GOOD NEWS

SLAVS LAUNCH FRESH ONSETS GAIN SUCCESS

Russians Advance on Sereth River Front, Taking Prisoners.

FOE FIGHT FIERCELY

Germans Offer Stubborn Resistance to Ally's Offensive.

Special Cable to The Toronto World. LONDON, Sept. 24.—Inaugurating a series of stubborn battles at various places between the Rumanian frontier and the Pripet marshes, the Russians struck heavily in the region of Nannuiv-Kharbuzov on the upper Sereth River, captured important positions from the Austrians and took 1,500 Austro-German prisoners. The Russians find that the Germans are making a stubborn resistance, but it is believed that they surprised the enemy by striking him on the upper Sereth. It is recalled that the battles just begun resemble those with which the Russians initiated their big offensive last June. After the capture of the Teuton positions on the upper Sereth River, the foe launched terrific counter-attacks, but his strong resistance to the Slav advance was overcome. The Russians affirm that all the counter-attempts of the enemy were repelled by their fire. The German version of this fighting differs from the Russian. It asserts that Russian masses again attacked the Teuton lines between the Sereth and the Strpa Rivers north of Zorobov and that they penetrated the front near Mansov, but that they were ejected in a counter-attack, leaving 700 prisoners and seven machine guns in Austro-German hands. It is claimed by the Teutons that they regained some ground in the Carpathians on the eastern slope of Combrovina and that they gained ground between Ludova and Babaludova. Tenacious fighting is in progress northeast of Kiribaba.

SWISS GOVERNMENT WILL NOT INTERVENE

Refuses to Consider Petitions in Favor of Peace.

GENEVA, via Paris, Sept. 24.—The Swiss Government, replying to several petitions that it intervenes in favor of peace, officially states that it considers the moment inopportune, and that any intervention would have no chance of being taken into consideration by the belligerents. Any action in this sense, it adds, would even risk being considered by the entente as an inimical gesture. The federal council, says the official note, therefore cannot at present take into consideration the wishes of the petitioners, but is willing, with other states, to prepare common intervention as soon as such action would be efficacious.

SECOND WAR LOAN ALMOST DOUBLED

Total Amount May Reach Hundred and Eighty Millions or More.

MINISTER IS PLEASED

Declares It a Striking Testimony to Financial Strength of Canada.

Special to The Toronto World. OTTAWA, Sept. 24.—"A Great Britain and elsewhere abroad the notable success of the war loan issue cannot fail to be regarded as further and infallible evidence of the spirit of Canada respecting the war and her invincible determination to persevere to the utmost of her power until final and conclusive victory is achieved." This was the comment of Sir Thomas White today in announcing that the second domestic war loan had been a splendid success. The lists closed on Saturday. "With so much mail still to arrive," said Sir Thomas, "it is not possible to make an accurate official statement as to the total amount of subscriptions. At midnight, Saturday, there had been recorded by the department an aggregate of one hundred and sixty-nine millions of cash subscriptions." (Continued on Page 4, Column 2).

BRITISH EXPEL BULGARS FROM BANKS OF STRUMA

Open Fresh Offensive in Balkans North of Saloniki, Capturing Villages—French and Serbs Advance.

Special Cable to The Toronto World. LONDON, Sept. 24.—Fighting on the front north of Saloniki assumed larger proportions today with the joining of the British in action east of the Struma River and their capture of Jemmita. After driving the Bulgarians before them the British attacked Kara Dikovbala where they encountered strong opposition. The Serbians have begun an attack at Starokovb in the mountain chain that continues in the Kaimakalan range in Macedonia in order to provide an opening for their advance on Monastir. The French have also fought and won an action started by the foe in the vicinity of Hill 1560, and they also made some progress northwest of Florina. The British entered into action by throwing forces across the Struma River in three places. The enemy was surprised and fled, setting fire to Jemmita, and driving the Bulgarians before them to Kara Dikovbala. In the fighting for this place strong opposition from the enemy was encountered and after the British had driven him out, according to some reports, he opened a counter-attack from Naveljen. This was observed by British artillerymen, and batteries of naval and field guns opened fire on the oncoming columns and entirely dispersed them.

The British battlefield is north of Kopriva and in the district of Lake Tahnino, towards which the British are advancing. In the district between Monte Beles and the Vardar River the British vigorously resumed their artillery bombardments, but owing to a mist which came on east of Nemhori, the artillery work in the Nemhori sector is being impeded. British scouts continue aggressive, making many raids. The news that the French are advancing northwest of Florina shows that they have made considerable progress in the fighting of the past few days. The Serbians are also advancing in the district east of the Cerna River to the northwest of Kaimakalan and they have taken some prisoners. They are now attacking Starokovb, an important position in the Eouka part. This fortress dominates the right side of the valley between Florina and Monastir. The left side of this valley is dominated by the Pabu mountain chain. Before the advance on Monastir can begin, the allies must force the Eouka-Baba positions. Another strong defensive position is the fortress of Kenali, lies in front of the Serbians. It consists of 16 lines of German trenches.

