Naval Aid Bill Will Not Be Introduced This Session --- Beardmore Home at Acton Burned --- South African Strikers Defy Police

NAVAL ISSUE TO BE AVOIDED REDISTRIBUTION BILL TO FORE WITH SENATE'S ENLARGEMENT

Premier Desires to Avoid Receiving Unpleasant Impression Created by Senate's Rejection of Dreadnought Program—Twelve New Senators West of Lake Superior.

(Special to The Toronto World.) OTTAWA, Jan. 14.—A meagre sessional program will be outlined for parliament in the speech from the throne tomorrow afternoon. Only three bills will be referred to. One of these, of course, will be the government's measure for the redistribution of the seats in the house of commons, to accord with the last census. Another will provide for 12 new senators from the provinces west of Lake Superior.

A third will amend the Civil Service Act, presumably along the lines suggested by Sir George Murray. The world is in a position to announce with authority that the naval aid bill, appropriating \$35,000,000 for the construction of three dreadnoughts, will not be introduced at the coming session. Indeed, it is anticipated that the prime minister, in his speech upon the address in reply to the speech from the throne, will announce that no legislation along this line will again be attempted until the senate is in accord with the popular will and the majority in the house of commons.

To Avoid Unpleasantness. It is felt that, in the interests of the empire and of Canada, it is undesirable that the bill should be sent to the senate for a second reading which would emphasize the unfortunate interpretation created by the senatorial veto last session.

The government, nevertheless, is firm in its resolve that three dreadnoughts shall be provided. The highways bill, which passed the house at the last two sessions of parliament and was virtually killed in the senate by amendments unacceptable to the government, will not be reintroduced. This announcement will come as an unpleasant surprise to many members of the opposition, who were in hopes that the senate would withdraw its opposition to this bill, as it finally did at the last session in the matter in the subsidy for the Timiskaming and Northern Ontario Railway.

It is also understood that the speech from the throne tomorrow will express the grateful appreciation of their royal highnesses for the solicitude of the Canadian people respecting the health of the Duchess of Connaught, as evidenced by the many expressions of sympathy received from all parts of the Dominion. The bountiful harvest, and the increased immigration will be referred to, and also the temporary financial stringency which the country has been experiencing.

Present New Members. No business will be transacted tomorrow by the house, but the members (Continued on Page 3, Column 7.)

ONLY TWELVE ARE YET TO BE SAVED FROM WRECKED STEAMER COBEQUID NINETY-FOUR ARE SAFELY IN PORT

Coastal Vessel Westport First to Arrive Off Trinity Shoals Where Cobequid Had Grounded and Seventy-Two Persons Were Transferred - Another Steamer Rescued Others—Boat Standing by to Take Off Remaining Twelve.

(Special to The Toronto World.) HALIFAX, N.S., Jan. 14.—Thirty-six hours after the steamer grounded on the Yarmouth coast, 84 of the 106 persons aboard the West India liner Cobequid were taken off by coastal steamers and brought into Yarmouth tonight. Captain Howson and 11 men are still standing by the steamer. No lives were lost, but all the crew suffered greatly in the intense cold, for the temperature was below zero, and the steamer's decks were continually awash, and the seas, which froze where they fell, converted the wreck into a gigantic icicle. Passengers and crew were kept below during the terribly long vigil, which largely accounts for all lives being saved, for the bridge, deck houses and practically everything movable was swept from her decks by the seas, which continually broke over her.

It was not until late this afternoon that the curtain of mist and snow veiling the Bay of Fundy was lifted, and the villagers of Handford, in Yarmouth County, saw the Cobequid, fast on the Trinity shoals, seven miles from shore. No help could be sent her from the little fishing village because of intervening reefs, but the news was telephoned to Yarmouth, twenty miles away, and the fleet of ships which was scouring the bay for the missing steamer were hurried to the rescue. The first of the ships to reach the wreck was the little coastal steamer Westport, which arrived off the shoals at 4.30 o'clock. The Cobequid's bow was high out of the water and seas were sweeping all over her. Captain McKinnon ran down as close as possible and then sent his lifeboat away. On the first trip all the women and children on board, nine in all, and nearly all the male passengers, were taken off, and in three trips of the boat, 72 people were taken aboard the Westport, which stood by the wreck until 6 o'clock, when the John L. Cann arrived. The Westport headed for Yarmouth, arriving there at 9 o'clock tonight, and after taking off 24 more, also returned. Capt. Howson and 11 officers and men electing to remain by the wreck all night. Other rescue steamers arrived shortly after, amongst them the Furness liner Rappahannock, which participated in the rescue of the burning Volturino's passengers a few months ago, but nothing more remained to be done. The ship was in safety for the night and while no hope remained of floating her, Capt. Howson and his men were preparing to try to save some of the cargo.

FIRE CHIEF FAILS IN DUTY AND DOES NOT ENFORCE LAW FOR PREVENTION --- DRISCOLL

New Library For Beaches District

After two years of waiting, the residents in the Beaches district will have a public library. The Toronto Library Board has leased a large store at the corner of Queen street and Hamby avenue, which will be used as a public library. The new library, under the supervision of the chief librarian Dr. Geo. H. Locke, stated that everything was being done to make the library a great success. "For some time," he said, "the board has been purchasing books, and when the library is opened something like twenty to thirty thousand books will be ready."

DRISCOLL REPORT CALLED UNFAIR BY CHIEF

Apparently Got Up by Some Person Formerly Attached to the Police Department in the United States, Says Thompson and Acting City Architect Price.

Judging by correspondence attached to yesterday's report of the civic survey, the investigation being conducted by Clement Driscoll, is not regarded as an unmitigated blessing by Chief Thompson and Acting City Architect Price. The letters disclose a conflict of opinion which Chief Thompson and Mr. Price made the subject of a lengthy communication and an affidavit which they forwarded to the mayor and the board of control.

Report Called Unfair.

