## Sweet Clover and Its Value in Ontario

By Chas. M. Flatt

Of all field crops that have recently been receiving a certain amount of attention, sweet clover is probably the most important. With many it would seem to be a new crop, while in reality it is one of the oldest cultivated plants in existence. Its present and increasing popularity is due largely to the fact that a certain class of land in Ontario either through improper moisture content, or the lack of lime, has become unsuitable temporarily at least for the production of red clover or alfalfa. The increased price of other clover seed has undoubtedly been an important factor in the increased acreage of sweet clover.

A survey of the world relating to the growth of sweet clover reveals the fact that it has been introduced and is being grown to a certain extent in every country in the world. In Russia it has been valued as a soil renovator and to a limited extent as a pasture plant. In Germany, France and Italy it has never proven of great importance except on land unfitted for the production of other legumes. In India it is at present a fairly important forage crop, and when young forms an important article of diet in the lower and poorer classes of the villages, where it is used for greens. In Great Britain and Ireland it is used to a limited extent as a soiling crop, and in the United States it has become a fairly important crop in those districts where a continuous system of bad farming has been practiced so long as to impoverish the originally fertile soils. So it may be safely said that in no country in the world at present is sweet clover a really important crop. A survey of Ontario however shows that in many counties sweet clover appears to be taking its place as a standard forage crop. In other counties small fortunes are being made in the production of sweet clover for seed. In these districts very few acres are cut for feed, and it is safe to say that so soon as the present eager demand for the seed ceases the production of this crop in many districts will also cease.

Sweet clover is a biennial plant. Only one season's crop can be secured but that crop consisting of 2 cuttings produces an immense amount. The seed can be sown with any nurse crop or seeded alone in July and good results obtained. It will grow on a wide range of soils, both in texture and water content. It will grow on land so deficient in lime as to prohibit the growing of other crops. It should be seeded at the rate of 20 lbs. per acre, and should not be cut or pastured extensively the first season. When cut for hay it is ready about the latter part of June. It must be cut when tender if a palatable quality of hay is to be produced. Unlike other clovers and alfalfa, sweet clover has no crown and must therefore be cut above the lower joints of the stem to allow for new growth, otherwise the plant dies. When cured properly sweet clover is palatable and equal to the best alfalfa. Owing to a bitter sweet principal called commarin, contained in the plant, animals must acquire an appetite for it, but when once this liking is acquired the hay is readily eaten.

As a pasture plant sweet clover is proving valuable. It provides early pasture, and owing to its heavy cropping it is a satisfactory pasture plant for the entire season. Unlike alfalfa it will not produce a bloated condition in cattle.

Many farmers are afraid to grow this crop because they consider it a weed because it grows in waste places. As it is only a biennial plant it can be reasonably easy controlled as it will die if kept from seeding. Probably the worst danger in the wholesale introduction of the crop is the fact that the seed is found in increasing quantities in other seed, particularly alfalfa. This is due to the fact that it is somewhat similar to alfalfa seed and is cheaper, hence its use by a certain class of seedmen.

Because it is rather difficult to cure properly and at the right stage it may never become a permanent crop. As it is grown at present its main value lies in its adaptability to all classes of land and its qualities as a soil enricher rather than in any superior value as a forage crop. As a honey plant it is unsurpassed. The common and only valuable variety the white sweet clover is named *melilotus*, or honey of Lotis, because of its qualities as a sweet producer.

Owing to the present high price of red clover and alfalfa seed it is practically certain that the coming season will see a larger acreage in sweet clover in Ontario than ever before.

### What is a Billion?

In Great Britain and Germany a billion is a million millions (1,000,000,000,000). In Canada and the United States the French billion is used—one thousand millions (1,000,000,000). The French "milliard" and "billion" are of equal value. In France and America, the English billion is called a trillion, the English trillion a quintillion, the English quadrillion a septillion, and the English quintillion a nonillion, as shown by the following table, the first column of which gives the number of noughts that follow the figure "1," when the amounts are given in figures:

French.	English.
6 Million	Million
9 Billion	Thousand Million
12 Trillion	Billion
15 Quadrillion	Thousand Billion
18 Quintillion	Trillion
21 Sextillion	Thousand Trillion
24 Septillion	Quadrillion
27 Octillion	Thousand Quadrillion
30 Nonillion	Quintillion
33 Decillion	Thousand Quintillion

You will observe that in the French system each denomination is a thousand times the preceding one, while in the English system, the trillion is a million times a billion, a quadrillion a million times a trillion, etc. Hence the English quintillion is a million million times as much as the French quintillion.

### His Request.

Mr. and Mrs. Newbride had at last obtained a villa in the suburbs, and Mr. Newbride was hanging the pictures. There was a certain photograph of his wife which he decided must be hung up, but which was too small to suspend from the rail by a cord. He thereupon got a substantial nail and hammered it into the wall. There came a knock at the door. "It's Mr. Nexdor," said his wife, running to the window. "Your hammering has disturbed him," Mr. Newbride hastened to apologize. "Oh, I don't mind the noise," replied Mr. Nexdor, cheerily, "I only came to ask if I might hang a picture on the other end of the nail."

### Value of Study.

"No lesson you learn in the classroom is of much use unless you apply it in every day life," said a school superintendent addressing an incoming High School class. "Don't just learn that two and two make four for recitation purposes, but apply that knowledge whenever the occasion requires. Like the lad who was studying industrial economy—"Isn't it romantic sitting out here by the mellow light of the moon?" murmured the girl. "Yes," he answered, "and besides your father can't kick about his electric light bill."

## Furs Boom Far North

Preparations are already being made for a greatly increased trade into the far north. A number of new trading posts are being opened up, one company alone having 12 on its extension list. The outlook for a larger and more profitable traffic with the wilderness country of the Athabasca and Mackenzie river basins is considered so good that the traders into the north are buying up heavy stocks of merchandise for their Indian and Eskimo customers and are laying plans to move them as soon as navigation opens.

There are now four large trading concerns in the Mackenzie field, each with from 12 to 30 posts, and besides these many independent traders are doing business in a smaller way, but no less actively.

The ramifications of this northern business have been extended from a few outposts just beyond Edmonton to a network of wilderness trading centres all over the top country, as far north as the delta of the Mackenzie. This means that it is possible to buy things to eat and wear almost to the Arctic coast.

It is fur, of course, that forms the basis of all this business. With the present world-wide demand for fine furs, the cultivation of commercial relations with the Canadian north is found to be highly profitable, and it looks now as though a larger production of raw material will come from the sub-Arctic next year than ever before. At any rate, the traders are planning on an extra busy season, and the Indians are sending down word that the prospects for an abundant fur catch were never better.

### New Business Methods.

Some new methods are being introduced into the northern fur trade, the most important, perhaps, being the substitution of a cash system for the time-honored bartering that has always been picturesque, but not always satisfactory. Much business will continue to be transacted at the northern posts in the old way, to which the Indian and half-breed trappers have become accustomed, but some of the traders have now adopted the plan of paying money for the furs, which puts the north more clearly on a par with the rest of the world. The trappers, it has been found, like to handle money, and in the end it comes back over the traders' counters for store goods. Incidentally, the wilderness folk are learning to talk in terms of dollars instead of beaver skins, which used to be the money standard of the north.

### The Profit Tax.

The Business Profits War Tax expired on January 1, 1920. During the four years the tax has been in force, it has provided the major share of receipts from war taxes, including 1919—returns for which are not yet available—the estimated yield of the tax since its inception is in the neighborhood of one hundred million dollars. For the four years, the revenue has been:

1916-17	\$12,506,000
1917-18	21,271,000
1918-19	32,970,000
1919-20 (estimated)	30,000,000
Total	\$96,747,000

The tax was imposed on a sliding scale and designed to strike at big profits. From a rate of 25 per cent. on business profits between 7 and 15 per cent., the tax reaches as high as 15 per cent. on profits in excess of 25 per cent. Although, in view of war conditions, objection to the tax has not hitherto been made, manufacturers held that it hinders expansion of industries. In fact, in his last budget speech, Sir Thomas White took up this point. "Our business profits taxation," he said, "unless repealed as soon as war conditions terminate, must have an adverse influence upon the investment of money in business enterprise in Canada."

The Government's policy in regard to continuance or discontinuance of the tax is not likely to be announced before the budget speech. Then, if considered advisable (as has been done before) the tax can be renewed. The suggestion is made that, instead of renewing the business profits tax, the Government might make provision under the income tax for further taxation of corporations. In any event, there is evident need for revenue. Before the war, the great debt of the Dominion stood at \$336,000,000. It now stands at \$1,800,000,000. Immediately before the war, interest charges on the national debt were under thirteen million dollars. For the present year, they are estimated at \$115,000,000.

Doctors in Holland are experimenting with radium water as a medicinal beverage.

Cleansing—Healing—Fragrant

Albert Soap Limited, Montreal, Que.

**ANCIENT CAIRO.**

**Twelve Thousand Died of Plague In One Day in 1492.**

At the dawn of history a city is known to have existed near the site of modern Cairo called Khery-oh, place of combat, was Horus and Seth, of mythological fame, fought there, says an exchange. Seth found the body of his brother Osiris cut into fourteen parts, and scattered the pieces; whereupon Isis, wife of Osiris, hunted the fragments so that she might erect a monument for each. That is why so many tombs of Osiris are encountered in European history.

Not until a century before the Norman conquest, a modern period of Egyptian history, was the present Cairo founded by Gohar, leader of the troops of the Fatimite Caliph Muizz, following the Egyptian conquest.

