

My Dying Husband.

The following is from a new volume of Poems, by Mrs. C. E. Johnson, published in New York. It bears the name of a friend of the author's, and is a beautiful and touching poem, in the midst of which she has written the following lines.

Sleep, love, sleep! The dusty day is done, Lay from afar the freshening breezes sweep, While o'er the graves of calm, Down from the towering palm, In at the open casement cooling run, And round thy lonely bed, The bed of pain, Hasten thy patient head, Take the refreshing showers of rain, Thy nurse!

Annual Meeting of the Micmac Missionary Society.

The Micmac Missionary Society held its fourth Annual Meeting in Salem Chapel Hall, on the evening of Sept. 30, Rev. Dr. Tapping in the Chair. Meeting opened by singing the hymn commencing "Subsequent to the joyful sound."

document, setting forth in a clear and lucid manner the proceedings of the Committee during the past year, and appealing powerfully to the understanding and the heart, in behalf of the Indian. It will be immediately published, and deserves to be extensively circulated and read.

Rev. RICHARD McLEARN moved the first Resolution, That the Report be adopted and published. He spoke to the following effect: Mr. Chairman, Ladies and Gentlemen, I regret that I was not present at the commencement of the reading of the Report. I have, however, heard enough of it to convince me, had it been necessary to convince me of what is so well known, of its vast importance, and to fully forth the highest emotions of gratitude to the Giver of all Good, for what has been done already in behalf of the poor Indians.

Ministerial Memoranda of a Missionary Tour. WOODSTOCK AND ANDOVER CIRCUITS, N. B. DEAR BROTHERS.—The Missionary Campaign for the fall of 1853 has just commenced. The credits above named are among the first of the series, and you and your readers are indebted to a regular rainy day of the old fashioned sort for a few "letters," which perhaps the continuous labour of an important Circuit might otherwise, if not altogether prevented.

Beware how you Stab in the Dark! Hospitality has been recommended, on the ground that one may perhaps entertain angels unwares. We would say be courteous to all for fear, that through forgetfulness or neglect, you may omit some person who has treated you kindly. Those whom we never saw may have performed good deeds to us though strangers.

Rills from the Fountain. DEATH.—What a moment must be that when the last flutter expires on earth, when a change? Tell me, who are deep-seated in nature and in God, to what new worlds are borne?—What new being do we receive?—Whether that spark, that uncomprehended intelligence find? Look upon the dead, and, with a steady eye, see before you? That was but a shell, a gross and earthly covering, which held for a while the immortal essence that has now left it—left it to range perhaps through the limitless space; to receive new capacities of delight, to be clothed in new and glorious garments of beatitude! To this radiant immortality the mind as it contemplates the now awful moment between life and death!

Reflections on Autumn. Time is again producing a change on our portion of the earth. Autumn has appeared with its sombre shades, and verdure shrinks and fades at the dread reality of its recent approach. The balmy zephyrs which, one short month ago, came enriched with the odour of the laden fields, and with the glow of the sunny sky, are succeeded by winds which murmur hoarsely and bear upon their wings a chilly moisture. The over-reaching canopy, that looked calm, blue, and so majestically pure, that the eye could almost pierce the frail curtain, and gaze upon eternal things, now assumes a troubled aspect; clouds swiftly pursue their aerial courses, and the whole expanse above looks dark and dim, as if astonished at the fading scene beneath.

General Intelligence.

News by the Last Steamer.

The R.M. Steamer *America* arrived at this port on Thursday evening. We give the following items from Wilmer & Smith's *European Times*:-

Our readers will be fully prepared for the announcement that the Emperor of Russia has refused to accede to the modifications made by the Porte to the note prepared by the Four Powers at Vienna.

The Emperor of Russia, accompanied by Count Nesselrode, has proceeded to Warsaw; and a conference is to be held with the Emperor of Austria, at Olmutz, on the 23rd inst. We cannot help repeating what appears to us self-evident, that if France and England had shown timely firmness the Russians would never have dared to cross the Pruth. Resolution and vigour are alone now save Europe from a terrible war; and we trust no further dallying will take place.

We shall not know for some days the effect of the news at Constantinople. That some frightful explosion of public opinion will take place seems to be inevitable. The Russians are, however, posting fresh troops into the Principality, and hostile messages have been exchanged between the two generals concerning the disputed positions at the mouth of the river. As far as we can judge, we should say it will be impossible to restrain the ardour of the Turks when the news of the Car's refusal reaches them, and in fact it would be sacrificing their golden opportunity if they did not strike a blow before the winter sets in.

