## P R E F A C E.

THE Publisher presents his first SAINT JOHN CITY DIRECTORY to the public with the hope that it will be found in reality as in name a complete and reliable record of the names and occupations of the citizens of Saint John,—having spared neither expense nor trouble to make it such; and with that end in view he has, at great additional expense, added thereto a full and correct STREET DIRECTORY of the city. There is also incorporated a complete DIRECTORY of the inhabitants of PORTLAND—that thriving off-shoot of St. John.

In the Street Directory, besides names, will be found inserted all vacant houses and lots, which will be found of great use to the capitalist and parties in search of houses. Much difficulty was found in obtaining this, owing to the imperfect numbering of the streets, but success crowned exertion.

The Historical Sketch of St. John will be found well worth a careful perusal; and the Appendix contains an extensive budget of useful and general information, including full lists of office-bearers of the different Societies, Churches, Institutions, Freemasons, Temperance and Orange Lodges, &c., &c.

Advertisers will find their Advertisements carefully and properly displayed; and the full and copious Indexes will enable the public to discover the great extent and magnitude of the various branches of trade carried on in our good city of Saint John.

In conclusion he returns his best thanks to all who have aided him in bringing to a successful issue this City Directory; and while perfection is unattainable, trusts that it will be found as near thereto as diligence and perseverance could reach.

# HUNTOON PATENT GOVERNORS.

Regular Speed warranted without any variation.

Now in use upon hundreds of Engines.

NOTE.—To any corporation or firm who wish to test practically the value of this invention, we make the following proposition :

We will forward the Governor on receipt of order for the required size ; and if it fails to prove itself a perfect and absolute controller of the speed, an economy in fuel, or great increase of power, we will receive it back, paying all charges of transportation ourselves, and render no bill.

We refer by permission to Messrs. JEWETT & BRO., and others using them in St. John, N. B.

PLEASE SEND FOR DESCRIPTIVE CIRCULARS.

# HISTORICAL SKETCH OF ST. JOHN.

PREVIOUS to 1783, that portion of the Lower Provinces now known as New Brunswick, under the name of Sunbury, formed one of the counties of Nova Scotia. More than twenty years before the separation of New Brunswick from the older province, a settlement existed at Manguerville on the river Saint John, and the settlers, who were chiefly Congregation-  
alists, obtained a grant of land for a glebe in connexion with their church. Subsequent to 1758, a few families, chiefly of German extraction, who had removed from the other American colonies, or who had lately immigrated from Europe, went into occupation of the lands, formerly held by the French in the district now divided into Albert and Westmorland Counties, under agreements to purchase from the Nova Scotia government, or as tenants to joint stock companies, which had bought the land on speculation. The remaining portion of the present province, with the exception of a few districts peopled by the *habitans*, who had been driven from their older cultivated farms and dyked marshes, and possibly an occasional trading post at the mouths of the great rivers, was wild and untenanted until the year first referred to. The country, however, is far from being devoid of historical interest, as indeed this portion of Acadia—the name originally given to French territory comprising Nova Scotia, New Brunswick, part of the present state of Maine, and of Lower Canada—was the platform upon which many passages of the great drama carried on between England and France in the 17th and 18th centuries were enacted; and in this respect the present site of the City of Saint John and its environs, may be said to possess special interest. In 1604 when de Monts and Poutrincourt, the true pioneers of French colonization in this portion of America, with the little squadron under their command had first landed on the southern coast of Nova Scotia, and at Annapolis, and skirted along the Nova Scotian shore of the Bay of Fundy and the Basin of Minas, they crossed over to the mouth of the Onigoudy, which they named St. John, in honor of the patron saint of the day on which they arrived. They devoted several weeks to the exploration of this noble stream, and seem to have spent a portion of their time in recruiting the sea worn energies of the sailors on the shores of the western side of the harbor. In the year 1629, when the seigneurs D'Aulnay, Charvizai and LaTour were contending for ascendancy in Acadia, the latter built a small fortification, near Navy Island, in Carleton, where after repelling a fierce attack on the part of Charvizai, his little garrison was at length obliged to capitulate. The incidents connected with the final assault and the heroic bravery of Madame LaTour, who