When confronted with the picture and the report, Chief Thompson and Mr. Price investigated, and in reporting back to the board of control they complained that the report was unfair and had been apparently got up by some person formerly attached to a police department in the United States, as many of the facts have been so distorted as to not be recognizable, in the face of the actual conditions. In support of their statement they submitted an affidavit of Reeves, the manager, stating that the theatre was not occupied by an audience at the time the lorry blocked the exit, and that the driver was about to move when Mr. Driscoll stopped him and ordered the picture taken.

G. T. R. SHOULD PAY COST CONTENTION OF LONDON

LONDON, Ont., Jan. 14.—(Can. Press.)—The board of control today decided to send the mayor and city solicitor to Toronto to protest to the Dominion Railway Board against the city being charged up for any portion of the cost of protecting the G.T.R. crossing at William street.

EXODUS OF AMERICANS FROM CANADA GROWS

OTTAWA, Jan. 14.—(Special.)—While the large immigration into Canada from the United States is well known, the heavy exodus the other way is not so much heard of. During the last six years the number coming across the line to settle in Canada was 618,112, but the number crossing from Canada to become permanent residents of the United States in the same period was 594,918. Thus Canada's net gain in the six years was only 23,194.

WED BUT AN HOUR WHEN MISHAP OCCURRED

Herman Hughes and His Bride Thrown From Taxicab While Driving to Union Station After Marriage Ceremony—Taxicab Sustained Most Serious Injury.

Married at St. Peter's Church at 11 o'clock yesterday morning Mr. and Mrs. Herman Hughes had a narrow escape from serious injury when their taxicab struck a hydro-electric light pole at the corner of Harbord and Euclid avenue while on the way to the Union Station. The chauffeur deliberately rammied the hydro pole to avoid running down a cyclist in front of him. The taxicab swung up on the kerb, the radiator striking the post with a crash, throwing the young couple to the roadway.

Mr. Hughes received a severe gash on the forehead, for which he required medical attention at Dr. Mackay's residence at the corner. The broken taxi had to be carted away on a wagon, but another was called and the happy couple reached the station just in time for the train which is to take them to Algonquin Park for their honeymoon.

The marriage was solemnized in St. Peter's at 11.15 by Rev. Father Minahan, and the accident occurred just one hour later. The bride was Miss Mona, daughter of Mrs. James P. Murray, Euclid avenue.

COBEQUID HIGH AND DRY WAS OFFICIAL MESSAGE

Ottawa Received Reassuring Word Telling of Measures for Relief.

OTTAWA, Jan. 14.—(Special.)—The department of marine and fisheries this afternoon received the following message regarding the steamer Cobequid from its agent at Halifax. "Confirmation of the wreck on Trinity Ledge, telephoned from Beaver River, opposite, reports the hull high and dry on the rocks, with seas breaking over her. Will telegraph you when steamer Laurier reports, which should be soon. Lansdowne arrived at West Port, and have ordered her to Trinity Ledge."

BOND'S ADHERENTS KEEP ALOOF FROM FISHERMEN

Newfoundland's Opposition Agrees, However, on Kent as Spokesman.

ST. JOHN'S, Nfld., Jan. 14.—(Can. Press.)—The colonial assembly was convened today by Governor Davidson and organized by the election of Goodison, a member for Carbonear, as speaker. Altho Mr. Goodison is an adherent of the premier, Sir Edward Morris, his election was made unanimous by the opposition members.

The followers of the former premier, Sir Robert Bond, and members of the Fishermen's Protective Union, which united to form the opposition in the campaign today decided to sit as separate parties at the present session. They agreed, however, to have Mr. Kent, formerly attorney-general in the Bond ministry, recognized as the official spokesman for the opposition. Sir Robert having recently resigned his seat.

EXPLORER SCOTT WAS GREATEST OF REPORTERS

His Dying Message Epitomized Spirit of Journalism, Says Franklin Matthews.

ITHACA, N. Y., Jan. 14.—(Can. Press.)—In a lecture on "The Citizens and the Press" at Cornell University today, Franklin Matthews, of the teaching staff of the Columbia University School of Journalism, characterized Captain Robert F. Scott, who lost his life in his Antarctic polar expedition, as the "foremost reporter of modern times."

Scott, said the speaker, was born and lived and died a reporter, altho Scott and the world never realized it. Scott's memory deserved from England as "his Robert F. Scott," who lost his life in his Antarctic polar expedition, as the "foremost reporter of modern times."

PREMIER STILL FIGHTING HARD

The Gradually Growing Weaker, Hopes Yet Held for Removal to Toronto.

NEW YORK, Jan. 14.—(Can. Press.)—Sir James Whitney's condition shows no material change tonight, tho he is gradually growing weaker. The splendid vitality which he has always manifested, however, is standing by him now, and while his friends fear for the ultimate outcome of the first real illness of his life, they are satisfied that unless something unexpected occurs he will hold out for some time and may even be able to return to Toronto.

The long rest which he obtained by sleeping from 11 o'clock last night to 10 o'clock this morning produced a good effect. His failure to take nourishment as heretofore, however, has offset the advantage thus gained to some extent and the night bulletin, issued somewhat later than usual, reads as follows:

"10 p.m.—Sir James Whitney has taken little food and grows slightly weaker, but has considerable reserve strength."

COLD WAVE TRAVELS EASTWARD Milder Weather Now Expected

Air Pressure is Rapidly Growing Less and Thermometer Rises Accordingly—Two Days of Arctic Weather Meant Big Loss to Toronto Milkmen.

Jack Frost has let go his grip on Toronto and the surrounding district and once more the citizens can walk along the streets without fear of being partly frozen. At 11 o'clock Tuesday night the mercury showed 19 degrees below. It remained in that position for several hours during the night, but towards morning it became less severe and snow began to fall. At 8 o'clock yesterday morning the official thermometer registered 7 degrees below and at noon it stood at 13 above.

