Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured covers/  
Couverture de couleur
- Covers damaged/  
Couverture endommagée
- Covers restored and/or laminated/  
Couverture restaurée et/ou pelliculée
- Cover title missing/  
Le titre de couverture manque
- Coloured maps/  
Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black)/  
Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations/  
Planches et/ou illustrations en couleur
- Bound with other material/  
Relié avec d'autres documents
- Tight binding may cause shadows or distortion along interior margin/  
La reliure serrée peut causer de l'ombre ou de la distortion le long de la marge intérieure
- Blank leaves added during restoration may appear within the text. Whenever possible, these have been omitted from filming/  
Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments:  
Commentaires supplémentaires:

- Coloured pages/

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public  
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives  
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

**INTRODUCTORY REMARKS**

AND

**EXPLANATIONS.**

---

Custom has not yet fixed any invariable Standard for Saw-logs ; for although a log, 12 feet in length and 22 inches in diameter at the small end, is generally understood to be a Standard log, yet in a contract or sale of logs the size to be adopted as the Standard is always a matter of agreement between buyer and seller. It is therefore necessary, in endeavouring to fill up the void which is acknowledged to exist in the want of tables for facilitating the computation of the contents of saw-logs, to give the various Standards which are in use. The author has prepared such tables with great care and labour, and now brings them before the public, trusting that they will be found useful in saving time and trouble to those engaged in the branch of business to which they relate.

The decimal system has been adopted in this work, the advantages of which are manifest in all commercial matters.

The tables on pages 1 to 30 inclusive will enable a person having the measurement of a lot of logs, of various lengths and diameters, to ascertain with very little trouble how many logs of 12 feet in length and 22 inches in diameter will contain exactly an equal quantity of timber.

Those on pages 31 to 60 will serve to convert logs into the Standard of 12 feet by 21 inches.

Pages 61 and 62 contain tables for reducing logs to the Standard of 20 and 19 inches respectively : and pages 63 and 64 are intended for Spruce logs, when it is desired to convert them into the Standards of

16, 15, 14 or 13 inches. As however these Standards are not so much in use as those of 22 or 21 inches, the equivalent of one piece only, of each length and diameter, is given. They are carried out to four decimal places to insure greater accuracy when the number of logs is large. To make use of them, multiply the number of logs of any length and diameter by the equivalent of one log of those dimensions as shown in the table; in the product, place the decimal point to the left of the fourth figure from the right.

The Standard of 13 feet by 19 inches, given on page 65, is used in some parts of the west, though not in this section of the country.

The table on page 66 will show the exact contents of logs in board measure, (that is, 1 foot square by 1 inch in thickness;) and that on page 67, in cubic feet, inches and parts. Many arbitrary rules are used which purport to give the produce of logs when sawn up, but so much depends on the dimensions into which the timber is sawn, the thickness of the saws and other peculiarities which vary in different localities, that the author has thought it best to give the *exact contents*; merely adding, that in sawing logs into 3 inch deals as far as practicable, and into 2 inch and boards at the outside, the loss from saw-dust, slabs and edgings is found to be a little more than one fourth; there is however a further loss arising from butting and edging off defective parts; varying of course with the quality of the timber. In sawing altogether boards the waste is greater, owing to the increased number of cuts.

Montmorenci, October 1863.

STANDARD OF 12 FEET BY 22 INCHES.

Logs 12 Feet long.
