

SYNOPSIS OF ALLIED PEACE TERMS PRESENTED TO AUSTRIA

A despatch from St. Germain says:—An epitome of the Allied peace terms presented to Austria on June 2 follows:

Austria must accept the covenant of the league of nations and the labor charter.

She must renounce all her extra-European rights.

Austria must recognize the complete independence of Hungary.

She must demobilize all her naval and aerial forces.

And Austro-Hungarian may be surrendered to the Allies.

Twenty-one specified auxiliary cruisers to be disarmed and treated as merchantmen.

All warships, including submarines, under construction shall be broken up and may only be used for individual purposes.

All naval arms and materials must be surrendered.

Future use of submarines prohibited.

Military clauses are reserved.

Boundaries of Bohemia and Moravia to form boundary between Austria and Czechoslovakia, with minor rectifications.

Allies later to fix southern boundary (referring to Jugo-Slavia).

Eastern boundary leaves Marburg and Radetzburg to Jugo-Slavia.

Western and northwestern frontiers (facing Bavaria and Switzerland) unchanged.

Austria must consent to abrogation of treaties of 1839 establishing Belgian neutrality.

Austria must agree to new Belgian boundaries as fixed by Allies.

Similar provisions with respect to neutrality and boundaries of Luxembourg.

Although more exact Allied demands of Austria are not given in this summary, it is believed that the following are included:

She must renounce all her extra-European rights.

She must demobilize all her naval and aerial forces.

She must accept the covenant of the league of nations and the labor charter.

She must renounce all her extra-European rights.

She must recognize the complete independence of Hungary.

She must demobilize all her naval and aerial forces.

And Austro-Hungarian may be surrendered to the Allies.

Twenty-one specified auxiliary cruisers to be disarmed and treated as merchantmen.

All warships, including submarines, under construction shall be broken up and may only be used for individual purposes.

All naval arms and materials must be surrendered.

Future use of submarines prohibited.

Military clauses are reserved.

Boundaries of Bohemia and Moravia to form boundary between Austria and Czechoslovakia, with minor rectifications.

Allies later to fix southern boundary (referring to Jugo-Slavia).

Eastern boundary leaves Marburg and Radetzburg to Jugo-Slavia.

Western and northwestern frontiers (facing Bavaria and Switzerland) unchanged.

Austria must consent to abrogation of treaties of 1839 establishing Belgian neutrality.

Austria must agree to new Belgian boundaries as fixed by Allies.

Similar provisions with respect to neutrality and boundaries of Luxembourg.

Although more exact Allied demands of Austria are not given in this summary, it is believed that the following are included:

Boundaries of Austria, Czechoslovakia and Jugo-Slavia to be fixed by a mixed commission.

Czechoslovakia and Jugo-Slavia must agree to protect racial, religious and linguistic minorities.

Scavens dealing with war prisoners and graves are identical with German treaty.

Guarantees of execution of treaty correspond to those in German pact.

Austrian nationals guilty of violating international laws of war to be tried by Allies.

Austria must accept economic conditions and freedom of transit similar to those in German treaty.

Both new Slav nations and Rumania must assure freedom of transit and equitable treatment of foreign commerce.

Austria must recognize full independence of all territories formerly a part of Russia.

Brest-Litovsk treaty is annulled.

All treaties with Russian elements concluded since revolution annulled.

Allies reserve right of restitution for Russia from Austria.

Austria must consent to abrogation of treaties of 1839 establishing Belgian neutrality.

Austria must agree to new Belgian boundaries as fixed by Allies.

Similar provisions with respect to neutrality and boundaries of Luxembourg.

Although more exact Allied demands of Austria are not given in this summary, it is believed that the following are included:

Markets of the World

Wheat—No. 1 Hard, \$2.20; No. 2 Hard, \$2.15; No. 3 Hard, \$2.10; No. 4 Hard, \$2.05; No. 1 Soft, \$2.15; No. 2 Soft, \$2.10; No. 3 Soft, \$2.05; No. 4 Soft, \$2.00.

Barley—No. 1, \$1.80; No. 2, \$1.75; No. 3, \$1.70; No. 4, \$1.65.

Oats—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Rye—No. 1, \$2.50; No. 2, \$2.45; No. 3, \$2.40; No. 4, \$2.35.

Flour—No. 1, \$4.50; No. 2, \$4.45; No. 3, \$4.40; No. 4, \$4.35.

Corn—No. 1, \$1.20; No. 2, \$1.15; No. 3, \$1.10; No. 4, \$1.05.

Soybeans—No. 1, \$1.80; No. 2, \$1.75; No. 3, \$1.70; No. 4, \$1.65.

Cotton—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Wool—No. 1, \$1.80; No. 2, \$1.75; No. 3, \$1.70; No. 4, \$1.65.

Iron—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Steel—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Coal—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Oil—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Gas—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Electricity—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Water—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Telephone—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Post—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Telegraph—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Radio—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Automobile—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Tractor—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Plow—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Harrow—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Roller—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Truck—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Tractor—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Plow—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Harrow—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Roller—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

Truck—No. 1, \$1.50; No. 2, \$1.45; No. 3, \$1.40; No. 4, \$1.35.

CUT DOWN THAT TREE.

Once upon a Time a Certain Man had a Garden. In the center of the garden he planted a Tree. The Tree grew Year by Year until its roots Spread to each Corner of the Garden. The Roots of the Tree Sapped all Life out of the Soil. Then the Man woke up to the Fact that he Must Cut Down the Tree. The Man Order habit, like a Deadly tree, has Fastened its Roots on our Community Life and is robbing Us of Thousands of Dollars each Year. Year by Year we have cultivated this Habit until we are now Face to Face with the growth that is holding back our Community. We must STOP the Growth of this Habit by Cutting it Out.

SUMMARY OF CHANGES IN CANADA'S SYSTEM OF TAXATION

Abolition of customs war tax five per cent on British goods.

Abolition of customs war tax seven and a half per cent on foodstuffs, clothing, boots and shoes, hides, skins, leather, harness and saddlery, agricultural implements, petroleum oils, mining machinery and bituminous coal.

Coffee duty reduced five cents per pound.

Tea from Empire reduced three cents per pound.

Free wheat and potatoes confirmed by statute.

Agricultural implement duties reduced approximately to the scale of the reciprocity pact, as follows: From 27½ to 15 per cent on cultivators, harrows, horse rakes, seed drills, manure spreaders, and weedeaters, and from 27½ to 17½ on ploughs, windmills, portable engines, and traction engines for farm purposes, horse powers and threshing machines and appliances.

On hayloaders, potato-diggers, fodder or feed-cutters, grain-crushers, tanning-mills, hay tedders, smiths and other agricultural implements the reductions will provide for a total reduction in the rate from 32½ per cent to 20 per cent and a similar reduction on farm wagons.

Cement reduced to eight cents per 100 pounds.

Business profits tax continued for this year.

Corporations pay ten per cent on profits in excess of \$2,000.

Income tax increased to United States rates: The normal rate of four per cent, be levied upon all incomes exceeding one thousand dollars, but not exceeding six thousand dollars in the case of unmarried persons and widows or widowers without dependents, and upon all income exceeding two thousand dollars, but not exceeding six thousand in the case of all other persons.

A normal tax of 8 per cent, upon all incomes exceeding six thousand dollars. The surtax commences from five thousand dollars instead of from six thousand dollars, as at present, and increases by graduation, applying firstly to income between five thousand dollars and six thousand dollars and to every two thousand dollars between six thousand dollars and one hundred thousand dollars. Upon incomes in excess of one hundred thousand dollars materially increased rates are levied.

LESS THAN 80,000 CANADIANS TO COME

A despatch from London says:—There are less than 80,000 Canadians now awaiting repatriation. Over 61,000 sailed during May.

The last units of the Fourth Division sailed on the Olympic on Friday.

About 2,500 Canadians, consisting of the hospital staff, remain in France.

In fixing up a guest room put a flashlight on the table. This proves a great convenience.

RID CANADA OF ALL BOLSHEVISTS

Government to Deport Revolutionists and Agitators of All Nationalities.

A despatch from Ottawa says:—A blow at Bolshevism in Canada was struck in Parliament today when a bill was passed giving the Government power to deport red-eyed revolutionists, anarchists, agitators, rioters and all persons who by word or act advocate the overthrow by force or violence of the Governments of Great Britain or Canada, or by word or act create or attempt to create any riot or public disorder in Canada, or who without lawful authority assume any power of government in Canada.