In the year Columbus discovered America a plague swept Cairo which is said to have killed 12,000 citizens in a day. It was a century before that when Cairo may be said to have attained its zenith. After the plague a period of violence, rapine and murder set in, and sultans were enthroned and assassinated with dizzying speed and informality. As early as the thirteenth century Christian persecutions took place. Since then the city has been Islam. Only eight years ago an excuse of the Grand Mufti for declining to approve execution of a murderer was that the crime was committed with a revolver, a weapon not mentioned in the Koran. Napoleon's headquarters were at Cairo in 1798, following the Battle of the Pyramids. The commander Bonaparte left behind was murdered. In 1811 the French finally were dislodged and Cairo's independence was re-established.

**DR. MARTEL'S PILLS FOR WOMENS AILMENTS**

Thousands of women have testified in the last 15 years regarding the healing qualities of Dr. Martel's Female Pills. A Scientifically prepared remedy for delayed and painful menstruation. Sold only in a Patented Tin-Clay Cover Box. At your Druggist, or direct by Mail, price \$1.00, Kaleschbocker Remedy Co., 71 Front St. East Toronto, Canada.

**Wrong Kind of Animal.**

This is the latest Paris boulevard story. Hindenburg died, and since he was a marshal he went to heaven. But the German functionary at the door said to him:

"Marshal, you must enter on a horse."

Hindenburg descended to hunt for a horse and encountered the German crown prince.

"So you're dead, too?" he said. "Yes," responded the Kaiser's son. "I ate too much Holland cheese. But show me the door to heaven, where, naturally, I go."

Hindenburg took the crown prince by the arm and they got in line behind the other heaven-bound pilgrims. The line moved up and finally they reached the door where the German functionary again blocked Hindenburg.

"Marshal," he said, "I told you to get a horse, not an ass."

Minard's Liniment for sale everywhere

**The Dawn in Belgian Africa.**

The time has been when news from Darkest Africa in the Congo region was dark indeed; but the present and future of the tribes that embrace all told, something like 5,000,000 human beings scattered over a tropical territory almost as large as Europe, looks full of promise as one reads the report of Mr. Frank, Belgian Minister of the Colonies, covering the period of the war and laying out a programme for the future. During the war there has been practically no trouble in the Belgian Congo, probably as a result of the lines adopted by the administration, for any idea of forcing the natives into an uncon-

genial mold has been abandoned, and the country is being governed by adapting methods to local conditions. "Not only must we decentralize our administrative organization," runs the report, but we must continue to study and make the best possible use of native institutions, respecting and developing them in all respects, even if they offend our ideas and moral conceptions, so long as they do not offend against the essential principles of humanity and justice. Economically and industrially, the Congo may reasonably become prosperous and important in accordance with those essential fundamentals. One may hope to hear far different and better things from the Congo than one has heard in the past.

**Bullet in Brain Twenty Years.**

After living for twenty years with a bullet in his brain, Edgar Wilgus, an insurance broker, of Trenton, N. J., was killed by a five-foot fall on the granite steps of a New York hotel. The medical examiner discovered the bullet in the man's brain, thought at first that he had been unaccountably shot, but learned by telephoning to his home how long he had carried the bullet in his head.

**DEPENDENT.**

Miss Oldgirl (very rich)—You love me now, but will your love ever change?  
Hunter (absently)—What are your investments?

**WINTER WEATHER HARD ON LITTLE ONES**

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes cold and becomes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. They are a mild laxative which regulate the stomach and bowels and the present medicine. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**Cannot Demand Gold in Britain.**

Mr. Knowall was heard to assert the other day that a person could legally demand gold for bank-notes from the Bank of England. He was wrong. You could do so before the war, because the gold standard was based on a rule which provided that the Bank of England note issue must be backed up by a certain amount of gold held by the bank. The gold standard, however, could not be observed when war broke out.

The bank is now under no obligation to redeem its notes in gold as was formerly the case, and the Treasury have issued Treasury Notes to the value of 346 millions, which are legal tender for the payment of debts. Neither can the holders of these demand that they should be redeemed in gold.

The gold standard received its final blow on April 1, 1919, when the export of gold was prohibited. Nations carry on their trade by barter. We send so much goods to the Argentine, for instance, and they send us so much goods. If there is a balance between the two, it is satisfied by the export of gold. Now that our gold reserves have fallen very low, it is estimated that at the moment they only amount to some twenty million pounds—the Government has prohibited the export. Consequently, we must do our foreign business by the export of goods or on credit—Tit-Bits.

Minard's Liniment Cures Burns, Etc.

**SAN BLAS INDIANS.**

**Last Remaining Hermit Race is Determined.**

At least one nation in the world seems to have solved the problem of "self-determination," and at that it is doubtful if any of them ever read President Wilson's "Fourteen Points." These people are the San Blas Indians, whose country lies geographically in Panama, just south of the Canal Zone and bordering the Caribbean Sea.

They got their name in the papers the other day when one of their little armies raided a Panaman town and killed seventeen of the inhabitants. Just what the merits of the controversy were it is impossible to judge at this distance, but it is more than likely that the expedition was a punitive one.

The San Blas Indians are perhaps the last remaining hermit nation. China's great wall has not only been pierced but lies in ruins. Tibet's isolation has been violated to such an extent that any moderately armed force can penetrate its fastness. Perry opened the doors of Japan. White explorers have exploited the Congo. But

**How I Cured My Rheumatism**

by PETER SAVALA

I threw away my crutches in seven days, in two months, I was a well man—and I have never had a twinge from rheumatism since. This is what the remedy, which I obtained from my uncle in Greece, did for me. I went home to Greece crippled, broken in spirit—sick. I returned to this country in two months, absolutely free of every trace of rheumatism.

The whole story of my life in America—how I became crippled with rheumatism and how I found the treatment which uprooted the disease and drove it out of my body—I will gladly tell you FREE.

It makes no difference how swollen or distorted your joints may be; how severe the pain; or how discouraged you are; I feel sure that I have the means of helping you to find relief in a few days and a lasting cure in just a few weeks.

Just write me personally. Say—"Tell me how you cured your rheumatism and how I can cure mine." Address your letter or post card to Peter Savala, 59 St. Peter St. E. 226 Montreal, Que.

San Blas countenances no white visitor—not even a "spigotty." It is the law of San Blas that no white man shall visit that pure blooded Indian dominion without express permission and that no white man shall never be allowed to remain there after nightfall. The penalty is an unpleasant Indian form of execution.

The San Blas people are not exactly untutored children of the jungle. Their law works only one way. They are frequent visitors to Colon, Panama and the other cities of the Isthmus, where many of them wear white man's clothes and speak his language. They are hospitable, too, in their way, when a white man is allowed to visit one of their villages, but as the afternoon shadows begin to lengthen the polite host hands his visitor's hat with the Indian equivalent of "what's your hurry?" Fortunately their country is small, and by hurrying it is usually possible to reach the border before he "sicks the dog on you."

Naturally this sort of a law sometimes gets on white men's nerves. It is all right to put an Indian out of your house with a cane, but the Caucasian "not used to it." And there are some men who simply cannot "take a dare." When to this fact is added the twin lure of rumors of gold in the streams and beautiful Indian maidens in the villages, it is no wonder that more than one white adventurer has tested the law of San Blas and found it to be as determined as its people.

Minard's Liniment Cures Dandruff.

**Seines to Capture Sharks.**

Faced with an alarming scarcity of hides, the world for some time has turned to the sea for a supply, with the result that a new industry is developing at various points on our coasts. Recently immense seines have been devised and used for the capture of sharks and other fish whose skins can be converted into leather. One of the nets that has proved very successful in this unusual fishing is 600 feet long and 18 feet deep, with a 4-inch mesh of heavy twine. It is operated from small boats, and as many as 200 sharks have been taken with it in a single day.

Experiments conducted under Government supervision have disclosed the fact that tanned shark skins are suitable for shoe uppers and other articles. Five hundred fish skins are treated weekly at one tannery devoted to the production of marine leather, and plans have been made for greatly increasing this output during the next year. Each hide contains from 10 to 40 square feet of exceptionally strong leather, and is sold at a price depending upon the quality. Valuable by-products are obtained from the flayed bodies of the fish, including fertilizer, glue, oil, and musical strings. The skins of certain whales, porpoises, rays and devilfish also can be utilized. Formerly these inhabitants of the sea were regarded as worthless. Now they are expected to become important factors in the leather market—Popular Mechanics.

**RELIEF AT LAST**

I want to help you if you are suffering from bleeding, itching, blind or protruding Piles. I can fix you now, in your own home and without anyone's assistance, you can apply the best of all treatments.

**PILES TREATED AT HOME**

I promise to send you a FREE trial of the new absorption treatment, and references from your own locality if you will but write and ask. I assure you of immediate relief. Send no money, but tell others of this offer.

Address: MRS. M. SUMMERS, BOX 8, Windsor, Ont.

**Cleaning Photographs.**

Dirty photographs are so unsightly that you will be glad to know there is a way to clean them. Moisten a soft cloth with warm water, to which a little ammonia has been added; wring the cloth out well and wipe the photographs very lightly, drying them immediately with a soft, dry cloth.

**DO YOU OWN A "MEAL MAKER" ?**

It's a Wonderful Aid to Housewives.

Though But List of Favorite Dishes.

