GREAT WESTERN RAILWAY

AUDITORS' REPORT.

TO THE SHAREHOLDERS OF THE GREAT WESTERN RAILWAY OF CANADA.

We have examined the foregoing accounts, and find them in accordance with the books and vouchers.

Although during the past half.year additional information has been received from the Engineer and the Mechanical Superintendent in reference to their special reports on the condition of the line and rolling stock, we still require further explanation to enable us to deal with them. The Directors propose to accept payment of the dividend for the half-year to the 31st December last on the Detroit and Milwaukee Preference Shares held by this Company, in 7 per cent. Bonds of the Detroit and Milwaukee Company, and as these Bonds are only estimated at 75 per cent. the amount of the dividend less 25 per cent. discount has been credited to the "Net Revenue Account," no portion thereof being applied this half-year in reduction of the "Old Detroit and Milwaukee Interest Account," which stands in the Balance Sheet at the same figure as last half-year.

30th March, 1870.

REPORT OF THE DIRECTORS

OF THE

Great Western Railway Company OF CANADA.

1. The receipts on Capital Account for the half-year ending 31st January, 1870, amount to £207,578. 17s. 2d., principally arising from the payment of the second instalment, due 1st December, 1869, on the 5 per cent. Preference Stock of the Company, including the proportion of discount thereon, which has been charged as previously against the remission of interest allowed by the Government. The first annual series of the four per cent. bonds issued to the Government in settlement of the loan and commuted interest, amounting to £142,203. 16s. 9d., became due on 1st January, 1870, and were paid.

The aggregate expenditure at 31st January amounted to £5,487,436. 19s. 7d., leaving a balance to the credit of Capital Account of £96,816. 14s. 9d.

2. The outlay on Capital Account during the half-year amounted to £94,843.14s.4d. (after deducting proceeds of surplus lands sold), and included 55 new broad-gauge flat cars,—2 new 12-wheel narrow-gauge baggage cars,—369 new narrow-gauge freight cars, patent rights for car platforms and car brakes— $8\frac{1}{10}$ ths miles of new sidings, &c. The Directors anthorised the construction of the narrowgauge freight cars in order to obviate the cost of hiring additional cars to conduct the large "Blue Line" freight business. The construction of five narrow-gauge locomotive engines has also been authorised, and this outlay cannot fail to be of a remunerative character. As stated in the Engineer's Report, the entire cost of laying down 1,100 tons of steel rails during the half-year has been charged to Revenue.

The dividend to 31st January on the Five per cent. Preference stock amounts to $\pounds 8,060.15s$., leaving a balance of $\pounds 99,696.12s.11d$. From this balance the Directors recommend a dividend on the ordinary shares at the rate of 5½ per cent. per annum, free of income-tax, payable in London on 28th April, which will absorb $\pounds 97,642.7s.9d$. The balance to be carried forward to the credit of next half-year will be $\pounds 2,054.5s.2d$.

The Renewal Fund for the Ferry Steamers now amounts, with interest, to £15,874. 14s. 2d.

4. The loss on conversions of American currency for the halfyear amounts to £37,156. 4s. 8d., as compared with £70,361. 15s.9d. The average rate of conversions during the half-year was 126, the average price of gold for the same period being 131[‡]. The amount of assets in American funds in hand at 31st January, 1870, amounted to \$182,009.09, against \$218,635.41, at the commencement of the half-year.

n

of

3 1 4 5. The following table exhibits the receipts and expenses for seven corresponding half-years :---

| | | RECEIPTS | • | A. 1. 199 - 1994 | EXPENSE | 8. |
|---------------------|---------------------------------------|----------------------------|--------------------|-------------------------|------------------------|-----------------------------------|
| Half-year ending | Passengers, Mails and Sundries. | Freight and Live Stock. | Rents. | Total. | Including Renewals. | Per Cent. of Gross Receipts |
| 31 Jan., 1864 | £ s. d. 129,684 7 3 | £ s. d. 171,828 19 10 | £ s. d. 621 1 9 | £ s. d. 301,634 8 10 | £ s. d. 171,336 4 9 | C. Carlos |