The patriotic zeal of the Turks is every thing that could be desired. They are impetuous in offering their services from the quarters of the Empire, and will offer them as readily to the Russians as a lesson which may be long remembered. We expect to receive hourly the Sultan's appeal to his subjects in the form of a new manifesto, being a virtual declaration of war.

For the first time in the history of the Turks the walls of Constantinople have been placarded with lithographic notices, calling upon the people to take up arms against the Russians, and reproaching the Ministers for their cowardice in modifying, in place of rejecting, the Vienna note. It is to be regretted that, for want of timely vigour, the whole affair has now become too the very brink of war, and most difficult to prove to drive the Russians from the Principality. We can scarcely expect that the matter will not be settled without a conflict.

The Kosia affair seems to excite great uneasiness, and the Americans are already engaged with lacking Switzerland in her opposition to Austria. An open rupture with the Americans is anticipated in some quarters, and the increase of their naval forces in the Mediterranean is not looked upon with indifference at Vienna.

The Globe's correspondent says:-"Commercial letters from Odessa assert that, so far from their being anything to indicate that the Russians are about to evacuate the Principality, fresh troops have arrived and contracts for provisions and stores have been entered into, which seemed to imply that they would winter there."

The Globe's Paris correspondent writes that it is said the French government has received very unfavourable news from Constantinople on the 5th inst. According to rumour, the Emperor of Russia has sent a new note to the Porte demanding immediate compliance with the conditions laid down by the Conference of Vienna, and threatening to advance against Constantinople, if within a fortnight the Sultan should not send an ambassador to present that note.

The Sultan has disposed of the jewels of his mother, the late widow of the Sultan Mahmood; it is said for the sum of 27,000,000 piastres, and many sacrifices have been made in the present emergency by the upper classes. The sums deposited as pious legacies and foundations have been turned into the war treasury, to defray the enormous expense of the army.

On the special demand of the representatives of the foreign Powers, the Sultan has addressed the publication of his manifesto, in which he speaks in the most bellicose language to the nation. The manifesto is, in fact, really and truly a declaration of war.

The Wanderer, of Vienna states on January 30th ult.:-"We have just been informed that the French and English Consuls have left a kind of peace taken possession of people's minds. It is said that Gen. Luder is approaching Moldavia with a corps d'armee. The cholera is making ravages in Bessarabia."

A letter from Tiflis, of the 15th of August, states that a most sanguinary combat had just taken place between the first brigade of the fourth division of the army of the Caucasus, which has its centre of operations at Stavropol, and a body of Circassian mountaineers, commanded by a relative of Schamyl, who of late appears anxious to assume the offensive. The letter declares that both sides suffered most severely, the advantage remaining doubtful.

The Journal of Frankfurt, contains a letter from Smyrna, of the 31st August, in which 'fanatical tendencies manifested themselves at Damascus on the 4th of August, and Aleppo on the 12th. At the former place the French and Russian Consuls were insulted, and the authorities had great difficulty in giving them the satisfaction which they asked for. At Aleppo two of the ringleaders were arrested. It was said that the city of Ispahan, in Persia, had been destroyed by an earthquake."

The Crown Jewels of Hungary are said to have been found at Geneva. A Belgian newspaper says that M. Ledru Rollo is dying of nostalgia. Several speculators in grain have been arrested at Berlin by the Minister of Police. Letters from Geneva announce the conversion of thirty-nine persons from Roman Catholicism to Protestantism.

The works of the Genoa Railway, on the section of the line between Genoa and Santho, are being carried on with such activity that it is believed if the season can be opened for traffic by the end of the year.

An English engineer is in Naples, employed by a company to drain the celebrated Lake Fregio, by which means an immense extent of valuable land will be reclaimed. The shares will be brought into the English market.

The Courier de Marseille, states that a mechanic of that city, named Gras, has discovered the means of working locomotives with hot air instead of steam and with an economy of 80 per cent. The system of M. Gras is said to be remarkable in some points that of Mr. Ericsson, but to be more perfect.

