Roumanian Troops Force Passage of Danube on Forty Mile Front.

COMMENCE INVASION

New Campaign of Allies Has Constantinople as Objective.

Special Cable to The Toronto World.

London, Oct. 2.—Roumanian troops have effected a crossing of the Danube. They have secured a lodgment on the southern bank on the 40-mile front between the towns of Rustenuk and Turtukai, after repulsing the Teuton-Bulgarian cordon of troops guarding this section of the front. Bucharest also announces that besides crossing the Danube the Roumanians have invaded Bulgarian territory.

The invasion is also admitted by Berlin, and the Germans have already set troops in motion to combata the invading forces.

It is pointed out in this connection by war observers that Russian troops are probably operating with the Roumanians in this campaign, and that for several weeks Slav troops have been entering Roumania from Odessa, The points of crossing are south of Bucharest and abut on the railway leading southward from the capital to a point opposite Turtukai. GERMANY ANNOUNCES ROUMANIAN INVASION

Berlin, Oct. 2, via London.—Rou-manian troops have gained a footing on the right bank of the Danube River south of Bucharest, says the official statement issued by German general headquarters, concerning the fighting in Transvlvania and Debrudia. In Transylvania the Roumanians have gained ground on both sides of the great Kukel River, north of Fogaras. Teutonic troops, the statement adds, have gained successes in the Strehl Valley, also in Transylvania.

Berlin Officials Admit Loss of Zep Near London

Berlin, Oct. 2 .- The following official statement was issued today with regard to the air raid on London and the east coast:

"During Sunday night several naval airships successfully threw bombs on Lordon and military works on the Humber. Despite the heavy firing by anti-aircraft guns all the airships returned, except one, which was hit and set afire by anti-aircraft guns and fell near London."

"In three months," La Patrie continues, "the British army (has lost over 300,000 troops, and while the heroic armies of Great Britain and Franc are shedding their blood for the common cause certain demagogues have resumed an anti-patriotic agitation seeking with more energy than ever before to show our rural population that we are not concerned in this war that all we have to do is to remai quietly at home, that we owe nothing to England, and await the allied vic tory which is being obtained at the price of awful sacrifices."

Canadian "Eyewitness" Tells of Wonderful Feat of Lone Canuck Splendid Behavior of Men From Dominion.

Ottawa, Oct. 2.-How an unnamed corporal of an eastern Ontario battalion of the Canadian forces in France single-handed charged a party of Germans consisting of two officers and about 20 men, who were advancing to the attack, and accomplished the wonderful feat of making casualties of all excepting one whom he took prisoner, is related in the report of the Canadian "eye-witness" in his communication covering the severe fighting from Sept. 20 to Sept. 27. The despatch follows:

Canadian Corps Headquarters (in France), via London, Oct. 2.—As a result of further severe fighting the Canadians have captured several important German positions and have advanced their own line upon a frontage of nearly two miles to a maximum depth of 900 yards.

What the Canadians Captured. The total number of prisoners in their hands since the beginning of their great offensive now amounts to 38 officers and 1,610 other ranks. They have also captured about 25 machine guns, 11 trench mortars and a great quantity of ammunition of all sorts and other war materials.

The Germans have fought hard and their resistance has been formidable. To minimize this fact would be to minimize the gallantry and persistence with which the Canadians have attacked. We have, in this fighting, advanced in close co-operation and sympathy with the British troops on either fiank. Despite the enemy's resistance we have, except for temporary and local setbacks, secured in succession all of our objectives, and by every account received we have inflicted severe

Bread, milk, meat—all have climbed to seemingly prohibitive prices and still the demand continues. Coal is the next that threatens, and here conditions are likey to be repeated.

The fact that bread, milk meat and the rest are still in demand to such an extent that the supply can hardly correspond to the call, seems to point out that the country, despite what it costs to live, is by no means in a despondent condition. The thrift which we hear so much about as a necestate of the times has correct inverse. we hear so much about as a necessity of the times has scarcely-impressed itself upon the people. Money, generally speaking, is no scarcer than it was a year ago, indeed, it seems to be more plentiful. Retrenchment, if it exists at all, has not yet affected the exterior life of our citizens. People seemingly eat and dress as well as in seemingly eat and dress as well as in former years. Places of amusement, too, are patronized to the full; poverty seems less prevalent than in former seasons.

All of which bears out the theory that high prices are good for the country, provided always that these prices are due to general legitimate conditions and circumstances, and that they are not the results of a hold-up of capital against labor or collusion amongst any body of men for their own aggrandizement and to the detriment of the remainder of the citizen body.

Sunday recruiting meetings sent yes-

terday's recruiting figures in Toronto off to a good start. During the day 52 applications were made at the depot and of this number 26 passed the loctors and were turned over to the

ning. The unit was 500 strong and after putting one hour at company and battalion drill, paraded thru the streets headed by both brass and bugle hands.

Word has reached Toronto that the crack 95th Battalion, that left this city last spring, has been broken up, and sent to the firing line as a draft for reinforcements.

On Sept. 13. a number of the men were sent to France and there are still some of the battalion in England. It has been learned locally that Lieut. Col. W. R. MARRIAGE OFFERED "1916 MAGDALENE"

Large and Humane Response to Girl's Pathetic Appeal.

INNUMERABLE LETTERS

Rich and Poor State Willingness to Give Her Home and Comfort.

Innumerable letters addressed to

Annie Laurie are filtering into the of-

fice of The Toronto World concern ing the "1916 Magdalene," whose pas thetic account of her predicament was printed in The Sunday World. The World does not know the iden-tity of "the 1916 Magdalene," and does not assume a position of responsibility. Kind-hearted persons have sent, thru letters to The World, money in behalf of the unfortunate girl, but this newspaper cannot accept it. Be-low are printed some of the letters which have been written as a response to the girl's plea. The World of course does not act as responsible for these letters, and withholds the signatures

from publication. Marriage is offered by the first writer. Hamilton, Ont., Oct. 1. Dear Annie Laurie: I read the appeal of the broken-hearted girl and I feel sorry for her. Well, I have been thinking about it and feel I would like to do something for her. I have had a big trouble in my life, and can feel for others. I am an Englishman, 25

years old. I have been out in this country four years.