was at the time in sole command, are referred to by more than one writer, as among the choicest and most memorable reminiscences of French American history. In 1758, it appears that the French were in occupation of a fortress in the same locality, possibly on the same site as fort LaTour; with that want of success, however, which attended their efforts at this period, although really forming a not inconsiderable garrison, they were attacked by a body of British and Colonial troops and compelled to yield. About the same time Louisbourg and Quebec, and several other strongholds, were ceded to England; and France was obliged to relinquish an ascendancy in America; she never afterwards regained. In 1760, Mr. James Simonds visited the river St. John, but was obliged by the hostility of the Indians, who were ever more favorably inclined to the French than to the English cause, to return to New England. In 1764 he was joined by Mr. James White and captain Francis Peabody, and with a small party of fishermen they arrived at the site of the present city and commenced the settlement. In 1768 a block house and stockades were erected and dignified by the name of Fort Howe. After the breaking out of the American rebellion, the revolutionists pillaged every unfortified village in Nova Scotia. A party of filibusters from Machias burned Fort Frederick, before mentioned as captured from the French, situate near Navy Island. Simonds and White had erected small houses at the foot of Fort Howe hill, and at these the party wantonly discharged a number of cannon shot, having previously robbed the place of every valuable article they could discover.

They also fired at and killed a man named Southacke, who had been rash enough to show himself and attempt to shoot one of these number.

The year 1782 furnishes the first records of St. John, as a port of customs and registry, from which it appears that in this year eleven vessels were entered and twelve cleared; of these the average was about twelve tons, the largest being eighteen tons. Previous to 1783 Mr. William Hazen joined the settlement, and it is worthy of remark that title to the greater portion of landed property in the city is traced through the Simonds, Hazens and Whites.

On the 18th of May, 1783, the Loyalists landed at St. John, and in the following year the province, under its present name, was separated from Nova Scotia. In 1785 the City was incorporated, and Gabriel G. Ludlow appointed Mayor. As early as 1765 Mr. Charles Morris, Surveyor General of Nova Scotia, took measurements and observations of the harbor and river St. John, and charts were prepared showing the soundings and the positions of the principal headlands, the reefs and bearings, marked with a tolerable amount of precision. These charts are indeed of more interest to the antiquarian, than of use to the navigator; still they possess some value, if only to show the names of localities before the more extensive settlement of the country. By these it appears that the city proper was known as Parr Town, Red Head as DesBarres' Head, Mispec as Maspee, Negrotown Point as Bruyer's Point, Manawoguish as Meogenes, while the names of Partridge Island and other places were the same as at the present day. It is worthy of remark that Partridge Island received its present name in their own language, from the French. The City was originally divided into four wards; this division, on account of the depopulation of certain districts, was altered in 1803 by an

In 1786 an act was passed by the Legislature, reciting that "the inhabitants of the City of St. John had at great expense supplied themselves and were supplied with two fire engines," and appointing persons to take care of these engines, and making provisions for putting out fires. On the 3rd of June in the same year the following notice appeared in the Royal Gazette: "The corporation having purchased two fire engines for the use of the City, and having directed one to be kept at the Market place, Upper Cove, the other at the Market place, Lower Cove, those who incline to join the two Engine Companies will leave their names with Mr. Munson Jarvis, and Mr. John Colvill, merchants."

The following extracts are taken from the same paper of different dates. 26th August: 1787 "On Wednesday last, after administering confirmation to a great number of persons, and delivering an excellent charge to the clergy, the Right Reverend the Bishop of Nova Scotia with the accustomed ceremonies, laid the foundation stone of Trinity Church."

18th December, 1787 "At a court of General Quarter Sessions of the Peace, held at the City Hall of this city (St. John) on the 4th instant, Silas Stutt was indicted for a felony, convicted, and sentenced to receive thirty nine stripes, which were afterwards well laid on."

26th February, 1810, Postscript. "We were last evening favored with a London paper of November 27th; a Liverpool paper of the 22nd, and two or three Cork papers to the 15th December, received overland from Yarmouth, U. S., to which place they were brought by the Brig "Dasher" from Liverpool, England."

In 1788 an Act was passed by the Legislature for the support of a light house on Partridge Island.

