Charlottetown Horticultural Society,

UNDER THE PATRONAGE OF HIS EXCELLENCY SIR
ALEXANDER BARRERMAN AND LADY BARRERMAN.
THE CHARLOTTETOWN HORTICULTURAL SOCIETY
will hold their first Exhibition of Flowers, Fruits, and Vegetables,
by the kind permission of Sir Alexander and Lady Barrer-
man, in the Government House Grounds, on WEDNESDAY the
15th INST, when Prizes will be distributed to the Exhibitors of
the following articles, viz:—
FLOWERS IN POTS, (HOUSE PLANTS.)
For the best Geranium, For the best Myrtle,
Do. do. do. Do. do. Fuchsia,
Do. do. do. Do. do. do. do.
Do. best Cactus, (Prickly), Do. best Monthly Rose,
Do. do. do. (Smooth), Do. do. do. do.
Do. do. Carnation, Do. best Chinese Primrose,
Do. do. do. Do. do. do. (white).
Do. do. do. Do. do. do. (colored).
For the best Seedling Geranium of last year.
For the best collection of House Plants, in Pots, the property of
one person, but not to include any Plant that shall have taken
either of the foregoing Prizes.

FLOWERS GROWN IN THE OPEN AIR.

For the best Bouquet of Moss Roses,
Do. do. containing the greatest variety of Roses of
Do. do. do. all sorts,
Do. do. do. of miscellaneous Garden Flowers, the produce
of one Garden,
Do. do. do. do. do. do. do.
Do. best Six Pansies, or Heartsease,
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.

FRUITS.

For the best Melon,
Do. do. Dish of Strawberries, not less than one pint,
Do. do. do. do. do. do. do.
Do. do. Dish of Gooseberries, not less than one quart,
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.
Do. do. do. do. do. do. do.

VEGETABLES.

Best quart Green Peas, Best 3 heads of Lettuce,
Do. do. New Potatoes, do. do. do. do.
Do. do. Carrots, do. do. do. do.
Do. do. Onions, do. do. do. do.
Do. do. Turnips, do. do. do. do.
Best quart Vegetables, the produce of one Garden.
A Prize or Prizes will be given for any Plant or Plants, of ex-
traordinary merit, that may be exhibited.
Persons wishing to compete, to send their specimens of Plants in
Pots to the Stand in Government House Grounds, on the day of the
Exhibition, between the hours of 10 and 11, a. m.
For the receipt of other articles, the Committee will be in
attendance until 4, p. m., after which, no specimen can be re-
ceived.
The Public will be admitted by Tickets only. Family Tickets,
single day, do. do. Single day, do. do.—To be had at the Book
Stores of Messrs. STRANAHAN and Geo. T. MAASMAN.
The hour of admission will be at 2, p. m., at the guard-house gate
also.
Competitors and Contributors will have from 6, p. m., to
remove the plants and other articles.
JOHN LAWSON,
Secretary.

Royal Agricultural Society.

Prizes for the best two acres of Wheat in Queen's County.
For the best two acres of Wheat £2 0 0
Second best, do. do. 1 0 0
Best two acres of two-rowed Barley 2 0 0
Second best do. do. 1 0 0
Best 1 acre of Indian Corn 2 0 0
Second best do. do. 1 0 0
For the best acre of Swede Turnips, 4 0 0
Second do. do. 2 0 0
Third do. do. 1 0 0
Fourth do. do. 1 0 0
Best acre of Yellow Turnips 2 0 0
Second do. do. 1 0 0

Competitors to send in their names to the Secretary in Charlottetown
or before the 1st of August, for Grain; and on or before
the 1st of September, for Turnips.
The fields of Grain to be sown, and the Prizes adjudged on
view, immediately after Harvest.
The fields of Turnips to be inspected during the last week in
October, and the competition confined to Turnips grown in Drill.
By Order,
CHARLES STEWART, Secy.

Cattle Shows and Ploughing Matches, 1862.

THE ANNUAL CATTLE SHOWS will be held this year, at
the times and places undermentioned, viz:—
In Queen's County, at Charlottetown, on Wednesday, the 29th
of September.
In King's County, at Falmley's Cross Roads, Lot 51, on Friday,
the 1st of October.
In Prince County, at St. Eleanor's, on Tuesday, the 5th
of October.
PLOUGHING MATCHES.
In Queen's County, on Thursday, 14th October.
In King's and Prince Counties, on the day of Cattle Show.

An Industrial Exhibition.

At which Prizes will be given for articles of Domestic Manufacture
and Agricultural Products, open to competition from all parts of
the Island, will be held in Charlottetown in November next.
Full particulars will be made known in future Advertisements.