A record for lightning legislation was established when the measure was given all three readings in both Houses of Parliament, and received the Royal assent all on the same day—indeed, the whole thing was done in less than an hour. Support in both Houses was unanimous.

This sudden action on the part of the Government is taken to mean that constituted authority will no longer tolerate conditions such as those prevailing in Winnipeg for the past few weeks. The Government at last has decided to have a showdown and agitators of the stamp of the Winnipeg strike leaders are to be summarily dealt with. The wording of the new clause—"Every person who by word or act... is sweeping and provides that the authorities can arrest a man of suspicion and deport him on the spot. An unusual feature of the clause is that it empowers the Government to deport British subjects.

HUN SHIP LOSSES 3,500,000 TONNAGE

Sunk, Captured and Seized by the Allies During War.

A despatch from London says:—Vice-Admiral Holloway, writing in the Vossische Zeitung, estimates the German mercantile marine before the war at a gross tonnage of five and a half million. In the first and a half years of the war about three-quarters of a million tons were added to the normal year. During the war about 1,000,000 tons were captured by the enemy, of which 325,000 tons were taken on the high seas.

Two and a half million tons took refuge in neutral harbors, but as neutrals came into the war the greater part of this was lost. To Spain a total of 22,000 tons and to Holland 38,000 tons were given in compensation for losses due to the U-boat campaign. He estimates that, in all, Germany lost about three and a half millions of gross tonnage during the war.

BRITAIN WILL PURCHASE ALL AVAILABLE CANADIAN FOODSTUFFS

British Food Controller Has Already Arranged For the Import of Bacon, Butter and Lard—Big Demand For Cheese.

A despatch from London says:—Negotiations are now in progress between Britain and Canada for the supply of all available foodstuffs for the former. High as are prices in Canada at the present, it is in arrangements with her and her sister Dominions that the Mother Country is pinning her hope of cheaper food prices, now that control has been removed. Already arrangements have been made for the export of bacon, butter, lard, etc., from Canada during the present year, while the British Food Controller, Mr. G. H. Roberts, advocates permanent arrangements with a view to making the Empire self-supporting. There has been a rapid reduction in British food prices, but during the last month the figures were 107 per cent. higher than before the war as compared with 138 per cent. in November. It is threatened, however, that next Winter prices may be higher than ever, and it is for this reason that all available surpluses of food are being secured from Canada, Australia, South Africa and the other overseas Dominions. For

MARVELS OF UNDISCOVERED CONTINENT

LITTLE IS KNOWN OF INTERIOR OF SOUTH AMERICA.

Inviting Field for Enterprising Young Canadians With Capital and a Knowledge of Spanish.

The undiscovered continent is South America. It is far less known geographically than Africa, and much of what appears on its maps is derived from the imagination of the cartographer.

Most of the interior of South America has never been explored. Civilization might be said to occupy not much more than the edges of the continent, which, as a whole, is sparsely populated relatively to its vast area.

From this time on, however, a flood of people from over-crowded parts of the world will doubtless pour into it; for it has not only plenty of room to offer, but also fabulous wealth. The natural resources of other terrestrial areas have been to a great extent used up, but those of South America are virtually untouched.

Its tropical regions no longer defy settlement by white men, because of deadly fevers. We now know how to clean them up and make them healthfully habitable. The jungles of the interior harbor many tribes of savages, some of them semi-civilized, but those of them who do not speak Spanish will be quickly wiped out.

Argentine Most Advanced Country.

The most highly developed country in South America is Argentina. Its height (including the state of Buenos Aires and adjacent territory) is grassy and treeless. In the west, along the foothills of the Andes, is a very rich agricultural belt.

The River Plate affords a more extensive system of unobstructed navigation than any other stream in the world. It offers a greater number of miles of navigable water than all the rivers of Europe combined. Steamers of twenty foot draft can go 2,000 miles into the interior, those loading for Europe being able to go 1,000 miles to the wheat fields and ranches to the board their cargoes.

From the Rio Negro south to Magellan Straits stretches an enormous territory—1,000 miles in length—called Patagonia, the interior of which is mostly unexplored desert. Wandering tribes, semi-civilized, inhabit its tallest people in the world, whose stature (the men often exceeding six feet by several inches) caused Magellan to describe the country as the home of giants.

South of Magellan Straits is Tierra del Fuego, a group of islands largely fenced off into great sheep ranches. The aborigines, whose smoke signals caused Magellan to bestow the name Land of Fire—have been either killed off or reduced to servitude.

Valuable Forests in Paraguay.

Paraguay (not far from the middle of the continent) has the most valuable forests in the world, called the Gran-Chaco, or Great Woods. Full of pumas and other huge cats, monkeys of over 50 many species and gorgeous birds, they are composed largely of precious woods, particularly those that will not float in water, such as ironwood and black palm.

In the very far north of South America is the Orinoco, one of the great rivers of the world. From it there are waterways through which vessels can actually make their way nearly 3,000 miles southward into the River Plate. Or a much shorter trip will take them into one or another of the affluents of the Amazon, in the mouth of which lies an island as large as Denmark.

South America today invites the enterprising young man who does no other part of the world. But he will make a mistake to go there unless he has some money and enough Spanish to get along with.

BRINGING UP FATHER

FRENCH HOTEL SERVANTS REFUSE TIPS FROM ENEMY

A despatch from Versailles says:—Because the servants employed at the Hotel des Reservoirs here, where the German peace delegation is quartered, have refused to accept tips from the members of the delegation, the hotel management has announced that it has been compelled to advance prices ten per cent. in order to increase the employees' wages.

The homes of a nation are its strongest forts.

BRIDGING THE PACIFIC OCEAN

BOGOSLOP IS NEWEST PIER OF THE LAND BRIDGE

Building the Will Eventually Be Converted Into Dry Land by Deposit of Silt From Yukon River.

The war has taught us much more about geography than we ever knew before. Among other things, we have learned that the German Ocean (commonly called the North Sea) is not an ocean at all, but the ordinary sea of the world, but nearly a vast shallow sea.

Just such a shallow sea is forming in the shallow piece of salt water that is becoming steadily shallower, owing to the deposition on its bottom of enormous quantities of silt emptied into it by one of the greatest rivers in the world, the Yukon.

At an early distant period the whole of British Columbia will be converted into dry land. Even now we can see the effect of the silt. The silt is being brought down by the Yukon in doing exactly what is accomplished in cities, where the refuse drops eventually form great areas of new ground for the extension of streets and the foundations of houses.

Filling Up Ocean Bed. The river is a land bridge, and in the last century has added thousands of acres of land to the coast of Alaska. It has built the whole of the Alaskan coast, Delta, and has made the coast of Alaska a shallow sea, with a depth of only a few feet within reach of the coast.

When Bogoslof Sea has become a shallow sea, it will be an extremely valuable piece of real estate. Its soil will be of high fertility, and its climate will be so far modified by the great warm currents of the Pacific, corresponding to the Gulf Stream, that the climate will be just what is needed for a successful settlement.

In the meantime, however, more and more land is being added to the coast of Alaska. The silt is being brought down by the Yukon in doing exactly what is accomplished in cities, where the refuse drops eventually form great areas of new ground for the extension of streets and the foundations of houses.

The whole thing is so slowly but steadily rising a phenomenon which geologists attribute to gradual folding up of the earth's crust along that line. There are many gaps, but these are being filled in. Every now and then a new island pops up out of the sea in that region, helping toward the completion of the bridge.

New Pier for Land Bridge. Not very long ago an island suddenly arose from the ocean between Unalaska and Unalut. In the night a strange fire was seen, illuminating the sea brightly for many miles around. Finally a black rock rose up amid steam and smoke, and gradually it grew until it presented the aspect of a pyramid 1500 feet high. The name Bogoslof was bestowed upon it.

Another look at the map, and you will see that the southwestern tip of Alaska extends as an elongated peninsula for in the direction of Asia. It is the Alaskan subcontinent, nay, rather, the eastern section of the future land-bridge, already finished and ready. Over that bridge our descendants may some day travel directly by rail all the way from Halifax to Paris, and via Paris to London, through the tunnel beneath the English Channel that is soon to connect France with England.

Staying "Threwed." The highest friends of Andrew Jackson on the story, could never understand how Jackson became so great, and could not say President of the United States—while the rest of them remained simple pioneer citizens of honor.

When, Mr. Brown, right down the line here, they said, "could they Andy three times out of four, and look where he is now?"

"How did that happen to be a fourth time?" asked some one. "Usual, by it's three times out of four, isn't it?" Sure it is. But Andy, you see, never had the sense to know when he was best. He would never stay "threwed." So by Andy by Jim would get tired out throwing him and stay "threwed" himself. And then Andy would think he'd beat him."

