William West, of Willow Point, near Nelson; Octavius Bentley Neve Wilkie, of Trout lake, and Major George E. Barnes, of Westholme.

To be chief constable for the Kootenay police district, and chief licence inspector for the Ymir and Ainsworth licence districts, in the place and stead of William Howard Bullock-Webster, resigned, William J. Devitt, of Trail.

To be a stipendiary magistrate within and for the county of Kootenay, and to have jurisdiction under the Smail Debts Act in and for the city of Nelson and the Ymir electoral districts, William Howard Bullock-Webster, of Nelson.

Old Country Man Writes Interest-

william Howard Bullock-Webster, of Neison.

To be registrar of voters for the Nelson city electoral district; mining recorder for the Nelson mining division, with subrecording office at Ymir, from July 15th, 1907, constable Johm A. Fraser, of Ymir.

The resignation of William Howard Bullock-Webster as chief iteense inspector for the Ymir and Alnsworth license districts, has and Alnsworth license districts, as an an accepted.

The following write-up of the fruit and item to the Winning recorder for the Nelson mining division, with subrecording office at Ymir, from July 15th, 1907, constable Johm A. Fraser, of Ymir.

The resignation of William Howard Bullock-Webster as chief icense inspector for the Ymir and Alnsworth license districts, has an an accepted.

The following write-up of the fruit and flower exhibit sent to the Winning recorder for the Nelson division of West Kootenae, and flower exhibit sent to the Winning recorder for the Nelson division of West Kootenae, excepting the former Slocan ard flower exhibit sent to the Winning and taste of an amateur goes, perfect.

The following write-up of the fruit and flower exhibit sent to the Winning recorder for Winning and flower exhibit sent to the Winning and the Winning and flower exhibit sent to the Winning and flower exhibit sent to the Winning and taste of an amateur goes, perfect.

The registrar of births, deaths and marriage and the Winning and taste of an anal taste of an anal taste of an anal tent with the pating are almost in the Spown as being good fleatu the attendants in charge had a very busy time answering the enquiries to from the people that surrounded it.

One reason why the exhibit of the livictoria Development and Tourist association is attracting so much attention is the prevalent interest in British to Columbia fruit lands. But the exhibit is in itself has special attractions. Mr. Cuthbert claims that some of the old is English shrubs grown in Canada are fexhibited for the first time in Winnippeg. Whether this is the case or not many people appear to take quite and interest in them. The eye, however, cannot resist the luring colors of the princip fruit and the fresh flowers. Each of Ymir.

The resignation of William Howard Bullock-Webster as chief constable for the Kootenay police district, and as chief license inspector for the Ymir and Ainsworth license districts, has been seen seented. consider the serious districts, has been accepted.

The resignation of Edward Albert Crease, of Nelson, barrister-at-law, as a stipendiary magistrate for the county of Kootenay, and as a magistrate under the Small Debts act from Juy 15, 1907, has been accepted.

In accordance with the Bureau of Inse the North Edward of Examiners, duly appointed under the act, met and held examinations at Victoria, S. E. C., on May 25, 1907, and following days.

Beging an Englishman, the writer's exist of such meeting and examinations of the old familiar shrubs common to exitificates of efficiency as assayers have been issued to the following selection 2, sub-section 2, sub-section 3, sub-section 3, sub-section 4, sub-section 5, sub-section 5, sub-section 6, sub-section 7, and following days.

Notice is given that the district formerly known as the Nicola licenses district and added to the following the sub-section 1, sub-section 1, sub-section 2, sub-section 2, sub-section 2, sub-section 1, sub-section 2, sub-section 1, sub-section 2, sub-section 3, sub-section 2, sub-section 3, sub-sec columbians an opportunity of displaying examples of their product. Each year a very handsome showing has been made, but since the building was erected and devoted to that special purpose no better or more effective exhibit has been made than that of the Victoria Development and Tourist association at this year's exhibition

FOR MEN

thing else.

Nevertheless as seen yesterday they show the possibilities in flower production, out-of-doors, around front steps, edging driveways, massed in beds—in Victoria. If this was the purpose of the exhibit it is an eminent success. Amongst the specimens of flowers shown were delphiniums, lies, roses, grasses and many others.

