GLENCOE FAIR
Wednesday and Thursday, Sept. 26-27
MELBOURNE FAIR
Thursday.....October 11

Volume 52.—No. 34

GLENCOE, ONTARIO, CANADA, THURSDAY, AUGUST 23, 1923

Whole No. 2692

ATTENTION
Ice cream, cake and lemonade will be sold Saturday evenings from now on by Junior I. O. D. E. in Memorial Hall. All kinds of good things. Your patronage is solicited.

FOR SALE
Nine pigs, 3 months old; also sow due to farrow soon.—John H. Robinson, Route 1, Newbury.

FOR SALE
Choice seed wheat, O. A. C. 104, grown from certified seed.—J. T. Lethbridge.

DRAINAGE TENDERS
Tenders for the repair of the Kelly drain will be received by the undersigned up to Saturday, August 25th, at 12 o'clock noon. Plans and specifications may be seen at Joe Blain's residence, lot 14, con. 12, Metcalfe township, or the clerk's office, lot 4, con. 4, Metcalfe township.—Harry Thompson, Clerk, Route 2, Kerwood.

Farm Loans

Lower Interest

I have an unlimited quantity of money to loan on first mortgages on approved farm lands at lower rates of interest. Terms will be to suit borrowers and all applications will have immediate attention.

V. T. FOLEY, Barrister, etc., 83 King Street West, Chatham, Ontario; telephone 159.

Cream & Eggs WANTED

Our wagon will be on the road all season. We pay cash for cream and eggs.

G. W. SUTTON

Agent for Ontario Creamery, Limited
NORTH MAIN ST., GLENCOE

DISTRICT AND GENERAL

Bothwell is having races for Labor Day.

Wm. Reycraft, formerly of Highgate, died at Petoskey, Mich., last week.

A Yonkers, N.Y., man is held in \$500 bail charged with spanking his wife with a shoe.

So far this year deaths from automobile accidents in Chicago and Cook County number 400.

Black rust, as well as low prices, are driving wheat growers of Western Nebraska to bankruptcy.

Despite low wheat prices, South Dakota farmers will show a prosperous year due to corn and cattle.

A New York woman was granted a divorce on the grounds that her husband neglected her to play solitaire.

M. S. Smith, of the Dutton Advance, had part of his first finger on the left hand crushed off in a printing press.

Malcolm McNeil, farmer and rural mail carrier, residing on lot 7, con. 3, Caradoc, died suddenly on Wednesday.

George Smith brought four carloads of horses to Cottam from the West and disposed of same at prices ranging around \$100.

Owners of cafes in Chatham have been ordered to eliminate flies from their establishments or they will be liable to prosecution.

Andrew Ferguson, of Bothwell, is in Chatham hospital in a critical condition, the result of being kicked in the stomach by a horse.

The Prince of Wales will revisit his Alberta ranch in September. At least one fine type of young man is going back to the farm.

The United Farmers of West Middlesex will have a surplus of between \$600 and \$700 from their picnic held at Strathroy on Dominion Day.

Mrs. Betsy McCallum, aged 61, died at her residence, north of Dutton, after an illness of two weeks. She was a life-long resident of Dunwich.

One hundred and twenty gallons of whiskey, valued at \$3,000 or more, were seized at St. Thomas a few days ago. The whiskey was packed in a large automobile in tin cans.

Neil G. Blue, of Dunwich, dropped dead when going to milk the cows on Thursday. He was in his usual health and attended the Old Boys' picnic at New Glasgow the day before.

Canned goods are showing a tendency to soar, according to a statement just issued. The reason given is that the pack this year will be a light one on account of the unfavorable season.

The weight of a large quantity of lumber and iron stored in the attic of a blacksmith's shop at Kintore caused the ceiling to give way. Two automobiles had left the shop just before the crash came.

It is stated that Aylmer is shortly to receive a decided decrease in hydro-electric rates. For domestic use the rates will probably be reduced from 4 cents to 3 cents, and commercial rates from 10 cents to 6 cents per kilowatt hour.

Fire completely destroyed the barn, sheds and outbuildings on one of R. J. Moore's farms, two miles southeast of Duart. The fire originated when Mr. Moore fell through a hole in the loft of the large shed, smashing the lantern he was carrying in his fall.

Tomatoes must be plentiful in the Leamington district, as testified by the following advertisement in the Post and News: "Tomatoes for all, only 15c per basket to parties picking same and furnishing baskets. If you haven't the 15c come quick anyway."

Milton Shaw, grain dealer, of Merlin, has been appointed governor of Kent county jail in Chatham to succeed the late John Davidson. His wife has been appointed jail matron.

Mr. Shaw was Conservative candidate in the provincial election of 1919.

Benjamin Lavine, a Russian, of St. Thomas, was fined \$500 for operating a large still at the farm of Wm. Griffith in Dorchester township and having liquor for sale. The big still, 500 gallons of whiskey, 200 pounds of sugar, yeast and other supplies were confiscated.

Railway officials estimated that more harvesters passed through Toronto on the first two harvesters' excursions this year than were sent from Ontario on all the excursions last year. Among the passengers were many Americans from the vicinity of Detroit.

A reunion and picnic of the Gillies clan took place on August 7th at the home of Peter C. Gillies, Dunwich. Friends and descendants gathered in memory of Duncan and Mary Gillies, who emigrated with their family from Argyllshire, Scotland, in 1852, landing at Port Stanley. Ninety of their descendants were present at the reunion.

ENJOYED WESTERN TRIP

Mr. and Mrs. J. N. Currie arrived home on Wednesday of last week from a seven weeks' tour of Middle West and Pacific Coast sections. They were fortunate in being at Vancouver during the reception there of the late President Harding. Their itinerary included a five-day motor trip on Vancouver Island and in Washington State, also the famous Malahat mountain drive. Asked as to crop conditions in the West, Mr. Currie stated that Manitoba will have but little over 50 per cent. of a crop, owing to black rust; Alberta will have a bumper crop, as there has been plenty of moisture, while the estimate for Saskatchewan is about two-thirds of a crop. He says there is an immense crop of fruit in the Okanagan Valley in British Columbia, but, similar to conditions in the Niagara District in Ontario, much of this fruit will be left on the trees, as owing to the high express rates, the profits received after the early market demands are supplied will not pay for the picking. Especially was this the case with cherries this year.

MCLAUGHLIN CLAN REUNION

Alvinston, August 20.—One of the most widely attended outings of the season here was the reunion of the McLaughlin clan, held on the farm of Alex. McLaughlin. Nearly 50 present were descendants of the late Hugh McLaughlin, who came from Kilmartin manse, Argyllshire, Scotland, and after which the settlement a short distance from the picnic grounds is named.

Members to the number of 250 from Detroit, Bad Axe, Calgary, London and local points began to gather at the grounds shortly after 10 o'clock and there was a continuous round of entertainment from then well on into the afternoon.

A baseball game in which the younger members of the clan took part occupied most of the afternoon, after which a lengthy program of sports was run off, which afforded much amusement for both young and old.

During the course of the afternoon a musical program was carried out when Henderson's Pipe Band of London and Sam and Dorothy Munroe, also of London, loyally entertained the audience and were later assisted by home talent.

Later in the afternoon Alex. Leitch read the history of the McLaughlin clan from the landing of the late Hugh McLaughlin until the day of the gathering, outlining the careers of various members of the clan. Nevin McLaughlin, of Calgary, also gave a well-worded address.

An organization meeting was then held and it was decided to select officers to make arrangements for a similar event next year, this being but the second gathering, provision of this kind not having been made before.

Lunch was provided in the early evening and ample justice was done to the repast.

NEWBURY BOY SCOUTS

Newbury, August 22.—The first Newbury troop of Boy Scouts will go into camp at Port Glasgow on Saturday, August 25, until Wednesday night, August 29. The camp will be under the control of the following officers:—Camp commandant, J. Parke, scoutmaster; camp cook, Mrs. J. Parke; games instructor and provisioning officer, Adair Haysler; orderly officer and assistant swimming instructor, P. E. Proctor; camp secretary-treasurer and scoutcraft instructor, Harry Wallace; scoutcraft, boxing, swimming, drill, signalling and first aid, the scoutmaster.

As every precaution will be taken to secure the safety and well-being of each individual boy, the scoutmaster hopes that every scout will make an effort to attend camp; also the scoutmaster would greatly appreciate an offer of assistance in the transportation of equipment.

METCALFE COUNCIL

Meeting of Metcalfe council held August 6th. Members all present. Minutes read, approved and signed.

On motion of Blain and Moyle the usual orders were paid.

Moved by Blain and Bennett that the engineer's report of Kelly drain be adopted, and on motion of Moyle and Bennett, Joseph Blain was appointed superintendent of same, and that tenders for construction be asked for.

The council adjourned to Saturday, September 1st, at 1 p.m.
HARRY THOMPSON, Clerk.

Over 4,000 musicians will take part in the Music Day program at the Canadian National Exhibition, including 25 bands, 2,500 choristers, and many troubadours, opera singers, instrumentalists and other artists.

MIDDLE SCHOOL EXAMINATIONS

Following is the list of successful candidates of Middle School examinations held at Glencoe High School. Names of subjects placed after candidates' names in abbreviated form:—Al, Algebra; C, Composition; L, Literature; G, Geometry; P, Physics; L.A., Latin Authors; L.C., Latin Composition; F.A., French Authors; F.C., French Composition; A.H., Ancient History; B, British History.

Candidates desirous of further information, write to the principal at Glencoe. Those desirous of obtaining applications to try supps. may receive the same by applying at the Transcript office.

POLICE COURT

A number of violators of the Motor Vehicles Act were summoned to appear before Police Magistrate Morrison during the past week. Jas. Craig paid \$2 and costs, G. Duane \$10 and costs, O. D. Cooley \$7.50, G. Lidden \$5, T. J. Redman \$10, J. Boemer \$3.50, Angus McLean \$5, Frank Shaw \$10 and C. Taylor \$5. A case against John Richardson, of Ridgetown, was dismissed, and the case against J. Guest, of Wardsville, was enlarged till next Tuesday.

GUTHRIE CHURCH JUBILEE

The jubilee services of Guthrie Presbyterian church, Melbourne, will be held on Sunday, Sept. 2nd and 9th. Special services will be conducted by Rev. Robert Stewart, of Dutton, and the Presbytery representative, at 11 a.m. and 7.30 p.m. Communion service will be observed on Sunday, Sept. 2nd, at 3 p.m. A tea meeting under the auspices of the Ladies' Aid will be held on Monday evening, Sept. 3rd. Supper will be served from 6 to 8 p.m., followed by a concert. Program will be given by the following: Rev. W. W. Shoup, Chas. Auld, South Caradoc Quartette, Mrs. and Margaret Stevenson, Miss Frances Norsworthy of London Mr. Watson of Mt. Carmel, and Miss Florence Bees, ecocutionist. Admission, 35c and 25c.

GASTLE-PERRY WEDDING

Appin, August 21.—One of the smartest and most picturesque nuptial events in many a day was responsible for a large assembly of fashionable guests on Wednesday afternoon at "Dapplemore Farm," Appin, when Norma Beatrice, daughter of Mr. and Mrs. A. E. Perry, was united in the bonds of matrimony to Robert Gastle, of Hamilton. Elder Slawson, of Ridgetown, officiated.

Promptly at 3 o'clock to the triumphant strains of the Lohengrin Bridal Chorus played by Miss Elizabeth Gastle, sister of the groom, and a picture to delight the eye in tomato georgette trimmed with silver and colonial bouquet of sweet peas, the bride, who was given in marriage by her father, entered the drawing-room, and was a vision in her nuptial robe of white crepe de chene, the neck cut in bateau mode, the sleeves girlishly short, and over it fell gracefully folds of the wedding veil caught with a bandeau of pearls. She carried sweetheart roses showered with sweet peas. There were no attendants.

The young couple received the congratulations of relatives and friends standing under an arch handsomely decorated and centred with a large white bell.

A dainty wedding breakfast was served after the ceremony to the guests, numbering forty, on the spacious lawn, the assistants being girl friends of the bride.

Later in the evening Mr. and Mrs. Gastle left on a honeymoon trip, after which they will reside on the groom's farm near Hamilton. For travelling the bride donned a chic French frock of brown with touches of green, brown wrap and hat to match.

BIG U. F. O. PICNIC

The annual U. F. O. picnic held in Weekes' grove Wednesday of last week was a decided success. Fully 1,500 people were present and heartily enjoyed a good program of speeches, song, comedy and sport.

J. D. Drummond, M.P., ably acted as chairman. The speaker of the day was R. H. Halbert, M.P., of Uxbridge, whip of the Progressive party at Ottawa. Mr. Halbert spoke for an hour in his usual convincing manner, notwithstanding the fact that he had recently gone through a very critical operation. He appealed to farmers to stand true to their organization, as it was only by organized effort that the great industry of agriculture could ever hope to hold its own, politically or otherwise.

Short addresses were given by J. G. Lethbridge, M.L.A., and A. L. Hodgins, M.P., East Middlesex. Both spoke in a very optimistic tone of the U. F. O. movement. They looked upon the defeat of the farm labor government as the result of the combined efforts of both old parties, and the usual fate of all governments during the time of readjustment after a period of abnormal conditions such as we had passed through during the war.

The Lyric Ladies' Quartette, of London, was well received. Master Donald McRae as usual delighted the audience with his Scotch airs. The Strathroy band was present and furnished splendid music during the afternoon.

A keen interest was aroused in the program of sports.

THE APPLE CROP

The report of the fruit branch of the Department of Agriculture for August, 1923, which has just been issued, states that reports from Ontario indicate that the total apple crop in the province will be slightly less than that of last year.

In Western Ontario a survey shows that the apple crop exceeds that of last year by about fifty per cent. and is practically free from scab.

The crop in Eastern Ontario, which previously showed prospects of exceeding that of last year, has now been considerably reduced, the cause being ascribed to a very considerable amount of apple scab, which has developed in that part of the province.