| 31 Jan., 1866 | 205,131 1 9 | 181,071 5 7 | 836 18 9 | 387,039 6 1 | 170,003 7 10 | 43.95 |
| 31 Jan., 1867 | 169,985 16 4 | 161,254 8 7 | 1,273 3 2 | 331,513 7 3 | 166,632 8 0 | 50.26 |
| 31 Jan., 1868 | 186,536 15 1 | 213,476 4 4 | 799 15 6 | 400,812 14 11 | 193,666 14 3 | 49.31 |
| 31 Jan., 1869 | 183,702 11 5 | 239,763 15 0 | 845 10 2 | 423,311 16 7 | 209,752 9 6 | 49.50 |
| 31 Jan., 1870 | 183,740 12 6 | 239,535 6 8 | 906 13 1 | 424,182 12 3 | 243,379 18 11 | 57.37 |

6. The aggregate total Traffic Receipts, compared with the corresponding half-year, show a small increase, £809. 12s. 9d.; the increase in the local being nearly balanced by the decrease in the through traffic, viz. :--

| Increase in | Local Passenger Traffic | | £2,469 | 8 | 1 |
|-------------|---|------------|--------|----|----|
| ,, | Emigrants | | 288 | 0 | 11 |
| " | Local Freight and Live Stock | •• | 15,491 | 6 | 4 |
| Decrease in | Foreign Passenger Traffic £1,944 1 | - 2 10 | 18,248 | 15 | 4 |
| " | Mails and Express 774 14 | 52 | | | |
| " | Foreign Freight and Live Stock 14,719 1 | <u>t</u> 7 | 17,439 | 2 | 7 |

7. The reduced rates for through freight traffic were protracted till the end of October last, and are not even at this time restored to the rates in force in 1868. The tonnage carried, per mile, has, however, increased by 10 per cent. over the corresponding halfyear, but the receipts for its carriage have decreased by £14,720.

R

The excessive expenditure on maintenance and renewals consists entirely of outlay for rails and fastenings, and wages of platelayers, and principally occurs in the months of November, December, and January last. The Engineer explains that in October last he found the extent of renewals executed up to that time would be insufficient to carry the increasing traffic safely through the winter, with the speed necessary to ensure through connections with the American lines; that the main track having deteriorated to a greater extent than he had anticipated, rendered increased outlay necessary, and this forms the greater part of the total increased working expenses.

8. In the last half-year's Report reference was made to measures contemplated for the development of the through traffic between Chicago and New York, and to the desirability of a closer alliance in the nature of a consolidation of interests between this Company and the Michigan Central Railroad.

The Directors have now to report that this has been accomplished by a deputation from the London Board, which visited Canada and America in the month of December last, and concluded an arrangement with the Michigan Central and Detroit and Milwaukee Railroad Companies for the division in certain fixed proportions of the joint through traffic earnings on the one-purse system. The agreement for earrying out these arrangements was sanctioned by the Shareholders at a Special General Meeting held on 16th February, 1870.

The effect of this agreement will be to obviate competition for traffic, and tend materially to reduce the expenses of the working staff, and of the agency offices in the United States ; but as the agreement did not come into operation until the 1st of January, 1870, the advantages of this arrangement will only be apparent in the future.

9. Circumstances have rendered it prudent for the friends of this Company, and of the Michigan Central Company, to obtain from the Ontario Legislature a permissive and protective charter for a loop line to occupy the territory south of the main line of this Company, which is receiving the careful consideration of the Board.

10. The Michigan Central Railway in alliance with the Great Western Railway is now promoting the construction of a branch line from one of its stations (Ypsilanti, State of Michigan) in a south-west direction to the State of Indiana, through a fertile country not reached by any connecting line. The Directors are desirous of assisting this undertaking by the investment of a certain portion of the earnings, which the new road may bring over the main line, in the first mortgage bonds of this new road.

| Gross earnings | •• | · • • • | | £331,976 | 7 | 1 |
|------------------|--------|---------|-------------------|----------|---|---|
| Working expenses | ••• | | e, 6617 K∃•j•j | 195,072 | 3 | 6 |
| N | et rev | venue | ••• | £136,904 | 3 | 7 |

This is sufficient to meet the year's interest on all classes of Bonds of the Company, and 7 per cent. dividend on the Preference Shares; but the expenditure on construction account having absorbed its immediate cash resources, the representatives of the Commercial Bank and the Great Western propose to receive payment of the half-year's interest to 31st December, 1869, in Detroit and Milwaukee Railroad 7 per cent. Bonds of the creation of 1st September, 1866.

