RUSSIANS DEFEAT GERMANS IN OFFENSIVE NEAR CHOTIN

Conscription Measure, Slightly Amended, Passes Senate

BOAT SINKS IN  
LAKE; TWELVE  
ARE DROWNED

UPSET BY SHARP GALE

Those Lost Include Captain  
and Mrs. Smith, and Seven  
Children.

Special to The Toronto World.

Kingston, Ont., Aug. 8.—News that  
12 persons were drowned in a ter-  
rible gale which swept Lake Ontario  
all last night, when the George A.  
Marsh, a three-masted coal schooner,  
of Belleville, foundered between Nine-  
mile Point and Pigeon Island, was  
the startling news that came over  
the telephone late this afternoon  
from Bath, where the first news of  
the awful tragedy was received. There  
were fourteen people on the vessel,  
and out of that number twelve were  
drowned, all of whom, so it is stated,  
were from Belleville. Those who  
were drowned were: Capt. Smith, his  
wife and five children; William Wat-  
son, mate; George Cousins, deck-  
hand; and Mrs. McClelland and two  
children. The survivors were Wil-  
liam Smith, about 19 years of age,  
a son of the captain, and Mr. Mc-  
Clelland, The Marsh, which is owned  
in Belleville, was on her way  
from Oswego to Kingston with a  
cargo of coal for Rockwood Hospital.

East From Bath

The schooner foundered about 5  
o'clock this morning.

The first news of the terrible lake  
tragedy was received when Hugh  
McClelland and Benjamin, two young  
fishermen from Amherst Island, went  
out in their boats several hours last  
night to look for their nets, when they  
came across Mr. McClelland and Capt.  
Smith's son coming in from the  
scene of the wreck in a small boat.

It is stated that the wind blew at  
the rate of thirty-five miles an  
hour, and that it came up very sud-  
denly. Mr. Smith men say that a wind  
of this velocity is a rare occurrence,  
happening for a summer month. It  
appears that there were five people  
in the boat in which McClelland and  
young Smith made their escape, but  
that they were lost, as the storm  
tossed the small craft about with ter-  
rific force. McClelland had one of  
his little children clamped in his arms,  
but the little one died from expo-  
sure.

GRAIN CUTTING BEGINS  
IN SOUTHERN ALBERTA

Yield Reported to Look Better  
Than Previously Expected.

Calgary, Alta., Aug. 8.—Grain cut-  
ting has started at Milk River and  
in many other sections of the south  
Alberta country. Those cutting say  
the yield looks much better than was  
earlier anticipated.

KERENSKY APPEALS  
FOR RUSSIAN SUPPORT

Only Rule of Iron Can Make  
for Powerful Creative  
Government.

Petrograd, Aug. 8.—Premier Keren-  
sky, in an appeal to the people for sup-  
port for the reconstituted government,  
declared that only a rule of iron in  
the present plight resulting from the  
military situation, together with ad-  
vance and aid, could make for a govern-  
ment capable of making for the power  
people can make for a powerful crea-  
tive government with authority to free  
the land of the enemy and enlist in  
the work of reconstruction, all the  
living forces of the nation.

"The government," the statement  
adds, "will employ its whole strength  
in its task, confident that the power  
of the revolution will be utilized for  
the salvation of Russia's honor which  
has been affected by treason, punitiv-  
ity and treacherous cowardice."

Home to Concentrate U-Boats  
Against United Kingdom

London, Aug. 8.—A despatch to Reu-  
ters Limited, from Amsterdam says it  
is reported from a German source that  
Germany intends shortly to concentrate  
her submarine activity exclusively against  
England.

RUSSIAN DRIVE OPENS  
IN REGION OF CHOTIN

Ally's Offensive Forces Back Germans at Confluence of  
Dniester and Zbrocz Rivers—Germans  
Beaten Near Brody.

London, Aug. 8.—Russian troops are  
on the offensive in the Chotin re-  
gion on the Russo-Galician border,  
northwest of Czernowitz, and have  
withstood successfully Austro-German  
thrusts in the region of Brody, in  
Galicia, northwest of Lemberg. The  
Russian forward movement west of  
Chotin resulted in the capture of  
two villages and a height. The Aus-  
tro-Germans lost 800 prisoners and  
four machine guns. The Russian ef-  
fort near Brody penetrated the Rus-  
sian lines, but the attackers were  
thrown back by a counter-attack and  
the Russian line restored.

A newspaper report from Petro-  
grad says that the Russians have  
evacuated the fortress of Kamenez-  
Podolsk, the capital of Podolia, about  
thirty miles northeast of Chotin, and  
the garrison town of Proskurov, on  
the Bug River, 53 miles north of  
Kamenez-Podolsk. Both these places  
are some distance from the line of

the River Zbrocz, which has been held  
in part by the Russians for more  
than a week, and is behind the Cho-  
tin-Brody line.

Continued Advance.

In central Moldavia the Teutons  
continue their advance north of Pok-  
shani. Petrograd admits the success  
of this movement and says the Rus-  
sians have retired toward the River  
Sereth.

The text of the Russian communica-  
tion follows:

"In the region of the confluence of  
the River Zbrocz our energetic offen-  
sive drove out the enemy from the  
Villages of Baryshkovey and Wygoda  
and the heights west of the latter

"In the region of the Village of  
Semerinki and Brody the enemy, in at-  
tacks, penetrated our defenses, but  
counter-attacks restored the positions.

### Soldiers Honored by King

Canadian Associated Press Cable. London, Aug. 8.—The following have been created companions of St. Michael and St. George: Lt.-Col. James K. Arthur Hesketh, Strathcona; Major-General Sydney Chilton Mowbray, Major-General Erasmus William Wilson, Brigadier Thomas Hemming, Colonel Charles Stephen McInnes, Colonel David William Macpherson.

### BRITAIN WILL SEE SERBIA RESTORED

Premier Lloyd George Promises Freedom of Country After War.

### GUARDIANS OF GATES

Lord Robert Cecil Believes Aims Reconcilable With Italy.

London, Aug. 8.—(Via Reuters' Ottawa Agency.)—At a luncheon given today in the Savoy Hotel in honor of the premier of Serbia, M. Paish, Mr. Lloyd George said we were indebted to M. Paish and M. Venizelos of Greece, more than he could say at the present time.

Serbia, he said, which had been covered by the dirt of Turkish barbarism, was about to be cleansed, and would yet appear fresh and wonderful. The first condition of peace was complete restoration without reservation. However long the war may last, added Mr. Lloyd George, British honor was involved in seeing Serbia freed.

"Serbia and Belgium are the guardians of the gates, and heaven help those who defend them. The Serbian people, who are still guarding them, are still guarding the gates of Europe. We will go through the war together to the end."

In the course of his speech, Lord Robert Cecil declared that he was convinced there was no inconsistency between the aims of Italy and those of Serbia.

Premier Paish, whom Lord Cecil described as the grand old man of Serbia, after expressing his deepest thanks for what Britain had done for the small nation, said that Germany now spoke of an honorable peace. Such a peace could only be secured if the peoples now under Austro-German rule were allowed to choose their own form of government.

"I," he said, "France gets back Alsace-Lorraine, if the Italians accomplish unity with their still unredeemed brethren; if the unky of Serbia and Slovenia is achieved, then only will a honorable peace be secured."

Thomas Leadon, residing on McGee street, had two fingers on one of his hands badly crushed yesterday afternoon when caught in a machine at the Pathe Phonograph Company's plant. He was taken to the Western Hospital.

### HAD FINGERS CRUSHED.

THE RUSSIANS, fortified by an infusion of discipline, have turned on the enemy at the confluence of the River Zloc and the Dunster, on the heights. In this attack they took four machine guns and 307 rank and file.

