WATFORD, JUNE 14, 1912.

## NOTE AND COMMENT.

When the men of some of the towns in the southern portion of the United States feel the need of a little recreation they go out and cheerfully hang or burn a negro. It's one of their agreeable ways.

Let us work and stimulate every legitimate enterprise by giving it all the friendly encouragement we can and unite our industry, intelligence and capital in a common cause for the good of our town.

Most people fail to see any good reason why June 3rd should be observed as a public holiday. The keeping of the 24th of May is a that it will be superseded. The cessation of business on the 3rd of show our loyalty to the Sovereign.

Scotland have embarked for Canada. They are the pick of their classes, and their departure has renewed the criticism that the land and labor policy of the government is driving the best men from the country. All the immigration agents of the various colonial dominions are reporting an extraordinary demand for passage from prospective immigrants, and it is said that the present steamship lines will not be able to handle

much more than half of the traffic during the coming season.

Another gold rush is in full swing following discoveries of gold and copper in the region north of Massey Station, on the Soo branch of the C.P.R., by a prospector named Teasdale. Prospectors are flocking in large numbers to the scene of latest excitement, which entails a in one sermon.—Exchange. 40-mile drive north of Massey to to Whiskey Lake, then a cancoe trip some miles further into the

The anti-treating bill which will be introduced by the Government at next session of the Ontario Legislature will be, it is understood, of a drastic nature; and will thoroughly eliminate the treating system. The hotel-keeper, the bar-tender, the man who buys the drink and the man who is treated will be prosecuted under the new law. A heavy fine will be imposed upon hotel-keepers who violate the law for the first and second time, and on the third occasion the license will be cancelled. The bar-tender likely will be fined to the amount of \$100 or \$200, and the "treater" and "treated" will be dealt with in a similar way.

#### Earn Their Living.

"Every girl in the world, whether she is a millionaire or a pauper should be taught some trade or profession so thoroughly that she could support herself by practicing it if the necessity ever arose.'

So says Dorothy Dix the wellknown writer on questions specially relating to women. She goes on to say that 'fathers and mothers excuse their negligence in this matter by saying that Mamie and Susie will get married, so what is the use in spending money in teaching her a business that she will never follow?' They speak as if marriage insured a woman against any possibility of want or poverty. Yet they see all about them dozens of married women who have to support sick or trifling husbands or whose husbands die and leave them widows with a house full of children to be provided

No education is lost. No woman can know too much. The millionairs will administer her affairs the better for having graduated as an expert bookkeeper. The woman of fashion will be all the better for understanding law and medicine. But if there are those parents who object to spending money on a girl's education for something she may possibly not require at that moment, there remain the purely feminine trades of cooking, sewing, nursing, etc., that they may be taught. All of these every woman needs to know, and at any of these she can make a living if she has taken a thorough course in them. Then if she is left with the necessity of earning a living she will not be helpless.

## She Should Marry a Minister.

"If I were a minister's wife," said a lady in the car, who was talking too loud not to be overheard, "you may rest assured I should take an interest-and a live interest-in my husband's work. I should say to him 'Richard, if you want to do well next Sunday, preach short! If you want your congregation to grow larger and larger, preach short! If you want to draw them to this church, that church and the other, preach short! Always preach short! But, Richard, have something to say, always! Condense, condense and condense and then have an air about you as if time were worth something and you could not afford to lose a minute of it.' 'If on a Sunday morning he firmly established custom in this seemed to be in an extra amiable country, and it is not at all probable mood, I would venture to say: 'Richard, dear, don't be all day in giving out your notices! Don't June is quite unnecessary from all blink over them as if you had never points of view, and is not needed to seen them before and were pondering them in your mind as you call attention to them! Don't, I beg you, During the past week over 3,000 Richard, read them straight forward and agriculturists from and then say them all over again

backward! There is nothing so tiresome! I am not sure but some Sunday I should say: 'Richard, if you get the least might tedious to-day I shall fuss with my bonnet-strings as a warning! "And when strings as a warning! "And when you say "in conclusion," don't go on until you reach a "Finally," and after that "One word" or "Just another thought." I do think it is such a mistake to tell all one knows

## DARK ROOM TESTING

Every child on reaching the age of seven years should have the eyes exam-ed. Many children have defective vised. Many children have defective vision, and it often happens that one eye only is affected. This throws all the work on the better eye while the other through disuse frequently loses its function entirely. With proper lense correction this trouble will be wholly overcome. If secompanied by parents we will be glad to examine children's seyes free of charge.