Method is one of the best things in the world for the kitchen, and for any household. But doubtless one of the hardest problems is the difficulty of finding satisfactory methods whereby the make-up of any given meal may be readily decided and then forgotten, leaving the mind free to deal with the other duties in the home. The mental exertion expended for over a thousand meals each year consumes much of a woman's energy which might be more intelligently directed into channels conducive to broader culture.

**SELF-DEFENCE.**

The plan given here was evolved by a woman in "sheer desperation and self-defence," as she put it. The plan is one which will appeal to every practical woman, and its only requirement is the construction of a simple device which any woman can make for herself in a few minutes. It involves, however, two factors of which every woman who appreciates the value, but which every business man finds indispensable; they are a pencil and sheet of blank paper. If women

I consider MINARD'S LINIMENT the BEST Liniment in use.

I got my foot badly jammed lately. I bathed it well with MINARD'S LINIMENT, and it was as well as ever next day.

Yours very truly,

T. G. McMULLEN.

are ever to make a clear-out business of housekeeping they must recognize that a pencil and paper can be put to good use as a means of relieving the worry incidental to the performance of the work in a kitchen.

Take a pad of plain paper, about three and a half inches wide by seven inches long. At the top of the blank sheets of paper write as headings the names of the different classifications of edibles, such as soups, salads, vegetables, meats, fish, breads, cereals, fruits, desserts, beverages, etc. On these consecutive pages copy from your cook-book in condensed form those particular dishes which properly come under each heading.

The pad will serve as a means of suggesting at a moment's glance, whatever variety of dishes you may wish to incorporate in any given meal. Then get a piece of cardboard of heavy manilla paper. Cut this to measure eight inches by nine. Fold it to form a cover whose sides are four and a half inches by eight inches in size. After it is folded open it, and on the inside of the front cover paste your pad with its classification of soups, meats, etc., so that each sheet of the pad can be easily turned. On the opposite side, and in the centre of the inside back cover, paste a similar pad of blank notepaper.

Drop a pencil in between the two pads, fold them together and put in your "Meal Maker" in some convenient place in the kitchen, and it is guaranteed to be found a most sensible means of relieving kitchen worries at times when you don't know what to get for dinner.

## This Soldier Knows What Helped Him

**DODD'S KIDNEY PILLS CLEANED  
OUT HIS RHEUMATISM.**

**He Found in the Old Canadian Remedy  
Relief That the Hospitals of  
Egypt Could Not Give.**

Cape St. George, Nfld., March 1st.—(Special.)—Eugene Cornet, keeper of the light and fog alarm here and who was overseas with the Newfoundland forces, is a firm believer in Dodd's Kidney Pills as a help for kidney disease and rheumatism.

"For two years I suffered from kidney disease and rheumatism," Mr. Cornet states. "I was treated for them in the hospitals in Egypt. But it was five boxes of Dodd's Kidney Pills that cured me."

Dodd's Kidney Pills are purely a kidney remedy. By putting the kidneys in shape to strain all the impurities out of the blood they remove the uric acid, the cause of rheumatism. With the kidneys cleansing the blood there can be no uric acid to crystallize in the muscles and cause those excruciating pains known as rheumatism. Ask your neighbors about Dodd's Kidney Pills.

## MONTAGU WARNS AS TO TURKEY

**Must Leave Ottoman Alone  
Or Stir India.**

**Her Part in War Entitles  
Her to Voice.**

London, Cable. The right Honorable E. S. Montagu, Secretary for India, in a statement to The Evening Standard on the question of turning the Ottoman Government out of Constantinople, said that if the taking of Constantinople from the Turk was to be a necessary result of the war, "I respectfully suggest that you ought not to have asked the Indians to take part in the war against Turkey."

The secretary considers that India's wishes should be consulted in the matter, particularly as Indian soldiers and material played a prominent part in the response to the Empire's needs.

"From one end of India to another," he declared, "all those who have expressed an opinion on this subject, of whatever race or creed, believe that non-interference with the seat of the Caliphate is indispensable to the internal and external peace of India."

Mr. Montagu is of the opinion that the rumor that has spread that Turkey was to be destroyed and deprived of its capital has been one of the prime causes of the recent Armenian massacres.

"The authoritative pronouncement of the war aims made when Turkey was really being beaten," continued the secretary, "was construed as a modification of the threats following the failure of the Gallipoli campaign and was hailed with high relief from one end of India to another."

**Pills That Have Benefited Thousands—Known far and near as a sure remedy in the treatment of indigestion and all derangements of the stomach, liver and kidneys, Parmelee's Vegetable Pills have brought relief to thousands when other specifics have failed. Innumerable testimonials can be produced to establish the truth of this assertion. Once tried they will be found superior to all other pills in the treatment of the ailments for which they are prescribed.**

## 3,000 DEATHS ON EACH DAY

**Terrible Toll of Disease in  
Petrograd.**

**Most Bodies Left On Snow  
In Country.**

Helsingfors, Finland, Cable. — Reports of serious living conditions at Petrograd have been received by Professor Hermann Zeidler, of Viborg, showing that typhus, cholera and influenza are taking a heavy toll of the depleted population. Prof. Zeidler will have charge of the Russian Red Cross relief work at Petrograd when Russia is opened again to the outside world.

The reports state that up to January 15, deaths in Petrograd were reaching a total of 3,000 a day. The coffin factories could turn out only 1,000 coffins daily, and most of the

bodies were being carried into the country on sleds and left in the snow. Many bodies were being dropped through the ice in the River Neva. Funerals were prohibited owing to the scarcity of horses and because of the depressing effect of funeral processions on the people.

"Living conditions are intolerable," said Prof. Zeidler. "It costs 30,000 Lening rubles a day for food alone. Petrograd at night is without light, and there is very little water. Houses are flooded by the bursting of frozen pipes. The sewers are stopped and sanitary conditions are deplorable."

"The people have given up hope and they do not wish to live. They make grim jokes among themselves as to how much longer they will hold out."

Professor Zeidler's information about conditions in Petrograd is wholly at variance with the cheerful news given to the Associated Press correspondent by M. Zorin a member of the Bolshevik committee from Petrograd that came to the frontier to receive the Russians deported from the United States. Zorin said that every resident was obtaining one and one-quarter pounds of bread daily while Prof. Zeidler asserts that two ounces of flour is all that can be supplied even to the favored classes, the non-Bolshevik class receiving none at all.

Zorin declared that there was no scarcity now of wood fuel and that some coal had been received from the South. On the other hand, Professor Zeidler says: "Wood is so difficult to get that the people are not permitted to burn it in stoves. Those living in tenements huddle together for warmth in rooms on the lower floors and sleep there. They count themselves lucky if the temperature of a room is one degree above the freezing point."

**Asthma Victims.** The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

## "CHOCOLATE DIP."

**Candy, and How to Make It  
Described.**

It is a great deal cheaper to dip the candies in a mixture of chocolate and nougat than in the chocolate alone. To make this mixture place a bowl in the top of a steaming tea kettle, and put in sweetened chocolate, either grated or cut fine. When the chocolate has melted add lumps of vanilla fondant until the bowl is two-thirds full. Use more or less chocolate, as a darker or lighter shade is desired. Stir occasionally with a fork until the mixture is warmed through, then beat well until all is of the same consistency. When a cold fork is dipped well into it the "dip" should run off slowly, leaving a coating about an eighth of an inch thick on the fork. If too thick add a little water and beat again. If too thin add more chocolate and fondant.

Drop the candies, one at a time, into this bowl; dip well into the mixture until entirely covered, and lift out by placing a fork under them, drawing the fork across the edge of the bowl to remove all superfluous chocolate, and drop on waxed paper holding the fork an inch or two above the paper.

When dipping the coconut balls a few shreds of coconut may be placed on the top of each so that they may be distinguished from the nut balls.

Nut kernels and pieces of figs dipped in chocolate or melted maple fondant are delicious.

Cut the stems of Malaga grapes clean and dip each in white vanilla fondant, melted as the chocolate "dip."

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, the best remedy of the kind that can be had.

## THE LENGTH OF LIFE.

**Dr. Alexander Graham Bell Sets  
Forth His Theory.**

"Most people die before reaching middle life, and comparatively few live to be old."

"Examine the history of the people you know and you will find that very few of them had parents who died before 70, while a considerable proportion had parents who lived to be 80 or even much older."

"Why?"

Dr. Alexander Graham Bell propounds these questions, and in answering them he set forth this theory:

"The weak and delicate are not

## ASTHMA

Templeton's RAZ-MAH Capsules are guaranteed to relieve ASTHMA. Don't suffer another day. Write Templeton, 142 King St. W., Toronto, for free sample. Reliable druggists sell them at \$1.04 a box. 70

capable of bearing large families. It is the strong and vigorous who live to extreme old age and leave many descendants behind them.

"The children of long-lived parents are, on the average, stronger, more vigorous and longer-lived than the children of others; and there are many more of them per family."

"Here, then, we have evidence of the existence of a natural process at work among human beings tending to improve the vigor and vitality of succeeding generations."

Dr. Bell quotes genealogy records to show that "a very large proportion of each generation has sprung from a very small proportion of the preceding generation, namely, from the people who lived to be old."

"Another inference," he continues, "is that the long-lived people left more descendants behind them in proportion to their numbers than the others, and therefore, on the average, had larger families."

"Of course many widowers may have married again when they were well advanced in years and have had families by each marriage, but this explanation does not apply to women."

"We cannot, for example, suppose that mothers who died at 50 would have had more children had they lived to be 60, or 80, or a hundred; and yet investigation shows that the mothers who lived to extreme old age actually had, on the average, larger families than those who died early in life."

