Herschell's Weather Table.

The following table is constructed upon a philosophical consideration of the attraction of the Sun and Moon in their several positions respecting the earth; and confirmed by the experience of many years actual observation, will, without trouble, suggest to the observer what kind of weather will most probably follow the Moon's entrance into any of her quarters, and that so near the truth, that in very few instances will it be found to fail. When it is said "Very rainy," it is not designed to convey the idea that it will rain all the time, but taking the whole of this quarter of the moon, and one or two of the first days of the next quarter, it will be "very rainy," compared with the general state of the weather for that season of the year, and so of all the other statements.

The Moon's entrance, at full, change and quarters, during six of the afternoon hours, viz. from four to ten, may be followed by fair weather; this is mostly dependent on the wind. The same entrance during all the hours after midnight, except the two first is unfavorable to fair weather, the like, nearly, may be observed in winter.

<i>Change of Moon.</i>	<i>Summer.</i>	<i>Winter.</i>
If it be new or full moon, or the moon enters into the first or last quarters, at the hour of 12 at noon,	} Very rainy,	Rain and snow.
Or between the hours of 2 & 4 P. M.		
4 & 6.	Changeable,	Fair and mild.
6 & 8,	Fair,	Fair.

Old and New Style.

The Julian Year, introduced by Julius Cæsar, 45 years before the Birth of Christ, made every fourth year, without exception a leap year. This however, was an over correction; for it supposed the length of the tropical year to be $365\frac{1}{4}$ days, which is too great, and induces an error of 7 days in 900 years. Accordingly, as early as the year 1414, it was perceived that the equinoxes were gradually moving from the 21st of March and September, where they ought always to have fallen, had the Julian year been exact. A new reform of the calendar was thus required; and it took place under the popedom of Gregory XIII., by the omission of ten nominal days after the 4th of October, 1582, so the next day was called the 15th and not the 5th. This change was immediately adopted in all Roman Catholic countries, but tardily in the countries of Protestantism.

In England, *the change of style*, as it was called, took place after the 2^d day of September, 1752. eleven nominal days being then struck out; so that the last day of Old style being the 2^d, the 1st of New style, (the next day,) was called the 14th instead of the 3rd. The same legislative enactment which established the Gregorian year in England in 1752, shortened the preceding year, 1751 by a full quarter. Previous to that time the year was held to begin with the 25th of March, and the year 1751 accordingly did so; but that year was not suffered to run out, being supplanted on the 1st of January by the year 1752, which it was enacted should commence on that day.

Russia is now the only country in Europe, in which the old style is still adhered to, and the difference between the other European and Russian dates amounts, at present to about two weeks.

1st MONTH

JANUARY,

HATH XXXI DAYS.

Another Year! my heart exulting cries,
 Another Year! with promised blessings rise!
 Eternal Power! from whom these blessings flow,
 Teach me still more to wonder, more to know,
 And let me ever midst these bounties raise,
 A humble note of thankfulness and praise.

MOON'S CHANGES.

Nature! Great parent! whose unceasing hand
Rolls round the Seasons of the changeful year,
How mighty, how majestic are thy works!
With what a pleasing dread they swell the soul.

The clear ethereal round
Shines out intensely keen, it freezes on
From pole to pole the frigid influence falls
Thro' the still night incessant, heavy, strong!

Greatness m

Unhappy he, who in this season pent
 Within the dusty gloom of City lane
 Pines for the flowery paths and woody shades
 Of Nature's verdant Empire, good and fair
 From which the love of lucre or of power
 Enticed his youthful steps.

MOON'S CHANGES.

Greatness may build the Tomb, but goodness must give the Epitaph.

The heavens in solemn stillness, see!
 Black watery mists and rolling clouds conspire
 To wage the awful elemental war!
 Lightning, its fatal light and power displays;
 Hear ye the thunder of His power, Behold!
 The thirsty land receive th' abundant rain,
 And praise the God of nature's vast domain!

The love of justice is often nothing more than the fear of suffering injustice.

9th MONTH,

SEPTEMBER,

HATH XXX DAYS.

Such is of well spent life the time,
 When busy days are past;
 Man verging gradual from his prime
 Meets sacred peace at last:
 He gains pacific Autum meek and bland
 And dauntless braves the stroke of winter's palsied hand.