Throughout the province as a whole indications are that Spy, Baldwins, Wagner and Russet apples will be a good crop, but the major portion of the earlier varieties will be but a medium crop.

THE WESTERN FAIR

London, September 8th to 15th, 1923

Thousands of copies of the official program of the Western Fair are being distributed this month. This booklet is of particular interest in that it announces one of the strongest programs twice daily before the Grand Stand that has ever been presented to a Western Fair audience. The following artists will provide the program:

The Reynolds and Donegan Co.—A delightful and spectacular ballet on wheels.

The Six Stella Sisters—The wonderful acrobatic company.

Hai Jung Chinese Troupe—Something entirely different. A startling show in itself.

The Tom Davies Sensation Co.—The most thrilling act ever presented to a Western Fair audience.

The Bert Hughes Co.—Basket ball on bicycles. A wonderful comedy act with plenty of thrills.

Nelson and Nelson—Comedy Acrobats on stilts. A great act for the children and still greater for the grown up people.

The Clown Act—Four of them going all at once. A whole program of themselves.

There will be at least two bands on the grounds each day, giving plenty of music all the time. The International Fireworks Co., of Jersey City, will put on something new in fireworks each night of the week. This is a new fireworks firm whose work has never been seen in London before.

A special pageant will be given on Friday and Saturday night, several hundred local people taking part. The subject will be "The early days of London and Western Ontario."

The London Hunt Club will put on a special program on Saturday afternoon, September 15. All information at the General Offices, London, Ont.

Wheat growers of South Dakota who purchased more land when wheat was bringing over \$2 a bushel are hardest hit in present collapse of prices.

A Ford that will go 90 miles an hour has been entered in the automobile races at the Canadian National Exhibition, August 26 and 27.

Soils and Crops

Address communications to Agronomist, 73 Adelaide St. West, Toronto

M. T.—Will you please tell me what time of the year is best to plant rhubarb, and how to replant it? I have several bunches but they are not doing well.

Answer—Rhubarb may be planted in either the fall or spring. September is a good month to replant because the roots are dormant by that time. Rhubarb is a ravenous feeder. It is necessary, therefore, for best results to fertilize the soil well before planting. The plants should be set not closer than four feet apart, and a depth of two and a half feet.

T. A. B.—I had an unsightly appearance of locusts, willows and brush this spring in front of my house along the roadside, and spent some time cutting same down. Now the stumps are shooting out branches, and by another year it will look just as unsightly. Isn't there something I could apply to the stumps to prevent any new growth?

Answer—The best plan, and perhaps the only plan so far as willows are concerned, of getting rid of the plants, is to dig them out root and branch. By digging around the roots a team of horses with a chain should be able to remove each plant successfully. Indeed it would seem that a neat appearance of the front of one's house could not be secured except by complete removal of the roots and leveling and seeding in the usual manner for making lawns.

SAVING TIMOTHY FOR SEED.

Tests made at Experimental Stations go to show that it is quite profitable for one to grow his own timothy seed. This may be done by seeding,

timothy at the rate of 10 pounds per acre when seeding down. Or, if 8 pounds of timothy, 8 pounds of red clover and 2 pounds of alsike are seeded, a good even stand of clear timothy will be secured the second year after seeding. It is seldom that there is not a fairly clean stand of timothy somewhere on a farm; such area should be reserved for seed purposes. It does not mean a great loss of hay as the straw after threshing is of fair quality and can be fed unless badly weathered. It was found that a seeding of timothy alone in 1920 gave in 1921 280 pounds of timothy seed, and 2,220 pounds of straw per acre after threshing. The harvesting was done August 25th and the seed ripened rapidly. This same area produced 157 pounds of seed and 2,475 pounds of hay per acre in 1922. A considerable amount of other grasses, particularly red top, was noticeable in the 1922 cutting. An adjoining area seeded in 1920 with the clover and timothy mixture mentioned above yielded 186 pounds of timothy seed and 3,052 pounds of timothy straw per acre in 1922. This seed was of particularly good quality and much better than the seed from the area in timothy seed for two years.

The practice here is to leave the timothy that is to be cut for seed standing until it is nicely filled and to cut with a binder. The sheaves are stooked neatly and allowed to stand for two or three weeks, or until the heads shell readily. It is then taken in and threshed in a threshing mill of with a flail. It sometimes happens that birds cause a great loss from shelling in which case the sheaves should be taken inside to a loft and allowed to stand until they can be threshed.

Storing Spuds, and Other Jobs

Good stable manure is becoming such a scarce and expensive commodity that home gardeners who are situated that they cannot procure all they require for their gardens must try to replace it with other humus-forming material.

For this purpose there is nothing better than the leaves which in fall gather in drifts along our roads and under the trees; when properly stored they become a rich humus which needs but little stimulating dressing of commercial fertilizer to make it a manure substitute that is even superior to some animal manures.

The question of storage requires some consideration. Where the gardener's grounds are commodious there should be no difficulty in selecting some out-of-the-way place for the compost heap, but in the small yard it may take some thought and a little trouble to concoct a suitable receptacle. Tramped in boxes or barrels the leaves can be left in some out-of-the-way corner, or a hole can be dug for them; tramped firmly and some soil spread on top, they will in the course of a season become a solid block of rich black humus. A large bin or crate can be readily made by fixing four strong posts in the ground to form a square and then nailing boards or wire netting round them.

Another method of storage is to build a wall of sod, either in the form of a square or oblong. In this the leaves are tramped firmly in layers of about one foot. On this lay three or four inches of fresh manure, then more leaves as before, alternating the layer of leaves with manure to any desired depth, the whole being covered with a roof of three-inch sods. Late in the following summer the entire mass is turned over and mixed thoroughly, and it makes a pile of unexcelled manurial matter.

POULTRY-HOUSE FERTILIZER.

But where no place is available for composting the leaves they may be dug into the soil as they are gathered. The best plan is to open a trench along one end of the patch, into which a thick layer of the leaves is spread, covering them with the next spading, continuing until the entire area is finished.

In whatever way the leaves are composted or piled, a little air-slaked lime should be used as the work proceeds, scattering just sufficient between each twelve-inch layer to whiten the surface.

Where chickens are kept their droppings make a splendid fertilizer if properly cared for. As poultry manure is very strong in ammonia, its loss must be prevented. That can only be done by keeping it dry. It is usual to find air-slaked lime being freely dusted on the boards, but this is altogether wrong. The lime certainly keeps the house sweet, but its action on the droppings sets free the valuable ammonia, it is driven off as gas and thus is lost. Gypsum or land plaster should be used instead, dusting it over the perches and boards daily, using more when the manure is scraped off. Gypsum will do all that

SIGHTS AT EXHIBITION

See little property situated with Watson Rights, in Sperry Building, or send for Catalogue Watson One Eight Co., 241 Victoria St., Toronto

A Weed Survey.

Weeds and their suppression have for many years engaged the attention of not only the Dominion Department of Agriculture but also the various provincial departments. A movement in the direction of a more scientific vision of Botany of the Dominion Experimental Farms, to gather fuller information as to the extent and distribution of farm weeds, and such other data as is likely to be useful. With this end in view, farmers all over the country are invited to send to the Division (postage free), on a form that has gone out with "Seasonable Hints" for July, to that publication's three hundred thousand recipients, the names of the weeds that affect their soil, and the extent to which they are troublesome; the character of the soil on which they flourish; whether the land is well drained, naturally or otherwise, what rotation of crops, if any, is followed, and what methods have been found best in suppression. The form contains a list of the weeds most frequently reported to date in the order of their apparent importance in the country as a whole. This list every farmer is invited to revise so as to represent his own farm fairly. Weeds not present may be crossed out or marked absent and others added if of more concern on the farm. Numbers can then be placed before each name to indicate the order of seriousness. Any weed not known by name should be sent to the Division for identification. Parcels up to sixteen ounces, if addressed to the Division of Botany, Central Experimental Farm, Ottawa, are postage free. Plants should be sent fresh, or when in flower or fruit, and as complete as possible, including root. The list of weeds given in the form, which can be had from the Division, is as follows: Couch (twich grass), Canada thistle, perennial sow thistle, wild mustard, wild oats, common reedgrass (French weed, pennycress), redroot, pigweed, lamb's quarters, ball mustard, Russian thistle, bindweed (wild morning glory).

Finishing Hens and Broilers.
Dispose of all hens that are not to be kept over for breeders just as soon as they stop laying. If this plan is followed the marketing will be extended over a considerable period. If you can get them all sold before the broilers become plentiful you are certain to obtain much better prices than if you market them later in the season.

After hens have been laying heavily they are likely to be thin in flesh and should not be marketed until put into good condition again. Even hens that have been loafing and are consequently fat are not in as good condition for killing as they should be. Ten days feeding in the crates will make a great difference in these birds, as the crate feeding and the inactivity softens the muscles of the neck and the fowl much more tender and juicy.

Do It Now.

The "Do It Now" sign is very often found in business offices for the purpose of getting things done quickly and to give the impression that the place is a busy one.

While this sign is used mainly for impression purposes in offices, it might be used for practical purposes around the farm buildings. It may be used to indicate some few things but when it comes to repairing and repainting, a stich in time saves nine. The longer a small repair job is left the longer and more expensive the job will be. Our sense of economy may indicate that building materials are the proper time to require attention. If that is so, our sense of economy means adjusting.

Your implements may need adequate shelter; your chicken coop may need necessary for your chickens to spend their winter shivering; your barn may be leaking and thus cause loss in hay and fodder; and even your poultry may begin to look a little the worse for wear. If that is so the time to get busy is now.

To keep in repair is greatest economy; to repair when repairing is necessary shows good judgment, but to leave repairing until it becomes a big job, is the grossest waste and extravagance.

When it comes to keeping things in shape, or putting them in shape, "Do It Now" is good, sound business advice.

Feed Floor Buys Itself.

I think that a concrete hog-feeding floor will pay for itself in about five years. I built one 36x40 feet. I believe the feed it saves me has easily paid for the materials in the few years that I have had it. It makes feeding easier. You don't have to get so dirty, especially in the spring, and the feed is always cleaner. On the ground some of the grain is bound to be wasted.—J. H.

If a drawer sticks, try rubbing the edge of the two sides with laundry soap.

HAVING NO ENTANGLEMENTS WITH EUROPE

Some of the European governments are refusing offered loans from the U.S. for the purchase of wheat in that country, preferring to purchase their grain wherever they choose.

—From the New York World.

Beauty is only skin deep—
Keep the skin clean, fresh and beautiful with Lifebuoy.
The smooth creamy lather of Lifebuoy wakens up the skin. Lifebuoy makes soft white hands—
Fresh, wholesome bodies.
Lifebuoy's health odour is delightful.

"The Child's First School is the Family"—Froebel.

The Story Hour—By Mrs. Grace P. Abbott.

It has been one of the many romantic fancies of my life that someday, seated in front of a glowing fireplace, I would observe that holy of holies, the story hour, with my fair-haired boys and girls gathered at my knee. My girls, it is true, are fair-haired and dearly love stories though they are young yet, but they do not love "The story hour" as I had so many times envisioned. Then, I was the story-teller and they the starry-eyed audience.

I know that I am not alone in this disillusionment for I have seen other mothers try the same thing and then abolish the story hour, saying regretfully, "Somehow, my children don't care much for stories. I guess they aren't like I was when I was a child. I used to sit by the hour and listen to my Mother and I well remember once how—". "By the hour" was probably how it seemed to them and not to their mothers, and they probably missed much as do the children to-day, by doing all of the talking themselves.

It took me a rather long time to learn my lesson. I hated to give in to the fact that I was beaten and I would not give up the story hour, but at last I was forced to admit my defeat in order to keep the hour that has now become an even more precious thing than I had envisioned it.

I have come to a happy compromise, which is really what all great happinesses are based on—we make up our minds to do it at first in or one of the children starts, or sometimes we

To Kill Quack Grass.

The way to kill quack-grass is to let it grow until it begins to blossom, and make it interesting (stabbers) after as possible, skim the sod loose from the underlying soil in as thin a layer as possible. In small patches this may be done with a hoe; in larger patches with a plow, provided the plowshare is broad enough to cut the entire slice loose from the soil, and of course sharp enough. In plowing, plow just as shallow as possible—certainly not over three inches deep. After this, stir the sod with a harrow about once every ten days until cold weather. If the season is a very wet one, you may have to stir it oftener in order to keep the roots from getting attached to the underlying soil again. If the season is dry they will die without so much stirring. We have known some large fields of quack-grass to be completely exterminated in a single year by this simple method.

tools on the farm. Some hooks back of the bench will hold these, if they don't run away with some careless man.

A couple of hammers will come handy, one for the house and the other for the shop.

Keep on getting tools, a few at a time, until you have a set of strong chisels, a standard square, a spirit-level—and be very careful of that, for it is a valuable and delicate instrument—two or three whetstones, coarse and fine, an adze, a small bench-vice, a try-square, a bevel-square, a compass, a saw-set, a cold-chisel, a screw-driver, a nail-set, some rat-tail, three-cornered and flat files, a wood rasp and finally a drawshave and some good planes. A good jack-screw is also a farm necessity.—Farmer Vincent.

Shop Tools.

Of course, you have a shop. And after you have it, what ought you to have in it?

First and foremost, a set of bits and augers, of all sizes; and don't get them at the five-and-ten-cent store, either. Get some good ones while you are about it. Back of the bench nail up a strip of inch-board with holes in it to stand the bits up in. Get a good stock to go with the bits and hang that up on a hook close by the bits. A couple of nails driven into the wall an inch apart will hold the augers.

Then get good saws, rip and cross-cut. Farmers as a rule are pretty short of good saws.

No reason why they should be. A saw is one of the most indispensable

KEEP AFTER THE IGNITION

The working of the ignition system affects the performance of the engine to a greater extent probably than any other one thing.

