Telegraphic News.

Ottawa, July 31.
Parliament is further prorogued till the 30th of September, not then to meet for the despatch of business.
The discount on American invoices is 11 per cent.
The excess of specie held over circulation is \$32,349.29.
Bathurst, July 31.
The steamer *City of St. John*, while going out of the harbor on Friday morning, struck on the sand bar in this harbor, and immediately filled with water. During Friday night she appears to have moved from the bar and slid into deep water, where she now lies with deck broken and abandoned. A survey was held, yesterday afternoon, on the vessel, which resulted in her being condemned.

London, July 31.
The Times financial article says it believes arrangements are in contemplation which will result in the payment of Dunlop, Sherman & Co's circular notes in the hands of travellers.
The Levant Herald states that the Government has authorized the circulation of the Bible in Turkey.
Broadwood weaving factory in Belfast was burned to-day. The damage is estimated at \$150,000. Seven hundred persons are thrown out of employment.
The English harvest prospects are improved, owing to the prevalence of fine weather, and Continental reports are more favorable.

New York, July 31.
Ex-President Andrew Johnson was stricken with paralysis on Wednesday afternoon, and died at 2.30 this morning.
Heavy rains have done \$100,000 damage along Atchison and Nebraska railroad.
Gold 112 1/2 @ 112.

London, Aug. 2.
The Austrian Premier has returned to Vienna on account of the insurrection.
The American Consul at Ching Kiang, China, was insulted recently by some Chinese soldiers, and fight ensued between the soldiers and the police.

New York, Aug. 2.
Memphis telegrams from above last night dispelled last hope in regard to an overflow of the river there. It is still rising slowly.
Reports more destructive storms come from Ohio, Indiana and Illinois.
An alarming amount of damage appears to have been inflicted on the crops and railroad beds and bridges.
Gold 112 1/2 to 113.

Shipbuilding at the Clyde.

Out of death comes life, and we learn from returns just published that a fair amount of work has been turned out in the Clyde shipbuilding yards during the month of June. The construction of sailing ships continues to occupy much of the attention of builders, as nearly one-half the vessels launched during the period indicated were of that description. Two paddle steamers for English railway companies were also launched during the month. The number of vessels floated from the yards during the month of June, and taking the whole half-year, exceeds largely the figures in corresponding periods of previous years; but, as an indication of the class of work, it may be mentioned that the tonnage shows a decrease of 14,309 tons on the month, and 17,500 tons on the six months of the year preceding. The average size of the vessels, therefore, built during the half-year is much lower than the recent average, being 810 tons, as against about 1,400 tons in 1874, 1,500 tons in 1873, 1,060 tons in 1872, and 1,050 in 1871. The total number of vessels of all classes launched during the month was 22, of 20,700 tons, and during the past half-year 125 vessels of 112,000 tons. Last year there were 17 vessels launched during June of 35,000 tons, and during the corresponding six months last year 93 vessels, the tonnage of which was 123,500 tons.

Belgian Labour in England.

The cheap labour of Belgium has for a considerable time made it a somewhat difficult task for English manufacturers, especially of iron, to compete successfully with Belgian productions; but a curious change has just been introduced, and we are now, it appears, to have Belgian labour on English soil. Mr. John Mitchell, of the Swanley Colliery, South Yorkshire, has brought over from Belgium a number of labourers, to be employed at the colliery. They are now at work and are giving great satisfaction. This is the first introduction here of foreigners for colliery work, but doubtless there will be more heard of the matter hereafter. English trades' unions have not hitherto shown themselves to be of such a temper as to readily accept competition of this kind. Is it possible that a change has come over the spirit of their dream, and that they are meeting the consequences of their own folly and ignorance like men who know how to take the punishment they so richly deserve.—*Canadian News.*

Behold how great a matter a little fire kindleth. A Frankfort journal of the 30th ult. says:—"In the streets yesterday great excitement was caused by the appearance of a Chinese in his national costume. It was General Wang Ching Jong, of Shanghai, stopping at the Union Hotel, sent here by the order of his Government to Messrs. Krupp, to arrange purchases of cannon." Should General Jong succeed in conveying a number of Krupps to his native country, the question of establishing

Chinese consulates in Europe and the Colonies, will become not merely desirable, but necessary. We have a great regard for Krupp, and positively worship sulphuric acid.—*Id.*

Houses to Let.—The *Calais Advertiser* says:—"There are more houses to let in Calais now than ever before. This is probably due to the fact that while landlords have been building to rent, many of the tenants have been building little houses of their own. If it has the effect of lowering rents it will be a good thing."

