eggs, grain, wegetables, starches and mineral matters. They pre-starches and mineral m

chief obstancles to be surmounted. They are hurdles which it will take clever statesmanship to negotiate. Strengthen the Units. The first may be overcome by the strengthening of the different parts of the empire. England, has often been compared to an old mother with grow-ing children. To extend this comparison, it is reasonable to say that if those ohil-dren are strong enough to safeguard her, she need not and will not ask

her to Paris. There, although closely guarded, she succeeded in running away from her tyrant. Away from Egyptian soil, he was powerless to seize her.

> The Princess returned to America after her flight, but later went to Europe, and is now in Berlin.

She has been making plans to return to the stage in a new musical. comedy.

The Khedive of Egypt was shocked to hear of his cousin's domestic. troubles. He regarded him as a valuable supporter of his throne, and wished him to live in harmony with his bandsome American wife.

While he was passing through Berlin recently the Khedive called upon Princess Ibrahim Hassan and warmiy urged her to return to her husband. He was particularly anxious that she should not return to the stage, as he evidently felt that this would put him self and the whole royal family in a very undignified light.

The national feeling in Egypt is now very strong, and the Khedive is anxious to maintain his position as a dignified monarch in the eyes of the people.

The Khedive offered the American Princess all sorts of rewards and honors if she would refrain from going on the stage, and she replied that she would only accept his proposition on certain conditions. These were, that if she returned to her husband she must be treated exactly like an American wife, meaning that she must be free to see any man she pleased, be allowed to go wherever she liked and not be attended by keepers. She required a written agreement, signed before an American consul, guaranteeing these conditions. The Khedive was not able to give

Twins.

NOVEMBER 24 1912

By Louis Joseph Vance

observed this peculiar happening, awaits the return of the cab, while Staff, who has noticed nothing investight who has noticed nothing investight for the definite announcement: his appartments. Lafer, while preparing "Look again nease." "Look again, please." or the journey a large and brightly col-ored bandbox is delivered to him, much Again Miny pawed the tissue-paper. "There ain't nothing at all, sir," she to his surprise and disgust

declared finally.

It was nothing more or less than the everyday milliners' hat-box of com-noerce: a capacious edifice of stout pasteboard neatly plastered with wall-course in whose design nearcow strings. "It is a bit odd, sir, isn't it?—having pasteboard neatly plastered with wall-paper in whose design narrow stripes of white asternated with aggressive stripes of brown, the whole effective-ly setting off an abundance of pur-ple blossoms counterfeiting no flower staff said something indistinguish-able because of the obstructing pipe-stem. "It's perfectly beautiful, sir-a elde was further decorated with bold black script advertising the establish-ment of its origin. "It is a bit odd, sir, isn't it?-having this sent to you like this and you Staff said something indistinguish-able because of the obstructing pipe-stem. "It's perfectly beautiful, sir-a "The devil fly away with it!" "Be mardon sir?" "Malson Lucifle, New Bond street, "Beg a West," Staff read aloud, completely bewildered. "But I never heard of the myself." "Beg pardon, sir?" "I said, I'm simply crazy about it, 'Oh, did you, sir?" - the place!'

Helplessly he sought Milly's eyes, and helpfully Milly rose to the occas-

A glimmer of intelligence shone lum-d-Ickens you do with it. It isn't my down to the sidewalk and, graciously A glimmer of intelligence shone ium-nous in Milly's eyes. "Mebbe," she uggested under inspiration of curi-sity--"Mebbe if you was to open it. ou'd find a note or-or something." "Bright girl!" applauded Staff. You open it. I'm too busy-packing ip-no time-" And realizing how swiftly the golden

The second provestion of the second provestion Behind him, Milly made noises with tissue-paper. Presently he heard a smothered "O str!" and looked round to discover the housemaid in an attitude of unmiti-rated adoration before what he could hot deny was a perfect dream of a nat-the sort of a hat that only a wo-nan or a society reporter could do ustice to. In his vision it bore a strik-ng resemblance to a Gainsboro with all modern improvements—as most big hats do to most men. Briefly, it was big and black and trimmed with an timosphere of costly simplicity, a monrom this he was aware of no sensa-ion other than one of aggravated an-

Disenchanted by consideration of this

With this, Staff turned hastily away. tentative synopsis, the playwright con-sulted his watch. Already the incident of the condemnable bandbox had eaten nodded to his driver to cut along, and with groans and lamentations squeezed himself into what space the bandbox did not demand of the interior of the up much invaluable time. He would see himself doomed to unending perdivehicle. tion if he would submit to further hindrance on its behalf.