## Living to be Old.

A druggist in London has died at the age of 89, and is aaid to have attributed his length of days to excellent habits cultivated in his youth. The Free Press speaks of his cheerfulness and courtesy as qualities that contributed to make his life what it was. These are qualities for which there is nothing but praise. A man can cultivate the habit of courtesy and it is well worth the cultivation, but cheerfulness is near the M.C.R. Station. the cultivation, but cheerfulness is not always to be had for the asking. Of one thing we may be reasonably sure, and that is that those who live to be centenarians are those who did not, throughout life, fuss and worry, dope and drug themselves in anxious fear that the machinery of their bodies would go wrong unless constantly tended. It is probable that they did not survive by taking thought or by planning, but that they evolved some sort of plan as they reviewed the years.

### SOUR RISINGS FROM STOMACH

Those Who Experience Fullness and Pain After Meals, Stomach Disorders, and Indigestion, Should Read Below.

"When I was working around the farm last winter I had an attack of inflammation," writes Mr. E. P. Dawkins, of Port Richmond. "I was weak for a long time, but well enough to work until spring. But something went wrong with my bowels, for I had to use salts or physic all the time. My stomach kept sour, and always after eating there was pain and fulness, and all the symptoms of intestinal indigestion. Nothing helped me until I used Dr. Hamilton's Pills. Instead of hurting, like other pills, they acted very mildly, and seemed to heal the bowels. I did not require large doses to get results with Dr. Hamilton's Pills, and feel so glad that I have found a mild yet certain remedy. Today I am well—no pain, no sour stomach, a good appetite, able to digost anything. This is a whole lot of good for one medicine to do, and I can say Dr. Hamilton's Pills are the best pills, and my letter, I am sure, proves it."

### A LUCKY SHOT.

It Helped the Captain Out of an Embarrassing Situation.

In the good old days the revenue cut-ters carried small rifled cannon, but they were only used to fire salutes with and now and then break up a derelict The gunners were never expected to hit anything. When they used the guns on floating wrecks the cutter would be alongside, and the master gunner would bang away until he'd smashed the wreck or used up his ammunition. No one ever thought of keeping tab.

Captain E. P. Berthoff told a story the other day which illustrates the conditions which formerly prevailed on the "treasury fleet." When it is a matter of running down smugglers or putting an end to poaching or mapping a bad channel or destroying derelicts the cutters average 100 per cent of efficiency.

"Few gunners could hit a target," he aid. "Really there was little need. said. They didn't use a loaded shell once in a lifetime. But now and then the board of inspectors came on board, and then every one was worried and nervous until the ordeal was over. The inspectors visited the cutter commanded by a friend of mine. He ordered out the firing squad.

"'Bang!' went the rifle. The projectile hit the target squarely in the cen-

"'Cease firing,' ordered the captain happily. And he turned to the inspect ors, pleased as Punch. 'There's no use wasting ammunition,' he said. 'Out gunners can do that every time."-Herbert Corey in Cincinnati Times-Star.

## OLD BAVARIAN TOWNS.

Many of the Smaller Ones Merely Walled Farm Villages.

