There will be no appeal by the York Township Council in the Toronto Suburban Railway decision at Lambton Park. This agreement was arrived at yesterday in a private conference between the York Township Council, their solicitor and a representative from the city. The suburban company was said to be giving excellent service in the western area, and it was held that no good purpose could be served by an appeal, the chance of securing a favorable verdict being regarded as slight. A long and satisfactory conference with the hydroelectric commissioners was held, matters being advanced very materially. Reeve Gr.f.f.th stated to The World last night that there was every prospect of a good working the suburbance of a good working a suburbance of a good working that there was every prospect of a good that there was every prospect of a good working avreement being arrived at in the near future. The Markham Township Rural School Fair held yesterday in the Village of Unionville, was a great success. Between 1500 and 2000 people from all parts of the county took part in the proceedings. The fair was held on the Unionville school grounds and from early morning till night there was something doing all the time. J. REDUCING STEEP GRADE

**GOVERNMENT PIONEER** 

Was Originator of Board of Control and Present Civic System.

In the death of ex-Ald. Thomas Davies at his residence, 56 Wellesley street, at 10 o'clock last night after several months' illness of a general decline, Toronto has lost a worthy c'tizen. He was elected alderman in the year 1573, and he helped in purchasing the Furness waterworks, which became a municipal franchise. He was honored many years with a seat at the council board, and on many occasions acted as mayor. He was one of the originators of the local improvement bylaws, which enabled the city to construct improved pavements and sidewalks all over the city. He was also the originator of the board of control and our present system of municipal government. He had the honor of moving the resolution that gave Hiverdale Park its name, and was one of the chief promoters of the straightening of the River Don. His names occupies a place on the tablet of the city hall and is also embossed on "Big Ben."

Mr. Davies was born in Davisville March 25, 1845. His father came to this country from Cheshire, England, in 1832. He was educated at the Park School, where he carried off one of the first Jesse Ketchum prizes, Model School and Upper Canada College. Mr. Davies was prominent in the Masonic fraternity, being a life member of King Solomon's Royal Arch Chapter and was past master of Orient Lodge, A. F. & A. M. He was also a life member of the Sons of England and St. George's Society and was made an honorary member of the Foresters.

## artillery, having been resisted, continued its ceaseless battering of German positions, villages, highways and railways within range of the terrible guns. Most significant is the report coming by wireless from Germany that the head-quarters of the great general staff are being shifted from the western to the eastern front, for the purpose of waging a big eastern offensive. The first part of the report concerning the transference of the headquarters from France part of the report concerning the transference of the headquarters from France is probably true enough, for the Germans have already been defeated severely and perhaps irreparably in the west, and they must sooner or later retreat, but by reason of their defeat in the west they will be in poor condition to wage an offensive campaign in the east. It is conceivable, however, that with the loss of their petrol supplies from Roumania, the Germans may have to drop everything and open a big offensive against Roumania to secure the oil wells in order to stave off utter collapse of their motor-transport system and, with it, the collapse of their far-flung battle lines. If this is so, it has hardly escaped the notice of the allied strategical control board and dispositions may be expected to be taken to counter this campaign of despair. But the hints about the undertaking of a campaign in the east allowed to be published in Germany by the German war lords are most probably designed solely to prepare the German public mind for the coming retreat from France and even tually from Belgium, following upon the irresistible advance of the allied

NEW SUITS! NEW OVERCOATS!
NEW RAINCOATS!

These are shown in a bewildering array of patterns, authentic styles and handsome colorings; and throughout the huge variety one of the most notable
features is the moderation in price that is surprising in view of
the great advances in the cost of producing clothing
of such qualities.

It is one of the most interesting collections of clothing for men that have been shown in our extensive Men's Clothing Department for some years. All men are invited to inspect the new clothes, Thursday or following days. No obligation to buy.

# The Suit Styles

In suits especially for young men, the more or less form-fitting models are favorites, a new tone being added this season. in the few double-breasted models. In both single and double-breasted styles, the lapels preserve a most artistic balance, being neither too narrow, nor very wide. Three-button models predominate and some have the now well established patch pockets.

