

# The Waterdown Review

THE BIGGEST LITTLE PAPER IN ONTARIO

VOL. 4.

WATERDOWN, ONTARIO, THURSDAY, MARCH 2, 1922

NO. 43.

## HON. MANNING DOHERTY

Minister of Agriculture

AND

## Mr. A. SAPIRO

San Francisco, California

Will address a PUBLIC MEETING in the

Assembly Hall, Royal Connaught, Hamilton

Monday evening, March 6th

At 8 o'clock

Subject: "Co-operative Marketing"

Mr. Sapiro is one of the most outstanding men as well as one of the best speakers in the co-operative movement on this continent. He has been closely associated with the organization and development of the big successful co-operative companies on the Pacific Coast. He will give the story of the development in a most fascinating manner and will also give a large amount of practical helpful information applicable to conditions in Ontario. Every person interested in the prosperity of agriculture should hear him.

Meeting under the direction of the Ontario Department of Agriculture

## Wall Paper

I have just received sample books of the new 1922 Wall Papers and will be pleased to have you inspect them.

A. J. Lovejoy

Phone 157

## We Thank Our Patrons

for taking so good naturedly the inconvenience to our customers that necessarily goes with the moving of a Drug Store. We have not had one complaint, but only good wishes and compliments from all.

## Our Interests Are One

In changing stores we did not change our policy, for we still are willing to sink or swim on **Quality and Service** and will do our best in meeting the needs of this community. We carry a large and well assorted stock and are constantly adding to it, and will always be pleased to procure anything special you may need.

B. Batcheler

Druggist

## Grace Church

REV. H. J. LEAKE, M. A., Rector  
First Sunday in Lent

11 a. m.—Money.

7 p. m.—Hymn 110. The first of a series of sermons on church hymns. Lenten Services Friday at 8 p. m. The W. A. meets in the Parish hall Thursday afternoon and the A. Y. P. A. it the evening.

## Knox Church

REV. J. F. WEDDERBURN, B. A., B. D.  
Minister

Rev. J. Radford of Smithville will preach morning and evening. Sunday School and Bible Classes at 9.45 a. m.

The Church Club meets Wednesday evening at 8 o'clock under the auspices of Devotional Committee.

## Methodist Church

REV. C. L. POOLE, B. D., Pastor

11 a. m.—Fourth in series on The Tragedy of Life, "The Crown of Glory".

7 p. m.—The Loneliness of Christ. 10 a. m. Sunday School and Bible classes.

The Y. P. S. meets on Monday evening at 8 o'clock.

Prayer Service on Thursday evening at 8 o'clock.

## Notice of Application

To the Legislative Assembly, Ontario.

NOTICE is hereby given that at the next session of the Legislative Assembly of the Province of Ontario application will be made by the Corporation of the Village of Waterdown for an Act to validate By-law Number Two Hundred and Twenty-two (222) of the said Village, authorizing the issuing of debentures for Twenty Thousand Dollars (\$20,000) for the erection and equipping of a Memorial Hall. The existing debenture debt of the Village is as follows:—

By-law No. 186, \$5000. For Hydro Electric, of which there is unpaid \$3331.25.

By-law No. 102, \$1500. For extending Hydro Electric, of which there is unpaid \$1000.21.

By-law No. 205, \$1500. For extending Hydro Electric, of which there is unpaid \$706.20.

By-law No. 217, \$55000. For Public School, of which there is unpaid \$52484.41.

By-law No. 227, \$20000. For Public School, of which there is unpaid \$19512.15.

The Corporation of the Township of East Flamboro has to pay the Corporation of the Village of Waterdown one half of the debentures unpaid under the two last mentioned by-laws.

BRUCE & COUNSELL,

Solicitors for the Corporation of the Village of Waterdown.

Dated at Hamilton this 24th day of January, 1922.

## Greenville

The Greenville A. A. A. held their postponed entertainment on Tuesday evening and was largely attended the Township hall was packed to the doors and the performance was a credit to all those who took part.

