The Toronto World

A Morning Newspaper Published Every Day in the Year.

WHERE LONDON LEADS.

Arnold W. Brunner, the architect on the New York Municipal Art Commission, has just returned from a trip to Europe. He was impressed with several things he learned in London, that he thinks the modern architecture of Paris and London is not equal to that of New York.

"London," he says, "is more successful in handling intricate municipal problems than big artistic things, but it was news to me to learn that when the city displaced a slum it was bound by law to erect little homes, cheap and sanitary, elsewhere, sufficient to house the people displaced."

Another point that results obtained in Europe by a general governmental control over the general architecture and planning of a city, its great streets, squares and parks.

"The approaches and plazas in front of the railway stations give a chance to distribute the crowds. The luggage and cabs are taken care of and do not obstruct the street traffic. We have been far behind in that respect. Our stations are put on the edge of a street, as a rule, with no space for the public to disperse."

He might have included our theatres, concert halls and other places of public gathering. A wet night at Massey Hall, for example, is a nightmare.

BRITISH NAVAL DIFFERENCES.

When experts differ what should the mere laymen do? This difficulty arises very frequently in courts of law, and in other walks of life and business, and it has presented itself in a particularly serious form in connection with British naval administration. The difference of opinion between Admiral Sir John Fisher, the senior naval lord of the admiralty, and as such chiefly responsible for the sufficiency and efficiency of the Imperial navy, and Admiral Lord Charles Beresford, has long been acute and has been embittered by what appears to be sharp professional and personal antipathies. These have been strengthened by parliamentary and public discussions and by the division of responsible naval officers into two opposing and irreconcilable schools, to the evident detriment of the service and the uneasiness of the nation.

Sir John Fisher owed his appointment to the board of admiralty to the late government, whose members have identified themselves largely with the attacks made on his policy by Lord Charles Beresford, and those who either honestly sympathize with his views or find in them an opportunity to make party capital in aid of the present ministerial opposition. Upon his retirement from active service before the natural expiry of his term, he submitted a full statement of his contentions to the prime minister, and these have been considered by a committee of enquiry, comprising some of the strongest members of the government, including Mr. Asquith himself. The result has been wholly in favor of Sir John Fisher; the blame is found with both for inharmonious co-operation. The finding will not please the Beresford party and may not be accepted as finally closing the dispute. But a different decision would have been equally distasteful to the other side, and the controversy illustrates the difficulty which constantly arises during a period of transition, without the advantage of actual experience. But Sir John Fisher apparently will be allowed to continue his policy while the present government is in power.

THE IMPERIAL FORCES.

To co-ordinate the land forces of the imperial states presents a less formidable problem than that of providing for maritime defence. The duty of each state to protect itself from within its own domain is conceded and it is only a matter of commonsense to make them similar in training and equipment. Nothing has proved more fatal to military success than lack of inter-changeability in arms and to be mutually helpful there must be substantial agreement in organization and supplies. There can be no objection to this and it in no way affects complete local control. All that it means is that the state governments will pursue a uniform policy as that may be settled by consultation and to take advantage of every opportunity to make their officers and men as efficient as possible.

It is not necessary that any hard and fast identity in military organization or administration should be required. Each government knows best the conditions it has to meet and can adapt itself and its methods accordingly. Considerable annual expenditure is already made in the British self-governing states for defence purposes and it is only reasonable to expect that the best use will be made of the money annually voted. As the mother country has frankly recognized the claim of the self-governing states for full and unfettered control of their own forces united action can be got only by consultation and individual action, and this is evidently the object of the arrangement sanctioned by the imperial defence conference.

ONTARIO FARM LABOR.

Every season the clamor for labor on Ontario farms becomes greater. The rural population is steadily falling away. The census, to be taken next spring, will, it is expected, show a further decrease on that of 1900. This means that unless otherwise compensated, Ontario will have fewer members in the house of commons after the next redistribution. This political phase of the question may, perhaps, induce the ruling powers to take it up. But whether they do or not, it is a burning question with the farmers. It is generally admitted that the farmer who cannot get a profit out of his men does not know how to farm. The labor of any man who is kept intelligently busy will produce a profit for both himself and his employer. If he gets such share of the profit as seems fair he will not be unwilling to work. This is the basis of all labor contracts.