Unofficial reports mention a Russian evacuation of two fortresses in Podolia, both some distance from the region of Chotin, where the necessity of reducing the sharp curve in the Russian line, caused by the recent retirement. The German attack in the region of Brody has begun with a bang and ended in a fizzle; for the Russians first broke their full force so that they only made partial gains of ground and then turned on the foe and drove him back to his own trenches.

The offensive launched by Von Mackensen in the Pokshani region of Moldavia has not lost its momentum, but has actually succeeded in pressing the Russians back a short distance further. The enemy does not claim that he has taken any prisoners, and the Russian retreatment is orderly. They have therefore not lost control of the local situation. The slowness of the enemy's advance will most probably give sufficient time for reinforcements to arrive to check him. The Rumanians have been strict has no been upset as in eastern Galicia. The enemy admits that, in this region, bitter fighting took place.

The resumption of gunfire so heavy in Flanders that the reverberations are felt across the channel rises to the expectation that Field Marshal Haig has chosen his next objective and is preparing to attain them. The Canadians, before the northern advance proceeds much further, will probably carry Lens, so as to permit the applying of pressure to the southern flank of the Scarpe lines. The fighting, strategically, consists of a double envelopment of the Scarpe lines. This merges into an envelopment of the German front. It will furnish an interesting spectacle of what the Germans can do when the British eventually try their flank loose of the North Sea. The left flank of the German attack is the German army in France. It may be said; the right flank is the German army in Russia.

The French front, except where the German crown prince failed again north of the Aisne to win ground, had his chief activity confined to heavy bombardments. The persistence of the crown prince in his onslaughts is his explanation partly in the fact that the enemy believes that he is rapidly wearing down the French by compelling them to make costly counterattacks. He evidently estimates that in this manner he is inflicting on the British casualty lists, it is said, that the heaviest losses come from the necessity of repulsing counterattacks. Wiseacre in modern warfare therefore assert that the ideal conditions would be a continuous advance.

The weekly return of the British admiralty on shipping losses in the merchant service, issued yesterday, gives an increase of two in the number sunk over the previous seven days. The enemy destroyed 21 vessels of over 1,600 tons and two of less burden, and he unsuccessfully attacked 13 ships. No fishing boats were lost. The enemy thus is still concentrating his efforts against the large vessels. The moral would seem to be to build ships of moderate tonnage, say 3,000, so that a million tons of shipping would represent 333 vessels, instead of the many large ships of 6,000 to 10,000 tons now in service. The enemy during July has increased the efficiency of his submarine campaign by probably 40 to 50 per cent. over June.

The United States, besides sending troops to France, will send them to Italy and Russia. This action will tend to solidify the allies still further in their determination to prosecute vigorous war against the common enemy. President Wilson apparently does not regard France as in urgent need of reinforcements. The presence of American soldiers in Russia may give the desired solidarity with weak parts of the Russian line.

Editor World: A report was published in yesterday's morning papers which stated that the transatlantic wireless service would be suspended until peace is declared. I might say that this is entirely without foundation.

The following is the report issued to the English newspapers by Mr. Godfrey C. Isaacs, managing director of our English company:

"I beg to inform you that in conformity with instructions received from the government of the United Kingdom, the transatlantic service between London and New York will be discontinued until further notice. I am authorized to state that the closing of this service is in no sense brought about by any fault of the Marconi company either here or in Canada, but is purely a necessary war measure. I would be glad if for the convenience of the public who have been in the habit of using our service so largely you would publish this announcement."

Thanking you for your kind attention, I am, Sir, very respectfully,  
The Marconi Wireless Telegraph Co. of Canada, Limited, G. Smyth, representative.

### RUSSIAN MINISTRY AUGURS SUCCESS

Kerensky Models War Cabinet on Style of Other Allies.

### TO DISPLAY ENERGY

New Government Will Restore Order in New Republic.

Paris, Aug. 8.—Recent events in Russia and the German ministerial changes were commented on today by Jules Cambon, general secretary to the ministry of foreign affairs, in an interview with The Associated Press. M. Cambon expressed sanguine hope for the success of the new Kerensky ministry. He said that Premier Kerensky appears to be invested with a kind of dictatorship which the allies hope he will exercise to the limit of his powers and his decision to reconstitute the war committee according to the model already existing among the allies augurs well.

The presence of M. Saynkoff in the Russian war ministry, M. Cambon says, is reassuring, as is the choice of M. Tchernoff as the minister of agriculture. M. Savinkoff, he said, took the initiative in re-establishing the death penalty for acts contrary to military discipline.

"The ministry seems to constitute an energetic government," M. Cambon added, "and should be an excellent instrument in the hands of Premier Kerensky for the restoring of order in Russia's house."

Regarding the ministerial developments in Germany, M. Cambon said: "The changes in the Michaelis ministry by the addition of one Socialist and one Catholic are not of a nature to alter the opinion already expressed concerning the policy of the new chancellor, Dr. Spahn, the Catholic member, especially his compromise himself too clearly by his annexationist declarations of December 9, 1915, and April 6, 1916, to permit one to consider his addition as a sign of pacific intention by Germany. Germany wants peace just as Shylock, on the condition that peace brings the pound of flesh which it covets in the form of political and territorial influence, in regions it has invaded."

### RUSSIA EMERGE POWERFUL STATE

Allies Can Depend on Her to Do Part in the War.

Washington, Aug. 8.—Russia, newest of democracies, grows stronger of heart and purpose daily, and with aid from the United States can be depended upon to do her part in the great war and emerge a powerful state. Thus was the message brought to President Wilson and Secretary of State Lansing today by Ellhu Root and his fellow members of the American mission here in Russia three months ago.

Unqualified encouragement from the United States, moral and financial when necessary, is absolutely essential to keeping her in the new government, the commissioners agreed. A separate peace with Germany obviously is the gravest fear, to fight along with her present government in control, the president was told, Russia will emerge triumphant and strong, but if either great masses of troops or clever propaganda, Germany should accomplish the overthrow of the Kerensky government the outlook would be dark indeed.

### INFANTRY ACTIVE IN FLANDERS AGAIN

British Carry Out Successful Raid Near Lombaertzyde.

London, Aug. 8.—Flanders, where the Big Push has been going on incessantly since the first of July, has again been the scene of infantry activity. The British have been successful in a raid into the German lines near Lombaertzyde, Berlin officials describe this operation as an attack in force, which, it says, the Germans beat off in hand-to-hand fighting on the night of August 6th and 7th. The raid was a surprise and the British inflicted heavy losses on the Germans. The British carried out a successful raid near Lombaertzyde, Berlin officials describe this operation as an attack in force, which, it says, the Germans beat off in hand-to-hand fighting on the night of August 6th and 7th.

### VIOLENT GUNFIRING ALONG FRENCH FRONT

German Artillery Actively Shells Belgian Communications in Flanders.

Paris, Aug. 8.—The official statement issued by the French war office tonight reads: "The artillery activity was rather violent in the region of Pantheon and the region of the Meuse in the region of the Courieres Wood and in the Douaumont sector. Belgian communications were actively part of our communications, firing with the least intensity on our organizations in the first line. The morning calm except for some shelling before Dixmude. In the afternoon the firing was of little importance. The activity was moderate on the whole of the front. On the Serbian front and in the Cehna Bend the enemy attempted two surprise attacks, which failed. "British aviators bombarded enemy encampments south of Veles."

### MAYOR OF MONTREAL GIVE 'ANTIS' CAUTION

"Be Patient, Laurier is Sure to Win," He Says in Effect.

Montreal, Aug. 8.—An announcement issued by the mayor of Montreal tonight, which was made by Mayor Martin this morning.

