THE HYDRO LOAD IS TREBLED IN TWELVE MONTHS

Big Increase Means That Full Capacity Will Be Sold Before Year is Up—Hamilton's Requirements Will Make a Big Hole in Remainder—Port Dalhousie Votes Saturday.

Hon. Adam Beck is not unduly optimistic when he asserts that the present consumption of hydro power will be increased by 100 per cent. within a year, if the present monthly increase can be used as an argument. The total load for the month of July was 24,188 h.p., compared with 9723 h.p. for the same month last year.

Toronto's total load for the month was 19,188 h.p., which is a big increase over July, 1911, and it is anticipated that when the Hamilton plant is in proper working order the amount of power already used will be doubled.

"I am pleased that the hydro-electric power appeals to Welland, where the existing power is said to be cheap. Now Welland will have well lighted streets, including a great white way," said Mr. Beck yesterday, but he was silent when questioned as to the alleged importation of thugs into the district in an effort to defeat the project at the poll.

Port Dalhousie will vote on Saturday. That place could not accept the Ontario Power Company's proposition, and the company, it is said, threatens to turn off the lights should the vote not go their way, but the enterprising port will have public ownership of its lighting system or nothing.

The commission is in a position to supply Esaukoc and Tomorden with power immediately, subject to a satisfactory agreement being drawn up.

From Mr. Pope was elicited the information that there would be no delay, and that work would commence as soon as satisfactory arrangements were made.

When questioned as to the possibility of a move being made towards authorizing the Toronto Electric Light Company to erect poles in the Esaukoc district, Mr. Pope stated that a special bill is necessary if the agreement is for more than a year's duration. Petitions are being circulated throughout the districts mentioned, in order to ascertain the number of residents who are in favor of the installation of hydro power.

Ad. Mollivena of North Bay said a visit to Mr. Beck yesterday, and chatted over the possibilities and practicabilities of introducing hydro power in his home town.

Hon. Alexander Murray Elevated to Peerage

Resignation of Former Chief Liberal Whip Weakens Asquith and is Cause of Curiosity.

LONDON, Aug. 7.—(Can. Press).—A peerage has been conferred on the Right Hon. Alexander Murray, master of Elibank and chief government whip, who has resigned his seat in the house of commons. Percy Holden Hingsworth, representing the shipyard division of Yorkshire, has been appointed his successor in office. The master of Elibank is the eldest son and heir of Viscount Elibank, at one time lord-lieutenant of Peebleshire. He was under secretary of state for India from June, 1903, to February, 1910, when he was appointed parliamentary secretary to the treasury and chief Liberal whip. He was elected to the house of commons from Midlothian, Edinburghshire.

The master of Elibank resigned to become a partner in Lord Cowdray's big contracting firm of S. Pearson & Son, Limited. His resignation is regarded as a serious blow to the Liberal government at a critical moment, and much comment and curiosity have been occasioned as to why he should thus abandon a promising political career.

MUSICIANS NEGOTIATING

The Musicians' Union of Toronto will not declare a strike at the present time. O. B. Sheppard of the Princess states that by the time the regular season opens on Aug. 19, the trouble will be settled. In the meantime the negotiations opened yesterday morning will be carried on between the managers and the union.

WILL EXEMPT AMERICAN SHIPS.

WASHINGTON, Aug. 7.—(Can. Press).—By a vote of 44 to 11, the senate late to-night refused to strike from the Panama Canal bill the provision exempting the American ships from payment of tolls for passage thru the Panama Canal. Debate on the question had continued from 1 p.m. until nearly midnight. The senate then adjourned until to-morrow without voting on the bill itself.

RAILWAYS START THE NORTH END VIADUCT

Gang of Men at Work Yesterday—Steam Shovel Placed on Big Cut—Occupants Given Notice—Operations and Men to Increase Daily.