St. Andrew's Church (the Established Church of Scotland,) generally known as "The Kirk," was built in 1816 and inaugurated in the following year. The Rev. Dr. Waddell, father of the present medical superintendent of the Provincial Lunatic Asylum, preached in the Kirk before, and Dr. Burns after, the inauguration. In 1820, the Bank of New Brunswick was established in St. John.

In 1824, the Legislature passed an Act empowering the corporation of St. John to order the Surveyor of highways, immediately after the first fall of snow, to summon the inhabitants and mark out roads in the city and county of Saint John, with a row of ever green bushes, erected at distances of not less than four rods from each other; and by the same Act, "persons travelling with their horses, cattle, sleighs, sleds and carriages, of what kind soever," in the winter season, are directed under a penalty "of ten shillings for each offence to leave the said row of bushes always on the left hand." From this it would appear that street communication in those early days was not in the best condition, and that the fall of snow during the winter seasons was probably greater than at the present time. There are indeed one or two old inhabitants who can remember when it was an extremely difficult task to walk from Lower Cove to the head of Jeffrey's hill, especially after a snow storm.

The changes of duty on Baltic timber and the high prices given in Great Britain in 1824 gave rise to much speculation, and the market was soon overloaded with colonial ships and timber. The result was, that the price of wood fell one half, many persons were ruined, and the most cautious merchants sustained severe losses. The great conflagration usually known as the Miramichi fire, occurred in the summer of 1825: the loss of personal property on that occasion was estimated at nearly £225,000, and the destruction of the forests, although scarcely a subject for calculation, is said to have amounted to the value of more than £500,000. This was of course very severely felt in St. John as well as the whole province. On the 14th January, 1837, another fire occurred which affected St. John more immediately than that of 1825. By this event one hundred and fifteen stores and houses, equal at the time to one third of the commercial portion of the city, were entirely destroyed. The loss was estimated at £250,000. In 1839 disputes arose between New Brunswick and the State of Maine as to their common boundary line: when the latter made preparations to invade this Province, New Brunswick appropriated its whole revenue, and Nova Scotia £100,000 and 8000 men in defence of this Province. Through the exertions of the Governor, Sir John Harvey, however, actual hostilities were avoided. On this occasion the military furor was raging in St. John, and almost all the male population were being exercised in arms, and expecting, if not desiring, war. The boundary disputes were adjusted in 1842.

In 1845 the Gas Light Company was incorporated, and on the evening of the 18th September in the same year gas was turned on for the first time in a few stores and offices on Prince William Street and the Market Square.

In 1849 serious disturbances arose between the orangemen and catholics. It is a pleasing reflection, however, that these were almost the last troubles of this nature, and that the old feeling of religious bigotry, once so prevalent in St. John, has since, almost, if not entirely, disappeared.

In the month of January, 1853, the Suspension Bridge across the rapids of the mouth of the river St. John, was commenced by the projector, W. K. Reynolds, and in October, 1853, was finally completed.

In 1853 the first sod of the European and North American Railway was turned, the day being set apart as a public holiday, and celebrated with a large procession of an elaborate nature, representing all the principal trades and businesses of the city. The sod was turned by Sir Edmund Head, then Lieutenant Governor of the Province. Unfortunately on the evening of the same day, at a public and crowded ball given in a new building, a gallery gave way under the weight of people, and the destruction of both life and limb was very serious. In the summer of 1854, the cholera visited St. John and carried off an immense number of persons, especially among the poorer classes. This calamity caused a fearful consternation among the inhabitants, who for the most part fled into the country districts, and business for the time was suspended to a great extent.

In the latter part of the year 1854, the Crimean war commenced, and owing to the stoppage of trade between England and the Baltic, an excel-

lent opportunity was afforded to the St. John merchants for supplying the home timber market, and during the period in which the war was carried on, very respectable fortunes were realized by them through this source of business. Comparatively handsome subscriptions were collected in St. John and the province generally for the purposes of this war, which was watched with the greatest interest by the colonists; the rejoicings at the different successes of the British arms were most exuberant and the fall of Sebastopol was received in St. John with acclamations which knew no bounds; a public holiday was proclaimed and in the evening the whole city was brilliantly illuminated.

