TWO FOR LONDON.

The Detroit Athletic Club boys are perfect gentlemen and fair ball players, but in the latter respect, at least, they were outclassed yesterday by the Londons. Considering the exodus from the city and the absence of the zest which only championship games impart, the attendance was very gratifying. About 1,000 people saw the morning contest and 1,500 the aftermoon. Both were devoid of sensational features, and at no time was the audience worried out of its composure, excepting in the afternoon, when a vidual in the grand stand who was ends. full of excitement and booze. Ward, first base on Hudson's muff.

Williams, four bad balls. Cockman, hit by pitcher. Walsh, second time at bat, single.

After this nightmare, papa's curly-headed boy retired to the bunch to weep in silence, and was superseded by a cyclone named Barrett. Barrett ore it better. His one moment of weakness was in the sixth, when he ssued two complimentary tickets to first base and allowed Keenan and Walsh singles. These produced the wo winning runs.

In the afternoon the Londons fairly massacred two of the D. A. C. pitchers. They fattened up their batting average on Bacon, and after making sausage of that gentleman's variegated delivery in the first two innings, Mr. Barrett again came to the rescue He wasn't so successful as in th morning. The Londons took to him like a long lost brother, and before he recovered from the greeting they had touched him for five singles and drawn two passes. In the eighth the Londons wound up the show by a grand exhibition of fireworks, among the set pleces being singles by Kershaw, Cockman, Sippi and Keenan; a double by a triple by Reid: a home run by Walsh (the second one for him) and charities by Sechrist and Ward. Gentle, mild. Willie Kershaw, wore a while the D. A. C.'s wondered why they couldn't straighten his innocent-looking curves. Keenan and Cockman made them presents of two runs in the after that they braced up, and Willie charity and a triple gave the visitors two runs in the second and in the sixth, the only time they bunched their hits, they added another brace

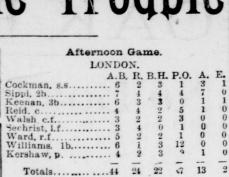

of runs by two singles and a three Weber, of London, and Ramsay, of Detroit, umpired jointly, and gave sat-

Remedies Have Done for Them READ WHAT THEY SAY

Munyon's introduction to the people of London so short a time ago, means only what it has meant in every other city where he had already introduced his remedies—SUCCESS.He promised to do certain things in London, and he has kept his promises. He told you his Rheumatism Cure would cure Rheumatism; his Kidney Cure cure Kidney disease; his Dyspepsia Cure, cure all stomach disorders; his Headache Cure, cure all forms of headache, and his various other remedies cure the eases they were prepared to cure. The testimonials--all genume-from people in your midst, from whom you may word that Munyon has said. Hence confidence of the people in his re nedies. Imitators may spring up and yon, and his work throughout th United States and Canada in the pas five years has been such as to convinc everyone that all he claims to do he

SE WARNED IN TIME! Should your rupture be hidden from view by some large clumsy truss you are lulled into a sense of false security. Your Hernia is not held, and you are in a more dangerous condition than you imagine. Now heed this Caution, 'ere it be too late; Unless the Hernia is completely reduced within the internal ring (where nature placed it) and constantly held there, adhesion might ensue, resulting in strangulation of the parts, rendering you liable at any moment to a frightful death.

An ill fitting truss, from intense, unequal pressure on one side, causes a Double Rupture, induces Paralysis, weakens the Generative organization, causes general nervous ation, Kidney-Urinary troubles, constipation and kindred ailments.

MOTHERS! Look to your children as you value their future happiness! I can Cure Them in six weeks! Neglect will produce frightful deformity and may prove fatal.

The very best evidence to support my claims—Our Own Physicians, Our Own People, Your Own Neighbors. EXAMINATION AND ADVICE FREE.

One set of teeth will not fit every mouth, nor one make of truss suit every form Hernia. I have known cases ruined for life by placing themselves in the hands of igno ant pretenders having not the slightest conception of the first principles of human an atomy. He who makes a specialty of one department must certainly be regarded as ing more experience and better facilities for the treatment of any particular trouble—AND CERTAINLY MORE CAPABLE—than anyone having "many irons in the fire."

British Trade Congress Asks Big Crowd Attend on Citizens Moral and Financial Aid

For the Striking Engineers-Plea for the Eight Hour Day-Status of the Coal Men's Strike.

Birmingham, England, Sept. 7 .- The Trades Union Congress resumed its sessions today, with President Stevens in the chair. The latter, in his annual address, said the engineers' strike was an instance of one of the best organized at the police court this morning, and and most powerful combinations in the world, being in the throes of a great struggle, with a powerful combination of capital. It was certain, he added, that the struggle would be prolonged, and that the engineers would have to appeal for help to the trades unionists throughout the country. That help, the president continued, must be given, for under no circumstances could they allow the engineers to be defeated. (Great cheering.)