MOON'S CHANGES.

A beggarly clergy is the sure sign of a bankrupt religion.

Swearing and obscenity are sins without temptation, without alleviation and without reward.

1844 MONTH,

NOVEMBER,

HATH XXX DAYS

How fumid is the sky ! how gleams
 The florid sun o'er yonder distant hill!
 How soft the murmurs of the icy stream
 That winds along the snow-clad vale.
 How tranquil, yet how bleak and sear,
 The Red man's summer of the year!

MOON'S CHANGES.

Full Moon, 7th day, 0 hour, 25 minutes, morning.
 Last Quarter, 14th " 9th " 49 " afternoon.
 New Moon, 21st " 0 " 49 " afternoon.

Is it now fitting that on winter's eve,
 When time is plenteous on the Yeoman's hand,
 That any of his humbler sons should pine
 For lack of culture in this favor'd land?
 That need-full knowledge in this age of light
 Should not, by birth, be every Briton's right?

CITY OF TORONTO.

Mayor, Henry Sherwood. *Chamberlain*, A. T. McCord.
Clerk, Charles Daly. Office, City Hall, Market Square.
 Population, by census, Oct. 1842.—15,661.

BIBLE AND TRACT SOCIETY.

President, Hon. J. H. Dunn. *Secretaries*, W. McMaster,
 and Lucius O'Brien, M. D. *Depositary*, James Carless.
Yonge Street.

AGRICULTURAL SOCIETY, H. D.

President, E. W. Thompson,
Secretary, Geo. D. Wells, Office, 150, King St.
Treasurer, William Atkinson.

The *Fairs* and *Fat Cattle Show* take place in front of the
 New Gaol and Court House on the second Wednesday of
 May and October in each year.

TORONTO HOSPITAL.

Trustees.—Dr. Widmer, J. F. Smith, H. D. Grasset, W.
 Ross, G. P. Ridout, J. R. Armstrong, Esqrs. *Steward*, J. Sin-
 clair.

TORONTO MECHANIC'S INSTITUTE, 1831.

President, W. T. Leach, M.A. *Secretary*, C. Sewell, King
 Street. Library and Lecture Room in Market Buildings.

TEMPERANCE REFORMATION SOCIETY, 1840.

Treasurer, Jesse Ketchum Esq. *Secretary*, Alex. Christie,
 King Street. This society now embraces upwards of 2000
 members.

Collector of Customs. W.M. Kelly, Office, Yonge St. Wharf.

MARRIAGE LICENSE AGENTS.

A. Mercer, *Toronto*; J. Sinclair, *Richmond Hill*; G. Alley,
Orillia; W. Boswell, *Whitby*; W. Osler, *Bond Head*; S.F.
 Jarvis, *Toronto Township*.

The Post Office Department.

Important changes have been ordered by the Home Go-
 vernment in the management of this department in Canada.
 The rates of postage are to be diminished, and the patronage
 hitherto vested in the Deputy Postmaster General will be ex-
 ercised by the Governor. With faithful and responsible Coun-
 cillors this additional power in the Executive may be made
 greatly conducive to the public good.

QUEEN'S COLLEGE, KINGSTON.

PROFESSORS.

<i>Logic and Mental Philosophy,</i>	T. Liddell, D.D
<i>Classics and Modern Languages,</i>	P. C. Campbell, A.M.
<i>Mathematics and Natural Philosophy,</i>	James Williamson,
Annual charge for Tuition, £10.	

VICTORIA COLLEGE, COBOURG.

THE FACULTY.—Rev. Egerton Ryerson, D.D., *Principal, with the Department of Theology and Moral Science*; Rev. J. Hurlburt, A.M., *Professor of the Greek Language and Literature*; Rev. D. C. Vannorman, A.M., *Professor of the Latin Language and Literature*; W. Kingston, A.M., *Professor of Mathematics, with the charge of the English Department*; Rev. J. Spencer, *Teacher in the English Department*.

Rev. John Beatty, *Treasurer*, | Mr. Robert Webster, *Steward*.

The Palo de Vaca or Cow Tree.

This remarkable tree is a native of Caraccas, South America, and is so called because incisions made into its trunk are followed by a profuse flow of thickish milk slightly viscid, destitute of acidity, and exhaling a very balsamic odour.