The mayor says in the course of his statement: "It is now evident that in spite of all the influence exercised by Borden, St. Denis, Rogers and others of the same stamp, the Liberal convention which is being held at Winnipeg will give its unanimous support to Mr. Laurier at the next election. Get the fanatics of Ontario are making desperate efforts to try to isolate the Province of Quebec at the coming elections, but so far from succeeding, this ill-omened policy is not abandoned, it is not our province, but Ontario which will be ruined. I would not be surprised if Ontario would vote for Sir Wilfrid."

Until Further Notice.

Editor World: A report was published in yesterday's morning papers which stated that the transatlantic wireless service would be suspended until peace is declared. I might say that this is entirely without foundation.

The following is the report issued to the English newspapers by Mr. Godfrey C. Isaacs, managing director of our English company:

"I beg to inform you that in conformity with instructions received from the government of the United Kingdom, the transatlantic service between London and New York will be discontinued until further notice. I am authorized to state that the closing of this service is in no sense brought about by any fault of the Marconi company either here or in Canada, but is purely a necessary war measure. I would be glad if for the convenience of the public who have been in the habit of using our service so largely you would publish this announcement."

Thanking you for your kind attention, I am, Sir, very respectfully,  
The Marconi Wireless Telegraph Co. of Canada, Limited, G. Smyth, representative.

### HAMILTON NEWS

Hamilton, Aug. 8.—There was a small gathering at the mass meeting of employers of labor, called by Mayor Booker tonight, with a view to securing men for the agricultural work, owing to the fact that earlier in the day the local branch of the Canadian Manufacturers' Association met and reported that enough volunteers had been secured. A committee, consisting of Controller Jutten, Mr. Chisholm and C. Conroy, was appointed to wait on Traction Manager Walter, with a view to having special cars put on morning and night, carry the city workers going and returning to work in the country.

The twelve-year-old Frank Enright, son of P. J. Enright, 55 William street, died in the City Hospital tonight, as the result of the pneumonia which he contracted in the city workers going and returning to work in the country.

Hamilton is going to honor the memory of her heroes of the great war who died here as the result of wounds received in action or from being gassed, by having them in the same plot at the Hamilton Cemetery.

Hamilton is going to have a fund to crack in the matter of disposing of unemployed city idlers, with a view to the Bank of Hamilton at the present time, Controller Jutten stated tonight that a fund of \$600,000 deposited at the same bank.

Over three hundred happy children took part in the annual picnic that was held at the Hamilton Playgrounds Association, Sunday afternoon, at the Hamilton Playgrounds, Benjamin Toronto, with several of the members of the Hamilton Playgrounds Association, was in charge.

He is wanted in Hamilton on a charge of larceny. When taken into custody he was found to be about 19 with him, the woman who says she is his wife. The woman had letters on her person.

Following their inspection by Major-General W. E. Frost, the Canadian Mounted Rifles will leave tomorrow for Winnipeg, where they will go on a tour of inspection.

### RUSSIAN DRIVE IN CHOTIN REGION

Place. We made prisoner seven officers and 300 men and captured four machine guns.

"During the course of Tuesday the enemy continued his persistent attacks between the Pokshani-Maraschki railroad and the River Sereth (Moldavia) and pressed back our troops to the north of Blaisgeseh. There have been fusillades on the remainder of the front.

"Caucasus front: In the region of Hoshaba, forty versts southeast of Van, our troops scattered a band of Kurds. In the region of Dizy, eighty versts to the west of Urm, our detachments of volunteers put to flight hundreds of Kurds killing 44 of them and taking ten men prisoner.

### CITY WILL BUILD WARD SEVEN LINE

Mayor Warmly Defends Commissioner Bradshaw — "Godsend," He Says.

#### WAR EXPENDITURES

Capitalized by Debentures  
War Debt Charges Form  
Mill of Tax Rate.

Headed by D'Arcy Hinds, a strong deputation of the ratepayers of Ward Seven appeared before the board of control and urged that extension of the Bloor street car line be carried out at once, and was finally assured that the work would proceed at once. Mr. Hinds criticized the finance commissioner for his attitude in connection with the work, but was pulled up by the mayor who stated that he would not allow any criticism of the officials. It was a godsend, he said, that the city had Mr. Bradshaw, who, he added, should not get the idea that he was the biggest man in the city. If an official interfered with the rights of the citizens they had a right to make a protest.

He had criticism also for Commissioner Harris who, he declared, in order to block the work, had stated that it would cost \$20,000. He had a man who had agreed to build the line for \$7,500.

To finance the work, the finance commissioner it was announced that the work would be financed out of the unexpended balances, and on being pressed for a definite assurance by Mr. Hinds, the board stated that the line would be built and that Commissioner Harris would be consulted on the matter immediately.

Finance Commissioner Bradshaw submitted that the civic insurance should be limited to those who had a primary interest in the life of the citizen at the time of his enlistment; in other words, to those relatives who were being supported financially by the man killed in action, or who had died on active service. This, he stated, was really the essence of life insurance.

#### War Expenditures.

He urged that the most earnest consideration be given to expenditures on behalf of the war. "Up to the close of 1916," he said, "expenditures in connection with the lives of citizen soldiers amounted to \$2,500,000. It is estimated that by the close of 1917 they will have increased to \$5,000,000. These expenditures are being capitalized by the issue of ten-year debentures. The annual debt charges of \$218,561 on debentures already issued represent over one mill on the dollar of the present assessment and form part of the yearly tax rate. Thus with the provincial war tax of one mill on the assessment, the city's present annual war contribution, through the war tax, is \$1,200,000, or over two and next year the mill rate for purpose will again be increased. The board was informed by George H. Gooderman that the Toronto and Hamilton highway commission had on hand just three days' supply of stone owing to the embargo placed by the railways, and that if this were not removed operations would have to come to a standstill. It was decided to make an appeal to the railways and the railway commission for relief.

#### Grant to Veterans.

A recommendation that the city grant the great war veterans \$25,000 to assist them in their organization scheme this year was sent on to the city council. The veterans are asking \$15,000 from Toronto and \$20,000 from the provincial government, and will raise the balance of the \$40,000 a year necessary to carry on their work themselves. The application of the association was approved by the mayor, Controller Foster and Controller Shaw, the only members present when the deputation was received. The mayor stated that both governments had endorsed the scheme.

#### THOUSANDS OF MEN REQUIRED FOR HARVESTING IN WESTERN CANADA.

Thousands of men are required to help in the great work of harvesting the western crop. Arrangements for transporting to the west this great army of workers have been completed by the Canadian Pacific Railway.

Excursions from points in Ontario to Manitoba, Saskatchewan and Alberta will be run, and special trains operated, making the trip in about thirty-six hours, without change of train.

Going trip west, \$12.00 to Winnipeg. Returning trip east, \$18.00 from Winnipeg. Consult C. P. R. agents regarding transportation west of Winnipeg.

#### Going Dates.

August 21st and August 30th—All stations in Ontario, west of Smith's Falls, up to and including Toronto, on Lake Ontario Shore Line, and Havelock-Peterboro line, also from stations between Kingston and Renfrew Junction, inclusive, and from stations on Toronto direct line to Havelock-Peterboro line, also from stations on main line, Beauséjour to Franz, inclusive; from stations, Berthany Junction to Port McNicoll and Burketon-Bobovayron and August 23rd and August 30th—From stations west and south of Toronto, up to and including Hamilton and Windsor, Ont., on Owen Sound, Walkerton, Teeswater, Wingham, Elora, Listowel, Goderich, St. Mary's, Port Burwell and St. Thomas branches, and stations Toronto and north to Bolton, inclusive.

Further particulars from any C.P.R. ticket agents, or W. B. Howard, District Passenger Agent, Toronto, Ont.