The Standard.

SAINT ANDREWS, AUG. 4, 1875.

Publisher's Notice.

Persons indebted to the STANDARD OFFICE for the paper, advertising, &c., will please pay our collector, and those at a distance can remit by mail. Many owe us for a year and upwards, and we trust that they will liquidate their accounts without delay. There is no good reason why publishers should not be paid as promptly as others. We are happy to learn that as the postage is now pre-paid by publishers, subscriptions &c. must henceforward be paid in advance.

POSTAL MONEY ORDERS.—On Monday last, the Postal Money order system between the Dominion and the United States went into operation. The articles of the convention which are plain and simple, have been published in the *Canada Gazette*.

Money orders payable in the United States will be issued at the money order post offices of the Dominion on and after Monday, the 2nd of August, for the sum not exceeding \$10, Canada currency, in any single order, and for any single order, and for which the commission charge will be twenty-five cents for any order not exceeding \$20 in amount, and fifty cents for orders over \$20 and not exceeding \$100. No further charge will be made in payment in the United States. Money orders issued in the United States upon Canada in conformity with the terms of the convention will in like manner be payable at the money order offices of the Dominion on which they may be drawn without charge at the time or place of payment in Canada. The value in gold coin deposits made in the United States in paper money for payment to beneficiaries in the Dominion of Canada and the value in United States paper of deposits made in the Dominion of Canada in gold coin or currency of par value for payment in the United States, will be determined according to the rate of premium on gold in New York. The Postmaster, at New York, will at 3 o'clock p.m., of each day, except Sunday, telegraph to each of the appointed exchange offices in the United States the rate of premium on gold at that hour, which rate when received by such exchange office be taken as the basis of conversion of money values for the next day, and for all subsequent orders and advice despatched and received until the receipt of the next telegram from the postmaster at New York.

This will be a great accommodation, as well as prevent the loss of money by attraction from letters, as has frequently occurred in the past.

CROP PROSPECTS.—From reports in the British and United States journals, we are happy to notice, that the late wet weather did but small damage, and that the present fine weather is ripening the crops, which are represented in many sections to be an average and in some parts above the average. The threatening weather towards the end of July caused some anxiety in England, which wheat growers in America were not slow in taking advantage of, and at once raising the price of flour; but we notice from reliable sources, that there is a large surplus of last year's wheat still on hand in the United States, and that prices must recede from that fact and the promise of fair crops. The truth is, speculators are manipulating the markets to keep up prices, in other words getting rich on the necessities of the poor.

THE CIRCUIT COURT is still in Session. The first cause which was alluded to in the last issue of the STANDARD as the most important one on the docket, "M. H. Grant, vs. the Town of St. Stephen," was only finished yesterday—just one week. The plaintiff was on the witness stand from Tuesday until Friday. Mr. Duff, Q.C., commenced his address to the jury last evening and is to finish to-day. It is expected that the verdict of the jury will be rendered this afternoon.

Those people who were so anxious for incorporation will have some idea of what it costs. These little incorporations as a correspondent observes "increase the taxes, which are burdensome enough at present. St. Andrews Parish has on several occasions voted against incorporations, preferring the "irresponsible Sessions" as they are termed, to the costly pleasure of electing councillors. Changes are not necessarily improvements.

OUR MARKSMEN.—New Brunswick has won laurels at Wimbledon. What reason to feel proud of her sons, three of whom were selected out of eight for the grand prize of the Kolapore Cup. Sergt. Hunter, of St. John, Pvt. Loggie,

of Fredericton, and Capt. Arnold, of Sussex. Our young friend Loggie being the third best shot.

