PRICE, FIVE CENTS

The Interdenominational Missio ary Institute held their first meeting on Tuesday Evening last. There were several speakers on the topic "City Missions." It was shown that Italians carry knives to protect themselves. The occasions when they are most needed are when they want to hold up a white man and he most ill-naturedly resists. Rev. Principal Brown, Protestant French College, Pointe aux Trembles, said that in the four Protestant French schools in the province about 550 children received instruction in the winter months, and of these 300 came from Roman Catholic homes. As the coming winter threatens to be a hard one, the Reverend Principal will have a longer report next year the provender and old clothes hold Rev. A. L. Therrien also spoke on "Evangelistic Work among the French-Canadians," Rev. D. J. Neugewirtz on "Work Among the and Rev. Chin Sing on Among the Chinese," and Work Among the Chinese," Rev. Mr. Castellinni on'Work among the Italians." Not a thing, according to this, will be done for the poor Protestants. How sad!!

La Presse, in a lengthy editorial, praises the Societe du Parler Francais. There are 675 members in this Society, the aim of which is to the French tongue properly and throw out all Anglicisms. La Presse ought to put in an application for membership.

The Herald says that public sympathy will be with the Government of France in the situation which has recently developed, and that public admiration will go to Premier Cle-menceau, the infidel, for the fortitude he showed in circumstances some difficulty. He also shows for-titude, no doubt, by sending good Frenchmen and women into exile, and stealing their property. The fact is that France is commencing to get her deserts. Nations are punished for their crimes in this world, as there will be no distinguishing them in the next; then it will be the individual's turn. The Herald is getting soft-hearted with regard to miscreants. May we not be allowed to claim a little compassion for the Pirate's victims?

According to the Figaro, the Bishops of France have received a ciroular from Cardinal Merry del Val, the Papal Secretary of State, absolutely forbidding them in the future to attend the lectures of the State

The centenary of a remarkable event in Irish ecclesiastical history took place recently. On September 1, 1808, the Irish Bishops met in Dublin to discuss the question of the 'Veto.'' Twenty-six prelates assembled, and it was decided that "it was inexpedient to introduce any alteration in the Canonical mode litherto observed in the nomination of Irish Catholic Bishops, which mode long experience has proved to Fathers Wickham and Kurtney. unexceptionally wise and salutary." This resolution was signed by twenty-three Bishops, only three dis-'Veto'' collapsed.

"The Roman Catholic Church is a housand years ahead of the Protestant Church in taking care of the child. They bring the children into the Church." So spake Rev. S. Travena Jackson, pastor of the Arling, (N.J., Methodist Church, in adressing the Woman's Literary Club of that place at a recent meeting.

Thirty-two adult converts in class of 250 received the sacrament of Confirmation at the hands of Most Rev. Archbishop Riordan St. Joseph's Church, Berkeley, last Sunday. The fact speaks volumes for the zeal and effectiveness of th ministrations of the pastor of the college town, the Rev. Dr. Morrison and his assistants Fathers Brenna and Ryan.

The German workmen were received in audience by the Holy Father recently, both male and female delegations being represented. The address to the Pope was read by the Rev. Th workmen received the Holy Father's commendation in an address that lasted for half an hour, concluded with the memorable words of the Holy Writ: "Happy is the life of the workman content with his lot; in it he will find treasure of a good conscience, of content, and of peace.

Some 500 members of the Knights of Columbus assembled, at the invitation of California Council No 615, last Wednesday evening to pay honor to His Grace Archbishop Riordan, of San Francisco, in observance of his silver jubilee. The chies feature of the reception was the presentation of a generous offering by California Council of a purse of \$5,000, a gift which will be put to the best of uses by His Grace, who will apply the money to the establishment of a scholarship at Patrick's Seminary.

Religious processions in England did not end with the bigoted outburst provoked by that of the cent Eucharistic Congress. We are told that four hundred Irish harvestmen are to take part in the procession of pilgrims to the grotto in the Church of Our Lady of Lourdes, Spalding, England, which is to be blessed by the Bishops of Nottingham and Namur. The ceremony will mark the golden jubilee of the original Lourdes grotto.

Lord Brave intends to ask in the British House of Lords next week, that the Government introduce into Parliament a measure to abolish the Coronation oath, in which the Sovereign "invokes Almighty God to bear witness that certain doctrines held by the great majority of ('hristians, not only as awful, sacred and stupendous, but also as vital fundamental, are false."

One of the most striking, as well as the most pleasing, incidents of the senting. Thus the project of the gathering at Laval University, Quebec, on Sept. 28 last, to witness the distribution of medals to the repre sentatives of the old French-Canadian families who have occupied their ancestral homes and farms for two hundred years and upwards, says the Chicago New World, arose when it came to be the time of Mr. Edmond Valin, of Portneuf, Que. Mr. Valin had bitterly opposed Sir Lomer Gouin in the late provincial election, but was defeated. When Mr. Valin presented himself on the stand Sir Lomer, Quebec's Catholic premier, stepped forward and pinned

the medal on his antagonist's breast. It is well known that the Masonic republican nucleus of Portugal has been working to obtain from King Manuel what it failed to obtain through the assassination of his fa-ther and brother. Within the shadow of the Portuguese lodges plots are now being formed to bring about

For Insh History in the Schools.

