| Do    on Lower Provinces by Canada.....                   | 2224 42    | 4559 93    | 6475 55    |
| Do    in Lower Provinces upon Canada.....                 | 12862 77   | 47297 58   | 87312 00   |
| Net Revenue to Canada upon the Money Order transactions.  | 9314 26    | 10519 97   | 11608 41   |
| Expenditure for maintenance of the Money Order system.... | 10845 12   | 11786 48   | 12552 65   |

The transactions of this year show an increase of 12 per cent, over those of 1866, and of 33 per cent. over 1865. It may also be further observed that the net revenue is fast overtaking the expenditure. In 1865 the deficit was about  $\frac{1}{4}$ th of one per cent., in 1866  $\frac{1}{12}$ th of one per cent., and in 1867 only  $\frac{1}{18}$ th of one per cent

**REGULATIONS**

OF THE

**POST OFFICE SAVINGS BANKS,**

**CANADA.**

---

THE FOLLOWING REGULATIONS ARE MADE UNDER AUTHORITY OF THE ACT OF PARLIAMENT, 31 VICTORIA, CAP. 10, ENTITLED: "AN ACT FOR THE REGULATION OF THE POSTAL SERVICE."

1. Every Post Office, being a Money Order Office, at which the Postmaster General shall permit deposits to be received for remittance to the Central Savings Bank in the Post Office Department at Ottawa, will be open for that purpose, and for the repayment of moneys withdrawn, during the hours appointed for the transaction of Money Order business at the said Post Office, and at such other hours as may from time to time be appointed in any case by the Postmaster General.

2. Deposits of One Dollar, or of any number of Dollars, will be received from any Depositor at the Post Office Savings Banks, provided the deposits made by such Depositor in any year ending the 30th June, do not exceed Three Hundred Dollars, except in special cases to be specially authorized by the Postmaster General, and provided the total amount standing in such Depositor's name, in his ordinary deposit account in the Books of the Postmaster General, do not exceed \$1000.00, exclusive of interest.

No interest will be allowed on any sum over and above One Thousand Dollars in an ordinary deposit account.

3. Every Depositor on making a first deposit, shall be required to specify his Christian name and Surname, occupation and residence, to the Postmaster, or other Officer of the Postmaster General receiving such deposit, and make and sign the following declaration, to be witnessed by the said Postmaster or other officer receiving the deposit, or by some person known to him, or by a Justice of the Peace; and if such declaration, or any part thereof, shall not be true, the depositor making the same shall forfeit and lose all right and title to his deposits.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                              |

| Depositor's Book.<br>Place .....<br>No. ....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | <b>DECLARATION BY DEPOSITOR ON MAKING<br/>FIRST DEPOSIT.</b> |
| I, .....<br>of .....<br>do hereby declare to the Postmaster General that I am desirous, on my own behalf, to become a Depositor in the Post Office Savings Bank. I do further hereby declare that I am not directly or indirectly entitled to any sum or sums standing in the name or names of any other person or persons in the books of the said Post Office Savings Bank; and I do hereby also testify my consent that my deposits in the said Post Office Savings Bank, shall be managed according to the Regulations thereof. |                                                              |
| Witness my hand, this ..... day of ..... 186..                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                              |
| Signed by the said Depositor<br>in the presence of me,                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | .....<br>.....<br>..... }                                    |
| Save and except such sum or sums as may be standing in my name as Trustee, jointly with the name or names and on behalf of any other Depositor or Depositors.                                                                                                                                                                                                                                                                                                                                                                       |                                                              |

A copy of the above declaration shall be printed within the cover of every Depositor's book.

4. On making the declaration, and in all cases in which the signature of a depositor is required, if the Depositor cannot write, his mark must be affixed in the presence of a witness, and attested by the signature of that witness.

5. Every deposit received by a Postmaster, or other officer of the Postmaster General appointed for that purpose, shall be entered by him at the time in a numbered book, and the entry shall be attested by him, and by the dated stamp of his office, and the said book, with the entry so attested, shall be given to the depositor, and retained by him as primary evidence of the receipt of the deposit.

The depositor shall sign his name in a place to be provided for his signature in the Depositor's Book.

The amount of each deposit, so received, and the name, occupation and residence of the depositor, shall, upon the day of the receipt thereof, be reported to the Postmaster General, and the acknowledgment of the Postmaster General for the said deposit, signified in the following form, by the officer whom he shall appoint for that purpose, shall be forthwith transmitted by Post to the Depositor as the conclusive evidence of his claim to the repayment of the deposit with the interest thereon, upon demand made by him on the Postmaster General.

| To .....                                                                                                                                                                                                                               |                                                                                           |
| .....                                                                                                                                                                                                                                  |                                                                                           |
| NOTICE.—This acknowledgment is of no VALUE to any person but the Depositor to whom it is addressed.                                                                                                                                    |                                                                                           |

If the Depositor does not receive the said acknowledgment within ten days from the day on which he made the deposit, he must apply for the same to the Postmaster General, by letter, and if necessary renew his application to the Postmaster General until he receives the said acknowledgment.

6. Interest calculated yearly, at the rate of Four Dollars per cent per annum, shall be allowed on deposits, and shall be computed from the first day of the calendar month next following the day on which the deposit is made, up to the first day of the calendar month in which moneys are withdrawn.

The interest will be calculated to the thirtieth day of June in every year, and will then be added to, and become part of the principal money.

7. Deposits may be made by a Trustee on behalf of another person, in the joint names of such Trustee and the person on whose account such money shall be so deposited; but repayment of the same, or any part thereof, shall not be made without the receipt and receipts of both the said parties, or the survivor or survivors, or the executors or administrators of such survivor, whose receipt and receipts either personally or by agent appointed by Power of Attorney, which Power of Attorney, in the case of Minors, may be executed by such Minor if of or exceeding the age of 14 years, shall alone be a valid discharge, except in case of insanity or imbecility of the party on whose behalf the deposits were made, when the Postmaster General may, on proof of the fact to his satisfaction, allow repayment to be made to the Trustee alone.

The following declaration must be made in such cases:—

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                       |

| I, ..... of .....<br>do hereby declare to the Postmaster General, that I am desirous of becoming a Depositor in the<br>Post Office Savings Bank, as the Trustee of ..... of .....<br>and I do further declare on behalf of myself, and also on behalf of the<br>said ..... that we are not either jointly or severally, directly or<br>indirectly entitled to any deposit or benefit from the funds of the Post Office Savings Bank, nor<br>to any sum or sums standing in the name or names of any other person or persons in the Books<br>of the said Savings Bank.<br>Witness my hand this ..... day of ..... 186..<br>Signed by the said Trustee<br>in the presence of me, .....<br>..... }<br>..... }<br>Save and except such sum or sums as may be standing in my name as a Depositor, on my own<br>Account, or as Trustee jointly with the name or names, and on behalf of any other Depositor or<br>Depositors. |                                                       |

And in case any such declaration shall not be true, the person making the same shall lose all right and title to his deposits.

8. Deposits may be made by, or for the benefit of any person under 21 years of age. In case of Minors under the age of 10 years, the declaration must be made by one of the Parents or by a friend on behalf of the Minor.

Repayment to a Minor over 10 years of age shall be made in the same manner as if he were of full age.

9. Deposits may be made by married women, and deposits so made, or made by women who shall afterwards marry, will be repaid to any such woman.

10. Every Depositor shall, once in each year, on the anniversary of the day on which he made his first deposit, forward his Book to the Postmaster General, in a cover to be obtained at any Post Office Savings Bank, in order that the entries in the said Book may be compared with the entries in the Books of the Postmaster General, and that the interest due to the Depositor on the preceding 30th June, may be inserted in his book.

11. No charge shall be made upon Depositors for the books at first supplied to them,

or for books issued in continuation thereof; but if any Depositor shall lose his book, and shall desire a new book, application must be made by him to the Postmaster General, by letter, stating the circumstances, and enclosing Postage Stamps of the value of twenty cents to pay for the new book, should the application be granted, and the Postmaster General shall, as he thinks fit, issue a new book, or return the stamps to the applicant.

12. No charge for postage shall be made upon the Depositors for the transmission of their books to the Postmaster General, or for the return thereof to them, or for any applications they may have to make for acknowledgments of deposits, or for any application or necessary letter of enquiry respecting the sums deposited by them, or for the replies thereto.

13. Any Depositor wishing to withdraw the whole or part of the sum deposited by him, must make application for the same to the Postmaster General, in the following form, a printed copy of which may be obtained at any Post Office Savings Bank.

No less amount than one dollar, or some number of dollars, shall be withdrawn, except when a Depositor withdraws all the money, both principal and interest, due to him.

|                                                                                                                                                                                                                                                                                        |                                    |

| I hereby give notice that I wish to withdraw the sum of.....dollars from my Deposit Account, bearing the above Number in the Books of the Post Office Savings Banks, and I request that a Cheque may be issued for the above named sum, and made payable to me at the.....Post Office. |                                    |
| .....Signature }                                                                                                                                                                                                                                                                       | } of Depositor.                    |
| .....Address }                                                                                                                                                                                                                                                                         |                                    |
| .....Occupation }                                                                                                                                                                                                                                                                      |                                    |
| NOTE.—If the Depositor cannot write, his mark must be affixed in the presence of a Witness, and attested by the signature of that Witness.                                                                                                                                             |                                    |

In this form the Depositor must specify the number of his book, the name of the office at which his deposit book was issued, the sum which he wishes to withdraw, his occupation and residence, and the Post Office at which he wishes to receive his money. On receipt, by the Postmaster General, of this application, a cheque in the following form, for the amount required, payable at the office named, shall be sent to him by post:—

|                                                                                                                                                                                                 |                                                                   |

| To the Postmaster of.....                                                                                                                                                                       |                                                                   |
| Pay.....of.....the sum<br>of.....dollars, on production of his Deposit Book, and on his satisfying<br>you that he is the person entitled to the same, and charge the amount to this Department. |                                                                   |
| \$.....                                                                                                                                                                                         | Entered.....<br>Examined.....<br>.....Superintendent.             |

|                                                                                                                                                                |                                         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|
| <p><b>DEPOSITOR'S RECEIPT.</b></p> <p>I hereby acknowledge the receipt of the above named sum.</p> <p style="text-align: right;">.....(Signature of Depr.)</p> | <p>Stamp of paying<br/>Post Office.</p> |
| NOTE.—If the Depositor cannot write, his mark must be affixed in the presence of a Witness, and attested by the signature of that Witness.                     |                                         |

By the same post, the Postmaster of the office at which the cheque is made payable, shall be advised of the issue of the cheque. This cheque must be presented by the Depositor, with the least possible delay, at the Post Office named thereon, together with the Depositor's Book, in which the Postmaster shall enter the amount repaid, and attest the entry with his signature, and the dated stamp of his office. The Postmaster shall take a receipt from the Depositor on the cheque, for the amount repaid to him.

The Postmaster General will endeavour to prevent fraud, and to identify every Depositor transacting business with the Post Office Savings Bank; but if any person shall fraudulently represent himself to be a Depositor, and by forwarding the proper notice of withdrawal, and by presentation of the Depositor's Book, and compliance with the rules of the Department, shall obtain any sum of money belonging to that Depositor, the Postmaster General will not be responsible for the loss thereof.

14. Payment of the Postmaster General's Cheque for a withdrawal shall be made only to the Depositor in person, or to the bearer of an order under his hand, signed in the presence of a Justice of the Peace for the place in which the Depositor resides,—or, in case of sickness, of the medical attendant. If the Depositor be resident abroad, his signature must be verified by some constituted authority of the place in which he resides.

The following is the form of order to be signed by the Depositor on such occasions, a copy of which may be obtained at the Post Office at which the cheque is made payable.

|                                                                                                                                                                                                                                                                                                                                            |                                                                             |                                                            |

| } Of Depositor.                                                                                                                                                                                                                                                                                                                            |                                                                             |                                                            |

15. When a Depositor has more than one Hundred Dollars at the credit of his ordinary deposit account, and desires to transfer that sum to a special deposit account, bearing interest at the rate of 5 per cent. per annum,—he may make application to the Postmaster General on the following form, a printed copy of which may be obtained at any Post Office Savings Bank.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                           |

| I,.....hereby request the Postmaster General to<br>transfer.....hundred dollars now at the credit of my <i>ordinary deposit account</i> ,<br>bearing the above Number in the Books of the Post Office Savings Bank, to a <i>special deposit</i><br>account in the said Books, bearing 5 per cent. per annum interest, and that he will grant me a<br>Certificate of such special deposit under such conditions as to notice of redemption, and subject<br>to such Regulations as in other respects may be expressed thereon, or from time to time may be<br>made by the Postmaster General in regard to such special deposits and Certificates thereof. |                                                                                                           |
| Signed by the said Depositor<br>in the presence of me<br>.....<br>.....                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | .....Signature<br>of Depositor.                                                                           |

The Postmaster General shall then, if the transfer be approved, make the transfer accordingly, and return to the Depositor a certificate for each Hundred Dollars so transferred. Such certificate will be evidence of the Depositor's claim upon the Special Deposit Account for One Hundred Dollars, with the interest due thereon from the date of the certificate, and shall be redeemable upon such previous notice as may be therein expressed, and such Special Deposit Accounts and the certificates thereof shall in all respects be subject to such Regulations as the Postmaster General, with the sanction of the Governor in Council, may from time to time make.

The Certificates of Special Deposit will not be transferable.

16. The interest which may become due on such Special Deposit Accounts will be calculated to the 30th day of June in every year, and will then be credited to the Depositor in his ordinary Deposit Account.

17. In case any Depositor shall die, leaving any sum of money not exceeding \$300, exclusive of interest, deposited in the Post Office Savings Bank, and Probate of his Will, or Letters of Administration or Acte of Curatelle or Tutelle, be not produced to the Postmaster General, or if notice in writing of the existence of a Will, and intention to prove the same, or to take out Letters of Administration or be appointed Tutor or Curator, be not given to the Postmaster General at the Post Office Department, within the period of one month from the death of the Depositor; or, if such notice be given, but such Will be not proved, or Letters of Administration or Actes of Tutelle or Curatelle be not taken out, and the Probate or Letters of Administration, Actes of Tutelle or Curatelle (as the case may be) produced to the Postmaster General within the period of two months from the death of the Depositor, it shall be lawful for the Postmaster General, after such period of one or two months, as the case may be, to pay and divide such funds at his discretion to or amongst the widow or relatives of the deceased Depositor, or any one or more of them; or, if he shall think proper, according to the provisions of law governing the distribution of property in such cases.

18. In case any Depositor shall die leaving any sum of money in the Post Office Savings Bank, which (exclusive of interest) shall exceed the sum of \$300, the same shall only be paid to the Executor or Administrator, Tutor or Curator on the production of the Probate of the Will, Actes of Tutelle or Curatelle or Letters of Administration of the Estate or Effects of the deceased Depositor, to the Postmaster General.

19. If any Depositor, being illegitimate, shall die intestate; leaving any person or persons who, but for the illegitimacy of such Depositor, and of such person or persons, would be entitled to the money due to such deceased Depositor, it shall be lawful for the Postmaster General, with the authority, in writing, of the Attorney General of Canada, to pay the money of such deceased Depositor to any one or more of the persons who, in his opinion, would have been entitled to the same, according to Law, if the said Depositor, and such person or persons, had been legitimate.

20. If any Depositor shall become insane, or otherwise incapacitated to act, and the same shall be proved to the satisfaction of the Postmaster General, and if the Postmaster General shall be satisfied of the urgency of the case, he may authorize payment from time to time, out of the funds of such Depositor to any person whom he shall judge proper, and the receipt of such person shall be a good discharge for the same.

21. If any dispute shall arise between the Postmaster General and any individual Depositor, or any executor, administrator, tutor or curator, next of kin, or creditor, or assignee of a Depositor who may become bankrupt or insolvent, or any person claiming to be such executor, administrator, tutor or curator, next of kin, creditor or assignee, or to be entitled to any money deposited in the Post Office Savings Bank, then, and in every such case, the matter in dispute shall be referred, in writing, to the Attorney General of Canada; and whatever award, order, or determination shall be made by the said Attorney General of Canada; shall be binding and conclusive on all parties, and shall be final, to all intents and purposes, without any appeal.

22. The Postmasters, or other officers of the Post Office, engaged in the receipt or payment of deposits, shall not disclose the name of any Depositor, nor the amount deposited

---

or withdrawn by him, except to the Postmaster General or to such of his officers as may be appointed to assist in carrying out the provisions of the Post Office Act in relation to Post Office Savings Banks.

23. In the construction of these Regulations, unless there is something in the subject or context repugnant thereto, every word importing the singular number only shall mean and include several persons or things, as well as one person or thing and the converse; and every word importing the masculine gender only shall mean and include a female as well as a male; and the word "month" shall refer to a calendar and not a lunar month.

A. CAMPBELL,  
*Postmaster General.*

**REPORT**  
OF THE  
**COMMISSIONER OF CROWN LANDS**  
OF CANADA.

FOR THE YEAR ENDING 31<sup>ST</sup> DECEMBER, 1866.

---

*To His Excellency Lieut.-General Sir JOHN MICHEL, K. C. B., Administrator  
of the Government of the Province of Canada, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY :—

I have the honor, in conformity with the provisions of the Act respecting the sale and management of the public lands, of submitting to Your Excellency the following Report of the proceedings, transactions and affairs of the Department of Crown Lands for the year ending on the 31st December, 1866.

L O W E R   C A N A D A .

CROWN LANDS.

The sales during the year amounted to 161,428 acres; the purchase money to \$65,379.28, and the receipts to \$69,726.67.

On the Colonization Roads 10,850 acres were located as free grants to actual settlers.

To the 6,142,669½ acres disposable at the commencement of the year, 305,824 acres were added by surveys, making a total of 6,448,493½ acres, from which deducting the sales and free grants, 172,278 acres, a balance of 6,276,215½ acres remain for future disposal.

CLERGY LANDS.

12,597 acres were sold in 1866, which deducted from the quantity remaining unsold at the commencement of the year, 270,305 acres, leaves a balance of 257,708 acres still disposable.

The purchase money of the lands sold during the year is \$6,785.50 ; the collections, \$25,655.71.

#### MINERAL LANDS.

There were 10,504 acres of mineral lands sold during the year at \$1 an acre, under Regulations of 13th July, 1866—4,951 in the Township of Watford, and the balance on the north shore of the St. Lawrence, in the County of Saguenay.

\$4,230 were deposited on account of sales not yet carried out.

#### JESUITS' ESTATES.

The gross sum collected from these Estates during the year ended 31st December, 1866, amounted to \$14,719.34, of which \$3,572.23, capitals of sales of property and rents up to the passing of the Act, 19th Victoria, chapter 54, (Consolidated Statutes of Lower Canada, chapter 15), appertain to the " Lower Canada Superior Education Investment Fund " under the provisions of that Act, and the balance of \$11,147.11, revenue accrued since the said Act came into force, belongs to the " Lower Canada Superior Education Income Fund."

Out of the receipts a sum of \$55,36 amounts overpaid by agents, was refunded. The expenses come to \$1,127.97 and consist of law costs and agents' commission and disbursements, including in the latter costs of copies of deeds, which in most cases are re-collected by the Department.

The net receipts remain at \$13,591.37, exclusive of above refund. The receipts include a sum of \$947, balance of purchase price of Charlesbourg Mill, in rear of Quebec, in which case a deduction, on condition of prompt payment, was made by Order in Council of August, 1865, in consequence of the very great depreciation in value of such property by the abolition of the Seigniorial Tenure. This is the last mill case of the kind remaining to be decided.

The receipts also include \$1,007.13, compromised balance of rent due by the late lessee of the Domain Farm of Notre Dame des Anges at Beauport, a bankrupt.

By Order in Council of the 27 June, 1866, it was decided that a remission be granted of one half of all the arrears of *Lods et Ventes* and *Cens et Rentes* to those of the *censitaires* of the Jesuits' Estates, Seigniories and *Fiefs* who would pay the balance in two equal instalments, viz:—one half in twelve months and one half in eighteen months from the 1st of July following. It is to be hoped that the debtors will avail themselves of this liberality of the Government in order that this long standing matter may be finally closed up without recourse to legal proceedings.

For statement of receipts and expenses, in detail, see Appendix No. 14.

#### CROWN DOMAIN.

The sum of \$8,864.76 has been realized from the Queen's Domain in Canada East, in the year ending 31st December, 1866, being \$2,660.42 *Lods et Ventes, Cens et Rentes, &c.*, *Censives* Quebec and Three Rivers. \$1,911.41 balance of price and interest on sale of St. Maurice Forges and lands, and \$4,292.93 on beach and deep-water lots, including \$350 Patent Fees.

Out of the receipts were paid \$309.11 refunded dues, and \$127.96 instalment on a beach and deep-water lot, not due till November, 1867, also refunded.

The expenses, comprising Agents' salaries, commission and disbursements, including costs of copies of deeds, received back by the Department in judicial cases, amount to \$1,602.32, leaving the net revenue at \$7,262.44, from which was further deducted the above refunds.

See Appendix No. 16 (a) for detailed statement.

#### SEIGNIORY OF LAUZON.

This property produced during the year ended 31st December, 1866, the gross sum of \$11,663.94.

The expenses, consisting of proportion of Agent's salary and of disbursements, amount to \$946.21, leaving the net revenue at \$10,717.73. The Agent's disbursements include a sum of \$12.20 refund.

For details of sources of revenue, expenses, &c., see Appendix No. 15.

#### ESTATE LATE SIR JOHN A. CALDWELL.

Mr. Felix Fortier, the Curator to this Estate, having made, during the past year, a further return into Court of the moneys received by him from the 5th December, 1863, to the 23rd November, 1866, the Crown was collocated for and received in December the sum of \$3,827.97 net, in addition to the \$8,186.67 collected by the Department in the year 1863, making altogether \$12,014.62 received through the instrumentality of, and in consequence of the action taken by this office, being further in reduction of the late Sir John Caldwell's indebtedness to the Province.

For statement see Appendix No. 16 (b).

#### GOLD MINES—LOWER CANADA.

##### CHAUDIÈRE DIVISION.

Operations in this division have still continued to be carried on during the past year principally in the Seignior of Rigaud-Vaudreuil. These operations have been confined to alluvial workings, and works mostly preparatory for the prosecution of quartz mining.

The De Lery Gold Mining Company are erecting a quartz crushing mill, which, at last accounts, was expected to be in operation at an early day.

On the 21st December, a large nugget weighing 3 lbs. 9 ozs. and 12 dwts. troy, and valued at \$850, was found in a pit sunk on the left bank of the River Gilbert, in the above Seignior, at a depth of 32 feet. Other large nuggets have likewise been found.

Mr. Pope's reports from January to December, dated respectively 28th February, 1st May, 2nd July, 6th September, 7th September, 3rd November, 13th December, 1866, and 5th January, 1867; also, approximate return of gold extracted and men employed during the year, dated 27th February, 1867, and correction to same, 4th March, 1867, will be found in Appendix No. 26 (a).

By Order in Council of the 11th May, on the application of the De Lery Gold Mining Company, holders of the De Lery Patent of September, 1846, for a commutation of the percentage of 10 per cent. reserved to the Crown in that patent, which they represented was exorbitant, it was decided that, without expressing any opinion as the validity of the patent, or the relative rights of the assignees of the patentees and the *Censitaires* and representatives, that, the Company not working any lands but those unceded, or those

as to which they acquire the right to do so from the *Censitaires*, the Crown do agree to receive from the former in lieu of the Royalty stipulated in the Letters Patent, similar fees to those provided by the "Gold Mining Act," on condition that they do, within five years from this date, settle the disputes with the *Censitaires* and representatives as to the ownership of gold on private lands, either by making bargains with the owners or by taking such legal measures as will demonstrate that the Company, and not the *Censitaires*, are the owners of the gold on private lands, and that failing adjustment of these disputes within a reasonable time, the Company shall abandon its pretension to the gold on conceded lands, so that the Department may deal with the *Censitaires* as owners of the gold; with the additional proviso that law-suits of the Company pending at the termination of the period of five years, will be allowed to go to final decision, ordinary diligence being used to obtain such decision. This Order in Council was accepted by the Company.

There was collected during the year, in the division \$14, \$13 being license fees and \$1 fine. Operations having been almost entirely carried on within the above-mentioned Seignior, not under the provisions of the Act, and the active works of the De Lery Gold Mining Company being only on the point of commencing, after which the fees, as prescribed by the above Order in Council, will be payable, will account for the small sum received.

There was expended for Agent's salary and disbursements, \$1,828.22.

For details, see statement, Appendix No. 26 (a).

#### ST. FRANCIS DIVISION.

Mr. Gilman, Inspector for this division, reported to this Department on the 26th September last, on the operations which had taken place in his district, which report will be found in Appendix No. 26 (a) before mentioned.

No fees have been received in this division during the year, but Mr. Gilman was instructed, on the receipt of his report, to call on the parties working to take out license.

No expenses have been incurred in this division. Mr. Gilman is only paid for actual time employed, and has not yet furnished account for 1866.

### U P P E R C A N A D A .

#### CROWN LANDS.

At the commencement of 1863, there were 3,218,510 acres of surveyed Crown Lands on hand, in addition thereto 245,869 acres were surveyed during the year, making a total of 3,464,379 acres, of which 170,827½ acres were sold, and 7,200 acres located as free grants on the Colonization roads, leaving a balance of 3,286,351½ acres disposable at the end of the year.

The purchase money of the lands sold is \$120,777.41; the amount collected \$196,836.38.

#### CLERGY LANDS.

There were 63,670 acres sold during the year, the purchase money of which amounted to \$78,933.49. The gross amount of collections was \$193,292.16, the disbursement were \$887.11.

## GRAMMAR SCHOOL LANDS.

Only 890½ acres were sold, leaving a balance of 45,993 acres still disposable. The purchase money of the lands sold was \$1,548.90. The collections \$8,667.62.

## COMMON SCHOOL LANDS.

The sales during the year of the lands set apart under the authority of the Act 12th Vic., cap. 200, for creating a Common School Fund amounted to 2,948 acres, chiefly lots which had been formerly sold but resumed for the non-performance of the conditions of sale.

The amount of sales was \$8,366.65, of gross collections \$128,070.40, and of disbursements, \$490.19.

The total amount realized from these lands up to the 31st December, 1866, is \$1,320,833.40.

## MINERAL LANDS.

Twelve thousand seven hundred and seventy-seven acres on the North Shores of Lakes Huron and Superior, have been patented for mining purposes during the year. In all patents granted since the 6th August, an allowance of five per cent. upon the acreage has been reserved for roads, in accordance with an Order in Council of that date.

The cash receipts amount to \$8,179.68 and sums brought out of deposit \$1,466.00. Total, as revenue for the year, \$9,645.68. See Appendix No. 24.

## C A N A D A .

## ORDNANCE LANDS.

In view of impending changes, the operations in Ordnance Lands have been purposely restricted during the year 1866.

The revenue for the year 1866, being the growing results of the operations of preceding years, amounts to the sum of \$39,061.40, exceeding the income of 1865 by a sum of \$9,767.67. The expenses of the Ordnance Lands Branch for the year 1866, have been \$7,169.89.

## INDIAN AFFAIRS.

The receipts for lands and timber for the year commencing 1st January, 1866, and ending 31st December, 1866, were \$92,455.10; interest on investment for the same period \$121,628.53; annuities and grants \$35,420.09, making a total of \$249,503.63.

The payments made, comprising annuity and interest money to Indians, and salaries, surveys and incidental expenses, amounted for the same period to \$140,469.66.

On the 1st January, 1866, the total sum, as represented in the books of this office, at the credit of the various Indian bands was \$1,630,833.61. At the termination of the year ending 31st December, 1866, from payments of instalments on lands, from new sales, timber, &c., the amount, after defraying salaries, and all other charges was \$1,739,867.58, shewing an increase of \$109,033.97.

## WOODS AND FORESTS.

The amount collected during the year ending 31st December, 1866, for timber dues and ground rents was \$338,302.49, and from slide dues \$63,483.84, making the total \$401,786.33; in addition to which the sum of \$903.97 was collected for other services,

viz: Clergy, School and Indian, and \$7,995.26 value of settlers' timber. Total, \$410,685.26.

The charges of management for collecting timber dues, ground rents, and slide dues are \$31,767.26. These charges do not include the salaries of Woods and Forests Branch at head-quarters, nor \$6,861.83 refunds, &c.

#### FISHERIES.

During the past year this service has been carried out in conformity with the new *Fisheries Act*, 29 Vic., cap. 11.

The whole expenses were, in Lower Canada, \$24,777.50, including \$7,239.50 for fishing bounty claims accrued in 1865, and paid in 1866. A schedule of similar claims accruing in 1866, and amounting to \$8,174.00, will be found at Appendix No. 23 (a). In Upper Canada the expenses were \$4,190.39.

The total collections made up to the close of the year amount to \$8,308.60. This sum consists chiefly of rents collected at the Department as payments in advance; various sums collected through the fishery officers as license fees and fines, appearing only in their returns after the 31st December, will be reckoned in the statements for 1867.

Receipts and disbursements are detailed in Appendix No. 22.

The number of United States vessels licensed in Canadian waters, under special arrangement for last season, between the British and American Governments, will be found at Appendix No. 23 (b).

The annual report of the Stipendiary Magistrate commanding the Government vessel *La Canadienne*, engaged in the Gulf and Lower St. Lawrence, is published as Appendix No. 27.

#### SURVEYS IN UPPER CANADA.

The following are the Surveys which have been completed and audited during the year:—

In the Huron and Ottawa Territory, the subdivision into farm lots of 100 acres each, of the townships of Carlow, Foley, McDougall, Watt and residue of Herschell; the subdivision of the town plot of Helmsley at the Head of Lake Rosseau; the posting of lots along a portion of the Parry Sound Road; and the examination of lands in the townships of Murray, Brighton and Seymour.

At Lake Superior, the subdivision into quarter sections of 160 acres each, of the townships of Palmer and Fisher; part of the latter being Indian Lands.

On Manitoulin Island (Indian), the subdivision into farm lots of 100 acres each, of the township of Tehkummah; the re-posting of portions of the townships of Assignack and Sheguiandah, the survey of which had been obliterated by fire; and the subdivision of the town plots of Sheguiandah and Shaftesbury.

The exploration and survey of that portion of the Great Northern Road between Parry Sound and Spanish River.

The re-posting of lots on the Ordnance property in the City of Ottawa.

The foregoing constitute the principal surveys which have been completed and closed during the year, details of which are given in Appendix (19).

The subdivision of the townships of Cardwell, Raglan and Humphrey, had also been

completed in the field, but the Surveyor's returns had not been received in the Department up to the 31st December.

The total area subdivided (exclusive of the three last mentioned townships), is 275,678½ acres. The amount paid in balances on the Crown Surveys enumerated is \$11,399.01, and advances on surveys in progress, \$14,010.88, making a total of \$25,409.89 paid for Crown Surveys during the year.

The sums paid during the same period for the survey of Indian Lands, amount to, in balances on surveys completed, and advances on surveys going on, \$7,128.22 and on Ordnance Lands, \$283.00.

The surveys for which instructions were issued during the year, are the following, viz :—

For the subdivision into farm lots of 100 acres each, of the townships of Cardwell, Foley and Humphrey, in tee Ottawa and Huron Territory, and the town-plot of St. Joseph, St. Joseph Island; also, of the townships of Allan, Campbell, part of Carnarvon and residue of Billings, on Manitoulin Island (Indian lands). For the subdivision into quarter-sections of 160 acres each of the townships of Herrick, Ryan and Vankoughnet, at Lake Superior (partly Indian lands). For the subdivision of the town-plots of Batchewana on Batchewanung Bay; Shinguicouse, at the mouth of Garden River; Helmsley, at the head of Lake Rosseau; and Sheguiandah on Manitoulin Island. For the survey of lots on the Road line, from Lake Rosseau to Lake Nipissing. The outlines of 10 townships on the River Maganetawan. The exploration, with a view to obtaining a knowledge of the soil, timber and general resources of the country between Lake Superior and the Montreal River, and for the traverse of the Montreal River and some of its tributaries.

The Appendix shews in detail, 15 Municipal Surveys confirmed during the year, consisting of the establishing and posting of lots and concession lines in the townships of Darlington, North Monaghan, Pickering, Pilkington, Uxbridge and East Whitby.

Instructions were issued for eighteen Municipal Surveys during the year, eight of which, having been returned to the office and approved, before the close of the year, are included in the statement of surveys confirmed.

#### LOWER CANADA SURVEYS.

The surveys of the Crown Lands in Lower Canada, performed in pursuance of instructions from the Crown Lands Department, as enumerated in the accompanying annual statement (Appendix No. 18) are distributed in nine Counties of that section of the Province, whereof twenty-one surveys relate to the subdivision of lands for purposes of actual settlement and colonization, into farm lots, averaging one hundred acres each, and two surveys to the subdivision into blocks of six townships, collectively designated as the "Gaspé Oil Region," in the County of Gaspé, for mineral purposes—the surveys above mentioned containing in the aggregate 612,821 acres, and the usual allowance for highways.

The remaining four surveys consisting of outlines and river boundary demarcations.

The average cost of subdivision into farm lots was about 6½ cents per acre, and that of the mineral blocks 2¼ cents par acre.

*COLONIZATION ROADS—UPPER CANADA.*

The principal operations effected during the year 1866, on the above roads, have been as follows :—

|                           | Repaired.      | New road made. |
|---------------------------|----------------|----------------|
| On the Addington.....     | 20 miles ..... | 0 miles.       |
| “ Bobcaygeon .....        | 11½ “ .....    | 1½ “           |
| “ Buckhorn .....          | 1 “ .....      | 6 “            |
| “ Burleigh .....          | 8 “ .....      | 3 “            |
| “ Frontenac.....          | 6 “ .....      | 3½ “           |
| “ Lavant .....            | 2 “ .....      | 6 “            |
| “ Mississippi (West)..... | 4¾ “ .....     | 3 “            |
| “ “ (East).....           | 12¾ “ .....    | 2½ “           |
| “ Monck.....              | 0 “ .....      | 8 “            |
| “ Northern.....           | 10½ “ .....    | 1 “            |
| “ Opeongo .....           | 20 “ .....     | 0 “            |
| “ Parry Sound .....       | 0 “ .....      | 17 “           |
| “ Peterson.....           | 13¾ “ .....    | 2¾ “           |
| “ Rosseau .....           | 0 “ .....      | 4 “            |
| “ Victoria.....           | 40 “ .....     | 0 “            |
|                           | <hr/>          | <hr/>          |
| Total.....                | 150½ “ .....   | 58½ “          |

Total expenditure of the season, down to December 31, 1866, \$63,422.65. For details, see Appendix No. 25.

---

*PROGRESS OF SETTLEMENT ON THE UPPER CANADA COLONIZATION ROADS.*

On the Addington, Frontenac, Hastings and Opeongo Roads there were no new locations. On the Bobcaygeon Road there were eight, on the Burleigh Road nine, on the Muskoka Road forty-four, and on the Peterson Road eleven. Of re-locations of lots abandoned by the original locatees, there were on the Addington Road fourteen, on the Bobcaygeon Road eight, on the Burleigh Road one, on the Frontenac Road one, on the Hastings Road four, on the Muskoka Road seven, on the Opeongo Road three, and on the Peterson Road eleven.

---

*PROGRESS OF SETTLEMENT ON THE LOWER CANADA COLONIZATION ROADS.*

On the Elgin Road there were two locations, on the Etchemin Road one, on the Mailloux Road twenty-seven, on the Matapedia Road thirty-six, on the Taché Road one hundred and eighty-three, and on the Témiscouata Road twenty-two.

The whole humbly submitted,

By Your Excellency's most obedient Servant,

A. CAMPBELL,

OTTAWA, 2nd May, 1867.

Commissioner of Crown Lands.

ANDREW RUSSELL,  
Assistant Commissioner.

THOMAS DEVINE,  
Surveyor in Chief, U. C.  
DEPARTMENT OF CROWN LANDS,  
Ottawa, 31st December, 1866.

## APPENDIX No. 25.

## REPORT OF COLONIZATION ROAD OPERATIONS DURING 1866.

To the Hon. the Commissioner of Crown Lands.

SIR,—It is my duty again to offer to your notice a Report of the operations upon Colonisation Roads in Canada West, during the past season.

These operations have been carried on, with one exception, through the agency of Overseers and the employment of day laborers.

This system has been found, generally, to work satisfactorily, both with regard to the amount and quality of improvements effected, and the economy of expenditure.

Improvements have from time to time been made in the Rules for the guidance of the Overseers, and it is assumed that they have thus been brought nearer to perfection, and it is further hoped, that additionnal experience will continue to advance them in the same direction.

The general principals of these Rules are :—

- 1st. To employ settlers in preference to strangers.
- 2nd. To give them remunerative wages.
- 3rd. To provide a common boarding place for the laborers.
- 4th. Wholesome and substantial food.
- 5th. To prevent the use of intoxicating liquors on the works.

Various efforts have been made from time to time on the part and in behalf of the laborers to be allowed to board at their own homes, but these applications have invariably been declined, as on all public works (roads especially) experience has shewa that such a permission injuriously effects the operations and creates confusion and dissatisfaction.

Simultaneous action at a common point can only be obtained trough parallel advantages of time and locality—hence the Rule.

The direct operations of your Department, this season, have been distributed over fifteen localities, between Ottawa and Lake Huron.

These localities, the extent and character of the improvements and expenditure on the same may be described as follows :—

## 1.—THE ADDINGTON ROAD.

This road has been further improved, from its commencement, in Sheffield, to the 27th mile, in the Township of Barrie, beyond Clark's Tavern and Cloyne Post-office. Many bad hills have been avoided by inexpensive deviations. Cross-ways have been repaired or removed, and especial attention has been paid to that most indispensable requisite of a firm road, drainage.

Many parts of this road are extremely difficult to improve. Indeed, with the limited appropriations at our disposal, the most practical ingenuity is often severaly taxed in order to overcome in some reasonable degree the obstacles that exist on this and other similar roads.

Much, however, has been done on this road to improve its condition, at a comparatively small cost; and, for the distance above stated, the Addington may be pronounced a very tolerable road.

Expenditure of the season.....\$3,232 50

## 2.—BOBCAYGEON.

The improvements on this road were stayed last season, some two or three miles southward of Minden village. The remaining distance to the village has been completed. A remarkable improvement has been made at a very difficult hill, just before entering the town plot. A circuitous wind around the north-easterly base of this hill completely avoids the labor of ascending the same, and forms one of the very best portions of the road, entering the village upon an easy grade and at a picturesque point.

From this point, thorough improvements have been extended as far as the intersection of the Peterson road, and throughout this entire distance of 40 miles, from Bobcaygeon village to the last named road, any reasonable load may be readily drawn, and any light vehicle may be safely driven.

Some very necessary improvements have also been made in the vicinity of Trading Lake, on this road, and to the southward of the same. They have been of a less thorough character than those already described.

A small settlement exists at the above locality, and enough has been done to enable the settlers, at favorable periods, to reach the village of Minden, their nearest market for sale and supplies.

Expenditure for the season.....\$4,497 76

### 3.—BUCKHORN.

This road was commenced last year (1865), as shewn in my report for the half-year ending December 31, 1865.

The road was begun under proposals from the Peterboro' Town and County Councils, in which the said Municipalities offered to furnish one half of the required expenditure to extend the road through the Township of Harvey, a distance of 10½ miles, and to supervise the construction of the road upon condition that the Government would appropriate from the Colonization Roads Fund the other half. This agreement was subsequently altered, much to the benefit of the Corporations in question. The road has been made over 8 miles of the above total distance through Harvey.

But little was done last year, owing to the work not having been commenced until late in the season. About six miles have been constructed this season, leaving still two miles of line yet unbroken to complete the work, as per agreement with the aforesaid Councils.

Expenditure for the season.....\$4,387 30

### 4.—BURLEIGH.

The Burleigh Colonization Road suffers from irregular, tortuous and injudicious location, especially in its first distance. There appears to have been no clearly conceived purpose as to where its general direction should lie or tend. Hence, for the first six miles, it passes through a section of country the most desolate and incorrigible to be conceived of; a region denuded of timber, destitute of soil, and broken into ravines and ridges, composed of inconvertible granite, where the superficial labors of one year disappear the next, through the actions of the floods and freshets of one spring tide. On the upper end of this road, through the townships of Chandos and Cardiff, the land is of very tolerable average, and a respectable and healthy settlement progressing.

If ingress could only be obtained into the settlement by a more rational route than at present made use of, say by the east side of Otonabee River, and across the Stony Lake Narrows, so as to join the sharp elbow formed by this road on the 8th lot in the 6th Concession of Burleigh, there would then be some hope of constructing a thoroughfare into a better settlement upon the road, which could be made to stand without an expensive yearly improvement.

The operations on this road have extended from the 24th mile post on the road, to a distance of 11 miles from that point. Over three miles of this distance an entirely new road has been made, and the remaining portion of eight miles has been very carefully repaired.

Expenditure of the season.....\$3,858 42

### 5.—FRONTENAC.

The repairs on this road have been completed as far as the Mississippi River, throughout its entire length. The extension of the road has also been taken up from lot

19 in the 3rd Concession of Miller, and about three and a half miles have been opened and wrought over, so as to make the same available for winter travel, although not yet entirely finished.

Expenditure for the season.....\$4,132 90

#### 6.—LAVANT.

This road was located some seven years ago. It leads from the south-west corner of the Township of Darling, and unites with the Mississippi Road at the north-east corner of the Township of Palmerston, and is 17 miles in length.

In 1860, Mr. Jno. Snow constructed five miles of the line upon the eastern end, and the further advancement of the road was not resumed until the season of 1863.

Six miles of the road have been completed during the past season, and about two miles more have been chopped, cleared and graded, so that there now remain seven miles still to be constructed.

Expenditure for the season.....\$4,312 52

#### 7.—MISSISSIPPI.

This road is over 74 miles in length, from its commencement at the Mississippi River, in North Sherbrooke, to its western terminus at the intersection of the Hastings road. About 42 miles of the eastern portion of the road was opened and made about the year 1859.

Repairs begun in 1864, and carried on in 1865, have been pretty well completed during the past season, and the road extended westward of the Addington some 2½ miles.

On the western end of the road, from its junction with the Hastings, it has been opened and completed for a distance of 11¼ miles, leaving about 18 miles still of unopened line to be constructed.

Expenditure for the season.....\$6,134 62

#### 8.—MONCK.

This is a new road, leading from the upper end of Couchiching Lake, in the township of Mara, in an easterly direction, to unite with the Mississippi at its intersection with the Hastings road.

The first work done upon the line was commenced in June last, under the direction of M. Snow, P. L. S.

Eight miles of the road have been completed in a substantial manner.

Owing to the swampy character of the country, and the wetness of the season, heavy ditching was found to be indispensable throughout the greater part of the above distance.

Expenditure for the season.....\$1,953 14

#### 9.—NORTHERN.

All that has been done on the direct line of this road during the past season has been to extend the road as a "Dog train track," from the point where the road had been finished in the 33rd section of the Township of Awere to the Goulais River, 10½ miles.

A new branch of this road has also been opened, for the benefit of settlement, in the Township of Korah; the returns of which however have not yet been received.

Expenditure of the season (advanced on works).....\$1,000 00

#### 10.—OPEONGO.

The improvement of this road has been taken upon where the repairs of the season of 1865 ended, viz:—at the junction of the Peterson Road.

The work has been diligently carried on under Mr. McGuin, P. L. S., as overseer, who has effected 20 miles of repairs from the point indicated.

The Opeongo Road is now an excellent agricultural highway for upwards of 60 miles.

The highest settlers upon it have now an opportunity of doing what they never previously were able to do, viz:—to travel to the County Town of Renfrew without any serious impediment and with a full load of produce.

Expenditure for the season..... \$4,133 17

#### 11.—PARRY SOUND.

The completion of this road was let by contract to Mr. W. Beatty, of Parry Sound. Equal to about 26 miles of the road (which embraces a total distance of 43 miles) had been made at the close of 1865. The remaining distance was contracted for as above stated, to be completed by the 1st November last.

Owing however to the extreme difficulty of procuring hands last year in the remote locality in question, the contractor did not succeed in finishing the entire road. Some six or seven miles are still but partially made, but these are so far constructed as to render them available for winter travel.

The road is thoroughly completed from the head of water navigation on Lake Rousseau to the Sound, and good stages and steamboats connect at this point and furnished uninterrupted communication with Orillia, Barrie and Bell Ewart.

Expenditure for the season (advanced on works).....\$5,000 00

#### 12.—PETERSON.

About 11 miles of this road have been repaired in a very substantial manner, beginning at the village of Draper Falls and extending eastward to the town line of Draper.

This road was quite impassable, in certain sections, with a loaded vehicle.

Notwithstanding the above disadvantage, quite a thriving settlement is growing up in Draper. The land, in great part, is of excellent quality, and many very respectable improvements begin to appear.

Besides the above repairs, a branch road has been cut out and grubbed, preparatory to grading, from the sharp elbow on this road in Draper, westward, across the adjoining Township of Muskoka, to join the Muskoka Road.

This, when finished, will be an improvement of immense advantage to the settlers and travellers, east or west in the locality.

The branch is about five miles in length.

Expenditure for the season.....\$3,854 95

#### 13.—ROUSSEAU AND NIPISSING.

It was contemplated in the projection of road works for the season of 1866, that this new and very important road might be opened and completed as far as the good land on the borders of the Maganetewan River. This was considered to be the more desirable on account of an unfavorable belt of land which lies between the good land on Rousseau Lake and that on the Maganetewan. This rough tract is some eight miles in extent. It is forbidding in its aspect and unfitted for cultivation; but must necessarily be crossed before reaching the great arable tract, which commence at the 10th mile upon the line.

The difficulty of procuring men and supplies in a region comparatively remote, and the extreme wetness of the season, are the chief reasons urged by the overseer for the small amount of progress made during the season.

About four miles of the road have been opened and nearly completed.

Expenditure for the season.....\$3,343 23

#### 14.—VICTORIA.

This road has been thoroughly repaired from its commencement, at lot 20 in Fenelon, on the town line between Felelon and Eldon, as far as the 40th mile.

It is now an excellent road throughout this distance, and may be travelled without difficulty to its terminus at the Black River Bridge on the Peterson Road.

Expenditure for the season.....\$1,189 88

All the works above enumerated had been carefully considered in the projection of the same. They had been impartially adopted, with a view to further the real interests and progress of the various new settlements through which they were to pass, or for the development of the best sections of unsettled country which still remain in the hands of the Crown.

No appropriation has been made for, nor has any work been undertaken that has not a direct and immediate, or a collateral and legitimate claim upon the Colonization Roads Fund.

I must confess to some degree of disappointment and regret that more has not been accomplished during the past season, with reference to the new lines of road; but when the agitated state of the country is taken into consideration, during the period referred to, when, through a patriotic and commendable spirit, great numbers of the ablest-bodied men in our agricultural districts, as well as in our towns and cities, were engaged in military service, it will not be wondered at that many of the overseers found it impossible to strengthen their laboring gangs to the extent needed.

In many instances not one-half the men advertised for and required could be obtained. Add to this fact the extreme wetness of the latter part of the season, in consequence of which a great portion of the working time was lost, and I am satisfied the apology will be admitted as reasonable and sufficient.

With regard to the character of the work (having personally examined a great part of it), I am gratified to be able to assure you that it is generally of a substantial and well adapted kind.

No description also can exaggerate the benefit these improvements confer on the needy but industrious settler.

No one but the grateful pioneers of these rugged districts can understand the inspiring effect of them; and none but the experienced and practical observations can comprehend fully their indispensability, if the settlement of our almost illimitable rural districts is considered a desideratum.

Speak of the reduction of prices for lands, or extend the benefits of free grants as much as you may, these sink into comparative insignificance when considered in connection with the means of ingress and egress thereto.

Any settler, however illiterate, can tell you at once the pecuniary advantage of a certain reduction in the price of his land, or the value of a free grant lot, but who will calculate the continuous advantage of an improvement that makes a market at all seasons available for sale or for purchase, and brings at once within the reach of all the social blessings of churches, schools and workshops.

To the honest, industrious agriculturist the *Road* is "King."

I have the honor to be, Sir,  
Your obedient servant,

JAMES W. BRIDGLAND,

Supt. of Col. Roads, U. C.

COLONIZATION ROADS BRANCH,  
Ottawa, January, 1867.

SUMMARY OF EXPENDITURE.

NOTE.—Of this amount \$1,500 was a refund deposited by the Municipalities of Peterboro',—town and County—for the benefit of Buckhorn Road, and \$497. 76 more is a balance on Bobcaygeon Road, actually paid in 1867.

#### APPENDIX No. 25 (a).

### REPORT OF C. F. ROY, AGENT FOR THE GULF AND MATANE TO CAP CHATTE COLONIZATION ROADS.

STE. ANNE DES MONTS, 1st August, 1866.

To the Honorable Commissioner of Crown Lands, Ottawa.

HON. SIR,—Permit me to submit for your consideration the present report on the progress of Colonization, since the spring, in the different localities under my charge, but more particularly on the western portion of the Gulf Road.

#### GULF ROAD.

I had long hoped that the Government would this year continue the works on this road, commenced in 1864. Believing that the prosperous state of the settlement, and above all the rapid increase of the population, on the part of this road not yet opened, would be a sufficient reason to induce the Honorable the Commissioner of Public Works to ask of the Legislature a special grant for the continuation of these works, I placed myself in communication with that gentleman and laid before him all the facts which I thought worthy to fix his attention, but unfortunately, my endeavors have as yet, so far as I am aware, been unsuccessful. I regret this the more as some families who have come down since the spring cannot remain where they now are, owing to the want of means of communication. For these families being almost all very poor and living only by fishing, cannot remain during the winter so far from help and where they could not procure it but with extreme difficulty. They are, therefore, forced to winter their families elsewhere. They will also make but little chopping the ensuing winter, consequently little sowing in the spring, and thus at the end of the year will be as poor as at its beginning, and will be so until they can winter on their lots and then make the necessary clearing, for the most of the settlers that come are generally poor during many years, and are obliged to sacrifice all the fine season in earning bread for their families.

It is certainly lamentable for the locality that the opening of the road has been delayed nevertheless, considering the difficulties to be overcome, the progress made since the spring is the more worthy of notice, and as respects the increase of population, it is the most satisfactory which has yet been obtained on this road.

Since the 15th of last April, 42 families, embracing about 250 souls, have come to establish themselves in this locality; that is, already 15 families more than last year. Of these 42 families, 26 have commenced clearing their lots and 10 have built. The 16 other families, who are the poorest, are at present residing in the most populous parts of

the locality, and live exclusively by fishing. The greater part of these last mentioned have selected lots on the line of the road, but I do not think they will commence clearing on them this year.