SEX CHOLERA as it is termed now, has been very prevalent and many suppose that the principal cause of its attacking so many, has been the use of fruit and early vegetables. This, however, is a mistaken idea; provided the fruit and vegetables are ripe, no injury is done by partaking of them; when they do harm, it is because either they are unripe and not fit for the stomach, or perhaps, their immoderate use, and at improper times. Again, the use of water from cellar wells which have no drains, is more apt to produce common summer complaints. The Aqueduct water conveyed in wooden pipes, from springs on high land, does not injure the system.

CANADIAN BANK OF COMMERCE.—From the eighth Annual Report of this institution, it appears to be in a flourishing condition, and is one of the largest Banks in Canada. The paid up Capital is \$6,000,000, and the Rest \$1,900,000. The net profits from July 1874 to July 1875 were \$742,067.59, which with balance of profit and loss carried from last year, \$7,373.49, give a total of \$749,441.08. This Bank has Branches in most of the principal cities of Ontario and Quebec. The London Branch is under the management of R. W. Smylie, Esq., and our friend and late townsman J. S. Carnegie, Esq., is Assistant, whom many will remember as St. Andrews Agent of the Bank of British North America.

FESTIVAL.—The Presbyterian Sabbath School Festival is to be held in "Mowat's Grove," on Thursday next. The teachers have made the usual preparations for the enjoyment of their scholars.

The Carleton *Sentinel* states that while Father Chiniquy was delivering his lecture last week in Woodstock, a stone was thrown through the window, which did no other damage than break a pane of glass. The Rev. lecturer did not fail to "point a moral" on the dastardly act. The lecture is highly spoken of. The lecturer is a member of the Presbyterian Church.

VILLAGE OF ST. GEORGE.

A St. George correspondent of the *Calais Times* gives a graphic account of what he terms "the loveliest village in the Dominion," pointing out its great natural beauties, its hills and dales, its alluvial soil, its trade, its great natural resources—red granite, copper, lime, mineral springs, and last, but not least, the prospective advantages to the village, which are to arise from the "Grand Southern Railway" which is to be located "between the lower Village and the Upper Falls." From the following extracts it will be seen that the writer while being a warm friend of St. George, is not impartial in his criticisms on other places, as he has mixed some truth with wholesale fiction. The definition of the Indian title "Maguadavie" he says is "river of hills," if this is correct, there are other Maguadavies in the Province. But to the extracts which are to be received *cum grano salis*—

"Here we are, just far enough from St. John to be free from its conceit and vanity,—and far enough from St. Andrews, to shake off the influence of a 'rotated aristocracy'—while our distance from Calais and St. Stephen, removes any cause for jealousy."

Six miles from St. George, on the St. John post road, there are a number of springs known as the "Mineral Springs" noted for their curative properties. They are without doubt the greatest natural wonder in this Province. I have never seen the famous Saratoga springs, nor the German spa, but from descriptions given, they are not so wonderful as these, were the same attention given them.

St. George is the proper harbor of St. George, and is about four miles distant from the village. The city of Edinburgh at one time was eight miles from its harbor; at present the intermediate space is all built up, and the old town reaches to the water. St. George has only half the distance to build, which in a new country in this progressive age is a mere bagatelle.

[This will be news to those who know Edinburgh better than the correspondent. The furthest end of the new town is not quite four miles from Leith harbor, and the old town is barely half the distance.]

The most interesting industry in St. George at present, is the Red Granite Works of the Bay of Fundy Company. As you may be aware, the manufacture of this valuable stone has hitherto been confined to Scotland which has supplied the world with it. The Bay of Fundy Co., are now about fairly started, and employ upwards of 100 hands, filling orders for different parts of the U.S. and Canada. The wide circuit from which the orders come, and the large business showered upon the Co., in this unprecedented dull year, goes to prove the demand to be extraordinary in good times.