"Some people have affected to regard out expressed intentions as a bluff," said Engineer Ripley to The World yesterday, "but you may say that the actual work of construction in connection with the work of grade separation along the north of the city, and the erection of the new North Toronto Union Station, commenced to-day."

From the windows of his temporary offices at the junction of Marlboro and Avenue-roads, could be seen a gang of 20 men unloading heavy timbers from Muskoka. "These are to be used for the temporary trestle over Yonge-street," continued Mr. Ripley, "and a steam shovel was despatched at 9 o'clock this morning to a position one and a half miles east of Yonge-street and immediately west of Leaside Junction."

The steam shovel will be used to widen the cut in readiness for the double track, and the earth removed will be dumped and utilized in the construction of the elevated tracks over Yonge-street.

Side Tracks East and West.

The bridge will be steel girders to carry the tracks on the eastern viaduct 12 to 13 feet high, with reinforced concrete retaining walls. Four main tracks will be carried on this viaduct, while on each side of Yonge-street there will be three dead-end side tracks, from which suburban trains will start. These side tracks do not cross Yonge-street, and on the east diverge from the main line at Summerhill-avenue, while the three on west branch from the main tracks at a point midway between Yonge-street and Avenue-roads.

Yonge-street will have to be depressed 5 1-2 feet, and the permanent bridge will be an accomplished fact before Christmas, 1912.

There will thus be a short portion of the railroad on each side of Yonge-street, seven tracks in width, and these will be owned and operated jointly by the C. P. R. and C. N. R.—in fact, the joint section will extend across almost all the north of the city and east in the township to at least the viaduct over the West Don.

Owners Given Notice.

The Ontario Lime Co., J. Britnell, Standard Fuel Co., Milnes Coal Co., Metropolitan Railway Co. and others have been informed by MacMurchy & Spence, solicitors to the C. P. R., that as their notices to quit expire, they must be ready to move at a day or two's notice, but that they will be allowed to occupy their respective yards and offices only on sufferance after that date.

There are at present 30 men engaged, inside and out, and now that the preliminary work of surveying and negotiating with property owners is completed, things will move and each day will see substantial progress made and more men at work.

WIRELESS ON ALL VESSELS

Lake, as Well as Ocean-Going Craft Will Come Under New Regulations.

OTTAWA, Aug. 7.—(Special).—Compulsory wireless equipment on all lake and ocean-going vessels, it is understood at the naval department here, is among the principal recommendations to be made by the International Wireless Congress recently held in London, and at which Canada was represented by Deputy Minister of Naval Service Desbarats and Superintendent of Dominion Wireless Edwards. This congress was convened in London shortly after the Titanic catastrophe and its recommendations, which will be embodied in a report to be submitted to the governments of all countries where wireless is used, are being awaited with world-wide interest.

HAMILTON GETS CHEAPER POWER

Hydro Voluntarily Cuts Rate to \$17 Per Horsepower, and Citizens Are Delighted.

HAMILTON, Aug. 7.—(Special).—Hon. Adam Beck notified the city to-day that the commission had decided on a reduction of the rate of hydro-electric power from \$17.92 to \$17 per horsepower. The reduction has been made by the hydro-electric of its own free will, as the city is not entitled to the cut under its contract. When the news was conveyed to the mayor and controllers, there was a general feeling of delight and satisfaction over the city's adoption of hydro-electric. Ever since Hamilton entered into the municipal power circle, every prophecy respecting the benefits of hydro-electric has been fulfilled.

Some time ago the city signed a contract with the commission for a supply of 1000 horse power at \$17.92. This load was not reached, however, and the city has paid a rate of \$17.92 per horse power. The reduction assuredly means a great saving to the people.

TO ATTEND SUPREME ORANGE LODGE.

Robert Burns, past imperial grand master of the Triennial Orange Council of the World, leaves to-day to attend the meeting of the Supreme Grand Orange Lodge of the United States held in Atlantic City.

T. G. MEREDITH

City solicitor for London, Ont., who has been invited to become corporation counsel of Toronto.

