THE COURIER.

FRIDAY, MARCH 22, 1800.

We are told that the "Mad Ministry" have issued a species of circular addressed to the super-numerary Clerks is all the Government Depart-ments, informing them that their services will not be required after the 30th of April next. We believe that these officials are paid at the rate of the many starpetite about each, and they are to be turned adrift, many of them having wives and families to support, in order that the public may be gulled into the belief that the Ministers have, at last, in their terror at the result of the Halton election, determined on a rigid enforcewarn these crazy people, that this is not the re-trenchment which the people demands, and will have. They do not, want to see the salaries of the "poor devile" of Clerks, the junior Clerks, cut down, but they insist that the necessary retrenchment shall begin at the beginning, first paring down the salary of my Lord Elgan, to something like reasonable limits, and so going through every office-holder at large emoliments. When this is done, it will be time enough to think of the smaller fry. We would also ask, ments. When this is done, it will be time enough to think of the smaller fry. We would also ask, how it is that it has only just been discovered that the services of these superminerary Clerks are discovered with the services of these superminerary Clerks are discovered with or dependent on, the Colonial Constraints. The Mother Country will support the Government, The Mother Country will support the the Colonial Government is discountennicing the movement; but if the littler succeed in the elections, we do not see how it can be prevented from being successful eventually. The Government know this, and hence we see their signits, at Washington, soliciting a treaty of Resiprocity, in trade. Such a treaty, if naireed into, would give the Canadians all the commercial advantages unnecessity ? Why were they ever employed? If they are uncless now, they were always useless, for we are not awarn that any of the Departments, except, perhaps, that of Public Works, have less business to transact this year than last year. The truth is, that, many of these persons were employed politically—that is, their appointment was a job, to gain Ministerial support from their friends or relatives, and their dismissal is just as gross a job, to gain support to the Ministry from the country at darge, which is clamoring for retrench

Any connection with the active-minded and Service Services of the Total Prince of the Services of the Se energetic men who reside in the United States, will regue us from the stagnant puddle of Colo councils of Toronto—a shifting scale which indi-ested the fluctuating impressions of a hand-to-mouth action. Lord John intimates that we may assign to the office whatever salary, we deem may assign to the office whatever salary we deem just but he says not one word about the higher right which we demand, and he leaves us to grope in the dark upon the question of elective Governors. It might have been impolitic for the Premier, a member of the Ducal House of Bedford, to tell the aristocracy that Canada had become realiess under the present system, that also had considered to value the innor of renovating the dispulated fortunes of impoverished Peers. Yet such, plainty speaking, are the sentiments of this community, and we believe Earl Eigin's proverbial, parsimony has given an edge to public opinion, and provoked comments and conclusions neither distensing to his pride, nor favorable to the perpetuation of Imperial patronage. The policy of introducing the Elective principle into both branches of the Legislature, and nomimating the Governor by the Crown, is a feeble conception, founded upon very insufficient acquaintance with the months. In the United States the elected ared the right barrel of the gun 4 just, but he says not one word about the higher at the utiling received him over. founded upon very insufficient acquaintance with the people. In the United States the elected President may veto a Bill, but he does so knowing that his tenure of office has but four years luration. If in Canada a Governor, named by the Crown, were to vete a Bill passed by a majority of both Houses, he would peril the connection; to abstain from the veto would be a voluntary sonegation of his authority; in the one instance he would be a nuisance, in the other a entity. Whereas, were our Governor elected by the people, he might, with impunity, exercise

At a recent meeting of the Archælogical Institute in London, an account was read of a singular d.scovery which was made in pulling down the walls of an old Church in Somersetshire. On removing a sculptured figure and niche, a small chamber was tound, closed by an oak panel let into a moulding. Within this chamber was a small oaken cup, is which was a mass of dry coagulated blood. The sculpture on the cup showed it to be of older date than the church, and it is presumed that at the destruction of the neighboring priory church of Woodspring, it was preserved by the pious zeal of some individual and transferred to this church. The priory church was dedicated, as is known, to Thomas sibeket, having been founded not long after his murder; and it is, therefore, suggested as altogether probable that the blood found was a portion of that of the archbishop and martyr. would give the Canadians all the commercial advantages of Amercanion, and preserve the Comercian between Canada and the Mother Country, lesides in a great measure, killing the Amercanion movement. Dry Goods Market.

From the Dry Goods Reporter.

