**There are 165 Cities**  
IN the World that contain over a Hundred Thousand Inhabitants, and there are a hundred and one little ailments brought on by an overworked constitution, which might be prevented by the timely use of  
**PUTTNER'S EMULSION.**

It is in diseases of this origin that it has achieved, and is achieving, such marvelous results. Rev. R. T. Brine, Pughwash, N. S., says: "Being fully convinced that suffering from exhaustion, brain weakness or rheumatic attacks will gain speedy relief from the use of Puttner's Emulsion, I feel it a duty to make known to such the remediable effect upon my system." Dr. H. J. Forsyth, St. Peter's, C. B., says: "Judging from the results obtained from Puttner's Emulsion in the course of my practice, I cordially recommend it to possess all the virtues ascribed to it as a medicine."  
Young and growing children thrive on Puttner's Emulsion. For sale by all Dealers at five cents.

**BROWN BROS. & CO.,**  
Sept. 26, 1888. Chemists, Halifax, N. S.

THE HERALD

WEDNESDAY, OCTOBER 3, 1888. NORTHWEST CROP PROSPECTS.

Information lately received from several independent and reliable sources shows that the crops in Manitoba and the Northwest Territories are most abundant, and that the damage caused by frost is very trifling, as compared with the accounts previously furnished.

Mr. McKenzie Bowell, Minister of Customs, has just returned from a six weeks trip through Manitoba, the Northwest and British Columbia, and he declares that, judging from personal observation and from information obtained from those who had made a thorough survey of the grain-producing sections, the crops are the best he ever saw anywhere.

Premier Greenway, of Manitoba, has also been heard from, and he corroborates the statements made by the Minister of Customs, and positively states that the damage by frost is very slight.

Another witness, who could have no object in giving anything but reliable evidence, is Mr. Moore, of the London Times, who has been enquiring into the question of the crops in Manitoba and the Northwest for his own satisfaction, and he unhesitatingly declares that the cereal crops in those regions are abundant and excellent.

Groping together the evidence of these gentlemen, it can be assumed, with a reasonable degree of certainty, after making all due allowance, that about four millions of the estimated fifteen million bushels surplus wheat in Manitoba and Assiniboia have been, to some slight extent, damaged by frost.

The damage to this grain would probably reduce its selling price by about twenty cents a bushel. Now the total value of the crops on the spot is estimated at about \$12,800,000; consequently the loss would be small in comparison with the enormous sum realized on the whole.

Another authority that may be cited regarding these crops is Mr. Fream, a Professor in the Agricultural College at Downton, England, and agricultural editor of the London Morning Post. This gentleman has been investigating the quality of the land all through the Northwest, right to the Pacific coast, and he puts himself on record as most favorably impressed with the capabilities, resources and progress of those sections of country.

After speaking in terms of the highest praise of the Northwest ranches, he refers as follows to the export trade: "The export trade of live stock from Alberta to Great Britain is a trade which began only last year, and is growing rapidly. This season over 4,000 cattle will be sent across the ocean. The cost of transit from Calgary to Liverpool is about \$30 per head, and the journey occupies a month. The Argentine Republic is one of the most powerful competitors Canada has in the British meat market. But the fact that Canada can place live cattle on the market, while the Argentine Republic, being on the other side of the equator, can send only dead meat, is a circumstance that must operate powerfully in favor of Canadian trade."

In addition to all these, railway managers report the necessity for enlarging their carrying facilities; and hundreds of extra cars for transport have been added to the rolling stock, while all along the line there is a general tendency to activity.

Mr. McDonald, a member of the Chicago Board of Trade, has recently visited the Province of Manitoba, and made careful enquiries as to the barley crop, and he says the quality of the barley raised in that Province is far superior to any raised in the United States this year. He believes the yield of barley in Manitoba will be about 4,000,000 bushels.

SIR JOHN THOMPSON SPEAKS.

At the last session of the Quebec Legislature an Act was passed abolishing the Circuit Court in the district of Montreal, and establishing in its stead a "District Magistrate Court," and providing for the appointment of three judges, to be known as district magistrates. The Circuit Court came under the jurisdiction of the Judges of the Superior Court of Quebec, and, of course, the establishment of such courts, and the appointment of judges to officiate therein, pertained to the Federal Government, according to the B. N. A. Act; consequently, when the Act came before the Dominion Government it was, on the advice of the Minister of Justice, disallowed by the Governor-General in Council, as being ultra vires the Provincial Legislature.

When this decision was made known, Premier Mercier, Mr. Laurier and his friends in Quebec raised a great hue and cry against the Government of Sir John Macdonald, and in the recent election campaign in Montreal East tried to make capital out of this question, by telling the people that the disallowance of this Act was an insult to the Province of Quebec, and that such a course would not be pursued regarding any other Province.