On behalf of the Board of Directors.

THOMAS DAKIN,

President.

London, 30th March, 1870.

n

REPORT OF THE ENGINEER.

ENGINEERING DEPARTMENT,

GREAT WESTERN RAILWAY, HAMITON,

28th February, 1870.

TO THE PRESIDENT AND DIRECTORS-

CHARGES TO REVENUE.

| able to Revenue amounts to | £ | 8. | d. | |
|---|---------------|-----|----|--|
| Ascompared with the corresponding half of 1869, which amounted to | 76,784 48,535 | . 8 | 6 | |

CHARGES TO CAPITAL.

During the past half-year the undermentioned new Works were executed, forming a charge to Capital Account.

| 1st.—Superstructure.—Labour and materials used in laying down ne sidings at various points of the Line, amounting in the aggr gate to 8 Å, miles of single treek. | £ | s | . đ. |
|---|----------------------------|-------------------------------|------|
| 877g tons of rails used for the same Cost of land purchased at Stamford Junction near Suspension Bridge | 6,73 7,21: | 2`6 | 7 |
| | ·· 41: | | 8 |
| 2nd.—Grading.—Cost of building a retaining wall to Thames Rive Embankment near London, and filling behind the same with | THE CALL CREEK AND ADDRESS | 12 | 1 |
| 3rdBuildingsCost of enlarging wood shed at Hamilton Station | . 1,027 | 8 | 9 |
| Cost of additions to station platform at London, and a new fance | . 229 | 7 | 4 |
| Cost of new brick vaults in course of erection, for the use | . 187 | 0 | 7 |
| from Mechanical Dewbury, Chatham, and Hamilton-charge | 29 | 18 | 1 |
| Cost of a new Line of Malana 1 . | 646 | 1 | 6 |
| Hamilton, and between London and Windsor | | 18 | 4 |
| | *£18,097 | 6 | 8 |
| * In the Capital Account No. 1 this and the | | and the local division of the | - |

." An the Capital Account No. 1 this amount is reduced by the sum of \$281, 4s. 7d., balance of amount received for the sale of surplus lands, and stands at \$17,916, 2s. 1d.

Referring to the above charges to Capital I have to remark :--

1st. Under the head of Superstructure is the cost of extending our mixed gauge sidings to an extent of nearly nine miles during the past half-year. This is largely in excess of what was contemplated as necessary at the end of the previous half-year, but the constantly-varying and ever-increasing requirements of the passenger and freight traffic of the main line demanded the whole of this extra accommodation.

The land purchases are for gravel pits, used for the construction of the sidings above mentioned.

2nd. The charge under the head of Grading, is the cost of a retaining wall for protecting the railway embankment for a length of 600 feet where the River Thames was rapidly encroaching upon it, at a point near the Cove Bridge, west of London.

ł.

6

3rd. Under the head of Building's are sundry charges for new works, the principal of which are three new water tanks of large size, erected by the Locomotive Department for engine service of the line; and also a charge of £1,571. 18s. 4d. for a new telegraph line along the railway between the Suspension Bridge and London, a distance of 119 miles.

REVENUE ACCOUNT.

| | | | | | | | | T . | 8. | u, |

| *4,7171 tons re- | rolled and | l steel rails | 6.945.944 1.9. ••• | ••• | ••• | | ••• | 30,632 | .3 | 2 |
| 37,378 sleeper | laid in tr | ack | •••• | ••• | | | ••• | 2,457 | 14 | 8 |
| . Fish plate | es, bolts an | nd nuts, sp | ikes a | nd ch | airs for | swite | cheş, | | | |
| and small st | ores | | ••• | 1 | | | | 6,784 | 13 | 10 |
| Engine Servic | e | | | | | | | 1,653 | 6 | 5 |
| Engineering su | perintend | ence | | • ••• | | | | 890 | 14 | 0 |
| | | | a. A. Fastige | | Total | | ••• | £76,784 | 8 | 6 |
| | | | | | | | | Constant of the second second | | |

*This sum is in mixed currency, being increased by a sum of £1,751. 11s. 2d., arising from the purchase of coal and firebricks in the United States, and charged in currency in the accounts. The above shows a very large increase in the expenditure for maintenance, and renewals, during the past six months, and I beg to make a few remarks in explanation of the same.