Prof. M. G. Rohan, of Marquette University, Milwaukee, as national chairman of the Irish history committee of the A. O. H., has issued a strong appeal to the hierarchy, reverend clergy, and religious orders; in which he declares:

"As members of the Ancient Order of Hibernians, which has done so much for the Irish in this and other countries, we are convinced that the children of Irish parentage or descent in America will be better men and women, better citizens, and especially better members of our Holy Mother Church, by a study of Ireland's history, in which nationality and religion are so closely entired. ty and religion are so closely en-twined." He recites what the Irish have done for Catholicity in this

"But here comes in the burning question—What will our children know of Ireland? What will they know of its bright and glorlous record in the ages past? What will they ever know of its saints and martyrs, its chieftains and kings, its scholars and sages? What will they know of the struggles and struckers will they know of the struggles and struckers. martyrs, its chieftains and kings, its scholars and sages? What will they know of the struggles and sufferings and valor of the ancestry that clung to this treasure against the bitterest oppression, wrong and villification that was ever heaped on any people? We have a very good right to ask these questions when we consider the sad neglect with which the history of Ireland is treated in this country. Are we not neglecting to learn it and also failing to to teach it? As a matter of fact, it is almost lost sight of in our schools and homes, while the children of this grand old race can get all the instruction they wish in the annals of Greece and Rome, of Germany and Great Britain and other countries that is far less concern to them from every point of view.

Must we not look upon this failure of our duty as a crime against the procession took place, but the emblem of the Host was not displayed. that is far less concern to them from every point of view.

Must we not look upon this failure of our duty as a crime against our race, as well as a privation to the children themselves? It is a simple truth that many of the children of Irish lineage are far more familiar with the names in French and British history than they are with the names and deeds that have glorified the land of their forefathers.

glorified the land of their fore-fathers.

"The history of Ireland is, there-fore, in a large sense the history of a scattered race; but it should be none the less a subject for pride for those who have Irish blood in their veins. It is inspiring to every true Irishman to read the history of nations and meet among their brey. nations and meet among their bravest commanders and most gifted statesmen a McMahon in France, a O'Donnell in Spain, a Nugent in Austria, a Lacy in Russia, and so on throughout the world of action and distinction. The history of this republic and its various wars from the revolution in which Patrick Henry Sullivan Moulen and Pares. the revolution in which Patrick Henry, Sullivan, Moylan and Barry

Henry, Sullivan, Moylan and Barry were leaders, down to the latest struggles in which Americans were engaged are dotted all over with the names of Irish families.

"It would be a shame that our children and our children's children did not know these glorious deeds, and we owe it as a debt to them that they shall know them. This and we owe it as a debt to them that they shall know them. This we can only do by making general provision for the study of Irish history in all our various schools. If we fail in this, it may be truthfully said that the Irish race is the only race which knows nothing of the race which knows nothing of the land of its forefathers."

London Intolerance.

England has lately been stirred to something like convulsion by what at one time threatened to be a great religious controversy. I am now, of

attempt, and relying at the

time on the dismay produced on the other side by the slaughter, Portu guese freemasonry has begun to play daring game and is making the most of the unhappy conditions, ma-The imposed and obtained the banishment of Franco, impunity for the regicides, and the control of the elections. Having thus prepared the ground it has resumed the old campaign inherited centuries ago its adept Pombal to secure the banshment of the religious congrega tions. To intimidate the monarch and its friends, the masonic-republican press of Lisbon and the provinces has invented the story that the Portuguese clericals are preparing an armed movement to abolish the constitution and impose a read tionary terrorism. Some of anti-clerical papers of Portugal like 'Liberta' and "Norte" and others announce that the friars and their pupils are mysteriously indulging in target practice to get their eye in for the day of the great mascourse, dealing with one of the incidents belonging to the great Eucharistic congress which has lately been held in London.

This religious congress—Catholic

held in London.

This religious congress—Catholic congress, in fact—was attended by a large number of cardinals and other prelates and dignitaries from every part of the world where the Church of Rome holds its place, and one of the events of this congress was to be a procession bearing the emblem of the Host through some of the streets of London.

There is still in Frahand

There is still in England and per-haps especially in many parts of London, a furious anti-Papal party-"anti-Papal" is indeed its own favorite title-and much apprehension was entertained that this might manifest itself in demonstra inight mannest itself in demonstra-tions of violence against those who made up the procession of the Host. I have good reason to believe that the police authorities in that quarter of London declared themselves to be of London declared themselves to be thoroughly capable of preventing any such disturbance, but there was a strong feeling even among quite impartial observers, that although the police might be able to prevent any serious riots, any riots like those which are associated with the name of Lord George Gordon, there would most assuredly be some furious display of hostility, made by the anti-Papal spectators of the lower class, which, if they did no great-

It was expressly stated on behalf of the government that this on behalf of the government that this step was only taken in order to prevent any outburst of violence which might lead to serious disturbance of the peace, and would be especially untimely on the occasion of a solemn religious manifestation.