Nearly 200 arpents have been cleared and sown for the first time during last spring. The total area of land made fit for cultivation is about 400 arpents, in which were sown 418 *minots* of all kinds of grain. The fields have everywhere a fine appearance, notwithstanding the continued drought, and it is thought that the crop of this year will be better than that of the last. Hay and straw will not be plentiful.

The number of buildings erected during the year is 14 houses and 5 barns. The increase of live stock since the spring is also very satisfactory. The settlers made nearly 7,000 pounds of maple sugar in the spring, making together a remarkable progress in the colonization of the Gulf road since the commencement of the year. I then add that this progress gives but a feeble idea of the importance this part of the country will attain if the opening of this road be continued, and the lands on it be given as free grants. Allow me once more respectfully to remark that it would be impossible to see more progress made in so short a time, with so many chances of failure as on this road, for in addition to the obstacles already so numerous of a toilsome clearing, with the means of communication almost impossible, there is the impossibility for all the settlers of being assured the possession of the lots they occupy, but by purchasing or obtaining free grants from the Crown. The benevolent solicitude to all in the administration of your Department leads me to hope that a state of things so adverse to the general development of this part of the country will not long continue.

#### ROAD FROM MATANE TO CAP CHATTE.

The repairs commenced three years ago on the road from Matane to Cap Chatte by the Department of Public Works, will be finished in a few weeks. The whole of this road is in good order, and although the hills are yet very numerous, it is travelled without difficulty.

The settlement on this road is in a most prosperous state. In certain tracts the population is so dense on the bank of the river as to induce the settlers to take lots in the second range. In the township of Cherbourg all the lots from one to twenty are occupied, and the same in the N. E. part of the second range of the township of Romieux. The land in the interior of these townships is reported to be better than that in the front range, and if it was not for the fisheries which retain so many on the front, we would shortly see a flourishing settlement there.

On my visit last month I re-located to new settlers eight lots located in 1860, and since totally neglected by the locatees. During the year there has been an increase of 11 families, comprising 47 souls.

The crops have everywhere a fine appearance, but, unfortunately, owing to the want of seed grain, the harvest will be less than that of last year. There are ten houses and seven barns on the road; one of the houses cost the proprietor \$1,000. Since the spring 37 arpents of land have been prepared for the plough, 187 arpents for the first crop, and 213 acres cut down.

Up to the present the cod-fishing on the coast has not been productive, yet the preparations for carrying on the fisheries augment yearly. More than 500 boats, each manned by two hands, are employed in this business in the limits of my agency; but, unhappily, the quantity taken by each boat is far from being a sufficient indemnity for the time spent. It is to be hoped the price realized will compensate for the small quantity of cod taken. Herrings have been abundant on all the coast this spring.

I close by remarking, with satisfaction, that the settlement of the lands in the interior of the Townships of Tourelle and Cap Chatte continues increasing. The Municipality have ordered the opening of a road in the Township of Cap Chatte, from the river to the rear of the sixth range. This is an appropriate measure, which will facilitate the settlement of a great number of families to whom the fisheries are only of secondary importance, and who desire above all to devote themselves to agricultural pursuits. I beg to add that I use my constant endeavors to promote the interests of Colonization in the locality committed to my charge.

I have, &c.,  
(Signed,)

CHARLES F. ROY,  
C. L. A.

APPENDIX No. 25 (b).

REPORT OF J. B. LEPAGE, AGENT FOR THE MATAPEDIA AND EASTERN SECTION OF THE TACHÉ COLONIZATION ROADS.

SIR,—I have the honor to submit to you the following report on the progress of the settlements, during the year ending 30th June last, on the Colonization Roads of Matapedia and Taché, section of Rimouski.

MATAPEDIA ROAD.

The work of opening this great road could not be finished last year, and for this reason Colonization did not make so much progress as we had reason to believe, but if I can judge by the measures taken to complete it during the present season, I hope this time, that my anticipations will be realised, in so far, as I said, respecting the opening up of the townships situated in the central portion of the road.

There has been this year but 15 new locations on this road and 13 transfers, in consequence of the original locatees having abandoned their rights to the said locations.

|                                        | New locations. | Transfers of same. |
|----------------------------------------|----------------|--------------------|
| In the Township, part of Fleuriau..... | ...            | 2                  |
| Do of Cabot.....                       | ...            | 7                  |
| Do Lepage.....                         | 10             | 2                  |
| Do Causapsca.....                      | 5              | 2                  |
|                                        | <u>15</u>      | <u>13</u>          |

The total number of locations issued on this road up to this date is given in the following table, also the number of acres of land taken up, the number of disposable lots and their extent per acre :—

| Townships.                                   | Locations. | Am't of acres taken up. | Lots disposable. | Amount of acres. |
|----------------------------------------------|------------|-------------------------|------------------|------------------|
| Part of Fleuriau .....                       | 21         | 1,529½                  | ....             | .....            |
| Cabot, including Kempt Road, Métis Section.. | 54         | 5,842                   | 156              | 15,498           |
| Lepage.....                                  | 22         | 2,111                   | 53               | 6,388            |
| Causapsca.....                               | 18         | 2,143                   | 35               | 4,287            |
| Assemetquagan .....                          | 3          | 447                     | 66               | 9,374            |
| Part of Ristigouche.....                     | 13         | 2,587                   | 15               | 3,023            |
|                                              | <u>131</u> | <u>14,659½</u>          | <u>325</u>       | <u>38,570</u>    |

Although few new establishments have sprung up in the course of the year, yet the considerable increase in the cleared land, and also of the resident settlers, cattle is an addition to the wealth of the settlement, worth mentioning.

PART OF THE TOWNSHIP FLEURIAU.

The settlements, in that part of the Township Fleuriau situated on the road, afford guarantee of sure prosperity. Out of 19 lots of land for which 21 locations tickets have been granted, 18 of them form establishments of great value. The extent of land under cultivation on each lot, is about 27 acres. The population numbers 113 souls and there are 18 houses, and 27 barns and stables.

CABOT.

This township contains a great number of lots of excellent land for Colonization and the road which passes through is nearly finished. Considering the matter on those two

points of view, one would have reason to believe that Colonization advances rapidly, but no, to the contrary, I regret to say, the progress is very slow. The cause is in the too great difficulty of clearing, especially for settlers who have to start, but an axe and a hoe, the lands being low and wet in several places, specially near the road, and covered with trees of full growth. But as these lands are of a great fertility I do think that once well known we will see on these lands vigorous pioneers who, with some means, will make valuable settlements. Notwithstanding, the clearing on the lots occupied has increased 118 acres during the year, which makes 317 acres of land in a state of cultivation. There are 14 resident settlers, forming in aggregate with their families 78 souls.

There are eleven houses and ten barns and stables.

LEPAGE AND CAUSAPSCAL.

The Township of Lepage is separated from the above by the Seignior of Metapediac, which extends about 21 miles along the road. In this space the new Metapediac Road is not yet passable for wheeled vehicles, it being open only in detached portions, and the bad state of the old Kempt Road in the same locality considerably retards the ingress of the settlers from the banks of the St. Lawrence into this Township. This township and the following one Causapscaal extend along the fine river of Metapediac. The good land they comprise and the great facility with which it can be cleared are known to several parties who are desirous of settling. The present state of Colonization is as follows :—

TOWNSHIP OF LEPAGE.

|                              |          |
|------------------------------|----------|
| Resident settlers.....       | 7        |
| Population .....             | 21 souls |
| Acres under cultivation..... | 84       |
| Buildings.....               | 6        |

TOWNSHIP OF CAUSAPSCAL.

|                              |           |
|------------------------------|-----------|
| Resident settlers.....       | 7         |
| Population .....             | 29 souls. |
| Acres under cultivation..... | 195       |
| Buildings.....               | 8         |

ASSEMETQUAGAN.

This township with part of Ristigouche adjoining extends also along the Metapediac. The road here and in Causapscaal is altogether finished up to Ristigouche, and gives an outlet to the central population on this side. There are five resident settlers, two houses, two barns and stables. The clearing consists of 30 acres under cultivation and five acres of slashing.

PART OF RISTIGOUCHE.

As represented by the shore statement there remains about fifteen lots to be granted, in that part of the Township of Ristigouche under my superintendence as Colonization Road Agent. These lots containing nearly upwards of 200 acres are nevertheless but sufficient to make each an advantageous settlement on account of the unevenness of the ground which is hardly fit for settlement. There are 13 resident settlers, 76 souls, 11 houses and 13 barns and stables. The clearings have increased 79 acres during the year, making a total of 387 acres in a state of cultivation and 28 acres slashed.

Here is the recapitulation of the above information :—

|                                       |              |
|---------------------------------------|--------------|
| Resident settlers.....                | 64           |
| Population .....                      | 364 souls.   |
| Extent of land under cultivation..... | 1,602 acres. |
| do do chopped.....                    | 124 “        |
| Houses or huts built .....            | 50           |
| Barns and stables.....                | 48           |

A saw-mill is built in Causapschal, and a second is under construction in the Township of Bagot.

*Increase on the preceding year.*

|                                       |            |
|---------------------------------------|------------|
| Resident settlers.....                | 14         |
| Population.....                       | 41 souls.  |
| Extent of land under cultivation..... | 322 acres. |
| Houses or huts built.....             | 9          |

The families settled in Fleuriau, Cabot and Lepage, are French Canadians from the parishes in the County of Rimouski; those in Causapschal, Assemetquagan and part of Ristigouche, are English, Scotch and Irish, from the parishes on the side of Baie des Chaleurs, County of Bonaventure—two families are from the County of Rimouski. The cattle of the settlers consists of 59 horses, 20 working oxen, 83 milch cows, 77 bullocks or heifers, 247 sheep, 89 fat hogs, and 97 to winter, making altogether 672 head of live stock. The domestic produce is set down as follows: Wool, 626 lbs.; fullled cloth, 359 yards; flannel, 485 yards; and butter, 1,660 lbs.

The extent of land sowed in the spring of 1865 was 509 acres—22 under hay, and 1,071 in pasture. Of the number of acres left for pasture I average about one-third which could not be sowed, in consequence of the frequent rains in May and June of the same year, and which has prevented the burning of slashing in proper time, but which has since been put in cultivation. Here follows a statement of grain sown and harvested.

|                      |                    |                                               |
|----------------------|--------------------|-----------------------------------------------|
| Wheat.....           | 59½ bushels sowed, | 389 bushels harvested.                        |
| Rye.....             | 53 “               | 408 “                                         |
| Barley.....          | 264 “              | 3,932 “                                       |
| Buckwheat.....       | 27 “               | 551 “                                         |
| Peas.....            | 55 “               | 330 “                                         |
| Oats.....            | 192 “              | 2,504 “                                       |
| Potatoes.....        | 301 “              | 3,933 “                                       |
| Turnips & beets..... | “                  | 3,425 “                                       |
| Total .....          |                    | 951½ bushels sowed. 15,472 bushels harvested. |

By the above figures it appears that the average produce of every acre cultivated is 16½ bushels; and of each bushel sown a little more than 12½ bushels.

Such a result as obtained in my locality—which is yet considered as a wild and uncultivated place—deserves, certainly, great attention. It is now time to value the work of clearing, of the buildings, and the increase of cattle, during the year from 30th June, '65 to 30th June, '66; also, the value of crops and the produce of domestic industry in the same space of time, viz:

|                                       |            |
|---------------------------------------|------------|
| Clearings, valued at.....             | \$3,964 00 |
| Buildings, “ .....                    | 270 00     |
| Cattle, “ .....                       | 2,138 00   |
| Agricultural products, valued at..... | 7,752 00   |
| Product of Manufactures, “ .....      | 850 00     |

Total value realized during the year .....\$14,974 00

It is also proper to shew the actual wealth of the settlers on this road :—

|                                                               |             |
|---------------------------------------------------------------|-------------|
| Value of the Agricultural and Manufacturing produce for 1865. | \$ 8,602 00 |
| Value of Cattle.....                                          | 8,510 00    |
| Value of Landed Property .....                                | 19,112 00   |
| Total actual wealth .....                                     | \$36,224 00 |

TACHÉ ROAD—RIMOUSKI SECTION.

The starting point of Taché Road in this section is at the 10th mile of the Metepediac Road, at the rear of the Seigniories of Lepage et Thivierge. In the fall of 1865 only one mile (3½ chains) of the road was opened, the greatest part of the money appropriated for the working of the road having been employed to complete and ameliorate the extent opened the previous year, and to repair Fleuriau road—one of the branches of Taché road—to the parish of Ste. Luce.

The extent actually open is then only eight miles and ¾ (up to lot No. 11 in the 4th Range of Fleuriau), on a length of 100 miles, where every where, I may say, Colonization promises to display and develop itself with the greatest success.

I think it would be unnecessary to give here a new description of the road, and of the good lands which will benefit the settlements up to Temiscouata Road, as they are already sufficiently described in my previous reports. I will only add these words of Mr. Drapeau, so well expressed about this great road: "Taché Road, truly called the Grand Trunk of the Colonization Roads of the east part of the St. Lawrence, will offer, once opened with its branches, an immense field for colonization for the surplus of population dispersed in the parishes all along the St. Lawrence." In fact viewing the great results obtained up to the present, in so short a space of time, and in a territory so limited as the one actually open for establishments, we may be convinced of the above truth.

The number of lots disposable as Free Grants is only 64, all are occupied and are under clearing. In order to show the clearings made on that part of the road, since the beginning of the works in 1862. I will make the following analysis:—

|                                                                |    |
|----------------------------------------------------------------|----|
| Number of settlers occupying lands on the 30th June, 1866..... | 85 |
| Do do settled on their lands.....                              | 40 |

Population, 191 souls, of which 100 men and boys, and 91 women and girls.

|                             |           |
|-----------------------------|-----------|
| Houses or huts.....         | 27        |
| Barns.....                  | 29        |
| Stables.....                | 22        |
| Saw-mill.....               | 1         |
| <b>Total buildings.....</b> | <b>79</b> |

The extent of land cleared up was 805 acres, of which 614 were in a state of cultivation, and 193 of slashing.

Notwithstanding the disadvantages of an excessively rainy spring, and the scarcity of good seed, which the settlers had to provide themselves, 428 bushels of grain have been sowed on the lands on the road, giving a satisfactory result as follows:—

|                      |                                   |                   |
|----------------------|-----------------------------------|-------------------|
| Wheat harvested..... | 616 bushels at \$1 50 per bushel, | \$ 929 00         |
| Rye ".....           | 364 " 1 00 "                      | 364 00            |
| Barley ".....        | 3,190 " 0 50 "                    | 1,595 00          |
| Peas ".....          | 145 " 1 00 "                      | 145 00            |
| Oats ".....          | 620 " 0 40 "                      | 248 00            |
| Potatoes ".....      | 789 " 0 25 "                      | 197 25            |

| Value .....             |                | \$2,630 70 |

The proceeds of the crop, of the domestic industry and of the cattle, from 30th June, 1865, to 30th June, 1866, amounted to \$4,902, which is a little more than \$153 per family. By the above figures, it is easy to see how useful the opening and finishing of the two great roads will be to Colonization, and I may assert that the advantages to be derived from them will not be surpassed in any other part of the Province, it being a proof of the good effect of Free Grants.

The whole humbly submitted.

(Signed,) J. B. LEPAGE,  
Agent of Metapedia and Taché Road, Rimouski Section.

## APPENDIX No. 25 (c).

## REPORT OF C. F. FOURNIER, AGENT FOR THE TACHÉ ROAD, WESTERN SECTION.

To the Honorable  
the Commissioner of Crown Lands.

SIR,—In conformity to my instructions I have visited the new settlements in the Township of Montmagny, in that part of my agency lying on the Taché Road.

I travelled by the road opened by Government, passing by the Township of Ashburton.

Along each side of this road there are about three miles of farm lands in which the timber is cut down and in part burnt, on a breadth of about two arpents; but there are only two settlers residing on each side of the River du Sud, one named Letartre, and the other, Mercier. All this large clearing will, in a short time, be covered with brushwood, and again become woodland, if it continue abandoned as at present.

I have been told that this clearing was made by a colonization Society, who did not find the land fit for settlement. This is another proof, in connexion with the settlement associations of L'Islet and Kamouraska, that these societies are rarely successful in steadily advancing colonization.

In these societies, each in general desire to have the best lot, or the lot most advantageously situated. Disension often arises; difficulties grow up in proportion as the work advances; the spirit of colonization cools down among the associates, and the disorganization of the Society follows, often with loss to each of the future settlers, without great

advantage to the colonization of that part which the Society proposed to settle, excepting perhaps for two or three individuals who may have derived some profit therefrom.

The settlements left to the choice of the settlers themselves, along a new colonization road, progress generally more rapidly, for, as the land is scarcely ever equally good and advantageous along a new road, the first settlers commence by establishing themselves along it, here and there, wherever each thinks that the land is best, or the site most advantageous for beginning a settlement; and, one after another, new settlers establish themselves sooner or later in the neighborhood of the former.

Moreover, the settlers establishing themselves in the beginning here and there, and sometimes at a considerable distance from each other, are under the necessity of keeping up the new roads which they make daily use of, and which have cost the Government so much to have constructed.

Fifteen years ago I was professionally employed in that part of the Township of Montminy where the Taché road passes, which was not then made. All this part was then wild land, covered with timber. At present there are, on either side of this road, 114 lots in Montminy, 85 of which (including the half lots) are built upon and settled—the settlers residing there. On 18 lots a clearing has been commenced; some have more than twelve acres cleared. Seven lots have been recently taken, and six lots still remain undisposed of.

There is, besides, a neat chapel, a very good grist mill, and also a saw-mill, both belonging to Mr. Boilard, a substantial and enterprising farmer, who resides on the premises.

The progress of Colonization in this locality is due to the opening of the Taché Road. The proof is, that this road having been opened no farther than up to the next Township (Patton), not a single settler has yet cleared any land along the trace of the road-line in this latter Township, although the lots along the road have begun to be cleared nearly up to this Township in Montminy.

In the Township of Patton there are, on both sides of the Taché Road line, 102 lots which are all asked for with a view to settlement; but, so long as this road is not opened, there will be probably little or no settling, notwithstanding the desire which appears to exist to settle as soon as possible; for it appears that all along the road line, the land is in general well adapted for being taken up by new settlers.

In the Township of Arago there are, on both sides of the trace of the Taché Road line, 104 lots, on which 38 settlers have obtained location certificates to settle immediately, and other lots are asked for. Clearances have even been commenced, some time ago, on two or three lots; but, as in the Township of Patton, as long as the Taché Road is not opened, I apprehend that few or no settlers will make any permanent establishment.

The completion of the Anse à Gîtes and Arago Roads is also much desired.

A large proportion of those who are parents wish to establish their children on new land, the old lots having for a long time been too much subdivided for the support and maintenances of new families. But roads of communication are also wanting. Every year we see a certain number of our young people expatriate themselves to settle elsewhere, often returning after some years of absence, generally poor, and very demoralized, to remain in some way or other, a burden upon society.

The whole respectfully submitted.

(Signed,)

C. F. FOURNIER,  
Agent.

St. JEAN PORT JOLI,  
15th March, 1867.

St. JEAN PORT JOLI,  
24th July, 1866.

SIR,—I visited, last week, the Elgin and Taché Roads, the former as far as the Province Line, the latter as far as the Chapais Road, farther than which this road is not opened.

I have the honor to submit to you the following Report of that part which I visited

## ELGIN ROAD.

The settlers on each side of this road have continued to make extensive clearances during last winter and this spring, but the season has been so rainy that they have been unable to burn off as much as they would have wished, which has considerably diminished the sowing in these clearings. The grain has a fine appearance all along the road.

Those who sowed fall rye last September will receive large returns; they will get in at harvest about one-third more than the same quantity sown in the spring.

Many new settlers have taken up their residence here; others have sold their property to persons of more means than themselves, who had sold their lands in the larger parishes so as afterwards to settle their children more economically. This will still further strengthen the impulse given to the settlements by the means which these new purchasers possess and by the example which they give to their neighbors, while the vendor goes elsewhere to re-commence a new establishment.

There are, on both side of the road, about thirty Lots which are not yet granted, the road frontage being too stony and swampy. Eventually these Lots will, without doubt, be taken, when the lots in the vicinity are more advanced than they are at present.

The road opposite these lots is in a very bad condition—almost impassable for wheeled vehicles, even with a light load. The settlers repair it from time to time, but so superficially that the repairs do not last long.

As several thousand dollars worth of provisions, goods, &c., pass every year by this road, both in winter and summer, for those persons who have purchased timber of the Government, to send it down by the Rivers Ouelle, St. Jean, and their tributaries, there would be no injustice towards other parts of the province if the Government granted a couple of hundred dollars for repairing the road opposite these lots once for all, if this were possible.

Since my last report a by-road (*route*) has been opened to communicate from the road to the grist and saw mills, between lots No. 31 and 32 of the Township Dionne, terminating at lot No. 1 of the 5th Range of this township. This road has been opened by the proprietors of Ranges A, in the Township of Dionne and Casgrain, in virtue of a *procès-verbal* of the Municipality.

The four Townships, Garneau, Lafontaine, Casgrain, and Dionne, have been reunited and established as a separate municipality in virtue of the Municipal and Road Act of Lower Canada (chap. 24, Revised Statutes). Unfortunately the rule having been adopted after the month of January last, the election of Councillors will take place only in January next. I believe that this municipality will be beneficial to these settlers in many respects.

A large number of the lots on each side of the front, between the 5th and 6th Ranges of the Township of Casgrain, are being settled; already four settlers have taken up their residence there, two of them two years ago, besides other settlers who have made clearings there, at intervals, with a view to actual settlement. The transport of their effects is attended with the greatest difficulty; if the Government would grant them a sum of about one hundred and fifty dollars to assist them in opening a road of communication from the Elgin Road to the end of Range A, between lots Nos. 33 and 34 or thereabouts, it would be rendering them a great service, for they are as yet too poor to open this communication without assistance.

I am aware that the Government is opposed to any grant of money for roads of this nature, but I look on this as an exceptional case. These people are near the frontier and may be of great utility at some future time, in the event of a conflict with our neighbors.

If the road were made, these two ranges would be immediately taken up, from one end to the other, as far as the Township of Leverrier, as they lie on each side of the road which would be opened by the people themselves on this front. These lots are sold: as there are still a certain number of lots to be sold along each side of the front, the sale of these may very shortly be expected, the soil being good and in general free from stones from one end to the other.

I hope the same will be done in the Township of Dionne, from Dupont's grist mill north-eastwardly, between the 5th and 6th Ranges, for settlement purposes, as yet but one road is in use, which the absolute need of the settlers has caused to be opened, to go to the grist mill.

At present the missionary says mass in the chapel built on the Elgin Road, about a mile below the Taché Road, for the settlers of the Townships of Lafontaine and Garneau. The proprietors of the lots in the Townships of Dionne and Casgrain, are also preparing to build a chapel soon on the Elgin Road.

Some settlers along this road have grain and hay for sale: others, few in number, from want of energy, perseverance, or otherwise, sell or quit their lots to go elsewhere. But on the whole, the settlers along this road are in a prosperous condition, and generally well satisfied to have settled there.

#### TACHÉ ROAD—GOING NORTH-EAST—TOWNSHIP OF LAFONTAINE.

There are five families established along this road in this Township; many other families are lodging there at present, some to reside there permanently after this autumn, there are besides many clearings commenced on other lots, on each side of the road.

As along the Elgin Road, the grain here has a fine appearance, particularly the fall rye.

One Narcisse Pelletier has sown three minots of it: according to all the intelligent farmers who have seen it, his crop is now estimated at more than a hundred minots.

Another, Jacob Theriault, has so fine a piece of land sown with timothy and clover, that a lumberer offered him eighty dollars for the hay after it had been got in on the premises.

There is no doubt that in a short time, each side of the road, in this township will be settled, now that there is a resident settler as far as lot No. 39, and clearings here and there in the interval.

#### TOWNSHIP OF CHAPAIS.

There are also in this Township many clearings on each side of the road. One settler has sown timothy on a lot, where the hay has a fine appearance. These clearings are generally in those localities where the road, which comes up from Ste. Anne, abuts on the Taché Road, and the remainder occur at intervals as far as the Township of Painchaud.

There is no one at present residing on the road in this Township.

#### TOWNSHIP OF PAINCHAUD.

No clearing has as yet been made in this Township along the road, excepting near the road which comes up from St. Denis to the lake, where something of a clearing has been commenced.

Here terminates the opening of the Taché Road, going downwards.

#### TACHÉ ROAD—GOING SOUTH-WESTWARDLY—TOWNSHIP OF GARNEAU.

There are five settlers living along the road in this Township, and several others have begun to clear on their lots, with a view to permanent residence. It is certain that this Township will also be rapidly settled along the road.

This part of the Taché Road, going south-westwardly, is only opened between this Township and the Township of Arago.

#### TOWNSHIP OF ARAGO.

Although the road is not open in this Township, I have a list of some thirty persons who are only waiting for the opening of the Taché Road to commence a settlement. Already, one Pelletier, and another, named Jolicœur, have begun a clearing, to sow next spring.

As soon as the Arago road has reached it, the Taché road will be rapidly settled on both sides, for all this Township is good land along the road.

I have been told that the same will be the case in that part of the Township of Patton where the Taché Road is not opened, as also along the Anse à Giles road.

The Townships of Montminy, Mailloux and Buckland, have been (in part) settled before the opening of the Taché Road, I shall not allude to them farther.

*On the causes which may have retarded the settlement of the Taché Road.*

## COUNTY OF L'ISLET.

The upper part of the Seigniorship of Port Joli and the greater part of the first ranges of the Township of Fournier, consisting of land in nowise fit for new settlements, the young people have not been able to settle there. Thus, the settlements on the Elgin Road have been even in advance of the opening of the road, and keeping pace with the progress, and this almost wholly by the people of the Parishes of St. Jean Port Joli and St. Aubert. It is also the young people of these parishes who have commenced the establishments along the Taché Road, in the Townships of Garneau and Lafontaine. Before the opening of these roads those who wished to establish themselves were compelled to expatriate themselves to the Saguenay, or to the Counties of Témiscouata and Rimouski, at that time but thinly peopled, in comparison, for want of fitting land here, within reach of roads of communication, or left the Province altogether.

St. Roch and Ste. Louise des Aulnais occupied the Township of Ashford, all the first range of which—less ten lots—and a part of the second range are settled. At the present day, when good lands for settlement are more rare, some of those in these parishes have commenced clearings along the Elgin and Taché roads, in the Township of Lafontaine. In a short time, for want of fitting lands at home, the youth of these parishes will have to establish themselves elsewhere: the good lands in the townships of Lafontaine and Dionne, which are near them, will probably be preferred by them, so as to settle near their relatives.

The parish of L'Islet had the Fief Lessard—now St. Cyrille—and a certain part of the second Range of the Townships of Fournier and Bourdages, into which to throw its surplus population desirous of finding settlements. The people have been able to wait till now, without expatriating themselves to any great extent; but the want of lands for settlement begins to be much felt, and a part of the Arago road, now opened, being too stony to settle upon at present, they are waiting with impatience for the completion of this road and the opening of the Taché road, so as to make a continuous settlement along the entire front of Township of Arago, where, as I have stated above, the clearing have been made in advance.

It appears that the Arago Road, on reaching the Taché Road, passes through very good land, well adapted for colonization by young settlers.

## COUNTY OF KAMOURASKA.

St. Anne Lapocatière has had the Township of Ixworth, where a parish has been even erected, for the establishment of its surplus youthful population. Many however, as I have stated above, have commenced clearing lots along the Taché Road, in the Township of Chapais, shewing that the necessity of seeking new lands is deeply felt among the new settlers.

River Ouelle and St. Denis have been able to continue their settlements back from the St. Lawrence, as manifested by the two next parishes of St. Pâcome and Mount Carmel. Nevertheless along the new road of St. Denis, even as far as the Lac de l'Est, I am assured that there are some settlers established and resident, and that new lands are being cleared; a proof that colonization is strongly needed for so rapidly increasing a population.

The inhabitants of Kamouraska have also been able to get back from the St. Lawrence for settlement purposes, having the fine Parishes of St. Paschal, Ste. Hélène and St. Alexandre in rear, as well as part of the Township of Whitworth. A large number of young people of these Parishes have also settled themselves along the Témiscouata Road to Lake Témiscouata, and in the Counties of Témiscouata and Rimouski.

The Taché Road is opened only at the commencement of the County of Kamouraska. Nothing has been done but the tracing of the road line in the County of Kamouraska.

## COUNTY OF MONTMAGNY.

The Taché Road is open only in the south-west part of this County, passing by the settlements existing at the time of its being opened in the Townships of Montmagny,

Mailloux, &c, and there being a desire to settle elsewhere among the Parishes of St. Thomas, St. Pierre, St. François, Berthier, and in the County of Bellechasse, the population of these districts have eagerly pushed forward to the Townships above mentioned, evincing the general need of communication to enable persons to establish themselves where the land is good, and where there is any possibility of conveying themselves.

That part of the Taché Road which is not yet opened in the Townships of Arago and Patton, would give a new field for settlement if it were opened, particularly in Arago, I have been told that the same would be the case in the Township of Patton, where the settlers would have the advantage of obtaining lots along the road gratuitously, an advantage not existing in the Seignories.

There are comparatively few young people in these localities who have emigrated to the United States to remain there. In summer the greater part of them engage to go on a fishing expedition to the North or South Shore at the mouth of the River St. Lawrence. In winter, part engage in *chantiers* to help in getting out timber, which goes down by the River St. John. Such is for the most part their mode of earning a livelihood, each year, until they are married. As in general little economy has been used in saving their gains previous to this event, they decide, after few years of married life, that the family has sufficiently increased to establish itself so as to assure a permanent future by obtaining a new lot of land. If they are industrious and persevering they generally succeed. As many have already succeeded well, after some years of privation, these examples will doubtless be more followed every year.

The lots occurring here and there along these roads, which no one at present appears to value, will be settled before a not very distant period, when we shall see farmers in easy circumstances sell their grain, as some do now, along the Elgin Road and near the province line, who have settled and occupied their lands within but a few years.

The population here increases rapidly; colonization must within a short time make speedy progress: from the young people requiring to establish themselves, as well as from the considerations I have noted above. I conclude therefore that colonization in these localities is at present only in its infancy. Permit me, sir, to add in conclusion, that it is necessary that a colonization agent should exercise a strict personal surveillance over the granting of gratuitous lots.

One individual asks a lot on which to settle himself or some of his children immediately, while it is only a pretext to obtain a location ticket to enable him to carry off all the serviceable timber, or to make sugar, when there are any sugaries on the lot, while another person, who desires in good faith to occupy the land and dwell there forthwith, is thus prevented from doing so, in this way retarding the settlement not only of this lot but also of those in the vicinity; for it often requires but one single settler beginning to establish himself in a new district to induce many others to follow his example. The person who may thus have obtained this location ticket will keep his lot as long as he can, without doing any work upon it, or but very little to satisfy the forms; nor will he keep up the road in front of his lot, to the great injury to the resident settlers, if the agent does not oblige him to settle on the lot immediately, or to give it up to the person who really desires to settle.

Without an active superintendance in this matter, colonization will be often delayed in certain places, if not completely arrested for a time.

I beg you will excuse the length of this report. On another occasion I will endeavor to be more brief.

I have the honor to be, Sir,

Your most obedient servant,

(Signed,)

C. F. FOURNIER,

Colonization Agent.

## APPENDX No. 26.

## REPORT ON THE GOLD REGION OF HASTINGS, BY DR. T. STERRY HUNT, F.R.S., AND A. MICHEL, ESQ.

REPORT BY DR. T. STERRY HUNT.

MONTREAL, January 29, 1867.

To the Hon. ALEX. CAMPBELL,  
Commissioner of Crown Lands.

SIR,—In the absence of Sir William Logan, I have the honor, in conformity with the request conveyed in your letter to him, dated January 14th, to transmit to you a translation of Mr. Michel's Report on the discovery of gold in the County of Hastings.

The rocks of that region have already been described to some extent in the Geological Report for 1865-66, pages 91-96. Farther explorations with regard to the geological structure of this region have been made by Mr. Vennor, under the direction of Sir William Logan, during the past summer. A series of gneissoid rock, often holding epidote and chlorite, associated with diorites, fine grained mica-slates, quartzites, conglomerates, dolomites, and limestones, is here met with, extending over a large part of the North-Riding of Hastings.

The limestones are sometimes coarsely crystalline, but more generally fine-grained, dark gray in color, and from an admixture of mica, pass into calcareous schists. This series of rocks, many thousand feet in thickness, appears to be conformable with the adjacent coarsely crystalline gneissic strata, which form a continuous part of the great Laurentian area of Canada and northern New-York. These rocks of Hastings thus appear to be a portion of the true Laurentian series, in proof of which they are, in the Township of Lake, apparently overlaid unconformably by rocks bearing the mineralogical characters of the anorthosites of the Labrador or Upper Laurentian series. To those facts is moreover to be added the evidence of organic remains. The *Eozoon Canadense*, which characterizes the uppermost or Grenville band of the Laurentian limestones, on the Ottawa, has been detected in the grey fine-grained limestones of Hastings; in a fragmentary condition in Madoc, and more recently in a large and well-defined shape, on the weathered surface of a similar limestone in Tudor; in both cases however filled, not with serpentine, but with carbonate of lime.

Although these rocks have been traced over a considerable area, it is not yet certain whether their distribution is due to a synclinal or an anticlinal form. In the latter case they would be an older series than the other Laurentian rocks of the region, and probably than any others as yet examined in Canada. If however, as seems more probable, they occupy a synclinal, they will represent an upper member of the true or Lower Laurentian, and it will then remain to be decided whether these Hastings limestones belong to a higher position of the system than any yet examined in the Ottawa district, or whether they are the equivalents of the Grenville band, of which they contain the peculiar fossil. In this case, their peculiarities, both in texture and mineral characters, must be regarded as due to original local differences. In the Hastings series, in addition to the lead and iron common to other parts of the Laurentian system, the dolomites are often highly ferruginous, and copper is frequently met with in small quantities, together with arsenic, antimony and bismuth.

The mineralogy of the Laurentian rocks is as yet but imperfectly studied, since this system is scarcely known except in Canada, New York and parts of Scandinavia. In the last Report will be found a comparative study of the mineralogy of these rocks on the two continents. It is there shewn that in Norway, Sweden, and Finland, besides the ores of iron, copper, lead, and cobalt, tin, silver, mercury and gold,—the latter two however, in but small quantities, occur among the minerals of the Laurentian system. (Report for 1865-66, p. 196.)

Since those pages of the Geological Report were written, gold has been met with

among the rocks of Hastings, under conditions of which some account will be found in subjoined report. It may be added that the locality of copper ore mentioned by Mr. Macfarlane (Report 1865-66, p. 106) is on the same lot as the Richardson mine, where two or three explorations had been made for copper, previous to the one in which the gold was accidentally discovered. The greenish epidotic gneiss, with red feldspathic and grey quartzose layers, is in some parts chloritic, and encloses also a bed of imperfect *séatite*. Besides the veins of quartz holding epidote, chlorite and specular iron, one was observed containing yellow and purple copper ores in a gangue of quartz and ferruginous bitter-spar. This latter mineral, in some specimens obtained from an excavation on that lot in 1864, is seen to be, in parts, decomposed, leaving only a light reddish pulverulent oxide of iron, like that which is described in the Report for 1865-66, page 85, as derived from the decay of a similar spar in veins in the Eastern Townships. The reddish earthy matter, described by Mr. Michel as partly filling the gold-bearing crevice at the Richardson mine, has evidently a similar origin. It is there however associated with a black carbonaceous matter, which is described as encrusting the walls of the fissure. This occurs, in the specimens before me, in small fragments with a conchoidal fracture, and a somewhat resinous lustre, and is soft and readily crushed between the fingers. When exposed to heat in a tube, it gives out some water, but no bituminous matter; in the open air, at a red heat it takes fire, and burns readily without flame, leaving a somewhat abundant ash, whitish and sometimes reddish, consisting of carbonate of lime, with some silicious and ferruginous matter, including a quantity of gold. This metal is visible in the form of grains and scales in the recent fractures of the black substance, which, although coal-like in its aspect, resembles more the carbonaceous matter which has been described in the "Geology of Canada," as filling veins or fissures in the rocks of the Quebec group, and is doubtless derived from the transformation of bitumen.

This substance as I have shewn, is in some cases, so far altered by oxidation, as to have a composition like that of anthracite, and is then scarcely distinguishable from the Madoc mineral. The examination of various specimens from the Madoc mine, shews the native gold in three different associations; first in the black carbonaceous matter; second in the reddish ochery oxide of iron, which is found in the same crevices with the latter; and third in plates in the midst of crystalline ferriferous bitter-spar. The farther examination of veins in their undecomposed state, carrying this carbonaceous matter, will perhaps throw a clearer light on its relations. Meanwhile it would seem, from the study of the specimens, that this black matter, probably in the form of bitumen, had first been introduced into the fissures, which were subsequently filled with the ferruginous bitter-spar, whose deposition was contemporaneous with that of gold. The precious metal is therefore found, not only in the midst of the bitter-spar, but disseminated through the carbonaceous matter which has resulted from the subsequent change of the bitumen, as well as through the decomposed spar. This association of the metal, although singular, is thus at the same time, perfectly intelligible.

Carbonaceous matters not unfrequently occur in mineral veins, in other regions, and are met with in several localities in the Laurentian rocks of Scandinavia, where, according to Daubrée, in the silver mine of Kongsberg, a matter allied to anthracite, and similar to that of Madoc, occurs in mammillary masses imbedded in the calc-spar of the veinstone, and sometimes penetrated by native silver. (Ann. des Mines [4] iv. p. 260.) In other veins in that region the presence of bitumen is indicated, and in the beds of magnetic iron ore found in gneiss at Dannemora, small masses of a matter closely resembling bituminous coal in composition, and penetrated by quartz veins, occur in the midst of the ore. According to Daubrée, both graphite and anthracite, where they occur in the ancient rocks of Scandinavia, are accompanied by bitumen. No such associations have hitherto been observed with the graphite of our Laurentian series.

As to the presence of gold in these ancient rocks, it was for a long time the opinion of most geologists that gold was confined to the rocks of the Lower Silurian period, and when it was shewn by the Geological Survey, a few years since, that the Upper Silurian strata of eastern Canada were auriferous, this conclusion was received by the geological world with surprise, which was farther increased when Prof. Whitney pointed out that the gold of California occurs in rocks still more recent. In Scandinavia, however, as above noted, small portions of gold have been found in several localities in rocks, probably of

Laurentian age, though in 1849, according to Durocher, none of them were worked. It is worthy of notice in this connection, that Dr. A. A. Hayes, of Boston, in 1864, detected in a pyritiferous quartz from the twenty-third lot of the sixth concession of Belmont, a small amount of gold, equal to about ten grains' weight to the ton of rock. More recently Dr. Girdwood of this city, in examining a portion from a bed of impure plumbago, from the twenty-first lot of the sixth concession of North Elmsley, found in two samples, small quantities of silver, with traces of gold. The rocks of this locality are lithologically unlike those of the Hastings series, and have the general character of those of the great Laurentian area, to which they belong; so that gold may eventually be found widely distributed through the rocks of this system.

Since the Report of Mr. Michel was handed in, I am informed that the Richardson mine has been re-opened, and has yielded specimens of great richness, some of which I have seen. The gold in them is disseminated in the same ferruginous bitter-spar already mentioned. The conviction expressed by Mr. Michel, at the close of his report in thus fully justified.

With regard to the existence of bismuth in this region, alluded to above, I have received from a reliable source, a small specimen, said to have been found in Tudor, which contains bismuth-ochre, or earthy carbonate of bismuth, associated with quartz.

I have the honor to be Sir,

Your most obedient servant,

T. STERRY HUNT.

REPORT BY MR. A. MICHEL.

MONTREAL, January 20, 1867.

SIR,—I had the honor, some time since, to report to you the results of an excursion which I made to Madoc, at your request, about the middle of November last. In then submitting to you the observations which I had been able to make, and the information which I had gathered regarding the so-called Richardson gold mine, I stated to you that I was not allowed to descend into the excavation for the purpose of examining the auriferous deposit, whose extraordinary richness was spoken of in the journals of Upper Canada. Later, on the 16th December, you desired me to revisit the County of Hastings, not to make explorations, which the season of the year would have rendered difficult and costly but because you hoped that Mr. Richardson and his associates would permit me to visit their mine, and because, moreover, you desired to obtain some certain information relative to various other discoveries of gold, said to have been made in the county. I therefore left Montreal again, on the 18th December, and spent three weeks in excursions in the Townships of Hungerford, Elzevir, Madoc, and Marmora; and now, after having submitted to Dr. T. Sterry Hunt the various specimens of rocks and earthy matter collected by me in the different localities visited, I have the honor to lay before you the facts ascertained with regard to the Richardson mine, and other discoveries of gold in that region.

In order to give you an idea of the difficulties attending my examination, I shall mention certain details of which I should not otherwise have spoken. Thus, when I first went to the mine, on the 22nd December, those of the proprietors then present would not allow me to go down into it, alleging as a reason, the absence of Mr. Richardson. Through the new purchasers of the mine, however, some days later, I was permitted to descend, but the number of persons at the same time in the pit, the darkness, and moreover the irregularity of working, were all unfavorable to my examination. The excavation at the Richardson mine, on the eighteenth lot of the fifth concession of Madoc, is round in form, six or seven feet in diameter, and about eighteen feet deep; the rock in which it is sunk appears to be a chloritic gneiss, more or less mixed with crystalline ferruginous bitter-spar, with which crystalline quartz and orthoclase feldspar are also apparent, forming what seems to be a veinstone. The excavation appears to have terminated in a steatitic rock. In the western side of the excavation is seen the gold-bearing crevice, which appears to be an earthy decomposed vein, irregular and twisted, with two expansions or pockets in its course, the one about four feet below the surface of the ground,

the other beginning at the bottom of the pit, and extending downwards in the steatite. From the decomposition of the veinstone, there remains now little more than an earthy reddish oxyd of iron, associated with a black carbonaceous matter, in both of which, but especially in the latter, the gold is imbedded. Specimens of a veinstone of ferruginous bitter-spar, with crystalline hornblende, rich in gold, were shown me, and others of steatite penetrated by gold, but I saw none of these in place, nor was I permitted to make, or cause to be made, the requisite examinations.

One of the new purchasers of the mine, who undertook to shew it to me, lying upon his back at the bottom of the pit, and introducing part of his body into the crevice, was able by stretching out his arm, to extract with difficulty, three small pinches of the black matter, which he gave me. This weighing 282 grains, yielded me nineteen grains of gold, worth 76 cents. I was also permitted to gather from the bottom of the pit about two pounds of earthy material, mixed with debris of the rocks. Of this matter, which shewed none of the black carbonaceous substance, and traces only of the earthy oxyd of iron, one and a half pounds gave me, by pulverizing and washing, twenty-four grains weight of gold, worth 96c. Having taken care to examine the little fragments of rock, before pulverizing, I found among them several morsels of bitter-spar, associated with hornblende, and rich in visible gold. I moreover caused to be broken from the gneissic rock, of the excavation, about a dozen pounds, taken from three different places. One of these, weighing about twenty-five ounces, and supposed to have been taken from near the crevices gave me one grain weight of gold, by a mechanical essay, but the remaining eight pounds did not yield a trace. The most striking peculiarity in this deposit is the association with the earthy oxyd of iron, of a carbonaceous matter, in both of which the gold is disseminated. For the rest, the occurrence of gold in earth oxyd of iron is a fact frequently observed in South America, and elsewhere, as I have myself observed, and as is described by Burat, who refers these oxyds to the decomposition of pyrites, from which they are, no doubt, often derived. In the present case, however, the oxyd would seem to come from the decomposition of the ferriferous spar, as in the case signalized by Dr. Hunt in his Report of last year on the gold-bearing veins of the Chaudière. To shew the richness of the Richardson mine, it is sufficient to say that the ochreous and carbonaceous matters extracted from the crevice have yielded from fifteen to twenty dollars of gold to the pound. Sixty pounds or more of this material were carried to the United States, by the first purchasers of the mine, and I met numbers of persons in the County of Hastings, having more or less of the gold from this mine in their possession, so that the quantity already abstracted must be considerable.

The gold from the mine, in its native state, is not at all like the alluvial gold of Lower Canada, but is dull reddish in colour, and in thin scales of plates sometimes dendritic, or more often in fine dust. The abundance of the precious metal would be sufficient to forbid any suspicion of an artificial enriching of the mine, and the peculiar character of the gold, as well as its unusual associations, are so many more proofs, to my mind, of the genuineness of the discovery. Nevertheless, I should have been glad to support my conviction by still farther facts, and I therefore, earnestly begged to be allowed to make, at the cost of the Geological Survey, and in the presence of the proprietors of the mine, some farther trials, which might have easily been made, but I was refused. I was finally informed at Belleville, on the 30th December, that Mr. Richardson and his friends had at last consented, and I at once returned to Madoc, but only to be disappointed, for I learned on my arrival there, that the proprietors had already again changed their minds, and had filled up the pit with logs of wood and stones, so that, as they said, no one should go down into the mine until they had been paid for it.

It appears evident that Mr. Richardson and his associates, guided probably, by the counsels of persons of more experience than themselves, entertain doubts as to the continued richness of the crevice, a question which must rest in doubt until farther explorations shall have been made. Burat remarks, with regard to veins, that they are subject to a great many accidents and variations of form; they swell out, contract, and are sometimes entirely cut off, for a time. It often happens, moreover, that veins, earthy or decayed in parts, are found in other portions of their course, less decomposed, or altogether unaltered. These considerations appear sufficient to show the uncertainty which exists as to the continuity in depth of the vein in question.

I have also visited, in accordance with your instructions, various lots in the Townships of Hungerford, Elzevir, Madoc, and Marmorora, where the presence of gold had been mentioned in the Belleville journals. With but few exceptions, the examinations which had been made had been very superficial and slight. On the eighteenth lot of the seventh concession of Madoc, and the seventeenth of the tenth of Marmorora, the matters which had been examined for gold consist of a fine, somewhat reddish, silicious sand. Those from the tenth lot of the ninth concession of Hungerford, and the sixteenth of the seventh of Madoc, are of a coarser silicious sand, with a reddish ochreous admixture; while fragments of mica-slate and of gneiss are mingled with the silicious earthy soil which I collected on the fifth lot of the second concession of Elzevir, the fifteenth of the fourth, the sixteenth of the sixth, and the seventh of the fifth of Madoc.

I found traces of gold :

1st. In the ochreous matters adjoining quartz, in the fifteenth lot of the second concession of Elzevir, where I remarked in an excavation ten feet by five, and four feet deep a band of quartz, whose outcrop is also visible about one hundred feet to the east, its course being east and west. The Hon. Billa Flint showed me a little button of gold, which he had obtained, by amalgamation, from a small portion of ochreous matter from the same excavation. He also, during my stay in the county, found traces of gold in several other localities in Elzevir.

2nd. In an ochreous quartz, which occurs imbedded in blueish and reddish-white limestones, on the eighteenth lot of the seventh concession of Madoc. Two contiguous excavations have been made, one four feet square, and four feet deep, the other eight by ten, and fifteen feet deep.

3rd. In an ochreous matter, and also in a cavernous quartz, holding orthoclase feldspar, both from an excavation about eight feet by ten, and fourteen feet deep, on the shore of Mud Lake, on lot sixteen of the sixth concession of Madoc.

4th. In a ferruginous earth, associated with fragments of white quartz and black tourmaline, from a depth of two or three feet, on the fifteenth lot of the fourth concession of Madoc.

During my stay in the County of Hastings, numerous specimens, rich in visible gold, were shewn to me as having come from different localities, more or less remote from the Richardson mine. A person gave me two portions of rock coarsely pulverized, which he assured me he had collected on the nineteenth lot of the fifth, and the eighteenth lot of the seventh concession of Madoc. The first of these gave me, by a mechanical assay, for 1310 grains of rock, not less than 509 grains of gold, and the second from 385 grains of rock, 89 grains of gold. In conclusion, I have only to repeat, what I had the honor to inform you by my letter from Belleville, that the discovery of a deposit of gold of extraordinary richness, on the eighteenth lot of the fifth concession of Madoc, was, in my opinion, an established fact, and one that could hardly be exceptional in the region,—that this discovery, as well as that of the presence of distinct traces of gold, both in quartz and in the ochreous matter extracted from shallow excavations, made in several localities in the County of Hastings, was sufficient to give a favorable character to the region, and finally, that I anticipated successful result from the excavations which will probably be made next spring, on a large scale, in that region.

I have the honor to be, Sir,

Your most obedient servant,

A. MICHEL.

## APPENDIX No. 26 (a).

## GOLD MINING INSPECTORS' REPORTS, LOWER CANADA.

## CHAUDIÈRE GOLD MINING DIVISION.

CHAUDIÈRE GOLD MINES,  
St. François, 23th Feb. 1866.

*The Honorable*  
*The Commissioner of Crown Lands, &c., &c., &c.*  
*Ottawa*

SIR,—I have the honor to report the continued development and extension of gold mining operations in this division. Several new quartz lodes have been struck since the date of my last Report, all of which have proved to be gold-bearing, and shafts are now being sunk upon some of them. Those upon which shafts are being sunk are located as follows:—Two in the *Pief* Cumberland, in the Seigniorie *Aubin de Lisle*, at the spot commonly known as “Cumberland Mills;” one in the Township of Linière, near the point of intersection of the Metgermette River with the Kennebec Road; and two on lots Nos. 39 and 71 respectively, in the first Range N. W., in the Seigniorie *Rigaud-Vaudreuil*. The depth of these shafts, at present ranges from 8 to 20 feet. From each of the two veins at “Cumberland Mills,” the Manager, Capt. Nason, of Boston, U. S., recently forwarded half a ton of ore, for the purposes of assay, and I hope soon to hear the results obtained therefrom.

The Detroit (U. S.) Company, of which I made mention in my last Report, as sinking two shafts, respectively, at Jersey Point and the Boundary Line, has forwarded a ton of ore from each of these veins to New York for assay, and I hope soon to hear from Mr. Hall, the Manager, the result of the assay so made.

Owing to some unaccountable delay on the part of the Grand Trunk Railway Company, in the transmission of the quartz forwarded by M. Rigg, and by Messrs. Kilgour & Featon, to New York and Boston, for assay, as mentioned in my last Report, no intelligence of the assay of the same has, as yet, been received by these gentlemen, but they are in daily expectation of information respecting it.