First, we have the miss noticeable at low speed. This sort of miss is due to one cylinder's not firing. If a plug is at fault the trouble can be located by retarding the spark about half way, putting on quite a lot of gas and holding down three of the coil vibrators and letting the engine run on one cylinder. This test is made with the car standing still. By letting the engine run on the first, then the second, then the third and fourth cylinders the one missing can be easily found. To find out whether the miss is due to the plug or the coil, move one of the coils from a cylinder which does fire over to the one which does not. If the miss moves with the coil, the coil is to blame. If it does not move with the coil, the trouble is probably in the plug.

Coil trouble is usually due to bad condition of the coil points or vibrators. Most service stations now have coil testers, in which the coil is placed, and the current taken by the coil and the spark it gives can be told, and the coil adjusted to give best results.

The other form of missing comes only at high speed. This trouble usually can be traced to a worn commutator. The fibre and steel over which the commutator roller runs wears full of little hills and hollows. At slow speed the roller can move up and down in these places, but when going fast it just hits the high spots and misses some altogether, and the engine misses. The remedy is to put in a new commutator and roller. The length of time that a commutator lasts depends almost entirely on the oiling it receives. One owner wore out a commutator in one week by not oiling it at all; another used one a whole summer of hard work by oiling it daily. Sometimes hard starting is due to the current from the magneto being weak. After a while it may be necessary to put in batteries for starting. One owner who had this trouble was advised to have the magnets of his magneto recharged. This can be done at a service station.

There is one miss at low speed that cannot be blamed on the ignition. An owner changed plugs, had new coil points put in and a new commutator and roller, but still the car did not pull right at low speed. A mechanic, who examined the car, took three of the spark plugs out and then cranked the engine over on compression. Then the one plug was moved in turn to the second, third and fourth cylinders. There was a very noticeable difference in the compression of the cylinders, and one had practically none. "Clean carbon and grind in valves to fix it," was the mechanic's report. The work was done and the desired result was obtained.

Ye Scrub, Farewell.

These are good days for pure-bred live stock. The wide-awake farmer has learned the economy of them. Agricultural authorities have been preaching the gospel of improved breeding, lo, these many years.

The pure-bred sire has come into his own and has plenty of support in determining that the scrub must go. The evidence of superiority is all on his side, and if our good country continues to move forward toward a higher and higher state of perfection, it is only a matter of time until the scrub sire, together with his mothers and sisters and daughters, is relegated to the background of oblivion.

Most pure-bred stock breeders are in full sympathy with this movement. They are finding an absorbing occupation in a consistent endeavor to breed their animals better and better, and are thoroughly conscientious in their efforts to put out to their customers only stock that they are sure will please. This practice is no doubt doing more than any other one thing to supplant scrub live stock.

Soldering Equipment Causes Rusty Tools.

Many tools in the farm workshop, such as chisels, bits, saws, etc., are too expensive to be endangered with rust, but if a home-soldering outfit is kept in the tool-box, or close to the tools on the bench, rust will get in spite of your care to avoid dampness in the shop.

I learned this by sad experience and not until an elderly tinsmith explained the cause did I learn to cork the self bottle with a glass stopper and place the lump of sal ammoniac in a box with a tight fitting cover when not in use.

These two essentials of the soldering equipment are very active producers of rust, and negligence to keep them covered will surely result in damage.—H.

Says Sam: If you're building a house, and a fellow will show you where you've got the foundation wrong, you'll thank him. But if you're building, say, a marketing organization, and he shows you a fault at rock-bottom why, dern him, he's a knocker!

The spirit of co-operation demands that everyone who participates in the growing, transporting, preparing and marketing of goods is entitled to a fair return for his effort, and so more.

All About Horses
A TREATISE ON THE HORSE
Get this book! You cannot afford to be without it. It tells you everything you should know about the horse. It covers the horse and all about him—his diseases—how to recognize them—what to do about them—with chapters on breeding, selection and showing, feeding and many other things of interest to the horse man.

STORIES OF WELL-KNOWN PEOPLE

Buckingham Palace Flunkey Didn't Recognize Prime Minister.

As Prime Minister Baldwin is a man with a sense of humor, he has found only diversion in the fact that he recently was shown out a side entrance of Buckingham Palace by an attendant who did not recognize him. He also was halted by a House of Lords attaché this week and asked if he were a member of the Cabinet.

The first occasion was at the royal court. After the presentation the Prime Minister retired to another part of the room, though his official position was behind the King and Queen on the dais. When the procession formed to follow the Sovereign from the throne room the Prime Minister waited until the court dignitaries and members of the diplomatic corps had passed and then modestly started to follow. An attendant, however, ignorant of the identity of the King's first Minister, said he could not join the procession and insisted upon showing him out by a side door. Mr. Baldwin liked the joke so much that he did not protest.

When the Prime Minister attempted to make his way to the place in Westminster Hall reserved for Ministers, on the occasion of its reopening by the King after a protracted period of renovation, a House of Lords attaché touched him on the arm and inquired if he were a member of the Cabinet.

Mr. Baldwin quietly answered that he was the Prime Minister and the attendant hurriedly walked away in dismay.

The Tireless "Tiger".

M. Georges Clemenceau, the veteran French statesman, is exciting a great deal of comment in the French capital because of his remarkable energy. He is up at seven o'clock each morning and begins his round of visits at eight o'clock. He has an hour's gymnastic lessons regularly every morning, and generally has very little time to spare.

However, one of his favorite pastimes is telling good stories, and the following is the latest gem of a repertoire that must contain thousands upon thousands of amusing anecdotes.

This story concerns, strange as it may seem, himself; it is remembered that M. Clemenceau is very modest and very rarely tells a story about himself, although tales about him are legion.

The grand old Frenchman was standing outside his residence one morning about eight o'clock, when a photographer from a morning newspaper sidled up to him, and asked:

"Excuse me, but has Clemenceau come out yet? I want to take his picture."

"Clemenceau, Clemenceau!" said the former premier thoughtfully. "I seem to know the name, but who is he? Who is he?"

"I don't know the end of this delightful story, but it seems extremely unlikely that Clemenceau gave the game away and let the photographer take his picture. It is one of the boasts of the French statesman that he will never have his photograph taken for newspaper purposes for the next ten or twenty years. After that time, of course, he may relent."

Timber.

Stroke of the axe! The trunk shivers and gapes.
Stroke on stroke! The chips fly.
"Oh year upon year upon year I grew, since I woke in the seed."

Stroke on stroke! Raw wounded wood and the heart laid bare.
"Oh sun and wind and rain, Oh leafing and the fall of leaves.
Oh flower, love and love's fruit."
Strong bite of the axe! Staggering, crying timber.

Down!
And the little branches and the twigs are scattered on the ground.
And the woodman stands measuring.
Man, of what timber are thou?
—Olat Stapledon.

Peter's Poser.
Little Peter was of an inquiring turn of mind.
"Daddy," he asked one day, "is to-day to-morrow?"

"No, my son, of course it isn't to-morrow," was the reply.
"But you said it was," murmured Peter.
"When did I say to-day was to-morrow?" asked father.
"Yesterday," answered Peter.
"Well, it was. To-day is to-day, yesterday was to-day yesterday, but to-day is to-day, and to-morrow will be to-day to-morrow, which makes to-day yesterday and to-morrow all at once. Now run along and play."

Poor Puss.
After a particularly trying day an English barrister came home with his nerves on edge and at once sought refuge in his own study, well away from the noises of the household. He sat down by the fire and was gradually feeling calmer, when the cat, which had been sitting there too, got up slowly and walked across the room.

The barrister started, then turned on her and said indignantly:
"Now, what are you stamping round here for?"

The Mower Sang.

The mower paused to whet his scythe,
And whetting it he sang,
Till to the merry tune and blithe
The stretching hay fields rang.

The sweat ran down his sunburnt face,
But deep his breath and slow,
A wind made ripples in the place
Where still he had to mow.

The whetstone rasped along the snath,
Which hummed beneath the stroke,
The knife that had laid low the swath
In ringing triumph spoke.

What words were couched to the tune
He sang amid the hay?
It may have been a wondrous rune
The mower sang that day.

But fully did I understand
The song that then I heard,
As though each note the mower
spanned
Was welded to a word.

And as he sang my dull heart sang
And lifted to the blue,
While all the stretching hayfield rang
And all my spirit, too.

—Maurice Morris.

Funeral Before Death.

Funeral services for an old couple who are still alive have just been held at Kochi, Japan.

The man, who is the proprietor of a fashionable restaurant, and his wife, are both seventy, and it was their desire that their funeral should take place before their death.

A long cortege of "mourners" left the Kochi park, and all the procedure of the funeral service according to Buddhist rites was carried out in regular order at the Hongwan Temple.

After the service the couple entertained many of their mourners at a dinner, given to celebrate their longevity. They believe that the "funeral" has given them a new lease of life.

Birth of An Island

The birth of an island is described in a report received recently from the master of the steamship Jacox, who declares that he was a witness of part of the phenomenon.

While on his route from Singapore, a violent disturbance was noted on the surface of the sea, where a mass "dark in color, with straight sides, about 100ft. in height and between two and three miles in length," had risen above the surface.

"There were breakers along the entire length," added the captain, "and the sea was washing away loose material." Repeated explosions were noted, causing large waves. These continued at intervals of about one minute for more than an hour.

The island has been officially named Tagawa, but on most charts is designated "Newborn."

Turnips are about nine-tenths water.

Surnames and Their Origin

CUMMING.

Variations—Cummings, Commings, Cumyn.
Racial Origin—Norman-French.
Source—A locality.

This group of family names is distinctly Scottish. It is, in fact, the name of an old feudal estate in Normandy.

This does not mean, however, that any appreciable amount of French blood flows in the veins of descendants of the Clan Cumming, for names form no infallible guide to blood. Probably no better example of this could be given than in the case of this particular name.

The Sire de "Comyn," or "Comin," as it is spelled in another copy of the battle roll called at the command of William the Conqueror following the Battle of Hastings, at which he broke the kingdom of the Anglo-Saxons, was one of the followers of the Conqueror. His given name does not appear, but the name of the place of which he was the ruler served for the Norman nobleman the same purpose as a modern family name, for his rulership was hereditary.

Either this nobleman or his son presumably was the Richard "Comyn" who settled in Scotland and became a follower of King David I. of that country, starting the family on the road to high honors. Later a John, known as the "Red Comyn," laid claim to the Scottish throne and killed Robert the Bruce.

The family won its holdings and position in the Highlands, as a few other Norman families did, both through intermarriage and grants of the Scottish kings. In this manner the clan following gradually was built up from the inhabitants of the granted

Pennies as Pledges.

In its original form the penny was not a coin, but a token or pledge. Its derivation comes from the same source as that from which we get the word "pawn," and also such words as "panel," "pane," "counterpane," and "panicle."

The readiest pledge to leave in pawn was cloth, hence the Latin "panna," a piece of cloth. The original panel was a piece of cloth, or patch, and from this we get the word "pane" as applied to a pane of glass, and also the word "penny," its literal meaning being a pledge or token, and hence a coin. Originally the penny was spelt "peny."

The word shilling really means a division of money into small parts, and is obtained from a word meaning "to divide." Thus, in the first place, it was not a coin, but an indication of money having been made up in small form.

Sterling, as applied to money, is derived from the Hanesatic League, which had an important house in England. As their land lay "to the east of England," Englishmen called them "Easterlings," and the gold they paid in the course of trade became known as "Easterling money." Subsequently the expression became sterling.

C.G.S. "Arctic" Again Sails for Far North.

The Canadian Government steamship Arctic sailed from Quebec on July 9th for points in the Canadian Arctic archipelago in the provisional district of Franklin, Northwest Territories.

It had been intended that the ship recently purchased in England for this service, and renamed the Franklin, would be used this year, but owing to unforeseen delays in having her hull strengthened to meet ice conditions this was impossible and it was necessary to recommission the famous old Arctic for one more northern voyage.

As last year the expedition which is in charge of the North West Territories Branch of the Department of the Interior, is commanded by Mr. J. D. Craig, and Captain J. E. Bernier is in charge of the Arctic. Those on board include a number of surveyors, naturalists, and engineers to investigate the natural resources of the region; the members of the special court which is to conduct the trial of three Eskimos charged with murder; and a number of members of the Royal Canadian Mounted Police to relieve men stationed in the north. The cargo consisted chiefly of supplies for the posts at Craig Harbor and Ponds Inlet and for the new posts it is intended to establish. It is expected the Arctic will return in October.

SAVE THE CHILDREN

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather.

Stomach troubles, cholera infantum and diarrhoea carry off thousands of little ones every summer, in most cases because the mother does not have a safe medicine at hand to give promptly. Baby's Own Tablets relieve these troubles, or if given occasionally to the well child will prevent their coming on.

The Tablets are guaranteed by government analyst to be absolutely harmless even to the newborn babe. They are especially good in summer because they regulate the bowels and keep the stomach sweet and pure. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

SEVENTY THOUSAND TROUT

Seventy thousand trout fry and 250,000 trout eggs were deposited in the outlying lakes and streams of Waterton Lakes national park with gratifying success during the past season.

There are about 45 species of tulips.

MANIFESTATIONS.

Lord, who walked upon the sea, is it you who pass softly in the grass when a little wind blows over, scarcely bending down the clover?

Must Give to Receive.

If a farmer desires a bountiful harvest he will not be stingy with his seed planting, and it is equally true that he who would have friends must give generously of himself. In the moral world, if we desire happiness we must "scatter seeds of kindness for the reaping by and by."

"For the heart grows rich in giving. All its wealth is living grain. Seeds that mellow in the garner—Scattered, fill with gold the plain."

—Hilda Morris.

THE OLD RELIABLE

Minard's gets at the root of the trouble. Stops inflammation, deadens pain.

MINARD'S "KING OF PAIN" LINIMENT

HARD PIMPLES DISFIGURED FACE

Very Sore, Itched and Burned. Could Not Sleep. Cuticura Heals.