St. George is well supplied with churches, having four in regular operation, viz: The Episcopal, Roman Catholic, Baptist and Presbyterian, and occasionally the Methodist. There are four schools under the free school act, two large Halls and two smaller ones. We have three Temperance Societies, a Masonic society, and several liquor saloons—besides an Agricultural Society. We have no millionaires, and but little actual poverty—having the happy medium between the two extremes. As a rule, St. George is a sober community and drunkenness is rarely seen.

Pic Nic.—The "Pic Nic Club" intend holding their second Annual Pic Nic on Wednesday next, 11th inst., in Col. Mowat's Grove. All the usual amusements are being prepared for, and a well supplied Refreshment table will be provided. The first Pic Nic was such a success, that all who attend the second can rely upon an agreeable and pleasant past-time. Should the weather not be suitable the Pic Nic will be postponed until the first fine day following. We trust our young townsmen will be well patronized.

The Dominion Steamer *Lady Head*, arrived here on Sunday last, on her visit to the Lights in the Bay.

The past few days were busy ones for the haymakers, who improved their time, so well adapted for securing the hay in good order. Last night a rain storm set in, which lasted for a few hours, but appearances to-day indicate a return to fine weather.

Freights from the port of Calais, say the *Times*, continue ruinously low. There are now only thirty vessels at the wharves, and half of these are unable to secure freights at any price.

The tug *Wm. Stroud* injured her boiler on the last trip from Grand Manan, and proceeded to St. John for repairs. It is probable the Steamboat Inspector will see that she is entitled to his certificate. The tug *Joseph Baker* is on the route for the present.

The subsidy granted by the Government to the owners of the little tug *Utopia* for semi-weekly trips between St. George and St. Andrews, is \$1,300. This is said to be an enormous sum for such a boat.

A City One Hundred and Eighty Thousand Years Old.

In the current number of the *Oberland*, a California geologist reviews the geological evidence of the antiquity of a human settlement near the present town of Cherokee in that State, and estimates the age of that most ancient of discovered towns to be not less than 180,000 years!

The data for all such calculations are necessarily uncertain, as they are derived from the present motions of the continents and present rates of erosion: still, from the changes that have taken place since the pioneers of prehistoric California left their traces on its ancient sea shore, there can be no doubt that thousands of centuries must have come and gone.

The traces in question are numerous stone mortars, found in undisturbed white and yellow gravel of a subaqueous formation, not fluvial, underlying the vast sheets of volcanic rock of which Table Mountain is a part. In one instance a mortar was found standing upright, with the pestle in it, apparently just as it had been left by its owner. In some cases the mortars have been found at the depth of forty feet from the surface of the gravel underlying Table Mountain. The distribution of the mortars is such as to indicate with great positiveness the former existence of a human settlement on that ancient beach when the water stood near the level at which they occur: a time anterior to the volcanic outpouring which Table Mountain records, and anterior to the glacial epoch.

The recent geological history of that region may be briefly summed as follows:

Previous to the placing of the mortars in the position in which they have been found, the early and middle tertiary sea level had receded to the position of the coal beds underlying Table Mountain, fully one thousand feet below the level of Cherokee. Subsequently, in the pliocene period, there was a further subsidence of about fifteen hundred feet, something like six hundred feet occurring after the mortars had been abandoned. All this, as has been noticed, took place before the volcanic outflows which covered up all the ancient detritus of the region, including that of the ancient rivers (whose gravels have furnished so much of the gold of California). The geological age of the river period was determined by Lesquereux from specimens of vegetation, now extinct, collected in the survey of the ancient rivers: specimens indicating a flora of the pliocene age, retaining some characteristic miocene forms.

After the volcanic period, the land rose again, the time of emergence embracing the glacial period and the new oroding period in the sierra, during which the slates, and the hard metamorphic greenstones, and the granites were slashed with canons three thousand feet deep by the action of ice and running water. Taking the rates of continental movement determined by Lyell, our geologist calculates that the time required for the changes thus outlined could not have been less than eighteen hundred centuries. For a period so long preceding the glacial epoch as the time when ancient Cherokee was buried by the waters of the advancing sea, his estimate is certainly not extravagant, though it does transcend so enormously the time men have been accustomed to allow for man's residence on earth.

