King Cabinet Believed To Favor Practices of Liberal Chieftain.

MAY FACE REDISTRIBUTION

Ottawa Observers Believe Parliamentary Session Will Be Short.

OTTAWA, Jan. 10 -- Dame Rumor was busy tonight around the capital speculating about the probable opening date of the parliamentary session.

The new cabinet is understood to be almost a unit against embarking on any ambitious program of legislation until it finds its feet and such bills as it contemplates at present will chiefly be in the nature of amendments to existing legislation wherein flaws have been revealed by practical experience.

The need of time to settle the terms of forthcoming measures has been often put forward as an excuse for delay in

summoning parliament, but this year it will not be available. However, the new ministers have a wide range of affairs and problems which they must examine with minute care and for which they must evolve ome line of policy.

Once Parliament actually meets the preoccupations of its daily business are usually too heavy and urgent to leave the cabinet much time for anything else. Accordingly if Premier W. L. Mackenzie King's ministers are dowed with wisdom and foresight they will make the best use of the time now available for determining their course upon a variety of matters and for laving plans to follow it with steadfast

BLAME WOMAN FOR OWN DEATH

[Special to London Advertiser.] ST. THOMAS, Jan. 10.—"That the deceased came to her death through her own negligence," was the verdict reached by the jury empaneled to in-vestigate into the death of Mrs. Margaret Weils of Port Burwell, who was killed by a London and Port Stanley car at Stop 12, on the night of Jan. 1.

The jury recommended that the L and P. S Railway equip stop sema-phores at crossings with stop lamps, as

t protection to the public.

The jury was out 40 minutes.

The evidence given by the relatives of the dead woman differed from that given by the conductor and motorman of the car, in respect to the whistles sounded, and to what portion of the car struck Mrs. Wells. Both members of the train crew swore that the front portion of the car struck the victim, as she stood on the roadway about one foot from the tracks, while witnesses on the other side swore that she was drawn under the car by suction while she walked past on the way to the plotform

Trading With U.S.

CHARLES H. MITCHELL, presi-dent of the National City Bank of New York, referred in a secent address to the desirability of United States cultivating trade relations with Canada.

In part, he related that Canadian "timber and paper products have filled a vacuum in our supply, enabling us to conserve the limited timber tracts of our own country."

This is a point that Canadians must consider. Our pulpwood is being cut at a very rapid rate, and over a great area there is no provision made for replanting.

It is a fine thing for United States to have this country to the north from which to draw pulpwood, but Canada must remember that we have no country to draw from when our supplies run short,

The speaker also warned United States of the folly of trying to shut Canadian goods out of the United States market, instancing the placing of a tariff of 35 cents per bushel on Canadian wheat. By so doing, Mr. Mitchell claims, United States is "antagonizing these neighbors of the North to the point where they are seriously discussing a retaliatory tariff that doubtless would, in the ultimate, result in their milling their is there any guarantee that an in- by-the view is so much better on of the National Liberal and Conservation in competition with our exportable supply, as well as inviting English and European goods to enter their goods out of competition."

The inference that Canada is pre pared to go the limit in allowing European goods to enter this country "under a freedom from tariff" United States to sell here is wide of the point, as Canada has no intention of making this country a practiced on United States for its tariff building against Canada.