On the boat-train, en route for Liver-pool, Mr. Staff found plenty of time to consider the affair of the foundling bandbox in every aspect with which "And after that, call me a taxi. Tell a lively imagination could invest it; it to wait. I'll be ready by ten or know--" Promptly retiring, Milly took with her, in addition to the bandbox, a con-fused impression of a room whose atmosphere was thick with flying garby the consciousness that he couldn't suess why or by whom it has been so cavalierly thrust into his keeping. Consequently he tudgelled his wits un-"Please put it back and tie it up." ments, in the wild swirl of which a "Yessir." Reluctantly Milly restored lanky lunatic danced weirdly, mutter-the creation to its tissue-naper nest. Helplessly he sought Milly's eyes, and helpfully Milly rose to the occas-on. "Nossir," said she: and that was all. "I know nothing whatever about the bing," Staff declared severely. "It's il a mistake. Take it away—it'll be ent for as soon as the error's dis-ligentleman. "I don't care what the single step in haste, followed his trunks. "Now the trunch of the trunks in gentleman. "I don't care what the single step in haste, followed his trunks. "Now reason why he should take a Lucille had acted in good faith; the single step in haste, followed his trunks. "Staff was too distinctive to

rom this he was aware of no sensa-for other than one of aggravated an-nowance. real, and make the seeming appear the reality. Therefore, the bells should not be allowed to "seem to I merrily," but the reader should merrily," but the reader should be made to feel that the bells actually are pealing merrily-they must convey a real message to him. strength" is not appropriate here; one

and poor" shatters the sense of har-

Read, the first line of stanza two carefully and you will find that : is not metrical. The composite face presented by the last two words taxes my imaginative processes sorely.

"Britain's Travail" is an incoherent narchist-socialist tract; In "To : Snowdrop" there is too evident the efort to make a moral, it is not natural. "The Sunflower" is vague; one doesn't 'now whether it means sunrise or a 'lower. "Helen of Ballydown" come from far-off Ireland: it is

F. A. TALBOT iritish journalist, who has written several books about Canada.

of a trip down Broadway on a S morning: once a Colombian cried right out loud to us sarcastically as we passed: 'America for the North Americans'! and this was the extent of the insults or ill-treatment received from the inhabitants of Colombia."

1890. They saw a row of the insects pulling the edges of leaves together, then position in its highest phases. The others trimming and fitting the edges: music selected has been chosen not others trimming and fitting the edges: music selected has been chosen and finally the completion of the work only for its intrinsic merit but for competition; it is a rare gem of verse.

THE CHIMES.

But oh! thru all their joyfulness, there runs a sadder strain. Telling of weary souls that came, only to fall back again. Telling of hearts that never felt the softening power of grace. Of others in their scorning who turn away their face. All have read of carnivorous plants, of laughing plants, and of plants that weep: but who has heard of a plant that coughs? There is the authority of a french botanist, however, for the

ical regions actually possesses the power to cough in the most approved -"Pete." manner. The fruit of this plant re-sembles the common broad bean.

There is a lack of definiteness in the grip of the subject here that is a strong contrast to the tenseness of the first poem. "They seem to peal," is a weak expression: in poetry, a great deal is "seeming" that is, it is sym-bolic, it represents something else which it informate to the tensor It appears that the coughing plant is something of a crank, that it easily works itself into a rage, and that it has a curious horror of all dust. bolic, it represents something ense which it interprets by the concrete As soon as a few grains of dust are deposited on its leaves, the air chambers that cover their faces and are the respiratory organs of the plant beimage. But the poet must bridge the chasm between the seeming and the come filled with gas, swell, and end by driving out the gas with a slight

explosion and a sound that resembles peal so much the cough of a child suffering from a cold as to carry a most uncanny sensation to the one beholding the phe nomenon. "Splendid

strength" is not appropriate here; one scarcely associates the idea of "strength" with the tolling of a bell. Again the transition from the concep-tion of mankind as a "soul" to the more prosaic classification into "rich and poor" shatters the sense of har-ochestral program on the first night "The Heather Moon," by C. I am for the sanatorium as much as I can be realizing that the treatment of tuberculosis should be a strictly local proposition. In every county in the country there should be one or two of them. Ideally, they should be municipally controlled. I am some-times accused of talking thru my hat. I seldom do, however, without having facts and stories at my command. In this instance, I have-many of facts and stories at my command, others has upon those afflicted. In this instance, I have—many of fhem. And so I insist that there should be strings to the money that the city is to give. And do not for-get that the term Free may apply in the direct case of the people who are admitted without means, but always someone is paying for them. Very women in them attend, with a view

SUNDAY MORNING

Religion and Social Service

EDITED BY KENNETH DOUGLAS, B. A., Ph. B.