The delegates then unanimously and enthusiastically adopted a special re-solution pleading for moral and finanial aid to the striking engineers. Mr. Benjamin Pickard, M.P., presihat all trade unionists should tender eight-hour notices and "sink or swim" with the engineers.

Mr. R. M. Ballantyne on the Importance of the Industry.

Should Lay to Heart.

From Toronto Weekly Sun. The Ballantynes, of Stratford, are the acknowleged kings of the cheese industry in this province. They are both manufacturers and dealers. They own the Black Creek and North Easthope factories, and are joint owners of the one at Tavistock—three factories, the joint output of which this year will aggregate 45 0tons of cheese, and which will distribute among 400 patrons \$80,000, or an average of

\$200 PER PATRON. In addition, the Black Creek factory will produce 40 tons of butter, which will be worth at least \$16,000 more. But, as already said, the Ballantynes are exporters as well as dealers, and they will this year export from 100,000 to 120,000 boxes of cheese, and UNITED STATES IMPROVEMENTS. the turnover will aggregate in money

value well on to three-quarters of a This gigantic industry has not been built up in a day. It has been a matter of growth. Mr. Ballantyne, sen., as already stated, opened the

"FAT" CHEESE NOT IN DEMAND. In answer to a question, Mr. Ballantyne said: "The percentage of butter fat in milk is, I think, less than formerly. The tendency is to get cows which will produce a large quantity of milk. Nor is this tendency objectionable. About 31/2 to 4 per cent of butter fat is about the right proportion. If it runs up to 5 the cheese is too fat and we find that it is not desirable

DEPENDS ON THE MAKER. otherwise in the quality of Ontario cheese?" Mr. Ballantyne was asked. "The quality of the cheese depends altogether on the individual maker," replied Mr. Ballantyne. "If the man in charge of a factory keeps his patrons up to the mark, the cheese will be good. If he does not, it will be poor. "Not even then. Supposing always," with an irrepressible glance at him, "that you have one!"
"That sounds as though you considered me in disgrace," says Wortley.
"I am not considering you at all."

"You know very well! All day long obtained from this factory. Here is obtained from this factory. Here is an instance of another kind. A few years ago the product of the factory in Carthage was proverbial for its bad flavor. The patrons had got so into justice will be done under laws that the habit of supplying badly-flavored are made and administered by imper-

milk that it was almost impossible to get a maker to handle the factory at In Arizo All that was not up to the standard that sum in lieu of three days' impri-was remorselessly sent back. Eventually the work of education was com-plete; and today Carthage factory the jailer, however, the man was kept ranks among the best in the province." ing off means a loss of half a cent a

> quality. THIS IS A BOOM YEAR. But, if 1895-96 were bad years, 1897 will be one of rare bounty. The farmers of the province are experiencing the rare pleasure in cheese as well as in wheat of an abundant supply, coupled with an abnormally high

plentiful supply, but a supply of good

"In the territory west of Toronto over which we operate," said Mr. Ballantyne, speaking on this point, "the increase in make will be 25 per cent, and the increase in price, as compared with last year, amounts to 25 per cent more. This increase in price means more than appears on the face of the statement. It costs the same to manufacture when cheese sells for 7 cents as it does when it sells for 9 cents. Consequently, a 25 per cent increase in the selling price of a pound of cheese amounts to more than a 25 per cent advance in the net return to the milk producer. On the whole, therefore, patrons in our district are receiving over 50 per cent more for their milk than they were paid last year. And they are getting this addition without having materially added to the number of their cows. The better flow of milk and higher price of the finished product, are, without any additional cost, putting \$1 50 into a man's pocket where he only got \$1 a year ago."

A SUPPLY OF ICE AN IMPERATIVE

"What suggestions have you to of-fer managers of factories?" Mr. Ballantyne was asked.
"One of the greatest needs in connection with factories," was the reply, "is the means of preventing the temperature of curing rooms from rising above a certain point. There is no excuse for the absence of such means from any factory," he continued. "Ice can be had for the hauling; any build-ing that will shed rain will hold it, and sawdust or straw will insure preserva-tion. The loss from the shrinkage of cheese in hot weather is more than sufficient to meet the cost of providing ice with which to keep a curing Oct.14-15 room cool, and the improvement in

quality resulting from an even temperature is clear gain.

BAD HEATING APPLIANCES. "Another thing. The curing of theese in the fall is very badly done. There are not half a dozen factories the western district that have proper appliances for heating. There should in all cases be a hot air furnace—not placed in the basement, but on the main floor, of the curing room. If a draft of hot air comes from below it will injure the cheese. Furnaces should have a double casing, and coal, and not wood, should be used, in or-

TARPAULIN COVERS. "Every factory ought to have a sufficient number of tarpaulin covers to protect the cheese when en route to the station. One load may easily, owing to lack of protection, suffer more injury than the entire cost of provid-ing tarpaulins would amount to."

