Will nobody marry me, pray.

I am on hand-and a husband I want ! Will nobody marry me, pray! My nose is the acquiline cast, And my cheek's bloom like toses in May My stature's five feet and no thore, Which is rather an agrecable size ! And my tongue never clatters like some! Therefore-I'm thought very wise.

My waist has a delicate turn ! And my forehead's prodigiously high ! And my eyes-are so black, and so bright, But in company modest and shy. And then -I'm just twenty and three, Which is rather a very good age ! Pray, somebody marry me, do-Or I vow, I'll get into a rage.

No offer as yet-I declare ! Good gracious what are they about ! These men are like cels in a pond, That we hook when fishing for trout O then Bachelors, take good advice-For I vow and protest it's a shame, That none of you are gallant enough-To ask me to alter my name.

Motto and Crest.

I knew her in her brightness, A creature full of gice, As the dancing waves that sparkle O'er a placid summer sea ; To her the world was sunshine, And peace was in her breast, For Contentment was her motto, And a Heart's ease was her crest.

Yet deem not for a moment That her life was free from care; She shared the storms and sorrows That others sigh to bear ; But she met earth's tempests meekly. In the hope of heaven's rest, So she gave not up her motto, Nor cast away bor crest.

Alas! the many frowning brows, And even that speak of woe. And hearts that turn repiningly From every chastening blow But our paths might all be smooth And our hearts would all be blest. With contentment for a motto, And a Heart's ease for a crest.

Planting Orchards-Peddling Fruit Trees.

The great demand which has existed for fruit trees in newly settled parts of the country, has given rise to a system of imposition, in the shape of peddling, which demands exposure; for it results in loss this manner, hoping to improve their pre-

In the spring of the year, particularly, enormous loads of fruit trees may often be seen through the country, on a tour of two or three weeks, without even the slightest provision bein, made to preserve their vitality-tied up like so many bundles of brushwood, their roots exposed to the full action of the sun, winds, or frosts, as though they were completely imperishable; whereas a few hours exposure is often essential to the life and growth of the tree. It is indeed surprising that any man of ordinary intelligence, especially any cultivator of the soil, should be so ignorant of as to expect trees thus treated, or rather maltreated, to live and thrive. But a few days ago we were conver-

sing on the subject of planting trees, with a gentleman from Canada, where this pedlling system is tractised considerably; he said that he and many of his neighbors had planted apple orchards year after year, but with very little success - not more than one third of the trees lived, and they might as well have died, for all the progress they have made. We asked him how he procured his trees; he replied, from a man who was peddling them. This at once explained the cause of his ill success. Partial failures frequently occur from unskilful planting and other adverse circumstances, but in the case we have related, and all similar cases, the trees were in fact dead before they were planted.

The man who digs up trees and sends them about the country in this manner, palming them off upon the community in a ruined condition, is guilty of a wilful volation of the laws of common honesty and fair dealing, and should be regarded as little better than a pickpocket.

But there is an argument of a pecuniary character in favor of purchasing from ! trust your Majesty will pardon my im- these pedlars :-they usually sell their trees ou will see no more of me. THE FRENCH LAUY'S NARRATIVE.

I knew not what time elapsed, ere I re covered my senses. I awoke, as I sup posed in another world. To my dreamy re vival came visions of angelic glories, and thy young fancy was busy in the delightful task of making a child's paradise, full of white wings, and sweet voices, and iew elled garments every thing young, and every thing in love. The mind delight, in contrasts; and, according to its nature, mine was seeking in these opposite ideas for restoration. As I came nearer to full life, prinful realities began to mingle with bright illusions. I wondered why heaven was so cold. I saw flakes of snow disporting before a freezing wind, and the crys tal'trees were dropping their golden leaves. and the rosy laughing cherubs cower under their folded wings and looked pale and cheerless. I tell the wet snow under my naked feet, as I trod the jewelled pave ments, and behold the golden ides gleam ing yet beautifully through the white cov ering. I saw a noble mastiff shivering at the door of a magnificent mansion, mosning for admittance. I paused, patted his shi ning head, and rung the bell for him. He licked my hand; but the' the bell which I had put in motion kept ringing on no one came to his aid, and I cried aloud,

SUMMARY OF AFFIDAVIT. Wm. BROOKE, Messenger, of 2 Union.st., Southwark, London, maketh oath and saith, that he (this deponent) was afflicted with ulcerated sores and wounds on both legs, for which deponent was admitted an out door patient at the Metropolitan Hospital, in April, 1842 where he continued for nearly four weeks .-Unable to receive a cure there, the deponent sought relief at the three following hospitals King's College Hospital in May, for five weeks ;-at Guy's Hospital in July, for six left, being in a far worse condition than when he had quitted Guy's, where Sir Bransby coor-ER, and other medical officers of the establishment had told deponent that the only chance of saving his life was to Lose HIS ARM! The de ponent thereupon called upon Dr. DRIGHT, chief physician of Guy's who, on viewing the deponent's condition, kindly and liberally said .here is half a sovereign : go to Mr. HOLLOWAY, and try what effect his Pills and Ointment will have, as I have frequently witnessed the wonderful effects they have in desperate cases .-You can let me see you again. This unprejudiced advice was followed by the deponent, and a perfect cure was effected in three weeks, by the use alone of HOLLOWAY'S FILLS and OINT-MENT, after four Hospitals had failed ! ! !thought that if I ever saw you again alive, it would be without your arm-I can only com

. A NEW SONG.

TO AN OLD TUNE.

From the London Literary Gazette. [When John Bull's pocket is touched, he generally surly and sulky, and in few instances contents himself with reprisals in the shape of so good humored a squib as the following .--Having heard it sung with the accompaniment of some merry laughter, we begged the MS from the author, and print it in the hope that it will purses. One quality, however, they posamuse on both sides of the Atlantic, though it is sess, which proves an overmatch for every pretty hard at the doctrine of Repudiation, - Editor Literary Gazette.]

Yankee Doodle borrows cash, Yankee Doodle spends it, And then he snaps is fingers at The jolly flat who lends it. Ask him when he means to pay, He shows no hesitation, But says he'll take the shortest way, And that's Repudiation !

Yankee vows that every State Is free and independent ; And if they paid each other's debts, There'd never be an end on't. They keep distinct till settling comes And then throughout the nation They all become 'United States,' To preach Repudiation !

Lending cash to Illinois, Or to Pennsylvania, Once was quite a mania. Of all the States 'tis hard to say Which makes the proudest show, sir, But Yankee seems himself to like The State of O I Owe, sir !

The Reverend joker of St. Paul's Don't relish much their plunder. And often at their knavish tricks Has hurled his witty thunder. But Jonathan by nature wears A hide of toughest leather, Which braves the sharpest pointed darts And canone put together!

He telle they're clapping on Their credit quite a stopper, And when they want to go to war They'll never raise a copper. If that's the case, they coolly say, Just'as if to spite us, They'd better stop our dividends, And heard them up to fight us !