In 1860, His Royal Highness the Prince of Wales visited America. On the occasion of his arrival at St. John the city was decorated with flags and garlands; while a number of arches, of the most tasteful description, were erected along the length of Prince William street, to the mansion assigned for his residence. This building, which is still in existence, is surrounded by a roomy park like enclosure, and was erected by the late Chief Justice Chipman, and is now tenanted by his widow. It had formerly been occupied by the Duke of Kent on a like occasion, and was on that account deemed most suitable for the present purpose. When the Prince made his entry into the city, the fire brigades formed single lines on each side of the street, while the volunteers acted as a guard of honor at the landing. In the evening the city was brilliantly illuminated, many of the citizens displaying great taste in their luminous devices.

On his return from Fredericton, the Prince drove through Carleton, where he received similar attentions, the whole city doing its utmost to exhibit loyal devotion to the heir apparent of the British throne.

Late in the autumn of the same year, what is generally known as the Trent affair occurred, and there was every prospect of war between England and the United States. In the early winter of 1861, several regiments of British troops passed through and were quartered in St. John; great excitement prevailed and the citizens vied with each other in showing hospitality to the soldiery and giving proofs of their loyalty. The people of Portland feeted the Guards, both Grenadiers and Scotch Fusiliers, while other regiments were treated by the townsfolk with like distinction. Fortunately the good sense of the two nations prevented a rupture of those friendly relations which had so long subsisted between them, and the Empire and the Republic, but above all the British Colonies, were saved from the impending calamity of a great war.

In 1864 delegates from the maritime provinces were sent to Charlottetown, being duly empowered for that purpose, to consider the desirability of uniting their respective colonies in federal or legislative union.

During the conference, a delegation arrived from Canada with proposals that the two provinces of Canada should also form a portion of the proposed union.

Delegates from all these provinces afterwards met at Quebec, where they drafted what is generally known as the Quebec scheme. This measure having been submitted to the people of New Brunswick at the polls in 1865, its supporters were defeated; in the following year, however the Provincial Parliament having been dissolved and a second general election ensuing, the scheme, with certain alterations and modifications was carried. An Act was afterwards passed by the British Parliament

and, under its provisions, New Brunswick now forms one of the provinces of the Dominion of Canada.

The harbor of St. John is safe but not very spacious, especially at low water. The tides, as is the case with all the harbors and sea ports on the Bay of Fundy, rise to a great height; at St. John as much as twenty-six feet. On this account great facilities are afforded for repairing and launching vessels; for during the retreat of the sea, the shores are left dry. From this circumstance a good opportunity is afforded for forming dry docks, an idea which it is not improbable may at some future day be carried into practice. During the flow, there is a strong inward current, and the harbor is therefore easy of access to the largest ships. Owing, however, to the great quantity of fresh water which descends from the river St. John, during the spring and autumn freshets, a strong and favorable breeze is necessary to enable ships to enter; in calm weather and when encountered by head winds they are frequently towed in by steamers. Partridge Island is situated at the mouth of the harbor. On this island are erected a battery, lighthouse, signal station, and hospital for the accommodation of sick immigrants and sailors, who are removed from vessels on their entering quarantine station. Here is also a steam whistle, which can be heard at a great distance and is of incalculable service during the foggy season, which usually continues from the latter part of June until nearly the end of July, although sometimes extending later into the summer. Between the island and the main land, westward, there is a long narrow bar, dry at low water. There is a beacon-light of considerable brilliancy and utility, on a reef situate some distance inside the island, towards the city.

Eastward of the harbour is a broad and shallow estuary, known as Courtenay Bay, terminating in a marsh, which produces excellent hay, and a deep ravine that runs westward and separates the parish of Portland from St. John. The city proper is built upon a rocky promontory of very uneven ground, sloping in opposite directions from a central ridge. Carleton, situate on the western side of the harbor, also constitutes a part of the city, at least for civic electoral purposes, and is built on a somewhat gradual but steep ascent, overlooked by rocky heights. The city is divided into Sydney, Duke's, Queen's, Prince's, King's, and Wellington wards; and Carleton, into Guy's, Albert and Brooks. The parish of Portland, which lies adjacent to and almost forms part of the city, includes Indiantown, formerly the site of an Indian village, and is subdivided, for ecclesiastical purposes only, into the parishes of St. Luke and St. Paul.

