which have been formed by farmers in the South movement will stop. The mere fact, that nearly an entire class in a large section of country repudiate everything like debt as between themselves and their landlords, is significant of the rapid spread of agrarianism, and of ideas in relation to morals, which an English mind fails to comprehend. The form which this repudiation takes, and the manner in which it is sustained, prove that in parts of Ireland, at least, disaffection and neces are not wholly averted. As to the land-

North we hear of an upward tendency in prices, and the expectations of a good trade for the winter. The rise in the price of cotton has, however, occasioned much excitement and irregularity of business at Manchester. A novel feature in the trade of England with America in the present year has been the great demand for pig-iron for the latter country, which, hitherto, instead of importing, had constantly exported large quantities of that metal.

The undersigned, Electors and Inhabitants of the County of Sherbrooke, feeling a deep interest in every measure which may affect the welface of this Province, and looking upon the subject of the Annexation of Canada to the United States, as one of greater magnitude than any which has hitherto agitated the country,—and agreeing as we do, with the sentiment expressed in the Manifesto recently put forth by a large and influential body of Gentlemen in Montrest, that a peaceable separation of the Province from Great Britain, and a union with the United States, would best promote the prosperity and develope the resources of

circumphs of Imperial skill, industry, and valor, the Canadana Colonists feel that they have no mational glory to promote, he national pride to indulae; they find their energies eramped down to the management of their mere parish affaire, and they seek, by the rancour of their discussions to obtain for them that importance which would be denied to gleir intrinsic merit.

To make Canada great, there must be opened to her inhabitants those elements of emutations and pride, which will call forth all their energies, the discussions of her citizens must be terminated by abolishing distinctions of rece, they must be mainted to feel that they form part of one great country, and that its destinies are entrusted to their guidance. Where it possible for Canada to become an integral part of the British Empire, still its possible in such as to bleed its interests more naturally with the United States, and to make the former connection less desirable. But knowing as we do, the Constitution of Great Britain, and the varied interests which govern its legislation, it is not a question of choice whether we shall be incorporated with Great Britain, or with the United States, but shall we reunain in dependency of the former, or become an integral part of the latter empire?

The permanent interests of Canada, its present state, and its ferare prospects all point to the adoption of Angestation; and unites it has the ease, contrary its my beful, that we saw peaces all the means of development as a people, the are essential for prospecity, we may expect, to see the new or of breaking out, until contributions whether we shall may the fruits of their political skill which has thus far shielded their institutions from harm over interests will be watched over, and our industry protected and encouraged by their wise commercial policy; and although no longer dependence to a shielded their institutions from harm own in the United States will account the found of their supervision of Canada them. of to think of all the common of the common have the New York Market also, and I will ven-ture to assert that White Pine Timber would never again be purchased in Camada at 3d, the foot, after Amexation. We are told that England will now urge upon the United States Government the granting to Canada of a Reciprocal Free Trade in the agricultural and mineral products of the Country. The United States Government two years are, if the question had been gealeastly

tion from, and with the consent of, Great Britain, without which it would be neither desirable nor practicable. I sincerely hope, may, I believe, not a man among the signers to that Address, affixed their signatures under any feeling of hostility to Britain. Of course, I cannot pledge myself for others; but, if I believed it possible to maintain the existing Councetion, and at the same time have a reasonable hope, that our country would not thereby be doomed to poverty and ruin, I, for one, would oppose what now I advocate—a Peaceable and Friendly Severment of the political Connection between Canada and England, and Annexation to the United States. We are told by those who have protested against our Address, that the evils we complain of may be overcome by legislative enactments. Do they tell us, in their wisdom, what those legislative enactments are to be? No, that is left to fancy. But we are to be? No, that is left to fancy. But we are assailed and condemned in strong language, and misrepresented by those who dare not, while