What's the use of monied friends, If you must'nt bleed 'em ? Onrs, I guess, says Jonathan, The country is of freedom ! And what does freedom mean, if not To whip our slaves at pleasure, And borrow money when you can,

To pay it at your leisure ? Great and free Amerikee With all the world is vying ; That she is the "land of promise," There is surely no denying. But be it known henceforth to all, Who hold their I O U, sir, A Yankee Doodle promise is

A Yankee Doodle doo, oir!

HEART. There are some persons in the world and from whom every one is loath to separate. Their frank and easy manners in spire confidence at first, and one numbers them as friends almost as soon as one has made their acquaintance. No one is ever 'not at home' to them; their visit is anticipated as a pleasure, and no one feels dis posed to part with them without the cordial inquiry, twhen shall we see you again? There is an exuberance of pleasurable life about them which seems to diffuse itself among all around, and their presence is of happiness in the circle privileged with friends, their name always suggests itself, first, and the absence of any two others

would be a less disappointment than theirs. Every one seeks their side at the dinner table, and he deems himself fortunate whose chair in the social circle is next to theirs. Innocent childhood loves to sit on their knee and prattle its earnest nonsense in their ear; impetuous youth finds in them cordial companions; and old age vaues them as pleasant and estimable friends. And yet it is not to their personal comeliness that they are indebted for their popu larity, for their exterior is often far from prepossessing; nor to their intellect, for even their best admirers do not imagine them Byrons, nor do they themselves turn down their shirt collars to be thought such. They have no remarkable vein of humour to boast of, never made a pun perhaps in their lives, scarcely know what an epigram is, are quite incapable of setting th table in a roar, and are distinguished neither for their fine clothes nor their long other distinction, namely, a transparen kindly nature, a desire to promote the happiness of all around them, a generou warmth of feeling, a frank cordial bearing an 'universal sympathy-in one word

It is quite refreshing, amidst the col-

conventionalisms of the world, to meet with these men of heart,' or to see in any one developments of naturalness. He must be a misanthrope, indeed, who can witness without pleasure the hearty shake of the hand of two friends at an unexpected me ting after a long absence. What a mutual pouring out of the soul, as it were, is there on both sides !-- what an infectiou countenances! Who has not, with a fine chubby little fellow seated on his knee, lisfor utterance in his speaking features !man romping with a child, and entering heartily into the sports and feelings of youth ? - who has not admired the verdant old age of such an one, his feelings unchilled by the freezing influences of threescore years and ten, still fresh and glowing as in his childhood; who has neither become so falsely wise nor so sourly proud as to rainbow hues and his magnificent train, and reciprocation of the sterner sex. excites in us but very cold emotions compared with those we experience at the sight of a robin, or even a sparrow. There seems to be a 'heart' about them of which the vain fop is destitute; the one we cancannot do less than love.

This quality of 'heart' commends itself so powerfully to every one's best feelings, Sam Slick's opinion of Waltzing. that its development is pleasing even to the most stoical, and needs only to be seen or mistaken kindness of her friends. The music begun again, and one of to be imitated. Copy of a Letter from the Most Hon. the Mar quis of Westminster, h. G.
Lord Westminster has just received Mr. Holloway's Medicine, for which he returns him his

best thanks. Eaton Hall, Cheshire, Feb. 12, 1842. THIS INESTIMABLE MEDICINE beng composed entirely of Medical Herbs, does t contain any mercurial, mineral, or deleterious substance. Benign to the tender infant, or to the weakest constitution, prompt and sure in eradicating disease from the most robust frame it is perfectly harmless in its operations and effects, while it searches out and removes Complaints of every character, and at every stage, however long standing or deeply rooted. OF THE THOUSANDS Cured by its ageny, many who were on the verge of the grave for a considerable period, (by persevering in its use) have been restored to health and strength,

after every other means failed. ALL DISEASES, (and whatever may be their symptoms, however they may declare themselves, yet one cause is common to them all, viz. want of purity in the blood and fluids), are cured by this Wonderful Medicine, which cleanses the stomach andbowels, while its Balsamic qualities clear the blood, give tone and energy to the nerves, and muscles, invigorate the system, and strength to bone and sinew.

POETRY. " MY MOTHERS BIBLE."

(BY GENERAL GEORGE P. MORRIS) This book is all that's left me now !-Tears will unbidden start-With faltering lip and throbbing brow, I press it to my heart. For many generations past,

Here is our family tree ; My mother's hands this Bible clasp'd; She, dying, gave it me. Ah! well do I remember those

Whose names these records bear; Who round the hearth-stone used to close After the evening prayer, And speak of what these pages said, In tones my heart would thrill ! Though they are with the silent dead,

Here are they living still ! My father read this holy book To brothers, sisters dear : How calm was my poor mother's look, Who lean'd God's word to hear. Her angel face-I see it yet! What thronging memories come ! Again that little group is met

Within the halls of home ! Thou truest friend man ever knew. Thy constancy I've tried; Where all were false I found thee true, My counsellor and guide. The mines of earth no treasures give That could this volume buy :

In teaching me the way to live, It taught me how to die. LET ENGLAND LIVE

BY THE REV. HENRY EDWARDS. Show forth, brave flag, thy blazonry ! Spread wide thy every fold ! The words we have inscribed thereon Let all the world behold. We wear no mask, and fearlessly The truth alone we give ; Our heart, our motto, and our page,

Are all-" Let England live !" We will not shrink, though foes assail, But for the strife prepare; No idle slumbering at our post,-An awful trust we bear ; We " nail our colours to the mast," By them to fall or live :

Rally, ye true of heart, atound Our flag-" Let England live !" Lines on a block of ice brought from America without melting, and exhibited in a window in the Strand :-

Ice placed within a shop of room Will turn to water, we presume . For 'tis a solvent, all agree; But here in solvent ice we see.

Yet, though we cannot solve the ice. We solve the riddle in a trice : It comes from Pensylvania's state, And therefore will not liquidate. -Cruikshank's Table Book.

Fatality attending the House

In our Island we can produce in the Royal line of Swart, a race as steadily unfortunate as ever was recorded in history. Their misfortunes have continued with un-

Robert III, broke his heart because he eldest son Robert was sidived to death; and his youngest son James was made a captive.

James I, after having beheaded three of dhis nearest kindred, was assessmented by his own uncle : who was tortured to doeth

James II, was slain by the bursting of a piece of ordnance. James III, when flying from the field of battle, was thrown from his horse, and murdered in a cottage into which he had

been carried for assistance James IV, fell in Flodden field. James V, died of grief for the Wilful ruin

of his army at Solway Mess. Henry Stuart, Lord Darnley, was assas. sinated and then blown up in his palace.

Mary Stuart was beheaded in England. James I, of England and VI of Scotland died, not without suspicion of being poison-

ed by Lord Buckingham. Charles I, was beheaded at White-Hall. Charles II, was exiled for many years. James II, lost his crown, and died in

panishment. Ann, after a reign which though glorious was rendered unhappy by party dis-putes, died of a broken heart, occasioned by the quarrels of her favourite servants. The posterity of Jarties liave ternalised

wretched wanderers in loreign lands.
The Year 88 has also been for several centuries fatal to the Royal House of Stuart: - Junies III, on June the 11th, 1498; lost a battle with his subjects, by whom be was pursued and assassinated. Mary Queen of Scots, was beheaded the 8th of Feb. 1588. James II, of England abdicated the Throne of Great Britain on the 12th of December 1688; and in the year 1788 the last legitimate male of the House of the Stuart Family expired.