CAN'T FIGHT NOW SAYS BERESFORD

Lord Charles Bitterly Attacks Winston Churchill—Has Proved a Miserable Failure as Naval Executive.

LONDON, Aug. 7.—(C. A. P.).—Lord Charles Beresford, speaking at Evesham last night, had many unkind things to say of Winston Churchill, whom he characterized as the most eccentric individual who had ever been entrusted with naval executive work. He had occupied the position eight months, and proved a miserable failure. He speaks of looking at things with a modern eye, but the first necessity is to see straight. With unaccountable insolence Churchill took charge of the recent Spithead naval manoeuvres, which resulted in chaotic disorganization.

The German menace was, in his opinion, so serious that he would withdraw the whole fleet and protect the heart of the empire, leaving one armed cruiser only responsible in the Mediterranean.

"We can't at present fight," added Lord Charles, "and shouldn't be ready for some time to come."

Vigorously opposing naval alliance with foreign countries, he urged that the empire should defend its own shores with its own ships. "The only alliance we should desire is one with the overseas dominions." "England," he concluded, "does not fear invasion, but starvation."

"We've reduced our fleet, we've reduced our army, while other nations are forging ahead with leaps and bounds. I say, stop fooling the people, tell them the truth."

BECKER HEADED GENUINE RAID

Two Poolroom Men Convicted on Evidence Obtained of Betting on Fort Erie Races.

NEW YORK, Aug. 7.—(Can. Press).—Friends of Lieut. Becker expressed gratification to-day over the conviction of two men upon evidence obtained by Becker's men in a raid which he himself conducted upon a poolroom alleged to have been maintained at Sam Paul's place, the Sans Souci.

Policeman Herman Schwartz of Becker's raiding squad, testified in the court of special sessions that Becker had given him some money and told him to go to Sam Paul's and get evidence against the poolroom operated there. Schwartz said he bet \$10 in the place on a horse named Merry Scribe, running at the Fore Erie track, Canada, and upon other horses, and cashed some of his bets before a cashier's window with other bettors. He then arrested the two men behind the window, David Levine and Morris Golden. After their conviction to-day, the men were remanded to the Tombs pending sentence.

Three other men arrested in a previous raid on the same place by Inspector Calkahan's men were discharged for lack of evidence.

It was stated to-day by friends of Lieut. Becker that John F. McIntyre, the accused lieutenant's counsel, who has just been engaged, has accepted a cash bribe of \$25,000. He will keep this sum whether he wins or loses. If he secures an acquittal he is guaranteed the additional fee of \$100,000.

OVER ATLANTIC IN MOTOR BOAT

Capt. Day of New Rochelle Makes Remarkable Journey Across Ocean in Small Craft.

QUEENSTOWN, Ireland, Aug. 7.—(Can. Press).—The motor boat Detroit, under command of Captain Thomas Fleming Day of New Rochelle, arrived here at 8:30 o'clock to-night, after a voyage from New Rochelle, N.Y., which occupied nearly 24 days. This was the second leg of the continental trip of the motor boat from Detroit, Mich., to St. Petersburg.

The voyagers were welcomed by great crowds of people, the chairman of the harbor board, the president of the town council and other officials, who extended their congratulations to Captain Day. Captain Day said that he had proved the feasibility of a motor boat race from New York to Europe.

FERVENT SINGING AND CHEERS LASTING 45 MINUTES SIGNAL NOMINATION OF ROOSEVELT

SQUARE DEAL FOR PEOPLE PROMISE MADE IN PLANKS OF BULL MOOSE PLATFORM

Courts as Well as "Big Business" to Be Curbed and Halt Called on Exploitation of Resources For Private Greed—Policy is Based on Broad Principles of Humanitarianism.

CHICAGO, Aug. 7.—The platform adopted at the Progressive convention begins with the following preamble:

"The conscience of the people, in a time of grave national problems, has called into being a new party, born of the nation's awakened sense of justice."