Sale of Live Stock of Improved Breeds.

A SALE of LIVE STOCK, of Improved Breeds, will be held in
Charlottetown, on Wednesday, the Twenty-ninth day of Sep-
tember next, being the day of the Cattle Show, under the direction
of the Committee of the Royal Agricultural Society. All persons
having Cattle or Sheep, of an improved breed, to dispose of, are
requested to send in their names to the Secretary of the Society,
together with the pedigree and age of the animal, on or before the
1st day of August next, and the Secretary will enter the same in a
book kept by him for that purpose. On the completion of the list,
an Advertisement will be inserted in the Island Newspapers, and
also in some of the papers published in the Provinces of Nova Scotia
and New Brunswick, containing a correct list and description of the
animals entered for sale. The Society will make arrangements
with an Auctioneer to sell the Animals, for a small commission,
which will be the only charge to the seller. The owner will be
allowed to buy in the animal, if he shall not be content with the
highest bid, in which case no charge will be made. In order to
keep up the character of the Stock, there to be offered for Sale,
under the auspices of the Society, the Society reserves to itself
the right of rejecting any inferior animal when brought to the
ground.
By Order,
C. STEWART, Secretary.
Charlottetown, May 10, 1862.

HERBERT Certifies, that he has examined and tested the COAL
and HAY SCALE belonging to Mr. T. R. TREMBALE, and
found it correct.
JOHN BOYER,
Assayer of Weights and Measures.
Charlottetown, 20th June, 1862.

POETRY.

WRECKED.
Night o'er the stormy sea
His dusky wing outflung,
The tempest's fury
The most ship wildly white;
And clouds, like goblets glist,
From round those glistening men—
How's light is growing dim
No'er to revive again!
The lightning fiercely leaps
From sky to son of Iph,
The wretched thunder sweeps
Its weird and giant ire—
The streaming sails are rent,
The masts now groan, now fall—
Darkness is thy seat,
The wreck'd ship's funeral pall!
The waves are dashing higher—
The faithful plank is broken;
One flash—their bark, their pyre—
Few farewell words are spoken—
Sea-monsters wistfully
Await their death-doomed prey—
Their ship, the sea, the sky,
All blazing, fade away!
God save those valiant hearts!
Sink in the treacherous waves,
Their gazing death breath,
Amidst the angry waves,
The waiting winds their dirge,
Are hushing mournfully;
The bounding billow surges
Their requiem must be!
Morn from that drear, dark night,
Wakes radiant and fair,
Wide streams her rays light—
No storm, nor ship is there;
Nor wreck, nor sea, nor sky,
Nor sun, nor moon, nor stars—
Where, morn so sadly strove—
Her death-fraught rage forgot,
All nature smiles with love!
So many a mariner
On Passion's sea is tossed;
And in the stormy straits,
Now struggling—now is lost;
But life's selfish gaily on,
Unmindful of his fate—
Not all the bad are gone—
Not all the good are great!

Miscellaneous.

THE EFFECT OF DEPRESSION.
This involves one of the most curious phenomena in economic
science. When an interest is depressed, it does not always happen
especially in the first stage of depression—that the labourers attach
to the interest feel immediately the consequences of the decline.
Agricultural wages, for example, do not fall according to the
price of wheat. The depression is necessary in conse-
quence of lessened returns, usually because effected, in the first
instance at least, by curtailment of personal expenditure on the part
of the cultivator—by abstinence from purchase, not necessary in-
deed, but conventionally—by that species of circumspection, but
whenever there is a fall in the price of a year, makes a very con-
siderable difference in the amount of tradesmen's bills. This kind
of retrenchment is the easiest, the safest, and the most humane;
and it is not until the depression is so great as to render other
and more stringent modes of economy necessary, that the agricultural
labourer is actually made to feel his entire dependence upon the
land, and the interest which he has in its returns. The small trade-
men and dealers in the country and market towns are usually the
first to discern what is called the pressure of the times. They find
that the farmers are no longer taking from them the same quantity
of goods as before; that their stocks, especially of the more expen-
sive articles, remain on their hands unsold; and that there is no
demand for novelties. If the depression goes so far as to necessitate
a diminution of rental, then the consequences, but on a wider
scale, is practised by the landlord. Expensive leases are given
up, establishments contracted, and the towns-people begin to com-
plain of a dull season, for which they find it impossible to account,
seeing that money is declared to be cheap. All this results upon
the artisan very severely, because in ordinary labour has a far
certain tenure than in the country; and when there is a cessation
of demand, workmen, however skilled, are not only liable, but
certain to be dismissed. If the shopkeeper cannot get his goods off
his hands, the manufacturer need not expect to prevail upon him
to give any further orders. The demand upon the mills becomes
slack, and the manufacturer, finding that there is no immediate
prospect of revival, considers it his duty to have recourse to short-
time.—*The Democratic Confederacy, in Blackwood's Magazine.*