In the midst of all this, Sir John Thompson, Minister of Justice, on whose advice the Act had been vetoed, came down to Montreal, and, on the 24th ult., addressed a meeting of several thousand people. His speech bristled with facts, and was a powerful presentation of the legal aspects of the case. He showed the entire fallacy of the "question of honor and loyalty," that the veto in this case was exercised be-

EDITORIAL NOTES.

LATE Winnipeg advices state that the price of wheat had reached one dollar a bushel, and that the demand was still active.

IMMIGRATIONS returns show that the actual settlers up to September numbered sixty-two thousand, being an increase of ten thousand over the same period last year.

The Nova Scotia Sugar Refinery has just paid off the balance of the mortgage held by the Merchant's Bank. Within two years it has paid off \$200,000 debt. The stock is now held at two hundred.

No information has been received at the Marine Department respecting the reported seizure of the sealing schooner Araucan, Captain Seward, in the Northern Pacific ocean on the 1st July last by the Alaska Commercial Company's steamer Alexander II.

The Alaskan papers intimate that at Ounakats it is understood no seizures will be made in Behring sea this season. This would seem to be confirmed by a letter which has reached the Government from Collector Hamley, of Victoria, who states that two British Columbia sealers had arrived from Behring's sea with good cargoes, the captains of which stated that they were "spoken" by the United States revenue cutter Russia, and were simply asked what kind of weather they experienced.

OUR readers from British Columbia speak enthusiastically of their black cod fishery. The Victoria Colonist describes the experimental voyage just completed by the schooner Theresa, and gives the experience of Capt. Oleson, her commander, who found both the fish and the fishery surpassed even his high expectations. Already preparations are being made to fit out other vessels. Rich as is the marine harvest of Canada on its Atlantic shore, there seems a probability of its being outvied on the Pacific coast. The varied resources of our Dominion are apparently almost limitless.—Empire.

THE ELECTION IN MONTREAL.

The election which took place in Montreal East, on Wednesday last, to fill the vacancy in the House of Commons caused by the death of Mr. Curson, resulted in the return of Mr. Lepine by a majority of nearly seven hundred over Mr. Poirier, Grit and Rielite. Montreal East is by far the largest constituency in Canada, having a population of about fifty thousand people, mostly made up of workmen, and nearly all French Canadians.

When the vacancy occurred the workmen demanded that they should have a candidate of their own. To this the Liberal-Conservatives made no objection, and Mr. Lepine was chosen to represent the workmen. It would be supposed that under these circumstances there would be no contest, and that Mr. Lepine would be elected by acclamation. Not so, however; the Grits asked Mr. Lepine to pledge himself to vote against the Government of Sir John Macdonald on all occasions. This he refused to do, saying he would vote with the Government on all questions which he thought right. He also made the statement that he was in favor of the National Policy. Having given expression to these views, the Grits, of course, thought no more of the workmen's claim to representation, and brought out, in opposition to Mr. Lepine, Mr. Poirier, one of the dismissed transients, who had written such vile things against the Quebec ministers in the Dominion Cabinet, because they had permitted the law to take its course in the case of Louis Kiel.

Mr. Laurier, leader of the Opposition in Canada, Mr. Mercier, Premier of Quebec, and several other leading Grits took charge of Mr. Poirier's campaign, and made the most violent appeals against the Federal Government. The race and revenge cry were worked for all it was worth. These men sought the electors to vote against Sir John Macdonald's Government, because he had allowed Kiel to be executed. Another cry raised against the Government was the disallowing of the Magistrates' Courts' Act, passed by the Quebec Legislature during its last session. The worst passions of the people were appealed to in the hope of electing Mr. Poirier, who said his sole aim to get to Ottawa was to destroy the influence of Secretary of State Chapleau.

When the Liberal-Conservatives saw the course things had taken, they took the field in behalf of Mr. Lepine. Sir John Thompson, Sir Adolphe Caron, Hon. Mr. Chapleau, and Mr. Curran, M. P. for Montreal Centre, addressed the people at public meetings, and pointed out to them the fallacy of the arguments used by their opponents. In a powerful speech Sir John Thompson explained the question of disallowance in a way it could not be misunderstood, and in the most complete manner, that the sophistry of Mr. Laurier. The result was that Mr. Lepine was elected with the handsome majority above mentioned. In this election the workmen of Montreal East have done themselves the greatest honor, and have shown that they have minds of their own, and are not to be carried away by the appeals for revenge and the frothy declamations of demagogues.

In the case of Fitcher, succeeding seller of the Union Bank of Providence, died in Montreal, Chief Justice Dorian, of the Court of Queen's Bench, ordered that the gold mentioned in the indictment should be returned to the Bank from which it was stolen. Regarding the drafts on London and Paris he decided they should be recovered in the civil courts.

