## U.N.B. ENCOENIA A BRILLIANT AFFAIR

### Many Prominent Men Attend

### Two Professors Resign and a Third May Do Likewise

### Senate to Meet Soon to Discuss Increase in Salaries—Stirring Addresses Delivered by Dr. White, Prof. Cartmel and Others.

Special to The Telegraph.

Fredericton, N. B., June 1.—The University of New Brunswick closed its 111th year this afternoon when a class of twenty-two members was graduated. Four M. A. degrees were conferred and one honor LL. D. degree. The graduating class was composed of twelve young ladies and ten gentlemen. Seventeen graduated in arts, two in forestry, two in electrical engineering, and eight in civil engineering. The rain fell in torrents this morning and threatened during the afternoon, and on that account the attendance of spectators at the encoenia exercises was smaller than usual. Lieutenant Governor Tweedie took the chair at 2.30 in the college library and the regular program was followed. Rev. Dr. W. H. Smith, alumni orator, on account of illness, was unable to be present, and his scholarly address was read by Rev. J. H. McDonald, pastor of Brunswick Street Baptist church.

Chancellor Jones opened the proceedings with a few words and called upon Prof. Cartmel, who delivered the address in praise of the founders. He referred to the great motto which had attended the establishment of the university, and urged the founding of a chair of agriculture, and 810 to the student in the junior class making the highest average to George Churchill, Burleigh.

Dr. Allison, who was present, spoke briefly.

### Students Concert.

The closing concert given by students of the Conservatory of Music and Oratory department was held this morning in Fawcett hall. A very interesting program was rendered and it was enjoyed by a large gathering. The programme was as follows:

Nita Fawcett—Piano Solo, Toccatella, (Dapont).

Violin—Lennie Lusty; Cello, Myrtle King; Piano—Hamilton—Trio, Andantino Allegro, (Judasohn).

Rita Chisholm—Song, Vol Lo Sapete, (Massagni).

Mildred Corning—Oratory, Sombre, (Anon).

Piano, Rigoletto, Quartette, (Verdi).

Helen Hughes—Song, Counsel to Nina, (Weber).

Mabel Leaman—Violin, Concerto No. 9 (De Bériot).

Ruth Hart—Oratory, A Day Off, (Alice Brown).

Elva Nicholson—Organ, Fanfare, (Batie).

University Septette—Septette, In the Forest, (Gillet).

Reta Brennan—Song, Rose Softly Blooming, (Spohr).

Marrion Reid—Piano, Moonlight on Lake Geneva, (Bendel).

Flora Curtis—Oratory, The Lady of Shalott, (Tennyson).

Flora Curtis—Orchestra, Praeludium, (Mendelssohn).

### Banquet to Students.

In the university dining room tonight at 10 o'clock the annual banquet to the graduating class was given by the undergraduate students and proved to be a most pleasing function. After the meal had been discussed the following toast list was carried out:

The King, proposed by F. M. Smith, Salve Rex; Graduating Class, proposed by Arthur Dwyer, response, W. A. Pickin; Ladies, proposed by George W. Beck, response, C. G. McDougall; Alumni, W. R. Ruggles, response, Judge McCowan; A. J. Gould, response, Ernest Baines; Our Societies, O. R. Atkinson, response, Fletcher; Our Next Merry Meeting, proposed by Fraser Bond, response, R. P. Hartley.

### Professors Resign.

At a meeting of the senate of the university this morning, the resignations were accepted of Prof. Geoghegan from the chair of French and German, and of Prof. Cartmel from the chair of physics and electrical engineering.

The position of professor of French and German was filled by the appointment of Prof. J. Uphill, who was the acting professor while Prof. Geoghegan was in leave of absence last year. Prof. Uphill graduated from Colby College, Maine, with the B. A. degree and afterwards took his M. A. degree at Harvard University. He also spent several years studying in France and Germany.

Another meeting of the senate of the university will be held in this city on Sunday afternoon for the purpose of taking up the matter of increasing the salaries of members of the faculty.

It is persistently rumored that Dr. White, dean of the engineering school, will resign in connection with the university before the commencement of the next academic year. When asked to confirm or deny the report this morning, Dr. Jones said he did not know. Dr. Stone had no communication with the university.

Dr. White, chief superintendent of education, resigned at this morning's meeting, and the others present were: Chancellor Jones, Senator Ellis, Dr. Thomas Walker, and Dr. W. H. White, Dr. Murray MacLennan, Dr. S. Myles, of St. John; Collector of Customs, Part, of Newcastle; Judge J. D. Phinney and Registrar Harvey.

## TAFT SANGUINE OF RECIPROCITY PASSING

### More Than Twenty of a Majority in Senate Favor Bill

### President Believes He Can Beat Standpatters' Scheme of Amending Pact in Order to Defeat Agreement—In Daily Consultation With Members Favorable to Its Enactment.

Canadian Press.

Washington, June 1.—The crisis in the senate fight on Canadian reciprocity is expected when the farmers free list bill is offered as an amendment to the bill carrying the reciprocity pact. That such an amendment will be offered to embarrass the Democratic supporters of reciprocity seems certain. Toward this contingency President Taft is devoting his attention. He is holding daily conferences in an effort to keep Republican and Democratic senators alike in line for the pact.

President Taft is certain the reciprocity bill will pass the senate by a comfortable majority if it can be brought to final vote without amendment. He feels that the test of the true friends of reciprocity will come in dealing with the proposed amendments. Mr. Taft recently has had assurances that the bill will be reported out of the finance committee without amendment, and without recommendation. This is what he greatly desires.

### Amendments Would Defeat Bill.

The president feels that any amendment in the senate will defeat the bill, and he believes that to be the purpose of some senators who have proposed amendments.

The proposed Root, Lodge and Nelson amendments have brought the senate into sharp conflict with these senators but he has not hesitated to express his views regarding them.

Fully cognizant of the fact that he must depend upon the almost solid vote of the Democrats in the senate to carry the reciprocity bill through, President Taft has been endeavoring to devise a means to help them out of the dilemma that will be presented when they are asked to vote for or against the bill.

With the White House holds an inconsiderable and lapsing, would violate the pact and require the consent of parliament before its adoption would be consistent with the enforcement of the agreement.

The Nelson amendment would simply cut down duties on agricultural products and put the paper provision again in conditional form. The house, it is said, would not accept the Root amendment of any other amendment carried through from a technical standpoint.

The Nelson amendment would simply cut down duties on agricultural products and put the paper provision again in conditional form. The house, it is said, would not accept the Root amendment of any other amendment carried through from a technical standpoint.

## EXPECT 50 PER CENT. GAIN IN POPULATION

### NOVA SCOTIA TELEPHONE CO. WILL SELL OUT

### Shareholders Accept Offer of Maritime Telegraph & Telephone Co. by Large Majority

Halifax, June 1.—The shareholders of the Nova Scotia Telephone Company, at a meeting today, decided to sell out their property and franchises to the Maritime Telegraph & Telephone Company, which received a charter from the Nova Scotia legislature two years ago. The vote was 66,924 in favor of the sale to \$4,688,000.

The terms accepted by the Nova Scotia Telephone shareholders were 135 per cent on the par value of the stock, or alternatively \$100 Maritime Telegraph & Telephone Company bonds at six per cent, and \$35 cash for each block of \$100 par value, or secondly, \$100 bond, \$30 in preferred stock and \$30 in common.

Hom. B. F. Pearson announced that a market had been found in England for the bonds not taken up by "Scotia" shareholders in exchanging their securities.

The total population will not be definitely known until October, though an approximate figure may be given out a month or so earlier. Returns will begin to come in from cities in about a fortnight's time but the enumerators have three weeks time allowed to complete their work and the commissioners are allowed another month in which to forward returns to Ottawa.

