

\$2.50 PER ANNUM, IN ADVANCE.

NO. 16.

NOTICE OF SALE.

TO BE SOLD AT PUBLIC AUCTION, on SATURDAY, the 17th day of April next, a given clock in the forenoon, at the Market Square, in the Town of St. Andrews, County of Charlotte, for payment of debts of the late Mary E. Clark of St. Andrews, in the County of Charlotte, Widow, deceased, in consequence of a deficiency of the personal Estate of the said deceased, for that purpose; pursuant to a Licence obtained from the Court of Probates, for said County:

The Land and premises following, that is to say—a certain piece or lot of land, lying and being in the Parish of the Division of the Town Plot of St. Andrews, being part of the old Gaol Block, so called, having a front of eighty feet on Queen Street, and running parallel with Frederick Street, one hundred and sixty-four feet; with the dwelling house thereon.

Dated at Saint Andrews, the 28th day of February, A. D. 1880.

PATRICK BRITT, Executor.

Assessors Notice.

THE undersigned having been appointed Assessors of Rates and Taxes for the Parish of St. Andrews, hereby give notice thereof and to the Assessors within thirty days after publication of this notice, true statements of their property and income liable to be assessed.

And further, the Valuation List will be posted at the small building between the stores of Capt. Green and Balcom, King Street, in pursuance of the provisions of the Assessment Act of 1875. Dated this 18th February, 1880.

J. R. BRADFORD, Assessors of Rates.
C. O'NEIL,
J. D. GRIMMER.

EQUITY SALE.

There will be sold at the Weigh Scales, in the Market Square, St. Andrews, in the County of Charlotte, in the Province of New Brunswick, at twelve o'clock noon, on FRIDAY the twenty-eighth day of May next, pursuant to the decretal order of the Supreme Court in Equity made on the twenty-seventh day of January last past, in a certain cause therein pending, wherein Joseph Hamblett and Eliza Hamblett are Plaintiffs, and Warren DeWolf, Maggie B. DeWolf, Emma DeWolf, William B. Hammond and Louisa Hammond his wife, Benjamin F. DeWolf, Lucy L. DeWolf, Charles R. DeWolf, Kate B. DeWolf and Annie Mable Porter DeWolf are Defendants, with the approval of the undersigned, as sister, the following mortgaged lands and premises described in the Plaintiff's bill:

"1. That certain piece or parcel of Land, situate lying and being in the Parish of St. Andrews, in the County of Charlotte aforesaid, bounded and described as follows—being the South East part or moiety of the Berrington farm, so called, commencing at a cedar post placed on the dividing line between land owned by Thomas Berry, and the Southeastern part of said farm at a distance of seven rods in a southerly direction, along said line to the North-east corner of the said Thomas Berry land, thence in a South Easterly direction along said Thomas Berry's line to low water at Katy's Cove (so called), thence along the bank or shore at low water in a north easterly direction, being the Railroad to low water mark, thence following the course of the shore at low water mark, to the south-eastern line of land owned by Richard M. Andrews, Esquire, and thence along the said land bounded line to the place of beginning; together with all the buildings and improvements thereon, subject however to certain covenants and reservations with regard to a road, made and to be made through the said piece of land to the railroad, contained in a deed made by Richard M. Andrews to the said Howard Trenholm, bearing date the twenty-seventh day of May in the year of Our Lord one thousand eight hundred and fifty seven, as by the said deed reference thereto being had, will more fully appear." With the exception of that portion thereof conveyed by deed bearing date the fourth day of March, in the year of Our Lord one thousand eight hundred and fifty eight, by Howard Trenholm and Elizabeth his wife, to Wellington Hatch, and described therein as:—

"All that piece or parcel of Land or Water-Lots and privilege, situated at Katy's Cove, so called, in the Parish of St. Andrews, bounded as follows: Commencing at the Northern extremity of Katy's Cove Bridge, so called, thence Easterly to low water mark, thence Northerly following the shore of Passamaquiddy Bay at low water, until it meet the prolongation of the dividing line of land owned and in the possession of the said Trenholm and Richard M. Andrews, thence easterly along said line until it strikes the line of the St. Andrews and Woodstock Railway, and thence Southerly to the place of beginning aforesaid; and premises hereby conveyed, to include all the Water Lot and land and privileges lying to the eastward of the Railroad line aforesaid."