"We of the Progressive party dedicate ourselves to the fulfillment of the duty laid upon us by our fathers to maintain that government of the people, by the people, and for the people, whose foundations they laid. We hold with Thomas Jefferson and Abraham Lincoln that the people are the masters of their constitution to fulfill its purposes and to safeguard it from those who, by perversion of its intent, would convert it into an instrument of injustice."

"This country belongs to the people who inhabit it. It is time to set the public welfare in the first place."

The platform further declares that "the old parties have become the tools of corrupt interests, which use them impartially to serve their selfish purposes, and that the new party offers itself as the instrument of the people to sweep away old abuses, to build a new and nobler commonwealth."

Referendum and Recall.

Among other things, the platform declares for direct primaries, for the popular election of United States senators, and urges on the states the use of the short ballot, with "responsibility to the people secured by the initiative, referendum and recall."

Pledges party to provide "a more easy and expeditious method of amending the federal constitution."

Advocates national jurisdiction of problems which have expanded beyond reach of individual states.

Pledges the party to secure equal suffrage.

Pledges party to enactment of legislation limiting campaign contributions and expenditures and providing for public participation by federal appointees in state or national conventions.

Demands "such restrictions of the power of the courts as shall leave to the people the ultimate authority to determine fundamental questions of social welfare and public policy."

Pledges judicial reform, believing "that the issuance of injunctions in labor disputes should be prohibited when such injunctions would not apply where no labor disputes existed."

Protection of Workers.

Declares against child labor and for a minimum wage for women, for prevention of industrial accidents, safety guards for health of employees, publicity as to wages, eight-hour workday, and establishment of a federal department of labor.

Pledges party to a full and immediate inquiry and to immediate action to deal with the high cost of living.

Demands national regulation of interstate corporations.

Pledges party to enactment of a patent law that will prevent monopolies.

Declares for prompt development of all natural resources, condemning exploitation of waste and monopolization.

Declares for good roads, national highways and extension of rural free delivery.

Demands the Panama Canal shall be so operated as to insure satisfaction with transportation of goods and that American railroad-contracting ships be denied the use of the canal.

Reasonable Tariff Revision.

Expresses belief in a protective tariff which shall equalize conditions of competition between the United States and foreign countries for all classes; demands tariff revision because the present tariff is unjust to the people of the United States and pledges the party to the establishment of a non-partisan scientific tariff commission.

Demands immediate repeal of the Canadian Reciprocity Act and the immediate creation of a parcel post.

In conclusion the platform appeals for the support of all American citizens without regard to previous political affiliations.

But Little Is Known Of True Conditions

Say City's Two Inspectors of Restaurants—Are Hammered by Magistrates Not Taking Serious View of Cases of Neglect and Filth Brought Up for Trial.

There is so much that can be written about the dirtiness and generally all round bad conditions in Toronto restaurants that one is at a loss to know just what to say and what not to say. If there was one, there were 200 people who telephoned the office yesterday anxious to give their experience as to just how they had found conditions to be. As many letters, yes many more, have come in. Here are some of the more flagrantly outstanding dirty practices witnessed by World reporters and others.

A certain gentleman went into a local restaurant yesterday. He followed the dinner course until he came to the dessert. (He ordered some of that also. Lo and behold, when he put his spoon into the interior of the concoction, he fished out the head of a sardine. Yes, he did, and it was a fine big specimen of the species, too. This man was a gentleman. He did not make any kick at all. Paid his bill and got out. But when he met some friends of his later, the atmosphere was dreadfully sulphuric, and you can't blame him.

Live Liver.