the mechanic or merchant, will have a protection on manufactures of 20 to 30 per cent. Free Trade, in the products of the farm, the forest, and the mine, will not enable us to become a manufacdo not come here to condemn or abuse others—our object is rather to invite argument—by organising an Association which will submit to the farmen, mechanics, merchants, and tradets of Canada, our reasons for advocating Annexation, and leave them to determine whether our arguments are worthy of their support or not. It is admitted, I may almost say at all hands, that Canada must eventually form a portion of the Great American Republic, that it is a mere question of time; but it is sail by those who assume to be exclusively loyal, that we ought, before mooting the question, to exhaust every argument—make every effort to induce Great Britain to return to her Protective policy. Some, also, affect to believe England may be, by threats and fear of losing the Canadas, induced to return to her exploded system—they flatter themselves she will, for the benefit of the people of threats and fear of losing the Canadas, induced to return to her exploded system—they flatter themselves she will, for the benefit of the people of Canada, again exact Corn Laws; and again consign her working millions to the starvation from which they have latterly escaped by the repeal of those edicus laws—laws which ground the laboration with manufactories; we should then compete successfully with Lowell in the supplying of the Moster Statemen—the price of labour would

The hard-Amexationsists which does not starve for the honour of her protection. I have seen it stated, and I believe it was correctly stated, that the average product of an acre of land in Canada Well, was 15 bushels. Wheat of 28, 9d., its highest market value in Toronto, gives 56, 2d.—the same product in Rochester, realises to the farmers 22s. 8d. more, for Wheat salls there at 5s, 2d. For the produce of his acre the Canadian farmer can purchase I can't of super the Amerationists have singed a Protest, but what 10s, or 11s, to carry house to his family, while the American farmer, just across the line, would by the same quantity of sugar and carry back \$10 to his family. Sugar on one side the line costing to the consumer \$5, on the other side \$9 or \$10 per cwt. This calculation was made for the meridian of Toronto, an equally striking difference exists on the immediate borders of Lower Canada. Another portion of our trade, and that a vast one, is languishing for Amexation. The herdy lumber-man goes hundreds or miles into the uninhabited wilds and fells the tree, which is transported to Quebec, and sold in the shape of a square log for 3t, to 5d, a foot. It is next to England at a cost of 9d, to 10d, a foot. Vast as quantilize of Lumber are requiring in the United States Markets, but to send it there the lumbermen must submit to 20 per cent, tax. VI. The Secretaries shall conduct the corresthe Country. The United States Government two
years ago, if the question had been scalously
urged, might possibly have assented. That Government has, however, a desire to possess the
Camadas, though she may not desire to war with
England to obtain them; but her people see
clearly, that the refusal of Reciprocal Free Trade
with Canada, must render the people of Canada

desirous of Annexation, and finally, under any cir-cumstances that must take place, the desire of the Republic will be gratified. Nature intended it;

the interests of the people of Canada require it; and it must be. The result is simply, as our ad-

versaries say, a question of time. But the Ame-

rican Legislature will never grant Reciprocity. It cannot, in my humble judgment, be granted, without violating the 8th section of the first article

of the Constitution of the United States, which, among other things, provides "that all duties, im-posts, and excise shall be uniform throughout the United States." Sin,—I cannot resist informing you of the enthordinary effect that I have experienced by taking only a few of your LOZENGES. I had a cough for several weeks, that denied all that had been prescribed for use; and yet I got completely rid of it by taking about half a small box of your Lozenges, which I find are the only ones that relieve the cough without deranging the stomach or digestive organs—I am, Sir, your humble servant,

My DEAR SIR,—I have great pleasure in informing you that my wife has received great benefit from the use of Kesting's Cough Lozenges, you recommended her a short time since. Previous to this she had been troubled with a severe cough, and was under some of our first medical men here without experiencing my relief; however, Kesting's Lozenges have done wonders.

Sta,—I have great pleasure in informicy you of the great good your azcellent COUGH LOZENGES have dong me. In December, 1845, I caught a severe cold from riding two or three miles, one very wet night, which settled in my lungs, and quite took away my voice, so that I ceuld not speak above a whisper from that time until December last. I tried all kinds of medicines, but they were of no avail. I was then advised to try your Lozenges, which I did only to please my friends; but before I had finished a 2s. 9d. tin, my voice, to my great joy, came back me strong as ever. is strong as ever.