A sensible traveller writing to the *Portland Transcript* pronounces the St. Croix

river fully equal in beauty to the Hudson. Tastes differ as to the beauties and magnificence of scenery.

MARRIAGE.—The *Halifax Herald* of the 30th ult. says: Among our marriage notices this morning is that of Arthur Kennedy Parvis, Esq., 87th R.F., eldest son of Arthur Parvis, Esq., of Saxmundham House, Suffolk, to Alice Maud Sawyer, daughter of the late J. J. Sawyer, Esq., of this city. Miss Binney, daughter of His Lordship Bishop Binney, was the bridesmaid, and Charles Wilberforce Wildman, Esq., of the 87th R.F., was groomsmen. The Chief Justice, Sir William Young, gave away the bride. A large and fashionable audience assembled to witness the ceremony.

CHLORAL HYDRATE IN NEURALGIA.—The intimate mixture of equal parts of chloral hydrate and camphor will, it is said, produce a clear fluid which is of the greatest value as a local application in neuralgia. Dr. Lenox Brown states, in one of the English medical journals, that he has employed it in his practice, and induced others to do so, and that in every case it has afforded great and in some instances instantaneous relief. Its success, he says, does not appear to be at all dependent on the nerve affected, it being efficacious in neuralgia of the scapula as of the trigemini; it is of the greatest service in neuralgia of the larynx, and in relieving spasmodic cough of a nervous or hysterical character. It is only necessary to paint the mixture lightly over the painful part, and allow it to dry. It never blisters, though it may occasion a tingling sensation of the skin. For headache it is also found an excellent application.

Singular Grass Rotation.

Wherever the pastures of Western Missouri have been destroyed by the grasshopper, a new variety of grass have sprung up which the oldest inhabitant never saw before. The principal of these is a green bunch grass of luxuriant growth, which in new covers pastures and door yards where only blue grass has grown for many a year before. Stock eat it with avidity. Some persons contend that it is buffalo grass, while others see in it a resemblance to other grasses of the plains and mountains west of us. We hope that its development will be studied by some expert in the botany of this continent, for its origin may throw a new and important light upon the origin or migration of the locusts. The seed was evidently brought here and deposited by the swarm that laid eggs in this region last fall. It brought here from Kansas or Colorado only, its identity would surely be determined ere this by old plainsmen who are so numerous hereabouts. It has put forth no seed stalk as yet, and perhaps in this climate it may not go to seed this year. Who will first inform us whence it came and what may be expected from it?—*Kansas Times.*

A terrible fight took place at Skin Bayou, in the Cherokee nation, about twelve miles from Fort Smith, on the morning of the 18th. The combatants belonged to the rival political factions of Ross and Downing. Several men were killed. The night following, the contending clans, consisting of about thirty men on each side, met again near Skin Bayou, and considerable firing was heard, but no definite particulars are received of this last rencontre. There is great excitement in the Cherokee nation, and everything denotes an impending anarchy.

The commercial look out in Britain is not wholly satisfactory. In many circles the effects of the recent failures are still felt, and other failures are feared. The cotton market in Liverpool is reported as very much depressed, whilst in several parts of Lancashire mills are being closed, and the feeling between employers and operatives is very uneasy. Should the harvest prove deficient, as many have feared it would, there is the prospect of much suffering and distress during the winter. In the West of England the floods have done immense damage to both property and crops, and some privation will result. Money is plentiful, but the rate of discount is high; and the banks at present seem disposed to hold fast to what they have.

A QUICK PASSAGE.—The steamship "City of Richmond" (run in Line), which arrived at New York from Liverpool on Saturday, male what is claimed to be the shortest passage between these ports on record.—She left Queenstown at 4.30 p.m. on the 16th, and reported off Sandy Hook at 11.30 a.m. on the 24th July, making the total distance in 7 days, 19 hours, with an average daily run of about 395 miles.