ALLIES' AIRMEN DESTROY FOES WRECK TRAINS

Fifty British Machines Attack Junction Behind German Front.

DETONATE EXPLOSIVES

French Machines Smash Fifteen Teutons—Make Raid on Lille.

Special Cable to The Toronto World. LONDON, Sept. 24.—Heavy fighting in the air between allied and German aeroplanes, and a big British attack on an important railway junction behind the Teuton front marked the aerial operations this week-end. British headquarters reports that about fifty British machines carried out the raid on the junction, doing much damage. Bombs thrown from the aircraft blew up two trains laden with ammunition and caused many other violent explosions. British aeroplanes also attacked many other railway works and sidings of the enemy, as well as aerodromes, with success equal to the raid on the junction. The Germans say Lille was raided by British machines. In air fights British machines disposed of three German machines by destroying them, and five others by driving them to the ground. Many others broke off the fight and were seen to descend steeply. Make Five Bombing Raids. The British aviators on Sunday carried out five bombing raids on railway stations and communications of the enemy, inflicting much damage. They also brought down in fights five German aeroplanes and destroyed them and they so damaged two others that they had to descend. The French airmen on Sunday and Saturday night dropped bombs on German factories in the districts of Rombach and Thionville. A zeppelin which flew over the Calais district was violently bombed by anti-aircraft batteries and driven off before dropping any projectiles. Destroy Foe Machines. Fifteen German machines were destroyed by the French in combat. The bulk of the air fighting was caused by aircraft of the enemy crossing the French lines at various points between the Somme River and the Vosges for the purpose of reconnoitering. The alert French machines headed off the foe and in one case pursued him for miles over his own lines. Twenty-nine engagements were fought by the French airmen on the Somme front alone and Lieut. Guynemer brought down his 17th and 18th aeroplanes. Concerning the western front the Germans report that numerous aerial engagements were fought within their own lines and also back of the lines of the allies. They claim that they shot down 24 machines, 20 of them falling on the Somme front. They also admit that Lille was bombed by allied machines, as well as Mannheim. An airship of theirs, the Germans say, also attacked British military establishments near Bourgoigne. The French official report on aviation work issued today follows: "Yesterday enemy aircraft having shown unusual activity, our pursuing (Continued on Page 5, Column 6).

I. Construction Battalion, Vancouver; 1st Field Garrison Horse, Winnipeg; 1st Engineer naval draft, Details.

TWO ZEPPELINS BROUGHT TO EARTH TWELVE MAKE A RAID ON ENGLAND

ALLIES REPEL GERMANS CONTINUE BOMBARDMENT

Foe Fails in Stubborn Attacks Against British and French in Picardy—Curtains of Fire Cause Teutons Heavy Losses.

Special Cable to The Toronto World. LONDON, Sept. 24.—Both the British and the French were called on to repel German attacks on the Somme battlefield today, and the enemy suffered severely from their gunfire. The Germans attacked the British west of LesBoisels, south of the Ancre, with large forces. These were caught by effective barrages and driven back. Stubbornly the foe came on for the second and third time, only to meet with severe rebuffs. The attack on the French was launched against the farm of L'Abbe Wood in the vicinity of Comblis. The Germans attempted to force forward the movement, but their progress was checked by the sharp eyes of French observers who detected the advance into a retreat in short order. As the Teutons began to be forced back, they dispersed under the rain of French shells. The effectiveness of the French fire was shown by the many dead left behind by the enemy in his rout. Destroy Foe Gunpits. The artillery action on this battle-

front continued heavy. The advantageous positions lately seized by the British enabled them to find the range of German batteries, gun emplacements, gunpits, and other organizations. British artillerymen noted the destruction of ten German gunpits from their fire in one section of the front. The British also damaged 14 other foe gunpits and they blew up five ammunition pits. In bombarding a village which their airmen had noted was much used by the German transport for supply purposes the British caused a big fire to break out in it by their shells. There was a hurried scattering of Teutons as the projectiles began to fall, and much loss of supplies was sustained by the enemy. The Germans attempted to attack the French in the Vosges and were repulsed. An attack launched against French trenches on Cote du Poivre in the Verdun region was also repulsed. The German official report said today that the great battle of the Somme was again in full swing, and that Anglo-French attacks last night near Courcolette, Rancourt and Bouchavesnes failed.

CANADIANS HOLD ALL THEIR GAINS

Every Inch of Ground Taken Remains in Their Hands.

COUNTER ATTACKS FAIL

Casualties Increased by the Impetuosity of Some Parts of Line.