There is a whole sermon in a nutshell in that simple little anecdote. The thing that counts is not how many times you are "threwed," but whether you are willing to "stay threwed." Your adversary, whether he be a person of a misfortune or a difficulty, or just a hard job, can be tired out in the end by throwing you just as surely, if not as swiftly, as by your throwing him. It is merely a question of which of you gives in—in his mind—first, and "stays threwed." Remember that!

No man is great enough, wise enough, or good enough to be trusted with unlimited power.

Gillette Safety Razor

The Shaving Service for Every Man—Everywhere

No Stropping
—No Honing

The NEW KIT SET No. 20

A perfect shaving edge is the daily privilege of the Gillette Safety Razor owner.

Few men can hone or strop a razor sharp enough to stop it pulling on the neck and around the awkward places. With a Gillette you do not depend upon your own skill in stropping and honing.

The precision of the edges of Gillette Blades is assured by scientific methods.

The new Kit Set shown above is most compact, perfectly convenient when you go away for a holiday or on business, and enables you to enjoy the most comfortable shave in a few minutes every morning.

Your jeweler, druggist, or hardware dealer can show you a variety of Gillette Sets at

\$5.00 the set

Gillette Safety Razor Co. of Canada, Limited, Montreal, Canada.

The Latest Designs

The influence of the Russian blouse has invaded the newest creations, and we find that this simple frock has felt its effect. The collection of this season is to be a study in simplicity. The new Kit Set shown above is most compact, perfectly convenient when you go away for a holiday or on business, and enables you to enjoy the most comfortable shave in a few minutes every morning.

The charms of a separate skirt and blouse are well recognized and appreciated. The blouse is developed in a separate crepe and silk skirt is a combination of crepe and plain linen. McCall Pattern No. 8917, Ladies' Waist. In 8 sizes, 34 to 48 bust. No. 8963, Ladies' Skirt. In 5 sizes, 22 to 30 waist. Price, 20 cents each. These patterns may be obtained from your local McCall dealer, or from the McCall Co., 70 Bond St., Toronto, Dept. W.

A GRAND MEDICINE FOR LITTLE ONES

Mrs. Avila Noel, Haut Lameque, N. B. writes:—"I can highly recommend Baby's Own Tablets as they have worked wonders in the case of my baby. I would keep them in the house and would not feel safe without them." What Mrs. Noel says concerning Baby's Own Tablets is just what thousands of other mothers say and feel. The Tablets are a mild but thorough laxative which regulate the bowels and stomach, thereby banishing constipation, colic, indigestion and a host of the other minor ailments of little ones. The Tablets are absolutely guaranteed to be free from opiates or narcotics or any of the other drugs so harmful to the welfare of the baby. They cannot possibly do harm; they always do good. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

BEES USED IN BATTLE

History Furnishes Two Well Authenticated Instances.

Probably the most remarkable weapons of war ever used were swarms of bees. There are at least two well authenticated instances of the use of this novel and stinging war material.

The first is related by Appian of the siege of Themiseva in Pontus, by Lucullus, in his war against Mithridates. Turrets were brought up, mounds were built, and huge mines were made by the Romans. The people of Themiseva dug open these mines from above, and through the holes cast down upon the workmen bees and other wild animals, together with swarms of bees.

The second instance occurred in Enilant. The Dones and Norwegians were attacking Chester, held by the Saxons and some Gallic auxiliaries. After adopting stoning and boiling water in vain against the besiegers, the Saxons threw down all the beehives in the town upon the attackers, who were soon routed.

Good breeding stock will be valuable for years to come. Keep the herd and flock up to a high standard.

AFTER EFFECTS OF INFLUENZA

Often as Serious as the Disease Itself—How to Get New Health.

There are few homes in Canada that were not touched by the sorrow that trailed in the wake of the Spanish influenza epidemic. Estimates of loss of life caused by this epidemic show that it was almost as great as the losses caused by the war, and these take no account of the baneful after-effects which are sometimes as fatal as the disease itself.

Victims of the disease are generally left with impoverished blood and a weakened system. In this condition they are exposed to many dangers unless precautions are taken to purify the blood and strengthen the nerves. The debility that invariably follows influenza is not a disease of origin. It is a general condition of weakness. It must be met by a remedy whose good results will be quickly felt throughout the entire system. In this condition Dr. Williams' Pink Pills will be found invaluable. The action of this medicine is to enrich the blood, and this new, red blood carries renewed health and strength to every part of the body. The case of Mrs. George Leader, Hamilton, Ont., proves the value of Dr. Williams' Pink Pills in cases of this kind.

"I had a very severe attack of Spanish influenza, and it left me in a very weak condition. My appetite completely failed me and the least noise would startle me and make me cry. I was under a doctor's care, and finally he advised me to take Dr. Williams' Pink Pills. I had not been taking them long before I could tell they were helping me. I used altogether nine or ten boxes, and am now feeling as well as ever I did in my life. I believe it had not been for these pills I would have been a chronic invalid."

Such proof as this must be interesting to everyone who suffered from an attack of influenza, and who still feel in any way weakened as the result of the trouble. It points the way to new health and strength, and if you are one of the sufferers you should avail yourself of this medicine at once. You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 25 cents a box or 60 cents from The Dr. Williams' Medicine Co., Brockville, Ont.

Too Deep For Him. An ambitious young author sent a humorous paragraph to the editor of a daily paper. Time passed and he heard nothing, nor was it printed. So he wrote to inquire about it. "I sent you a joke about ten days ago. I have heard nothing respecting its safe receipt, and should be glad to hear whether you have seen it?" The editor's reply was as follows: "Your joke arrived safely, but up to the present we have not seen it!"

Minard's Liniment Lumberman's Friend.

Have a soapstone of good size and you can use it for putting on the back of your stove to set the tea kettle on. It keeps the kettle nice; it keeps the steam from coming out; it does not boil away, and you always have hot water.

Make this beauty lotion cheaply for your face, neck, arms and hands. At the cost of a small jar of ordinary cold cream one can prepare a full quart of the most wonderful lemon skin softener and complexion beautifier by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quart of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Ask for Minard's and take no other. NEW GIANT C.P.R. LOCOMOTIVE.

Ten of the largest locomotives ever built for use on Canadian railways have been under construction for some time at the C.P.R. Angus Shops in Montreal, and one of these, No. 5392, was inspected the other day by President E. W. Beatty, and Vice-President Grant Hall. These locomotives are of the heavy 31000 type and are intended for freight service, being designed and built under the direct supervision of Mr. W. H. Winterford, the Chief Mechanical Engineer.

The weight of the engine and tender in working condition is 400,000 lbs., the engine alone weighing 225,000 lbs. The diameter of the driving wheels is 63 inches. The cylinders are 25½ inches in diameter by 32-inch stroke, which with 300 lbs. boiler pressure makes these locomotives capable of exerting a maximum tractive effort of 56,000 lbs. The diameter of the boiler is 59 inches at the head end. The fire box is 34 inches wide and 120 inches long, and the grates are moved by steam grate shakers.

The cab is of the vestibule type, which is the C.P.R. standard, and every effort has been made to make the accommodations for the engine-men as comfortable as possible. One side of the cab is fitted with a clothes locker 14 inches by 20 inches wide, in which clothes can be hung and lunch pails carried.

The tender has a capacity for 12 tons of coal and 8,000 Imperial gallons of water.

MONEY ORDERS. Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Cotton the same shade is better to mend gloves than silk. Keep Minard's Liniment in the house.

BITS OF HUMOR FROM HERE & THERE

His Fate. Mrs. Shrew—What would you have been if it were not for my money? Mr. Shrew—A happy bachelor.

Old Stuff. Sergeant Overman—You know what a listening post is, don't you, dear? Miss Peachblow—Sure. There's one just outside that door. The parlor maid's on duty there.

Very Broken. Athlete—Did I break it, doctor? Doctor—I will be plain, sir. The arm is broken, the collarbone crushed, the skull is fractured. Athlete—No, no, no! The—did I—break it? Doctor—What, sir? Athlete—The record?

His Heart Out of the Way. Wounded Tommy (in hospital)—Yes, mum. I was shot right through here (pointing to his left side). Visitor—Oh, but that is impossible; the bullet would have gone straight through your heart. Wounded Tommy—My heart was in my mouth, mum.