BRIBERY.—In the Legislative Committee appointed to examine into the affairs of the U.S. Emigration and Quarantine Commissions, it was stated on Saturday last that the District Attorney Michael Nolan had received over \$30,000 from steamship companies for his efforts to obtain a re-union of head-money at Albany in the year 1871. His examination was unsatisfactory, and produced a very unfavorable impression.

Quarantine regulations have been established at Charlottetown, P. E. Island.

MARRIED.

On the 3rd inst., by the Rev. T. W. Crawley, Mr. John M. Camp, of Cambridge, Queens Co., to Sarah Jane, daughter of Mr. Thomas Smith, of St. Andrews.

Ottawa, 16th July, 1875. 31 jy 28

Valuable Stand FOR SALE.
THE SUBSCRIBER offers for sale that valuable stand for Travellers' House or Tavern, situated near the junction of the Rois Road and Great Road to St. George.
On the premises are a well finished story and a half House, with a large Barn; there are 18 acres of cleared land, a portion of which is under crop of Oats and Potatoes, also a kitchen garden with beans, peas, carrots, &c.
The above stand is well calculated for a Tavern or private residence, being within 5 miles of the Town of St. George.
Terms made known by the proprietor on the premises, or at the "Standard" Office.
JAMES ORR, JR.,
St. George, July 13, 1875.

TENDERS.
TENDERS will be received by this Department, at Ottawa,
Till the 31st July next,
For the construction of
TWO BEACON LIGHTHOUSES,
On Washadenook Lake, Queen's County, New Brunswick.
Also, for the construction of Beacon Light Houses at Spruce Point and Marks Point, St. Croix River, Charlotte County, New Brunswick.
Plans and Specifications of all the Light Houses may be seen at the Agency of this Department, St. John, N. B., and of the St. Croix River Light Houses at the Office of the Collector of Customs, St. Stephen, N. B., where Forms of Tender can also be procured by intending Contractors.
Tenders to be addressed to the undersigned and marked on the outside "Tenders for Light Houses."
WM. SMITH,
Deputy Minister Marine & Fisheries,
Department of Marine & Fisheries,
Ottawa, 30th June, 1875. 31 jy 21

Government House, Ottawa,
Monday, 14th day of June, 1875.
HIS EXCELLENCY THE ADMINISTRATOR IN COUNCIL.
ON the recommendation of the Honorable the Minister of Customs, and under the provisions of the 8th and 54th sections of the Act passed in the Session of the Parliament of Canada, held in the 21st year of Her Majesty's Reign, chapter 41 and intitled: "An Act respecting the Customs." His Excellency, by and with the advice of the Queen's Privy Council for Canada, has been pleased to order, and it is hereby ordered that, Liscomb, in the County of Guysboro', Province of Nova Scotia, be and the same is hereby constituted an Out Port of Customs under the survey of the Collector of Customs for the Port of Guysboro'—to take effect from the First of July next.

TEACHERS' INSTITUTE.
EDUCATION OFFICE, Fredericton,
May 28th, 1875.
UNDER the authority of the twenty-third Regulation of the Board of Education, a Teachers' Institute will be held in the Temperance Hall, Fredericton, on Wednesday, Thursday, and Friday, the 7th, 8th, and 9th of July next. The first Session will begin at 10 o'clock, a.m. There will be three Sessions each day.
The Teachers of the Public Schools in the Counties of York and Sunbury are requested to be present at all the Sessions of this Institute. In the event of any Teacher being unable to comply with the request (see Reg. 23), it is required that a written statement of the cause of absence from any Session be transmitted to this office.
THEODORE H. RAND,
Chief Superintendent.