Two vacant spaces, one at the lower, the other at the upper central part of the City, have been reserved by the corporation and are known as Queen's and King's square. They are both ornamented with trees, and the latter contains a fountain. The buildings in the city, both public and private, are for the most part more noticeable in a utilitarian point of view than for any special architectural beauties. Many private residences, however, both in the environs of the city and the less public streets, are exceedingly attractive, and there are several handsome shop fronts and buildings on Prince William and King streets. There is a substantial stone custom house, fronting on the harbor, and adjoining the principal wharves; a court house built of the same material, fronting on King's

square, with a stone provincial Lunatic Hospital; and several other materials. square, with a stone jail adjoining; a public hospital built of brick, the provincial Lunatic Asylum, situate in Carleton, built of the same material; and several Banks and other buildings constructed of like durable materials. There are three banks in Saint John, not including the Savings bank 1 the St. John Branch of the Bank of British North America, the St. John Branch of the Bank of Montreal, and the Bank of New Brunswick. The Savings Bank building is a handsome edifice, situate at the corner of Princess and Canterbury streets. The skating rink is one of the finest structures of the nature in America; and the railway buildings are also exceedingly chaste in design. The Mechanics Institute is a large wooden building situate at the end of Germain street; this establishment contains a good museum, a library and news room, and a public hall; to these attractions may be added, during the winter season, a course of lectures under the management of the Board of Directors.

The Provincial Penitentiary, a massive stone structure, is situate on the eastern side of Courtenay Bay, as are also the Poor House buildings. The St. John Rural Cemetery Company are in possession of a beautifully situated piece of ground distant a little more than a mile beyond the city which is adorned with many finely executed monuments. The principal societies of St. John, besides those already mentioned, are the Chamber of Commerce; the Natural History Society; the Gymnasium having a building on King street; the Agricultural Society; the Bible Society; the Missionary, the Religious Tract, and other associations of a similar nature; the Protestant Orphan Asylum, the Female Reform Society, the Ragged School Association, the different National Societies, several Masonic Lodges, and the various divisions of Good Templars and Sons of Temperance.

The barrack buildings are situate at the extreme southerly portion of the city, at the mouth of the harbor. There are batteries erected here and at Negrotown point; while heavy guns are mounted on a stone tower on Carleton heights. These are all under the control of the regular military authorities, who also keep a guard at Fort Howe. As is always the case with cities built principally of wood, St. John has suffered severely from fires, and whole streets, including the North and South Market wharves, have been laid in ruins. At one time the fire engine companies were a source of great pride and satisfaction to the citizens, and acted a very important part in all public demonstrations; within the last few years, however, the corporation have procured three steam fire engines, and the old hand companies are now disorganized.

Of the different places of worship, the Roman Catholic Cathedral is the most handsome, although St. James, the Episcopal church in Lower Cove, St. Jude's in Carleton, the Baptist Church in Germain street, the new Kirk at the foot of Jeffries hill, and a few others, present a very respectable appearance.

The number of places of worship in the cities of Portland and Carleton is in all, of which are

The following files of newspapers are in the possession of gentlemen in the city, who have agreed to transfer them to the St. John Mechanics Institute, upon the Directors providing a suitable place for their reception:

A complete file of the *St. John Courier*, commencing with the issue of the 2nd May, 1811, published by H. Chubb & Co., down to the last issue on the 15th July, 1865.

These seem to have been the earliest papers published in St. John, although it is quite possible there have been others of which the record is either lost or not known. Previous to the 1st of July, in this year, there were seventeen newspapers published in St. John; three of these having been absorbed at that date, there are now but fourteen; of these three are daily, nine weekly, and two tri-weekly. The following statistics in regard to two of the most important and useful institutions in St. John, are offered to the reader, as affording a slight idea of civil progress for the last twenty-five years, and enabling a stranger to form some estimate of the present conditions of the city. The St. John Gaslight Company was incorporated in April, 1845, with a capital of £20,000, which has subsequently been increased to £50,000. During the summer of '45 about 4½ miles of pipes were laid, a retort and rarifying house with work shops and offices built, and the gas holder erected. Up to the 1st of May, 1869, the Company have expended \$196,000 on the works, and have laid over 38 miles of pipes extending through all the principal streets of the city, the parish of Portland and Indian-town; there are about 1200 private services in use and 280 public lamps. The works on Carmarthen street, comprise two retort houses, a purifying and condensing house, limekiln, station metre house, three gas holders, blacksmiths, and metre repairing shops, store-rooms and offices, with sheds for holding 2800 tons of coals, being the year's supply. The St. John Water Company was incorporated in 1832, the water being first pumped from Lily Lake and the supply up to 1850 was only for two hours each morning. In 1849 twelve inch pipes were run out to Little River and the pumping was abandoned. In 1855 the Company transferred their works to the city and parish of Portland. In 1857 a twenty-four inch main was carried to Little River Reservoir, five miles from the city; and there are now over forty miles of pipe, with a never failing supply of water, over the whole city. The Suspension Bridge, built across the picturesque rapids at the mouth of the St. John river, is also deserving of mention, as an instance, not only of the enterprise of the talented projector, Mr. W. K. Reynolds, but also of the progressive tendencies of the