Much milder weather can be expected now for some days, as the weatherman states that the temperature will rise to about 32 degrees above, which is the freezing point. There is a chance of it rising even higher than the freezing point.

DAILY MAGAZINE PAGE FOR EVERYBODY

Very Latest Fancies of Fashion Newest Blouses Show Art in Color Blending

By MADGE MARVEL

FOR a change, slip a bit of pale blue flesh under the lining which you have been wearing. It is the newest fancy and the effect is quite charming. I have noticed it in several of the most expensive blouses. One of white lace and another of gold chiffon cloth showed the pale blue under the blouse. Blue and lavender is another combination which I have noticed. It needs an artistic eye if one would get the right shades. There is a decided tendency toward the sleeveless bodice. It appears on some of the best and smartest models. To be successfully worn, the bodice should have the most beautifully modeled arms and they should be snowy white and velvety. It seems to me that the possession of such arms is the only real excuse for the sleeveless bodice. At any other time it gives a most unpleasant undressed appearance, which is exactly what one should wish to avoid in evening dress. Terra cotta, which is sometimes called "mahogany," is coming rapidly into favor. I have seen some stunning velvet and cloth suits in this hue, and the other night at the theatre I saw a delightful gown of terra cotta chiffon over charmeuse in the same shade. The chiffon was embroidered in dull copper beads and the tunic was edged with marten. The wearer was a blonde with a dazzling white skin and the faintest of pink cheeks and with hair of pale gold. Pockets are surely going to be a part of our spring suits. And they are meant for use. Perhaps this is more significant than the careless ones recalled. The suffragists have long contended that until a woman has pockets in her clothes she is not fitted for the vote. Perhaps when she gets the pockets, she will be handed the franchise. Really we women do waste a terrible lot of time and nervous energy opening our shopping bags and taking out our purses, then waiting for the change and then doing it all over again—just as the vaudeville teller about amid shrieks of laughter. In the meantime we are dropping first a package and then a muff—and oh, dear, if ever we needed anything in the way of modern conveniences it is the pocket meant for use. So we may look to see the triumphant entry of pockets this spring. I am again going to refer to the bustle, which is already here. I saw a gown the other day of much draped crepe in a dull green shade. There was nothing unusual about the front except that the hips were very full, the crepe being gathered into the waistband. At the back there was a queer bunching, as if two or three tucks had been taken in the draping. And it stood out from the figure in an unusual way for so soft a material. Investigation revealed a typical "extender" made of taffeta with five full and narrow ruffles gathered along its length. The modistes looked at my surprise with pity. "No, not so awfully new," said she in a bored tone. "We have made them for our exclusive trade for two or three months. They are old in Paris. But they will be new here for most people when the summer frocks come in." We are brightening up our black hats with red roses and pink posies and purple and pink bouquets. There is a sudden influx of color noted. And the new color cards show strong shades in the predominance. We seem about to finish the winter in a burst of glory and enter the spring like animated rainbows. I say "seem," for who has the temerity to look ahead in these fickle days?

Advice to Girls

By Annie Laurie

DEAR ANNIE LAURIE: My sweetheart says I am heartless because I laughed when my mother cried over my staying out too late with him the other night. And yet he was the one that got me to stay out. What do you make of his attitude? PERPLEXED.

WHY, honey, he's a man, that's all that's the matter with him. Just a plain man. He wants you to act one way and feel another. He wants you to stay with him just as late as he pleases and yet he wants you to be worrying about your mother's fears all the time. You can never in the world make him understand that it takes two different kinds of girls to be the two different kinds of people he would like you to seem to him.

Give it up, there's no use trying. Stay with him, just long enough, but not too long. There are very few people in the world who are worth making your mother cry, don't you know that, little girl? She's your real friend, she's the one who really loves you, the one who really cares. Don't let your sweetheart think more about her grief than you do. It's a mistake and some day you'll know why.

Miss Laurie will welcome letters of inquiry on subjects of feminine interest from young women readers of this paper and will reply to them in these columns. They should be addressed to her care this office.

"ALL OVER BETWEEN US!"

By MICHELSON

THIS is a sad business! That quick fling in the note that sent back the ring was easy enough. When you are really feeling SAVAGE these things can be done quickly. BUT when it comes to burning up the letters—Especially that one he wrote the week after the GREAT DAY—it is hard to burn that. It takes courage. It is like putting one's heart in the fire. DID any one ever write letters like these? Maybe he didn't mean what he wrote. But maybe he did. If he did—Why can't a girl KNOW? Ah! the whole problem of life is wrapped up in that doubt. Anyway, there's no need for burning the letters tonight. Tomorrow will do. Then, surely, they'll all go in the fire, unless—Well, let's wait till tomorrow. Tomorrows have done wonderful things.

The Kind of Girl a Man Likes

BY NORVELL ELLIOTT

The Red Haired Girl

"I NEVER subscribed to the theory that all red haired girls were as hot headed on the inside as one would believe from the blaze of fire on the outside. I have known a number of little red haired girls who were as quiet as mice."

This piece of wisdom was advanced by my bachelor friend, who turned from an animated conversation with Vivien Glenn when she left our street car at her home corner. When Viv's friends are in the lukewarm class, they allude to her hair as "auburn," when they are in a more friendly frame of mind, they call it "straw," but when they know her for what she is and catch glimpses of her glorious hair in all its stages of light and shadow, they are perfectly frank and generally say:

"Why, Viv, you've got the REDDEST hair I ever saw in my life!"

And this last statement tickles Viv nearly to death. She glories in her hair and prefers the adjective "red" to any other ever invented by Mr. Webster.

"The girl is perfectly named," continued my bachelor friend, as he looked from the car window and lifted his hat finally to Vivien, who waved her muff at us.

"Whatever you call her hair, lass, she herself is as vivid a creature as I have ever known. Why, the minute she enters a room every man and woman in it is perfectly conscious of her vivid personality. And, as you know, she is far from being a hot headed, temperamental girl. I scarcely know where to put my finger on the charm of her, but it's there—there with a big T."