I presume that, under all the conditions, the government took the best course open to them, and I am quite satisfied that among the leading

course open to them, and I am quite satisfied that among the leading members of the present manistry there is no hostile feeling whatever toward the creed and the members of the Church of Rome. But I cannot help thinking that it is a blot upon the reputation of a great civilized metapolis that the members of any metropolis that the members of any faith should not be allowed to make faith should not be allowed to make a peaceful procession, displaying the principal emblem of that faith through the streets. We have processions of all sorts through London streets, processions representing all manner of organizations, some of them regarded as socialistic and communistic, and I know not what else with which the authorities were else, with which the authorities very wisely never attempt to interfere, and I cannot think it anything but a deplorable fact that during a great Roman Catholic celebration a procession bearing the most sacred emblem of Catholiciem should be a problem of Catholicism should be prevented from passing through public thoroughfare, and that the procession itself should only be al-

procession itself should only be allowed to pass on condition that it did not carry with it that sacred emblem.

I believe that Mr. Herbert Gladstone was entirely opposed to the prohibition, and that many other members of the cabinet shared his opinions, and that, in fact, the priminister himself only acted as he did with the object of preventing a dangerous riot, and not because he agreed in any sense with the views of the anti-Papal extremists, who became furious at the proposed exbecame furious at the proposed exhibition of the Catholic emblem

hibition of the Catholic emblem.

The Dublin Freeman's Journal, in a very moderate and reasonable article, points out that if the members of the procession. "had only been Mohammedans, or Brahmins, or Jumpers," or 'Dippers,' or 'Shakers' they would have enjoyed complete liberty, but that, being only Catholies, they had no such claim to the protection of the law. I am glad to hear that the whole question is certain to be raised in the House of Commons when Parliament meets for its winter session.—N. Y. Independent.

SOLEMN CELEBRATION OF HOLY FATHER'S JUBILEE

Archbishop Bruchesi who is now in Rome, has requested that in all the churches and communities of the Archdiocese the Golden Jubilee of Pope Pius X. shall be celebrated with due solemnity.

Following out the desires of His Grace, Mgr. Racicot, administrator, has given orders that in all the churches and chapels a solemn High Mass will be chanted on Monday next and the Most Blessed Sacrament remain exposed all day. The faithful have also been exhorted to approach the sacraments on this day.

The event thus commemorated is the fiftieth anniversary of the priestly ordination of Pope Pius X.

The longest day has its evening, the hardest work its ending, and the sharpest pain its contented and ever-lasting rest.

Holy See to Publish Official Bulletin

The new Official Bulletin of the Holy See, which will be published by the Vatican printing press twice each month with the beginning of the new year, will be the means of promulgation of all these cats, which shall not have juridical force until they have been thus printed. Until now such promulgation was made only for the more important documents; and according to the ancient method of attaching copies of them to the doors of the Basilicas of St. Peter and St. John Lateran. The acts of the reigning Pope are also published annually in a separate volume, which now bears the title of 'Acts Piers' Merchanian congregation of the properate when the properate which was a properate when the properate when the properate which was a properate when the properate which was a properate when the properate which was a properate when the properate which was a propera Pope are also published annually in a separate volume, which now bears the title of 'Acta Pii x.' The following is the text of the Apostolic constitution providing for the new publication.

PIUS BISHOP

Servant of the Servants of God

Servant of the Servants of God for Perpetual Memory. The method of promulgating—the Pontifical constitutions and Laws, has not always been the same at all periods of the Catholic Church; but for several centuries it has been the custom to expose a number of copies custom to expose a number of copies of them to the public by affixing them in some of the more frequented places in Rome, especially at the doors of the Vatican and Lateran Basilicas. What was promulgated in Rome, as the centre of Christendom, and the common country of the faithful, was held to be promulgated for all nations and at once award the all nations and at once assumed the force of law. But as the form force of law. But as the form and method of promulgation depend upon the will of the legislator, who is free to introduce modifications in the existing methods, to establish the use of ther, and the exigencies of time and there is the exigencies of time and there is the exigencies of

ones according to the exigencies, of time and place; it has happened that not all the Pontifical Laws and Constitutions have been, even in the past, promulgated in the above mentioned form, that is by having them affixed in the usual places in Rome. Recently, and primarily owing to the work of the Sacred Congregations, which the Roman Pontiffs have availed themselves to interrust existing which the Roman Ponthis have avail-ed themselves to interpret existing laws or to make new ones, as a rule all the acts and decrees of the Holy See drawn up by and legitimately emananting from the respective Se-cretariates, were held to be promul-grated. There is no doubt that the There is no doubt that the acts, published in this way, were authentic, both because as a rule they

contained clauses abregating all dispositions whatsoever to the contrary and because this method of promulgation had the express or tacit approval of the Supreme Pontiff. Yet this form of promulgation, although quite legal, fell short of that solemnity which should be connected with the acts of the supreme authority. For this reason many Bishops have frequently urged on our predecessors and on ourselves, both in the past and especially when they have been consulted recently on the codification of canon law, that a bulletin should be issued by the supreme authority of the Church for the promulgation of the new ecclesiastical laws and the publication of the Pontifical acts.

After having taken this plea into

mulgation of laws and the publication of the Pontifical acts.