I have delayed this Report a few days in the hope of being able to verily a rumour which has obtained current belief here, that a portion of Mr. Kilgour's crushing-mill, referred to in the last Report, has arrived at Point Levi. I am happy to say that according to the most accurate information I can obtain here, the rumor appears to be well-founded, and that arrangements are in progress for having it immediately removed up here. The erection of this mill will constitute a new era in mining here, being the first, as I believe, imported into Canada, and will give an additional impetus to the development of the mining interest, and effectively establish the gold-bearing value of the quartz in the Chaudière Division. The mill will be erected on the vein on Lot No. 19 in the *Concession St. Charles*, in the Seigniorie *Rigaud-Vaudreuil*.

There are now fourteen quartz veins in the Division on which shafts are being sunk and work actively prosecuted. They are located as follows:—

1.—By Detroit Company, on Lot No. 1, on the Kennebec Road Range, in Linière, about three acres this side of the Boundary Line.

1.—By Reciprocity Mining Company on the Kempt stream; on the point of its intersection with the Kennebec Road.

1.—By Du Loup Mining Company, at the intersection of the Metgermette with the Kennebec Road.

1.—By Detroit Company at Jersey Point.

1.—By New York Company at Jersey Point.

2.—By New York Company, two of Cumberland Mills, in *Pief* Cumberland, Seig *Aubin de Lisle*.

1.—By Rigg & Co., on Lot No. 83, in 1st Range N. W., in the Seigniory *Rigaud-Vaudreuil*.

2.—By Kilgour & Fenton, two veins on Lots. Nos. 19 and 21, in St. Charles Concession, *Rigaud-Vaudreuil*.

2.—By Reciprocity Mining Company, two on Lot No. 18, in the *Concession de Lery*, Seig. *Rigaud-Vaudreuil*.

1.—By Power, Causly & Co., on Lot No. 39, in the first Range N. W., Seig. *Rigaud-Vaudreuil*.

1.—By Hamilton, Smith & Co., on Lot No. 71, in the first Range N. W., Seig. *Rigaud-Vaudreuil*.

Total 14.

In addition to the above there are a number of other veins which have been prospected, and surface specimens of ore extracted therefrom, for the purposes of assay.

Rigg & Co's. vein has now attained a depth of 45 feet. Those on the Kennebec Road range in depth from 25 to 40 feet, and all continue to give the most promising indications.

I am happy to say that a revival has recently been given to alluvial mining in the Division, in consequence of the Reciprocity Mining Company having consented to let mining claims on their property on the Gilbert River, on Lots Nos. 16, 17, 18 and 19, in the *DeLery* Concession of the Seigniory *Rigaud-Vaudreuil*. This is the famed spot of gold-digging notoriety of last winter, and whence the large nuggets were extracted which were referred to in the evidence taken before the Parliamentary Committee. The scene also of a near approach to a serious disturbance and breach of the peace shortly after my arrival here last spring, owing to the refusal of the Company to let mining claims upon it, and the spot also on which are centered the affections of alluvial miners, as though all the gold in the Division were concentrated upon it. These claims are of two different sizes, being respectively 25 and 50 feet frontage on the river, by 100 feet in depth, and are staked out as nearly as may be in parallel lines at 100 feet from the edge of the river, and on either side thereof; the Company thus reserving the bed and immediate banks of the river. The prices charged for these claims are respectively \$50 and \$100, being \$2 per foot river frontage; the time allowed for working them being respectively nine and twelve months. Although it is only a few days since the Company consented to let, a great many claims have already been taken,—the three Poulins, who have the reputation of being the most successful gold-diggers, being among the number of lessees of claims. The Company could easily have let all their claims ere this, but owing to the difficulty it experienced last spring in re-obtaining possession of the claims held by some of the miners, it has established very stringent rules, such as requiring security, &c., in the hope of avoiding any trouble hereafter. At the request of the Agent of the Company I consented to draw up the Rules and Regulations and a form of lease to be signed by all such lessees of claims. The Agent believes the leases will be thus more effectually framed than if drawn by the professional men here, who are not as yet accustomed to drawing specialities respecting mining claims, and who moreover are not sufficiently conversant with the language to be able to draw them up in English. I hope by this means, in the interest of both lessors and lessees, to avoid a repetition of the difficulties and law-suits which occurred last spring, and which occasioned great expense and loss of time to both the Company and the miners. Several of the lessees have already commenced work on these claims, and some eight or ten shafts have already been sunk, and a considerable amount of earth throw up, preparatory to being cradled and sluiced. One party shortly after commencing work picked up a little nugget from the surface worth about \$9 or \$10. Those who have begun to wash meet with good paying results. One party of three washing casually on Saturday last realized \$14. I am in hope that other Companies owning property in the Division will follow the example of the Reciprocity Mining Company, and consent to let claims on reasonable terms.

I mentioned in my last Report that I had convicted two individuals named respectively Joseph Fortin and Joseph Poulin for mining without licenses. The latter has since paid the fine, \$1. I subsequently discovered that his two brothers had also mined, and having learnt that I was going to fine them, they each forwarded me \$1, in anticipation of a conviction. I will forward the \$3 so soon as I can convert the silver, in which the amount was paid, into bank-notes. Fortin, the other delinquent, is absent from his place of residence, and is expected to return shortly, when I am led to believe he will pay the fine also to avoid imprisonment.

I have not as yet exacted license fees from the several mining companies, but have informed them of their liability under the Gold Mining Amendment Act of 1865, and furnished them with copies thereof, and have taken a note of the day they commenced operations and of the number of men employed, and will collect the amount due so soon as they shall have ascertained the result of the assay of the quartz forward by them to the United States.

A misunderstanding having occurred between the Famine Mining Company and their Agent, both parties have requested me to decide the difficulty between them, and have agreed to be bound by my decision. I have consented to act, and have requested them to furnish me with all papers and vouchers necessary to enable me to decide equitably between them. The Company will at the same time pay me \$8 due for license fees for work performed on Lot No. 20 in Watford on the Famine River last August.

I have the honor to transmit you herewith a copy of the (New York) *Minning Index*, containing an account of the formation of the "Chaudière Gold Mining Association," referred to in my last Report. I am happy to say that the Association is in good working order, and actively engaged in carrying out the object of its formation. At the request of the President and Directors, I drafted a code of by-laws for its government and regulation, which have been adopted by the Association. I have since received a letter from the Secretary, highly complimentary in terms, expressing the thanks of the Directors, and informing me that I had been unanimously elected an honorary member thereof in appreciation of my service on behalf of the Association.

On the 28th January last, I received a letter from J. G. Robertson, Esq., Mayor of Sherbrooke, requesting information as to the gold-bearing character of certain quartz veins in the Division. I forwarded a reply giving him as much information as my own personal observation and experience warranted, without committing myself to any allegation of doubtful or unassured fact.

On the second February instant, I received a letter from A. C. Buchanan, Esquire, Chief Emigrant Agent at Quebec, asking me to favor him with a short account of the Chaudière Mines, with a view to publication in the proposed new paper, *The Canada Emigration Gazette*, authorized by the Honorable the Minister of Agriculture and Immigration. I complied with his request, giving him a succinct summary of the discovery, extent and progress of the gold fields, together with such information as I thought might be interesting and profitable to intending emigrants, as well as beneficial to mining interests here—the whole founded on the evidence taken before the Parliamentary Committee last year, and upon facts within my personal knowledge, and which have passed under my own observation. I will forward you a copy of the *Gazette* as soon as I shall have been furnished with one.

On the 21st inst., I received a letter from P. S. Hamilton, Esq., Chief Mining Commissioner at Halifax, Nova Scotia, in answer to mine, giving me certain detailed information respecting the kind of machinery and mode employed in working the quartz in Nova Scotia. I have furnished the "Chaudière Gold Mining Association" with a copy of his letter, in the hope that the information may be of service to the mining interest here.

The whole nevertheless respectfully submitted.

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C. E., 1st May, 1866.

*The Honorable**The Commissioner of Crown Lands, &c., &c., &c.,  
Ottawa.*

SIR,—I have the honor to report that during the month of March, and up to about the 8th April last, mining operations were steadily carried on in the several quartz shafts enumerated in my last Report. About the date last mentioned, owing to the spring thaws, and consequent excessive flow of water, work therein was discontinued, and is only now being resumed.

Since the date of my last Report Messrs. Rigg & Co., have received the result of the assay of the 1,300 lbs. of quartz forwarded by them to New York, which yields, by mill process, the rich result of \$40 to the ton. This Company has in consequence determined upon carrying on the excavation of their shaft, both day and night, with all possible despatch. There are eight men employed in working therein, four by day and four by night. The shaft has now attained to a depth of 50 feet, and the Company is causing machinery to be constructed whereby the ore may be raised by horse power.

In alluvial mining, work has been vigorously prosecuted on lots 16, 17, 18 and 19 on the *Gilbert*, in the DeLery Concession of the Seigniori of Rigaud-Vaudreuil, during the whole of the month of March and April. The parties so engaged carried on their work variously, some confined their labors during the cold weather in March and the early part of April to excavating and hoisting the earth and gravel, and only began to wash after the spring thaw, when the abundance of water afforded them greater facilities for doing so, while others washed accordingly as they hoisted the pay-dirt, and most of them have so far met with encouraging though not rich results. Preparations are being made for carrying on alluvial mining on the lots in question, on a more extensive scale during the present year.

I beg to refer you to a tabular statement which I have prepared, as requested by you, and forward herewith, shewing approximately—among other particulars—the number of men employed, the number of shafts being sunk, the amount of quartz, earth and gold extracted, in both quartz and alluvial mining, distinguishing between these different kinds of mining, and also between the work carried on in the Seigniori Rigaud-Vaudreuil, and that carried on in other parts of the Division. I beg to remark, however, that this statement cannot be considered as either reliable or accurate: on the contrary, it is based in many particulars upon mere supposition or guess-work. There being no mill-machinery erected here yet, there is no means of weighing, nor is there any object in ascertaining the quantity or weight of the quartz excavated and hoisted, and consequently the weight given in the statement is merely a rough estimate of the heap of stone and ore thrown up, and lying around the mouths of the various shafts. This remark applies with equal force to the alleged weight of the earth and gravel excavated and washed from the alluvial shafts.

I have distinguished also, wherever I had the means of doing so, between the value of the quartz when assayed theoretically, and that yielded when subjected to mill-treatment. This information also is based upon the representation of the parties interested, not upon personal knowledge, but I have good reason to believe it to be correct.

You will perceive by the tabular statement that there are several quartz veins which have not as yet been assayed, either chemically or otherwise, by those interested. Ore from these several veins was however forwarded by Mr. Michel to Dr. Hunt, and by the latter gentleman assayed, but not having yet had the advantage of being able to procure or see a copy of the printed Report of these gentlemen, I am unable to identify the veins referred to by them, or to state the result of the assay so made. A gentleman who has seen the Report in question informs me that it alleges that the specimen obtained from the vein on Lot No. 83, in the 1st Range of the Seigniori Rigaud-Vaudreuil, yielded no gold by the assay made. This is the vein referred to above, and designated in the accompanying statement as yielding, *by mill-process*, \$40 to the ton, and upon which work is in consequence being vigorously prosecuted by the owners thereof. This apparent difference may be easily accounted for by the smallness of the sample assayed by Dr. Hunt. The only reliable means at present known of establishing the value of quartz is actual working by

mill-treatment. The most effective chemical process known cannot establish anything beyond mere problematical accuracy, and even such a test must be as uncertain as the kind and variety of the chemicals required; the quality of ore operated upon, and the vagaries of nature in the irregular distribution of the auriferous deposits.

A few days ago I received a letter from the President of the Famine Mining Company (New York) respecting the difficulty between the Company and their Agent here, and requesting me to forward him an account of the claims and complaints for wages preferred against the Company before me, including license fees due, with the view of an immediate settlement of the same. I have complied with his request, at the same time intimating that I will be glad to have all the outstanding claims against the Company, including license fees, settled as soon as possible.

I have the honor to be, Sir,  
Your most obedient servant.

R. POPE, G. M. I.

TABLE shewing approximately the number of Quartz Shafts being sunk, the number of men employed, the quantity of Quartz raised and assayed in the Chaudière Gold Mining Division, out of the Seigniorie Rigaud-Vaudreuil, for the two months ending 31st March, 1866.

| Township or Parish.                           | No. of<br>Let. | No. of Shafts. | Average number of<br>men employed. | Quartz<br>and<br>stone<br>raised. |       | Quartz<br>chemi-<br>cally.<br>assayed. |       | Quartz<br>assayed<br>by Mill<br>process. |       | Alleged<br>yield of<br>gold<br>per ton. |       |                                                                                                                                                                                                                                             | Remarks. |

## CHAUDIERE GOLD MINING DIVISION.

(Extract.)

GOLD MINING INSPECTOR'S OFFICE,  
St. Francis, Beauce, C. E., 2nd July, 1866.

*The Honorable*  
*The Commissioner of Crown Lands,*  
*Ottawa.*

SIR,—I have the honor to report that the heavy and continued rains which prevailed here during the months of May and June last, considerably retarded mining operations in this Division during the two months above named.

Alluvial mining is actively carried on, in the Gilbert River, on the claims leased by the Reciprocity Mining Company, on lots 16, 17, 18 and 19 in the De Lery Concession, Seigniory Rigaud-Vaudreuil. There are about 50 men engaged on these claims, and a number of shafts and pits have been sunk, and satisfactory results obtained.

Having no power in this Seigniory to enforce regular or correct statements of the yield of gold obtained, I can merely base my estimate of the amount upon the assertions of men employed in the work, and I judge that the average yield obtained is about \$3 per man per day, when washing is carried on. I can form no correct idea of the gross amount obtained since the date of my last Report, owing to the irregular manner in which mining has been carried on, in consequence of the continued rains above mentioned—whereby parties owning claims have been compelled to regulate their labor according to the weather—some days having more men employed than on others, which renders it impossible for me to form any idea of the gross amount of gold obtained, and those interested, and who alone know the amount, do not appear willing to make it known. I may be able to ascertain the amount later, when any object those interested may have in concealing the facts, shall have ceased to exist. This Company expects, from the numerous applications received, to be able to let all its remaining claims on the Gilbert, during the present month.

Alluvial mining will also be carried on to some extent, on the Du Loup river, this season. I expect to receive applications for licenses therefor in a few days.

Quartz mining has been more retarded by the rains than placer mining, and it has only been within the last few days that work to any extent has been recommenced thereon.

A few more quartz veins have been uncovered since the date of my last Report, both in and out of the Seigniory Rigaud-Vaudreuil, and show very promising indications.

The De Lery Mining Company have a few men employed in this Seigniory in prospecting for and uncovering quartz veins, and I am awaiting the arrival of the Managing Director of the Company shortly expected, to collect the license fees due therefor, in accordance with your letter of instructions of the 11th June last.

The Agent of this Company informs me that the Company has concluded arrangements for the construction of a crushing mill in Montreal, which he expects to be able to erect in August next, at latest.

A number of gentlemen in Quebec, interested in mining lands here, have formed a Company with the view of erecting a crushing mill in some central part of the Division, to be used as a custom mill.

All that is required now is the erection of one or more crushing mills, to give life and energy to the development of the auriferous deposits in this section of the Province. I therefore anticipate hopeful results from the erection of these mills.

With respect to the misunderstanding between the Famine Gold Mining Company and its agent, referred to in my last Report, I received a letter from the President of the Company, on the 25th ult., enclosing the sum of \$300, in settlement of all outstanding claims by miners and others against the Company, and requesting me to be kind enough to establish and verify the amounts due, and to pay them. I have done so, and obtained and forwarded receipts therefor. I also retained the sum of \$8, due for license fees for work done on lot 20 in Watford, on the Famine river, in August last, and which sum I had the honor to forward you on the 29th ult.

\* \* \* \* \*

I have the honor to be, Sir,  
Your obedient servant,

R. POPE, G. M. I.

GOLD MINING INSPECTOR'S OFFICE,  
St. Francis, Beauce, C. E., 6th Sept., 1866.

*The Honorable  
The Commissioner of Crown Lands,  
Ottawa.*

SIR,—I have the honor to report that alluvial mining has been actively carried on since the date of my last Report. During the month of July, and part of August, about 80 or 100 men were employed on lots 16, 17, 18 and 19, in the De Lery Concession of the Seigneurie Rigaud-Vaudreuil, and a considerable amount of gold was extracted. I have no means, for the reasons mentioned in my last Report, of ascertaining the gross amount obtained; but some miners reaped handsome results—one man, by the name of Brack, took out \$80 in one day, including a nugget worth \$57. During the latter part of August mining was not carried on so actively, owing to heavy and continued rains and consequent excessive flow of water in the pits and shafts, which rendered the labor of the men both irksome and expensive. To avoid the difficulty thereby felt, Messrs. Power, Causley and Coveney—three enterprising miners here—are constructing a canal which, when completed, will be about 1600 feet in length, by three in width, and will have the effect of draining nearly all the claims on the lots in question to a depth of thirty-five feet. About 500 feet in length of this canal have already been made, and the remainder of the work is being actively pushed forward, from fifteen to twenty men being constantly employed thereon. The canal is being solidly made and well covered in so as to protect it from the frost, whereby it will be as serviceable in winter as in summer. It has been agreed between the owners or lessees of the claims to be drained, and the contractors, that the latter shall receive the sum of \$1 per day per claim so drained till worked out, that is a period from two to three months, whereby it is expected, in addition to the advantages the canal will confer upon miners, and the stimulus it will give to alluvial mining in this section of the division, that it will prove highly remunerative to the contractors, seeing that 30 claims have already been let, and some hundreds more are at the disposal of the Reciprocity Mining Company, which they can get lessees for whenever they think proper to let.

In the month of July last, I issued three private Gold Lands Licenses, to work at Jersey Point, in the bed of the Du Loup River, but I cannot state what amount of gold was taken out, as the licenses have not yet been renewed.

Quartz mining has been principally confined to prospecting, and discovering new veins, some of which have been uncapped, and shew very favorable indications of a gold-bearing character.

Mr. A. Michel, the gentleman who was employed last year, on behalf of the Provincial Geological Commission, to visit and report upon the quartz veins in the Seigneurie Rigaud-Vaudreuil, was employed for a sort period in the month of August last, by the De Lery Mining Company, to explore and report more specially on the auriferous deposits, both in the quartz and in the alluvial, in this Seigneurie, and his report thereon is highly favorable and encouraging. I beg to refer you to the *Journal de Québec*, of the 1st inst., copy of which I have the honor to transmit herewith, in which is report will be found. I am informed that the De Lery Company has also engaged the services of a Mining Engineer and party of men to explore the Seigneurie in search of quartz veins, and to test their gold-bearing value. This Company has also laid a stone foundation of a building for a crushing-mill, which it is expected will be erected and in working operation early this fall.

Messrs. Kilgour and Spoffard, two spirited miners here, have recently erected an "Arastra," or quartz-crushing machine, on the Gilbert River, about a mile from its mouth. This machine is worked by water-power, and is capable of reducing from one to one and a half tons of ore per day of 24 hours. I have delayed this report some days in the hope of being able to give you the results of the yield of gold obtained from the quartz so crushed, but owing to an accident in the process of amalgamation, which took place yesterday, nothing more was established than the bare fact of there being a good percentage of gold contained in the quartz. The "Arastra" continues working, however, and I hope soon to be able to inform you of the yield per ton of the quartz crushed.

The whole, nevertheless, respectfully submitted.

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C. E., Sept. 7, 1866.

*The Honorable**The Commissioner of Crown Lands,  
Ottawa.*

SIR,—I respectfully desire to correct an error in my Report forwarded yesterday. Instead of stating that 500 feet of the canal has already been made, I should have stated 700 feet. I feel this correction due to the Contractors, in case my Report should find its way into the newspapers.

I have the honor to be, Sir,

Your obedient servant,

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C.E., Nov. 3, 1866.

*The Honorable**The Commissioner of Crown Lands,  
Ottawa.*

SIR,—I have the honor to report that during the month of September last, owing to the heavy rains which prevailed, but little alluvial mining was carried on in this Division. During the month of October more mining was done. There were about 50 men at work during this period, on lots, 16, 17, 18 and 19 on the Gilbert river, an a considerable amount of gold was taken out, but for the reasons mentioned in my former Reports, I am unable to give anything like an accurate estimate of the amount. A number of claim-holders in this vicinity discontinued their labors even during the latter month, owing to the excessive flow of water in their pits and shafts, from the previous wet weather, and preferred waiting for the completion of the canal mentioned in my last Report. This canal, though much retarded in its construction by the wet weather above referred to, is now rapidly advancing towards completion. About 900 feet of it have been cut and finished, and it is expected that in about eight or ten days several of the claims will have been reached and tapped by it, when I have reason to believe, from 200 to 300 miners will be at work on the several claims and shafts on the Gilbert river. In order further to obviate the delay and consequent expense occasioned by the excess of water above alluded to, Messrs. Proulx and Dion, two enterprising miners from Quebec, have caused to be erected on the site of these claims, a newly patented steam-pump, of 6 horse-power, and capable of drawing off between 300 and 400 gallons per minute; the machinery of which is being rapidly adjusted, and will be, it is expected, in full operation in a few days. This pump will be a valuable assistant to the canal, by withdrawing the water from claims which cannot be tapped by the canal.

The interval of temporary cessation in mining labor has been made available and turned to good account by the miners, by the erection of a number of compactly built and well-roofed log-houses over the several shafts, to enable them the more effectually to carry on their mining operations during the winter; and the spot which, only a few months ago, looked like a dreary waste, and a barren upheaval of sand-mounds, mud-banks and deep and dilapidated pit-holes, rendering it a work of caution to traverse, now presents all the appearance of a primitive and thriving little village, from the numerous snugly-built log cabins which are promiscuously dotted over the whole scene, and from many of which the cheering hum of voices and the busy din of hammer, pick and spade, already resound.

I forward you herewith a sketch or plan of a portion of the seigniory Rigand-Vaudreuil, showing the position of the lots upon which the above mining operations are being carried on, which are colored red, and also indicating the direction of the canal, and the "flume" referred to in my previous Reports, and also showing some of the quartz veins which have been uncapped, and the position of the principal shafts sunk thereon. I would like to have this plan, or a copy of it, returned to me, as it is convenient for the purpose of reference and information to capitalists and others, visiting the locality with the view of engaging mining operations.

For several days past, portions of the DeLery Company's crushing-mill have been arriving; and it is expected that by the end of the ensuing week, the whole will have arrived, when, I am informed, no time will be lost in adjusting its several parts, and putting it into working operation. The buildings intended for its reception are being rapidly pushed towards completion, some 30 workmen being constantly employed thereon.

I have been told by one of the Directors of this Company that one of their number will be shortly dispatched from New-York, empowered to settle with the *Censitaires* and others, the disputed question as to the right to the gold on conceded lands. I hope this may prove to be correct, as I will then be able to collect license-fees for mining rights in the Seigniorie; and for the additional reason, that I am induced to believe the settlement of this vexed question will be speedily succeeded by the erection of other crushing-mills, by persons holding the site of quartz veins in the Seigniorie, but who are deterred from investing capital thereon, pending some satisfactory settlement of this much disputed question.

Out of the Seigniorie nothing beyond prospecting for quartz lodes has been done, and with what result I have not as yet learnt.

A misunderstanding has arisen between the agent of the Reciprocity Mining Company, and a miner to whom he leased certain claims on the Gilbert, and who refused either to pay the stipulated rent, or vacate the claims at the expiration of the period allowed for prospecting, unless the Company would give him a guarantee and security that he would not be molested in working out the claims. The Agent, believing the man to be acting in the interest of a rival Company, by thus throwing difficulties in his way, in the hope thereby of obtaining more favorable terms of settlement from his Company as to the disputed question respecting the right to the gold, and fearing lest other of his lessees might follow the man's example, has retaken possession of the claims, and removed the man's mining implements therefrom. The man, on his part, pretends he has a right to exact such guarantee and security, in view of the unsettled question as to the right to the gold, and declares his determination to re-obtain possession. At the instance of the parties I have interposed, and hope, by judicious counsel and advice, to succeed in effecting an amicable adjustment of the difficulty.

The whole nevertheless respectfully submitted.

R. POPE, G. M. I.

GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C. E. 13th Dec. 1866.

*The Honorable*

*The Commissioner of Crown Lands &c., &c., &c.*

SIR,—Through the kindness of the Agent of the Reciprocity Mining Company, I am enabled to furnish you with the accompanying statement of the amount of gold taken out, within the last four weeks, of some of the pits sunk on lots 16, 17, 18 and 19, in the De Lery Concession of the Seigniorie Rigaud-Vaudreuil. From motives of supposed policy, owing, I fancy, to the disputed question of patent right, the Agent and miners generally, have hitherto withheld all information as to the amount of gold obtained, and they have recently decided upon pursuing the opposite course. I deem the accompanying statement perfectly reliable, as it is based upon weekly returns made by the miners to the Agent, in virtue of an express stipulation in their deeds of lease from him.

The pits are not sunk on the banks of the present bed of the River Gilbert, but at distances therefrom varying from 50 to 80 feet, on what is called the old alluvial flat, or the supposed ancient or original bed of the river. The gold obtained is what is known as coarse gold, a large proportion of it consisting of nuggets, varying in weight from half an ounce to about nine ounces, and is found in the gravel as high as four feet above the bed-rock, as well as in the bed-rock itself, under a substratum of blue clay. It was in similar indications, I am informed, that most of the alluvial gold obtained in California and Australia, was taken out.

In view of the approaching International Exhibition at Paris, I respectfully desire to mention, that a nugget weighing 8 oz. 18 dwts., has recently been taken out of one of these pits, and is in the possession of the above named agent. If the Government should desire it, I think it could be purchased at a small amount beyond its mint value, which is roughly estimated at \$18.25 per ounce. It is a much prettier and more valuable specimen than those which have been obtained by the Provincial Geological Commission for the purpose, as I have been given to understand, of being forwarded to the Paris International Exhibition.

The whole, nevertheless, respectfully submitted.

I remain,

Your obedient servant,

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C. E., 13th Dec., 1866.

STATEMENT shewing the amount of Gold taken out of some of the pits sunk on lots 16, 17, 18 and 19, referred to in the accompanying letter.

|                                                                                 |          |
|---------------------------------------------------------------------------------|----------|
| One pit, to 4 × 5 feet, worked by 5 men 4 weeks.....                            | \$700 00 |
| A drift or tunnel, 50 × 6 feet, 5 men 5 weeks.....                              | 504 00   |
| A pit, 5 × 6 feet, 3 men 4 weeks.....                                           | 275 00   |
| Casually taken out of other pits, and while prospecting for good locations..... | 1200 00  |

Total.....\$2679 00

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C.E., 5th Jan., 1867.

*The Honorable**The Commissioner of Crown Lands, &c., &c., &c.*

SIR,—I have the honor to report that during the months of November and December last, mining was steadily carried on in the De Lery Concession of the Seigniori Rigaud-Vaudreuil, on lots, 16, 17, 18 and 19, and that a considerable amount of gold was taken out, including a nugget weighing 8 ounces 18 dwts., as set forth in detail in my letter to you of the 13th ult. During this period about 80 men were, and are still, employed in mining in this locality.

The canal, of which I have made mention in my former reports, is expected to be completed in a few days. A portion of it has already reached, and drains some of the claims, and a great amount of labor and expense is thereby saved, and greater facilities afforded for mining operations. I hope, so soon as this canal shall have been completed, to be enabled to furnish you with regular statements of the amount of gold extracted.

The large nugget to which I had the honor to draw your attention, in my letter of the 31st ult., as having been recently taken out of a pit on lot 16, weighs 45 ounces. The fortunate finder expects to get about \$22 an ounce for it, making the sum of \$990 for the nugget. As I informed you in my letter last referred to, I wrote to Sir W. E. Logan, informing him of the fact of the nugget having been found, and of its probable weight and value, and the locality it was taken from, in case he should desire to add it to the specimens of Chaudière Gold he has already obtained for the purpose of being forwarded to the Paris Industrial Exhibition. I have received a reply from him, in which he states he has no funds at his disposal to enable him to purchase it.

The De Lery Company expect to have their crushing-mill in operation about the beginning of March next. They have at present 12 men employed in excavating quartz from the lode on lot 83 in the 1st Range, N. W., in the Seigniori Rigaud-Vaudreuil, commonly known as Riggs' vein, and intend shortly to put on an additional number of hands, in order to have a sufficient quantity of ore ready to supply the mill when in working operation. I intend to collect the License fees due for the labor of these men, so soon as the Agent of the Company shall have returned, who is now temporarily absent.

No mining is at present carried on in this Division, out of the Seigniori Rigaud-Vaudreuil, but a number of persons are prospecting for quartz veins in Cranbourne and adjoining parishes.

The whole, nevertheless, respectfully submitted.

R. POPE, G. M. I.

## GOLD MINING INSPECTOR'S OFFICE,

St. Francis, Beauce, C.E., 27th Feb., 1867.

*The Honorable**The Commissioner of Crown Lands &c., &c., &c.*

SIR,—I have the honor to furnish you with an approximate estimate of the amount of gold taken out of this Division during the year ending on the 31st December last.

I am unable to give a correct statement of the amount, owing to the fact, that with one slight exception, all the mining carried on in the Division, during that period, was confined to the 16th, 17th, 18th and 19th lots on the Gibert River, in the De Lery Concession of the Seigniori Rigaud-Vaudreuil, by miners and companies, other than the

De Lery Company, and from whom consequently I could not exact license fees, nor enforce payment, nor statements respecting the amount of gold taken out by them.

From the most reliable data I can obtain, I find that, upon a low estimate, the sum of \$8,700, including the large nugget, of the discovery of which you have already been informed, was taken out during the year. This amount, however, was in reality taken out in about three months, and towards the close of the year, as the earlier part of the year was chiefly spent in prospecting, and in constructing a canal, and perfecting other preparatory appliances for the better prosecution of mining labor. The above amount, with the exception of about \$100 taken out near Jersey Point, at the confluence of the Du Loup and Chaudière Rivers, was taken out of the lots above mentioned on the Gilbert River, from 12 pits or shafts sunk thereon, and by four parties sluicing near the bed of the river. These shafts have as yet only been partly worked, and a considerable quantity of gravel or dirt taken therefrom still remains to be washed, and cannot be washed till the spring, from which a good yield of gold is expected.

It is impossible to form any idea as to the exact number of men employed in mining, as the work was carried on very irregularly, the number varying frequently from 20 to 100, and some of these were engaged in other than mining work, though connected therewith, such as draining, canal-making, and other preliminary labor.

I have the honor to be, Sir,

Your obedient servant,

R. POPE, G. M. I.

(Extract.)

ST. FRANCIS, BEAUCE, 4th March, 1867.

SIR,— \* \* \* In case you should be desirous of distinguishing, in your annual Report, the different places in the Division whence gold was obtained, I am desirous of supplying an omission in my letter of the 27th ultimo, wherein I state that, "with the exception of \$100 the whole of the \$8,700 obtained during the past year was taken out of the pits sunk on the Gilbert," I should have stated that, "about \$500 of this amount were taken out of the Branch River, near its junction with the Gilbert, in the Seigniori Rigaud-Vaudreuil."

I have the honor to be, Sir,

Your obedient servant,

R. POPE, G. M. I.

ST. FRANCIS GOLD MINING DIVISION.

To the Honorable

The Commissioner of Crown Lands.

STANSTEAD, September 26th, 1866.

SIR,—In accordance with your instructions of the 16th ultimo, I have visited the Golconda mine in Ascot. There has been some progress made in developing that mine since my visit last year. The Company have got an engine of forty horse power, two double stamps, and two amalgamators. With this machinery they can crush three-fourths of a ton of quartz per diem. The manager of the mine, Gen. Adams, being absent, I was unable to ascertain the amount of gold that has been taken out of this mine during this season. From what I could learn of the man left in charge of the work, I should think that the work which has been done is entirely of an experimental character. It seems they have crushed the pay dirt, the tailings of the sluices, and the slate, which is the bed rock of that section, as well as the quartz. This mine is represented as being very rich. The tailings of the sluices, after crushing, yielding as high as thirteen dollars per ton. The Company find very great difficulty in extracting the gold, on account of the sulphur with which it is combined. To illustrate, by roasting the tailings from the amalgamators they have succeeded in obtaining as high as sixty dollars per ton. The quartz yields from five to seventy-five dollars per ton, and the slate seems to be the richest of all, yielding as high as three hundred dollars per ton. The Company are going to increase the building to three times its present size. The steam engine is to make way for a new one of one hundred horse power. The stamps to be increased to eighty, and amalgamators and desulphurisers in sufficient numbers to dispose of fifteen tons of quartz daily. I should mention the fact that there is being a shaft sunk on one of the quartz leads on this property. It had reached the depth of ten feet at the time of my visit. In regard to the

gold mining in Ditton, I wrote J. H. Pope, M.P.P.—I enclose a copy of his answer. The Ascot Gold Mining Company that started last fall with such brilliant results, have done nothing worth mentioning this season. I have made inquiries respecting Woburn, and have been shown some specimens of gold said to have been taken from one of the streams in that township. But nothing that can be called mining, as I can learn, is being done in that township. That feeling, as far as I am able to judge, in regard to gold mining in this District, is not a very sanguine one.

I have the honor to be, Sir,

Your most obedient servant,

JAMES K. GILMAN, G. M. I.

(Copy).—James K. Gilman,

COOKSHIRE, Sept. 10, 1866.

DEAR SIR,—Your letter of the 31st August, I found on my return home last night, having been absent several days. I am trying Ditton, cannot call it mining, have four or five men trying it. They have been there since the first of June. They have taken out some gold, about eight hundred dollars; some of the time they are prospecting in different places, but most of the gold has been found in Lots, 9th range, Ditton, from No. 39 to 46, all private lands; have done nothing on Crown Lands, I think I have answered your inquiries fully as I could if under oath, as I suppose you want something reliable to report or wanted facts; of course they are for your own use or the use you may have to make of them officially. Perhaps I ought to have taken out License, but I did not call it mining what I was doing. If, however, you think that I should take License, please send them to me with bill of what I am to pay, and I will send you cheque.

(Signed), J. H. POPE.

#### APPENDIX No. 27.

### ANNUAL REPORT OF PIERRE FORTIN, ESQUIRE.

STIPENDIARY MAGISTRATE, IN COMMAND OF THE EXPEDITION FOR THE PROTECTION OF THE FISHERIES IN THE GULF OF ST. LAWRENCE, ON BOARD "LA CANADIENNE," DURING THE SEASON OF 1866.

To the Hon. the Commissioner of Crown Lands, Ottawa.

SIR,—The same causes that have for several years, delayed my departure for the Gulf in the spring, that is to say: cold weather, and the lateness of the breaking of the ice at the mouth of the River St. Charles, have this year also, operated very much against my wishes; for *La Canadienne* could not get out of the *Dock* which was moored in Palace Harbor, before Monday the 30th April, and we required the remainder of that week to complete the equipment of the vessel, and to take the provisions and the stores on board.

At last, on the 7th May, in the afternoon, we set sail for the Gulf. Towards evening it became calm, and as the tide was flowing, we were obliged to cast anchor at Rivière à la Fleur.

The next day, we were enabled to resume our course very early in the morning, and after having experienced calms and adverse winds during part of the passage, we came to anchor on the 10th, about noon, under the east point of St. Bernabé Island, in accordance with the order that you had given me by a telegraphic despatch, dated 19th April, which order intimated that I was not to go down the River with *La Canadienne*, further than Farther Point, without first having received your instructions bearing on the course to be followed in regard to the American fishermen that would resort to our maritime coasts this year.

But the stay that I made in the neighborhood of Farther Point was not lost, for the mission that I perform, for I employed the fifteen days I spent there in visiting the brush fisheries of Bic, Rimouski, Ste. Luce, Ste. Flavie, and Métis, in order to see that the Fishery Laws would be observed everywhere. I set myself principally to the putting into force of the clause of the new Fisheries Act which applies to the brush fisheries, which were not in existence in the year 1864.

And I am very happy to be able to say that the fishermen of the different parishes, who, more by ignorance of the law than otherwise, happened to have their fisheries set in contravention to the law, hastened to put everything in order as soon as I had told them to do so, and several others, in breaking down and removing those which having not been set in 1864, had no legal right to be set up. I must, however, except four fishermen, who, having refused to conform themselves to the law, were prosecuted by me before the Justices of the Peace of Rimouski, and were condemned, one for not having had a net at the bottom of his brush fishery, and the three others for having set up a brush fishery at a place where none had been set in 1864, nor before that year.

The following tabular statement will show the number of brush fisheries, with the owners' names, that I found set in the parishes above mentioned, and also, the number of those I ordered to be pulled down, because they did not exist in the year 1864.

**BRUSH FISHERIES—FROM CAPE ENRAGÉ (BIC) TO RIVER RIMOUSKI; AND COMPRISING ST. BERNABÉ AND CANUEL ISLANDS.**

1. Etienne Doucet.
2. Joseph Doucet et William Dubé.
3. Ferdinand Bernard and Joseph St. Laurent.

*Massacre Islet.*

4. Théophile Chassé.
5. Jacob Arseneau.
6. Isaïe Dionne, junr.
7. Isidore Côté.

*River Haté.*

8. George Sylvain.
9. Xavier Parent.
10. George Lavoie & St. Pierre.

*Rimouski—(40 acres more to the eastward of the last one.)*

11. Pierre Gagnon (rented by Martial Labric.)
12. François Lavoie and Joseph Dubé.
13. Auguste Bradley.
14. Samuel Fournier.
15. Vital Rioux.
16. J. Baptiste Pineau.

*Anse aux Sables.*

17. Sifroy Marin.
18. Charles Drapeau.
19. Félix Lévesque.
20. Louis Gagné and Louis Lepage.
21. Pierre Langé.
22. Johannan Dubé.
23. Pierre Parent and Elzéar Drapeau.
24. François Parant (on the property of O. Parant.)
25. Louis Parant, close ashore, and Jean Longé and Augustin Michaud, outside, the who'e forming but one fishery.
26. Joseph Parant.
27. Nicholas Pineau.

*Canuel Islet.*

28. Jacques Parant.
29. Jean Langé.

*St. Bernabé Island.*

30. Simon Chalifour.
31. Laurent Bouillon.
32. Jacques Lepage.

*From River Rimouski to Father Point—at Malcolm Riel's Point.*

*Little Métis Point.*

92. Daniel Fergusson.

*Boules.*

93. James Harris Scott.  
 94. François Lamarre.  
 95. Boniface Bernier.

There were also, at Great and Little Matane, several brush fisheries, that I was not able to visit, but I had heard from very good authority that they had all been erected according to law.

On the 25th, in the afternoon, special instructions addressed to me, having reference to the American fishermen, reached Rimouski, and I immediately afterwards gave the order to get under weigh. But we got wind enough to set sail only the next day in the morning, and towards the evening, after having been obliged by a dead calm to anchor opposite Ste. Flavie, for a few hours, we went, for shelter against a strong easterly wind, under Little Metis Point.

On the 27th, I went to visit the brush fisheries erected in Grand Métis Bay, and ascertained that they were all set according to the law.

On the 28th, in the morning, the easterly wind began to blow with such violence, and the sea rose so high in consequence, that we were forced to raise anchor and bear up and south. We came to the anchorage ground at the west end of St. Bernabé Island; but when nearing this place we had to jibe the mainsail while running before the wind and in performing that manœuvre the main sheet-iron gave way, and the main-boom coming upon and striking on the main-rigging with great violence, broke in two pieces; fortunately, however, we met with no other accident. As soon as we were anchored I sent ashore some of the men to get pieces of timber and some iron bolts to repair our damages. We worked on board all night, notwithstanding a terrific gale of north-east wind accompanied with heavy rain, we fixed the main-boom and the next day that spar was in a fit state to resist against the storms until we could procure a proper spar to make a new one.

The wind having shifted south-west about mid-day, we made sail, and on the 30th in the evening we cast anchor in the Bay of Montlouis. I at once visited that pretty fishing post. I saw Mr. Laflamme, Justice of the Peace of that place, and I arranged with him some business concerning the fisheries of this part of the coast.

On the 31st, at 2.30 A. M., we got under weigh and we were enabled to reach Gaspé Basin on the 1st of June, in the morning. I spent the day issuing salmon-fishing licenses of that place, to the number of 55. Moreover I was busy with other matters connected with the maritime fisheries. Everything was quiet at that post, where few vessels were to be seen yet. Salmon-fishing was just beginning in the rivers of Gaspé.

On the 2nd, at day-break, we came out of Gaspé Basin with a land breeze. I first landed at Douglastown, for the purpose of issuing the salmon-fishing licenses of St. John's River and Malbay, to the number of 11, and in the afternoon I stopped at Point St. Peter. The next day, in the morning, we came to anchor at Percé. Cod-fishing in the Bay of Gaspé and at Malbay had only been going on for a short time, and it showed no very good prospects; even at Percé, that famous fishing post, codfish was scarce, and the best boats had only taken fifteen drafts of fish yet. Still, herring was abundant enough, and capelin was beginning to show itself on the coast. I was able to ascertain that there was an increase in the number of fishing boats at that place.

On the 4th, in the morning, we left Percé for the Bay Chaleur, where I had to occupy myself with the issuing of salmon-fishing licenses, and see to all that appertained to the fluvial and maritime fisheries of that important district. I was very much delayed by calm weather during this passage, and it is for this reason that I only arrived at Cape Core on the evening of the 5th, and the next day at Grand River.

On the 7th, a fine breeze brought us to Paspébiac. Mr. Moses Gibaut, chief agent of the house of Chas. Robin & Co., at that place, with the politeness and obligingness which every one acknowledges him to possess, placed at my disposal the carpenters and blacksmiths of their celebrated establishment, to get a new main-boom made for us with a spar of red pine which had been sent from Quebec, and while it was being made I proceeded on my visit to the fishing posts of Bay Chaleur.

On the 8th I was at Nouvelle, on the 9th at Carleton, the 11th at Maria and at New Richmond, and on the 12th, in the afternoon, we were back at Paspébiac.

The following is the number of licenses issued in each of the localities above mentioned:—

|                                  |              |
|----------------------------------|--------------|
| For Restigouche River.....       | 10 licenses. |
| For Nouvelle.....                | 2 “          |
| For Carleton. ....               | 9 “          |
| For Maria.....                   | 10 “         |
| For New Richmond.....            | 12 “         |
| For River Grand Bonaventure..... | 2 “          |

---

45 licenses.

A question that concerned me much, during that visit in the Bay Chaleur, was the putting into force the 12th Section of the 12th Clause of the new Fisheries Act, which obliges the fishermen, from Saturday evening until next Monday morning, to raise or dispose their salmon or trout-nets, in such a manner as to allow a free passage to the fish.

I must first, that all the fishermen, at the time of my arrival in Bay Chaleur, had not complied strictly with that part of the Fisheries Act, but it appears that those parties had done so more on account of ignorance than with a view of acting in opposition to the system in use for the protection of the fisheries; and as soon as the new Act was made known to them and explained, all of them submitted to the law without the slightest difficulty, and observed it throughout the season with great punctuality and exactness, as the different fishery overseers testified to this in the monthly reports they have addressed to me.

I have already had the honor, I believe, of informing you that the salmon nets set near the shores of Bay Chaleur, and on the whole coast Gaspé, cannot be entirely raised but with the greatest difficulty, and a great deal of work, and at times, when the wind

blows strong on shore, it is utterly impossible to do so. But there are certain ways of disposing a salmon fishing station, without raising it at all, in such a manner that the salmon will not be caught in the nets: it is by raising certain parts of them out of water, according to the mode after which the stand has been erected. Thus for a certain kind of stand of nets, as soon as the swings, the wings and the crooks have been raised out of the water, no more salmon can be taken in it. As for other kinds of stands, on the contrary, the bar net must be lifted up near to the crooks, so as to allow a free exit to the fish. Those different ways ought to be adopted, in accordance with the depth of the water and the conformation of the shores where those stands of nets are erected. The fishery overseers have been advised by me to put the clause in force in the way that I have just been explaining, being guided in this respect by their judgment and the long experience they have acquired among the fisheries. According to my humble opinion, it is the best means of putting the law in force, without obliging the fishermen to submit themselves to too much fatigue, and imposing on them burdensome restrictions. But, on that question, I would not trust to me alone, and I thought it my duty to refer it to you in my second report of progress, dated Paspébiac, 13th June, and you were pleased to do me the honor of approving by your letter of the 22nd June, the practical manner of construing and applying the 12th section of the 12th clause of the Fisheries Act.

Notwithstanding all due diligence used on the part of the workmen of the house of Robin, our new main-boom could not be got ready before the 18th, it being also necessary to make iron works suitable to the large dimensions of that new spar.

The few days I passed in Paspébiac, waiting, were employed in the manner the most advantageous to the service of the fisheries. I availed myself of this forced stay in port to give special attention to gun and rifle exercise, and during several days I had my men ashore exercising at target practice, and the remarkable progress they made in such a short space of time showed very well that all on board had at heart to fulfil their duty in the best possible manner, and be ready to have the flag floating at the mast head of *La Canadienne* respected at all times and under every circumstance.

The port of Paspébiac was frequented by the usual number of vessels, and the following list of those I visited on the 18th indicates the kind of trade in which they were engaged.

## PORT OF PASPEBIAC (18th JUNE.)

| Name of the Vessel.            | Name of the Captain. | Tonnage. | Number of sailors. | Remarks.                       |
|--------------------------------|----------------------|----------|--------------------|--------------------------------|
| Schooner "Pandora".....        | G. Larbalestier..... | 99       | 8                  | Just arrived from North Shore. |
| Brigantine "G.D. T.".....      | Ed. LeBrun.....      | 124      | 10                 | Going to Labrador              |
| Schooner "Adelina".....        | P. Syvret.....       | 104      | 8                  | do Barbadoes.                  |
| do "Quiz".....                 | L. Vigo.....         | 93       | 8                  | do Boston, with Herring.       |
| Brigantine "O. T. Sutton"..... | P. Cante.....        | 197      | 12                 | Going to Labrador.             |
| Bark "Homely".....             | George Pirouet.....  | 229      | 12                 | do Brazil.                     |
| Brigantine "Century".....      | D. LeMoignan.....    | 190      | 10                 | do West Indies.                |
| Bark "C. H.C.".....            | Jos. Couillard.....  | 210      | 12                 | do Brasil.                     |
| Do "Markwell".....             | Thos. Ledain.....    | 130      | 10                 | do Mediterranean.              |
| Brigantine "Ranger".....       | N. Ledain.....       | 130      | 10                 | do do                          |
| Do "85".....                   | J. Romeril.....      | 113      | 8                  | do do                          |
| Schooner "Only Son".....       | Chas. Renaud.....    | 18       | 4                  | Coasting fish.                 |
| Do "Hare".....                 | J. Moulin.....       | 15       | 4                  | do do                          |
| Do "Replevin".....             | Jos. Young.....      | 10       | 2                  | do do                          |
|                                |                      | 1802     | 120                |                                |

On the 19th I left Paspébiac at 12.45 P. M. Being abreast of Port Daniel I perceived near the shore three schooners which resembled very much American schooners, and as they might be then fishing, I at once gave orders to bear away on them, and the superior speed of *La Canadienne* enabled us to reach the nearest one to us after a run of seven or eight miles. We found it to be the schooner *Annie Eaton*, P. Cullins, Master, from Liverpool, Nova Scotia. The two other schooners belonged to the same port. Their occupation was cod-fishing on the bank of Miscou, and on that day they had come into the Bay of Port Daniel for the purpose of fishing herring for bait. Captain Cullins told me that about fifteen schooners had passed that very morning, on the bank of Miscou, bound for the New Brunswick coast.

At 2.30 P. M., we resumed our course towards Percé, and we came to anchor at that place at a quarter past six in the evening. I made my usual visit to the fishing establishments of Percé, and found everything in order. Cod-fishing was yielding a little more than during the time of our last visit, but still it was not very good.

On the 20th we left Percé, and, after having visited Point St. Peter and Grand Grave, we came to anchor in the evening in Gaspé Basin. I met, in this port, a schooner just arrived from the Magdalen Islands, whence she had brought the news that the spring mackerel had been very abundant, but that, unfortunately, a storm which had arisen at the very height of the operations of the fishing, had caused great damages among the several thousands of nets which were set in Pleasant Bay, and had occasioned serious losses to a great number of fishermen. However, notwithstanding this sad mischance, we may say that this fishing was good, so great had been the gathering of schools of mackerel in that bay. I met at the Basin the fishery overseers, Mr. Jos. Eden, junr., and Mr. B. Conly, who reported that all was right in their respective divisions.

On the 21st we set sail, and the next day, at 4.30, a. m., we came to anchor at the south-west point of Anticosti, for the purpose of landing Mr. Macfield McLaren, the fishery guardian of that island. Mr. Ed. Pope, the well known light-house keeper of that place, was good enough to furnish a lodging for this man, and also promised to give him all possible assistance during the voyages he would have to make along the dangerous coasts of this almost waste island. Codfish seemed to be abundant on that part of the island; and three schooners we saw in the south-west cove—two of which belonged to Nova Scotia and one to Canada—seemed to have succeeded very well in their fishery. As for salmon fishing, it had been only middling till then.

At 6.15, a. m., that is to say, less than two hours after our arrival at the island of Anticosti, we again put under sail, and on the same day, a little before midnight, we were able to reach Moisie.

The next day (23rd) I landed at that place and issued the salmon-fishing licenses for the stations at Moisie Bank; and I visited the fishing establishments, of which the number had again decreased since the preceding year. Codfish was just beginning to show itself in the waters of the Moisie, and it was far from being abundant. Salmon fishing, on the contrary, had, up to that time, yielded pretty good products, in quality as well as in quantity. I stationed at this post the overseer of that district, after having given him the necessary instructions. Having put everything in order at Moisie, I ordered to set sail, but it was calm during the whole night.

On the 24th, in the morning, we laid to abreast of Pigou; I visited this post, and also Bason River, where I found everything in order. During that day I went to Shallop River, which is now totally abandoned as a fishing post, and in the evening we cast anchor at Shell Dr. kc.

On the 25th I visited Thunder River and the posts that lie in Rambler's Cove and in Magpie Bay.

On the 26th I spent part of the day at River St. John and at Long Point, and in the evening we reached Mingan Harbour.