I would like to get in touch with this unfortunate girl, then we might make arrangement for marriage or find some other way out of the difficulty. In her letter she seems to think all men are alike. I would like to prove her wrong regarding myself, anyway I think she is making a mistake in not denouncing the beast's name. (Ex-

Maybe we would become friends and it would be some one to stick up for. I am telling yo more than I have ever told anyone else even my mother, and I will certainly pray for the girl every time I go to bed.

You can publish this if you like, bu I would rather my name and address did not appear, as I sometimes think my friends and relatives do not understand me. I can hardly explain. I seems there is something inside me that wants to be doing all the time and I would die if I had to be still Hoping you will not misunderstand me and awaiting your reply.

PTE. FAIRBROTHER WOUNDED.

Special to The Toronto World.

Niagara Falls, Oct. 2.—Pte. Walter
S. Fairbrother has been wounded in
both legs, according to a telegram received by his wife. He has been two
months in the trenches, and this is his

white lie, and say she is my sister, and I know God will forgive us the lie to shield her. . . My reason is a selfish one. I feel that if you will give us the chance to help her God in His turn will forgive in part the many sins I have committed. That is one reason, the other being the wish to save her from herself and keep her to the joy that will be hers when the clouds have passed away and she can bathe in the sunlight of the love of her dear baby.

To conclude please let me impress on your mind that we will not make her feel out of place with us, but she will be one of the family and no one moed ever know anything to the contrary. We are anxious to help her if we will but be given the opportunity.

Ten members of various battalions in this military district have been sentenced, members of various battalions we will but be given the opportunity. Sincerely, Refuge,

of the letters were silly, but thank God that some of them are not. I think in such a heart-rending case as that someone should step forward as a friend in time of need. I cannot do much, as I am only a business girl, and not very strong, but as fong as I can help anyone I am willing to do so. I nearly got the same as this girl, but it must have been the prayers of my mother and father for my safety that carried me thru.

I have never had any sisters or more than my husband and I did last night. We knelt down together as we always do and prayed as we never prayed before for that little girl's lover to come to her.

Oh dear Annie Laurie, we feel for her. We have been married two years and have a little angel with the laurie of the plant of

years and have a little angel with blue eyes. Dear Annie Laurie, if it isn't asking too much, let me know how the little girl gets along." Toronto, Ont.

Dear Annie Laurie: I am writing on behalf of the poor girl you allude to. I am the mother of a large family. My husband and I are both from overseas. I am not in a position to help financially, but being a maternity nurse I will offer my home during her great trial and take care of her.

I'm only a working man, forty years old, with a son and daughter. Lost my wife, the lest ever created, and my heart is nearly torn out. I want someone to fill the gap. I'm a mechanic and wish nearly torn out. I want someone to fill the gap. I'm a mechanic and wish I were far younger so that I'd stanf a better chance. I'm not leng in Toronto and know no people hardly, and that makes it more lonesome for me. I'm English. Perhaps you think I'm crazy. Perhaps I am. I know by your letters you nut in the papers that you letters you put in the papers that you will treat me with confidence, but if I can help, here I am.

Henri Bourassa Shou Toronto, Ont.

Dear Arnie Laurie:

With reference to the pathetic letter of the "1916 Magdalene," the writer has every sympathy for her and offens a home until after her baby is born and she is able to get around. We are a family of husband and wife and five-morths-old baby, not many vicitors, and we could keep the poor girl from publicity. As far as remuneration goes, we would not care to make her a pauper; if she came she could pay what she could in years to come, if able; if not convenient, we would not ask it. Please let her know of the offer at once. Yours sincerely. Dear Arnie Laurie: offer at once. Yours sincerely.

These Eaton Values Decide The Question of Your New Fall Clothes

The Present Mode in Both Suits and Overcoats Displayed In Men's Clothing Section on the Main Floor

FEATURED in immense variety of materials, shades and patterns are suits and overcoats, tailored in smart new fashion. Styles that are the very newest for Fall and Winter wear.

IN SUITS we call attention particularly to a smart navy blue model made of fine twill, firm woven worsted or soft Cheviot finished serge. Coats are form-fitting and have rolling, rather narrower notch style lapel. The flaps on pockets are narrower than usual, giving a new effect that is very smart. Vests button fairly high and trousers are straight and narrow. Distinctively a young man's model. Sizes 33 to 37. Price, \$16.50.

Always dependable for service, style and fit are the society brand clothing, the new Fall models featuring both the single and double-breasted coats.

Another very distinctive model is a brown with slight tinge of green, showing a pin check weave. It's a single-breasted 2-button model, with slightly rounded front. Also a double-breasted model with lapels rolling to second button. This model has patch pockets and is in a blue grey cheviot tweed with just a tinge of green. Price, \$22.50.

IN OVERCOATS the slip-on Balmacaan still ranks as the supreme favorite among the young men. This Fall the velvet collared model is the new feature. One model in particular, made of Chip-o-Nortin tweed, is in such attractive mixtures as fawn with red and green, or brown with grey and red, or grey with black. It is single-breasted and has velvet collar. About 44 inches long and satin lined at shoulders and sleeves. Sizes 34 to 44. Price. \$12.50 and \$13.50.

For men who dress conservatively are Fall top-coats in Chesterfield style with close-fitting back, fly front and in a length coming just below the knees. In greys, mostly oxford, as well as darker shades, in soft cheviot finished materials. Sizes 34 to 46. Price, \$15.00 to \$22.50.

Stylish Slip-on Tweed Raincoats, made of that attractive material, Donegal tweed, in light brown or grey mixtures. They are rubberized throughout and absolutely waterproof. Tailored in single-breasted style, with soft rolling lapels that can be turned in and buttoned close up to neck, and with natural width shoulders draping loosely down the back. In 47-inch lengths and sizes 24 to 44. Price, \$15.00.

THE SKILFUL, life-experienced workmen who make these famous Cort boots, exercise personal care in every detail of the making. Each stitch is sewn to stay and the leather welded together in such a way as to give lasting service. There is no clumsy finish to the Cort models; they're so cleverly made and so neatly finished and shaped that you'd wonder how it is possible to produce such graceful looking footwear by hand.

The materials in them are the very best obtainable. Such soft. flexible and smooth leathers as French calfskin, vici kid, etc., in exclusive shades and finishes that will keep their shine almost indefinitely. They are handsewn throughout, which makes them as comfortable as footwear

A new Fall model made of handsome French calfskin, in dull finish, is Blucher cut and has invisible eyelets. Sizes 6 to 11, and in widths A to E. Price. \$18.00.