"The few who live to extreme old age are people who have proved themselves to be immune, at least resistant, to the disease that have carried off the vast majority of their fellows. They have been exposed to all the diseases and accidents of life and have not succumbed. They had proved themselves to be resistant, not at a single disease alone, but to all diseases; and the fact that they transmit to their offspring a tendency to live long shows that the disease-resistant quality is handed down to their descendants."

"Of course, longevity itself is not a thing that is capable of direct inheritance; but the fact that longevity seems to run in families shows that a tendency to long life can be inherited."

"What is really inherited is probably a tough, wiry constitution which enables the fortunate possessor to survive the multitudinous ills that flesh is heir to and live on to the extreme limit of human life. From this point of view, the attainment of old age is extremely significant."

"The people who live to be old represent the disease-resistant strain of their generation; and, on account of their superior fecundity, this disease-resistant quality is distributed very largely through the population."

**Muscular Rheumatism Subdued.**—When one is a sufferer from muscular rheumatism he cannot do better than have the region rubbed with Dr. J. D. Kellogg's Electric Oil. There is no oil that so speedily shows its effect in subduing pain. Let the rubbing be brisk and continue until ease is secured. There is more virtue in a bottle of it than can be fully estimated.

## A Rare Violin

Some years ago Harry Furness, the English artist, told an interesting story of a hungry lad, a grasping butcher and a violin, which illustrated how easy it is to overreach oneself.

A poor little boy, with a hungry look and seamy clothes, was playing a violin in the gutter on a wet Saturday evening. He crawled until he came in front of a brightly lighted butcher shop.

"Move on there, Paganini!" cried the pompous proprietor.

"Oh, sir, please, sir, I am so 'ungry. I 'ave been playin' and playin' and not a crumb to eat all day, and I'm cold and wet, and, oh, so 'ungry. It's not meself I'm thinkin' on, neither, but them at 'ome. There ain't nuthin' in the 'ouse, an' to-morrow is Sunday. Do give us a piece of meat, there's a kind gentelman."

"Have you any money?" asked the butcher.

"Not a stiver, sir. Earned nothin' all day. I'm too cold to play any more. Would you, kind sir, take this violin? It's a good un, sir; I know, for me father is a violin mender, an' would you keep it until I pay, an' give us a few scraps of meat?"

Moved by pity, the butcher took the violin and gave the boy some meat, and hung the violin on the hook from which he had taken the meat.

Shortly afterward a stranger entered, humming a tune, well-brushed hat on one side, dark curly hair, black mustache, astrakhan collar and cuffs on his overcoat, big diamond scarf-pin and a gold-headed cane.

"Good evening, butcher," he said. "I'm rather late to call, but the fact is we have been moving all day. Taken No. 8 Crochet terrace, you know. Egad, forget we had nothing to eat in the house—pure forgetfulness. Peo-

ple of my artistic nature are all alike—mind before matter. However, I see you are yourself a musician"—tapping the violin hanging on the hook with his can.

"Me? Oh, no, sir," replied the butcher. "That is not mine. A boy left it in pawn for some meat—a poor street musician. He'll come and redeem it, for he has an honest face."

"How interesting," said the stranger taking down the violin. "A poor boy in the streets, indeed. Well, he can afford a good violin, egad, he can! I'll give you 20 guineas for this at first sight."

"Twenty guineas!" gasped the butcher. "I gave only 19 pennyworth of meat. But there, it ain't mine, so back it goes."

"You're right, butcher," said the affable stranger. "Of course it is yours in trust, but tell the boy when he comes, and send him to me, Signor Bower, No. 8 Crochet place."

In the meantime the Signor ordered a good stock of meat and opened an account with the butcher.

Shortly after the Signor had left in a rush an infuriated man with the meat the butcher had given the boy in one hand and a stick in the other.

"Here take your precious meat and give me that violin," he cried, as he flourished his stick. "I've given a good caning to that precious brat, I have. Do you know, I wouldn't part with that violin for 500 pounds. And the brat knew it too."

"Then you starve," said the butcher, taking down the violin.

"Yes, die rather than part with it." "I've taken a fancy to it," said the butcher coolly. "A great fancy. I'm a bit of a judge, and think it a good one. I'll give you 50 guineas for it, and risk it."

"It's worth 10 times that," growled the man. "But, there, beggars cannot bargain. Here, give us the money."

The signor's meat returned just after the father had departed with the 50 guineas.

"There ain't no one living a No. 8," said the messenger.

The butcher rushed to No. 8 himself, with his violin, and verified the fact that no one had moved in there.

Then he took the violin to an expert.

It was worth exactly 18 pence.

Needless to say, he never again saw the poor boy, the irate father nor the impressive musical genius with a careless memory, and forever after music had no charms to soothe his savage breast.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Cure.

## DARK DUBLIN.

**Council Retaliates for Mar-  
tial Law.**

Dublin, Cable. — Beginning tonight, martial law will be enforced in this city between midnight and 5 o'clock in the morning.

As a protest against this measure of the Dublin Castle authorities, the Dublin Corporation (City Administration) served notice it would refuse to light the streets during those hours.

The corporation resolved to refuse permission to any employee or official to ask permits from the Government for the discharge of municipal duties, and refuses to authorize the payment of overtime to any men working by permit between midnight and five o'clock in the morning.

The streets to-night are in absolute darkness within the city limits, but electric light is still supplied to the houses. The newspapers fear that the electric power may be stopped, compelling them to cease publication.

## HOW'S THIS?

We offer \$100.00 for any case of catarrh that cannot be cured by HALL'S CATARRH MEDICINE. HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the System. Sold by druggists for over forty years. Price 50c. Testimonials free. F. J. Cheney & Co., Toledo, Ohio.

## WILSON'S REPLY AS TO ADRIATIC

**U. S. President's Letter to  
Reach London To-Day.**

**Still Refuses to Agree to  
Ally Terms.**

Washington, Despatch. — President Wilson's reply to the Entente Premiers on the Adriatic question was despatched by the United States State Department. It is expected to be in the hands of Ambassador Davis at London to-morrow, and will be delivered as soon as it has been decoded.

Officials still declined to discuss the contents of the communication, but it is known that in exchanges with the Premiers, the President has made an unequivocal statement of the United States Government's position, especially with regard to the forming of agreements without the participation of this country.

It is understood that in his latest note the President does not return precisely to the arguments and decision announced in the note of December 3, which formed the basis of the Adriatic agreement to which the United States subscribed, as important events which have occurred in Fiume since that time are said to have necessitated modification in some respects to meet the changed conditions.

However, the President is said to have refused to agree to the terms of the settlement arrived at by the Premiers, and sent to Jugo-Slavia as an ultimatum.

Acting Secretary of State Polk is endeavoring to arrange for the simultaneous publication of the correspondence on both sides of the Atlantic and it is regarded now as probable that the notes will be made public in Washington soon after the President's reply is delivered at London and Paris.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure no better remedy than Miller's Worm Powders, which are guaranteed to totally expel worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

## ACCEPTED AS A SUBSTITUTE.

(Stray Stories.)

"How did they happen to meet?"

"He ran over that puddle of which she was so fond."

"Did he rescue it?"

"Looks that way. He and she are now engaged."

## EVEN THEN.

"What an awful talker Lowbrow is; he absolutely talks all the time."

"Not when he eats, surely."

"He does the next thing to it; he eats audibly."

**DR. WARD The Specialist**  
79 NIAGARA SQUARE, BUFFALO, NEW YORK.

**Men, Are You In Doubt**

As to your trouble? Have you some skin eruption that is stubborn, has resisted treatment? Is there a nervous condition which does not improve in spite of rest, diet and medicine. Are you getting down hill steadily? ARE YOU NERVOUS and despondent, weak and debilitated? Good mornings, no ambition—lifeless; memory gone; easily fatigued; excitable and irritable; lack of energy and confidence? Is there falling power, a drain on the system? Consult the old reliable specialist.

**SYMPTOMS OF VARIOUS AILMENTS**

Weak and relaxed state of the body, nervousness, despondency, poor memory, lack of will power, timid, irritable disposition, diminished power of application, energy and concentration. Fear of impending danger or misfortune, drowsiness and tendency to sleep, unrestful sleep, dark rings under eyes, weakness or pain in back, lumbar, vertigo, constipation, headache, loss of weight, insomnia. Dr. Ward gives you the benefit of 25 years' continuous practice in the treatment of all nervous, nervous, blood and skin diseases. The above symptoms, and many others not mentioned, show plainly that something is wrong with your physical condition and that you need expert attention.

Men, why suffer longer? Let me make you a vigorous man. Let me restore your physical condition to full manhood. Don't be a weakling any longer. Make up your mind to come to me and I will give the best treatment known to science—the one successful treatment based on the experience of 25 years in treating men and their ailments.

**Dr. Ward's Methods Unrivalled, Thorough and Permanent.**

Do you realize that you have only one life to live—do you realize that you are missing most of that life by ill health? A life worth living is a healthy life. Neglect of one's health has put many a man in his grave.

I have been telling men these things for many years but still there are thousands of victims who, for various reasons, have not had the good sense to come and get well.

Specialist in the treatment of nervous conditions, nervous exhaustion, headache, lumbago, rheumatism, stomach and liver trouble, acute, chronic diseases, catarrh, asthma, rectal troubles, piles, fistula and blood conditions.