JOHN HOWARD PAYNE.—Until Mr. Payne's death, it was not
generally known, that he was the author of "Home, Sweet Home!"
The name of the poet had been eclipsed by the very beauty of his
poems. The following is from an American paper:—
"The little song that he had sung to his countrymen, gives him
full assurance of an immortality, honored and grateful—it has
been sung with simple and rude earnestness in the humblest
hovel; and at the time the news of his death was received, Triple
Hall was echoing to his beautiful language, as it fell from the lips
of Jenny Lind. It is a yuletide gem of song. Every body knows
it; every body has been soothed by it at home, and has wept over
its sweet suggestions when abroad. It is for ever associated with
the dearest spot on earth, and is cherished in every heart, while it
links the author's name by golden chains to all history."

GALVANISM.—ASTORIA.—Perhaps in no disease is galvanism
of greater value than in cases of asthma. Dr. Wilson Philip,
particularly recommends it for this complaint. In nearly every
case of asthma I have had, I have been successful. A lady
of Troy was brought to me in a carriage, so dreadfully afflicted
with the asthma, that her friends imagined every moment she would
be suffocated; and it was enough to make one's heart ache to
witness the agonies she was enduring. I placed her under the
action of the galvanic apparatus, administering it so weak that she
was scarcely aware I was galvanizing her at all. In ten minutes
her anxious friends, as well as myself, noticed that the breathing
was getting easier; in five minutes more she exclaimed, "Thank
God, I am relieved!" She was now breathing quite freely, and
told me, that she had tried it three years ago, and had not
listened to the advice of her medical attendant, who was contin-
ually ridiculing galvanism. In one month she left me, quite free
from the complaint! I have lately been informed, that she mounts
a bill with the history of a young girl.—*Notes on Medical Galvanism.*

WORKS OF FICTION.—Many works of fiction may be read
with safety, some even with profit; but the constant familiarity
even with such as are not exceptional in themselves, relaxes the
mind, which needs training; diminishes the heart, which wants
for-frying; stirs the imagination, which wants quieting; irritates
the passions, which want calming; and, above all, distorts and
dissimulates for active virtues and for spiritual exercises. Though all
these books may not be wicked, yet the habitual indulgence in such
reading is a most mischievous habit. Though there is no sed,
and the moment, in which any man assaults on the mind is
made, yet the constant habit performs the work of a mental strait-
—It produces all the symptoms of decay; and the danger is not less
for being more gradual, and therefore less suspected.—*Franklin*
More.

TEACH CHILDREN HOW TO USE MONEY.

Show the child early the use of money; its use in obtaining ac-
cessories, and in procuring works of benevolence. Train the child
in the right direction as to the estimate of money, as to its use, and
as to the objects to which it should be expended. In after-life he
will have much to do with it: teach him betimes to handle it aright.
It is of such practical importance that young children should be ac-
quainted from some person of their own age to be laid out according to their
own judgment, or given in charity on the impulse of their own will.
Of course there will be a continuous effort to imbue the child's mind
with correct ideas; but there should not be direct interference with
the freedom of his act. I would rather see an occasional mistake, or
childhood to some person of their own age to be laid out according to their
own judgment, or given in charity on the impulse of their own will.
Of course there will be a continuous effort to imbue the child's mind
with correct ideas; but there should not be direct interference with
the freedom of his act. I would rather see an occasional mistake, or
childhood to some person of their own age to be laid out according to their
own judgment, or given in charity on the impulse of their own will.

EDITOR.—The life of an editor is comparatively short. He
wears out before his time. The exacting toil he pursues, which is
rarely, or never broken by a solitary day of relaxation, exhausts his
nerves, exhausts his vital energies, and makes him gray-haired
almost in middle age. To him the course of nature is reversed, and
night is turned into day. He labours when other men sleep. No-
thing tall comes on the constitution than this. The close room in
which he usually sits, the stifling odour of damp newspapers from
mud, and the blinding glare of the gas-lights increase the wear and
tear upon his system, so that he is a fortunate member of his pro-
fession if he does not give out entirely before he is fifty years old.
Nothing but distinguished success and the consequent ability to
lighten his toil by employing substitutes, can save him from the in-
evitable doom.

From late Papers.

ENGLAND.