This department has been inaugurated with the hope of materially aiding in the task of bettering social conditions in Toronto. It will sladly furnish publicity for any worthy cause having a similar aim, irrespective of creed or denomination. There are also very many young men and women in the city who are face to face with vital problems. To any such—to all who are ionesome and desirous of making the acqualat-ance of those who may be helpful to them—the Editor will be happy to extend whatever advice or assistance he may.

The Sanatorium There seems a probability, as I write this, that the people of Toronto will have an opportunity to yote as to

will have an opportunity so vote as to interest in this matter. If you will the grant to the National Sanatorium. commence to think of it and talk of it

the grant to the National Sanatorium. Personally. I would oppose the mea-sure—the grant of \$200,000, I mean— unless there were some strings to it. By strings I mean, of course, con-ditions. The first of these would be that the sanatorium authorities should be forced by virtue of the grant, to co-operate with the city's health authorities. Under present

health authorities. Under present

conditions they refuse to do so.

THE TORONTO SUNDAY WORLD

NOVEMBER 24 1912

A No. 1, the World's Most Famous Wanderer, Tramps Half a Million Miles in His Lifetime

"Horrible Example" of the Victims of the Wander-lust Calls on The Sunday World and Talks About His Great Work of Rescuing Boys Who Have Been Gripped By the Germ-Exhibits Autographs of Taft, Roosevelt, Wilson and Jack London

Into The World Office the other day, there walked a brisk-looking little man, wearing gold-rimmed spectacles and an air of prosperity, which, coupled with a ruddy glow of health made him a very pleasant little fellow to have around.

rible example," and yet that is just what he is-of the wanderlust. When A No. 1., arrived in Toronto, over the Grand Trunk, he had just completed his 505. 765th mile of railroad travelng. And he has never paid .a cent in money for his transportation. All his journeying has been done on brakebeam and rod.

A No. 1 can speak French, Gen and Italian besides English and has scorned many flattering offers from lecture bureaus because he can not endure any sort of management. He usually stays at a good hotel when in any city but puts fictitious names

upon the hotel register. But he can-not be induced to remain longer than twenty-four hours in any one city. At Cambridge Springs, Pa., there is already erected over a lot he has bought in the cemetery, a grave-stone bearing this inscription.

"At Rest At Last."

A No. 1's Profession.

The most famous tramp has taken up a profession. This man, who has ived for 30 years under no other name than "A No. 1," and who has never stolen a nickel or anything other than raliroad fare, and who has seen every foot of territory in America, has taken up a profession. It is the oldest pro-fession imaginable. No other person in history ever gave his life to the same work. "A No. 1" is saving boys from themseives. He is dissuading them from "going on the road" and is sending them back to heal up broken motherly hearts. He doesn't want the public to know about himself, but he is anxious to have people know of the great work which he is now doing. For years he has sent boys home, and

A No. 1. World Famous Tramp. is doing for both railroads and tramp-

for years railroad corporations and great men have recognized him in a They let him go his way.

way in which no other man has ever been recognized min in a way in which no other man has ever He once had another "profession"— this man who reigns as king of tramp-dom—and even now he can always make enough money to keep body and soul together by reverting to it. He formerly sat on street corners and carved comiceal faces out of say and the mest way is the say in the second floor office. This king of tramps who sat the factor in his life. He is delight-dom and even now he can always make enough money to keep body and soul together by reverting to it. He formerly sat on street corners and carved comiceal faces out of say on the mest of say ing boys from themselves. "He mest a youth

ROAD CODE OF TRAMPS.

think they would sell well in the east, which region he characterizes as "classical," because the classical east

does not like the looks of anything cheap. Wayward boys, do, however, and wayward boys are the class to which "A No. 1" tries to appeal: A Hobo Author.

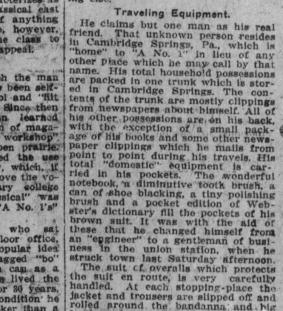

A Hobe Author. The only equipment which the man has had for authorship, has been self-acquired since he left school and "fiit the grit" at the age of 11. Since then he has acquired a certain learned vocabulary thru the medium of maga-zines read in his "author's workshop" --the empty box car or open prairie. He thinks he has mastered the use of 43,000 words in this way, which. If true, is about 3000 words above the vo-cabulary of the ordinary college graduate. The word "classical" was added to the collection on 'A No. 1's" present trip to Canada... This king of tramps who sat

when the end of the term arrives. Kids have been known to be taken away from their homes by intimidating methods, even after they have been rescued from the road. This strange attachment between the yegg and the boy, which is sometimes mutual, is one of the great problems which "A No. 1" confronts. His own experience as a "good kid" for a yegg has taught him the intricacies of the system, and he is as well fitted for combating it as any living person.