In several of the posts I had just been visiting I had several disputes to settle among the fishermen, and also to hear several cases for violation of the Fisheries Act. Nevertheless, if we except several quarrels among the fishermen, especially when the latter were in a state of intoxication, all was quiet on the coast, and no foreign vessel had shewn itself on that coast yet. Everywhere codfishing was below an average one, except at Thunder River and at Rambler's Cove, where the fishermen had still expectations of a good catch

It is perhaps now the proper place to say one word, although the subject seems to be foreign to the matter I am treating in this report, of the melancholy and baneful effects to the morals of the fishermen, as well as to the industry of fishing, caused by the sale without license of spirituous liquors at the fishing establishments. Every one will acknowledge, that the immoderate use of intoxicating drink among the fishermen, is a great evil, which we ought to try and extirpate by all possible means. There exists it is true, an Act (cap. 91, 23 Vic.) to prevent the sale without license, of spirituous liquors, in the unorganized countries of this Province. But, in my humble opinion, this Act does not contain dispositions strict and rigorous enough against those who violate this law knowingly. I believe also that one good thing, to uproot this evil, would be to give jurisdiction, in this kind of summary matter, to the overseers of fisheries. Besides, I would take the liberty to suggest that a person be appointed to grant licenses to those who wish to make a lawful and regular trade of liquors on any part of the north coast. This subject certainly deserves the attention of our Government, and of our Legislature.

In accordance with your instructions, I stationed a Fishery Guardian to look upon the salmon fisheries of the Rivers Mingan and Romaine. He was to act in concert with Mr. Joseph Beaulieu, the local overseer. Mr. McKenzie, Agent of the Hudson Bay Company, at Mingan, was good enough to procure him a lodging in one of the buildings of that post.

On the 27th we went down to Esquimaux Point. I made the visit of that post, which now numbers eighty-five families and 13 vessels, and assured myself that everything was quiet there.

The next day we proceeded on our course to the eastward. About noon we stood abreast of Watsheeshoo, but the strong breeze that was blowing, and the rough state of the sea, would not allow us to land there, so we went down towards Natashquan, where we arrived at about five o'clock in the evening. Not a single vessel was to be seen at that well known fishing place; it was a proof that there were very few codfish in those parts, and unfortunately it was but too true, although capelin had been on the coast for some time. I took arrangements to have the overseer engaged for Watsheeshoo, brought to his place of destination, and on the 30th I went to visit Grand Natashquan River. I examined the nets Mr. Boulet had set in that stream, and found them according to law, with the exception of two, one a salmon and the other a trout net, which were not quite at the legal distance, one from the other, that is to say 250 yards. But Mr. Boulet hastened to raise them as soon as I had made known to him that the necessary distance had not been left between his nets, and seeing that he had acted so through ignorance, I contented myself this time with making known to him the clauses of the new Act, which had special reference to his case, and told him to guard himself against committing any new violation of the Fishery Law. In acting so towards Mr. Boulet, I was taking into account the ill success he had had until now in his fisheries at Natashquan, and the losses he had experienced in consequence of the great expense incurred in procuring the necessary gear for carrying on his fishery. The salmon was just beginning to appear in Grand Natashquan River, and only 5 barrels had been caught yet. Having stationed Mr. Félix Sylvestre, as Fishery Overseer at that place, I gave the order to start, and the next day in the morning, 1st July, we came to anchor at River Kégascha. I visited this fine stream, and found 4 salmon nets in it at a distance of 250 yards from each other; but one of them had not quite the required size of meshes, and I ordered it to be removed at once. I also got a small trout-net taken away, the same being placed at a distance not quite sufficient from one of the salmon nets above mentioned. Only 11 salmon had been caught yet in that river, but it must be remarked that salmon generally ascends it at a much later period than any other river on the north shore. In the afternoon we came to anchor, for a few hours only, in the Bay of Kégascha, where we did not see a single fishing vessel. Codfish and bait were very scarce there. The six fishing-boats of that place had taken in all, only about 30 quintals of fish yet. The tabular statements will show that the seal hunting carried on by small schooners belonging to that harbour, had not been good. Towards the evening, we came in the harbor of Coacoachoo.

The next day, 2nd July, I visited the river, and found no one there. The licensee, Mr. Aubé, was not fishing the stream. At the same time, I had given instructions to my coxswain to go to Miramichi, to get information from Mr. S. Jones, if

there had been this year any parties engaged in carrying away the eggs of wild fowl from the coast, and the answer was that he had not seen a single one. Besides, the numerous broods of young birds we met at every moment in that real archipelago, formed by the islands of Coacoachoo, were a convincing proof that the wild fowls had not been interfered with during the laying season. The same day we weighed anchor, with the intention of going out of Coacoachoo Bay, but having sailed a few miles the head wind and the adverse current brought us back to the anchorage we had just left.

On the 3rd, it took us the whole day to go out of the bay, being towed by our two boats, and towards the evening we were only three miles distant from Outer Island; then came a dead calm, and as we were going to be cast by a heavy swell from the south-west, in the direction of very dangerous reefs, we had to let go the anchor in twenty fathoms of water, and in this critical position await the wind from whatever side it might blow. At the same time we were surrounded by a dense fog on every side.

On the 4th, it was calm, the fog being yet as dense as ever, and the swell very high; at last about five o'clock in the afternoon, the fog cleared a little and we hastened to take advantage of it and reach the harbour of Coacoachoo. But before we had time to arrive at the entrance of the bay, with a slight breeze from the east-north-east, we were again enveloped in a very thick and wet fog, and forced to cast anchor at a few cable lengths only from Outer Island, having the breakers of that Island nearly under our stern; but we kept all the sails up and took all necessary precautions with the view to go out to sea if the wind increased. At last, on the 5th July, in the morning, the fog having disappeared, we were enabled to enter into the harbour of Coacoachoo and place ourselves in safety; the fog reappeared immediately after and at the same time the wind began to blow from the south-east. This vexing and very annoying kind of weather lasted till the next day in the morning, when we were enabled to joyously set up our sails and start for the harbour of Wapitigan, where we arrived at 1 p. m. I started at once to visit the River Etamamu, and found the salmon nets all placed according to law. Only three barrels of salmon had been taken there yet. It was certainly a very small product, and no one knew what cause to attribute to this failure. Mr. Blais told me that no party engaged in the carrying away of eggs of wild fowls had been seen this year in the neighborhood of Wapitigan.

On the 7th, we left that place and came to anchor at Meccatina, at about 1 p.m. There had been at that post, some time before, as many as 30 fishing schooners, but as codfish had been only seen in very small quantities they had soon left.

In the afternoon I stopped at the fishing post of Tête à la Baleine, where I found three schooners from the Magdalen Islands, and towards the evening we came to the harbor of Beles Moutons. There were 17 schooners in that port, all engaged cod-fishing. I give their names below, as well those at Tête à la Baleine.

## BAIE DES MOUTONS, LE 7 JUILLET.

| "Mermaid" .....             | Jos. Marin .....    | Gaspé .....             | 40       | 10             | 2                        | .....                     | 55                 |
| "Constantine" .....         | J. Boudreau .....   | Esquimaux Point.....    | 54       | 11             | 3                        | .....                     | 60                 |
| "Espérance" .....           | D. Chiasson .....   | Amherst Island.....     | 51       | 10             | 3                        | .....                     | 60                 |
| "Bee" .....                 | M. Howley .....     | Bays of Islands.....    | 15       | 4              | 2                        | .....                     | 4                  |
|                             |                     |                         | 739      | 207            | 58                       | 3                         | 1174               |

It will be seen that codfishing had not been successful for any of them, although codfish was abundant enough on the fishing grounds everywhere, but it was said that the fish would not bite freely, because of being too much glutted with capelin, of which there was a large quantity near the shores for some time. I enquired everywhere if any party engaged in the carrying away of eggs of wild fowls had come to Murr Rocks, or in the neighborhood, and I learned with pleasure that none had made their appearance; scared away, evidently, by the capture and sale of the "*Ocean Bride*" last year. It was a great satisfaction to the inhabitants of the coast, who hope that, since protection is given to the birds during the laying season, wild game will have a chance of becoming as numerous as they formerly were.

On the 8th I visited the fishing posts of La Tabatière, Lac Salé, and in the evening we came to Kikapoë, at which place we were detained during the 9th by head wind and fog.

On the 10th I went to Tête à la Baleine de Pacachoo, and in the afternoon we came to St. Augustin, where I found 14 schooners engaged in cod-fishing without much success. It was at this last fishing post that such a large quantity of fish had been taken last year. Salmon fishing, on the other hand, was progressing favorably. I issued Salmon-fishing licenses for that post, and I entrusted Mr. Matthew Kennedy with those intended for places I could not visit myself, because they were too far off. The following is a list of the fishing schooners I found at St. Augustin Harbor:—

## ST. AUGUSTIN HARBOR, 10TH JULY.

| Name of Schooner.    | Name of Captain.     | From which Port.       | Tonnage. | Number of Men | Number of fishing boats. | No. of Capelin Seines. | Codfish quintals. |
|----------------------|----------------------|------------------------|----------|---------------|--------------------------|------------------------|-------------------|
| "Britannia" .....    | John Ross .....      | Gaspé.....             | 67       | 14            | 5                        | .....                  | 100               |
| "Flying Fish" .....  | Robert Pye.....      | do .....               | 36       | 8             | 3                        | .....                  | 80                |
| "Light Boat" .....   | Jos. Foster.....     | Halifax.....           | 48       | 14            | 4                        | 1                      | 100               |

| "Amy" .....          | William Terriau..... | do .....               | 43       | 10            | 3                        | .....                  | 60                |
| "Onésime" .....      | M. Richard.....      | do .....               | 42       | 10            | 3                        | .....                  | 20                |
| "Dolphin" .....      | O. Richard.....      | do .....               | 52       | 10            | 2                        | 1                      | 60                |
| "Marie" .....        | N. Arseneau.....     | do .....               | 40       | 19            | 3                        | 1                      | 50                |
| "Two Brothers" ..... | T. Delaney.....      | do .....               | 42       | 10            | 3                        | .....                  | 30                |
| "Archangel" .....    | L. Jonphe.....       | do .....               | 50       | 10            | 3                        | .....                  | 50                |
| "Enterprise" .....   | J. Dixon.....        | Halifax .....          | 33       | 7             | 3                        | 1                      | 51                |
| "Elie Burton" .....  | A. Langlois.....     | Bay of Islands.....    | 39       | 8             | 3                        | 1                      | 40                |
|                      |                      |                        | 594      | 142           | 45                       | 5                      | 801               |

At 5.20 p.m., we followed up our course to the eastward, and the next day, at 4 a. m., we came to anchor at Ile à Bois. In Anse aux Blancs Sablons I found 15 schooners, and at Green Island 8 others, all engaged at cod-fishing; among the latter there were four French schooners. I boarded each of them, and, after having told their masters that they had no right to fish on the British shores, ordered them to depart as soon as the weather would permit them to do so.

On the 12th I visited Petit Havre, L'Anse des Dunes and Bradore Harbor. In this last place there were 29 schooners engaged at cod-fishing, and with bad luck generally.

It was the same at Green Island and at L'Anse aux Blancs Sablons.

Here follows a list of those vessels:—

## SCHOONERS AT GREEN ISLAND, 11TH JULY.

Codfish was reported plentiful enough on the fishing grounds, but it would not take the hook, even when baited with capelin; though pretty large quantities were at times taken by means of the seine. Being informed that foreign fishermen had often been in the habit of using herring seines for catching codfish in those places, I warned all I could meet against resorting to this illegal practice to make their fares, or if they did it they would expose themselves to have their fishing gear forfeited to the Crown.

On the 13th and 14th the weather was bad. I went to Ile à Bois, and a second time to Green Island, then to Bradore, to see that the French schooners had left our shores. On the 15th, in the morning, the last of those vessels put under sail, and we left for the harbor of Bonne Espérance, which I visited, as well as Salmon Bay. I give below a list of the fishing vessels I boarded at those two places:—

## SALMON BAY HARBOR, 15TH JULY.

| Name of Schooner.     | Name of Captain.  | From which Port.        | Tonnage. | Number of men. | Number of fishing boats. | Number of capelin seines. | Remarks.    |
|-----------------------|-------------------|-------------------------|----------|----------------|--------------------------|---------------------------|-------------|
| "Native America"..... | Thos. Tobin.....  | Newbury Port, U. S..... | 92       | 16             | 5                        | 1                         | Codfishing. |

|                        |                    |                         | 1459     | 340            | 119                      | 10                     | 6                     | 3930               |

Fishing was poor there and I may say it was about the same all over that part of the coast, so that the fishermen who had been so successful last year at those same places, were beginning to lament on the bad prospects of the season. As for salmon fishing it had been middling till now.

At St. Paul's River, a fisherman of Newfoundland had tried to set a salmon net at the Rapid Champagne, but as soon as Mr. Louis Chevalier, the licensee of the stream, made him understand that this act on his part was illegal and that I would soon appear on the coast to put the law in force, it was raised and taken away.

Having completed my first visit to the principal fishing stations of the north shore of the River and Gulf of St. Lawrence, I felt now very anxious to return to the coast of Gaspé, so as to be there at the arrival of the American schooners equipped for mackerel fishing; therefore, we put under way as soon as the weather would allow us to do so, that is to say, on the 17th in the morning. But once at sea, we found the wind right ahead, and this lasted during the whole voyage, so that we had to beat and sometimes struggle hard against heavy storms; fortunately for us we had a good and fast sailing vessel, and *La Canadienne* showed her fine sailing qualities.

On the 18th, we anchored at the harbour of Tête à la Baleine of Pacachoo for the night. The next day we met, at a short distance from the Island of Meccatina, a whaling schooner of Gaspé, the *Rambler*, Ascah, master. We learned from him that whale fishing had not till then yielded satisfactory results, but that for the last few days there seemed to be very good prospects. Bad weather had acted in a most injurious way, and rendered the labors of the whalers unproductive so far.

On the 22nd, we were at the west point of the Island of Anticosti. I landed in English Bay at the fishing establishment of Messrs. Fruing & Co. I found there a pretty large number of fishermen, and settled in a satisfactory manner several disputes which had arisen between the agents and the fishermen. Cod-fishing had been good. At 5 p. m., we again put under weigh, and on the 24th, at 2.30, a. m., we came to anchor at Great Fox River.

In the morning I boarded two schooners from the United States, just in for mackerel fishing; the *W. S. Baker*, A. B. Pierce, master, 103 tons, and the *Right Bower*, F. Cunningham, master, 50 tons; both of them had fishing licenses for Nova Scotia, signed by the Hon. Charles Tupper; and towards the evening, R. J. Cunningham, master of the American Schooner *Charles Shearer*, of 97 tons, came on board to take a fishing license. He reported that, till then, but a few mackerel had been seen in the River St. Lawrence.

At 11.30, p. m., we left for Gaspé. The next morning, while abreast of Grande Grave, in the Bay of Gaspé, I boarded the American Schooner "*Weather Gage*," Augustin C. Thomas, master; she had a license from Nova Scotia. A few hours afterwards, while still in the Bay of Gaspé, we boarded the American schooner "*Empire State*," 57 tons, Stephen Smith, junr., master, to whom I issued a fishing license, and afterwards followed up our course towards Gaspé Basin, where we arrived at 2.30, p. m. Nothing remarkable had taken place in that port since our last visit; I only found two schooners lying there.

Having left the next day (20th July) at 4 a. m., we first stopped at Point St. Peter, which I visited, as well as Malbay, and at 12.45 p. m., we arrived at Percé. As this post is the headland, at which, generally, the vessels coming from the east part of the Gulf and steering for the west coast of Gaspé make the land, I cruised until the 30th, for the purpose of looking after American fishing schooners; and during those four days we only met the following schooners:—

| Name of Schooner.      | Name of Captain.  | From which Port.       | Tonnage. | Number of men. | Remarks.                                    |
|------------------------|-------------------|------------------------|----------|----------------|---------------------------------------------|
| "Carrie S. Dagle"..... | Chas. Dagle.....  | Gloucester, U. S ..... | 74       | 17             | Mackerel fisherman, took a license from me. |
| "Mystic Tie".....      | Frank Danton..... | Booth Bay, Maine.....  | 39       | 8              | Cod fisherman.                              |
| "Eastern Light".....   | J. R. Howard..... | Gloucester, U.S.....   | 70       | 16             | Mackerel fisherman, took a license from me. |
|                        |                   |                        | 183      | 41             |                                             |

On the 30th, in the afternoon, we made sail for Grand River, where I had to judge a case of contravention to the fisheries act. The defendant in this case was accused of having set a net in the fluvial division of Grand River, and was condemned to a penalty, and had his net forfeited. When the suit was over we perceived outside an English frigate shaping her course towards Percé, and as we thought that this vessel was one of the men-of-war despatched to our coasts for the protection of the fisheries, we made all haste to raise up anchor and make way in the direction she had taken, and the next day we came to anchor at Gaspé Basin. I found there the frigate *Barracouta*, S. O. Bevin, commander; I went on board and at once took with this distinguished officer proper arrangements with regard to the best course to follow to secure an efficient protection of our waters and he promised me all the assistance he was able to afford. The *Barracouta* had just arrived from the Bay Chaleur, where she had not met a single American vessel. The cruising assigned to that vessel by Admiral Hope extended from the east point of Prince Edward's Island, including the whole north coast of this Island, the coast of New Brunswick, from Miramichi to Dalhousie, and the coast of Gaspé, from Restigouche to Cape Rosiers.

I visited, in Gaspé Basin, the following American vessels :—

| Name of Schooner.        | Name of Captain.    | From which Port.      | Tonnage. | Number of men. | Mackerel barrels. | Remarks.                             |
|--------------------------|---------------------|-----------------------|----------|----------------|-------------------|--------------------------------------|
| "W. S. Baker".....       | J. O. Pierce.....   | Gloucester.....       | 109      | 19             |                   | Mackerel fisherman having a license. |
| "C. B. Manning".....     | P. Sinclair.....    | do .....              | 87       | 17             | 25                | do do                                |
| "Massena".....           | G. H. Davis.....    | do .....              | 59       | 13             | 80                | do do                                |
| "Empire State".....      | S. Smith, junr..... | do .....              | 57       | 13             |                   | Already visited.                     |
| "Ellis F. Bartlett"..... | J. Bartlett.....    | do .....              | 57       | 14             |                   | Mackerel fisherman having a license. |
| "Frank Treab".....       | T. R. Clark.....    | Frankford, Maine..... | 109      | 18             | 236               | do do                                |
|                          |                     |                       | 476      | 94             | 341               |                                      |

Adverse winds and a violent storm, which raged from the 2nd to the 3rd, did not allow us to come out of Gaspé Bay before the 4th. On that day the *Barracouta* took us

in tow and brought us as far as Percé, and then she shaped her course towards the Magdalen Islands. While abreast of Seal Cove, I boarded the following schooners :—

| Name of Schooner.    | Name of Captain. | From which Port.  | Tonnage. | No. of men. | Mackerel, barrels. | Codfish, quintals. | Remarks.                                        |
|----------------------|------------------|-------------------|----------|-------------|--------------------|--------------------|-------------------------------------------------|
| "Lady Franklin"..... | E. O. Obson..... | Gloucester .....  | 60       | 14          | 40                 | .....              | Mackerel fisherman having a license.            |
| "Sea Flower".....    | P. Meagher.....  | Douglastown ..... | 35       | 7           | .....              | 80                 | Cod fisherman, on the Banks, with bultow lines. |
|                      |                  |                   | 95       | 21          | 40                 | 80                 |                                                 |

And in the evening, I visited two others lying in the north-east Cove of Percé.

| Name of Schooner.  | Name of Captain. | From which Port.     | Tonnage. | No. of men. | Mackerel, barrels. | Codfish, quintals. | Remarks.                         |
|--------------------|------------------|----------------------|----------|-------------|--------------------|--------------------|----------------------------------|
| "Snow Squall"..... | E. Hodgden.....  | C. Porpoise, Maine.. | 46       | 9           | .....              | 250                | Codfisherman, with bultow lines. |
| "North Star".....  | A. Ebson.....    | Gaspé Bay.....       | 25       | 8           | .....              | 50                 | do                               |
|                    |                  |                      | 71       | 17          | .....              | 300                |                                  |

I continued my cruise until the 8th, in the waters of Percé, Bonaventure Island and Cape Cove, and during that time boarded the following vessels :—

| Name of Schooner.    | Name of Captain.     | From which Port.    | Tonnage. | No. of men. | Mackerel, barrels. | Codfish, quintals. | Remarks.                                     |
|----------------------|----------------------|---------------------|----------|-------------|--------------------|--------------------|----------------------------------------------|
| "Massena".....       | G. H. Davis.....     | Gloucester .....    | 59       | 13          | 80                 | .....              | Already visited.                             |
| "Empire State".....  | S. Smith, junr.....  | do .....            | 57       | 13          | 30                 | .....              | do                                           |
| "Lady Franklin"..... | E. O. Obson.....     | do .....            | 60       | 14          | 80                 | .....              | do                                           |
| "Juliet".....        | Thos. H. Phillips... | Newburyport, U. S.. | 45       | 11          | 90                 | .....              | Mackerel fisherman— took a license from me.  |
| "C. B. Manning"..... | P. Sinclair.....     | Gloucester .....    | 85       | 17          | 6                  | .....              | Already visited.                             |
| "Live Yankee".....   | G. C. Johnson.....   | do .....            | 56       | 15          | 100                | .....              | Having a license.                            |
| "Mazepa".....        | H. Clark.....        | Port Haven, Maine.  | 66       | 13          | 25                 | .....              | Having no license, fishes only on the banks. |
|                      |                      |                     | 428      | 96          | 470                | .....              |                                              |

I was informed by the masters of those schooners that the main body of American

fishing vessels, equipped for mackerel fishing, was to be found at that time, at Magdalen Islands, and in the neighborhood of that group of isles, and also on the coast of Prince Edward Island. They reckoned that there might be from 20 to 30 American schooners engaged at mackerel fishing on the Orphan Bank.

On the 8th, at 4.15 A.M., we left Percé, and taking advantage of a fine breeze from the north-east, were able to reach the Magdalen Islands on the same day, where we came to anchor at 8 P.M. We met during the day, 19 American schooners engaged mackerel fishing on Orphan Bank.

On the 19th, in the morning, I visited the vessels at anchor around us, and their names follow:—

## MOULIN (AMHERST ISLAND), 9TH AUGUST.

| Name of Schooner.      | Name of Captain.   | From which Port.                | Tonnage. | Number of men. | Codfish, quintals. | Mackerel, barrels. | Having a license. | Having no license. | No. of the license. | Licenses.<br>By whom and when given.   |

|                          |                      |                     | 1394     | 333            | .....              | 1835               | 16                | 7                  | .....               |                                        |

It will be seen that out of this number of schooners, only 9 had no fishing licenses, but two of them took licenses from me, and the masters of the remaining five schooners told me that they had not fished at all until now in British waters, except in those of the Magdalen Islands, where American fishermen have a right to fish, and as their voyages were nearly completed, they did not think it worth while to take out licenses now; but that on their return in the Gulf, for a second voyage, they would probably take licenses, when passing through the Gut of Canso.

On the 10th, I went to Havre aux Maisons, and found only a few schooners belonging to the Island. The fishermen of that place, lately returned, had not met with the expected good luck on the north shore, and their schooners did not reckon more than from 100 to 200 quintals of codfish each. Several of them were now engaged codfishing on the banks. In the afternoon, we went round Amherst Island, and came to anchor at l'Anse à la Cabane. Towards the evening, the weather got very bad. By and by we observed, a great number of American schooners, arriving from all parts, and coming to shelter themselves under the lee of that part of Amherst Island, and before night we could count 160 of them around us. I should have liked to board them all, but I had no time to do so, and when darkness came I had visited the following:—

## ANSE À LA CABANE, 10TH AUGUST.

On the next morning all these schooners, except three, went away mackerel fishing on different parts of the coast. Having cruised for some hours to the westward of that island, we came back and anchored at the Basin (Amherst Island), and I went by land to the harbor, where I collected the following information:—

The spring herring fishery, as well as that of mackerel, had been excellent in Pleasant Bay, while that of codfish had been middling until then. Several depredations had been committed on the coasts, and American fishermen were suspected of the misdeed, but the necessary indications by which we could trace the guilty parties were wanting. A pretty considerable robbery had been committed at Amherst the week before our arrival, during a dark night, and the crew of an American schooner, laying at anchor that night in the vicinity, but which had at daybreak gone away to sea, were accused, and people were busy making searches and taking information, to find out if, in this case, the suspicions would be confirmed,

An American frigate, *Winooski*, commander Cooper, came, in the month of July, to make a visit at the Magdalen Islands; she laid at anchor for about a fortnight in Pleasant Bay, and from there proceeded to Pictou.

The frigate *Barracouta* having left Percé, as before mentioned, entered Pleasant Bay on the 5th, and remained at anchor, inside of Entry Island, for seven or eight hours; and after her officers had boarded a fleet of American fishing vessels which were laying there at the same time, she left for Port Hood, on Cape Breton Island.

On the 12th, in the morning, we went to cruise towards the east point of the Islands, and saw part of the fleet of schooners we had met the day before at Anse à la Cabane, but they were all too far off to allow me to go on board. In the evening, a dead calm obliged us to anchor near Wolf Island.

On the next day, the 13th, everything looking very quiet at Magdalen Islands, and my presence being besides required on the coast of Gaspé, I took advantage of a favorable breeze to proceed thither, and on the 14th, in the evening, we anchored at Percé. We met, during our passage, but one American fishing schooner, the *Ella F. Bartlett*, which I had already visited. At Percé and in the neighboring posts I could not see a single American fishing vessel.

On the 15th, we went to Gaspé Basin, after touching at Point St. Peter. There was not a single American fishing vessel on that part of the coast of Gaspé, nor in Bay Chaleur. I came back to Percé after having called at Douglstown and at Anse Brillante, where I was required to judge a case of trespass on private property.

On the 18th, I sat at Court to hear complaints against two fishermen accused of having refused to fulfil their engagements as fishermen. One of the defendants was condemned to \$5 penalty, and the other to \$20, and the latter, not having paid immediately, was sent to gaol for one month.

On the 19th, not having a single vessel in sight, I gave the order to start for a cruise in the Gulf of St. Lawrence. In the evening, a dead calm obliged us to anchor at Point St. Peter, and the next day an easterly wind sprang up which soon changed into a gale, and we took such an advantage of it, that at midnight we were abreast of Ste. Anne des Monts:

On the 21st, we stopped at Grand Mechins, where there are two fishing establishments. In the evening we visited the Grand Capucins, where Messrs. Saucier and Pelletier have a cod-fishing establishment, employing 26 boats.

On the 22nd we were enabled to reach Rimouski, with a fine land breeze.

I remained two days at that place, for the purpose of taking detailed informations on the brush fisheries of that and neighboring parishes; and I have had the honor to address a special report on this matter, in answer to your letter of the 2nd July. The herring and sardine fisheries had been middling at Rimouski, and in the parishes of St. Luce, Ste. Flavie, and Great and Little Métis.

On the 25th we left Rimouski to go down the river.

On the same day I visited the Great and Little Métis; on the 26th, the Great and Little Matane; on the 27th, the Cape de Chatte and Ste. Anne des Monts; on the 28th, Marsouin, River Claude and the Bay of Montlouis; on the 29th, Magdalen River and Grande Vallée; and, in the afternoon, the wind having shifted to the eastward, we shaped our course for Seven Islands.

In all the posts I had just visited on that part of the south shore of the River St. Lawrence, cod-fishery had been, in general, below an average, especially between Cape de Chatte and Little and Great Matane. At Grande Vallée it had been better than anywhere else. Bait, in the shape of herring and squid, had been everywhere sufficiently abundant. As for mackerel, although there might have been a certain quantity at some places, still it would not take the hook, and this explains the fact of few fishing vessels having been seen this year in those parts. Not more than six had been seen at all, and only four at a time; and, from what I have learned, they must have had licenses. There had been no complaints against any of them. In general, I had occasion to observe that order was prevailing in the establishments I visited, on an extent of coast of 125 miles. Nevertheless, I had to settle a good many difficulties and quarrels among the fishermen, about the limits of their beach lots, and had a fisherman of River Claude put under bail to keep the peace.

On the 31st, at 1.30 p.m., we came to Trinity Bay. I immediately met Mr. Comeau and learned from that overseer that everything was going on satisfactorily in his division. Fly-fishing for salmon had been excellent in Godbout River, but cod-fishing, on the contrary, had hardly yielded anything until then. Before leaving Trinity, it came to my hearing that a Mr. Savard had said that the lessees of Godbout River speared salmon in that stream. I gave cognizance of this report to Mr. Comeau, and ordered him to see whether it was founded or not. If so, he was to prosecute the party having rendered himself guilty of such a violation of the law.

On the 1st of September, we came to Seven Islands, and having visited this place, which is now of very little consequence, left for Moisie River. There were but a few fishermen at the last named place, and none at the former. Codfishing was bad, salmon fishing, on the contrary, was good. Mr. Luc Simard, overseer of that division, had not heard of the slightest violation of the law. I have already had the honor to transmit to you a special report on the quantity of salmon taken with the spear by the Indians, in the upper extremity of that stream, and also of the other rivers of the north shore.

On the 2nd I visited the fishing posts of St. John's River and Long Point, and towards the evening, we came to Mingan.

On the 3rd, in the morning, I went back to Long Point, where I had several disputes to settle among the fishermen of that place. Mr. Beaulieu, the overseer of the St. John's Division, came with me as far as Mingan, and reported that everything was right in his division, except, however, a supposed case of violation of the Fisheries Act, in the Bay of Magpie, by people who were thought to have captured salmon while seining for other fish. Mr. Beaulieu was proceeding there at once to enquire into the matter.

In the afternoon, we left Long Point. I should have liked to return to St. John's River, where I had several cases to decide, but the weather was so threatening, and the fog soon became so thick that we had to keep away from the coast. I must here remark that, until then, no American schooners had been seen on the north shore, from Godbout to Mingan. The next day, the 4th, I landed at Grand Etang, and visited the fishing establishments there. In the afternoon I went to Pointe Sèche, where I had a dispute to settle between two fishermen, and we left in the evening for Percé, where we arrived on the 5th in the morning. Codfishing on that part of the south coast of the River St. Lawrence from Pointe Sèche to Cape Desrosiers, was very poor. Mackerel had appeared only in small quantity, and few schooners had been seen during the season.

At Percé, fall codfishing had begun under unfavorable prospects; the bad weather especially hindered the fishermen from following their occupations. Bait was also rather scarce. There were no American vessels at Percé, nor in the neighborhood, and none had been seen there for several weeks. In the afternoon I sat at Court with other Magistrates of the place, in a case of violation of the Act regulating the sale of spirituous liquors. The hearing of the case, on motion of the defence, was postponed till the 8th.

In the evening, we left for Paspébiac, where we arrived the next day, the 6th, at 4 p. m. I found eight vessels in the roadstead, engaged in taking dry codfish arriving from the different fishing establishments of our coasts. The fishing was middling at Paspébiac, and good enough at Bonaventure. No American schooners had been seen in Bay Chaleur since our last visit, and everything was quiet.

On the 7th we left Paspébiac for another cruise. We visited Port Daniel on our passage, and on the next day arrived at Percé. The weather had been bad for some time on the coast, and the fishermen had hardly had time to get to the fishing grounds. The fishing was very much injured in consequence, and but a small quantity of fish had been taken since the 15th of August. In the afternoon I sat anew, in the case of prosecution of the Revenue Inspector, John Eden, Esquire, against Mr. George Brown, and there was another postponement of the case until the 12th of the month; and about 4 o'clock the weather became so bad that we were obliged to slip our chain cable and run before the wind at Gaspé Basin, where we anchored at 7.20 p. m. We remained there until the 13th, engaged in collecting statistics on the fisheries, repairing and painting the vessel. At the last-named date I left for Percé by the "*Lady Head*," so as to be in time to sit in Mr. John Eden's case. Mr. George Brown appeared before me and two other magistrates; and having confessed judgment, was condemned to \$50 penalty, and costs which amounted to \$12. During my stay at Percé nothing remarkable took place; on the 18th, at 12 p. m., we set sail for the Magdalen Islands, and the next day, at 9 a. m., we came to anchor at Bryon Island. I visited the Island in order to see if foreign fishermen had committed any depredations and also to take in fresh provisions and vegetables. Towards the evening we came to Grosse-Isle.

On the 20th I visited the establishments of that Island, of Cape North-East, Old Harry, and Grand Entry. My object in going to all those places was to take more correct information on the position and value of the lands belonging to the Clergy Reserves, and also to dispose of them by sale, as you had instructed me to do; and on that day I sold 15 lots to different persons of the Islands.

On the 21st, in the evening, we came to Havre aux Maisons. While there I sold 12 more lots of the Clergy Reserves. In the afternoon we came to anchor at Amherst Harbour.

On the 22nd I visited five fishing schooners, and I give their names below.

AMHERST, 22ND SEPTEMBER.

The schooner *Arcola* was on her second trip. Three hundred barrels of mackerel, the produce of her first voyage, had been brought to Gloucester, and sold at \$19, \$18, and \$13 per barrel, according to quality. According to the reports of fishermen, there were still a great many American fishing vessels in the waters of Magdalen Islands, and I thought proper to cruise there for some time. During the forenoon, we had the wind from the south-west, but in the afternoon we were suddenly assailed by a violent gale from the north-west, accompanied by a pelting rain, which obliged us, as well as other vessels laying at anchor, close to us, to run for shelter under Cap aux Meules, and that storm was the same which raged at the same hour and committed so much damage in the roadstead of St. Peter and on the coast of Newfoundland. Fortunately for us, it was not so severe on our coast, and it passed away without any accident.

On the 24th I visited Etang du Nord, and did not find a single American vessel there. On the next day a violent south-west wind obliged us to run under Grosse Isle, and towards the evening the following schooners came and joined us there. I visited them all on the 26th, although it was blowing a heavy gale of wind at the time, and the sea was heavy.

GROSSE ILE, 26TH SEPTEMBER.

On the 1st of October, we returned to Cap aux Meules, to take on board a supply of

fresh water, and in the evening we came to anchor at the Moulin, where I boarded the following schooners, the names of which are below:—

## MOULIN (AMHERST ISLAND), 1ST OCTOBER 1866.

| Name of Schooner.    | Name of Captain.    | From which Port.       | Tonnage. | Number of men. | Mackerel, barrels, 1st voyage. | Mackerel, barrels, 2nd voyage. | No. of the license. | Licenses.<br>By whom and when given. |

By looking over this list, it will be seen that a good number of American schooners were still remaining in the waters of the Magdalen Islands, and that some of them had made good fares. But it was a well established fact that mackerel fishing had produced this year less than last year, and those unfavorable results of the season were due to the frequency of bad weather, which had so often interrupted the arduous labors of the fishermen. Nevertheless, taking everything into account, the produce of that fishing, carried on by American fishermen in the Gulf of St. Lawrence, must be considered of great importance, and its value estimated at from 3 to 4 millions of dollars.

During this cruise at the Magdalen Islands, several persons spoke to me of depredations committed on the coasts of that isolated group. On some parts men and women had been insulted, even in their own houses, and one day, while I was at Grosse Isle, a very serious affray took place at Amherst Harbour (on shore), among American fishermen, of whom a great number got intoxicated with liquor procured from merchants of the place, and a battle had been the result of it, during which, several pistol shots were fired, to the great dismay of peaceable inhabitants of that locality who had hardly dared coming out of their houses on that day, and this accounts for the latter having received no injury. My principal object, in cruising for such a long time at the Magdalen Islands, was to try and find the authors of those depredatory acts, and also to try to stop, by my presence, the renewal of such disorderly scenes. There is no doubt that a great number of fishermen, English as well as American, are very honest, and very peaceable, and when they go ashore, know how to act in a decent and quite way; but there are also, among that large fleet of fishing vessels, a certain number of rowdies and lawless characters, for whom evil-doing seems to be a favorite pleasure, and very often the masters on board whose vessels they are, have no control over them, especially when in a state of intoxication. This wretched class of fishermen requires to be closely and constantly looked after, in order to be able to preserve the inhabitants of our coasts, and principally those of the Magdalen Islands, from the insults to which they are so often subjected on their part. During the time of mackerel fishing, a Government vessel could be employed constantly in cruising around the Magdalen Islands, and in following the fleet of fishing schooners, resorting to those ports.

On the 2nd, I took advantage of a fair wind to sail for the north shore of the Gulf, and the next day we came to anchor in the Bay of Kegashca. Fishing had been bad at that place, and but few vessels were there during the season.

In the afternoon, we made sail for Natashquan where we arrived on the 4th.

I would have liked very much to extend this second visit to the fishing posts of the north shore, as far as the extremity of the Province, in the Straits of Belle Isle, but the season was already so far advanced, and as at this time of the year the fishermen residing in those remote parts having almost all gone into their winter houses at the head of bays and inside of rivers where it is impossible to follow them, I thought it would be much better for the service to proceed on my course towards the westward, take on board the different fishery overseers I had stationed at different posts at the beginning of the season, and in adopting this course I would be enabled to arrive on the coast of Gaspé in time to complete the business of my mission, and afterwards proceed to Caraquette to take a load of oysters for Bic, before the cold and bad weather would set in and throw insuperable obstacles in the way of this kind of operation.

I landed at Grand Natashquan River, and having taken on board the overseer of that place went to the harbour of Natashquan. Nothing remarkable had taken place there. The fishermen of the village of Natashquan had not been successful at herring fishing, nor cod-fishing, and it was thought that many of them would not be able to procure their necessary winter provisions without being assisted; the same thing may be said of a large number of the inhabitants of the north coast.

On the 5th, at about two o'clock in the morning, we left Natashquan and having touched at Watshechoo at 8 a.m., for the purpose of taking on board the fishery overseer of that place, we were able to reach Pointe aux Esquimaux before night. We were detained in that excellent harbour until the 9th, partly on account of contrary winds and partly by a case of assault and battery brought before me to decide upon. The complaint lodged in this matter was of so grave a nature that I could not dispose of it in a summary way as a Justice of the Peace, and therefore would have been obliged to send the accused before the Criminal Court at Malbaie; but the new Fisheries Act, in virtue of the 22nd clause, has conferred upon me the powers of a Recorder, and enabled me to judge this affair in a summary way, the accused consenting to it; and this is what I did, with the full consent of the accused, who was assisted in his defence by a Quebec lawyer. The witnesses were heard, the accused was found guilty, and condemned to \$20 penalty and costs, which were immediately paid, so that this case was gone through in the space of one day, and without any expense to the Province, while if it had been brought before the Criminal Court of the District of Saguenay, sitting at Malbaie, a distance of 350 miles from the place where the offence had been committed, as I would have been under the obligation to do if I had not been invested with the powers of a Recorder; the conveyance of the prisoner and the travelling expenses of the witnesses in this case would have entailed heavy expenses and burdened the budget of the Administration of Justice with a sum which cannot be estimated at less than from \$800 to \$1,000. This is, amongst others, one of the savings realized by the service of the protection of the fisheries; at the same time, the administration of Justice on those distant and difficultly accessible coasts has been very much improved, by the expeditious manner in which several offences can now be judged, and the salutary awe with which this summary manner of proceeding impresses those who are often led to crime solely by the hope of impunity.

The schooners of Esquimaux Point had not been more lucky at herring fishing than at the other fisheries, and it was much feared that there would be a great deal of misery in that place.

At last, on the 9th, we sailed very early in the morning. We touched at Mingan shortly before 8 o'clock, to take on board the fishery overseer of that place; and after having stopped for a short time at Long Point, left for the south-west point of Anticosti.

We arrived there at 10.45 a.m. As soon as we were anchored I went ashore to take on board the overseer of that island, and at 3 o'clock we proceeded on our way towards the coast of Gaspé.

At noon we touched at Grande Grave, and M. LeGros, Fruing & Co's agent, gave me the following information regarding the fisheries of that part of the coast of Gaspé. According to his report, cod-fishing had been very far from good in all the neighboring

posts, and distress was beginning to be felt among a certain class of fishermen. Codfish, it is true, had been scarce during part of the season, but still it was owing to bad weather that the products of this fishery had been so little this year.

Having left Grande Grave at about 1 p.m., we directed our course towards Gaspé Basin, when our attention was attracted by signals of distress being made from a schooner brig, apparently following the same route that we were. I at once ordered the boat to be lowered, and went on board the vessel, which proved to be the "*Dandy Jim*," Nazaire Derois, master, from Quebec, which had sprung a leak several days before abreast of Cape Gaspé, and was now trying to make a port and reach a sheltered place. As she was leaking very badly I put four of my men on board, to help at the pumps, and at the same time instructed my coxswain to pilot her in Gaspé Basin, and, this being done, we proceeded on our way.

At 4.30 p.m. we anchored in Gaspé Basin, but the "*Dandy Jim*" did not get in until the next day. There were but few vessels in the port, as will be seen by the following list of vessels, and business did not seem to be very active, owing, in a great measure, to a diminution in the product of the cod-fishing this year. Whale fishing had not been successful. Mr. Joseph Eden, junr., fishery overseer, reported that there had not been a single case of contravention to the Fisheries Act in his division this year, and that the salmon, old and young, were very abundant in all the rivers.

On the 13th, having taken on board H. Kavanagh, Esquire, Inspector of Her Majesty's Customs, we left Gaspé Basin. We touched at Point St. Peter in the afternoon, and in the evening came to anchor at Malbaie. Everything was quiet in those places. The next day we went to Percé, spent the morning there, and in the afternoon set sail for Bay Chaleurs. Fall fishing was bad at Percé, and in the neighborhood, mostly on account of violent storms which since the end of the summer had been of unusual frequency, even for those parts. The fishing boats had often run great risks in going out fishing on the outside banks where codfish had resorted since the beginning of autumn, and we have to regret the loss of two good fishermen being swallowed up by a sea with their boat loaded with the proceeds of their day's work, while returning to Grand River. I caused to be lodged in Percé gaol an Indian, accused of having committed a murderous assault on the person of another Indian of Anse aux Cousins, while waiting for his trial at the next Criminal Court.

On the 15th in the morning, we came to anchor at Nouvelle, in the Bay of Carleton, and having taken wood and vegetables went to Carleton in the evening.

On the next day, after hearing a case of assault and battery, I went to visit Maria and in the evening we reached New Richmond, and having disposed of all the business relating to my service, left for Paspébiac during the night. According to the reports of the fishery overseers there had not been a single case of contravention to the Fisheries Act in the Bay Chaleurs, with the exception, however, of a salmon net having been set, for a few days only, in the upper part of Bonaventure River, and Mr. Dimock, the active and intelligent overseer, in whose division this stream is comprised, was looking after the guilty parties. Salmon fishing had been very good this year on that part of the coast of Gaspé, as will be seen further on, and had yielded a quantity of product much superior to that of preceding years. Seven vessels anchored in the roadstead of Paspébiac. There was perhaps a little less activity than usual in that port, but this was owing to the fact of a less quantity of codfish having been taken than in former years. It was reported that for some time a good deal of codfish were on the bank of Misson, and that the fishing boats of Port Daniel, Pabos and Grand River, as often as they could go, used to bring full boat loads of that fish which being taken at that season of the year is in its greatest beauty. Some fishermen had brought from 10 to 15 drafts in a single day's fishing. But codfish did not appear to come near the shore, and the fishermen had to go outside on the banks and look for it. The weather had been very good and pretty calm, for a few days and it was hoped that this state of things, continuing for some time, would enable the fishermen to reap enough from their daily labour to procure a sufficient quantity of winter provisions.

On the 19th we left Paspébiac, and came in the Harbor of Caraquette. I went there in obedience to your instructions, dated 22nd September, 1866, in order to take on board a certain quantity of oysters, to be carried and deposited in old Bic Harbor, with the view of trying the experiment of forming an oyster bank. In the afternoon, at low water, I caused to be fished, by the inhabitants of the place, fifty-eight barrels of oysters, which were brought on board and put with great care in our hold before night, and on the 21st, at about 2 o'clock in the afternoon, a fair breeze having sprung up, it gave us a chance to go out of Caraquette Harbor, and in the evening, at 10 o'clock, we reached Percé. I stopped there for about an hour, to settle some business, and about midnight we were under sail again. On the next morning we were becalmed abreast of Grand Fox River, and I took advantage of it to land there. I received the worst possible news about the fall fishery on nearly all the south shore. First, codfish had been scarce on the fishing grounds, and then winds from the northward had been unusually prevalent during the fall, and fishing boats could hardly go outside once or twice a week. These causes, acting together, had occasioned a failure of the fall fishery, and as it is the one on which the fishermen principally rely, to procure their winter provisions, great distress was seriously apprehended in that quarter.

At 4.15 p.m., we left Fox River, with a fine westerly breeze, and after having met with head winds and fog, during part of this voyage, came to Trinity Bay on the 24th at 1 p.m. I landed there hoping to see the fishery overseer of this division; but Mr. Alexander Comeau was absent, and I was obliged to go away without having seen him. Towards the evening we left Trinity Bay, and on the next day, the 25th, at about 5 o'clock in the afternoon, we came to anchor under Bic Island, as the wind being from the north-east, it would have been imprudent to go at once in Old Bic Harbor. But on the 20th, in the morning, favored by wind and weather, we anchored at the mouth of Old Bic, and began at once preparations to deposit our oysters at that place. At the village of Bic, I met Mr. Holwell, Provincial Land Surveyor, whom Mr. Campbell, lessee of the deep water lot of the Bay, where the oysters were to be put, had sent to witness the laying, and to take on shore proper bearings, in order to establish afterwards the place where the oysters had been deposited. All the arrangements being at last completed, the oysters were brought in our boats on the chosen spots and thrown into the water in conditions most favorable to the success of the experiment; as the oysters used to form those artificial banks were very fresh (they being only six days out of their natural element), and so much precaution had been taken, that none of them were wounded or damaged in the slightest degree. This work was over when night came, and to our great delight, for if the weather had been good during the day, it was very threatening towards the evening. We had a little snow during the night, and on the next day, the 27th, at about 9 o'clock in the morning, an easterly breeze having sprung up, we got under weigh for Quebec. During

the day we had a strong north-east gale, accompanied at times by snow squalls, and on the 28th, at 2 a.m., we anchored in the roadstead at Quebec.

### SUMMARY.

In beginning this summary, which for the same reasons already given in my report of 1865, ought not to be very long (for it is unnecessary that I should every year speak of the nature and extent of the mission I fulfil in the Gulf of St. Lawrence, on board of the armed schooner *La Canadienne*), I must observe that if the narration of my last cruise in the Gulf, shows little variety, and if one meets few of these moving scenes, of which it is generally hoped the relation of a sea-voyage ought to be filled, it must not be inferred that the service I perform on our Gulf coasts is of little utility or importance, or that it is not attended with results advantageous to the protection and the development of the fishing industry. On the contrary, it seems that we ought to see, in the regular manner in which this service is generally accomplished, in the tranquillity and order of our maritime coasts, and our seaports of the Gulf, frequented by such a great number of fishing vessels, and in the comparatively small number of contraventions to the Fisheries Act, which took place this year, a proof that the presence of the Government vessel in the waters of the Gulf, has had all the happy results we had a right to expect; especially when we consider that the expedition I command, is performed on a sailing vessel, and that nearly half of the time, we have to contend against head-winds, storms and fogs of such frequent occurrence in those parts.

Our cruise lasted nearly six months, and ended favorably, although the season was generally bad, on account of the violent storms experienced in the spring and beginning of summer.

We have not had to deplore the loss of a single sailor of *La Canadienne*, on the contrary every one came back in good health, and full of vigor, and I am happy to testify here to the highly satisfactory manner in which every one on board acquitted himself of his duty. The damages sustained, were of little consequence, having only to report the loss of our main-boom, and the gaff of our fore and main-sails, which gave way during the storm; but these damages were soon repaired in the seaports where we happened to come after the accidents had taken place.

I will now examine in detail, what have been the advantageous results obtained this year by the service of the protection of the fisheries; and in order to be better understood, will speak of each of the duties attached to my office, under the particular head belonging to it, and in the following order:—

#### 1ST.—OF THE MAINTENANCE OF ORDER AND PEACE ON OUR COASTS.

In looking over my report, it will be seen that on the North Coast of the River and Gulf of St. Lawrence, and on the coast of Gaspé, tranquillity and order have been hardly troubled on that immense extent of coasts, and that our fishermen and those of the other Provinces have been able to devote themselves to their labors with perfect freedom and without fear of being molested by any one. At Magdalen Islands also, public order had not been troubled in the month of May and June, that is during the time of spring herring and mackerel fisheries, although there were at the time a good number of fishing schooners in Amherst Harbor. But as soon as summer mackerel fishing set in, American schooners frequented those parts, and not long after the inhabitants of the isolated coasts of that group, had reason to complain of the depredations and robberies perpetrated on their properties.

And these criminal acts having also taken place during the night, it had been almost impossible to find the guilty parties; all that was known was that they were among the crews of schooners anchored in the vicinity where those depredations were being accomplished. To charge indistinctly all the American fishermen who frequent the Magdalen Islands, to the number of several thousands, with the bad deeds the inhabitants of those Isles have to complain of, would be unjust, for I have had occasion to acknowledge that there are to be found among them a large number of honest seamen of peaceable

dispositions, who, when they land on our coasts, always behave in a decent and polite manner. But besides those, there is, unfortunately, a class of fishermen of bad dispositions for whom evil-doing seems to be the greatest pleasure, and it is particularly when they go ashore in crowds and get intoxicated, that our inhabitants have to fear the most. Then they are no more under any restraint, and if our fishermen were to show a disposition to struggle with them for their personal safety, there would follow serious affrays, in which our people would of course be exposed to the worst abuses, because of being less numerous than the others, and less accustomed to these kinds of fights, and so they are obliged to keep away, and sometimes cannot even go to their work when these disorders take place. Often too, American fishermen will fight among themselves, as happened this year at Amherst, and as already mentioned in my report. It is hardly necessary to say that these disorders and affrays never take place under my eyes, but happen on the contrary when the requirements of my service call me elsewhere. It will be easily understood that having an extent of 1200 miles of coast to visit, I cannot go very often to the Magdalen Islands during the season of navigation, which is so short in the Gulf, nor make long stays at these places. This year, however, I cruised there longer than usual during the mackerel fishing, and in all the places I have been, either for one day, half a day, or for one night, as the wind would allow me to do, every thing was quiet. But I could not be every where at the same time, nor be answerable for what happened in my absence. During the time of summer mackerel fishing, at Magdalen Islands, that is, during August and September and part of October, it would certainly be very necessary that a Government vessel should cruise constantly in those parts, as it is easily understood that the continual presence of a vessel having an armed force on board, amongst those foreign fishermen, would have the effect of putting them on their guard and maintain them at all times within the bounds of duty.

## 2.—PROTECTION OF THE FISHERIES.

The regulations relating to the maritime fisheries have been well observed on the whole extent of our coasts, at least I must believe so, since no complaint to this effect was lodged before me or any other Magistrate I know of.