## Vests

Many of these, too, are form-fitting and many have collars.

# The Trousers

are pretty much as before, many having tunnel and strap belt loops, back pocket tabs with buttons and side pockets and watch pocket.

## In Overcoats

both single and double-breasted styles are shown, some—a very few—being form-fitting and the favorites in loose slip-on styles. Velvet collars are a notable feature. Slant pockets with flaps are noticed on many of the coats and they seem to add to appearance as well as being most convenient.

# Patterns and Colors Small checks, neat stripes and multi-

colored mixtures are the keynote as to patterns, with colors mostly in dark shades, browns, greys and the many effects in tweed mixtures.

materials—tweeds—tweeds—tweeds—good all round, business-like, serviceable tweeds are the most favored, altho in such a large collection, cheviots, worsteds and the even popular blue serge are also greatly in evidence.

# Raincoats

The desire of late years for a garment that would do service as a fall coat and raincoat combined has perhaps been responsible for the new tweed raincoats shown in a splendid collection in this opening display. These, to all appearances, are tweed coats, but they have a rubberized lining, mostly in plaid effects, and are both rainproof and windproof. From the favorable reports already heard, the tweed fall coat and raincoat combined, promises to be one of the greatest selling lines in years.

Another combination coat which is a revelation to many is a stylish tweed coat, the cloth of which, we understand, has been treated with whale oil, so that when the water strikes it it runs off like water from a duck's back. Since this coat made its appearance, it has been difficult to keep it in stock. The price is .... 30.00

# **FARMER REFUSES WIFE** ADMITTANCE TO HOUSE

Seeks to Commit Him for Disobeying Order of the Court.

Justice Sutherland has reserved judgment on an application by J. E. Jones, representing Mrs. Agnes Evans, for an order committing John H. Evans, farmer, of Simcoe, to jail for contempt of court. The couple have been married for many years and have nine children.

Mrs. Evans sued her husband for

alimony, but her action was dismissed. After an order was handed down in the appellate division declaring that the husband should take his wife again. the husband enould take his wife again into his home, Mrs. Evans, with her baby, went to the farm, but was refused admission, it was declared. It was stated that if Mrs. Evans returnwas stated that if Mrs. Evans returned the \$3000 paid to her she would be allowed to enter. The motion to commit followed. Mrs. Evans alleges that \$600 of the \$3000 belonged to her, and that the remainder was paid under an agreement for future separation, and is not binding.

## ENGLISH LANGUAGE OF GERMAN ORIGIN

Teutonic Invasion of British Planted Seed of Present Tongue.

The English language is not native to England—strange to say. It was carried there by the flerce German warriors who conquered that island in the fifth and sixth centuries. Its nearest cousins today are to be found in the rude dialects of the islands along the German coast.

When our Anglo-Saxon ancestors first came to plunder and recommender. first came to plunder and Britain they found a people

advanced in the arts and sciences than themselves. For the Celts of England had inherited the Roman civilization of an earlier day. It is curious to think that if the old Teutions had never invaded England we would now be speaking a language similiar to French, Spanish or Italian—of Latin derivation. The Anglo-Saxon or old English language belongs to the Teutonic speech.

The latter has several principal branches, such as the Scandinavian, from which come the Danish and Swedish tongues; the high German, or language of German literature; and the low German, which is divided into Frisian, Dutch and Flemish. Our own English is the nearest related to this last group. But all the Teutonic languages are only one branch of a large racial family, known as the Aryan or Indo-European. This reaches from India to Ireland—and connects Patrick with the Parys). Sanskrit, Persian, Greek, Latin, Celtic and Teutonic are thus all related tongues.

Goodyear Tires, Tubes and Tire Saver Accessories are easy to obtain from Goodyear Service Station Dealers everywhere.

Goodyear 30 x 3½ Plain Tread Tires sell for \$4.02 each less because they are made in Canada. Goodyear 37 x 5 All-Weather Tread Tires sell for \$11.05 each less because they are made in Canada. These are two examples of the actual cash savings for you because Goodyear Tires are not imported, but are manufactured at Bowmanville, Ont. Other savings are shown in the two tables given

The Goodyear Tire and Rubber Co. of Canada, Limited imports only raw materials. The duty on raw materials is much lower than that on finished products. Hence the saving.