any living person. "A No. 1" started out as a "kid tramp." He was 11, and as he drifted away from his California home and French parents for the first time, a yegg approached him with "Ho, ho. Which way?" He at once fell into the snare of the man, and within a week was the thief's accomplice and unfailing meal ticket. He was so good an aid that his master called him "A No. 1 kid." He learned all the wiles of the professional thief. Then, as he grew older, he broke away from the yegg, who then picked up another kid. With the coming of his whiskers he could no longer travel under the name of "A No. 1 Kid." and the "Kid" was dropped. Since then he has carved dropped. Since then he has carved his "monicker" on almost every water tank and railroad outhouse in the United States. He has never been known by any other name and never expects to be. Whatever his civilized name was before he was 11, nobody knows. When inquisitive persons in-quire, he merely says "Sh-h-h," and that is all. He is "A No. 1" and noth-

ing else

Traveling Equipment.

handled. At each stopping-place the jacket and tronsers are slipped off and rolled around the bandanna; and hig leather gloves. The roll, like every-thing else about A No. 1 is unique. No other person ever rolled up a sult of overalls like this. After an intri-cate system of folding and rolling, ex-active 18 inches of the bottom end of one trauser leg is left protruding from the end of the roll. Then the leg is drawn back over the bundle so as to envelope it like the skin of a stick of bologna, and the package is made. It is in the smallest possible shape and will not fly to pieces with rough handling and makes a neat ap-pearance when being carried down street. street. Probably the most important thing, in the man's pockets is a stick of black graphite with which he inscribes most of the monickers which adorn the bridges and railroad property of the United States. In the west es-pecially is "A No. 1" noticeable. It may be carved, it may be painted, if paint is handy, but usually it is made with the stick of black graphite. In the man's 30 years of wandering, the "A No. 1" has appeared at every stop he has made, and for so many years have they been noticeable that imen of mature years can remember see-ing item in their youthful days. "A No. 1" has been in this city, but last week's visit was the first since 1907. street.

WINDSOR TABLE SALT

About Toronto Last week I had something to say about spitting on the sidewalks of the cliv. A great many people have said that what i wrote was timely. If has heen suggested to me that I say some-thing about grouping on corners. It is worth while. In Toronto we get splendid service in the middle of the street, but what about the sidewalks? In. nearly all well-managed cities people are not allowed to congregate on street corners thus blocking the traffic of pedestrians. They do so at traffic of pedestrians. They do so at will here and the objectionable feawill here and the objectionable fea- believe in our Saviour we must make ture of this is that most of those who them believe in us first. If the Christ-do assemble in this way are the kind ian life does not look good to them as men that I don't like to have even reflected in us, then we are in a large ok at a decent girl. Particularly is measure responsible for their defec-

this the case where there is a saloon in the vicinity. It would help a great deal if the spitting ordinance was en-forced and some means taken to pre-tent people from assembling in the ting away from their democracy and area way from their democracy and area of where the social methods of older The Feeble-Minded. I have said, over and over again, at evils evils only over again, in the churcher democracy and apeing the social methods of older countries. We are up against the same danger in Canada, particularly in the churcher democracy and apeing the social methods of older countries. We are up against the same danger in Canada, particularly manner of which I have spoken.

in the churches. Canada's success is being builded upon its democracy, not that evils exist only as long as the great public conscience allows them great public conscience allows them the state apolic the country is get from its aristocracy. If the church is to all over the country I see that the take its true place in this great country it will have to be democratic too. There's going to be a tremendous welfare. And there is much agitation concerning the feeble-minded. It is one of the good signs of the time, but it will not acail unless that would help this along very necessity of the consideration of child it will not avail unless you get busy and interest yourself in the matter too. It doesn't affect the question that you have no feeble-mindedness in your If you have children people of the type who made the reyou marks I have quoted. Just so surely as a church forgets ought to be thinking of the kind of

HOMESITE THAT IS DIFFERENT

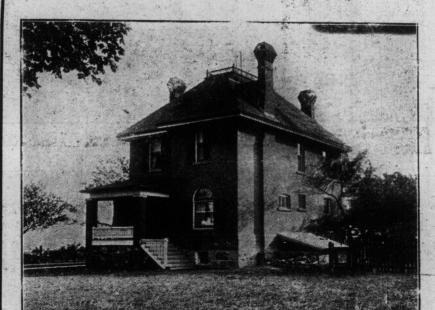

Kingsdale is located on Yonge St., the main artery of Toronto, just north of the new city limits which go into effect on Dec. 15. It lies, so to speak, at the back door of Toronto on the fringe of the city and will benefit materially by its advantageous location and the one great fact that while the city officials are solving the problems of the necessary improvements for the newly annexed territory, Kingsdale residents will be served almost immediately with all improvements, including sewer system, water, sidewalks, macadam roadways, shade trees, etc.