For terms of Sale and other particulars, apply to the Plaintiff's Solicitor.

Vick's Illustrated Floral Guide, a beautiful work of 100 Pages, One Colored Flower Plate, and 500 Illustrations, with Descriptions of the best Flowers and Vegetables, with prices of seeds and how to grow them. All for a FIVE CENT STAMP, issue Nov. 26th. In English or German. JAMES VICK, Rochester, N. Y.

HOLD ON!

We will surprise you with the
NEW AMERICAN SEWING MACHINE,
THE ONLY SEWING MACHINE WHICH HAS A
Self threading Shuttle,

being ready to work as soon as the bobbin is placed in it. If the machine accidentally turns backwards it does no harm, and breaks no thread or needles. The construction of the shuttle race is such, that no wear comes on the shuttle as in other machines; consequently, the shuttle does not wear sharp and cut the thread. Also the wearing points of the machine are adjusted on steel centres, thereby avoiding friction, and adding greatly to its durability.

EFFICIENCY.

The feed can be quickly raised or lowered to adapt it to thick or thin material; also the length of stitch can be regulated from above, while the machine is in motion. The tensions are easily, evenly, and perfectly adjusted, the under tension being self-regulating, and no threading up required in the shuttle. The underthread is drawn from a short deep bobbin, giving a perfectly even tension, never breaking the thread, making the Lock Stitch, the strongest and best. It runs lightest of any shuttle machine. Makes the least noise. Has self setting needle. Has the most room under the arm. Never skips stitches or breaks threads. Is most easily learned. Can be instantaneously adjusted to work from No. 300 to No. 10 cotton. Is thoroughly made in all its parts of the best material, and every machine is warranted by the Company and its Agents.

IT IS SOMETHING WONDERFUL,

Attractive and useful. Beautiful in design, simple in construction, and perfect

IN OPERATION.

Examine these celebrated machines before purchasing elsewhere. They possess more good points than any other machine in the market; in fact, they are just what we claim for them, the

BEST IN THE WORLD.

These machines may be seen in J. M. HANSON'S Shoe Factory.

THE SECRET KEY TO HEALTH.—The Science of Life, or Self Preservation, 300 pages. Price only \$1. Contains fifty valuable prescriptions, either one of which is worth more than ten times the price of the book. Illustrated sample sent on receipt of 6 cents for postage. Address, Dr. W. H. Parker, 4 Bullfinch Street, Boston, Mass.

A MAN OF A THOUSAND

When death was hourly expected, all remedies having failed, and Dr. James was experimenting with the many herbs of Calcutta, he accidentally used a preparation which cured his only child of Consumption. His child is now in this country, and enjoying the best of health. He has proved to the world that Consumption can be positively and permanently cured. The Doctor now gives this Receipt free, with full particulars, showing that every one can be his own physician and prepare his own medicine, only asking that each remit two green stamps to pay expenses. This herb also cures night-sweats, nausea at the stomach, and will break a fresh cold up in twenty-four hours.

A CARD.

To all who are suffering from the errors and indiscretions of youth, nervous weakness, early decay, loss of manhood, &c. I will send a receipt that will cure you, FREE OF CHARGE. This great remedy was discovered by a missionary in South America. Send a self-addressed envelope to the Rev. JOSEPH I. LEMAY, Station D, New York City. feb12 ly.

Nothing short of Unmistakable
Results can be obtained upon the use of a course of AYER'S SARSAPARILLA. It is a compound of the best vegetable ingredients, with the addition of Potassium and Iron, and is the most effective of all remedies for scrofula, mercurial, or blood disorders. Uniformly successful and certain in its remedial effects, it produces, and complete cures of Scrofula, Sores, Boils, Humors, Pimples, Eruptions, Skin Diseases and all disorders arising from impurity of the blood. By its use, it always relieves, and often cures Liver Complaints, Female Weakness and Irregularities, and is a potent restorer of vitality. For purifying the blood, it has no equal; it tones up the system, restores and preserves the health, and imparts vigor and energy. For every use it has been in extensive use, and is today the most available medicine for the suffering sick, every where.

