THE WAY THAT MAY AND ALICE "MADE UP."

For several mornings, Mrs. Morton had him about bringing up her boys.

" Last week, on Thursday, in your seat," said Alice, "just before the bell rang for school to begin."

May looked blank for a moment, and then burst into a laugh. Alice turned angrily away; but May caught her laughter as fast as possible, and said-

"Alice, don't you know that I named my new canary-bird Alice, after you? I was telling Bessy Potter about her, and how she tore her paper to pieces, and scattered her seed all over the floor."

Alice stared, and drew a long breath. May's eyes twinkled again; and both little girls forgot their grievances in a peal of hearty laughter, ending in an affectionate shake and hug.

"There, Alice," said May afterwards, 'If ever we get put out again, let's speak about it the very first thing. Perhaps it will be something as funny as this."

I have told this story for the sake of other children; large and small. Many a pleasant day is spoiled, and many unkind and painful feelings are caused, by little mistakes which a few frank words would set right. True love is not too proud to speak first. It is pride that prevents; and, if we could see pride in all its selfish ugliness, we would make haste to tread it under foot.

"STICK TO YOUR BUSH."

Mr. Morgan was a rich, and also a good advice. If a school-house was to be built. the plan had to be talked over with him. Widow P. asked him what she would plant in her field, farmer S, always got his advice in buying cattle, and Mrs. R. consulted

" I went with the party, and we had a capital time. But it was just as my father said. No sooner had one found a good bush than he called all the rest, and they left their several places and ran off to the new-found treasure. Not content more than a minute or two in one place, they rambled over the whole pasture, got very tired, and at night had but very few berries. My father's words kept ringing in my ears. and I 'stuck to my bush.' When I had done with one, I found another, and finished that; then I took another. When night came. I had a large basketful of nice berries, more than all the others put together, and was not half so tired as they were. I went home happy. But when I entered, I found my father had been taken ill. He looked at my basket, and said, 'Well done, should be adopted. Joseph. Was it not just as I told you? Always stick to your bush.'

"He died a few days after, and I had to make my way in the world as best l could. But my father's words sunk deep into my mind, and I never forgot the experience of the whortleberry party-I 'stuck to my bush.' When I had a fair place, and was doing tolerably well, I did not leave it and spend weeks and months in finding one a little better. When other young men said. 'Come with us, and we will make a fortune in a few weeks,' I shook my head and 'stuck to my bush.' Presently my employers offered to take me into business with them. I staid with the old house until the principals died, and then I had everything I wanted. The habit of sticking to my business led people to trust me, and gave me a character. I owe all I have and am to this motto-' Stick to your bush.'" -Baltimore Episcopal M. thodist.

WHAT A PRICE !

"What is the value of this estate?" said a gentleman to another with whom he was riding, as they passed a fine mansion surrounded by fine and fertile fields.

"I don't know what it is valued at; I know what it cost its late possessor."

"How much ?"

" His soul."

A solemn pause followed this brief answer, for the inquirer had not sought first tions this is more the rule than the excepthe kingdom of God and his righteousness.

SYRIA .- The Mission in Ramoth Gilead. -During an exploratory mission tour in the trans-Jordanic country, undertaken by the Rev.. F. A. Klein, of Jerusalem, a Missionary visit was made to Salt, supposed to be the ancient Ramoth-Gilead. An examination of the spiritual work hitherto carried on by Bishop Gobat, but now likely to be relinquished, induced Mr. Klein strongly to recommend to the Chnrch Missionary Society to undertake the support of the efficient cathechist and schoolmaster now labouring there; and the Society has decided that, with a view to the continuing the Mission in Ramoth-Gilead commenced by the Bishop and thus attracting the Christian communion at that place more closely to that of Jerusalem, the course reccommended by Mr. Klein

WEST AFRICA .- Gratifying Intelligence from Abbeokuta .- The Rev. H. Townsend, who is now in England, has received letters from Abbeokata, and the following is from his summary of their contents :---

"I have received by the past mail several letters of great interest, containing the gratifying intelligence of the reopening of our church at Ake, at which there were, it is estimated, 1000 persons-800 inside, and 200 outside unable to get admission for want of room. The collection after the service amounted to 2,226,000 cowries and 17. 10s. in coin. The total value would be about 73/. I cannot tell exactly, as there is a fluctuation in the rate of exchange. The cowries would require about 111 persons to carry them. The Lord's Supper was administered the same day, at which 316 communicated. I think these are telling facts."

