The copy filmed here has been reproduced thanks to the generosity of:

D. B. Weldon Library University of Western Ontario (Regional History Room)

The images sppearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or iilustrated impression, or the back cover when sppropriate. All other original copies are filmed beginning on the first page with a printed or iilustrated impression, and ending on the last page with a printed or iilustrated impression.

The last recorded frame on each microfiche shall contain the symbol \longrightarrow (meaning "CON-TINUED"), or the symbol ∇ (meaning "END"), whichever sppiles.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

D. B. Weldon Library University of Western Ontario (Regional History Room)

Les images suivantes ont été reproduites evec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres examplaires originaux sont filmés en commançant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une teile empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \longrightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, pianches, tableaux, etc., peuvent être flimés à des taux de réduction différents. Lorsque le document est trop grand pour être raproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'Images nécessaire. Les diagrammes suivants illustrent la méthode.

Mr. WILLIAM BELLHOUSE, of

having been appointed Agent to the above

Company for HAMILTON, begs to announce that ho is prepared () receive Proposals for FIRE and LIFE INSURANCE. The large Capital of the Company and the number and influence of its Proprietors, enable it to rank with the most eligible Offices either in America or Europe with respect to the advantages offered to the Public.

FIRE BRANCH.

Persons assured by this Company are not subject to any covenants or calls to make good losses which may happen to themselves or others, nor do they depend upon an uncertain fund or contribution, the Capital Stock of this Company being an unquestionable Security to the Assured in case of Loss or Damage by Fire. The Company have alrendy established, and are now establishing Agents of the highest standing and positions in various parts of the World where Insurances may be effected with **oomsiderable advantages** which will be communicated on application to the Agent. The Company has every desire to establish as reasonable a Rate of charge as circumstances will admit of, in every case.

LIFE BRANCH.

In addition to the more customary methods of Insurance, the Company likewise Assures Lives on any of the following contingencies;-For the term of Ons Yess, Seven Years, or any other definite period. For the whole continuance of Life.-The Premiums to case after a limited number of Annual Payments. For two Joint Lives.-The sum Assured to be paid on the death of either. On the longest of Two or Three Lives.-The sum Assured to be payable at the death of the last survivor, or, On the longest of Two or Three Lives.-The sum Assured to be payable at the death of either. On the longest of Two or Three Lives.-The sum Assured to be payable at the death of the last survivor, or, On Survivorships.-To secure the payment of the Sum Assured, if a Life A die before another Life B. For a Sum to be payable at age 60, or at death. Premiums on Circedit.-A porticia of the Premiums may remain on Credit. Assurances may be effected in various ways, not enumerated, to meet the convenience of parties.

Premiums on Credit.—A portica of the Premiums misy remain on Credit. Assurances may be effected in various ways, note cnumerated, to meet the convenience of tastites.
 The important advantages aforded by the Corpany in the Life Branch will include the following, ris...
 The Guarantee of an ample Capital and Exemption of the Assurad from Liability of Partnership. The Assured neither beying to depend on an uncertain fund, nor being in any way accountable for the psyment of Claims.
 Moderate Premiums.—The Company, in determining its charges for Assurances, under the various confingencies, dependent on human life, has availed itself of the experience of the oldest and most prosperous London Ollies, and of the recent investigations on the subject, made by the most competent Mathematicians and Actuaries. Its Tables of Pravimer consequently avoid, on the one hard, an unnecessarily high rets of payment by the most competent Mathematicians and Actuaries. Its Tables of Pravimer Consequently avoid, on the one hard, an unnecessarily high rets of payment by the set of an ample the other, the danger resulting from inadequate charges.
 <u>Baradi Charges for anangement.</u>—The Expense of the Office heigh borre in due proportion by the tro Branches.
 <u>Baradi Charges for anangement.</u>—The Expense of the Office heigh borre in due proportion by the proving the Assured. The Directors the result after satisfactory proof of the death of the Life Assured. The Directors the power to discharge any claim in machine the satisfactory proof of the Assured. The Company will always be propared on the solution of the Office south being established.
 <u>Baradi Charges for an angement.</u>—The Expense of the ool state of heast the frastruct.
 <u>Baradi Charges for an angement.</u>—The Expense of the office head borre in due proportion by the Evolution of the Directors of the good state of heast the frastruct.