All tires sold in Canada do not effect this saving. Many are imported and so carry the higher duty. This increase in price, however, makes no increase in quality.

In the United States whence most of these imported tires come, a great many sell at lower prices than Goodyears. Yet Goodyears outsell every other brand. Surely the American motorist must have found that Goodyear higher cost-pertire still gave lower cost-per-mile because of greater mileage.

Then here in Canada where you have lowerthan-import cost-per-tire, must not the difference in cost-per-mile be even greater?

Rent has followed the same tendency, tho it has fallen since 1913, when the highest point of \$24.90 per month for a six-roomed house with sanitary conveniences was reached. In 1914 the figure was civilization. \$28.50, and last year \$18.40. A curious anomaly is indicated in the higher rents paid for houses without sanitary conveniences, in 1910, when the rent for the better dwelling was \$17, and for the unimproved one \$19.75. The downward tendency in rent since 1913 is perhaps the most comforting thing another loan of a million francs from in the report for the working man.

# The War and the Tariff

So far as imports from Europe are concerned the war has automatically created the most complete protective tariff ever enjoyed by either Canada or the United States. By putting a stop to immigration, the war has done away with the strongest argument against the statutory tariff, namely, that it protects the manufacturer from competition, but permits free trade in labor. The manufacturer in Canada and the United States alike has had the home market pretty much to himself, but he has found labor scarce-much scarcer of course in Canada, where nearly four hundred thousand men have been withdrawn from productive employment.

There is this difference, however, i the state of mind prevailing in the two ountries. Canadians seem to take it for granted that they can hold their own after the war, when Europea imports will easily cross the sea. Working Out the Liquor Law

Lawyers, liquor men and others interof the Ontario Temperance Act in respect to the delivery of spirits from a bonded warehouse or beer from a brewery in Ontario to the private dwelling house of an Ontario householder upon the crier of the owner of said spirits or beer living in some other province or country. The act, it will be remembered, does not prohibit liquor being sent into this province for consumption. A man in Ontario admittedly may buy whiskey or beer in Quebec and have it shipped from Quebec to his home in Ontario. Section 138 reads as follows: Sec. 139. While this act is intended to

prohibit and shall prohibit transactions in liquor which take place wholly with in the Province of Ontario, except under license or as otherwise specially 170-vided by this act, and to restrict the consumption of liquor within the limits of the Province of Ontario, it shall not

Judge Winchester Releases Him on Charge of Killing John Gorman.

After a long examination and cross experiation of motor and electrical experts before Judge Winchester in the sessions yesterday, Albert W. Gordon, charged with criminal negligence, was released. While driving a motor car from Willocks' Lake on June 28 he struck John Gorman near stop 52. Yonge street, and killed him. There was evidence that after the accident the lights of the car gradually dimmed, and when the battery of the car was examined by experts for the car was examined by experts for the crown it was found to be exhausted. According to two witnesses, however, the lights were in good condition both at the time of the accident and a short time after.

The driver and those in the car did not see Gorman until he stepped in front of the car. There was no chance of avoiding the accident. After hearing many witnesses Judge Winchester found that the lights were alright at the time of the accident, and that Gordon was not negligent.

Having already proved it in his "Get-Rich-Quick-Wallingford," he has produced another farce, called "It Pays to Advertise," which comes to Grand next week, with the reputation of being another "Wallingford." The farce is said to have all the dexterity of a game and to keep the audience guessing. It all begins with the plot of a wealthy soap manufacturer to get his easy-going son interbusiness. It is see-saw between them, and the ups and downs make one of the breeziest farces of the season.