The trunk of the Palo de Vaca sometimes measures twenty feet in circumference five feet from the root, this colossal stem runs up sixty feet uninterrupted by either leaf or branch when its vast arms and minor branches luxuriantly clothed with foliage spreads on every side full thirty feet from the trunk, and rising to an additional elevation of forty feet, making 100 feet high in all, while its thick roots scarcely penetrates the rocky mountains on which it is found.

Election Law.

Sec. I. Repeals all former Acts relative to Elections.

II. Elections to be held in each Township or Ward as the case may be.

IV. Townships not entitled to hold Town Meetings to be included in the next Townships, both forming one Electoral Township.

VI. Poll to be held where the last Town Meeting was held, and in Cities, at such places in each Ward as the Returning Officer shall appoint.

VII. The Elector to vote only in such Township or Ward within which the property in right of which he votes lies, and no other, under the penalty of £10.

VIII. Returning Officers may require Electors or Candidates to make oath or affirmation, that they have not before

voted at such polling place or any other during said election.

XI. Polls to be kept open two days only, from 9 A. M. to 5 P. M.

XXVI. Returning Officer required to take the bribery oath.

XXVIII. Returning Officer or Candidate may require voters to take the bribery oath.

XXV. Returning Officer a Magistrate for the time being, with power to apprehend disturbers of the peace, to appoint special Constables and others to assist him in doing so.

XXVII. Returning Officer empowered to seize all offensive weapons found on the persons of electors or others, refusal to give up which, punishable by fine, not exceeding £25 and imprisonment not exceeding three Calendar months.

XXVIII. Persons convicted of a Battery within two miles of the Poll punishable as above.

XXIX. Candidates convicted of Bribery forfeit their election.

XXX—I. Persons Convicted of Bribery exposed to a fine not exceeding £100, and if an elector, his vote struck from the Poll Book.

XXXIII. Keeping open Houses and hiring of conveyances to promote the elections of a Candidate, declared unlawful.

All persons who have not resided six calendar months, except the Returning Officer, Poll Clerk and Constables, in such Township or Ward, not to approach within two miles of the Poll, with offensive weapons—punishable by fine not exceeding £50, and imprisonment for six months.

The above is a synopsis of one of the most important acts, if not the most important one, to which the royal assent has been given since the union of the Canadas, and we may regard this assent as a sort of pledge that the Queen's government really intend to do justice to this long misgoverned country. Her Majesty having thus acknowledged the necessity of a law in this province, to secure the freedom of the exercise of the most sacred right and highest privilege of freemen; the elector has now a most important duty to perform,—to sustain that freedom and to preserve the *purity* of elections.

In a representative government like ours the *power of voting* is the great moral lever by which the machinery of Responsible Government is to be moved; there is no other peaceful manner in which public sentiment can be brought to bear upon its administration. This doctrine is now happily recognized by the highest authority in the land, and it is for the electors now to sustain and adorn it by acting with uprightness, fidelity, and intelligence at the poll.

There is a moral power and grandeur about a peaceful election which ought to repress all desire to advance mere party interests or private gain,—here there is no need of effigies or processions, drums or fife, flags or party banners; this busi-

ness of reason can very well be conducted without such aid,—for here come the majesty of the people to vindicate their rights, redress their grievances, and uphold the institutions of the country.

Value of the Bible.—It has God for its author, Salvation for its end, and Truth without any admixture of error for its matter. Were men to drink of this pure river of life instead of the turbid pools formed from its waters—the creeds and dogmas of religious sects, there would be a much greater amount of spiritual Christianity in the world.

Extract from the Division Court Act.

That the plaintiff, in any suit brought in any Division Court, shall enter a copy of his account or demand in writing, which shall be numbered according to the order in which it shall be entered, and thereupon a summons bearing the number of the account or demand on the margin thereof, shall be issued, which shall be in substance, in the form of the schedule to this Act annexed, according to the nature of the demand; and a copy of such summons, to which shall be attached a copy of such account or demand, shall be served on the defendant, eight days at least before the day on which the Division Court shall be holden at which the cause shall be tried; and delivery of such copies of summons and account or demand to the defendant, or delivery thereof to his wife or servant, or any grown person, being an inmate of his dwelling house or usual place of abode, trading or dealing, shall be deemed a good service of such summons: *Provided always*, That personal service on the debtor, of such summons, shall be necessary in all cases where the amount sued for exceeds the sum of forty shillings.