#### SCHOOLS BEING REPAIRED.

York street school is being thoroughly overhauled in preparation for the fall term. The class cabinet which Miss Cullen has so long desired for a specimen case for the children has been installed. Duke, McCall and Hester. There are also urgent repairs needed.

# Take Off Your Coat and Give the Farmer a Hand!

When, three months ago, we called upon Ontario's farmers for mighty efforts to avert the threatened Famine and World-Hunger, they responded splendidly.

Aided by Providential weather, Ontario's Crop is one of the biggest in her history.

The farmer has done his part.

We Town and City men must do our part.

The crop is on the ground—the farmer can't possibly take it off unaided.

To lose a sheaf of it for want of harvest-help would be an unthinkable crime.

We call upon the Men of Ontario to rouse themselves. To co-operate, employee with employer, in this patriotic service. Many employers have agreed to make it financially possible for their employees to do this work, and the Ontario Government will pay railway fare both ways of all men who go.

Help us, so that we may send word to Ontario's Sons in the trenches — that Ontario's Second Line of Defence stands fast, — that here, as well as there, we "Carry On."

W. H. Hearst,  
Prime Minister of Ontario.

S. R. Parsons,  
Pres. Canadian Manufacturers' Assoc.

Albert H. Abbott,  
Secretary of Committee.

## Toronto Men Register at War Production Club - 15 King Street East

Men outside Toronto should apply to the Local Public Employment Bureau, the Local District Representative of the Department of Agriculture, or to the Mayor of their Municipality for registration.

#### SEA FISH EXPERIMENT PROVES GREAT SUCCESS

Commission Has Made Arrangements to Rush Another Car Thru on Friday.

The sale of the first car of cod and haddock from the Atlantic coast was yesterday pronounced to be a most successful experiment by all parties concerned, including the ultimate consumer.

Arrangements have now been completed to bring in a car of fish on Friday that will be distributed and sold on that day under the same conditions as that of Tuesday. It was impossible to secure a refrigerator car for this shipment but the express car will be rushed thru and the fish will arrive in first class condition. The Friday shipment will not be quite as large as Tuesday's, but on Monday a refrigerator car containing seven and a half tons of fish will

reach here for distribution on that day. The fish commission and the food controller have not only accomplished an appreciable reduction in the cost of living by this project, but have shown that perishable fish can be used and kept palatable food conserved for the men overseas.

#### Street Railway Men's Case Is Still Being Considered

The board of conciliation that is inquiring into the differences between the Toronto Railway Company and the employees met yesterday morning and although the progress is reported as being very slow, Judge Snider, chairman of the board, admitted that he hopes to finish up this week, if it is at all possible. Yesterday's meeting was devoted to considering the working conditions, but very little headway was made. Considerable difference of opinions was expressed and Judge Snider stated that if the parties cannot agree, then a report will be fixed up by the board.

#### CARLTON PLAYGROUND GIVE SUMMER FETE

Children Present Exhibition of Activities to Large Assemblage of Parents.

The annual summer festival of Carlton Park playground centre was held yesterday afternoon, Alderman Archibald acting as chairman. Unfortunately threatening rain broke up the afternoon a little before the program could be completed but the large crowd of parents and friends who assembled to witness the play work of the children had no disappointment in the numbers that were given. Miss G. M. Bartley, who is in charge of the girls at this centre, is head lady superior for the city. Miss E. Dunsmore is teacher of the junior girls and H. Nisbro, superior of boys. Carlton Park is one of the most popular of all the city centres, with

plenty of open space and green grass for games. Boys and girls play with a will day in and out all thru the summer.

#### Brant House Taken Over For Use as Military Hospital

The Military Hospitals Commission entered into complete possession of the Brant House at Burlington Beach yesterday. The nine cottages in connection with the Brant House also taken over by the commission for use by returned soldiers, will not be used until the end of October and the present occupants will be permitted to retain possession until that date.

#### CHARGED WITH VAGRANCY.

Charged with vagrancy, the theft of goods to the value of \$19.50 and \$20.50 in money from Joseph Adler and theft of \$40 from Alfred J. Clark. Roy Swain was sentenced to three months on each charge when he appeared in the police court yesterday.

#### TELEGRAPHERS THREATEN TO CALL A STRIKE

At a special meeting of the committee which is looking after the dispute of the commercial telegraphers of the G. N. W., a walk-out was threatened, if some settlement is not arrived at regarding a new wage and time scale. At a recent conference it was reported that the general manager of the G. N. W., G. D. Perry, absolutely refused to discuss the proposed change in the wage and working scale or to offer any increase whatever, and yesterday morning, C. E. Malette, general chairman of the committee, stated that the outlook was very serious, and that it now looked as though a strike would be forced owing to the men's inability to obtain a hearing. It is stated that the Canadian Pacific telegraphers are receiving \$18 to \$20 per month more than the G. N. W. telegraphers. Special meetings have been called in

#### If Stomach Hurts Drink Hot Water

"If dyspeptics, sufferers from gas, wind or flatulence, stomach acidity or sourness, gastric catarrh, heartburn, etc., would take a teaspoonful of pure bisulphated magnesia in half a glass of hot water immediately after eating, they would soon forget they were ever afflicted with stomach trouble, and doctors would have to look elsewhere for patients." In explanation of these words a well-known New York physician stated that most forms of stomach trouble are due to stomach acidity and fermentation of the food contents of the stomach, combined with an insufficient blood supply to the stomach. Hot water increases the blood supply and bisulphated magnesia instantly neutralizes the excessive stomach acid and stops food fermentation, the combination of the two, therefore, being most successfully successful and decidedly preferable to the use of artificial digestants, stimulants or medicines for indigestion.

N BECOMES VICE-PRESIDENT  
son Retires on Account of Ill Health.  
g. S. — W. P. Hinton, manager of the Pacific Railway, has been elected vice-president of that railway, to succeed Donaldson, who has resigned on account of ill-health. Hinton was at one time general manager of the old Canada-Atlantic Railway, and his headquarters at Ottawa.

**FRY'S PURE COCOA**

Delicious

RECIPES: Keep on hand a syrup made up of one half cup of FRY'S Cocoa, one cup of sugar, one cup of warm water. Stir until smooth. Then boil for 5 minutes and chill and add one half teaspoonful of Vanilla Extract. To serve, allow two tablespoonfuls of this syrup to a glass with a little chopped ice and fill with cold milk. Stir well.

Try this cooling, delightful FRY drink. You'll want it often.

**PLAYS, PICTURES AND MUSIC**

**LOEW'S THEATRE.**

"Redemption" with Evelyn Nesbit and her son, Russell Thaw, a photodrama that ranks as one of the most elaborate and best productions produced during the present vogue of mighty film ventures, will be seen for the first time anywhere next week at Loew's Yonge Street Theatre and Winter Garden. The central character in the most sensational newspaper story ever known on the North American continent is Evelyn Nesbit, who has proved herself an exceptional screen subject and artist of really great ability. Featured on the vaudeville bill is the Unedda Girls, consisting of nine principals and a stunning beauty chorus in a fascinating musical comedy sketch. Other features will include Grace Hanson, the musical comedy star, with new melodies; Connors and Hyack, unique funmakers; Eddie Foyer, "the man of a thousand poems," and the Oxford Trio, who play baseball on bicycles.

**THE ROBINS PLAYERS.**

"A Pull House," next week's play to be presented by the Robins Players, is one of the greatest successes of the year. A clever, clever farce has not come to Toronto for many a day. Disproving the theory that only risqué farces can win on the stage today, "A Pull House" attracts by its lack of the suggestive and its sheer buoyancy of humor. Imagines a reckless youth, who writes ardent love letters to a designing chorus girl, an attorney brother-in-law, who steals the letters and then gets his hand bag mixed up with the grip of a burglar, who has just stolen a valuable necklace from the mother of the indiscreet youth, and the effort of the crook to recover his plunder, as incidents in the story of a play in which the action never ceases for an instant.