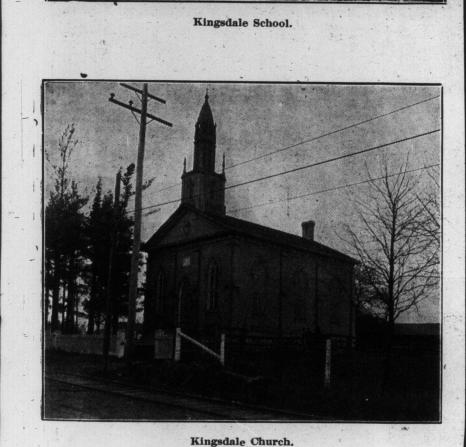

KINGSDALE HAS THESE IMPROVEMENTS.

It will take time to give North Toronto all these conveniences, but thanks to the foresight of the owners, Wrights Limited, the model city builders, Kingsdale will have these conveniences under construction on all its Boulevards, Avenues and Streets by the early Spring. So far as we know, Kingsdale is the only community in or around Toronto that has been furnished by the original owners with these conveniences before offering their lands for sale to homeseekers.

THESE MEN HAD THE BIG IDEA.

Messrs. C. F. Wright, Jas. Barr, J. G. Wright, W. B. Chamberlain and R. C. Nelles are the men

who first conceived the idea of securing a tract of land within easy access of the city, furnishing all the city improvements at their own expense without any cost to the homeseeker before offering the lots for sale. They secured the services of one of Toronto's leading engineers and these improvements have now been arranged for. The Wrights Limited have solved the secret of subdivision success and Kingsdale with its artistic beauty, high elevation, and natural topography of the land rivals all adjacent properties.

HOUSES BEING ERECTED IN KINGSDALE.

The building activity has already commenced in Kingsdale. Plans are being prepared for homes of architectural beauty on the better streets and for the more modern priced house on the less expensive property. All are contiguous to Yonge St. and within thirty-five minutes of the City Hall. Kingsdale is the ideal spot for the man who must work in the city, but prefers the quiet, invigorating advantages of the suburban home free from noise, bustle, smoke and dirt.

FIRST COST IS ONLY COST.

These improvements are being installed at the expense of the company, the purchaser of a lot will have no local improvement taxes to pay, no special assessments will be levied and when he buys a lot at \$16 per foot or so, he can figure that the local improvement taxation alone on the same lot in North Toronto would pretty nearly equal the price he pays for a Kingsdale lot.

KINGSDALE LOTS ARE GOOD BUY.

There is no safer or more profitable investment today than Toronto real estate. In a few years we will have exceeded our widest expectations. Downtown real estate will increase with enormous rapidity. The future of Toronto is undoubted. It is to be one of the greatest cities of America. Kingsdale will increase in value many thousands of dollars. The present prices surely cannot prevail much longer.

THE WORLD AND NORTH TORONTO.

The Toronto World has always maintained that North Toronto would make millionaires of those who had the money and the faith to invest and hold on. We cannot all be millionaires, but we have all a right to a share of the good things that are around us. Kingsdale is good buying today. Wrights Limited have their office at 22 College St., North 6383 and they will be pleased to accompany all interested parties to their model suburb for an inspection.

Mr. Wm. Stong's Residence (Adjoining Kingsdale).

Satisfaction guaranteed or money refunded Price one dollar. On sale at Bond Bros.' Drug. Store, 453 Yonge Street, or nent postpaid. Address Tremain Supply Co Dept w. Toronto, Ont.

TORY. _____ Artificial Rubber From Sea Fish. According to the British consul at Amsterdam, a factory is being built at the fishing harbor of Ymuiden for the manufacture of artificial rubber from sea fish. The process was invented by an Amsterdam physician, and he claims an Amsterdam physician, and he claims that the product has the same quali-ties as real rubber and is not affected by benzine of heat. Estimates show that the fish rubber can be produced at a cost representing only about one-sixth of that required for the manu-facture of real rubber, due in part to the manufacture of a valuable by-pro-