That no such summons shall be issued, unless the plaintiff shall, at the time of entering his account or demand, deposit with the Clerk of the Court, for every claim not exceeding twenty shillings, the sum of one shilling, and for every claim exceeding twenty shillings, one twentieth part thereof (neglecting any sum less than six-pence, in estimating such twentieth part,) and if upon the day of the return of any such summons, or at any continuation or adjournment of the said Court, or of the cause for which the said summons shall have issued, the plaintiff shall not appear in person, or by some other person in his behalf, or appearing, shall not make proof of his demand to the satisfaction of the Court, it shall be lawful for the Judge, if he shall think fit, to award to the defendant a part or the whole of such deposit money, by way of costs, and as satisfaction for his trouble and attendance, with such further sum as the Judge in his discretion shall think fit, and to order and compel the plaintiff to pay such further sum, by such ways and means as any debt ordered to be paid by the same Court, can be recovered; but so much of the said depos-

Extract from the Common School Act--Common School Commissioners--When Elected--their duties and term of Office.

That at the annual Township or Parish meetings to be held in the month of January, one thousand eight hundred and forty-two, and at each succeeding annual meeting, for the Election of Township and Parish Officers, there shall be elected in the manner prescribed by Law for the Election of such Officers, five Commissioners for each and every Township and Parish entitled to elect one District Councillor and seven Commissioner for each and every Township entitled to elect two District Councillors; and the said Commissioners shall be called "Common School Commissioners," and their duties shall be:

Firstly: To choose, and whenever funds shall be provided for that purpose by the District Council, to acquire a site for a Common School House in each School District in their Township or Parish in which no such School House shall exist at the time this Act shall come in force, and to make an estimate of the cost of such site and of the expense of building a School House and of keeping the same in repair, and an estimate of the cost of furnishing each Common School in the Township or Parish with the necessary fuel and appendages; and to transmit such estimate to

the Clerk of the District Council, in order that the inhabitants of the respective School Districts may be assessed accordingly.

Secondly: To appoint for each of the School Districts within the Township or Parish one or more of their number to superintend the building and repairing of the Common School House in such School District, and the furnishing it with fuel and other necessary things, and generally, to manage the Concerns of the School, and report to the School Commissioners, once in three months, that is to say: on or before the first Monday in each of the months of March, June, September and December, the state of such School, the amount of monies received for it, the manner in which such sum has been expended, the number of children above five and under sixteen years of age taught in it, and the number of days they attended.

Thirdly: To agree with and appoint, from time to time, Teachers in the said Common Schools, and to remove such Teachers when they shall find just cause for so doing: *Provided always*, That no person, except he be one of the persons known as *les freres de la Doctrine Chretienne*, shall be appointed a Teacher in any of the said Schools, unless he be a subject of Her Majesty by birth or naturalization, of good moral character and shall have been examined before the said Commissioners as to learning and ability.

Fourthly: To regulate for each School respectively the course of study to be followed in such School, and the books to be used therein, and to establish rules for the conduct of the Schools, and communicate them in writing to the respective Teachers.

Fifthly: To hear and determine all disputes which may arise out of the proceedings of the managing or visiting Commissioners hereinafter mentioned, or other matters of dispute in respect to Common Schools within their Township or Parish.

Sixthly: To appoint two or more of their number to visit each Common School in the Township or Parish, once at least in each month, and to report the state of such School, whether the rules and regulations established by the Commissioners are duly observed, the number and proficiency of the scholars, the character and ability of the Teachers, the conduct of the managing Commissioners, and all matters connected with the management and well-being of the School.

Seventhly: To grant warrants from time to time upon the District Treasurer, for such sums of money as may be required for paying the Teachers, and defraying the expenses of the several Common Schools within the Township or Parish: *Provided always*, That such warrants shall be signed by a majority of the Commissioners, of which the Chairman shall be one; and that the sum of money to be paid under the same shall in no case exceed the amount then appropriated by Law, and collectively for the said Schools respectively.

Eighthly: To exonerate such poor persons as they may

Ninthly : To record and preserve all their proceedings in a book to be provided for that purpose. the proceedings of each meeting with the names of the Commissioners present, being authenticated by the signature of the Chairman ; and such book shall be delivered over by the Commissioners to their successors in office, and it shall be the duty of the Town Clerks to attend to all such meetings, for the purpose of making such record.