There is a very general feeling that the Ontario farmer does not pay enough for his labor. A dollar a day and his food is regarded as excellent wages by the farmer for a man who has to work from 5 or 6 in the morning till 8 or 9 at night. The same man can get \$2 or \$3 a day in the city for eight or ten hours' work. There is no mystery about the lack of labor on Ontario farms.

Let the farm laborer be paid at least the equivalent of the wages he could earn in the city and the scarcity of farm labor will be ended.

But the farmer declares he cannot afford to pay such a rate. This leads back to the contention that the farmer who cannot employ his labor profitably does not know how to farm intelligently.

It is, however, also objected by many excellent farmers, that good men always go farming on their own account. The answer to this is that a practically inexhaustible supply of men is to be had from Scotland and Ireland, men who doubtless would go farming on their own account after a year or two's experience, but a succession of whom would supply all the labor required in Ontario.

For the proper and profitable utilization of his farm labor the farmer, if unskilful, must look for instruction to the government college, the institutes and other means of training. Mixed farming, intensive culture, fruit and other departments of modern farm activity must be adopted if men are to be kept busy at all seasons, and their labor exploited to the greatest advantage.

NEEDLESS TO COMMENT. Thru his reverend spokesman, the Dominion Lord's Day Alliance declares that the selling of ice-cream as a food on Sunday in restaurants that are open in any case would compel the employment of 2000 people on that day. Comment is needless.

THE NEW ELEMENT IN CANADIAN LABOR TROUBLES. Detroit Free Press editorial: Fort William's strike is the second Canadian industrial disturbance this summer that has been attended with rioting and bloodshed.

The striking miners of Cape Breton are still out. Their destructive tendencies are still out. Their destructive tendencies are still out. Their destructive tendencies are still out.

COLONIAL DELEGATES NOT TRUSTING JAPAN

Some Objections Made, It is Said, at Naval Conference—Britain Relies on Ally.

LONDON, Aug. 15.—(By Associated Press.)—While the imperial defence conference had little difficulty in agreeing a scheme for the army, as explained in detail in previous despatches, the delegates found the naval question a hard problem to solve.

All the colonies had agreed to pay a fair share of the cost of the navy, but discussion as to the particular form of the contributions disclosed a sharp difference between the admiralty and the Canadian and Australian delegates.

This was particularly true with respect to Great Britain's recent policy in the Pacific. When the Anglo-Japanese treaty was concluded Great Britain withdrew the greater part of her fleet from the China coast and entirely abolished the North Pacific fleet, both of which could be used in conjunction with an Australian squadron to protect British trade and British possessions in all parts of the Pacific.

The home government sees no danger in that part of the world, and has full confidence in her eastern ally. The colonial delegates, however, persistently pictured Japan as a rival who might some day become possessed of a desire for more territory.

They, therefore, while agreeing to contribute to the maintenance of the main fleet, insisted that the greatest defenses should be exerted to provide defenses for their own coasts and trade.

Australia already is building torpedo boats as a nucleus of the fleet, and Canada purposes to do the same. The admiralty believes that these fleets will prove of greater use if centered from London, but to this the Canadians do not agree.

The fleet, they say, would come to the assistance of the mother country in a time of need, but it must be absolutely under the control of the federal government.

Canada's first ships will be modern cruisers, and the Canadians think that these should be placed in the Pacific. The home authorities, on the other hand, want them in the Atlantic, whence they could joint the main fleet in the North Sea on the shortest route.

The delegates are in daily conference and the admiralty hopes that a scheme will be completed and ready for presentation at the conference on Aug. 19.

New Zealand, South Africa and the smaller colonies have agreed to make direct contributions to the British navy and to depend on it for their protection.

Canada's Coast Lines. LONDON, Aug. 14.—The Canadian Associated Press learns that one result of the imperial defence conference will be the provision of the sum of 2 1/2 million pounds for the further development of the coast defence of Canada. It is understood that the Canadian delegates submitted to the imperia delegates a scheme in this regard.

On Thursday last the first of the admiralty will present bills to amend the Colonial Naval Defence Act of 1885, and to make better provisions respecting naval establishments in the British possessions.

ENGINEER'S PRIDE IN RECORD Dying, He Wouldn't Take Stimulant Until He'd Proved His Reliability.

ATLANTA, Ga., Aug. 15.—Passengers who were on the Southern train wrecked near Bristol, Va., bring details of the bravery of Samuel Bush, a driver of Knoxville, Tenn., who died as a result of his injuries.

