REPORT OF THE DEPUTY MINISTER.

The Honourable

Sir RICHARD J. CARTWRIGHT, G.C.M.G.,
Minister of Trade and Commerce,
Ottawa.

SIR,—The Seventh Annual Report of the Department shows, as may be seen by Statement No. 1, that the value of the total Imports has increased over that of the previous year by nearly \$22,500,000.

Exports fell off in value as compared with the previous year to the extent of about \$5,250,000, leaving the total trade about \$17,250,000 in excess of the highest figures previously reached. To what extent this gratifying result is due to appreciation in values rather than to increase in quantity is not easily determined, for though the tonnage figures as per Statements Nos. 61 to 66, inclusive, may be taken as some indication of actual quantities handled, yet to the well known general advance in values in many lines of both Imports and Exports which set in prior to the close of the fiscal Year must be attributed some considerable weight in carrying the figures so far beyond previous experiences. This factor will be more strikingly apparent in the figures for the year ending June, 1900, which for present indications will reach a total of well on towards \$400,000,000—at any rate will reach a total for greater than the half of a decade ago could have been anticipated as the record for the close of the century.

There are openings for increased trade, notably in Australia, the West Indies, along the Mediterranean, China and Japan, and there will be also in South Africa at the close of the present unfortunate war, an effort on the part of Canadian producers and exporters could secure material advantages in any or all of these regions, provided they comply with local requirements and supply goods in the condition specially called for by the consumers. The consumers in their demands are of course largely guided by climatic influences, necessitating care in preparation and packing that our northern people being unaccustomed to, are slow to appreciate, but which must, however, be met if business is to result.

Certain Canadian products have attained a high reputation and it cannot be too strongly impressed upon both producers and exporters that the standard of quality which has earned this reputation must be maintained no matter at what inconvenience or cost, otherwise losses will result to an incalculable extent. Promptness in answering orders and strict compliance with the terms thereof and with directions for packing and

shipping must be the aim of all exporters, especially when seeking new trade. Small inattentions or carelessness in these respects frequently cause the loss of important connections.

As heretofore there are appended Trade figures (unrevised) to latest practicable date—say for the eight months to the end of February, 1900, which indicate no diminution in the steady advance made during the year, but on the contrary the unquestionable prosperity of the country, and in this connection it may be well to note that the trade of Canada is *per capita* of population more than double that of our nearest neighbours to the south of us.

All of which is respectfully submitted.

W. G. PARMELEE,
Deputy Minister of Trade and Commerce.

COINAGE, WEIGHTS AND MEASURES.

To assist in arriving at a comprehensive understanding of the value of foreign currencies, weights and measures (as expressed in foreign trade returns, tariffs, &c.,) as compared with those of Canada, tables have been prepared as follows:—

As regards those of Canada, the law provides that the denominations of money in the currency of Canada shall be dollars, cents and mills, the cent being the one hundredth part of a dollar, and the mill one-tenth part of a cent.

That—The currency of Canada shall be such that the British sovereign (the pound sterling) of legal weight and fineness, shall be equal to four dollars eighty-six cents and two-thirds of a cent.

In like manner the law provides as respects weights, that the unit shall be the standard pound (avoirdupois) of 7,000 grains, one-sixteenth part of the standard pound shall be an ounce ($437\frac{1}{2}$ grains) one hundred pounds a cental, and two thousand pounds a ton, and that four hundred and eighty grains shall be an ounce troy, or 5,760 grains a pound troy.

As regards measures—that the unit or standard measure of capacity, as well for liquids as for dry measures, shall be the gallon containing ten standard pounds weight of distilled water weighed with the water and air at a temperature of sixty-two degrees Fahrenheit, with the barometer at thirty inches, that the quart shall be one-fourth part of the gallon, and the pint one-eighth part of the gallon, and that eight gallons shall be a bushel.

This gallon commonly known as the "Imperial Gallon," contain 277.274 cubic inches, or 353.036 cylindrical inches.