"A Different Kind of Love"

By WINIFRED BLACK

MRS. ELLA FLAGG YOUNG of Chicago resigned from the board of education, and the whole city was torn up by it. They held indignation meetings on the sidewalk, men circulated petitions and women made speeches, and the "practical politicians," who forced Mrs. Young out of her position, were absolutely dumfounded over the excitement.

And Mrs. Young, the woman in the case, is over 70 years of age.

This world is certainly whirling around.

Why, 20 years ago, when a woman was 50 there wasn't a thing for her to do but go out in the kitchen and make caraway cookies or sit in the corner in somebody else's house and mend somebody else's socks, and be so grateful to get the chance to do it that she didn't dare to speak above a whisper. And she always took the dark meat of the chicken and said "No, thank you," to dessert when there was unexpected company.

Thirty years ago a woman began to act that way when she was 40, and they do say that 50 years ago a woman of 30 was considered quite too old and feeble to go out without her cap and somebody to apologize for being seen outside the doorway with her.

Why, girls, we're just beginning to live, aren't we?

Take up the paper this morning and read about the women who are making the stir in the world—the women who do things—the women who are "somebodies."

Fifty and over, every single one of them, and proud of it, at that.

Getting Crowded

"There is always room at the top, you know."

"I am not so sure about it. These aviators are beginning to crowd the heavens with their aeroplanes, and their claims of the highest flight."

Chances Reduced

O'Kelly—It's too bad your boy lost his foot. What will you make of him now?

McWhack—Sure, and I'll make a rope walker of him. Having only one foot he'll have only half the chance of falling.

Making Haste

"Why are you playing so fast?" asked his mother of Johnny, who was practicing at the piano.

"I want to finish my hour's practice in thirty minutes and go skating," said Johnny.

Secrets of Health and Happiness

If You Have the "Blues," Wear Red for a Tonic

By Dr. LEONARD KEENE HIRSHBERG

A. B., M. A., M. D. (Johns Hopkins)

(Copyright, 1914, by L. K. Hirschberg.)

WHAT would life be without color? Just as red is the life blood of higher animals and green the very same fluid for flowering plants, so there must be something in each and every hue of the glorious rainbow upon bodily conditions of health. Sickness is often a skeleton of dusky men, which, clothed with life, color and complexion, becomes, as if by a fairy wand, youth, health and beauty.

Color is not understood by chemists and physicists. Nor can psychologists, savants or metaphysicians explain the curious effects upon some persons of red, violet, blue, yellow and green.

It is an extraordinary but well attested observation that flashing scarlet upon certain people is like shaking a red rag in a mad bull's face. These vermillion hues tone up, irritate, excite and stir the human emotions as no other colors do.

What little is known about colors comes from the physical laboratories. White light is a mixture of short-legged and long-legged soldiers, called waves or vibrations. As the long-legged and short-legged soldiers march upon the double-quick from the sun, the electric light or any source of illumination, they all march along evenly as long as no opposing force or obstacle intercepts them.

If, however, some large obstacle or enemy, blocks their passage, this militia becomes a straggling band. The little fellows who are short and swift escape interference and proceed as of yore. Not so the big fellows. These are held up a bit and lag behind the little chaps.

This is what happens with light. The red rays are the longest and slowest and the violet rays are the swiftest and shortest. The result is that demons are illustrated in fiery red and heaven and the sky are shown always in blue or violet.

A modicum of red goes a great ways. Most people are passionately fond of scarlet and crimson hues. It excites the human appetites and emotions. Persons may eat in red dining rooms because vermillion adds zest to the viands and excitement to the appetite and the inner man.

People who "get the blues" are not the only ones who are infected and depressed by violet and near-blue tints. Thus the ruling reactionaries of a certain European country have their "red-finned dungeons" for dissenters and radicals.

The theory is that active, progressive and creative intelligence are soon depressed, saddened and made complacent in blue and near-blue light. Blue light is introduced into medi-

one by the late Prof. Pinsen of Copenhagen, to treat tuberculous of the skin. This is one of the established methods today.

On the other hand the pitting and scarring of small pox patients is prevented by using red glass in the windows of quarantine hospitals and draping the rooms with red hangings.

Answers to Health Questions

J. H., BOSTON—Why do I sometimes want water and at others do not feel thirsty for hours? I make it a point to drink at least a pint of water in the forenoon and the same quantity in the afternoon. Is it advisable to drink water when one is not thirsty?

Yes. Sick people, infants, delirious and the insane must be given frequent sips of clear, refreshing water, despite the inability to call for it.

There is a vast difference in persons with regard to the stirring sensations of thirst. Many people are blunted in this, others, like you, are only conscious of thirst when they are not distracted by important matters. You should drink some water every hour.

Dr. Hirschberg will answer questions for readers of this paper on medical, hygienic and sanitation subjects that are of general interest. He will not undertake to prescribe or offer advice for individual cases. Where the subject is not of general interest letters will be answered personally if a stamped and addressed envelope is enclosed. Address all inquiries to Dr. L. K. Hirschberg, care this office.

Chips with the Bark on

The man who looks for trouble can find it where it isn't.

Money will not repay a man for the loss of his youth, but it will enable him to make his old age shorter.

Daddy's Good Night Story

By GEORGE HENRY SMITH

I AM very tired this morning," said Mr. Hop Toad. "I am also very hungry and I do not want to go very far for something to eat. Perhaps if I sit here long enough a fly or a freddy will come along and do me for my breakfast."

While Mr. Hop Toad was thinking all this to himself, Mr. Fly was sitting on the fence just above his head and when he saw Mr. Hop Toad close his eyes and open his mouth wide he said to himself:

"I suppose that fellow down there thinks I'm going to fly right into his mouth and I guess I will have to fool him."

Mr. Fly took a little twig and dropped it into Mr. Hop Toad's mouth.

"Pop!" went Mr. Hop Toad's mouth, then his eyes opened very wide and he said to himself, "That does not taste very much like a fly."

