tain extent at the decision of the gov-ernment, thru the deputy attorneygeneral, that a recount cannot legally take place. It is clearly a case of Mr. Drury passing the buck to Mr. Raney,

and he passed it on to Mr. Bayly. "Mr. Bayly bases his refusal on the grounds that 'a recount, if desired, must be applied for within four days after the returning officer has added up the votes.'

"Our first application for a recount was made to Mr. Lucas, the late at-torney-general, on October 23, three days after the vote was taken.

"The late-government were so con-vinced of the justice of our contentions that they passed an order-in-council dated October 31 granting a recount. The advisers of the Drury government have ignored this orderin-council.

"My executive had decided not to oppose Mr. Drury in his election in order tc give him fair play, and a chance to make good. This raw deal which has been handed to us will probably cause a change in this respect. A meeting of our committee will be held today to decide what further steps will be taken in reply to Mr. Raney's ultimatum," said Mr. Carruthers.

Altho the third annual convention of the Y.M.C.A. came to a conclusion Thursday the national council met yes-terday to discuss plans for the next two years and to review the matters brought up during the convention. The reco the commission of five and adopted by the convention were received by the na-tional council and plans made for their execution. The national council also passed cor

The national council also passed cor-dial votes of appreciation for the ser-vices of Mr. G. H. Wood, the retiring chairman, and Col. F. H. Deacon, the retiring treasfrer, who have served in these offices since the council was first organized in 1912. Action was taken to make the na-tional council an integral part of the re-ligicus education council. A nominating committee was appointed at the morning session to elect the offi-cers and members of next national council the number of members in the council the number of members in the council

Richard Hill of Brooklyn Bible School Gives Illuminating Account of Turkish Atrocities.

In the interests of the people of Ar-nenia, Richard Hill of the Bible School, menia, Richard Hill of the Bible School, Brooklyn, N.Y., gave an address last night in Knox Church, dealing with the situation as it exists between the Turks and Armenians. Conditions, suid the speaker, were hard to account for, but the reasons were probably threefold— racial, commercial and religious. The Turk is a Mongolian, while the Ar-menian is of an altogether different race. The business of the country is in the hands of the Armenian in Asiatic Turkey, and the Turk is a Mahometan, while the Armenian is a Christian. The speaker told of former attempts to aid the Armenian after a massacre—of the Armenian after a massacre-of

aid the Armenian after a massacre-of gathering the survivors into camps after they had made their way thru the Cau-casus, and of the oft-times helplessness of the situation. An instance that cam y under his own observation was that of finding twenty refugees, men, women and children, huddling together on the cold, clay floor of a stable. One of the party was a woman who had been in comfortable circumstances, with a good home, and waited upon by servants. She had seen her husband and three sons placed in a row and shot and her daugh-ters ill-treated and killed, and she, her-self, deprived of clothes, wandered in the mountains until she found herself one of the refugees of the stable. On another occasion, 9000 were gathered to-grether at Treberghed neared one of the refugees of the stable. On another occasion, 9000 were gathered to-gether at Trebezohd, placed on board barges, which were sent out to sea, and not one was ever seen again, the sup-position being that they were fired upon from the forts. In a letter recently re-ceived, it was stated that there were

ceived, it was stated that there were 100,000 orphans to be cared for, and that unless something was done they must

die before the spring. The story of the atrocities was illus-trated by pictures, which were thrown on the screen by I. W. Pierce. A col-lection was taken up in aid of the suf-

Electric Standardization.

At the Electric Club a week ago Mr. William Goodwin of New York outlined some of the tendencies in the electrical business of the country, a realization of which would constitute the most important business development in this generations It is to be

observed in the first place that electrical business of every kind is as yet only in an infantile stage. With all the importance it has at present, and the gigantic dimensions it has already attained, these are as nothing to what will be the case a generation hence. So it is of prime importance that any direction given to the development of the business should be most carefully considered in all its phases and applications.