Another model is made of a Russian leather, in a beautiful shade of russet. It is a Balmoral, laced style boot. Sizes 6 to 11. Price, \$16.00.

Made of soft vici kid, in a very bright finish that resembles patent leather, is a model in Balmoral, laced style; has invisible eyelets, and sewnin tongue. Sizes 6 to 11. Price, \$15.00.

Battle of Somme" Creates Naval Forces Come Up Somme Wonderful Sensation in Britain.

VIEWED BY THE KING

Lloyd George Would Not Allow Censorship of Pictures.

men, so many guns, such vast quantities of such powerful ammunition as the Somme. The Battle of Waterloo was a skirmish compared to the first drive of the British in this confict.

In July's operations the British caspalties were 20,000, or a little less than the total army commanded by Wellington at Waterloo. Long before the big attack was launched preparations were made. Now that the drive is under way there is intense but methodical activity for miles behind this part of the allies' front.

The British Government sanctioned the film as an official historical record of one of the greatest episodes in history, and it is the first war film that was ever allowed to pass without coming under official British censorship.

The English papers have universally acclaimed the film to be the best yet produced. Some of the scenes, the taking of which was extremely dangerous to the operators of the machine, rank in vividness and dramatic quality with battle pictures by famous artists.

Because the pictures show actual bat-

Stark horror is revealed in some of the opisodes of the pictures. One is permitted to see what war really is. There are neither evasions nor polite reservations. Occasionally the scenes are so grim in their realism that it seems almost indecent to be witnessing them from an easy chair. The pictures, in short, are calculated to bring the war home to impressionable people with the force of almost magic, and few who see them but will be better able to understand what the allies have before them, and to render tribute to the brave men who are performing the job bravely, staunchily, and more often than not with a cheery

LARGE REST HOME FOR ANIMALS TO BE PROVIDED

Toronto Humane Society Has Purchased Jackson Farm for Purpose.

With a view to giving rest to and prolonging the lives of animals, particularly horses, the Toronto Humane Society recently purchased the Jackson farm, situated on Bathurst street, about six miles north of St. Clair avenue, and rimning westerly from Stop 38. Yonge street, at a cost of \$20,000. Renovation of buildings already on the farm and the erection of other suitable ones for the accommodation of the animals in need of rest, will bring the approximate cost of the whole scheme to about \$30,000.

With the improvements that will have to be made at an early date, the outlay represents a value of about \$150 an acre, and it is the intention of the society to appeal to the public of Toronto to help in this worthy cause. It is also the hope of the society that sufficient money will be raised to erect a building for the accommodation of cats and dogs whose owners desire to leave them in good care during the summer vacation.

He has originated a ridiculous, clumsy animal, which he calls "Gertie," and, by 75,000 drawings. by 75,000 drawings, turns out the most amusing and novel vaudeville the most amusing and novel vaudeville sketches seen in many a day.

All the other turns are up to the standard as produced by the Shea management and a program chuck full of varieties is the result. There is plenty of comedy in some of the numbers, especially the sketch entitled, "Somebody's Baby," produced by Wm. Gaxton & Co., also some very cleverdancing by La Argentina, Queen of Castanets, and Spain's greatest dancer, and the La Vars, who have a whirlwind dance, introducing their revival of the cake walk.

Arthur Sullivan and Ricca Scott have a human sketch entitled, "A Drawing From Life," and the Four Entertainers have a line of harmonious blend in fun and music. Leo Beers is a real good piano-song reader, who has a good line of stuff. Joe Fanton and Company in "A Garden of Surprises," produce some dazzling acrobatic stunts and Hunting and Frances have a clever comedy turn of their own origination. It is a good bill.

We Can No Longer Keep Down the Price of Milk

October Brings Increase in Price

As a result of the unusual weather of the past Summer it is necessary that we increase the price of our milk. It has been almost impossible for the farmers to grow much food crops, so that there is a scarcity of suitable feed for the cows. Hay is about the only crop of which there is any abundance—and this is not very satisfactory. The resultant increased cost of milk production makes an increase in price essential. Commencing today you will get 18 tickets for \$1.

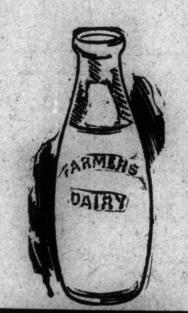

18 Tickets for \$1

During the past few months we have successfully striven to keep down the price of milk in the face of the high cost of production. There would be no increase now were it avoidable, and it is with reluctance that we take the step, for it has always been our aim to give our customers the greatest consideration. Customers will still receive the same richness and purity in the Farmers' Dairy milk as heretofore.

Aviation Once More

Zeppelin raids over England have een on the increase, and while to date honors are about even, it is undoubted that England would sleep more soundly if the air defences were in an impregnable condition. The most effective defence is efficient air service. The anti-aircraft guns have done good work, and have brought down at least two of the big German dirigibles, but it is the aeroplane and the men like Lieut, Robinson, V. C., who are most to be feared by the Germans. They can fly out of range of the guns, but where they go the aeroplane can go higher. Getting the drop on them is a phrase which has acquired a new meaning.

Canada has a great responsibility in this matter. Only the most ignorant or the most deluded can deny that the destiny of Canada is now being settled in Europe. Did the entente allies lose in this fight for freedom Canada would become, not merely a dependency, but a colony of Germany, and the status of a German colony can be judged by the treatment accorded to the inhabitants of the invaded territories of Belgium and France. It is idle to say that Canadians would be differently treated. Some Canadians would be equally recalcitrant with the patriots of Belglum and France, and the result would be similar.

The paramount importance of air service to the empire and consequently to the Dominion of Canada makes it a constant wonder that the federal government has not done more for aeroplaning than it has. The meagre grants and the cold shoulder of departments that should be interested will remain as historic blots on the record of the war government of Canada. On various occasions representatives of the British naval and military forces have come over to Canada since the war began, with the object of stimulating this indispensable branch of the service. Even the generous grants made by the British Government, and the fact that our men are given a three months' course of training in England after their preliminary training here does not seem to have caused any ripple of interest in the apathetic Ottawa officials. Just now when the brother of the Duke of Roxburgh is over in the interests of the air service, would seem to be a propitious time for the government to get busy and do something, but so many similar occasions have passed without result that one hesitates to hope. Hon. Mr. Hazen as head of department of marine, should be aware of the exceeding importance of the aeroplane service to the navy, and even to the Canadian navy. If ly the "divided household," which the the department of militia be utterly paralyzed in this motor nerve, the department of marine has a chance to redeem the reputation of Canada, and defend its character for common sense and business acumen.