Bulb Culture

In addition to the fine display of per-In addition to the fine display of perennials an exhibit is made of bulbs. Speaking of bulbs brings to mind Holland, and the idea seems to have thorland, and the idea seems to have thoroughly established itself in our minds that the best bulbs come from Holland. But Victoria is asserting the claims of its locality to rank even higher than Holland in the quality of bulbs pro-**OUT-OF-DOORS** DRESS

its locality to rank even higher than Holland in the quality of bulbs produced. It is quite true that as fine bulbs as were ever grown have come from Victoria. In season the fields of tulps and narcissus to be seen at the constraint of tulps and narcissus to be seen at the constraint of the bulb growing industry is capable of development as all the conditions essential to it are there. Often have Free Press readers heard of the wonderful fields of flowers at the coast, but they can now see for themselves at the British Columbia building the bulbs which give to the Victoria residents their hyacinths, crocusses. daffodils and other beautiful bulb blooms. It seems that Victoria bulbs will soon eclipse those of Holland; authors one clipse those of Holland; authors of the strations of the standard of the sems that Victoria, should draw special attent of the wonderful circles, have said so and it is no wonder that Mr. Cuthbert, speaking enthusiastically of the attractions of Victoria, should draw special attent that direction to this unique distinction which in due time the world will accord to that fair district at the coast.

Fruit From Victoria

President of B. C. Packers

It is upon the fruit products of the Victoria district that the many people were bestowing most attention. Cherries were in greatest prominence. Mr. Barker, for several years the general

ries were in greatest prominence. Mr. Barker, for several years the general Cuthbert said that the season had not been one of the best for cherries, but the quality of the fruit shown did not large manager of the concern, was elected president to succeed the late Mr. Alexander Ewen

piece Outing Suits appeals to correct dressers. HOMESPUNS, WORSTEDS AND FLANNELS fair district at the coast.

Some Fine English Hollies

It is unusual to speak of "holly" farms, but that term at Victoria is a common place. Trees from these are on exhibit. Associations of Yuletidghave associated this shrub with many tender memories and it does seem to be somewhat of a pity to see it brought down to the common field of commercialism from that of adornment of lawns and as an emblem of a season of joy. But it is now farmed" as wheat is "farmed," set out and planted with a view to quality and quantity of product just in the same way as an Irishman would plant potatoes, only perhaps the holly in Victoria would be tended more scientifically, "How is the tended more stafform about forty to fifty cents per pound. I've had to pay that for it in Victoria. I have in my mind a case where a holly farmer got forty dollars for the product of one tree, and one farm I know of has 1,500 producing holly trees." From these farms the holly at Christmastime is shipped to all parts of the world. Here again have we another reminder of the old land—the holly that is so associated with its Christmases is sent from this "bit of England on the Pacific coast" in larger quantities every year to English people the world over.

It is upon the fruit products of the Varcouver. July 19.—At a directors' resident of the common field of commerciant is a common place.

seem to bear out what he said. Some very fine samples of goeseberries can also be seen. A novelty well worth examining is the Logan berry. This is a hybrid—crossed from a blackberry and a raspberry. Its form is like an elosgated raspberry and its taste combines the tartness of the rasp with the ripe mellowness of the blackberry. Other fruits are also shown, but it is too early in the season to give an adequate representation of the possibilities of the Victoria district as a fruit growing centre. The display made is effective and every sample also bears the name and address of the grower. This is a good feature. THE CAUSE OF DELAY

Chief Justice Hunter Points to Need of Strengthening the

Vancouver, July 19.—The following statement regarding congestion of legal business in the courts came from Chief Justice Hunter and was read in court today by Mr. Justice Clement. It was called forth by an editorial article in the News-Advertiser on "Judicial Delays."

"There are two statements made in the editorial article of the local morn-

ing paper of yesterday which I think necessitate judicial notice.

"The first is that here are three judges in Victoria where, according to reports in the daily press, there is no business to transact, except the hearing of a few applications in chambers which could easily be disposed of by one judge sitting for an hour or two three or four days a week. This is in-correct, the fact being that the regular July sittings in Victoria commenced on the same day as in Vancouver and are not yet concluded, both sittings being interrupted on July 12th and 13th by the full court having to sit in an appeal from a conviction for murder.

The second statement is one at least of the judges in Victoria should appear and easier in disposing of hus-

Vancouver, July 18.—The steamship Tartar seems to be having more than her share of troubles with her oriental population aboard ship. Some time during the afternoon of Wednesday, it is reported that four of the ship's crew deserted and kept the custom house officers busy running them down. One of the Chinamen was captured and the other three gave themselves up later in the day. The one captured was immediately put in one captured was immediately put in the iron cage in immigration detentions with the stowaways now under arrest. This swells the number of Chinamen from the Tartar locked up, to nineteen.