Canadian Associated Press Cable. LONDON, Sept. 23.—The Canadians are clinging to every inch of ground so brilliantly taken, and are consolidating their hold daily despite torrents of rain which made the scanty cover more like a series of lagoons than entrenchments. They have had to repel several fierce counter-attacks towards the end of the week. The enemy made a determined effort early Saturday against that position. The German artillery still pours shells heavily upon the Canadian line. Canadian casualties earlier in the week were increased by some measure by the impetuosity with which certain portions of the line went ahead. A large proportion of the wounded are not unduly serious. A serious mishap to one of the tanks, which advanced with the Canadians, is related by eyewitnesses. The tank charged gallantly against trunk of fallen tree and branches which were already torn off by shell fire. The front part of the tank surmounted the tree, but the tree then began rolling with the tank. This encumbrance compelled the new engine of war to come to a halt. The Canadian infantry went forward leaving the tank sufficient amount of free space in which to operate at a distance. Sir Hamar and Lady Greenwood arrived in Montreal on their way to Lindsay and Toronto.

FOE BLOWS OFF TOP OF MONTE CIMONE

Austrians Force Italians to Evacuate Portion of Summit in Trentino.

ATTACKS PEAK OF SELF

Ally Also Repulses Stubborn Counter-Attacks on Carso Plateau.

Special Cable to The Toronto World. ROME, Sept. 24.—Owing to the explosion of mines under the summit of Monte Cimone in the Trentino by the Austrians, the Italians were forced to evacuate 100 yards of this position, according to a communication from general headquarters today, but they are keeping the peak under a curtain of fire from their artillery. In reporting this operation the Austrians claim that they took 378 men and 13 officers prisoners. The Italians say that the enemy is still attempting diversions on the Trentino front. They repulsed an attack in the Ledro valley, and in the Astico they lost part of the Cimone summit by the explosions of mines by the enemy preceded by a heavy artillery fire. The Austrians were repulsed in an attack in the Sugana valley. In the upper Cordevole the Italians captured an advanced position near the summit of Monte Seif. They shelled the military station of Sillian and the railway in the Drave valley, and they repulsed stubborn attacks by the enemy on the Carso plateau. Women, Girls and Priests Executed by Huns in Belgium

AMSTERDAM, Sept. 24.—Press despatches from Maastricht, Holland, today says that 17 persons have already been executed as a result of recent trials at Hasselt, Belgium, on the charge of espionage. In all 22 persons were condemned to death, among them four priests, three women and two young girls.

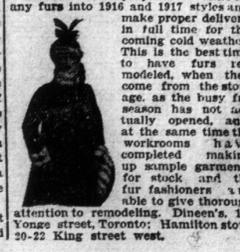

LONDON, Sept. 24.—Of the 12 big zeppelins which invaded the British Isles last night to deal death and destruction from the skies, two today lay stark and black masses of steel and aluminum in the little Village of Mangold, Essex County. They fell victims of the anti-aircraft defenses of London and outlying districts. One came down a flaming torch, as did the zeppelin L-21, destroyed three weeks ago, while the second, disabled by gunfire, effected a landing, which saved the lives of the crew, 22 in number, who tonight are prisoners in England. The crew of the first raider died in the consuming flames of their own ship, but they were not so terribly charred as their predecessors. This latest raider to light her own funeral way on English soil, collapsed and was consumed much more quickly than the L-21. It is possible, too, that some of the men were still living when the great vessel struck the ground. The captain's body was found some distance from the wreck. The death and burning of the first zeppelin was witnessed by tens of thousands of London's residents, but the wounding and descent of the second raider was a matter of doubt, until today's official statements were given out. Few details are available of this second raider's condition, but it is reliably reported that the crew surrendered to special constables. Many who saw the shrapnel bursting like skyrocket about the invader, which subsequently caught fire, think there must have been several direct hits. Many aeroplanes were aloft and attacked the zeppelins from all sides. 23 Killed, 99 Wounded. The raiders took a heavy toll of lives before their destruction, 23 persons being killed and 99 wounded in the metropolitan district of London. Two persons were killed, probably four; and 17 were wounded in the provinces. The property damage, while widely distributed, is confined for the most part to small suburban dwellings and shops, although one railway station was damaged, some empty cars being destroyed and part of the tracks torn up. Outside of the London district two persons were killed and 11 injured, in an east Midland town, and it is feared that two other bodies may be buried in the ruins. The missiles dropped by the hostile aircraft caused numerous fires, and demolished or damaged a large number of residences and stores in London. The casualties in the metropolitan area, according to an official compilation, are as follows: "Killed: Men 17, women 5, children 2. Total 24. "Injured: Men 45, women 37, children 17. Total 99."