After having taken this plea into serious consideration and heard the opinion of some of the Cardinals of Holy Roman Church, and having come to the conclusion that the wishes of the said Bishops might be complied with, we do, by our apostolic authority and in virtue of the present constitution, decree that at the beginning of the coming year 1909, there shall be published by the Vatican printing press an official Bulletin of the Acts of the Apostolic Sec. Hence it is our will that the postifical constitutions, laws, descriptions. Soe. Hence it is our will that the Pontifical constitutions, laws, decrees and other ordinances of the Roman Pontific, of the Sacred Congregations and Offices, inserted and published in this bulletin with the authorization of the secretary or chief officer of the respective congregations or offices, shall be held. gations or offices, shall be held gations or offices, shall be held to be legally promulgated by this sole and only næthod, whenever there is need of promulgation and provision shall not be made otherwise by the Holy See. Moreover, it is our will that there be printed in the same bulletin all the other acts of the Holy See which it is deemed useful to bring to the knowledge of the mubble of least as far as their na-Holy See which it is deemed to bring to the knowledge of

to bring to the knowledge of the public, at least as far as their nature permits, and that, according to the circumstance, the due provision be made by the superiors of the Sacred Congregations, tribunals and other offices.

Thus do we ordain, declare, decree, making provision that this our constitution shall always remain firm, valid and of force, having and obtaining in all things its plenary and integral effects, all things whatsoever to the contrary notwithstanding.

CLEANING PANTRY SHELVES

Ideas concerning the arrangement of pantries are changing under the influence of schools of domestic science. The majority of housewives want white paper spread on the ence. The majority of housewives want white, paper spread on the shelves and edging in addition, but sanitation dictates a finished surface which can be wiped clean with a damp cloth. If your shelf is finished in hard finish keep it immaculate without paper. The first exclamation is, "But it will get dusty!" So will the paper get dusty, for the dust falls upon anything it can. Just try once to clear a shelf completely, put on paper and replace everything, and then try setting things aside enough to wipe the shelf without having to clear it all and see which is the less labor. If your shelves have not a hard finish cover them with oilcloth hard finish cover them with oilcloth Floor oilcloth—you can get it almost white—is the best, cut carefully to fit each place. BE MERCIFUL.

One may be very merciful in one's one may be very merciful in one's judgments upon those who fail in some ways, and very unmerciful on those who fail in others. Many people are quite pitiless towards those whose temptations are not their own. Again one may be full of pity and toleration of the faults of those one loves and absolutely intelerant. one loves and absolutely intolerant of those one does not love. A man may be the most gentle man in the world towards those who are near and dear to him, and positively cruel to others. This is not the virtue of

HAPPINESS.

Happiness is not dependent Happiness is not dependent on outward circumstances, but on the attitude of the mind. That happiness was the destiny of mankind was proved by the fact that the things which make us happy are the simplest and holiest things, such as duty done. We cannot attain happiness so long as we are indifferent to the happiness of others. When self-fish people want to be pleasant and agreeable they find they cannot do agreeable they find they cannot do
it because they have not formed the
habit of doing things simply to
please others. People would be happier if their homes were less pretentious and more comfortable. Idle
women and overworked men make a

The Most Popular Piclure.

What is the most popular picture in the world? Possibly if a referen-dum were taken on the subject — it would be found that the majority would declare in favor of Leonardo da Vinci's sublime masterpiece, "The Last Supper" in the ex-convent of Santa Marie delle Grazie at Milan. Yet a year ago it seemed certain that the days of this masterpiece were numbered. that the days of this masterpiece were numbered. For years past the paint had been scaling away from the walls, and some of the figures had become almost unrecognizable. A great art critic wrote a most touching description of this fatal decay under the heading. The Agony of a Masterpiece, and nobody thought that it would be possible to arrest the work of castruction. But it was decided to make a trial, and the artist chosen for the delicate task, Luigi Cavenaghi, has been able to an junce that he has succeeded. By a special process in vented by himself he has been enabled to attach the scaling fragments to begin and little by little he has seen the faces come again out of the void, and the dead wall breathes once more with the life and movements infused into it by Leonardo. His address to the clergy of Milan on the necessity of the Catholic religion is a remarkable document. St II more remarkable are some of the numerous aphorism's which he uttered, such as: "I know men; and I say that Christ was more than a man." Recently many of his sayings on Catholic and other subjects nave been published in Erench and Italian journals. A few of them, which relate to the Exalted Head of the Church, may be quoted here, since they are both striking and interesting. Although he, himself, did not always live up to them: "One should treat with the Pope as though he had two hundred thousand bayonets at his disposal." "To see me people would come a league—to see the Pope they would come thirty." "The Pope"

He was dressed like a priest, and a thoughtful person hastily summoned Father J. J. Dowd to the general office of the railway company, to which the stricken man had been carried and where he died. The small assemblage of railway for small assemblage of railway officials bared their heads as the priest administered the last rites to the dead. Later the body was identified by Rev. Dr. Taylor, rector of St. George's Episcopal Church, as that of the Schuylerville rector.