The standard measure of length is the yard, one-third part of which it is provided shall be a foot, and the twelfth part of such foot shall be an inch.

In many countries the Metric system of weights and measures has been adopted. A separate table of Canadian equivalents of these is given in order to avoid repetition, the word "Metric" being used in the general table in each case where the system is in vogue, as indicating a reference to that table.

The equivalent value of the monetary unit can only be given as respects those countries having a gold standard. Where silver is the standard, the value of the currency necessarily fluctuates correspondingly to the market value of silver billion, and were any attempt made to quote the value of such currency it would, under present circumstances, be misleading, therefore, the weight in decimal parts of an ounce with the fineness of the coin is given instead, which will enable any one to approximate the value of the currency according to the current value of fine bar silver. As an example, say fine bar silver at 75 cents an ounce, the Bolivian dollar weighs .801 of an ounce, its fineness is .900, therefore $75 \times .801 = 60.075$ which $\times .900 = 54.0675$, or a small fraction over 54 cents, and the actual intrinsic value of the pure silver contained in the coin, to which should be added a reasonable allowance to cover the value of the alloy, the cost of the coinage, and in some instances exchange, the aggregate of which would be approximately the current value in Canadian currency of the dollar in question.

Unless carefully noted, the quotations as usually given of the current value per ounce of silver may be misconstrued and lead to misapprehensions, as it is sometimes quoted per ounce *fine*, and sometimes per ounce *standard*; thus for instance on a certain day the London quotation reads "fine silver per ounce standard 32 d.," while on the same day it is quoted in New York "69½ cents per ounce fine;" as 32 d. is equal to a fraction over 64½ cents, there would appear a difference of about 4½ cents per ounce between the two prices, the New York price appearing that much in excess of the other, were it not noticed that one is based upon *standard* fineness and the other upon absolute fineness, but by reducing the New York "fine" to London "standard" (of .925 fine, or 444 grains fine to the ounce) the actual difference between the two quotations is found to be only about $\frac{1}{2}$ of one cent per ounce, the London price being that much in excess of the New York.

SESSIONAL PAPER No. 5

To reduce the value of *standard* or sterling silver when expressed in pence to *fine* expressed in cents, multiply the pence and decimal parts thereof by 2·192.

To find the *standard* or sterling value expressed in pence and decimal parts thereof when *fine* is expressed in cents multiply the cents by 0·4562.

METRIC WEIGHTS.

Denomination.	Grammes.	Equivalents.		Remarks.
		In pounds and decimal parts thereof, avoirdupois.	In grains, troy.	
Gramme.....	1	·002204	15·4323487	The gramme is the actual unit, and is the weight of one cubic centimetre of distilled water.
Decagramme.....	10	·022046

* Old weights and measures sometimes used. The tael is in reality not a standard of value (there is no such coin), but of weight, and when used in the sense of a value it only represents its weight in gold or silver, as the case may be, the real difficulty is to establish its exact equivalent in grains. Authorities differ greatly, as also does the practice in different sections of China. The Chinese are far from being inexact, and the probability is that there exists a standard, and a further probability that it is equal to 10 Japanese monmes, or 579.72 grains, which figures have been used in computing the value as above. It will be observed, however, that these figures fall short about 3.61 grains from the weight usual (say 14 oz. per tael) in dealing with the weights other than those of gold and silver. † For many years the value of the peso in Chili has been 91.2 cents, but by the Resumption Act of Feb. 11, 1895, the value of the peso is made equal to 18 pence = 36.5 cents. § Usually reckoned same as Chinese Picul of 133½ lbs. ¶ This is long measure. Cloth measure is 25% greater in length than long measure. Therefore by cloth measure 1 sun = 1.4916 in., 1 shaku = 14.916 in. and 1 jo = 149.6 in.