Mr. Goodwin's remarks covered two points. The first was the necessity of co-operation among the various firms and corporations engaged in electrical supply and manufacture. This has past, the capital conversed with Halibeen accomplished to a large extent in Great, Britain, where the "British Electrical Amalgamated Manufactur- thing over 1,300 miles. ers' Association" is a powerful organi-

tirely new revue, brilliant of color, gay of music, rollicking of comedy. The best known juvenile vaudeville troupe of the world will be here. For two hours these clever performers, every-one but a school child, put on a cyclone of mirth and gaiety. Composed of the best talent America could produce, their short career, first as a patriotic organization which raised and donated more than \$100,000 to patriotic purpetes, has brought them to the top of the profession without a question. By royal command they appeared at Government House in Winnipeg to perform for H. R. H. the Prince of Wales and H. R. H. the Duke of Devonshire on the occasion of the double visit of royalty this summer. Of all the show folks who played Winnipeg that week, none were chosen but the Kiddies, and the prince afterwards had a chat with them, in which he told them he thought they were great. Cancer is one of the most dreaded diseases. It is the second largest cause of death in Ontario. A specially cruel falsehood of the Anti-Vacs is the statement published by them that cancer is caused by vaccination and that Medical Research proves it. The facts are just the opposite.

At Columbia University, New York, there is a World-Famous Cancer Research Laboratory, supported by an endowment of over one million dollars, the sole purpose of which is to conduct investigations into the causes, methods of transmission and all facts relative to cancer. The director writes as follows:

Columbia University in the City of Rew Pork

January 2, 1920

Dr. Jinn W. S. McCullough Chief Officer of Health Provincial Board of Health Toronto, Ontario, Canada/

My dear Dr. McCullough:

I have your letter of December 29, in regard to the assertion that there is a relationship between vaccination and the occurrence of cancer.

The fact that the cancer rate in England, where there is no compulsory vaccination, is much higher than that in the United States, where we have very general vaccination in the Registra tion Area from which our cancer statistics are obtained, shows that vaccination has nothing to do with cancer. For example, Hoffman in his book on "The Mortality from Cancer Throughout the World" gives the cancer rate per hundred thousand in 1908-1912 as 97.6 in England, while in the United States Registration Area during the same time the rate was 74.7. In Germany, where vaccination has been compulsory for many years, the rate in, 1908-1912 was only 87.1, compared to England's 97.6.

The statistics of cancer in animals, which are never vaccinated show that some strains of mice have much more cancer than is found in any human race. Certain strains of white mice may have a crude cancer rate of 50 to 60 per hundred; that is nearly a thousand times as much as occurs in man.

My own opinion, based upon reading and upon my experience as a member of the Advisory Boards of the New York Department of Health and of the Health Officer of the Port of New York. 19 that vaccination against smallpox should be compulsory. If every one were vaccinated, smallpox would disappear here as it did in Germany before the war, where the few dozen cases which did occur were in persons coming into the country from) Russia or elsewhere, who had not been vaccinated.