Tenthly : To report all their proceedings, and all matters connected with the several Common Schools in the Township or Parish, to the District Council annually, on or before the third Monday of November, such report being in the form to be furnished by the Superintendent of Education.

Eleventhly : It shall be the duty of the said Common School Commissioners, within ten days after the expiration of their respective periods of service, to deliver to their successors in office any and all books, accounts, vouchers, papers, reports, and other documents, in their possessions, as such Commissioners, and they may in case of default, be thereunto constrained by all lawful way and means.

Commissioners shall remain in office until the annual Parish or Township meeting next following the time of their election, and until others shall be elected in their places : and in case the office of one or more Commissioners shall be vacated by death, refusal to serve, removal out of the Township or Parish, or incapacity, the vacancy shall be supplied by an appointment to be made by the remaining Commissioners, at their first meeting after such vacancy shall occur.

Temperance.

Decrease of crime in Ireland.—Lord Morpeth stated at a public dinner in Dublin, that arrests for assaults upon the person, had decreased under the influence of the Temperance Reformation, according to the following ratio :

In 1837.....	12,096.
1838.....	11,058.
1839.....	1,077.
1840.....	only 773.

Is not a cause producing results so salutary, deserving of universal commendation and support ? Surely it is.

An interesting fact.—At the great Croton celebration, in New York, in the month of October, when about 200,000 persons had assembled to rejoice in the introduction of **PURE WATER** from the Croton River, upwards of 40 miles distant from the City—when all classes had for a time released themselves from business, to enjoy the festivities of the occasion—

It was stated by a careful observer, that not three cases of intoxication was discovered among so vast an assemblage! What power has produced this mighty change? Knowledge—persuasion, and example. Moderation may have preserved its thousands—Total Abstinence has recovered its tens of thousands, who were hastening to the drunkards grave, and made them blessings to society.

Suicides.—Those men who destroy a healthful constitution of body, by Intemperance, and an irregular life, do as manifestly kill themselves, as those who hang, or poison, or drown themselves.—*Sherlock.*

Responsibility of Drunkards.—Persons guilty of crime when drunk, must suffer punishment of the laws when sober.—In Ancient Greece a man received a double punishment in such cases—viz.—one for the crime itself, and another for the inebriety which led to it.—The Athenians also, inflicted severe punishment, and made intemperance in a Magistrate a Capital offence. What a reduction of the Magistracy in Canada, would this law of the Athenians make, were it enforced!

TRUTH.—Truth, whether in or out of fashion, is the measure of knowledge, and the business of the understanding; whatsoever is besides that, however authorised by consent, or recommended by rarity, is nothing but ignorance or something worse.—*Locke.* Whoever knew truth put to the worse in a free and open encounter?—*Milton.*

A TABLE,

Showing the number of days from any day in one month, to the same day in any other month. Very useful in Banking business.

RECIPES.

Grafting Trees.—The best grafting wax is made of 1lb. Pitch, 1lb. Rosin, ½lb. Bees Wax, ¼lb. Hogs Lard, ¼lb of raw Turpentine melted together.—When in a warm state it may be spread with a brush, on moderately thin brown paper, and when cold, the paper may be cut into stripes, about ¼ inch for use. When a scion has been fitted to the stock, warm one of the strips with the breath, and bind it round both, pressing gently

with the hand, when it will be found to adhere so closely as to exclude both air and moisture.—Fruit trees are found to grow best on declivities.—A small quantity of Lime thoroughly mixed with the mould, is said greatly to ensure their rooting and future growth, (4 bushels do an acre.)

Dressing Ointment for Canker in Horses.—Tar 1lb. Tallow 1lb. Verdigrise in fine powder 4 ounces—mix together.

Dressing Ointment for Cattle.—Tallow 3 pounds—Tar, Rosin, and Spirits Turpentine, each 1lb. Blue Vitriol, Oil of Vitriol, and Alum each 5 ounces—mix carefully for use.

To give the flavour of smoke to meat.—Take Pyroligneous Acid (or Essence of Smoke) and give your Meat two or three coats with a painter's brush; then hang up to dry.—This simple process saves both time and expense.