"My face became affected with large, hard, red pimples that were very sore. They scaled over and itched and burned so that I could not sleep. My face was awfully disfigured for the time being."

"I read an advertisement for Cuticura Soap and Ointment and sent for a free sample. My face began to feel better so I purchased more, and when I had used four cakes of Soap and one and one-half boxes of Ointment it was healed." (Signed) Miss Lillian R. Ladue, Jericho, Vt.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.

Sample Pack Free by Mail. Address: "Cuticura, Ltd., 344 St. Paul St., W. Montreal." Sold every-where and one and one-half boxes of Ointment and Talcum are all you need for every-day toilet and nursery purposes.

FALSE, ON THE FACE OF IT. Fritz's make up.—From the Sunday Chronicle.

SYMPTOMS OF ANAEMIA

An Inherited Tendency to Anaemia May be Overcome.

Some people have a tendency to become thin-blooded just as others have an inherited tendency to rheumatism, or to nervous disorders. The condition in which the blood becomes so thin that the whole body suffers comes on so gradually and stealthily that anyone with a natural disposition in that direction should watch the symptoms carefully.

Bloodlessness, or anaemia, as the medical term is, can be corrected much more easily in the earlier stages than later. It begins with a tired feeling that rest does not overcome, the complexion becomes pale, and breathlessness on slight exertion, such as going up stairs, is noticed.

Dr. Williams' Pink Pills are a home remedy that has been most successful in the treatment of diseases caused by thin blood. With pure air and wholesome food these blood-making pills afford the correct treatment when the symptoms described are noticed.

You can get these pills through any dealer in medicine or by mail, postpaid, at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Money orders. A Dominion Express Money Order for five dollars costs three cents.

Must Give to Receive. If a farmer desires a bountiful harvest he will not be stingy with his seed planting, and it is equally true that he who would have friends must give generously of himself.

What Stopped Them? "Why those crabs are not moving. I wouldn't dare buy one of them." "Lady, I'll swear every one of 'em was moving less before you looked at 'em."

"Skyrocketing" the Price of Chairs.

Everyone knows how exorbitant the prices of genuine antique furniture frequently are. The purchasers are generally rich and don't often dispute the price, and the supply is rarely equal to the demand.

In a recent court case, says London Opinion, a witness who was a furniture dealer testified as follows:

"In October, 1920, I went to Sudbury Hall, Lord Vernon's place in Derbyshire, to bring to town ten Chippendale chairs and two settees that we had bought. In a few days we sold them to Messrs. Dighton."

"What did you pay for them?" asked the examining lawyer.

"About six hundred pounds."

"How long was it before you sold them to Messrs. Dighton?"

"About six weeks."

"For how much?"

"One thousand four hundred pounds."

"And then they were sold to Mr. Shragar for three thousand pounds? What do you suppose Lord Vernon would think of that—a profit of two thousand four hundred pounds the dealers made out of his chairs in a few weeks?"

What indeed!

Keep Minard's Liniment in the house. Manifestations. Lord, who walked upon the sea, is it you who pass softly in the grass when a little wind blows over, scarcely bending down the clover?

The Transcript

Published every Thursday morning from The Transcript Building, Main Street, Glencoe, Ontario. Subscription—in Canada, \$2.00 per year; in the United States and other foreign countries, \$2.50 per year.

Advertising.—The Transcript covers a wide section of territory in Western Ontario and its readers are the leading farmers and townspeople. It is a first-class advertising medium. Rates on application.

Job Printing.—The Jobbing Department has superior equipment for turning out promptly books, pamphlets, circulars, posters, blank forms, programs, cards, envelopes, office and wedding stationery, etc.

A. E. Sutherland, Publisher.

According to J. F. Andrews, of the Ontario Department of Agriculture, the European corn borer is giving Middlesex county farmers considerable trouble, although the pest is not nearly as prevalent in this county as in Elgin.

There are so many stories about the Ford car that one hesitates to say that any story he hears is a new one. Silas Hoeking, in his new book, tells this one: It is said Mr. Ford has invented a new kind of speedometer. When the car is travelling 30 miles an hour it shows a green light; at 40 an hour it shows a red light; at 60 it plays "Nearer, My God, to Thee."

The Beamsville Express says: "Police in municipalities in Western Ontario are getting after auto speeders, some 20 being recently fined at Glencoe for traffic law busting on the Longwoods Road between Delaware and Wardsville. As the fines were usually \$10 for 40 to 60 miles an hour, it does not appear as if these prosecutions would prove any great deterrent to the speed fiends."

Only once in the history of Canada was the gold production record set in 1922 exceeded, and that was in 1900, when the Yukon placers reached the peak of their yield. During 1922, 1,163,364 ounces of gold were mined in the Dominion. The value is set at \$26,116,050, an increase of 36 per cent. over the previous year's figures. In 1900, 1,350,057 ounces of gold were mined and the value was \$27,908,153.

About two weeks ago eight motorists were summoned at Simcoe for passing a funeral procession with their motor cars. Seven paid without question, but the eighth turned his case over to the Motor League and the case was dismissed. The defense pointed out that the clause covering the alleged infraction formerly required a motorist to stop his motor either on meeting or overtaking a funeral procession. Now, however, the clause refers only to meeting and says nothing of overtaking.

The announcement made on Saturday of suspension of payment on the part of the Home Bank of Canada came as "a bolt from the blue," following as it did closely upon a very optimistic annual statement and declaration of the usual dividend. It is quite evident from this and other recent failures of financial institutions in Canada that little or no reliance can be placed on statements issued by boards of directors, and it would seem also that some of our Government inspectors must be either incapable or dishonest. There should

be demanded a thorough investigation, and if guilt is established, adequate punishment meted out, else the Montreal Star's "Whisper of Death" will very quickly have a new and real meaning.

Dr. J. C. Lawson, of Los Angeles, made the prediction that the world is not far away from the time when the doctors will be teachers of health instead of doctors of disease. He contends that disease was not an entity, but an abnormal condition. Fear and pessimism in civic and physical life were destructive and had to be overcome by their opposites—optimism and knowledge. When people know what health was and how it could be maintained, there would be no need for fear. He instanced the various conceptions of disease and how they all had one common cure.

Many of the so-called accidents to motor cars on the highway prove that gasoline and booze are not good mixers. A scurry for the tools to attend to repairs after the smash often reveals the bottle. A man who attempts to drive a car while under the influence of grog should have his car confiscated and six months' incarceration in prison for himself. "Thou shalt not kill" is still one of the Ten Commandments, and sober people have no right to travel in fear and trembling of meeting some crazy fellow running a car at 50 miles an hour, and forgetting the rights of other folks.

Police Magistrate Jelfs, of Hamilton, takes sensible ground when he holds that there is no need to disfigure the landscape with huge, unsightly signboards when Ontario has a press that is both efficient and influential. The newspapers of Ontario can do all the advertising needed and are in a position to do it more cheaply and more effectively than any other medium. The day when people stand gaping open-mouthed at ten by twelve signboards has gone never to return. We are living in an auto travelling age, when locomotion is too swift to permit of leisurely inspection of signboards or other objects that happen to line the highways. When the citizen of today wants to post himself on the markets and commodities that he wishes to buy or sell he sits down at home and peruses the columns of his favorite newspaper. Newspaper advertising was never so effective as it is right now.

An intelligent and cultivated woman was heard recently to express the opinion that the present generation will see the last of the good old-fashioned family life which has kept the nation pure and worthy of the high destiny set for it. Many people see many changes in domestic life. And it is a common error to believe that the things that used to be were better than the things that are. The old games by the fireside, the comfortable sitting-room in the home of childhood, even the chores that seemed so hard then, are fondly looked back upon in middle life, through a mellowing veil of years. And there is a regretful realization that life has not as much zest now as it had then. The days of boyhood and girlhood, when there was keen delight in merely living, have gone. But the boys and girls of today are having them just as bounteously as their fathers and mothers did, even though the surroundings are different. There never was a generation that did not think

the one succeeding it was going to the dogs. The surest cure for this mild pessimism is to go back to the old home after years of absence. The house that in memory was a spacious abode full of delightful nooks and corners turns out to be a cramped cottage, devoid of plumbing. The street in front, which had seemed a wide and noble thoroughfare, is found to be narrow. The world is moving forward and the homes with it. The common comforts of the laborer today were sought as luxuries by the rich not so many years ago. Home has always been the same to those in it and it always will be. Whether a hut in the wilderness or a mansion on a boulevard, it is the abode of happiness if it really is a home.

A THOUGHTFUL SERMON

The Central Canadian of Carleton Place printed a thoughtful editorial last week which will be read with profit elsewhere. The question of support of a local newspaper is the theme. In too many places and even in Glencoe there are people who come to the local newspaper for their free publicity but who go elsewhere with their work. The Central Canadian says:

The Central Canadian has the reputation of being a booster, and it has always been the aim of the publisher to boost every enterprise of a public or private nature and of a worthy character. Boosting is a game, however, that more than one can play. "I boost you, you boost me," is a good motto, and "we will boost together" is another good motto. The newspaper man can boost in a very effective way, even by not "knocking" when people want him to "knock."

He can boost a good deal more by the good that is in an individual or coming out flat-footed and upholding the good that is in an individual or an institution and leaving unsaid what he knows to be bad. But when this is done there is no occasion for the person or institution which is boosted to assume that the newspaper has done it in order to hold its job with the public, as that indeed is a serious mistake. A newspaper man sees and hears more things, bad or good, about individuals and about the way institutions are conducted than other individuals, and it is unfair to assume that it is because he does not know that he does not print it. It is because he has a sense of honor and a sense of feeling, and last but not least a love of peace and harmony in the community. Many things might be printed about our town which would make spiky reading, but why herald such things abroad? The least said, the better. The newspaper man, however, has a keen sense of appreciation and is susceptible to praise of the right sort and to substantial business support. He appreciates the spirit of the man who, when he has a few dollars' worth of job printing, does not go galavanting about the country, spending car fare and time, thinking he might get it a few cents cheaper, but who says, "We've got a printer here at home and we'll try to help him by giving him the little printing we have to do."

This is the true community spirit, and it counts with the merchant, with the doctor, with the lawyer and with every business which draws its daily support from a community.

WHERE IS HEAVEN?

Where is Heaven? Is it not just a friendly garden plot, Walled with stone and roofed with sun?

Where the days pass one by one, Not too fast and not too slow, Looking backward as they go At the beauties left behind To transport the pensive mind Does not Heaven begin that day When the eager heart can say, Surely God is in this place, I have seen Him face to face, In the loveliness of flowers, In the service of the showers, And His voice has talked to me In the still apple tree.

—Bliss Carman, in The Christian Century.

APPIN

Miss Lauretta Lotan, of Longwood, is in St. Joseph's Hospital, London, where she recently underwent an operation for appendicitis.

The Appin W.M.S. held its regular meeting at the home of Mrs. John Rankin recently. After the business and devotional part of the meeting the members quilted two quilts for the bairn, after which Mrs. Rankin served tea. The next meeting will be held on the second Wednesday of the month as usual, at the home of Mrs. Albert Nevin, when arrangements will be made for the packing of the bale.

Mr. and Mrs. J. F. Cass and family and Percy Lotan motored to London Sunday to visit Miss Lauretta Lotan in the hospital. They report her to be doing nicely.

The regular meeting of the Women's Institute will be held at the home of Mrs. Archie Munroe, Metcalfe, Thursday, August 30th. All ladies are welcome.

Reserve the date, August 31st, for the weiner, roll and watermelon social at the Methodist church, Appin.

New York coal dealers hope a coal strike will be averted, but say the coal situation will be critical even if there is no strike.

London Lady Finds Relief

Mrs. Crabb finds in Dreco, the famous herbal remedy, corrective properties that overcome sufferings of years

The story of Mrs. A. Crabb, of 22 Rayburn Street, London, Ont., is an object lesson to every man and woman who is troubled with digestive ailments. It shows the extent of the sufferings had digestion causes if allowed to pursue its way unchecked. Check your digestive complaints now with Dreco, and avoid the misery that Mrs. Crabb describes. Here is her statement:

"Since August 17, 1922, I have been in terrible pain, through my left side and also around through my back. The pains were so acute that night after night I would walk the floor, unable to sleep. I was unable to do my housework, as I was in misery from morning to night. Gastric trouble caused my stomach to bloat, and my sufferings from indigestion were awful. I began taking Dreco on January 15th and today I feel like a new woman. The pains have entirely gone and I am now able to do my housework and cooking. My appetite is good and I have no gastric troubles, while before taking Dreco everything would turn my stomach. I had tried every kind of pills and remedies and had almost given up hope when I heard of Dreco. I am so happy over the benefits Dreco has given me that I tell everyone about it. It was a godsend and I am continuing to use it."

Dreco is a natural remedy, prepared from herbs, roots, bark and leaves known for ages for their medicinal properties.

Dreco contains no mercury, potash or habit-forming drugs and is a safe and certain spring tonic and regulator.

Dreco is being specially introduced in Glencoe by P. E. Lumley, and is sold by a good druggist everywhere.

Here and There

A discovery of excellent ochre (raw sienna) was recently made in the province of Ontario on the Dominion Atlantic Railway. The color is uniform throughout, with very little gritty matter in the main body. The material can be burnt to produce a variety of colors from reddish brown to black. Prospecting is still going on.

Canadian Pacific S.S. "Metagama" westbound from Glasgow via Belfast, recently docked at Montreal and Quebec with the record number of 382 cabin and 1,073 third class passengers. This constituted a record only for ships of the size and type of the "Metagama," the Canadian Pacific Express liners often having a far larger list.

Canadian Pacific Railway officials estimated that 61,000 men would be required to harvest the western crops this year. They expected to supply only 9,000 from the prairie provinces and British Columbia and made arrangements to carry over 50,000 from Ontario, Quebec and the east.