Roar of Bombs Heard. The roar of dropping bombs was heard in many districts where the raiders were invisible. It is not believed that more than two or three invading zeppelins which crossed the east coast succeeded in reaching the environs of London, and that two of these paid the death penalty given by the greatest satisfaction to the military authorities. Apart from the loss in material, the casualties of the past two raids, it is believed, will have a depressing effect on the morale of the zeppelin crews in the future. Messages from correspondents at various points between London and

the Essex coast, describe the delight of watchers when the raiding airship was brought down in flames about 1 o'clock this morning. People rushed from their houses to points of vantage, when the sound of the guns was heard, and they watched the airship as it proceeded eastward constantly in the glare of concentrated searchlights with shells bursting around it in such close proximity that watchers were convinced hits must have been scored. Suddenly there was a flash, then a burst of flame and a storm of shrapnel as the blazing airship descended slowly, a huge ball of fire still outlined in the rays of searchlights. Londoners Jubilant. Londoners were jubilant today, but there was not the slight resultant enthusiasm as three weeks ago indicating that destruction of giant sky raiders is already taken as an ordinary incident in this unusual world war. The fact that the airships were brought down well outside of London, both last night and September 3, shows the care with which the defenses have been developed. The efficiency in dealing with the raiders was further evidenced by the speed with which the searchlights picked up the first raider that appeared above the suburbs at midnight. Suddenly a searchlight beam shot into the starlit sky. Three more dazzling shafts followed, and within 15 seconds the whirring airships were caught in the coils and the guns began sending up shrieking shrapnel shells. For a minute or two the raider kept its course, then wavered, turned away and suddenly dissolved apparently in thin air. Evidently the zeppelin was beclouded in the smoke, and the lights lost her completely. In the meantime, however, bombs were dropping and red flares were visible as they hit the earth. Then the city was quiet for an hour, the searchlights flashing only occasionally in the hunt for raiders. All London, within the sound of guns and bombs, was out to see the spectacle and almost despair of further excitement, when well to the eastward a tiny glow appeared low in the sky. It looked first like the moon rising red in its last quarter from behind a cloud-bank. From the city it appeared to hang stationary for a minute or more, then glowing redder and redder slowly turned to the perpendicular and streaked into the gloom of the smoky night ground-mist. To the watchers in Essex, however, the spectacle of the flaming, falling zeppelins had all the thrills of excitement which marked the end of the L-21 and they cheered the gunners (Continued on Page 10, Column 7).

## In Draperies

*A Wonderful Medley of Gay Chintzes, of Rich but Sombre Tapestries, of Luxurious Silks and Velvets and Artistic Plain Fabrics that Commend Themselves for Use with Eighteenth and Nineteenth Century Period Furniture.*

IT IS A TRUE romance of art and commerce, the tale that is told by these beautiful fabrics for draperies, upholstery and wall coverings—materials that came into vogue with William and Mary and Queen Anne.

Dutch traders brought from the East the brightly colored *chintz* (Hindu-spotted cloth); English traders marketed in the velvets and silks from Genoa and Florence, and the tapestries and wool work so much used were oftentimes products of the industry of their owners. The great circle of 17-18th century English designers made their own styles—brocaded or printed materials in Eastern design, classic medallions and wreaths or stripes according to the fancy of the particular artist. And all these are to be found in the most representative collection of charming fabrics that distinguishes the Drapery Department.

There are chintzes and shadow cloths galore, with strange glowing flowers springing from climbing branches, on which are perched long tailed birds, naturalistic roses and lilies with plenty of foliage, as affected by the English-Dutch school of William and Mary and Queen Anne. There are the strange exotic designs and the Chinese patterned chintzes that Chippendale delighted in, in a vast range of lovely colors, both in the 36-inch width at prices ranging from 35c to \$1.00 a yard, and in the 50-inch width at prices ranging from \$1.75 to \$3.00 a yard.

Tapestries are exploited in magnificent array in a host of verdure designs and quaint large floral effects in cool greens, enriched with browns, rose and a hint of blue. These range in price from \$1.50 to \$12.50 a yard.

Among the silk brocades may be noted several typically Adam designs with the characteristic medallion and festoon in charming shades of grey, blue, champagne, rose, green and mulberry, also Chinese Chippendale brocades at \$2.50 and \$3.50 a yard.

## In the Multitude of Treasures Housed in the Furniture Building

*Specially Noteworthy is the Splendid Collection of Period Furniture Featuring for Tuesday, Dining Room and Bedroom Suites in the Eighteenth and Early Nineteenth Century Styles, So Tremendously Popular at the Present Time*

NEVER was a greater axiom written than the phrase: "A thing of beauty is a joy forever," and in no way can it be more ably illustrated than in the possession of furniture which by reason of its exquisite proportions and its well balanced lines must be an aesthetic gratification to the possessor and whoever should happen to view it.

And these qualities are characteristic to a superlative degree of the graceful Adam, the luxurious Chippendale, and stately Queen Anne and William and Mary designs specially commended to your notice for Tuesday.

These abound in the Furniture Building, and are to be had in all manner of sizes and designs, the following having been selected as good examples of type and moderate pricing.