Bush asked for a last look at his old engine, as hopeless a wreck as his driver. When the passengers came to him with whiskey he begged them to look after the comfort of the passengers. Told that no passengers had been injured, he said: "This good; but before I take this whiskey, I want you men to smell my breath and testify, if I need be, that I had not been drinking when this happened. All an engineer he cannot afford to have anything against that."

He worked for the Southern for 20 years.

KNOCKED DOWN BY CAR Prompt Work of Motorman Laura Saves Four-Year-Old Girl.

Little four-year-old Alley Setz, of Sherbourne-street, was knocked down by a street car at Yonge and Shuter-streets yesterday evening and although shaken up was not seriously injured. Yonge-street car No. 1304, in charge of motorman F. A. Laura, Conductor D. Matherson, was coming down the street at a fair speed when the little girl, who had lost her mother in the crowd at the corner stepped out on the track. The car was almost at the corner when she went on the track and it was only by very quick work of the motorman that a fatality was averted.

TYPOS TO VOTE ON IT. ST. JOSEPH, Mo., Aug. 15.—(Special.)—With love feast and exchange of presents, the fifty-fifth annual convention of the International Typographical Union came to a close Saturday. It was decided to submit the monetary benefit proposition to a referendum vote next February.

FIRE BOAT DEPUTATION WILL GO TO CITY HALL

Representatives of Harbor Interests and Island Residents to Ask Protection.

A large deputation, representing the marine, island and harbor interests, will wait on the civic fire and light committee to protest against the cavalier way in which the board of control dealt with Chief Thompson's fire-tug recommendation.

It looks, in fact, as tho the battle for a fire boat that would not only protect the island and waterfront, but could also assist in fighting fires further up town by means of pipe-lines, is just beginning in earnest.

There will be a fire-tug ordered before the year is out is the content assertion of Ald. Church, chairman of the fire and light committee. He says he will bring the issue to a vote in the city council, and that he is assured of a sufficient backing to overcome the board of control. He blames the board for the tardy policy which has delayed the installation of a proper fire alarm telegraph system, for which the people voted \$45,000 four years ago.

Would Cost \$75,000. Ald. Church says the board exaggerates the cost of a fire-tug and that a good one can be bought for \$75,000, and would cost \$5000 a year. He represents the mayor's imputation that the waterfront interests are not sufficiently great to warrant the outlay, and suggests that if his worship occasionally attended a meeting of the committee, he would have greater knowledge of the conditions.

"The mayor is getting altogether too autocratic and council will have to set him and the board right, as it did on the firemen's salaries and other matters," he said.

Owing to the absence from the city of many of the aldermen, it is difficult to get the trend of opinion. Ald. J. J. Graham, chairman of the island committee, declares himself unreservedly in favor of the purchase of a fire-tug. He thinks money could be expended to greater advantage in this way than in enlarging the waterworks engines and mains on the island, as the latter measure would not give to the waterfront or the city side the protection a fire-tug could afford. He had been informed by a gentleman who had seen the operations of fire boats in different cities, that the cost ranged from \$65,000 to \$110,000, but the more expensive boats were more powerful than Toronto needed, and had elaborate ornamental equipment which the city could afford to do without. The cost of maintenance would have, however, to be carefully considered.

Ald. Chisholm said he hadn't decided that a fire-tug should be bought, but would like a full discussion by council, as he could not more protection of some kind was needed. He thought that as a fire-tug could only land at Hanlan's Point, Centre Island and Ward's wharves, it couldn't be of use to cottages along the waterfront.

THE G.T.P. IN THE EAST Contractor Davis Returns With an Encouraging Report.

MONTREAL, Aug. 15.—(Special.)—M. P. Davis of the Ottawa contracting firm of M. P. and J. T. Davis, has just been over the 200 miles they are Pacific for the Grand Trunk Pacific between Quebec and New Brunswick frontier. He reported to-day that thirty miles of track laying had been completed, and that all the grading would be done by September, except where the ten steam shovels are at work at different points. These shovels move 1500 yards of earth per day each, and it will take them two years more to complete the work. There are twenty steel and concrete bridges on the line, and the work on the part of the alliance since its organization. Since the passing of the act, over two years ago, however, \$5,000 have been added to this number.

"There are yet," he continued, "75,000 who should be allowed the Sabbath Day privileges, and who are illegally being forced to work on Sunday."