We are all aware that young Canadians as a class are capable of becoming the finest body of airmen in the world. Their keenness, dash, independence, initiative and native daring render them an unrivaled class upon which to draw for the support of the army of flying men, without which the empire cannot get along. It has been fairly well settled that the British navy will henceforth have its aeroplane auxiliaries with all vessels, and the Canadian navy must follow suit in this if it is to retain any semblance of efficiency. Halifax and of Importations Esquimalt cannot remain undefended from the latest means of attack.

So frequently has the royal navy hown a willingness to co-operate with Canada in this important matter that it has been a matter of constant wonder to those on the outside why the vernment has not already organized on a present factory and im-

The Quebec Bridge

The Engineering Record of New York says that the cause of the recent Quebec bridge disaster must always emain a mystery. It was not the fault of the cantilever arms, which bore the burden placed upon them easily and withstood the shock of its sudden removal. It was not the fault of the hoisting tackle and apparatus for is there anything to show that there was any defect in the span it self, which now lies at the bottom of the St. Lawrence River. The official explanation of the accident is that there was some hidden defect in the castings intermediate between the two pins of the lifting girder, but these castings, in fact the whole of this universal supporting shoe at each corner as well as the lifting girders, The Engineering Record points out, carried heavier loads at Sillery Cover where the span was erected, than during the hoisting operation. Moreover, these castings had been subjected to the most severe and com-

suggests that a Nemesis pursues the bridge and the National Transcontinental Railway, of which it is to be the final link. Perhaps some other poet will suggest that the imperious St. Lawrence refuses to be bridled, and that the river deities have been at work-possibly the ubiquitous German spy may be to blame, altho it is hard to see how he could have done anything to the castings after they had been tested and put under the heaviest possible strain at Sillery. In any event, the one thing now is to build a new span and get it into place as quickly as possible.

The Woman Vote

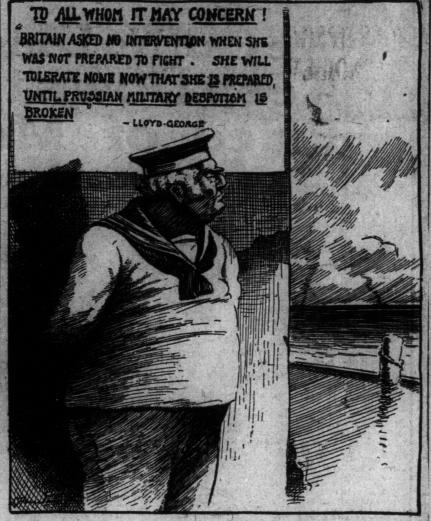

Women vote in twelve of the fortyeight states at the coming presidential election. These twelve states by no means contain one-fourth of the country's population, but they include great commonwealths like Illinois and California. No doubt if all the women in these twelve states go solid for Mr. Wilson he will be re-elected. But are they likely to do so?

In 1912 no result could be traced to equal suffrage where it had been established, except that in California the Socialist party made a poorer showing than usual. The women not unnaturally shrank from socialism. which, as interpreted by some of its as honorary secretary will be pleased exponents, directly attacks the sanctpublicans, Democrats and Progressives the women divided in about the same proportion as the men. Inverited predilections were equally strong with both sexes, and apparentopponents of equal suffrage are so fond of conjuring up, was not in evidence Why then should there be any fear of the newly enfranchised women voting almost in a body for the Democratic candidate? Republican managers have some such fear, and they are especially apprehensive about the result in the State of Illinois, It is not that they fear the suffragettes. Both of the big political parties alternately promised and sidestepped the ladies who descended upon their national conventions. Governor Hughes turned

In publishing the following letter we believe the literary flavor will appeal to the readers who might disagree with some of the conclusions. As result of a discussion such as may a somersault on the question of equal be found going on in many quarters at present, it is valuable as the summary of the views of one who has seen life and knows the world as only the worker sees and knows them:

Dear Friend,—Permit me to send you a few lines as the result of a late conversation. The remark of yours which impressed me most forcibly was, that this is an important, in fact, a critical time in Toronto's social life. That never occurred to me. The reference was to the closing of the bars—the "poor man's club," as some water-gruel people call them. You are conversation. the B. N. A. Act that would postpone the general election until the fall of 1917, and the opposition was plainly warned that they must consent to the extension of the parliamentary term or get ready for an early election.

The government is just as anxious to have the parliamentary term again extended as they were a year ago, but the Liberals are much more willing than they were to face an election. Hon. Charles Marcil said the other evening that no one could say what the Liberals might do three months hence, but the less cautious G. P. Graham has definitely announced that the Liberals will not agree to an extension. The Ottawa correspondent of The Toronto Globe, presumably in the confidence of Sir Wilfrid Laurier, wires his paper that any extension of the lift of parliament is "united."

"When we set our thoughts down in written form," says Professor Forrest M. Lunt, M.A.; instructor of English in Horace Mann School, Teachers' College, Columbia University, "we are without the aids of voice and manner to inake clear what we are trying to say. Our thoughts must be undersited between the various parts of our sentences are clear. If the relations between the parts of our sentences are not clear, the thoughts we are trying to express will not be understood." This is Professor Lunt's introduction in the New Universities Dictionary to his article on "Practical Syntax," which shows readers of this new dictionary how to build correct sentences.

"Good usage, common practice, society—whatever you will—has decided
what is good form, what is proper, in
this field of syntax, just, as it has in
morals, etiquet or fashions," continues
Professor Lunt; "therefore, the man
or woman who has occasion to set his
thoughts down in writing should observe the common practice, the universally understood rules which govern the relationship of words. If he
falls to do this, or if he attempts to
make his own rules, he will be considered without the pale of cultured eduered without the pale of cultured edu-eated people. From this it will be seen that the ability to construct sen-tences properly is hardly less impor-tant than the power to speak."

had to be undertaken in preparation for a further advance. Under the con-ditions of ordinary trench warfare, any one of these would have been an enter-prise of the first magnitude. Today they are shadowed by the greater op-

erations.

Advance Under Heavy Fire.