First, the Adam dining-room suite, which appears in the illustration at the foot of the page. This is carried out in the dark mahogany favored by the Adam Brothers, and is made of beautifully matched wood. With its classic grooving, occasional carved medallions, tapering legs, spade feet and oval drop handles in antique finish, it is very characteristic of the simpler furniture by these designers.

A charming dining-room suite in William and Mary design, unusually dainty and effective, is made of walnut, inlaid with ebony. The sideboard is particularly striking with a low back between two small drawers, shelf tops. It has two deep centre drawers between side cupboards, having plain round medallions and pear drop handles of antique finished brass. The dinner waggon is similar in style, but with undershelf; the 4-shelf china cabinet opens with a centre door; the table is oval; the 6 chairs have arched panel backs, and tapestry seats, and all are characterized by the well known cup and ball legs with curving braces. The price of this suite is \$465.00.

Very handsome is a mahogany bedroom suite after Chippendale, one of its distinctions being the lovely marking and splendid matching of the wood, and another the beautiful carved beaded edges. The twin beds are plain but for this heading and a Chinese motif in the centre of the head and foot pane's, which is given special significance by the graining of the wood. They measure 3'3", and are each \$92.00.

The toilet table in knee hole style, with triple wing mirror, ebony lattice carving at the back, and ornate brass handles. Price \$175.00. The wardrobe chest, with similar paneling to that on the beds, is \$225.00; the nightstand, \$27.50; the writing table, with two drawers, \$72.00, and the panel backed chairs, with Chinese tapestry seats, \$14.50.

Obtainable in mahogany is a bedroom suite in Queen Anne design. The dresser, highboy and dressing table all have the typical arched mirror frames and cabriole legs and antique finished brass handles and key screws in a curious seal design. The bed has arched panels head and foot, and the whole suite is \$130.00.

## In Wall Decorations

*It is Well to Remember that the Walls form a Background for Your Furniture and Yourself, and if in any doubt as to their Correct Treatment, Why Not Call in Expert Advice?*

SOMEONE HAS said that "choosing a wall paper is like choosing a wife—You have to live with your own selection."

And verily it is a thing not to be lightly undertaken! To begin with, there is the aspect to consider, then the function of the room, also the personality of the occupant and style of the furniture.

Sometimes, and in some houses, plastered walls, panels of silk or leather or wainscoting are infinitely preferable to wall paper, and in these, the advice of the professional decorator is well nigh indispensable.

So we would remind you that our staff of artist-decorators includes men who are well versed in every style of wall decoration known to modern art—all the types of the historic periods as well as the latest dreams of the creators of the "new art" movement, and on receipt of a card or phone message, a competent man will be sent to your house, who will give advice gratis, and, if required, will submit color schemes and sketches.

## The Popular Stripes and Pretty Chintz Effects Abound Among the New Papers

Charming, soft neutral tones are a characteristic of the striped papers, which are so eminently artistic both for bedroom and sitting-room use, where a light, dainty effect is desired, and also frequently provide the most effective setting for the early nineteenth century and Empire furniture.

Stripes of varying widths may be seen on satin and damask papers in faint pale shades of green, stone color, buff, light greys and rose, at 60c a roll, and in much the same hues with silk stripes at 35c and 75c a roll.

Quite new among striped papers is a heavy jaspé striped chambray with little leaves scattered over it at infrequent intervals in a greyish tone on buff. This is used with an extremely handsome chintz border in purple and brown tones, with a touch of burnt orange—long tail birds perched on rambling, flowered branches. The paper is \$1.10 a roll, the border 40c a yard.

## Among the Wealth of Carpets of Every Description Your Attention is Specially Drawn to a Group of Axminster Rugs, Another of Wiltons, and Two Groups of Orientals, With the Reminder That the Sale of Oriental Rugs Continues

SOMETHING RESTFUL, something harmonious, and above all something practical. Are these your requirements in a rug? Then consider the merits of the four groups referred to above.

First of all the Axminsters. These are seamless, splendidly woven, with soft velvety pile and in those plain designs for which the more educated (artistically) modern taste evinces such decided preference. The colors, too, are particularly charming—a lovely purplish mauve that is rapidly coming to its own in decorative art, a warm old gold, and a most effective old blue. The first two have plain centres with narrow acanthus border in soft pretty colorings, and the last is procurable with a plain or latticed centre and border in vine design. These are most effective in sitting-rooms and bedrooms.

Size \$110-6; Price \$52.50. Size \$x 12; Price \$60.00. Size \$x13-8; Price \$67.50. Finely woven, English Wilton rugs of remarkably good quality show a splendid range of those small Persian and subdued Oriental medallion designs at once so effective and so popular. For instance, there is a charming Persehan design in amber cream and dark blue, with a background of

China blue. Another more striking is developed in a rich terra cotta shade with Kazee medallions in tan, dark blue and green. In lighter daintier style is a little trailing Persian pattern with curious small oblong medallions in dark blue, green and brown on a cream ground. Other equally attractive designs present a variety that offers a choice for any room in the house.