On the Plaza, Santa Fe.

Brnest Ingersoll, in *Harper's Magazine*, gives this picture of life on the plaza at Santa Fe, New Mexico: Three times a week the military band plays in the plaza at sunset, and I accept the invitation of General Edward Hatch, that bravest of cavaliers and most genial of gentlemen, to join him in a cigar at headquarters, and listen to the music. The benches on the plaza soon fill up, and the portales that form a complete colonnade over the sidewalks around the whole square become populous with pleasure-hunters. It is a tri-weekly acquaintance day for the whole town. A noisy train of long-horned, thin-bodied oxen, dragging trailed wagons piled high with freight from the railway terminals, comes round the corner, and stops to listen before unyoking for the night, the whacker's long whip cracking like pistol shots as he lashes his unwieldy beast into position. Half a dozen donkeys, loaded with immense burdens of fagots cut in the foot-hills, are allowed to stop their peregrinations in search of a customer, and make squealing remarks to the rival burros of the grass merchant, whose boy is kept busy with his club in protecting the aged parchment Mexican whose skin is much the color of his shoes, and begs us, or at least, senores, the wild plums that lie in red and saccharine masses under the lid of his home-made basket. Then an Indian, tall, straight, grinning from under hair "banged" like a Saratoga belle's, saunters up, and thrusts from under his striped blanket a bonny hand and arm, with a "How?" that seems to come from the heels of his beaded moccasins. He tears from his bundle a fragment of coarse wrapping paper, sprinkles upon it some tobacco, and calmly begs a light from the general's cigar. It is given (dignity amounts to nothing with an Indian in such matters), and the aborigine moves on to range himself with half a dozen other shapeless figures in stripes and checkers and zigzags of Navajo blanket, who lean upon the fence, and keep time, to the quickstep with their active toes.

Everywhere are troops of women; and just before us one of the acknowledged demi-monde sits chatting with a young mother, nodding to acquaintances, and amusing the little laughing nut-brown babe, without any one lifting an eyebrow. A woman must be very far gone indeed before Mexican society (barring a slight few) will ostracize her. This girl is dressed in an attempt at American style, and loses by it. Her hat explains what becomes of the remnants of supersaturated and culled-out stock which must be left over from each season. The shops of Santa Fe are a museum of ancient styles in bonnets and hats—relics of fashions which expired before the war, and evidences of an ingenuity in bad taste that could never be equalled by a design to produce horrible effects. It is the country people who buy them. What do they care for fashion at Santa Domingo or Abiquia? I am inclined to believe that the reported grace of motion traditional in speaking of the Spanish has not been wholly lost in their American descendants. In their gait, in their attitudes (when not sitting on their heels), in the use of the ever-present fan, and the motion of the slender hand, there is a natural and familiar grace not characteristic of American ladies, and utterly lacking in the peasantry of the Teutonic and other Northern races. What has often been remarked of the senoritas of old Castile is still true of the young women of Santa Fe.

In the Wilds of Guiana.

After passing the Rappi rapids we saw our first cayman, a particularly stout fellow, some fifteen feet in length. He kept swimming on his course without the slightest notice of us. At Apoterie, at the junction of the Essequibo and Rupununi, the old chief, Joseph, keeps a perfect menagerie of parrots, macaws, toucans, trumpet-birds, man, red-gulls, monkeys, dogs, scorpions, turtles, sloths, ducks and fowls, all apparently quite tame, and roaming about as if they had no wish to leave the spot. I here purchased seven ripe bananas for a fish-hook. Coborowos, a kind of sand-fly, and mosquitoes troubled us grievously on our course up the Rupununi. The former bit viciously during the day, and the mosquitoes had their innings at night. I gave a shirt to each of my Indians for their protection against the blood-sucking and blistering coborowos, but their legs were still exposed. For myself, I was compelled to put on a pair of trousers. This was an exceptional proceeding on my part, for until we came to the Rupununi I had been able to revel in the comfort of being free from these and sundry other articles of conventional attire. On the second night of our being in the Rupununi, a few hours after we had retired to rest, an immense tree close by us broke and fell, causing a most appalling crash in the still night. My Indians imagined that an evil spirit had done it, and they were carrying a white man into their country, and that if the spirit did not behave himself better the white man would take dire revenge. This species of superstitious regard for the white man's prowess is so much for the convenience of travelers that I confess I should be sorry to see it dispelled. The evil spirit, if such there was, obediently left us, and quietness came back. It was a lovely, balmy morning, a soft breeze just stirring, and if it had not been for the mosquitoes, existence just would have been perfectly placid; without question "life" — "worth living."