In old Bavarian districts many of the smaller towns are merely walled farm villages. These settlements of agriculturists reproduce the ancient laager for all. Each is built in the form of a parallelogram, the shorter sides having each a gateway, with double gates, over which rise central square watchtowers capped with conical red roofs. to gate, with old half timber houses set back close to the inclosing wall. The ground floor of these houses af-fords stabling for cattle, and from these stables the cows are driven out through the town gates in the morning and brought in at night. Townships like this are merely clusters of houses intimately connected with the farm lands that lie beyond their gates. The peasantry, whether peasant proprietors or allotment leaseholders, go in and out to their work.

In eastern Bavaria, toward the Danube, where the better class farms are to be seen, one finds farmhouses of wood, a great shingled roof covering-as in Holland-not only the large live ing apartment, with many bedrooms, but also the stables for the horses and cattle. On such farms much of the farm work is done by girls, who usually wear short petticoats, tight bodices and kerchiefs on their heads. Most of the men are either in the army, working at trades.

#### From Old Subscribers.

Mr. Geo. W. Hagle, formerly of Watford, but now with the Wind Engine & Pump Co., of Calgary, Alta., writes about the crops in that province as follows:—"Conditions in the province in general at the present time are fairly good, the spring seeding having gone in in very good shape, and the weather having been favorable thus far. There is no question but what the soil in Alberta will grow crops, and if we are favored with this kind of weather all through the year, the crop will be a very favorable one.

### An Editor's Outburst.

An accusation was voiced and a solemn request made by Wm. McDonald. the warm-hearted editor of the Chesley Enterprise. "Men," he said, or words to that effect, for God's sake stop boosting the west. What has the west done for you, that you do so much for it? Boost old Bruce and Grey counties, the home counties where you live and expect to make your living." And they loudly applauded his utterance.

The Lambton Publicity and Improvement Association is doing the work for our county suggested by Mr. McDonald for Bruce and Grey, and we are getting good results. The officers, Dr. C. O. Fairbank, R. Stirrett and Johnston McAdam, deserve a great deal of credit for the success of this movement.

Dominions Soon to be Self-Protecting.

London, June 9.—Hon. Mr. Haldane, speaking at a banquet after Saturday's review of troops, said the dominions were organizing for war on the same line as adopted here. Our forces had been so disposed as to protect the overseas dominions, but the time would come when dominions would have to organize their own naval and military defences, and that meant we should become by far the most powerful military and naval station combined the world has ever seen. combined the world has ever seen.

Hon. Mr. Haldane specially referred to the visit of the Canadian cadets, and said, that in the organization of the cadet forces, England had something to learn from the daughter states.

## Forestry on the Pacific Coast.

Ottawa, June 13.— The Canadian Forestry Association will this year follow the plan of 1906, and hold a big Autumn Forestry Convention in Victoria, B.C. The date fixed is Sept. 4-6. This is upon the invitation of the Government of that Province. Hon. Richard Mc-Bride, the Premier, and Hon. W. R. Ross, Minister of Lands, are forwarding the plans, so as to make it one of the largest things of the kind held in Canada. The Secretary, Mr. James Lawler, of Ottawa, is now consulting with these gentlemen and Mr. John Hendry, of Vancouver, the President of the Association, in regard to final details. tion, in regard to final details

### MECCA THE SACRED.

A Shrine That Draws One-seventh of the Human Race.

Although one of the most inaccessible cities on earth, Mecca each year has visitors in such numbers that it must be ranked in this particular with London and New York. Even the world's metropolis on the Thames can boast no such cosmopolitan character as is imparted to this mysterious city in the wilderness of Arabia by the myriads of pilgrims who, at the cost of incredible pains, annually crowd into its confines.

This city is the oldest place of resort in existence, yet of all the millions who have visited it not a score of Christians are known to have come out alive. No flag of citizenship would save a man's life were he known to be a Christian within the sacred precincts of the city where the prophet himself decreed that no unbeliever

should set foot.
Of the 225,000,000 Moslems in the world only 15,500,000 live under the Turkish flag, yet most of them acknowledge the sultan of Turkey as their caliph, the successor of the prophet. As Mohammed shrewdly foresaw, the Mecca pilgrimage binds together his disciples into a unity which could

be effected in no other way.
"Mecca," says Dr. Samuel M. Zwemer of Arabia, "has become the religious capital and the center of universal pilgrimage for one-seventh of the human race."—Harper's Magazine.