He dropped the twig out of his mouth and closed his eyes again and opened his mouth wide.

He was almost asleep when he heard a noise above his head.

"Cher-choo!" Mr. Fly sneezed and then he pecked down to see if the noise had made Mr. Hop Toad wake up.

Sure enough his eyes were open and his mouth shut and he was looking straight at Mr. Fly.

"My goodness!" he said to Mr. Fly. "I think I will have to eat you for breakfast."

"You will have to catch me first," said Mr. Fly.

"How dare you talk to me like that?" shouted Mr. Hop Toad.

"Don't get excited," began Mr. Fly, "for if you get mad it only affects you. I don't care a bit. The madder you get the more I laugh."

"Aren't you afraid of me?" asked Mr. Hop Toad in a low voice.

"Why should I be afraid of you?" asked Mr. Fly. "If I were afraid of you the first thing I would do would be to fly into your mouth when you open it. It doesn't do to be afraid of anything, much less a Hop Toad like you."

"There, there," began Mr. Hop Toad, "I'm not going to get mad at you. I'm going to remember what you told me. Will you do me a favor?"

"Of course, I will," answered Mr. Fly.

"Then fly away and let me go to sleep," said Mr. Hop Toad meekly. "Talking to you makes my head tired."

The Toronto World

FOUNDED 1880. A morning newspaper published every day in the year by The World Newspaper Company of Toronto, Limited; H. J. Maclean, Managing Director.

will pay for The Daily World for one year, delivered in the City of Toronto, or by mail to any address in Canada, Great Britain or the United States.

WATERWORKS EXTENSION. No more exhaustive, well-considered and conclusive report has been issued from the city hall than that on the extension of the waterworks system by the commissioner of works, which was given publicity yesterday.

Every precaution appears to have been taken to get the necessary information on which to base the report and tests and borings essential to construction are fully recorded. There will no doubt be some discussion over the substitution for the old plan of this radically different one, but it is clear that no vital objection exists, and the authorities appear to be satisfied with the conclusions arrived at.

WHAT WILL THE OBSTRUCTIVES. Speaking at the luncheon of the Civic Survey committee, Mayor Hocken asserted that "there is no obstacle in this year's board of control to deal with any situation we find existing."

Canada Today. In his annual address to the shareholders of the Canadian Bank of Commerce Sir Edmund Walker has presented to them and to the public a series of able, comprehensive and judicial surveys of financial and business conditions in the Dominion from year to year.

Debentures. For sums of one hundred dollars and upwards we issue Debentures bearing a special rate of interest, for which coupon payments are made yearly and attached. They may be made payable in one or more years, as desired. They are a

tried and proved and better fitted to meet the difficulties that will and must confront them.

Canada undertook a tremendous task when she linked her provinces together, not by one, but by three links of steel. Canadians were banking on their future, one that may be delayed but is bound to come.

Notwithstanding the adverse monetary situation and the efforts made to decay the credit of the Dominion, the fact remains, as Sir Edmund Walker pointed out, that England took more of its securities last year than ever before.

MEXICAN AFFAIRS. President Wilson's policy of non-intervention in Mexican affairs is being steadily justified by the course of events. In Villa the so-called constitutionalists seem to have found an excellent strategist who, whatever may be his personal failings, is capable of winning battles.

LEARNING THE LESSON. Misdoing always brings its own punishment, and that the express companies of the United States have found. For years they enjoyed a fictitious prosperity based on arbitrary and discriminatory rates and an absolute indifference to the rights of the public.

TORONTO BANK'S NET PROFITS REACHED SEVENTEEN PER CENT.

More Than a Million Dollars is Now Available for Distribution—Deposits Show the Satisfactory Increase of a Million Six Hundred Thousand—Fine Bank Buildings.

Most gratifying in every respect was the annual report of the Bank of Toronto, which was presented to the shareholders at the annual meeting yesterday. It was the fifty-eighth annual report, and is by far the best ever presented.

The total assets of the bank are \$69,251,184, an increase for the year of \$1,688,616. The statement is certified by an outside auditor, thus complying with the regulations of the Bank Act, and also the provisions of the act do not apply until after the annual meeting, which is held.

Reserve Funds. The amount carried forward in profit and loss account is \$2,072,723, which makes the total reserve funds exceed the paid-up capital of the bank—\$5,000,000—by \$1,072,723.

Loans amounted to \$48,478,485. After allowing for the different method of treating the rebate of interest called for by the new Bank Act, a net decrease of \$1,068,017 is shown, indicating the ability of the

that it is now producing so that we might produce more iron and steel? If this is Sir Edmund Walker's opinion, it is apparently not that of the people engaged in the different trades. Other than trading, which is the occupation they are how pursuing.

DUNFIELDS

Annual January SALE OPENS TO-DAY

The mere announcement of this sale has always been sufficient to bring hundreds of men to the Dunfield Stores. Men know that the Dunfield sales (which are held only twice yearly), are the most important in Toronto because of the haberdashery offered, and the genuineness of the reductions.

The sale commences this morning and a few of the reductions are mentioned here merely to indicate the savings that may be obtained. Naturally, assortments at the beginning of the sale will be better than towards the end. Those who intend taking advantage of it should, therefore, do so as early as possible.

OWNERSHIP OF SHORE PROPERTY IN GERMANY

Continually Flowing Waterways Are Public and Not Subject to Private Control.

Prior to Jan. 1, 1906, the general Roman law, which provides that all flowing waters, the sea, and the sea-coast, to the utmost limit of the high-water mark, are public property, was applicable in the larger part of the German Empire. Since the date named there has been a development of legal principles in that country, according to which the following rules are now operative:

DOCK THAT IS HEWN OUT OF SOLID ROCK

Peculiar Feature of New South Wales Government Institution at Sydney.

A peculiar feature of the New South Wales Government dock on Cockatoo Island, in Sydney harbor, is that it is hewn out of a solid rock. Historically this island is of interest as it was the site of a large prison in the days when British convicts were transported to Australia.