ADDITIONAL ADVANTACES OFFERED TO LIVES ASSURED WITH THIS COMPANY AT HAMILTON.

I.-RESIDENCE.-Persons Assured for the whole Term of Life will have permission, without the payment of extra Premium, to reside in any part of Europe; or, in any place in North America to the north of 38 degrees of North Latitude, but not to the westward of the Mississippi River.

II .- VOYAGES .- They will also, if not seafaring by profession be allowed, without any extra charge,

To cross and re-cross the Atlantic Ocean, in steamers or first-class sailing vessels;

To pass from any part of Europe to any other, or from any part of North America to another, within the limits above specified ; also,

To pass to and from, but not to reside in, any place which shall not be further south than 35 degrees of North Latitude, but not to the westward of the Mississippi River.

PERCY M. DOVE.

Extracts from the " Post Magazine," 31st August, 1850.

Latracts from the "Post Miggaine," 31st August, 1850. THE ROYAL INSURANCE COMPANY.— The Aunual Report of the ROYAL INSURANCE COMPANY at Liverpeol, and a commentary upon it in the "Post Magizine," have become as regularly conjoined as the Queen's speech on the opening of Parliament, and the debate by which it is invariably followed. The Managers of other Offices cannot charge us with partiality in these annual notices; as the success of the Royal Insurance Company has been of so remarkable a nature as almost to give it a separate position from Assurance Societies of recent date. What may be the operations and massive results of the older Companies, such as the Royal Exchange, the Sun, the Globe, &c., &c., we have very imperfect means of knowing; as these Offices being beyond the Registurf's surveillance, are not so communicative in respect of their affairs as the Assurance Companies formed since the passing of the Registration Act in 1845:—but the details furnished by the Offices included in the late Parliamentary Return, shew that the Royal Insurance Company in transacted an amount of business and realised profits with which the operations of no other Society can be brought into comparison. The Annual Statement for 1848, gened with the following anneuncement of the oreguint of the Company's operations— "The statement of account which the Directors will lay bofore you will show—

nt to the credit of profit and loss for the past year of	9	4

		£38,665	11	0

Let us now see how the remaining balance has been affected by the business of the past year. After payment of all expenses and losses there remains in hand the sum of £27,809 17s. Id.; more than sufficient to pay a dividend of 15 percent, on the original Capital. The Directors, however, very prudeutly, determine only to appropriate the sum of £13,612 for this purpose, being at the rate of 6 per cent, on the accurate Capital or 74 per cent, on the original Capital. The Directors, however, very prudeutly, Capital. The remaining £14,207 17s. Id. being added to the former balance brings the Re-assurance Fund up to £24,371 12s. applicable to the contingencies of the present year, or to be added to the profit balance at the end of it. The year itself is so far advanced that the Directors are enabled to afford the Shareholders some view as to its probable results. Adopting the scale of receipts for 1849, the half-year's premiums would be £17,234 15s. 2d.; whereas the receipts to the end of June last were £19,747 12s. 3d.

end of June last were £19,747 12s. 3d. Extracts from the "Reporter," September, 1850. THE ROYAL INSURANCE COMPANY.—Though strictly speaking, the history of the rise and progress of this great undertaking should have been placed under the kindred heading of "New Companies and Societies," yet upon this occasion we must depart from the plan which we have laid down for our guidance in the complication of these papers, as we consider that an institution which, on account of its intrinsic merits, its able management, and its adaptation to the commercial wants of great industrial communities, has been enabled, in five years, to raise itself to a commercial and financial position which some of the "elder" assurance companies have never opproached, and from which pleasing goal the whole of the new companies are a long way off, pre-eminently deserves to rank and take its place as a compere with the best of the old, as if, by right, ranks at the head of the whole of the new undertakings of the kind. Trom the Report to which we have referred, it appears that the revenue of the fire department last year, onding on the 31st December last, when it was £34,469 10s. 43. exceeded the income of any year since the commencement of the company. But the business transacted from January to June in the present year exhibited a still greater increase—namely, of £4,000, or 25 per cent, mere business than was transacted during the corresponding peried of last year.