A Yonge-st. restaurateur had on his bill the other day some specially advertised liver. Before the chef had been introduced to the meat, the proprietor had tested it by putting his finger into a portion of it and afterwards smelling that member. It passed his scrutiny, also that of the eaters when it was later served on the dinner-table. But while dinner was in progress, a health inspector happened in. He made a round of the tables, and seeing the liver, took immediate

La Patrie Scores Sir James

MONTREAL, Aug. 7.—(Can. Press).—La Patrie, commenting on the bilingual school situation in Ontario, says:

"It is regrettable to note that Sir James Whitney, who has given so many proofs that he is animated by the spirit of fair-play and who has so often risen superior to the prejudices of race and religion, should in this instance, have thought fit to deliver our compatriots into the hands of the fanatics of his province."

Recognition of its appearance. He scanned more closely and thoroly its exterior, then ordered its immediate removal to the garbage barrel outside the rear entrance of the eating house. The liver was so bad that it contaminated the other meats in the barrel and they were not prize winners.

Next door to a shoe shine parlor on Yonge-st., a new restaurant is about to open up. Altogether the entire dimensions of the place are not more than 12 x 20 feet. The kitchen is about eight feet square, and the back yard's dimensions are very small. A lavatory is contiguous to the kitchen, and it is said that these people expect to feed close onto 1500 people daily. The price per meal will be 15 cents.

Health Department's Work.

The health department at the city hall are taking a great interest in the battle waged by The World for cleaner restaurants in Toronto.

Yesterday one of the inspectors of the medical health department explained to The World just how that department is hampered in its work of cleaning up the unclean restaurants of the city. There are just two of these inspectors, who devote their attention to the eating houses, which number in the hundreds and are scattered over all parts of the city. The department is fairly able to cope with structural defects in restaurant premises, as this

Continued on Page 7, Column 4.

PREPARE FOR RAINY DAYS.

Raincoats and umbrellas should be in big demand now. The English raincoat and umbrella holds the world of fashion as being considerably better in style and quality than any other manufactured. As a matter of fact the prices asked for such goods in Canada are much lower than for either United States or French makes and the English goods are considerably better in material. The Dinesco Company is showing some fine lines of genuine English raincoats and umbrellas. These goods are in the very newest designs. Call and see them.

COUNCIL DECIDES TO BUILD ABATTOIR COSTING \$300,000

Only Three Dissenters in City's Scheme To Own and Operate a Meat Plant—Barbers Protest Against Closing Slaughter—Scheme To Secure Water From Island Wells Impracticable—Motion To Annex Slice of Land.

After a debate which lasted for an hour and a half, the city council yesterday afternoon passed the third reading of the bylaw to expend \$300,000 on a municipal abattoir by a vote of 14 to 3. The discussion was largely inspired by Ald. McBride, who characterized the whole proposition as a "half-baked scheme" and censured the members for their disposition to spend the people's money without any assurance of an adequate return.

After a debate which lasted for an hour and a half, the city council yesterday afternoon passed the third reading of the bylaw to expend \$300,000 on a municipal abattoir by a vote of 14 to 3. The discussion was largely inspired by Ald. McBride, who characterized the whole proposition as a "half-baked scheme" and censured the members for their disposition to spend the people's money without any assurance of an adequate return.

DUG A GRAVE—STRUCK A VEIN

The fact that a burying ground for the dead was established on the Foley-O'Brien property in Porcupine has been the means of bringing to light a quartz vein, and is quoted as the reason for renewed activity on the property. When the sexton of the ground was preparing a grave, he encountered a quartz lead under several feet of clay. The find was reported to Manager Frit of the property, and another spot for a grave was sought. Rights to bury the dead on that portion of the property have been canceled, and more bodies will be placed among the quartz leads.

WHAT does it cost you in dollars and cents to cook with coal? Aside from that, what does it cost you in exertion, such as carrying a heavy scuttle of coal up a flight of stairs, emptying ashes and kindred little disagreeable jobs? If all, or a good part of the heat generated in a coal range was used in cooking it would not be so bad, but as it is, a great deal of it is radiated into the kitchen, and you know what that means in midsummer weather.