### WONDERFUL ECHOES.

Effect Produced by a Pistol Shot at a Lake In Bavaria.

Probably the finest echo which the world knows is in the cathedral at Pisa, where the leaning tower is. Sing two notes and there is no reverberation. Sing three and they are at once taken up by the walls of the edifice, swelled, prolonged and varied till they seem as a divine harmony from some majestic organ.

There is a cavern in Finland in which, if you test your lungs to the top of their capacity, there will answer you such horrible roarings, moanings and mutterings that you will be glad to rush out in absolute terror.

The cutting down of trees in a certain locality on the Hudson river spoiled a splendid echo. A word shouted there was repeated forty-two times.

Undoubtedly the most extraordinary natural echo in the world is to be heard by the side of a small lake in Bavaria. On one hand rises a perpendicular cliff several thousand feet high, while on the other side is a dense forest. If a pistol is fired on the lake the woods send back a faint echo that gradually dies away, but presently it is heard from the cliff, continually increasing in power till it bursts over one's head like a deafening peal of thunder .- Pearson's Weekly.

Making Up His Mind.

Deliberateness, a quality generally ascribed to the Scots, must reach kind of quintessence among the Shetlanders, if this story from the Chris tian World may be held to represent them fairly:

The Rev. James Hamilton, minister of the Church of Scotland, Rodney street, Liverpool, while on holiday in Shetland had a narrow escape from drowning. Accompanied by a boy Mr. Hamilton was fishing for sea trout, when he slipped on a stone, lost his balance and, being incumbered with heavy wading boots, had great difficulty in keeping his head above water. Finally he managed to get back to

the shore, although in a very exhausted state, and said to the boy: "I noticed that you never tried to help me."

"Na," was the response, "but I was thinkin' o't!"

## Farming in Mexico.

Rice in considerable quantities is raised Rice in considerable quantities is raised in Mexico, but the methed of cultivation is most primitive. No attempt is made at irrigation. Land is cleared by felling the timber and burning over the field. The soil is not plowed. Planting is done from June to August. A hole is made in the soil with a stake, and the seed dropped in and covered, It is planted in rows about a foot apart and at about the same distance apart in rows. War Time Coffee.

This was the formula of a coffee mix-ture that sold freely in the days of gross adulteration during and immediately subsequent to the war between the states before matters began to right themselves: Best Java coffee, one pound; rye,

three pounds. Carefully clean the rye from all bad grains, wash to remove dust, drain off the water and put the grain into the roaster, carefully stirring to brown it evenly. Ronst the coffee separately. Grind the mixture and pack in air tight containers. All Chinese music is weird and screeching. They say their pleasure comes in exciting, not soothing, the nerves. They have flutes, horns, vio lins, mouth organs, guitars and table harps to be played with a loaded feather, which last make a delightful music akin to our mandolins. Every, business house has its musical corps (just as we organize company baseball clubs), who in the evening are supposed to amuse the master, who lives on the story above the comprado's house. Seated on the counters which at night are also their beds, the fokis essay with a vengeance discords which are unquestionably disturbing to the occidental nerves, but for that reason the phlegmatic Chinese find them exhilarating .- J. "Mad," but He Knew It. FitzGerald, the author, was once walking down Church street, Woodbridge, in company with a friend on the way to the Deben to go aboard his yacht. The day was hot, and he walk-ed bareheaded and barefooted, his shoes slung by their laces across his shoulders, his clothes untidy and ill fitting. At the four cross ways, where the postoffice now stands, was gathered a party of yokels, who made the strange figure the butt for coarse wit. "Ah, bor," exclaimed one in the singsong Suffolk vernacular, "'e's as mad as a hare in March." FitzGerald turned to his friend, having overheard the remark. "Yes," he said, "the fellow is right, but I'm sane enough to know that I'm mad."—T. P.'s London Maga-

Stick to the 24th.