Miss Cora Tunis has returned from visiting with her sister in Dunville.

A young son has arrived at the home of Mr. Wesley Grightmires.

The Womens Guild of Christ Church will meet next Tuesday at the home of Mrs. F. Hore.

## Why Some Towns Grow

The reason why some towns grow is because there are men of push and energy in them who are not afraid to spend their time and money to boom their town. They erect good buildings, organize stock companies, and establish factories, work for public improvements and use every means in their power to induce other people to locate in their town. Wherever they go, they tell of the advantages of their town, they write about them in every letter, they send circulars and newspapers to all whom they think they can get to visit their town and when anyone comes they treat them so kindly that he falls in love with them and their town. It is enterprise and everyone pulling together that makes a progressive town, and don't let that fact escape your memory. To hear every person saying something pleasant about its people and interests is the surest way to make a town attractive to others. One of the best ways in which to make it attractive with that sort of attraction that will draw other people to it, is for every man and woman to have a pleasant word for the people and the town generally. Talk up your town if you would have it do well. Talk up your town if you would have others come to it. Talk up your town if you feel an interest in it, and have its people feel an interest in you. There is no better way to do it, and many a time one little word of unpleasant reference to something that does not suit you and not particularly concern you as to that matter, will turn a good man's influence from your town and may even drive him away. At your fireside, talk up your town. Among your neighbors, talk up your town. When you come in contact with strangers, talk up YOUR TOWN.

## Mountsburg

The ice storm did considerable damage to the telephone wires a round here.

Mrs. John Wingrove fell on the ice and sprained her arm so badly, it was necessary to secure the services of Dr. Joyce of Freleton.

Mr. S. Woolsey was confined to the house for a few days with a bad cold.

Mr. R. Ingles and Mr. Chas. McCarthy are very busy filling the contracts for wood, for the schools.

The small son of Mr. and Mrs. Walter Ingles had the misfortune while sleighriding to strike a stone cutting his head and bruising his body badly and is under the care of Dr. Joyce.

Good looking men must be scarce as the Park Board has not received any applications for the position of Bench watchman and Park keeper.

Mr. Morley Harris has returned from Chicago where he was learning the automobile repairing.

The funeral of Mr. Hugh Linn took place on Monday from his late residence and was largely attended. Deep sympathy is extended to the widow and son.

The next church social will be held at the home of Mr. and Mrs. Partridge.

## Locals

Dr. Haddo Fell, of Midland was the guest of Mr. and Mrs. I. Baker over the week end.

The Waterdown Senior Basket Ball team will meet the speedy Hamilton "Y" team Friday evening Mar. 10th.

The Hon. Manning Doherty will be the guest at the banquet given by the Agricultural school in the rink Friday evening of this week.

A big organization meeting of all baseball fans will be held in the rink Saturday evening at 8 o'clock. All interested in baseball are requested to attend.

The W. A. A. will hold an At Home in the Roller Rink, St. Patricks evening, Mar. 17th. Progressive Euchre and dancing will be the evening program.

The members of Rock Chapel Church are preparing to hold a centennial of the old Rock Chapel Church built in 1822, this year. Two of the oldest members still living are Benjamin Sheppard and Geo. Neewasher.

The death occurred at her home on the 3rd concession, West Flamboro, Tuesday, of Mrs. Sarah Mann, relict of the late Joseph Mann, Deceased was in her 79th year. The funeral will take place on Thursday afternoon, at 2 o'clock, to Grove Cemetery, Dundas.

The Wayside Gleaners' class of the Methodist church intend holding an entertainment in the Roller rink on the evening of Mar. 15th. The program will be furnished by the Excelsior Club of Zion Tabernacle Hamilton. More particulars of the program will be announced in next weeks paper.