**AT THE REGENT.**

Kitty Gordon, in "Forget-Me-Not," is the stellar attraction at the Regent for next week. She and Sidney Drew and Dr. Harvey Robb and the Regent Symphony Orchestra will give a program of unusual merit. Kitty Gordon portrays the Corsican peasant and the wife of a marquis. From the sweetheart of the fisherman to the wife of a notorious Frenchman her career carries her thru many paths. The story is full of exciting incidents. Every moment brings its new situations, making the production of unusual interest. Dr. Harvey Robb will be heard in piano solos. Sidney Drew's new comedy is a ticklish one.

**AT THE STRAND.**

The Greater Vitaphone production, "The Stolen Treaty," which is headlining the bill at the Strand Theatre, is getting a very favorable impression. It is timely and topical and does not strain the imagination too hard. Earle Williams has fine opportunity of display-

**Society---Mrs. Edmund Phillips**

Their Excellencies the Duke and Duchess of Devonshire, accompanied by Lady Rachel Cavendish and Captain Ridley, A.D.C., visited the discharge depot in Quebec on Saturday morning and displayed a keen interest in the different departments and the operation of the depot. His Excellency afterwards entertained His Excellency Cardinal Beaudry, who was accompanied by Canon Lindsay, at luncheon. On Saturday evening their excellencies attended a special service of intercession at the Cathedral of the Holy Trinity to commemorate the fourth year of the war. Their excellencies were accompanied by the Ladies Dorothy and Rachel Cavendish, Miss Saunders, Miss Walton, Lord Richard Neville, Captain Bulkeley Jonson and Captain Ridley.

Lady Loughheed and Miss Dorothy Loughheed joined Major Loughheed in Calgary last week, and will spend a few days there before returning to Banff.

Mrs. Cawthra Mulock is leaving next week for Kooche's Point to pay a visit to Miss Ina Matthews.

Mr. G. R. Bremner, who is with a Forestry battalion, is stationed in the great park at Windsor, near the statue of the Prince Consort, and finds it much more congenial than with the Army Service Corps in France.

Mr. and Mrs. Glenholme Moss have returned from a holiday at Bobcaygeon.

Sir Hardman Lever, Bart., has arrived in Ottawa from England, and is at the Chateau Laurier.

Miss Mary Garrett has arrived in Niagara from Northampton, Mass., to spend a month.

Mrs. William Hendrie and her children, Hamilton, have left for the French River, where they will spend the remainder of the summer in their house-boat.

Mr. G. Grenville Hunter has volunteered for service in the United States army, and will shortly go into training. Mrs. Hunter is in the Berkshire Hills, where her father, Mr. Acton Burrows, has been visiting her.

Mr. Hamilton Cassels, K. C., who spent a few days in Winnipeg, has proceeded to the coast.

Mr. and Mrs. Leigh Pemberton are leaving Winnipeg shortly to live in Toronto.

Lady Braid, who owns dachshunds, has received a client for her dogs, for they were not originally a German breed, and calls them "spitz" dogs, for they were used for turning the rook in former days.

The Rev. C. Ennor Sharp is at the Hotel McAlpine, New York.

Mr. E. Byron Hostetter was in Toronto last week to make a presentation of books to the library of the Royal Canadian Mounted Police, in honor of Mrs. Hostetter, who was unable to be present in person. The books, which were given by her as a

**LODGE NEWS**

**WILL DISPLAY HONOR ROLL.**

At last night's meeting of Toronto Camp No. 43, W.O.W., in the Foresters' Hall, presided over by C. Dutler, councillor commanding, the question of preparing a roll of honor for the 20 members now serving overseas was under discussion. It was stated that such a roll should be hanging in the lodge room, and the necessary arrangements will be made forthwith. So far no deaths at the front have been reported in the lodge and only two have been slightly wounded.

**WHITE HEATHER CAMP, D.O.S.**

At the regular meeting of White Heather Camp, No. 1, D.O.S., last evening in the Temple Building, President Mrs. Easton in the chair, it was reported that the sum of \$10 was raised as the result of the recent picnic. This sum will be donated to the forwarding of comforts to the boys overseas. The ladies of this camp are working hard in the cause, and so far this year the sum of \$150 has been raised and spent in purchasing comforts. Ways and means for increasing this amount were discussed, and it was decided to hold a series of concerts, euche parties, etc., under the supervision of Mrs. Munro, who is convener of the soldiers' comforts committee.

**BADE SOLDIER GOOD-BY.**

I. O. F. Lodge Makes Presentation to Dr. Hodgson, Now Going Overseas.

A special meeting of the officers of Court Sherwood Forest, No. 3105, I. O. F., was held last evening in the Temple Building, Bro. G. Bailey, high secretary, presiding. The meeting was called for the purpose of making a presentation to Dr. E. G. Hodgson, court physician, who has resigned his office to join the Imperial A. M. C. for work overseas, and who is sailing from New York this month. The presentation, which took the form of a purse of gold, was made by Bro. S. Martin, and Dr. Hodgson in thanking them said he regretted having to leave the members of Sherwood Forest, but he was taking up important work, and although the war had been on for some time now he had felt for some time

things in his address. Two new members were initiated into the lodge.

**REMEMBER OVERSEAS MEN.**

Lodge St. Albans, No. 76, S.O.E.B.S., met last evening in the S.O.E. Hall, Bro. J. Jones, president, in the chair. Arrangements were made for the sending of parcels to the thirty-two members now overseas. The lodge sends every two weeks parcels to those members who are prisoners of war, and at wider intervals to the other members in the firing line. Arrangements were also made for the holding of the past-presidents' night in September, which will open the fall session.

**SOLDIER COMMITTED.**

Alleged to have stolen a car belonging to William Gibson, Pte. Frank Gourlie was committed for trial when arraigned in the police court yesterday.

**SENTENCED FOR THEFT.**

Judge Coatsworth yesterday sentenced Samuel Roy Carlton to thirty days in jail for the theft of \$40 from Frank McGuire during a joy ride.

PORCUPINE NOTED FOR LARGE TONNAGE

Size of Ore Bodies Prime Factor in Determining Value of Mine.

BIG MINES PREDICTED

High Values Not an Important Factor Except in Large Amounts.

At the beginning of the present year there had been very little development on either the 500 or the 1250-foot level of the Hollinger Consolidated. Of the 1,500,000 tons of ore which had been milled up to that time, less than five per cent. had come from a horizon below 425 feet. In fact, the great bulk of the ore came from points below 200 and above 425 feet.

This property is unique among the mines of Porcupine in respect of the large quantity of payable ore near the surface. At the Porcupine Crown values were negligible above 500 feet, so also at the McIntyre Consolidated the zone of enrichment began about 600 feet from the surface, and the Big Dome has proved by the diamond drill values of \$17 per ton, at a depth of 700 feet to a total width of 119 1/2 feet.

The No. 1, or main vein on the Hollinger, had a very fine surface showing. There was visible gold at several points in its course. On the other hand, there was no visible gold on the McIntyre on the north side of Pearl Lake, where such splendid values are now being obtained in depth.

The principal ore shoot on the latter is 900 feet long. It has a pitch to the northeast in the plane of the vein, and it will average nearly 20 feet in width at the 1000-foot level, and values are unusually high for such a large ore body.

The ore shoot on the main vein of the Hollinger is about 1000 feet long at the 425-foot level. In places it is 20 feet wide, but its dimensions must be equal to those of the corresponding shoot on the McIntyre.