OUR CHEESE STANDS HIGH. "How does our cheese stand in Engand in comparison with American? Mr. Ballantyne was asked. "Away ahead. It runs all along at from 1/2 to 3/4 of a cent above American quotations.

"And how about our factory-made

butter? "We have obtained a better price than the Australians by from 1/2c to 1c per pound during the last two winters," was the reply. "The Americans have frequently, owing to carelessness in regard to salting and color, had to take 5c a pound less than our people. We have not yet been able to come up to the Danes, however; but this is only because Danish butter can be placed on the market within 24 hours after it is made. Still, we have, nothwithstanding this handicap, come within 1c per pound of our strongest rivals.

"The United States people are improving the quality of their output, though. They are being more careful in regard to salt and color and they have adopted the Canadian style of package. The result is that Canadian dealers have found it profitable to go to Chicago and buy for export selling in Ontario at 16c. It is butter has doubled in the last fifteen years. so bought which forms a large proportion of the through shipments from Montreal to England."

> LANDSLIDE IN QUEBEC. A Hundred Acres Slides Into the St.

Anne's River.

Quebec, Sept. 7.-The announcement hat another landslide took place at St. Alban Friday night is creating much excitement among the population, not only of the parish, but of the whole district. The landslide occurred on Ste. Anne's River, near St. Alban. The length of the landslide is about fifteen or eighteen acres, breadth six or seven acres. It has completely passing below the slide. A strange eature of it is that the water does not seem to rise to any considerable eight. The water above the landslid is not more than 20 or 25 feet deep although the river has been blocked for 48 hours. This landslide is abou three miles west of the one that one curred three years ago. It seems that the water following the bed of the rive undermined the ground, which is sand and clay, as it is cut almost straigh

Mrs. Butler and family have been summering at a cottage on Liberty Hill, which is but a snort distance east of the pier. The family of Mr. John A. Robinson, barrister, of St. Thomas, have also been spending the summer nonths on the hill, and it appears that yesterday afternoon about 4:30 o'clock Miss Edna Butler and Misses Winnie nd Geraldine Robinson went in bathing together in front of the bath house at the foot of the hill. The beach at this point is shallow for a considerable istance, but towards the east the botom deepens much nearer shore. The young ladies had been in the water mittee also distributed candy among ten or fifteen minutes, not far from all the children on the grounds. shore, when Edna and Geraldine ven-tured out a considerable distance, and got into the deep water at the

of the point. It is supposed by the physicians that Miss Edna was seized with cramps. However, she began to sink, and her ompanion was unable to save her, but called loudly for assistance. Mr. Hugh Stringer, of South London, was in bathng near by, and went to the rescue. His son Bert, who was lying on the beach, and Mr. A. C. Lyons, brotherin-law of Ald. Hunt, who happened to be walking along the beach, also answered the cries for help. Mr. Stringer could not swim, but managed to get hold of little Winnie Robinson, who was overcome with fright when she saw the danger of her companions. When Bert Stringer reached the other girls, Geraldine Robinson was almost ex-hausted, and Miss Butler could not be But while assisting Geraldine to shallow water, he noticed the body of the unfortunate girl under the surface of the water. He seized her by hair and started for shore. Mr. Lyons had by this time reached the scene, and assisted young Stringer. Drs. Charles S. Moore, of this city, Dr. Mothersill, of Port Stanley, Dr. Malatt, of St. Thomas, and Dr. Hoedl, of Detroit, quickly arrived on the ene, and spent upwards of an hour in an endeavor to resuscitate the girl, but their unthing efforts were unavailing. The united picnic at Port Stanley vesterday of the various labor organizations of the city was participated in by between 3,000 and 4,000, and proved one of the happiest of the many large gatherings there this season. Workmen, with their families, made merry, free from the fatiguing cares and exertions of their daily tasks. "Old Probs" must have been very kindly disposed, for the day was an ideal one, and the success of the outing on the heights was largely due to the weather man's evident par-

tiality. Fourteen well-filled coaches composed the train that pulled out from Lon-don at 10:05 a.m., and four trains followed later in the day. There were eight coaches on the special at 1:15, ten at 2:30, seven at 5:25 and five at 7:25, and almost all crowded. Among the unions represented were: Cigarmakers, B. of R. T., Engineers, Firemen and Con-ductors, Metal Polishers and Buffers, Bricklayers and Masons, Carpenters, Amalgamated Engineers, Industrial Brotherhood, Printers, Coopers, General Laborers, Telegraphers, Plumbers, Tailors, Molders, Painters and Building Laborers.