The Soft Answer. Yogi's grandson had a reputation to keep up. He was regarded as a great "wit." So one morning, when an unopposed professor set the class to write an essay on "Manners," Jimmie sprang to his feet.

"May we write on 'Bad Manners'?" he asked, and lit. "Certainly," replied the professor blandly. "Just write about what you know best."

Thrifty Lad. The other day a boy went to the provision store and asked for "half a dozen black hen eggs." The grocer laughed. "I have a black hen," he said. "How can you tell them, my little man?" "I can. My mother told me so."

"Well, here you are, and see you pick them from the crates!" The boy carefully selected the six biggest ones he could find. "I'll take those," he said. "These are the best."

LEMONS WHITEN AND BEAUTIFY THE SKIN. Make this beauty lotion cheaply for your face, neck, arms and hands. At the cost of a small jar of ordinary cold cream one can prepare a full quart of the most wonderful lemon skin softener and complexion beautifier by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, sallowness and tan and is the ideal skin softener, whitener and beautifier.

Just try it! Get three ounces of orchard white at any drug store and two lemons from the grocer and make up a quart of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and hands. It is marvelous to smoothen rough, red hands.

Ask for Minard's and take no other. NEW GIANT C.P.R. LOCOMOTIVE.

Ten of the largest locomotives ever built for use on Canadian railways have been under construction for some time at the C.P.R. Angus Shops in Montreal, and one of these, No. 5392, was inspected the other day by President E. W. Beatty, and Vice-President Grant Hall. These locomotives are of the heavy 31000 type and are intended for freight service, being designed and built under the direct supervision of Mr. W. H. Winterford, the Chief Mechanical Engineer.

The weight of the engine and tender in working condition is 400,000 lbs., the engine alone weighing 225,000 lbs. The diameter of the driving wheels is 63 inches. The cylinders are 25½ inches in diameter by 32-inch stroke, which with 300 lbs. boiler pressure makes these locomotives capable of exerting a maximum tractive effort of 56,000 lbs. The diameter of the boiler is 59 inches at the head end. The fire box is 34 inches wide and 120 inches long, and the grates are moved by steam grate shakers.

The cab is of the vestibule type, which is the C.P.R. standard, and every effort has been made to make the accommodations for the engine-men as comfortable as possible. One side of the cab is fitted with a clothes locker 14 inches by 20 inches wide, in which clothes can be hung and lunch pails carried.

The tender has a capacity for 12 tons of coal and 8,000 Imperial gallons of water.

MONEY ORDERS. Remit by Dominion Express Money Order. If lost or stolen you get your money back.

Cotton the same shade is better to mend gloves than silk. Keep Minard's Liniment in the house.

Til For Tat.

quiet stream, when these approached a yoke, who remarked, with a yawn: "Time ain't very valuable to you, is it? Here I've bin a-waitin' you three hours, and you ain't had even a bite." "Well," drawled the fisherman, "my time's too valuable, anyhow, to waste three hours of it watchin' a man fish that don't gettin' even a bite."

At the Yarmouth Y. M. C. A. Boys' Camp, held at Tucker's Mills in August, I found MINARD'S LINIMENT most beneficial for sun burn, an immediate relief for soles and toes.

Suffering Gait. Sunfower stalk pith, which is about ten times lighter than cork, is used in life-saving apparatus invented by a Russian.

SUFFERING GAITS GAVE THIS MAN THE GOLD MEDAL. Let folks stop on your feet longer; wear shoes a size smaller if you like; your corns will never again send electric sparks of pain through you, according to this Cincinnati authority.

He says that a few drops of a drug called Freezone, applied directly upon a tender, aching corn, instantly relieves soreness, and soon the entire corn, root and all, lifts right out. This drug is a sticky, sticky compound, but dries at once and simply shrivels up the corn without inflaming or even irritating the surrounding tissue.

It is claimed that a quarter of an ounce of Freezone obtained at any drug store will cost very little but is sufficient to remove every hard corn, callus or callus from one's feet. Cut this out, especially if you are a woman reader who wears high heels.

How to Cure Biliousness. Doctors warn against remedies containing powerful drugs and alcohol. "The Extract of Roots, long known as Mother's Syrup, Curative Syrup, has no drugs, no alcohol, no irritating ingredients, and is safe for all ages. It can be had at any drug store. Get the genuine, 50c. and \$1.00 Bottles."

Cuticura Will Help Clean Eruptions & Dandruff. Don't wait to have eruptions, redness and roughness, dandruff and irritation. N. & A. M. GRAHAM

GLENCOE, ONT.

Our reputation for fair dealing and reliable goods, coupled with the De Laval record of service and durability, has made the De Laval Cream Separator the leader in this community.

Here are advantages you can obtain only in the New De Laval:
GREATER CAPACITY: New capacities have been increased 10%.

CLOSER SKIMMING: The improved bowl design, together with the patented milk distributor, gives greater skimming efficiency.

EASIER TO WASH: Simpler construction makes the bowl easier to wash.

A BELL SPEED-INDICATOR on every New De Laval.

EASIER TO TURN: Low speed, short crank, and automatic oiling throughout, make it the easiest and least tiring to the operator.

WEARS LONGER: Due to its much lower bowl speed, high grade of materials used, and careful and exacting workmanship, the De Laval outlasts and outwears other makes by far.

We're here every day to explain the De Laval to you—to go into all the details. Come in and talk it over.

SOONER OR LATER YOU WILL BUY A

DE LAVAL

Patented milk-distributing device used in the New De Laval (Sectional View)

If a farmer saves an hour a week by being enabled to use good roads as opposed to bad roads, it would mean 52 hours a year. Estimating the use of man and team as being worth \$6 a day this means a saving of \$31.20 a year. Suppose his farm is assessed at \$10,000 and the additional tax levy due to the improvement of roads by the county runs to \$1 per thousand, which would mean \$10 a year additional taxes as against a saving of \$31.20 on time alone this means that he is investing \$40 and drawing dividends of \$31.20, an interest rate of 312 per cent.—Farmers' Sun.

Kilmartin garden party, Friday, June 20.

E. SUTHERLAND.

THURSDAY, JUNE 12, 1919

REAL HOME LIFE

There is no greater token of respect and affection than an invitation to enter the real heart-and-home life of a family. And yet how seldom do we offer ourselves the relaxation and our friends and neighbors the pleasure of such an invitation. Is a guest coming? Straightway we get to work to clean house from garret to cellar; we cook and bake and stew and fuss and sigh as though some terrible calamity were about to befall us, instead of that which should be the most delightful anticipation, the visit of a friend. If the house is clean and fair enough for our nearest and dearest, why not for a friend? If dinner is enough for our nearest and dearest, why not for our friend? If dinner is ample for the family, why not for an added guest? And will not the day and the visit be more delightful for both hostess and guest, if the fare is plain and the faces at the table bright and fresh, not wearied and flushed as with an added burden instead of an added pleasure? Can we not learn to offer ourselves sincerely and simply, just as we are, in our everyday clothes and manners, to those who come to us? Let social intercourse be frank and frequent and friendly. Let us be honest and genuine and fine and courteous in our daily lives, so when the friend comes he will find us untroubled and serene, as we always are, ready to receive the god thought, the story, the laugh, and to give him ourselves in return, our best in conversation and appreciation, and that will make the humblest dinner a feast for kings.

Flesh and the devil, as exemplified on the modern stage, are causes of the unrest and discord of the present day, and will bring the downfall of this nation unless checked, according to Rev. William Burgess of Chicago, director of the Illinois Vigilance Association, speaking at the conference of social work.

An exchange says:—Peter McArthur's book on Sir Wilfrid Laurier comes at an opportune time, when the death of the veteran statesman is still fresh in the public mind. It is, of course, not intended to be an elaborate biography. But it is a remarkably good picture of the man. Brief as it is, it throws much light, not only upon his personality, but upon the motives and basic principles of his policy as a public man.

No better protection against worms can be gotten than Miller's Worm Powders. They consume worms and render the stomach and intestines untenable to them. They heal the surfaces that have become inflamed by the attacks of the parasites and serve to restore the strength of the child that has been undermined by the draughts that the worms have made upon it, and their operation is altogether health-giving.

Save the Money You Waste and Make It Earn You More Money

How much of your wages do you fritter away each week on trifles?

If you reckon it up you will probably find that at least five per cent. disappears thus "like snow wreaths in thaw."

If your weekly wage is \$15.00 you spend easily 75 cents of that on "mere nothings" before you know it.

But suppose you said to your employer: "Each week I want you to keep 75 cents out of my pay envelope and invest it for me in War Savings Stamps. As you buy each War Savings Stamp put it in my pay envelope, and go on doing that for a year."