### WON SECOND MONEY IN AERIAL RACE, PARIS TO ROME

Garros Arrived Today, After Beaumont, But Got a Great Reception.

Rome, June 1.—Roland Garros, the French aviator, was the second contestant in the great 1,200 mile Paris-Rome-Turin aviation race to reach the Italian capital. He arrived here at 5.10 o'clock this afternoon from Pisa, which city he left at half past ten o'clock this morning. His reception here was even more enthusiastic than the greeting accorded to André Beaumont, whose arrival here yesterday won for him one of the \$20,000 prizes.

The crowd today was of enormous proportions. It is estimated that at least half a million persons witnessed the graceful descent of Garros. Vigorous cries of "Bravo Garros," and "Honneur au France" filled the air as the Frenchman circled the aerodrome and then landed.

Asked if the Carnegie Steel Company might make statements not in accord with the testimony given by John W. Gates as to the highly prosperous condition of the business, Coal & Iron Company at the time of the "forced sale" to the steel corporation.

Mr. Gary told the committee that the steel corporation will own the steel corporation \$10,167,700 for money advanced.

"There is not any doubt," Mr. Gary told the committee, "that the United States Steel Corporation, as the owner of most of the stocks of the subsidiary companies, ultimately controls those subsidiary companies, including their management and conduct."

White, Arthur G., St. Martins.  
Turner, Herbert, Yarmouth.

Principal Palmer in his report referred to the fact that this had been the 17th year in which he had been head of the academy. He expressed regret that Dr. Stewart, who had been head of the academy, had been removed by death. One hundred and ninety-nine students had attended the classes in the academy the last year, twenty in excess of the previous year, which was the largest in the history of the institution. One hundred and fifty had pursued full work; eighty had boarded in the academy, an increase of nine over last year.

Mr. Palmer referred to the inadequacy of the academy residence and class rooms and to the need of more money if the work of the school was to be efficiently carried on.

The alumni class scholarship was won by George Whittney, of Pembroke, Bermuda; the alumni mathematical scholarship by Reginald Giles, of Bridgetown (N. B.); \$20 offered by Frank Curran, of Richibucto, had been divided into two prizes, \$15 to the student of the senior class and \$5 to the student of the junior class making the highest average to George Churchill, Burleigh.

Dr. Allison, who was present, spoke briefly.

### Students Concert.

The closing concert given by students of the Conservatory of Music and Oratory department was held this morning in Fawcett hall. A very interesting program was rendered and it was enjoyed by a large gathering. The programme was as follows:

### CASTORIA

For Infants and Children.  
The Kind You Have Always Bought  
Bears the Signature of *Dr. J. C. Watson*

### LIGHTNING PLAYS

### PRANKS IN SACKVILLE

Sackville, N. B., May 29.—(Special)—A very severe electrical storm passed over here tonight about 7 o'clock. Lightning played numerous pranks around town, the floor in R. C. Lawson's carriage factory being torn up, a window broken in Rodd's drug store, and other small depredations done.

### BOSTON COUPLE WEDDED IN ST. JOHN

### NOW SEPARATED

Mrs. L. R. Crandon, wife of prominent physician, now in Reno after a divorce.

Boston, June 1.—(Special)—The filing of the complaint of "A. L. Crandon vs. L. R. Crandon," was disclosed the fact that Mrs. L. R. Crandon, wife of the prominent physician, Dr. L. R. Crandon, of 366 Commonwealth avenue, has been living in Reno since October to establish a legal residence to obtain a divorce.

Mrs. Crandon married the physician in St. John after a romantic courtship, and with the birth of a daughter, which seemed to unite the couple even more strongly, it was thought the marriage was ideal. Now it is learned the final separation occurred in June, 1909.

### MANY SPRINGHILL STRIKERS AT WORK

### FIVE CANADA LIFE DIRECTORS RESIGN

### Places Found for 150, and Others Will Be Taken Back as Fast as Possible.

Springhill, June 1.—Optimism and hope prevail in this town. The coal company has found places for 150 of its old men and the others will be put to work as soon as places can be found for them.

The provincial constables will be gradually withdrawn, five will be cut off the force this week, and the week following ten more will be withdrawn.

The U. M. W. officials paid an indemnity on Tuesday this week and tomorrow will pay another, but it is not known what course will be pursued in the future, although the general opinion is that they will continue relief to the men struck in idle places can be found for them.

Z. A. Leah, K. C. Sir Edmund Walker, H. B. Walker, Montreal, Hon. Wm. Gibson, Beausville, and Mr. Charles Chaput have resigned, and the following gentlemen have been elected: Hon. J. M. Gibson, lieutenant-governor of Ontario; Hon. Senator Louis-Edouard, of Quebec; Duncan Coulson, president of the Bank of Toronto and Robert Beckerdie, M. P. of Montreal, vice-president of the Banque D'Hochelega.

The resignation of the directors mentioned followed the adoption by the board of the policy recommended by the president, Hon. George A. Cox, and the vice-president, J. H. Plummer, under which the joint general management has been discontinued and E. W. Cox has been appointed general manager.

### STRONG EVIDENCE AGAINST CAMORRISTS

Viterbo, June 1.—Quaco, a Neapolitan barber, was the star witness at today's sitting of the Camorra trial and his testimony caused such an uproar in the court room that the proceedings were adjourned.

The witness described the habits of Camorra Camorra, who was named the prosecution alleged, by members of the Camorra society. Quaco said that he saw among the rings worn by Quaco the one requested by the Carabinieri following the arrest of the Camorrist. The ring bore the monogram "C. G. C." and was found, along with the witness, in the mattress of a bed at the home of a woman known as the friend of Giuseppe Salvi. The theory of the police was that this ring was to be sent to Luigi Arena as proof of Quaco's death.

### McGILL MINING STUDENTS TO VISIT CAPE BRETON

Montreal, June 1.—Twelve students of the mining section of the Polytechnic school left yesterday, with Professor Duley, for Nova Scotia, where they will inspect the coal and iron mines. At the Dominion Steel plant they will be the guests of Mr. J. Butler, general manager. They will be back in Montreal in a week's time.

### DEMOCRATS FAVOR HALVING WOOL DUTIES

Washington, June 1.—The Democratic wool tariff bill prepared by the ways and means committee of the house, was presented to the Democratic caucus at noon today. The bill makes reductions of from one-half to two-thirds in all wool duties. Raw wool itself, which was free in previous Democratic tariff bills, is given a duty of twenty per cent, and valorem, equivalent to from three to five cents a pound.

### BRITISH TORY MEMBER UNSEATED FOR LAVISH TREATING

London, June 1.—Sir Henry Seymour King, who in the last general election was returned to the Conservative party, was unseated today by the court hearing the petition against his election. The judges found Sir Henry guilty of lavishly treating his constituents at Terra Hall.

### CONGRESS STILL AFTER TRUST MALEFACTORS

Washington, June 1.—Prosecution of the officers of the Standard Oil Company, the American Tobacco and their constituent companies is proposed in a concurrent resolution introduced today by Senator Deussen, of Ohio. The resolution would instruct the attorney general to proceed against the officials at once under the recent decisions of the supreme court.

### Good Job for Newspaper Man

New York, June 1.—Joseph Johnson, jr., deputy fire commissioner and former journalist, was appointed by Mayor Gaynor today fire commissioner to succeed Rhinelander Waldo recently appointed police commissioner.

INTERESTING AGRICULTURAL FEATURES FOR COUNTRY READERS

GENERAL

CULTURE OF FIELD ROOTS

Detailed Instructions for Growing Mangels and Forage Sugar Beets.