United States factories turn out chewing gum to the value of \$41,000,000 annually. The extent to which this product is used in this country can be appreciated when it is known that at the Canadian Pacific Windsor station, Montreal, a man is continually employed in removing gum stains from the marble floor.

Despite the fact that the new Banca de Ste. Anne de Beauport is still in course of construction, many thousands more have visited the shrine this year than in former years, and at frequent intervals the Canadian Pacific Railway has been called upon to add special equipment to its regular trains to accommodate the pilgrims. The Redeemtorist Fathers are investigating a large number of cures claimed to be miraculous.

E. L. Richardson, manager of the Calgary Stampede of 1923, held under the patronage of the Prince of Wales and Governor-General Byng, announces that, owing to the enormous success of the great rodeo July 9-14 it will be staged annually instead of at intervals of several years, as heretofore. The recent Stampede was attended by 137,500 people.

Only once in the history of Canada was the gold production record set in 1922 exceeded, and that was in 1900, when the Yukon placers reached the peak of their yield. During 1922, 1,163,364 ounces of gold were mined in the Dominion. The value is set at \$26,116,050, an increase of 36 per cent. over the previous year's figures. In 1900, 1,350,057 ounces of gold were mined and the value was \$27,908,153.

Canada's trade is climbing ahead. Total trade in the three months ending June was \$462,544,438, an increase of \$110,841,056 over the corresponding three months of last year. For June alone total trade was \$170,720,516, an increase of \$44,944,732 over last year. Domestic exports in the three months increased approximately \$50,000,000 and imports approximately \$61,000,000.

Now comes a health specialist who says bathing suits are unhealthy. Don't wear one, then, the way they do at Chatham.

Agitate for Community Action in Control of European Corn Borer

No single farmer can expect to keep his corn crop free of the European Corn Borer unless all his neighbours are also fighting the pest. For this reason some sort of co-operation is essential. You can organize your whole neighborhood by arranging a mutual plan of campaign whereby each farmer undertakes to account for the Corn Borers on his own farm.

This plan will assist in bringing the Corn Borer under control, but without such co-operation, satisfactory results will not be obtained.

A Very Important Point

Cut corn crop low and as soon as it is ready. Burn all corn stalks. Garden sweet corn should all be pulled early and burnt.

Plough down all corn stubble very carefully. Seed to winter wheat where possible. Write for pamphlet, post free.

TRANSCRIPT ADVERTISING RATES

"Special Notices" column—two cents per word first insertion; one cent per word each subsequent insertion; minimum charge, 25 cents. Condensed advertisements on first page—two cents per word first insertion; one cent per word each subsequent insertion; minimum charge, 35 cents.

Cards of Thanks and In Memoriam notices and verses—50 cents up to 25 words; all over 25 words, one cent per word. Auction Sale notices—first insertion, one cent per word when bills are ordered; two cents per word when bills are printed elsewhere; minimum charge, 50 cents; subsequent insertions at one-half above rates.

Display advertising, per inch—1 inch, 50c; 2 to 10 inches, 40c; 12 to 25 inches, 35c; 30 to 60 inches, 30c; 60 to 100 inches, 25c. Special contracts made for advertisers using over 100 inches in stated number of issues.

All notices of meetings and entertainments are advertising and will be charged for, but a reduction from regular rates will be made where the objective is not of a pecuniary nature.

She Didn't Want Ducks

A very green young woman decided to start a poultry farm. She bought a hen and a setting of eggs, and, having no knowledge of poultry, she wrote to a farm journal asking how long the eggs would take to hatch out. The editor replied: "Three weeks for chickens and four weeks for ducks." Some weeks later she wrote again to the paper: "Many thanks for your information. However, at the end of three weeks there were no chickens, and as I did not want ducks, I took the hen off."—Boston Transcript.

A Corrector of Pulmonary Trouble. Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

ments before December 31st. Orders taken now for December delivery at present prices will save you money.

Considerable amusement was created at Petrotea when a woman from the country drove to town and tied her horse to the silent policeman which stands in the middle of the road on Main street. The horse remained tied to the policeman for nearly an hour before the owner realized her mistake. She thought it was a tying post.

There appears to be a plentiful supply of school teachers at the present time. Upon receiving the resignation of Principal Coon recently the Glencoe public school board advertised for an experienced principal, and received over seventy applications for the position. The board decided to accept the application of D. A. McDonald, of Tavistock.

Upwards of 135 relatives attended the Suddall reunion picnic held on Frank Copeland's lawn on Friday, August 17. A splendid program was given in the afternoon, and there were sports of many kinds, including races, baseball and softball games. Dinner and supper were served on the grounds. Guests were present from London, Port Stanley, Wallaceburg, Detroit, Streetsville, Cairo and California.

An interesting event of last week was a tennis tournament which was held on the Glencoe courts on Wednesday afternoon. A number of young people motored from Alvinston and participated in the various games. The courts were in splendid condition, and keen competition was shown throughout the different events. Glencoe scored in the total, the result being 5 to 4. Refreshments were served on the grounds.

The death occurred in St. Joseph's Hospital, London, on Saturday of John Duncan McKellar, a well-known and highly esteemed young farmer of the township of Dunwich. Mr. McKellar was taken to the hospital some eight weeks ago, suffering from blood poisoning which developed from a slight scratch on his hand, which resulted in his death. Mr. McKellar was about 36 years of age. He leaves his mother and one sister, Mary Catherine. The funeral took place from the family residence to Fairview cemetery, Dutton, on Monday afternoon.

SPECIAL NOTICES

House to rent from September 1.—Mrs. W. A. Currie, Glencoe.

23c trade (not on account) and 21c cash for eggs, at Mayhew's.

Girl wanted to assist with housework.—Mrs. B. F. Clarke, Glencoe.

CHAPTER XIV.—(Cont'd.)
Tu Hee turned wide eyes on the woman and smiled faintly when her gaze did not waver. Deciding she needed her strength for whatever emergency threatened, she forced herself to eat and drink the food before her. With the nourishment came fresh courage to Tu Hee. She began to think she had been exaggerating matters greatly. That Chu Sing wished her for his wife she had known for many months, but that he would dare harm her she thought now was highly improbable. The greatness and power of her uncle, Weng Toy, overshadowed him too much. No, Chu Sing was probably trying to frighten her. Perhaps his motive was mere jealousy of the foreigner. He wouldn't dare keep her a prisoner another day. Why, her uncle would scour the country for her, and Chu Sing was too shrewd not to know the very least he could expect would be a death penalty. Her reflections were interrupted by the woman appearing with fresh bandages for her foot.

"Misses' foot much better," ventured the servant with satisfaction, as she applied a lotion on the bruised, swollen ankle.

Tu Hee winced as the long, deft fingers wound a fresh bandage into place. "Thank you," she smiled. "You are very good to me. I shall always remember this."

A pleased look flashed across the

was begging her to take some food. Tu Hee shook her head and turned away, but the woman pleaded: "If you not eat you get sick and die."

"Ah, if I only could!" sobbed Tu Hee. But the effort to speak roused her, and she sat up and allowed herself to be helped to the little table. A dinner lay before her savory enough to tempt the most fickle appetites. Watermelon seeds, fruits, nuts, and jelly were the dainty first course. Tu Hee forced herself to take the fruit jelly and drink the deliciously prepared sweet lotus seed broth. The woman stood eying her anxiously, and when those dishes were pushed aside placed in front of her the tempting breast of a chicken.

Tu Hee did her best, but the food choked her. The image of her uncle obtruded itself, overcome by fear for her.

The visualization was too much for her. Turning to the servant she cried passionately: "Oh, please help me to get away! I must be home to-night or my uncle will die of grief."

The woman's stolid face did not change. Seemingly unmoved by the piteous appeal, she merely shook her head.

"I can't spend another night here, it would kill me," cried Tu Hee. "You look kind," she observed, scanning the woman's face, "but it is not merely gratitude that would be your reward," she added, realizing all too well the necessary traits of the servant class. "My uncle would give you money—make you rich."

But the woman again shook her head. "It seemed to Tu Hee her round eyes grew softer. She derived a little hope from this. And then the thought occurred to her that perhaps Chu Sing had threatened her. She must be fully tested by him or he would never have left her in sole charge of his prisoner.

Desperate, Tu Hee threw herself before the woman and clasping her hands cried: "You must help me. You must! You are a woman. Don't you understand? I hate, hate this man who has brought me here! If you do not help me to escape I shall have to kill myself."

The woman looked at her curiously and raised her gently to her feet. "Love not now, perhaps, but it will come after marriage. Listen, the rain comes in rivers, the wind blows in hurricanes. Ten miles next house. Escape impossible."

In an hour's time she was the well-groomed child of fortune again. Even her dress had been made to assume its old daintiness. The woman accomplished this only when she saw her new charge was firm in her refusal to do any of the garments with which she endeavored to tempt her.

Tu Hee was now all ready for Chu Sing. The horrors of the previous night had faded a little in his continued absence and in the glow of adventure. Her spirits did not sink, even with the insistent beating of the rain against the roof and window. She thought of her uncle. He would be home from his trip to-night. Surely Chu Sing would not dare have her absent when he returned. Ah, no, she assured herself, he would not dare! But—and a sudden chill ran through her—perhaps she was miles and miles away from home. She had no means of knowing how far she had journeyed after she lost consciousness. Possibly she was in some lonely part of the interior. If she could only look from the window, but it was too high to reach, unless—

She glanced apprehensively towards the door. The woman had gone out half an hour previously. Perhaps she would be able to get an idea of her surroundings before her return. Tu Hee's foot was not far on the road to recovery, which she discovered when she tried to coax it to give her a little support. So it felt as by hopping on one foot and pushing a heavy carved chair of the small window that she achieved her purpose. Her lame ankle protested vigorously at being lifted so far off the floor, but, setting her teeth grimly, Tu Hee succeeded in getting her eyes on a level with the pane of glass. Eagerly she peered out, but, alas, only the swaying, creaking limbs of trees and blowing rain rewarded her effort.

Ungratefully she clambered from the chair, unaware whether she was in the suburbs or in Peking itself, for—and the thought sent a shiver through her—out in the country of brigands.

The minutes and hours dragged into noon at last. Tu Hee began to grow anxious. Why did her captor not come? The mystery and inaction of her position began to tell on her. There was nothing to do but sit with folded hands and think, and to think was the worst thing she could do. It was the gates for vivid, horrible imaginings.

A step sounded outside the door. Tu Hee held her breath and waited. Terror had her in its grip. She heard a key inserted and waited for Chu Sing to enter, but it was only a Chinese boy with a tray of steaming, appetizing food.

Bowing low and respectfully, he set the tray on the table and with another bow glided from the room.

This was too much for Tu Hee. Throwing herself on a couch, she sobbed with fright and loneliness. What did it all mean? "O, Uncle Weng, please come to your little Autumn Gladness!" she sobbed wildly. Her past bravado had fallen from her and she shivered to atoms. Cold presentiments of overhanging evil gripped her mind as she lay there clutching the cushions. How long she remained thus she did not know. She cared no longer to count the minutes or hours. She felt the gods had indeed abandoned her. Her ankle throbed with pain, but she did not mind. Indeed, she welcomed it as a sort of antidote for the torture of her mind. The storm had increased to shrieking fury and pelting hail. Thunder pealed and shook the walls of the house. The thought entered her dazed mind that perhaps the gods were angry, that the roars of thunder were vociferous protests at her suffering. Perhaps they would destroy her persecutor—had already destroyed him, which accounted for his strange absence.

A soft, hesitating touch on her hand brought her imaginings to an end. She opened her eyes wearily. It must be night, for the lamp was lit. The waiting-woman was speaking to her,

WASHABLE WOOLLEN FROCKS.
No, the title is not an advertisement for a new brand of goods guaranteed for the tub. Making woollens washable is a home process. And it may please you to know, if you happen to be in the midst of peach-canning and have only half of your relishes put down for the winter, that the time element is a small consideration. Roll the goods up at night and shrink them in the morning with the shrunk out.

Wool crepe, rep, kasha cloth (the new soft chieft), serge, cashmere, flannel, tweed, homespun—any of these you can make tub-proof. Of course, when you buy your dress length you must allow a quarter yard extra for shrinking. Many stores have their goods sponged or steamed to prevent spotting. Some even call it "shrunk" goods. But the spots on Mary's dress got beyond the cleaning bottle and you dipped it in the tub, you probably discovered that all the shrink was not out. Woolen goods take their own time to shrink, at least twelve hours. Sponging or a few minutes' steaming won't complete the job.

If you are doing any amount of sewing, you really ought to have a shrink cloth. Duck makes the best kind of one. It should be several inches wider than the goods, and a yard longer than a dress length. If duck isn't available, heavy unbleached muslin or an old sheet folded double will do.

You see, the wet shrink cloth is rolled with the goods. There is just one little trick in the process: the goods must be kept perfectly smooth. Spread the goods on a table or the floor. If it is double width, keep it folded double and the crease exactly even. Dip the shrink cloth in a pail or basin of water, wringing it thoroughly. Wring the cloth loosely and place it on the goods almost dripping wet. Smooth the shrink cloth over the goods and roll both layers over a smooth board or broom handle. The shrink cloth should be long enough to wrap several times around the outside.

After the cloth is carefully rolled, put it away for twelve hours. It is the slow process that contracts the yarn. When you unroll it, if it is very damp spread it out to dry a little. Press, while damp, on the wrong side. Woolen goods will shrink both in width and length.

Some goods have cotton or silk threads woven in the selvage. In this case the selvages will not shrink as much as the body of the goods. Cut the selvages off before pressing; or, if you want to take an extra precaution, cut the selvage off before rolling the goods in the shrink cloth.

Of course, with all this laundering and scrubbing in mind, I am thinking of school clothes that are ready-made pockets are destined to be candy carriers, and whose sleeves will be desk wipers—my one recommendation is to make them washable. They may be cotton—many mothers are holding to the gingham rule right through the winter. But woolen can be just as spic and span as gingham if the shrink is out, as described above.