Reference was made to the street railway traffic, which he admitted was legal.

"But, listen to those cars," he observed. "Since I came into this spotlight the time I started to preach, 40 cars have passed by. I feel sorry for those men who have to work on Sunday."

According to Mr. Moore, the enforcement of the Sabbath law was the practicing of the golden rule, and he quoted the statement of a number of English and Canadian statesmen bearing out his contention that Sabbath degradation meant national degradation, while Sabbath observance meant national prosperity. France, he pointed out, had never prospered as a nation since the revolution, which had destroyed the Sabbath law.

"There is," he said, "an inseparable relations between a nation's Sabbath observance and a nation's prosperity."

Rev. Mr. Moore chose his text from the Book of Nehemiah, and illustrated his arguments from the experiences of the Jewish nation, which prospered most when it observed the day of rest.

Car Traffic Blocked. Street railway traffic was suspended for half an hour at Gerrard and Broadview last night. The rear truck of a large double-truck Carlton-street car jumped the track while they were flying at 8.45. The truck became detached from the car body, and was wedged thru the floor. When about 30 cars were waiting for right of way they got things partially straightened out and the car limped off to the barns.

Including admission to Cobourg Horse Show. Tickets good going p.m. train August 16th, all trains August 17th to 20th inclusive. Return limit August 21st, 1909. Secure tickets from Grand Trunk Ticket Offices.

A large number of Barcelona revolutionists have sailed for South America. James Wellington of the New Wellington House, Port Dalhousie, was fined \$50 and costs for selling liquor to an Indian brayplocker.

Fourteen were injured, one fatally, in an explosion on the torpedo boat Dragon at St. Petersburg.

EATON'S DAILY STORE NEWS

As in June and July, Store Closes Saturday at One o'Clock during August. No Noon Delivery Saturday.

Men! A Tweed Suit for \$6.19

MEN'S suits in medium grey all wool tweed with faint stripe effect, single-breasted three button sack style, durable Italian body linings; well tailored throughout. Special value. Sizes 36 to 42. 6.19

Price of Boys' Two-Piece Suits Reduced to \$2.95

YES, ICE CREAM'S A FOOD—SO ARE ONIONS, MEAT, ETC.

But Butcher Shops Are Not Open on Sunday, Says Rev. T. A. Moore.

"The courts have been trying to figure out whether ice cream is a food," said Rev. T. Albert Moore, at Broadway Tabernacle last night. "Of course it is a food, so are onions, meat, etc., but should the butchers and green grocers keep open on Sunday? The law says that no unnecessary business should be transacted. It is necessary that people should have ice cream on Sunday? If we have to have ice cream on Sunday, it means that 2000 people in this city will have to work on Sunday. Are we that selfish that to get ice cream we should make all these people work?"

It was the fighting against such sentiments that prevented open saloons in this country.

As to the progress of the work of the Lord's Day Alliance, he said that previous to March 1, 1907, 150,000 men in Canada had been relieved from working on Sunday. This entailed, however, 14 years' labor on the part of the alliance since its organization. Since the passing of the act, over two years ago, however, \$5,000 have been added to this number.

"There are yet," he continued, "75,000 who should be allowed the Sabbath Day privileges, and who are illegally being forced to work on Sunday."

Reference was made to the street railway traffic, which he admitted was legal.

"But, listen to those cars," he observed. "Since I came into this spotlight the time I started to preach, 40 cars have passed by. I feel sorry for those men who have to work on Sunday."

According to Mr. Moore, the enforcement of the Sabbath law was the practicing of the golden rule, and he quoted the statement of a number of English and Canadian statesmen bearing out his contention that Sabbath degradation meant national degradation, while Sabbath observance meant national prosperity. France, he pointed out, had never prospered as a nation since the revolution, which had destroyed the Sabbath law.

"There is," he said, "an inseparable relations between a nation's Sabbath observance and a nation's prosperity."

MONORAIL IS COSTLY

Will Cost About a Million to Make Experiments. CLEVELAND, O., Aug. 15.—Engineers at work on plans for the two-mile stretch of monorails near Schenectady that was to have been used in experimenting with the 500-mile-per-hour magnetic railroad invented by Mayor Johnson several years ago, have found that the cost of the experiments would run to \$1,000,000 or more. This has halted the work, as the General Electric Company does not wish to assume the entire burden.