Success and profitability in the culture of the most important crops for raising for successful live stock feeding and breeding operations on the farm. There are various ways of adding these qualities to a nation, but probably none more effective and acceptable to almost all classes of farm animals than the inclusion of a proportion of roots to soil and climate of the various kinds of roots grown, as possible production in Canada, mangels, sugar mangels and forage sugar beets, for several reasons. First, these roots are highly recommended. They are a valuable source of food and are highly recommended. They are a valuable source of food and are highly recommended.

method is the more thorough and more certain to be effective in very heavy soils. Getting heavy to sow. Where the manure is applied to the surface, great care must be taken to work it in and thoroughly incorporate it in fine particles with the soil, which should be done by harrowing or by using a harrow or other cultivation implements as stopped. If the soil is very light or very dry, it should be rolled immediately after harrowing. It is intended to sow on ridges the field should be rolled up in uniform ribs 28 to 36 inches apart and 8 to 10 inches high, as soon as the soil is sufficiently moist. Having taken care to first remove any sods, stones or lumps from the tops of the ridges, the field should be rolled lengthwise of the ribs. The soil is very light and loose, it will be found advantageous to roll more than once, say once or twice before sowing, and once after sowing. On light soils or in dry weather, it is often advisable to sow on the flat, in which case the only preparation necessary after the land is sufficiently cultivated and the manure thoroughly incorporated, is to roll with a moderately heavy roller.

EARLY PREPARATION OF FIELD.

Roots do best on well rotted sod. A clover sod, ploughed at a time to turn some after-math under, will probably provide the best conditions. If it is not possible to get a second crop of clover hay, the ploughing might be done in early August with a shallow furrow, in a moist climate, three or four inches deep, but in dry areas from four to six inches deep. The land should then be worked at intervals till late September or early October when the soil is again slightly deeper, or else tilled up with a double mould board plough and left till the next spring. In Manitoba, Saskatchewan and Alberta, however, it will be found advisable to plough slightly deeper than the first time and pack. Where the land is to be sown in autumn, the manure might be applied before the ploughing the first time, before ribbing up, or after ribbing up, in fact any time before preparation for sowing was necessary in the next spring. If it is intended to plough instead of rib in the late fall, then manure should be applied before summer ploughing, or else not till after late fall ploughing, after which operation it might be applied at any time till spring.

In the case of pasture land or old meadow, it is imperative that summer ploughing and working be done, if returns at all good are hoped for. Much more work is done on the flat, a greater proportion of the seed sown likely to germinate, especially in the true dry seasons. If the soil is dry, it will, as indicated above, be found good practice to roll immediately after sowing. This is true whether sowing be done on ridges or on the flat. Generally speaking, better results will be obtained if the seed is sown in the furrow, and the drier the weather the more seed is required. When the seeding is done on the flat, a greater proportion of the seed sown likely to germinate, especially in the true dry seasons. If the soil is dry, it will, as indicated above, be found good practice to roll immediately after sowing. This is true whether sowing be done on ridges or on the flat.

Compact the Seed Bed.—Most thorough cultivation and compacting of the seed bed is an absolute necessity. Any opening due to lack of cultivation or other cause is sure to prove injurious. Subsoiling.—Roots require a somewhat deeper soil than most other farm crops. To provide suitable conditions it is, therefore, often advisable to subsoil. This may be done in two ways: first, by following in the furrow immediately behind the regular plough with a subsoil plough, or after a plough from which the mould board and inside braces have been removed; second, by attaching a simple subsoiling hook or grubber to the plough or to the subsoil plough. The latter plan has proven entirely satisfactory, but the first described

where the other method resulted in a very poor start. Early Cultivation.—The hand wheel hoe is an almost indispensable implement when roots are grown at all extensively and it will break the crust, kill weeds and stimulate the growth of the young roots. It should be used through whenever the roots are fit to be thinned and cultivated with the hand hoe. Thinning the Roots.—Thinning is probably the most unpleasant and expensive operation in connection with growing roots. It is, however, susceptible of being made more expeditious and laborious than at all necessary, if no effort be made to render it less so. In the first place, a suitable hoe should be used. A hand better be light handed and should have a thin, shallow and narrow blade, three or four inches deep, four or five inches wide and sharp on three edges. To get the best results, the operator must know how to go about his work. The hoe should be used in such a way that six inches to one foot or possibly fifteen inches apart. This calls for some judgment on the part of the man who uses it. The strongest growing and most vigorous and healthy looking plant should be left wherever possible. If a miss or blank occurs on the part of the man who thins, it is better to leave two roots close together at either end and make as much use of the space as possible. Transplanting is sometimes practised, but is not always successful. With a little practice, the man who is willing to pay attention to his work will seldom find it necessary to do any hand work, unless the field is very dirty. A clean, firm crop stroke between small clumps where a root is to be left, then a careful, rapid manœuvring of the hoe to clear away the weeds and the other small mangels or beets surrounding, or adjacent to, the favored one, will be found a practicable and after a little experience, even a rapid and easy operation. The man should stand sideways between the rows, facing the part of the man who thins. When so placed, he can work to better advantage, pushing and pulling from the favored root with the sharpened ends of the hoe and cutting between with the usual edge.

SEEDING.

The seeding should be done as soon as the soil is in nice shape in the spring. The date will depend on the soil, and it is seldom possible to get them in too early. Any time from April 30 in Western Ontario to May 15 in the north, or from May 15 to June 15 in the south, may be taken as suitable dates in parts of Canada lying between the plough and the subsoil. The seed should be sown in the furrow, 2 to 2 inches deep and well covered, as soon as the weather is warm enough to insure germination. Under test, seeds of mangels, sugar beets and sugar mangels often germinate as high as 100 per cent. Nevertheless, a heavy sowing is necessary in order to insure a crop when sown, not on account of being infertile, but because of lack of moisture or other unfavorable conditions. On light soils, it is advisable to sow from 6 to 12 pounds per acre, according to soil and weather conditions. The rougher or coarser the land, the more seed should be sown, and the drier the weather the more seed is required. When the seeding is done on the flat, a greater proportion of the seed sown likely to germinate, especially in the true dry seasons. If the soil is dry, it will, as indicated above, be found good practice to roll immediately after sowing. This is true whether sowing be done on ridges or on the flat.

SEEDING.

The seeding should be done as soon as the soil is in nice shape in the spring. The date will depend on the soil, and it is seldom possible to get them in too early. Any time from April 30 in Western Ontario to May 15 in the north, or from May 15 to June 15 in the south, may be taken as suitable dates in parts of Canada lying between the plough and the subsoil. The seed should be sown in the furrow, 2 to 2 inches deep and well covered, as soon as the weather is warm enough to insure germination. Under test, seeds of mangels, sugar beets and sugar mangels often germinate as high as 100 per cent. Nevertheless, a heavy sowing is necessary in order to insure a crop when sown, not on account of being infertile, but because of lack of moisture or other unfavorable conditions. On light soils, it is advisable to sow from 6 to 12 pounds per acre, according to soil and weather conditions. The rougher or coarser the land, the more seed should be sown, and the drier the weather the more seed is required. When the seeding is done on the flat, a greater proportion of the seed sown likely to germinate, especially in the true dry seasons. If the soil is dry, it will, as indicated above, be found good practice to roll immediately after sowing. This is true whether sowing be done on ridges or on the flat.

Generally speaking, better results will be obtained if the seed is sown in the furrow, and the drier the weather the more seed is required. When the seeding is done on the flat, a greater proportion of the seed sown likely to germinate, especially in the true dry seasons. If the soil is dry, it will, as indicated above, be found good practice to roll immediately after sowing. This is true whether sowing be done on ridges or on the flat.