CATSUP AND CANNING TIME.
When canning apples, pare and quarter the fruit the night before, then cover with cold water and let stand overnight. This toughens the fibre of the apples so that they retain their shape. A slice of pineapple added to a quart jar of apples will improve their flavor.

Tomato Catsup No. 1.—Use one peck of tomatoes, cut in halves or quarters. Place these in a kettle and boil for a half-hour and strain through a hair-sieve. After removing skins and seeds, return pulp to the kettle and add one-half desertspoonful of cayenne pepper, one desertspoonful each of black pepper, allspice, cloves, mace and mustard (all ground) and three desertspoonfuls of salt. Boil slowly for four or five hours, add one pint of vinegar, bottle and seal.

Tomato Catsup No. 2.—One peck of ripe tomatoes, one quart of vinegar, one-half pound of sugar, two cloves of garlic, six desertspoonfuls of salt, one-half ounce of ground mace, two desertspoonfuls of dry mustard, one desertspoonful of ground allspice, one desertspoonful of cayenne pepper. Cover the tomatoes with water and bring to boiling point, then drain well and rub through a sieve or press through a vegetable press. Put the pulp into an agateware kettle, add the other ingredients and simmer for six hours. Bottle and seal. The spices should be tied in a muslin bag.

Belgium Marks Medicine.
Under a new law in Belgium all medicines for external use must be sold in bottles octagonal in shape, yellow brown in color, and bear in relief on the glass itself the words "for external use."

1888 No. 34-23.

INCREASING UNITED STATES INVESTMENT

ENTERS EVERY PHASE OF CANADIAN DEVELOPMENT.

British and American Investment in Dominion Industries Tend to Become Equal.

The Bankers' Trust Company of New York, after completing an exhaustive survey of Canadian industry, estimates that the United States has invested in Canada the sum of \$2,500,000,000. The last pronouncement of the approximate amount of American money in Canada was made by Sir Lomer Gouin in the Federal Legislature about the middle of the year 1922 when he stated that this amounted to nearly two billion dollars. The increment indicated in the new estimate is illustrative of the manner in which United States funds in Canada are increasing, and may be taken as accurate in view of the heavy investments made by the Republic in 1922, which established a record.

In the year 1922, Canadian bond sales in the United States amounted to well over \$20,000,000, or \$27,000,000 in excess of the previous highest figure reached in 1920. Adding to this investments of a general nature, other than those represented in the sale of bonds, and it is easy to account for \$300,000,000 in the twelve months, which would bring the total amount of American funds invested in Canada well within eight of the two and a half billions estimated by the Bankers' Trust.

The increasing ascendancy of American funds in Canadian annual development has been an outstanding feature of the post-war era. In the year 1913, for instance, when Great Britain invested about \$276,000,000 in Canada, a little more than \$51,000,000 came. That this movement has no means yet reached its zenith is indicated in the fact that the sale of Canadian bonds in the United States in the early months of 1923 have been substantial, greater than in 1922, the record year. In 1915 the United States is estimated to have had \$750,000,000 of Canadian investments.

Further Establishment of Branch Plants.
United States money is entering into every phase of Canadian economic development. Of the total amount of American money invested in Canada at the present time, \$1,200,000,000 is estimated to be in hotels and the business, industrial enterprises, bank-maintenance in farms, mortgages, small and private loans.

The difficulty of computing American industrial investment has since the war been enhanced by the growing popularity of the movement to establish branch plants of American industries in Canada, which, financed by capital from the United States, operate to all intents and purposes as Canadian industries. It is stated that there were more than 200 branch factories opened up in Canada by United States concerns in 1919, and a greater number in 1920 and 1921. The past year was an exceptional one in this regard, and conservative estimates place the number of branch plants of United States establishments operating in Canada at over one thousand.

The present year promises to be outstanding from every point of American investment. Not only are bond sales larger than ever before, but an unprecedented number of branch factories have either established on Canadian soil or declared their intention of so locating. An exceptional amount of American money is being expended this year in the development of Canadian water-powers and, in promoting other industrial enterprises on a large scale. American bankers, according to report, are anticipating a still greater movement of money over the border.

It is expected this year that the volume of American investment in Canada will reach that established by British funds. At the last computation, about the middle of last year, British investment was estimated to be two and a half billion dollars as against the United States two billions. The huge American investment last year tended to equalize this and the movement this year will probably definitely bring the two together. There is a gratifying tendency at the present time for British funds to flow again to Canada in some volume, and then Canada may expect a rivalry in which she must inevitably benefit.

The Disillusioned Man.
Among the fugitive pieces written by the late Sir Walter Raleigh, English scholar and man of letters, and collected in a book called *Laughter From a Cloud*, are these charming though gently critical lines: "They are supposed to be the reflections of an elderly man who has just come home from a garden party: I wish I loved the human race; I wish I loved the silly face; I wish I liked the way it talks; I wish I liked the way it talks; I wish I liked the way it talks; I wish I thought, 'What jolly fun!'"

Why Men Laugh at Girls.
Men laugh at girls because they are different from themselves, but they would hate them if they weren't.

NINE PERSONS DEAD, 23 MISSING, IN MUSKOKA HOTEL FIRE

Summer Guests at Wawa Hotel on Lake of Bays Driven from Rooms in Night Attire—Total of Dead May be Increased, as a Number of Guests Are Reported Missing.

Huntsville, Aug. 19.—Nine persons are dead, 23 are reported missing, many more are badly injured, and the picturesque Wawa Hotel on the Lake of Bays, the Mecca of hundreds of Canadian and American tourists, is today a charred and blackened mass, the result of a fire which broke out in the hotel early Sunday morning.

While the identity of nine victims has been established, the casualties, it is estimated, may be twice that number, as it is impossible at the present time to obtain any authentic list of those who perished.

A number of the casualties occurred among the help employed at the hotel, who had little chance of escape, so quickly did the fire spread.

Among the casualties are:

- IDENTIFIED DEAD:**
- Miss Margaret Bowker, aged 14, daughter of C. G. Bowker, General Manager, Central Region, Canadian National Railways.
 - Miss Annie Leigh, 4 Russell street, Toronto (employed in hotel).
 - Mrs. Alexander, 6 Duke street, Toronto (employed in hotel).
 - Mrs. Barrett, Toronto or Hamilton (employed in hotel).
 - Miss Phyllis Beranda, Thorold (employed in hotel).
 - Miss K. Rogers, Cleveland, Ohio.
- MISSING:**
- Elizabeth Krogan, Cincinnati, Ohio.

Among those who are badly injured through jumping from the windows of the burning hotel are:

Mrs. Simpson; Mrs. Young, thought to be from Toronto; Miss Kitty Carroll, New York, all employed as help in the hotel, and Miss Mary Miller, Miss Nellie Smith, guests at the hotel.

It was at 12:30 on Sunday morning, when most of the guests had retired, that the fire broke out. Sitting in the rotunda of the hotel, a few men were startled to hear the crackling of flames, and observed smoke pouring from the elevator shaft, which is located in the centre of the building.

Instantly the alarm was raised, but in the twinkling of an eye, it seemed, the whole building was a raging inferno. The elevator was almost instantly put out of commission, leaving the guests on the second and third floors no exit from the building except by jumping from the windows of the rooms.

The scene that followed beggars description. Men, women, and children, clothed only in their night attire, sprang from the second and third storeys of the building, many of them sustaining terrible injuries from their fall.

With such rapidity did the fire spread that in thirty minutes the entire building was destroyed. Owing to the hydrants being located close to the building, little use could be made of them on account of the intense heat.

CANADA HOUSE IN LONDON
The Canadian Government has purchased a famous English club house which is to be converted into headquarters for all the Canadian offices in the British capital. It will be known as "Canada House."

SINN FEIN LEADER IN FREE STATE CUSTODY

DeValera Arrested at Ennis as He Was Starting an Election Speech.

A despatch from Ennis says:—Eamonn De Valera, "president of the Irish Republic," at last is in the custody of the Free State authorities. He was arrested here on Wednesday as he was starting an election speech to his constituents. He had boldly announced his coming and when he took his position on the rostrum in Market Square Free State troops threw a cordon about him.

The crowd that had gathered had given him a tumultuous reception, and he had just started his address in Gaelic when a shout arose, "the soldiers are coming." Simultaneously armored cars rattled up to the vicinity of the platform.

The crowd, made up of men and women, fled in all directions as the soldiers fired several volleys over their heads. Many of the women fainted. As several soldiers rushed toward the platform, De Valera was seen to sway and then to collapse. At first it was thought the Republican leader had been shot, but it turned out that he had only fainted, probably in consequence of a blow he received during the stampede.

When he recovered De Valera was assisted down the steps from the platform by troops. He waved aside a number of persons who were seemingly desirous of attempting to rescue him, and surrendered to an officer, who received him with a kindly "Come along."

When the first panic had subsided, the people who had been about the platform returned to Market Square. Many of them hurled insulting epithets at the troops and for a moment the situation looked ugly. The troops, however, took things calmly, fixed their bayonets and soon restored a degree of order. Then, with a large crowd following him, De Valera was taken to the county jail. He offered no resistance.

A despatch from Limerick says:—After his dramatic arrest at Ennis, De Valera was brought to Limerick in an armored car and safely lodged in the county jail, where he is heavily guarded. The strictest precautions are being taken against any attempt at rescue. The military authorities, while naturally unwilling to state the prisoner's ultimate destination, say he was not hurt by his alleged fall, but is dejected. He has not eaten yet, but there is no reason to suppose that he intends to go on a hunger strike.

DeValera Taken to Dublin Under Strong Escort

A despatch from Dublin says:—Eamonn De Valera was removed from Limerick to Dublin under a strong escort on Friday, says the Central News.

A despatch to the Daily Express from Rome says the Irish Republicans appealed to Pope Pius to intervene in behalf of De Valera. Cardinal Gasparri, the Papal Secretary of State, replied that the Vatican lacked power to intervene officially.

ONLY THREE MEMBERS IN BY ACCLAMATION

Eighty Republicans Placed in Field in Irish Free State.

Dublin, Aug. 19.—The nominations for the parliamentary elections furnish no surprises. On the average there are less than three candidates for each of the 153 seats, grouped into thirty constituencies.

The Republicans carried out their decision to increase their list of candidates, and these number more than eighty. Each candidate was required to deposit £100 but the Republicans did this seemingly without difficulty. The only constituency uncontested is that of Trinity College, where the three present members, Sir James Craig, and Professors Allen and Thrist, are returned unopposed. There are only two instances of double candidature, Prof. John McNeill, Minister of Education, standing for Clare as well as the National University, and Sir Michael Hayes, speaker of the Dail, for both Dublin City South and the National University.

The Republicans put forward two candidates for the three National University seats, in Prof. Stockley, one of the present members, and Prof. Hugh Ryan. Michael Collins' sister, Mrs. O'Driscoll, is a candidate for Dublin City North. She is an ardent supporter of the Free State.

Joseph McGrath, Minister of Labor, had announced his intention of retiring from public life but under strong pressure from President Cosgrave finally consented to nomination for North Mayo in opposition to Patrick Rutledge, deputy of Eamonn de Valera and now "Acting President of the Republic."

In Waterford, Mrs. Cathal Brugha, widow of the Sinn Fein Minister of Defence, killed after the Four Courts fighting in 1921, is the only Republican candidate considered to have a good chance of success. Major Redmond, son of the Irish constitutional leader, is also expected to secure an electoral quota in Waterford. Nineteen candidates were nominated for the eight seats in Donegal, ten for the four seats in Cavan, and eighteen are contesting the Leitrim-Sligo constituency, of which six are Government supporters, five Republicans, one Independent. Leath has five nominees, including three members of the late Dail and Frank Aitken, former chief of staff of "The Irish Republican Army" under de Valera. Kevin Barry's brother, Michael, opposes President Cosgrave in Kilkenny.

Dr. Banting Avoids Interviews on Homeward Trip

A despatch from Quebec says:—Among the prominent cabin passengers on the Montcalm, which arrived on Friday, was Dr. F. G. Banting, of insulin fame, Toronto, who hid himself away from the newspaper reporters who hoped to interview him. Dr. Banting continued by the Montcalm to Montreal from which city he will proceed direct to Toronto.

HOME BANK OF CANADA CLOSES, CURATOR HAS BEEN APPOINTED

A despatch from Toronto says:—Serious impairment of the assets of the Home Bank of Canada having been caused by losses sustained in a number of large loans and investments, it has been deemed advisable that the institution should suspend payment. Announcement to this effect was made late on Friday afternoon following a meeting of the Board of Directors, at which A. E. Calvert, recently appointed assistant general manager, presented a report which, according to an official statement later issued, was of a "serious character," the immediately liquid assets of the bank having been practically depleted. Negotiations with other banks for the absorption of the Home Bank having proved futile, it was found necessary to close the doors of the institution, the affairs of which will be administered by A. B. Barker, who has been appointed curator under the provisions of the Banking Act. He will be required to present a report within three months' time, when the Canadian Bankers' Association will decide what further action is to be taken. Mr. Barker has been manager of the Toronto Clearing House for the past six years, and previously had long service with the Bank of Toronto, holding the post of superintendent when he resigned.

It was stated on Friday that within the past four days there have been heavy withdrawals of funds in the form of depositors, rumors that the bank was in difficulty having such circulation recently in the financial district. Among the number of large loans referred to in the official statement as of a "bad and doubtful" nature it is stated is one to a large pulp and paper company which had been operating in British Columbia, but which for some time has been closed down. It is believed that, to a very considerable extent, loans to this enterprise are responsible for the straits in which the Home Bank has been placed.

Irish Rebel Chief Captured
Eamon de Valera, who was arrested by Irish Free State troops as he was making an election speech at Ennis, Ireland.

Two Hundred Killed by Typhoon in Chinese Town

Hong Kong, Aug. 19.—More than one hundred persons were drowned and about one hundred persons killed and injured ashore and about fifty junks and sampans capsized during the typhoon at Macao on Saturday. Many persons were entombed when houses collapsed.