The more common plan is for a couple to agree to be married in public in the presence of the members of a lodge or club or other organization, or even in a public hall before a general public, a sum of money being given them and an admission price being charged. This is sometimes done at country or town fairs, and even at gatherings of religious organizations, the justificaligious organizations, the justifica-tion being found in the fact that the shiptons organizations, the justification being found in the fact that the organization, lodge or (Jub gets a percentage of the money returns. Monsignor Fox doesn't hesitate to declare in the plainest terms that such pretended justification is no justification at all, and in fact there can be no justification for such trifling with the sacred and solemn jites of marriage. He donounces the public prize wedding, whether for advertising or for other purposes, as even worse than the exploitation in a similar manner of the granting of a decree of divorce. Marriages of the kind mentioned are essentially had, and have in their the essence of vileness. They are the condition of society that contributes to the

If some one would throw light upon their progress and principle it would be a public benefit. Cure of the body seems to them the sole desideratum in this vale of tears; and the sun to be the one bright luminary on life's weary way. Such theory, creed or religion-call what you will-might emanate from a physician's consulting room; for it is well calculated to exalt the medical profession without holding out hope to the patient beyond the grave. Whatever physical benefit a sun-bath may afford a sufferer, it promises not the least spiritual grace now or hereafter. This new attempt is very different from the doctrine taught by the old Persian philosopher Zoroaster. Taken in its entirety the philosophical concept of Zoroaster was one of the most perfect which the unaided reason of fallen man ever produced. Evident different elsewhere. In English-speakthough somewhat veiled traces of primitive revelation are found this early Mazdeism. It is a strong it reaction against the naturalistic pantheism and the consequent polytheism which found its way into the creeds of so many Aryan races. Zoroaster's work, like other human constructions of spiritualistic theo ries, is full of grave faults. His two-fold principle of good and evil, his moderate polytheism, his mixture of agi were radical defects. His religion, although pure so far as human reason goes, soon degenerated into the worship of fire and the su perstition of magic. Our modern imitators have not reached the same height; although with nearly two thousand years of Christianity they have a much better start. We do not hear that they are making much headway. Winter is at hand, and

At a Church Congress held at Manchester lately the Anglican Bishop of Bristol read a paper remarkable for its statement rather than its scholarship. He committed himself' to the assertion that it is ridiculous to maintain that the English people so atheistic as France. Its inclina- in every walk of life. Without reli-

man Catholics. It is the denial of it which is ridiculous. The paper immediately following swept aside the Bishop's absurd proposition with the remark that the English Church or the whole society of baptized persons in England before the Reformation "was an integral part of the Holy Roman Church." Comprehensive in their own claims, some glicans see nothing but Anglicanism in all the past ages of their Church It is beyond nationce to deny that England was Roman Catholic before Henry VIII. and Cranmer. The term faithful and devoted sons of Holy Church of Rome" was tradi tional among all classes. It was the language of official documents and familiar speech. From the King upon the throne, bishops, barons, clergy and faithful, all used it constantly when reference to Roman authority was appropriate. It meant then as it does now that the Roman Church actually possessed spiritual authority or jurisdiction over * the Catholics of England through those ages when the country was Our Lady's Dowry.

NEUTRALITY

There are a few words which serve can find no real standing room on the ground floor of social thought Neutrality is one of these terms non-sectarianism and liberalism (re ligious) are others. What the intellect aims at is truth. This be secured only by care on the part of the subject and reality on part of the object. But truth must conform to the nature of man. Let us therefore apply the test. Man can he advocates or any system which he maintains. There is a virility about man's actions and enactments We are under a cloud as to how which from the outset contradicts tem in spite of contrary resolutions and protests. France is now throw ing off this mask. When some years ago these atheists proposed to lai cize education, they befogged the horizon with dust by proclaiming that this would simply and surely leave religion neutral. French Catholics need have no fear-the religion of their children would be left in tact. No teacher, no book, nothing would be allowed to dim the fait! or weaken the religion. It did no last. The mask was thrown off. To their dismay the simple Catholics of France saw an armed foe upon their hearthstone and a deceiving demor in their schools. Clemenceau and all his satellites knew the game, played it with skill, nor did they even hide their hand. Over twenty years ago Clemenceau told the Chamber that a profession of neutrality and a declaration of atheism were, in France at least, the same thing. We fail to see how they are much ing countries atheism is not perhaps France. English, Irish and Scotch versities there to misconduct themmay differ seriously upon important selves for the first three months so questions. From irreligion to atheism is only one step; and with such literature as is abroad from a jumping pole the step of our children parents, and especial ly fathers, do not give religion at all its proper place. It is away behind utilitarian prospects and social advantages-these being more tended than real. Catholics strive sition for them to assume, neither winning favor nor commanding respect. Some send their boys here or there in the idea that they will form school friendships which may serve them afterwards. Religion in nor are Catholic institutions choser for the purpose of eternal friendships and the truer and better education of their boys. It is temporal considerations which govern parents. They like to rub up against wealth and position. To do this they practise neutrality and minimize their religion. Their sons grow up and go out into the world no knowing their faith, its discipline and practices. They seek their old college friends who despise them: they have no refuge among their own whom they themselves contemned in early years Neutrality tom-foolery for those who belong to the Church militant. Our Lord put the case exactly when He said that he that was not with Him was

Only this week Dr. Ira Van Giesen, the city's official brain pathologist, showed them to a World reporter and an artist, who made drawings of them. It was the day after Dr. S. T. Armstrong, Superintendent of Bellevue Hospital, had issued his annual report, in which he states that more than 40 per cent. of the patients in the psychopathic wards are suffering from insanity due mainly to the drink habit, and that ten per cent of all the cases of insanity there are due to that cause. It was to make clear just what alcohol does to the material brain, what changes it brings about to dull the intelligence and blind the morality of the drinking man, that Dr. Van Giesen gave up one of his afternoons for the benefit of those World readers who may be curious to know exactly what is happening to them when they sip the companionable highball on the way home or "steam up a bit" before beginning the day's work.