Compact the Seed Bed.—Most thorough cultivation and compacting of the seed bed is an absolute necessity. Any opening due to lack of cultivation or other cause is sure to prove injurious. Subsoiling.—Roots require a somewhat deeper soil than most other farm crops. To provide suitable conditions it is, therefore, often advisable to subsoil. This may be done in two ways: first, by following in the furrow immediately behind the regular plough with a subsoil plough, or after a plough from which the mould board and inside braces have been removed; second, by attaching a simple subsoiling hook or grubber to the plough or to the subsoil plough. The latter plan has proven entirely satisfactory, but the first described

where the other method resulted in a very poor start. Early Cultivation.—The hand wheel hoe is an almost indispensable implement when roots are grown at all extensively and it will break the crust, kill weeds and stimulate the growth of the young roots. It should be used through whenever the roots are fit to be thinned and cultivated with the hand hoe. Thinning the Roots.—Thinning is probably the most unpleasant and expensive operation in connection with growing roots. It is, however, susceptible of being made more expeditious and laborious than at all necessary, if no effort be made to render it less so. In the first place, a suitable hoe should be used. A hand better be light handed and should have a thin, shallow and narrow blade, three or four inches deep, four or five inches wide and sharp on three edges. To get the best results, the operator must know how to go about his work. The hoe should be used in such a way that six inches to one foot or possibly fifteen inches apart. This calls for some judgment on the part of the man who uses it. The strongest growing and most vigorous and healthy looking plant should be left wherever possible. If a miss or blank occurs on the part of the man who thins, it is better to leave two roots close together at either end and make as much use of the space as possible. Transplanting is sometimes practised, but is not always successful. With a little practice, the man who is willing to pay attention to his work will seldom find it necessary to do any hand work, unless the field is very dirty. A clean, firm crop stroke between small clumps where a root is to be left, then a careful, rapid manœuvring of the hoe to clear away the weeds and the other small mangels or beets surrounding, or adjacent to, the favored one, will be found a practicable and after a little experience, even a rapid and easy operation. The man should stand sideways between the rows, facing the part of the man who thins. When so placed, he can work to better advantage, pushing and pulling from the favored root with the sharpened ends of the hoe and cutting between with the usual edge.

SEEDING.

The seeding should be done as soon as the soil is in nice shape in the spring. The date will depend on the soil, and it is seldom possible to get them in too early. Any time from April 30 in Western Ontario to May 15 in the north, or from May 15 to June 15 in the south, may be taken as suitable dates in parts of Canada lying between the plough and the subsoil. Verdict for Defendant in Case of Bank of New Brunswick vs. Scovill & Son—Probate.

County Court. Wednesday, May 31. In the County Court yesterday afternoon the jury returned a verdict in favor of the defendant in the case of the Bank of New Brunswick vs. Scovill & Son. C. F. Sanford and M. G. Teed, K. C., acted for the plaintiffs, and D. Mullin, K. C., for the defendant. This was an action brought by the bank to enforce payment of a note for \$827 against Scovill & Son. The verdict was as follows: "In the opinion of this jury the firm of Merritt Bros. Ltd., exceeded their authority in changing a signed bill of lading with a promissory note and that the alterations were so apparent that the plaintiff should have insisted on said alterations being initialed or approved by J. B. Scovill & Son. Therefore we bring in a verdict for the defendant, J. B. Scovill & Son."

Probate Court.

Wednesday, May 31. In the probate court yesterday the will of Charles J. Ward, tavern keeper, was proved. He was all his estate to his wife, Mrs. Ward, absolutely. The testator died on March 17 last; his widow on the 28th day of the same month, without having proved his husband's will. The will was proved by the executor, Andrew McIntosh of the Parish of Simonds, florist, executor and trustee, and directed him to divide the real property one-half to be given to her adopted daughter, Katie White Ward, the other half to be equally divided among her sisters and half brother and half sister. Practically all of the estate of which Mrs. Ward was seized was what she got from her husband, Charles J. Ward, who left no relatives so far as known except a niece, whose residence is unknown here. According to the will, the executor and trustee of the will is Andrew McIntosh, 211 Britannia street is valued at \$1,200, personal estate consisting of the leasehold in

FOREST FIRES DO

GREAT DAMAGE

NEAR SHELBURNE

Thirteen Buildings Burned in Two Villages in the Vicinity—Thousands of Acres Swept by Flames.

Shelburne, N. S., May 29.—(Special)—Forest fires have been doing great damage in the vicinity of Shelburne. One big fire at the north of the town burned thousands of dollars worth of timber land and several dwellings had a narrow escape. Another fire on the western side of the harbor was more destructive. It not only burned valuable timber but worked into the village of Gunning Cove and Burnside, over the former nine miles from town and the latter seven. The latest reports state that thirteen buildings have been destroyed, including the rectory occupied by Rev. S. C. Andrews, with all contents, the residences of Fred Sullivan, Frank Doane and the public school. Crowds of men from Shelburne and other places have lent valuable assistance in fighting the flames. A gasoline engine from Shelburne, which was at the scene, sunk on way home and John Ethington and Frank Robertson, of Shelburne, had a narrow escape from drowning.

MS CORMICK

A Simple Knotter

The McCormick knotter is a revelation of simplicity in construction, accuracy in tying, and ease of adjustment. Only two moving parts constitute the working mechanism. There is no straining or pulling of the twine because the twine holder feeds the twine in the direction the knotter hook turns. The cutter bar has guards in such a position that the machine can be tilted to cut close to the ground without pushing trash and stones ahead of the knife. It cuts smoothly and perfectly in all conditions of grain. The McCormick reel has a wide range of adjustment. It successfully meets the conditions encountered in any field, whether the grain is tall or short, standing, down, or tangled. Grain filled with green undergrowth is forced upon the platform. The McCormick floating elevator handles grain of any length or weight without clogging, even when the grain is filled with vines or green undergrowth. There are many other features and advantages of McCormick binders. The McCormick agent will tell you about them. He will tell you about the wonderful strength of each individual part and of the strength of the binder as a whole—the skilled workmanship backed by many years of experience that enters into the construction of every McCormick binder. Why not see him today? Ask him about McCormick having machines and tools. If you prefer write to the nearest branch house for catalogue and any special information you desire.

# McAvity's Messenger

### Galvanized Poultry Netting

Our Poultry Netting is the cleanest and finest Netting in the market. It is thoroughly galvanized after weaving which effectually solders the joints, making a strong and stiff fabric and absolutely prevents rusting. Size of mesh 2 inches, No. 19 wire.

Width, inches	19	24	30	36	48	60	72
Per roll of 150 lineal feet	95c.	\$1.65	\$1.90	\$2.30	\$3.00	\$3.70	\$4.35

We also have what is known as "Mixed" Poultry Netting. The lower part for 12 inches of its height is made with 1 inch mesh, and the remainder with the regular 2-inch mesh.

Width, inches	60
Per roll of 150 lineal feet	\$4.75

### Heavy Woven Wire Fencing

Made of heavy steel wire galvanized after being twisted. Size of mesh 4 inches, No. 14 wire.

This fencing meets the popular demand for fencing farms, etc., also largely used as garden trellis for peas, tomatoes, vines, etc., easily put up, more tidy than brush, and can be used again year after year.

Width, inches	36	48
Per roll of 50 yards	\$3.75	\$5.00

**NETTING AND FENCE-STAPLES—Galvanized Steel**

Size, inches	7-8	11-2
Per lb.	8c.	5c.