THE SUBMARINE TELEGRAPH BETWEEN ENGLAND AND IRELAND.

The following extremely interesting history of the submarine tele-
graph between Holyhead and Howth, is given by *Saunders's Dublin*
News Letter.
This undertaking, which has more or less taken the public by surprise,
is now complete, and its success certain. It certainly appeared to
have been hitherto abandoned in consequence of the fact that
the cable was broken by the waves, and the projectors, some private individuals,
and these have been up to the moment successfully and ably
engaged in its performance. There were other reasons
for its failure; the task was daring, difficult, and, in respect to dis-
tance, unprecedented; the projectors, some private individuals,
and these have been up to the moment successfully and ably
engaged in its performance. There were other reasons
for its failure; the task was daring, difficult, and, in respect to dis-
tance, unprecedented; the projectors, some private individuals,
and these have been up to the moment successfully and ably
engaged in its performance.

Three several companies had been advertised for telegraphing
across the Irish Sea; the usual means for alluring shareholders,
electing directors, appointing agents, engineers, &c., had all been
put into operation. These necessarily proceeded to the formation of
corporations were drawn and laboriously proceeded to put their
talked of scheme into practice, when about three weeks ago, the
idea flashed across the mind of Mr. R. S. Newall, "This Irish tele-
graph will be a paying concern; it will not require much capital,
the firm will be an unincorporated, have facilities for doing
what they should not do it and do it at once ourselves!"
He accordingly explained his views to his partners, got their
consent, and immediately applied to Samuel Statham, Esq., conductor
of the *Gutta Percha Works*, City Road. "Can you supply me with
eighty miles of telegraph wire, double covered with gutta percha,
within a fortnight?" "I'll try," was Mr. Statham's response; and
accordingly it was commenced and finished within the time agreed
on, being latterly done at the rate of twelve miles a-day. The cost
of wire was then sent down to *Gutted-Tyne* and the cable was
wound up in a warehouse in the Strand, and drawn by means
of the cable being finished, Mr. Newall called on Mr. Statham last
Tuesday week, and then for the first time told him the object for
which it was manufactured. It was agreed, that Mr. Statham
should bring a quantity of wire, and the required for doing
the work, and kindly sent down Captain Beecher, R. N., to
give his valuable advice and assistance; and they also sent
the *Prospere* government steamer, *Leant*, Aldridge, R. N., to aid
in carrying out the undertaking. Meanwhile the British cable
was being laid from the Cable from Whitehaven, and afterwards pay it
out from Holyhead to Dublin.

The enormous cable, eighty miles in length, weighing a ton per
mile, and all in one continuous piece, was wound up in immense
coils, placed on trucks, one after the other, and drawn by means
from Newcastle-upon-Tyne to Whitehaven—from one side of Eng-
land to the other. The Britania, as has been stated, steamed to
Whitehaven to take it on board, when, unfortunately, it was
found that the entrance to the dock was too narrow to permit the
cable to enter. The cable had to be replaced on trucks, and car-
ried to Maryport, where they were kept at length embarked, and speedily
conveyed to Holyhead. Now it might be hoped, that all diffi-
culties had been overcome, and that there was nothing to do but to
lay down the line; but Mr. Statham, who had already achieved the
Dover and Calais connection, knew too well the dangers and ac-
cidents to which things concerned were liable, in the event of a gale,
to trust any thing to chance, or proceed one step further without a
careful preliminary inspection. The intention of the copper was
used, and found to be defective; then the portions stored in the
various departments of the ship were examined separately, and
at last it was ascertained, that the fault lay in some eight miles
of the line lying in the bottom of the hold. These were getting for
it to disembark the levitation bulk, and to track it step by step
to the exact seat of the defect. This was accordingly done, the
fault remedied, and by Tuesday morning the giant rope was in
readiness to be placed in its abiding home.

Early in the morning, the Britania, under the command of Cap-
tain Brown, and *Lewes* by the *Prospere*, under Lieutenant Ald-
ridge, R. N., commenced paying out the cable, according as it
sank by its own weight to the bottom of the sea, along the route
from Holyhead to Howth. There were on board, besides the offi-
cers and crew, R. S. Newall, Esq., with a gang from the *Gutted-
Works*; Samuel Statham, Esq., with a party from the *Gutta Percha*
Works; Thomas Allan, Esq., the inventor of a new telegraph in-
strument; and Mr. Reid, Jm., L. D. Gordon, Esq., (Mr. Newall's
partner) had previously departed to Dublin, to supervise the land line
from the latter city to Howth. Occasional difficulties were expe-
rienced in the paying out of the cable; but they were all overcome
through the skill and energy of Messrs. Statham and Newall.
Slowly the vessels ploughed on at a rate varying from three to five
miles an hour; and at length, between seven and eight o'clock on
the same evening, the Britania anchored off Howth. An electric
cable was sent through the wire to Holyhead, and the returning
answer brought the pleasing intelligence that the line was all right
throughout, and perfectly insulated. The portion of cable requisite