vear.

present year exhibited a still greater increase-namely, of £4,000, or 25 per cent, more business than was transacted during the corresponding period of last year.
Of the Life Branch we have even greater success to record. In speaking of the society twelve months ago, we commented upon the fact that the claims from death had been far below the calculated average. It seems that but four deaths have occurred during the five years of the existence of the Company—just 50 per cent. less than the number that the rates were calculated to provide for !
We cannot too much compliment the Directors for accumulating a fund which, we find by calculation, would provide for six times the contingencies they cannot too much compliment the Directors for accumulating a fund which, we find by calculation, would provide for six times the contingencies of two typersons, whilet during the prevalence of the greatest amount of mortality, the Company could not, unless the laws of unture were folled back, be called upon to may for claims on account of the death of our person it.
We thought that the success of 1848 would not be outmatched by the success of 1849. Had the ratio been kept up we should have been satisfied, and our prophecies would have been fulfilled. The men of whem we have been speaking—the merchant princes of the manufacturing hives of industry, skill, and our prophecies would have been fulfilled. The men of whem we have been speaking—the merchant princes of the manufacturing hives of industry, skill, and great mechanical ingenuity, are adepts at figures; figures are as much their alphabet, as it is asid their "ledger is their bible." After adding £89,280 in 1848 to the capital, and paying a dividend of 2. per share, a sum of £0,0433 443. Hd. remained, and was properly carried to the re-assurance fund in order that every probable as well as improbable. Configures and extension of this department are such as the class of the past, being 5 per cent, on the accumulated capital, or 7 is error to the acte

establishmed. The Premiums collected during the first six months of the present year, amounting to £19,747, 12s. 3d., exhibit a still more striking advance, as they show a surplus, when compared with the result of the corresponding months of the year 1849, of no less than 25 per cent. The Directors think they may ground ou the experience of the past, a well-founded anticipation, that the further development of this branch of their business will form the compartual arcy subjects of thruce reports. 2.—LIFE BRANCH.—The position of the Life Branch of the Company is such as to give full satisfaction : and the Directors may here likewise lead the proprietors with contidence to look forward to the time when the amount receivable for Life Premiums will form an important item in the revenues of the establishment.

One life only has dropped during the course of the past year, and since its close small claims have become payable on the deaths of two others. The total number of deaths, therefore, in five years, has been but four; whilst if the average age of the lives insured by the Company be taken, and a computation be unade, founded on the mortality known to prevail among insured lives, it would appear that the deaths in that period of time should have been

computation be made, ionace on the normally known to provant among means in these is when appear and the made in the normally known to provant among means in the proprietor may hope that this department will, in future Taking the important test which the quality of the lives selected by the Company gives, the proprietor may hope that this department will, in future years, become the means of adding an increased permanent value to his property, while the *life assurer* in addition to his consciousness of *perfect security*, may induge the expectation of au important ultimate benefit to his policy in the shape of a rapidly accruing profit which the continuance of a minimum rate of mortality would insure.

of mortainy woman mane. The report for the year 1848 stated that after the adoption of the plan proposed of capitalising £89,280, and paying a dividend of 2s per share, there would remain but the sum of £10,433 14s, 11d., as a re-assurance fund to meet any possible contingency. It will be gratifying to the shareholders now to learn that no adverse circumstances having taken place, the statement which will be presented to them will show an amount to the credit of profit and less of £27,800 17s. 1d., as the result of the basiness for the year 1840.