## Kermanshah and Small Oriental Rugs at Sale Prices

The Kermanshah stands on a plane by itself among modern Oriental rugs, for beauty and delicacy of treatment, in the achievement of well balanced designs, and wonderfully harmonious but subdued colorings. And the very fact of its unobtrusiveness makes it peculiarly suitable for use with period furniture. Some of the rugs are in medallion effect, some show a light feathery tracery picked out with black. Little idea of their surpassing beauty, of the exquisiteness of weave and coloring can be given by the few pieces so briefly described below; suffice it so say that each rug is a picture in itself—interesting as a piece of wonderful tapestry.

Kermanshah Rug, 6.10 x 11.4. Special Price, \$275.00—Cream ground, rose and blue medallion, cream, blue and red border.

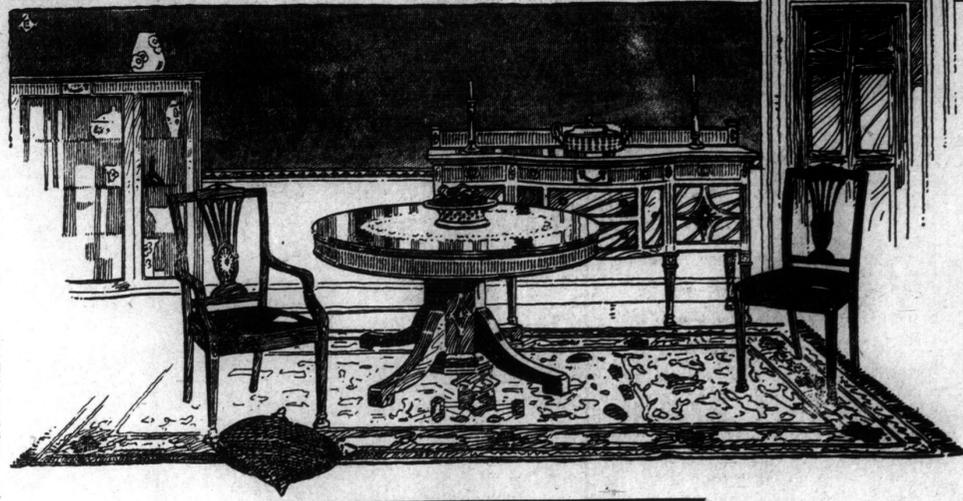

Kermanshah Rug, 8.10 x 10.9. Special Price, \$255.00—Shaded blue ground with medium all-over design.

Kermanshah Rug, 7.4 x 8.10. Special Price, \$225.00—Soft amber ground with corner designs and medallion centre in camel, amber and blue; border in gold and rose.

Kermanshah Rug, 10.7 x 14.7. Special Price, \$600.00—A magnificent example of the weaver's art, a large pear-shaped design, interspersed with feathery lines in intricate design, camel ground; amber, rose and blue border.

Small Orientals for halls, living-rooms, etc., include the well known Hamadan, Shiraz and fine Mossis in medium and dark rich combination. Average size 4.5 x 6.5. Special value, \$45.50.

STOCK EXCHANGE KEEPS UP RECORD

Sales Again Exceed Million Shares on Wall Street.

U. S. STEEL LEADS ALL

Principal Copper Issues Also Command Further Advances.

NEW YORK, Sept. 23.—Today's market session was a fitting climax to the five preceding sessions of the week, sales exceeding 1,000,000 shares, a record unequalled by any week-end for many years.

Trading was again dominated to an enormous extent by U. S. Steel, the copper, motor and a few other specialties, while shipping issues, equipments and munitions were heavy, or at least irregular. In fact, the market was extremely one-sided, rails falling to share in the movement to any appreciable extent.

U. S. Steel made an extreme advance of 1-4 to 117 1/2, overtopping its previous high record by almost 3 points, which puts it within about 4 points of the preferred.

Other maximums included the leading copper, which was further stimulated by reports of the closing of contracts for foreign interests amounting into hundreds of millions of pounds for delivery in 1917. Anaconda rose to 99 and Utah to 96 1/2, with material advances in American Smelting, Inspiration, Kennecott and National Lead.

Factors were unusually active, with new records for Maxwell at 97, and Stutz at 77. Central Leather also sold higher than before at 73 1/2, these gains being offset by declines of 1 to almost 3 points in Mercantile Marine, Bethlehem and Crucible Steels, Continental Can, Baldwin Locomotive and Suggs.

Continuance of railroad prosperity was indicated by the August report of the Southern Pacific Co., showing a gain of \$1,084,000 in operating income. Bonds were steady, with total sales of \$1,975,000. U. S. bonds were unchanged on all.

MINE STOCKS STEADY FAIRLY ACTIVE TRADE

McIntyre Recovered a Couple of Points of its Recent Loss—Davidson Up.

A firm tendency was displayed in the short two hours session at the Standard Stock Exchange on Saturday. The market was fairly steady, and there were some good buying orders in the market.