### Barb and Plain Wire Fencing

Our Barb Wire has four points, six inches apart, is well galvanized, and has strong and sharp points. The plain wire is also well galvanized and strong, made with four strands, plain twist. Both barbed and plain wire is put in catch-weight reels containing from 90 to 115 lbs., and sold by us only on full reels. We always send the reel nearest the weight asked for, and charge or deduct the difference.

Barbed Wire, runs about 16 feet to the pound ..... 23-4c. per lb.  
Plain Wire, runs about 12 feet to the pound ..... 3c. per lb.

### Townsend Wire Stretcher

With this instrument the person stretching the wire can nail it to the post from which he is stretching without assistance.

Always place the end of lever against post. After you get the wire stretched, do not waste your time by holding it. Nail your wire to the post, go on and make another stretch, etc. to the end.

Very strong, made with a 3-ft. hardwood lever. Each ..... 80c.

### Wire Fence Pliers

With Four Wire Cutters

The two cutters between the jaws are so designed that the wire after it is cut is held between the jaws. This feature adds to the utility of the tool, and the advantage of handling the wire with less trouble is evident. Polished head.

Size, inches	6	8	9	10	12
Each	30c.	25c.	30c.	35c.	60c.

### Combination Pliers

Ten tools in one, two staple pullers, two wire cutters, two hammers, one pair pliers, one monkey wrench, one wire splicer and one high-grade tool.

Each ..... 80c.

### "LOCK-LEVER" POST HOLE DIGGER

The "Lock-Lever" is an automatic, self-lock and locks the blade at right angles so that both hands are used in lifting the loosened earth. It works successfully in all kinds of soil, and makes a hole of any desired diameter. By the use of the compound lever operating blade ordinary stones that obstruct digging are readily loosened and removed.

Easy to operate, simple in construction and made of the best tempered steel.

Each ..... \$1.75

### Post Hole Scoops

Plain back solid cast steel blades.

Handles, feet	5	6
Each	.....	\$1.10

### McAvity WOOD PUMPS

Anti-Freezing With Porcelain Lined Cylinder

The most simple, economical and durable Wood Pump made. They are well-known and in general use all over the country, giving unusual satisfaction.

Prices of Pump and Pipe ready to put up for a well:

10 feet deep	.....	\$8.00
12 feet deep	.....	8.40
13 feet deep	.....	8.55
15 feet deep	.....	9.00
20 feet deep	.....	11.55
25 feet deep	.....	13.20

### ECLIPSE SEMI-ROTARY CLOCK PUMP

This is a powerful Lift and Force Pump, acts quickly and easily, gives absolute suction and delivery at each stroke; no lost motion. Handy, efficient, reliable and durable.

No.	.....	2	3
For Pipe, inches	.....	1	1 1/4
Double acting, painted red, each	.....	\$4.50	\$5.50
Quadruple acting, painted blue, each	.....	\$5.75	\$7.00

### Tinol

The New Paste Solder

Simplifies soldering and is a necessity in every home. With it anyone can do any soldering work that ordinary solder will do, and some kinds that ordinary solder won't do.

In using Tinol no acid, rosin or other flux is required. A thin coating of the paste is spread on the surface of the metal to be soldered and then heated with Tinol Torch or a hot poker or soldering iron or in the flame of a gas light. In some cases the flame of a match is sufficient.

Tinol Paste Solder, Per can	.....	35c.
Tinol Torches, Each	.....	60c.

### Lawn Mowers

Beautiful lawns are made and kept beautiful only by constant care and attention.

Buy a good lawn mower and it will be a pleasure for you to care for your lawn. The mowers we sell are built in a factory where they have specialized for years on mowers that cut clean and hold an edge. High class materials and workmanship being used in their construction, they therefore wear well, look well and work well.

### "DIAMOND SPECIAL" Ball Bearing Mower

This machine is unequalled for its even cutting and long wearing qualities, it is made of material of the highest quality and fitted with Patent Ball Bearing adjusting device. The Reel has five blades of best knife steel and is adjusted to Cutter Bar by special adjusting and Locking Device.

Size, inches	14	16	18	20	
Each	.....	\$8.50	8.75	9.25	9.50

### W. & B. "JUNIOR" MOWER

This is a fully guaranteed and easy running machine made on the same lines as the W. & B. Junior Ball Bearing Mower, except that instead of Ball Bearings it is fitted with self-aligning adjustable Reel Shaft Bearings.

Size, inches	14	16	18	20	
Each	.....	\$5.75	6.00	6.50	6.75

### W. & B. "JUNIOR" Ball Bearing Mower

This machine is made of high grade material throughout is strong and at the same time of light weight and draft. The Ball Bearing adjustment is the simplest and most effective made. The frame is strong and rigid and all working parts are incased to protect them from dust.

Size, inches	14	16	18	20	
Each	.....	\$6.50	6.75	7.00	7.50

### "NORKA" MOWER

This is a low-priced mower but not a cheap machine. It is warranted against defects in workmanship and material and stands at the head of its class as a medium priced machine.

Size, inches	12	14	16	
Each	.....	\$4.00	4.25	4.50

### SCREEN DOOR SETS

We can furnish you with a good set of hardware for screen doors, consisting of one pair spring hinges complete with screws, one stamp steel pull with screws, and one 2 1/2 inch hook and eye japanned finish.

Per set ..... 15c.

### BI-TREADLE GRINDSTONE

STRONG, DURABLE STEEL FRAME

No need to have a boy turn this Grindstone. It runs like a bicycle. You sit down on the seat and work the treadles with both feet. Your hands are free to attend to the grinding of tools of all kinds, making it a pleasure to do what has heretofore been considered the most tiresome of jobs. It also enables you to do much faster and better work, has self-watering attachment, seat adjustable in height and length, stone can be adjusted on frame.

It is shipped knock-down, stone and frame crated together, stones about 22 inches in diameter, 3 inch thick.

Each ..... \$5.00

We are also prepared to furnish loose or unmounted Grindstones, selected Bayde Chaleur Grit, prices upon application.

### ROOFING

After the winter's snows and rains more or less roofing repairs are needed. Right now while the recollection of the loss and inconvenience due to that worn out roofing is fresh in your mind is a good time to put the roof in repair.

With Wire Edge is well-known as a reliable and durable Ready Roofing for all classes of buildings. It is waterproof and sparkproof, and comes in rolls sufficient to cover 100 square feet.

Price complete with coating, tins, and nails is:

Ply	.....	3
Per roll, complete	.....	\$2.05

A roll contains sufficient roofing to cover 100 square feet.

**Red Diamond Roofing**  
This is a satisfactory ordinary grade roofing, which we sell somewhat cheaper than our XXX Brand. The price complete for this grade is as follows:

Ply	.....	3
Per roll, complete	.....	\$1.40

A roll contains sufficient to cover 100 square feet.

**Amitee Roofing**  
This Roofing has a mineral surface, coated with coal tar pitch and requires no painting.

Per roll	.....	\$2.15
----------	-------	--------

The nails and liquid cement for laps are supplied free inside each roll.

### Hammocks

Our line of Hammocks for this season are not only handsome in design but due regard has been given to strength. The strength not only insures lasting qualities and economy, but safety as well.

### Slanting Dial Family Scale

Every home should have a convenient family scale for weighing groceries as they come in and for measuring ingredients in everyday cooking.

We can thoroughly recommend these Slanting Dial Scales to give satisfaction. They are made of cold rolled steel with black enameled body decorated in gold and six inch brass finished dial. The double upright supports distribute the weight and insure accuracy. No weights to lose--no poise to adjust. Simply place on the scale whatever you have to weigh and the dial pointer at once shows the exact weight. Instantly adjusted for plate, basket or other receptacle in which the article to be weighed is placed.