**OFFICE HOURS: 9 a.m. to 5 p.m. Sundays—10 a.m. to 1 p.m.**

**FREE CONSULTATION EXAMINATION.**

Before beginning treatment you must make a visit to my office for a personal physical examination. Railroad fare will be considered as part payment of fee. Canadian money accepted at full value.

THURSDAY, MAR. 4, 1920

**LOCAL MENTION**

The Waterdown Music Co. have moved to their new quarters on Dundas street.

Mr. A. E. Richards, of Vancouver, B. C. is spending a few days under the parental roof.

The ladies of St. Thomas church will hold a euchar party in the parish hall March 17th beginning at 8.30 p. m.

Friends of Mrs. Herbert Neustead will be pleased to learn that she is recovering from her recent attack of the flu.

L. M. Henry who has been confined to his bed with a severe attack of the flu for the past two weeks is able to be around again.

Mr. Herbert Beatty, wife and daughter, of Hamilton, were visitors at the home of Mr. and Mrs. J. F. Breckon last week.

The postponed concert by the ladies section of the Choral club will be held in the Methodist Sunday school room on Wednesday evening, March 17th.

The Basket factory is again in operation, and a number of hands are employed turning out baskets, berry boxes and crates for the coming season's bumper crop.

The monthly meeting of the W. M. S. will meet at the home of Mrs. Albert Slater on Wednesday March 10th at 2.30 p. m. All members are requested to be present.

Mr. Herbert Hooper, who has been seriously ill with pleura-pneumonia died to-day at his home on the Hamilton road. The funeral will take place on Saturday afternoon to the Burlington cemetery.

Mr. J. W. Young, a well known resident of this village passed away at his home here on Wednesday morning last after a lingering illness. The funeral will take place Friday afternoon to Waterdown cemetery.

Mr. Geo. Collier, of Portland, Ore. is visiting his sister, Mrs. R. Griffin, and renewing old acquaintances in the village. Mr. Collier is an old Waterdown boy, and prior to leaving, here some 25 years ago was engaged in the butcher business.

Messrs. D. E. Knowles and J. E. Sparks are opening an up-to-date morgue and chapel in the old Drug store property on Dundas street. The building is now being fitted up in first class order for their Undertaking business. A full line of funeral necessities will be kept on hand at all times.

The young people of the Methodist church are preparing an interesting program for an entertainment to be held in the church on Friday evening March 12th. The program will consist of instrumental and vocal music recitations and a striking character sketch contrasting rural and city life. An enjoyable entertainment is assured all who attend.

**KNOX CHURCH SERVICES**

Morning Services—Sacrament of the Lord's Supper. Subject "The Heart of the Gospel."

Evening Service—"The Light of Service."

A Preparatory service will be held on Friday evening, March 5th at 8 o'clock.

Commencing March 1st. my Blacksmithing business will be conducted on a strictly cash basis.

Geo. Gilmer

**Notice to Creditors**

NOTICE is hereby given that all persons, creditors and others having claims against the estate of Andrew McCartney of the Township of East Flamboro in the County of Wentworth, Farmer deceased, who died on or about the 21st of November, A. D. 1916, are hereby notified to send notice of their claims to the undersigned on or before the 13th day of March 1920, after which date the Executrix will proceed to distribute the assets of said estate, having regard only to the claims of which she shall then have had notice.

Dated at Hamilton this 21st day of February, A. D. 1920.

W. T. EVANS,  
4 Hughson St., South, Hamilton,  
Solicitor for the Executrix

**CARD OF THANKS**

I wish to take this opportunity to thank the many friends for their kindness during my recent illness.

CLIFFORD BOWEN

**Greenville**

Mr. and Mrs. F. Hore spent the week end in Hamilton.

Mr. Will Hills, son of the late George Hills died of pneumonia on Sunday and was buried at Christ Church cemetery on Tuesday.

Mr. and Mrs. J. Hopkins of Hamilton spent Sunday at Mr. W. Hopkins.

W. Taylor made a business trip to Ingersol this week.

The Women's Guild of Christ Church will meet at the home of Mrs. F. Hore next Tuesday afternoon.

Mr. and Mrs. H. Templer visited with Mr. and Mrs. Andrew Betzner on Sunday last.

Mr. and Mrs. Gable of Dundas spent Sunday at Mr. and Mrs. W. B. Hyslop's.

**Not at Athens.**

There will be no exhibit by Canadian manufacturers at the Athens Fair this year. It has been decided the notice was too short for anything but a Canadian Government exhibit, but arrangements are being made between the Government and the Canadian Manufacturers' Association for future exhibits to be made at short notice in connection with the Dominion's bid for European trade.

**Mills in Poland.**

Textile mills at Lodiz, Poland, are reported by the British Economic Commission to be comparatively undamaged, and capable of production almost immediately if supplies of cotton were obtainable.

**No Man's Land.**

In the north of the Province of Quebec there are still 250,000 square miles of unexplored country, making, with the 642,000 square miles in western Canada, a total of 901,000 square miles.

**GET BIGGER PROFITS  
From Your Vegetables**

Get the most out of your land. You can handle as many crop acres of heavy yielding land as of light yielding land. You owe it to yourself, to your land, to use a high-grade commercial fertilizer.

**FREEMAN'S 4-9-4 POTATO  
And Gardener's Special**

has been increasing potato and other vegetable yields every year for 40 years. It is a general vegetable fertilizer especially compounded for potatoes, turnips, carrots, onions and sugar beets. Expert agriculturists say that potato fertilizers should supply 3 to 5% Ammonia, one half of it coming from a readily available source of Ammonia such as nitrate of soda and the other half from blood or tankage, 6 to 8% available phosphoric Acid and 3 to 5% potash.

Freeman's 4-8-4 Potato and Gardener's Special is the ideal fertilizer: it is well balanced; it supplies 40 p. c. Ammonia, 9 p. c. Phosphoric, 4 p. c. Potash.

Grow big crops of vegetables of superior quality—Use Freeman's 4-9-4 Potato and Gardener's Special. Write for information

Scap 25c. Ointment 25 and 50c. Sold throughout the Dominion. Canadian Depot: Lorne Ave., Limited, St. Paul St., Montreal.

Use Cuticura Soap shaves without stung.

### SUNDAY SCHOOL LESSON

Lesson X. March 7, 1920.  
John Writes About Christian Love. I John 4: 7-21.

Commentary.—I. Exhortation to love (v. 7-11). 7. Beloved—We seem almost to see the aged apostle, as in the ripeness of Christian love he speaks to a company of saints or writes to all the churches, addressing them with this endearing term. His heart is in what he says. Let us love one another—One who loves God supremely and with all the heart loves his fellow men. Here is an exhortation to allow nothing to interfere with the love that Christians have for one another and to cherish and cultivate that love. Love is of God—God is the source of love, and only as we receive love from him can we truly "love one another." Every one that loveth is born of God—The fact that one has true Christian love is evidence that he is a child of God, is born of the Spirit. Knoweth God—He not only knows something about God, but knows him. 8. Loveth not knoweth not God—A statement negatively of what is put in the affirmative form in the preceding verse, and emphasizes the truth set forth. For God is love—Love is the essence of the divine nature. His heart of love goes out to every creature he has made. One cannot know God from becoming acquainted with him through the new birth without loving him and his fellow men. 9. Was manifested the love of God toward us—A profession of love without any manifestation of it is an empty claim. God is love and has given a manifestation of that love to the world. The extent of God's love is measureless.

10. Herein is love—Love in its essence, love in its highest possible measure, is here manifested. Not that we loved God—It was in no sense man's love to God that led the Father to send his Son into the world. But that he loved us—The love was all on one side. He loved us because of the fact that man was the creature of his hand and because of what man could become through the plan of redemption. To be the propitiation for our sins—To be the atoning sacrifice for our sins; to satisfy divine justice. Jesus bore on the cross the penalty for our transgressions, so that we, by trusting in him and resting upon the atonement that he made, might be free from sin and the punishment connected therewith. 11. If God so loved us—The measure of his love is what he did for us in giving his Son to die for us. We ought also to love one another—This is a fitting conclusion to the argument by which the apostle drives home the exhortation given in v. 7. Since God loved us with an infinite love and manifested that love for our present and eternal well-being, we ought to love one another.

12. Dwelling in God and He in us (vs. 12-16). 13. No man hath seen God at any time. God is a Spirit. He is invisible, yet He exists, infinite in wisdom, power and love, and we are to love Him; and we are to love our fellow men who are to be the visible recipients of our love. God dwelleth in us—Love one to another is a natural consequence of God's dwelling in us. One who is born again becomes a temple of the Lord. God comes in to set up His kingdom and make His abode. He has possession of the faculties of the being. He dwells there as a beloved and wel-

### The Cause of Heart Trouble

Faculty digestion causes the generation of gases in the stomach which inflate and press down on the heart and interfere with its regular action, causing faintness and pain. 15 to 30 drops of Mother Seigel's Curative Syrup after meals sets digestion right, which allows the heart to beat full and regular.

come guest. Perfected in us—See note on v. 17. 13. Hereby know we—God's plan for us includes a positiveness of knowledge as to our acceptance with him. That we dwell in Him—The indwelling is mutual. Not only does God dwell in us, but we also dwell in Him. Because He has given us of His spirit—The change that comes to us when we are born again is evidence that God has come to dwell in us; yet the greater evidence is brought to our hearts by the Holy Spirit who bears witness to us that we are born of God. 14. We have seen and do testify—John had been closely associated with Jesus during the years of his public ministry and was prepared to bear testimony as to his mission on the earth. To be the Saviour of the world—in the atonement He made, Jesus provided salvation for the world, and whosoever will may be saved through Him. 15. Whosoever shall confess that Jesus is the Son of God—Much stress is laid on this confession; because the false teachers denied the reality of the incarnation; but this confession implied also such a belief in Christ as put them in possession of His pardoning mercy and indwelling Spirit.—Clarke. This confession involved both the truth that Jesus was the Son of God and the application of that truth to one's personal need. God dwelleth in him and he in God—The faith just mentioned appropriated personally the benefits of the atonement. 16. We have known and believed—John repeats and emphasizes the certainty of knowledge and faith in respect to Christ's nature and mission.