Soldiers and firemen worked energetically to rescue the persons buried under the debris of fallen houses. The floating plant of the Netherlands Harbor Works Company was not damaged, but the company's dredger Rotterdam dragged anchor and grounded on a mud bank undamaged. Trees in the public squares were uprooted and the roof was blown off the Catholic cemetery chapel.

Prince Books Passage for Canada on Liner

A despatch from London says:—The Prince of Wales has provisionally booked his passage for Canada on the Empress of France, to sail on September 5. He will go straight from Quebec to his ranch in Alberta. He expects to return to London about the end of October. His Royal Highness left Thursday night for Glamis Castle, the residence of the Earl and Countess of Strathmore, parents of the Duchess of York, to join the Duke and Duchess of York, who are visiting at Glamis Castle.

£6,000,000 Loan for the Irish Free State

A despatch from London says:—Great Britain, according to the Morning Post, is arranging a loan of £6,000,000 for the Irish Free State. In effect, the paper says, the Government is abandoning its claims to compensation for the damage to British property in Southern Ireland during the disturbed period.

Only 10 Per Cent. Damage by Hail to Alberta Crops

A despatch from Calgary says:—While there is yet time for considerable damage to crops in this province from hail, present weather conditions indicate that the worst has passed, with the result that estimates by heads of various companies place the total loss in the province at ten per cent of the entire crop.

Natural Resources Bulletin

The Natural Resources Intelligence Service of the Department of the Interior at Ottawa says:—The products of Canada's forests are so numerous and varied that it is difficult to select an industry in which some class of wood product is not an essential factor. A report recently issued by the Dominion Bureau of Statistics gives the value of the output of the Canadian saw, door and planing mill industry for 1920 as \$53,368,656, of which dressed lumber and interior woodwork formed the greater proportion, although boxes and packing cases, butter and cheese boxes, handles, etc., occupy a prominent place in the output. Ontario has the largest number of plants, 342, of the 810 in Canada, the investment of the province in this industry being \$28,646,512. Ontario employs 5,815 of the total of 11,812 engaged, and of the total value of the Canadian output, \$53,368,656, Ontario produced \$29,874,994. The 5,515 employees in this secondary industry, together with their dependents and others, will thus have a very material interest in protecting the forest from fire.

DEPOSITORS IN HOME BANK MAY NOT LOSE

Shareholders May be Assessed Upon Holdings Besides Losing Value of Stock.

Toronto, Aug. 20.—Although the announcement of the suspension of the Home Bank of Canada has come as a severe blow to thousands of depositors, strong hope is felt that when the assets are realized upon to the fullest extent, though probably at the cost of a levy in part at least upon shareholders under the double liability provision, persons whose money has been deposited with the bank will be indemnified to some extent against loss.

The curator, Mr. A. B. Barker, announced on Saturday that all bills of the Home Bank would be accepted at par at any other banking institution, thereby relieving any anxiety among unduly timid holders.

So far as depositors are concerned they are likely to obtain a percentage of their money within ninety days, the period for which operations of the Home Bank have been suspended, while other payments will likely be forthcoming as the process of liquidation progresses.

The savings deposits total \$17,887,002, and the assets are placed at \$27,918,096, of which about \$11,000,000, or about 44 cents on the dollar, are believed to be certain of realization. In addition to this are real estate, mortgages and bank premises exceeding \$600,000. Then there is the large sum of \$15,757,320 under the heading of "Other current loans and discounts in Canada," and in this it is expected that the large loss sustained will be found.

It appears inevitable that the shareholders will not only lose the value of the stock, but will be called upon to pay at least a portion of their double liability, a phase of the Canadian banking system which has always been regarded as tending so largely to the security of the depositors. Much, it is said, now depends upon whether the assets and holdings of the bank are thrown on the market, or whether they can be conserved and sold at a more opportune time.

NEW MANITOBA WHEAT EXPORTERS' GRAIN EXCHANGE ENDEAVOR TO ARRANGE FOR TRANSPORTATION DOWN LAKES.

Winnipeg, Man., Aug. 19.—New wheat from Manitoba continues to grade away below normal. Of 27 cars received at Winnipeg on Saturday, eleven went to special grades established No. 4, 5 and 6. But seven even lower. Color, size and weight were off, worse than has been known for some years. The crop averages sixteen bushels to the acre. Exporters' Grain Exchange will meet the Grain Board on Tuesday in a final effort to arrange working conditions to get the new grain down the lake, since it is apparently settled that no United States boats will be in the traffic this fall. The plan to route some fifty million via Duluth is still under consideration.

The "Shy Doctor."
Because he shunned all publicity and evaded the lionizing that London was prepared to give him, Dr. F. G. Banting of Toronto, the discoverer of insulin, was known as the "Shy Doctor." He was caught by the photographer leaving a conference of world famous doctors.

NOTABLE CABINET CHANGES AT OTTAWA

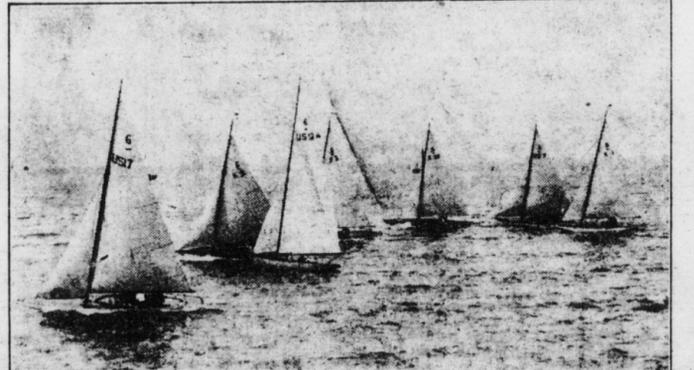

Portfolios Are Given to Hon. E. M. Macdonald and Hon. T. A. Low.

A despatch from Ottawa says:—Important Cabinet changes were announced Friday, namely: Hon. J. A. Robb, Minister of Trade and Commerce, since the formation of the King Government, takes the portfolio of Immigration and Colonization. Hon. T. A. Low, member of the Cabinet without portfolio, succeeds Mr. Robb as Minister of Trade and Commerce.

Hon. E. M. Macdonald, who has been acting Minister of National Defence, becomes Minister of Defence. The changes entail two by-elections. Mr. Macdonald will seek re-election in Pictou and Mr. Low will have to seek re-election in South Renfrew.

Until the present appointment of Mr. Robb, the Immigration Department has been in the hands of Hon. Charles Stewart, Minister of the Interior. Mr. Robb, it is announced, will give full attention to developing the immigration plans already worked out by Mr. Stewart and the Government for an energetic and carefully considered campaign of immigration and settlement.

Writes for the by-elections in Pictou and South Renfrew will be issued immediately. In both cases nominations are fixed for September 6th and polling for Sept. 20th. In the last general election Mr. Macdonald had a majority in Pictou of 3,568, although in 1917 the constituency returned a supporter of the Union Government by a majority of 757. In 1911 Mr. Macdonald's majority was 264. In South Renfrew Mr. Low had in 1912 a majority of 1,651.

BRITISH SAILORS RETAIN INTERNATIONAL HONORS
The British-American Cup contest for yachts of the international six metre class, at the Isle of Wight was won by the British entrant by 26 to 15 points. The contests take place alternately in British and United States waters. The picture shows the graceful little vessels getting into position for the start of one of the races.

BANDITS HOLD NO FOREIGN PRISONERS

Priests, Disguised in Chinese Clothes, Make Good Their Escape.

A despatch from Hankow, China, says:—The Reverend Michael McHugh and the Rev. Daniel Ward, Catholic priests who were kidnapped Thursday at Tsaoohih by Chinese bandits who looted the town, have escaped according to advices received here early on Saturday. It is said the priests disguised themselves in Chinese clothes and eluded their captors. The late reports from Tsaoohih indicated that the bandits burned the London mission hospital and its adjoining buildings instead of the Catholic hospital. The first accounts of the bandit raid told of the burning of the Catholic institution. With the escape of the two priests, it is now believed the bandits have no other foreign captives, although they are holding more than one hundred Chinese prisoners.

Greece Pays Interest on Debt to Canada

A despatch from London says:—The Greek Government paid to the Dominion of Canada on account in London \$225,000 interest on its debt to the Dominion, which is approximately \$8,000,000. The \$225,000 interest is for the first six months of this year.

To Visit Canada.
Frank Hodges, the youngest and one of the best known of the British Labor M.P.'s, arrives shortly in Canada en route to the Trades Congress in Vancouver. He will also address the Labor Day gathering at the Canadian National Exhibition. Mr. Hodges is an intimate friend of the Prince of Wales.

The mother of John Ruskin, the English writer, never allowed him to row or ride for fear of accidents.

E. A. MAYHEW & CO.

What promise did Jesus make to those who believe in His works?—
John 14: 11, 12.

NEWBURY

The Newbury-Mosa Women's Institute held their regular monthly meeting at the home of Mrs. W. J. Watson on August 16th, about sixteen ladies being present. After the business matters were attended to, Mrs. Ed. Haggitt gave a good reading and a recitation was given by Doris Reycraft, followed by a dainty lunch served by the hostess and her daughter, for which a hearty vote of thanks was passed.

The citizens of this district were shocked and grieved on Monday to learn that Rothwell Winship had died suddenly at his home, a mile east of the village, in his 89th year. Much sympathy is felt for the family by the community who feel a personal friend to each has gone.

Rev. James Bracken and wife, of Hamilton, called on friends in town Monday.

Mrs. Francis Graham returned to Toronto on Monday after visiting her daughter, Mrs. R. H. Moore.

Mrs. Will Callan and son, of Duluth, visited friends here last week.

Robin Haggitt, wife and baby, of Detroit, are visiting his parents.

Miss Alena Teifer, of Port Huron, is visiting at her home here.

Our readers will extend their good wishes to James Patterson, who passed his 96th birthday on Monday, August 20th.

Miss Hazel Fennell left on Thursday for Moriac, Sask., to resume her work on the teaching staff of the school.

Mrs. Gordon Haggitt of Windsor, is visiting Mrs. Wm. Glennie.

Mrs. Emma Sellers spent last week with her cousin in London.

The Anglican Guild will have a sale of homemade baking on Saturday, 25th, at Mrs. Margaret Crim's.

Miss Alberta Armstrong is spending some time at Port Stanley, having motored there with her uncle, Dr. B. E. Wilson, of London, who was here last week.

Our ball team were the winners at Weekes' picnic last week, defeating a team under the name of Delaware, but in looking over the score card we find the names of the three Swales brothers from Komoka. Dr. Pardy from Mount Brydges, and A. Conkey, supposed to be from Strathroy. The other four players may belong to Delaware but we have our doubts about two of them. Score, 3-1. Batteries: Newbury—Connely and Fletcher; Delaware—Swales and Lamont. Connely allowed but one hit.

On Friday evening the Glencoe ball team visited Newbury and played a friendly game with our boys. They put up a very fair game considering that they have only played a few games this year. Our boys won out in the last innings by one run. Score, 9-4. Batteries: Newbury—Holman, Logan and Fletcher; Glencoe—Hamilton and Leitch.

The Globe Casket Company's team from London are billed for a game of

ball on Old Boys' Park Saturday afternoon, September 1, at 4 o'clock.

Newbury ball team played a return game with Glencoe on the latter's grounds Monday evening. There was nothing to it but Bayne. He had the Glencoe boys at his mercy from start to finish, only 23 going to bat in 7 innings. The batting honors were carried off by Harry Armstrong and Ray Holman, with a home run each, and by Tim Fisher, with a three-bagger. Score, 9-1. Batteries: Newbury—Bayne and Logan; Glencoe—Hamilton and Leitch.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

CAIRO

The teen age girls of the Presbyterian congregation were entertained by Mrs. Robert Huffman at her home Wednesday afternoon. Piano selections and singing were enjoyed by all. Scott McKay, of St. Thomas, provided the main feature of the afternoon by giving a talk on "A Girl's Preparation for a Life of Service," with special reference to work in the home and foreign mission fields. Lunch was served by the Treasurer Seekers class.

Claude Clifford and sister and Mr. and Mrs. Frank Bessemer, all of Detroit, were Sunday visitors at the home of the former's father, T. C. Clifford.

Mr. and Mrs. Will Ball and Miss Mae Ball, of Strathroy, accompanied by Mrs. Let's Smith, of London, spent Sunday at the home of Mrs. Agnes Smith.

Dugal Smith and family are leaving for the West Friday on a three months' trip.

Vera McGugan is visiting in London, the guest of her sister, Mrs. Knott.

Dr. Leo Banghart, of Detroit, called to see old friends Saturday on his way to London to spend his vacation with his parents.

WOODGREEN

Born—to Mr. and Mrs. Wesley Henderson, a son.

John Grover left for the West on Wednesday.

Mrs. McKibbin is spending the holidays with her parents, Mr. and Mrs. H. Moore.

Miss Connie Pearson is visiting at Harry Harvey's.

Miss Stella Long has returned to Melbourne after visiting friends here.

Misses Alice and Ethel Harvey have returned from visiting London friends.

H. Harvey and Lawrence spent Sunday in St. Thomas.

Mrs. A. Daun and Miss D. McIntyre are visiting in London, Stratford, Burk's Falls and Toronto.

Mrs. G. Scrimshaw received word Monday of the sudden death of her father, Mr. Winship.

Albert and Pauline Bridgette, of Wardsville, spent a few days with Margaret Waterworth last week.

Mr. and Mrs. C. Austin, of Detroit, visited her grandmother, Mrs. Chas. Grover.

Mrs. W. Waterworth, of Toronto, is visiting Mrs. Joe Simpson.

WARDSVILLE

Rev. R. J. Murphy is spending a couple of weeks at his old home in Alliston.

June Hitchcock, of Detroit, is a guest of Marion Reid.

