STANDARD SIZED APPLE BARREL.

It is interesting to note that as a result of the information collected by the N. S. J. Fruit Growers' Ass'n, there is a strong probability of a standard size apple barrel being adopted by government regulation. The size proposed will contain 99 quarts, which will decrease the Ontario size barrel by 11 quarts and increase the Nova Scotia barrel by 3 quarts. It is not possible to regulate the weight of barrels of apples owing to difference in fruit. It is also proposed to establish grade sizes for potatoes in ones, twos and culls, which has never hitherto been done, but would be a great advantage for the consumer.

### HOW ONE SUBMARINE MET ITS FATE.

This story of how one enemy submarine was destroyed is told by the New York Sun:

A seaplane spotted the submarine lying on the sea bed and wireless destroyer and trawlers ten miles away, and then the plane continued to circle around until the trawlers appeared to take the four corners of the quadrangle within which the submarine lay. The trawlers got out their sweeps and began teaming toward each other. As they met, their wires engaged the bow and stern of the submarine and began to pass under the submarine. The trawlers crossed and held the submarine by cables. The submarine attempted to free herself but without success. The seaplane signalled "You've got him!" and the destroyer answered, "Thanks! We'll give him five minutes to come up to breathe, but no longer." When the time had passed Fritz had not moved. The destroyer flagged a signal and the trawlers slipped a small tin of high explosive to the taut wire and let it slide down to the submarine's hull. Two gray mounds of water presently muffled the explosion. The wires about the submarine snapped in the middle and the crews coiled them up. Meanwhile the seaplane circled around a patch of oil that came to the surface and then notified the trawlers that the submarine was destroyed.

### FIGHT WITH DOLLARS AND BAYONETS.

OTTAWA, Feby. 21.—That the Canadians at the front are just as willing to fight with dollars as with bayonets is shown by a report from the militia department today. It shows that in two weeks the soldiers subscribed \$1,500,000 to the Victory Loan.

A Chicago clergyman gives the account of infant resourcefulness:

His little daughter was feeling a bit under the weather one evening and consequently was put to bed early. She had not been under the covers more than five minutes before she called out, "Mother, I want to see father."

"Go to sleep, dear," answered the mother. "Father can't see you now."

In a few minutes she called once more:

"Mother, I've got to see father."

"I can't disturb your father now. He is very busy. Go to sleep."

There was silence for nearly five minutes. Then these words floated down the stairs:

"Mother, I am a very sick woman, and I must see my pastor at once."

CANNING -- -- -- NOVA SCOTIA

DRAFTEES MUST GET CONSENT TO JOIN R. F. C.

New Order Send all Men to Depot Battalion First.

Men called up under the Military Service Act will no longer have the option, hitherto extended to all draftees, of enrolling in the Royal Flying Corps before joining the battalion to which they have been allocated. This is the interpretation given at Recruiting Headquarters of the R. F. C. to an order recently issued by the Militia Department, which says that in future all draftees must report for service to the Depot Battalion.

Such men, however, will still be eligible for the Air Service. After reporting to his Depot Battalion, the draftee may, if he is anxious to train for an aviator in the Royal Flying Corps, apply for discharge to his Commanding Officer, upon whose consent he may re-enlist in the R. F. C.

Just what effect this new regulation will have upon the number of recruits applying to the Flying Service, it is difficult to say. At the present time, despite the fact that all cadets enroll voluntarily, the training school in Toronto is kept filled to capacity and there are many young men waiting to get started. The new procedure undoubtedly puts added difficulties in the way of aspirants, but at the same time it is anticipated that the Commanding Officer's consent will in most cases where men pass the essential qualifications be given readily, while the fascination and novelty of the aviator's work should be sufficient incentive to most men to make the extra effort called for by the new regulation.

### PLENTY OF CREDIT.

Mr. Butterworth, the grocer, was looking over the credit sales to the new clerk: "Did you give George Callahan credit?" "Sure," said the clerk. "I—" "Didn't I tell you to get a report on any and every man asking for credit?" "Why, I did," retorted the clerk, who was an earnest young fellow. "I did get a report. The agency said he owed money to every grocer in town, and, of course, if his credit was that good I knew that you would like to have him open an account here."

Mr. Tucker had unexpectedly come face to face with Mr. Cutting, from whom he had frequently borrowed money. "Er—aw—what was the denomination of the bill you loaned me?" he asked, nervously. "Episcopalian, I guess," said Mr. Cutting. "At any rate, it keeps lent very well."—New York American.

## A Harbinger of Beauty

Diamonds of the purest water, without flaw or discoloration, horses with a pedigree that dates back to Pegasus, Homes that are built enduringly and beautiful—the perfection of each of these is sought for and attained in the Heintzman Piano.

Machinery could be used to make most of it, and at a greater profit. But it is subordinated to the process whereby slowly, painstakingly, grey haired craftsmen create the beauty that the Heintzman Piano brings into every home it adorns.

### LECTURE.

A very large and appreciative  
audience listened, last Sunday  
evening in the Nickel Theatre  
to Pastor W. J. Thorn, of Boston,  
lecture on "The World War  
in Prophecy."  
Mr. Thorn showed that all  
wars are progressive and that  
this present "World War" also  
will result in the complete em-  
anicipation of the human race.  
We learned that God has a  
careful provision for man,  
er this present time of  
ow, sickness and death

of all to attain the likeness of  
God as expressed in our first

one man (Jesus) came also the

When it is remembered that a total of 300 marks on the best six subjects including English constitute pass in each of these classes, the excellence of these marks is very evident. Olivia Lamont for Grade (XI) made an average equal to that of the most successful pupil of that grade in the Province at last summer's examination. Norma Webster did the same for her grade, while Yula Dennison in Grade (IX) was close up among last year's leaders.

Several pupils who failed to pass on the examination at the end of the first quarter have by diligent application, been successful this quarter and did fair to make a safe pass at the end of the year.

In the Common Schools the teachers and pupils generally are working hard and the outlook is favorable. There are of course, some failures in every grade both in the Academy and in the Common Schools classes and parents are urged to assist backward pupils where possible especially by keeping them at school regularly and appointing regular periods for home study. For Academy Students this is especially important since applications to take the Govern- ment Examination must be sent in on May 1st and the teachers are then compelled to decide from each pupil's class standing whether to recommend him for examination. Let us make this quarter's work tell.