17. Herein is our love made perfect—When we fully dwell in God and He in us, our love is perfected in us. Everything out of harmony with God is taken out of the heart and his love fills the entire place. "Thus the love is made perfect. When it thus fills the heart, it has all the degrees; it is all in all; and all in every power, passion and faculty of the soul." This is Christian perfection. It is the pure love of God filling the soul to the exclusion of every evil thing. Boldness in the day of judgment—He whose sins are all forgotten and whose heart is cleansed and filled or stand boldly before the Judge and plead the love and mercy of Jesus. As he is, so are we—As he is pure and righteous and holy, so are we through faith in Christ and the atonement he made for us. 18. There is no fear in love—He who dwells in love and dwells in God, and God in him, has the Judge in closest sympathy and fellowship with him, and hence can have no fear. Perfect love casteth out fear—The apostle is speaking particularly about the judgment. The heart that is filled with divinely-imparted love has no place for fear. Fear of future ill is also cast out. Fear hath torment—Fear is always distrustful. It has led to sickness, insanity or death. God has provided for his people relief from tormenting fear. He that feareth is not made perfect in love—The apostle here states the test of our relation to God. If fear remains, it is evidence of a lack of love.

19. We love him, because he first loved us—In the most ancient manuscripts "him" is omitted, so also is the Revised Version. It is because he first loved us and sent His Son for our redemption that we can love God and our fellow men in a proper sense. God furnished an example of unselfish love, gave us the ability to love

### Cook's Cotton Root Compound

A safe, reliable, regulating medicine. Sold in three degrees of strength—No. 1, 25c; No. 2, 50c; No. 3, \$1.00 per box. Sold by all druggists, or sent prepaid on receipt of price. Free pamphlet. Address: THE COCK MEDICINE CO., TORONTO, ONT. (Formerly Kitchener.)

and inspired love in our hearts. He hateth his brother—One who truly loves God can not hate any fellow mortal. A liar—He who professes to love God and at the same time hates his brother, does not tell the truth and intends to deceive. How can he love God—Hatred in the heart renders one incapable of loving God. 21. This commandment—See Deut. 6: 5; Lev. 19: 18; Matt. 22: 37-40. "Love is the fulfilling of the law" (Rom. 13: 10).

QUESTIONS—Who was the writer of the Epistle from which the present lesson is taken? What other books did he write? What exhortation does he give in this lesson? How did God manifest his love toward the world? What is the dwelling-place of the Christian? How is our love made perfect? From what does perfect love free us? What commandment have we in the last verse?

PRACTICAL SURVEY.

Topic—Christian love regenerating society.

- I. Love.
- II. Love to God.
- III. Love to man.

John the apostle occupies a peculiar and prominent place among the twelve disciples and New Testament authors. Bethesda in his traditional birthplace. His family, though fishermen, appears to have been possessed of some means and of better connections than some of the other disciples (John 18:15). He was probably a disciple of the Baptist before being called by Christ and sustained the most intimate relations with the Master of all of the apostolic group. He is described as that "disciple" whom Jesus loved. During the tragedies

### RHEUMATISM

This is just the season when Rheumatism with its grinding pain and stiffening of joints gets hold of you. Fight it with

#### Templeton's Rheumatic Capsules

Templeton's Rheumatic Capsules bring certain relief, and permanent results. They are recommended by doctors, and sold by reliable druggists everywhere for \$1.00 a box, or write to Templeton, 149 King St. W., Toronto. Mailed anywhere on receipt of price. 66

of Gethseman, the judgment hall and Calvary he displayed greater loyalty than any of the others; and from the cross he received the commission of carrying for the widowed mother of the Saviour. He has been called the "apostle of love" because love is the controlling conception in his system.

I. Love. Love is the strongest impulse of which human nature is capable. What men will not do or endure from fear of punishment or hope of reward, they will do and endure from love. The objects of affection are clear indications of moral state. Ruskin tells us that in the last analysis "morals are matters of taste." The objects of affection exert a potent transforming influence of character. Unconsciously, but infallibly, they conform us to themselves. Love is the most unselfish and transforming impulse. It seeketh not her own, but always the honor or happiness of its object. The spirit and teaching of the lesson are post-pentecostal. John could not have written this message before the refining energies of the Holy Ghost had swept through his soul (Mark 10: 35-37; Luke 9: 51-54).

II. Love to God. To love God is at once the highest obligation and enjoyment of the creature. "Thou shalt love the Lord thy God," is the first, supreme and all-comprehensive requirement of the law. True affection is founded in esteem and can not long survive it. God's disclosure of the excellence of his being and character challenges the admiration of his creatures as it should awaken their adoration. His beneficence challenges the admiration of his creatures as it should awaken their adoration. His beneficence challenges their gratitude and should elicit their affection. God exalts man by the power of a purified affection. Our affectional nature is the stronghold of Christian experience. Only the service which springs from love is acceptable. The service of love may be wearing, but it is never hard. The value of service is not judged by its measure, but by its motive. "A cup of cold water" may bring a disciple's reward. Love always gives its best, and glorifies the commonplace.

III. Love to man. Inseparable from the first command is the second, which fixes the standard of sentiment and service toward one's fellows. The law itself is founded in love (1 Tim. 1: 5). Love to God is impossible without begetting love to man (1 John 4: 20, 21). Even enmity and injury do not exempt from the obligation. "Love your enemies." "Thou shalt love thy neighbour as thyself." Christian love is the force which must regenerate social, industrial and political conditions. Apart from it society becomes chaos. It has been proved that a Christless civilization cannot endure. W. H. C.

### WHEN I GET MARRIED.

#### Small Boys Give Their Ideas of Wedded Life.

"When I get married," he says, "which I shall not do until I can pay for a good home and the necessities of life for my wife and myself, I should go and see that no water ran through the roof and dropped on the beds. I should not like the walls to be damp. When we had been married for a bit, with a kiddie or two toddling about the house, I should soon want them to grow older, so that I should not be awakened in the middle of the night by their screams. I should be a teetotaler, shave twice a week, and smoke two ounces of thick twist a week."

Another boy sees it very simply: "I will be my own master in some things, but in other things I'll let my wife have her own way. My wife and I will have a night off every fortnight. Of course, we shall have some children." One little fellow does not believe in heiresses. "I shan't get married to a rich lady," he says, "because she will be always wanting dresses that cost a lot of money, and if her wealth grows less and less till she is poor, then I shall have to work very hard to please her. I shall marry a lady that can do housework and requires no servants—a lady who will agree to do everything I say." The palm, however, goes to a

twelve-year-old who promises to be a husband worth courting. He writes: "When I get married I shall, I hope, agree with my wife. I shall keep trying to get more knowledge of my work, then I should get better positions in my trade, and that means more money. I think that the more money you get the better it will be for the wife." "If I had any children I should try to cultivate a hobby for them. I should give them a money-box each, and allow them something per week to put in their boxes. When they had got enough they could buy what they wanted, provided it was sensible, such as a camera, fretwork, or foreign stamps, or any other hobby. I should build a shed and put them a punch-ball and a few other things in, and make it like a little 'grove' for them. Then I would put a hammock in one end of it, for wife to lie in and watch her little sonnies learn to 'play the game'." "If I had any girls I should bring them up with the boys. They could go with them on their madcap adventures, but still I should like them to cultivate that quiet dignity so characteristic of real ladies."

### INFLUENZA HAS LATER DANGERS

#### Particular Care Needed When Patient is Convalescent, Says Expert.

The influenza convalescent who has apparently recovered from the disease and is yet in a strangely weak and depressed condition should be the object of particular care, according to Dr. Louis I. Harris, director of the Bureau of Preventable Diseases of the New York Health Department. In the opinion of Dr. Harris, after care of the influenza patient is most important. The co-operation of the patient, coupled with the willingness to see that the weakness and depression are a part of the illness, though coming after the disease itself has spent its force is a big factor in effecting a complete return to full health. On the other hand, the determination to ignore this debilitated condition and to fight against it, will, Dr. Harris says, frequently bring serious consequences upon the patient.

#### AFTER EFFECTS BAD.

"The subject of the after effects of influenza," said Dr. Harris, "is one of particular interest to the scientist at the present time." "First, and perhaps the most momentous condition to be considered is the striking depression, mental, nervous, and physical, complained of by most patients. Those attacked by the disease with moderate severity are always afflicted with this depression, which should be recognized and dealt with. Those who have had mild cases of the epidemic are little affected by depression, and their quick return to health and strength gives rise to the belief that influenza is trivial. On the contrary, influenza in its after effects is anything but trivial, and calls for the application of rules of common sense and sanitation which are the fruit of years of experience.

Tonic treatment, well chosen diet, and great care in not becoming overtired or allowing the body to be chilled are necessary. Eggs may be eaten, but not more than two a day, for the average adult. Of course, it must be remembered that in many cases this disease tends to direct its force against the kidneys, and therefore we instruct patients to avoid eating a great amount of meat, eggs, or beef extract. Eggs, soft boiled, poached, or beaten, raw, are advisable in limited number. The raw eggs should always be well agitated before taking.