Young Man's LEISURE. - Young man! after the duties of the day are over, how do you spend your evenings! When business is dull, and leave at your disposal many unoccupied hours, what disposition do you make of them? I have known and know, many young men, who if they devoted to any scientific; of literary, or professional pursuits the time they spend in games of chance, and lounging in bed, might rise to any eininence. You have all read of the sexton's son, who became a every evening in gazing at the stars after ringing the bell for nine o'clock, Sir Wm. Phips, which at the age of forty-five had attained the order of knighthood, and the office of high sheriff of New England! and Governor of Massachusetts, learned to read and write after his eightebrith year; of a ship carpenter in Boston. William Gifford, the great editor of the Quarterly, was an apprefitice to a shoemaker, and spent his leisure hours in study. And because he had neither pen nor paper, slate nor pencil, he wrought out his problems on smooth leather with a blunt awf. David Rittenhouse, the American astronomet when a ploughboy, was observed to have covered his plough and lences with figures and calculations, Ja's Fergusoff the great Scotch astronomer, learned to read by himself, and mastered the elements of astro. nomy whilst a shepherd's boy in the fields by night. And perhaps it is not too much to say, that if the hours wasted in idle company, in vain conversation at the taiern, were only spent in the pursu't of use. ful knowledge, the dullest apprentice in any one of our shops might become an intelligent member of society, and a fit person for most of our civil offices. By such a course, the rough covering of many a youth is laid aside; and their ideas, instead of being confined to local subjects and pro. fessional technalities, might range the wide field of creation; and other stars from composed of 100,000 men attempted two among the young men of this city might be added to the list of worthies that is gilding

Constitution of the United States. The House of Representatives have declared in favour of annexing Texas, and organizing a territorial government in Orc-gon; and they have received petitions from Michigan and Maine praying for the nnnexation of Canada. The Government of Texas disclaims all desire to be incorpo. rated into the Union; the bill for organizing a government in Oregon is a violation of an existing treaty with England; and the Canadas certainly have evinced no wish to fraternize. The spirit that animates the House of Representatives is a lust of domination, as precipitate and insatiable as that of any crowned tyrants, the butts of American oratory. The rational and honest portion of the United States' citi zens endeavour to re-assure other countries by protesting that the Senate never will adopt such measures. Let us hope so : matters are aircady bad enough when one of the three co ordinate branches of the Legislature can violate the decorum and respect for the rights of other nations to the extent of passing the Texas and Oregon bills. But how long can the Senate persevere in resistance to these annually repeated assaults on its virtue? It stands between the two fires; the President is as f iendly to the acquisitive line of policy as the House of Representatives, and both are urged on by popular feeling. The House of Representatives is goaded by petitions for annexation and appropriation; Gen. Jackson publishes oracles, that if Texas be not acquired peaceably now, it must hereafter by the sword; and even Mr. John Quincy Adams tells stories about pattern young Americans, looking on the St. Lawrence and exclaiming, "It is and must be ours!" The Senate is elective as well as the other branches of the Legislature : for how long can the honest Americans guarantee to England, Texas, and Mexico, (California being already eyed wistfully by the annexe s,) that the Senators who stem the torrent of national cupidity will be allowed to keep thier seats ? The hardest task of the respectable class of Americans, of late years, has been to apologise for thier Governmit. The Government wished to abolish slavery, the Government wished to preserve national faith it vio ite; the Government disapproved of the conduct of the N. Y. Sym. pathiz rs; but the Government was checkmated in all its attempts to redress those wrongs by 'States rights.' Foreigners and negroes are not the only parties for whom the United States Government is too weak to procure justice. In North Carolina there i, a law that every sailor of colour in a foreign vessel shall be kept locked up until black citizens of Massachusetts have been repeatedly deprived of their liberty. The Government of Massachusetts lately sent an agent to renonstrate against this con duct of the Carolinian authorities-the envoy, and (apparently) his daughter also, were only saved from the American accolade of tarring and feathering, by the gentle compulsion of some gentlemen who conveyed them on board and obliged them to set sail. Respectable citizens wish their G vernment to be thought the best disposed and most honourable in the world; but unfortunately it lacks the power to give effect to its good intentions. It can only sigh over the excess of its subjects, (we beg pardon-" citizens") not prevent, check, or punish them. Do the Americ.ns fan y that other nations will always put off with these whining protestations of weakness and regret? That injured, insulted, and sufficiently powerful European states will not some day take in hand to as intelligent, as in any country in the integrity, and set an excellent example; and smiting the monsters of the world! but, year after year, these classes appear

Fanaticism and Infidelity of

From the New York Herald, April 20. One of the most painful subjects present ed in this day to the observation of the enlightened friend of humanity, is the alarming progress of fanatacism and infidelity. Every species of fanatacism appears to be daily acquiring a deeper tinge of extravagance and madness. Millerism-Mormonon Parkerism and all the isms around the felly of weak minds and the knavery of unprincipled adventures have been congregated, are becoming more and more re volting and demoralizing. One of the peculiarities of these false

and wicked perversions of morals and religion, is their proneness to split up and divide into minor sects, still more deplora bly at variance with truth and decency than their original. Thus we see the the nature of combustion and of fire. Af. Millerites now dispersing into small comter explaining the phologiston theory of the munities of fanatics whose violations of common decency are so gross as to demand Lavoisier, and others; the Doctor pro- the interference of the civil authorities .-In Maine, Millerism has recently assumed a form which is marked by the most melancholy demoralization. Professing the To illustrate the efficacy of the apparatus, belief that the end of the world has actually which for a large house is only the size of come, and that the human race are about a small stove, Dr. Ryan kindled a fire in to be led to judgment, these fanatics are giving themselves up to the most revolting practices and obscene ceremonies. They ced a small apparatus, not holding more declare that the distinction of sexes has been abolished, and in their private meetingplaces, engage in the washing of each others' naked bodies, and other acts of gross indecency, which exceed any thing fire, it may be carried to any part, and immediately used. It will no doubt, prove his followers. It is stated by the Morning News, that the contagion has spread to this city, and that similar meetings have been held here, and that the same kissings and washings, and other filthy rites, in which even negroes have mingled, as characterise the fan tical assemblages in Maine,