The Protestants of Geneva, alarmed by the open hostilities, and indignation of the Roman Catholic priesthood in this ancient citadel of the Reformation, have formed a society for the furtherance of the interests of the Protestant Church. In a long address, they point to the advances of Popery in England, Holland, and France, and the destruction of religious liberty in Tuscany, as evidences of the necessity of contracting movement.

The Official Gazette of Milan publishes a decree relative to sixty-four persons convicted of high treason for being concerned in the insurrection of Feb. 4. The punishment of twenty of

them condemned to death has been commuted to perpetual imprisonment in a fortress, and the other forty-four to condensation to hard labour at the hulks and other penal institutions.

A letter from Rome mentions that the Pope is anxious to see the occupation of Rome by the French troops brought to an end. The Papal Nuncio at Vienna has, it is said, made a communication to that effect to the conference of the ambassadors, in order that they might intervene with the French Government.

A letter from Rome of the 2nd instant states that on the previous day the reading committee of the Holy Inquisition met in judgment upon various works, and condemned 'Uncle Tom's Cabin as a damnable and pernicious work.

The Turin correspondent of the Berlin Conservative and Church paper, the 'Kreuz Zeitung,' thus writes:-"After what has lately happened (at Smyrna) I think I ought not to omit informing you that the American commodore appears to command a regular 'Mediterranean fleet' from the haven of Spezia. We observe a perpetual coming and going of American ships to and from Alexandria, Tangier, La Spezia, and other Mediterranean ports, and from all sides I hear that the star-spangled banner of the United States of North America is waving so frequently seen in this sea as it now is."

New Brunswick. Our Correspondent under date of Sept. 21, furnishes the following items of news.

H.M. Ship *Calypso* arrived at Paspebic on Thursday last, and sailed again on the following day. The vessel was on her way to the island of St. Michael's, and was to be employed in carrying out a project for building a bridge across the strait between the island and the mainland.

More Preparations for the Railway. The barque *Recovery*, Capt. Southey, arrived at Shepards on Tuesday last, from New York, with coal and materials for the Railway, about to be commenced at that place by Messrs. Jackson, Peto & Co. - N. 204.

Some three or four cases of a singular disease have lately occurred on the Presque Isle in the County. The patient is first seized with a violent headache and high fever; he is then taken with bleeding at the nose, and vomiting large quantities of blood, and finally he is covered with black spots. We have heard no more of this disease, but it very much resembles the description we have seen of the Yellow Fever. - *Christian Sentinel*.

Profession WILSON. - Professor Wilson, one of the Royal Commissioners to the New York Crystal Palace, has arrived in Montreal, and taken apartments at the Donegan Hotel. He is accompanied by his wife, and remains to attend the Industrial Exhibition there on the 27th, 28th, 29th, and 30th of the present month. It will be seen, on the advertisement of the Agricultural and Industrial Exhibition Committee, that his gentleman will deliver his promised lecture on "Cultivation of Flax," on the 23rd inst. - *Montreal Com. Advertiser*.

It is rumoured that the Reverend John Cook D.D. Minister of St. Andrew's Church in this city has been appointed Principal of Queen's College, Kingston, and Professor of Divinity therein. The Principality of College is one of the highest honours in the gift of the Church of Scotland, and we would congratulate Dr. Cook upon his being made a "Very Reverend" were it not that the loss of a man, so distinguished as a preacher, scholar, and man of letters, and whose excellence of his understanding and goodness of heart might be irreparably felt by a congregation to whom he has long ministered with the utmost satisfaction. - *Quebec Chron.*

The Grand Jury have returned "true bills" against fourteen of the Chalmers' Church rioters. - *Id.*

Bermuda. The melancholy duty devolves on us this day to record the death of Colonel George Phillipps, R.E., the Administrator of the Government of these Islands, Commander of the Forces, &c., &c., which ad event occurred at St. Georges on the night of Sunday last, of the prevailing epidemic, and after but a few days, illness.

We understand that Colonel Phillipps' time here in Bermuda was not a very agreeable one; it is humane to hope they will bear of their and bereavement ere they leave England. Colonel Hope, Commanding R.A., being the senior Military Officer in this command, will assume the Government.

Friday the 23rd Sept. is appointed by Proclamation as a day of special humiliation and prayer. There is a deeply touching circumstance connected with this Proclamation. It was signed by the Senior Commanding Officer in the presence, and with the consent of, the late lamented Acting Governor, Colonel Phillipps. It may, therefore, be regarded as the dying request of that excellent man and Christian, and cannot but affect us, from this fact, with an additional solemn interest.