The advantages of deep mining are becoming apparent in Porcupine, and the Hollinger is opening up ore bodies at a depth of 1250 feet. The Jupiter shaft is being rapidly pushed to the 1000-foot level, and the McIntyre shaft is being located an important ore body with the diamond drill. But whether this is a continuation of that at 700 feet has not yet been determined.

Has Advantage. In respect of its many veins and vein systems Porcupine has an enormous advantage over other camps where there is only one, or at most three or four veins. Its ultimate tonnage will be very great, and large tonnage must be mined before heavy expenditure can be undertaken. Single veins running only for a few hundred feet are of no commercial importance as they are too rich to be mined, and it is a universal rule that exceptionally rich ore is only in small quantities.

Emancipated from the handicap of the great War Porcupine will go ahead with giant strides. Its output of over \$20,000,000 to date proves its possibilities. It is now only a question of development. There may not be very many large mines at all events within the field as at present known, but there will be a few of the largest ore mines in the world, and in their wake a lot of smaller properties.

Capital going into Porcupine now can avoid the mistakes of the early operators. No two mining camps are exactly alike, and much has to be learned as to every new region as to the nature and mode of occurrence of its ore deposits. But when this lesson has been learned much can be saved in both mining and marketing. All initial difficulties and mistakes, and after the war it will get into its normal stride. S. R. Clarke.

MILLER LAKE O'BRIEN BIG SILVER MINE

Has Veins Equal to Anything Seen in Cobalt's Palmy Days.

The Miller Lake O'Brien silver mine in the Elk Lake-Gowanda district, is the biggest proposition now operating in northern Ontario, so far as silver is concerned. In one place the vein is 10 feet wide, and thru it there are five stringers, each five inches wide, with values running over 500 ounces per ton. There is also good milling ore over the whole 10 feet.

Further on the stringers join in one great vein 25 inches wide, and here also silver values run into thousands of ounces per ton of ore.

As yet it cannot be definitely said how much this great property will produce, but the vein at present looks equal if not better than the best vein in Cobalt in its palmy days. The marked success of this property should attach more capital to the district.

SECOND VEIN FOUND AT WASAPIKA MINE

Strike Made in Workings on Development of Ribble Vein.

George R. Rogers, M.E., general manager of the Wasapika Gold Mines, Ltd., at West Shining Tree, has just returned after three weeks spent in that camp. In locating the shaft for the development of the Great Ribble vein another vein was struck. This vein was seven feet wide and contained visible gold. It is about 80 feet west of the Ribble. The latter is dipping at an angle of about 45 degrees to the west and the shaft will enter it at a moderate depth. With two payable veins, each of good dimensions, the company will be in a very strong position so far as the volume of ore is concerned.

The Ribble vein is one of the most persistent in the whole camp, and the vein or conglomeration thereof are evidence of great dynamic activity and consequent mineralization in the vicinity. With adequate development the company has an excellent chance to become an important producer at an early date.

SHORTAGE OF SILVER IN INDIA ACUTE

Internal Demand for Metal Coinage Not Remedied by Loan.

The following illuminative article on the silver situation appeared in the monthly report of the National City Bank of New York:

"The silver market has been excited and higher in recent weeks and the position of the metal is very strong owing to the heavy balance of trade in favor of India. The situation is the occasion of no little perplexity to the British authorities and concerns the United States as well, for if the balance due India cannot be paid in silver they will have to be paid in gold, and nobody cares to see gold taken to that bourne whence neither gold nor silver ever returns. The balance of trade in favor of India for the last British fiscal year, ended March 31, 1917, was \$270,902,259, which compares with \$196,428,030 in the year 1915-16, \$128,858,081 in 1913-14 and \$51,682,932 in 1912-13, the last year of normal trade. In 1914-15 the importations of silver by India amounted to 60,077,452 ounces, in 1915-16 to 25,829,218 ounces and in 1916-17 to 115,745,821 ounces. In order to direct all importations into the government treasury private importations have been recently prohibited, except under license. The Indian demand has caused a large movement of silver from China and exhausted supplies everywhere without satisfying the trade requirements. It is said that large plantations in Ceylon have been greatly embarrassed for the want of rages to pay for their labor, and money has been tight in the financial centres of India.

The Indian Government is understood to have asked permission of the home government to allow it to import gold either from London or the United States, but consent has not been given. Japanese banks are shipping gold from Yokohama in payment, it is explained, of the Indian cotton, and there would be a handsome profit to American banks in gold shipments from this country, but they have abstained for public reasons.

In order to correct the exchange situation the Indian Government has brought out a loan of \$100,000,000, or \$600,000,000, the proceeds of which will be placed to the credit of the British Government. Reports show that the loan is being well subscribed, and this should remedy the exchange situation between India and the rest of the world, but it does not remedy the embarrassing situation in India, for the reason that the small Indian farmer or laborer is not a borrower, and he is the individual who is wanting silver or gold in exchange for his products and labor. The great body of the Indian people have little knowledge of paper money or any form of credit, and nobody knows how to persuade them to take any substitute for the precious metals.

"The total production of silver in the world in 1913 was estimated at 223,900,000 ounces, but in 1916 the estimated yield was only 173,283,000 ounces. The chief falling off has been in Mexico. On the other hand, the increase of silver in all countries has increased owing to the fact that the production and activity of trade, France used 20,000,000 ounces in 1916, which was four or five times its normal consumption. The coinage in the United States is very remunerative to silver producers, especially as silver in the United States is mainly produced in connection with lead and copper, which are also bringing high prices."

RAPID PROGRESS IN BAGGING ORE

Cobalt, Aug. 8.—Altho little is being said by the Adanac management relating to the developments at the property this reference cannot be considered before it is made. According to report the bagging operations are being continued with such success that it is estimated that over \$15,000 in ore has been prepared for shipment. Where the stoping has been commenced the vein is looking exceptionally good.

UNLIMITED METAL SUPPLY AT SUDBURY

One Hundred Years Will Not Exhaust Nickel Deposits, it is Estimated.

OTHER METALS ALSO

Platinum and Palladium By-products of Nickel-Copper Ore.

According to the report of the Royal Ontario Nickel Commission the nickel-copper area of Sudbury are capable of producing much more palladium than the whole of the present world supply together with a very large proportion of platinum, iridium, rhodium and other metals of the platinum group.

Palladium has long been used in dentistry and it is now largely replacing platinum both in that work and in jewelry. Its value is now equal to platinum, that is about \$100 per ounce or nearly five times more than gold. But at Sudbury the platinum and palladium are recovered only as by-products of the nickel-copper ore. The Mond Nickel Co. saves practically the whole of the precious metal remaining in the nickel ore. The present operator, the International Nickel Company, has adopted a process which allows a large proportion to go into the nickel and metal not at all produced and sold. But notwithstanding this fact the International Nickel Company in 1916 recovered altogether 15,829 ounces of platinum and palladium worth \$1,589,200 at \$100 per ounce. They of course received no payment for any precious metal remaining in the nickel ore. In the metal of which the company makes a large quantity, carrying from 1 per cent. to 10 per cent. of the total nickel in the matte produced at Copper Cliff.

The International Nickel Co., however, has been producing all over its Vermilion Mine. This mine yields rhodium as well as platinum and palladium. It is also high in nickel-copper and gold. Shipments have been made from this property averaging over 15 ounces of platinum and palladium per ton of matte. The high value of these metals named, but the tonnage available is not large.

It will be remembered that the Mond Nickel Co. are recovering all the precious metals, but we have no figures as to totals. But it is safe to say that the Sudbury production of these metals annually is \$20,000,000 worth of the rare metals.