The Mission Circle girls will introduce their Travel Basket on Saturday afternoon when they will call at the homes and the ladies will be invited to either take one parcel out or put one parcel in the basket. No article to cost more nor less than 25c. Kindly encourage the girls who are so generously giving of their time and talent to this good work.

The Grace Church Branch of the A. Y. P. A. was well represented at the meeting of the Niagara District held in the Arcade tea room on Saturday, Feb. 25th. Dinner was served at 6 o'clock, and was followed by topical songs led by Rural Dean R. H. Ferguson. Mr. Calloway, former president of the Social Council, was chairman, and Mr. T. H. Hollingworth, Dominion President; and Mr. W. R. Sproule, Vice-President were the principal speakers. The object of the meeting was to re-arouse the enthusiasm of the members and bring the district to its former place in this Dominion wide Association. A very interesting discussion followed Mr. Hollingworth's presentation of the situation and the desirability of the various branches working together under the common head of the units of the district generally. It was agreed that a local council would accomplish a great deal. The following officers for the local council were elected. President, Mr. Calloway; Vice-Pres. Mrs. Walton; Sec. Mr. Riley, all of Hamilton, and Miss Woodhouse of Dundas, Treas. The Waterdown delegation were the officers, R. Buchan, Miss M. Cutter, H. Armstrong, and four members, Mr. Brown, Mr. McDonald, Miss Buchan and Mrs. Terry.

**THE CURE OF RINGWORM**

Disagreeable, Contagious Disease of Farm Animals.

The Symptoms Carefully Described  
 —Treatment Carefully Applied  
 Usually Successful—A Fly Spray  
 —September Notes.

(Contributed by Ontario Department of Agriculture, Toronto.)

Ringworm is a contagious disease to which all classes of animals, including man, are subject.

Calves and young cattle appear to be more susceptible to the trouble than other animals, but no age renders an animal immune. It is purely a skin disease, and is due to the presence of a vegetable parasite, which is readily capable of being conveyed from one animal to another by direct contact, the hands of the attendant, pails, stable utensils, clothing, harness, saddles, blankets, the contact of one animal with the stalls, etc., of affected animals, etc.

In like manner, curry-combs, brushes, rubbing cloths, etc., that are used on affected animals of any class, if used on other animals, become a fertile cause of infection.

**Symptoms.**

While any part of the animal may be the seat of the disease, the skin around the eyes and on the face, and on the neck and back, appears to be the favorite seat. The first symptom shown is usually an itching, which is followed by a slight form of eruption, which soon assumes the appearance of little yellowish scabs forming a circular space; hence the term "ringworm." A variable number of these circular patches may be noticed on different parts of the body. They are of a yellowish color when fresh, but become lighter in color as they grow older; the hairs become bristly, some break off, and some become split. When the disease is not checked the affected areas become more numerous and the patient apparently suffers acutely from itching, and sometimes rubs against solid objects with such force as to cause bleeding. If a scale be removed and the under surface examined by a magnifying glass, the parasite can be seen.

**Treatment.**  
 In order that the spread of the disease may be checked, it is necessary that great care be taken to avoid the conveyance of the virus from the diseased to healthy animals. Where practicable, it is well to remove all non-infected animals to non-infected premises. If this cannot be done, the diseased animals should be isolated, and the premises in which they had been kept should be disinfected by thoroughly sweeping and dusting, and then giving a thorough coat of an insecticide, as a hot 10 per cent. of one of the coal tar antiseptics or carbolic acid, or a coat of hot lime wash with 5 per cent. carbolic acid. This precaution is desirable on account of the virus lodging in stalls, bedding, etc., and infecting other animals.

Local treatment consist in moistening the scales with warm water and soap, or sweet oil, removing them in order to expose the unprotected surfaces of the affected areas. It is good practice to burn these scales. An insecticide, as tincture of iodine, or an ointment made of two drams white hellebore mixed with an ounce of vasoline, or, in fact, any reliable non-irritant insecticide, once or twice daily until cured.—J. H. Reed, V.S., O. A. College, Guelph.