#### WHEN GOOD FOOD IS BAD.

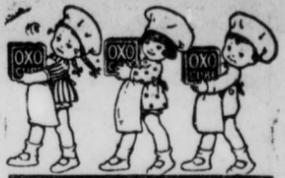

"With milk and eggs as a foundation the patient should eat good nourishing food, including meat, fish, and vegetables, simply prepared. Frying, for instance, is out of the question. Good food prepared in an unassimilable manner becomes bad food; especially is this to be noted in cases of convalescence from influenza, for the disease often manifests itself in vomiting, and in intestinal and gastric disturbances, and it is important not to weaken the digestive function by the eating of poorly prepared food, or even the best of food in ill-advised quantities. The quantitative distribution of foodstuffs should be so adjusted as not to overtax the stomach, but the patient should eat generously and frequently."

As a tonic to build up the blood and stimulate the shattered nerves. Dr. Williams' Pink Pills are unsurpassed. These pills actually make new rich, red blood, which reaches every organ and every nerve in the body, improves appetite, strengthens digestion and drives away the feeling of weariness and depression always following an attack of flu or influenza. Those who give Dr. Williams' Pink Pills a fair trial will be amply repaid by the new health and strength this tonic medicine always gives.

#### SHOCKED U. S. SENATORS.

(Ottawa Journal.) Hon. N. W. Rowell's reminder that Canada had definite status in the League of Nations which she would not forego probably came as a surprise and shock so many United States senators who had no thought that their course of action had any concern to any country beside their own.

Many a man is a decided bore who never used a corkscrew in his life.

Oxo Cubes contain the rich nourishment of prime beef in so compact and convenient a form that they are handy for use anywhere, at any time. Just a cube—hot water—and a biscuit or two—and a light sustaining meal is ready.

### The Greatest Optimist

The typical prospector for gold, still met with in the far hills and deserts, may well be taken by all men as an example and an inspiration as far as the blessings of staying hopes are concerned, says the Los Angeles Times.

"Hope deferred maketh the heart sick," says the proverb. But it is not a good proverb. No matter how long deferred a hope may be it should never be abandoned. It should never be anything but an inspiration and an incitement. Take this nomadic trip of prospectors, for instance. The typical prospector is a man who has spent perhaps the most of his life pursuing a hope that has never been realized. Yet we never find them discouraged. We never know them to end their days in despair. No matter how many their years of failure may be they will tell you that just beyond the next chain of hills or in the heart of a still unexplored desert the treasures they seek are surely awaiting them.

A most sincere and persistent man is the prospector. He believes in his quest and respects it. The little or the much that he wins by spasmodic toil he invests in his dreams. He braves the solitudes and the lonely wastes of the world to reach the goal for which he strives. Hunger, thirst and other hardships and sufferings he endures with a willing heart.

And he never despairs. That's the glory of the prospector—he never despairs.

The average man, hedged in by the traditions of towns and cities or settled in the humdrum of the country, looks upon the prospector as a queer and somewhat demented individual. We laugh at this strange fellow who is pictured to us as plodding along in the wildernesses and the sandy desolations with his pack and his burro, following the will-o'-the-wisps of fortune.

But the prospector is only doing in his way what we are doing in ours. We are following each our own dream as the prospector is following his. The only difference is that we proceed in safety and without adventure. Otherwise we are the same as the wanderer of the desert and the hills. And also we are soon discouraged and we are easy prey to defeat, while it is death alone that can defeat the prospector.

It seems to us that of all the misfortunes there are in life—and heaven knows there are many—the misfortune of hopelessness is the worst. "Only for hope the heart would die," said a poet. It was a true thing to say.

And about this wonderful thing of hope there is another thing to look at, and that is that we should always have at least one hope ahead. That is to say, we should always have something that we look forward to. Then, if what we have in hand fails us, the other thing that we look forward to will stay us.

Hope is something to be busy with. It is something of which we should accumulate a store. Always have plenty of hopes and have them so that they will reach out and last away into the years of the future.

There is really something mysterious about a hope. If you will cherish it faithfully and keep it warm in your heart you will be almost sure to sometime realize it. It is said that we are what we believe ourselves to be. But perhaps we might better say that we are what our hopes are. Since then a long-cherished hope is most likely to be realized, surely it were foolish of us to harbor hopes that will not bring us comfort and joy. Hope for the best there is—not great riches, not any material possession, but peace for the heart and a serene path for the white years of old age.

#### LONESOME

"So you have decided to marry again?" "Yes. You don't know how lonesome it is going home nights and having nobody to find fault with me."

**SIR WILLIAM'S  
WILL**

His horse was young, one he had broken in before he left Parraluna, high-bred, and as full of spirit as an Arab; but the ruffian in front of him had got a start, and Jack knew that he would have to call upon his horse to do its utmost. It was a race of greater import than the Derby, a race for life, a life so precious in his eyes that he shook in the saddle, and the veins in his temples seemed bursting.

With a word to the horse, he bent low over its neck, jockey fashion, and settled down to a swift but steady gallop, holding the horse well within his power until the moment came for the decisive rush. He gained a little, and, as he did so, he saw Clytie glance over her shoulder, and heard her cry out. A mist swam before his eyes, his lips were parched, the breath seemed to hiss as it passed through them. Once he raised his revolver and fired; but anything like an effective aim under the circumstances was impossible. The ruffian looked round as the bullet whizzed past him, and Jack fancied he could hear him laugh derisively.

Jack knew that at the bottom of the dip, down which they were descending at a breakneck pace, ran a fork of the river from the bed of which they were getting their gold. His horse would not take water readily; the time lost in forcing it through the river would give the Red Gulch man a further start. He put on the spur now; the river came in sight, shining dimly in the faint light. With his teeth clenched, and urging his horse by voice and spur, he came down the slope like an avenging god, and saw his prey climbing the bank of the river. He raised his revolver and fired again. The man swerved aside to spoil the aim, and, in doing so, jerked Clytie's horse.

It stumbled, strove to recover itself, and then fell forward. The ruffian released the bridle, turned in his saddle to shake his fist and yell a volume of oaths at his pursuer, then dashed into the water, swam across, and was lost in the wood on the other side.

In another moment or two—which seemed ages, eons of dread and anxiety to Jack—he had gained Clytie's side. Almost before he had reached her, she had struggled to her feet and stood, swaying a little, as if she were dizzy and half-stunned, and with her hand pressed to her brow, she caught

**A NERVOUS  
BREAKDOWN**

Miss Kelly Tells How Lydia E. Pinkham's Vegetable Compound Restored Her Health.

Newark, N. J.—"For about three years I suffered from nervous breakdown and got so weak I could hardly stand, and had headaches every day. I tried everything I could think of and was under a physician's care for two years. A girl friend had used Lydia E. Pinkham's Vegetable Compound and she told me about it. From the first day I took it I began to feel better and now I am well and able to do most any kind of work. I have been recommending the Compound ever since and give you my permission to publish this letter."—Miss FLO KELLY, 476 So. 14th St., Newark, N. J.

The reason this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, was so successful in Miss Kelly's case was because it went to the root of her trouble, restored her to a normal healthy condition and as a result her nervousness disappeared.

her on his arm—clutched her, rather—and pressed her to him protectively. He forgot in that electric moment their parting, the gulf that yawned between them.

"Clytie!" he whispered to her hoarsely. "Don't be afraid. You are safe, quite safe! It is I, Jack—Jack Douglas, you know! Are you hurt?"

He feared that she would faint, expected her to do so, but though she was white and trembling, she met his eyes bravely, and tried to smile.

"No, I am not hurt," she managed to breathe. "I am not hurt; but I am—I am a little frightened. I—I didn't think you would save me. Let me—let me sit down a moment." She sank on the bank, and while he stood near her, so near that he could grip her to him if she showed the least sign of swooning, she fought for breath and composure.

"Mollie, Mary!" she panted. "Quite safe!" he said, soothingly. "They are on their way to Parraluna, where you came from. They are quite safe. Will you try and stand up, so that I may see if you are hurt by your fall?"

His voice was still thick with the emotion which thrilled through every vein; but a change had crept over his manner; he was beginning to remember their parting, the reason for it. She stood up—he gave her his hand to help her—and pushed from her forehead his hair which had been blown loose by the ride in the wind.

"Where are we?" she asked, still in a dazed way. "Can we get to Mollie?"

Jack glanced at the horses. His was standing with its legs apart, almost spent; hers was hobbling, dead lame, feeding at a little distance.

"I am afraid not," he said, reluctantly. "The horses would not carry us until they have had a rest and some food."

"Then we must stay here and wait," she said, with evident distress. "And Mollie!"

"You need not be anxious about Mollie," he said; "she will know that I should come up to you in time."

"That is true," she said, simply.

They stood for a moment in silence, an awkward silence; then Jack uttered a little sound of relief; he had remembered the hut.

"There is a place near here, an outsider's hut to which I can take you. You can rest there until we can go on, or some of them come for us."

He got his horse and lifted her on to it, and, supporting her with his arm, walked beside. Not a word was spoken. Every now and then he heard her sigh and felt her quiver, as she realized all she had gone through. They reached the hut and he lifted her down and led her in.

There was a pile of sheepskins in the one corner, and he quickly made it into a rough couch.

"Lie there and close your eyes, and try to sleep," he said.