We are much pleased to notice that sums of money have been placed by the House of Assembly at the disposition of the Boards of Health of each of the Towns of Hamilton and St. Georges, and of the several Parishes, to be applied in such manner as may be deemed most advisable for the prevention and against the spread of the disease.

The most cheering news we have had from St. Georges is, that there have been but a few new cases of Fever within the past two days. We treat such a favorable state of things with content.

The resolve passed by the House of Assembly on the 9th inst. for providing a payment for the Minister of the Presbyterian Churches in three instalments from July 1852, to July 1853, has been ordered to be read "that day six months" by the Council.

United States. REMARKABLE CASE. - Michael Hogan, of New Hartford whose skull was fractured by the kick of a horse August 31st, is fast recovering. And who is very remarkable in the case, although conscious he could not speak until the eighth day, when he commenced talking in monosyllables, and is now connecting words as child beginning to talk. He was trepanned by Dr. Wier, assisted by Dr. Wolcott, of this city. - *Voice Wars.*

Sabbath movements in California. At a meeting to promote the observance of the Sabbath, it was resolved, that in our opinion, all lovers of the Sabbath should encourage Sabbath-keeping brethren, by giving them the preference in their trade, other things being equal.

The Wheat production of Ohio is estimated to average 25,000,000 bushels per annum, of which one-fifth of the land in the State is under cultivation. While some of the average crops exceed 30 bushels to the acre, the premium yield of the State will not exceed 16 bushels.

A curious fact was caught a few days since in Queensland creek, Queen's Co., Mt., is about 18 inches in length - without scales, and has a perfect flat head, the upper part of which is as rough as a rasp and almost as hard. It is four or five inches long, and grows from the side of its head two or three smaller ones, each of its head long projects about half an inch beyond its upper jaw.

A Texas mail contractor excuses himself for failing to perform his schedule, by alleging that the mosquitoes are actually so bad upon his route, as to make it dangerous to the life of man and beast to travel at the season of his recent failure. We have heard much of the truth of this apparently strange reason.

The late Henry Whittlesly, Esq., of Casshill, who has for several years been a liberal donor to the Colonization Society, besides providing a legacy of \$500 to be paid at once to the New York State Society, has decreed \$10,000 to be divided after the death of his widow to six benevolent institutions.

WASHINGTON. - The Intelligence mentions the existence of a rumor that the Government of France and England have entered a protest against the recent conduct of Mr. J. M. McKim, at Richmond, Carlton and Newcastle, where the people are said to have caught as many as they had salt to cure. Some of our fishermen who have crossed over to the other side report that the catch has been equally great at Caraquez. - *Mt. Vernonian*.

GALE. - On Saturday evening, a heavy gale of wind was experienced from the South West, which shifted during the night to the North, and with much violence. Several vessels dragged their anchors, but sustained no damage - only one disaster we have heard of, is the sinking of the brig *Daniel World*, which went down near the Bescon, in attempting to run to the harbor, having struck on the Island rocks, and subsequently on the Point Gordon, where she now remains. - *N.Y. Herald*.

MORE PREPARATIONS FOR THE RAILWAY. - The barque *Recovery*, Capt. Southey, arrived at Shepards on Tuesday last, from New York, with coal and materials for the Railway, about to be commenced at that place by Messrs. Jackson, Peto & Co. - N. 204.

Latest from Europe.

By Telegraph to M.E. Reading Room.

New York, October 3. Steamship Baltic arrived at 4 a.m. Wheat has not declined 3/4 per bushel. Flour has advanced 1/2 per barrel. Corn has slightly advanced. Sugar market stiffer, at unaltered quotations. Tea market stiffer, at unaltered quotations. Cotton - small business doing, at declining prices. Increased pressure in the Money market. Eastern quiet unchanged.