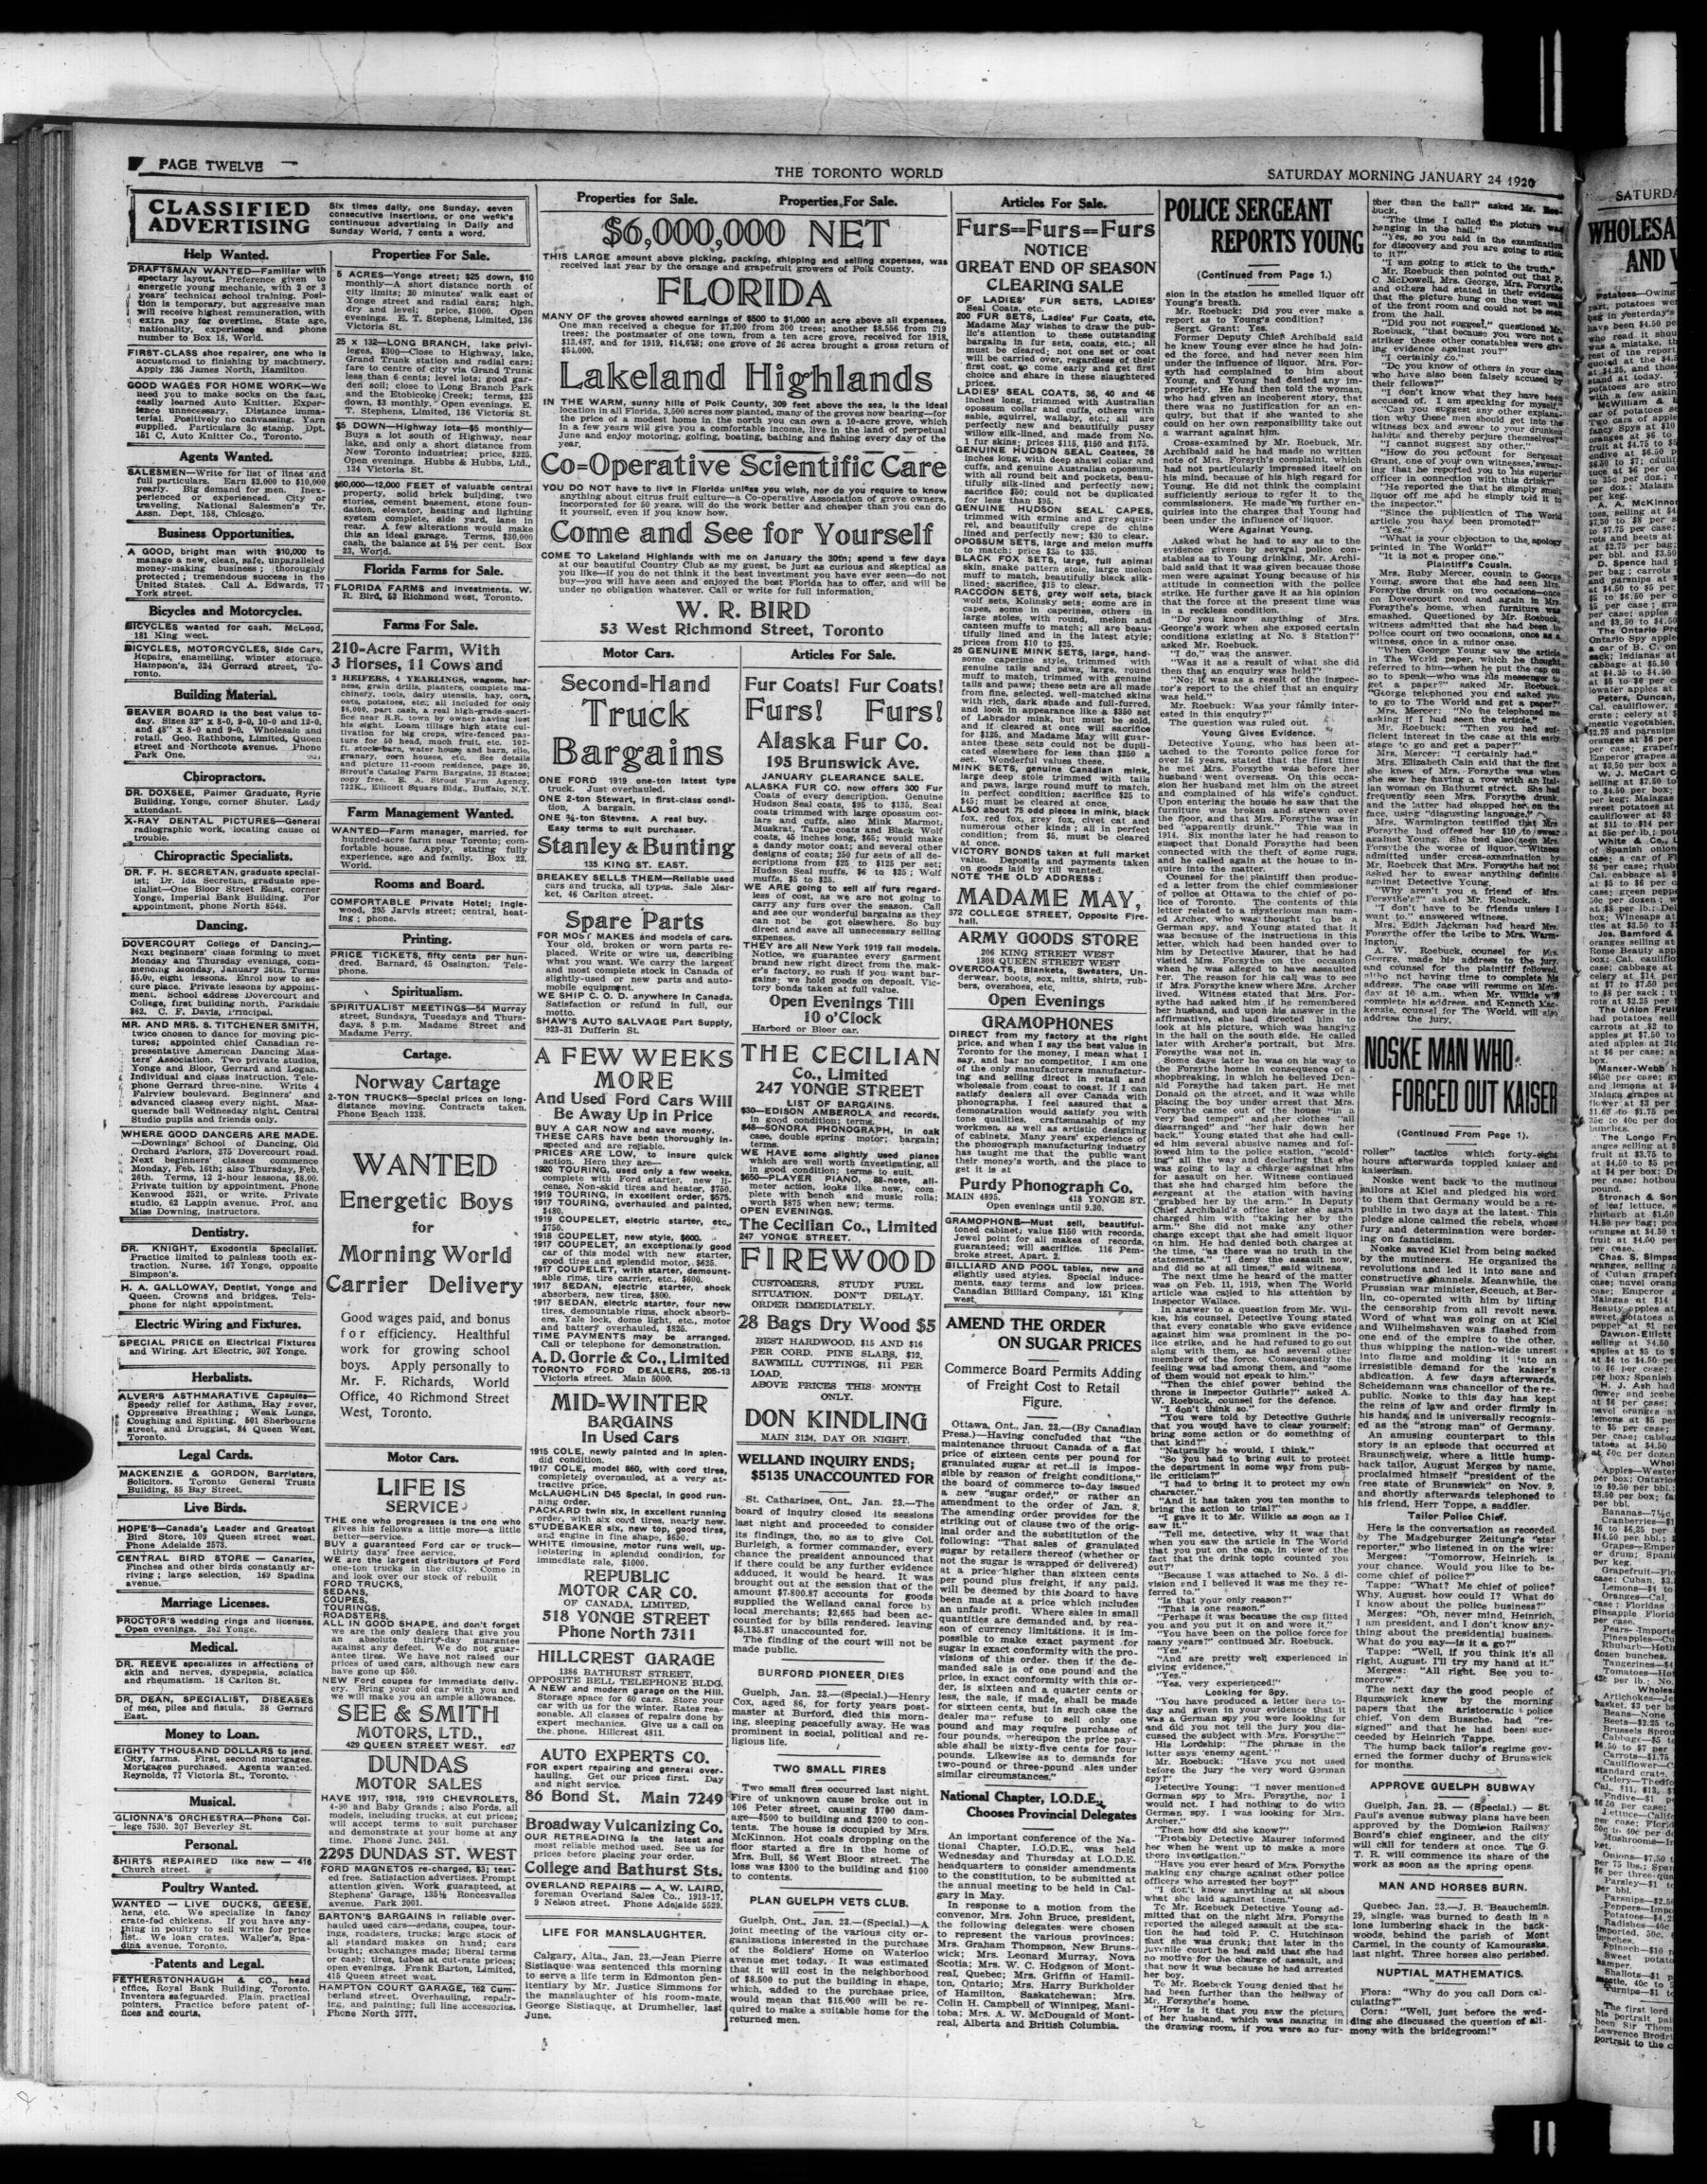

I trust that this letter covers the ground; if it does not I shall be glad to discuss any other points with you.

Very sincerely yours

Francis C. (bood

A.B.C. coal briquettes are made from over 90% high-grade fine anthracite coal mixed with a patent binder and subjected to an enormous pressure. They are superior to coal in every way, cheaper, cleaner and give more heat per ton. When lighted, briquettes burn evenly over the whole surface, making an abnormally hot fire, and giving off practically no smoke. A heavy fire may be maintained with briquettes without fear of clinkers or cinders, and the ash deposit is very small. With ordinary coal about 20% is lost in clinkers and free coal. Briquettes save this waste, as they are consumed entirely, leaving only about 3% to fall through into the ash-pan.

> A.B.C. Coal Briquettes should not be confused with ordinary briquettes sold under various trade names Telephone Orders to M. 6212 or M. 4294