"The human brain and the nervous system which it controls," said Dr.

ning the day's work.
"The human brain and the nervous system which it controls," said Dr. Van Giesen, "may be compared to the electric street car system of a great city. Up in the Bronx, we'll is the main great power house. eeding from it and extending to Proceeding from it and extending tothe uttermost parts of the city are
feed wires which distribute power to
lesser stations, and these, in their
turn, control the various lines within their district. The main power
house is the brain, the feed wires are
the principal nerves, and the lesser
power stations are the little subsidiary brains or bundles of nerve
cells—like the solar plexus—each of
which controls a certain area of the
body.

"Now. every feed wire, the great trunk lines of the main power house which run the cars, as well as the little ones which light the desk lamp which run the cars, as well as the little ones which light the desk lamp of the general manager and his assistants, is adapted to transmit a certain amount of energy and no more. If the capacity of a wire is exceeded, if it is called upon to deliver at a certain point more energy than it was intended to carry, the wire will 'burn' out at that point. Similarly, if the main power house sends more energy to any subsidiary station than that station was built to distribute safely, the machinery of the lesser station itself will suffer; and if it is thus persistently overworked it will become permanently disarranged and useless. Little by little the contact end of every overburdened wire will become disintegrated, and the disintegration will gradually extend until the wire refuses to perform its mission and the energy of the power house can no longer reach the point which needs it.

"So with the brain. It is endowed with the nower of generating a mys-

with the brain. It is endowed mental firmament. with the brain. It is endowed with the power of generating a mysterious force. We do not know what it is, but we know that this force governs the functions of the body, and that, under normal conditions, only enough of it is carried along one nerve fibre to supply the tissues through which it nessess so that, for through which it passes; so that, for example, if you cut off your finger, the stump of the finger needs only the services of the stump of its own particular nerve to keep it alive. Science calls this mysterious force neuron energy.

Now just as the great power house in the Bronx not only drives the street, ear power for its own lights and ventilating fans and the dainty electroliers in the manager's office, so the brain not only controls the remotest functions of the body, but also provides neuron energy for its own most intricate and complex, workings—the orderly marshaling of thought, the recording of impressions and the illuminating of all with the transcendent faculty of the moral sense. Disarrange these functions and the result is insanity. And the effect of overtaxing the nerve centers which control the brain itself is precisely the same as upon those which govern the bodily functions—they become burned out; and what I have shown you through the microscope is the ashes of these beautiful organs, burned out by overstimblation with alcohol.

"Of course, every smallest exercise of the brain tends toward its destruction, but in the normal person nourishment and restoration go on laster than the burning out process. But alcohol does not nourish; it is a spur, a whiplash. When you drink you are not getting up more steam by feeding the fire; you are obtained on the fire under forced draught. You are trying to do that foolish thing of getting romething school acquire a tract of land of the colors of the fire under forced draught. for nothing.

"To put it in another way, the 'alcoholic' is a man who is mortgaging his heritage of life energy, who is discounting nature's promissory notes at a ruinous percentage. Alcoholism is simply premature old age, and instead of extending the joy of life to its natural limit, the alcoholic is having all his fun at once.

alcoholic is having all his fun at once.

"Mind you, though, these burned out brains are not peculiar to the abuse of alcoholic stimulants. Overwork, long continued excitement, continued worry—all these things will bring about the same result. But alcoholic insanity is so fearfully common because drinking is more popular than working or worrying.

"Contrary to the lapse of the functions in normal old age, in which the brain is the last organ to be affected, the breakdown through alcohol is manifest first of all in the high domain of the intellect. It is a law of nature that the last and most complex attributes which evolution has developed in man are the first to become perverted by vicious living. Therefore you will notice that the first symptoms of alcoholic insanity are to be found in a dulling of the moral sense the sense of obli-

living. Therefore you will notice that the first symptoms of alcoholic insanity are to be found in a dulling of the moral sense, the sense of obligation to one's self and to others. "Indeed, any man may tell when he is beginning to become an "alcoholic.' He need not worry so much when his hand loses its steadiness at times or when his eyes water easily, and there come purple veins in his nose, or his liver gets balky. These things can be cured by removing their cause. But when he finds that he procrastinates in the performance of small duties, such as answering letters, or that he tells small lies because they are easier than the truth, or that he promises readily and fulfils tardily or not at all—then let him have a care. Insanity is spinning her web about his brain. "Sometimes the other more purely intellectual faculties, such as the power to reason, the ready wit, the grasp of business or professional affairs, will survive years of this cellipse of the finer sense of right and wrong; but they are none the less doomed to be burnt out." For with the collapse of the ethical functions King Barleycorn comes into his

After all, the whole thing is a matter of nutrition. Alcohol, properly speaking, is not a food. Neither is it, as some good people aver, a poison. It is what we have always called it—a stimulant; it is a good friend for a small loan, but a monster of usury when its friendship is presumed upon.

"Yet I question if its mission, in the final development of a perfect race, is not a good one. What we need is a race of men, normal, hardy and efficient not because they creek. Science alls this mysterious force science alls this mysterious force neuron energy.