About the fluvial fisheries I shall have more to say than about the others. There was a new Fishery Act, and it was necessary to put it in force. The first thing to do was to make it known, and for this purpose I sent a great number of copies to the principal fishery out-fitters and merchants of our coasts.

Among the clauses of this Act relating to salmon fishing the most important were: 1st. The clause which increases by fifty yards the distance between each net; 2nd. The other which obliges the fishermen to raise or dispose their nets in such a manner as to leave a free passage to the fish from Saturday evening until Monday morning of each week. The putting in force of the first of these clauses raised a good deal of difficulty and objections on the part of the fishermen, for they had to remove and carry at a further distance a large number of nets which were only at two hundred yards distant from another, as allowed by the old act. However, with the help of the different fishery overseers, and much in consequence of the good will and spirit of concord showed by every one on this occasion, I was enabled to arrange this pretty difficult matter in such a manner as to do no injury to the fishermen, whilst having at the same time the strictest requirements of the law complied with.

The Sunday clause, also gave rise to a good many difficulties; to many fishermen, having a large number of nets in use, it was a very arduous and sometimes impossible task, to raise them every Saturday and replace them again on Monday. But as you were pleased to acquiesce to the demand I made of requiring from the fishermen, that they would only raise certain parts of their nets, and dispose what remained in the water in such a manner as to leave a free passage to the fish, as already stated at the beginning of this report, I succeeded, but not without many obstacles, in putting it into operation. I had not myself to condemn fishermen for any contravention to this clause, preferring, in several cases where fishermen had not raised their nets, in compliance with the law, to be indulgent towards them, convinced as I was that they had acted more through ignorance than otherwise. But the fishery overseers of Natashquan and Anticosti, were compelled in

some cases to apply the law rigorously. They condemned the guilty parties to a penalty and to the forfeiture of their nets, and of the fish captured in violation of the law.

I have continued the system inaugurated in 1859, for the organization of Salmon and Trout fisheries, which consists in renting the fishing stations by means of licenses renewable each season. This year the number of licenses granted for salmon-fishing, either on the sea coasts, or in certain number of rivers, emptying into the Gulf and Lower St. Lawrence, amounts to two hundred and sixty, and the fees on the same to the sum of \$861.75. But this figure does not represent all the revenue derived from the renting of Salmon and Trout fisheries, for our most abundant rivers are leased directly by the Government to different persons, by means of leases of several years duration.

There now remains to speak of the system of licenses adopted towards the American fishermen, with the view of making them participate, in common with our fishermen, to all our maritime fisheries, in exchange for an annual rent payable by each vessel at the rate of half a dollar a ton.

Nova Scotia, New Brunswick and Prince Edward's Island adopted the same system, and one of the conditions of this intercolonial arrangement was, that a license, granted by one of the Provinces, would give to the bearer the right of fishing in the waters of all the other Provinces. My report shows that I have had occasion to give only a few licenses to American fishermen, and the reason of this is obvious; as, when they reached our shores, they were all provided with licenses taken on their way from home, in the ports of Nova Scotia principally, at the Port of Halifax, Port Mulgrave and Port Hood, as is shown by the lists of vessels, boarded by me, either at the Magdalen Islands or on the coast of Gaspé, and published in my report. Those lists will also establish that there were several American schooners at the Magdalen Islands, having no licenses, but I must add that not one of those came to fish in our waters, except at the Magdalen Islands, where it is known that American fishermen, by the Treaty of 1784, and the Convention of 1818, between Great Britain and the United States, have a right to fish on the shores, in common with British subjects.

On the whole, the system of licenses in favor of American fishermen has worked very well, and I may add, that in all my communications with them, I have been well satisfied of their politeness, and their readiness to give me the information required. It is now the proper time to inform you that during the voyages I have made this season in the Gulf; I have visited myself, or have caused to be visited by my officers the following number of vessels:—

|                       |     |
|-----------------------|-----|
| Canadian vessels..... | 125 |
| English “ .....       | 135 |
| American “ .....      | 88  |
| French “ .....        | 12  |

360 vessels.

I had the honor to receive, on the 30th of September, at Gaspé, your letter enclosing a Commission of His Excellency George Dundas, Esquire, Governor of Prince Edward's Island, authorizing me to board the vessels frequenting the coasts and seaports of that island. This Commission had reference to the putting into force of the system of licenses mentioned. Unfortunately, your communication did not reach me before the 30th September, at Gaspé Basin, too late to allow me to acquit myself of the duties imposed by this Commission. But another year, if I am invested with the same authority, I will not fail to do all in my power, to visit during the season, the parts of that island which are most frequented by American schooners (and this I can do without losing much time, or without interfering with my other occupations, either when going from the coast of Gaspé to the Magdalen Islands, or when returning), and in this way justify the confidence I have been honored with by the Government of that Colony.

### 3RD.—ADMINISTRATION OF SUMMARY JUSTICE ON THE COASTS.

It is easily conceivable that with such a large extent of maritime coasts as Canada possesses in the Gulf and Lower St. Lawrence, inhabited by a population or more than 30,000, besides being frequented every year by from 15,000 to 20,000 foreign fishermen my ministry as Justice of the Peace is often required, the more so as there is no other

armed vessel but the one under my command, by which the public officers of those distant localities can be assisted to put the law in force, when there is open resistance on the part of the accused parties. As my sailors are all constables, disciplined and armed, and being always at hand, I am ready at all times to render assistance where it is necessary, and this is why in many cases the law is put into force and works well, when if left to itself it would become a dead letter.

#### GAME LAW.

I am pleased to be able to say that this law has been in general well observed on our coasts, and the great number of broods of young birds seen this year near the shores and among the innumerable islands and isles lining the coast of Labrador, is a sure proof that the several and important species of the duck tribe frequenting those parts have not been much disturbed during the laying time. It did not come to my knowledge that the clauses forbidding the carrying away of eggs of wild fowls, had been violated although this might have taken place during my absence from the coast, but not on a large scale. However, one thing I am certain of is, that no schooner either foreign or Canadian, and engaged in the carrying away of those eggs for the purpose of trade to some parts of Nova Scotia, where they sell at a high price, was seen on any part of our coasts this year. The capture and forfeiture of the schooner *Ocean Bride*, for violation of this clause of the game law, had the good effect of putting a stop to this illegal trade which is so destructive to some species of our wild fowls.

#### CUSTOM REGULATIONS, AND FREE PORT OF GASPÉ.

In my quality of Custom Officer I must not omit the duties connected with that office. In the visits I made on board the fishing schooners found near our shores I have always ascertained that there were no smuggled goods on board, and moreover, I have attended to the vessels trading on the north shore, so that none would land their goods for the purpose of delivering them to their customers on the north shore without first having had their clearance from the Custom House of the Free Port at Gaspé Basin. As soon as the Free Port system was abolished, my duty was to try and stop smuggling on the coasts where it might have been practised; this is what I have done, and I am very glad to be able to say that I did not perceive any intention of violating the Revenue laws on our coasts.

#### SALE OF CROWN LANDS.

Your instructions of the 4th May, 1865, entrusted me with the sale of the Clergy Reserve lands of the Magdalen Islands. I hastened to fulfil this part of my duties, in the best possible way, and I have during this season disposed of 31 lots of land, purchased by some inhabitants residing at the Magdalen Islands, with the exception of one lot which was bought by a trader from Nova Scotia. The sale of those 31 lots, at 20 cents per acre, brought the sum of \$365, and I collected at once one-fifth of the price of sale on all those lots, and besides the whole price of lot No. 59, forming a total sum of \$81.92 which I have received. The remainder of those lots I believe I shall be able to dispose of next year, although they are mostly all composed of a light sand, and consequently unfit for agriculture, but on some of them are found pastures and natural meadows, where the inhabitants may procure their forage for the winter.

Before closing this report I will add that, in my quality of Doctor of Medicine and Surgery, graduated at the McGill University, I have attended, as in former years, the officers and sailors forming the crew of *La Canadienne*, requiring my services during the season, and I have at all times taken care that the crew was with respect to lodging and feeding, in the best hygienic condition, so as to secure health and vigor to the sailors. And every time that sailors and fishermen came on board, to claim the assistance of my profession, I have acted as surgeons of men of war usually do among all civilized nations, attending them and giving them the necessary medicines without charge in any case; and on many occasions I have been able, on those distant coasts, where medical aid is altogether wanting, by surgical operations performed in time, and the giving of medicines which could not have been procured elsewhere, to alleviate many sufferings and cure many poor fishermen who, otherwise, might have lost their whole season's work.

The whole humbly submitted.

P. FOATIN.

# REMARKS

## ON THE

### FISHERIES OF THE SEASON AND THEIR PRODUCTS.

#### FIRST DIVISION.

##### MAGDALEN ISLANDS.

This Division comprises 104 miles of sea coasts. See my Report of 1864, page 29.

##### SEAL HUNTING ON THE ICE.

The port of Amherst fitted out this year 8 schooners for this hunting, and House Harbour 14, in all 22 schooners, manned by 220 men. It is one vessel more than in 1865, and three less than in 1864. The greatest part of those expeditions did not prove successful this year, mostly on account of bad weather and the impossibility for many vessels to penetrate among the fields of ice where the herds of seals were to be found. Consequently these schooners brought in all only 2,434 seals, of a value of \$15,821.

|                                |              |
|--------------------------------|--------------|
| In 1865 the products were..... | 4,366 seals. |
| In 1864 do do .....            | 1,622 “      |

It can thus be seen that the product of this industry varies according to the year. I will add that the inhabitants of Magdalen Islands had not the chance of seeing fields of ice covered with seals, aground near their coasts this year, and that the resources furnished by the welcome visit of those amphibious animals of which they used to kill a great number during the several days the ice so remained fast near the shores, failed completely this year.

##### SPRING HERRING FISHERY.

According to the fishermen's report, this fish has been as abundant as ever at Magdalen Islands this year, and immense quantities might have been taken if there had been enough of men to fish it, and especially profitable markets to send it to. But the number of fishing vessels which visited those islands has been small, and our fishermen only captured a sufficient quantity for their own provisions, and also a few thousand barrels to send to Quebec, Montreal and Halifax.

##### NUMBER OF BARRELS OF HERRING TAKEN.

|                                  |                 |
|----------------------------------|-----------------|
| In 1866, by the inhabitants..... | 3,316 barrels.  |
| do by foreign fishermen.....     | 7,577 “         |
| <b>Total.....</b>                | <b>10,893 “</b> |
| In 1865, by the inhabitants..... | 3,000 barrels.  |
| do by foreign fishermen .....    | 26,640 “        |
| <b>Total. ....</b>               | <b>29,640 “</b> |

|                             |           |                |
|-----------------------------|-----------|----------------|
| In 1864, by the inhabitants | - - - - - | 1,500 barrels. |
| do by foreign fishermen     | - - - - - | 1,500 "        |
| Total                       | - - - - - | <u>3,000</u>   |

**SPRING MACKEREL FISHERY.**

This fishery has been much better than in former years, and if a most violent storm had not interrupted the operations of the fishermen, and been the cause of considerable losses to them, on account of many of their nets being either damaged or lost, it would have yielded very large products.

**QUANTITY OF BARRELS OF MACKEREL TAKEN.**

|                             |           |                |
|-----------------------------|-----------|----------------|
| In 1866, by the inhabitants | - - - - - | 1,050 barrels  |
| " by foreign fishermen      | - - - - - | 274 "          |
|                             |           | <u>1,324</u> " |
| In 1865, by the inhabitants | - - - - - | 500 "          |
| " by foreign fishermen      | - - - - - | 455 "          |
|                             |           | <u>955</u>     |

Only a few schooners came from the Provinces to fish for mackerel this year at the Magdalen Islands, as is apparent by the small quantity of fish taken.

**SUMMER CODFISHING.**

The products of this fishery have exceeded those of last year, although the want of salt in the spring was a cause of the loss of from 500 to 600 quintals of codfish. According to my reports these products are equal to 10,470 quintals of codfish. I include in this amount the quantity of codfish taken by the schooners of Amherst and House Harbors. It amounts to 2,490 quintals for the first, and 2,520 for the last.

**SUMMER MACKEREL FISHERY.**

Our fishermen of Magdalen Islands, have been more successful this year than ever. They now devote themselves to this fishery with more perseverance than heretofore, besides having, within the last few years, acquired a great deal of experience and skill in this kind of trade. The products of this fishery, according to information collected on the spot, are estimated at 1760 barrels, being more than double the proceeds of last year, when they only reached a total of 952 barrels.

**FALL CODFISHERY.**

The products of that fishery have been middling. Bad weather, and very often the want of bait, have alone contributed to bring this result:

|                                               |           |                 |
|-----------------------------------------------|-----------|-----------------|
| The products of this fishery are estimated at | - - - - - | 1,790 quintals. |
| In 1865                                       | - - - - - | 1,840 "         |

**HADDOCK FISHERY.**

I estimate at 370 quintals the quantity of haddock taken at the Magdalen Islands this year, during the season. It is a little less than in former years.

In 1865 there were taken 437 quintals.

**HALIBUT FISHERY.**

Seventy-eight barrels.

**EEL FISHERY.**

Fifteen barrels.

**STICKLEBACK FISHERY.**

Four hundred barrels.

## RECAPITULATION.

*Seal Hunting.*

Seals killed by crews of schooners, 2,434, @ \$5.50..... \$ 13,387 00

*Herring Fishery.*

Herring, 3,316 barrels, @ \$3 per barrel..... 9,948 00

*Spring Mackerel Fishery.*

Spring Mackerel Fishery, 1,050 barrels, @ \$6 per barrel..... 6,300 00

*Summer Cod Fishery.*

Summer Cod Fishery, 10,470 quintals, @ \$4 per quintal..... 41,880 00

*Summer Mackerel Fishery.*

Summer Mackerel, 1,760 barrels, @ \$10 per barrel..... 17,600 00

*Fall Cod Fishery.*

Fall Codfish, 1,790 quintals, @ \$4 per quintal..... 7,160 00

*Haddock Fishery.*

Haddock, 370 quintals, @ \$3 per quintal. .... 1,110 00

*Cods' Tongues and Sounds.*

@ 90cts per gallon..... 756 00

\$105,067 00

*Total value of the products of the different Fisheries of this Division.*

In 1866..... \$105,067 00  
In 1865..... 112,049 00  
In 1864..... 86,590 05

## SECOND DIVISION.

This Division comprises the Counties of Bonaventure, Gaspé, and part of the County of Rimouski. Extent of sea coasts, 354 marine miles.

## HERRING FISHERY.

This fishery has not been quite so good as last year, although it yielded abundant products in the three Counties comprising this Division, as will be shown by the following figures:—

*County of Bonaventure.*

|              |                            |
|--------------|----------------------------|
| In 1866..... | 10,887 barrels of herring. |
| In 1865..... | 19,925 “                   |

*County of Gaspé.*

|              |                           |
|--------------|---------------------------|
| In 1866..... | 4,202 barrels of herring. |
| In 1865..... | 2,875 “                   |

*County of Rimouski.*

|                       |                           |
|-----------------------|---------------------------|
| In 1866.....          | 4,127 barrels of herring. |
| In 1865.....          | 1,998 “                   |
| Total in 1866.....    | 19,216½ “                 |
| Total in 1865.....    | 24,798 “                  |
| Decrease in 1866..... | 5,581½ “                  |

The present year shows a considerable decrease in the products of this fishery in the County of Bonaventure, while on the contrary, there is an increase in the Counties of Gaspé and Rimouski. This is owing to the conditions and circumstances under which this fishery has been carried on, for herring has been generally abundant on those shores during the season. Besides, 2,800 boxes of smoked herring were prepared in the County of Bonaventure.

## SUMMER CODFISHERY.

The following figures will show that this fishery, the most important of our shores has unfortunately been unsuccessful, especially on the south of the River St. Lawrence, in the Bay of Gaspé, and on the neighboring coasts. The causes of this failure have been mentioned in my report, while speaking of my visits to the different localities.

*County of Bonaventure.*

|              |                 |
|--------------|-----------------|
| In 1866..... | 4,713 quintals. |
| In 1865..... | 6,171 “         |

*County of Gaspé.*

|              |                  |
|--------------|------------------|
| In 1866..... | 61,762 quintals. |
| In 1865..... | 72,380 “         |

*County of Rimouski.*

|                       |                 |
|-----------------------|-----------------|
| In 1866.....          | 3,608 quintals. |
| In 1865.....          | 5,418 “         |
| Total in 1866.....    | 70,083 “        |
| Total in 1865.....    | 83,969 “        |
| Decrease in 1866..... | 13,886 “        |

The number of boats, was about equal to that of last year, the whole division being taken together, but if the three counties are examined separately it will be found that there was a great many more boats in the County of Gaspé, about the same number in the County of Bonaventure, and much less in the County of Rimouski.

*Number of fishing boats.*

|                            | 1863.        | 1864.        | 1865.        | 1866.        |

## FALL CODFISHERY.

This fishery is far from having given results as favorable as those of last year; on some parts of the coast of Gaspé only has it been middling, everywhere else it gave but poor products, as the following tables will show :

|                            |                 |
|----------------------------|-----------------|
| County of Bonaventure..... | 4,616 quintals. |
| do Gaspé.....              | 21,591 "        |
| do Rimouski.....           | 1,178 "         |
|                            | <u>27,385</u> " |

## HADDOCK FISHERY.

There has also been a decrease in the products of this fishery.

|               |                 |
|---------------|-----------------|
| In 1865 ..... | 2,949 quintals. |
| In 1866.....  | 1,728 "         |

## HAKE FISHERY.

|              |               |
|--------------|---------------|
| In 1855..... | 372 quintals. |
| In 1866..... | 213 "         |

## HALIBUT FISHERY.

|              |              |
|--------------|--------------|
| In 1865..... | 504 barrels. |
| In 1866..... | 489 "        |

## MACKEREL FISHERY.

This fishery has been very bad this year, as shown by the following figures :

|              |              |
|--------------|--------------|
| In 1865..... | 643 barrels. |
| In 1866..... | 181 "        |

## TUNNY FISHERY.

|              |             |
|--------------|-------------|
| In 1865..... | 12 barrels. |
| In 1866..... | 10 "        |

## WHALE FISHING.

This fishery, on account of bad weather and the scarcity of whales, has been still less successful than last year, and six schooners only instead of seven were fitted out for that trade this year.

|                       |                              |
|-----------------------|------------------------------|
| Products in 1865..... | 14,420 gallons of whale oil. |
| " 1866.....           | 12,330 " "                   |

The following table will show the quantity of oil brought by each whaling schooner :—

WHALING SCHOONERS OF GASPÉ BASIN, AND QUANTITY OF OIL BROUGHT BY EACH IN 1866.

| Name of Schooner.    | Name of Captain.   | Tonnage. | Number of men. | Oil, barrels. | Value.    | Remarks.                                                                                                                 |
|----------------------|--------------------|----------|----------------|---------------|-----------|--------------------------------------------------------------------------------------------------------------------------|
|                      |                    |          |                |               |           |                                                                                                                          |
| "Admiration".....    | Jos. Tripp.....    | 46       | 15             | 134           | 2680 00   | The cause of failure in this fishery for the past few years, is due to the scarcity of whales in the waters of the Gulf. |
| "Lord Douglas.....   | James Baker.....   | 58       | 15             | 115           | 2300 00   |                                                                                                                          |

SARDINE FISHERY.

The catch of this fish, in the brush fisheries, has been larger than for a long time in the County of Rimouski, and it cannot be estimated at less than 2,552 barrels. The greatest part of it was consumed on the spot, and the remainder sent to Quebec and Montreal, in tinnets and barrels. A certain quantity was also used as manure.

EEL FISHERY.

This fishery is carried on to a certain extent in the rivers of the coast of Gaspé. Eels are also taken in brush fisheries.

Products in 1866..... 98 barrels.

SALMON FISHERY.

There is every reason to be satisfied with the results of the salmon fishery in this division especially in the County of Bonaventure.

The following is a comparative statement of the products of this fishery, for each county, in 1865 and 1866.

|                            |              |       |
|----------------------------|--------------|-------|
| County of Bonaventure..... | 1865.        | 1866. |
| " Gaspé.....               | 299 barrels. | 424½  |
| " Rimouski.....            | 217½ "       | 278½  |
|                            | 16½ "        | 14½   |
|                            | 533½ "       | 717½  |

Increase in 1866, 183½ barrels.

By looking at the above statements it will be perceived that the catch of salmon has increased by more than one fourth since last year. But in order to make a fair comparison between this year and the past, one fifth more of the catch should be added as representing the quantity of salmon the fishermen have lost every week of the fishing time, during the thirty-six hours, to say the least, that their fishing gear, in obedience to the clause of the Fisheries Act, have been raised or disposed so as to let the salmon pass without any one being caught in the nets, which would give 860½ barrels of salmon as the estimated catch of this year, if the legislature had not thought advisable to impose new restrictions on the fishermen respecting the manner of capturing salmon. We ought also to take into consideration the decrease in the production of some salmon fishing stations, caused by the removal to places not so advantageously situated for fishing, in view of complying with the 50 yards increased distance between each station, as the law now requires it. I estimate at 30 barrels at least, the quantity of salmon lost in this way by the fishermen.

I will now give the estimated quantity of salmon the rivers of this division would

have yielded, if the fishing had been carried under the old Fisheries Act, that is to say without the restrictions imposed by the new fishery law, with the view of hastening the breeding of salmon, and the restocking of our rivers with this important species of fish.

|                                     |                         |
|-------------------------------------|-------------------------|
| Catch of this year.....             | 717½ barrels of salmon. |
| One fifth more.....                 | 142 “                   |
| Lost by the increased distance..... | 30 “                    |
|                                     | 890½ “                  |

These figures clearly show that our Gaspé rivers, instead of getting exhausted, as some people will have it, are becoming every year more and more abundant in fish owing no doubt to the active supervision kept for the protection of salmon frequenting the said streams. Besides, as I have already stated several times, every one who went up these rivers for the last three or four years has always remarked a large quantity of salmon, young and old, on the spawning grounds, and all concur to say that this number seems to increase in a very visible manner from year to year.

TROUT FISHERY.

This fishery yielded this year, on the sea-shores, in the rivers as well as in the lakes, 57½ barrels.

SMOKED HERRING.

2,800 boxes of herring have been smoked during this year in the Bay Chaleurs. It is a great deal more than in 1865.

TONGUES AND SOUNDS.

|                       |              |
|-----------------------|--------------|
| Products in 1864..... | 318 barrels. |
| “ 1866.....           | 200½ “       |

FISH USED AS MANURE.

*Capelin.*

This little fish, one of the best baits for codfishing, has been very abundant this year, on the coast of Gaspé, and according to the returns of the overseers, as many as 8,802 barrels have been used for manure on the coasts extending from New Richmond to Pabos.

*Herring.*

It is reckoned that 2,000 barrels have been employed this year on the land as fertilizer.

*Plaice.*

Twelve hundred barrels of this fish were seined and brought ashore for the purpose of being used as manure, principally at Carleton and Maria.

*Smelt.*

Besides the quantity sometimes taken, and that employed as bait for codfish, it is estimated that 1,000 barrels of smelt has been used as manure this year.

| 1864.....               | 2080 "     |

## SEAL HUNTING ON THE ICE.

Twenty schooners were this year, fitted out for this kind of hunting on the north shore of the Gulf of St. Lawrence, as follows :

|                         |               |
|-------------------------|---------------|
| At Esquimaux Point..... | 14 schooners. |
| At Natashquan.....      | 3 "           |
| Kegashca.....           | 3 "           |

It is one vessel more than last year, but the returns were much less than in past years. This hunting might be said to have been nearly a total failure, for what are 2,792 seals to be divided among 20 schooners, manned by 200 men. It hardly pays the expenses of those expeditions, and no profit remains to the men. This failure is to be ascribed to bad weather, intense cold and strong gales felt in the month of April, at the time when the sealers were at the height of their labors, rather than to anything else; for the seals were reported numerous enough on the floating ice. Thwarted by head winds and currents, and being kept sometimes whole weeks among fields of ice which after closing on them, formed into a solid mass, they were unable to reach the places where the seals lay in numerous herds. I must, nevertheless, say that six schooners belonging to Esquimaux Point, were more fortunate than the others, and brought back from 200 to 300 seals each

---

---

 PRODUCTS OF THIS HUNTING.

|               |        |
|---------------|--------|
| In 1866 ..... | 2,782  |
| " 1865 .....  | 4,077  |
| " 1864 .....  | 5,154  |
| " 1862 .....  | 13,195 |

At several places on the North Coast, fields of ice came near the shore and grounded, during the month of April, the fishermen took advantage of this fine opportunity to go seal hunting, and succeeded in killing 510 of these amphibious animals, of the value of \$2,040. To the above figures must be added the number of seals entered in the statement annexed to this report.

|                                                                                      |              |
|--------------------------------------------------------------------------------------|--------------|

|                                                                                      | 2,146 seals. |

## SUMMER COD FISHERY.

This fishery is far from having been successful this year on the north shore. It failed principally at Moisie, in the neighborhood of River St. John, at Natashquan, and in most of the fishing posts between this last named place and L'Anse aux Blanc Sablons. I must, however, except Ile à Bois and several neighboring posts, where codfish was abundant enough towards the middle of summer. My report explains the causes which contributed to bring those disastrous results to a great many fishermen; but, above all, the frequency of bad weather during last season, threw the greatest obstacles in the way of the success of this fishery, the products of which are only 22,439 quintals for 19 schooners, and 773 fishing boats.

## MACKEREL FISHERY.

Sixty-five barrels.

## FALL COD FISHERY.

The proceeds of this fishery are indeed very short. I might add that it has almost been a total failure, for it yielded only 971 quintals of codfish, and most of it was taken about Ile à Bois. Only a small number of fishing boats were engaged in this fishing on the north shore. This circumstance coupled with the scarcity of fish, explains the great decrease of the proceeds of this fishery when compared with those of last year, which amounted to 6,512 quintals.

## HALIBUT FISHERY.

This fishery is carried on at the same time as codfishing, and yielded 218 barrels of Halibut, valued at \$1,090.

## FALL HERRING FISHERY.

Our coasts were visited by only a small number of that excellent fish in the fall, and this was in a great measure the cause of the destitution now prevailing amidst the population inhabiting that part of the coast which lies between Meccatina and Blancs Sablons.

According to my own calculations, I estimate at only 593 barrels the quantity of herring taken on the north shore, within the limits of Canada. It is a mere trifle for such an extent of coasts. To the above amount must be added 1,646 barrels of herring, captured by the schooners of Esquimaux Point, Natashquan and Kegashca, on the Newfoundland shore, and on the Coast of Labrador, outside of the Province of Canada, and also 1,600 barrels taken by some schooners from Quebec, and the lower parishes in the same parts.

## FALL SEAL FISHERY.

This seal fishery, carried on with nets, in the fall has failed, as will be seen by the following figures:—

|                                   |            |
|-----------------------------------|------------|
| Proceeds in the fall of 1866..... | 178 seals. |
| “ “ 1865.....                     | 1,268 “    |

The bad weather, and intense cold felt during the time of this fishery (in the month of December) is, in a great measure, the cause of the failure of this branch of industry which formerly used to yield very abundant products. It must also be acknowledged that the seals visiting those shores seem to decrease in number for the last few years.

## SALMON FISHERING.

The season just elapsed has not been favorable to salmon fishing in the rivers of this division. However, the salmon were not wanting, on the contrary, it was reported every where that a great number had been seen, as well in the large as in the small streams; but the great freshets which took place in the spring, on account of the melting of the snow, the frequent rains of the months of June and July, and the late appearance of the salmon in the rivers of the eastern part of that coast, near the close of the fishing at the end of July, are causes which have influenced, in a most prejudicial way the products of this fishery. If our salmon fishermen had been able to set their nets, and attend to their labors under circumstances as advantageous as in 1863, I really believe that the present year would have been the most profitable one for salmon fishing that we ever had. After adding together the proceeds of all the fishing stations of this division, I find the total amount of barrels of salmon taken in 1866, to be 1,240½.

Adding one-fifth of this total, that is 248 barrels, as the estimated quantity of salmon which would have been caught from the Saturday evening of each week of the fishing time to the next Monday, during which the fisheries were raised, as already explained, at the article salmon of the second division, and putting 120 barrels more for the probable quantity of salmon, the increased distance of 50 yards between the nets caused to be lost to the fishermen, gives the amount of 1,608½ barrels as the estimated product of this fishery, if it had been carried on as last year, that is without being subjected to the restrictive clauses of the new Act, as just explained. Besides, in order to make an equitable comparison between the products of 1866, and those of previous years, it is necessary to add the probable quantity of salmon which would have been caught in the rivers now closed to net fishing, and in which nothing else but fly fishing is allowed.

The following are the names of those rivers on the north shore:—

|                          |            |
|--------------------------|------------|
| River Mistassini .....   | 4 barrels. |
| “ Beesic .....           | 4 “        |
| “ Godbout.....           | 60 “       |
| Bay of Godbout.....      | 20 “       |
| River Trinity.....       | 30 “       |
| “ St. Margaret .....     | 30 “       |
| “ Mingan .....           | 57 “       |
| “ Romaine .....          | 33 “       |
| “ La Corneille .....     | 8 “        |
| “ Great Watsheeshoo..... | 24 “       |

270 “

I must also remark that in St. John's River, there are now six fishing stations less, since 1865, that is to say more than one-third less fishing this year than before that period, and consequently the quantity of salmon taken in that stream ought to be one-third less, (60 barrels of salmon for the River St. John). From an estimate made with the greatest care, I put at 330 barrels the quantity of salmon thus lost, which added to 80 barrels more which the Grand Natashquan ought to yield if properly fished, would give the total amount of 2,018½ barrels as the product of the salmon fisheries of the north shore,

supposing that this fishing had been carried on this year in the same place, in the same number of stations, and without more restrictions than for four or five years past. This will show that salmon has not decreased on the north shore, and that if there is a less quantity taken than formerly it is owing to the restrictions imposed on the modes of fishing, with the very praiseworthy intent of re-stocking with salmon the numerous streams of that distant country and to render them, if possible, as productive as they were in the first years of the settlement of Canada. Before concluding, I will remark that there are this year in use a few stations and a good many thousand fathoms of salmon nets less than last year, as may be seen by looking over the tables accompanying this Report.

TROUT FISHERY.

REMARKS.

Mackerel.—This fish scarcely appeared on the coast of Labrador this year, and only a few barrels were taken.

Seals.—Very few seals were caught in the nets—the ice having destroyed a good many of them, and thus preventing the fishermen from going on with their work.

COUNTY OF SAGUENAY.—Continued.

## APPENDIX No. 28.

## REPORT OF THE DEPUTY SUPERINTENDENT OF INDIAN AFFAIRS.

INDIAN OFFICE,  
Ottawa, 9th April, 1867.

SIR,—I submit herewith, for insertion in the Annual Report of the Commissioner of Crown Lands, Tabular Statements, marked from A to I, inclusive, exhibiting the operations, during the year 1866, of this office and of the Superintendencies connected with it, in relation to receipts and expenditure, the establishments existing for the education of the Indians in their various settlements, and likewise the population, so far as ascertained and shewn in official returns, made up in the various localities or from sources to be relied upon. It is gratifying to perceive from the population Returns, that the endeavours which have been employed for the repression of intemperance, under the provisions of Acts of the Legislature (which, although not sufficiently comprehensive, are highly beneficial), that a decrease of the Indian race is not taking place, but on the contrary, their numbers are decidedly on the advance. This is also in part to be attributed to the fact that by adopting more and more the habits of civilized life, and following, though in many cases indifferently, the occupation of agriculturists, and dwelling in comfortable habitations with the accessories of suitable clothing and nutritious food, and joined to this the providing them with proper medical attendance, the instances of mortality have been diminished, and serious cases of disease probably become less frequent.

It is satisfactory to perceive that an extended desire for education is prevailing, leading to the establishment of additional schools; and although the attendance is at times not what could be desired, it is not doubted that a gradual improvement is going on.

The opening for sale the surrounding lands in the great Manitoulin Islands has resulted in the disposal of a number of lots. And it is understood that several actual settlers have gone upon the Island. The opening of a line of road from Little Current to Sheguiandah Bay, and from thence to Manitowaning, and with a continuation to Providence Bay on the south coast of the Island, will afford the requisite facilities to intending settlers to examine the lands and become occupants under favorable circumstances. The section between Little Current and Sheguiandah is under contract with Mr. T. Herrick, and considerable progress has been made with the work. It is contemplated by one of the actual settlers to erect a mill on the stream emptying into Sheguiandah Bay. This of course will promote settlement.

The sales of lands in the Saugeen Peninsula to actual settlers have been, during some months past, highly satisfactory, and it is expected that during the year 1867 important additional sales will be made there, and also in the vicinity of the Sault Ste. Marie, where large quantities of Indian land are now open for sale.

It will be observed that the amounts received in payment of land during the year 1866, shew an improvement on those for the year 1865.

I have the honor to be, Sir,  
Your obedient servant,  
WM. SPRAGGE,  
D. S. I. A.

The Honorable Alexander Campbell,  
Commissioner of Crown Lands.

APPENDIX

WM. SPRAGGE,  
D. S. I. A.

INDIAN OFFICE, DEPARTMENT OF CROWN LANDS,  
Ottawa, 16th January, 1866.

## APPENDIX No. 29.

## EXTRACTS FROM UPPER CANADA REPORTS OF SURVEY.

## ASSIGINACK.

Is situated on the Manitoulin Island.

It is bounded on the north by Lake Manitou and the township of Sheguiandah, on the east by Manitowaning Bay and the Indian Reserve, on the south by South Bay, and on the west by the townships of Tehkummah and Sandfield.

Provincial Land Surveyor John Grant subdivided part of this township in 1864. The surveyed portion contains an area of 22,081 acres, including water and roads.

The following is an extract from Mr. Grant's report of survey:—

“The portion not surveyed was omitted, on account of its total unfitness for cultivation; it being, as a general thing, rough, broken, and rocky surface, covered with rolling boulders, interspersed with swamps and a few hardwood ridges; the eastern portion, being the larger part,—swamp, with cedar, balsam, tamarac, spruce and pine.

“On the balance, up to portion surveyed on 11th concession, small ridges of hardwood land, and the balance rock and swamp. From the 12th concession to the south-west angle of township, most of the land has been burnt over, little soil being left—it being left nearly a bare surface, covered with stone, except some swamp on the extreme south-west angle, and some high ridges of hardwood on South Bay. The portion between the 1st concession and 11, 12, 13 and 14 is high and broken limestone rock, interspersed with mixed timber, principally cedar, balsam, birch and maple.

“There is not much dissimilarity in the soil; the eastern part, up to the west side of Sucker lake, is a clay loam, incumbent on a limestone rock, ranging from one to eighteen inches deep; from thence, on the 1st and 2nd concessions, it is a clay loam, of a lighter quality, approaching to a sand loam on the extreme west, considerably mixed up with stone, and many rolling boulders on the surface. That portion of the township on the south side of Manitou lake, extending to the 11th concession and west boundary, is of a light clay loam, considerably broken up with ridges of rock, and large quantities of rolling stone mixed with it.

“The parts of concession (from 11 to 14) surveyed, is very much broken up with rock, and with very little soil—a large portion entirely bare rock. The timber from Manitowaning west of Sucker lake, is principally maple, ironwood, basswood, and elm of light growth.

“The balance of the survey is mixed timber, composed of balsam, tamarac, poplar, hemlock, birch and maple, and a few scattered pine, except the portion surveyed on south side of concession 1, the greatest part of which is burnt, only a few ridges of maple, beech, and ironwood left.

“The only waters on the survey, except the lake, are a few streams of little importance, none of sufficient volume for mill purposes.

“The geological feature of the survey is broken with ridges of limestone rock, ascending from South Bay in bold and abrupt ascents, and from Manitowaning until it attains the maximum height on lots 18 and 19 in the 1st and 11th concessions, apparently 300 feet high. The contour from thence to Manitou lake is broken and irregular, with rapid and precipitous descents. There is also a considerable fall from the lots above-mentioned, to the side road 8 and 9 on the 1st and 11th concessions, where a limestone cliff rises nearly perpendicular. From thence to the west boundary does not differ much from a level in its main feature, but is much broken up with limestone rock.

“On the extreme northern boundary there are some small ridges, and less frequent.

“There are no minerals that I could discover, and little shale and some metamorphic rocks.

“The season of the year was greatly to my disadvantage in the prosecution of such researches, as, during most part of the time of the survey, several feet of snow was on the ground,

"The concession and side roads are so much broken up, that it is not practicable to open them as roads capable of travel.

"There are some portions of the survey which offer fair inducements for settlement, probably one-third of the survey, the greatest portion being between Manitowaning and Sucker lake, and around said lake, as far west as 19 on concessions 1 and 2, and the balance in strips between the several ridges.

"There are about 400 acres of clearing, in scattered patches, some of which are pretty well cleared up, and others only partially cleared.

"It is the village situated on the eastern portion of the survey, at the head of Manitowaning Bay. It is composed of about 18 residences, four frame dwellings and the rest log houses; population probably about 120. There is a good frame Episcopalian church, mission house and school, and a good frame store-house on the beach."

#### BIDWELL

Is situated on the Manitoulin Island.

It is bounded on the north by the township of Howland, on the east by the township of Sheguiandah, on the south by the waters of Lake Manitou and unsurveyed land, and on the west by the township of Billings.

This township was surveyed in 1846 by Provincial Land Surveyor Joseph Hobson, and contains an area of 36, 816 acres, including roads and water.

The following is an extract from Mr. Hobson's report of survey:—

"I regret to say that I cannot speak very favorably of this township. By far the greater part of it consists of swamps, and poor, sandy and very rocky tracts of land, covered with a dense growth of timber, principally evergreen. In many places it is broken by high and very steep hills and out-crops of rock, the positions of which are represented on the accompanying plan.

"The country to the north and west of Pine Lake is rough and hilly, although in some places it supports a very fair growth of hardwood; but the soil is poor and stony, and far from being well adapted for agricultural purposes. To the south of Pine lake the land rises in terraces and the hills recede some distance from the shore, while upon the north they approach close to the water's edge. There is a small piece of most excellent farming land, timbered nearly altogether with large maple to the east of the lake. The south-eastern part of the township is not nearly so hilly as the north-eastern portion, and contains a number of small pieces of hardwood. There is likewise a large tract of burnt land, the position and approximate extent of which may be seen by reference to the timber map. We also found a good deal of burned land at the south-west corner of the township. Portions of lots Nos. 26 and 27 in concession 6, of lots Nos. 29 and 30 in concessions 4, 5, 6 and 7, are timbered with an excellent growth of hardwood, principally maple. The last mentioned tract is a singularly beautiful undulating plateau, about 300 feet above Lake Huron, and about one hundred and fifty feet above those parts of the township to the north and east of it. It slopes towards the south, which is the only side from which it is possible to make a road to it. There are also small groves of maple, used by the Indians as sugar bushes, on lot No. 30 of the 3rd concession, and on lots Nos. 26, 27 and 28, concession 11. In addition to the above-mentioned parcels of hardwood there are some others of small extent to the north and west of Lake Manitou; all the rest is, I think I may safely assert, nearly, if not altogether, unfit for farming.

"Some parts of the north and east shores of Lake Manitou, from the line between Sheguianda and Bidwell to that between concessions 7 and 8, rise to an elevation of from about twenty to forty or fifty feet above water. In these places it is fringed with cedar, at the back of which there is a narrow belt of hardwood, which would cause any one travelling on the lake to suppose that there was a tract of very good hard land extending inland, which is really not the case, as will be learned from the field notes. The wet land comes to the water's edge in some places. The shore of the most northerly part of Lake Manitou is low and swampy. Part of the west shore consists of a perpendicular rock, varying in height from forty to seventy feet.

"As before stated, the greater part of the township is covered by a dense forest of evergreen timber, principally cedar, balsam, spruce, small pine, &c., with an intermixture of birch, poplar and, in some few places, hemlock. Generally speaking the timber is small.

There is none possessing an exchangeable value except a very limited quantity of pine along a portion of the line, between Sheguiandah and Bidwell. The trees are large, straight, and of great height, but every one that we had occasion to clear in cutting out the lines was hollow. They are, however, sound, probably at some distance above the butt.

“There is not enough for local purposes if the country becomes settled; of course the cedar will be capable of economic application, for rails and building purposes, although it cannot be said to possess a money value.

“I may here remark that I did not see a beech tree in any part of the island that I visited.

“Owing to the great depth of snow, I could only ascertain the quality of the soil from the varieties of timber which it supported and from the roots of trees which had been blown down. In no single instance did I discover any clay—always sand and stones. In those parts of the township which I have described as really good, I did not observe any uprooted trees, but the timber was of such a large size and so thrifty in appearance that I have no doubt that the conclusion at which I had arrived in reference to the soil is the correct one.

“The streams are generally very small. The only one upon which there is any probability of a mill site being found, is that which falls into Honora Bay, near the north-west corner of the township. This stream must, in its course, have a fall of not much less than two hundred feet. I think there is a small stream connecting Lake Manitou with Pine lake, but, owing to the almost unprecedented depth of snow, I failed to find the point at which it leaves the former. It must, however, if it exists at all, be a little south of the Portage.

“Lake Manitou, Pine, and Bass lakes, abound with salmon trout, white-fish, herring, bass, &c., &c. There are two small lakes not far from the west boundary of the township. The water of the most northerly one had a very offensive smell; it is more like a flooded marsh than a lake.

“There is no place in this township, in my opinion, suitable for a town plot, nor do I think any is required. Supposing that the township is settled, “Little Current” and Sheguiandah are not too remote for the settlers to visit in the way of business. The former, being upon one of the main lines of travel in Lake Huron, would probably be the best market on the Island, while the excellent water privileges at the latter are enough to make it a good site for a town, and one that would be likely to draw a good deal of business from a township which possessed no water power within its own borders. I have little hesitation in saying that the two above-named places would interfere most seriously with the prosperity of any village in Bidwell.

“It is deeply to be regretted that I have been obliged to give such an unfavorable account of this township. I have stated already that there are some pieces of excellent land, but there are not any of them large enough to form a good settlement. The land may, perhaps, be sold by auction; but I cannot think that any one who has a knowledge of agriculture, will purchase if he has seen the country.

“The formation of the township is limestone.”

#### BILLINGS

Is situated on the Manitoulin Island. It is bounded on the north by the waters of the Georgian Bay, on the east by the township of Bidwell, on the south by the township of Carnarvon, and on the west by the townships of Allan and Campbell.

A portion of this township, embracing an area of 23,321 acres, including water and roads, was surveyed in 1864 by Provincial Land Surveyor Alexander Niven.

The following is an extract from Mr. Niven's report of survey:—

“The part of this township surveyed naturally consists of high table lands on its east and west parts, running northerly along the shore of Lake Huron at an elevation of from 200 to 400 feet above its waters, and descending by precipitous cliffs to a valley several miles in width, occupying its central portion, and extending from Honora Bay to Minde-Moya Lake.

“The soil of this central portion, bounded by the aforesaid cliffs as shewn upon the plan, is in general a sandy loam underlaid with clay, and timbered chiefly with maple, basswood, ironwood, &c. The land and timber around Minde-Moya Lake is of excellent

quality. The sugar made from the fine maple groves around this lake affording the Indians one of the principal means of existence.

"A tract of excellent land occurs on the east boundary, extending from concession 6 to concession 9, and is timbered chiefly with maple, basswood, &c. Lots 1 to 3, concession 1 are also good lots.

With the exception of a few detached pieces, the remainder and by far the greater part of the portion of this township surveyed, is a poor, rocky description, and timbered chiefly with cedar, spruce, balsam, &c.

"A tract of land along the east boundary, extending across concessions 2, 3, 4 and 5, has been completely burnt over by fire, leaving the rock exposed.

"With regard to the timber, I may say that the good land is timbered chiefly with maple, basswood, birch, ironwood, &c. Along the Eastern shore of Honora Bay covering the face of the hill rising from its waters, is to be found some very good red or Norway pine.

"A good deal of white pine is to be found throughout the western portion of this township, this being the principal timber on lots 22 to 27, concessions 4 and 5, as shewn by the timber map. I should think, however, that the supply would not much exceed the demand by the settlers.

"The remainder of the timber is chiefly evergreen, cedar, spruce, balsam, &c., interspersed with maple.

"This township is well watered by lakes occupying about one fifth of the area surveyed, abounding with whitefish, bass and other varieties of fish. Numerous streams are found traversing it in nearly all directions. On the high lands, however, or westerly part, these are very seldom met with.

"This township is strikingly marked by bold promontories and precipitous limestone cliffs descending from the east and west towards the centre and Honora Bay, having a gentle dip to the south, and exhibiting in many places for miles together an exposed face, varying from 20 to 50 feet in height.

"I did not succeed in finding traces of any minerals.

"With regard to the agricultural capabilities of this township, I have to remark that a splendid settlement of about 5,000 acres can be made around Minde-Moya Lake, and extending northerly towards Honora Bay. This tract of land is by far the best that I have seen upon the Island, and would, I think, be settled soon after it comes into market.

"The piece of good land mentioned on the east boundary, taken in connection with an adjoining tract in Bidwell, might make another settlement. Of the 18,000 acres of this township surveyed, I should say that no more than 7,000 acres will make good farming land.

"About 190 acres have been cleared by the Indians at different places between Honora Bay and Minde-Moya Lake, the largest clearing being at Michigawadenong village—the principal crops raised being potatoes, corn and wheat. These with maple sugar, form the principal means of subsistence to the Indians.

"The inhabitants of Michigawadenong are about 150 in number, or about thirty families.

"It will be observed that I have marked upon my plan a reservation for a town plot, containing 695 acres. The eastern portion or that part at present improved is of little importance in an agricultural point of view, the soil being a light sand.

"By reference to the notes it will be seen that quite a village already exists here, consisting of well-built hewed log-houses, including a church with bell, and priest's house, &c., quite a number of these being enclosed by cedar post fences. There is also a mill privilege here on the creek shewn upon the plan.

"Michigawadenong harbour is naturally much exposed, but sufficient protection for vessels could be obtained by a moderate outlay for a pier. At present the water is too shallow to admit of a steamer approaching within 200 feet of the shore."

#### BURLEIGH

Is situated in the county of Peterborough. It is bounded on the north by the townships of Anstruther and Cavendish, on the east by the townships of Methuen and Chandos,

on the south by the township of Dummer and Stoney Lake, and on the west by the township of Harvey.

This township was re-surveyed in 1864 by Provincial Land Surveyor J.W. Fitzgerald, and contains an area of 79,402 acres, including water and roads.

The following is an extract from Mr. Fitzgerald's report of survey:—

"The township forms, I regret to say, an unfavorable exception to those lying to the rear of it, and is not likely to offer much inducement to settlers, the greater portion of it being of so barren and sterile a character as to render it totally unfit for agricultural purposes.

"In the part of the township lying south of the base line, dividing the old from the new surveys, a tract of fair arable land extends from the west boundary to concession No. 8, having an average width of about one mile.

"The Burleigh Road passes through this tract, which is covered with a stout growth of hardwood timber, composed chiefly of beech, maple, basswood and elm. The soil is fertile and of a dark loamy character resembling clay, in places it is shallow while at others it attains considerable depth.

"The rock underlying this area is a fossiliferous limestone in horizontal beds varying from one to three feet in thickness, assuming occasionally, where it crops out, the appearance and character of a coarse description of marble. As no limestone in any abundance occurs in the newly surveyed townships north of this, it will doubtless, as settlement progresses, become exceedingly valuable for building and other purposes. The greater portion of the tract is, I am informed, already patented by the Government to non-residents who are now demanding for it an enormous price, viz: five to six dollars per acre, notwithstanding that it has been almost totally denuded of all the timber on it of any commercial value. This acts as a very serious check to settlement, and interposes a formidable barrier between those who are obliged to settle on lands in the interior and the old settled townships in the front.

"South of this tract and immediately north of Stoney Lake is a narrow bed of granite rock which forms the north shore of this chain of lakes for a considerable distance. The surface is broken and interspersed with swamps and patches of bare rock totally destitute of vegetation. A large proportion of flooded land occurs along the shore of the lake, caused by the dam erected at the foot of Clear Lake, which throws back at least from three to four feet of water.

"Beyond the limestone exposure northwards the granite again appears and continues to the north end of the township. In the neighborhood of Big Cedar Lake, and extending westward to the boundary, an extremely broken and rocky granite tract occurs from sharp irregular ridges entirely destitute of soil and timber. This tract covers an area of about three thousand acres. East of Big Cedar Lake on concessions 6 and 7, the country although considerably broken, is somewhat better, the timber is large and healthy, but has been lumbered on regularly for square timber and saw logs since the year 1857. A few scattered trees of fair white and black oak are met with on this tract.

"Eels Creek flows through this part of the township, and within the limits of its water shed the pine timber, both red and white, is generally of a fair quality. This stream is navigable for saw logs, and square timber is occasionally driven down during the spring freshets.

"East of Eels Creek the country contains very rough and broken land, particularly in the vicinity of Stoney Lake, where it presents a very bleak and desolate appearance. The timber is generally poplar, small white pine and birch, but a few isolated groves of good white pine nevertheless occur in this area, and on the concessions, 9, 10, 11 and 12 good red pine is tolerably abundant.

"In the neighborhood of the boundary line between the townships of Burleigh and Methuen from lot No. 9, old survey, north of Jacks Lake, the red pine is very plentiful, large groves composed exclusively of it occurring in several places.

"The land in this section is of no value for agricultural purposes, the surface being rocky and broken, and the soil poor and unproductive. In this part of the township no lakes occur, and streams and creeks are also few and rarely met with. It is however plentifully interspersed with swamps, chiefly of tamarac, alder, &c. The portion of the

township lying north of the base line and west of concession line 10 and 11 is worthless in an agricultural point of view, and the timber of it of no commercial value.

“ Along the water shed of Deer Bay Creek a number of small lakes occur, the largest of which, Long Lake, is about four miles in length, very deep in places, and varying in width from three to fifteen chains.

“ Its shores are generally high and precipitous, and the country surrounding it barren and sterile in the extreme. Along the borders of the creek, however, occasionally patches of fair white pine are found, but the remainder of the barren tract is scantily covered with a stunted growth of small pine, oak and soft maple, and the surface much broken by bare granite knolls, deep ravines and gorges, interspersed with swamps and beaver ponds.

“ The country through which the Burleigh Road passes, from where it intersects the base line to lot No. 11, concession No. 11, new survey, is broken and unfertile. It has been partially lumbered over, and there still remains a large yield of small white and red pine. North of this the country presents a more favorable appearance, and many of the lots along the road are settled upon and partly cleared.