FARM, GARDEN AND HOUSEHOLD

Notes for the Farm.

Rack-feeding of horses is wasteful. The better plan is to feed with chopped hay from a manger, because the food is not then thrown about, and is more easily chewed and digested.

Oats supply more nourishment and flesh-making material to horses than any other food, but oats alone are not conducive to the best results. Mixed food is best.

To cure galls on the shoulders of horses: At morning, noon and night wash the shoulders with water, and apply thoroughly with a feather six drachms of iodine dissolved in a half pint of alcohol.

It is essential that leather should have light. In the care of harness do not inclose in a dark closet or room. Of course harness should be oiled three or four times a year, first washed with soap and water.

The most satisfactory results with bees may be expected if abundant stores of honey can be found within two miles. They will work more freely upon blossoms at some little distance from the apiary than upon those close by.

A cow that has accidentally eaten her fill of meal should be kept in the stable, and not allowed to drink. As soon as discovered she should be given a pound or two of Epsom salts, repeating the dose till a movement of the bowels is obtained.

A market gardener living about eight miles from Boston on a piece of land less than two acres realized, in 1874, from the products of his farm \$938.91. This is more than is secured from many farms in this country of many acres in extent.

To give delicacy of flesh to chickens make their principal food for a week or ten days before killing barley meal moistened with milk. Alternate with Indian meal, scalded with either water or milk. During this process keep the chicks confined in a darkened room.

Fasten a short piece of a log-chain, say five or six links, by means of a light strap, to his leg just above the knee (in the stable, of course), and see how quickly that pawing horse will leave off the habit. In most cases a few days will be sufficient to effect a cure.

Good things to have handy where there are horses: White lead, for bruises and breaks in the skin, saddle galls, etc.; bathing whisky, with about two ounces of turpentine, two ounces of kerosene and a little camphor, for sprains, stiffness, etc. Leaf lard for cuts. Coal oil applied to a slight sprain is also good.

Dr. Heliogel experimented with the different elements required in plant growth by putting clear sand into boxes, and then applying fertilizing matter, and found that the quantity of water applied had much to do with the growth of plants. In the sandy soil which he experimented with the largest yield of rye, wheat, oats and barley was obtained when the soil held steadily ten or fifteen per cent. of its weight in water. On increasing this proportion the straw in some cases was heavier, but the grain was reduced in quantity.

Young Fruit Trees.

The subject in reference to young apple trees is specially applicable, and we venture an opinion that, were the early years of these trees better attended to, the troublesome blight would in all probability be not so bad. Thus, in preference to so much knife work, young trees of these should be disbudded immediately they show signs of pushing, and instead of merely rubbing them off, they should be close pared with a sharp knife, thus preventing the possibility of lateral buds pushing forth. Providing the stem is tall enough, a limited number of buds alone should be allowed to push forth. These, of course, will form the main branches of the tree, and in all cases the terminal bud should be cut off, so that there may be no central main branch. The laterals, in course of time, will sufficiently fill up the center space.

Then, as the lateral main branches expand and again put forth other laterals, these should be again disbudded, and care taken that buds having a tendency to produce low branches should be carefully pruned, as of a surety if left they will only have to be cut away at a future period.

In the way of stakes to young trees, the question is whether the conical rule is the right one—that is, having staking one or two feet beyond the leading lateral branches, and often, as has been observed, causing a very serious chafing.

