AYER'S PILLS.

AYER'S PILLS.

The following statement from James R. Chilton, M. D., of New York city, after a therough examination of the subject, leaves no doubt in any reasonable mind of the intrinsic virues of my preparation, or its value as a reliable medicine. Dr. Chilton is known throughout the whole constry as one of the oldest and best analytical chemists it contains; and his high character, both as a chemist and a man, is certified by distinguished persons, who are known to the people every where.

J. C. Ayer, M. D., Lowell, Mass. Dran Sin; I have examined your Capitalatic Plles, and become a thoroughly acquainted with their composition. It is a new and judicious combination of materials posse-sing points of excellence which, I believe, have not been obtained before.

As a Cathactic for general use, they are far asperier to any which have hitherto fallen under my notice. They do not contain any mineral substance whatever; and, consequently, all objections urged against seek ingredients are obviated.

The skilful method of separating the active principles of which these Pills are composed from the insert vegetable matter is meritorious, and should command special attention, and win for the Pills the liberal patronage of the public. Me have known Dr.U. R. Chilton for many years as a gentleman of the highest respectability, and a clemist in whom we have utmost confidence.