“ On concessions 11 and 12 there is a good tract of hardwood land extending from lot No. 11 to 14, the soil of which is of a very fair quality, and the timber, of a mixed character, is large and healthy. Upon concessions 14, 15 and 16 also, a piece of good hardwood land occurs. It extends from lot No. 18 to 24, the soil is of good depth and quality, and the surface gently undulating and covered with maple, beech, basswood, birch, hemlock, &c. There are along this section of the Burleigh Road clearings varying from 10 to 25 acres, which have this year produced good crops of fall and spring wheat, barley, oats, potatoes, turnips, &c. Upon lot No. 16, concession 12, a good saw mill has been erected by Mr. James Golborne, and has been for some time in full operation sawing lumber for the settlers.

“ In the north-east part of Burleigh the granite rocks are occasionally interstratified with masses of crystalline limestone which entirely disappears on entering the township of Chandos. In all the small lakes connected with Deer Bay Creek fish is very abundant, particularly in Long Lake, where salmon-trout and bass abound and are caught in large quantities by the settlers.

“ Salmon-trout and bass are also very plentiful in Jacks Lake and in the southern part of the township. Stoney Lake abounds in salmon-trout, bass and maskelonge. The Cedar Lakes too are well supplied with bass.

“ Throughout the township deer are very plentiful; beaver, mink, martin, &c., are much hunted for in the spring and fall.

“ Notwithstanding the unfavorable character of this township for agricultural purposes, the arable proportion of which does not exceed 15 per cent., it is to be deplored that the settlement of the good tracts in it, as well as the fine township lying to the north, receives no encouragement whatever.

“ The Burleigh road, the only avenue at present into this country, was contracted for and commenced four years ago, is still in the most unfinished state, and owing to the gross carelessness and neglect of the Superintendent by not causing the contractor to remove the fallen timber from the bridges and crossways a certain distance, every one of them along the road was, during last summer, destroyed by fire, entailing a serious loss to the Department, causing great inconvenience to the settlers and materially retarding the progress of settlement generally in this section.

“ In conclusion I would beg to suggest as a means of promoting the settlement of the country opened by the Burleigh Road the construction of a branch road from lot No. 7, concession 6, old survey, across the Boshing Narrows into the township of Dummer. This would turn out an inlet of great importance to the people, and would contribute very considerably to increase the settlement and prosperity of the country.

#### CARDWELL

Is situated in the county of Simcoe. It is bounded on the north by unsurveyed territory, on the east by unsurveyed territory, on the south by the township of Watt, and on the west by the township of Humphrey. It was surveyed in 1866, by Provincial Land Surveyor F. A. Baldwin, and contains an area of 50,065 acres.

The following is an extract from Mr. Baldwin's report of survey :—

"The country through which the old Parry Sound road passes being composed of ridges of rock with swales intervening, the soil red sand, and timbered with hemlock and alder. I consider it to be altogether unfit for settlement. The remaining portion of the township with the exception of the thirteenth and fourteenth concessions, from lot number five to lot number thirty five, is fit for agricultural purposes, and especially along the easterly boundary, which is very fine land extending eastward to Vernon River and Lake. Also along the banks of a small stream called by the settlers Rosseau River, and by the Indians Rinuwahbiking, which is from thirty to forty links wide.

"The valley along this stream, up to the ninth concession, is extremely good land, having a heavy clay soil, which is flooded by the creek every spring. This stream is used by the Indians as a canoe route in the spring, when there is plenty of water, but during the summer is abandoned owing to the want of water. It drains the whole of the township of Cardwell, and is principally fed by large swamps, the water is very dark and offensive during the warm weather. The lakes of this township, for this section of country, though few in number, abound with fish; principally salmon-trout, and the woods are well stocked with deer and partridges.

"The fur bearing animals have become nearly extinct. The timber in the township is composed of hardwood and hemlock, with some small pine, the pine not being in sufficient quantity or quality to admit of being retained for lumbering purposes though ample for local requirements.

"Owing to the parties constructing the Parry Sound Road having burnt the brush cut on the line of road, the fire has extended some distance on either side, for about two miles in width, which practice, I think, should at once be stopped, as it is the means of doing an immensity of harm both to the timber and soil, as well as destroying the fur bearing animals.

"I have carefully noted all mill-sites in my field notes; there are several in the township, principally along Rosseau River, having a good supply of water for the greater part of the year.

"The geological features of this part of the country are wholly of the gneissoidal or primary formation, specimens of which I have secured to send to Sir W. Logan.

"I have not noticed any point in the township of Cardwell, which would be suitable for a town plot, owing to the town plot in the township of Humphrey being close to the town-line, and at the head of Lake Rosseau, which is the most suitable place for it."

#### CARLOW

Is situated in the County of Hastings. It is bounded on the north by the township of Bangor, on the east by the township of Raglan, on the south by the township of Mayo, and on the west by the township of Montegale.

It was surveyed in 1866, by Provincial Land Surveyor Charles Fraser Aylesworth, and contains an area of 48,308 acres, including water and roads.

The following is an extract from Mr. Aylesworth's report of survey :—

"The greater portion of the township is composed of excellent farming land. The soil is principally sandy loam, and the timber chiefly maple, beech and basswood (that is, on the best land).

"The south-east corner of the township, as shewn on the timber map, about 2,500 acres, is rough and in some places very rocky, the timber principally pine and hemlock; the pine timber has been culled and very little left fit for market in the way of square timber, although a large quantity of saw-logs could be had of a very fair quality; the soil on this portion is light and sandy, and not suitable for agricultural purposes.

"The central portion of the township (as shewn on the timber map covered with hardwood), bounded on the north by the York branch of the Madawaska River, is composed of excellent farming land, the soil sandy loam with a clay sub-soil, very little rock or stone in this section.

"The timber is chiefly maple, beech and basswood, with sufficient pine for local purposes, but not in large enough quantities to make it profitable for lumbering operations, as this township has been all culled by lumber-men for the last 35 years.

"That portion to the north of the York branch (as shewn on the timber map, covered

with pine and hemlock), and bounded on the north by the line between the hardwood and the pine and hemlock, is light sandy soil, and a large amount of rock and stone in many places, to such an extent as to render it unfit for settlement; in fact the very best part of this section can only be called second class land.

"All along the margin of the river, however, and scattered over the whole of this tract, there is still some fair pine remaining, better suited for saw-logs than for square timber. There is also birch and poplar on this portion, but of very small growth.

"The northern part of the township (that portion shewn on timber map as being covered with hardwood), is of the same quality as the central portion, and well suited for agricultural purposes, soil sandy loam, and timber, maple, beech, basswood, and pine, enough for local purposes.

"About 200 acres in the north-west corner of the township are very rough and rocky. The timber (pine) nearly all dead, owing to fire having passed over it some years ago.

"At the time I completed the survey there were in the township twenty clearings, comprising in all 270 acres, and the settlers all appear to be doing well, and in very good circumstances; the crops last year, 1865, were very fine, and the fall wheat, 20 acres altogether, gave an average yield of 30 bushels per acre, oats about 40, and hay from 2 to 2½ tons per acre. Roots and vegetables of every description do well in this township, and in several instances as many as 200 bushels of potatoes per acre have been raised, turnips, &c., in like manner, have yielded abundantly.

"The township is well watered by lakes, rivers and creeks, the lakes and rivers being plentifully supplied with fish, such as salmon-trout, pike, bass, perch, and speckled trout.

"The York branch of the Madawaska River, which runs through the township, is a splendid stream of water, on which there are two good mill-sites marked on plan, with a plentiful supply of water all the year. There is also a good mill-site on the Papineau Creek marked on plan.

"I did not collect any specimens of rocks, as nothing worthy of note came under my notice, the formation (granite) being the same throughout the township without any variation."

#### DUNGANNON

Is situated in the County of Hastings. It is bounded on the North by the township of Montegale, on the east by the township of Mayo, on the south by the township of Limerick, and on the west by the Hastings road, and the township of Faraday.

This township contains an area of 54,337 acres, of which 11,535 acres were surveyed in 1857, by Provincial Land Surveyor Quintin Johnstone.

The residue of the township, being an area of 42,802 acres, including water and roads, was sub-divided in 1864, by Provincial Land Surveyor John L. P. O'Hanly.

The following is an extract from Mr. O'Hanly's report of survey:—

"This township is naturally divided by York River and its main tributary, Egan's Creek, into three sections, viz: the north-western, south-western and eastern.

"The north-western section is in the form of an irregular trapezoid, and contains in round numbers 16,000 acres. It is generally rugged and hilly. Some of its hills attaining the magnitude and continuity of mountains, and the surface in many places consists of bare rocks. The soil is a red sandy loam, and where free of boulders is tolerably productive. Some patches of pretty fair land are here and there to be found. About a fourth of this section is fit for settlement, and I have no doubt that at least that proportion will in time be settled. The prevailing timber along the York River is greenwood, principally pine of a very fine quality. The remainder is covered with hardwood, pine and hemlock, one or other predominating according to soil and situation, excepting the swamps, and the alluvial flats along the river, which are mostly timbered with elm and ash. Crystalline limestone in this section is almost entirely confined to the south side.

"The south-western section is in the form of an oblong with two serrated sides. It contains about 16,000 acres. The surface is rolling, here and there abruptly broken by narrow ravines and steep rocky declivities. The soil is a deep sandy loam, generally free from stones, capable of yielding very fair crops. The timber of this section, swamps excepted, is principally hardwood mixed with pine, in some places only scattering, in others bearing a fair proportion, and along Egan and L'Amable's Creeks, almost exclusive

on the high lands. I consider that about one half of this section it fit for settlement Crystalline limestone is very abundant throughout.

"The eastern section is in the form of an upright millsaw, irregularly worn, and with broken teeth. It contains, unsubdivided portion included, about 14,000 acres. It consists of low, flat hills, alternating with narrow swamps and marshes along the principal streams. It is less elevated and more nearly approaching a level surface than either of the other sections. The soil consists of sand and gravel, bare rocks in many places protruding. The prevailing—almost only timber, is greenwood, consisting of red and white pine of superior quality, hemlock and balsam on the high lands, and cedar, spruce and tamarac on the low lands and swamps. This portion is mostly if not altogether, unfit for settlement, and in my opinion should not be offered for sale. For whilst I doubt not but it would command a readier sale than any other section, I am satisfied that it would be purchased by pretended settlers for the sake of the pine, to the great injustice of the limit-holders, and loss to the revenue.

"In this connection I may remark, that continued observation and considerable experience have convinced me that the exclusively pine districts are more regular or level than either the hardwood or mixed timber countries in the Ottawa and Huron territory. I have found no trace of crystalline limestone in this section.

"Of the whole residue of this township, about a fourth consists of middling or fair land very well fit for settlement, and the remaining three fourths are rough, rocky and barren, and therefore wholly unsuited to agricultural pursuits. This may appear a small proportion, but I have seen enough to convince me that it is equal to that of any other township on the Hastings Road; nay, that many townships in the Ottawa and Huron territory, supposed to have much good land cannot boast of a like ratio.

"The prevailing timber is pine, which is to be met with in more or less quantities throughout the whole township.

"This township is well watered, the principal streams being York River, Egans's Creek, and L'Amable Creek. York River, a tributary of the River Madawaska, itself a tributary of the Ottawa, a tributary of the St. Lawrence,—so that York River may metaphorically be styled a great grand-child of the mighty St. Lawrence,—enters the township on the west side in gift lot No. 54, and flowing north-easterly, in a circuitous and very serpentine course, leaves it in lot No. 4, in the 16th concession. Its bed is deep and narrow, current swift, and high banks generally to Egan's Farm, where it becomes broader and less swift, with low banks and large marshes adjoining, which in high water present the appearance of a long, irregular lake. Its navigation, suitable for the canoe, skiff or punt, is interrupted by three rapids, composed of a series of chutes or cataracts of great hydraulic power, and forming excellent mill sites. A slide and dam have been constructed on one of them, and side dams on the others by Messrs. Harris, Bronson & Co., to facilitate the descent of timber to market. A considerably quantity of saw-logs and square timber annually go down this stream, the former for the Ottawa City Mills, and the latter for the Quebec market.

"Egan's Creek, a tributary of York River, enters this township in the 10th lot of 1st concession, flowing northerly in a zigzag course, falls into York River in lot 12 in 11th concession. This stream is for the most part deep and sluggish, with low swampy banks, and large marshes at its confluence with L'Amable's Creek. Its navigation is obstructed by three rapids, on one of which a slide and dam are constructed, and on another a dam by the party and for the purpose referred to above. The two larger are well fitted for mill sites.

"L'Amable's Creek is also deep and sluggish with low swampy banks. Its navigation is likewise used for the descent of timber.

"The lakes are few and small, shallow and muddy, gradually filling up by the *débris* of the adjacent hills, swamps and marshes are numerous, and some of considerable extent, I have no doubt that many of these are extinct lakes, as they bear unmistakable traces of their aqueous origin.

"There are also some wild meadows, the hay from which is eagerly sought by lumberers and new settlers, as it affords an excellent fodder for oxen and cattle.

"This township offers many inducements and advantages to new settlers not possessed in a like degree by other localities. It is accessible from the old townships on the south

by the Hastings Road, and from the Ottawa by the Opeongo and Peterson Roads. Extensive lumbering operations in the circumjacent country cause a great demand for labor with high wages, and a ready market at hand for the redundant produce of the settler, at prices far exceeding those of the frontier townships.

"There is a post office (York River) in the adjoining township of Faraday, separated from this only by the breadth of the Hastings Road. There are a grist and saw-mill on L'Amable's Creek; there are also a general store, two smaller stores, and three taverns in the township."

#### FISHER

Is situated on Batchewanung Bay, on the north shore of Lake Superior. It is bounded on the north by the township of Palmer, on the east by the township of Tilley, on the south by Batchewanung Bay and the projected township of Ley, and on the west by the township of Herrick.

This township was subdivided into sections and quarter sections in 1865 by Provincial Land Surveyor G. B. Kirkpatrick.

Each regular quarter section contains an area of 160 acres.

The township of Fisher contains an area of 12,241 acres of land, 400 acres of which had been previously patented.

The following is an extract from Mr. Kirkpatrick's report of survey:—

"The land throughout the township generally is of good quality, sandy loam, and well situated for agricultural purposes, there being scarcely any rock visible except in the east boundary. The swamps shewn on the plan are generally dry in summer and would make excellent meadow land. The land on the island is level and swampy, but as it is considerably above the level of the lake, I think there would be no difficulty in draining it. The two northern ranges of sections are most deserving of notice, being for the most part splendid looking hardwood land, and nearly free from stone. Round the shore of the bay the soil is lighter and more sandy. On section 9 and part of section 8 the timber has been lately burned.

The timber in the township is principally composed of maple, birch, balsam, ironwood, cedar, spruce and tamarac, and a few pine scattered over most of the sections, not in sufficient quantity, however, for lumbering purposes, but affording good building materials for settlers. The only fixed rocks to be met with are greenstone and trap, in the former of which iron ore is found in abundance in the locations of Mr. Mansfield and others, situated to the north of the township. There are no mill sites within the limits of Fisher, but immediately to the north of it there are falls on the Batchewanung River and Carp River, which both enter Batchewanung Bay, in this township. The rivers as well as most of the smaller streams are plentifully stocked with speckled trout.

"There are a half dozen families of Indians living on section 14, who get their living by fishing and hunting. They do not cultivate any of the land, except a little for potatoes round their houses. There are several maple bushes on section 12, where they all go in the spring during the sugar-making season.

"The Hudson Bay Company have a trading post near the village, on section 13, and I am much indebted to the officer in charge for his kindness and courtesy during the winter.

"This township presents unusual advantages to settlers, from its proximity to the iron mines before referred to, which, I understand, are being opened up at the present time, as affording a ready market for everything that could be grown by them.

"The climate, to judge by last winter, which I have been told was an average one, is not more severe than in the latitude of Kingston, though more snow falls than in the latter place.

"In conclusion I would say that the whole of this township is fit for settlement, and I have no doubt, when the land is open for sale, that the greater portion of it will be speedily settled."

#### FOLEY

Is situated in the county of Simcoe. It is bounded on the north by the township of McDougall, on the east, south and west by unsurveyed land, the north-west corner of the township touching on Parry Sound.

It was surveyed in 1866 by Provincial Land Surveyor George A. Stewart, and contains an area of 42,497 acres, including water and roads.

The following is an extract from Mr. Stewart's report of survey :—

"The Parry Sound Colonization Road passes diagonally through the township from south-east to north-west, thus facilitating in the best possible manner the settlement of the township. This road, through Foley, is of very superior quality and will compare most favorably with any of the colonization roads with which I am acquainted and reflects great credit on the parties employed in its construction.

*"Physical features of the Country."*

"A large proportion of this township is occupied by water, a characteristic common to this portion of the province. The lakes throughout this township are generally very irregular in outline, presenting bold rocky shores and great depth of water. An examination of the map will shew the position and extent of these lakes. It will be observed that towards the western part of the township they become more numerous and irregular as we approach the Georgian Bay. These lakes present scenery of singular beauty and variety, and possess many attractions to the sportsman and tourist.

"The hills throughout the township are generally rugged and rocky, presenting in some cases impassable barriers.

"The rivers are of small dimensions, connecting the several lakes. The principal river, after passing through several lakes, continues its course westerly along the tenth concession, and empties into Parry Sound near the western boundary of the township. It has several falls in its course which might be made available for manufacturing purposes. The position of these falls are indicated on the plan and field-notes.

"A lake of some magnitude occupies a considerable portion of the centre of the township. It is named by the Indians Nig-ga-go-bing, and extends its numerous bays in several directions from the main body, its shape being very irregular. Its waters are discharged through a short river into a small lake on lots 130, 131 and 132, in concession A. and from thence into Lake Pot-tah-cah-win-wa-na, and from thence through a longer stretch of river into the Sound at lot number thirty-five in the ninth concession. Where this river crosses lots 139 and 140, in concession 13, are falls of some twenty feet head.

"The only other rivers of any consequence are, that running from Pah-she-gong-ga Lake into a small lake on lots six and seven, on the third concession, and another from Lake Che-pah-gua-ne-ne-na across lots 128 and 129 in concession A. The former is sluggish in its course and contains no falls, but the latter is precipitated over several ledges of rocks, and affords some mill power for manufacturing purposes. It falls probably some twenty-five feet.

"I have endeavored to indicate on the timber plan accompanying these returns the general divisions of the timber throughout the township. The difficulty of rendering anything like a correct representation of all the various characters which the country presents, is well known to those who have made the attempt, so that only the general sub-divisions are attempted as being all that is deemed necessary. It will be found, therefore that in many places throughout the portion shewn as hardwood land, rough precipitous barriers of rock present themselves, and low wet swamp incapable of drainage; but on the other hand, there are small patches, containing perhaps several hundred acres, to be found throughout the portion shewn on the plan as rough rocky land.

"Land of excellent quality will be found in several places along the southern boundary, particularly from lot number one to number eight, and from fourteen westward to lot twenty-four. Towards the western end of this boundary the land becomes rougher and more broken, although still containing small patches of good land. At the south-west angle of the township a very extensive marsh occurs, which rendered it difficult to continue the survey to that corner.

"Along the line between the second and third concessions are considerable tracts of very excellent land, more particularly at lots seven, eight, nine and ten in those concessions, and westward from lot number twenty-eight may much good land be found. In the north-eastern part of the township are large tracts of good land, particularly from lot three to lot ten, in the tenth and eleventh concessions. Also from lot fourteen to twenty-three, in those concessions. So that generally throughout the township large tracts may be

found well suited for settlement. Indeed I have no hesitation in saying that the whole township will compare most favorably with any other that has come under my observation throughout the surveyed lands in what is commonly known as the Ottawa and Huron tract.

"I surveyed the township of Stanhope in the winter of '59 and '60, and it was considered one of the best townships in that portion of the country, and it was not long in being taken up to a great extent, notwithstanding the difficulty of getting into it for many years, yet I consider the township of Foley much superior to it, independent of the greater facilities the latter possesses of getting to it by steamer on Lake Huron.

"The numerous lakes throughout this country offering difficulties to transit from one part of a township to another are often the cause of reported tracts of good land not being taken up, and the township of Foley will be found to be no exception in this respect containing, as it does, a more than usually large water surface; but the position of the Parry Sound Road counteracts in a great measure the evils arising from that source.

"There are no large tracts of good pine found in the township, though occasional groups of very excellent red pine may be met with throughout the hardwood tracts worthy of the attention of the lumberman. Oak of good quality may be seen in various parts of the township, and birch is very abundant generally.

#### *Geological Features.*

"All rock exposures throughout the township bear the strongest evidence of its being situated wholly within the Laurentian formation, enormous masses of gneiss rearing their faces like perpendicular walls are constantly met with. These rocks bear the usual characteristics of the gneiss. Stratified beds, varying in thickness from an inch or less to many feet, composed generally of quartz, feldspar and mica, and sometimes hornblende. I looked in vain for any indications of a higher formation, or for any tracings of crystalline limestone, and for that reason I did not think it necessary to transmit any specimens of the rocks to the Department, as they appeared to be ordinary gneiss, differing only in the proportions of the constituents quartz, feldspar and mica.

"There were strong indications, however, in many places of iron ore, and the effect on the magnetic needle was very troublesome, at times causing a variation of as much as fifteen or twenty degrees. I was not able to discover anything resembling ore on the surface, or samples would have been forwarded with these returns to the Department."

#### FRANKLIN

Is bounded on the north by unsurveyed lands, on the east by the Bobcaygeon road and the township of McClintock, on the south by the township of Ridout, and on the west by the township of Brunel.

It was surveyed in 1865 by Provincial Land Surveyor Henry Lawe, and contains an area of 41,191 acres, including water and roads.

The following is an extract from Mr. Lawe's report of survey:—

"Along the east side of the township, between concession A and side-road 5-6, the surface of land is very hilly and broken, and very much cut up with small lakes and swamps, the hills—or ridges—rising some hundred feet above the general level of the township. The soil is of a sandy character, shallow on the tops of the ridges, where, in many parts, the rock, which is chiefly of the gneiss formation, comes to the surface. In the valleys, however, the soil is deep, and is covered with a rich black mould.

"The timber is chiefly beech, maple, ironwood, elm, black birch, and basswood; there are also pine, hemlock, cedar, balsam and spruce.

"The same may be said of the west side of the township, between the west boundary of Peninsula Lake, the Lake of Bays, and a line running from the extreme north-east point of the Lake of Bays to the extreme south-east point of Peninsula Lake; with the exception that the ridges are not so high, the soil is deeper, and it is more thickly timbered.

"On the central peninsulas and on Bigwin's Island the surface is more rolling, the land is stony, the soil sandy loam, and it is thickly timbered with maple, beech, black birch, ironwood, elm and basswood.

"On the north side of the township, between the north boundary, concession road 10 and 11, Peninsula Lake, and side road 10 and 11, the surface is rolling.

"In the north-west part the soil is clay and the timber chiefly beech and maple. In the south-east part the soil is sandy and the timber very mixed, containing some very fine white pine.

"Between the south boundary and the Lake of Bays the surface is rolling, the soil clay, and the timber chiefly beech and maple.

"The Muskoka river is a deep, clear stream, averaging about a chain in width. In parts it is falling and rapid, affording several good sites for mill privileges. After passing lot No. 4, till it enters the lake, it flows through a dry, sandy plain, extending half a mile south and two miles north of the river, timbered chiefly with red and white pine; many of the former would make fine spars, but the latter are of an inferior quality, scarcely fit for merchantable purposes. It abounds with speckled trout.

"The Lake of Bays, which takes up about a fourth of the area of the township, is a deep and clear lake, abounding with white-fish, lake trout and speckled trout.

"In conclusion, I would state that this township is well watered, contains sufficient amount of pine, cedar, &c. for the wants of settlers, and water-power to drive grist and saw mills.

"There is a considerable amount of arable land scattered through it. Fish and game are plentiful, and it is easy of access, both by way of Bobcaygeon and Muskoka roads.

"The lots along this latter road, I understand, are getting settled-up fast; as it passes within a few miles of the north boundary of Franklin, along which there is some very good land. Probably the township will get settled along that side first."

HARVEY.

Is situated in the County of Peterborough.

It is bounded on the north by the townships of Galway and Cavendish, on the east by the township of Burleigh, on the south by Buckhorn Lake, and on the west by the township of Verulam.

This township was re-surveyed in 1865 by Provincial Land Surveyor, Theodore Clementi, and contains an area of 107,990 acres, including water and roads.

The following is an extract from Mr. Clementi's report of survey:—

"It affords me great pleasure to be able to report of this township very much more favorably than previous statements, made by persons who could have had but a slight knowledge of the land comprised within the limits, would have led me to expect.

"I will speak first of the western portion of the township, or of that part lying to the west of Mississagua Creek:

"Along the shores of Buckhorn and Pigeon Lakes the land does not present an inviting appearance, and, indeed, is generally very rough and broken; but after proceeding inland a lot or two the hardwood timber appears, and the tall, clean trees of maple and beech which are seen, are a sure indication of the richness of the soil which supports them. The latter, the upturned roots of fallen trees show to be usually a fine sandy loam, with sub-soil of clay. Going a little further north, the hardwood is thickly interspersed with hemlocks, which run to a very large size; here the soil is rather lighter and the land generally more undulating, but, at the same time, more free from stone; and I would not have you to believe that even the lots which are the best timbered with maple and beech are by any means without a very fair share of stones, but, as in the adjoining township of 'Smith', this will, no doubt, with labor and perseverance, prove to be the very best of land for wheat.

"Along the northern boundary of the township the character of the land changes, as the granite ridges appear, and of this I can only say that I have scarcely ever seen a rougher country. There has been at one time a large quantity of pine timber there, but the fire has, of late years, destroyed all that the lumbermen had left, and a dense second growth of hemlock and birch has sprung up, so thick that in places it is almost impenetrable; this commences at the 16th and 17th concession line, running into the township about the breadth of three lots, and gradually increases in width as you proceed eastward.

"Around the shores of Sandy Lake the land is very good, with the exception of some few lots; there are several partially cleared farms in the vicinity, and many people are anxious to take up land there as soon as it is available. The lake itself is a very handsome

sheet of water, with a beautiful sandy bottom, and abounds in bass and perch; but not in maskinonge, which is a peculiarity, the latter being almost invariably found in the lakes in this section of the province.

"You will observe in the accompanying plan that there is a connection between Pigeon and the two Bald Lakes, where, as in the original survey, this fact seems not to have been discovered. All through the summer months a steamboat traverses those waters, taking lumber from the mills known as 'Burton's mills,' on lot 15 in the 8th concession, to Lindsay, through the Bald Lakes. The shores of these lakes are very bold and picturesque, but not calculated to impress favorably the intending settler; and, indeed, I attribute greatly the bad opinion which has hitherto been formed of this township to the fact that hunters and trappers, whose interest is by no means identical with that of the farmer, have reported of the township generally, from what little they may have seen of it on their expeditions on and in the immediate vicinity of these lakes.

"The 19th concession of the township may be said to be tolerably well settled, and that, too, with an industrious class of men, who seem well satisfied with the land of their choice, and look forward to a prosperous future for themselves and their families. The western boundary of this concession is the well-known Bobcaygeon road.

"I regret much that I cannot speak in the same terms of that portion of the township which lies to the east of Mississagua Creek, it being almost entirely useless for agricultural purposes; but, although year after year the lumbermen have been despoiling it of its splendid pine timber, even this year there are no less than four shanties erected—some for square timber and others for saw-logs—in that section; and there is little doubt but that for many years to come, the facilities to navigation will induce the lumbermen to take out saw-logs from land which, a few years ago, would have been considered worked out, in so far as pine timber is concerned.

"There is a block of land on the 3rd, 4th and 5th concessions, and about the 10th 11th and 12th lots, comprising some 600 acres, which, although stony, is worthy of notice, as being fit for farming purposes; than the beech and maple which are seen standing on it I have never seen finer, and this is the only portion of what can be termed hardwood land in the eastern section of the township. As soon as you leave this, on either side, the granite crops out, and the pine ridges are merely diversified with tamarac marshes and beaver ponds.

"On the north ends of the 1st, 2nd and 3rd concessions, to the breadth of about three lots, there is a good deal of pine still standing, and that, too, of a first-class quality; and I imagine that now (through the energy of Mr. W. A. Scott), the Mississagua Creek having been improved to such an extent that even masts may be taken down with safety, all this timber, which it has been hitherto considered impracticable to take out, will find its way to Quebec.

"Throughout the township generally there is still a great deal of scattering timber, which will be taken to the mills as saw-logs; and even this year a great many thousand feet of timber are to be seen on the ice of Pigeon and Buckhorn lakes.

"With respect to the waters in and around the township, I can only say that, were a person travelling in a canoe to form an opinion of the country from what he there saw, it would be but vague indeed, and the more so, now that the erection of the dam at Buckhorn mills—which has flooded several thousand acres—and the dead timber now standing presents an unsightly appearance, excepting where the shores are very bold, and here, of course, they have not been similarly affected.

"Of the principal creeks, commencing from the west, Nogies Creek is available for running timber, but there are several falls or rapids on it, which would prevent its being made use of for extensive navigation. On lot 22 in the 17th concession is a large tannery, now in operation, and the great quantities of hemlock bark which are close at hand give unusual encouragement to the proprietor to proceed with his undertaking. The average width of this creek is about six feet, and the depth about four feet.

"Squaw River, in size and depth, resembles Nogies Creek. After you get up the stream some three or four miles the banks on either side are low, and great quantities of butternut are seen. These flats extend to a width of some four or five chains, and the land would, with draining, become very rich. On this stream, on the 16th lot of the 12th

concession, a fine saw-mill has been erected; it is, however, only available during the spring months, the water being too low at other seasons of the year.

"On Mississagua creek great improvements have been made, which facilitate materially the bringing down of timber. This creek is somewhat larger than the two aforementioned ones and the waters more rapid on it. On lot 15 on the 8th concession there is a saw-mill, better known as 'Burton's mill,' capable of cutting thirty thousand feet of lumber a day. Mr. Burton has also erected a commodious house close by, and there the traveller, weary with his day's exploration of the country, will always find a comfortable bed and a hearty welcome. A tramway has been constructed from this mill to Bald Lake, some  $\frac{1}{2}$  of a mile, and by this means the lumber is conveyed (per steamboat) to Lindsay. At the head of this creek Mr. Scott has erected a large and substantial dam, by means of which he can raise the water in Gull or Mississagua Lake several feet; he has also put up smaller dams down the creek, so that he has now an almost entire command of the water.

"Of Deer Bay Creek little can be said; It traverses a very rough country, but is still useful in bringing down timber. Small temporary dams are annually constructed on this creek by the lumbermen, but, with these exceptions, no improvements have been made. It is, perhaps the most crooked stream in the township, its average width being about thirty feet, and its depth three feet. The numerous little ponds and marshes which feed this creek afford, in the spring and fall of the year, shelter and comparative security to the thousands upon thousands of wild ducks of all descriptions, which repair to them during the day time, coming in every evening to feed on the rice-beds in Deer Bay, and returning in the morning before sunrise.

"I must not, however, omit mentioning the improvements made at Buckhorn, on lot 9 in the 8th concession. Here a very small saw-mill is in operation all the year round, and a very extensive business is carried on, giving employment to many families who live close by; and indeed there are almost enough houses here to entitle the place to be called a village. At the Narrows which here divide the townships of 'Harvey' and 'Smith,' a dam was erected some years ago by the Government, and a good substantial bridge forms the means of communication between 'Harvey' and the Front.

"Of the township generally I should estimate that there is about 40 per cent. fit for agriculture; and although the land—through the prevalence of stone—may not be properly classified with the very best, still, the hardy and persevering settler will find that, by the exercise of patience, he may hew out for himself and family a comfortable home, and have (which after completion it will be) a good level road whereon to convey his produce to the market."

#### HERRICK

Is situated on the North shore of Lake Superior.

It is bounded on the north by the township of Ryan, on the east by the township of Fisher, and on the south and west by the waters of Lake Superior.

This township was subdivided into sections and quarter sections in 1867, by Provincial Land Surveyor, Quintin Johnstone. Each regular quarter section contains an area of 160 acres.

The township of Herrick contains an area of 7,210 acres of land. The following is an extract from Mr. Johnstone's report of survey:—

"The surface of the township is very little broken, there being neither hills nor mountains in it, and no fixed rock. There is a ridge, nearly all of which is south of the line between sections 3 and 10. It stretches away to the south-east, and is nearly parallel to the lake shore, and about half a mile to the east of it.

"The descent to the valley lying between the ridge and the lake is abrupt in places, particularly on the line between sections 15 and 10, where it is about 75 feet. This ridge falls away almost imperceptibly to the east and south-east, breaking into patches of swamp and semi-swampy mixed timber land.

"The soil is sandy loam, and where not overly stony or swampy, is well suited for agricultural purposes, and will produce hay, roots, and cereals suitable to the latitude, abundantly. The timber upon the dry land is chiefly hardwood, birch and maple. No beech nor basswood, and not over a dozen pine trees in the township. The swampy land produces, when very wet, tamarac; otherwise, cedar, balsam, and spruce, from all of which, timber for fencing and building purposes can be obtained. The cedars, in the

valley between the ridges above written and the lake, are chiefly of a very thrifty growth, being large and straight.

"This valley is, in places, very stony. What I have seen of the land lying north of the first west line that I surveyed in this township, is in general tolerably good. The tamarac swamp at the east end of that tract could be easily drained into some of the small streams adjacent to it. With the exception of the maple timber land, the growth of underbrush in this township is more dense than any I have yet seen, being in places almost impenetrable.

"Neither lakes nor ponds came under my observations; and I do not think that there are any in the township.

"The streams are few and small, and with the exception of the 'Sable River' (the western boundary of the township), could not be made available for machinery. The waters of the latter can, by erecting dams almost anywhere from the north boundary to its mouth, be made available for milling purposes. This stream is very meandering and sluggish, with the exception of one spot about thirty chains from its mouth, where the water passes over a stony bed a little more rapidly than anywhere else that I have observed in the river. Here the east bank is nearly level with the water.

"The banks of the river are dry and firm, and average about eight feet in height; however, in many places they are much higher. They are, as well as the soil of the adjacent lands, sandy loam of good quality. The depth of water will average from two to four feet, and width of river, from bank to bank, about one chain.

I have shown on the map a site for a town plot lying on both sides of the river and adjacent to where it enters the lake. This is the only place in the township and in the adjacent township west of the river, that I have observed suitable for a town plot, and even here I cannot recommend it as being very eligible for that purpose, on account of the shallowness of the river and lake, or more properly a bay.

"This bay being exposed to south-west winds and storms from that quarter, would not be overly safe even for vessels of light draught to enter during a storm from the quarter before written. However, the advantage of a town here would be to induce settlers to erect mills for gristing, and machinery for crushing ores, &c.

"The advantages for settlement are good. First, for during the summer months access to and from the township is easy. Next, the whole or greater part of this township can be made available for agricultural purposes at ordinary expense. A ready market for all kinds of produce will be found at the mines now being wrought in the adjacent township of Fisher, as well as the several mines about being opened in that section of the country.

"During the summer months, settlers in this township will have but little trouble in conveying their produce by boats the greater part of the distance to the several mines that will eventually be wrought in that region.

"There is an excellent harbor and wharf at the upper, or north end of Batchewanung Bay in the township of Herrick, and from which settlers can move in their furniture and provisions to the northern portions of Herrick, at little expense.

"There are no squatters in the township of Herrick. When traversing the lake shore I observed boulders extending out from the shore for several chains, nearly the whole way round to the river. About seventeen chains before reaching the river, the bank becomes sandy, and continues so round the head of the bay, where, I think, good fishing stations might be located."

#### HERSCHEL

Is situated in the County of Hastings. It is bounded on the north by the township of McClure, on the east by the Hastings road and the township of Monteagle, on the south by the township of Faraday, and on the west by the townships of Cardiff and Harcourt.

This township contains an area of 58,405 acres, including water and roads, of which 11,002 acres were subdivided in 1858 by Provincial Land Surveyor Peterson; the residue of the township, containing an area of 47,403 acres, was subdivided in 1865 by Provincial Land Surveyor A. B. Perry.

The following is an extract from Mr. Perry's report of survey:—

"The general aspect of the township is undulating, considerably broken with lakes, ponds, swamps, marshes, and granite hills; the latter in some instances, are very steep

and rugged, and often rise to a considerable height. The rocky portions are principally timbered with white and red pine and hemlock. The pine is of a superior quality.

"York River passes through this township, entering it on lot number thirty-four in the thirteenth concession, running in a south-easterly direction through Long Lake, and leaves it on lot number five in the first concession. This affords ample privileges of water power, for milling and manufacturing purposes, particularly that in the allowance for road between the fourth and fifth concessions, lot number six, where the water falls perpendicularly thirty feet. Along, and upon either side of this river, from Hay Bay to the twelfth and thirteenth concession line a large swamp and marsh occurs, timbered with ash, cedar and alder; in the more marshy places cranberries are found. Salmon and speckled trout are found in abundance in Long Lake, the latter are also found in the other principal lakes of the township.

"The remaining swamps are generally timbered with cedar, ash and tamarac of a good quality; the soil is a black loam. The upland is chiefly timbered with maple, beech, birch, basswood, hemlock, ironwood, and pine, with an occasional rock elm. Save the rocky portions thereof, the soil is of a good sandy loam, with clay subsoil, well adapted to the growth of all our staple products.

"In conclusion, I would say that fully two-thirds of the land in this township is well adapted for agricultural purposes. That part heretofore surveyed adjoining the Doyle settlement is rapidly filling up. The access by the Hastings road, together with the Peterson road, a ready market for the surplus produce of the settlers, and employment for themselves and teams during the fall and winter months, seem to render this township a desirable one for the settler."

#### HOWLAND

Is situated on the Manitoulin Island. It is bounded on the north and west by the waters on Lake Huron, on the east by Sheguiandah Bay, and on the south by the townships of Sheguiandah and Bidwell.

This township was subdivided into farm lots in 1864, by Provincial Land Surveyor Alexander Niven, an contains an area of 31,373 acres, including water and roads.

The following is an extract from Mr. Niven's report of survey:—

"The township of Howland in its central portion consists of a high undulating table land, and descends to the west, north and east by abrupt terraces strikingly marked by bold promontories to the waters of Lake Huron.

"Around the shore of Lake Huron and as a general rule extending to the base of the first terrace, a distance varying from one to two miles, the soil is of a poor sandy description and the timber generally spruce, balsam, cedar, tamarac and poplar, much blown down by the wind, and with a great deal of swamp existing to the north and east.

"The south-west part of the township, or all west of side road between lots 25 and 26, with very little exception is unfit for settlement, the greater portion of it being rough, rocky land and timbered with cedar, spruce balsam and red and white pine; the remainder of this tract is swampy and covered with cedar, balsam, black ash, birch, poplar, &c.

"Along the south boundary from lot 23, easterly, and around Perch Lake, some very good tracts of rolling hardwood land occurs, consisting of sandy loam and clay soil with maple, basswood and ironwood timber.

"The south-east corner of the township is very rough and rocky, covered chiefly with scrubby maple, birch and poplar.

"The 2nd and 3rd concessions here passes chiefly through swampy and rocky land timbered with cedar, spruce, balsam, poplar, birch, &c. There is however on this line a piece of tolerably good land, extending from lots 16 to 20, the greater part of it being windfall.

"On the 4th and 5th concessions a good tract of hardwood land with fair soil, timbered chiefly with hard maple, extends from lot 10 to 26, intersected occasionally by swamps of cedar, tamarac, balsam, &c.

The 6th and 7th concessions here runs through by far the best tract of land in the township. There is a sandy loam, with clay sub-soil in parts. Timbered chiefly with very fine maple, used as a sugar bush; basswood, ironwood, &c. This tract may be described as lying along the base of the hill crossing this line, varying in width from 20 to 80 chains,

and extending with an occasional break by a swamp from lot 22 to lot 2, and thence running southerly to the 3rd concession. Some tolerably good land also occurs on the 11th and 12th concessions or Manitowaning road, between lots 9 and 13, part of this being windfall.

"With the exception of a few detached pieces, I have particularized all the really good land in the township, and the remainder I may say is swampy and rocky.

"Large tracts of this township have been blown down by wind. The most noted windfalls occurring on the 2nd and 3rd concessions from lot 14 to lot 20, north of Perch Lake, and along the west, north and east boundaries, embracing altogether an area of nearly 5,000 acres, of which large portions have been burnt over.

"With regard to the timber, I may say that on the part of the township designated good land, the timber is chiefly maple, birch, basswood, ironwood, &c., and the swamps are timbered chiefly with cedar, spruce, tamarac, and balsam, while the rocky land is covered with balsam, poplar, white birch, &c.

"A few scattering pines are found here and there through the swamps, and in the south-west part of the township along the south boundary, and near Honora Bay considerable red or Norway pine exists, but not sufficient for lumbering purposes. In some of the swamps the cedar is of excellent growth.

"It is to be remarked that no beech is found in this township.

"Numerous small streams are to be found traversing this township, but in the high lands or central part few are to be met with.

"Perch Lake having an area of 510 acres, is a fine sheet of water, abounding with perch from which it takes its name, having a depth of about 60 feet on the south side but rather shallow to the north and east; the outlet is at the west, a fine creek fifteen inches in depth and 30 links in width, flowing with gentle current to Honora Bay.

"As before stated Howland is strikingly marked by promontories and precipitous cliffs, running around its west, north and east boundaries. These cliffs are as a general rule formed of a very good limestone for building purposes, belonging to the silurian formation, and often exhibit for miles together an exposed face of from 20 to 30 feet, the rock having a slight dip to the south.

"Towards the south-east corner of the township occurs several mountains of quartz rock, presenting a jagged, uneven surface.

"I failed to discover traces of any minerals, indeed the season of the year during which the survey was carried on was unfavorable to discoveries of this nature. Snow lying on the ground to the depth of from three to four feet.

"It is to be regretted that the capabilities of this township for settlement are not of the best description, still there is enough good land to form settlements in parts. A great portion of that designated low land and swamp will make tolerably good farming land when cleared. I should say that no more than 30 per cent of the entire township is fit for settlement.

"With regard to the Manitowaning Road I have only to say that the position selected is the best that I could get, and one upon which a good road can be made with very little difficulty.

"About 100 acres have been cleared in different parts of the township by the Indians, the largest clearing being at Little Current.

"The inhabitants of Little Current number 52, or nine families; they subsist chiefly by fishing, growing Indian corn and potatoes, and by making maple sugar.

"By reference to my plan it will be observed, that I have, as instructed, marked thereon a reservation for a town plot containing 596 acres. The land is of little importance in an agricultural point of view, being chiefly of a light sandy description. The situation, however, is an eligible one for a town, the harbour being a good one and its position such that all vessels passing east or west along the north shore must pass within a short distance of the dock."

#### MATTAWAN

Is situated at the junction of the Ottawa and Mattawan Rivers, and about 200 miles distant from Ottawa City.

It is bounded on the north by unsurveyed land and the River Ottawa, on the

east by the River Ottawa, on the south by the River Mattawan, and on the west by unsurveyed land.

This township was surveyed in 1864, by Provincial Land Surveyor Lindsay A. Russell, and contains an area of 51,878 acres, including water and roads.

The following is an extract from Mr. Russell's report of survey:—

"The present and also future place of business in the township is Fort Mattawan, at the mouth of the river of same name. The reserve made there for a town plot, is one of the most suitable and picturesque sites for that purpose to be met with in the province.

"There are already at the Fort a large Catholic chapel, two good hotels, the Hudson Bay Company's general store, and on the Antoine, a couple of miles distant, Mr. McConnell's saw-mill. The nearest post-office at present is the Joachim, to which place there is a weekly mail from Ottawa. The lumberers, however, feeling much the want of a mail to Fort Mattawan, are endeavoring to get a post-office established there also. There is as yet no grist-mill, the high prices for hay and oats stated above leading the few settlers there are, to cultivate hardly anything else; it being more profitable to buy flour for their own use, and devote all their land and time to growing the before mentioned crops.

"The general characteristic of the country about Fort Mattawan and elsewhere in the township is roughness; the hills being of the Laurentian formation, there is a great deal of rocky and light sandy land; but in the low grounds on the banks of streams, and in some cases on the hills, it is of better quality.

"It is wooded with alternating tracts of soft and hardwoods, viz., pine, hemlock, spruce and birch, beech, maple &c.

"This township resembles much, in general features of surface, timber and soil, those on the Opeongo Road. Nearly all its square timber has been taken to market, a few saw-logs remain of what was once a very fair timber limit.

"The climate is much the same as that of Ottawa, with perhaps some seasons a little deeper snow in winter. The steamers commence running from Joachim downwards, at from the 1st to the 5th May. They cease running in fall about the 25th November, but boats and canoes are used till the middle of December.

"This township is not naturally inviting to settlers, but when a farmer receives four times the ordinary price for his produce, he can well afford to live on second rate land.

"Its position at the future confluence of Upper Ottawa, and western lake trade, gives it importance. The time will come soon, when scarcity of timber, and the encroachments of settlers on the lumberers, where they now are, will lead to the bulk of the lumbering being divided between the country above this and that on the northern tributaries of the river lower down. The three or four hundred miles yet unexplored and almost unknown course of the Ottawa, may yet furnish much, both in timber and minerals, to a trade of which Fort Mattawan will be the depot, when that ultimate necessity—the Ottawa and Georgian Bay Canal—is made; the lake vessels, laden with supplies for the Upper Ottawa lumbering, will there discharge their cargoes, and will receive a return freight for the western people, of the manufactured wood goods of all descriptions required by them, and of the material for which their country is so deficient. Mattawan is particularly suited for such a trade, on account of its abundant water-power and its facilities for getting wood of various kinds, much of what would be required for such manufactures being in the vicinity of its water-powers, small timber generally answering the purpose sufficiently well, such as will always be left by square timber and saw-log makers."

#### MCDUGALL

Is situated in the county of Simcoe. It is bounded on the north by unsurveyed territory, on the east by unsurveyed territory, on the south by the township of Foley, and on the west by the Georgian Bay.

This township contains an area of about 70,000 acres, of which 43,864 acres (water and roads included) were subdivided in 1866, by Provincial Land Surveyor J. L. P. O'Hanly.

The following is an extract from Mr. O'Hanly's report of survey:—

"This township has considerable diversity of surface and soil. The surface is generally flat, having few elevations 100 feet above the level of Georgian Bay. Yet it is much broken both by hills and lakes. The hills for the most part are abrupt and precipitous,

falling and rising by steps like a terrace, gradual slopes being rare. The land in many places is of the worst kind, being almost destitute of mould or verdure, while in other parts it is well adapted for settlement.

“On the accompanying trace I—by different colours, in a general way—indicated the land fit for settlement, as well as the bad land. Not that I would be understood to mean that no part of that shewn bad is fit for settlement. I have no doubt but small patches here and there will be found intermixed with it of a very fair quality, and so of the other, as some spots will be found in it very inferior. But for a general and comprehensive classification I think it may be relied on as pretty accurate, indeed as correct as it is possible to do it without a special inspection.

“The timber consists of birch, maple, pine, hemlock, beech, balsam, ironwood, oak, cedar, basswood, spruce, tamarac, ash, elm, poplar and white birch. This is the order of predominancy. There is a great deal of white pine, but much scattered, and therefore very difficult to fix its limits, except along the valleys of streams and the margins of lakes, and of Parry Sound. Along the latter there is much of inferior quality and stunted growth. It is nowhere to be met with in groves, and not often in clumps, yet there is scarcely a spot without it; and the country, viewed at a distance, would be probably considered as a vast pinery. Red pine is entirely unknown.

“This township is principally watered by the River Seguin, which enters it from the east by two branches, the northern at lot No. 1, in the 8th concession, flows southerly a distance of about five miles, and the southern branch at lot No. 1, in the 4th concession, flows westerly a distance of three and a half miles, uniting at lot No. 11, in the 5th concession, flows westerly a distance of three miles, makes an acute angle with its last course, flows south-easterly enters Mill Lake at two miles, then forming the outlet of Mill Lake flows south-westerly one and a half miles into Parry Sound.

“At its mouth is situated the nucleus of the town of Parry Sound, and lumbering establishment of Messrs. J. & W. Beatty & Co. There is a church, a post and customs offices, a hotel and two stores and several mechanics. There are about 20 houses, principally occupied by the employees of Messrs. Beatty & Co.

“Between the village and foot of Mill Lake there are three rapids, to obviate which there is a very fair portage road. At the foot of Mill Lake there is a fine water privilege and an excellent site for a mill, on which the Messrs. Beatty have erected a dam, and made other improvements to facilitate the descent of saw-logs, and husband the spring's food for the summer's consumption, of which Mill Lake is the reservoir. This chute is about 18 feet high.

“Mill Lake, the largest inland lake in the township, is very picturesque with its deep bays, bold bluffs and pretty islands. From Mill Lake to the forks there is very little obstruction to the navigation, except in the dry season that it becomes very shallow and unsafe for bark canoes.

“From the forks, for about two miles, the north branch is composed of a series of rapids and cataracts, alternating with small basins of still water. The navigation here is wholly impracticable. The scenery is extremely wild and romantic. There are many water privileges, which are not likely to be useful within a reasonable time, and therefore for the present, at least, absolutely worthless. To obviate this there is a canoe route by Trout Lake, and two smaller ones, and entering the north branch at the head of these rapids. From this to the eastern boundary, the river may be called three narrow, shallow lakes divided by three short rapids, where it crosses at the foot of the Chutes from Manatawabi Lake.

“The south branch, from the forks to the eastern boundary, has but one small rapid, but nearly the whole way it is swift and shallow. The stream, as far as I have seen it, is well adapted for the descent of saw-logs and timber.

“There are primarily two conditions essential to the success of a new settlement. The first is good land, and the second cheap and expeditious access to markets or centres of trade, without both these conditions new settlements cannot flourish, and it is unfortunate they seldom go hand in hand. The former to raise abundant crops, and the latter to dispose of them at remunerative prices. I have seen new settlements where the land was of good quality in a very languishing condition for the want of the other. For

without competition the redundant crop is sold at a sacrifice, while purchasable necessities are exorbitantly high.

"Though this township has not the first condition in a preeminent degree, yet it has a good deal of land well calculated to recompense industrious labour, and has very superior advantages in the second condition. As a steamer weekly plies between Parry Sound and Collingwood, and thence by rail to Toronto, so that Parry Sound, in the summer season is in direct communication with all the civilized world. Besides the route is both cheap and expeditious, leaving Parry Sound in the morning and reaching Toronto in the evening, about 180 miles for \$4.85 cents.