On a former occasion a Chinese was On a former occasion a Chinese was Grand Forks, Greenwood were not in existence and Vancouver has developed from a village into a fast growing city. To say anything further would be superfluous."

SERGT, RICHARDSON WINS AGGREGATE AT CALGARY

Leads in Northwest Shoot, Capturing Six First Prizes During the Rifle Meeting There

Calgary, Alta., July 19.—The British Columbia rifle team was second in the city of Calgary match. Capt. Forest was fifth in the grand aggregate which was topped by Staff-Sergt. Fred Richardson, who scored six firsts in the open competitions.

Staff-Sergt. Richardson is a well-known rifle shoot having competed at

Salmon Fishing Improves

Representative of St. Paul Syn-**Buys Tract Near Kennedy** Lake

(From Friday's Daily.)

Concluding a very pleasant and profitable visit of four or five days' duration to Victoria, Cal., E. Stone, a large timber operator of St. Paul, Minnesota, returned to the Mainland this morning. While here Mr. Stone closed a deal which implies the acquirement by a syndicate which he represents of a large timber tract in the vicinity of Kennedy Lake, Vancouver Island.

Mr. Stone was formerly general passenger agent of the Great Northern Railway but relinquished that position to go into the timber business, his firm, operating as C. E. Stone & Co., dealing exclusively in British Columbia investments. They have issued elaborate maps and pamphlets descriptive of the resources of this province, which in themselves constitute a good advertisement for the country. (From Friday's Daily.)

the country.

Mr. Stone predicts a large influx of people from the Northewest to Vancouver Island at an early date. He says the fame of Victoria as a residential point has travelled far, and he met many people who expressed themselves as determined to locate here as soon as they could adjust here as soon as they could adjust their affairs to that end.

See This Display!

WHEN you are passing don't fail to see the big showing of Dining Room Furniture in the Early English style

of finish shown in our Broughton Street windows. We are showing there some new

pieces to give you a slight idea of the stock of this line we carry. We've an immense stock of this particular line of Furniture and can say, without fear of successful contradiction there is no such showing elsewhere in the Province. It is a kind that has found much favor with Victorians and we have sold large quantities during the past year. We expect to sell even larger quantities this Summer and Fall, and with this end

in view have stocked heavily. See the window display and then come in and go up to the third floor and see some more—a whole lot more—for there are many other pieces there.

CTORIA THE BEAUTIF

ST. ANDREW'S CATHEDRAL

Splendid Edifice Reared by Roman Catholics of This City

It is not generally known that the Catholic church was represented, in what now constitutes the archdiocese

his clergy, in a small frame cottage on Humboldt street. In this holy mass was celebrated for many years; the white congregation consisting chiefly of French-Canadiams, who were in the white congregation consisting chiefly of French-Canadiams, who were in the employ of the Hudson's Bay company. His lordship did not tarry to provide education for the little ones under his care, and to him belongs the honor of having, founded the first school that was established in Victoria; thus again exploding that oftrepeated calumny that the Catholic church keeps its members in ignorance and illiteracy. He secured the services of two brothers of the congregation of the Holy Viator, brothers Joseph Michand and Gedeon Thibaudeau, who were the first to conduct a regular school within the confines of British Columbia—a small school at first, but which developed into the present St. Mary's college on Pandora avenue. Brother Michand, besides being a successful teacher, was also a skilled architect and a very handy man with tools, and to his untiring efforts we owe the first cathedral of Victoria. It was situated on Humboldt street, and up to 1884 it sheltered within its walls the Catholic congregations that assembled there to worship their God. worship their God.

Morship their God.

The building was a gem of artizanship, the carvings being made by the deft hands of the designer himself.

This relic of the early days has been their hands of the designer himself. This relic of the early days has been carefully preserved, and now does service as chapel in St. Anne's academy. Within its hallowed precincts many historical events have been enacted, such as the consecration of the Rt. Rev. Bishop Louis D'Herbonez, first vicar apostolie of the Mainland, in 1863; of Bishop Seghers in 1873, and of Bishop Brondel in 1879, and the ordination to the priesthood of several priests, among whom may be mentioned Rev. Father Michaud, C.S.V., the designer and builder of the cathedral, and Father McGuicken, O.M.I., a pioneer priest well and favorably known all over the Mainland. The cathedral was finished and consecrated to the service of God on November 30, 1858, under the patronage of the Apostle St. Andrew, whose feast is celebrated on that day. It was also the eleventh anniversary of the consecration of Bishop Demers.