Capacity 24 pounds by ounces.  
Weight boxed only 4 1/2 pounds.

No. E2X--With Square platform on double support	.....	\$1.65
No. T2X--With tin scoop on double support	.....	1.75

### Union Scale

This scale is especially convenient for a large variety of uses, as it includes both a scoop and platform (104 by 134 inches), weighs one-half ounce to 30 pounds on the scoop and up to 240 pounds on the platform. Has heavy tin scoop and single brass beam. Government inspection certificate sent with each scale.

Each ..... \$8.00

### "Dandy" Cobbling Outfit

A complete outfit of tools and materials for boot, shoe and rubber repairing. It consists of one iron stand, four lasts, different sizes, one shoe hammer, one shoe knife, six awls, one peg awl half and wrench, one bottle each rubber and leather cement, one bunch bristles, one ball each shoe thread and wax, four packages nails, assorted, four pairs heel plates, assorted sizes six harness needles. Directions sent with each outfit.

Complete, each ..... \$1.10

### TAP SOLES and HEEL LIFTS

Per gross pair	.....	30c.	40c.	50c.

On cards, assorted ..... 30c. card

### Fibre Butter Tubs

Fibre Tubs are much superior to ordinary butter tubs for the reason that they keep the butter sweet and clean, and are lighter and more durable than wooden tubs.

Through a new process these Fibre Tubs have been brought to a state of perfection--lower priced, better quality. They will not shrink or swell, cannot leak, water soak or rust; will not take milk or other liquids, and are warranted to stand any fair usage.

Capacity	.....	5 lbs.	10 lbs.	20 lbs.	30 lbs.
Each	.....	25c.	30c.	40c.	50c.

ANTI-RECIPROcity TRICKS SHOWING HOW "MADE-TO-ORDER" MEETINGS ARE WORKED UP Striking Evidence of Widespread and Calculated Attempt to Trick Liberals into Attitude Hostile to the Government—Misleading Representation of the "Anti-Reciprocity League of Canada."

Here is a plain story about "ready made" anti-reciprocity meetings. It is well known that the Conservative anti-reciprocity campaign is being financed by interests which profit by the protective tariff, and recent information has come to light showing how the anti-reciprocity campaign is being promoted and how "made-to-order" meetings are worked up.

A few days ago a St. John business man received a letter from the chairman of the petitions committee of the Anti-Reciprocity League of Canada with headquarters in Montreal. The league describes itself as a national organization, free from all political parties, but how free it is from all political parties can best be judged by some of its literature.

"From among the members of the executive committee appoint a chairman of the parliamentary committee and of the petitions committee, they to form their own committee."

"We now wish to assist in organizing branch leagues in the cities and towns throughout the country, and take this opportunity in addressing you, as we wish to find out whether or not any league or similar organization has been formed in the city of St. John."

"We know that meetings, etc., have been held bearing on the subject, but we do not consider this enough for this question must be tackled AGGRESSIVELY in every possible manner."

"The St. John man wrote for further particulars asking what assistance was furnished by the Montreal organization, and making other inquiries. The answer from Montreal, dated May 27, was as follows:

"Dear Sir—With reference to yours of the 29th inst., and replying to your inquiries, we supply all forms, etc., in French and English, for a strong petition campaign, we also supply any pamphlets we may issue from time to time."

"We also enclose a copy of our methods of organizing branches of the league, and in order that the best results be obtained, it is necessary that the branches be organized along the same lines, and that you will adopt same in principle."

"We would be glad to have your opinion of this organizing, so that we may benefit by any suggestions which have not occurred to us here."

"Yours very truly, THE ANTI-RECIPROcity LEAGUE OF CANADA, Per H. K. S. Hemming, Chairman of Petitions Committee."

Directions for Organization. This letter was accompanied by specific instructions, copies of resolutions, copies of petitions, and other earmarks of the "made-to-order" nature of the campaign in opposition to the proposed trade agreement.

"Among the circulars and instructions forwarded by Mr. Hemming is one entitled "Methods of Organizing Local Branches." It contains, among other things, the following significant directions:

"Call a meeting of prominent people whom you know to be strongly OPPOSED TO RECIPROcity. COMING AS MANY LIBERALS AS POSSIBLE."

"Be careful to explain that the meeting is to be entirely FREE FROM PARTY POLITICS."

LOCAL NEWS Correspondents who send letters to The Semi-Weekly Telegraph and who wish to have them returned if they are not printed, must send stamps for return postage.

The treasurer of the St. John Protestant Orphan's Home, who has just returned from ten days on the island of Grand Manan, reports that the fishing catches this year have not been large and that the conditions on the island are therefore not too good.

The wedding of Miss Edith Carter, daughter of Dr. W. S. Carter, chief surgeon-in-charge of the St. John Hospital, to Frederick Hanbury, of Brandon (Man.), will take place in Fredericton about the last of June.

The St. John Railway Co. have awarded the contract for the work in connection with the extension of their power house to A. R. C. Clarke, of Carleton. The work is to be begun as soon as the necessary arrangements can be made.

W. M. McLean, school inspector, who has returned from ten days on the island of Grand Manan, reports that the fishing catches this year have not been large and that the conditions on the island are therefore not too good.

Among the delegates to the conference of the Women's Methodist Missionary Society in Moncton today will be: Mesdames C. F. Sanford, W. P. Gaetz, F. Bennett, Harry Hayes, T. J. Dierstadt and Misses Bessie Tyler, Julia Heuniger, Miss Gaetz and Miss Jane Henderson.

There is considerable work in the way of improvement going on at present along the Shore Line branch of the C. P. R. The work includes four new bridges as follows: Over Linton's Creek, Pocogogan River, Douglas River, and Lancaster River. Concrete culverts are being constructed and 18,000 ties laid. There is also a lot of fencing being erected and considerable ballasting done.

C. J. Street, for the last four years has been traveling freight agent in this city for the C. P. R. He has been promoted to Montreal where he will occupy the same position with the company in that city. His place here has been taken by H. W. Newburn. The transfer will take effect today. Mr. Street received from his fellow clerks a handsome pipe the presentation being made by Mr. Bamford.

The marriage of Miss Annie Walsh, daughter of Patrick Walsh, to Peter Nelson, took place in the Assumption Church in Albany, N. Y. on May 19. Both are former residents of this city. Rev. Father Rouillard performed the ceremony.

HON. JAMES HOLLY DIED WEDNESDAY

Stricken With Heart Trouble About Three Weeks Ago

A PROMINENT MAN Always Took an Active Interest in Public Affairs and Held Important Positions in This Province—Leaves Widow and Four Children.

Thursday, June 1. The death of Hon. James Holly, one of the foremost men in New Brunswick, occurred at his home, Douglas avenue, at noon yesterday after an illness of three weeks' duration. He was seventy-six years of age and had enjoyed an honorable and successful career as a business man and in public and private life.

Mr. Holly had long occupied a high position among the men of note in the province, and up to a few years ago was prominent and active in all live matters of public interest and importance. He was well known as a lumberman of experience and success. The funeral will take place at 2:30 p. m. tomorrow from his late residence, 186 Douglas avenue.

Hon. James Holly was a son of the late James Holly, of the parish of Burton, Saint John county, and was born on October 24, 1835. His parents passed away while he was but a mere lad, and while he was still attending the village school where he acquired the habits of industry and the principles of integrity which in later life proved such valuable assets.

At the age of twelve years he came to St. John, and worked with his grandfather, John S. Brown, in the lumbering business, his duties being surveying and delivering.

In May 1867 he entered into partnership with the late David McLellan and until Mr. McLellan's death in 1884 they carried on business together. The following year the name of the firm was changed to James Holly & Son. Mr. Holly was president of the South Bay Boom Co. from 1876 to 1881 and in 1882, having purchased the stock and plant, became proprietor.