You will never miss that 75 cents. But at the end of the year you will have over \$36.00 invested in Savings Stamps. By then they will be worth considerably more than \$36.00, and by 1924 they will be worth \$45.00.

War Savings Stamps are guaranteed by the Dominion Government. They have the whole resources of Canada as their security, the same as Victory Loans. And they bear an unusually high rate of interest. You can cash them at any time, however, if you need to.

In June W.S.S. Cost \$4.05

War Savings Stamps can be bought wherever this sign is displayed.

Make Your Savings Serve You and Serve Your Country—Invest Them in War Savings Stamps.

"FLORENCE AUTOMATIC" OIL COOK STOVES

A GREAT comfort in the heat of summer! No hot range to bother with—no shaking down—no ashes to carry out. No wicks to clean. And remember, no fuel is cheaper than kerosene.

There have been 98 war brides brought to London since December 24 by London soldiers who have served overseas. It is expected that at least 200 brides will have been brought to the city from England when all the soldiers have returned.

In Toronto tomorrow the State will take with cool deliberation and after weeks of preparation the life of a human being who in the heat of passion while fighting for his freedom drew a revolver and fired on a policeman with fatal effect. Looks like barbarous justice.

The death occurred at Lucan on June 3rd of Annie Curry, widow of the late Robert Donnelly. Mrs. Donnelly formerly resided in Glencoe. She was 60 years of age. The funeral was held from her late residence at Lucan on Thursday morning to St. Peter's cemetery, London.

The death occurred at his home north of Appin on Saturday, June 7, of Archibald Johnston, one of the well-known old residents of that section of the county. The funeral service was held at the family residence on Monday afternoon. Interment was made at Lotan cemetery.

A meeting of the Liberal electors of West Middlesex will be held at Mt. Brydges on Friday afternoon, June 13, to appoint delegates to attend the provincial convention to be held in Toronto on June 25th. Hon. Duncan Macphail, minister of agriculture for Alberta, and others will address the meeting.

Joy bells rang on Monday for the return of John Dundon from overseas. Mr. Dundon, enlisted in the 125th Battalion and was in the telegraph signalling corps at the front. He is accompanied by his wife, who during his absence resided at Milton. They are spending a week with Mr. and Mrs. Hiram Lumley.

An exhibition game of baseball was played at the park on Friday evening against the team from West Lorne. Generally speaking, it was a poor interpretation of the game. The locals showed their lack of practice to an extent that was deplorable, allowing West Lorne to score no less than 14 runs in the first five innings. Glencoe scoring 37. In the last four innings, however, our boys showed that they were good losers and warmed up to the game to the extent of getting in nine runs and holding the visitors to one run in the game finishing 15 to 12 in favor of West Lorne. A couple of games during the week between our boys and the local married men proved interesting and gave the team some much-needed practice.

PERSONAL AND SOCIAL

Miss Irene Smith was home from Detroit for the week-end.

Miss Jean R. Wilson of Chatham spent the week-end with Miss Mary Lett.

Neil McKellar of Saskatoon, Sask., was the guest of Mr. C. L. Anahon one day last week.

John Knox of Miramichi, N.B., is visiting his brother, Matthew Knox, for a week.

Miss Butler of London is visiting at the home of her grandfather, John S. Walker.

Mr. and Mrs. Ross H. Allison and Arthur Merritt of Bridge spent Sunday at Colin Leitch's.

J. A. Ferguson, accountant of the Royal Bank, Windsor, is visiting at his home near Alvinston.

Miss Blanche McLeod entertained a number of her Glencoe friends at her home in Bothwell on Friday evening.

Mr. and Mrs. Neil McMillan and Mr. and Mrs. Kivel of Kintyre were visitors at the home of M. Knox on Sunday.

Isaac Watterworth and Frank McGregor of Wardsville were in Glencoe last week attending the Methodist conference.

Mr. and Mrs. Chas. George were at Putnam on Tuesday attending the funeral of Mr. George's sister, Mrs. Clendenning.

Mr. and Mrs. Innes J. Davidson motored from Thamesville on Sunday and spent the day with Mr. and Mrs. C. E. Davidson.

Mrs. G. W. Robertson of Toronto is spending a few weeks with her sister, Mrs. J. Stinson, and other relatives in the vicinity.

Mr. and Mrs. J. Hayter and Mr. and Mrs. W. F. Hayter attended the funeral of Mrs. J. Hayter's nephew, Edgar Oke, at Alvinston on Wednesday.

Mr. and Mrs. John Whittaker and their granddaughter, Donna Stevenson, of Windsor were visitors with Mr. and Mrs. John Hayter for a day last week.

J. A. Walker, manager of the Royal Bank at Calgary, is home on a visit to his father, John S. Walker, Glencoe, who we regret to learn is in poor health.

Mr. and Mrs. Robert Greenwood of Dilke, Sask., are visiting Mrs. Greenwood's uncle and aunt, Mr. and Mrs. Hiram Lumley, and other friends in the vicinity.

Mrs. Margaret Graham has returned home after spending the winter with her daughter, Mrs. P. B. Wade, and has recovered nicely from the effects of a recent fall.

Mr. and Mrs. Duncan R. McAlpine announce the engagement of their daughter, Miss Margaret, to Leo F. Stier of San Francisco, California, the marriage to take place in June.

Mr. and Mrs. D. J. McCugan, Mrs. J. L. Hull, and Mrs. Arch. McCugan of Mt. Brydges attended the graduation exercises at Toronto University last Friday. Miss Jennie McCugan being one of the graduates.

Dr. Angus Graham and son Angus of London and Mr. and Mrs. Duncan Graham and son Duncan and Mrs. Parkin and son Harry of Strathroy, the latter recently returned from Siberia, were Sunday visitors at Archy Graham's.

Ticket sellers for the U. F. O. DEMONSTRATION at Strathroy on July 1st will call upon you during the next two weeks. We bespeak for them a cordial reception. Help the management and avoid the crush on July 1st by getting your tickets NOW.

NO MORE KIDNEY TROUBLE

Since He Commenced to Take "Fruit-a-lives"

78 LEES AVENUE, OTTAWA, ONT.
 "Three years ago, I began to feel run-down and tired, and suffered very much from Liver and Kidney Trouble. Having read of 'Fruit-a-lives', I thought I would try them. The result was surprising.
 I have not had an hour's sickness since I commenced using 'Fruit-a-lives', and I know now what I have not known for a good many years—that is, the blessing of a healthy body and clear thinking brain."
 WALTER J. MARRIOTT.
 50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

 A garden party under the auspices of the Y. P. S. of Burns' church, Mosa, will be held on the manse grounds on Friday evening, June 20. An excellent program, consisting of quartettes, duets, solos by the mixed quartette of First Presbyterian church, London; selections by Miss Jean Walker, teacher of elocution, London, and music by Strathroy orchestra. See bills.
 Relieves Asthma at Little Expense.
 —Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within reach of all. It is the national remedy for asthma, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Glencoe Horse Show

AND RACE MEET

Wednesday, June 18

ALL-DAY PROGRAM

MORNING—Great Calithumpian Parade at 8.30 sharp; Baseball at 10.30: Appin vs. Dutton.

Soils and Crops

By Agronomist.

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seeds, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 72 Adelaide St. W., Toronto.

After-Value of Fertilizer.
No matter whether a farmer buys a ready-mixed fertilizer or one that is made up of the separate parts and mixed at home, there is the "after-value" to take into consideration when figuring the benefits derived from the fertilizer.

So many times we seem to think that whatever we are doing for the one season is what our fertilizer is worth to us. That is a safe place to stop figuring all right, but it is not a fair one. I can safely figure that every dollar I have spent for fertilizer has made me from \$2.00 to \$4.00 in increased production. This is on the average, of course, and I know of some cases that have made much more than this.

Three years ago I had a field of two acres in onions from seed. Previous to this the field was in potatoes and had about four hundred pounds to the acre of complete fertilizer. The year the field had one thousand pounds to the acre of a high-grade onion fertilizer. The year the onions were planted it was rather dry and so a good deal of fertility was not available that year. The year following the potatoes and one of the field was planted to corn along with a few acres adjoining it, which had been in potatoes two years instead of onions as the other two acres were. The yield of corn was nearly a ton better on the old onion bed than on the other part. Besides that it was of better quality and matured early enough to be sold and marketable at once. That, of course, was one reason why there was so much difference in the yield. It was so well matured that it was sold and marketable. The other part of the field was rather soft.