In nical reasons only, they may be purchased to other markets of late the trend has been ower, partly owing to demoralization of fore.gn exchange rates and partly to the strained credit situation in the United States, and it could hardly be expected that the mining market could be quite immune from depressing influences out-side. At the same time the gold and siver mining industry is on an assured foundation such as the producers of no other metals can boast, and purchasers of the better classes of mining issues can face the future without forebodings. Atlas had a good "come-back" yes-terday, scoring a five-boint upturn to 30, and closing at the top. Atlas is now 8 points above the low of a few days ago, and supporting orders yesterday were credited to New York interests, indicating that, if there was any dissen-sion among insiders at the beginning of the week, harmony has been restored. Kirkiand Lake, Keora and Teck-Hughes were three other gold stocks to show a distinct upward tendency. The first-named was traded in heavily, and ad-vanced half a point to 17, closing at the top. Kirkland Lake has been clinging so tenaciously near its high level day after day that traders who were inclined to think the fall of the stock would fol-low the rise of the rocket have had to revise their opinions. The decorator then asked the location of the room, the exposure and the amount of daily sunshine.

"Why, I never dreamed that all these things entered into the buying of a rug," she declared laughingly, "I thought I would just come in, see a scrumptious big Oriental rug, fall right in love with it and carry it away. Why we haven't even looked at them yet."

"No," reminded the decorator, "but knowing the environment, we can view them now and secure exactly the thing."

They looked at Kirmanshahs of refined coloring and intricate pattern, at Sarouks, Irans, Kazaks, and finally settled upon a generous Chinese rug with blue background and characteristic golden peach motifs.

"I am so pleased with the rug," sighed the purchaser, "but I have a host of other things to buy and can't afford them for weeks."

"If you join the Home-Lovers' Club it is quite simple," said the decorator. "Purchase nearly anything in furniture or home furnishings on a convenient payment basis."

When the rug went out on delivery, it was accompanied by a chesterfield, portieres and other things. "I am so glad I learned of the Home-Lovers' Club," said the purchaser happily, as she drove home.