"And right here, though it has no direct hearing on our subject, I must tell you a wonderful thing. If at the moment when we amputate a limb, and its nerve along with it, we could arrest and transmute into some known form the neuron energy which the knife suddenly interrupted in its accustomed flow—if we had an instrument sensitive enough to determine the nature of the surplus energy thus suddenly released—we should be close to solving the riddle of life itself. That flash of ineffable of life itself. The weak died, but those who is a continued to contin

French Womanhood

Detoiating As a Result of the Decay of Religion.

In an article in the current Revue Bleue (Paris), M. Eugene Hollande discusses the question set forth in the above caption, suggesting that the present state of irreligion in france is liable to strike at the growing generations and at the family, through the mother, whose opportunities of practising her religion have become lessened, and who, in consequence, is as much likely to drift away as either her husband or her children.

drift away as either her husband or her children.

M. Hollande, who confessedly does not hold a brief for any form of religion, frankly admits that if the destruction of the religious instincts of the women of France be one of the results of the act of separation, then it had been far better for the nation that the act had never passed into law.

into law.

From the earliest history of France down to recent times, all French statesmen have reposed the securest hopes in the influence of the mother over her child—particularly over the male. In no country in the world is the devotion subsisting between mother and son so edifying as it is in

Napoleon, who took little pains to France, during his tenure of power, never missed an opportunity of conciliating the good-will of the mothers of the nation, and though he naturally failed in doing so, owing to the fact that he robbed them ruthlessly of their sons many laws stand to of their sons, many laws stand to-day on the French statute book, de-signed, to honor the condition of motherhood, which were drawn under his eye. His own devotion to motherhood, which were drawn up under his eye. His own devotion to his mother, throughout his life, was a full example of the putting in practice of tenets held, and on more than one occasion he was known to express the view that a nation of mothers who practised no religion was incapable of real greatness.

M. Hollande cites the case of a French father who recently complained to him of the "iniquitously novel manner in which children, in the Godless schools, were being spoken regarding religion," which in many cases is now really regarded as a thing of the past.

an many cases is now really regarded as a thing of the past.

According to this French father whose daughter was being educated at a "neutral" school—that is to say a school which held no blas in favor of, or against, religion—a female professor once defined her views as to religion. She said substantially

The Interference of Maloney.

Sarah Ann Bidwell was pruning and her rose tree. It was early spring and her small garden was just awakening to new life. She worked busily, clipping off a twig here and there with a precision which indicated a thorough knowledge of the art of growing roses.

If you had stolen into that quiet garden on that early spring afternoon you would have seen a woman in the prime of life. Sarah Ann was not beautiful, but if you came across her in a crowd of women you would pick her out as being altogether worth while.

The very next time he saw Miss Bidwell at work in her garden he stralled over she never knew.

At nineteen she had returned to the college town and to her father's home. She took her part in the social life of the place and got to know some of the college men.

The inevitable happened. She fell in love or thought she did, which has the same effect, with a young man about to be graduated. The courtship, frowned on by her father. courtship, frowned on by her father, was fast and furious. So was the awakening. For the young man neback to that college town and Sarah Ann at twenty became a

She might have gone on through successive widowhoods of the same nature, but she was not of that type She found solace in the companion father, absorbed more and more the idea of solitary living and more the idea of solitary living, which had become an obsession with him, and when he died a few years after the ending of her little romance she was firm in her resolve to live her own life apart, in its closest intimacies, from all the world.

Sarah Ann was reaching up to trim the topmost branch of a large rose tree and couldn't quite do it. She frowned and then stood on tiptoe. Again she failed. Then a voice startled her:

"Want some help?"

Sarah Ann looked around and saw a man who was a stranger to her. She was familiar with the appearance of the residents of the town; she knew by sight the professors and she knew by sight the professors and students in the college. This man was none of these

Sarah Ann noted quickly the general details of his appearance. He was tall and loosely built and had big hands, a countenance often described as wide open and honest, but not intellectual, and red curly hair. He wore a suit of blue serge which looked as if it had been a hasty acquisition at a glothist's.

Sarah Ann was startled even more by the intruder's manner of speech.
"Maybe he doesn't know any better," she thought, and spoke to him mildly

"Thank you for offering." she said.
"but I prefer to be alone."
Buck Maloney blushed and stood

You would have seen that she was serious minded the nanute she looked at you. Her black hair was coiled tightly, but no attempt at plainness could make it unbecoming. Her eyes and mouth told the story.

The eyes were grey and lacked tenderness; the mouth was set firm, and about it lines were forming that came not of smiles but of efforts to repress them. You got the idea that.

"Oh! a professional ball player!"

Buck Maloney found time hanging heavy on his hands in the quiet town. He regarded the college boys indifference beyond the work of training the team. Books had fascination for him.

He did think he knew something

The Late Father Ignatius:

A Stormy Career.

Even in an institution such as the Church of England, which is comprehensive enough to embrace almost all sorts of beliefs, Father Ignatius was continually engaged in warfare. He was setting the world right and he would not leave the Anglicans who differed from him, whether bishops or ordinary clergymen, alone. So they felt bound to defend themselves.

First, he had a quarrel with Bishop Eden, the Scottish Episcopal primus. Subsequently, the Ritualistic Father Lowder, Anglican vicar of SS. Peter's, London Docks, fett that the line should be drawn at most instructive sights in the world and he tells us that he has often been struck in such a case by the keenness of the reader's judgment and the consummate and natural art with which she mánages to skate over the thin ice. Finally, he implores the fair sex to whom the essay is particularly addressed, to read books of many styles and by authors of many nations—French, English, Italian and Spanish—such literatures being, as he says, so many windows open upon the world. By so doing, ne tells them, they will be able to defect a once what is and is not had taste, and to suppress this last as certainly as "a hatpin can deflate a balloon."