FOR COMPLETING THE CONNECTION WITH SHORE AND LAND LINE WAS NOW LAID

down, and the parties engaged in this arduous undertaking sought
some repose, after nearly two days and night of exertion and
tiring exertion, about day-break on Wednesday morning.
It might be supposed that every thing was now smooth and pro-
perous. Beyond with hope, those who had already suffered so
much in the attempt went down at noon on Wednesday, to the
Ardara-arcet terminus, to test the success of their enterprise. The
batteries were put in action, the wires were connected, and they
anxiously waited a reply, but none arrived! They telegraphed to
Howth and were answered—the fault was further off than the land
line, the express train was provided, and they dashed down to
Howth. Again they telegraphed to Holyhead from the shore—no
answer! They took a boat and rowed to the ship. A message
sent to Holyhead, brought back the reply that "all was right there."
It was now manifest, that the fault lay somewhere between the
Britania and the shore.

It was necessary again to take up this portion of the line, and
test it little by little. The defect was probably caused by the strain-
ing of the ship upon a line comparatively short. When discovered,
it was soon remedied on board. It was again recoiled into an open
boat, the crew having managed to sink the whole line, and
to the shore. In the mean time Messrs. Statham & Newall
proceeded to shore in another boat with the instruments, but when they
overtook the boat which had been paying out the cable they found
it at a stand, the crew having managed to sink the whole line, and
to the shore. In the mean time Messrs. Statham & Newall
proceeded to shore in another boat with the instruments, but when they
overtook the boat which had been paying out the cable they found
it at a stand, the crew having managed to sink the whole line, and
to the shore. In the mean time Messrs. Statham & Newall

English Mail of June 26.

(From the Halifax British North American, July 7.)
The steamer "Albatross" arrived at the wharf on Saturday, June 26th, at 10 o'clock, after a rapid passage from Liverpool.

It is a great fact, and worthy of all consideration, that the greatest amount of wheat ever raised in the United States...

UNITED STATES.
DEATH OF HENRY CLAY.
We have received per Steamship Albatross, dated from New York to the 31st inst. The chief item of interest is the death of the great American patriot and Statesman, the Hon. HENRY CLAY.

NEW LINE OF STEAMERS FROM NEW YORK TO QUEBEC.
We perceive by advertisement in our columns of this date, that a fresh impetus has been given to our daily increasing connection with the British Provinces, by the establishment of a line of steamers from our port, which are intended to sail bi-monthly for Halifax and Quebec, calling at Pictou, Nova Scotia, Charlottetown, Prince Edward Island, Sherbrooke, and Miramichi, New Brunswick, and from thence to St. John's and Quebec.

THE SABBATH.—The March of Indianapolis, Indiana, has given the harbor to understand, that hereafter Sunday should not be tolerated. Druggists are required to restrict their sales on the Sabbath to articles of necessity, and newspapers are enjoined not to have horses or carriages for trips of any pleasure.

NOVA SCOTIA.
OUR YOUNG MEN.—Twenty young men—"the bone and sinew" of the country—left yesterday, Thursday, in the Cleopatra for Australia. They were conveyed on board at 1 o'clock, by one of the Harbortown steamers, and the steamer will deliver up to the hands of our citizens, who thronged the wharf from which they started.

NEWFOUNDLAND.
The Steamship Cleopatra arrived on Sunday night with the Newfoundland mail. She had a very rough passage, but behaved admirably. The Passengers of the Cleopatra saw the clipper ship Cleopatra, bound for Australia here, sailing very fast in a southerly direction.

IRELAND.
£700,000, it is estimated, is annually squandered in whisky in Ireland. The Rev. Bernard St. Patrick, a Roman Catholic clergyman, was drowned, whilst bathing at Quilca, on Saturday.

HASZARD'S GAZETTE.
TUESDAY, JULY 13, 1852.
The Members of the party of which Mr. Cole is the ostensible head, delight in calling themselves "Liberal" and boasting on the other side, by way of reproach, the term "Obstructives."

THE SABBATH.—The March of Indianapolis, Indiana, has given the harbor to understand, that hereafter Sunday should not be tolerated. Druggists are required to restrict their sales on the Sabbath to articles of necessity, and newspapers are enjoined not to have horses or carriages for trips of any pleasure.