Some time ago the suggestion was made that a pool be formed for the purpose of fitting out the two miles of rails, but this step has not yet been taken.

Mr. Johnson's invention may be ahead of the times," said A. E. Du Pont. "There is no limit to the speed at which cars can go with this system in use. Engineers declare they could be made to go 800 miles an hour or 1000 miles an hour. At the former speed, the trip from New York to Chicago could be made in 1-1/2 hours."

In the cellar of Mayor Johnson's home several years ago Mr. Du Pont had a number of rides on a magnetic line 80 feet long fitted out by the mayor for experiments.

On riding on it one floats along in a car poised between two magnets, touching neither the upper or lower rail. Mr. Du Pont has suggested to the mayor that the tubes or cars built for the system be unsupplied with windows. In that event passengers would be deprived of the novel sensation of

Day's Doings in YORK COUNTY

COMMISSION MAKE OFFER FOR PRISON SITE

Local Farms Were Favorably Considered—West and North Toronto News.

UNIONVILLE, Aug. 15.—(Special).—It now transpires that the special commission appointed by the Ontario Government to select a site for the new Central Prison grounds have made an offer for "Burnside Farm," the property of A. G. Gormley, and located immediately to the east and north of the village.

The farm contains 300 acres and in the character of the soil, with an abundance of running water and nearness of access to the city, is said to have in the mind of the commission approached nearer to the ideal sought than any other.

The price offered by the government was \$30,000, but Mr. Gormley is reported as asking \$55,000, which the commission regarded as excessive.

To the north of Mr. Gormley, the adjoining farm of 100 acres is owned by Henry Miller, while the farm of 100 acres to the east is owned by Mr. Dixon. Either of these could have been secured at a reasonable figure. The soil throughout is well adapted for mixed farming, and on the farm of Mr. Dixon there is a large quantity of excellent building sand. As far as known the commission have not made an offer for any other York County properties for Central Prison sites.

Dr. D. A. Carmichael who passed such a brilliant examination at the recent medical examinations of practicing with Dr. Carmichael of Peterboro, his uncle, and as in his academic career is meeting with eminent success.

With the incorporation of Unionville as a police village, the town is for the first time in its history collecting a fair return for the revenue collected. With an energetic board of commissioners many needed improvements have been carried to completion. On both the east and west side of the streets long stretches of concrete sidewalks have been laid down, while the character of the work performed by Frisby Bros. is excellent. Next year the commissioners have still greater projects in mind.

While the putting down of good sidewalks is commendable it is equally imperative that some steps be taken to provide better street lighting, and a number of accidents have already occurred, while apart from this the comfort of the villagers in general is hands better lighted streets. A number of schemes have been discussed and some definite plan will in all probability soon be evolved. The village will readily accept a little extra expense for well-lighted streets.

Frank Stiver has just completed at Stouffville for Silver Bros. of Unionville, one of the modern grain elevators in Ontario.

William Monkman has left for a trip to the northwest. About 70 took part in the Markham public library excursion to Jackson's Point.

The refreshing showers of to-day will prove of immense benefit to the meadow lands and crop root. If a police village has the legal authority to acquire park grounds no time ought to be lost in securing the present baseball grounds to the south of the G.T.R. tracks and station.

WEST TORONTO. Local Cricketers Win Over St. Barnabas by Fair Margin.

WEST TORONTO, Aug. 15.—The police are making an investigation regarding the information laid against two little girls named Flora and Anne Rutherford of Medina street, aged 12 and 10 years respectively, who are charged with the theft of a ring from Mrs. Thomas' house, 59 East Annetta street. The missing ring was located last night by the police at the Rutherford house on Medland street.

Bro. A. E. Purvis, L. O. L. 997, has won the Royal Arch sash presented by Bro. J. Bell, and the ring presented by the lodge, for bringing in the largest number of new members.

There are 30 cars of stock in the Union Stock Yards for to-morrow's market.

Two games were played in the West Toronto Senior Baseball League on Saturday. In the first game Davernport Stars defeated Victorias by 8 to 0. The Stars' victory was due in a great measure to the splendid pitching of "Sharkey" Welsh.

The Ravens went down to defeat before the All-Stars with a score of 3 to 0. The West Toronto cricket team defeated St. Barnabas on Saturday by 11 runs. The West Toronto team's score was 79 and St. Barnabas 68. Snazelle of West Toronto, with 21 runs to his credit and Matralls of St. Barnabas with 35 runs, were the best scores made during the game.