And while I am mentioning it I want to add that there is one point about fertilizer that we do not consider enough—early maturity. With me this is worth fully as much as the large yields. In fact, in many cases that is just what it means—larger yields because of early maturity. In the short crop seasons that we have, it is a quicker way of getting an early crop than breeding corn up, though both methods of course, will help just that much more.

I have another instance of the after-value of fertilizer in my own experience. A field of a little over two acres was planted to onions from the seed and twelve hundred pounds of a complete fertilizer was used to the acre. The onions were fair. The next year this field and another part next to it was in sugar beets. The total acreage came to about four. I think now, when one looked over the field during the growing season there was not much difference to be seen, but when you got under the leaves there was a lot of difference. When the yield was measured the two acres that had fertilizer went almost twenty tons to the acre. To anyone who is not used to the beet crop let me say that twenty tons is a mighty satisfactory yield. I have raised slightly less than ten tons to the acre and thought it was a fairly good crop. I am sorry that I can't give the exact yield of

the rest of the field but I am not sure enough to say except that I figured at the time that it was mighty good pay for the fertility used even if the onions hadn't been taken off the year before, and I might add, too, that the next year after beets this field was in corn and the difference could be seen even then. Just what it was I could not tell, but it was to be seen easily during the growing season.

Your Iron Chere Boy.

The modern gas engine is a highly efficient and never-tiring helper, capable of adapting itself to almost every known need for power on the farm. As the first and foremost consideration of gas engines is the means of employing their power, the first thing a farmer or other user needs to know is not only how to make them work, but also the best way to put them to work. We have seen some gasoline engines standing out in the open, where the owner leaves them through summer and winter, covering them up with some frail covering like a blanket or an old box that leaks. An engine in such a situation is certainly subject to all the direct influences of the weather, and should not be expected to do good work. It should be housed at all times.

A special engine house, with the various adaptations of shafts, pulleys, belts, etc., where the engine can rest bolted down to a solid bed, is the best arrangement of all. Such a house can be built at a place convenient to all power work it is needed for. It is no trouble at all to have the engine separator in a house, joining the engine-room and then provide a shafting to run this separator. An engine of sufficient power to do several things at once is the most profitable plan, and then so arrange the work that it can operate more than one thing at a time.

There is even a way of having several beds made for one particular type of engine. In this case the engine is wheeled about on its truck to the required place, where a firm bed is ready, bolted down, and then put to work.

In putting up shafting and pulleys, you should know about what speed the pulley is required to run to perform the chosen work satisfactorily. The wood saw will necessarily have to run very swiftly. The fanning mill to do several things at once is the most profitable plan, and then so arrange the work that it can operate more than one thing at a time.

Flour should be sifted just before used, in making measurements. The slogan of the Canadian Trade Commission, "CANADA-PRODUCT," is to be a guarantee of good quality, fair price, and all around high level.

THE CHEERFUL CHERUB

I started life a friendly soul With frank and smiling face, But office boys and traffic cops Soon put me in my place.

Brush for Harness Oil.

It stands every farmer in good stead to use all the care he can with his harness. Not only is leather exceedingly high in price, but it is mighty hard to get.

The usual job of oiling a harness is one that is dreaded. I have read so many times about how to take the harness all apart and unhook every possible buckle, then wash with lukewarm water and soap and keep it in a warm place, and with a cloth saturated with the oil so carefully over every piece. All this is right, but how many farmers who are using the harness practically every day in the year have the time or the notion to do that sort of job?

My plan is to take a harness at a time and clean off the mud and sweat the best you can, take the straps out of their keepers and go at it with a good oil with blackening in it.

Instead of the cloth soaked with oil I take a two-inch brush and a saucer or small pan and apply it that way. It is quicker, gets into the cracks much better, and keeps your hands clean while you work. Then, if there is time, take another harness and do the same. Hang the collar over the top of the saucer, and after a few minutes they have the harness all oiled.—E. R.

Why I Am a Farmer.

Have you ever asked yourself this question, Why am I a farmer?

It is the writer's belief that many so-called "misfits" are really persons who have failed to solve the problem as to why they are engaged in this special work.

What are the advantages and disadvantages of your business? I am a farmer because: Farming is a very old and honorable business; that is, if the farmer makes it a business and not a disease. Farming is my specialty. By farming I can do more for my country and my family than I possibly could if engaged in any other profession or occupation.

I am my own boss and call no man master. I do not have to punch a time clock, neither do I jump at the sound of a whistle or bell. I am entirely free of the heart-burnings and petty bickerings common in persons who work for others. No one can take my place away from me. I have no fear of the boss who might bring a rabbit-faced individual in, introduce him as his cousin and calmly inform me that said cousin would take my job in the morning.

I make my own plans and work them out in my own way; there is no one to steal the glory if they are successful or to berate me if they prove faulty. As the British soldier says: "I am on my own." Among country people there is no great wealth or abject poverty. Each person, if honorable, is the equal of his neighbor. People have a chance to get acquainted in the country. There is a patriotic sentiment connected with the ownership of a farm that is not noticeable in other possessions.

A well-tilled farm is the grandest monument a man can leave behind when he is gathered to his fathers. The camera on the farm. The camera is a valuable asset to the farmer for advertising his farm and its products. If he has a brood mare or a valuable bull for sale the camera will truthfully portray 'tis image on paper and carry a forceful message to the prospective purchaser. A good photograph with age, pedigree and other details written on the back tells instantly just what the critical buyer wants to know. A dated negative is indisputable evidence. Damage accidents are frequently proved by photographs taken of the scene. Write on the back of the film or glass negative with a steel pen and ordinary black or red ink and the lettering will come out gray on the print. If figures or letters are desired directly on the picture, bicarbonate of soda, mixed with enough water to make it flow from the pen,

Health Talks

By John D. Huber, AMMD

Dr. Huber will answer all signed letters pertaining to Health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John D. Huber, M.D., care of Wilson Publishing Co., 72 Adelaide St. West, Toronto.

The Cigarette Smoker.

Asbestos is not rare among smokers; the breathing of such sufferers is deepened and quickened, and short-windedness results. The wood products by irritation reddened, even "pink eyes," which is a contagious infection; or the nicotine, when slowly and continuously absorbed from the digestive tract may induce—how often has it not induced—blindness, acute or permanent and hopeless. Indeed, such blindness—amblyopia—has come even from tobacco being applied to a hollow tooth; in a patient who took snuff for ten days to cure a cold.

The sexual function is impaired in the tobacco-poisoned, and the victims are notably weak-bodied (anemic). And tobacco makes the boy to tobacco. The most injurious way of using tobacco is the cigarette, largely because the fumes are inhaled and passed to the lungs. The cigarette smoke, especially if it is inhaled, is the most excessive of the tobacco products. The more the smoke is inhaled, and the sooner the "sport," the worse are the effects.

Tobacco has its analogue among perhaps every people or tribe that our explorers and discoverers have ever visited. For adults this plant is one of the "paratriptics," the savans banks of the tissues. Such also are makes a cheap and permanent white ink.

When you have acquired skill in making pictures the farm papers will pay you from \$1 to \$2 each for any prints they can use. When you get this far remember to send only clean, snappy prints, printed on glossy paper, and make each one tell a story. A special implement, new ways of doing things, threshing day, the tractor in action, a day's outing in the country and filling the silo suggest the kind of pictures wanted by the farm papers.

In the year before the war Germany sold goods valued at \$835,000,000 to the British Empire. Canada's opportunity to get a large share of this is waiting for Canada's action—that is the opinion of the Canadian Trade Commission.

IN TEN YEARS 500 Dollars

I deposited at 3% amounts to \$697.75 but if invested in our 5 1/2% Debentures will amount to... \$850.20

The Great West Permanent Loan Company. Toronto Office 20 King St. West.

Better Than a Raise in Pay.

After one of our hired men had been with us a few weeks, I noticed that the horses began to look a great deal better than they had before. They not only looked sleeker, but they took on flesh and did their work more easily; that, too, without using more hay or grain.

It was simply the care the new man took of them. He was always quiet when around the horses, he kept the pores of their skin open by the use of a good comb and brush, and he was regular in doing his work. Seeing these things, I thought it was no more than fair that I should say so. And you should have seen how much higher the hired man stepped after that. It was very plain that my good work had warmed him. He not only took better care of the horses, but he did more than he had before.