The company this season includes Bert Rose, burlesque's best and highest salaried Hebrew comedian; James Coughlin, equally famous as a portrayer of Irish humor, and Don Clark, Margaret Lee. WATER NEEDED TO COOL "AIR-

COOLED" GUNS. One of the many things needed which the United States soldiers have learned on the Mexican border is that a certain type of machine gun which is supposed to be air-cooled scarcely cools at all when subjected steady service for any length of ime. The barrel is provided with radiating flanges like the exterior of an air-cooled gas engine cylinder.
Water is now applied to these guns
with long-handled sponges which
have been provided for the soldiers for have a spare barrel for use when the other barrel gets hot, and yet that provision is inadequate to prevent everheating.

F. MITCHELL SIGNS WITH BRAVES AGAIN

Fred Mitchell, formerly of the Toronto Leafs, and for the past two seasons assistant to Manager Stallings of the Boston National League baseball team, yesterday signed a contract with the Boston Club for three years.

Tyrus Cobb, for nine years the leading batsman of the American League, yesterday conceded that Tris Speaker of the Cleveland Club would be the 1916 champion. Speaker now has a margin of nearly thirty points over Cobb, according to unofficial averages. Cobb said it was a human impossibility for him to try to cut down this lead and at the same time to co-operate in team-play to the fullest extent of his ability.

Shortstop Rawlings of the Toledo Club of the American Association has been drafted by the Boston Nationals.

When the curtain rings down on the 1916 baseball season, there is a strong possibility that "Cactus" Cravath, Philadelphia National's right fielder, will retire.

More cancellations of the drafts made by major league clubs on last Friday reached Secretary John E. Bruce of the National Commission yesterday.

The Chicago Americans canceled on Montreal, the players from which team they had not named, and the Royals revert to Washington for selection. The Chicago Americans also canceled on Richmond (player originally not named). By Washington's cancellation of second choice on Kanzas City, Philadelphia Americans have the opportunity of selecting a man from this team.

Both pitchers were well supported and all of the runs were earned. Detroit presented a makeshift infield, with Heilman at second and Young at third, but the two men who played the strange positions gave satisfactory service. Young had very little work to do, but Harry accepted eight or nine chances, booting one of the easiest offered him. He was not altogether familiar with work of covering the sack, and once forced Bush to make a sensational play because he failed to get over in time to take a throw, But, all things considered, he did very well.

CHRISTIE FOUND A TRACK TO HIS LIKING

MONTREAL. Que., Sept. 19—Under a brilliant ride at the hands of Jockey Robinson Christie carrying the colors of the Zollicoffer Stable, won the handicap that featured the card at Doryal for the last day but one of the autumn meeting.

Christie found a track to his liking and with his pull in the weight he held a great advantage over King Neptune, which carried the colors of the Tyree Stable. King Neptune raced as if he has had too much of it, while Christie ran fresh and true, and under the well-judged ride won with something in receive. When the break came, Prohibition, the light-weighed one, dashed to the front and forced the pace to the far turn with Christie and King Neptune running close together until Robinson made his run and soon overtook the pacemaker. King Neptune dropped out of the running and was never able to get up within challenging distance of the first two horses. The winner was much the best, and for a three-horse race the price paid in the mutuels was a liberal one.

Prohibition ran a good race and showed that he was now at his best form. He will bear watching in future starts on the Canadian circuit. Along with his victory on the winner of the feature event Robinson had three other winning mounts, which puts him far in advance of the other boys riding in Montreal this autumn. He is not only a stronger finisher, but is a good post rider, which gives him a great advantage at the starts. MONTREAL, Que., Sept. 19-Under a

Seventeen Went to the Post in Rich Race in Aus-

The story of the race for the Australian Grand National Steeplechase, the chief event at the winter meeting of the Victoria Racing Club at Flemington, is told in The Melbourne Argus. One of the competitors was Buliawarra, who was racing in England a season or so ago.

tod in The Melbourne Argus. One of the competitors was Builawarra, who was racing in England a season or so ago.