Then, again, in a thousand directions nfidelity may be traced like a river of desolating lava-blighting and blasting the hopes, purity and happiness of the souls of men. Under various disguises the spirit of scepticism is at work, unsettling the minds of the young, the weak and the proud-hardening the hearts of the thoughtless and the profane. What is the cause of all this? Where are we to look for the sources of this swelling tide of

fanaticism and infidelity? First among the causes of the fanaticism which is presenting itself under such re volting aspects, and of the infidelity which is corroding the moral and religious sentiment of the age, we regard the conduct of the clergy-both in a theological and mo its extent is but too apparent. The 'Apocryphal Gospels' have also been recently put lished in this city, and are strendously pushed into circulation, for the purpose of advancing peculiar dogmas, even at the expense of shaking confidence in the au thenticity of the canonical books of the sacred volume. The direct and obvious tendency of all these publications is to unsettle the popular mind-to fritter away confidence in Christianity, and to foster a

spirit of cold and Leartless infidelity. Thus, in all quarters, we see agencies of demoralization at work. The literature. philosophy, morals, religion, and we may add the politics of the age, are beset by influences tending to unsettle the mind -to obliterate the ancient landmarks -to punish those who are too strong for their cast the mind affort, without rudder or Government? Wood so prepared—even deal—becomes succeptible of the floor polish; and moreover, by the see of certain solutions, can be stained throughout with any variety of color. In ship building and in house building, it would come into odvantageous use, with the peculiar recem-mendation that the inferior woods of helfit and entonial growth, would become at each more valuable in the market. Parhaps the most important fact connected with l'aynized timber, is its applicability out cay for railway sleepers, but actually as a substitute for iron rails, for which purpose it is now being tested on several lines, and so far as experiment goes, premises to be preferable to troit, offering nearly as little friction, and presenting a bester bite to the wheels, which enables the engine to mount nelmations impossible on the tron railway. The discovery has also attracted the atterrior of the Commissioners of Woods and Forests, under whose directions a set of experiments are now being made, with

There is an addiouncement in the Ma Annies' Magazine of Saturday Isst, of a plan invented by Mt. W. H. James, for the rapid transmission of letters and light dispatches through tabular patienges, at certain intervals in which he proposed to place air exhausting machines, which will establish a perpetual current or artificial horricane, by means of which ophericall? shaped dastic vehicles, or bags, will be blown at inconceivable speed from station to station. The first cost is estimated by Mr. James at £2,000 per mile, and the working expenses at from £300 to £500 per annum for every fifty miles. It is also alleged that a wonderful engine, called the air engine, has lately been constructed by Professor Reittagale, who is securing pd tents in every civilized country of the earth. The power which is self-produced in the engine, is obtained from condensed air, which; though easily manageable, begets an im mense force, the present engine, which stands on a space not exceeding two feat square, having a powerlequal to five hundred and sixty eight horses. For pumping water out of mines it is gravely proposed to use a 10,000 to 20,000 horse-power in order to do the work promptly. It is stated, that, with the present small engine, two hundred and twenty tone can be propelled at a rate of twenty five to thirty miles per hour The description of the action of the machine is very vague, but is said that several very emment and scientific men have examined it and expressed their astonishment. Professor Faiady, having seen the drawing and heard the theory and practice of this invention exp. ained, complumented the inventor by declaring, that he

James, for the rapid transmission of letters and light dispatches through tabular passages, at cortain intervals in which he propried to establish a perpetual current or artificial harricane, by means of which ophericall shaped elastic vehicles, or bags, will be blown at incanceivable speed from station o station. The first cost is estimated by Mr. James at £2,000 per mile, and the working expenses at from £300 to £500 per annum for every fifty miles. It is also alleged that a wonderful engine, called the ait engine, has lately been constructed by Professor Reittagaie, who is securing pd its in every civilized country of the earth. The power which is self-produced in the engine, is obtained from condensed air, which; though easily manageable, begets an im. mense force, the present engine, which stands on a space not exceeding two feet square, having a power equal to five hundred and sixty eight horses. For pumping water out of mines it is gravely proposed to use a 10,000 to 20,000 horse-power to order to do the work promptly. It is stated, that, with the present small engine, two hundred and twenty tone can be propelled at a rate of twenty five to thirty miles per hour. The description of the action of the machine is very vague, but is said that several very eminent and scientific men have examined it and expressed their ast an diment. Professor Farady, having seen the drawing and heard the theory and practice of this invention explained, commented the inventor by declaring, that he had discovered perpetual motion of the most

SOXNETS ADDRESSED TO MY MOTHER Mother ! then a new at how truly I om thin By time of sympathy as well as blood ; Warm from my booms in a gashing flood, My best affections still Littles incline,

Thy breast buth been to me a holy shrine, Where tore unselfish, glowing gratitude With all that makes as kind or leaves us good in one unchanging soutment combine. Whatido I che ish more than thy blest blessing As our the varying scenes of life I rove? Not e'en the warm imposessmute car essing, In parting moments of the maid I love.

I would not change my state with saints above Thy leve was like a sheltering tree that grew the The erream that fed it. Thy embrace War just se warm when first my infaut face

Was seen by thee, as at our last adieu. Untiling, enger, generous, and true, Thy tundernous bath with my days kept pac Seeking all ourrow from my brow to chase-And bolding truth and virtue up to view. Thanks, grateful thanks - I have not all deserve I plead me guilty to a wayward will-Yot then aslet chide so saidly when I swerved, That I returned to love thee better still,

Thy warning council has my spirit nerved,

And proved an antidote to many an ill. As age accumulates upon thy brow, And all thy energies become less warm, security red on my more regardes sem ; Time the protectorship reverses now,

It by God's blussing, health and strength allow My toil shall comfort thee, decure from harm. No dread of want shall thy last days starm-Nor work house insolence thy spirit bow. Mother ! though dim thine eye; yet many a day While birthe I sported didst thou toil for me-Along no path of flowers ; -but a rude way, Beent with hardship and with poverty. May I the debt that's due, in part repay.

By feeling grateful and by aiding thee. Dost ask why I have joined my name to song Lo! how the ivy round the oak entwines! Thus round thy worth those transitory line Enwroath themselves existence to prolong. My muse now noteless 'mid the busy throng,

If in her lay a parent's virtue shines, A pleesing theme unto her numbers joins To warm the heart and hinger on the tongue. Though fame proced by, a better guest, Content Dwelt ever with ue, making all serene : And hope bath in my dreams a vision sent. POEL An Editor's Troubles

That Editor who wills to please Most hambly crawl up a his knees. And kies the hand that beats him Or if he date attempt to walk, Must toe the mark that others chalk, And eringe to all that meet him.

Pays one, your subjects are too grave-Too anich morality you have -Too much about religion t Give me some witch or winard's tales, With slip shod ghosts, with fins and scales Or feathers like a pigeon.

I love to read, another cries. Those monttrous fastnomable lies-Composed of kings and queens, and lords, Of border wars, and Gothic hurden' That used to live in hovels.

No. no-cries one, we've had enough Of such confounded love sick souff. To craze the whole creation Give us some recent foreign news, Of Russians, Turke, the Greeks and Jews Or any other untion.

The man of drilled scholastic lore Would like to see a little more In scraps of Greek or Latin ; The merchants rather have the price Of Southern indigo and rice, Of India silks and wiin.

Another cries. I want more fun, A witte apredote of pun. A rebus, or a riddle ; Some long for missionary news, And some, of wordly carnal views, Would rather hear a fiddle

The critic, too, of classic skill, Must dip in gall his gander quill. And scrawl a minst the paper ; Of all the literary fools Bred in our colleges and schools He cuts the siliest caper.