DOMINION Bicycle Tires

WILL SAVE YOU WELL EVERYTHING that you could ask for—easy riding, extra-mileage, staunch wear and freedom from ordinary tire troubles, you will find in Dominion Bicycle Tires. They are

"Unquestionably The Best Tires"

Be sure to ask your dealer for DOMINION TIRES that have proved their high quality and durability under every road condition. Sold by the Leading Dealers.

Electricity Saves Labor For Farmer and Wife

Farm work is not just a matter of taking a team to the fields and putting in so many hours a day plowing, harrowing, seeding, harvesting or whatever the task might be. There are also the chores, and farmers are coming to realize more and more that valuable time can be wasted in doing chores that is, where folks persist in doing them in the old way.

In the field modern machinery is employed to save time and labor and to make possible short cuts, so that fewer hands can do the work and keep the farm production up to the standard that has been set for it. Why isn't it just as reasonable to employ short cuts about the barn, in the chore work as in the regular farm work in the fields?

A great many farmers are coming to decide that it is, and your up-to-date farmer is using modern equipment about the farm buildings just as he is using modern equipment in the field work. One of the most important of these and labor-saving forces he is using today is electricity. Generally he gets it from one of these small, individual electric plants that can be installed in the tool-house or garage, or in any other convenient place about the premises. This electricity is used to power a wide variety of things. Then, if he has his lights are to be electric, he will get the best light he can and save the money that would be spent in buying kerosene or oil. More of them will be able to use electric power to pump the water. They will have this water stored under pressure so that it is forced to the faucets, either at the house or barn, and no pumping or carrying is necessary. If there are many cows to milk he will run the milking machine with an electric motor, and the farm boy who otherwise would be tempted to leave the farm to escape an unattractive job will be satisfied to stay and supervise so interesting an operation as milking by mechanical means. Then this electric power the farmer will use to turn his grindstone, the corn sheller or grinder, the clippers for clipping horses, for cleaning seed, for a dozen different uses that will suggest themselves wherever electricity is available.

Of course, the women folk will not fail to reap a benefit from it, too, for besides the modern lighting, the bath and indoor toilet that electricity makes possible, the electric power gives them the vacuum sweeper, the electric vibrator with its healthful, beautifying massage, and such household machinery as electric washing machines, churns, and the like. There is electric heat for repair jobs like soldering, for the electric toaster or percolator, for the electric warming pads for the sick room, for the flat iron and various devices all calculated to bring comfort, saving or pleasure to the farm family.

How I Save on Roofing.

"Nearly every year I used to have an old shed or outbuilding that needed repairing," says a farmer. "This was especially true of the roofs, which I noticed were the first things to go. It seemed to me that I had more leaky roofs than any other man in the country, and I always had some extra expense in the way of roofing. But I have now found a way to overcome this trouble and get my leaky roofs repaired at a much lower cost.

"If the building happens to be an old one I never go to the expense of putting on shingles or galvanized iron roofing, because they are too costly. The plain sheet-iron roofings that are not galvanized are not satisfactory in the way of service. After several years of experience with various roofings, I have discovered that the prepared roofings are the most serviceable of any, besides being much cheaper.

"When I apply this prepared roofing I never take the trouble to tear off the old roof first, because I have found it to be much easier and much more desirable to lay the new roofing right over the old one. I cut the roofing into strips so they are convenient to handle, and I allow enough in the length so they can be turned down at the ends. I then cement them at the laps with roofing cement, and also nail wooden strips, called battens, over these laps, making them more solid.

Safety First.

A handy method of disposal for the gasoline tank on the farm is to place the tank under proper shelter underground, with facilities for filling the tank from the surface and a pump with which to force the gasoline from the tank to the automobile gas reservoir. Such a system places the gasoline out of danger from a stray match, and puts it in a place where children cannot tamper with it. A pump which will be very convenient in transferring the gas from the supply tank to the motor or other receptacle may be purchased at a slight expense.

READY FOR YOUR SUMMER NEEDS

Let This Store help you in the perplexing problems that this inrush of summer days has brought about. Splendid stocks in all departments to meet your every want.

Men's Classy New \$5 and \$6 Panamas for \$3.68. Every style. All sizes.

The Transcript.

THURSDAY, JUNE 12, 1919

MELBOURNE

Melbourne, June 7.—A terrific storm accompanied by heavy rain passed over this village on Thursday afternoon. Although many trees were broken, very little damage was done considering the fierceness of the storm.

Norman Graham, a Melbourne boy, has secured a position as operator on the G. T. R. at Alvington.

John McNabb, who has been attending the University in Toronto, is home for the summer.

Mrs. Boie of West Lorne spent Sunday at the parsonage here.

Mrs. William Richards of Middlemiss, who has been visiting friends and relatives in this vicinity, will leave to visit her brother in Alberta shortly.

Mr. McNicol of Dunnville has been placed on the Union Bank staff here. Mr. McNicol is a returned soldier.

Mrs. Goldin of Dryden spent a few days with her sister, Mrs. Meek, after attending the funeral of her brother, John Cooper.

Miss Annie Martin, sister of Rev. D. E. Martin, who was pastor of the Methodist church here some years ago, spent a few days with friends here. During her visit she addressed the W. M. S. of the Methodist church and gave a very interesting talk on her work in Victoria. Miss Martin has recently returned from Toronto where she has taken a post graduate course at the Methodist Deaconess School. She will return to Victoria in a few weeks.

Rev. Wm. R. and Mrs. Vance are attending the conference held at Goderich.

The many friends of H. Parr and Carmen Richards were pleased to welcome them back to their homes here after serving almost four years overseas. Arrangements are being made to hold a social evening in honor of the returned men.

Miss B. C. Buchanan has been appointed by Anna Rebekah Lodge, No. 118, as representative to the Assembly which will be held in Toronto this month.

STRATHBURN

The weather is just what the farmers want now, and the crops are looking fine.

Webster Bros. are making preparations to sink some deep wells for oil.

A number of farmers are going in for truck farming and are taking advantage of the motor truck service that is making daily trips to and from London. They purpose putting their truck on London market, which is a great convenience, as the cost of transportation is less than shipping on railroad. Many passengers are being carried on same truck. They make the trip to London in less than two hours. The fare is just one-third of the railway fare and is being taken advantage of.

To have the children sound and healthy is the first of a mother. They cannot be healthy if troubled with worms. Use Mother Graves' Worm Extirminator.

WARDSVILLE

Jem. Beatrice and Verna Wilson of London called on old friends here last week.

Miss Edna Jefferson of Victoria Hospital is visiting at her home here.

Bert Simpson of Lethbridge, Alberta, called on friends here last week.

Frank Davis and family have moved back to the old home.

On Sunday morning next, June 15, Mrs. J. M. McEvoy of London will give a chart talk on the forward movement of the W. M. S. in the Presbyterian church.

Allan Henderson has arrived home from overseas after three and a half years' absence.

Marion and Dorothy Reid of Bothwell are visiting their grandfather, J. Wilson.

Miss Aileen Jefferson has returned home from Toronto where she has been taking treatment.

Mrs. McKeown is visiting her sister, Mrs. Munroe.

R. J. Fitch attended county council last week.

A number from here attended the public meeting at Thamesville in the interest of the proposed highway.

Mr. and Mrs. W. R. Smith and family of Kent Bridge spent Sunday with friends in the vicinity.

CASHMERE

Russell Willick left on Tuesday for an extended visit to Detroit.

Hugh Taylor was a Chatham visitor on Saturday.

Mrs. and Mrs. Norman Bergee and family of Bay City are visiting the former's sister, Mrs. Wilkie Taylor.

Mr. and Mrs. Allan Willick and Mr. and Mrs. Ross Willick and children, spent Sunday with Mr. and Mrs. Angus McDonald at Palmyra.

Mr. and Mrs. J. E. Taylor and children and Mrs. A. D. Patterson and son Finlay motored to Rondeau to spend Sunday.

John Bergee, Mr. and Mrs. Norman Bergee and Mrs. Wilkie Taylor motored to London on Saturday.

Mr. and Mrs. Calvin Sittler spent the week-end with the latter's parents, Mr. and Mrs. B. F. Jeffery, Newbury.

Mr. and Mrs. James Dent and family and Mr. and Mrs. Ted Knowler and family of Bothwell spent Sunday with Mr. and Mrs. Thos. Darke.

Basil Sittler spent Saturday in London.

NORTH EKFRID

The few showers of rain that came recently were very much needed to promote the growth of the crops.

Mrs. Howard Gardiner is in the hospital at London. We all hope for a speedy recovery.

Little Raymond Willick is on the sick-list.

Every woman in Middlesex should hear Mrs. Laws, the famous writer and speaker, at the U. F. O. celebration in Strathroy on July 1st.