Our opinion is that if the main branches are to start at four feet from the level of the ground the top of the supporting stake should just be under the branches, thus giving all necessary support to the trunk, and at the same time allowing free play to the branches, which scarcely, under no chance or possibility, can receive any support from the stake. The main lateral branches should head out in equal distances—a process that may be easily managed by proper disbudding.

Then, if the trees are to be kept dwarfed, the laterals may again be stopped, so that the tree may form what is termed a fine head. The question whether fruit trees, of whatsoever kind they may be, should be tall standards or dwarfs may be decided in respect as to whether the situation is exposed or sheltered. We can see no harm, but much good, in letting trees attain a fair altitude in sheltered situations. The produce will certainly be far more abundant when the trees attain to moderate age, while the quality will certainly be

equal to that upon such as are too closely pruned.—S. M., in the *Farmer (Eng.)* *Medicine.*

POTATOES ROASTED UNDER MEAT.—Half a loaf large potatoes; drain the water, put them into an earthen dish or small tin pan, under meat roasting; baste them often with the drippings; turn them, to brown nicely on all sides; take them up in a separate dish.

OLD-FASHIONED TAPIOCA PUDDING.—Two eggs, one quart milk, one cup tapioca; spices of nutmeg and cinnamon to taste; also sugar and bit of salt, and small teaspoonful of butter, melted. Wash and soak the tapioca in very little water till rather tender; then put it in the milk, and place on back of the stove and soak one hour; then melt butter in dish and pour in the beaten eggs, milk well sweetened, and spice; bake one hour quite slowly.

SIMPLE AND DELICIOUS MUFFINS.—One quart flour, one teaspoonful salt, half gill yeast, one pint warm milk, less two tablespoonfuls; mix at night, and beat until light; in the morning drop the well-risen dough in buttered cups.

CHICKEN CREAM SOUP.—Boil an old fowl with an onion in four quarts of water until there remain but two quarts. Take it out and let it get cold. Cut off the whole of the breast and chop very fine. Mix with the pounded yolks of two hard-boiled eggs, and rub through a colander. Cool, skin and strain the soup into a soup-pot. Season; add the chicken and egg mixture; simmer ten minutes and pour into the tureen. Then add a small cup of boiling milk.

Arctic Expeditions.

The following expeditions have been sent to the Arctic seas during the present century by European governments and the government of the United States: In 1820 the Russian government sent two expeditions to explore the regions north of Siberia. In 1818 the British government sent Captains Ross and Parry to discover the northwest passage, and Captain Buchan and Lieutenant (afterward Sir John) Franklin to reach the North Pole. In 1819 it sent Captain Parry to explore the regions north of Hudson's bay; in 1820 it sent Sir John Franklin on a land expedition to explore the north coast of America; in 1821 it sent Captain Parry to explore the regions north of and around Hudson's bay; in 1823 it sent Captain Parry again; in 1824 it sent Captain Lyon via Hudson's straits; in 1825 it sent Sir John Franklin on a land expedition via the Mackenzie river; in 1825 it sent Captain Beechey via Cape Horn and Behring's straits; in 1827 it sent Captain Parry via Spitzbergen to reach the pole; in 1823 it sent Lieutenant Back on an overland expedition through the Hudson's bay territory; in 1836 it sent Captain Back to complete the survey of portions of the coast line north of Hudson's bay; in 1845 it sent Sir John Franklin to search for the northwest passage; in 1847 it sent out three expeditions to search for Sir John Franklin; in 1850 it sent three other search expeditions; in 1852 it sent Sir Edward Belcher in command of five vessels, to search for Sir John Franklin; in 1852 it sent Captain Inglefield to search for Sir John Franklin, and in 1855 it sent Captains Nares and Stephenson to reach the pole via Smith's sound.

In 1869 the German government sent out an expedition toward the North Pole in command of Captains Koldewey and Hagemann. In 1872 Austria sent out an expedition in command of Lieutenants Weyprecht and Payer, to reach the pole via Nova Zembla. In 1871 the United States sent out Captain Hall in the *Polaris*, via Smith's sound.