NOTICE OF SALE.
NOTICE is hereby given that by virtue of a Power of Sale contained in an Indenture of Mortgage bearing date the Twelfth day of February, A. D. 1873, and made between Andrew Beahan, of Saint Andrews, in the County of Charlotte and Province of New Brunswick, mortgagor, of the one part, and Robert K. Ross, of Saint Stephen, County and Province aforesaid, M. D., of the other part:
There will for the purpose of satisfying the moneys secured by the said Mortgage, default having been made in the payment thereof, be sold at Public Auction at Saint Andrews, in the said County, on the premises hereinafter mentioned, on TUESDAY, the tenth day of AUGUST next, the Lands and Premises described in the said Indenture, as follows, viz: "All and singular that part and parcel of Town Lot number Eight (8) in Block lettered A. Bulkley's Division of the Town Plat of Saint Andrews, in the County of Charlotte, situate on Queen and Adolphus streets, with the dwelling house thereon, now occupied by himself and father, and Mrs. Ann Swinford, as a tenant, being the same property as purchased by me from John Steel and wife, also Charlotte Thompson, Hugh Thompson, Lindsay Thompson, Mary Jane Thompson, and Catherine Thompson, as by reference to the deeds thereof will fully appear, together with all the buildings and improvements thereon or thereon appertaining."
Dated this 29th day of June, A. D. 1875.
ROBERT K. ROSS,
Mortgagee.
L. A. MILLS,
Solicitor for Mortgagee.

GOVERNMENT HOUSE, OTTAWA,
Friday, 7th day of May, 1875.
PRESENT:
HIS EXCELLENCY THE GOVERNOR GEN-
ERAL IN COUNCIL.
WHEREAS it is provided by the 58th Section of the Act 31 Victoria, Chapter 6, intitled: "An Act respecting the Customs," that the importer of any cattle or swine may slaughter and cure and pack the same in bond, under such Regulations and restrictions as the Governor in Council may from time to time make for this purpose.
And whereas it has been found expedient to give effect to the said section 58, in so far as regards the importation of swine, and to alter the terms of the Regulations for this purpose, adopted by Order in Council of 22nd of May, 1869:—
His Excellency, on the recommendation of the honorable the Minister of Customs and under the provisions of the said Act has been pleased to order, and it is hereby ordered, that the said Order in Council of the 22nd day of May, 1869, and the Regulations thereto established be and the same are hereby repealed, and that the following Regulations be and are hereby adopted and established in lieu thereof—that is to say:
1. Upon the importation of swine for the purpose of slaughter, the Importer shall enter the same for Warehouse, upon the usual form of such entries, stating upon its face, the number and value of the swine, and also the quantity of pork, bacon, hams and lard, which the number stated will produce when slaughtered and dressed at 113 pounds weight for each live hog so imported, and the amount of duty to which such produce is or may be liable under the rate prescribed by the tariff in force at the time being as the proper duty on meat of that kind. Such Importer shall then execute a bond to the Queen, in double the amount of such duty, the condition of which bond shall be, that upon the due exportation within one year of the said products of the swine so imported and converted into pork, bacon, hams and lard, or payment of the duty secured by the said bond, then the said bond shall be and become null and void, otherwise shall remain in full force and virtue.
2. Upon the receipt into the Bonding Warehouse, the swine shall be regarded only as meat, and it shall not be lawful to remove any of them from such Warehouse at any time, nor shall any part of the produce of such swine be removed therefrom, for any purpose, without a permit from the Collector, or proper officer of Customs, as in the case of all other bonded goods.
3. Swine imported in the carcasses to be cured and packed in bond, may be entered in the usual way for Warehouse, and be placed in the premises established as a Warehouse of this class for the special purpose of curing and packing. The weight of such carcasses to be duly ascertained by the proper Officer of Customs, and the Importer shall give bonds to the Queen in double the amount of duty as accruing thereupon under the tariff then in force, in addition to the duty on exportation of the same, or payment of duty within two years from the date of first entry.
4. The killing, curing and packing of houses and all cellars, stores or other apartments included in such Warehouse, shall be accessible at all times to the Collector, or proper officer of Customs, or any officer of Customs, to whom the duty of such inspection may be assigned by them or their officers.
5. The produce of swine imported alive and warehoused for slaughter, at the said rate of 113 pounds for each hog, and the meat of the swine imported in carcasses for curing and packing, at the actual ascertained weight at first entry, shall be subject while in bond to all changes in the tariff rate of duty, and when entered out of bond for home consumption, shall pay the rate of duty in force at the date of such entry.
W. A. HIMSWORTH,
Clerk, Privy Council.