J. L. Laughton is attending college in Toronto. He will be greatly missed in the community and in North Ekfrid church where he was president of the Young People's Society. We wish you success, Laverne.

Wedding invitations printed in the latest style and with neatness and despatch at The Transcript office.

MOSA

A pleasant event took place at the home of Mr. and Mrs. A. B. McLachlin on Saturday last when their eldest daughter, Flora M., was united in marriage to Stuart Nisbet of Wyoming.

Misses Phenia and Aileen Mitchell have returned to their home in Chatham after spending a week with their sister, Mrs. M. C. McLean.

Miss Pack spent the week-end at her home in London.

Ross Dyke and Ross Douglas have taken a contract to put down four oil wells on the farm of John A. McLeas.

Mr. and Mrs. J. F. Pack and Mrs. (Rev.) C. P. Wells of London visited at M. C. McLean's on Friday.

Rev. Mr. Steward of Dutton gave an excellent and forceful sermon in the Presbyterian church on Sunday. He also preached at North Ekfrid anniversary services.

A Belgian family have moved into the premises of George Scates on Main street.

George McGill has commenced building his house.

This community was glad to welcome Sammy Badaou back from overseas, also Neil Fletcher and Archie Clark, who arrived quite recently.

APPIN

The Women's Institute hope to have a crowded house to see "Joe, the Waif," given by the Newbury dramatic club in the town hall tonight.

Appin and Dutton baseball teams locked horns in a league game at Appin on Thursday evening, Dutton winning by a score of 8 to 7.

Appin—Dutton—R. Duncan, Kirkland, Dr. Hafel, J. Graham, L. Burnett, B. Aheek, P. O'Malley, W. Smith, R. Braden.

Rev. Mr. Stewart of Dutton gave an excellent and forceful sermon in the Presbyterian church on Sunday. He also preached at North Ekfrid anniversary services.

A Belgian family have moved into the premises of George Scates on Main street.

George McGill has commenced building his house.

This community was glad to welcome Sammy Badaou back from overseas, also Neil Fletcher and Archie Clark, who arrived quite recently.

EKFRID STATION

Mr. and Mrs. D. J. McGugan of Westminster, B. C. are visiting his sister, Mrs. J. L. Hull, Ekfrid, and his parents at Mount Brydges.

Mr. and Mrs. Chris. Poolco and family of White Oak and Mr. and Mrs. J. G. Lethbridge of Glencoe visited with Mr. and Mrs. W. P. Cornelle recently.

Mr. and Mrs. Crawford Allan and family of Tait's Corners spent Sunday with Mr. and Mrs. D. A. Campbell.

Lorne Eaton is in Toledo this week attending the wedding of his brother Clarence.

Miss Annie McCallum of London spent the week-end at her home here.

Mrs. Lamont of Toronto is visiting her aunt, Mrs. Ardies, who had the misfortune to fall recently, fracturing her collarbone.

Deputy Sheriff B. F. Watterworth of Middlesex is a strong supporter of the proposal of H. M. Mowat, K. C., for the establishment of a central executive board in Ontario and for the substitution of electrocution for hanging.

Wedding cake boxes at The Transcript office.

NEWBURY

Simon McDonald and sister Ora have just returned to London after a delightful trip to Montreal, New York, Newport, Buffalo and Detroit.

Fire destroyed a barn belonging to Wm. Cucksey about one o'clock Friday. When first discovered, smoke was coming out of the roof and the fire had such headway that nothing could be done to save the building. Jim Brennan, one of the first to get to the fire, made his way through the smoke and got the horse out. Fortunately the wind was blowing in the direction of some apple trees, which saved Neil Campbell's house. This fire was another demonstration of the need of fire protection in our village. It is supposed spontaneous combustion started the fire.

The funeral of the late Jane Powell, wife of David Gage, was held from her late residence Wednesday afternoon.

Rev. James Malcolm conducted the service and a celebration was held at Shetland. Deceased had been ill for several weeks. At times her sufferings were very severe, but she never complained, trying always to be patient and give as little trouble as possible to her nurse and friends who were caring for her. Her aged partner will miss her sadly as she was always at home looking well to the comfort of her friends who visited her. Besides her husband she leaves three stepchildren, to whom she was a kind mother: Susie, Mrs. Payne of Wardsville and Mossie and Orlena of Cairo; also two sisters, Mrs. Mary Robinson here and Mrs. McCutcheon of Thorndale, and two brothers, Henry of Sarnia and Francis of Watford, to whom sympathy is extended.

Dr. W. F. Roome and wife, Will Roome, wife and son of London, Mrs. J. Bridgeman and son Bob of Edmonton, Mrs. Wollatt of Walkerville, Mr. Alex. and Mrs. Tait and daughter, Ethel and Misses Alma and Grace, Gibb of Blenheim, called at C. Tucker's on Sunday.

John McConnell moved in from the farm to the house purchased from John Sheppard some time ago. Mr. McConnell is making extensive repairs to the house.

Walter Beggs of Guelph was home for the week-end.

At a special meeting of the council held Monday evening a resolution was passed to the effect that we join with Wardsville and Mossie in a celebration to be held some time in August in honor of the returned soldiers. A meeting will be held in the town hall here Monday, June 23rd, at 8 o'clock, to make arrangements for this celebration. We wish to have everyone in Wardsville, Mossie and Newbury feel that he or she is interested in this and attend the meeting. Lend a hand, who did not do so in uniform can now do something to show our appreciation of those who did. Let us make this the biggest and best celebration ever. Come to this meeting. There will be lots to do in getting good working committees appointed. June 23 is the date. Everything will be fully explained.

The dramatic club reproduced their splendid play "Joe, the Waif," here on Thursday evening. Anyone who has not yet seen this play should make an effort to do so. The play is clean and interesting throughout and each player does his or her part to perfection. Much credit is due Mrs. R. H. Moore for the work she has had in preparing her own part, which was difficult, and the part of manager for J. G. Graham of Dutton, a splendid Scotch singer, sang between acts. This was Mr. Graham's first appearance here and those who heard him hope he may come again. He has an excellent voice and in the kilts made quite a hit, especially in some of Harry Lauder's favorites. Proceeds of this concert, \$35.

D. J. Baines, James H. Bayne and daughter Frances motored from Detroit on Saturday for the week-end.

D. A. Simpson of Lethbridge was a visitor in town on Wednesday. His friends were pleased to see him looking so well.

James Hanna, wife and family of Wheatley visited at H. D. McNaughton's last week.

Tom Wood visited his brother in Windsor last week.

Mrs. Lulu Murray of Detroit is visiting her mother, Mrs. Crimm.

John Franklin Hurdie, son of Mr. and Mrs. Peter Hurdie of Mossie, arrived home from London on Wednesday, June 4th, having been honorably discharged from the 1st C. G. Reg., in which he has served for the last eleven months.

KILMARTIN

Mrs. Alex. Summers, Mr. and Mrs. Arthur Summers, Mrs. Peter McNeil of Oakdale motored to Kilmartin and spent Sunday with friends here.

Mrs. D. A. Dewar of St. Thomas spent Friday with her parents, Mr. and Mrs. M. C. Munroe.

Mr. and Mrs. M. C. Munroe celebrated the 64th anniversary of their marriage last Friday.

BUY A USED CAR

Don't harbor the idea that because a car is not brand new it is not a safe investment. Good cars are all the time finding their way to the sales-room floor to be sold as secondhand! After a car has gone a few hundred or even a few thousand miles, it is still at its best, unless it has been abused. The paint is not quite fresh—and its sentimental value is less—that is all.

You can buy a secondhand car from dealers and private owners who daily list their cars in The London Free Press classified Autos and Taxis column. It will save you money—big money! Eventually, you will own and drive an automobile. Why not start out now, with a good used car—and get your new car when you have become a seasoned driver? The reading of "Automobile" column in The London Free Press will tell you where to find the best bargains in Western Ontario. Read the Want Ads in The London Free Press.

Deputy Sheriff B. F. Watterworth of Middlesex is a strong supporter of the proposal of H. M. Mowat, K. C., for the establishment of a central executive board in Ontario and for the substitution of electrocution for hanging.

Silverwood's ice cream

"SMOOTHER THAN VELVET"

Ice Cream like mother used to make?

No indeed! Ice cream far superior to that.

Nothing but purest cream, cane sugar and purest flavor extracts go into Silverwood's Ice Cream.

That creamy, velvety taste that mother never could have given to her home-made ice cream is the result of homogenizing and scientific freezing.