During the half-year eleven hundred tons of steel rails were placed in the track of the main line, the whole cost of which, less the value of the old rails taken up, was charged to Revenue. The cost of these steel rails exceeds an equal weight of re-rolled iron rails, such as we have hitherto produced at our rolling mill, by a sum of £6,369. 17s. 3d.

They were manufactured in the best manner from hammered ingots, and with drilled bolt heles for the fish plates, but having been only laid down in the month of November last, it is of course impossible as yet to pronounce any opinion upon their durability.

But besides the extra charge for these steel rails, the chief part of the increased expenditure has arisen from the unusually large quantity of rerolled rails placed in the track as compared with any previous half-year, being, inclusive of the steel rails, 2,395 tons in excess of the corresponding half-year, and 1,533 tons beyond that of the preceding six months. This extra weight of rails was of course accompanied by a corresponding weight of new joint fastenings, and a proportionate increase in the force of men employed in the work of renewals. And over and above these increased charges, I found it necessary to augment the permanent gangs of track repairers, whose extended duties since the narrow gauge track came into use have demanded repeated additions to the force employed upon the permanent way.

The necessity for renewing such a large extent of the main line track during the past half-year was of course caused by the inferior quality and premature destruction of a large proportion of our rails. In the early part of the winter several sections of the line began to give way with a rapidity which upset all my calculation and estimates, but as the importance of our through traffic would not admit of any detentions or reduction of speed, in consequence merely of an imperfect roadway, I had no alternative but to adopt every available means to place our permanent way in as sound a condition as the circumstances would permit.

I have in my former reports remarked upon the very inferior quality of the rails imported from England in 1866, for our narrow gauge track, and I regret that I must again repeat my complaint of them. These rails wear moderately well in summer, but they are totally insufficient for the severe usage to which they are subjected during our winter months. Whilst the roadbed is frozen into a solid mass, they become crushed, abraded, and laminated to an unprecedented extent; and during periods of alternate frost and thaw, whilst the rails become loosened on the surface of the sleepers, they break into several pieces to an alarming extent.

This is unfortunately no novel experience on this continent, where I ought to state, such very serious defects pertain to a large proportion of all the rails imported from England of late years, and the consequence is that all the leading railways are now either introducing steel rails, or they are purchasing American rails manufactured from a superior quality of native iron.

The increasing importance of our through American business makes it absolutely necessary that our railway should be maintained at as high a standard of efficiency as that of any connecting or rival lines between New York and the Western States, and this can only be attained by laying down solid steel rails on our steep gradients, and by making use of the best American iron for the heads of our re-rolled rails, which experience has now proved to possess the desired degree of toughness and strength in combination with a hard wearing surface. Such rails will cost considerably more than those we have heretofore been re-rolling, and, together with the contemplated proportion of solid steel rails, will materially augment the expenses of my department for several half-years, but the beneficial results of such a liberal outlay will very soon become manifest in the increased efficiency of the working of our trains, and in a very appreciable reduction of our working expenses.

But large though the cost of maintenance and renewals has been during the past half-year, I wish to call your attention to the fact that we are still within the average of all the leading Eastern American Bailways, whose expenditure upon maintenance and renewals of late years exceeds the proportion of the gross receipts (viz. eighteen per cent.) which we have reached during the past half-year.

£23,577 8

| year chargeable to revenue amounts to | £27,182 7 | 8 |
| As compared with the corresponding half-year of 1869 | 22,356 13 | 0 |
| Renewal of Locomotives.—The amount expended for ren during the half year, and included in the charge to follows :— | | |
| Balance of account for six new Passenger Engines, to repla Engines, known as the Amoskeag class | | |
| Balance of account for the reconstruction of the two engines of Gunn's class | £2,015 8 | 4 |
| on account of six new narrow course D | 473 0 | 5 |
| Engines to replace six nearly worn-out Engines of the Norris class | | |
| On account of new material manufactured for other | 2,604 7 | 14 |
| rangines | 723 11 | 1 |

Total

The remaining two of the six new Passenger Engines mentioned in previous Reports were completed and set to work during the half-year, their names being the "Reindeer" and "Gazelle."