Jack Douglas, of Windsor, is spending a few days at his home here.

Miss Mary McIntyre is spending a week with friends in London.

Thos. H. Weer spent the week-end with his brother in Port Huron.

Arthur Jackson, of St. Thomas, is visiting at Will Atkinson's.

Gordon McIntyre left Monday to take a position in Windsor.

Mrs. A. Miller has returned after spending a week with relatives at Highgate.

Margaret Harold has returned after a two weeks' visit in St. Thomas.

J. Thomas spent the week-end in Windsor.

Mr. and Mrs. Clayton, of Highgate, were week-end visitors of Mrs. A. Miller.

Russell McPherson, Mr. McDowell and Wm. Main left Wednesday for the West on the excursion.

Mrs. E. Purdy spent last week in Windsor and Detroit.

Joe Guest spent a few days in Windsor and Detroit last week.

Mr. and Mrs. W. H. Parnall spent a few days at Bruce Beach last week.

The Wardsville boys played a friendly game of ball on Tuesday with the team from Florence.

The game resulted in a victory for the home team, the score being 5-3.

Miss Dorothy Voce and brother Jack, of Detroit, are visiting their grandparents, Mr. and Mrs. J. Voce.

George Archer and daughter, Mrs. Minkner, of New York City, are visiting Miss Maggie Archer.

Mrs. J. Sloan and Victor have returned from a week's visit with relatives in London.

Mrs. Nelson, of Detroit, visited Mrs. J. Thomas last week.

Miss Winnifred Parnall is visiting friends in Leamington.

Betty Leake, who has been visiting her aunt, Mrs. A. Douglas, returned to her home in Toronto on Friday.

Mr. and Mrs. Wm. Turk spent a few days with their son in Bradford.

Jack Simpson and Tom and Clara Tunks spent a few days in Windsor last week.

Rev. Mr. Johnson, of Moosejaw, was the preacher at the Presbyterian church on Sunday.

Mrs. G. Harold and Glen are visiting relatives in St. Thomas.

Mr. and Mrs. Tibet called on old friends in the village on Sunday.

Mary Hurley, of Glencoe, is visiting Mrs. Henry Archer.

J. Wilson has purchased a new Chevrolet sedan.

Mrs. Will McMaster spent a week with her son Garret in Windsor.

Dr. and Mrs. Claire and sons Harvey and Jim returned to their home in Toronto on Tuesday. Miss McVicar went with them for a short visit.

Mr. and Mrs. Harrington have returned to their home in Windsor after visiting Mr. and Mrs. Frank Henderson.

Lorraine Henderson went to Detroit Monday for a week's visit.

DAVISVILLE

Mr. and Mrs. Clayton Armstrong and little son, of Detroit, spent a few days with the former's parents, Mr. and Mrs. Joseph Armstrong.

Mr. and Mrs. James Gibson and two daughters, Florence and Alice, have returned to their home in Detroit after spending a week with Mrs. Gibson's mother, Mrs. Thos. Durfee.

Mr. and Mrs. Clarence Beaupre and daughter Marjorie, of Grosse Pointe, are visiting Mrs. Robert Armstrong.

Mrs. Shred has returned to her home in Toronto after spending a couple of weeks with her son Percy.

Mr. and Mrs. Joseph Armstrong, of London, were Sunday visitors at the home of Mrs. Agnes Smith.

Mr. and Mrs. Ernest Armstrong and family, Mr. and Mrs. Clayton Armstrong and son and Mr. and Mrs. Wm. McEae and son spent a jolly good day at Port Stanley.

MOSA

Miss Florence Hick, of Brooke, spent a few days here last week.

Ronald Fletcher, of London, was the guest of his aunt, Mrs. Duncan Gillies, a couple of days last week.

Mr. and Mrs. Archie Walker and family, of Ubyly, Mich., called on friends here while attending the McLaughlin reunion.

Miss Katherine McIntyre, of Detroit, spent the week-end with her mother, Mrs. C. McIntyre.

Mr. and Mrs. W. C. Hoone and Mr. and Mrs. Sharnan motored from Butler, Pa., and are camping here for a couple of weeks.

Andrew Douglas and Mitchell Innes motored to London on Tuesday.

MELBOURNE

Melbourne, August 15.—The following students were successful in obtaining their complete junior matriculation:—Arthur Elder, Garnet Long, Hettie Cawthorpe, Sadie Switzer, Agnes Alexander. Complete Normal entrance:—Margaret Murray, Margaret Campbell, Robert Brown, Doris Campbell, Jean Lockwood, Edward Bateman. The following failed in the subjects mentioned:—Avis McRoberts, English composition; Winnifred Wallace, ancient history; Rena Kapayo, British history, ancient history; Edward Bateman, Latin authors, Latin composition, French composition; Sadie Johnston, English composition, ancient history, geometry; Annie Johnston, ancient history, composition; Stella Long, composition; Sadie Mullins, composition, geometry.

A number of members of Irene Rebekah Lodge, of Kerwood, motored to this village and spent a social time with Anna Lodge here. The District Deputy President, Mrs. Walthen, of Kerwood, gave a most interesting address, as well as others of Kerwood lodge. At the close of the meeting lunch was served by the members of Anna Lodge. The remainder of the evening was spent in a carpet-ball contest, the side chosen by the D. D. P. winning the game.

Mr. and Mrs. Frank Johnston, of Windsor; Mrs. Charrington, of Washtenaw, and Mr. and Mrs. James Jeffery are the guests of Mrs. James Collier.

Mrs. E. Dyer gave a birthday party for her little daughter, Lila, and her nephew, Chester Collier. Fifteen guests were present. Many interesting games were played and a birthday cake with five burning candles delighted the children. When leaving for home each guest was presented with a basket of candy.

Melbourne, August 18.—The basket picnic held here today under the auspices of the U.F.W.O. was well attended. The brass band and Harmonic Quartette, of London, furnished a splendid program. The games were most interesting. The soft ball game between Melbourne and Caradoc girls was one of the best of the season, the Caradoc girls winning. Night came too soon to finish the ball game between Melbourne and Delaware. The proceeds were in aid of a new fence for the cemetery.

Mr. and Mrs. Harry Brown, Archie Caruthers, Owen Coombs, Tom Howe, Fran Small and Frank Hoover left for the West on Wednesday.

Mrs. McCartney, of Toronto, is the guest of Mrs. George Richards.

Miss Harris, of Glencoe, is the guest of Mrs. E. Cornelle.

Melbourne, August 20.—The closing of the Home Bank came as a great surprise to this community and has placed many people in a trying position, with all their savings locked up and no money in the home. Many people in this village and community are at a loss to know how to manage and "carry on." With plenty of money in the bank they have found it necessary to give a note in order that they may have money to meet necessary demands, while others have been compelled to change their plans completely. Some who never asked for credit in their lives have found it necessary to do so now, and ninety days is a long time to wait for their own money which they thought was where they could get it at a minute's notice. Long anticipated trips have had to be cancelled. Some will not be able to go to college this year, as all their savings are in the Home Bank. Fortunately for some of the people they had accounts in the two banks, which will help out. However, the majority of those depositors are very hopeful that they will receive 100 cents on the dollar, and there are no shareholders in this community.

Rev. G. W. Oliver and family have returned from their vacation. Mr. Oliver preached Sunday morning and evening. Sermons are being made to hold jubilee services the first two Sundays in September. Dr. Henderson, of Vancouver, was expected to preach, but a message has been received that he will not be able to attend. A history of the church is being prepared and will be put in book form, with the photos of the ministers who have had charge.

STRATHBURN

Mr. and Mrs. Earl Coler and D. H. McEae motored from Detroit by way of Port Huron and spent Sunday with Mr. and Mrs. D. H. McEae.

Duncan R. McEae, George Coulthard, Will Coulthard and L. D. Suddall left on the harvesters' excursion last week.

Misses Jean and Margaret Coulthard have returned from their trip down East.

Mr. and Mrs. Duncan A. McEae, of California, spent a few days visiting friends in this vicinity.

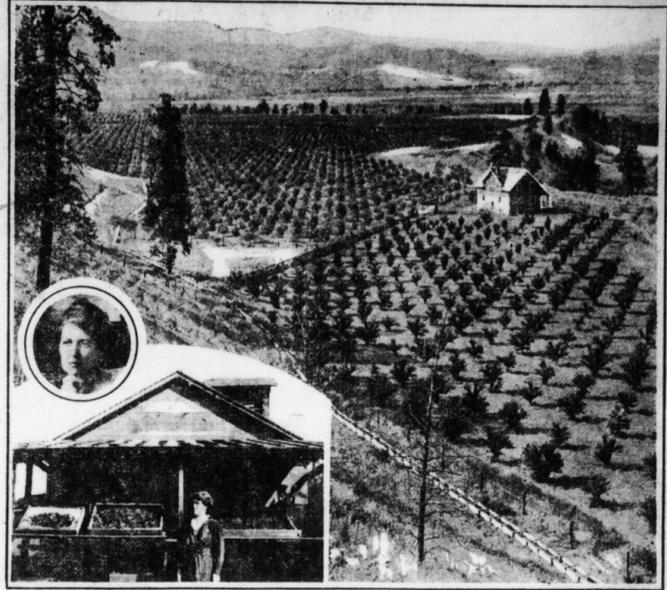

MODEL CENTRE

On Friday evening an exciting game of softball was played here between the Kilmartin boys and the Model Centre "Heart-breakers." The game ended with the score in favor of the visiting team. The regular meeting of the club will be held on Friday evening, August 24th.

Miss Elda Campbell has returned home after spending a couple of weeks near Watford.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Okanagan and Fruit Conservation

This view is that of a flourishing new fruit district in the Okanagan Valley near which Mrs. Smith (inset) has opened her dehydration plant (bottom left).

THE fruit products industry of Mrs. M. B. Smith of Naramata, Okanagan Valley, is a story of Canadian initiative that has assumed large proportions. After extensive research work and experimenting on a small scale, Mrs. Smith is this year opening up a large plant for the dehydration of fruit at Poplar Grove, between Naramata and Penticton, where seventy fruit products will be prepared instead of eleven as sent out by Mrs. Smith from her ranch on the benches.

The site of the new factory is a point in the very heart of the fruit district and convenient to the railway. A siding of the Kettle Valley Railway will be run into the premises.

The most important factor of the enlarged scope of the work is that the new industry will utilize much waste and perishable fruit that would otherwise go to waste as most of the fruit must be in a tree-ripened condition for dehydration and therefore much too ripe to ship.

Mrs. Smith was visiting on the premises in the early stages of the war when conservation of food was beginning to be a vital question. She saw dried logan berries for the first time and it led her to dwell on the possibilities of the dehydration of other fruits and vegetables. Later, visiting in the Okanagan Valley, she was much concerned over the large

quantity of fruit and vegetables that could not be shipped so, with broad vision and patriotic idea, she began the evaporation of fruit. Mrs. Smith made an extensive study of the work and persisted, despite the fact that men of experience declared that she could not dry fruit, other than apples. Now she is in the unique position of being the first one in Canada who has dried fruit, other than apples, on a commercial basis. Her dried peach is the only totally peeled peach on the market, either in Canada or the United States.

Mrs. Smith, being very much interested in movements to promote the practical usefulness of women, declares that there is a large opportunity for women in this work. Having no desire to keep a monopoly of the new industry of which she may be said to be the founder, she hopes that all women in fruit growing districts may start small evaporating plants to care for their surplus fruits, not only for their own households but also for export.

By dehydration a large part of the fruit and vegetables which otherwise spoil is saved. The products are so reduced in weight and bulk that one railway car or one ship will carry as much dehydrated fruit as ten of fresh.

Mrs. Smith, in continuing to make a study of conditions, is opening up a new field and demonstrating that women are the natural housekeepers of the race.

CASHMERE

Mr. and Mrs. Wm. Radley and daughter, of Detroit, are visiting Mrs. Radley's parents, Mr. and Mrs. Isaac Saylor.

John Saylor, of Galt, is spending a vacation at his home here.

Mr. and Mrs. C. F. Smith attended the Smith reunion at Springbank on Thursday last.

Threshing is the order of the day. Clarence Tunks and George Hewitt left for the West last week.

Miss Jean Taylor spent a few days in Chatham with her grandmother, Mrs. M. J. Taylor.

A number of young folks from here spent Sunday at Belle Isle, taking the boat from Chatham.

PORT GLASGOW

Mr. and Mrs. Allan Sittler, of Bothwell, and Mr. and Mrs. Earle Tunks and Walter and Glen spent Sunday at Port Glasgow.

On Sunday night about 6 o'clock a McLaughlin car burned up near Angus Taylor's. When found, it was burning, but the occupants had gone. It bore a Quebec license and is believed to have been a stolen car.

Mr. and Mrs. Calvin Sittler and sons and Lyman Hoxie spent Sunday at B. F. Jeffery's, Newbury.

A number from here went to Springbank and held a picnic recently and report an excellent time.

There will be four days of trotting at the Canadian National Exhibition this year on Sept. 1, 4, 5, 6.

SHIELDS

The annual meeting of the Ferguson's Crossing Needle Club was held at the home of Mrs. Hugh McAlpine on Thursday, August 2, with a good attendance. Mrs. Purcell, the retiring president, conducted the meeting. The business of the past year was reviewed, and new officers appointed. There was \$15 taken in from all collections. Lunch was served by the hostesses. The next meeting will be held at the home of Mrs. D. C. McTavish. Everyone is requested to be present, as the new officers want to get the year's work planned. Roll call will be answered by the letter W.

It is claimed that practically everything made in Canada from a fountain pen to a locomotive is on display at the Canadian National Exhibition. There are over 15,000 exhibits in all.

To Save Money Is To Grow

To save money is to grow—to add happiness and comfort to your life.

In the Bank of Montreal there is a Savings Department where interest is paid regularly on all deposits and where your account is welcome, no matter how small it may be.

If a personal visit is inconvenient,
you can open an account by mail.