Economy in feeding Horses.—By crushing or bruising Oats, or soaking them a few hours with hot water, it is affirmed a Horse will become fatter on half his usual allowance.

To Restore musty flour.—Mix $\frac{1}{2}$ Dram of common Magnesia, with every pound of flour, and it will greatly improve your bread.

To stop Ravages of Caterpillars from Shrubs Plants, and Vegetables.—Take a chafing dish with lighted charcoal, and place it under the branches of the tree, or bush, whereon are the caterpillars; then throw a little brimstone on the coals. The vapour of the sulphur, which is mortal to these insects, and the suffocating fixed air arising from the charcoal, will not only destroy all that are on the tree, but will effectually prevent the shrubs from being at that season, infested with them. A pound of sulphur will clear as many trees as grow on several acres.

Another method of driving these insects off fruit-trees is, to boil together a quantity of rue, wormwood, and common tobacco (of each equal parts), in common water. The liquor should be very strong. Sprinkle this on the leaves and young branches every morning and evening during the time the fruit is ripening.

To Whiten Straw Hats.—First wash them with soap and water then place in a box along with burning sulphur for an hour.

Excellent Blacking.—Ivory black, ground fine, 4 ounces; treacle, 2 ounces; vinegar, $\frac{3}{4}$ of a pint; spermaceti oil, a teaspoonful. If the ingredients are of the best qualities, this blacking will be found exceedingly good. Mix the oil with the black first, then add the treacle, and lastly the vinegar.

To Purify Water for Domestic and other Purposes—This method consists in placing horizontally, in the midst of a common water butt, a false bottom, perforated with a great number of little holes. The butt being thus divided into two

equal parts must be in light, and which the cylinder, prevent it as to detach into the material is servant to economy; water thus days, and by the rott

equal parts, the upper is filled with pieces of charcoal, which must be neither too large nor too small, thoroughly burned, light, and well washed. Immediately under the cock, by which the water enters the butt, must be placed a small hollow cylinder, being merely to break the force of the water, and prevent it from falling upon the charcoal with such violence as to detach from any particles of dirt, and wash them through into the lower receptacle; it is of little consequence of what material it is made. This contrivance might be made subservient to the interests of agriculture as well as domestic economy; and it would be highly advantageous to provide water thus filtered for the cattle during the whole of the dog days, and particularly when the ponds and streams are infected by the rotting of hemp and flax.

To Clean Paper Hangings.—Cut into eight pieces a stale quartern loaf: with one of these pieces after having blown off all the dust from the paper to be cleaned by means of a good pair of bellows, begin at the top of the room holding the crust in the hand, and wiping lightly downward with the crumb about half a yard at each stroke, till the upper part of the hangings is completely cleaned all round: then go again round with the like sweeping stroke downward, always commencing each successive course a little higher than the upper stroke had extended till the bottom be finished. This operation if carefully performed, will frequently make very old paper look almost equal to new. Great caution must be used not by any means to rub the paper hard nor to attempt cleaning it the cross or horizontal way. The dirty part of the bread too must be each time cut away, and the pieces renewed as soon as at all necessary.

How to Prognosticate the Summer.—When there has been no particular storm about the time of the Spring Equinox, (March 21,) if a storm arise out of the east, at or before that day, or if a storm from any point of the compass, arise near a week after the equinox then in either of these cases, the succeeding summer is generally dry, four times in five. But if a storm arise from the S.W., or W.S.W. on or just before the Equinox, then the summer following is generally wet five times in six.

Eggs and Chickens.

There is a machine now in operation in London called the Eccaleobion or "life giving machine," which is capable of hatching 100 Eggs per day: it exhibits at one view every gradation from the newly laid Egg to the perfect Chicken arising from it. Having passed through all its wondrous changes and become a perfectly formed and animated creature within the short space of three weeks. It promises to be a source both of private and national wealth. It consists of many cells, pointed with iron wire and heated by means of hot water conveyed in pipes. The temperature required is 99° Fahrenheit.

EASTWOOD & Co.

PAPER MANUFACTURERS,

Stationers & School Book Publishers,

YONGE STREET, TORONTO.

KEEP CONSTANTLY FOR SALE, THE FOLLOWING ARTICLES,

Wholesale and Retail;

WRITING PAPER.