Bishop Demers.

In order to provide for the education of young girls, Bishop Demers secured some Sisters of St. Anne from their mother house at Lachine, Qué. They arrived in Victoria in 1858, and took up their abode in a small frame structure that is still standing on South Park street. The classes were given in a building that occupied a site in the rear of the old Masonic temple, and which has but lately been pulled

the 10th of August, 1897, the F Father Christie was appointed as successor. His stay with us was of short duration, for having arri Portland, and was succeeded by Father John Baptist Brondel, of Steilacoom,

who, upon his insistent appeal, had been re-appointed by the sovereign appointed by the sovereign appointed former see of Vancouver Island, a temporary pro-cathedral was built on the church property on view street, large enugh to provide seating accommodation for some years to come. This building, which is now the institute hall, was occupied as a pro-cathedral from the summer of 1884 intil October, 1892, when St. Anirew's congregation moved into the present stately cathedral.

Archbishop Seghers returned to us on the 1st of April, 1885, and was received by his former parishioners with residence for his clergy. The old house was dilapidated and unhealthy, and with the funds on hand, which he had mostly collected in Europe, he receted the magnificent structure that graces Yates street. He visited all the missions of the diocese, and appointed a resident priest in Juneau, and another one in Sitka. In the Summer of 1886, accompanied by two priests, he started on that fateful journey into Alaska where he was mandered by a man hamed Fuller. Great was the grief and consternation in Victoria when the sad news was brought to the city, for Archbishop Seghers was beloved by Protestants and Catholics alike.

At the unanimous request of the clear of the diocese, the Hely Father. he warmest demonstrations of joy and appiness. The first work which he

At the unanimous request of the clergy of the diocese, the Holy Father appointed to the see of Vancouver Island the Rev. John Nicholas Lemmens, who was consecrated August 5th, 1888.

Bishon Lammens, boying been for who was consecrated August out, loss. Bishop Lemmens, having been for many years a zealous missionary on the Island, was fully aware of the needs of the diocese, and as he ob-tained a reinforcement of priests, he

justly proud, and which is a last monument to the energetic efforts Bishop Lemmens. After the death Bishop Lemmens, which

John Baptist Brondel, of Stellacoom, Wash., who was consecrated Bishop of Vancouver Island on the 14th of December, 1879.

Bishop Brondel, during his short administration of the diocese established one more mission on the west coast of Vancouver Island. He made a visit to Rome and shortly after his return was appointed to Helena in Montana, whither he went early in 1883. Up to this time the growth of Catholicity in Victoria, at least as far as the white population was concerned, was but coast of Vancouver Island.

It was in 1900, when Archbish Orth commenced the administration the archdiocese of Victoria. To Catholic church has since then commenced the latest the continued to brown are with the deceleration of the continued to brown area with the deceleration. Wictoria, at least as far as the white population was concerned, was but slow, yet it kept pace with the growth of the town itself, which, not taking account of the temporary large influx of population at the time of the gold excitement on Fraser river, was only a very small community until it received an impetus as the building of the C. P. R. was nearing our western shores. Then the city of Victoria began to take rapid strides, and it was soon realized that the cathedral on Humboldt street was inadequate to accommodate the steadily increasing number of Catholics who came to worship there. It was necessary to prowide at once a larger and more centrally located building, and, pending the arrival of Archbishob Seghers, who, upon his insistent appeal, had been re-appointed by the sovereign and industrial schools. In addition to these church institutions there are six Benedict, whose mother house is at Mount Angel, Oregon. These sisters are at present conducting one academy, two orphanages and five primary and industrial schools. In addition to these church institutions there are six parochial schools managed and taugh by the local priests, assisted by lay teachers. Fourteen churches have a resident priest and about thirty stations are regularly visited by district missionaries. It is fondly anticipated by the church authorities that, in no literate further the Catholics living in distant future, the Catholics living in the most isolated localities will enjoy at least an occasional visit from a

FRUIT POSSIBILITIES.

