ARTICLES OF THE CALENDAR

—AND—

ASTRONOMICAL NOTICES FOR THE YEAR 1893.

On the left-hand page of each month are given the rising and setting of the Sun with the length of the day to the nearest full minute; also the data required for solar observations for time, namely, the Equation of Time (that is, the difference between apparent Sun time and uniform Clock time), which is given for the instant of Apparent Noon and the Sun's Declination at Mean Noon—Greenwich Time. With these two exceptions all the calculations are reduced to the nearest minute of local mean time at Charlottetown. Latitude $46^{\circ} 13' 55''$ N.; Longitude $63^{\circ} 7' 33''$ W.; giving 4 hs. 12 mins. 29.5 secs. difference slow on Greenwich.

If required, the Sun's Declination at Greenwich apparent noon may be obtained from the data here given, by multiplying the hourly variation of Declination by the Equation of time for the same day reduced to the decimal of an hour, and applying the result according to the conditions, as under.

DECLINATION INCREASING.		DECLINATION DECREASING.	
Sun slow of clock Add	Sun fast of clock Subtract	Sun slow of clock Subtract	Sun fast of clock Add

Example—To find the Sun's Declination at Greenwich, Apparent Noon, on February 16th, 1893.

Equation of Time, February 16th,	$14^{\circ} 14.94''$	slow

Sun's Declination S. Mean Noon,	$237^{\circ} 3$

From the Sun's apparent Semi-diameter, which is given to the nearest tenth of a second of arc for each day of the year, may be found the Sun's Horizontal Parallax (which equals the apparent Semi-diameter of the Earth as it would appear at the distance of the Sun) by dividing by the constant quantity—107.44, that is, the ratio the Sun's actual diameter bears to that of the Earth. Thus, on July 1st, when the Sun is in Apogee, the apparent Semi-diameter is $15' 46'' = 946''$, this divided by the constant, 107.44, gives 8.805, the Sun's Horizontal Parallax at that time. In like manner on December 31st, when the Sun is in Perigee with Semi-diameter $16^{\circ} 18' 3''$, we find the Sun's Horizontal Parallax 9.105.

The Parallax in Altitude may be found on multiplying the Horizontal Parallax by the nat. cosine of the Sun's apparent altitude at the time of observation.

On the right hand pages of each month are given the phases of the Moon, its Rising, Southing and Setting, with the time of High Water at Charlottetown, all to the nearest minute of local mean time.

To assist in the matter of weather forecasts, are added the bearing of the Moon at the times of Full and Change, the Perigee and Apogee, and the time of the Moon crossing the line and of reaching its greatest North and South Declination. It being found that these critical periods are accompanied by atmospheric disturbances more or less marked as they agree with the times of the Moon's changes and Perigee, ** or *** are added where two or more of these influences concur within the space of 48 hours.

ECLIPSES.

During the year 1893 there will be two Eclipses, both of the Sun, but neither will be visible at Charlottetown.

I. A Total Eclipse of the Sun, Greenwich mean time of conjunction, April 16th, 2h. 27m. 1.7 sec. Central line

THE WEATHER.

MOON.	TIME OF CHANGE.	IN SUMMER.	IN WINTER.
If New Moon, First Quarter, Full Moon, or Last Quarter happens—	Between midnight and 3 in the morning	Fair	Hard Frost, with N. or W.
	“ 2 “ 4 “	Cold, with showers	Snowy and Stormy [wind
	“ 4 “ 6 “	Rain	Rain or Snow
	“ 6 “ 8 “	Wind and Rain	Stormy
	“ 8 “ 10 “	Changeable	Rain, with E. or S. wind
	“ 10 “ 12 “	Frequent Showers	Snow, with N.E. or W. wind
	“ 12 noon and 2 afternoon	Very rainy	Cold, with high winds
	“ 2 “ 4 “	Changeable	Snow or Rain
	“ 4 “ 6 “	Fair	Fair and mild
	“ 6 “ 8 “	Fair, with wind N. or W.	Fair and frosty
“ 8 “ 10 “	Rainy, if S. or E.	do	
“ 10 “ 12 “	do do	do	
“	10 “ 12 “	Fair	do

REMARKS.—1. The nearer the Moon's changes to midnight, the fairer the weather will be during the next seven days; the nearer to mid-day, the rougher and more stormy. The former time occupies from 10 p. m. to 2 a. m., the latter from 10 a. m. to 2 p. m.