Thus on Sept. 22, an Ontario regiment attacked the maze of trenches stuated to the east of Coarcelette. This was a most difficult undertaking. The storning parties were met with heavy machine gun and rifle fire and an intense bombardment by the hostile artillery. Altho many of our men were cut down the remainder poured over the German trenches and secured the whole of the battalion's objective. More than 60 corpses of the enemy were counted in one part of the position alone and one officer and 27 other ranks were made prisoners. One machine gun was captured.

over 50 yards. Later that same night a determined counter-attack was made by a central Ontario battalion and the whole position recaptured. Early the next morning the Germans again attacked along the whole frontage of the battalion but were severally reattacked along the whole frontage of the battalion, but were severely re-pulsed, Lewis machine gun fire and by bombs. An hour later elements from an Ontario and a Winnipeg regi-ment attacked an important line to the north and northwest of Courcelette, called the Zollern Graben. The at-tack was carried forward with the greatest defermination in the face of greatest determination in the face of a heavy fire. After taking the posi-tion, our men were driven back under heavy fire, to their original

During all this time our trenches were gradually being advanced on all fronts and ferward posts were linked up by new lines. This was done by hard physical labor under heavy ar-

tillery fire.
By Tuesday, Sept. 26 all preparations had been completed. A long contin-ued bombardment of the German postions had reduced the infantry re-sistance to a minimum. About noon the great attack was launched on a frontage of nearly two miles. Battalions from Vancouver, Calgary, Montreal, Toronto, Saskatchewan and Winnipeg participated. One battalicn in the right sector met with particularly heavy machine gun fire and could not progress. On this limited front alone our attack failed to complete its course.

Two further attacks were made by us against this position. The first was entirely repulsed, the second was partially successful. Finally, on Sept. 27, a third attack secured the remaining portion of this hotly contested

Furious Battle For Trench. On the extreme left of the original objective the enemy was found to remain in possession of about 100 yards of trench. A Vancouver battalion attacked and drove them out with heavy losses. A few hours later, the Germans, having been strongly rein-forced, counter-attacked the whole line of the Hessian trench. They were repulsed at all points except in the 100-yard trench on the left. This portion, however, we again attacked and once more drove the enemy out.

VERDI'S OPERA IS SPLENDIDLY GIVEN

Masterpiece Has Spectacular Gorgeous Production Has Presentation by San Carlo Company.

ATTRACTIVE CAST

Maddalena Carreno and Mary Kaestner Have Many Triumphs.

Spectacular and melodious, with its martial scenes and music and its romantic and pathetic story. Aida is always a favorite with opera-goers, and the crowd that blocked the sidewalk in front of the Reyal Alexandra at 8.15 last night showed that the fame of the Verdi masterpiece and the reputation of the San Carlo Grand Opera Co. had combined to produce a successful engagebined to produce a successful engage-

San Carlo Grand Opera Co. had combined to produce a successful engagement.

The cast of the opera was possibly the most attractive the company could assemble. Maddalena Carreno was the Amneris, and her appearance was a series of triumphs. At the end of the first scene in Act. II. along with the other members of the cast she had three recalls, and several huge bouquets were sent up to her. She acted with considerable dramatic effect and passion. Mary Kaesiner had an equal success in the trying part of Alda, and the duet hetween her and Amneris in the scene referred to was finely rendered. The applause was tremendous. Giuseppe Battistini was the Ethiopian King. Alda's father. His splendidly resonant and musical baritone was in some respects the most atractive voice on the stage. Radames, sung by Manuel Salazar, was rendered with soldierly distinction and dramatic power by the tenor robusto. His solo in tae first act, "Celestial Aida," was rendered in a manner adequate to its musical merits. His voice has almost unlimited power and range, and in the softer passages he sang with sweetness and taste.

Fietro de Blasi, as Ramfis, the high priest, has a bass voice of rich tone and remarkable power, and his contribution to the score was of the highest artistic merit. Natale Cervi has a distinctive quality in his bass, which blends most effectively in the concerted passages. The sextet passage in the Temple of Vulcan was one of the most successful numbers of the evening. The orchestra was wholly delightful, the strings in the overture at once displaying delicacy and refinement. In the processional music of the second act, the brass, both on stage and in orchestra, left little to be desired, and this is an excellent test for the brass, The wood wind was also singularly artistic and discreet, and Chevaller Carlo Peroni svidently has his forces well in hand. The costuming was exceptionally costly and beautiful, and the stage settings imposing and luxurious.

Tonight "Rigoletto" will be given: Wednesday evening "Carmen." wi

In Ledro Valley in Trentino Playing at the Gayety and is Supported by Fine Cast.

Funnier than ever, Sam Howe, one of the old-timers of real humorous burlesque, opened a week's engagement in Toronto at the Gavety Theatre supported by a well selected cast. Howe is seen as a wealthy Jew with a wife in every port, and the first act, in which he gets in many mix-ups, proves very laughable.

The act closes with a pretty stage setting in China. Here a number of oriental songs are rendered by the leading members of the company, Eva Muli, Dee Loretta and Stefi Anderson assisted by the chorus.

BEAUTIFUL LOUISE HUFF STARRING AT THE REGENT

Charming Actress Appears in Appealing Story of Romance.

Louise Hu, supported by a cast exceptional interest, is the feature attraction on the Regent's program this week, appearing in an appealing story of a Quaker girl's romance en-titled "The Reward of Patience." EVERYWOMAN PAYS WELCOME RETURN

Fine Reception at Grand Opera House.

CAPABLE COMPANY

Paula Shay Appears in Leading Role and Shows Great Ability.

The powerful allegorical play, "Everywoman," by Walter Brown, is the attraction at the Grand Opera House this week. The cast is a very large one and well chosen to do justice to this spiendid production. The play itself is well known to Toronto theatregoers and is gorgeously spectacular and musical.

Led by youth and beauty, Everywoman, in obedience to the voice of flattery, seeks love in the artificial atmosphere of the Broadway theatres. Here the homage of wealth and nobility for a time satisfy, but unable to find love, with youth and beauty gone, she returns under the guidance of truth to her home, where she faids love on her hearth and happiness comes to her home.

Miss Paula Shay in the part of "Everywoman" shows great soility. During the course of the play she is called upon to portray all the emotions and every condition of fortune. This she is able to do with a skill that wins her audience. George Sydenham in the part of "Nobody" was able to lend the part the mysticism required to thrill his hearers and cast over the whole play the unusually large company made the best of their parts, giving a strong presentation of this unique play.

FINE BILL AT HIPPODROME FOR VAUDEVILLE LOVERS

Replete With Novelties That Provide Much Amusement.