Second crop berries, that is, those ripening in the early part of October from fields that have already yielded one crop, are now seen in the market every year. They have ceased to be a subject of remark, and there seems to be foundation for the opinion that a variety is being developed which may be counted upon to yield two crops yearly as a regular thing. Other berries cultivated are the raspberry and the blackberry, A new variety, known as the logan berry, produced by crossing the raspberry and the black crossing the raspberry and the black-berry, is becoming common. Wild blackberries are exceedingly prolific, and are among the best of small fruits. Of the larger fruits, the apple is naturally the king. The quality, when suitable varieties are selected for the orchard, is excellent, the flesh being firm and the flavor good, although as a rule they are not very high-colored. Excellent as are the majority of the apples now grown, it is evident that better results may be expected, as orchardists succeed in developing varieties best adapted to the soil and climate. The same is also true of pears, which ahe wonderfully prolific. Peaches do well in certain localities, but can hardly be looked upon as of but can hardly be looked upon as of commercial importance, as a fruit crop. Prunes and plums give the best possible results both as to quality and quantity. Of recent years considerable attention has been paid to grape growing, with results that promise very well for the future.

There is, perhaps, no line of cultivation which is more attractive and

tion which is more attractive and gives better results than fruit growing on Vancouver Island. A large ing on Vancouver Island. A large amount of acreage is not required to yield a good living. Ten acres are yield a good living. Ten acres are ample, and the owner can not only raise a bountiful crop of berries and fruit, but he can keep a cow or two and a horse, and grow sufficient vegetables for the use of his family. During the fruit season he will be kept pretty busy, at least he ought to be, if he wants to realize the best results, but the labor is not hard and is sults, but the labor is not hard and is of an interesting kind. During a good part of the year he will have little to do except look after his few animals and keep his place in order. For everything he raises he will find a good market, and if he chooses to keep fowls, he will be able to dispose of his eggs and chickens at remunerative prices.

tive prices.

The southern end of the Island, that is the part lying south and southeast of a line connecting Sooke and Saanich Inlets, contains approximately 100,000 acres, very much the larger employed for fruit culture. It is in this part of the Island that Victoria and Esquimalt are situated, and where mentioned the greater part is yet improved and can be purchased at reasonable prices. The district is resonable prices. The district is markably well provided with highwroads. In the neighborhood of Naimo, Ladysmith and Cumberla coal mining towns, are extensive ar of the same class, possessing the advantages of a convenient market, regular and efficient transportation facilities and good schools. Duncans ap Comox, the Courtenay and Alberta valleys, and other places that could be named have their special adva-tages and attractions, and in all them a settler can readily locate hi self on excellent land at a moderate outlay.

Looseness of The Bowels.

It is very seldom during the summer months that most people are not troubled with "looseness of the bowels."

Sometimes it only goes that far, but generally it develops into Diarrhoea, Dysentery or Summer Complaint and has a tendency to weaken the whole system.

When the bowels get loosened up in this way and you wish to check the unnatural discharge without bringing on constipation, there is only one remedy to use, and that one is Dr. Fowler's EXTRACT OF WILD STRAWBERRY. This remedy is not an experiment as it has been used in thousands of families dur-

ing the past sixty-two years. When you ask for Dr. FowLER's be sure you get it, as many unprincipalled druggists will try to palm off a cheap sub-

Miss M. Hopkins, Roseview, Sask., writes: "I have used Dr. Fowler's EXTRACT OF WILD STRAWBERRY and found it is all it is recommended to be for Diarrhoea and Summer Complaint. We would not be without a bottle of it in the

Grand Trunk Pacific route in British Columbia that have not yet been definitely located, and several parties of lengineers are now at work on this section. The route being surveyed is designed to avoid the Grand Canyon of the Fraser river, where two tunnels would be necessary. The projected line leaves the north bank of the Fraser at Five Mile Bend, about the Grand Canyon, goes through the pass at the head of Tomoquah Creek, and thence down the yalley of the creek to the Fraser river, ten miles below the Grand Canyon. From there it crosses to the south bank of the Fraser, which it follows for some distance, returning to the north bank at traser, which it follows for some distance, returning to the north bank at the mouth of Little Salmon River. It is exepected that this route will bring the road a good deal nearer the Cariboo Mines than the course along the Fraser river, through the canyon.—Montreal Gazette.

station and is expected to reach port today.