2. The phases happening from 4 to 10 p. m., may be followed by fair weather, but this chiefly depends upon the direction of the wind.

3. If a storm arises from the East, on or immediately preceding the Spring Equinox, or a week after, the following Spring or Summer will be wet four times out of five; if from the West, North, or South-west, the Spring and Summer will be dry five times out of six.

Books to suit everyone at J. M. McLEOD & Co's

THE
Summerside + Journal

AND THE

PRINCE EDWARD ISLAND AGRICULTURIST,

The Leading Papers of this Province, are published at Summerside by

W. A. BRENNAN, Editor and Proprietor,

At \$1.50 per year, or \$1.00 when paid strictly in advance; subscribers outside the Province at \$1.25 per year in advance.

THE JOURNAL

Is devoted to politics and political news, general, Dominion, Provincial and local news, shipping news, and general family literature of a high order.

THE AGRICULTURIST

is devoted more especially to the interests of breeders and farmers, and contains full reports of races, exhibitions, and other gatherings of this nature. Our reports of races are a specialty and are acknowledged by horsemen generally to be the most complete and accurate published in the Maritime Provinces. The agricultural matter is carefully selected to suit this country. Special attention is given to market reports, and a large amount of general and local news appears in each issue.

The JOURNAL is a four page, forty column paper, and the AGRICULTURIST is an eight page, forty column paper, thus giving one subscriber twelve pages, or eighty columns weekly, and 624 pages, or 4,160 columns yearly. Thus it will be seen that no paper in Maritime Canada, apart from some of the large city dailies, give such an amount of reading matter for the low price at which the subscription has been placed.

Having a circulation exceeding that ever attained by any other paper in this Province and reaching fully twenty-five thousand readers every week, it will be seen that as advertising mediums the JOURNAL and AGRICULTURIST are surpassed by no paper in Maritime Canada. They reach all classes in town, village and country, and go into the majority of homes in Prince Edward Island, as well as very many in Nova Scotia and New Brunswick, making them the most advantageous and efficient papers in the Province for advertisers to patronize.

RATES OF ADVERTISING.

Fifty cents per inch for first insertion and twenty-five cents per inch for continuations. Special Notices twelve cents a line for each insertion. A reasonable discount on yearly, half-yearly or quarterly contracts.

In connection there is a well-equipped

Job Office & Bindery,

With facilities for doing all kinds of Plain and Fancy Book and Job Printing and Bookbinding in the very best style.

Catalogues a specialty. Having full sets of the American Trotting Register, Year Book, etc., we are in a position to compile Catalogues, Stallion Cards, etc., promptly and accurately. Send your name and address on a postal card and sample copies will be forwarded.

Strike the Reader's Eye Reach the Most People

THIS is what you must do if you want to prosper. Do you know how to do it? It is done by

JUDICIOUS ADVERTISING.

And the way to do it is to advertise in THE EXAMINER. Ad's in THE DAILY EXAMINER and in the WEEKLY EXAMINER are read by people all over P. E. Island, and by many in the other Provinces and in the United States. REMEMBER that when you have what you want to say set up in a striking advertisement and published in THE EXAMINER, it is bound to reach a good class of readers, and **IT WILL PAY YOU.**

The Daily Examiner

Contains the most news, has the largest circulation, and is the best advertising medium. It reaches all parts of the Island. *The Daily Examiner is sent to subscribers for \$5 a year in advance; \$2.50 for 6 months; \$1.25 for 3 months.*