Another cries, I want to see A jumbled up variety-Variety in all things A miscellaneous budge podge print, Composed -- I only give the hat, Of multifarious small things.

I want some marriage news, says Miss, It constitutes my highest bliss To hear of weddings plenty For in a time of general rain. None suffer from a drought, 'tis plain-

I want to hear of deaths, says one-Of people totalty undone. By losses, fire or fever : Another auswers full as wise, I'd rather have the full and rite

At least, not one in twenty.

Of racoon skins and beaver. Some signify a secret wish For now and then a savoury dish Of politics to suit them : But here we rest at perfect case We r. ver should dispute them.

NEW AND FRARFUL MODE OF EXECU-TION .- It appears from the journal of a European traveller, that a new and fright ful mode of execution has been adopted by the Great Mogul. The instrument and the process are thus described: A box, each side of which is fifteen feet square, is constructed of timber, about eighteen inches thick, dove tailed together, and braced with fron rods. The outside of the bottom of the Abstract of sums of money subscribed by box is covered with a plate of beaten iron, one inch in thickness. The interior is filled with perfect cubes of granite, weighing in the aggregate several thousand tons. machine is erected after the manner of an enormous scale, and of tremendous AGRICULTURAL SOCIETIES. strength. The mass is rused by powerful machinery, cast in Birmingham for the express purpose, though it is to be presumed that the machinist by whom the work was turnished, had no idea of the horrible purpose for which it was intended. The human victim is placed upon a block of gran ite, of a corresponding surface, buried in the earth immediately beneath the enormous mass, and also covered with a plate of iron. At a signal by the vicramadack, the execu tioner touches a spring, the mass falls ! and several Agricultural Societies in the the victim, crushed at once, is suddenly amuchilated, and spread out like a sheet of pasteboard. The huge weight being again the raised, the flattened body is withdrawn, Eighteen hundred and dried in the sun. When complete y prepared, it is hung upon the walls of a public building, there to serve as a warning to the multitude.

AGRICULTURAL.

AGELECATIONAL NEWS .- The attention of both scientific men and practical farmers is given to agricultural improvement with so much success, that one knows not what to think of it. It is to be hoped that something important will prove to be fixed and certain truth; By the last steamer we have the two following items

The rumours of a very interesting and astonishing discovery begins to be circulated in Paris. It consists in furnishing the means of lighting, simultaneously all in all directions, by means of simple iron wires connected with electro-magnetic machines. The utility of this discovery is immense, as it will render the road as well lighted and safe as the most frequented streets of the capital. Several expetiments have already been made on the road from Paris to a small town on the Havre road, which was crowned with entire success. BROOKE, Messenger, of 2, Union.st., Southwark, London, maketh oath and saith, that he (this deponent) was afflicted with FIFTEEEN BURNING ULCERS on his left arm, and ulcerated sores and wounds on both legs, for which deponent was admitted an out door pati ent at the Metropolitan Hospital, in April, 1842 paid to Canada

where he continued for nearly four weeks.—
Unable to receive a cure there, the deponent sought relief at the three following hospitals:
King's College Hospital in May, for five weeks; -at Guy's Hospital in July, for six weeks; -and Charing Cross at the end of Au-Sust, for some weeks more; which deponent left, being in a far worse condition than when ponent thereupon called upon Dr. BRIGHT, chief physician of Gny's who, on viewing the depo-nent's condition, kindly and liberally said.— "I am utterly at a loss what to do for you! but here is half a sovereign : go to Mr. HOLLOWAY, and try what effect his Pills and Ointment will have, as I have frequently witnessed the wonderial effects they have in desperate cases. -You can let me see you again. This unpreju and a perfect cure was effected in torce weeks by the use alone of HOLLOWAY'S PILLS and OINT-MENT, after four Hospitals had failed !!!-When Dr BRIGHT was shown by the deponent, the result of his advice and charity, he said, "I am both astounded and delighted, for I thought that if I ever saw you again alive, it would be without your arm-I can only com

POETRY.

THE CHERRY GIRL.

BY G. W. BUNGAY.

When the cherries were red. As the lips of a maid, I passed by a cot near the wood. Mong the branches so green, Where the robins had been, A beaut ful cherry girl stood.

With her soft little hand, Which the fair fruit had stained, She broke a rich branch from the tree, With a smile on her face, And with lady-like grace. She gave the sweet present to me.

What the berries contain, With the dew and the rain, And nectar of herbs, fruits and flowers, We may press to the lip, And most gratefully sip. Said she, Ob, what rich drinks are ours

The best spirit, said I, This side the blue sky, Is spirit of woman so fair, She intoxicates man More than wine ever can : She's dearer than wine, all declare.

STANZAS.

BY ROBERT GILFILLAN. On hearing a lady sing an Irish melody.

se! what strains are these That fall upon mine ear the while 'Tis music's voice-and thine own choice-Sweet breathing from the Emerald Isle!

There is a land that all men claim. Where'er the spot on rounded earth-Whate'er the clime-whate'er the name-Land of our fathers, and our birth !

Old England has its vales of green, And Scotland boasts its hills of pine, And fair Louise! thy songs I ween Tell that loved Erin's land is thine.

I love the isle from whence thou'rt sprung-Land of the brave, the kind, the free :-Where harps, high-toned, by minstrels strung, Have waked their sweetest melody ! Thy sires, Louise! in lordly halls

Held sway or on the battle plain Showed deeds, which, though thy song recalls, We hope may not return a ain Too much of blood-too much of woe

Hath England, Erin, Scotland, seen :-This had been one bright scene below Had man to man as brothers been ! We seek not fame! that yet is ours-

For high in thought, and bold in hand, Have stood our sires, with giant powers The guardians of our fatherland! But give us peace-and give us love-The rose, the thistle, shamrock green

United thus, like stars above, Each in its track shall bright be seen! Fair lady! wake thy song again,

Thee and its strain the bard adores 'Tis Erin's voice across the main Soft sounding on our Scottish shores !