Mr. W. CHAMBERS. - Among the passengers by the America, we observe the name of Mr. W. Chambers, one of Scotland's most popular publishers and essayists. Mr. Chambers is a native of Peebles, and was born about the year 1800. The Brothers William and Robert Chambers have attained their conspicuous position entirely by the most exemplary industry and self-reliance. William is a printer, it is related of him that when in want of large type he used occasionally to cut letters in wood, and on one occasion he actually bound a whole impression of a small work he had printed on his own account. He was early the author of a work called the Book of Scotland. The Brothers next compiled the Gazetteer of Scotland, published in 1832. In that year they commenced the famous Edinburgh Journal. - It obtained at one time a circulation of 92,000. They subsequently published the Cyclopedia of English Literature, "The People's Edition of Standard English Works," the Educational Course, "Chambers' Miscellany" and Papers for the People. Their Establishment at Edinburgh employs about two hundred hands.

Mr. Chambers, we understand, proceeds in a few days to New Brunswick, by his way to the United States and Canada. - *Id.*

THE FRENCH METHODIST CONFERENCE OPENED ITS SESSION OF 1853 at Paris, in the Chapel of the Rue Royale, on the morning of Sept. 7th. The Rev. Dr. COOK was unanimously elected as President, and Mr. DEJESSET, Secretary. There has been a gratifying increase of members during the year. Dr. Cook was appointed to represent the Conference at the Ecumenical Diet about to meet at Berlin. Methodism, says the Paris correspondent of the *Watchman*, is gaining ground in the hearts of religious people in France, and may one day reap what she now sows.

ANNAPOLIS, SEPT. 27th. - *Sad Accident!* - On Friday last Mrs. Corbett, wife of Mr. Lebbard Corbett, of this place, while taking a carriage from the fire, the flames came in contact with her clothes, and she so badly burned that after extreme suffering she died on Monday morning, and was buried this afternoon. - *Tel. to Yorkmouth Herald.*

CIVIC ELECTIONS came off on Saturday. The returns of the successful candidates are as follows: - Henry Pryor, Mayor; Aldermen - Wards No. 1, H. G. Popley; No. 2, H. Evans; Ward No. 3, F. Morrissey; No. 4, W. Hartson; No. 5, W. J. Coleman; No. 6, W. Sutherland.

Little Helps. For Little Boys and Girls who think they can do no good in the world.

Suppose a little twinkling star, Away in yonder sky, Should say, what light can I do for you, Form such a star as I? Not many rays of mine, so far As yonder earth can fall— I will not shine at all!

Suppose a little child should say, Because I'm not a man, I will not try in word or play, To do what good I can? Dear child, each star some light can give, Though gleaming faintly there; Each rose-bud helps the plant to live, Each dew-drop keeps it fair.

And our good Father who in heaven, Can all his children view, To every little child has given Some precious work to do, Kind words to every one you see, Kind words and actions right— So shall your star shine bright and be A precious little light!

To my Infant Daughter. BY DR. MOIR. In sleep thy gentle spirit seems To some bright realm to wander back, And seraphs mingling with thy dreams, Allure thee to their shining track.

Already, like a vernal flower, I see thee opening to the light; And day by day, and hour by hour, Becoming more divinely bright.

Yet in my gladness stirs a sigh, Even for the blessing of thy birth, Knowing how sore and sorrow's try, Mankind, and darkest o'er the earth.

How to Live. We live in death, not years; in thoughts, not breath; In feeling, not in figures on a dial; We should count time by heart-throbs. He most lives Who thinks most; feels the noblest; acts the best.

Temperance. The War upon the Maine Law. The following excellent and timely article is taken from the Delineator.

There is a very large class of respectable newspapers in this country that do not oppose the cause of temperance, but ever regard the movements of its peculiar friends as "injurious and indiscreet," if not as "suicidal."

Another important principle farmers should not neglect, is, that some grains, fruits, and vegetables have climates, and soils, in which they develop themselves the most, and in which they are best suited to their nature.

For posts, in the order of durability, is red cedar, yellow locust, arbutus, vine, (or white cedar, or some other). The most durable is oak.

the law is also proved, as even the most respectable among those who oppose it do not scruple to boast that they have successfully violated it.

But it may be said, the Boston Transcript is but a single penny paper, and its sayings should not be magnified as the voice of the whole opposition to the Maine Law.

But a crisis is approaching in the State of Maryland. The prohibitory law is the important issue. Politicians in both parties are anxious to frustrate the efforts of the friends of temperance.

But a crisis is approaching in the State of Maryland. The prohibitory law is the important issue. Politicians in both parties are anxious to frustrate the efforts of the friends of temperance.

Why Mr. Buchanan never married. A correspondent of the New York Tribune, writing from Lancaster, Pa., briefly records the reason.