LISTOWEL SUFFERS TEN THOUSAND DOLLAR FIRE

Town Hall Wiped Out and Stables of Adjoining Hotel--Fire Fighting Plant Cut Off.

(Special to The Toronto World). LISTOWEL, Jan. 14.—(Can. Press).—Fire doing \$10,000 damage, wiped out the town hall and the stables of the Grand Central Hotel and seriously scorched the hotel and the implement warehouse of Robert Marks and other nearby buildings. The fire broke out about 2 o'clock, probably due to a defective chimney. Chief William Wilson and the members of the fire brigade could reach the town hall, access to the section where all their fire-fighting apparatus was stored, had been shut off, and all was lost in the flames.

INCREASE OF WEED GROWTH

The afternoon program opened with an address by F. C. Nunick, who is connected with the commission on conservation. He said that enough attention was paid to the varieties of grain grown in Peterborough County, for instance, 17 varieties were grown. These could not all be best varieties. Weeds were gaining the ascendancy in many cases. On one farm 45 different weeds were found. A fact, the significance of which could not be slighted, was that 98 per cent. of the farmers were taking no special precautions to prevent the waste of farmyard manure. This meant an enormous annual loss of fertility. Eight demonstration farms were established in different parts of the province. On these farms cultural methods laid down by the commission were followed.

Table titled 'PROFIT AND LOSS ACCOUNT' showing financial details for the year ending 29th November, 1913.

There has been world-wide financial stringency throughout the year, but the volume of business in Canada has again been large. The reports of the Trade and Commerce Department show increases, and the development of the country has gone forward.

The Bank entered into occupation of their new banking house on the second day of July last, and since that date the operations of its principal Toronto office and the Head Office department of the Bank have been carried on in this building.

A branch of the Bank has been continued in the premises formerly occupied as the Head Office, and branches have also been opened at Victoria, B.C., Myrhone and Mazenod, Saskatchewan, Richards, Alberta; Kerwood, and Yonge Street and Yorkville Avenue, Toronto, in Ontario. We have also closed some small offices that did not give promise of becoming profitable.

The form of General Statement submitted to you is in accordance with the requirements of the Bank Act passed in the last session of Parliament, and gives fuller details in some particulars.

The Auditor appointed by the stockholders at the last Annual Meeting has made his examination into the affairs of the Bank, and his report upon the same will be found appended to the General Statement submitted herewith.

GENERAL STATEMENT.

Table titled 'GENERAL STATEMENT' showing financial details for the year ending 29th November, 1913, including Liabilities and Assets.

D. COULSON, President. THOS. F. HOW, General Manager. Toronto, 29th November, 1913. I have examined the Books and Accounts of The Bank of Toronto at its Head Office and two principal branches in Montreal and Toronto, and checked the cash and verified the investments and securities on hand there as at the close of business on November 29th, 1913, against the entries in regard thereto in such books.

After the Report had been read, the President addressed the meeting as follows: Gentlemen—It is not my intention to go minutely into the events of the year, but to give you a brief summary of the more important matters that have been referred to the demands that were then being made upon loanable capital, and the increasing difficulty experienced in obtaining money for new enterprises.

The past year has been an eventful one. At our last annual meeting I referred to the demands that were then being made upon loanable capital, and the increasing difficulty experienced in obtaining money for new enterprises. This difficulty increased, and a widespread and severe monetary stringency resulted, which affected every market.

As the result, therefore, of causes operating over a series of years, the supplies of available capital were reduced, and the money markets were unable to provide for the large demands being made upon them.

The stringency was probably felt less in the United States than in most of the financial markets. In part, this was owing to the fact that for the greater portion of the year they were passing through a period of hesitancy and lessening trade, due to uncertainties created by proposed legislation affecting the tariff, and a new Banking and Currency bill. The demands of business became less as trade continued to fall off. The Tariff and Banking Acts have now become law, but it is yet too soon to speak of their probable effects upon that country.

We are more concerned, however, with the situation in Canada. We have during the year, some unfavorable and some favorable conditions. The year began with widely extended loans and large undertakings under way. Your attention was called at our last annual meeting to the increase of one hundred million dollars made by Canadian Banks and Current Loans in Canada during the year that had then passed. In the absence of largely increased resources, it was, of course, impossible for banks to continue expanding their loan accounts as was prudent, in the interests of customers alike. A halt had to be called, and wholesome restraint was exercised.

The harvest of the preceding year, in its final outcome, was disappointing, and the distress had been incurred that could not be repaid and had to be carried over. Although conditions abroad were unfavorable, the London money market has been generous in its advances to Canadian undertakings. The estimated amount of Canadian securities taken in London during the past year, is, in round numbers, two hundred and eighty-four millions of dollars, and includes between government loans, municipal securities, railways, public utilities, and other works in connection with municipal government, and also a considerable amount in relieving a strained situation. The fact that in an unfavorable situation British capitalists have taken about sixty millions of dollars more of our securities than in any other year shows their willingness to make investments in this country, and their confidence in our resources.

We have also found a market for many of our municipal securities in the United States, and it is estimated that not less than \$20,000,000 of our municipal bonds have been purchased by investors from increased resources, and that our securities are finding a wider market.

In spite of the unfavorable conditions the country has continued to grow, and its resources have been expanded, although there has been a falling off in the later months of the year. The aggregate amount of loans made during the year ending 31st December, 1913, was \$1,132,670,000, an increase over 1912 of \$125,848,000, and over 1911 of \$315,418,931; the imports for the year being \$672,402,508, the preceding year, and this item forms a satisfactory feature in the year's results.

Total immigration to Canada during the eleven months ending 30th November was 409,748, made up of 155,123 British, 111,482 American, and 143,847 from all other countries. During the eleven corresponding months of 1912 the total number was 382,778, composed of 142,797 British, 134,380 American, and 105,601 from other countries. The amount of cash and valuable effects brought in by these immigrants is estimated to be about \$27,000,000 sterling, or \$135,000,000.