There were 17 acceptors for the event on the previous Thursday, and the whole of them went to the post. The winner proved to be Coradjill, by the Australian Cup winner Portsea from Sindhia, by by Wellington from Sylvina, by Giorious from Sylvan Queen, by Julian Aveneti. He is nearly 10 years old, but this is nothing out of the way for a gelding, particularly a jumper. D. H. Allan, a well-known r.der a few years ago, trained Coradjill, while R. Connolly rode him, and thus scored his first important victory over jumps. At Williamstown Coradjill did not jump well, or he would probably have won the race that Bullawarra took. In the, Grand National he gave a perfect exhibition of jumping, and came in practically without a mark on him. He is a bay, and is a good lump of a horse—clean-legged for such and old steeplechaser. The most conspicuous thing about him is his white face. This was Coradjill's fourth attempt to win the Grand National. He was third to Leah Kleshna and Statecraft in 1913, third to Zephuron and United Kingdom in 1914, and sixth to Flash Jack last year.

At the weights and on the day the best horse won, Coradjill fairly and squarely wore down the lighter-weighted Rendrock from the last fence, and he ran the distance in good time—equal to Leah Kleshna's in 1913, and less than 2 seconds outside of the record for the event, put up by Zephuron two years ago. On a drier day Bullwarra may have made a better fight of it, but possibly his condition rather than the state of the going beat him. It was disappointing to see two spiritedly-backed candidates like Booligal and Highland C'an disappear so early in the contest, but that is the fortune of war. Bibben-luke must have proved very dangerous but for hitting the fence near the abattors. He seemed to be going well at the time. None of the jockeys or horses sustained any particular injury. Tho Ches cut his stiffe a little, and Flash Jack pulled up

The commandant of the 20sth Irish-Canadian Battalion, Lt.-Col. T. H. Lennox, was asked today by Major-Gen. Logie to explain the recent campaign for funds to aid the battalion, a feature of which was the use of contribution time labeled "Help." Cclonel Lennox said he knew of some campaign to get in battalion funds, but was unaware of the precise means employed, and had stopped the campaign a week ago. He regretted the use of the tin boxes.

Morris, Co. Sgt. -Maj. W. J. Hopwood.

"If dyspeptics, sufferers from gas, wind or flatulence, stomach actility or sourness, gastric catasph heattburn, etc. would take a teasph heattburn, etc. would take a teasph heattburn, etc. would soon forget they were ever afflicted with stomach trouble, and doctors would soon forget they were ever afflicted with stomach trouble, and doctors would have to look elsewhere for patients." In explanation of these words, a well-known New York physician stated that most forms of atomach trouble are due to stomach acidity and fermentation of the food contents of the stomach, compined with an insufficient blood supply to the stomach. Hot water increases the blood supply, and bisurated magnesia instantly neutralizes the excessive stomach acid and stops food fermentation, the combination of the two, therefore, being marvelously successful and decidedly preferable to the use of artificial digestions, stimulants or medicines for indiges.

In the same dressing station this week the correspondent has seen Canadians, New Zealanders, English, Scotch, Irish, Newfoundlanders and Americans. These were some of the men of many countries who took part in the now historic battle, and with them there went into action those armored motor cars, called "tanks," which are to the credit of a quiet officer of engineers. When the correspondent met this officer in London six months ago and asked him what job he was now on he replied, "Sh! sh! don't telli" It was the "tanks" that completed the wonderful business of this battle.

The "Cordon Rouge."

Today when the correspondent was calling on a Canadian brigadier, it was a "tank" called "the cordon rouge," looking like a pre-historic monster in a skin of modern armor and with engines inside, which took him across the field of shell craters, weaving its way with pythonic adaptability by all irregularities up to the door of the brigadier's dugout. The skipper of "the cordon rouge" alighted, and with phlegmatic drawl announced that he reported for further orders. The brigadier laughingly bade him not to start the brute down the stairs of the dugout but to move it to one side and wait. So the "tank" ambled with the bulky leisure of a hippopotamus over some more shell craters to a place where it would be out of the way until it was needed.

Then the correspondent went over the ground which the Canadians had taken up to the edge of the Village of Courcelette, Later they stormed the village. He met Canadians who came from Montreal, Toronto, Winnippeg and Vancouver. There were also men with the accents of Missouri and New England and others who, on the soil of France, hailed one another in the French tongue of Quebec.

