**REINFORCED CONCRETE BRIDGES**

This cut shows ONE of SEVEN arch bridge spans which we are now completing at Ottawa, Ont. All parts including arches and railings are in concrete thoroughly reinforced with steel bars imbedded in same. This construction is very rigid under heaviest loads, and will resist any flood or ice flow. No painting or maintenance; they are there to stay as long as the native rock. Cost about same as for steel bridges, and superior beyond comparison. Plans and tenders promptly submitted.

## Studebaker Sprinkler

(PATENT IMPROVED.)

Does not clog or get out of order. Greatest width of spray can be graded from driver's seat to any volume.

We also make as . . .

### IMPROVED VERTICAL SPRAY

for Pavement

Stackpole Patent Improved **Street Sweeping Machine** is the Standard of Perfection  
Because no sweeper so effectually does the work for which it is designed as "The Studebaker." It Sweeps Clean. No sweeper is constructed with the same degree of care and mechanical precision. It Wears Well. "The Studebaker" has the smallest number of working parts, and has less gearing than any other sweeper made. It is free from all unnecessary complications. With reasonable care it does not get out of order. Send for complete descriptive catalogue.

**Geo. Heaman, Mnfr., London, Ont.**

REGINA

**FOUNDATION OF ROADS** is the subject now under most earnest investigation by Engineers throughout the World. poor foundations and good surfaces are found everywhere—rail, short lived roads. **THERE IS NOT ONE FOUNDATION ON THE MARKET TO-DAY THAT PROPERLY SUPPORTS THE SURFACE.** The steel rail and the wooden cross tie is always the same, but the highway is a different thing; different surfaces and different foundations are required for different services. We have these different foundations; they DO properly support the surface, and, IN OTHER WAYS, they give all life to the surface that was never before even contemplated. **The Nash Road, Borough of Brooklyn, N.Y. City, U.S.A.**