The two Engines of Gunn's class "Bacchus" and "Achilles" were also reconstructed with new boilers mentioned in last half-year's Report as in course of progress.

In addition to the above, the construction of the boilers for six new narrow-gauge Engines to replace six Engines of the Norris class has been commenced, these engines, numbering from 17 to 22 inclusive, being now nearly worn-out.

Repairs.-36 Engines have received heavy, and 13 light repairs.

The heavy boiler repairs mentioned in last Report have been continued. Two Engines have been supplied with new half-barrels, and four with new copper flue-sheets, and the pressure of two Engines, in consequence of the extra strength imparted to their boilers, has been increased from 120 lbs. to 130 lbs. per square inch.

The following new material has been supplied, and charged in the halfyear's revenue expenses :—3 steel crank axles, 1 iron crank axle, 3 straight axles, 2 tender axles, 2 truck axles, 43 axle boxes, 17 pistons, 2 eccentric pulleys, 3 cylinders, 15 crank pins, 5 cross heads, 4 cast-iron driving wheels, 22 engine springs, 30 tender springs, 1 regulator, 3 bells, 3 trucks, 1 steel truck wheel, 128 cast-steel tyres.

Stock of Engines.—The number of Locomotives continues the same as last reported—

46 Passenger Engines.

44 Freight Engines.

8 Shunting Engines.

1 Locomotive Fire Engine.

Total ... 99

5

8

es

as

t

4

The general condition of the Locomotive stock is satisfactory

Pumping Engines, Tanks, &c.—The repairs requisite for the maintenance of the effectiveness of the water stations have been promptly attended to, and the general condition of the tank service is satisfactory.

Additional new and improved frost-proof water tanks, requiring no tankhouses, have been constructed at Chatham and Hamilton, to supply increased traffic demands.

At Newbury a new frost-proof water tank, with windmill-pump complete, has been erected in place of the old structure burned down at next station of Bothwell, mentioned in last half-year's Report.

Three new tanks were erected in the Windsor running shed, and one new tank in London running shed, at cost of revenue, in place of old tanks wornout and removed.

Engine Turntables.—These have been repaired as required, and are all in good condition, with the exception of the one at Hamilton, which will require renewal during the ensuing summer. Comparative Expenditure of the Department.—The expenses of the Locomotive Department show a decrease of $\pounds 209$. 11s. 11d., notwithstanding the increase of 18 per cent. in the tonnage carried.

Renewal of Cars.—The amount expended for renewal of cars during the half-year, and included in the charges to Revenue, is £3,715. 8s. 0d., the following renewals having been effected ;---.

Three first-class cars have been reconstructed with all the latest improvements; 2 second-class, 1 conductor's, 3 cattle, 14 box, 11 flat cars, and three timber trucks were also renewed. Five first-class, 5 second-class, and 2 post-office and baggage cars were converted to narrow gauge.

Eight first-class, 7 second-class, and 1 post-office and baggage cars were fitted with the Miller Automatic Coupler and Platform.

625 new side springs, 22 sets new lateral-motion springs, 355 new axles, and 818 new chilled wheels, were supplied to the stock, and charged in the half-year's expenses.

Repairs.—All necessary repairs to cars have been efficiently attended to as required.

Stock of Cars.—The stock of cars has been increased during the halfyear by the addition of 190 blue cars, 80 narrow-gauge box cars, 99 combination cars (for carrying cattle, freight, or grain), and 55 platform cars.

In addition to this, the tabular statement will be found altered since last half-year, by the conversion to narrow gauge of 5 more first-class, 5 sogond-class, and 2 post office and baggage cars, as previously mentioned.

| Description of Cars. | Broad Gauge. | Narrow Gauge. | Total. | |

STEAMERS.

or

ve

y

"Great Western" and "Union."—Both boats have worked satisfactorily during the half-year, and are in good working order, excepting the boilers of the "Union," which will require repairs during the ensuing summer.