SOUTH-EASTERN AFRICA. - Translation of the Bible into the Kaffir Language.-Some four years ago a Missionary Conference met at Lovedale, and amongst other matters took np the consideration of the propriety of re-translating the Bible in title-deeds and documents brought from Kaffir. WHY BOYS SHOULD LEARN TO FARM.

1. The demand for intelectual labor or pestilence, a bad harvest, a business revulsion, throws them suddenly out of employment, and no excellence or merit on their part can avert the catastrophe. I would have every one so armed and equipped for the battle of life that, if suddenly unhorsed, he can fight on efficiently and undismayedly

2. The professions are fearfully overcrowded. A Western village is half peopled by doctors, lawyers and clergymen, who have rushed in ahead of the expected flood of immigration. Like miners in the Sierra Nevada or Rocky Mountains, they have already staked out their claims, and are waiting for others to come in and help develop and work them to mutual profit. But while the grass grows the steed starves.'-Whatever may be their fortune ten or twenty years hence-and events are constantly interposing to blast their sanguine hopes-doctor, lawyer,/ minister are but a winning but a meagre, precarious beg I am ashamed,' is the plaint which many would utter if they could afford to be frank and outspoken. Thousands suffer and stagger on, oppressed by want and ever increasing debt, who would gladly take refuge in productive industry, if they had been trained to familiarity with pitchforks and plow-handles. They would outgrow whose training is as helplessly one-sided as their own. I would qualify the profesthe habit of formal introduction to the ex-

ENGLAND. - Departure of Clergymen for India .- Two Clergymen of the Church of Englandhave recently left that country for Missionary work in India-men of character, standing and recognized position in the Church, both of Oxford University. where in their respective colleges they had graduated in honours twenty-five years, ago, subsequently fellows of their colleges, and at the time when they were led to offer themselves for Missionary work holding important and valuable incumbencies, one as vicar of East Ham, Diocese of London, and the other as the vicar of St. Paul's Church, Cheltenham. They are going to the Punjab, to establish a training college for native evangelists, pastors and teachers. There names are the Rev. J. W. Knott and the Rev. T. V. French. Concerning the latter some mention was made in our last number. The occasion of the General Committee of the Church Missionary Society taking leave of these Missionaries was no ordinary one, and the interest felt by the friends of Missions was evidenced in the large attendance, not less than one hundred gentlemen being present, many of whom he had passed a considerable proportion of their lives in India-generals in the army, and aged civilians who had honorably discharged the weightiest governmental duties; one, moreover, was present from a day 'much to be remembered' in amongst the princes of India, the Mahra- annals of His people in Tinnevelly."

"I suppose that such an ordination as that which took place in the beautiful church of this favored station (Palamcotta) has never occurred in modern Mission history-perhaps, if the circumstances of apostolic times are duly considered, not In this still heathen province of Tinnevelly -for such it still is, even with its 50,000 scattered Christians-there was there gathered together a body of some sixty clergymen, all, with the exception of the bishop's chaplain, engaged in Mission work. Of these, fourteen were Europeans and the candidates of our own Society, and seven the Gospel Mission. Twelve of them were also admitted to priests' orders, viz., four including one European in each case. These twenty-two deacons and twelve priests presented the unwonted sight at an Indian ordination of three sets of occupants of the communion rails of a fairlysized chancel. It was my privil-ge to be present at the last great Indian ordination, viz., at Paneivilei in 1859, when the late Bishop Dealtry admitted, I think, seventeen in both orders; but on the present occasion there were, as I have stated, no fewer proved their attainments to be in nowise how and when, we cannot tell." behind their predecessors, are designated

A correspondent of the Chicago Times, writing on the subject of "extravagance in ladies dress," concludes as follows :----

"Where is dress leading society? There was a day when there was something so bility of this one or that one by dress or tume has created much scandal of late. Perhaps, it has deserved. The actor is the scapegoat of community. It is always we and the treaties." One of our own missionaries, writing to cheerful urbanity without the preliminary must acknowledge myself heretic enough not to believe that all immorality is confined to the stage in dress, or anything else. There is no barrier strong enough reception of the drawing-room of the period. A writer in a London Journal says :----

DEATH OF M. LE PASTEUR ROGNON OF PARIS.