Prospectors in the district have long believed that the nickel-copper ore have very valuable by-products in the way of the rare metals. But the nickel people have not shown any remarkable anxiety to acquire the public with the values therein or being recovered and the Royal Commission seems to think that the recoverable amount of these metals are too low. The report says that in view of the normal and particularly the present demand for all metals of the platinum group investigations should be continued both as to the amounts present and the possibility of recovering them. They also point out that the electrolytic process of refining nickel matte recovers the precious metals automatically, and only by a few specialists.

Caution Advised. It would not be profitable to work the nickeliferous pyrrhotite for the metals of the platinum group alone and great care should be exercised before commencing any mine on the assumed existence of these metals in any other ore, for instance iron pyrrhotite even the found in the same district. Pyrrhotite is known to carry minor quantities of the rare metals but pyrrhotite is not, and assays of platinum and palladium are made with great difficulty, and only by a few specialists.

CAUTION ADVISED.

It would not be profitable to work the nickeliferous pyrrhotite for the metals of the platinum group alone and great care should be exercised before commencing any mine on the assumed existence of these metals in any other ore, for instance iron pyrrhotite even the found in the same district. Pyrrhotite is known to carry minor quantities of the rare metals but pyrrhotite is not, and assays of platinum and palladium are made with great difficulty, and only by a few specialists.

GOLD UNITED KIRKLAND

The public response to our announcement of the first offering of stock of the United Kirkland Gold Mines, Limited, of the Kirkland Lake district is proving to be in every way satisfactory—so satisfactory that an oversubscription of the first allotment of stock available at 22c is already indicated.

The orders and inquiries coming in by mail and wire are in such large and increasing volume that it is considered advisable to recommend immediate decisions on the part of those who intend buying the stock at the initial offering price of 22c, and who wish to avoid any difficulty in having their orders placed and filled in their entirety.

AT THE CLOSE OF BUSINESS NEXT WEDNESDAY, AUGUST 15, THE PRICE OF UNITED KIRKLAND STOCK WILL BE ADVANCED TO 30c A SHARE. AFTER THAT DATE THERE WILL BE NO STOCK AVAILABLE AT 22c. ALL ORDERS COMING WITHIN THE 22c OFFERING PRICE MUST BE ON FILE IN OUR OFFICE AND MUST BEAR DATE MARKS PRIOR TO THE CLOSE OF BUSINESS AUGUST 15.

As a matter of record and information we publish below the officially sanctioned description of the United Kirkland Gold Mines, Limited, properties, located in the Kirkland Lake gold mining district, Timiskaming Mining Division, Province of Ontario:

UNITED KIRKLAND GOLD MINES, LIMITED

INCORPORATION—United Kirkland Gold Mines, Limited, is incorporated under the Ontario Companies Act. No personal liability.

CAPITALIZATION—Authorized, 2,000,000 shares. Par \$1. Treasury, 1,000,000 shares.

OFFICERS—President, R. T. Shillington; vice-president, W. George Ellis; secretary and treasurer, Herbert A. Day—all of Halesbury, Ontario—with Levi Dodge and Edward Kart, both of Englehart, Ontario, constitute the board of directors.

PROPERTIES—Five full and fractional claims, aggregating 140 acres, more or less.

LOCATION—Properties are in a compact group and located in the western end of the Kirkland Lake district, adjoin the Elliott-Kirkland properties and are one remove west of the already famous Kirkland Lake Gold Mines (McKane), now under successful deep-level development by the Beaver Consolidated Mines interests of Cobalt.

The Elliott-Kirkland and Kirkland Lake Gold Mines properties were sold to their present interests by the principals of the United Kirkland Gold Mines Limited.

ACCESSIBILITY—United Kirkland Gold Mines estate is located in the extreme western end of the proven mineralized zone of Kirkland Lake, nearest the Swatara station on the Timiskaming & Northern Ontario Railway. It can be reached from the railroad station by automobile in from 10 to 20 minutes. The making of an appropriation to cover the building of a railroad tangent from the station to connect with Kirkland Lake has been authorized by the Provincial Government, and it is expected that the first new railroad building done in the north country will be that connecting up the Kirkland Lake camp. Two surveys have been made by the T. & N. O., one of which will be followed when the road is built. Both surveys pass in the immediate vicinity of the United Kirkland Mines properties, one survey crossing the properties.

VEIN SYSTEM—United Kirkland Gold Mines properties lie on the direct strike of the main vein system of Kirkland Lake, on the contact between the porphyry and the sedimentary series. This system has been proven for two miles, in a direction slightly north of east and south of west extending from the Tough-Oakes mines to United Kirkland. The extension of this main vein system is exposed boldly on the surface of the United Kirkland properties and shows from six to eight feet of the characteristic vein matter lying directly on the contact, which has proven to be the rich productive zone of Kirkland Lake. This outcrop, with its marked favorable characteristics, exceeds in width, length and strength of showing any other surface showing at the western end of Kirkland Lake, and is fully equal (with one possible exception, the Wright-Hargraves, the discovery mine of the camp, at the opposite end of the lake) to that of any in the entire camp. The company is fortunate in being in position to immediately begin work on the extension of the known ore-bearing system of Kirkland Lake. There are three positively established vein systems in Kirkland Lake, all of which cross United Kirkland Mines.

DEVELOPMENT—There has been but little development done to date on the properties of the company, this having been confined to the statutory assessment work.

VALUES—Assays of the surface exposure on United Kirkland No. 1 vein show values up to \$12 per ton across a stoping width. Following the experience of its immediate neighbors, Elliott-Kirkland and Kirkland Lake Gold Mines, higher values and greater widths may be expected as each new level is opened up.

POWER—Development of these properties has waited on the delivery of hydro-electric power into the Kirkland Lake district, which became a fact in the spring of 1917. Northern Ontario Light & Power Company with an expenditure of approximately \$400,000 entered the district from Cobalt, a distance of 70 miles, providing for all the power demands of the Kirkland Lake mines and works. Power from this system is now being delivered to the Elliott-Kirkland plant, directly adjoining United Kirkland, and by the stringing of approximately one-third of a mile of wiring at nominal expense this power will be available on the United Kirkland estate. Former costs were about \$120 per horsepower annually, while present costs are \$60 per horsepower, a reduction of at least 50%, placing the power costs of the camp on substantially as economical a basis as those of any camp operating in the north.

HISTORY—The development of Kirkland Lake, which is now producing around \$1,000,000 annually in gold bullion, notwithstanding recent unsettled labor supply, has been exceptional. This development dates back only to 1914, when gold was found in the quartz veins which traverse the reddish felspar porphyry on the Wright-Hargraves to the east of the lake, and when the Tough-Oakes group began making shipments of high-grade gold ore from its No. 2 vein.

The men connected with United Kirkland Gold Mines were pioneers of the district and have been closely associated with its physical and financial development from the earliest discovery days. They have owned and disposed of some of the richest ground in the district, notably the McKane properties, to the Beaver Consolidated interests, for \$200,000, the second payment of \$75,000 of which was made a few weeks ago. The McKane properties had been developed by shaft for 70 feet at the time of this sale, but the Beaver interests did not reach the main ore body until the shaft had been sunk to 200 feet. The Beaver interests are now sinking from the 600 to the 700 level, the deepest shaft in the camp, and as the result of deep developments are preparing to erect on the ground a 150-ton mill to treat the ore.

The record of the men at the head of United Kirkland Gold Mines in Kirkland Lake has been successful without exception, and, as a matter of fact, not a single failure has yet been recorded against Kirkland Lake in the two-mile section lying between Tough-Oakes, a dividend payer, and United Kirkland Gold Mines. The rich surface showings have already proven in the experience of the Kirkland Lake Gold Mines the tendency to widen and grow richer down to the 700 level, where these properties have an ore body 45 feet wide with estimated average values of \$15 to the ton, the widest vein in the district and one of the widest in the north country.