" Rev. Solomon Spaulding, to whom was united in marriage in early life, was a graduate of Dartmouth College, and was distinguished for a lively imagination and a great fondness for history. At the time of our marriage, he resided at Cherry Valley, N. Y. From this place we removed to New Salem, Ashtabula county, O., sometimes called Coneaut, as it is situated upon the Concaut creek. Shortly after our re | ed. moval to this place his health sunk, and he was laid aside from active labors. In the town of New Salem there are numerous mounds and forts, supposed by many to be the dilapidated dwellings and fortifications of a race now extinct. These ancient re hes arrested the attention of new settlers. and became objects of research for the curious. Numerous implements were found, and other articles, evincing great skill in the arts. Mr. Spaulding being at educated man, and passionately fond of history, took a lively interest in these developments of antiquity; and in order to begule the hours of retirement, and fur ish employment for his lively imagination. he conceived the idea of giving an histori cal sketch of this lost race. There ex treme antiquity, of course would lead him to write in the most ancient style; and as the Old Testament is the most uncient book in the world, he imitated its style as nearly as possible. His sole object in writing historical romance was to amuse himself and his neighbors. This was about the year 1812 Huli's surrender at Detroit occurred near the same time; and I recollect the date from that circum stance. As he progressed in his narrative, the neighbors would come in from time to time to hear portions read, and great terest in the work was excited a nong them It claimed to have been written by one of the lost nation, and to have been recovered from the earth, and assumed the title o Manuscript Found. The neighbors would often inquire how Mr. S. progressed

in decyphering the manuscript? and when he had a sufficient portion prepared he would inform them, and they would assemble and hear it read. He was enabled. ancient history, to introduce many singu lar names, which were particularly noticed by the people, and could be easily recognized by them. Solomon Spaulding had a brother, John Spaulding, residing in the place at the time, who was perfectly familiar with this work, and repeatedly There are two follies as disgusting as heard it read. "LIFE AT THE SPRINGS." This is the title of a very pretty littl sheet, that issues, at the close of each week, at this justly celebrated fountain of health, a spot far removed from the busy hum of mercantile and other active pur suits, yet laving around it many attractions that cannot be found in our large cities and towns.

Perhaps the greatest attraction of the Caledonia Springs is the health restoring qualities of its waters; but those are no he only inducements that make a vis. agreeable. Extracts from the New York

The British are determined to construct a road from Toronto to Port Sarnia, and it will ultimately be extended to Kingston and to Montreal. The roads and canals in Canada, are not to benefit New York, or Boston, but to engross the travel and trade from the Western and South western States, and convey them to Momtreal.

Do not New York and Boston daily see the products of the States going into Cana. da, under the colonial treaty, and under the fostering care of British and Canadian Legislation, and from thence transported in British vessels as the productions of Canada? Do they wish to increase this trade ?-- Canada, of herself, furnishes little or nothing for New York, or Boston; nor will she, so long as she remains a colony

Why give to her the benefit of the tran. it of more than half of the people and of the wealth of the States ?

LOOK OUT FOR POISONED TEA. - It is well known that nearly half a million dol lars worth of tea was in one of the build ings on Broadway, New York, destroyed by the late great fire. Tea is known to e an incombustible substance, at least it has proved so in the present instance. Thousands of boxes were crushed and broken with the fall of the building, and we perceived that tea [it is black tea] is now being shovelled together and packed in large rough board boxes, as if it were, intended to be sold and used. Now it is well known that there is an inside cover ng of sheet led to the loves in which this article is imported; jected to the action poses, and at once becomes a deadly poi son. If hy any chance this union of acids general destruction in which the building was involved, the contents of the boxes equence ought to be placed beyond the each of any body who would be likely to ise it.

History of the Mormons.

The above parrative is accompanied by a statement signed by the Rev. Dr. A. Ely, pastor of the Congregati nal Church in Mason, and Dr. R. Auston, principal of the Mason Academy, who asserts that Mrs Davison is a woman of irreproachable character and a humble christian ; and her testimony is worthy of implicit confidence. . Should any one be lead to wonder why these facts were withheld from the world for the nine years which intervened from the first publication of the Mormon Bible and their being made publie by Mrs. D., we can only surmise, in nswer, that she did not look upon the n ovement us one calculated to have a very long existence; and, giving too much credit to the good sinse of the world, did not think such a palpable impoposition could draw after many followers .

SONG OF THE SO (DID SWEETHEART.

I loved thee for thy memory. For wealth, they said, was thine But, finding thou hast none, I Thy heart and hand resign. Think not I wish to pain thee, Deem not I use thee ill;

I like thee ; - out maintain thee, I neither can nor will. I thought thee quite a treasure-1 bona fide sum, And dreamt of joy and pleasure That never were to come

The house-the hounds-the horses Thy fortune would allow ;

The wines -the dozen courses ;--

That dream is over now. Not for thy charms I wooed thee. Though thou wast passing fair ; Not for thy mind I sued the Though stored with talents rare : The income twas that caught me,-For that I held thee dear :

I trusted thou'dst have brought me

Five thousand pounds a year. That hope alas ! is blighted, Thereon I will not dwell I should have been delighted To wed thee-but, farewell ! My feelings let me smother, Hard though the struggle be, And try and find another Rich as I fancied thee.

Next, after the potatoes are dug, after carefully selecting all those which are injured, previous to storing the remainder, we would recommend a quantity of slacked lime to be mixed with them. And when the potato seed is planted next year, we would also recommend a portion of that material to be put in with every plant. And it is well worth the consideration of farmers, whether they should not, as a matter of precaution against the continuance of this disease, which it appears is very difficult to eradicate when once introduced, rear some new seed from the apple or ball.

About seven o'clock this morning, 24 years of age, James J. Cowley, third son of the Proprietor of this paper, breathed his last, after a tedious illness, near five weeks of which he was confined to his bed. He was in life kind, obedient, dutiful, and affectionate, as Child, Son, and Brother; and as a young man, who, being little contaminated by the prevailing vices of the age, was perhaps not to be excelled for high and correct notions of honorable integrity, veractive, candour, and sobriety; and as an example of modest and unsophisticated morality, not unworthy the imitation of youth of all classes. In death he was calm and District, one month at the least after the date serene, stedfast in faith, full of hope, and hereof. As witness my hand this ninth day

Signal Good Luck.

A letter from a friend in Canton, under da of May 25th, received by the Rainbow, which arrived last week at New York, relates the following striking and interesting fact :-

" A Spanish schooner of about 100 tons, now here, the Quarternoon, of Mamilla, has met with the richest luck that, so far as I know, is on re cord. It appears that she s arted from Manilla for the purpose of fishing upon the Shoals, as the Captain states, he saw an anchor, having a chain fast to it, which he traced along until he found a wreck; and having "divers" on board, he'sent them down to see what might be found on board. One man at last brouge t up a black piece of metal which he called lead, but which the captain knew to be large sycce silver, weigh

ing about 70 dollars! The man reported any quantity more below ; so at it all hands went, and worked till they had brought up the value of 150 000 dollars in these ingots of silver, the crew all the while supposing that they had lead. The captain got all he dared for China. He arrived here about two months since, and sold his sycee to a house to whom he fitted out again for his shoal, picked up 25,000 dollars more, got all the ship's anchors Great Western Railway. and cables, and all her old fastenings in shape of iron knees, bolis, &c., and also her water casks,

Canada Railways.