The Paris L'Esperance announces years, twelve of which were devoted to the Reformed Church in Paris. He was, says L'Esperance, in the full vigour of manhood, strong, and eminently gifted with mental endowments. A long and brilliant career seemed to lay before him But but we were far from suspecting the serious nature of the malady which was consuming him. He preached twice during Holy Week, and he celebrated the festival of the Resurrection at Easter. No one anticipated so near or so sudden an end.

"It was on Sunday, the 11th of April, that M. Rognon was struck for death. From that moment till the following Thursday, when he yielded up his soul to God, his faculties were clouded. He had only now and then lucid intervals, and was generally either in a state of delirium or unconsciousness......He was cut off in the flower of his age and of his talent. And this testimony of the Bishop was often repeated, eliciting strong expressions of gratitude from the society.

The concluding works of the sermon bear ample testimony to the reality of the loss which our Church of Quebec has sustained. They were as follows :--" The cheerful alacrity with which he gave, not only his money, but his time and his talent, wherever there was misery to alleviate, or sorrow to succor, is known to us all. He will not soon be forgotten. But his deeds will live longer than his name. The print of his hand is upon every institution of our Church. In them his influence still survives and will yet endure. But he is gone; he has been gathered into the fold. At the evening sermon, by the Rector, Rev. Mr. Houseman), allusion was likewise made to the same subject. A meeting of the Central Board of the Quebec Church Society was held after the Annual Grand Meeting, in which a resolution was passed, deploring the loss of Mr. Forsyth, who was one of the oldest members of the Society, and had been one of the Vice-Presidents.

WOMAN'S EDUCATION.

On Monday, the 31st May last, a large number of influential ladies gathered at the residence of Dr. Taylor, Sixth Avenue. New York, in response to a call of the Secretary of "The American Woman's Educational Association." A meeting was organized-Mrs. M. O. Roberts acting as President-and after a long and interesting discussion, the following resolutions were unanimously passed. It is proper to state that the society has been an organized and efficient power in woman's education for over twenty years. The object of its present action is to forward a movement to secure endowed institutions for the training of women to their special duties and professions as men are trained for theirs, particularly the science and duties of homelife. The resolutions will sufficiently explain the rest :---

Resolved,-That one cause of the depressed condition of woman is the fact that the distinctive profession of her sex, as the nurse of infancy and of the sick, as educator of childhood, and as the chief minister of the family state, has not been duly honored, nor such provision been ma le for its scientific and practical training as is

up the matter of education, and Mr. Justice

"Every one who has taken any interest in the cause of education in this province must have felt that the great want had been the obtaining of trained teachers. Much had been said on the subject ; but while others had been merely talking, the Colonial Church and School Society had been acting, and had established an institution here for the education of teachers so that last year, when the authorities of Mc-Normal School in connection with the College, they were saved all the anxiety and trouble of they were saved an the anxiety and trouble of the preliminary steps. They found a school already formed, and they had only to go on with the work. The union had been happily effected, and the institution had gone on pros-perously, smoothly, almost without a check. For the flourishing condition in which the Mc-full Neural School neuris the Partnerstee of Gill Normal School now is, the Protestants of Lower Canada were in a great measure indebted to the efforts of the Society's Superintendent, the Rev. Mr. Bond. aided by the exertions of Professor Hicks. Public attention was now very generally awakened to the subject of education; but it must not be thought that therefore all was done that had need to be done. Society could not stand still. It must either go constantly forward, or the irruptions of vice must drive it backward, and nothing could better prevent this than a sound education."

IN THE WORLD! **THE \$25** NOVELTY SEWING MACHINE.