In politics Mr. Holly was a staunch Liberal, and in 1883 he was honored with a seat in the legislative council for the province. He was also a member of the provincial board of health. He was for some time a member of St. John's Lodge No. 2, A. O. U. M., and also of the New Brunswick Order of the Sons of Liberty.

Mr. Holly was united in marriage on December 31, 1863, to Aramantia A. Barnhill, of Lancaster, and five children graced the family: Mrs. Charles Swinerton, of Cambridge, Mass.; Mrs. John E. Moore, the late Mrs. George Fleming, Alexander B. Holly and Murray McL. Holly of this city.

The intercolony railway will change its time table on Sunday, June 4, and all trains in and out of St. John on Monday will be governed by the summer schedule. No. 2, the morning express, will depart at 7.10. The morning suburban will leave at 8.10 and will prove a great convenience for those who desire to spend a day in the country promiscuously or visiting friends who have country homes.

No. 4, the Boston train for Pt. du Chene, will depart at 11.20 a. m. and will carry the through sleeper to connect at Moncton with the Ocean Limited for Quebec and Montreal. No. 26 express will leave as usual at 12.40 p. m. but at Moncton will be merged into the Ocean Limited for Halifax, reaching there at 2 p. m. The other trains will depart on the same time as last summer except No. 134 express, the connection for the Maritime, which will depart at 6.58 p. m. five minutes later than at present.

The arrivals of trains are the same as last summer. The Maritime connection will reach St. John at 10.40 a. m. No. 3 express carrying the through sleeper from the Ocean Limited, will arrive at 6.58 p. m.

The suburban trains will greatly convenience the traveling public between St. John and Hampton. Suburban time tables may be obtained from George Carville, city ticket agent.

It is understood that after the coronation Sir Wilfrid Laurier will go to Switzerland for a week in the Alps. He may not return to Ottawa until a few days after the house resumes on July 18.

To remove the smell of fresh paint, put a pair of cold water in the room and change it every two or three hours.

WEDDINGS

Dales-Cunningham. Wednesday, May 31. A very pretty wedding was solemnized in the Congregational church at 6 o'clock yesterday morning when the pastor, Rev. H. R. Read, united in marriage Miss Jennie Muriel Cunningham, daughter of William Cunningham, of the West Side, and Clarence D. Dales, son of Conductor T. O. Dales, of the C. P. R. here. The church was very tastefully decorated with potted plants and lilies. The ceremony was performed in the presence of a large number of friends and relatives of the bride and groom. The bride looked charming in a lawn tulle made suit with a black jacket hat, and carried a bridal bouquet of lilies of the valley. She was given away by her father, and was unattended. Miss Nettie Retalick presided as the organ.

After the ceremony the bridal party drove to the Union Depot and left on the Boston train on a honeymoon trip to Boston, New York, Buffalo, Washington, Philadelphia and Albany. Mr. Dales holds a lucrative position in the office of the general manager of the Boston & Albany Railroad and has been living in Boston for several years. The popularity of the young couple is attested by the large array of beautiful presents. The bride and groom is a graduate of the St. John High School, and has a great many friends in the city. Mr. and Mrs. Dales will reside in Newtonville, Mass.

Millican-Coates. Amherst, N. S., June 1.—(Special)—A quiet but very pretty wedding was solemnized this forenoon at the home of Mr. and Mrs. Rupert Coates Napton, and their daughter Nellie was united in marriage to Harry Millican, manager of the firm of Baird & Peters, of Campbellton. The ceremony was performed by the Rev. P. L. Job, of Londonderry, in the presence of immediate friends.

Christie-Black. Springfield, N. S., June 1.—(Special)—An interesting wedding was solemnized at the home of Mr. and Mrs. Martin Black, Springfield, today, witnessed by their daughter Mary who was married to Warren Christie, of the firm of Christie Bros. Co., Amherst. The ceremony was performed by Rev. Dr. D. A. Steele, of Amherst, assisted by Rev. A. Graham Barton, in the presence of the immediate relatives and friends.

Connelly-Roberts. In Trinity church on Monday afternoon John Howard Connelly, of Salmon River, son of Robert Connelly manager of the Pipecot Lumber Company, and Miss Mary Agnes Roberts of Fredericton, were united in marriage by Rev. R. A. Armstrong, the rector. They will reside in St. Martins, where the groom has a host of friends and where they will be warmly welcomed.

McAdoo-Cain. Miss Pearl M. Cain, of Stewarton, was married Thursday to Andrew J. McAdoo by Rev. Wellington Camp, of the Leinster Baptist church. The ceremony was performed in a Wentworth street. There were no attendants. The bride wore a white silk dress with picture hat to match, and carried a bouquet of carnations. After a trip to Boston, Mr. and Mrs. McAdoo will take up their residence in Springfield, to which place the groom belongs.

Cochrane-Armstrong. St. Stephen's church was the scene of a pretty wedding yesterday afternoon when Lawrence M. Cochrane, son of Mr. and Mrs. Robert J. Cochrane, Main street, was united in marriage to Miss Margaret Armstrong, of this city. Rev. Gordon Dickie officiated at the wedding in the presence of quite a gathering of relatives and friends. The bride's father, James Cochrane, gave her away. The bride was daintily costumed in a traveling suit of tan broadcloth with a hat to correspond. Pink roses and lily of the valley composed her shower bouquet. Her sister, Mrs. A. H. Nolan, Dalhousie, (Que.) was the bridesmaid. The bride and groom were becomingly gowned in white silk tulle and yellow, and a white picture hat, and carried a shower bouquet of cream roses.

George Gamblin and D. McArthur, Jr. A tempting wedding luncheon was served at the home of the bride in St. James street, following the ceremony. Mr. and Mrs. Cochrane left last evening for their future home in Calgary, where the groom is sales manager for the Northern Electric Co. He was formerly in charge of Chicago and Minneapolis, and will also visit Banff before reaching Calgary.

The remembrances received were numerous, valuable and handsome. The groom received a silver watch, a gold watch, a costly silver fruit dish, and from the chief office in Montreal, a dozen pearl-handled desert knives and forks. His present to his bride was a pearl and amethyst necklace, to which he added a pair of ring, while the groomsmen and ushers were remembered with gold scarf pins.

Marois-McGaffigan. A pretty wedding took place yesterday morning in the Cathedral of the Immaculate Conception, when the city of Moncton, Mrs. McGaffigan, eldest daughter of J. J. McGaffigan, became the bride of Alfred J. Marois, of Quebec. Nuptial mass was celebrated by Rev. A. W. Meahan, who also performed the bridesmaid's duties. To the strains of Wagner's Bridal Chorus from Lohengrin, played by the Cathedral organist, Mr. Arthur S. Godsoe, the bridal party on entering the church proceeded up the aisle, the bride leaning on the arm of her father. At the offertory the wedding hymn, The Voice that Breathed O'er Eden, by Warren, was played, and on the conclusion of the ceremony Mendelssohn's Wedding March was most effectively rendered.

The bride was very becomingly gowned in a costume of ivory satin, trimmed with old duchesse, featuring a tulle veil, with orange blossoms, and carried a shower bouquet of white bridal roses, and wore a piece of old jewelry, a heir-loom in the groom's family.

The most beautiful was the bride's sister, Miss Bessie McGaffigan, who was prettily costumed in a gown of pink crepon over pink silk, with a large picture hat, with black plumes. She carried a shower bouquet of white roses. Dr. B. R. Quigley acted as groomsmen, and the ushers were Dr. T. H. Lunney and Edward Scully. After the ceremony a reception was held at the home of the bride's parents, 186 Princecess street, and a beautiful luncheon was served. The house decorations consisting of ferns, pink carnations and dahlias.