Interviews have been held by officials of the Pacific Whaling company and Mr. Doutrie, commissioner of wireless telegraphy, who is soon to leave for the west coast on board the government steamer Quadra to inspect the site selected for the Estevan point lighthouse in connection with which a wireless telegraph station is to be established, and to visit Cape Scott, Cape Cook and the Scott Islands, with a view to the establishment of the whaling stations of the company on the west coast, will be made by the commissioner to look into the matter of the installation of wireless telegraphy in connection with the whaling factories. If wireless telegraph stations are established at the whaling depot the whaling company is willing to place apparatus on board its steamers.

BIG SAWMILL ENTERPRISE. Large Structure is to be Erected on Lulu Island.

Vancouver, July 17.—The North Arm Lumber Co., Ltd., which has just been incorporated with a capital of \$20,000 has secured one of the most important mill sites on the Fraser river, near Vancouver, on which they will erect an up-to-date mill at a cost of \$150,000 the water front, close to where the B. C. Electric trams cross to Lulu island, and there is at present double trackage on the ground which will afford every shipping facility. every shipping facility.

Work on the mill buildings was

work on the min buildings was begun to-day and will be pushed for ward with the utmost speed. It is expected that the mill wilk-be in running order by the beginning of the year with an initial output of \$100,000 fee

with an initial output of \$100,000 feets a day, while the construction of the plant is such that these figures can be doubled at any time.

The mill will be modern in every detail. The 'machinery on order consists of one ten foot band mill, one eight foot band mill, one Mershou band re-saw and a Wicks' gang, carrying 27 saws. Connected with the mill proper will be the most modern lath and picket machinery that can be installed, one large timber planer, two flooring machines and stickers.

Steam will be generated in four boilers 72 inches by 13 feet, having a working pressure of 125 pounds, which will drive two large Corliss engines of the Allis make.

Mr. H. L. Kennedy has been appointed mill superintendent and is at

HE COLONIST

it is time to set them out into the garden but this is what you will "go up against": Celery makes a long tap root, that is, a root which goes straight down into the earth with very few fine, side, or fibrous roots. When the tiny seedling is transplanted, the end of this tap root is usually broken, the fibrous roots are forced to start work, and they make a clump. Then when the second transplanting time comes, the root is not so long, but bunchy, and not nearly so liable to be badly injured. If the seedling is allowed to remain in the seed bed until setting out time comes, it has a root so long that it is almost invariably badly broken in lifting, and the shock being much greater almost invariably badly broken in lifting, and the shock being much greater
the plant's progress is scriously retarded at the time when it needs to grow
most quickly. Therefore, two transplantings are far ahead of one, and if
one of these has been into an individual
receptacle, that is better still.
When the seedlings appear, tend
them carefully, turning the box each
day that they may not be drawn in one
direction toward the light. Keep them

day that they may not be drawn in one direction toward the light. Keep them moist, but not wet, and not too warm, or they will be tall and spindly. If they are too thick, pull out a few weak-lings and give the others a better chance. When the second leaf appears, and they are jostling and pushing elbows for room, transplant them into a second box, deeper than a flat, er into a coldframe, whence they can be planted into the garden.

Having filled a flat with finely sifted

Having filled a flat with finely sifted leaf mold, mixed with sand, scrape the earth off even with the top of the box, shake or press it down earth off even with the top of the box, shake or press it down with the hand, and, if the soil is very dry, sprinkle it lightly with a rose sprayer and let it stand for a little while before sowing the seed. There are two methods for doing this; one is to sow or sprinkle the seed over the entire surface; the other to mark shallow drills, one or two inches, apart, and sow the seed thickly in these, barely covering it. I prefer the latter plan for in that way it is easier to lift the seedlings when the first transplanting time comes. Place the flat in a bright, moderately warm window, and water very gently when the surface shows a tendency to dry out. The seedlings appear in two or three weeks.

Celery loves light, rich soil, and the flavor of the plant is much finer from that kind of land, than when it is raised on a heavy clay, bog or peat

that kind of land, than when it is raised on a heavy clay, bog or peat soil. But it also demands plenty of water. Therefore a thorough preparation of the ground in dealing with the crop is more than usually profitable.

crop is more than usually profitable.