**Fresh Fruit For the Farm.**

For a very small sum any farmer may have a few rows of strawberries, two or three dozen of raspberries, currants, etc., which will give fresh fruit at cheapest cost. A few grapes will also pay. Selling strawberry plants and berry canes will also bring in an odd dollar or two for the wide-awake man or woman, or boy or girl.

**The Reason.**

Hoggins was travelling at a fair rate of speed, but there would never have been a disaster had not some fools watered the road.

The natural thing happened. As he turned a corner the car turned turtle. Fortunately, Hoggins landed in a wet but soft ditch.

A few minutes later, when he had scrambled out, and was mournfully regarding the machine, a friend came along.

"Hallo, Hoggins!" exclaimed the fool. "What's the matter? Has your car turned turtle?"

"Oh, no! Oh, n-n-n-no!" answered Hoggins sarcastically. "These children here wanted to see how the machinery worked, so I had the car turned upside-down just to please them!"

### To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,

### DIA RHOEA IN FOALS

Scours Causes Many Losses Annually Among Young Colts.

Symptoms Described and Timely Treatment Suggested—Laudanum and Castor Oil a Good Drench—Preparing for Gardening.

(Contributed by Ontario Department of Agriculture, Toronto.)

The occurrence of Scours in foals is responsible for a considerable part of the losses among them during the earlier periods of their lives. It often makes its appearance within a few days after birth, without any apparent cause. Among the various causes responsible may be mentioned too long intervals being allowed between the suckling periods, as is often the case when the dam is being worked and the foal allowed to suck only during the mornings, noon, and evenings, and when the foal is hungry the milk is swallowed rapidly and in excessive quantities. Another frequent cause is the foal sucking the mare after she has been over-exerted, or while she is in an overheated condition, and the udder has become filled with milk in which there may be an excess of the products of tissue waste, drained from the system.

Artificial feeding is also another cause, as in the case of foals being fed on cow's milk.

It may also result from the indiscriminate use of physic medicines.

The milk of the dam is also materially affected by the nature of the diet, and sudden changes from one kind of food to another cause a variation in the milk, which tends to derange the stomach of the foal.

There are also other predisposing factors, such as exposure to cold rains and the keeping of the young animal in a damp, unwholesome stable, and especially where the floors are filthy and wet, owing to lack of drainage.

In addition to the foregoing, there are also some infectious agents (disease germs) which cause a very fatal form of scours or dysentery in foals.

Symptoms.—When the foal is affected with scours, the symptoms may be first preceded by a constipated condition, which, however, is soon followed by the passage of liquid matter. The discharges at first appear soft, and slimy and have often a peculiar, offensive odor. The tail and hips become soaked and covered with the discharges, which, in severe cases, become more frequent and very watery. The foal then rapidly loses condition and becomes very weak, and the belly becomes tender. If not arrested, the condition may prove fatal in from two to ten days.

Treatment and Prevention.—As a means to prevention, the first consideration should be the avoidance of the various causes which have been mentioned. The foal should be

protected from exposure to cold rain storms. The stable should be maintained in a good, dry, and clean condition, and plenty of dry bedding provided in the stall occupied by the foal. In cases where the foal is being fed on cow's milk, it should be modified to suit by the addition of about one-third water and sufficient sugar to make it sweet to the taste. In cases where the dam is being worked and the foal having access to her only during mornings, noon, and evenings, care should be exercised to prevent it, when hungry and the stomach empty, from sucking the milk too rapidly and in excessive quantities. If the dam has been over-exerted and become over-heated, some of the milk should be withdrawn by hand from the udder before allowing the foal to commence suckling.

The nature of the treatment employed in affected foals is to some extent governed by the origin of the trouble, so that the cause should be ascertained if possible.