"Such facilities of communication are of vast advantage to the settler, and cannot fail to give a great impetus to the speedy and successful settlement of this section of the new country, a progress without which, it would not make in another quarter of a century."

MONCK

Is situated in the county of Simcoe. It is bounded on the north by the township of Watt, on the east by the township of Macaulay, on the south by the township of Muskoka, and on the west by Muskako Lake.

It was surveyed in 1864 by Provincial Land Surveyor W. H. Deane, and contains an area of 29,182 acres, including water and roads.

The following is an extract from Mr. Deane's report of survey :—

"The Muskoka Colonization Road, made as far as practicable on the eastern boundary of this township, presents the means of easy access thereto at all seasons of the year, the distance from Seven Mills, on Lake Couchiching, being about twenty-four miles.

"In order to more fully describe the land, timber and capabilities of the township, I have divided it into six sections, on the timber tracing accompanying the returns.

"Section No. 1 is a narrow belt of tolerably good land, extending along the shore of Muskoka Lake, from lot No. 19, in the 6th concession, to the northern limit of the township. The soil is sandy loam, with claysub-soil in places. The granite rock cropping out on the sides and tops of the hills and occasionally on the shore of the lake. The timber is composed of maple, beech, hemlock, elm, birch, balsam and some white pine of a superior quality.

"This is the only part of the township in which the pine timber is of any value. In the other sections it is not at all of a merchantable character.

"Section No. 2 is much broken by rocks and hills, the land generally being of a very inferior quality, and on the whole affording no attractions to the intending settler. Patches of good land, however, are to be met within the valleys, but not to an extent to merit special remark. The timber is composed of hemlock, pine, maple, birch, beech, cedar and balsam.

"Section No. 3 is a large tract of land extending from the Muskoka River to the northern boundary of the township, and from the Muskoka Road to Muskoka Lake. The settlement of this tract, commenced in the spring of 1861, has progressed steadily to the present time. There may be large tracts of very excellent land found in it, and there is scarcely a lot that does not contain a fair proportion of good land, and free from rock, which is occasionally to be met with on the slopes and summits of the hills. The soil is sandy loam, with maple, beech, hemlock, birch, ironwood, elm, balsam and some pine and white oak.

"Sections No. 4 and 5 are small tracts of very inferior land, being high, rolling and rocky, and not at all suitable for settlement. The timber is composed of hemlock, maple, birch and pine.

"Section No. 6 is a small tract of good land on the north bank of the Muskoka River. The soil being sandy loam, with clay sub-soil, and timber chiefly hardwood.

"Every lot on this tract is taken up and more or less improved by actual settlers.

"With regard to the capabilities of the township in an agricultural point of view, I have much pleasure in being able to state that the crops of wheat, oats, corn, peas, potatoes and turnips grown by the settlers in the year 1863, I have not seen surpassed in the most favored parts of the county.

"There is only one lake worthy of notice in the township, it is situate on the 8th

and 9th concessions, and contains about four hundred acres. The water is clear and abounds with excellent fish.

"Muskoka Lake, being dotted with numerous islands, presents many charming views, and during the season of navigation it is much resorted to by tourists and sportsmen. It abounds with fish—salmon-trout and bass being the most valuable.

"Deer and fur-bearing animals are numerous in this section of the country, and are taken at the proper seasons by Indians and others engaged in the trade."

#### PALMER

Is situated north of Batchewanung Bay, on the north shore of Lake Superior.

It is bounded on the north and east by unsurveyed territory, on the south by the township of Fisher, and on the west by the township of Ryan.

This township was subdivided into sections and quarter sections in 1865 by Provincial Land Surveyor G. B. Kirkpatrick.

Each regular quarter section contains an area of 160 acres.

The township of Palmer contains an area of 18,984 acres of land, of which 3,714 acres had been previously surveyed and patented as mining locations.

The following is an extract from Mr. Kirkpatrick's report of survey:—

"The surface of the township is hilly, and in some places rocky. Many of the hills, however, though attaining a considerable height, have a very gradual ascent, and are deeply covered with soil, which throughout the township is sandy loam. Many beaver ponds occur which drown much good land, but as they are capable of being drained I have not deducted the areas. The township is well watered, the Batchewanung River flowing through the south-east portion of it, Carp River through the centre of it, and the Sable River through the western portion of the township, besides numbers of smaller streams tributary to these rivers. Many mill sites may be found on these rivers. Three falls of about twenty feet each occur on the Batchewanung River, and there are several mill sites on every section through which the other rivers flow.

"The timber in this township is mostly hardwood, maple and birch being the chief kinds in the western half, while in the eastern portion the timber is more mixed, consisting of maple, birch, balsam, spruce, cedar, ironwood, and a few white pine here and there. The fixed rocks are either greenstone or trap. Traces of iron were found by the survey party in many parts of the township, but owing to the greater portion of it being surveyed while the snow was on the ground I could not make much search for minerals. Iron ore is largely developed on the northern boundary of the township, and also to the north of the township, and traces of copper were found by me in the hills to the north of the lake on the south boundary. On section 31, and the adjoining mining location, amygdaloidal trap is the prevailing rock. The mining locations of J. P. Mansfield and others being in this township, the fact of their being opened up at the present time, must give a stimulus to the settlement of this portion of the country, as supplying a cash market to the settler at his own doors, an advantage which many older sections of the country are without. I consider that about two-thirds of this township are fit for settlement, there being much good land on every section."

#### RAGLAN

Is situated in the County of Renfrew.

It is bounded on the north by the townships of Radcliffe and Bangor, on the east by the townships of Brudenell and Lyndoch, on the south by the township of Ashby, and on the west by the townships of Mayo and Carlow.

This township was surveyed in 1867 by Provincial Land Surveyor Joseph Doupe, and contains an area 69,212 acres, including water and roads.

The following is an extract from Mr. Doupe's report of survey:—

"It will be seen by the plan that the side lines 25 to 26, and 30 to 31, were run no further south than the line between the 2nd and 3rd concessions. The land in the unfinished portion is exceedingly rough, consisting chiefly of high, steep, rocky ridges, and is totally unfit for settlement.

"The geological features of this township exhibit but little diversity of appearance, and are not deserving of particular notice.

"The rocks belong to the Laurentian formation, and consist for the most part of gneiss. In several places there are extensive exposures of white crystalline limestone, which produces a fair quality of lime, and may yet become of some importance to settlers. No indications of valuable minerals were met with, and no specimens were collected.

"The township is well watered by streams and lakes, which abound in many kinds of fish. There are but two lakes of any considerable extent, the larg est being about a mile and a quarter in length and over half a mile in width. Beaver meadows and ponds are to be found in all parts of the township:

"The township is drained by the Madawaska river, and the York and Mississippi branches of the same. The current of these rivers is, except at a few places, very slow.

"On lot No. 6 in the 6th concession the Mississippi branch passes through a narrow channel or chute, with a fall of 5 or 6 feet, and affords a mill site which, at a small cost, can be made available. On lots No. 18, 19 and 20, in the 9th concession, is situated what is known as the 'Palmer' rapids. A very good mill site, with an ample supply of water, is here afforded; and also the most eligible site for a bridge across the Madawaska, that is to be found in the township. I was informed that Mr. McLaughlin, who occupies the adjoining clearing and owns extensive lumber limits in Raglan and Radcliffe, proposes soon erecting mills at this place, and opening a road northerly to the 'Peterson Road.'

"Along the York and Mississippi branches extends a marsh, varying in width from a few yards to half a mile or more, on which considerable quantities of marsh grass are annually cut for the use of the lumber firms and settlers. This tract when overflowed in spring, presents the appearance of a large lake ten or twelve miles in length.

"The land in Raglan is undulating, or rolling, and in many places broken by swamps of cedar, spruce and tamarac, and by steep rocky ridges, short and very irregular, and not inclined to any general course. The prevailing timber on those rough portions, and also along the Madawaska river, is pine, the best of which—through lumbering operations, carried on for 20 years or upwards—has been removed, though a considerable quantity of valuable timber still remains.

"In several places, once covered by beautiful groves of valuable pine, the fire has made a clean sweep of all vegetation, or left only the dry trunks of trees.

"Throughout the township, except in the marshes and swamps, the soil partakes of a sandy character, being in many places a deep rich sandy loam, which yields, where clearings have been made, wheat, oats, corn, grass, and cereals of a very superior character both in respect to quality and quantity. In other portions it is more sandy, especially the level land along the Madawaska River, and many other places where pine is the prevailing timber, the land may be classed as second rate.

"Where the land is good the prevailing timber is beech, maple, and basswood. The land in those portions covered by hardwood (as shown upon the timber map), is with some few exceptions favorable for agricultural purposes. In these exceptional places it becomes rough and rocky, and the timber is usually maple, birch, beech, hemlock, pine, balsam, oak, ironwood, elm, &c. In the remaining portions of the township good land is only to be obtained in small patches, widely separated by spaces of rocky land and swamps.

"The clearing occupied by the lumbering firm of Messrs. Hilliard & Dixon, was the first one begun in the township. It has been occupied 24 years, and contains in Raglan, 135 acres of very good land. A portion lies in the adjoining township of Carlow. The second is the 'Palmer Farm,' on the Madawaska, occupied by Mr. McLaughlin of Arnprior, contains 136 acres of excellent land, and was begun 19 years ago. Six miles further down the Madawaska, in the 13th concession, Mr. Patrick Maddigan has resided for 10 years. He has now a clearing of 83 acres of first class land, has a very good log house of flatted timber, and at the time of the survey was preparing timber for a large barn.

There are thirteen clearings and eight resident occupants in the township. A ready sale and good prices are obtained at the lumbering establishments for the produce the settlers have to spare."

RYAN

On the north shore of Lake Superior, is bounded on the north by unsurveyed territory, on the east by the township of Palmer and the Batchewanung Mining Company's

locations, on the south by the township of Herrick and Pancake Bay, and on the west by the Montreal Mining Company's locations at and near Cape Mamainse, and by unsurveyed territory.

This township was subdivided into sections and quarter-sections in 1866 by Provincial Land Surveyors Hugh Wilson and John Joseph McGee.

Each regular quarter section contains an area of 160 acres.

The township of Ryan contains an area of 19,153 acres of land.

The following is an extract from the report of survey:—

"In sections from 1 to 10 inclusive, although intersected by a few high ridges, the valleys are extensive and rich, with fine sandy loam soil, covered mostly with maple and birch of healthy appearance and good quality.

"In sections from 11 to 16, and the north halves of sections 21, 22, 23 and 24, the land is rough and broken by high ranges of rock. On the tops and down the slopes of the ridges, which are very steep, there is no great depth of soil; but the valleys, though not extensive, are rich, having a fine sandy loam soil. Maple and birch predominate, and of a good healthy growth.

"In sections 12 and 13 there is a lake whose waters flow eastward into the Carp River through the township of Palmer. This lake is very deep, even at its banks, and clear; and, though in midsummer, its waters are perfectly cool. It, as well as the smaller lakes throughout the township, abound with speckled trout. We have often, in an hour, hooked over twenty of those beautiful fish.

"Along the western side of the lake the shore is bold and precipitous, and in many places, particularly towards the north-west, is almost perpendicular, rising to the height of 300 feet, while the land gently ascends from the water on the east side, excepting a very steep ridge or bluff at the intersection of sections 12 and 13, on the east boundary, the acclivity of which, however, begins at several chains from the lake.

"In sections 17, 19, 20, 29 and 30 the land is exceedingly rough and broken by deep ravines and high ridges composed of coarse conglomerate, porphyritic and amygdaloidal trap, having a north and south strike, a disposition which pervades the geological formation all through this section, and extending into the Montreal Mining Company's locations. The soil is sandy loam, and in many places may be said to be breccia, covered with a light coating of sandy loam. The timber is inferior and composed principally of spruce, tamarac and birch, although there are some patches covered with maple and birch of healthy growth.

The remaining sections, and those fronting on Pancake Bay, are superior to any other. The absence of rock and hills of any extent, excepting a few spurs running in from the ranges to the north, combined with the improvement in the quality, richness and depth of the soil, being sandy loam on a still richer mould, makes these sections the most important district of the township. The tracts of hardwood are extensive, though there is much mixed timber through them, and well watered by Pancake River, Sable Creek, and their affluents, which are abundantly supplied with water, even in the height of summer.

"There are tracts of pine along the valley of the Pancake River, especially near the north boundary, and at the mouth of the river, in front of sections F and G; through part of sections 22, 23 and 26, there is a tract of pine of medium size, all of which is valuable for saw logs and small spars.

"The Pancake River is of paramount importance to this section of the country. It flows out of a large lake northwards and traverses the west half of the township and part of the Montreal Mining Company's locations. It has a gentle current, with exceedingly tortuous course, and its banks are in many places high, but generally low and inclined to a small angle, in which case good loamy soil stretches down to the water's edge; its average width is perhaps about fifty links from its mouth to where it crosses the north boundary, and having a depth of from 5 to 6 feet, with gravelly bottom.

"There are several excellent mill privileges on the river. The most important of which is one at about twenty chains from its mouth, having a fall of nearly eight feet. The river is deep and current sluggish between the falls and its embouchure on Pancake Bay.

"This Bay contains one of the finest harbors on the north shore of Lake Superior,

being well sheltered on the west, north and east by Point Mamainse, township of Ryan, and Point Corbeau. There is a good anchorage on stiff clay bottom.

"In conclusion, we beg to remark, it is our opinion too much attention cannot be paid to this section of the north shore of Lake Superior. The Montreal Mining Company's locations on the west, and the Batchewanung Company's on the east, having this tract of good land between, will actuate many to settle here. Even in our own survey party, there were four young men only waiting for the approaching spring to enable them to carry up provisions and commence farming."

#### SHEGUIANDAH

Is situated on the Manitoulin Island. It is bounded on the north by the township of Howland and Sheguiandah Bay, on the east by Manitowaning Bay, on the south by the township of Assiginack, and on the west by the township of Bidwell.

The township was surveyed in 1864 by Provincial Land Surveyor George McPhillips, and contains an area of 31,624, acres, including water and roads.

The following is an extract from Mr. McPhillips' report of survey:

"The timber is so mixed that one can hardly say what order to put it in. Cedar, maple, ironwood, &c., all mixed up together; hardwood and swamp, sometimes in such small patches that I could not mark them on the plan. When the swamps are large, I have marked trees resembling cedar or balsam, and when there are none, the swamps are very small or otherwise mixed with hardwood, and the land of middling quality. Some of the windfalls were originally hardwood, but the young timber growing up now is poplar, birch, tamarac and spruce. The soil in some of them was also good, but being so often run over by fire, the good soil is burned off. The soil is of different qualities varying from rich clay and loam to sand, gravel and rock, the rich clay land is generally on the slopes and in the valleys, till within ten or twelve chains of the coast, when it changes to sand or gravel; sometimes the good land will come nearer to the coast. The rocks generally appear on the top of the slopes, back from the edge of which the soil is very shallow for ten or twelve chains, with a girdle of small stunted hardwood running in the same direction as the edge of the rock. Back on the table land the soil is weighty clay, with a close, retentive subsoil, which will not admit of the water to pass through, causing swamps and swales; the worst swamps I met were on the table lands.

"I think the Island in general would be better for pasture than for cultivation, but where there is good soil it is productive, even with the poor cultivation the Indians give it. The 6th and 7th concession line runs through the highest part in the township; the land falls north and south of it. The little lake that this concession line crosses, and which I have named Pine Lake, has a good deal of good pine timber around it, particularly on the west and north-west. The south shore, up the lake, is very rocky. Limestone, in great masses, often appears in front, and sometimes in thin layers, and shale. Around Turtle Lake there is a great deal of marsh, swamp, and very poor land. The stream from Turtle Lake to Manitowaning Bay is the largest in this township, except the short one from Bass Lake into Sheguiandah Bay.

"The part I left for a town plot contains some good land, a good deal of rock and swamp, and some useless old clearing of the Indians, so covered with boulders and small stones that we could not plant a picket in it. It is the best situation for a town or village, on account of the mill privileges on the stream. I think there could be three from Bass Lake to the Bay.

"I could not give the number of acres cleared by the Indians with any degree of accuracy as they are so irregular; therefore I have only noted them where my lines cross them. I did not bring any specimens of rock with me, as I did not observe anything different in them from the common limestone and white quartz, and they are the only rocks I observed in the island."

#### TEHKUMMAH

On the Manitoulin Island, is bounded on the north by the township of Sandfield, on the east by the township of Assiginack, on the south by the waters of Lake Huron and South Bay, and on the west by unsurveyed land.

This township contains an area, including land and water, of 33,795 acres, of which 18,288 acres were subdivided in 1866 by Provincial Land Surveyor G. B. Abrey.

The following is an extract from Mr. Abrey's report of survey :

"In referring to the eligibility of the township for settlement, I may confine myself to the part that I have subdivided (I believe scarcely an acre of the undivided portion is capable of cultivation). The soil in general is rather sandy, or clayey loam, the former predominating in hardwood ridges, and the latter in the more swampy parts. In no case is the vegetable part of great depth, and except in the swamps, the rock is comparatively close to the surface; also, where the fires have prevailed, nearly every trace of vegetable matter has been burned out of the soil. The north-easterly four thousand acres comprises nearly the whole of that part, that may be called well watered.

"In more particularly describing that portion suitable for settlement, I may say the following is a fair approximation : Concession B contains lots 31 to 17 inclusive—excluding a part of the latter—1,520 acres; Concession A contains lots 33 to 12 inclusive, 1,877 acres. Concessions one and two, all to the westerly limit of the valley of the river (the outlet of Lake Manitou), except a strip of rock intersecting the town line at the north-westerly angle of lot No. 10, and near the line dividing lots No. 14 and 15. Thence running south westerly, following the easterly limit of the valley of the river, and intersecting the line between concessions two and three at the south westerly angles of lots 16 and 19, say 1,900 acres fit for agricultural purposes. Concessions three and four, from concession B to the rockridge intersecting the concession line between concessions 2 and 3 at the north-westerly angle of lot No. 16, and concession line between 4 and 5 at near the centre of lot No. 19, say 1,400 acres. Concession 5 contains lots 11 to 18, inclusive 800 acres. Concession 6 contains lots 11 to 15 inclusive, 500 acres. Concession 5 contains also lot 1 and parts of lots 2 and 3, say 200 acres. Concession 6 also contains lots 1 to 5 inclusive, say 500 acres. Concession 7 contains lots 5, 4, 3, 2, and part of lot 1, say 450 acres, making, in all, a total area of 9,150 acres fit for cultivation. Over a large portion of this area the timber—composed chiefly of cedar, spruce, tamarac and balsam, with patches of hardwood scattered over here and there—is killed and fallen, or partially fallen, and only requires another fire like that which killed it to totally consume it, and render the whole cleared and fitted for tilling.

"The other portions of the township are valueless for agricultural purposes, and except from 3,000 to 4,000 acres in the North-westerly corner of the township which is covered with some pine, and may at some time be rendered available, cannot be disposed of for any purpose whatever. The whole south shore of the township bordering on Lake Huron, extending inland a distance of a couple of miles, is a smooth limestone rock, supporting a growth of small cedars growing very closely together, with some spruces, balsams, birches and balm of Gileads intermixed.

"There are no large streams crossing the surface of the township, except the outlet of Lake Manitou. It crosses the northern town line on lot 16, thence running south-westerly, and emptying into Michall's Bay, near the western boundary of the township.

"Most of the smaller streams dried up last summer. These smaller streams have their sources principally from the swamps, in the northern parts of the township.

"The rock formations are all of the Clinton or Niagara limestone, and afford nothing striking in this section. They are somewhat undulating, but dipping with a gradual decline towards the shore of the lake, and have a strike parallel with that shore line.

"In selecting a site for a town-plot, I find no place suitable, except it be the point, at the entrance of South Bay. The mouth of South Bay affords an excellent harbor for vessels and is one of the best fishing stations on the island. Michall's Bay, also, is a good place for fishing, but offers no securities as a harbor for large vessels.

"There are no settlers or clearances in any portion of the township. A few Indians remain at the point, at the entrance of South Bay, during the fishing season, but have no gardens or clearances.

"At present the township offers very little inducements to the settler, the south side being barren, the township of Sandfield on the north unsurveyed, and Assiginack not opened up, renders this township quite isolated. Tehkummah must be settled from towards north, as in that direction will be the markets, and in that direction lies most of the best of the land.

"Therefore I would recommend, that the Government construct a road, say : the road between concessions A. and B., from South Bay to the Bay of Manitowaning (cost of f

which might be added to that of the lots benefited thereby). In that case the advantages of settlement of this township would be materially increased, and I believe the lots adjacent to the road would speedily be taken up and improved, and eventually those more remote. I am aware that a number of parties intend taking up some of the lots in the coming summer, if they are in the market by that time, but they will be abandoned again, unless some means of access thereto be made."

TILLEY, AND PART OF HAVILLAND; AND OUTLINES OF HAVILLAND, TUPPER AND ARCHIBALD.

These Townships are situated on and near Batchewanung Bay, north shore of Lake Superior.

Tilley is bounded on the north by unsurveyed territory, on the east by the township of Archibald, on the south by the waters of Batchewanung Bay, and on the west by the waters of Batchewanung Bay and the Township of Fisher, and containing 15,747 acres of land. Was subdivided in 1865 into sections and quarter sections, and, at the same time, 3,825 acres of Havilland (being the whole of the *first range, north*, of that township) was subdivided into sections and quarter sections, by P. L. S. Hugh Wilson. Each regular section contains an area of 160 acres.

Provincial Land Surveyor Wilson also at the same time surveyed the outlines of the townships of Havilland, Tupper and Archibald.

The following is an extract from Mr. Wilson's report of survey:—

"I then commenced to run the limit between the townships of Havilland and Tupper.

"Sections 36, 25, 24, and the south half of section 13 in Havilland, and the adjacent sections in Tupper, as shewn on the map, are high, rolling land, somewhat broken with rock ridges; but at least two-thirds of the land, as far as seen, is well adapted for agricultural purposes. Soil—rich sandy loam. Timber—principally maple, mixed with balsam and black birch, with some good white pine on the ridges. Sections 24 and 13 fall gradually towards Batchewanung Bay.

"There are several good mill sites on the stream, shewn on the accompanying map, in section 13 in Havilland and section 18 in Tupper; but the land here is broken and rocky, with but few good pines. Sections 12 and 1 in Havilland contain considerable portions of good land along the Lake shore; but these sections, together with the adjacent sections in Tupper, as shewn on the map, are very much broken by the Lake shore mountain, which is very rugged, and composed of immense masses of rock, with high cliffs. The mountain has lately been devastated with fire; the timber has been burnt down, and its site grown over with thick brushwood.

"The limit between Havilland and Tupper crosses the western spur of the said mountain at the 5th mile-post from the place of starting, which post has an altitude of 500 feet above the bay, with cliffs from 50 to 60 feet. Rock—gneiss, overlaid with black trap, containing iron pyrites and traces of copper.

"Havilland township is situated on the south and east shores of Batchewanung Bay and part of Batchewanung island, and contains 23,040 acres, more or less, of which nearly one-half is water. Sections 37 to 43 inclusive are situated on the north brow of the anticlinal, dividing the Goulais and Batchewanung bays, and is generally good land, somewhat broken with rock ridges, and falls gradually to Batchewanung bay. Timber—maple, mixed with black birch, and maple and balsam, with some good white pine on the ridges. Soil—rich sandy loam, is beautifully watered by small spring creeks, flowing into Batchewanung Bay. Prevailing rock—gneiss, and a hard, hornblende slate, with pieces of amygdaloid trap, and red sandstone in the bed of the streams.

"There are one or two good mill sites on a stream passing through sections 38, 35 and 34, with good land in valley of stream; also in the west portion of section 33, a little west of line. Fall—60 feet in 200 feet.

"Sections 42 and 31 are situated on the top of a burnt mountain, west end of Goulais and Batchewanung range, which is here about 500 feet above the bay, and suddenly breaks off along the west line of Havilland, showing cliffs from 60 to 100 feet high, with cherry, poplar, white birch and underbrush. Rock—gneiss and amygdaloid trap, with detached pieces of hornblende slate, and traces of the sulphate of copper.

"The township of Ley, as seen from the ridge, is level, and with little elevation above

the bay, and a considerable portion of it burnt over. Sections 30 and 19 of Havilland fall gradually to the bay, and appear to be good land—a considerable portion of them burnt over and covered with the remains of old windfalls. The part of Havilland in Batchewanung island is generally level, soil good; timber: hardwood, balsam, cedar and white pine; soil, sandy loam. Potsdam sandstone crops out on the east and north-east shores of the island, dipping slightly to the south-west. I found several excellent landings or points, with from 10 to 20 feet of water, within a few feet of the shore, affording easy landing for vessels—the landing being well sheltered from heavy seas and weather. I was informed by several of the Indians of the neighborhood that excellent fishing ground exists off the east and north-east shores of the island.

“The boundary line between Archibald and Tilley is situated on the Lake shore mountain, which is all burnt over, and generally covered with fallen timber and thick brush-wood, which includes nearly all of sections 36 and 25, and sweeps around to north-east, into the township of Tupper, and rises to an elevation of about 1500 feet above the bay. The remainder of said boundary passes over a rough, broken country, but contains sufficient good land in the valleys and north slopes of the ridges, which are generally sufficiently easy to warrant settlement. Timber: maple, black birch, cedar, and a considerable quantity of white pine. Soil: rich sandy loam.

“Sections 1 in Tilley and 6 in Archibald are crossed by the Chippawa river, the valley of which is excellent land. Timber: maple, elm, cedar and balsam. Soil: rich sandy loam.

*“ North Boundary of Archibald.*

“Sections 6 and 5, are somewhat broken with rock ridges, but contain, at least two-thirds excellent land. Soil: sandy loam. Timber: maple, birch, elm, cedar, balsam, and some good white pine. In section 5 the south spur of a range of cliffs is crossed, at an elevation of at least 600 feet above the river. Rock: red quartzite granite, with fine black trap, in the form of dykes; some good red pine on mountain. From the top of this range of cliffs the land falls gently to the north, and presents a large tract of apparently good land; timber, hardwood.

“This ridge or range of cliffs, bearing an east and west course, is about a quarter of a mile north of the line, through sections 4 and 3, which are good land, rising gently to the south. Timber: hardwood and balsam. Rich sandy loam. Sections 2 and 1 are high hardwood land and rock ridges, and some tolerably good white pine on the east part of section No. 1. The whole northern boundary of the township of Archibald is beautifully watered with small spring creeks.

*“ East Boundary of Archibald.*

“Section No. 1 is partly tamarac swamp, but perfectly dry, and rich sandy loam, which extends for over a mile to the eastward, through which a branch of the Chippawa river flows. Sections 12, 13, 24, 25 and 36, are generally very good land, somewhat broken with lakes and ridges. Timber: maple, balsam and birch, with a considerable amount of good white pine—land falling gently to the west. About a mile east of sections 13, 24 and 25, is an extensive depression in the country, which sweeps south-west into the township of Tupper, the mean course being north-east, and containing a chain of lakes, some of them two or three miles in length, and extending for some 15 miles; and I was told by some of the Indians acquainted with the country that they abound with white-fish and salmon, having large tracts of good arable land, with considerable quantities of white pine adjoining. I have seen a good specimen of galena from the shore of a lake east of section 24.

*“ South Boundary of Archibald.*

“Section 31 is on the lake shore mountain, which is burnt completely over, and rises to about 700 feet above the bay. The second range of Lake shore mountains is crossed by the line at the second mile east, and rises to the height of 1,200 feet above the bay, with cliffs from 100 to 200 feet, and sweeps round through section 30 in Tupper and 25 in Tilley.

“Sections 6 and 5 in Tupper fall off to the south, in a valley of good land. Sections 4, 3, 2, 1, are high, rolling land, broken with rock ridges, but sufficient good land to

warrant settlement; fully one-half of section No. 1 is water, in one of a chain of lakes, extending to the north-east. There is an excellent mill site in section 36 in Archibald, on the water connexion between two lakes, which connexion is about 8 chains in length; there is abundance of water, and fall of about 20 in 100 feet—the land adjoining gently rising and good. Timber: hardwood, with considerable quantities of good white pine.

“Archibald is bounded on the south by the township of Tupper, on the west by the township of Tilley, and on the north and east by the unsurveyed land, and contains 22,927 acres, more or less. On the east side of Archibald there are large tracts of very fair land, and I was informed by the Indians in my party that it improved very much to the eastward; and what I saw of the township on the south and north boundaries, and from the accounts given by the packmen (who passed through the township by two different routes, bringing in supplies), a large tract in the interior of the township, extending past the eastern boundary, is good arable land, with high hills and gradual slopes. Timber: hardwood and scattering white pine, far exceeding what would be required for local consumption.

*“East Boundary of Tupper.*

“Sections 1, 12 and 13, are considerably broken with lakes, containing numerous small islands—banks gently rising. Timber round the shore: good white pine and hardwood; the land rolling, with gentle slopes, somewhat broken with rock ridges. Soil: rich sandy loam. There is a good mill site a little west of the line, in the north part of section 24, having a reddish quartz rock on either side of the stream for some distance, rising to the height of 20 feet on the point of an island. A little to the west of the line, in section 1, I found iron pyrites in considerable quantities, in cubes of over an inch in diameter, together with a fair specimen of hematite iron ore. Section 24 I found to be excellent land; 25 and 36, hilly, with easy slopes, falling gently to the eastward, with low rock ridges. Timber: maple, ironwood, black birch, and some good white pine. Soil: rich sandy loam. Gneiss is the principal rock appearing in the east boundary of Tupper, and on one to two occasions I found it tinged or spotted with green, indicating the presence of copper. The whole line is beautifully watered with small spring creeks, flowing easterly. The land is heavily timbered with maple, mixed with black birch, balsam, cedar, and some good white pine. Soil: a rich sandy loam.

*“South Boundary of Tupper.*

“The easterly part of section 36 is beautiful land. In section 35 the line passes along the south brow of a hill, falling to the south, and is precipitous and rocky. There are several lakes in sections 33, 34 and 35, some of them nearly a mile in length. About half a mile south of section 34 is a lake of considerable size, and is at least 500 feet below the lakes referred to above. The line, in section 34, ascends the north brow of Beaver mountain, rising with steep but gradual ascent in the east for over half a mile, attaining an altitude above the lakes on the north about 800 feet, and on the south about 1500 feet. Timber: maple, black ash, black oak, and mountain ash of small size. The rock that was visible was quartzose and a coarse hornblende slate. From the summit of this mountain a bird's-eye view of the country from north-east and north-west was obtained; and, on carefully adjusting the theodolite, I found it considerably the highest point of land in the country, except one, north of Pancake Bay. From this point numerous lakes could be seen in Tupper, and the country did not appear to be much broken with ridges, and I should say contained good tracts of arable land. The land falls with steep descent, westerly, through section 33 and part of section 32. Timber: small maple, black birch, oak and balsam, with large tracts of good land. Sections 31 and 32 are, as a general thing, good land.

TOWNSHIP OF TILLEY.

“The township of Tilley is situated on the north shore of the Batchewanung Bay and part of Batchewanung island, and contains 15,747 acres of land, more or less, which has been subdivided into sections and quarter sections, each regular section containing 640 acres, being a mile square. The township is considerably broken by the lake shore mountains, which sweep inland eastwardly and breaks up into mountainous ridges along either side of the Chippawa river, which runs through the township of Tilley.

"The Chippawa river enters Tilley about half a mile south of its north-east angle, and flows in a serpentine course through sections 1, 2, 11, 10, 15, 16 and 17, then emptying into the Batchewanung Bay, having an average width—from section 1 to the falls on sections 16 and 21—of about 1.50 chains, with slight rapids in places. Banks clay, from 6 to 10 feet high.

"The falls on the said river consist of two chutes, with a basin of about two chains intervening. The upper chute is immediately north of the line, between sections 21 and 16, and the lower chute a little south of the line, both affording excellent sites for mills, with easy approaches. The chutes have a fall of about 30 feet each, with a total fall of about 75 feet; adjoining the falls on the ridges there is a considerable quantity of good white pine. The banks below the falls are from 10 to 12 feet high, and consist of light bluish clay and gravel; the average width of the river being about two chains, and depth from 6 to 10 feet. At the mouth of the river, in the bay, a sand-bar extends out about a quarter of a mile, not covered with more than two or three feet of water. The valley of the river on either side throughout the township is good arable land and suitable for settlement. Timber: maple, elm, cedar and balsam. Soil: rich sandy loam.

"The west part of section 1 is considerably broken by a rock ridge, but contains a large tract of good land along the river. Sections 2, 3, 4, 5 and 6, are traversed by a dry swamp. Timber: balsam, cedar, tamarac, white pine, and a considerable amount of hardwood. Soil: rich sandy loam. Sections 7, 8, 9 and 18, are situated principally on the north and west slopes of the lake shore mountain, with hills rising to considerable height, with easy slopes; the south part of sections 8 and 9, being on the south brow of the mountain, are broken and rocky. Timber: maple, mixed with balsam, cedar and white pine. Sections 10, 11 and 12, contain considerable amount of good land along the valley of the river, but are very much broken by ridges on either side of said valley. Sections 13, 14 and 15, are situated in the second range of the lake shore mountains, and are very much broken by high rock ridges. The valley and the north slopes of the ridges are generally very good land, and comprise at least one-half the area.

"Sections 16 and 17 are situated on the top and south slopes of the lake shore mountain, and are exceedingly broken, but contain large quantities of good white pine; but there is considerable amount of excellent land from the base of the mountain to the lake shore. Section 21 and the south-west half of section 22 is excellent land, rising in plateaux. Timber: principally maple, mixed with a little balsam and cedar, a considerable area of which has been used by the Indians as a sugar-bush, some long time ago. The soil is a rich sandy loam. I found, on the line between sections 22 and 15, trap rock, strongly magnetic. Sections 23 and 24 are situated on the top and west slope of the lake shore mountain. Section 23 is broken and rocky, and contains a large amount of good white pine. The greater part of section 24 consists of a considerable amount of good land, with high ridges. Timber: maple, mixed with birch, balsam, cedar and white pine. Sections 25 and 26 are on the south slope of the mountain, and are broken with rock ridges, with small valleys of good land. Timber principally maple. Begley's copper location occupies a certain position in these sections.

"The copper lode is situated near the centre of section 25, and forms a cliff from 80 to 100 feet high, course north-west and south-east, and shews a face of from three to four chains in length, and bears the appearance of a distorted dyke, large portions of it being tinged with green from the presence of copper, and has, to all appearance, a 'good show.'

"Sections 31, 32 and 33, on Batchewanung island are generally undulating. Timber: maple, hemlock, cedar, birch, poplar and white pine; soil, sandy loam. Potsdam sandstone forms the east and north-east shore of the island, dipping slightly to the south-west. All that portion of the island in the township of Tilley has the appearance of good land. Section 36 is principally situated on the face of the lake shore mountains, the timber of which has been destroyed with fire; it is exceedingly rugged, and broken with cliffs.

#### "General Remarks.

"The northern shore of Batchewanung bay is principally composed of a sandy beach, with shallow water for several hundred feet out; but there are several points of rock on the north-easterly shore of the bay, with water from 10 to 15 feet deep at their extreme edge, affording great facilities for the construction of commodious wharfs, with very little

expense. A strong current from the west sweeps around to the north and north-east of the island; the water is of considerable depth, and the current so strong that a considerable portion of it is open during the winter. Easy access can be had over the mountains in numerous places to the interior by following the faults or windings of the ravines and valleys. The whole country is beautifully watered by spring creeks; several are of good size and abound with speckled trout. There are considerable number of rein-deer or Cariboo throughout this region of country. The climate, soil and facilities for settlement are much superior to many portions of the Ottawa country.

“ *Settlement.* ”

“The mineral wealth of the country is apparently inexhaustible, and there is abundantly sufficiently good arable land, capable of producing the cereal and other Canadian staple products necessary for the sustenance of a large mining population. During the present season the first-class steamboat “*Iron City*,” on her up and return trips, has called weekly (plying between Detroit and the American mines on Lake Superior) at Mansfields & Co.’s landing, situated on the Batchewanung Bay, about four miles westerly from the west boundary of Tilley. There is no doubt that, owing to the position of the township of Tilley, so soon as any mines are in active operation a regular steamboat communication would at once be established with them. This would, consequently, be a great inducement for farmers and others to settle in the township.”

VANKOUGHNET.

East of Goulais Bay, north shore of Lake Superior, is bounded on the north by the township of Tupper, on the east by unsurveyed land, on the south by the township of Aweres, and on the west by the township of Fenwick.

This township was subdivided in 1867, into sections and quarter sections by Provincial Land Surveyor George F. Austin.

Each regular quarter section contains an area of 160 acres.

The township of Vankoughnet contains an area of 26,299 acres of land.

The following is an extract from Mr. Austin’s report of survey:—

“The soil, in the township of Vankoughnet, may be divided into three kinds, sandy and sandy loam, clay and vegetable loam or mould.

“The first mentioned covers an area of about fourteen sections, chiefly on the north and south sides of the Goulais River, on the south-western section of the township, and is generally level land. The clay is often to be found along the river and ravines, and seems to be of a great depth, although not frequently met with, owing to its being covered with vegetable matter, yet it was seen cropping out in a number of places. The last mentioned or third kind I have called vegetable loam or mould, it being formed by the decomposition of the leaves of hardwood, and has but little depth, seldom exceeding nine or ten inches, covering the rock of the country. The predominating rock seems to be trap, of two or three different kinds, clay slate, and here and there chlorite slate and jasper conglomerates.

“The timber oftenest met with is maple, birch, balsam, white spruce and cedar, with a few scattering hemlock and pine of inferior size; one remarkable feature is the total absence of beech, not a tree of which was met with on the survey.

“Maple and birch is by far the most abundant, it is to be found on the mountains, and in the plains mixed with the soft wood. The trees grow to a fair size. On the river banks poplar is frequently found, but as it did not extend any distance from the river, I have not noticed it in my field notes. A few ash and elm are to be met with in some of the swamps. Pine, of inferior quality and size, occupies a portion of the ground, but it is not of any value.

“The Goulais, a very fine stream, winding through the township from east to west, varying from two chains to four and a half chains in breadth, has a swift current, and is navigable for mackinaw boats for about six miles from its mouth, and is from five to ten feet deep, with banks in many places (of sand or clay), of twenty or thirty feet above the water. This river affords no water powers.

“This township, viewed as the crow flies, is of surpassing beauty, with its high mountains rising to a thousand feet or upwards above the Goulais River, the remarkable

sinuosity of its main stream, with two picturesque lakes, and the mixture of the different shades of green, one cannot but be struck with admiration.

"It is tolerably well watered, having quite a number of streams, brooks and rivulets. The streams afford eight or nine excellent water powers.

"The south-western section, for an area of about nine miles, is level and of a sandy or sandy loam, chiefly wooded with evergreens. The northern and eastern portions of the township are rocky and mountainous.

"One strange feature in many of these mountains is, that they are perpendicular on the south and south-west sides, in many instances rising to a couple of hundred feet perpendicularly, shewing nothing but a bare wall, in consequence of which estimates of distance had to be made, as they could neither be measured with chain or instrument, without taking a very long time. I must leave this strange feature in the hands of some one more able to account for the action of the electro-magnetic currents than myself.

"The minerals of economic value met with during progress of the survey were the yellow sulphuret and variegated ores of copper, traces of molybdenum and peat.

"The ores of copper were met with in so many instances, without any search being made therefor, that I am satisfied that that particular section abounds with rich veins—thirty were discovered chiefly in a belt or dyke of greenstone that runs through the gray trap and slates across the township, on a course about north sixty degrees west, the veins vary from two or three inches to eight or ten feet, and are well charged with metal. Traces of argentiferous galena were met with, but not in situ, as also of the scarce metal molybdenum, a deposit of peat is to be found on section forty-two, and a large quantity of silicious rock of great purity exists on section thirty-seven (in situ), well suited for making glass.

"The township of Vankoughnet, taken as a whole, may be classed amongst the most promising, having sufficient agricultural land to furnish the requirements of mines. It is never destined to be a lumbering section of country, but may be termed a mining and manufacturing one, and I feel persuaded that as soon as the mineral riches of the township are known, the whole of it will be purchased.

"The only thing that can be done towards the developing of this township, and in fact its only requirements, is a good road from the Sault St. Marie."

#### WATT

Is situated in the county of Simcoe. It is bounded on the north by the township of Cardwell and Skeleton Lake, on the east by the township of Stephenson, on the south by the township of Monck, and on the west by Lake Rosseau. It was surveyed in 1865, by Provincial Land Surveyor T. W. Nash, and contains an area of 28,856 acres, including water and roads.

The following is an extract from Mr. Nash's report of survey:—

"The soil of this township has a local reputation of being the best upon the Parry Sound Road. The valleys furnish a rich clay loam, in some places inclined to sandy loam; in the high parts the land is not so good, being light sandy soil.

"The good land is found in the valleys in all parts of the township in larger or smaller tracts, there being but few lots but what have some on; perhaps the valley of Three Mile Lake contains the best lots in the township, there is however much good land near Lake Rosseau.

"The land taken by squatters is generally all good, some of the best lots, however, are still vacant. The poorest portion of the township is that north-east of the Parry Sound road lots, and that adjacent to the northern boundary, the fourteenth concession being mostly broken land. The shores of the waters are mostly lined with hemlock and scrubby pine, maple, balsam, pine and birch are found in all parts of the township, beech is found on the high sandy soils; the pine is not found in groves, so that no portion of the township contains sufficient to reserve for timbering, but it is scattered pretty equally throughout the township, the best perhaps being on the portage from Lake Rosseau to Three Mile Lake, the largest found were about  $3\frac{1}{2}$  to 4 feet diameter.

#### "Waters.

"The water system is that of the Muskoka River, the whole drainage being to the

west, into Lake Rosseau, thence by Muskoka Lake and River into the Georgian Bay. The surfaces of the lakes are about 100 feet below the main level of the country, and in many places have precipitous banks. Mill sites were found on lots No. 30, con. 1 ; No. 13, con. 4 ; No. 24, con. 8 : No. 42, con. A.

*“ Advantages and prospects of Settlement.*

“ The very best means of developing the resources of this township and neighborhood is that already adopted by Government, by improving the Parry Sound road ; this road effectually opens up the whole of this township for settlement as well as most of the country immediately north and east of Lake Rosseau ; it possesses besides, military considerations of some importance, as it affords military access to the defensive harbor of Parry Sound.”

WOLLASTON

Is situated in the county of Hastings. It is bounded on the north by the township of Faraday, on the east by the Hastings road and the township of Limerick, on the south by the township of Lake, and on the west by the township of Chandos.

This township contains an area of 59,015 acres, including water and roads, of which 14,936 acres were surveyed in 1857, by Provincial Land Surveyor Quintin Johnstone, and the residue of the township, 44,079 acres, was subdivided in 1864, by Provincial Land Surveyor John A. Snow.

The following is an extract of Mr. Snow's report of survey :—

“ By reference to the timber map on which I have shown the character of the soil and timber, it will be seen that in the part surveyed by me there are only two small tracts of land timbered with pine, and embrace only about 2,000 acres. On that tract in the 1st, 2nd, 3rd and 3th concessions, the timber has been chiefly cut by Messrs. Gilmour & Co., who have a depot in the vicinity, the other tract has not yet been mutilated with the axe. All the other parts of this township surveyed by me are more or less suitable for settlement. That tract east of Deer River and south of the line between the 6th and 7th concessions is in general more uneven than the other portions. the rocks are oftener exposed. On the whole, in this township, is the largest tract of hardwood land together, which I have met with in the course of my practice, and the soil throughout is of fair quality and in most places sandy loam, with an undulating surface, the hills in no instance rise to more than 100 feet above the general level of the country.

“ The only stream of any importance is Deer River, a tributary of Crow River, which skirts along the western boundary of the township. Deer River below Eagle Lake is from one to three chains wide, and has three rapids, at the first of which there is an excellent mill site, owing to the whole of Eagle Lake being converted into a reservoir, insuring an abundant supply of water at all seasons. At the other rapids no opportunity exists of forming a pond, they are consequently of little value. Above Eagle Lake the stream is from forty links to one chain wide, with a depth of from one to three feet. Three small rapids occur, but the banks are too low to admit of their being turned to account for mill purposes.

“ The best method of developing the township would be by opening the road surveyed by Mr. Gibson last fall, running the whole length of the township, and by making a road along the line between the 8th and 9th concessions, from it to the Hastings Road and westward, uniting at some point in Chandos with the Burleigh Road. If these roads were open and a grist and saw mill erected at the mill site below Eagle Lake, this township on account of the general superiority of the soil would be rapidly settled.”

WYLIE

Is situated in the county of Renfrew. It is bounded on the north by the township of Rolph, on the east by the township of Buchanan, on the south by the township of McKay, and on the west by unsurveyed land.

In 1864, Provincial Land Surveyor W. J. Macdonald surveyed 39,977 acres (including water and roads), of this township.

The following is an extract from Mr. Macdonald's report of survey :—

“ The township throughout is admirably supplied with brooks of excellent water,

having their sources in springs, beaver meadows and lakes, and are not affected by the driest weather in summer. The two principal streams are the Petawawin and Chalk Rivers. Lakes are numerous, some of them are large, abounding in trout and other varieties of fish. I may mention Corry's Lake, on Chalk River, Lake Cartier, on Creek Cartier, Green Lake on Beeman's Creek, and Trout Lake, emptying into the Petawawin. In the vicinity of the Petawawin the land is very much broken by hills and gullies, and a very small portion fit for agricultural purposes. There are quite a number of beaver meadows, scattered over the township, which will be of very great service to the intending settler. The timber in the southern portion of the township, as shown on the timber map, consists principally of red and white pine, mixed with hardwood; nearly all the timber fit for market has been taken off. I could not recommend any portion of the township to be reserved for lumbering purposes. The timber in the northern portion of the township is either burnt, or dead from other causes. The soil is a yellow sandy loam, and generally free from stones, particularly the portion of the township east of Chalk River, which will be quickly settled, as it is so conveniently situated with respect to the Matawin road, access to the remaining portion of the township will be by Chalk River. There were nine settlers in the township at the time I executed the survey; they boast of the richness of the soil on which they are settled, all kinds of crops thriving well and yielding largely.

"The township possesses numerous water privileges, where machinery could be effectually worked. The great body of the township is a tract of high rolling land, being a succession of hills and ridges; in the intervening valleys the soil is deep, rich and fertile. Geologically speaking, the formation is entirely granite, which crops out on the sides and tops of the hills. During the progress of the survey indications of iron were met with in several places. No limestone to be found, although it was sought for whenever an opportunity offered. I have no doubt but this township will be rapidly settled."

#### EXPLORATION LINE BETWEEN SPANISH RIVER AND PARRY SOUND.

The following is an extract from Provincial Land Surveyer Fitzgerald's report of survey of Exploration Line for a road between Spanish River, on the north shore of Lake Huron, and Parry Sound on the east shore of Georgian Bay, in the year 1865:—

"By a reference to the plan of the north shore, it will be seen that north of the village of Killarney are three mountain ranges. The northerly one of these, 'La Cloche Mountain' is the principal, and extends westwards to the river La Cloche, forming the shore of Lake Huron, from the mouth of the White Fish River west, a distance of twenty miles.

"The two lesser or southerly mountain ranges, attain about the same easterly as the former does, but their westerly extremities jut out into Lake Huron in bold promontories, some ten to twelve miles west of the village of Killarney.

"Having concluded all necessary arrangements, I proceeded with surveying party and a certain quantity of supplies to a point at the mouth of a small stream called the "Mazeenazing River" about six miles east of the village of Killarney.

"Here is an old Indian settlement containing two houses. Good strips of land extend back along the course of the stream, though not more than two acres of a clearing are made.

"A road to connect the village of Killarney with the great Northern road must cross this stream at or near the Indian settlement. Such a road I have taken the liberty to project on exploration plan.

"On being informed that one of the resident Indians was familiar with the route across the mountains, I employed him as a guide. His services were invaluable to me, as none of those employed knew anything of the country, and much time and trouble might have been uselessly expended in finding our way through the tortuous intricate windings of these mountain passes.

"From the Indian settlement, our supplies, camp equipage, &c., were carried over a portage about a mile long, to a lake at the foot of the south slope of the first, or southerly mountain. Over this lake only a short time was occupied in transporting the material to the portage which leads across the mountain.

"The portage is somewhat over a mile in length, and passes through an elevated

valley, or depression in the mountain, in which is a pretty maple sugar bush, much frequented by the Indians during the sugar-making season. It is skirted by lofty rocks, almost perpendicular, and varying from two to three hundred feet in height, and does not at its widest place exceed a quarter of a mile.

"On entering the lake above mentioned, and after passing to the left a sharp, well-defined point, which dips precipitously into the lake, the mountain presents a very grand and imposing appearance, rising majestically from the water's edge at an angle of about 60°, to a height of five or six hundred feet. It is totally destitute of soil, except in small sheltered nooks and crevices, where a stunted pine, with its hardy companion, the white birch, manage to hold a precarious footing.

"Our supplies, &c., being conveyed over this portage, we embarked across another lake about 70 chains wide, one of a chain in the valley between the middle and southerly mountains, to a portage leading over the former one. This is about a mile and a half long, and so steep in places, that we only succeeded by great labour to transport our supplies, &c., over its rugged sides.

"The general character of this mountain range is broken and precipitous, like the former, destitute of soil, except in small summit valleys, and only yielding, like the former, an odd stunted pine and birch.

"On ascending the top of a high peak, about mid-way on this range, a magnificent view of the great La Cloche Mountain is obtained, stretching off in a north-easterly direction about twelve miles towards Lake Penage, while towards the west it vanishes in the distance along the north shore of Lake Huron. A very broken valley of three miles wide separates this mountain from the middle one, and it is cut up by large dykes of granite and quartz rock, between which are imbosomed a series of small lakes and streams flowing westwards into Lake Huron. In the valley a few patches may be found fit for settlement, but they are so isolated and far between as to render a successful settlement extremely improbable. Having reached the south slope of the great mountain, I was enabled, by means of a narrow winding gorge which leads obliquely through it, to transport supplies, &c., to the northerly slope. It differs in its general configuration from the two former mountains, being made up, as it were, of a number of truncated masses of compact quartz rock, rising gradually to a high elevation.

"While surveying party were engaged in forwarding supplies, &c., myself and assistants made exploration of the country for several miles in a northerly direction, with the view of selecting a favorable tract in which to commence the survey. In this we were quite successful. So soon as due preparations were made, I commenced the survey at a point about half a mile beyond the north slope of the mountain, and proceeded in a north-easterly direction nearly parallel with the base of the mountain for a distance of ten miles, to a point between the head of the mountain and Lake Penage.