The president of the company, Mr. R. T. Shillington, is a man of considerable means realized from the mining business. His mining ventures have uniformly turned out successfully. He was for four years a member of the Provincial Parliament from the Timiskaming district. His official associates are men of splendid standing. Mr. W. George Ellis, the vice-president, and Mr. Levi Dodge, a director, originally staked these properties, which are known locally as the "Dodge-Ellis" group, having been connected with the Kirkland Lake camp since 1912. These properties have been examined and reported upon by T. J. Flynn, M.E., R. H. Lyman, M.E., and Geo. O. Randolph, M.E.

REMARKS—The established character of Kirkland Lake; rapid progress of the camp in matters of deep-level development; widening and enriching of ore bodies; development of ore reserves; building of mill; advent of hydro-electric power; assurance of early railroad facilities; building of new mills and increasing capacity of old plants to treat the ore, and the already demonstrated earning power of the older mines, all point to a great future for Kirkland Lake, which some mining geologists seem to be in line to become the peer of Porcupine. The United Kirkland Mines will add one more success to Kirkland Lake's "Golden Two Miles" cannot be intelligently questioned.

United Kirkland Gold Mines stock offering is being sponsored by Mr. J. T. Eastwood, president of the Toronto Standard Stock Exchange.

BUT WE WANT TO REITERATE—AND THUS PLACE OURSELVES EMPHATICALLY ON RECORD—OUR PLEDGE THAT EVERY SHARE OF UNITED KIRKLAND GOLD MINES STOCK SOLD THROUGH OUR OFFICE WILL BE SOLD SUBJECT TO THE EXAMINATION AND REPORT OF A DISTINGUISHED MINING ENGINEER AND GEOLOGIST, WHO WILL BE CHOSEN AND ANNOUNCED BY US AS SOON AS THE MATTER CAN BE PROPERLY DETERMINED. WE WANT TO MAKE OURSELVES PLAIN—WE WISH NO MISUNDERSTANDING. UNLESS THIS ENGINEER, A MAN WHOSE RECORD AND ACHIEVEMENTS SHOULD STAMP HIM BEYOND QUESTION WITH THE NECESSARY QUALIFICATIONS TO PASS UPON THE KIRKLAND LAKE DISTRICT AND UNITED KIRKLAND MINES, SHALL FIND FAVORABLY FOR UNITED KIRKLAND—SHALL CHECK UP SUBSTANTIALLY AND ESSENTIALLY AND CONSTRUCTIVELY ALL THE FEATURES WHICH WE HAVE SET FORTH OVER OUR SIGNATURE AND RESPONSIBILITY ON UNITED KIRKLAND MINES—WE WILL IMMEDIATELY RETURN ALL MONEY SENT US ON UNITED KIRKLAND, AND THUS LEAVE ALL CUSTOMERS OF OURS WHO HAVE BOUGHT THE STOCK ON OUR SUGGESTION FREE TO CHOOSE AND ACT AFTER THAT AS THEY PLEASE.

We are free to say that we believe that the United Kirkland properties will prove the biggest in Kirkland Lake. This is a belief based upon talks with various Kirkland Lake operators, some of whom have no direct interest in United Kirkland. It is a belief based upon the reports of such mining engineers as Messrs. T. J. Flynn and George O. Randolph, which are on file in our office. It is a belief based upon statements received from such mining engineers as Messrs. Frank C. Loring and R. H. Lyman, whose reports will be available later. We believe United Kirkland is the solar plexus property of Kirkland Lake. Personally, we believe it is the mother lode of the camp. But we are not mining engineers, and we have never yet tried to force our views as to mining propositions upon the public to the exclusion of the opinions of men of technical ability and authority. We not only decline to offer our opinion in lieu of that of a mining engineer, but we intend—and are now working out our intention—to procure this mining engineer of commanding standing to report upon these properties, whether for good or for ill, and his report shall afford the protection which we and our customers must now and always have in buying into mining propositions.

REMEMBER, THE TIME IS SHORT. AN OVERSUBSCRIPTION OF STOCK IS ASSURED, ATTESTING THE GREAT POPULARITY OF KIRKLAND LAKE AS A GOLD CAMP. IF YOU DO NOT HAVE YOUR SUBSCRIPTION IN OUR HANDS BY THE CLOSE OF BUSINESS, AUGUST 15, YOU LOSE THE OPPORTUNITY OF BUYING UNITED KIRKLAND STOCK AT 22c, AND WILL THEN HAVE TO PAY 30c. LATER, WHEN APPLICATION SHALL HAVE BEEN MADE AND ACCEPTED FOR OPEN TRADING ON THE STANDARD STOCK EXCHANGE OF TORONTO, WE MAY EXPECT THE STOCK TO SELL AT MUCH HIGHER FIGURES.

STOCK DECLINES ON WALL STREET UPSETS POOL SPECIALTIES

Adverse Legislation and Steel of Canada Program Disarranged by Break in U. S. Steels.

New York, Aug. 8.—The administration's reported policy respecting the steel industry...

Materials, equipment, coppers and other shares were subjected to constant pressure at extreme declines of three to ten points.

There was little demand for speculative shares but time money was firmer, however, as the 100,000,000 of Canadian notes and \$200,000,000 treasury securities.

There were two important items of news yesterday which might, under some circumstances, have been expected to affect the mine stocks.

ADANAC DIVIDEND PASSED

News Thoroughly Discounted—Adanac Active and Stronger in Cobalts.

There were two important items of news yesterday which might, under some circumstances, have been expected to affect the mine stocks.

Money was plentiful and discount rates were quiet, owing to the scarcity of bills.

There was a general feeling of confidence in the market, and the price of stocks was generally higher.

BIGGER CROPS IN U.S.; CORN BREAKS RECORD.

Washington, Aug. 8.—In its August crop report issued today, the department of agriculture forecast the prospective production of the country's crop, based on their condition August 1, as follows:

Wheat—1,042,000,000 bushels, compared with 1,020,000,000 bushels last year.

Corn—1,042,000,000 bushels, compared with 1,020,000,000 bushels last year.

Wheat—1,042,000,000 bushels, compared with 1,020,000,000 bushels last year.

Corn—1,042,000,000 bushels, compared with 1,020,000,000 bushels last year.

Wheat—1,042,000,000 bushels, compared with 1,020,000,000 bushels last year.

PROTEST AGAINST PURCHASE OF C.N.R.

Drastic Resolution Calls for Enforcement of Mortgage Provisions.

The belief that the convention will support their policy and make strong representation to the government at Ottawa.

J. W. Lyon, of Guelph, who presided at the convention, said that he had the control of the Grand Trunk.

The hydro and the municipalities objected to paying the Grand Trunk any money.

The Canadian Northern were taken money which would form a fund system with which to compete against the C.P.R.

The proposals might seem attractive to the Dominion cabinet, but they were not attractive to the people of the province.

Major Church stated that the common stock of the C.N.R. represented no cash investment and that so far as the company and the Grand Trunk was concerned the report and recommendations of Drayton and Acworth should have been adopted.

Major Church stated that the common stock of the C.N.R. represented no cash investment and that so far as the company and the Grand Trunk was concerned the report and recommendations of Drayton and Acworth should have been adopted.

## Is Made Doubly Attractive by the Home-lovers' Club

The values are immense—you will be enthusiastic about them. Moreover, you need not miss the sale because of not being prepared to pay all cash just at this time. The Home-lovers' Club will arrange that for any responsible person. Members of the Home-lovers' Club pay part cash, and the balance is spread over a period, as arranged. There is no interest to pay nor charge of any kind for this convenience. See the Club Secretary on the Fourth Floor.