Replete with novelties, the bill at Shea's Hippodrome this week is one that cannot fail to provide amusement for lovers of vaudeville. A remarkable war fea'ure picture entitled "The Deserfer," is shewn and also a comedy, the leading role being taken by the famous De Wolf Hopper.

"The Debutantes," assisted by Jack Russell, a capable comedian, provide the headline attraction and sing and dance extremely well. A timely skit, introduced by Lawrence and Edwards, deals with the American Civil War and the actors make the most of their parts. They received well earned applause, Taylor and Arnold sing several popular songs and as their last number present a Canadian patriotic air which brings down the house. Bernard and Myers are unusual. The Isami Japanese Troupe perform feats of mystery and daring, while Hazel Moran accomplishes marvelous tricks with a lariat.

ANITA STEWART AT THE STRAND IN FINE FILM

Her Remarkable Talent Seen to Advantage in "The Combat" -Chaplin Release a Scream.

Anita Stewart appears once more as the headline feature at the Strand this week in a strong emotional role, which again proves her cleverness. As Muriel Fleming in, "The Combat," she plays the role of a society girl, whose mother forces her into a wealthy, tho loveless marriage. Muriel has been secretly married to a young westerner, who is reported killed in a train wreck, but, for her mother's sake, she weds the wealthy politician. After two years, her first husband turns up and kills a blackmailer in defence of her lover. How Muriel wins his release and her freedom from the man she does not love is revealed in a series of gripping scenes.

FIRST GAME FRIDAY AT BRAVES' FIELD?

New York, Oct. 2.—It appears almost certain that the opening games of the world's series will be played at Braves' Field in Boston, beginning October 6 or 7. The suggestion has been made to the National Commission that the usual formality of tossing a coin for the privilege of staging the initial contests be dispensed with this season and the first two games awarded to Boston Americans. The suggestion is put forward by the officials of the latter club and will in all probability be adopted by the commission if acceptable to the National League Club owners, who are considering the proposition.

The Boston American League Club authorities have said that they have arranged to play their games at Braves' Field, and that park, with its seating capacity for 42,000 spectators, is ready for the opening games, while neither the Brooklyn nor Philadelphia National League Club is justified in view of the closeness of the National League pennant race in installing additional stands and boxes until it is settled which of the two clubs will meet the winner of the American League pennant.

If the first two games are played in Boston, the National League pennant winning club will have between four and five days in which to prepare additional seating accommodations for the fans, and, since both parks are comparatively small, the loss of a Saturday game will make little difference in the receipts, as the teams will play to capacity on any day of the week. If the plan is adopted, as appears likely, it may be that the opening game will be played on Friday, October 6, in order to permit the shift after the first two games to be made between Saturday night and Monday morning.

BUBONIC PLAGUE CARRIED BY RATS

disease have themselves died of that disease.

The case of John Daniel Major, a physician and naturalist born in Bresslau in 1634, is cited by the United States Public Health Service as one of the most interesting examples of this. He studied at Wittenberg, took courses at many of the schools in Germany, and finally went to Italy, where he received the degree of Doctor of Medicine at Padua in 1660. Returning to his own country, he resided for a short time in Silesia, and in 1661 married at Wittenberg, Margaret Dorothy, a daughter of the celebrated Sennert.

The following year his young wife was stricken with plague and died after an illness of eight days. Distracted by his less, Major wandered up and down Furope, studying the plague wherever he found it, in the hope that he might discover a cure for the disease which had bereaved him. Spain, Germany, France and Russia were visited by him. He settled in 1665 in Kiel, where he was made Professor of Botany and the Director of the Botanical Gardens. He made frequent voyages, however, always in quest of a remedy for the plague. Finally in 1693, he was called to Stockholm to treat the queen of Charls XI., then ill with the plague. But before be could render her any service he contracted the disease and died.

died. Bubonic Plague Like Black Death. Bubonic Plague Like Black Death.

"The bubonic plague of today," says a statement issued by the United States Health Service, "is identical with the black death of the middle ages. Primarily a distense of rodents, caused by a short dumbell-shaped microscopic vegetable, the pest bacillus, it occurs in man in three forms; the pneumonic which has a death rate of almost 100 per cent.; the septicaemic, which is nearly as fatal, and the bubonic, in which even with the most modern methods of treatment, the mortality is about 50 per cent. It is a disease of commerce, spreading around the globe in the body of the ship-borne rat. It is estimated that every case of human plague costs the municipality in which it occurs at least \$7500. This does not take into account the enormous loss due to disastrous quarantines and the commercial paralysis which the fear of

Where Safety Lies.

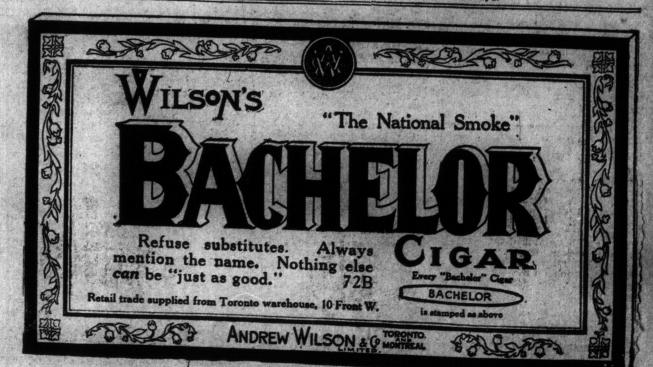

"Since plague is a disease rodents," says this report, "and sind it is carried from sick rodents to we men by rodent fleas, safety from the disease lies in the exclusion of rodent not only exclusion from the habitation of man but also from the ports an cities of the world. Those who dwe in rat-proof surroundings take in plague. Not only should man dwe in rat-proof surroundings, but he should also live in rat-free surroundings. The day is past when the roder served a useful purpose as the unpaicity scavenger. Rats will not comwhere there is no food for them. Municipal cleanliness may be regarded as partial insurance against plague. The prayer that no plague comes nigh out welling is best answered, however, be rat-proofing the habitations of man."

MAKING OF TAPIOCA A LONG

"Hardly is there any article of whose origin so little is known as taplocs." writes J. K. Jank in a book just published on "Spices."

It is manufactured from taploca gour on the Islands of Singapore, Penang and Java. This flour is made from the taploca potato, the root of the cassava or manioc plant.

