The way of the legitimest party. Mr Burthelenry has lately is used a Circular to the Departments, in which the sails Frince of Evocator formally and absolutely condenns the system of an appeal to the French sequences in success of the great national principle of heneditary monosurely. The document has given great offerce on Mr. do in Larochepaquelin and his followers. Mr. do in Larochepaquelin and his followers of letter to the papers; in which is abjust, and in the connection with the Legitimus party, but which is not seen and the solid preserve in allence the political symbol which has bithout been the faith of his whole life." I amped, surprised that the French Government has adopted the views I took has week respecting the death of Mr. Gale, the Eronatal; and has interdicted any obe from henceforth as conding in a balloon except for a accentific purpose. It is, perhaps, an arbitrary interference with the liberty of the subject to abrogate his privilege to put an end to his existence in the way to may most aspire to, but if it checks the disposition to winness these dangerous spectacles on the part of the "mattlion," few reflecting persons will complains.

The way in the Durhien has not assumed any

ed in the public journals. That on the Great Western, which was occasioned by a horse-box having been placed on the rait, as as to endanger the lives of the travellers in a large excursiontrain, has caused a great deal of interest. Under the cifrumstances, no blame seems to be attributable to the principal railway authorities; a policeman, however, has been sent to prison for two months for neglect. The calamity has not caused any depression in the value of the property. The recent accident on the Great Northern caused the destruction of three engines of very great value. It was generally expected that some distinguished Member of the Bar would eventually be needed Recorder of the city of London, in liter of picture does the miserable and devastating contest present. The trade and agriculture of a fertile and flourishing country are stepped, and its insub-tants involved in the greatest suffering, merely because a band of agitators want to range themselves under the black and yellow fing of Germany. The Duchies have always gone on prosperously under Denmark, enjoying every rational provilege, and facessing in importance; what then have they to hope for in the event of their present effort being successful 1—Absolutely nothing. It was the phantom of German unity that first blew the alumbering embers of discontent into a fame, and now that the phantom has disappeared, the fire still rages on. The unseemly dispute has had a serious effect upon the trade of England more than one large mercantile farm in Hull have no been absolutely ruined by its direct beauting has had a serious effect upon the trade of Engine's more than one large mercantile firm in Hull having been absolutely ruined by its direct beating upon their transactious, and it is only fair to suppose that the embarrassments of the, Holstein merchants have been of a more serious character. The people of Hesse Cassel seem to be provokingly quiet, now their Elector has run away. I do not much feer that Austria and Prussia will come to blows at this affair. It is, however, most embarrassing to the Potentates as well as the people of Germany.

This sentence is constantly in the mouth of every person, in order to explain certain complaints. Those who use it often, we think, have but a faint idea of its precise meaning. We will offer an explanation, which we believe to be the opinion of a majority of the most hermed physicisms. A person, for instance, has been over exering any persicular set of muscles—of the throat, from visient speaking—of the losis, by too much stooping or bending, or those or any other part of the body: these garts or muscles are, consequently, weakened and relaxed, sud become a fair prey for any disease. The person who has been thus acting accidentally or otherwise, exposes himself to the cold air, the perspiration immediately ceases, and the blood, which had been but just move circularing rapidly throughout the surface of the body, is regelled invaridly, and is sure to settle in those parts which have been previously wearied and reinxed. Here, then, we have an accumulation of blood, a congestion, which gives rise to all the pain and stiffness attendant upon such complaint. When this takes place in the throat, we have what is called Sore Throat; when in the losis, Lambugo is Stif Back; when in the chest, Picariay. We also have it in the shoulder-blade, sick, and other parts.

A BAD COUGH CURED IN TEN MINUTES, Mr. Rigdon, of Brooklyn, the celebrated Church Stoger and Organ-Player, on the night of the 10th of December was stacked with a severe fit of condition—so that he coughed from 9 orleck until 12 o'clock, P.M., without three minutes intermission. One of the Clerks of Radway & Co., who sleeps in the next reom, got up and gave him a tea-spoonful of the Relief internally, and bathed his throat, neck, and chest; in a sloo saturated a piece of flew seconds the congling ceased, he could expectorate freely, and raised with perfect case a great quantity of phegan. The Relief instantly soothed the tritation of the throat, and removed the inflammation from the lungs, and gave free action to them, produced a free and copious perspiration of the throat and chest; and in ten minutes he was entirely free from pain, and sunk into a sound and pleasant sleep. In the morning he was free from hoarseness and cough, and has not been troubled siner. Let every individual who is troubled with a "cough, sore throat, influenza, or hoarseness, parsue the same plan, and we's wail warrant them a speedy cure.