FAMILY SEWING MACHINE

It makes the famous elastic lock stitch that will not rip or ravel, and will not break in washing, ironing or wearing. It is adapted to all kinds of family sewing, and to the use of seamstresses, dressmakers, and indeed for all purposes where sewing is required. It uses the straight needle, which is not so liable to break as the curved. It does not soil the dress of the operator, and does not require to be taken apart to be oiled. It is not injured by being turned backward, and is therefore not liable to be put out of order by children or in-experienced persons. It is made in the most thorough manner of the best material. For beauty and excellence of stitch, for strength, firmness and durability of seam, for roughness, and for cheapness, this machine is WITHOUT A RIVAL.

WITHOUT A RIVAL.

At the Massachusetts State Fair of 1867 the Novelty Sewing Machine took the Premium over Wilcox & Gibbs, and was awarded a Bronze Medal therefor. Every machine is sold with a table and com-plete outfit, and is warranted for one year.

THE BRITISH CHURCHMAN'S MAGAZINE,

FOR

Residents in the Colonies, India, and on the Continent of Europe.

PROSPECTUS.

"Another new Magazine!" the readers of this circular will at once exclaim; but the projectors of the "British Churchman's Magazine" feel there is yet a void left for them to fill, fully acknowledging the truth of the inspired Word, which says, "Of making of many books there is no end."

As this is a preliminary circular only, a very brief statement of the plan and scope of the Magazine will be given. This first circular is issued to ask from members of the Church of England in the colonies and at home a promis to become subscribers for the Magazine for twelve months. It is impossible to issue the first number until a promised circulation of 5,000 monthly copies has been obtained. Already, while the project is yet in the bud, 1 000 copies a month have been promised. The Editor and Publishers issue this circular with a

confident hope that the circulation required will be at once obtained, as they feel certain the want of such a Magazine as the one they propose to issue is largely felt.

OBJECT.

To give residents in the vast colonial empire of Great Britain, and residents in India, a religious Magazine of their own, published in connexion with the Church of England ; to afford settlers who are without the ministrations of a regular pastor short services from our own Liturgy, short sermons, daily prayers, to be used by all needing such a help; and instruc-

PLAN

No efforts will be spared to secure the services of the BEST WRITERS OF THE DAY as contributors to the Magazine. To be issued monthly, at the cost of sixpence (about the size of "Good Words"). Arrangements will be made with the Colonial Bishops and Clergy who wish to purchase the Magazine in sheets, for diocesan and parochial circulation, printing their own covers, with local information upon them. Radway's Pills are the only aperient medi-cines safe to take in all these cases of eruptive fevers—the peculiar character of the poison or virus of this class of fevers irritate, blister and ulcerate the mucous membrance of the internal viscera. All known remedial agents farnished by Materia Medica, for the purposes of a cathar tic, irritate and inflame; and in order to secure dismissal of these decayed and decomposing humours, most medical men resort to mercury calomel that utterly fails in expelling these humours; here then is where Radway's Pills

the condition of the system. The first dose will determine the quantity required : an ordinary dose for an adult in these malignant fevers is 4 to 6 pills every six hours, to be increased or diminished according to the

judgment of the patient. Infants under 2 years, may take, to com-mence with, half a pill, to be increased if

necessary, to one pill. Children from 2 to 5 years may take one pill to one and a half, and if not sufficient, 2 pills or more may be necessary. Where inflammation exists, grind one, two, or more, and for adults six pills to a powder; if within one hour relief does not follow, repeat the dose, given in this way, and the desired result will ensue in from

30 minutes to 2 hours. In severe attacks of Gastritis, Bilious Colic and Inflammation of the Bowels, 6 of Radway's Pills, ground to a powder, have secured results which Croton Oil and other powerful agents have feiled to produce.

AFTER THE CURE.

Radway's Pills should be taken in small doses, half a pill to four pills per day, for ten or fifteen days, after the patient is considered cured, for in many cases of fever. especially Scarlet Fever, Measles, &c., the patient may, if exposed too soon, suffer from deafness, weak sight, &c., so that good nursing is necessary after a cure is effected.