During the same period a large number of private expeditions to the Arctic seas have been fitted out in this country and in the north countries of Europe, and many expeditions which received only partial aid from government sources. Among these have been the expeditions of De Haven, Kane, Hayes and Hall, from the United States, and those of Professor Nordenskjold, from Sweden. Among the results of these various expeditions are the following: The discovery of the magnetic pole, which proved so valuable to commerce and navigation; the discovery of new species of birds, animals and fishes, of commercial and scientific value; the discovery of new minerals, some of which do not exist elsewhere; interesting studies in ethnography and kindred sciences—a great increase over knowledge of magnetism, electricity, meteorology and of ocean currents; the discovery of new whaling grounds, notably by Dr. Hall, by which millions of dollars have been added to the commerce of the United States; the discovery and survey of the vast territory lying north of the American continent; the discovery of Francis Joseph Land and Wrangel's Land north of Europe and Asia, and the survey of the northern coast line of these continents.

When a man in a Vermont grocery

store was sitting upon the edge of the counter, and his feet slipped and he raked the whole length of his back on the counter's edge and sat square down in a bushel basket of eggs, which stood right where he could miss it, the grocer was horrified and exclaimed: "Was it an accident?" and the victim replied: "By crissum, sir, if you insinuate that I skinned my back and got myself into this mess on purpose, I'll jam your head into the remains of those eggs!"—Boston Post.

A poet sends us a spring ode beginning:

"I love to smell the cowslip." Well, if the cow will stand it, go ahead and smell of her lip. We don't care.—Boston Post.

Eaton, a little town in Gilson county, Tenn., boasts a citizen who is poetmaster, mayor, justice of the peace, Sunday-school superintendent, newspaper correspondent, worshipful master in the masonic lodge, elder in the church, leader of the choir, cotton speculator, extensive farmer, deals largely in thoroughbred chickens, imports fine grades of wheat, runs a reaper and thrasher, and is a professional mule trader.

The tunnel through the Alps on the Simplon route, now favored by the French engineers, would be twelve miles long, and could be built, it is thought, in seven years.

Stop coughing at once by the immediate use of Dr. Bull's Cough Syrup; 25 cents a bottle.

In Powder Form. Vegetine put up in this form comes within the reach of all. By making the medicine yourself you can, from a 50c. package containing the bark, roots and herbs, make two bottles of the Liquid Vegetine. Thousands will gladly avail themselves of this opportunity, who have the convenience to make the medicine. Full directions in every package.

Vegetine in powder form is sold by all drug, and general stores. If you cannot buy it of them, enclose fifty cents in postage stamps for one package, or one dollar for two packages, and I will send it by return mail. H. R. Stevens, Boston, Mass.

Prevent crooked boots and blisters of feet by wearing Lyon's Patent Heel Sufferers.

Consumption Cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure for Consumption, Bronchitis, Catarrh, Asthma, and all throat and lung affections, and a positive and reliable cure for Nervous Debility and Nervous Complaints, after having tested the remedy in thousands of cases, has felt it his duty to communicate the formula to the public, and send free of charge to all who desire it this recipe, in German, French, or English, with full directions for preparing and using. Sent by mail by enclosing with postage stamp, this paper. W. W. Slick's Low Power Book, Rochester, N. Y.

How to Get Sick.

Expose yourself day and night, eat too much without exercise, work too hard without rest; doctor all the time; take all the vile nostrums advertised; and then you will want to know

How to Get Well.

Which is answered in three words—Take Hop Bitters! See other column.—*Examiner.*

When exhausted by mental labor take Kidney-Tonic to maintain healthy action of all organs.

Cured Scrofula.

HOW TO REDUCE YOUR DOCTORS' BILLS.

66 BARKER ST., East Boston, Mass.

Sept. 16, 1878.

Mr. H. R. Stevens—Dear Sir: My little daughter Stella has been afflicted a long time with Scrofula, suffering everything I employed different physicians in East Boston, but they helped her none. I bought some of your Powder Form Vegetine, and my wife steeped it and gave it to her, and according to the directions, and we were surprised in a fortnight's time to see how the child gained in flesh and strength. She is now gaining every day, and I can cheerfully recommend your remedy to the best we have ever tried.

Respectfully yours, J. T. WEBB.

Vegetine is Sold by all Druggists.