She obeyed, so far as lying there and half-closing her eyes went; but, through her lashes, she watched him light a fire on the hearth, take some food—the tinned meat, biscuits and tea which were always kept in readiness there for the visits of the outsider—from the cupboard; watched him as he went out for water, and, coming back, set the kettle to boil; and only when he turned to her, closed her eyes, and pretended to be unconscious. For there had been an expression in those eyes which she shrank from his seeing.

"Are you rested enough to try and eat something?" he asked. "You will be better if you can. Stop; stay where you are, stay and rest. I will bring you some tea."

He brought her some food, and she tried to eat; she did manage to drink the tea. Presently, without raising her eyes, she asked:

"How—how long shall we have to wait?"

"Three or four hours," said Jack, after considering. "You must try to go to sleep again, for it is a long ride, and you—you must be worn out."

"No," she said; "strangely enough, I don't feel tired. I am very strong. I was much frightened, in deadly

terror"—she shuddered a little—"but that has passed, I suppose because I feel so safe," she added, as simply as she had assented to his assurance that Mollie would know that she, Clytie, would be saved.

"I don't like to ask you any questions," he said, after a pause; "but—you, Mollie and Mary Seaton, here—I don't understand it."

A blush began to creep over her face.

"Mary Seaton came over with us—brought us; she and her husband—her name is Mary Rawdon now. She came to England—" She paused; the blush grew deeper.

"She came to England," he prompted, in amazement, his brows drawn together in perplexity.

"To tell me," faltered Clytie, her eyes downcast. "To tell me where you were."

He stared before him, then nodded as if he began to understand.

"Yes, she knew who I was. And she betrayed me," he smiled half-bitterly. "And you and Mollie came out to—to find me?"

She made no reply; silence like a dove hovered over them, a silence pregnant with vague suggestions of intense import.

"You came out to find me?" he repeated. His face had grown pale; that served for a table, his hands working restlessly, his eyes fixed searchingly, wistfully, with an eager half-doubt, on hers.

"Why?"

She tried to answer, but failed for a moment; then she whispered, as if she were ashamed of her own voice:

"She—Mary—said you were—in danger."

He rose and stood trembling, his face going from white to red, his breath coming painfully.

"You thought I was in danger; and so you came; but why?"

She raised her eyes slowly, as if the lids were heavy, and looked at him.

With a cry of "Clytie! Clytie!" he was down on his knees beside her and took her to his heart.

CHAPTER XXXI.

Now, so cleverly had Mollie and Mary Seaton worked it, that only two persons in Bramley were aware that the two Miss Bramleys had gone to Australia. It had been absolutely necessary to tell Percy, because Mollie knew very well that if he thought they were on the Continent he would most assuredly follow them, and would hunt them down, if he were compelled, in doing so, to tramp from town to town. She had to tell him to keep him quiet; but she did not tell him the cause of their journey, that Clytie was married, or that Mr. Hesketh Carton was—what he was.

Percy had at first complained bitterly of the length of Mollie's proposed absence, and it was not until Mollie, driven to desperation, as she said, had given him a half-promise that on her return she would—well, cease to laugh and jest when he should tell her that he loved her, that he became somewhat resigned. Both Lady Mervyn and he were among those very rare persons who can keep a secret; and the rest of Bramley, though rather surprised by the girls' sudden departure and the prolongation of their tour, were not at all suspicious. Exception might be made in the case of Mr. Hesketh Carton, for there were times when he asked himself whether their sudden flight and the length of their stay on the Continent had any more serious reason than that of feminine caprice and whim.

He did not suspect the truth, because nothing had occurred immediately before their departure to rouse his suspicion. Both Clytie and Mollie had been as friendly as usual on the afternoon he had called to invite them to the picnic, and Mr. Granger had not referred to the strange discovery of

Mr. Hesketh Carton, could not hear of any one receiving letters from the girls; but he had to ask cautiously, and letters might have come without his knowledge. He rebelled inwardly at this check of his hideous scheme, but he was a patient man; he could afford to wait a few weeks or months for the accomplishment of his fell designs; the prize was worth waiting for.

The picnic came off. It would not have done to have abandoned it. It was a great success, and enhanced Hesketh Carton's popularity; for he made a splendid host, and was as attentive, so altogether charming, as to win the hearts of the ladies, who, when discussing the picnic afterward, were unanimous in praise of his tact and amiability.

About this time, Mr. Garden, the member for the Bramley division, was taken ill; and as he was an old man and had once or twice spoken of resigning, the conservative party began to look round for a candidate. By a strange and useful coincidence, Mr. Hesketh Carton displayed, just at this period, a great deal of interest in the charitable and public institutions of the place; doubled his existing subscriptions, and subscribed liberally where he had not done so before. The wages at the works were increased, and Mr. Hesketh Carton went among the men with a smiling countenance, dropping a pleasant word or two whenever an occasion presented itself.

And yet he seemed quite surprised when a delegation from the party visited him and formally asked him to become a candidate. He did not jump at them, by any means, and asked for a week in which to consider their flattering proposal; of course they pressed him, and, at last, with modest reluctance, he consented.

Mr. Garden retired, and, with the usual celerity, the holdings broke out with placards inviting the electors to vote for Hesketh Carton, the Workmen's Friend.

His election address was pronounced by competent judges a model of what an address should be; and when he appeared at the largest hall in Bramley to make his first important public political speech, he addressed an immense audience, and roused much enthusiasm. His supporters were delighted, and prophesied success.

(To be continued.)

**What Prominent  
Ontario Women Say**

Tilsonburg, Ont.—"I found Dr. Pierce's Favorite Prescription very beneficial during pregnancy. I felt quite poorly, was nauseated and sick, could not eat anything and I was extremely nervous and weak. I took 'Favorite Prescription' and it soon stopped the nausea, my appetite returned, I also my strength and I was soon feeling fine and strong. My baby was strong and healthy and has always been so. I consider 'Favorite Prescription' a great help to the expectant mother and am glad to recommend it."—MRS. AMOS MILLS, Box 238.

**A HAMILTON WITNESS**

Hamilton, Ont.—"A few months ago I was stricken down and was confined to bed about ten days. My strength all left me. It was my first illness since a child. I lost five pounds and felt awfully weak afterward. I could hardly do my work. I was advised to try Dr. Pierce's Favorite Prescription in tablet form. I tried a couple of bottles and before I knew it, I was well and strong and had gained 9½ pounds. I can recommend Dr. Pierce's Favorite Prescription to build one up."—MRS. E. MARTIN, 397 Dundurn St.

After suffering pain, feeling nervous, dizzy, weak and dragged down by weaknesses of her sex—with eyes sunken, black circles and pale cheeks—such a woman is quickly restored to health by the Favorite Prescription of Dr. Pierce. Changed, too, in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. It is purely vegetable, contains no alcohol.

His supporters were delighted, and prophesied success.

(To be continued.)

**The Lobster  
Disappearing**

In the early days of the lobster industry only the large ones were caught. These were so abundant that the young ones were ignored. A single lobster would often fill two or three cans. To-day it takes several of the average size to fill a can.

Even in the British provinces, where the catching industry thrives the best, most of the large lobsters have been killed. One rarely sees or hears of a big lobster now, and a fifteen pounder would be a curiosity. There is a lobster preserved in the collection of crustacea at the Smithsonian Institution which weighed eighteen pounds at the time of its capture. Reliable records show that specimens weighing from thirty to thirty-five pounds have been captured. Such a monster would measure nearly five feet in length, including the claws, and prove a pretty formidable antagonist for one in the water.

**HATCHING THE BABY LOBSTER.**

The work of hatching the young at the different stations is now in full progress. The female breeds only once in two years, but she makes up for this seeming loss of time by producing a great number of eggs. It is estimated by the fish experts at the hatcheries that a ten-inch lobster will produce in one season about 10,000 eggs and a nineteen inch nearly 75,000. It does not require at this rate

a great number of female lobsters to yield several million eggs a year.

The female attaches these eggs to her until they have hatched out, and she is known in local parlance as a "berried hen" lobster. It was not many years ago that these female lobsters were caught; and sold as much for their eggs as for their meat. The eggs were considered as great luxuries as the roe of a shad is to-day. This greatly helped to decrease the supply. As saucers for salads the eggs of the lobsters were of great value, and expert cooks eagerly sought them. The passage of laws both in the New England and Canada making it punishable to capture or sell decorated lobsters has made it impossible to obtain these delicacies in this country.

In the lobster hatcheries the eggs are put in hatching jars, where they are kept in water heated to the proper temperature until they hatch out. The young creatures when first hatched are only from a third of an inch to an inch long, and for a time they swim about as ordinary fish. They are turned loose when an inch or two in length and then begin their perilous career in the waters of the coast, where innumerable dangers beset them. A large percentage of them never pass beyond the stages of infancy, and the few which survive this period are then compelled to face the new dangers incident to the shedding process. Every now and then the crustacean finds that it is outgrowing its shell, and it proceeds to shed it, as a crab, and take on another one. This process is a long and dangerous one, and for a considerable period the creature is weak and helpless. Every part of the armor must be removed, and in the process the creature becomes thin and emaciated, and fishermen do not consider them fit to eat. Before the old shell has been discarded a new thin one has been provided, but it requires time to make it of much protective use.

**PRIDE JUSTIFIED.**

Hokus—Gertie Gotrox prides herself on her memory for faces.

Pokus—And well she may. I was engaged to her last summer at the shore, and to-day she actually recognized me on the street.—Judge.

**NO DOUBT.**