A Gas Range will cost very little to install, and the operating price is so small in comparison with coal that you will wonder why you did not get a gas range long ago. We have ranges in all sizes and retail prices, you can easily find one with just the right capacity for your family.

NORTH WANTS GOVERNMENT TO ADVERTISE MORE FREELY

Considering Vast Extent of Great Clay Belt the Progress of Settlement is Very Slow—85 Farms a Month is the Average.

COCHRANE, Aug. 7.—(Special.)—There are two ways of settling in this region. The first is by the town, and the second by the homestead. The town, which consumed the place in July, 1911, the charter was passed in July. The charter was passed in July. The charter was passed in July. The charter was passed in July.

Optimism. Instead, the manifestations of faith in the coming business of Cochrane are being displayed in the "go-getters" of the west, who are looking for the "go-getters" of the west, who are looking for the "go-getters" of the west.

Four townships around Cochrane are nearly settled. In these townships there are about 800 farms, of which nearly two-thirds are settled by English-Canadian and nearly one-third by French-Canadian. There are a few Italian, Syrian, Swedish and other European settlers. An average of 85 farms a month is the rate at which settlement is coming in.

Progress slow. Considering the vast extent of the great clay belt, this is a very slow progress. If the Ontario Government would immediately adopt a large and systematic campaign of advertising in the United States, the influx would be enormous. Of the 6,000,000 farms in the United States, more than 2,000,000 are owned by tenant farmers, all of whom are practical, hard-working men, laboring under oppressive conditions.

But the settlement of the country immediately around and in the neighbourhood of Cochrane has had the effect of increasing the population and business of Cochrane. The town is only three years old and the population is estimated at 150 or 160. The population now is 300 or more and is steadily growing.

But the settlement of the country immediately around and in the neighbourhood of Cochrane has had the effect of increasing the population and business of Cochrane. The town is only three years old and the population is estimated at 150 or 160.

TELEGRAPHERS MAY LOSE JOBS

C.P.R. is Experimenting With New Device, Which, if Successful, Will Mean Dropping of Morse Code.

Telegraph operators will soon only be serviceable as fiction heroes, and their places in the railway and telegraph systems will be usurped by young and untrained girls, if the newly introduced device which is at present under trial in the offices of the Canadian Pacific lives up to present expectations.

The new system is now in use on the C. P. R.'s Montreal and Toronto line. It is known as the Morkrum Automatic Telegraph, and the sending and receiving apparatus resembles nothing more closely than the typewriter.

But the settlement of the country immediately around and in the neighbourhood of Cochrane has had the effect of increasing the population and business of Cochrane. The town is only three years old and the population is estimated at 150 or 160.

Porcupines Develop Weaker Trend Cobalts Are Buoyant

WHEAT MARKET MOVES IN NERVOUS MANNER

Chicago Market Wound Up Just a Shade Under Previous Day's Quotations—Crop News Exerts Big Influence on Sentiment.

CHICAGO, Aug. 7.—Actual merchandising demand for quick shipments made the wheat market irregular. The close was 1-8c higher for September, but later months ranged from a shade to 1-8c to 5-8c down. Corn finished 1-8c to 1-4c off to 1-8c to 3-8c advance, oats at a decline of 1-8c to 1-4c to 3-8c and provisions varying from the lower to 2-1-2c and 5c up.

More Rain in Corn Belt. Rains in Missouri and elsewhere southwest weakened the new crop months in corn. A healthy cash demand upheld the September delivery. December fluctuated from 54 1-8c and 54 1-4c to 55 1-2c, closing easy 1-8c under last night at 54 5-8c.

Aggressive realizing by longs took all the snap out of the market. The chief setback was in January pork, 10c.

OUR WESTERN CROPS. Crop Expert Ingalls writes from Moose Jaw, Manitoba Province shows many thin and uneven fields. September advance, good, fully as large as last year. Crop earlier, but warmer weather needed, as some is late. Showery to-day, still cool and cloudy.