McIntyre sold up a couple of points to 144 and there seemed to be little doubt that it would recover its recent loss. Davidson went higher at 47 1/2. Dome Lake was quiet but in strong demand at 87, large blocks being wanted at this price.

DOMINION STEEL Has Now No Debt and Big Orders Ahead for Its Products.

BUYING AHEAD OF THE BOOM

No mining stocks in the world are paying as high dividends on the average as the Cobalt silver stocks, and few mining companies have such strong reserves and resources to guarantee future dividends. These dividends have been made and paid on silver as low as 46c an ounce, and never with silver, until recently, above 60c an ounce.

The copper companies are now offering on 28c to 30c a pound for copper, because of tremendous war demands, whereas the peace price was anywhere from 18c to 19c. Silver is not a war commodity except in its use as a money metal, and although the war will send the price much higher many believe that silver will see a still higher price on the return of peace.

The increase in silver, therefore, has a material bearing on all Cobalt stocks. Now that new, deep finds have proved that Cobalt has taken on a fresh lease of life, silver shares as an investment and speculation are being viewed from an entirely different aspect and a revival of the boom of early days is naturally expected to follow.

Nipissing, with its \$2,000,000 reserve, should, and will, most likely, declare a bonus within a short time, and other companies proportionately as financially strong, may be expected to follow suit.

Peterson Lake, for instance, is returning 30 per cent. to the investor, and he has the speculative possibilities in addition. Recognition of such conditions by Wall Street is already being taken advantage of and the basis of a boom established. An upward movement in the silver will induce speculation in the gold shares, and the announcement of the final act in the McIntyre merger will be the signal for the start.

Reference to the tremendous advances made in some copper stocks gives an inkling of what can take place when public speculation invades a market, and blocks of the shares of Ontario mining companies are being bought by the wise ones in advance of the big movement.

Markets Are Booming the World Over

All metal stocks have a big advance with the exception of silver shares, and the general consensus of opinion is that they are next in line and the time is at hand. Silver is hovering around 69 cents per ounce, a price at which all producing companies are earning big money, and predictions of an advance to 80 cents per ounce and even higher are being made by New York bankers, who should be in a position to know.

OUR PERSONAL OPINION IS COBALT ISSUES, WHICH ARE MORE OR LESS NEGLECTED AT PRESENT, ARE GOING TO BE RIGHT OUT IN FRONT, AND WE FEEL THERE ARE A NUMBER OF ISSUES WHICH WILL ADVANCE TO PAR AND ABOVE, THEREBY SHOWING AT LEAST 100 PER CENT. PROFIT FROM PRESENT LEVEL.

At the present prices of a great number of Cobalt issues the net earnings on the purchase made at this level are all the way from 15 per cent. to 30 per cent. on your investment, and an advance in silver means an increased earning power.

PRODUCTION COSTS ARE NO LARGER WITH SILVER AT 50 CENTS THAN WHEN SILVER IS BRINGING 70 TO 80 CENTS, WHILE THE EARNINGS ABOVE A CERTAIN LEVEL ARE LARGELY INCREASED.

We wish to place before you for your approval the facts as they exist with reference to CALUMET AND MONTANA CONS., as we believe it is one of the best speculations that are offered in any market today.

A little over two years ago the Calumet and Montana Cons. took over the Airgrid claim in the Cobalt Camp, from the Airgrid Mining Company, under a working lease, with an option to purchase under very satisfactory conditions.

This deal was effected just previous to the Declaration of War and in consequence thereof the further development of the property was delayed until July of 1915.

The development work which had been done on the property previous to the acquisition by the Calumet and Montana Cons. consisted of the sinking of a vertical shaft to a depth of 225 feet, cross-cutting of some 150 feet on the 150-foot level, and about 250 feet on the 225 foot level. A number of good veins were uncovered, but the idea was to open the mine on a large scale and no attention was paid to mining. Every one is thoroughly familiar with the results of the panic of 1914 and the drop in silver to its low level of 50 cents, with little demand from the Great East.

This was the condition of affairs when the Calumet and Montana Cons. took charge in July, 1915, and started work in a systematic and practical manner, George G. Thomas, C. & M. E., taking full charge of the property, and after renewing all equipment both on surface and underground, actual mining was inaugurated about October 1st, 1915.

A station was cut at the 90-foot level and the development of the property was started from that level. The shaft was sunk on what is known as No. 1 vein, and at a depth of 45 feet, silver values assaying up to 645 ounces were found. No. 1 vein goes down south of the shaft from the 50-foot level, and was picked up on the 90-foot level in a crosscut of 47 feet. A raise here at a height of 35 feet cut an ore-body. This ore body was then drifted upon for a distance of some 90 feet west from what is called the 60-foot level, and Engineer Thomas' estimate of this ore body is as follows:

A vein of smallitie, which would pick down to 400 ounces of silver, was developed, averaging in width from 6 inches to 14 inches. In addition the mill rock on both sides of this ore body is about 2-1/2 to 3 feet in width, of good milling values. No stoping has been done and the only ore taken out was from actual development.