The difference between celebrating the Twenty-fourth as a perpetual holiday, and celebrating June the third, or any other day on which the reigning monarch is born, is the difference between true British pattriotism and flunkeyism. Long before Imperialism was fashionable. Canada made a specialty of observing the Queen's Birthday. It was the occasion of expressing the chivalrous devotion of the people to the Queen. It was the first real summer holiday. It was the when the trees were touched with the freshest, most tender green. It was the day of firecrackers for the kids and amateur gardening

their fathers. The proposal to abolish this holiday, and substitute for it a celebration running all over the calendar, according to the accident of birth of the reigning sovereign, is unwise. Edward the Seventh was universally beloved, but the date of his birth was forgotten by most people, and nobody could be induced to keep it as a holiday. It was too near Thanksgiving Day; people would not keep two holidays within two weeks and they would not abandon their practice of rendering thanks to the King of Kings.

In the same way, June the Third is too near Dominion Day, and we do not intend to give up the celebration of our only distinctive Canadian holiday. We are governed in the British Empire not by the will of the monarch but by the laws and institutions which he represents .-

### The Leading Seaports.

While New York leads the cities of the world in its foreign shipping, it is the only United States port in the first dozen. London, which held the first rank for generatious, not only lost the lead a short time ago to the American metropolis, but has been crowded into third place by Antwerp.

Next in order come Hamburg, Hongkong, Liverpool, Montevideo, Marseilles, Singapore, Cardiff, Kobe, Genoa, and Buenos Aires.

Rong, Liverpool, Montevideo, Marseilles, Singapore, Cardiff, Kobe, Genoa, and Buenos Aires.

It is a fact worth noting that fwo South American cities are now among the leaders. The progress of Japan is evidenced by the appearance in the list of Kobe, its chief port, which has now a foreign commerce almost half as large as that of New York, although not a building was erected on the sort where the ing was erected on the spot where the city now stands until years after Com-modore Perry opened Japan to the commerce of the West.

#### THE WESTERN FAIR London, Ontario.

The management of the Western Fair, London, Ontario, are sending out this week their Prize List, Entry Forms and other kind of advertising matter announcing their coming Exhibition in September. The dates are September 6th to 14th. This is the oldest Exhibition in Canada and it is becoming more and more popular each year. The prize list contains some very valuable information for intending exhibitors. From the breeder's standpoint this is one of the best Exhi-Litions held, as a large number of buyers always attend in order to secure the best animals that can be obtained. The parade of the Live Stock daily is something of great interest and attracts large crowds, Stockmen should include this Exhibition in their list. Write the Secretary, A. M. Hunt, London, for prize lists and all information information.

## He Got the Limit.

There was, not long since, a venerable and benevolent judge in Paris, who, at the moment of passing sentence on a prisoner, consulted his associates on each side of him as to the propen penalty to be inflicted. "What ought we to give this rascal, brother?" he said, bending over to the one upon his right. "I should say three years," "What is your opinion brother?" to the other, on his left. "I should give him about four years." The judge (with benevolence) — "Prisoner, not desiring to give you a long and severe term of imprisonment, as I should have term of imprisonment, as I should have done if left to myself, I have consulted my learned brothers, and I shall take their advice. Seven years!"

## How to Gather Fish Worms.

fish worms is timely:—
"You take a broom handle three and a half feet long, drive it into the spot likely to be inhabited by angle worms. Leave about six inches of an end sticking up. Then take a rough board and rub the top of the broom. The rubbing will cause a vibration of the earth and the worms, angry and disturbed, will work their way out of the ground. A fellow can get a pailful of worms in a short time."

Good Old Ontario.