§ Usually reckoned the same as the Chinese picul of 133½ lbs. *Old weights and measures sometimes used. † It has been recently stated that Tripoli has adopted the Turkish monetary system. †† Japan has adopted the Gold Standard, which came into effect Oct. 1st., 1897. Value of Gold Yen being 49½ cts.

TABLE of constant Factors, which multiplied by the current value per ounce of silver, either pure or standard as the case may be, will give the value of the silver contained in the coin referred to, to which if there be added a small percentage to cover the value of the alloy and the cost of coinage, the aggregate will equal the then intrinsic value in Canadian currency of the coin in question.

SESSIONAL PAPER No. 5

TABLE of Sterling Pence (26 to 31 $\frac{7}{8}$) and fractions thereof, with statutory equivalents in Canadian cents and decimal parts thereof, for use in connection with the foregoing table of Constant Factors.

EXAMPLE—Silver at 27 $\frac{3}{8}$ pence per oz. standard, what is the value of the silver in the Japanese yen?
ANSWER— $\cdot 84259 \times 56 \cdot 016 = 47 \cdot 1985$, or nearly 47 $\frac{1}{4}$ cents.

Pence.	Cents.	Pence.	Cents.	Pence.	Cents.

63 VICTORIA, A. 1900

CHINESE IMMIGRATION.

No. 68.—STATEMENT showing the TRANSACTIONS under the CHINESE IMMIGRATION ACT to June 30, 1899.

The Act went into force as respects arrivals by vessels sailing from ports in North America on August 20, 1885, and as respects arrivals by other vessels on January 1, 1886, *vide* 48-49 Victoria, chapter 71.

The Act as it appears in the Revised Statutes, chapter 67 (1886), is slightly changed from the original. There have been since then two amendments thereto, viz., as per 50-51 Victoria, chapter 35 (1887), and 55-56 Victoria, chapter 25 (1892).

The administration of the Act was by Order in Council of September 1, 1885, assigned to the Department of Customs and transferred to the Department of Trade and Commerce by Order in Council of March 13, 1893.

The annual revenue, expenditure, &c., under the Act has been as follows :—

Year ending June 30.	IMMIGRANTS.		Total Collections from all sources.	Refunds.	Expenses of Collection.	Share of Capitation Fee paid to Provinces.
	Exempt.	Paying Fees.				
	No.	No.	\$ cts.	\$ cts.	\$ cts.	\$ cts.

1899.....	17	4,385	220,309 50	950 00	3,072 89	53,262 50
	368	24,402	1,239,136 50	9,400 00	34,427 24	298,250 00

During the same period 10,363 Chinese have taken out certificates of leave or registered for leave up to June 30, 1899, while a very large number have left the country without so registering, having no intention of returning, so that, for this latter reason, the exact number remaining in the country is uncertain.

CAPE OF GOOD HOPE.

VALUE of the Total Imports and Exports from and to each Principal Country during the Years ended December 31, 1894 to 1898, inclusive. (Including Coin and Bullion.)

NOTE.—The value of gold (produce of South African States) brought into the country for shipment at Cape ports, is not included in the returns of Imports, though included in those of Exports.

NOTE.—Imports of dutiable goods re-exported to States outside the South African Customs Union, and of dutiable goods removed to States within the Customs Union are not included in this table.

TREATIES AND CONVENTIONS.

(A.)—DENUNCIATION OF TREATY BETWEEN MONTENEGRO AND GREAT BRITAIN.

The Department of Trade and Commerce has received information from the Colonial Office to the effect that the Montenegrin Government has denounced the Commercial Treaty between that Principality and the United Kingdom of January 21, 1882, in accordance with Article XV. of that Treaty. It will cease and determine on the 13th June, 1900.

(B.)—RENEWAL OF TREATY BETWEEN GREAT BRITAIN AND URUGUAY.

A Convention has been entered into between Great Britain and Uruguay for the Renewal of the 'Treaty of Commerce and Navigation' of date November 13, 1885.

Under an Order in Council of date November 4, 1899, the Government of Canada declined to become a party to the Convention.