The continued influx of these large amounts of money has added greatly to our country, but prosperity created by the expenditure of money into development of lands which are thereby made productive, into profitable investments, into well-planned and properly managed railways, and other investable return, we will find that we have a solid foundation and bring a profitable foundation. But we have great natural resources, and we have large sources of our own opportunities for development, and we have wisely conserved these and judiciously developed them.

The following figures have been prepared showing the sources of the wealth production of the Dominion, and should assure us that our present resources are building a ready-made, and that the foundations upon which we are building are really sound. These figures may be put under the following heads, with the estimated amounts represented by each:

Table showing sources of wealth production: Crop production, Fisheries, Minerals, Manufactures, etc.

These figures do not embrace the whole of our production, as they do not include anything for animals and animal products, dairy, etc., and there do not include the Canada's oil production, which is a very important item. We are only at the beginning of our development, and if content to go forward wisely, avoiding speculative booms, paying special attention to increasing wisely conserving them, our country will have a secure future, and investments can continue to be made in Canada, with absolute safety.

The figures of the November statement of Banks furnished to the Government for the years 1912-1913 show the following changes in the principal items: Circulation increased \$4,024,222; Loans in Canada, decreased \$4,007,948.

I think I am justified in saying that the banks have handled the situation this year with commendable wisdom. The actual business requirements have been judiciously cared for, and while an expansion of loans could not be entered into, customers have had every legitimate need supplied.

It is but due to the Hon. Mr. White, the Minister of Finance, to say that he is entitled to great credit for submitting an Act which showed such an intelligent appreciation of the needs of the country. The Banking Act of Canada has always been framed on generally admitted economic principles, but necessarily requires adaptation to the changing conditions of a rapidly growing country.

The discussions that took place in the Banking and Commerce Committee were of great value, and the Minister showed his thorough appreciation of the different subjects under discussion.

The members of the Committee are also entitled to praise for their efforts to discuss the proposals in that spirit. Board of Directors—I would like to add a few personal words about our former Director, Mr. Robert Reford. He was one of the earliest customers of our Montreal Branch, and was always a valued customer. His shipping interests, under his management and that of his son, who was associated with him, were very important factors in the trade of the port of Montreal, and in addition, large interests in Rice Milling and various Lumber Companies.

We are ourselves fortunate in having as his successor, Mr. William Gear, who has been so long associated with Reford in many of his business interests, and who has also filled many important positions in the business world of Montreal. It is very glad to have him as our Vice-President, and to add that I am also very glad to answer any questions relating to any matters contained in the Report.

This motion was carried, as also a resolution expressing the thanks of the Shareholders to the President, Vice-Presidents and Directors for their services during the past year. In accordance with previous notice given by him, Mr. J. C. Black, named Mr. Geoffrey T. Clark, C.A., as Auditor of the Bank, as required by Section 56 of the new Bank Act, and resolution to that effect was duly carried by the meeting.

The following Directors were elected for the ensuing year: William Gear, President; Charles Smith Hyman, William Stone, John Macdonald, Vice-Presidents; Edward Gooderham, Nicholas Bessard, Joseph Henderson, Stephen Melghem, Jacob Lewis Engheart, William G. Gear, Secretary. Most recently re-elected: President, Mr. W. G. Gooderham; Vice-President, Mr. Joseph Henderson; Secretary, Mr. W. G. Gooderham.

ENGAGEMENT OF A SPRIT SAVY IN THE PROFESSORS' IS NOT AT HAND

Addresses by Principal Hutton, Dr. Andrew McPhail, graduates respectively of Toronto and McGill universities, and by Col. Denison, were given at the open meeting of the Literary and Scientific Society of University College on 'The Objects and Policy of the Canadian Defence League' in Convocation Hall last evening. That Canadians should awake to the necessity of preparing for the defence of their country in time of peace, that they should contribute materially to the armaments of the nation, and that British supremacy among the nations of the world, and that Anglicanism as a greater defect than its advocates are aware of, were the sentiments of the speakers of the evening.

The audience numbered about three hundred, made up mainly of undergraduates and members of the I.O.D.E. Dr. Denison, who was invited to speak for the sake of dollars, and all were agreed that the subject was one of the greatest importance to the nation, and that men are actuated by suggestions which only exclaimed 'Principal Hutton' in the course of the evening. 'I maintain that the Canadian Defence League did not go far enough when in drafting its constitution it excluded the object of the league was not to encourage the spirit of militarism in the Dominion,' Dr. McPhail said. 'It is my opinion that statement need not have been made, and that it should be an avowed clause, that the organization of the constitution should be fostered in Canada.'

POWERS OF THOUGHT LIMITED IN ESKIMO

Eating Seems His All-Important Life Duty Beyond the Task of Providing It. According to Knud Rasmussen, an explorer and authority on polar regions, the Eskimo does not count the hours of his day, and he does not keep a calendar. All his thoughts are centered on food, and beyond the need of sufficient food for himself and his family, he has no care.

Mr. Rasmussen relates a number of interesting conversations with Eskimos, with various Eskimos, all of which are toward pointing out, conclusively, the fact that the Eskimo has no sense of religion, and that he is not a religious man. 'Oh, it is only you white men who think of religion,' he said. 'I have never heard of it, and I have never seen a priest.'

Mr. Rasmussen also relates a number of interesting conversations with Eskimos, with various Eskimos, all of which are toward pointing out, conclusively, the fact that the Eskimo has no sense of religion, and that he is not a religious man. 'Oh, it is only you white men who think of religion,' he said. 'I have never heard of it, and I have never seen a priest.'

The Weston Electric Light and Water works Commission, at their headquarters, decided to utilize the old power house on Little Avenue as an auxiliary power house to assist in the hydro-electric plant. Although the machinery has been idle, it is still in good condition, and the Commission will be glad to have it put to work on the matter at its next meeting.