Sheffield, Eng., Daily Independent. Ontario has well been named "The Garden of Canada." It contains some of the loveliest fruit farms in the world. Fruit that in England will only grow under glass and with the tenderest care, is produced in the most lavish abundance, notably peaches, grapes, lemons and tomatoes. Last year, in her 338,258 acres of orchards, she produced 75 per cent. of the fruit grown in Canada, the value of the same being three million pounds. Although four times as large as England, the thickest populated province of Can-ada, Ontario contains only twice the number of people there are in Glasgow. She has an area of 140,000,000 of acres, and only one-third of these has yet been surveyed. There are still 118,000,000 acres belonging to the crown, and con-taining every form of agricultural land and mineral wealth known to man, only awaiting his advent to yield it to him with bounteous hands.

What officials believe to be the biggest swindle ever successfully worked in Detroit, was uncovered last week when swindle ever successfully worked in Detroit, was uncovered last week when Prosecutor Shepherd raided the offices of Prof. H. Samuels, arrested the professor and seized samples of a solution of sugar, salt and water, being sold to the public at \$5 per two ounces. The professor was released on order of Justice Stein on \$1,000 bail. This "remedy was sold to the professor's patients for the cure of every disease with three exceptions, from heart trouble to tuberculosis. No matter what the ailment, a cure was affected, according to the professor—and thousands of testimonials he proudly shows—by placing a few drops in the eye three or four times a day. And the professor found buyers for his sweetened salty water. He not only found buyers for the first bottle, but they came back for more. They have come for so much of it that the professor has accumulated property enough to secure a rating in Bradstreet's from \$350,000 to \$400,000. His receipts average from \$12,000 to \$16,000 monthly. He employs thirty helpers, includes twenty-five girl stenographers, ricks around in a big touring car and he maintains his wife and daughter at the Hotel Pentchartrain. at 'the Hotel Pentchartrain.

An interesting hanging garden can be made by sowing a large sponge full of oats or wheat. Place it for a week or ten oats or wheat. Place it for a week or ten days in a shallow dish containing a little water; and, as the sponge will absorb the moisture, the seeds will begin to sprout. When this has fairly taken place, the sponge may be suspended by means of cords from a hook in the top of of a window, where a little sun will enter. It will thus become a living mass of Now that the fishing season is at hand, a new labor saving device for gathering labor saving device for gathering moisture.

## ST. VITUS DANCE IN YOUNG CHILDREN

A Striking Example of its Cure By the Tonic Treatment.

St. Vitus dance is the commonest form St. Vitus dance is the commonest form of nervous trouble that afflicts young children, because of the great demand made on the body by growth and development, and there is an added strain caused by study. It is when these demands become so great that they impoverish the blood, and the nerves fail to

mands become so great that they impoverish the blood, and the nerves fail to receive their full supply of nourishment, that the nervous debility which leads to St. Vitus dance begins.

The remarkable success of Dr. Williams' Pink Pills in curing St. Vitus dance should lead parents to give this great blood-building medicine to their children at the first signs of the approach of the disease. Pallor, listlessness, in attention, restlessness irritability are all symptons which early show that the blood and nerves are failing to meet the demand upon them. Here is proof of the power of Dr. Williams' Pink Pills to cure this trouble. Mrs. J. W. Towns, Oshawa, Ont., says:—"At the age of eleven my daughter was attacked with St. Vitus dance, and despite all we did for her the trentle grown in the strentle grown i eleven my daughter was attacked with St. Vitus dance, and despite all we did for her the trouble grew rapidly worse. Soon she was scarcely able to walk, her body and limbs jerked and trembled so, and she was quite unable to feed herself.

and she was quite unable to feed herself. When she would lie down she would be unable to rise without assistance. As nothing was helping her I wrote a friend whose daughter had been similarly affected, and she advised the use of Dr. Williams' Pink Pills, which had cured her child. I at once got a supply of the Pills, and even the use of the first box Pills, and even the use of the first box seemed to show an improvement. By the time five boxes were used she was completely cured and has had no return of the trouble since."