I reiterate, celery loves a very rich, light soil, well drained, and it craves plenty of water, often. Dig your trench, or bed, deep, put in some well-rotted manure, or, if you can possibly get hold of it, some hen droppings, and if the soot from the chimneys has not gone on the rose bed, add that too. A little bone-meal and wood-ashes will not do any harm, for celery is not subject to indigestion from over feeding. ject to indigestion from over feeding.
Celery is an important crop for the
home garden, as it occupies ground upon which some earlier crop has already
matured. It can follow peas or spinach for instance. It likes mitrogen is

matured. It can follow peas or spinach for instance. It likes nitrogen in abundance and so does particularly well as a second crop on the ground previously occupied by peas.

Have you decided which way to grow celery? If so let us set out the plants. The bed or row is made, raked fine, and the garden line run. Now make holes with the dibble, or, if your plants are too large, with a trowel,

sion, and sometimes are more conveniently prepared. Carbolic acid with water-one part to thirty-kills lice, and this can be forced in a spray in the same manner as the other solu-tions recommended. The only caution with any of these remedies is to be very thorough. All loose pieces of boards, barrels and boxes, as well as litter of every description, also the floor, must be gone over, else the work moor, must be gone over, ease the work will be in vain, for all these will be harboring enough of the pests to overrun the premises again. The best way is to remove and burn everything, even to the roosts, and thus be sure to get rid of them.

Then, when the building thoroughly sprayed, give it a coat of whitewash and furnish it anew. This will be necessary in case of a badly infested roost. Kerosene, or coal oil, as it is usually called, may be used as it is usually called, may be used undiluted upon perches and supports. This is another sure remedy, and should be used at least once a month regularly around such places, pouring it from the spout of a can in a tiny stream or using a cloth swab. Cleanliness is as necessary in the poultry liness is as necessary in the poultry house as in the cow or horse barn, yet the first named is more subject to neglect than any farm building.—

Exchange and soft medical to the second secon

WHAT THE TRAP NEST DOES

It shows which hen lays the egg. It shows just what each hen is doing. It picks out the 300-egg hen, the 200-egg, the 100-egg, the 50-egg and the drone. Feeding the drone is one of the greatest leaks of the poultry-

It picks out the winter layer. enables one to get acquainted each individual hen.

The frequent handling and moving the hen from the nest tames her and the tame hen is a paying hen.

It prevents egg eating, as the cul-prit is easily detected and killed. It picks out the hen that lays the infertile egg, the brown, the white and the yellow egg.

It picks out the hen that raises the best chicks. Not always the highest scoring hen raises the winning chicks. 'It is the only practical way that a breeder can pedigree his stock. Poultry will in time be pedigreed as is other thoroughbred stock. Trap nests may be placed in a building or yard away from the laying hens (when used for sitting hens) and they can be removed once a day for feed and water. When they return to the nest

shut themselves in and the other hens out so they cannot crowd on and break the eggs. The trap nest is a simple contrivance by which the door is set on a trigger which is sprung by the hen when she enters. The door closes and she cannot leave the nest until removed by hand moved by hand.

A numbered band on each hen's leg enables the owner to tell exactly what each hen is doing by writing her number on the eggs in the trap nest.

Some of the Guggenheim men got on the raft and started to pry it loose from the shore. At a given signal the raft with those on it was pulled up the hill about half way, when Tony Morris, a boss of the Guggenheim company, cut the cable with an axe, and the raft sild back into the lake carrying with it the Guggenheim men and their horses. The raft was soon demolished. During the fight over the raft those on the hill and those on the raft engaged in a fierce hand-to-hand struggle, the Katalla outfit is alleged to have struck at one Scotty, of the Bruner outfit with an axe, barely missing his head. Someone where a board between the men, and Scotty came out of the melee with a badly cut hand.

Next day a charge was made upon

FOR RIGHT-OF-WAY

Next day a charge was made upon Bruners right-of-way led by Mike (Black) Sullivan. The struggle was a hard one. Sullivan was knocked down a dozen times before being put out of action, and he is now in hospital with a dozen stitches in scalp wounds. Six of the Bruner outfit and fourteen of the Katalla outfit were in-

Bruner people tearing up their crossing and are watching their opponeents with a jealous eye. Further trouble is therefore possible, but not probable."

WEDDING ANNOUNCEMENTS (From Friday's Daily.)

Cornwall—Rye

One of the prettiest country weddings of the season took place yesterday afternoon at St. Luke's church Cedar Hill between Men.

A canvass of the real estate offices

New Westminster city and district real state and all agents report many sales, both in lots and farm property. Considerable water front property has also been sold.