Father James Malahan has been placed in charge of the new Basilica Catholic parish, comprising Weston and surrounding districts, which recently formed the northern part of the parish of St. Cecilia. Father Malahan's place as pastor in Athol and Clevedon will be held by the Rev. Father J. O'Brien, lately assistant to Rev. Father Walsh of St. Helen's parish.

Prof. J. H. Michael, M.A., of Victoria University, Toronto, will conduct a series of lectures on 'The History of the Westford Methodist Church' at 7:30 p.m. Appropriate music will be rendered for the occasion by a quartet from Victoria College, Toronto.

The Etobicoke Raceway Association will meet in the Hunter Bay school house on Friday night, Jan. 16, for the construction of a new car. Has from Milano to Queen street, on the proposed extension of the street car line, and the railway track. As the proposition is so intimately connected with the future of the district, there will be a large attendance.

The report in yesterday's 'World' that the driver of the motor car, which was being driven by the Toronto Police, had been refused, was incorrect.

SURPLUS WHEAT WANTED ABROAD

Bullish News Gave Prices Strength—Corn and Oats Higher.

CHICAGO, Jan. 14.—Estimates that all of the surplus wheat in the United States and Canada will be required by importing countries had a bullish effect today on prices. The market closed strong at the top figures of the session, 1-1/2c above last night. Other staples, too, all made a net gain—corn 1/4c to 1/2c, oats 1-8c to 5-8c, and provisions 2/4c to 2/8c.

Wheat gathered strength from the fact that export sales continued, and there were signs that foreign buyers had spread out into future months, July in particular. One of the incentives to purchase was the injury to the winter crop in some sections of the United States, notably Kansas. Furthermore, rain was said to be delaying and spoiling shipments in Australia, where unseasonable and navigation was reported to have closed on the Danube.

Europe's consumption. The strongest swell in wheat came after the issuance of figures indicating that Europe is consuming a million bushels a week more than the record-breaking total a year ago. Heavy offerings at the extreme advance were taken well, as freely indeed as at any time since the May price was at 90c.

Important interests in the corn trade changed front today and covered several million bushels in an interesting market. The supply of old Argentine corn was said to be exhausted and the new crop unsuitable. Europeans were bidding for corn from the United States, the first time in a long while.

Canceling of hedges by shippers tended to lighten shorts, although cash sales today were not large.

Oats joined in the strength of other grain. Demand, however, was only fair.

Provisions climbed in company with hogs and corn. Top figures of the day, also, were not maintained, prices receding somewhat owing to holders attempting to realize profits.

CATTLE MARKET WAS AGAIN STRONG

Sheep, Lambs, Calves and Hogs All Very Firm.

Receipts of live stock at the Union Yards were 50 car loads, 988 cattle, 617 hogs, 482 sheep and 105 calves.

Trade in every department of live stock was very active. Cattle sold up to \$9 for choice steers, and, in fact, all classes of cattle never were higher this season than far. Stockers and feeders were in demand. Stock steers, 600 lbs. each, sold at \$4.20. Had the Ontario farmers taken The World's advice last fall, when this class and these weights were selling at \$4.25 to \$4.50, they would have made a nice clean up just about now. Hogs were again higher, selling up to \$9.60, fed and watered.

Choice butchers' steers, 1000 lbs. to 1200 lbs., sold at \$3.50 to \$3.75; good, \$3 to \$3.25; medium, \$2.75 to \$3; common, \$2.50 to \$2.75; choice cows, \$2 to \$2.50; good, \$1.75 to \$2; medium, \$1.50 to \$1.75; common, \$1.25 to \$1.50; canners, \$2.50 to \$2.75; choice bulls, \$7 to \$7.75; good, \$6.50 to \$7; medium, \$6 to \$6.75; common, \$5.50 to \$6; culls, \$4.50 to \$5; sheep, \$7 to \$7.75; good, \$6.50 to \$7; medium, \$6 to \$6.75; common, \$5.50 to \$6; culls, \$4.50 to \$5.

The demand for stockers and feeders was greater than the supply. Choice steers, \$6.75 to \$7; good steers, \$6.50 to \$6.75; stockers, \$5 to \$6.20.

Milkers and Springers—The market for milkers and springers remains steady but firm, especially for those of good quality. Prices ranged from \$50 to \$95, the bulk going at \$85 to \$89 each.

Veal Calves—The demand for veal calves was as strong as ever, and prices were very firm. Choice calves, \$10.50 to \$12; good calves, \$9 to \$10; medium, \$7.50 to \$8.50; common, \$6 to \$7.

HEART SONGS

Greatly Reduced Size. Full Size, 7 x 9 1-2 inches

Lead, Kindly Light

The words of this beautiful hymn were written by Cardinal Newman, and published anonymously in 1832, in The British Magazine. John B. Dykes composed the music, and both words and music are known and loved wherever the English language is spoken. Cardinal Newman was for many years a priest of the Catholic Church in England, being made a cardinal in 1879. He will long be remembered for his masterful defence of his faith in a controversy with the great Gladstone, known at the time as "the battle of the giants." His whole life was one of sincerity and saintliness, and his memory will always be revered by his countrymen. He died in 1890.

The music was written by the author of "Nearer, My God, to Thee" and "Jesus, Lover of My Soul"—as noted above—who ranks among the greatest of English musicians.

"Heart Songs" contains many sacred songs and melodies which are adapted to ritualistic work, as well as home, church or Sunday school. The music and words are the highest expression of true religious faith, regardless of creed or denomination.

BANKS FALL INTO LINE WASHINGTON, Jan. 14.—(Can. Press)—Certified copies of resolutions adopted by the boards of directors of 1626 national banks, scattered throughout every state of the Union, accepting the provisions of the new currency law, had been received tonight by the treasury department. The acceptance, it was said, included nearly all of the largest banks in the principal cities, and the list is being increased hourly by notifications from state banks noting their intentions to nationalize.