"Don't let her know you are laughing at her," warned the more thoughtful Pauline.

"Oh, she won't notice. She's the slow sort that never notices things," Winifred returned. "And it's lucky she is, otherwise she'd be my morning at une, and it was not until supper that it occurred to her that there might be two sides to the question.

The girls in Miss Graham's school who were studying language did not took forward to their supper with unqualified anticipation. The girls who took German sat at the "German table," and were not supposed to make any remarks during the meal, except in the language. The French table was on the other side of the dining-room and at this the conversation was all in French. Winifred sat at the German table, and when she took her seat that night, she found that the flaxen-haired foreigner whose accent had seemed so amusing earlier in the day, was her right-hand neighbor.

Winifred's German vocabulary was somewhat limited, and it was not till she had done some thinking that she ventured to ask her neighbor, Lena Saeker, how she had enjoyed her first day at the school.!

For a moment Lena stared, as if she had not quite understood. Them suddenly her fair cheeks flushed, and she hastily replied in smoothly-flowing German which fell musically on Winifred's ear, though she could not understand all the words. The teacher, Miss Roberts, spoke from the end of the table, when Lena had finished.

No fluffy, spoiled Angora, no starved stray of the alleys; but a sleek dainty creature whose demure distinction belonged to herself and the entire race of cats. Pure maltese in color, she folded a long and supple tail across her feet.

discussing technic and values. At first Curtis did not see very clearly because of the haze that dimmed his eyes and brain. Gradually he perceived that there hung before him the clue of a great unravelling, the key of many mysteries.

The picture showed a colonial kitchen, its humble furniture, spinning wheel, musket and sanded floor, dwarfed into insignificance by the great fire-place whose vast chimney yawned across the canvas. On a stool beside the fire sat a girl in homespun gray, with a white kerchiel drawn about her neck, her soft hair braided down her back, her hands folded in her lap, her eyes upon the blaze. Opposite her sat a gray cat, her tail wrapped daintily over her feet, her cyes upon the blaze. Opposite her sat a gray cat, her tail wrapped daintily over her feet, her cyes upon the blaze. Present Position of Catholics in England.

Nearly sixty years ago man in one of his celebratures on the present position of tures on the present position or ca-tholics in England, declared that the anti-Catholic tradition propagated among his fellow-countrymen was the sustaining power of the Protes, tant view regarding the Church of Rome. Tell an Englishman, Churchman or Dissenter, he says, "that the vulgar accusations against Catholics are but slanders, simple lies, or exaggerations, or misrepresentations... and he will laugh in anti-Catholic tradition propagated tions ... and he will laugh in your face at your simplicity." With him Protestantism is "the profession of a gentleman; Catholicism, of underbred persons, of the vulgar minded, the uncouth, and the ill-connect."

of a gentleman; Catholicism, of underbred persons, of the vulgar minded, the uncouth, and the ill-connected." . . . "for the fathers and patrons of the English Reformation have given a substance, a momentum, and a permanence to their tradition, and have fastened on us Catholics, first the imputation, then the repute of ignorance, bigorry and superstition." This, he points out, is the tradition of "Kings, Lords, Commons, Law, Literature, and also of the clergy."

Speaking of the Establishment, he maintains that its special duty as a religious body is not to inculcate any particular theological system, but to watch over the anti-Catholic tradition, to preserve it from rust and decay, to keep it bright and keen, and ready for action on any emergency or peril. The lectures make very interesting reading at the present time, not simply as presenting a vivid picture of a condition of things existing when the lectures were delivered, but as placing in noon-day light the "vast enchanted palace" in which the Englishman's lot is cast and which must be shivered in pieces before England will ever return to its old-time allegiance to the Church of Rome.

Were any but an Englishman to characterize the great Protestant tradition in terms as scathing as Dr. Newman employs, he would, with the average Briton, risk reputation for honesty and fairmindedness, and be roundly abused for allowing his rhetoric to color his facts. Beyond a peradventure he would be called a fanatic or a bigot, or both.

on the occasion of the Eucharistic Congress in London, one may be pardoned for calling attention to Newman's picture of the attitude of John Bull when he is made to face the Roman question. It is at least doubtful if two generations of intercourse with Catholics have softened the lines of the picture. He charges them with shutting their eyes, with thrusting their heads into the sand, and trying "to get rid of a great vision, a great reality, under the name of Popery." "Was there ever" he asks, "such an instance of self-sufficient, dense, and religious bisufficient, dense, and religious gotry, as that which rises up walls in the minds of our

The carrying of the Sacred Host in solemn procession, but a short distance in the neighborhood of the Cathedral, where it would naturally be supposed only Catholics would be congregated, was only an incident of the Congress. And yet it was sufficient of itself to disclose to the world at large the real sentiments of the Protestant Englishman and to fan into flame the smouldering embers of religious bigotry. We cannot help feeling that were the people of London only aware of the peaceful mission of the Catholic members of the Congress, or of the meaning of the procession of the Blessed Sacrament—the triumphal march among His children of Hims—came as the Prince