Domestic Goods.—There has been a marked irregularity in the trade of the past week. Some days it has amounted to almost a brisk demand, and again it has been almost complete stagnation. There is no denying the fact that the late decline in the Cotton market has shaken the confidence of both buyers and sellers, and although prices of both buyers and sellers, and although prices are nominally the same, yet concessions would be made upon almost every description of Cotton goods, if they were to be taken out of the market. There is, however, a great unwillingness on the part of buyers, and no good result could possibly flow from diminishing prices till there is some prospect of an active demand.

Under this state of things, we have not much to construct although was must saw that the decline.

ings and Shirtings, although the signs are, that manufacturers will have to abt te something from their present views, or hold for some time, as speculators are to-day offering heavy brown goods in our market at i cent less than Boston price.

Bleached goods are quiet, with hardly so firm a market as at the date of our lest report, and the stock being dependant in a great measure upon the demand for brown goods, is rather accumulating. Should a decline take place in the latter, it must of course affect the bleached article. We.

There has been no movement in Cloths, but the feeling is one of great firmness, which is fully sustained by the lightness of the stock, and the continued buoyancy of the Wool market.

Foreign Goods.—There has been only a moderate demand since the date of our last report, but the small supply left from the early sales, together with the continued light-receipts, enables the importer to maintain prices with considerable firmness. In point of fact, upon many descriptions of goods prices would be refused which would have been gladly accepted early in the season; and our auction rooms, which in this

market for white and Yellow Corn remains very uniform, not exceeding the demand; mixed Southern, however, not being wanted for export, is a little lower—the sales aggregate 123,000 bush at 52 @ 53] cents for mixed Southern, the lower rate for interior; 55 @ 56] cents for mixed Southern, the lower rate for interior; 55 @ 56] cents for round white; of both for handsome; 55 cents for round white; and 56] @ 57 cents for round white; and 56] @ 57 cents for round yellow. Peas are quiet, and we know of no sales.

The arrivals of British goods of the week have, for the moment, improve d the goods were duplicates of those received early, and in immediate request, or such as were new in style, and sold to arrive, stocks in first hands, after a few days, will hardly about that any addition has been made.

THE Advantages offered to the Public by this Institution are MANY and IMPORTANT, and the trates of Premium quite as LOW as security to the Assured, and safety to the Office,

will arimit of.

The following are some of the advantages offered by this Society:

The peculiar Benefits secured to the Assured by the principle of the LOAN Department.

One half of the Premium for the first five years may be paid by the Assured's own Note. These Notes need not be paid, but may remain on Interest, to be deducted from the Policy on the death of the Assured. of the Assured.

of the Assured.

Insurers can at all times demand, as a right, a from to the extent of two-thirds the amount of Premium they have paid—upon deposit of their Policy, and guaranteeing it will be kept in force.

Policy, and gustanteeing it will be kept in force. This important advantage removes the fear so many entertain of being obliged, through pecuniary embarrassment, to let their Policies larse, and at a time such a provision is absolutely needed for their families.

No Charge for Stamp Duty, nor for Medical Examination.

The Bonuses divided Annually, either in Cash, Reduction of Premium, or in addition to the sum Assured, whichever of these three ways the Assured may each year desire, after being a Policy holder for Four Years, at which period a Bonus is payable for the Four Years—Ahnually afterwards.

THIRTY DAYS allowed after each Payment of Premium becomes due, without Forfeiture of

Policy.

The General Agency for the British North American Colonies being established in Montreal, RISKS will be accepted by the General Agent, and lemporary Policies at once granted.

The Local Board meet regularly at the Office, and by them the business of the Colonics conducted, thereby affording to the Assured every acility.

LOANS will be Granted, and LOSSES PAID, at the General Agency, without referring to London.
Pamphlets, Blanks, and all requisite informa-

BOGLE'S AMOLE, BUSILE'S AMULE,

A COMPOUND FOR SMAYING.

This delightful article is totally different and far superior to anything yet invented for shaving. The base of it is derived from the 'Bassal, or ' soon plant,' or Culifornia, an article used by the natives of that country for washing; and thus the use of strong alkali, so burtful to the skin, is avoided. Its vegotable and detergent properties have the purest and most nonrishing effects on the skin,—it southes and allays irritation, and has, fine, the's, creany lather, which dops not dry on the face,—It is a decided luxury to be shaved with this incomparable scap.