An interesting fact in regard to the many sales made is that the great bulk of the property sold was purchased by farmers and business men from the Northwest provinces who have come incidentally look up some investments. Many of the purchasers intend closing up their affairs in the east and coming to the coast to live at once, while others will wait till autumn.

A canvass of the real estate offices

PRIZE LISTS FOR THE FAIR BEING ISSUED

Secretary Smart Is Busy Mailing Them to All Parts of Country

held here from September 24 to 28, under the patronage of the provincial government and the corporation of the city of Victoria was issued yesterday. The booklet is a most artistic production of some 112 pages in handy pocket size and is certainly a credit to the association. Secretary J. E. Smart is now busy mailing them all over the country. The prize list is bigger and better than ever before in the history of the association. The prize list is bigger and better than ever before in the history of the association. father had seats close to the defence group.

Mr. Hawley, who has been ill for several days as a result of the strain of the long trial, began his address in a voice almost inaudible to anyone except the jurors. He apologized for this, explaining that he had feared he would be unable owing to ill-health to deliver a prolonged address. Mr. Hawley is the nector of the Boise bar. He is a man of impressive presence and aggressive speech. Warming ence and aggressive speech. Warming to his subject, his voice lost all trace of weakness. He denounced the defendant and his alleged co-conspirators in severe terms, and maintained the truth of Orchard's story.

Boise, Idaho, July 20.—James Haw-ley, leading counsel for the State of Idaho, presenting the first argument to the jury in the case against Wm. D Haywood, spoke for nearly eight hours, distributed over three sessions of the court. Even when the session teday had extended beyond the customary limit, every seat in the courtroom was occupied, and zemained so until the last word was spoken. None listened more attentively to the argument than Haywool. From time None listened more attentively to the sigument than Haywool. From time to time he took copious notes in a small book, and frequently made suggestions to one or other of his lawyer's seven of whom were in court today. Throughout analysis of the testimory in contradiction of Orchard's story concluded frequently with the denunciation of witness after witness as a wifful perjurer or intentional faisifi w. When he had spoken nearly six hours, Mr. Hawley reached Caldwell, where, in December, 1905, the preparations for the assassination of Steunenberg with a bomb were afoot. His voice now found a sympathetic note, and as he told of the last movements of the former governor the crowd leaned forward to catch the speaker's every word.

Mr. Hawley's paroration was impossible to the system. For positive local help, use as well must be combined. One is local, one is constitutional. Dr. Shoop's Right Cure is the Local. Dr. Shoop's Right Cure is the Local. Dr. Shoop's Restorative, in December, with the denunciation of Orchard's story concluded frequently with the denunciation of witness after witness as a wifful perjurer or intentional faisifi w.

When he had spoken nearly six hours, Mr. Hawley's paroration of Steurone of the comment of the system seeking the repair of all nerve all tissue, and all blood allments.

POLICE SEE MYSTERY DEATH OF NURSE

Body of Miss Jane Lawley Found on Beach at Rifle

CIRCUMSTANCES ARE SUSPICIOUS

ndications That Death Was Due to Strangulation—No Evidence of

try.

Just about an hour before the finding of the body, Patrol Driver Jones moticed a white skiff enter the bay with a single occupant. The man disembarked some little distance from the spot where the body was later found and walking thither he remained for some few minutes. Then hurriedly retracing his steps to his skiff he rowed away. Later when the body was found the actions of the man appeared suspicious and the police are now

was dark and about middle height. She weighed about 150 pounds.
According to Detective Palmer the body of the deceased when found, was located with her feet two inches above high water mark which would preclude the possibility of her being drowned. Upon her right arm a heavy slab of wood was resting. Her watch was stopped at 12 o'clock exactly.

(From Sunday's Daily.) Mystery continues to shroud the death of Jane Lawley, the nurse whose body was found on Friday afternoon last at Clover Point beach and whether suicide or murder it is unlikely that the autopsy and inquest which takes place on Monday will throw much light upon it. light upon it.

light upon it.

It transpires, however, that the dead nurse had been in somewhat poor health for the two months prior to her death and this in conjunction with a deposition returns. Of the court. Even when the session today had extended beyond the customary limit, every seat in the court-room was occupied, and semanted with a disposition naturally inclined to melter the court-room was occupied, and semanted with the court-room was occupied, and semanted by a condition of the text members it is as one way oblob, but with this stay, we remained the court-room was occupied, and semanted by a condition of the court inclined of the court inclined to the court inc