These potatoes often weigh over twenty pounds. They are washed, skinned, cut into small pieces and put into a grater, where small circular saws reduce them to pulp. The fine flour is separated by 2 revolving drum, and after being washed six times is dried on heated trays, it is then made into dough and passed thru sieves and baked.

MINE CONTROL PROTECTS

In order that mine fields may not jeopardize neutral shipping and bring disaster to war vessels of the nation planting them, a Massachusetts inventor has developed a novel means of control. His plan consists in part in using an operating and observation buoy which is manned and kept in absolute control of every mine within absolute control of every mine within a certain area. In the upper part of olds and up. 14 miles: absolute control of every mine within a certain area. In the upper part of the device is the compartment in which the operator takes his station. The coming tower is fitted with glass ports and a periscope so that the horizon in all directions can be scanned. Heavy insulated wires extend between each of the contact mines and the floating routrol station. Upon sighting an enemy vessel the observer submerges until only the periscope remains above the water. As the ship draws nearer, the operator lowers the buoy to a depth of 50 or 60 feet, so that it is entirely safe. Should the approaching boat enter the field and strike one of the floating mines, a red lamp on a switchboard before the operator would ignite. By pressing a button the man in control of the station is then able to explode the specific mine indicated to him.

GERMAN TRENCH.

A remarkable series of photographs showing at close range the actual capture of a German trench and its consolidation by East Indian troops fighting with the allies "somewhere in France," is presented in the October Popular Mechanics Magazine. The successive steps in the manoeuver are pictured. The first view shows the forms of those who fell in making the hand-grenade attack which routed the enemy. In the next view, the main body of the first-line men has reached the position and is charging past it, following the Germans. In the third scene the second line is advancing to the trench from the underbrush and the work of changing the parapet to face the opposite direction is being commenced in the midst of rific and artillery fire. The final photograph shows the consolidation well underway, the first-line troops still remaining ahead and holding the enemy while their comrades shift the sandbags.

TORONTO DRIVING CLUB Inc

Any one who when a child was sent to the store for "pigeons' milk" may console himself with the know-ledge that the practical joke was on the practical person. For "pigeons milk" is not a myth but a common term for liquid secreted by the domesticated birds. It is made in the narental crop from half-digested grain and fed to the young, which come in pairs two or three times a year.

Councillor Wright Urges Appointment of Postmar

The regular meeting of the town touncil was held Monday evening in the town hall, Mayor Charlton presiding. The minutes of the previous meeting being read, a great deal of discussion ensued on the point of financing the construction of the water main to the Russell Motor plant at Weston. The matter was referred to the power and light committee.

Mr. Wright urged the appointment of a posiman for the town, stating that there were 400 mail boxes in the post office, for the upkeep of which the people were paying from \$200 to \$400. This money could be saved, he believed. He also advocated the installation of another mail box at each end of the town. It was decided to leave the matter in the hands of a committee, composed of Councillors Macklem and Harris Hughell. The committee will composed of Councillors Mackiem and Barris Hughell. The committee will submit its request in the form of a potition to Ottawa. An application from Mr. Longstaff for the use of waten from the lower hydrant was referred to Councillor Mackiem.

Mrs. George Hughes, 91 Auburn avenue, Earlscourt, has received a, letter from her brother. Trooper Harry Stott, of the Duke of Lahcaster's Own Yeomanry, Egypt, of which the following are interesting extracts: "You will be sorry to hear that I am in hospital here at Kantara with dysentery. I have already been in a fortnight, but expect to be fit for duty again in a week or so. I was taken ill at Katla about Aug. 10, and was brought on the back of a camel to the railhead, thence to the base by rail. The first week I was absolutely prostrate, the doctor told me I had narrowly escaped enteric fever. I got the complaint thru drinking well water. The sufferings of the East Lancashire division in early August are best left untold. Men fell sick in hundreds. I never fired a shot at a Turk personally, but I was well within range of their artillery fire and bombs. While we were at Katia, after the battle of Romain, a Turkish aeroplane visited us twice a day for a week. But he never did any damage, tho he wasted scores of bombs. The nearest bomb droopped to me was fifty yards. The Australian Light Horse, New Zealand Rifles, Worcesters, Gloucesters and Warwicks Yeomanry have done wonderful work in this campaign. The D.L.O. has not taken a prominent part in the fighting, but on one occasion only a stroke of luck stopped them from being annihilated, as we were advancing on a wood, not knowing that 5000 Turks were in hiding there. However, we were warned just in time. We got within 25 miles of El Arish, but the order came then to retreat. The shortage of water in this campaign was lamentable. What the infantry suffered must be indescribable. Of course, the Turks got a severe trouncing, judging by the number left dead upon the field. I could have got a few trophies from the battefield, but a soldier has enough to carry. I am not at all keen to go on the desert; in fact, I am about fed up with it. I am quite comfortable here. Hope you are all well." Mrs. George Hughes, 91 Auburn av-

William Ward, an old G. T. R. gate-keeper at Royce avenue crossing, was found guilty of criminal negligence, and Judge Winchester imposed a fine of \$50 or one month in jail. The evidence showed that the man, who is nearly seventy years of age, was unable to lower the gates at the crossing in time to prevent David Muir, a milk-man, and the wagon he was driving from being struck by a train. Muir sustained injuries to his ribs, and the wagon was smashed.

The first market of the new month was undoubtedly a strong one, so far as figures are concerned. Chicago reported nervous, with the trade mostly done by professionals, and the same might apply to Winnipeg also. While there is a lot of bear sentiment and a decline was looked for on our own bad weather, the Liverpool report that futures were being firmly held and offers limited combined to swing the market round to the bull side once more. Some export houses were reported to be reselling at the advance. Flax was excited thruout the day.

Farmers Not Raising Cattle and So Prices of Meat and Milk

DEMAND FOR WAR NEEDS

Shortage of Men to Work Mines Also Given as Cause for

Coal Prices.

Filled with the idea that the high cost of living is the result of combines of various kinds which are controlled by a certain few who happen to have the financial string of the country obedient to their pull, one starts to investigate for the purpose of getting facts an digures, and, if possible, get out counter-strings by which those in the combine may be pulled up shorts and prices allowed to sink back to normal.

Starting out on the mission with the "staff of life," it is ascertained that, without doubt, there is no reasonable ground for housekeepers paying the present price; that by making their, own bread the women of the country have it in their power to save about 50 per cent. of their present outlay on this one article. Even this however, does not prove that if labor and the time and expense of delivery were taken into account the price asked would be altogether beyond reason.