"In the whole of this distance the country is good and fit for settlement. The soil is composed of a reddish clay loam of considerable depth, and produces a healthy growth of red and white pine, with patches of land covered with birch, maple and hemlock interspersed. Small bluffs of granite and trap rock occasionally crop out, but they are not of a nature to seriously affect the proportion of arable land.

"Returning to starting point I continued the survey westwards towards the Spanish River, making for a distance of fifteen miles, only a slight deviation from the mountain range. In this distance, exploring line intersects P. L. S. Salter's second meridian west, to which I tied my survey by measurement and observation. The country is somewhat of the same character as that already described, being in places covered with a fine yield of red and white pine timber on a clay soil of good depth, and comparatively free of stone.

"The twenty-five miles so far explored runs through the tongue of land formed by the White Fish River on the north and the La Cloche Mountain on the south side.

"For a long distance north of the river explorers report the country good and covered with bearing timber.

"Exploring line intersects White Fish River within the Indian reserves, about half-a-mile below where it makes a sudden bend towards the mountain, and about thirty yards north of a rocky gorge, on which is a fall of nine feet. The stream does not exceed twenty feet wide at this place, and the water rushes through with great force.

"The easterly bank is a perpendicular rock about ten feet high over the top of water-

fall, while the westerly bank above the fall, in the distance of a chain or two, rises gently. Below the fall this bank rises from the river bed somewhat more abruptly.

"On the course of the White Fish River, for a distance of twenty miles above this point are a number of falls and rapids, presenting many important manufacturing locations, and all easy of adaptation.

"The river, from this place flows into Lake Huron by a series of lakes and rapids, through La Cloche Mountain. It could, I have no doubt, be rendered capable of carrying saw-logs through, and by the construction of slides at a few places, it is my opinion that square timber could be conveyed out to the lake.

"From the White Fish River west, the country for a few miles is comparatively level; the purely pine-bearing tracts give place to patches of land yielding black birch, maple, hemlock, cedar, mixed with white pine and basswood of enormous size.

"A reddish loam soil on a clay substratum is met with through this section; occasionally sunken boulders and coarse stone form the substratum as observed on the roots of the fallen trees.

"Between these patches of hardwood, uplands, beaver meadows, cranberry marshes, &c., frequently occur.

"Narrow strips of swamp land yielding tamarac and spruce of good quality are also met with, but the proportion of low and swampy land existing in this territory is below the average in other parts of the province, which have come under my notice.

"The country runs in this way until the 140th mile post is reached (the miles number from Sault Ste. Marie towards Parry sound) where it becomes broken by knolls and short granite ridges, the slopes of which are in some cases covered with a light sandy soil, yielding a stunted growth of fir, birch, poplar, and pitch pine, while the tops of the ridges are bare granite rock without soil or vegetation. About two miles west of the above mile post, the country is of this unpromising character, from which to Mr. P. L. S. Salter's second meridian west, about three miles, the country is rolling and covered with large timber including tracts yielding beech, maple, and other kinds of hardwood timber. The soil is of a sandy loam character, and apparently of a fertile description.

"From the meridian above referred to, to where exploration line terminates westerly, viz: Spanish River, the country is partially broken by ranges of granite, greenstone, and clay slate rock, occasionally attaining a high elevation. On the slopes of the more gradual of these are found tracts containing soil of good depth and covered with pine, hemlock, birch, balsam, &c. In the valleys between these ridges a stiff, retentive clay is found, in places having a depth of three or four feet, as noticed on the brows of the streams flowing through them from the hill-sides. Much, however, of the present appearance of the soil in these low lands is doubtless attributable to the baking effects of a fire which a year or two previously devastated the country for miles in all directions. To the great destruction caused by the fire in many parts of the forest I have also to attribute difficulties in establishing traces of exploring line; and at the Spanish River, where I required to connect my survey with Mr. Salter's line from Sault Ste. Marie, I barely succeeded, after a great deal of searching, to effect a satisfactory connection. By further searching, I also succeeded in finding the east boundary of the township of Salter, with which I also tied my survey.

"The Spanish River flows very nearly in a direct south-west course from a point half a mile above its intersection with exploring line to a point about the same distance below it. It has a gentle steady current, with sloping banks about 10 feet high. The depth of the stream at centre is about 12 feet, with clay bottom, and could, by running out abutments, have the distance to be spanned even reduced to 100 feet. The approaches at either side are excellent, and can be carried in a straight line for a considerable distance at either side.

"The River Sable forms a junction with the Spanish River a short distance above this point. During the last two years lumbering operations have been carried on in this section, and, I am told, timber of a large and fine quality has been taken out. Having completed this end of the survey, I proceeded, with my party, by a circuitous route of land travel to the Hudson Bay Company's post, at the mouth of the River La Cloche.

"From the Hudson Bay station our course lay for nearly twenty miles, viz: to the mouth of Whith Fish River, along the base of the great La Cloche Mountain, seldom

exceeding more than a mile distant from our track at any point. From this place the mountain trends off in a direction a few degrees north of east to the interior towards Lake Penage, before spoken of. The remainder of our route lay over a short portage on the White Fish Indian Reserve, then around the headlands of the middle and southerly mountains previously referred to. On arrival at Killarney, myself and party were received with the same kindness and attention which greeted us on our first arrival at this place.

"The general effect of these mountain ranges is somewhat monotonous and unpicturesque, but the scenery is beautiful, where we meet occasionally a transverse gorge through which the inland streams escape into Lake Huron. This is especially the case at the mouth of the White Fish River, which, after winding its way through the mountain, makes its debut around groups of islands into the open of the lake.

"About three-fourths of a mile west of the mouth of White Fish River, and immediately west of the Indian Reserve, is the property on which the Wallace mine is located. The tract of land belonging to the property comprises about 1,400 acres, including a few small islands, which lie a short distance from the shore.

"An attempt to work these mines, it appears, was made some fifteen years ago, when a few small shafts were sunk, but owing to the want of means or energy, or, perhaps, to the small proportion of ore yielded, the shafts were abandoned, and are now so filled with rubbish and water as to be hardly perceptible at the surface. The remains of a few shanties and a small wharf are the only vestiges which mark the place where these operations were carried on.

"After remaining a few days at Killarney, while my party were engaged in forwarding some supplies to the Mazeenazing River, about eighteen miles east on the shore of Georgian Bay, I left the village to join my party. On arrival at the mouth of the river. I concluded to follow up the stream for six or seven miles, and having selected a favorable point for the construction of a bridge, I commenced to survey exploring line in a north-west direction to P. L. S. Salter's principal meridian. This meridian I adopted for a couple of miles north, and then turned off on a course a few degrees north of west generally, to connect with the part of survey first performed to the head of La Cloche Mountain near Lake Penage. The country drained by the Mazeenazing River is of a rough, broken character, containing a poor growth of timber, and affording only a small proportion of arable land, which would be hardly worth attention for settlement purposes. From the principal meridian west to where the parts of survey connect the country improves, and has in places a fair growth of timber, both hardwood and evergreens. The soil is sandy loam, with a mixture of clay soil, and is of a depth sufficient to satisfy agricultural products. Towards Lac Penage the country is still better, and explorers report that north of it a fine tract of land, covered with heavy timber, extends for a long distance.

"Of this lake, I was informed by an intelligent old Indian, that in the summer season the water is so pure and transparent as to render the bottom visible from 30 to 40 feet. Here the delicious salmon trout, weighing from five to twenty pounds, are found in great number and of the finest quality. Pike, pickerel, perch, herring, and several other kinds of fresh-water fish are also in abundance.

"The junction formed by a road connecting Killarney village (see plan) with the Great Northern Road, will be at or near the point where the latter intersects principal meridian.

"At the mouth of the Mazeenazing River in a good substantial frame saw-mill. It has not, however, been worked for a couple of years past. It is known as Waddell's mill. Taking up the survey at intersection with above stream, I proceeded eastward towards the French River. For some three or four miles the country presents a rather barren aspect, being composed of flat granite rock, with small groves of pine and tamarac swamps alternating. Approaching the head waters of Beaver Stone Creek, which flows through the Indian Reserve (called by the Indians Bearstone Indian Reserve), the country improves, particularly through the reserve, where a fine tract of country, well suited for settlement, exists. This tract is covered with heavy pine, birch, maple, &c. The country along to the Warrapitac River is somewhat of this nature, occasionally fine tracts of undulating lands occur, yielding a mixture of heavy timber which has, however in many places been partly destroyed by fire. The soil is composed of clay loam, and appears to

be of a character pretty well adapted for farming purposes. Through the tract just described a great irregularity in the motion of the magnetic needle was observed, the variation on a short distance varying in many cases between 10 and 30 degrees from the astronomic meridian, the result, doubtless, of the existence of large quantities of mineral matter in the rock formation. The season, however, was so extremely unpropitious to carry on a search for minerals that I lost no extra time in investigations of this kind.

"The Wanapitac River, so called from the resemblance of the lake out of which it flows to a tooth, is a beautiful stream about 50 yards wide. The banks, where crossed, are 10 feet high, of clay or rock, bottom sloping gradually to the water's edge, depth of water at centre 12 feet, with stiff mud bottom. A bridge could easily be constructed over this stream. On its course are numerous falls and rapids affording any amount of mechanical power. At the elbows or bends are small deltas of considerable extent, yielding white and blue oak of average size. From the river eastward to within a few miles of the French River the face of the country is rugged and is a good deal broken by small bluffs and ridges of gneiss, tray and clayslate rock. The timber on this tract is worthless in a commercial point of view, and the region itself totally unfit for settlement. A belt of fair land, some four or five miles back, runs along the north shore of the French River at this part of it which could be pretty generally cultivated, though the timber on it is scarcely indicative of a productive soil.

"Exploring line cuts the French River at a point a few chains east of the source of the branch called the Grand Recollet.

"The stream is very deep at this particular place, and was at the time I crossed it so covered with bad ice that I could not get a sounding. The approach on the north side slopes gradually to within a few chains of the bank along which the road runs easterly some seven chains, then by an easy curve turns straight across the north-west part of the stream towards the opposite bank.

"The river is here less than 75 yards wide, and a flat rock sufficiently large for the base of a pier occurs nearly mid-way in the river. In the summer this rock is a foot or two above the water level, but probably covered by a depth of four or five feet during freshets.

"From this point I found it necessary to follow a more easterly course than I at first intended, owing to the rocky character of the island to be passed over, which separates the two branches of the river. Proceeding a short distance, a small narrow gorge is crossed, the water flowing through which connects the two Recollets, and separates the above island from the Island Indian Reserve. No difficulty whatever exists to the construction of a bridge over this small stream. The exploring line from this place runs eastwards through the reserve mentioned. This is a splendid tract of land heavily timbered with birch, maple and basswood, mixed with large pine and birch. It is generally level and contains soil of a most fertile character.

"An Indian village of some five or six houses, with a population of about thirty persons, is situated on the south-east shore of the island, and though the settlement is 40 years old, not more than 10 acres of a clearing are yet made.

"Another rocky gorge similar to that above described, separates, on the east side, the island from the main land, and offers facilities for the construction of a bridge equal to the former. A short distance east of this gorge is the head of the Petit Recollet, but I deemed it advisable, on account of the broken nature of the country in this direction, to locate exploring line at a suitable place on the Recollet. Here it is about 65 yards wide, with only a depth of 8 feet, subject to little or no change of level.

"The banks at each side are composed of clay, and slope very gradually to the water level about 10 feet. A bridge can easily be thrown across, and as no other, except canoe or small boat navigation is likely to be required on this channel, the bridge need not be more than eight or ten feet over water level. Extending southward from Petit Recollet to the River Majiwajinie, the country is very level, and covered with a clean growth of soft maple, birch poplar and pine, produced on a sandy soil well suited for agriculture.

"The Key River, rather appropriately so called, is a long narrow inlet of the Georgian Bay into which, at its head, flow the above stream from the south-east, and another small stream from the north. The Key River is about nine miles long and navigable for small boats to within the same distance of the Indian village on the Petit Recollet. It is the

natural, as well as the most convenient, route by which the good lands described may be reached. Between the Majiwajinie and the Maganatewan Rivers the country is barren and rocky and much broken by the lakes and streams flowing into the latter. Several tracts of fair land, fit for settlement, however occur. The timber met with is chiefly white pine, hemlock and balsam, and the soil a sandy loam. On the Maganatewan River are numerous falls and rapids. The banks are generally steep and sometimes precipitous, but were crossed by exploring line; a good site for a bridge and approaches has been selected. The banks at this point slope gradually. The bed of the river at centre not more than three feet deep. Patches of good land occur a short distance back, from either side, along the course of the river.

"From the Maganatewan, south to Parry Sound, are several hardwood tracts of land, though a portion of the country has a partially broken surface. On the whole, I consider this tract capable of affording fully 60 to 75 per cent. of arable land. It is covered in places with exceedingly fine beech and maple, while other parts yield a fair growth of pine, hemlock, &c., and if opened up for settlement, and proper facilities held forth, would in a short time become a thriving locality.

"At Parry Sound the nucleus of a promising village has already been established. A magnificent saw-mill, owned by the Messrs. Beatty, is now in constant operation, and affords employment to a number of men. The Parry Sound Road, from the Muskoka district to this place, is also in progress of construction, and it is expected to be open all the way through before the expiration of the present year. This will afford many advantages for ingress and egress during the winter season to those requiring to occupy lands in the interior of this country.

"The River Seguine, which flows through Parry Sound, is crossed by Great Northern Road above the mill above referred to. At this place it is 16 feet deep at centre, and the water way can be reduced to a width of fifty-five or sixty yards, which can, by means of two piers, be conveniently spanned over. About half a mile south of this place I met with the Parry Sound Road, with which I connected my survey, and terminated it at the same point.

"The distance actually surveyed is one hundred and fifty miles, to which, if the number of miles traversed by explorers be added, would give a total of nearly one thousand miles of exploring lines, embracing an area of one million one hundred and fifty thousand acres.

"Though perhaps not more than one-half to two-thirds of this territory is actually fit for settlement, yet, in view of the immense quantity of valuable pine timber, of the undoubted mineral wealth yet undiscovered in this region, of the many important fishing stations along the north shore, of the construction of a canal *via* the French River, and above all, being our only land connection with the Great North-West territory, the subject of annexing which to Canada at present occupies so large a share of the public mind; yet, I say, in view of these considerations, the country will doubtless, ere long, become the scene of active and energetic occupations, and form the home of many a happy and prosperous settler.

#### BASE LINE FOR CERTAIN TOWNSHIPS ON THE EAST COAST OF THE GEORGIAN BAY.

The following is an extract from Provincial Land Surveyor Silas James' report of survey of base lines for certain townships on the east coast of the Georgian Bay, and traverse of a portion of the Maganatewan River, in the year 1865:—

##### 1st.—*Base Line A. B.*

"The country through which this line passes is very diversified in character; between Skeleton Lake and Lake Rosseau the land is of very good quality, timbered with healthy hardwood, occasionally mixed with pine, elm, birch, hemlock, &c., while red oak and ironwood are found on the elevated and rolling lands; adjoining Lake Rosseau the country is more rugged and rocky, but the prevailing timber is hardwood, and the land is generally of good quality. Near to Lake Joseph, on the east, on the peninsula between its bays and for nearly three miles westward of the lake the country is of superior character, and affords some excellent, and much really good hardwood land. From thence on to the waters of the Georgian Bay the land, generally, is of inferior quality. The rock over considerable

portions of elevated country, crops out to the surface, having only a thin covering of moss, while generally the soil on it is only a few inches deep, and does not admit of profitable cultivation. There are throughout the line extensive tracts of low ground marshes and swamps, timbered with a good growth of tamarac, cedar, birch, poplar, &c., and interspersed, are tracts of pretty good hardwood land. The peninsula between the Georgian Bay and one of its inlets, crossed by the line, is covered with hardwood and the land is of good quality. I found no timber of merchantable character on this line; pine is not abundant, where it exists in any considerable quantity and is of very inferior quality, scrubby and knotty; occasionally, pine of good quality is found intermixed with hardwood, particularly on the peninsula of the Georgian Bay, above referred to, but so scattering as to preclude the idea of its being merchantable; the trees of largest growth were found in the neighbourhood of Lakes Rosseau and Joseph, where maples and hemlocks were observed of three feet in diameter and of average height; on the last mentioned peninsula a few pines were observed of about three feet in diameter, and the timber generally along the line was rather small growth.

In the sections where good hardwood prevails, the soil is a red sandy loam with a thin covering of black earth. On the high lands there is only a few inches of soil and gray sand, the deposition of decomposed gray gneiss, with a covering of black soil, is sometimes found; in the swamps and beaver meadows, interspersed among the rough rocky portions, and generally along the line, there is a deep rich black soil which efficient drainage might render valuable farming land.

The geology of the country through which this line runs is of the gneiss system, and varies from a fine grained gray to that of coarse grained reddish gneiss; the upturned edges have the same general bearing as the lakes shewn on the plan of survey and the dip, ranging from south-west to east, seldom exceeds  $45^{\circ}$  or  $50^{\circ}$

2nd.—*Base Line No. 2.*

"This line commences on base line No. 1, about 86 14 chains west of the west shore of Lake Joseph; from this point, for a distance of about 707 chains northward, the country is very much the same in character as in the vicinity of that lake. It is principally timbered with good healthy hardwood of average growth, occasionally intermixed with ironwood, red oak, pine, hemlock, birch, &c. From this point northward to the east branch of the Perry Sound River, the country is more broken and is similar to that described on base line No. 1, as unfit for settlement. The rocks in many places crop out to the surface and are covered with small pine, red oak, balsam, &c. From the east branch of Parry Sound River to a distance of about 800 chains northward, there is a tract of country very much resembling that adjoining Lake Joseph at the commencement of this line and affording good farming land; it is covered with hardwood, basswood, elm and thick undergrowth of small maples, and the soil is a light sandy loam covered with a rich black mould; proceeding northward the country becomes more broken, rough and rocky. Occasional tracts of good land are met with, particularly on the south-west of Loon Lake, but generally, the land is of inferior quality, and not well adapted for settlement.

"In its timber and soil the country traversed by this line bears close resemblance to that through which base line No. 1 passes. No timber of merchantable character and quality was found. There are pines of good quality in considerable numbers scattered through the hardwood lands, but no pinery was met with.

"There is but little change in the geology of this line from that of base line No. 1 at its commencement, and as far as concession VII, of the townships I and J, the upturned edges of gneiss take the same general direction as on base line No. 1, changing from a fine grained gray to a coarse grained red, with a south-westerly dip ranging from an acute angle to one of nearly  $90^{\circ}$ . From this northward to the River Maganetawan, the upturned edges of the rocks (as may be seen by the general range of the lakes) take a north-easterly and south-westerly direction, and show from an almost horizontal to a perpendicular dip towards the south-east.

"The country opened by base lines Nos. 1 and 2, is copiously watered by numerous lakes and rivers, in which fish of various kinds are found in great abundance. The rivers afford valuable water power from their innumerable falls, which could be rendered available at a small outlay, and the country admits of easy access from the waters of the

Georgian Bay, the north and east branches of the Parry Sound River and through the Colonization Roads and chain of connected lakes which lie within it.

3rd—*Traverse of Maganetawan River.*

“ I traversed this river from the point where it is intersected by base line No. 2, to its mouth, during a very dry season and when the water in it was unusually low. It abounds in rapids and falls affording excellent water power throughout that distance ; where these occur the river is generally contracted to from 50 to 100 links in width ; in many places in its course the river expands into lakes and bays of considerable extent ; it flows through an inferior country, marshy, broken and rocky, timbered generally with small scrubby pine and occasionally small hemlocks, cedar and balsam, and towards the mouth of the river the country becomes worse in character. It consists principally of rocks with a slight covering of moss and a few scattering trees. On the south of the Island Lake, there is a small tract of country covered with red and white pine of very good quality, some of the largest trees measured about four feet in diameter, but the average diameter would be about two feet ; this tract of pine is about sixteen miles from the mouth of the river, the falls and rapids in which present obstacles to the running of timber, and I am very doubtful whether it can be regarded as available for merchantable purposes ; the pine here was considerably injured by fire, which ran along the south side of the river very nearly over the whole extent traversed, and which was burning while the work progressed.”

APPENDIX No. 30.

EXTRACTS FROM REPORTS OF LOWER CANADA SURVEYS.

ARMAND—BY P. L. S. G. A. DOUCET.

\* \* \* “ Having been compelled to abandon the continuation of the road line, or the front line of the 9th range, owing to the mountainous aspect of the country, I advised those interested in the matter to make efforts to have the direction of the road line changed so as to pass through the rear of the land on this road, where good land is found on both sides, for a considerable distance, and where a good road could be made. I then continued laying out the lines of the 10th and 11th ranges, after having chained their depth along the rear line of the lands on the Blue River Road. The soil here is generally good and favorable to cultivation, though hilly in some places. The woods most in abundance are balsam, cedar, spruce, with maple in different localities. Spruce fit for building purposes is abundant, but good pine is very scarce.”

TOWNSHIP OF BOUTHILLIER—BY P. L. S. JAS. MCARTHUR.

“ The land in the township of Bouthillier, fronting on the River du Lièvre, is well suited for agricultural purposes ; more than one-third of said lots are already occupied by the lumbering establishments of Messrs. James McLaren & Co., and Thompson & Co., who have large farms in an excellent state of cultivation thereon ; said establishments afford a convenient and profitable market for the sale of the surplus produce of the settlers who reside in the vicinity of their lumbering operations.

“ The banks of the river are for the most part level, and the soil is fertile, being composed of clay and sandy loam, which are easily cultivated ; the timber is chiefly hardwood, consisting of ash, elm, birch, beech, maple, &c. Pine timber does not appear to be in abundance, neither is it of good quality, although two saw-log *chantiers*, belonging to Messrs. Thompson & Co., are in active operation within the township this winter. There are numerous beaver meadows throughout the township, which produce a large quantity of wild hay. There are also numerous creeks and lakes, which abound in excellent fish, which are taken in large numbers by the Indians and settlers. Besides the lumbering

establishments already mentioned, there are only five actual settlers in Bouthillier, two of whom are Indians; there are, however, a considerable number of settlers in the vicinity of Lake De Camp, in the adjoining township of Wabasee. These settlers suffer many privations from the want of roads, churches, mills, schools, and post offices. A road could be easily made from Lake De Camp round the north end of Grand Lake, to intersect the Gatineau Road, at or near the Six Portages; the distance would not be more than 16 miles, and it is the only practicable route with which I am acquainted. It is useless to expend money for surveys in remote sections unless good roads be constructed to render the lands thereon easy of access to the intending settler.

“The best lands on the River du Lièvre and Gatineau are allowed to remain vacant in consequence of the want of roads during the summer months, which causes the price of provisions and clothing to be exceedingly dear in such places, and consequently retards the progress of settlement.”

ESTCOURT.—BY P. L. S. E. CASGRAIN.

“Having fully completed my survey in accordance with my instructions, my operations were closed on the 27th January, 1866.

“The last part of this township which I surveyed is well adapted for cultivation, the land being mostly level, free from rocks, and well watered. It offers so fair an opening to settlers that I would strongly recommend the continuation of the Pohenagamook road along the south-west shore of the lake, and to carry it across the River St. Francis, at the south-west end of the lake, whence the river flows; to do this, as the American frontier intersects the same point, it would be necessary to construct a small pier at very little expense, about ten feet wide and a hundred feet in length, to the north-eastward of the American line, so as to allow sufficient width of road-way, and then carry on the road line north-easterly along the River St. Francis till it reaches Blue River, as shown on my plan of survey.”

GAYHURST.—BY P. L. S. BIGNELL.

“This portion of Gayhurst is well timbered and exceedingly well watered, there being several heavy streams running through it, all of them offering an abundance of water-power. The land between these streams is elevated, and comparatively level; the soil is good and fit for settlement, and there is no doubt that the early completion of the road through the township will be a great inducement to intending settlers.”

GASPÉ OIL REGION.—BY P. L. S. M<sup>CDONALD</sup>.

“The measurement of the lines and area of the lots being given on the plan, I shall beg to dwell now on the nature of the country traversed by me in my operations, viz:—

“The south-eastern section presents various features of hill and dale, diversified and intersected by numerous streams and rivulets, the slopes of which are more or less abrupt, and rising to elevations of considerable height. There are, notwithstanding, several fine and well-wooded valleys, and on the hill-tops may be found, in parts, good soil; but in general the plateaus are limited in extent, and rather poor in soil and growth of timber, as there are but few locations on the rivers St. John and York adapted for settlement, though a limestone formation prevails to the anticlinal, at centre of 52 and 59. The rivers, again, are very rapid, and offer on their banks no extent of level land, but the hills rise in many parts from the water's edge, and are more or less steep and rocky in their ascents and summits. Higher up stream the land even becomes more broken, elevated and sterile, particularly above the anticlinal of sand, shale, and limestone. Again, pine timber is to be seen along the river and hill sides, but it is not of a very good quality; but spruce abounds, of a good size, in the lower section.

“My centre line, as well as line from lot 43 to 50, traverses—as shown on the plan—a very rolling country. 49 and 50, on the other hand, present, in their front, barren and rocky elevations, denuded in their slopes of nearly all growth whatever. This is a sandstone formation, to York river, along which, from the falls upward, a bituminous shale is to be met with; and here and there limestone crops out along the beds of streams, and the river, in places.

“On the Mississipp, and where my centre line intersected a branch thereof, and

eastwardly, the bed of the stream and along it is limestone ; but, except on the Dartmouth the superincumbent rock is sandstone.

" My line again, from Gaspé Bay south from 36 to 37 inclusive, passes over a very elevated region, the highest being on the line west of the Little Forks, west of the centre of 40—from which last there is an extensive and uninterrupted view, east and south eastwardly, of the line of coast from Ship Head to Point Peters—and centre of 39; and the mountains at the Little Forks and Mississippi streams are more precipitous, so much so, that it was at the risk of men's lives they could follow on each other's paths, or ascend with a heavy pack on their backs—on one occasion I found the packmen employed in hauling up their packs, the toil was so excessive. Such an inaccessible region could therefore scarcely prove favorable in respect of soil and timber.

GASPE OIL REGION—BY P. L. S. BLAIKLOCK.

Having now given a concise report of my proceedings, I have the honor of submitting the following report:—

" The tract of country embraced within the limits of my survey, and known as the 'Gaspé Oil Region,' lies to the westward and contiguous to the townships of York, Gaspé Bay (south), and Sydenham (the most of the surveyed lands in which have been conceded. It is traversed from west to east by three main streams, known as the St. John, York and Dartmouth Rivers, these streams run in narrow valleys which are bounded on either side by bold and precipitous mountains, from eight to nine hundred feet in height; these main streams are again fed by innumerable smaller tributaries, which rise rapidly from the lower levels to the summits of the hills in which they take their rise. They have actually no valleys, but run in narrow and precipitous ravines or gorges, which cut the country in every direction, making it very difficult to traverse; to such an extent does this prevail that were it not for the valleys of the main streams, it would be almost impossible to penetrate the interior at all. The most southern portion of this tract, namely, that lying between the southern outline and the River St. John, comprising lots from No. 55 to 62, inclusive, rises very rapidly from the bank of that stream to an elevation of eight or nine hundred feet; the country then becomes flat, but terribly cut up by numerous tributary streams, forming as many deep and precipitous ravines, varying from one to eight hundred feet deep. The hills are clothed with dense forests of fir, white birch, white and grey spruce and the soil is generally of a light grey loam mixed with clay of a good quality. The rock met with upon this section is chiefly of clay-slate and limestone, but is rarely seen except in the bed of the streams, and on the steep sides of the ravines. This land is generally free from rock and stones, but is so cut up and broken as to offer but little prospect of its ever being made available for agricultural purposes.

" The country lying between the St. John and York Rivers is also very mountainous and broken, being cut up by the tributary streams of these two rivers. About one-half of this tract, namely, that portion lying along the former stream, is thickly clothed with a good growth of fir, white and grey spruce, white birch and cedar, with a few pine scattered along the banks of the larger streams. The soil is more of a sandy loam, and the sandstone is seen cropping out in several places.

" The other portion, lying along the York River, is less mountainous, the land rising more gradually from the bank of the stream. A fearful conflagration has passed over this part of the country about 110 years ago, extending westerly from the centre line far beyond the limits of my survey, and northward to lots 28, 22, 14 and 13, taking in all the head waters of the Dartmouth; this fire must have burned with the greatest intensity, for it appears to have destroyed everything combustible within its reach, leaving scarcely a vestige of the primitive forest behind. The hills are now covered with a second growth of white birch, poplar, spruce and fir, not over six to eight inches diameter, vegetating upon a cold hungry gravel of limestone; these hills are, many of them, still very scantily timbered, and the soil, composed of sharp angular pieces of light colored rock, which present the appearance of having been intensely heated by the fire, and then suddenly cooled by copious rains, causing it to split into innumerable fragments, upon which the action of the atmosphere of a hundred years has had but little effect.

" From the last described section northward, across the Dartmouth, and on to the

northern outline, the country is rough and broken, although the hills are not so high as those on the River St. John, but still it is much cut up by steep ravines. North of the Dartmouth, the timber is of a good average growth, and the soil a light loam, mixed with clay, generally free from stones.

"The rock (sandstone, limestone and shales) is occasionally seen cropping out in the water-courses and on the summit of the hills.

"Although the timber and soil are of a medium quality, yet I consider the country generally too rough and broken for any regular or connected system of settlement being made.

"The only level or flat land met with throughout the extent of my survey was found in this section, and around the head waters of the Dartmouth, but the part traversed by my lines was either swamp or poor, cold sandy soil, covered with an inferior growth of spruce timber.

"Having described the general features and character of the country embraced within my survey, I now proceed to define more particularly the lines run in the field.

*"The South Outline.*

"Beginning at the south-east angle of the township of York, I determined, by astronomical observations, the true meridian and the variation of the magnetic needle. The latter I found to be  $25^{\circ} 14'$  west. Having planted a large squared cedar post, duly inscribed, for the south-east angle of York, and numbered 56, I thence laid off the south outline of the survey upon the astronomical course due west, which I ran to the distance of 1,463 chains, 20 links, equal to 18 miles, planting posts for the subdivision into blocks of 5,000 acres each, upon a front of 229 chains 13 links. I laid off lots from 46 to 62, the latter having a front of only 87 chains 42 links. This line followed nearly along the high table land dividing the waters of Malbay from those of the River St. John. Many of the small tributaries of the latter stream were crossed, running in narrow and steep ravines from one to three hundred feet deep. These ravines descend very rapidly towards the main stream, near to which the hills bordering them attain their maximum attitude of eight or nine hundred feet, many of them are so steep as to be almost inaccessible, and springing from the very margin of the streams. They afford no chance of making roads to gain the higher lands.

"From the foregoing description it will be perceived that the country comprised within the limits of my survey is not, from its mountainous character, calculated to form a settling or agricultural district. There is likewise but little timber suitable for manufacture or commerce. Its only remaining value, therefore, consists in its supposed mineral wealth, but on this point I am not competent to judge; but from my own observation, and the general indications, I am by no means sanguine as to the result of the experiments now going on. That it contains both petroleum and galena, I think, has been satisfactorily proved, both from the surface indications discovered in the district, and also from the boring and mining that has already taken place, but that either will ever be discovered in remunerating quantities, I have strong reasons to doubt, from the fact that the geological formation of the country is not highly favorable to the production of these minerals."

JONQUIÈRE.—BY P.L.S. E. A. DUBERGER.

"As to the physical geography of the country, it is in general very favorable, with the exception of a few small rocky tracts, where the vegetation is mostly destroyed by recent and old fires, such as the rear of the lots 13 to 18 inclusive, of the 7th range, and from the south-west borders of River aux Sables on the 8th range to the vicinity of Nos. 10 and 11. The remainder of the country traversed by the above range line is very favorable in every respect, although it traverses a narrow swamp, which will be easily drained in the future. The timber consists of white birch, white spruce, fir, and a few tamarac and brushwood; a few maple trees are occasionally seen, but, owing to some unknown cause, are dry and produce no juice. Maple trees in Saguenay, or County of Chicoutimi, are affected with the same disease. The soil is composed of rich loam, intermixed with rich grey sand, on level tracts, in the valleys and in the vicinity of brooks, the borders of which are clothed with alders; the soil is argile, or clay, and very proper for agricultural purposes.

The country traversed by the line dividing ranges 8 and North is generally uneven, but the soil and timber are generally as above described. These remarks can be applied to the south-east side of the river, which presents all the advantages that can reward a courageous pioneer. The spots colored green on the plan shew where *abattis* have been made by different parties, who, I am told, intend to extend their clearances this spring.

"The country traversed must have been very rich in pines formerly, if we can judge by the numerous team roads crossed and the innumerable pine stumps. Nevertheless, amongst the still numerous standing pines of an inferior quality, yeomen from near and far, with hard labor and patience, manage to employ themselves during the long winters, scraping the pines from one old shanty to another. It is a great succour for those whose means are limited."

MANSFIELD.—BY P.L.S. L. BRABAZON.

"The land on the east side of the Coulonge is generally good farming land, and will in all probability soon be all taken up. The land for the first mile and a half, on the west of the Coulonge has been in great measure stripped of the timber by fire; it is rather poor soil, though with exceptions, but it will also be in a great measure taken up. Beyond that to the centre line the land is very rough on the 5th range. On the 6th range, it is not quite of such a mountainous character, but it is pretty rough. There are large tracts covered with sugar maple, while will lead to a great deal of the land being taken up for sugar bush, though comparatively worthless for anything else.

"The centre line throughout is about the roughest line of the same extent I ever saw. There are three precipices considerably over 200 feet high that cross it nearly at right angles.

"The portion of the 6th range, south of the large lake is fit for settlement, but is rather isolated. The portion of the 6th range north of the large lake, say from lot No. 38, is quite worthless, except a small valley that runs from the west end of this lake towards Waltham. The settlers on the east of the Coulonge are in a bad way for roads, having none so far, except those opened by lumberers, and I am inclined to think a little assistance given towards a road along the Coulonge would do a great deal towards colonising Mansfield, Leslie, Pontefract and Huddersfield.

"The means used for developing the resources of the part of Waltham east of Black River, are those of which the north-west portion of Mansfield can best take advantage; a road running parallel to Black River, with which the Mansfield roads can communicate, being probably that which would advantage both townships most."

METGERMETTE SOUTH.—BY P.L.S. F. LEGENDRE.

"The land in the first range east of the centre line is very good, that on the west is pretty fair, but swampy in parts. In the second range it is of good average quality. Towards the west, however, there are swamps, as indicated on the plan.

"In the third range it is very good, except near the River St. John, where it is low and swampy. In the fourth range, near Linière, it is good, but there are also swamps along this range. Near the centre line, however, there are very large sugaries and fine soil.

"There are several mill sites in this township, one being near a road leading from the sugaries to the Kennebec. This road is used by those frequenting the sugaries. Nearly all the merchantable timber has been cut, there being but a few pine and tamarac trees of any size left. I see no difficulty in making colonization roads along all the range lines.

"I think it is right to call attention to the valuable sugaries in the third and fourth ranges.

"The heavy falls of snow which occurred during my survey rendered it no easy task to determine the quality of the soil, which I was, in some cases, obliged to estimate from the lay of the land and the character of the wood upon it."

METGERMETTE SOUTH.—BY P.L.S. TEMPLE.

"The first six ranges of Metgermette south are flat and level, the soil of very good quality for cultivation.

"The other ranges are but little adapted for cultivation, owing partly to the poorness

of the soil and the number of lakes and rivers which intersect them; these latter abound in fish. The best timber has been all cut down and carried away.

"That portion of the land I have surveyed is tolerably level, but is bare of good pine timber, nothing being left but spruce of little value."

PAKINGTON, BY P. L. S. DUVAL.

"I made a survey of a lake which I came across on the south-west line of the township. The amount of land contained in my survey is 9,836 acres, not including the south-west line of Pakington, 808 chains in length.

"The whole township is favorable to cultivation, offering many inducements to the settler. The soil is a rich grey loam, and the timber large and lofty, showing the excellence of the soil.

"Although I made this survey when there was a layer of three or four feet of snow on the ground, I can state with certainty that the land is not rocky, having planted all my pickets firmly in the ground. I encountered very few river or streams, the soil being generally sandy; there are, however, some fine valleys or low lands, all favorable to the production of grain of all kinds. The mountains in this region are not very rocky, nor very steep. Hardwood abounds, though on the lots which my lines crossed I found very little birch; in many places I found fine groves of maple, well adapted for sugar-making settlements.

"There are also cedar groves, which, though small in extent, are of great value, the cedar trees having a girth and height which are quite uncommon, and the soil on these spots is very rich. Old shanty roads cross this township in all directions. There are but few good pine trees.

"I feel certain that hardy settlers will ere long confirm my opinion of this township, the only obstacle to speedy settlement being the want of roads."

PORTLAND WEST,—BY P. L. S. RAUSCHER.

"Concerning the topographical features of the tract of land comprising my verification survey of Portland West, I beg to state that it is traversed, besides the River du Lièvre, by three distinct water-courses.

"Firstly, by Priest Creek, which flows in a south-easterly direction, through a very fertile tract of land along its whole length, to the confluence with the River du Lièvre, which occurs in the fourth range of the township of Portland. The tributary lakes and creeks of said creek are very numerous.

"Secondly, and south of the former, by the chain of lakes being situate in the second, third and fourth ranges, and emptying into the River du Lièvre, in the third range of the township. The general course of these lakes and connecting creeks, is from north-west to south-east. The country surrounding these water-courses is, with exception of those of the lakes in the third and fourth ranges, not very suitable for agricultural purposes on account of its mountainous nature. The third water-course, situate in the south-west part of the township, is formed by the tributary lakes and connecting creeks of the River Blanche, which empties into the Ottawa River. The land surrounding these lakes and connecting creeks is, of a hilly nature, yet affords good farming land.

"Concerning the timber which grows on the tract of land comprising the verification survey of the township of Portland West, I beg to say that almost all the level parts of the township which I have traversed, are covered with hardwood and evergreens; but on the mountain ranges, the evergreens, and particularly white pine, are prevalent."

RAUDOT, BY P. L. S. FOURNIER.

\* \* \* "In addition to my notes of survey, I think it my duty to make a summary report of the qualities of soil, woods, &c., traversed by my survey.

"The soil in the first range is generally good, with a mixture of sandy loam, in which I found some hardwood and establishments for making sugar. The land is in general low, but consisting of good clay soil, fit for cultivation.

"A road could be made through this range, from end to end, with only a few curves to avoid two small lakes and a hill.

"The soil in the second range is mostly good at the north-east end, through the whole depth of the lots; but in the middle and south-west parts, not above two-thirds of the lots are of any value. The remainder, near the line between the second and third ranges, is low and swampy.

"A road would never be practicable through this line (second and third ranges) from one end to the other, for that reason.

"The third range is generally good, except a small part of the lots on the line between the second and third ranges. There is a considerable number of establishments for making sugar, as also near the front of the fourth range. A good road would cause a speedy settlement on these lands.

"Throughout all that part of my survey, I found the surface of the land very uneven, interspersed with hills and valleys, with very little level land; still there are no quarries nor rocky, uncultivable mountains.

"A road is practicable through this range, with the exceptions detailed below.

"The above lots are covered with pine timber, white and black birch, maple, beech and spruce. All the kinds of wood fit for saw-logs in this locality, and along the borders of the river, have been carried off many years ago. Pine stumps are found here and there, but not a single standing tree.

"There are three or four lumbering establishments, for making pine logs this winter, but they found nothing but culls.

"A few logs were made from trees long fallen.

#### RIPON, BY P. L. S. JOHNSTON.

"I have the honor to report that, on the 3rd day of April, 1865, I completed the survey and subdivision of the residue of the township of Ripon. I found great difficulty in surveying the residue of the township, on account of its mountainous character; but I am glad to be able to state—on account of the future settlement of the country—that the range lines and west boundary traversed the very roughest parts of the township, leaving between many fertile valleys and some large tracts of good rolling land, well adapted for agricultural purposes.

"Some few settlers have already found their way into the part surveyed by me, and are making great progress in their agricultural pursuits. Considering the time they have been there they have made large clearances, and grow fine crops of different kinds of grain and roots, such as wheat, oats, rye, barley, buckwheat, Indian corn, flax, &c., &c.; the latter is invariably raised by them all, and woven by them into a fair quality of linen.

"They appear to succeed remarkably well in the growing of wheat, as the land in many of the valleys seems to be well adapted for its culture, it being a mixture of blue clay and dark rich loam, which, together, form a very enduring soil for the culture of exhausting cereals. The general character of the soil—where it is in any quantity on the rolling lands—is a dark sandy loam, and in many places a blue clay sub-soil. The valleys are generally arable, and much of the rolling land is well adapted for settlement.

"There are some good localities for roads throughout the part surveyed by me, although they may not be in direct routes, yet they might be made to answer all the purposes of the settler.

"The settlers throughout this part of the country find it to be a very great tax upon them whilst they are clearing their farms—as at first they have no other means of support for themselves and families but what little they can earn from the making of potash—that they should have to make their own road, in order to take to the nearest market the fruits of their first labour.

"If some small grants could be given towards the construction of roads through this and some of the adjoining townships, it would be highly encouraging to those already located on the wild lands, and would hasten the settlement of the country.

"The timber throughout the part surveyed by me is generally of a very large growth, and is chiefly hardwood, mixed with a large quantity of good merchantable pine and hemlock (maple and black birch predominating). The only notable streams in the part surveyed by me is a small part of Scryers' creek, running along the north boundary of the township, upon which one John Hughes has erected a grist mill, within the 7th concession of this township, and I believe soon intends erecting a saw-mill near the same place.

"The other is a portion of Sinsic creek, the general breadth of which is about seventy-five links, and which runs through the south-west part of the townships, forming a junction of the two branches near the south-west corner. This stream is at present sufficiently navigable to drive some logs, and might, with a little labor, be made sufficiently navigable for squared timber."

BOUX, BY P. L. S. FR. S. LEGENDRE.

"The level of this township is much higher than that of Mailloux, and the soil generally fit for cultivation, though very uneven; there are neither rocks nor swamps, the slopes are composed of grey and yellow loam, remarkably free from rocks.

"The fall of the land in the 2nd, 3rd, and 4th ranges, is towards the south, and on that account favorable to early cultivation. Settlers have already commenced clearing with the hope that the Government would lay out these lands; one settler in particular, has been located nearly four years on the Mailloux Road; there are five or six families on the sixth range, who have been there about five years settled; several others are about to join them in the spring.

"The settlement in this locality will, in a short time, be productive of good results.

"The road through these ranges affords great facilities of communication, but having been partly made during winter, and in very bad weather, during the shortest days, along the upper lands where the snow is deepest, is consequently effected by the obstacles met in its construction, though the snow was not sufficiently deep to prevent the pickets from being well planted.

"The bad state of the roads in autumn, has caused the cost of transport to be very high, not more than four hundred pounds per load could be carried."

SUFFOLK.—BY P. L. S. H. C. SYMMES.

"The general features of the land in that portion of the township of Suffolk surveyed by me are high, mountainous, with fertile valleys intervening.

"The level flats of land worthy of particular mention are: 1stly. That portion of the sixth and seventh ranges lying east of the centre line and adjacent to the township of Ponsonby; also, that portion of the fourth, fifth, sixth, and seventh ranges, through which Leduc's exploratory road line passes.

"I would here respectfully suggest that the projected colonization road line surveyed by P. L. S. Leduc be changed. One reason I advance for a change in this road line is that as Mr. Leduc's line runs near the western boundary of the township (on the seventh lot), and on a course nearly parallel with the western boundary line of the township of Suffolk, it will fail to open up the township for settlement. Were the road line, however, to run across the township in a north-easterly direction, it would not only serve to induce settlement into the interior of the township, where the really valuable tracts of arable land are situated, but this road could, at a future time, be extended into the adjoining township of Ponsonby, thereby presenting a great inducement for settlement in that township."

MISCELLANEOUS  
STATISTICS OF CANADA,

FOR THE YEAR

1866.

PART I.

---

Printed by Order of the Legislature.

---

OTTAWA:  
PRINTED BY HUNTER, ROSE & COMPANY.  
1867.

AUDIT OFFICE,

Ottawa, October, 1867.

SIR,—I have the honor to lay before you Part I. of the Miscellaneous Statistics of Canada, for 1866.

It contains no new feature, except that I have, this year, endeavored to collect some statistics relative to Foreign Fire Insurance Companies and Fire Insurance Companies chartered within the Province. My success has only been partial, owing to imperfect Legislation on the subject, but the tables will be useful as a guide whenever Parliament may choose to take up the matter, which I hope will be soon.

I have the honor to be, Sir,

Your obedient Servant,

JOHN LANGTON,

*Auditor.*

The Honorable A. T. GALT,

*Minister of Finance.*

# INDEX.

The "Capital authorized by Act," which was \$45,166,666 at the end of Dec. 1865, was reduced to \$37,866,666 on Jan. 1st, 1866, by the withdrawal of the International Bank (Limited) with \$7,300,000 nominal capital. In March it increased to \$39,466,666, the Union Bank of Lower Canada making its first returns with a capital of \$2,000,000, and the Banque du Peuple reducing its capital from \$2,000,000 to \$1,600,000. In July the Mechanics' Bank commenced to make returns, raising the amount to \$40,466,666, and in October the \$4,000,000 of the Bank of Upper Canada disappeared, leaving as the authorized capital of all the Banks, \$26,466,666, at which figures the amount remained until the end of the year.

\* The Government circulation was issued in October, and the average amounts in circulation, to be added to the Bank circulation in order to arrive at the Total Paper Currency of the country were: In October, \$1,524,250; in November, \$2,339,000; in December, \$2,802,500. Including the Government notes, the average circulation of the year was \$11,695,735.65.

\* The figures under this head for 1864 relate to the "Ontario" Building Society of Toronto, now wound up. The "Union" replaces it, with nearly the same interests.  
 † The figures for 1864 and 1865 include the returns made in these years by the London Permanent Building and Savings Society, now incorporated with the Huron and Erie.  
 ‡ The Kingston Permanent Building Society has paid off all depositors. Its business has been principally transferred to the "Frontenac" Society, of the same place.

\* The nuns at present occupy a leased house ; they are building an asylum which would cost \$2,400, when completed.

† The Commissioners report that 10 sick persons were supported at the Hôtel-Dieu during the whole year, 23 at the General Hospital, 11 in private families and 4 in Protestant Asylums ; in all, 64. There is some change in the mode of preparing the return in 1866.

TABLE VIII.—STATEMENT of the Affairs of Hospitals receiving Grants from Government, 1866, (from Returns furnished to the Audit Branch of the Finance Department.)—Continued.

\* The Commissioners for the relief of the indigent sick give their grant to this hospital.

† Including \$1,501.44 tonnage dues for 1863.

‡ Presented as a charity.

§ This is the number of persons supplied each year with medicines and advice.

|| This year's return includes Canadian as well as Irish patients. The difference between the income and expenditure of this hospital is made good from the funds of the Hôtel-Dieu.

\*\* The deaths are principally among foundlings, many of whom are brought to the hospital in a dying condition. They are usually put to nurse, in the country, as soon as possible: 566 deaths happened among children thus put to nurse; the rest were deaths in the hospital itself. The report states that during 1866, 553 poor families were visited and assisted, and 25 to 30 persons received their meals. At the Dispensary kept up by the Sisters, 10,492 prescriptions were made up.

TABLE VIII.—STATEMENT of the Affairs of Hospitals receiving Grants from Government, 1866 (from Returns furnished to the Audit Branch of the Finance Department).—Continued.

\* Some amendments to the returns of 1864 are embodied in these figures, causing a slight difference between them and those printed in previous statements.

† Paid by City Corporation.

‡ A few slight discrepancies exist in the returns between the number of patients said to be remaining in hospital at the end of one year and at the beginning of the next.

§ The Sisters of Charity of the General Hospital, Ottawa, visited and relieved 659 poor families during the year, and received 83 French Canadian and 50 Irish orphans into their asylums. The French Canadian orphans are supported by the Sisters; the Irish are cared for by the Sisters and supported by a committee.

TABLE IX.—STATISTICS relating to the Lunatic Asylums of the Province, 1866.

A newly formed company which

1867.

\* These totals differ somewhat from the figures in previous returns, because various Companies have this year supplied some particulars formerly wanting.  
 + This Company has changed the time of commencing the financial year, and until next return, the figures previously sent are continued. The Secretary says the business of the Company has not materially varied.

MISCELLANEOUS  
STATISTICS OF CANADA,

FOR THE YEAR 1866.

---

MUNICIPAL RETURNS.

---

PART II.

---

Printed by Order of the Legislature.

---

AUDIT OFFICE,

Ottawa, Oct., 1867.

SIR,—I have the honor to lay before you Part II of the Miscellaneous Statistics of Canada, being the Municipal Returns for Upper and Lower Canada, for 1866.

In view of the recent change of the Municipal Laws in Upper Canada, and to facilitate a correct apprehension of the results of that change, it appeared desirable that I should have the Upper Canada Returns printed at greater length than they have been for some years past.

Proofs have been sent to all the County Officers, who have brought to bear upon them their local experience ; and although absolute correctness cannot be relied upon when dealing with many hundred officers, who receive no remuneration for making these returns, I believe they are quite exact enough for practical purposes. It will be noticed that in the cities and towns, the actual value of property has been given, deduced from the figures representing the annual value, and the rate of taxation has been similarly dealt with. The totals of taxes collected and taxes due are as follows for three years past:—

|           | Taxes collected. | Arrears due. |
|-----------|------------------|--------------|
| 1864..... | \$1,917,261      | \$1,765,445  |
| 1865..... | 2,368,903        | 1,370,374    |
| 1866..... | 2,828,790        | 1,261,811    |

The increase in the former column, and the decrease in the latter are a striking and satisfactory indication of the increased prosperity of the country.

The returns from Lower Canada Counties, though not so satisfactory as I could wish are yet more complete this year than they ever were before I have printed in full the number of acres assessed, the number of rate-payers and the assessed value of property, but the liabilities, revenue and expenditure of the Counties of Lower Canada are in most cases so trifling that I have not deemed it necessary to give them to the printer. They are shewn in last year's returns, from which those of the present year do not materially differ.

It is necessary to remember that the statements for Upper and Lower Canada both represent assessed values, which are, in almost all cases, very much below the market values.

I have the honor to be, Sir,

Your obedient servant,

JOHN LANGTON,

*Auditor.*

The Honorable A. T. GALT,

Minister of Finance.