With the exception of those cases which have resulted from the improper use of physic medicines, it is usually best to begin treatment by giving a teaspoonful of laudanum, combined with two ounces of castor oil as a drench. In addition, a teaspoonful of prepared chalk and powdered catechu may be given in a cupful of boiled milk or flour gruel every four or five hours, until the movements of the bowels become more regular. Another common remedy is a tablespoonful of lime water and a teaspoonful of laudanum, given in a little boiled milk, repeated every four hours as required.

When the foal is in a weakened condition, its strength should be kept up by means of an egg beaten up with several ounces of the mother's milk, and poured carefully into the mouth, and repeated at intervals of several hours, as may appear necessary. The foal should in all cases be kept warm and comfortable until better. If the foregoing measures are not effective in checking the condition within a reasonable time, special veterinary treatment may be necessary.—C. D. McGilvray, M.D.V., President Ont. Vet. College, Toronto.

Head lettuce requires cool moist weather to head well. The loose leaf sorts are best for warm weather.

Prepare orchards for spraying for San Jose Scale and other pests by pruning and scraping off loose bark.

Be sure that all seed corn and root seeds are secured from the best sources available, and are in ample quantities for spring seeding.

### EFFECTS OF CROPPING

Sure to Exhaust the Best Soil in Time.

Plant Food Must Be Supplied—Mother Earth Has Her Limits—Seven Rules for Poultry Raisers—Breaking Up Broody Hens.

(Contributed by Ontario Department of Agriculture, Toronto.)

Lands that have been farmed for half a century usually show a decrease in crop production. A few farms that have been well managed in the various sections of Ontario are still very productive. Some have been so depleted of the plant food materials that were accumulated during the period of forest development as to be unprofitable under tillage today. Previous to clearing and cropping the process was accumulating fertility. Since cropping has been practiced the process has been reversed and supplanted by one of expenditure. Under a farming practice that exhausts the humus and returns no vegetable matter the soil hardens quickly, dries out and becomes non-productive, simply because there is neither food nor soil life to release such to growing plants.

Mineral Elements Become Exhausted.

Frequently one of the mineral elements—lime, potash or phosphorus—is exhausted by cropping or leaching. Nitrogen exhaustion is a very common condition noticeable in lands that have been cultivated for more than twenty-five years. After all, the soil is only a storehouse for those elements required in the life processes of the food plants that the farmer grows. In that storehouse various forms of life are at work converting the unusable to a usable or food condition for the plant. If we crop for years and exhaust the nitrogen or the potash or the phosphorus to a point where any of such could not be supplied in quantity sufficient to meet the full demands of the growing plant then we have a condition of plant mal-nutrition or starvation.

If home-made lime-sulphur solution is to be used, make it now and store till needed.

Insects that eat the foliage must be kept in check by spraying, with a poison they will eat, like paris green or arsenate of lead.

### BUYING A FARM.

Some Very Practical and Timely Hints to Would-be Purchasers of Farm Property.

The most important decision that a farmer is called on to make is the selection of a farm on which to live and earn a living. The judgment used in making the selection of a farm may make or break a man, may tie him up for life to poverty or to wealth. In districts where the soil is uniformly good over a large area and where prosperity is evident on all sides the task is not so great and risky. But in districts where various types and grades of soil exist a poor farm and a good farm may lie side by side. The good farm will no doubt help to sell the poor one, which, by the way, is always for sale. See Your Prospective Farm In July.

Farm purchases are most frequently made during the winter when the opportunity for close examination is least. This should not be so. If farms were purchased on the basis of the crop showing during the month of July there would be fewer regrets. If a man contemplates purchasing a farm in a district where he has lived for a long period, he will know the soil and district conditions. Knowing conditions the purchaser will hand over his money with his eyes wide open; if he does not know conditions in the district he will be handing over his money with his eyes closed and must depend upon the honesty of some one else. Purchasers of farms are advised to live and work in the district of their choice for at least a year before investing heavily.—L. Stevenson, Secretary Dep. of Agriculture, Toronto.