By the Canada papers, arrived per the Briannia, we perceive that "the Toronto and Lake Huron Railway Company" in this country is regarded with the most intense interest in every part of the Western Province. Several columns in every journal are filled with discussions upon the merits of the various routes proposed for the line, or lines, to Lake Huron. It is natural that our fellow subjects in Canada should be as impressed Irelan with the advantages of railway intercourse between their cities as ourselves. The present line of communication between New York and Boston and the rapidly increasing settlements of Wisconsin and Illinois is the Kiver Hudson, and the Boston Railway to Albany ; thence by railways or Canal to the ports on Lake Ontario, or to Buffalo, at the foot of Lake Erie, and thence by the circuitous routes [Innate Saxon hatred !] of Lakes Erie, St. Clair, Huron, and Michi gan. The south westerly and westerly portions of Canada forms a peninsula, which has Huron, and Ontario, and the proposed line rom Toronto to Goderich form a triangle;

the railway being the base, 109 miles, and the lakes the remaining sides, 500 miles; and as these sides must be, and are now, coasted, the saving of distance by railway will be 391 miles. The rising town of Hamilton desires that their town and port should be a terminus, and shows forcibly, by tables of traffic, the advantages thereby accruing to the Company. Goderich is not idle. Mr. Lizars, the very intelligent and active clerk of the Crown of that part of Western Canada, is in London for the purpose of urging upon the Board in St. Helen's place, the favourable position of Goderich for a vast emporium of communication with Lake Ontario. In supmark, after carefully examining the town site and harbour :- "This place is well adapted for a fortification and naval depot, the harbor being so well sheltered on the north and south. In the event of war, military and stores could but, to complete this, there should be a railroad from this to Hamilton or Toronto;" in have already been taken in hand. which remarks Deputy Quartermaster General Colonel M'Kenzie Fraser, most warmly concurred. It may be interesting also to add.

that the late Sir Richard Downes Jackson,

then commander-in-chief of the Canada for-

es (1840), said, on viewing the lake and har

[From the European Times.] The Corn market continues firm; and the ne weather which prevailed last week at the sailing of the steamer, having been followed by repeated and heavy fallst of rain, the market, in the early part of the present week acquired additional firmness, and continues so, with a slight drawback, to the predaily arriving from the United States and Canada; and from the nature of the advices recently sent across the Atlantic, the supply from those quarters, there is every reason to believe, will increase. From the cause, at which we glanced in our last publication, the import rate on wheat has advanced to 18s., the result of the inferior qualities thrown on the market. The import duty on flour is now 10s 10d per barrel. In some instances recently, Irish flour has receded 1. per sack, and Canadian 6d per barrel, influenced by the large arrivals from the West, which

Whiskey! Whiskey!! FIHE best Canadian Whiskey-as ac. knowledged by all who have tried it-is that manufactured by II. Van Buskirk at his Distillery at St. Thomas.

For pleasantness of taste, and purity of &c. &c. &c. flavor, it decidedly excells every other GRIST-MILL, SAW-MILL, AND brand in this market, and cannot be surpassed in Canala. The manufacturer has (at great expense) brought the process of raw grain distillation to such perfection that he has succeeded in overcoming an obstacle common so all newly distilled spirits, by imparting to his whiskey a peculiar mildness of taste, a desideratum hitherto only to be acquired by age.

With this recommendation, the subscriber respectfully invites the inspection of a discriminating Public; and pledging himself to maintain the high celebrity his brand now obtains, he confidently counts upon all, who favor him with a trial, becoming permanent customers Agents in have on hand a large supply by the barrel. WINTER.

BY KLIZA COOS. Winter is coming! who cares! who cares Not the weal hy and proud, I trow? " Let it come," they cry, " what matter How chilly the blast may blow ?"

.. We'll feast and carouse in our lordly halls, The gobiet of wine we'll drain; We'll mock at the wind with shouts of mirth, And music's echeing strain.

" Little care we for the biting frost, While the fire gives forth its blaze : What to us is the dreary night,
While we dance in the wax light's rays!"

'fie thue the rich of the land will talk ; But think, oh. ye pompous great, That the harrowing storm ye laugh at within Falls block on the poor at your gate ! They have blood in their veins ave. pure as this

But nought to quicken its flow; They have limbs that feel the whistling gale, And snrink from the driving snow. Winter is coming -oh! think ye great, On the roofles, naked, and old !

Deal with them kindly, as man with man, And spare them a tithe of your gold ! A MEDITATION.

Some hidden disappointment clings To all of man-to all his schemes.

And life has little fair it brings, The peace that may be ours to day,

The slighted moments steal away, and then comes sorrow. The light of promise that may glow Where life shines fair in bud or bloom Ere fruit hath ripen'd forth to show,

Scarce heed we, looking for the morrow;

The rapture softest blush imparts. Dies with the bloom that fades away. And glory from the wave departs At close of day.

Is quench'd in gloom.

Where we have garner'd up our hearts, And fixed our earnest love and trust, The very life blood thence departs,

Then, Nature, let us turn to thee ; For in thy countiess changes thou Still bearest immortality Upon thy brow.

Thy seasons, in their endless round Of sunshine, tempest, calm, or blight Yet leave thee like an empress crown'd With jewels bright.

Thy very storms are life to thee, 'I'is but a sleep thy seeming death; We see thee wake in flower and tree At spring's soft breath.

We view the ruin of our vouth. Decay's wan trace on all we cherish But thou, in thine unfailing truth, Canst never perish.

The Clerk of the Council had applied to the fire. the office of the Western Globe, the office of the St. Thomas Standard, and at the office of the Times, London, for their terms. The offer of the Globe was conditional, as "it was difficult to calculate." The Standard offered for a definite sum. The terms of the Times were, that they would do so. It would scarcely be believ

Mr. Coyne considered himself greatly insulted by the offer of the Times. The great warmth of this worthy member, and the absurdity of the remark, elicited much laughter from the Members of the Council. A keen contest was carried on for some time. Mr. LAWRASON and others could not see how members could justify themselves to their constituents for seeking to get their work done out of the District Mr. BRENNAN wished to inquire of memhers whether they thought the people of Toronto would be foolish enough to send their orders here. After a sharp discusson and several divisions, in the last of which the members were equal, the casting vote of the Chairman was called for :- he remarked, that both the offer of the Times and the We tern Globe were too indefinite; he therefore gave his vote in favour of the St. Thomas Standard.

THURSDAY .- An order of importance to the individuals interested was passed, directing the Clerk of the Council to notify all persons in arrear for lots of the gaol block purchased by them, that they must pay within three months, or else the land will be re-sold.

MICHIE, MATHIESON & CO.'S OLD GROCERY ESTABLISHMENT.

JOHN MICHIE

AS the pleasure to announce to the numerous friends of MICHIE, MATHESON & Co., that he has taken possession of the NEW and SPACIOUS PREMISES which have been built for him, in the fine row of BRICK BUILDINGS,

No. 13. Dundas Street,

(Opposite the Site of M. M. & Co's Old Store,)

Where he is prepared to transact business off the most extensive scale. His afrangements for IMPORTING DIRECT, will enable him to offer for Sale, at all times, a choice assortment of

EVERY ARTICLE IN THE EROCERY LINE And at prices which will compare favourably with those of any Establishment in Western Canada. His Wholesale Prices will be quite as low as those of the largest

Houses in Toronto and Hamilton. J. Michie is determined that the reputation which his late Firm acquired-for thorough acquaintance with every department of the Trade, and for always keeping the best Articles—will be fully sustained. In purchasing his New Stock, J. M. has devoted special attention to

THE TEATRADE,

37.1f His purchases in this article have been very extensive, and he is convinced that while in flavour and strength they will be fully approved—the prices will be considered by all; very moderate. Since the destruction of their former premises by fire, M. M. & Co. were prevented from giving that attention to

THE WINE TRACE

Which they would have desired; but the ample accommodations afforded by his New Stores will enable J. M. to carry on this branch of the business on the most satisfactory scale. A large Stock of WINES, of the most celebrated brands, is now in store; and additions will be constantly receiving until the close of the navigation. The Stock of BRANDIES, HOLLANDS GIN, SCOTCH and CANADIAN

WHISKEY, &c., will be found as usual, well laid in. In the Article of COFFEE, M. M. & Co. have been favourably known to he public for years back, and everything which skill and care can avail to retain the preference which has been so long awarded them-will continue to be employed. J. M. draws particular attention to a large importation of

Dried Brufta.