The back is estimated to be from 27 feet to 40 feet. This is a very creditable showing when it is taken into consideration that the face of the drift is still in ore and the drift has some 200 feet further to go to the Nova Scotia line, where good ore was mined in the early days.

This property has an exceptional showing of veins on surface and to cut these a depth of 400 feet is being driven north by northwest to what is known as the Biskay vein, and which is reported to have been the real big vein of the Nova Scotia or Dominion Reduction property. This crosscut is now in over 150 feet, and although a number of promising veins have been cut, they have not been prospected as the objective is the Biskay vein.

On the 60-foot level a crosscut is being pushed forward in a northeasterly direction to intersect a junction of veins, which give some values on surface, and which are very highly regarded by Mr. G. G. Thomas, C. & M. E., and also Ernest E. MacCarthy, the manager.

The crosscut at the 60-foot level is now in over 170 feet, and in altered ground, and a two-inch vein of calcite was encountered in last week's development. In addition to the above development, about the centre of the property is a huge fracture or vein system, and power lines are now being laid to this point where a new shaft will be sunk.

We wish to say here not a foot of development has been done which did not give great encouragement, and urge the management to rush the work. A description of the property would be about as follows: Bounded on the west by the Dominion Reduction or Nova Scotia. This makes the milling facilities ideal, since the Dominion Reduction mill is only 1000 feet away and regarded as the best custom mill in the camp. On the north the National Mine Company is sinking a shaft to the 1100-foot level, after having been very successful in finding ore on the property under the management of the King Edward.

To the south is the Parah and Reliance. The management of the mine is in the hands of Ernest S. MacCarthy, who came to the company from the Nipissing, and who has been 9 years associated with the mine. Mr. Geo. G. Thomas, C. & M. E., manager of the Nova Scotia, Dome Lake and Hudson Bay mines, has been retained as consulting engineer. The mine is sinking a shaft to the 1100-foot level, after having been very successful in finding ore on the property under the management of the King Edward.

### New Fabrics for Hangings and General Uses

There are Chintzes, Scrims, Madras Muslins, Nets, Plain Repps, Casement Cloths, etc., from the mills of Europe and United States. These materials are now being displayed in the department, marked at unusually attractive prices. It has been difficult to get delivery owing to the conditions in Europe, but we are satisfied, now that we have them here, that without doubt we are showing a better line and more exclusive and extensive one than ever before, and the prices are as low as ever. The quality is the regular Simpson quality, which is always best.

**Chintzes**—Tables loaded down with New Chintzes, 30 and 36 inches wide, in a profusion of colorings; all beautifully blended and well printed; at prices ranging from 14c to 25c per yard.

**Scrims and Marquisettes**—An enormous variety to select from, in cream or ecru, 36 to 50 inches wide. In plain and with pretty bordered effects.

**Madras Muslins and Nets**—Lots to select from, including all the new patterns, both floral and trellis, 36 to 50 inches wide; in cream or white. These fabrics are mostly in demand for curtains for the windows of the home. There are designs to suit any style of room.

**English Repps and Casement Cloths**, in greens, browns; these are exceptionally fine fabrics for curtains and portieres; 50 inches wide.

**Tapestry Bandings**—Just arrived from the mills in England, new designs, new colorings; for applications on plain repps for portieres and window curtains, in a variety of widths; at 20c and 25c per yard.

**Lamp Shades**—We are showing our new designs in Lamp Shades, which can be made to order any style and any color, and trimmed to your own ideas; we have also an extensive collection of the necessary lamp shade trimmings and frames.

**Renovate Your Furniture Now**  
Thousands of yards of Tapestries just arrived from the mills in England and Italy afford beautifully blended colorings and all-over verdure designs. Patterns to select from that will suit almost any room decoration. Our aim when purchasing these tapestries a year ago was to combine economy with the most artistic effects, and this we feel we have accomplished. The tapestries we are showing are as good as, and, if anything, better than we have shown in previous years.

### New Tapestries

At \$1.50 Per Yard—English Tapestries, in small conventional and verdure effects, 60 inches wide.

At \$1.65 Per Yard—English and French verdure effects, 60 inches wide.

At \$1.85 Per Yard—This is perhaps our best line, showing verdure tapestries, in beautiful autumn shades of browns and greens, 60 inches wide.

At \$2.50 Per Yard—French and Italian Tapestries, in blues, browns and greens.

At \$3.50, \$4.00, \$4.50 and \$4.75 Per Yard—A large assortment of unusually fine designs of these English and Scotch Wool Tapestries; floral and conventional designs, in all shades of colorings; 60 inches wide.

### Re-Upholstering

Our staff at our factory is at your service.