Having taken their objective, their part was finished, but General Byng decided, despite the complicated time table methods of a modern offensive, that he could go further. The commanders of British corps of all kinds, from cockneys to clerks, stock-brokers and farm hands, of the new army made the same decision. Canadians had been so busy digging in they had not time to send news. It was explained that they thought that it would be taken for granted that they had got there.

Among those who "made good" say those who are supposed to know the facts, was a battalion of French-Canadians, the kind of men you see in times of peace working their farms in Quebec or bending over the benches of a factory in New England. "We had luck with us and we forced it," one of the Canadians said. "It was up to us to do so, that's all." At one place in the village the attackers were held up for a time by a strongly fortified post which bristled with machine guns.

"Tank Offensive."

"Well." as one officer said, "we did not have to tell the men what to do. They stalked that strong point, man to man moving around it, and got it."

"The German is some fighter," said one Canadian, to conclude the story, "and he has been learning the game of a long time, but on this occasion we had him going."

But the exploit of the Canadians is only one of the many chapters which may be told now of what the soldiers humorously called "the tank" offensive, having reference to the new constraint of the stank of the stan

humorously called "the tank" offensive, having reference to the new armored motor cars. There was a London division, comprising representatives of all classes of the great city's life, who were told that they must reach their objective in a given time. In front of them in High Wood was a fastness of machine guns which neither the artillery nor the trench mortars had been able to reduce. However, it was the business of the Londoners to be on time in reaching the given point on the map and to hold on there until further notice.

Admitting French Gains, Foe Denies General Haig's Successes.

LCNDON, Sept. 19.—The Daily Mail says this morning:

"The German communique, printed today, is a perfect example of the method recently adopted in German official reports. That method is to be silent as to British successes or to represent the British attacks as 'bloodily repulsed,' while the French are given credit for their successes

bloodily repulsed, while the French are given credit for their successes and praised for their bravery.

"Thus today the communique impudently asserts that the battle north of the Sorame 'terminated favorably to us,' whereas south of the Somme, where the French are attacking, it says that positions had to be abandoned.

The British official comments:
"At this point it seemed desirable to the German general staff to distinguish between important events which should be published and secondary events which should not be judged by any other standards of importance than those of the German general staff.

Foe Put in Quandary. "Which of the changes in the war map does the general staff consider mportant enough to be mentioned is the question asked here. It certainly dmitted promptly enough the loss of took an extra day to deliberate before deciding to mention the loss of Chilly, and two days before mentioning the loss of Ginchy. In the case of Ginchy it tried to conceal this postponement of admission by saying on Sept. 12 that the British took the village on the morning of Sept. 11, whereas they really took it very quickly and completely on the after-noon of Sept. 9."

Rainfall is General.

The rainfall was general along the British front in Flanders and France. The British troops spent the night in consolidating their new posi-tions northwest of Bouleaux Wood, where the captur, of the "Quadrila-teral work" yesterday enabled Haig's men to advance 1000 yards on a front of a mile. This gain was another important advance in the encircling of Combles, whose capture is now considered but a matter of a few days. A despatch to The Times from

Paris says:
"On the French front the points of interest are now between Combles, north of the river, and Barleux in the south. Barleux has been under direct fire of the French since yesterday's capture of Berny. "Combles is so surrounded, north west, and south, that there remains only an opening of less than two miles to the east thru which it can be supplied. The town is thoroly well fortified and the chateau posesses underground caverns, extending under the village, over an area of nearly 400 yards, so that it is unlikely that any direct assault will be attempted. "When the British, advancing from Ginchy, get to Morval, the garrison will not have much else to do but tighten their belts and make up their minds to surrender."

INTEREST PAYABLE HALF-YEARLY, 1st APRIL, 1st OCTOBER. PRINCIPAL AND INTEREST PAYABLE IN GOLD.

# ISSUE PRICE 974

A FULL HALF-YEAR'S INTEREST WILL BE PAID ON 1st APRIL, 1917. THE PROCEEDS OF THE LOAN WILL BE USED FOR WAR PURPOSES ONLY.