Mr. and Mrs. Marois left on the noon train for Halifax, at which place they will visit La Normandy. They will then proceed to Quebec, where they will make their future home.

The presents received were very numerous, many being of old glass and silverware. A handsome piano was the gift of the bride's parents.

Anderson-Fletcher. Friday, June 2. The wedding took place yesterday at the home of the bride's parents of William J. Anderson, of Albert, eldest daughter of Mr. and Mrs. Henry Fletcher, 130 Prince William street. The ceremony was performed by Rev. F. S. Porter, in the presence of the immediate friends and relatives of the pair. The bride was given away by her father and the groom was supported by H. Cunningham. The bridesmaids were Miss Ethel Fletcher, sister of the bride, and Miss Florence Cunningham. The bride and groom have a large number of friends and received many handsome presents. They will make their home at 151 Carmarthen street.

Hope-Alexander. Campbellton, N. B., July 1.—(Special)—The marriage of Miss Lucy Alexander, daughter of the late A. E. Alexander, of Campbellton, and K. Malcolm Hope, manager of the Bank of New Brunswick here, and son of K. Malcolm Hope, of Perth, Scotland, was solemnized this evening at the residence of Charles Alexander, Campbellton. Rev. T. P. Drummond, of St. Andrew's church, performed the ceremony.

The bride, who was unattended, was given away by her brother, and was somberly gowned in crepe meteor embroidered with pearls, and wore a wedding veil arranged over a coronet of lilies of the valley, and carried a shower bouquet of lilies of the valley. The house was beautifully decorated with roses and carnations. A reception followed the ceremony, which the young couple left for the Maritime provinces for Quebec from whence they will sail on the Corsican for Liverpool. Their stay abroad will occupy about two months, and will include the occasion of a visit to the groom's home in Scotland, and a continental tour. On their return they will reside in Campbellton.

Obituary. Mrs. Rachel Dougan. Wednesday, May 31. The death of Mrs. Rachel Dougan, widow of Capt. John H. Dougan, occurred at Hampstead on Saturday. The deceased, who was in the 84th year of her age, had been ailing for about six weeks. The funeral was held at Hampstead yesterday and the services were conducted by Rev. C. B. Lewis. She is survived by four sons, John A. and Theodore, of Hampstead, Hedley, of Fairbanks, Alaska and De H. B. Dougan, of Harvey, and three daughters, Mrs. W. T. Nickerson, of Hibernia; Mrs. Levi Thompson, of Amherst; and Mrs. Charles Ritchie, of this city.

James Jessop, Sr. Dalhousie, N. B., May 28.—The funeral of the late James Jessop, Sr., which took place in his home in New Brunswick, to St. Dominique's church Wednesday, May 17, was largely attended. Requiem mass was sung by Rev. J. St. Laurent. The deceased was 83 years of age, a native of New Brunswick, and had been 46 years in Quebec, where he was elected as first mayor and served five years. He celebrated his golden wedding three years ago and was still in perfect health. His daughter, Miss Marguerite Jessop, a graduate of an Albany (N. Y.) institution, was summoned to his bedside and all efforts to save him from pulmonary congestion failed. He is survived by his wife, four daughters—Mrs. George Vautier, Alaska; Mrs. A. H. Nolan, Dalhousie; Mrs. M. J. Baker, Dalhousie, and Miss Marguerite Jessop. The three latter were at his bedside when he died. He was highly respected and was a great temperance man.

Mrs. Catherine Murray. Friday, June 2. The death of Mrs. Catherine Murray, widow of Bernard Murray, occurred at her late residence, 31 Elliot street, last evening. She was in the 96th year of her age.

Mrs. Susan M. Ross. Many friends of Mrs. Susan Ross will regret to hear of her death, which occurred at the residence of her brother, Philip M. Ross, on Hibernia street, last evening, May 22, after a brief illness. She was in the sixty-fourth year of her age. She leaves three brothers and two sisters to mourn.

Mrs. Charles A. Burchill. Fredericton, June 1.—Mrs. Charles A. Burchill, wife of Al. Charles A. Burchill, died at the Victoria hospital on today after a brief illness. She was formerly Miss Parker. She leaves her husband and one daughter, also several brothers and sisters.

Thomas Phippen. This Phippen, a veteran of the Crimean war, died Wednesday in the General Hospital where he had been since Friday. He had been in poor health for some time. He was a man of fine soldierly bearing who would be picked out in the street as one who had served under the colors. He enjoyed a small pension from the British government in recognition of his services in days of the Crimean war.

For more than thirty years Mr. Phippen had been sexton of St. Andrew's Presbyterian church here, but resigned about three years ago. Mr. Phippen's wife died in 1887. He leaves three sons, William, Milton, of J. & A. McMillan's and Herbert, an engineer, also in St. John; and John, of Boston. The funeral will be held at 2 p. m. this afternoon, from the residence of his son, 46 Broad street.

William Bovard. Moncton, N. B., June 1.—(Special)—William Bovard, an employe of J. A. Marven Company biscuit factory, died yesterday at the home of his uncle, Alex. Bovard, after ten days' illness of inflammation of the lungs. Deceased leaves a wife and two small children.

Mrs. Sarah Carlisle. Campbellton, June 1.—(Special)—Mrs. Sarah Carlisle, widow of Malcolm Carlisle, Hillsborough, Albert county, passed away this evening at the home of Douglas Nichol, St. George street, Moncton, aged 82 years. Deceased came here last summer on a visit to her sister, being taken sick a few days later and never recovered. Mrs. Carlisle was born in Hillsboro, where she spent the whole of her life. She was well known in Albert county and highly esteemed. She was survived by one son, Joseph Carlisle, dry goods merchant, Boston, and three sisters, Mrs. Nancy Daniel, Whitman (Mass.); Mrs. Mary Smith, Albert; Mrs. Douglas Nichol, Moncton. Interment will be at Hillsboro.

Mary Davidson, charged with neglecting to provide medical treatment for her child, was brought into the police court yesterday afternoon and remanded. She was represented by George S. Shaw.

ST. JOHN MARKETS

The past week saw very few changes in prices in either the country, fruit, fish or provision markets. New beets and carrots are at present in the country market selling as high as \$1 a dozen. In the fish market there has been a slight drop in the price of medium dry cod, pollock and salmon. These are the only noticeable changes. The wholesale quotations given out yesterday are as follows:

INCREASE IN APRIL IN BUILDING PERMITS

St. John Only City in Canada Reporting to Construction, Which Showed Gain.

It is of interest to note that of all the eastern cities reporting to Construction, Toronto, St. John was the only one that showed an increase in the amount of building permits issued in April. The amount of the increase was very gratifying, being 31 per cent. The figures were \$200,000 for April, 1911, as against \$152,000 for the corresponding month of the preceding year.

This is what Construction showed conditions here: "Of the eastern cities reporting St. John is the only one on the report that shows an increase in the amount of building permits issued in April. The amount of the increase was very gratifying, being 31 per cent. The figures were \$200,000 for April, 1911, as against \$152,000 for the corresponding month of the preceding year."

WALTER L. GRANT NEW COLLECTOR OF CUSTOMS, ST. STEPHEN

St. Stephen, May 30.—(Special)—Inspector McLaren today installed Walter L. Grant as collector of customs for this port and Thomas Vanstone as presiding officer.

Walter L. Grant is the second son of the late John F. Grant and was for a number of years collector of customs for the Bank. Mr. Grant was always popular and gentlemanly in his dealings with the public and no doubt that experience will serve him well in his new office.