ST. LAWRENCE MARKET. Receipts of farm produce were 10 loads of hay and 1 load of straw. Hay—Ten loads sold at \$14 to \$15 per ton.

FARM PRODUCE WHOLESALE. Hay, No. 1, car lots, \$12.00 to \$13.00. New combed, per ton, \$10.00 to \$11.00. Butter, creamery, 1b. rolls, \$2.25 to \$2.50.

ONTARIO WHEAT CROP 66 P.C. OF LAST YEAR

Revised Estimates of Probable Yield—Farmers Will Get 85c to 90c a Bushel.

Ontario wheat from the west that wheat harvesting is progressing under good conditions and that by the first of the next month practically all the grain will have been cut and stored for marketing.

Local grain dealers' quotations are as follows: Wheat—No. 2, white or mixed, 85c to 86c outside; Ontario fall, 85c to 86c per bushel.

Wheat—No. 2, white or mixed, 85c to 86c outside; Ontario fall, 85c to 86c per bushel.

INTERNATIONAL REVIEW OF WHEAT SITUATION. Good Wheat Scarce and in Urgent Demand—Broomhall on the Outlook.

Now it is South Porcupine, in the silver sections, that is coming into notice. Buffalo capitalists yesterday a party of them, accompanied by a number of men, gathered again at the company's office.

SMALL GAIN IN MINE OUTPUT. WASHINGTON, Aug. 7.—The value of the mine output of gold, silver, copper, lead and zinc in New Mexico in 1911, according to Charles W. Henderson, of the United States geological survey, was \$2,704,842.

MONTREAL LOOKS FOR LOWER BUTTER PRICES. Butter continues easy and many of the local dealers are doing for lower prices. Western quoted here at \$1.75 to \$1.85.

TEST 200 CLAIMS SWEET MINES TAKE OVER ONE

Canadian Mining & Exploration Co. Conduct Aggressive Field Work—Prospectors Are Sent Out.

Considerable interest on the part of mine men and prospectors is attached to the work of the Canadian Mining and Exploration Co., organized by Ambrose Monnell and backed by nearly 100 millionaires in Canada and the States.

Local grain dealers' quotations are as follows: Wheat—No. 2, white or mixed, 85c to 86c outside; Ontario fall, 85c to 86c per bushel.

LABOR PROPERTY GETS ANOTHER CHANGE. Buffalo Capitalists Inspect Bison Consolidated—Plan to Re-open the Workings.

Now it is South Porcupine, in the silver sections, that is coming into notice. Buffalo capitalists yesterday a party of them, accompanied by a number of men, gathered again at the company's office.

STRUCK GOOD ORE AT LUCKY CROSS. The local office of the Lucky Cross Mines of Swastika has received word from Walter E. Hurd, Hallelujah, one of the directors, concerning the discovery of a vein of free gold.

COPPER MINING AT SWASTIKA. The Dane Mining Co., controlled by the McKinnon and Ogilvie interests of Montreal, has added two more valuable copper claims to the large number they already hold.

DID LA ROSE TRY TO BUY FOSTER? An interesting fact in connection with the many rumors which have been circulated in relation to the plan of the La Rose Consolidated Mines to add to its already large territory in the Cobalt camp, was the report yesterday that the company had made an offer of \$125,000 for the Foster property at Glen West.

HOLLINGER AND DOME

Big Porcupine issues Come in For Drastic Return—Crown Chartered Also Hits the Bump—Cobalts Redeem the Situation.

The declining price trend displayed by Hollinger was carried further in the mining exchanges to-day and before the close of the session the shares had reached a level of full 65 cents below yesterday's quotations.

On the curb Dome dropped to a new low record at \$15.50, a loss of two and a share from the last previous price. There is very little demand for these shares, and consequently sales are only made possible by market reductions in quotations.

Cobalts Redeem the Market. In the Cobalts continued weakness in several instances, the market was redeemed by a sharp rise in the price of the shares.