Which he is now making under the recent Draw back Bill of the United States: He will be enabled to offer RAISINS, CURRANTS, &c., on very favourable terms. SUGARS, TOBACCO, RICE, SPICES, CANDLES, SOAP, and every other Article in the Grocery Business in great tariety and on on the best terms.

London, Cetober 14, 1845. Wholesale Buyers will do well to inspect J. M.'s Stock before going east, as hey can purchase here on as good terms.

Whiskey! Whiskey!! HE best Canadian Whiskey-as ac. knowledged by all who have tried it-is that manufactured by H. Van Buskirk at his Distillery at St. Thomas.

For pleasantness of taste, and purity of flavor, it decidedly excells every other brand in this market, and cannot be surpassed in Canada. The manufacturer has (at great expense) brought the process of raw grain distillation to such perfection that he has succeeded in overcoming an obstacle common to all newly distilled spirits, by imparting to his whiskey a peculiar mildness of taste, a desideratum Capt. MICHIE, MATHIESON & CO.'S OLD GROCERY ESTABLISHMENT.

JOHN MICHIE

AS the pleasure to announce to the numerous friends of MICHIE, MATHIESON & Co., that he has taken possession of the NEW and SPACIOUS PREMISES which have been built for him, in the fine row of BRICK BUILDINGS,

No. 13, Dundas Street,

(Opposite the Site of M. M. & Co's Old Store,)

Where he is prepared to transact business on the most extensive scale. His arrangements for IMPORTING DIRECT, will enable him to offer for Sale, at all times. a choice assortment of

EVERY ARTICLE IN THE GROCERY LINE And at prices which will compare favourably with those of any Establishment in Western Canada. His Wholesale Prices will be quite as low as those of the largest Houses in Toronto and Hamilton.

J. Michie is determined that the reputation which his late Firm acquired-for thorough acquaintance with every department of the Trade, and for always keeping the hest Articles-will be fully sustained. In purchasing his New Stock, J. M. has devoted special attention to

THE TEA TRADE:

37 if His purchases in this article have been very extensive, and he is convinced that while in flavour and strength they will be fully approved—the prices will be considered by all, very moderate. Since the destruction of their former premises by fire, M. M. & Co. were prevented from giving that attention to

THE WINE TRADE

Which they would have desired; but the ample accommodations afforded by his New Stores will enable J. M. to carry on this branch of the business on the most satisfactory scale. A large Stock of WINES, of the most celebrated brands, is now in store. and additions will be constantly receiving until the close of the navigation. The Stock of BRANDIES, HOLLANDS GIN, SCOTCH and CANADIAN

WHISKEY, &c., will be found as usual, well laid in. In the Article of COFFEE, M. M. & Co. have been favourably known to the public for years back, and everything which skill and care can avail to retain the preference which has been so long awarded them-will continue to be employed. J. M. draws particular attention to a large Importation of

Dried Gruits.

Which he is now making under the recent Draw back Bill of the United States. He will be enabled to offer RAISINS, CURRANTS, &c., on very favourable terms. SUGARS, TOBACCO, RICE, SPICES, CANDLES, SOAP, and every other Article in the Grocery Business in great variety and on on the best terms.

Wholesale Buvers will do well to inspect J. M. & Stock before going east, as

they can purchase here on as good terms.

A WELL-WISHER FOR THE PROSPERITY OF THE TOWN OF LONDON, C. W.

A THIEF IN THE NIGHT. - A few nights ago a thief found his way into Mr. Ailworth's Tavern at the Five Stakes in the middle of the night, and having groped to the bedside where Mr. and Mrs. Allworth were sleeping, discovered that Mr. A. had not taken his breeches to bed with him, (as most cautious people do when they have any change in their pockets,) and very quietly took therefrom all the money be could find, about \$5. Not knowing what the rogue meant to do, Mr. A. lay very quiet till the fellow having accomplished the object of his visit, went slap through the window a la harlequin leaving mine host to look for him at his leisure. - St. Thomas Standard.

CAUTION .

A Dissipated Drunken Woman, of ill fame, of the name of WILLSON, is loitering about this town as a common beggar, and generally accompanied by a boy from 10 to 12 years old. She appears from 35 to 40 years of age, with red face and eyes, indicative of a dissolute life. Her apparel consists of an old black bonnet, blue clock, old black bombazette frock, dirty stockings, (should be white.) Her husband is a strong athletick man, of plain visage and also of dissipated habits, It is therefore hoped that all persons who lay the least claim to respectability will treat her as a woman undeserving of their sympathy, and not be deceived either by her false stories or pitiable appearance.

EVERY ARTICLE IN THE GROCERY LINE

And at prices which will compare favourably with those of any Establishment in Western Canada. His Wholesale Prices will be quite us low as those of the largest Houses in Toronto and Hamilton.

J. Michie is determined that the reputation which his late Firm acquired-for thorough acquaintance with every department of the Trade, and for always keeping th: hest Articles-will be fully sustained. In purchasing his New Stock, J. M. na devoted special attention to

THE TEA TRADE;

His purchases in this article have been very extensive, and he is convinced that while in flavour and strength they will be fully approved—the prices will be considered by all, very moderate. Since the destruction of their former premises by fire, M. M. & Co. were prevented from giving that attention to

THE WINE TRADE

Which they would have desired; but the ample accommodations afforded by his New Stores will enable J. M. to carry on this branch of the business on the most entisfac-tory scale. A large Stock of WINES, of the most celebrated brands, is now in store, there others insert pures, being of epinion that and additions will be constantly receiving until the close of the navigation. The Stock of BRANDIES, HOLLANDS GIN, SCOTCH and CANADIAN

WHISKEY, &c., will be found as usual, well laid in. In the Article of COFFEE, M. M. & Co. have been favourably known to the public for years back, and everything which skill and care can avail to retain the preference which has been so long awarded them -will continue to be employed. J. M. draws particular attention to a large Importation of

Dried Fruits.

Which he is now making under the recent Draw back Bill of the United States. He will be enabled to offer RAISINS, CURRANTS, &c., on very favourable terror. SUGARS, TOBACCO, RICE, SPICES, CANDLES, SOAP, and every other Article is the Grocery Business in great variety and on on the best terus.