AGINCOURT. Kennedy Family Have Great Family Reunion at Agincourt.

AGINCOURT, Aug. 15.—(Special).—A memorable event in the history of this village was the re-union on Friday of the Kennedy family. Davernport, the best known and most respected in the historic old township of Scarborough. The gathering was held at the residence of Lyman Kennedy, a short distance north of the village, and in the weather which was ideal, the large and representative gathering and the happy feeling generally prevailing was all that could be desired.

Those present were the descendants of Thomas, James and William, the three oldest sons of the late Samuel Kennedy, who settled about the old home, following as their father had done the pursuit of agriculture. More than one hundred were present, among them two of the three surviving daughters of Thomas, one son of James and two sons and a daughter

West Toronto North Toronto East Toronto

of William, together with their children and grandchildren. During the afternoon games were indulged in by both old and young. Just before sunset a group photo was taken, and following luncheon served on the lawn, an impromptu program of speech and song was carried out.

Rev. Mr. Anthony, of Knox Church, Presbyterian, presided, while John L. Patterson referred briefly, but effectively, to the high standards and ideals of the Kennedy family. Mr. Patterson paid tribute to the success attained in agriculture and the professions. Hugh K. Clark, John Kennedy, James Green, Thos. Kennedy, Alfred, of Prince Albert, Sask., and William of Liverpool, England, spoke briefly.

Others who added their quota of praise were T. C. Irving of Toronto, William Menzie, John Parker, and Rev. J. A. Brown of Fergus, for 16 years minister of Knox Church, Agincourt.

W. T. Kennedy added greatly to the enjoyment of the evening in musical selections, and the gathering dispersed with the singing of the One Hundredth Psalm and the national anthem.

WOODBRIDGE. WOODBRIDGE, Aug. 15.—(Special).—Mrs. H. N. Schmidt and Misses Besse Wallace and Vera Hallett are away at Preston Springs for two weeks.

C. S. Hare, formerly of the Northern Crown Bank, was married in Comber on August 4th. He is manager of the bank agency there.

Messrs. Geo. Porter and Wm. Beamish were in the city on an extended trip thru the northwest.

EAST TORONTO. It is expected that by to-morrow or Wednesday the list containing the names of those who donated prizes will be published together with the list of the various events to be held on August 25th, at the Y.M.C.A.'s big hold day.

The residents in and around the vicinity of Kingston-road are very much pleased with the city's experiments in regard to the use of oil on that road.

The oil on the roads serves two purposes, that of keeping down the dust and letting the water run off instead of forming pools as formerly.

S. G. Maurice of Woodstock, Ont., is in the city for five days with friends in East Toronto.

AURORA. Well-Known York County Family Will Have Big Gathering.

AURORA, Aug. 15.—(Special).—The descendants of the late John Hartman will, on September 8th, celebrate on the homestead, lot 20, Township of Whitchurch, the 102nd anniversary of the settlement of the family on that farm. The family have issued a neat little folder giving in detail the names and ages of the descendants which in itself forms a most valuable history. A large number of invitations have been issued.

WYCHWOOD. District Deputy H. G. Mullas of Brampton, will visit Yarmouth Lodge, S. O. E. at their lodge room, Wychwood, on Tuesday (17th) to install their new officers.

ELECTRICITY IN SURGERY. Found Effective in Healing Wounds by Eliminating Infection.

BERLIN, Aug. 15.—A new use for electricity involving its employment as the handmaiden of surgery is recommended to medical men in the latest issue of The Roentgen Ray Archives, a German scientific review. The writer affirms that the healing of wounds, cuts and lacerations, which have become infected thru the presence of dirt and other extraneous matter, can often be effected by the application of rays emanating from high-power electrical currents.

The healing influence of electricity in such wounds is attributed in part to the ozone, which is produced thru powerful electrical discharges, it being well established that ozone is destructive to noxious bacteria. The writer suggests that electricity itself can be used to heal sores and abscesses caused by Roentgen ray burns, which heretofore have proved extremely difficult to treat successfully.

WATER MAIN BREAKS. Twelve-inch Pipe on Gerrard Street Cracks Sunday Morning.

The elbow of the 12-inch water main at the east end of the Gerrard-street bridge over the Don, cracked at 11 o'clock yesterday morning and the escaping water caused a small landslide down into the ravine. About two tons of earth were washed away.