DEAR Saa,—If my testimony in favour of your valuable medicine will do you any good, or he of any service to the sick and afflicted, you are welcome to make such use of it as you please. For seven or eight years I have not enjoyed perfect health. In the apring of 1844 I had some cough; I was then in Worcester County, Mass., and applied to a physician, who gave me some medicine, but it did not relieve me. I was not able to work dering the summer. Last fall I was much worse, so reduced by coughing, and sweating nights, that I was obliged to take my room. My physician tried in vain to remove my cough, and restore me to health, but I did not expect to recover; I however concluded to try Wistar's Balsam of Wild Cherry; I was then troubled with very frequent spells of coughing, night and day; before I had taken one bottle, my cough was esserie; I continued to take the medicine until I was sable to leave my room. I have taken several bottles, and I think Wistar's Balsam of Wild Cherry sac cared me; at least, I leel as well and as strong as I have for twolve years.

THE RAST INDIA COMPANY.

The recipe procured from the original recipe procured from a celebrated Turkish fakim, (physician) of Smyrna, in Asia Minor, and which has obtained an unprecedented celebrity in Great Britain and the East Indies, from the astonishing Cures performed by it in both these countries, has lately been introduced into Montreal. As might be especied, its popularity has followed it, and its use is becoming general among all classes. The Proprietors, prompted by the very fattering reception it has met with in the Metropolis, have determined on extending its usefulness to all other parts of Canada; and, for that purpose, have established agencies in all the principal Caties. They fatter themselves that when its wonderful properties shall become more generally known, they will meet with that encouragement which the introduction of such a valuable medicament into a country justly entitles them. The contracted limits of an advertisement necessarily precludes their enjering into any adequate detail of its merits, but, for the information of the public, they intend to publich, from time to time, such statements of cures as have or may occur, and for the present will content the nelves with merely enumerating some of the complaints for which if has been used with the mast complete success—Such as Swellings, Cuts, Whitfows, Scalds from Seambout explosions, or other causes, Burne, Scrofulous Sores, Sere Nipples, Carbunder, Seads from Seambout explosions, or other causes, Burne, Scrofulous Sores, Sere Nipples, Carbunder, Seads from Seambout explosions, or other causes, Burne, Scrofulous Sores, Sere Nipples, Carbunder, Seads from Seambout explosions, or other causes, Burne, Scrofulous Sores, Sere Nipples, Carbunder, Seads from Seambout explosions, or other causes, Burne, Scrofulous Sores, Sere Nipples, Carbunder, Seads from Seambout explosions, or other causes, Burne, Scrofulous Sores

CURE OF DROPSY IN THE CHEST.

To Professor Holloway:

Sign.—Various circumstances prevented the possibility of my thanking you before this time for your politeness in sending me your Pills as you did. I now take this opportunity of sending you an order for the amount, and, at the same time, to add that your Pills have effected a cure of a disorder in my Liver and Stomach, which all the most emment of the Faduly at home, and all over the Continent, had not been able to effect; nay not even the waters of Carlabad and Mariesbad. I wist to have another Box and a Pot of the Comment, in case any of my family should ever to the continent, in case any of my family should ever to the continent of the Stomach. CURE OF TYPRUS FEVER, WHEN SUPPOSE ED TO BE AT THE POINT OF DEATH.

A respectable femals, in the neighborhood of Loughall, was attacked with Typhus Fever, and lay for five days without having tasted any description of food. She was given over by the Surgeon, and preparations were made for her demise. Mr. Benjamin Mackie, the Quaker, whose case is referred to above, heard of the circumstance, and knowing the immense benefit that he hisself had derived from Holloway's were given to her, and the same number was continued night and morning for three days, and in a very short time whe was completely cured.

N. B.—From advice just received, it appears that Colonel Dear, who is with his Regiment in India, the Slat Fusilisers, curd himself of a very bad attack of Fever by these celebrated Pills. There is no doubt that any Fever, however malignent, may be cured by taking, night and morning, copious doese of this fine medicine. The patient should be induced to drink pleutifully of warm linseed tea or barley water.