A new spare piston has been made for the steamer "Union," for use in case of emergency, and a quantity of spare gearing is also now in process of construction for the steamer "Great Western," to be used in case of breakage by accident.

BUILDINGS AND TOOLS.

The two new improved stationary engine boilers, mentioned in last Report, were completed, and are now at work, giving the most satisfactory and economical results.

The stationary Engine was also refitted and repaired.

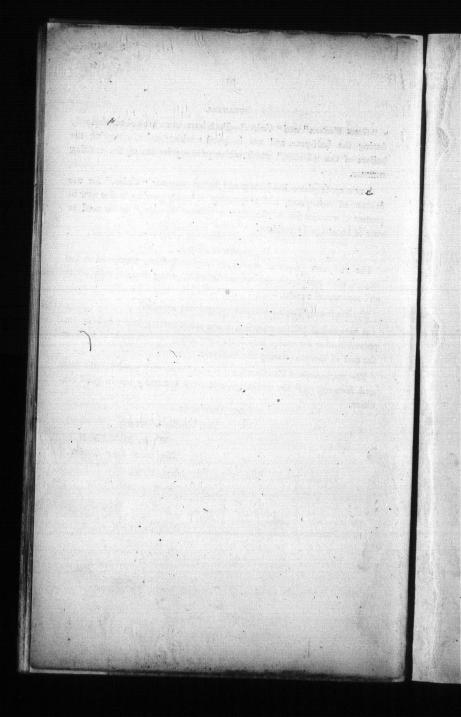

A new radial drilling-machine, a new screw-cutting lathe, and an improved blower for smiths' fires have been added to the stock of tools at the cost of Revenue during the half-year.

The workshops at Hamilton have received necessary repairs to the roofs and flooring, and the buildings and tools generally are in good condition.

I am, Gentlemen,

Your obedient Servant,

W. A. ROBINSON, Mechanical Superintendent.

GREAT WESTERN RAILWAY OF CANADA.

At a General Meeting of Shareholders

OF THE GREAT WESTERN RAILWAY OF CANADA,

Held at the London Tavern, Bishopsgate Street, on Wednesday, April 13th, 1870, at 12 o'clock,

MR. ALDERMAN DAKIN in the Chair,

The Secretary read the Advertisement calling the Meeting.

The Minutes of the Ordinary General Meeting of Shareholders held in London on October 27th, 1869, and of the Special Meeting held on February 16th, 1870, were read and approved.

The Report and Accounts for the Half-year ending 31st January, 1870, were taken as read.

It was proposed by the CHAIRMAN, seconded by Mr. GILSON HOMAN, and resolved-

"That the Report and Accounts for the Half-year ending 31st January, 1870, this day submitted, be received and adopted, and that a dividend to on the Preference Stock at the rate of 5 per cent. per annum, and on the Ordinary Shares at the rate of 51 per cent. per annum, free of income-tax, be now declared, payable in London 28th April."

To which, as an amendment, it was proposed by Mr. H. H. CANNAN, and seconded by Mr. JOHN SANGSTER-

"That paragraph 9 be not approved, because it is suggestive of further outlay on Capital Account, and because if now approved, when further capital is asked, the Shareholders will be reminded of that paragraph as a preliminary sanction of such outlay.

On a show of hands being taken, the amendment was negatived by a large majority, and the original motion was adopted.

It was proposed by Mr. George SMITH, seconded by Mr. WILLIAM PAXTON, and unanimously resolved"That the Directors be empowered to present to the three members of their Board who, at great personal inconvenience, proceeded to Canada in December last, solely on the affairs of this Company, the sum of £1,500, together with the best thanks of their colleagues and the Shareholders for the arrangements they entered into with neighbouring companies, and the valuable services their personal experience enabled them to effect on that occasion.

It was proposed by Mr. T. H. HARRISON, seconded by Mr. T. K. HARDIE, and resolved—

"That the thanks of this Meeting be given to the Chairman and his colleagues for their attention to the interests of the Company."

The Meeting then separated.

þ

By order.

BRACKSTONE BAKER, Secretary.

126, Gresham House, Old Broad Street, London, 13th April, 1870.