THE MINISTER OF FINANCE offers herewith, on behalf of the Government, the above named Bonds for subscription at 97½, payable as follows:—

10 per cent on application;
30 " 16th October, 1916;
30 " 15th November, 1916;
27 " 15th December, 1916.

The total allotment of bonds of this issue will be limited

to one hundred million dollars exclusive of the amount (if ally) paid for by the surrender of bonds as the equivalent of cash under the terms of the War Loan prospectus of 22nd November, 1915.

The instalments may be paid in full on the 16th day of October, 1916, or on any instalment due date thereafter, under discount at the rate of four per cent per annum. All payments are to be made to a chartered bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render previous payments liable to forfeiture and the allotment to cancellation.

Subscriptions, accompanied by a deposit of ten per cent of the amount subscribed, must be forwarded through the medium of a chartered bank. Any branch in Canada of any chartered bank will receive subscriptions and issue provisional receipts.

This loan is authorized under Act of the Parliament of Canada, and both principal and interest will be a charge upon the Consolidated Revenue Fund.

Forms of application may be obtained from any branch in Canada of any chartered bank and at the office of any Assistant Receiver General in Canada. Subscriptions must be for even hundreds of dollars.

applied towards payment of the amount due on the October

Scrip certificates, non-negotiable or payable to bearer in accordance with the choice of the applicant for registered or bearer bonds, will be issued, after allotment, in exchange for the provisional receipts.

When the scrip certificates have been paid in full and payment endorsed thereon by the bank receiving the money, they may be exchanged for bonds, when prepared, with coupons attached, payable to bearer or registered as to principal, or for fully registered bonds, when prepared, without coupons, in accordance with the application.

Delivery of scrip certificates and of bonds will be made through the chartered banks.

The issue will be exempt from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

The bonds with coupons will be issued in denominations of \$100, \$500, \$1,000. Fully registered bonds without coupons will be issued in denominations of \$1,000, \$5,000 or any authorized multiple of \$5,000.

The bonds will be paid at maturity at par at the office of the Minister of Finance and Receiver General at Ottawa, or at the office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary, or Victoria.

The interest on the fully registered bonds will be paid by cheque, which will be remitted by post. Interest on bonds with coupons will be paid on surrender of coupons. Both cheques and coupons will be payable free of exchange at any branch in Canada of any chartered bank.

Subject to the payment of twenty-five cents for each new bond issued, holders of fully registered bonds without coupons will have the right to convert into bonds of the denomination of \$1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons at any time on application to the Minister of Finance.

The books of the loan will be kept at the Department of Finance, Ottawa.

Application will be made in due course for the listing of the issue on the Montreal and Toronto Stock Exchanges.

Recognized bond and stock brokers will be allowed a commission of one-quarter of one per cent on allotments made in respect of applications bearing their stamp, provided, however, that no commission will be allowed in respect of the amount of any allotment paid for by the surrender of bonds issued under the War Loan prospectus of 22nd November, 1915. No commission will be allowed in respect of applications on forms which have not been printed by the King's Printer.

Subscription Lists will close on or before 23rd September, 1916.

cined to throw off their recent handicaps.

Sugars and oils were in greater speculative favor, the former being represented by Cuban-American Sugar at the new record of 260, while Texas Co., Associated Oil and California Petroleums rose 2 to 3 points, with some irregularity in Mexican Petroleum.

Shipping shares were consistently backward, developing heaviness in the final hour, when the entire list, save for a few minor specialties, surrendered much of its advance on pressure, seemingly of professional origin. Total sales of stocks amounted to 1.070,000 shares.

Market news included an increase of the American Agricultural Chemical dividend from 4 to 5 per cent. additional equipment orders and higher prices for some of the base metals and by-products. Bonds were active. Total sales (par value) \$4.875,000.

Toronto Stock Market Slows Down and Undertone Loses Some of Its Strength.