Regarding the meat quest. Here it is found that if meat its high in price the cause is something over which found that if meat is high in price the cause is something over which there is no immediate control. Meat is high because cattle are scarce. Those on the land have not been rais-

ing cattle; as a consequence the supply is not equal to the demand, and this condition existed for some years back. With increased demand and exportation due to the war the amount Marria

exportation due to the war the amount for home consumption grows always less with a corresponding increase in cost. It seems almost hopeless to look for relief here until a great impetus be given to the raising of cattle and results even then would not be apparent for a year or wo at last.

Cannot Control Conditions.

Enquiry, too, has elicited the statement that city distributors of milk have actually been losing during the past few months. Here again scarcity of cattle, the ingrease of the cheese industry for the purpose of war raytions, scarcity of labor and a lowering in efficiency of that available, are all in efficiency of that available, are all presented as reasons why the prica asked for milk is a logical and reasonable result of conditions over which no one in particular has control, on the power to alter in the immediate Night classes were opened last night

To J. M. Skelton for the erection of a dwelling at the corner of Alvin avenue and Heath street, to cost \$5000.

To S. B. Green. 111 Evelyn avenue, for the erection of a brick residence at 151 Evelyn avenue. to cost \$3000.

Month's Customs Receipts

Slightly Under Record

\$2,653,000, while those of August to-taled \$2,900,000.

To some slight extent the decrease is due to a slight fulling off in the shipment of war material, owing to a delay in the arrival of certain material, which held back the work. It is expected that this month will make up for the slight deficiency in September from August.

At the end of August the total receipts for the year established a record of thirty millions and for the year ending September, this record has been increased by over two millions.

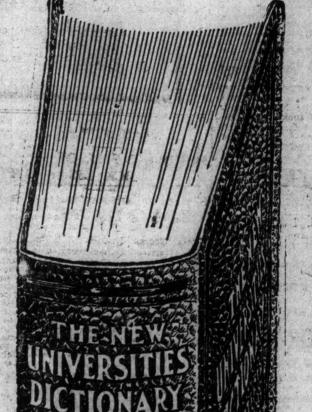

SEVEN YEARS FOR BRADY.

August, according to the figures supplied by Collector of Customs J. H. Bertram. September receipts were by Judge Winchester.

Dealings Again Attain Impressive Total of Over Million Shares.

DULNESS AT MIDDAY

Optimism Keeps Up in Speculative Circles of New York.

New York, Oct. 2.—The stock market today entered upon the fourth quarter of the year with every indication of a continuance of the remarkable activity of the preceding month, altho quotations suggested an accession of bearish aggressiveness, Dealings again attained the impressive total of 1,050,000 shares, but a very large proportion of the turnover occurred in the first and final hours, the intermediate stage being marked by relative dulness and uncertainty.

There was nothing in the general news over the week-end to cause any diminution of the optimism so long prevalent in speculative circles. On the contrary, numerous additional statements of carnings submitted by rallroads and industrial companies were of the most encouraging character, with scarcely an exception, shewing large gains for the fiscal year, or in excess of corresponding periods of 1915.

Shares of the coal roads, especially Norfolk & Western and Lehigh Valley, gave the market its stability at the opening, Norfolk & Western and Lehigh Valley, gave the market its stability at the opening, Norfolk & Western and Lehigh Valley, gave the market its stability at the opening to the new maximum of 140. Illinois Central increased last Saturday's gain and minor lines were represented by the Wabash issues and Western Maryland at material advances.

Smelters was the strongest issue during the day, making a straight advance from 38% to 42 before profits were exacted and the quotation fell back to 40. Maple Leaf was steadily firm and lost only a fraction after a new high of 110. General Electric and Steel of Canada each touched higher figures, but in the other issues dealt in changes were unimportant. Brazilian was unsteady again and Toronto Rails was weak, with sales below 88. The temper of the market is still bullish, and with necessary reactions higher prices are promised.

Foundation Being Laid

For Steel Consolidation

It is still believed that what. New York buying has been going in the Canadian steel stocks is part of an ambitious plan to bring about a consolidation of interests. It has not been a plan of sudden development and will hardly be hurried along. Heron & Co. had the following at Heron & Co. had the the the close:

Montreal, Oct. 2. — The market was again extremely active to-day. Dominion Steel cpened a half point up, but a good deal of stock came out, and in the afternoon there was a reaction from the opening below. Smelters took the lead and price. Smelters took the lead shipping. Smelters took the lead shipping advanced sharply to 42 on what would advanced sharply to 42 on what would appear to be a good buying. This company is reported to have just closed a remarkably good year and, in addition to this, American interests are reported to be investigating the affairs of the company with a view to buying a block of stock. There was some buying also of Steel Co. of Canada, and Ontario Steel was again market was watched closely by local traders and the improvement there at the close was most encouraging.

STEADY ADVANCES OCCUR IN WHEAT

on Bad Crop Advices

Market Receives No Setback From Opening to Closing.

Chicago, Oct. 2.—Emphatically bullish crop advices from Argentina today made wheat values go higher and higher. The close was strong at 21-8c net advance. Corn gained 5-8c to 11-8c and oats 3-8 to 1-2c. In productions the outcome ranged from 45c decline to a rise of 5c.

Drought ravages in Argentina began to lift the wheat market right from the outset, and there was no radical setwack at any time during the session. Especial attention appeared to be given to despatches from Rosario, the centre of the dry district, telling of serious damage from the long continued lack of rain and saying that all crops were suffering. Diminishing receipts at Minneapolis and Duluth counted also against the bears and so, too, did the advices of a scarcity of offerings from Winnipeg. Increased world shipments falled to act as any offset. On the contrary, the bulls seemed much encouraged by reports that foreigners were active purchasers both of cash wheat and of deliveries. Notwithstanding that the U. S. visible supply total showed an increase of 746,000, the effect on the market was of little advantage to the bears. The reason seemed to be that the enlargement was less than one-sixth as great as at the corresponding time last year.

Corn derived most of its strength from wheat. Fine weather tended at first to ease the market a triffe, but subsequently was altogether ignored. Oats merely reflected the action of other cereals.

Big receipts of hogs pulled down provisions. January transactions formed the bulk of the business. J. P. Bickell & Co., Standard Bank Building, Toronto, report fluctuations in New York stocks, as follows:
