Technical and Bibliographic Notes/Notes techniques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a tenté d'obtenir la meilleure copie originale disponible pour la numérisation. Les caractéristiques de cette copie qui peuvent être uniques bibliographiquement, qui peuvent modifier n'importe quelle image dans la reproduction, ou qui peuvent significativement changer la méthode habituelle de numérisation, sont vérifiées ci-dessous.

graphic Notes/Notes techniques et bibliographiques

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks
to the generosity of:

National Library of Canada

The images appearing here are the best quality
possible considering the condition and legibility
of the original copy and in keeping with the
filming contract specifications.

Original copies in printed paper covers are filmed
beginning with the front cover and ending on
the last page with a printed or illustrated impres-
sion, or the back cover when appropriate. All
other original copies are filmed beginning on the
first page with a printed or illustrated impres-
sion, and ending on the last page with a printed
or illustrated impression.

The last recorded frame on each microfiche
shall contain the symbol → (meaning "CON-
TINUED"), or the symbol ▽ (meaning "END"),
whichever applies.

Maps, plates, charts, etc., may be filmed at
different reduction ratios. Those too large to be
entirely included in one exposure are filmed
beginning in the upper left hand corner, left to
right and top to bottom, as many frames as
required. The following diagrams illustrate the
method:

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ▽ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

BIBLIOTHÈQUE NATIONALE

THE YUKON Gold District, in the Northwest Territories of Canada, is about 650 miles long, and the same gold belt continues south through British Columbia for another 750 miles, the most of which is unexplored.

KLONDYKE. The remarkably rich gold discoveries on the Klondyke River and Creeks which are tributaries of the Yukon were first reported to the Canadian Government last spring, and upon the arrival at Victoria of a large number of miners who had gone into the Klondyke poor and returned with fortunes in gold dust, a rush to the gold fields immediately commenced, and steamships have since been leaving Victoria *en route* for the Klondyke Eldorado every few days.

ROUTES. From the head of Lynn Canal there are three routes over the coast range of mountains, namely, *via* White Pass (No. 3 on map); Chilkoot Pass (No. 4 on map); and Chilkat Pass (No. 5 on map). The principal travel this year has been over the White Pass and Chilkoot Pass. Improved transportation facilities are now being provided so that by next spring it is expected that miners with their supplies will be able to travel in two or three days from Lynn Canal to the headwaters of the Yukon River.

Most of the travel next year will be *via* the Stickeen River and Teslin Lake route (No. 1 on map). There is a line of steamships between Victoria and Wrangell, mouth of the Stickeen River, where connection is made with steamers which transport passengers and freight to Telegraph Creek. The journey from Victoria to Telegraph Creek can be made comfortably in six days. There is good land travel between Telegraph Creek and Teslin Lake (120 miles). The country is open and undulating, and excellent grass abounds for pack animals the entire distance. The Dominion and British Columbia Governments are surveying with a view of locating a line of railway which it is expected will be under construction next spring. A steamer is being built on Teslin Lake and will be ready for the opening of lake navigation next May to carry passengers and freight to the Klondyke.

The Stickeen-Teslin Lake route *via* the Hootalinqua River on which rich diggings have been struck avoids the dangers and hardships which are experienced on the mountain passes and the White Horse and other rapids, on the routes *via* Lynn Canal.

The Stickeen-Teslin Lake route has another very great advantage as the prospector upon leaving the steamer at Telegraph Creek finds himself in the heart of a gold country practically unexplored. Miners intend to prospect in the gold districts of Cassiar and preference to the Klondyke because they are in British Columbia where there are no royalties collected or reservations made. From Omineca two miners recently arrived with \$48,000 in gold dust.

Omineca in

CANADIAN DUTIES. It is important to remember that all supplies for the Klondyke and British Columbia Gold Fields are dutiable if purchased out of Canada, or in the United States.

OUTFITS AND PRICES. All supplies for the miner, prospector and trader can be purchased at Victoria, the Capital and main distributing point for the whole of British Columbia, at lower prices than at any other place on the Pacific Coast, besides which, the duty, 35%, on most goods, is saved. The Victoria merchants, from experience gained in Cariboo, Omineca and Cassiar outfitting, are specially qualified to advise parties going north for the first time the most serviceable goods for that country.

TRANSPORTATION. It is strongly recommended that miners and prospectors going to the Klondyke and British Columbia Gold Fields book direct to Victoria, which is the "key" to the northern country. A line of steamships sail from Victoria almost daily for Wrangell, Lynn Canal and St. Michael, and the steamships of all other lines call for freight and passengers at Victoria.

BE SURE YOU OBTAIN YOUR TICKET DIRECT TO VICTORIA:
the fare is the same as to all other Coast Cities.

VICTORIA'S outfitting advantages are unequalled: prices are lower, duties are saved and customs annoyances avoided.

For the convenience of intending passengers and shippers arrangements are being made for securing passages and freight space in advance, at lowest rates, for any given date.

The steamers leaving Victoria are all high class boats. Their comfort and efficiency are acknowledged by the passengers travelling thereon by numerous testimonials published in the press.

CAUTION.—Many of the steamers for the Klondyke from other Pacific ports have during the past two months met with disasters as they were unsatisfactory. Passengers avoid all risks by taking the Victoria steamers.