The Toronto stock market had a conversion further slowing down yesterday, and exercised, with it some reaction in prices. The loan still remains as a factor to ict investments, and apprehension regard to Wall street is somewhat of a deterrent to bullish speculation. Steamships common was the only active issue, but realizing and a light Steamships common was the only active issue, but realizing and a light amount of bear pressure sent the price back nearly 4 points from the recent high level. The undertone through the entire market was none too strong, and concessions had to be given where sales had to be made. The rise of U.S. Steel to a new record is expected to have an influence on Canadian steels, but these issues were dull and somewhat easier yesterday. Riordon paper was the only firm spot in the unlisted issues on trading for Montreal account.

Messrs. F. C. Sutherland & Co., in their weekly market letter, out today, state that Nipissing's production for eight months of the year totaled \$1,-755,139, and should be close to \$5,000,000 of the whole year, which would be the highest on record. Earnings will run close to 30 per cent. Kerr Lake ended its fiscal year last month, and as production for eight months of 1916, ran 1,716,577 ounces, the total for the year should be well on to 2,500,000 ounces, which would indicate profits of \$875,000 on the same basis of net earnings as last year. The meeting of Apex shareholders, called to consider the proposal to sell treasury stock, was postponed until Saturday. The West Dome has discontinued sinking operations, after putting the main sharf down to an incline depth of 366 feet, which is a vertical depth of 366 feet, which is a vertical depth of 366 feet, which is a vertical depth of 360 feet. Development of the 300-foot level is now being carried on, two drifts and a cross-cut being run. At the bottom of the shaft the vein gives values of \$14 90. shaft the vein gives values of \$14,80 to \$16 to the ton, over a width of seven feet. It would not be surprising if nteresting news concerning important developments on the Davidson were to come out during the next few days. The new discovery on the Peterson Lake is an inch wide and carries values up to 1000 ounces of silver to the ton. The labor situation in Cobalt is improving, and rumers of a strike this winter are scouted by the mine man-

NEW YORK, Sept. 19.—Today's stock market maintained its recent reputation for excessive activity, sales again exceeding 1,000,000 shares. This makes the devenih consecutive session in which timpsessive total.

I. S. Steel retained its position as leader on a fresh advance to the new record of 109, placing it within 12 points of the preferred, on its rise to 121, was at its best quotation since 1911.

Movements elsewhere were not altosether in keeping with the gains made by Steels, altho advances far exceeded declines. Rails regained 1 to 2 points of yesterday's reversal, equipments were inclined to throw off their recent handingers and oils were in greater speculations, and Motors were included.

Newray seemed in good demand, and sold up 2 points from the opening at 66 to a new high. Davidson changed hands at 46.

In the Cobalt section Crown Reserve developed strength early in the day, advancing to 61, but eased off later to 58, with this figure the closing bid. Nipissing was firmer, going up again to \$8.50. Peterson Lake was moderately active at 22 3-4 to 23, and Timiskaming closed firm at 64.

## WAR LOAN ISSUE IS NOT TO BE INCREASED

Impression is Quite at Variance With Terms of Prospectus.

An impression that the present Canadian war loan issue might be in-creased to \$150,000,000 if subscriptions warranted such a course, is obviously warranted such a course, is obviously based on a misapprehension.

The minister of finance has explicitly stated that the policy pursued in connection with the last loan in increasing the issue so as to give each subscriber the full allotment would not be followed in the present issue will be in excess of \$100,000,000 only by the amount of subscriptions received in bonds of the issue of last November, and it is already evident that this conversion privilege will not be freely exercised.

somewhat easier yesterday. Riordon ably strong undertone, the effect of a paper was the only firm spot in the keen investment demand rather than unlisted issues on trading for Mont- that for speculation.

WINNIPEG, Sept. 19.—Wheat closed %c higher for October, %c higher for November, 1c higher for December, and 1%c up for May. Oats were %c higher for October and December. May oats closed at 51½. Barley was unchanged. Flax gained 1%c in October and November and 2½c in December.

Lower cables, perfect weather and heavier receipts helped the market this morning. A report that the Greek Government bought a cargo of Argentlat wheat at New York, and also the rumor that a big export business had been done caused the shorts to cover. Wheat took new life and went up nearly three cents for a short time. Oats were freely traded in. Cash business was fairly good.