KING'S COUNTY EXHIBITION.

The Exhibition and Cattle Show for King's County which took place at Georgetown on Thursday last, the 27th ult., was quite a success. The weather was all that could be desired, and notwithstanding the fact that, on account of the late harvest, such a fine day was of the greatest value to the farmers, there was a large gathering of the yeomanry of King's County present at the Exhibition. The number of exhibits was not so large as on some previous years, but the selections were good, and all things considered, the Exhibition reflected much credit on Chairman Gordon, Secretary Owen and the other Commissioners who had charge of it.

About 11 o'clock the train from Charlottetown arrived, bringing His Honor Lieut. Governor McDonald and Mrs. McDonald, Lieut. Col. Irving, A. D. C., Hon. D. Ferguson, Hon. G. W. Bentley, L. C. Owen, Esq., Messrs. Richard Hunt, C. S. Gardner, representatives of the press from Charlottetown and Summerside, and several other ladies and gentlemen. Shortly after 11 o'clock His Honor was escorted to the Drill Shed, where the following address, read by Hon. D. Gordon, Chairman of the Exhibition Commissioners, was presented to him:

To the Honorable Andrew A. Macdonald, Lieutenant Governor of Prince Edward Island.

MAX Y. FLETCHER YOUR HONOR—We, the Commissioners appointed to manage the Exhibition of King's County, 1888, are gratified to meet you here on this occasion, and from the interest here manifested by you in the progress of our farming and industrial pursuits, we entertain the hope that you will be much pleased with the indications of advancement made since our last meeting.

We regret that, owing to the very late harvest, the exhibits of cereals will scarcely come up to the standard of former fairs, but to say, as regards the number of samples exhibited, but the quality will be found equal to the best ever grown in this Island.

It will also be observed that the display of fruits in the several sections is not so large as could be desired, for the reason that our Exhibition is held at a time when these productions are not fully matured. The exhibits in the departments allotted to Roots and Vegetables will be found on inspection to compare favorably with those shown at any former exhibitions in this country.

The show of Horses and Cattle, so important to the Island, will be well as most satisfactory, giving evidence of improvement in stock raising. This result, we believe, is due to the more careful and judicious expenditure of the annual grants provided by the legislature since the year 1870, in order to respectfully submit that in future it is most desirable that those grants be increased, so as to become an imperative duty of the Province. The importance of encouraging and fostering agricultural enterprise is, at the present time, more apparent than ever before in the history of this section of the Dominion.

When it is borne in mind that our fisheries have been destroyed, made waste by the depredations of those who are not of our country, it becomes an imperative duty that encouragement be given to our hardy fishermen to turn their labor to the direction of cultivating the soil, in order to obtain the means of subsistence to which they have been deprived.

The returns from the labor of the husbandman and the artisan, for the past year, we feel that the people of this country, in the present time, are more abundant than ever before in the history of this section of the Dominion.

DEATH OF FATHER LEFLOCH.

The St. John's of the 27th ult., give the following particulars relative to Father LeFloch's death:

On Friday afternoon last, while going to a sick call, Father LeFloch, parish priest of Grand Digue, Kent county, met with an accident which resulted in his death on Saturday evening. He had been called to witness a settlement and had proceeded to a half mile from a bolt fastening the shaft to the wagon got out of its place. The bolt was fastened on the wrong side of the shaft, and on nearing a small curve, Father LeFloch jumped from the wagon and fell on the right side of his head. When the neighbors came to his rescue blood was oozing from his mouth, nose and ears. He was insensible and continued so until the time up to the hour of his death. Doctors Leper and Belliveau went quickly to his assistance, but the doctor had been so long in coming that he was unable to do anything but to keep the patient cool and to give him all the attention possible.

THE ROSE OF SHARON.

In his chamber sat the Rabbi,
Poring o'er the book of learning.

On the table lay the book of learning,
When a Knight with clanking armor
Stood on the threshold.

Spoke the Knight: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Rabbi: "What is it, my friend?"
The Knight replied: "A gift of peace."

Spoke the Rabbi: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Knight: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Rabbi: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Knight: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Rabbi: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Knight: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Rabbi: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Knight: "I have a gift for thee,
Which I bring thee from the East."

Spoke the Rabbi: "I have a gift for thee,
Which I bring thee from the East."

THE EVIL MAY DAY.

A Tale of the Time of Henry VIII.
CHAPTER X. [CONTINUED].

It was somewhat galling that this
should be the most respectable occupa-
tion that could be put forward, but

At that moment Master Hansen's boy
made his appearance, returning from
an errand; the stall was left in his