The Riverdale supply was not cut off as the broken main is only one of three sending water into that district. There is one crossing the Don at Queen-street and another at Eastern-avenue. The Gerrard-street main was shut off at both ends of the bridge, but the other mains provided sufficient supply.

Workers started repairing the break at 1 o'clock and it is expected it will be fixed some time to-day.

Nuremberg Forbids Women's Trains. BERLIN, Aug. 14. Following the example of other municipalities which have recently passed edicts against the wearing of long batings the police authorities of Nuremberg also are starting in to regulate the question of woman's dress. They have issued a regulation forbidding any woman to wear upon the public streets a dress which is provided with a train. Violations of the rule, which it is said, has been passed in the interests of the public health, will be punished either by a fine or imprisonment up to two weeks.

The idea of the authorities is that trains not only set up dust but collect germs and thus subject their wearers to risk of infection.

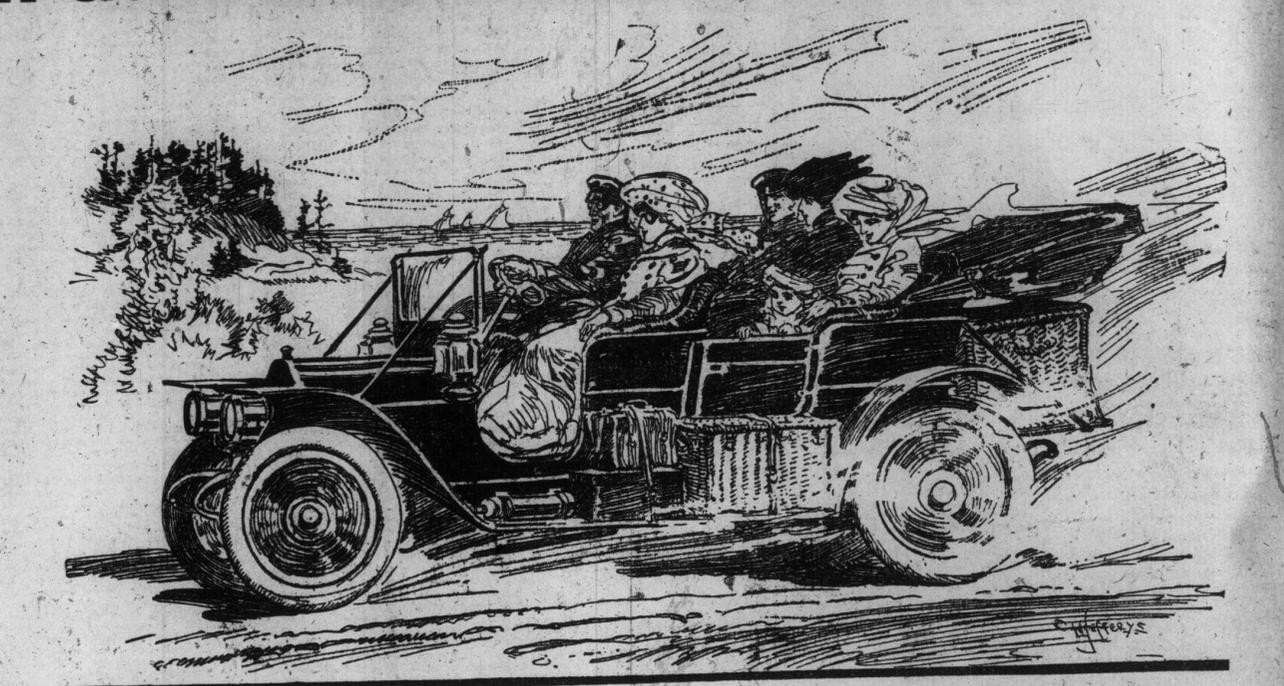

Sorry to Lose Him. At the conclusion of the service in Grace Church, Elm-street, last night, Rev. J. A. Fidler addressed the congregation, expressing regret at the departure of Dr. Gutzeit, the organist and choirmaster, who begins his duties as organist of Wesley Methodist Church on Sept. 1.

H. H. FUDGER, President. J. WOOD, Manager. Store Closes Daily at 5.30 p.m.

THE ROBERT SIMPSON COMPANY, LIMITED

PROBABILITIES. Fresh west to northwest winds; fair and warm; showers; local thunderstorms. MONDAY, AUG. 16.