citizens of St. John. towers, 53 feet in height to the top where they meet between the rails; 18 inches diameter, are of aggregate strength 1000 wire, if extended, would

The population of St. John was 745, and in 1861, it was 1000. The population, according to the census, is 1000, showing a marked degree of increase both in iron, wood and other constantly in demand. The population of the neighbourhood is a marked improvement and one cotton factory and several founderies and of machinery for railroads. The demand for all descriptions of wood and iron was very great extent by the operation in the manufacture of meats and fruit, are exported.

Ship building has been a staple of St. John; but it is some time since any were made in this colony for the purpose a few extra were made in this colony the greater number were made in 1782, the total tonnage was 1000 while in 1795 the tonnage was 1000 and in 1836, 59,663 tons and in 1838, 80,876 tons; in 1839, 1000

One of the most important colonies was the timber colony. The timber cannot be cut in the colony on with a tolerable quantity of timber from New Brunswick. The timber was only six feet in diameter, usually raised, and in 1820, though afterwards

At the present day the business in the manufacture of iron is of immense numbers to the line of railway from St. John to the colonial, and of the United States, and the renewal of the reciprocity treaty is probably that St. John will claim the name of British North America.

citizens of St. John. The entire space of this structure is 630 feet. The towers, 53 feet in height, are 15 feet square at the base, tapering gradually to the top where they are 7 feet square. The roadway is 23 feet wide between the rails; the cables are ten in number, 1030 feet in length by 3 inches diameter, are composed of 300 wires and weigh ten tons each. The aggregate strength of the cables is 2250 tons, and the whole length of wire, if extended, would be about six hundred miles.

The population of St. John in 1840 was 19,281, in 1851 it was 22,745, and in 1861, it numbered 27,317. Including Carleton the total population, according to Munroe, in 1864, was 38,817 souls. The manufacturing interests have not, until somewhat recently, received a very marked degree of attention; and for many years, articles of various kinds both in iron, wood and other materials, and of such a nature as to be constantly in demand over the whole province, were imported from Europe and the neighboring states. At the present day, however, there is a marked improvement in this respect; as there are two or three woollen and one cotton factories, producing fabrics of superior workmanship, several foundries and factories in iron, turning out almost all varieties of machinery for railway, steamboat, mill and other purposes; while the demand for all description of household furniture, carriages and ornamental wood and iron work in the city and the province, is supplied to a very great extent by native mechanics. There is also a spice mill in active operation in the parish of Portland, and different kinds of fish, meats and fruit, are potted and cured for the home market and for exportation.

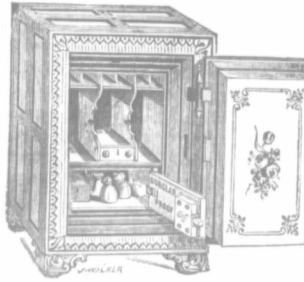

Ship building has always been an important branch of industry in St. John; but it is somewhat curious to observe the enormous strides which were made in this department in comparatively few years. For this purpose a few extracts from the register of shipping may be quoted, as the greater number of vessels owned in St. John are built there. In 1782, the total tonnage of the province alone did not exceed 250 tons; while in 1795 the tonnage of St. John alone was 4,000; in 1824, 16,000, and in 1836, 59,663. In 1835, the total tonnage of the Province was 80,876 tons; in 1839 the tonnage of St. John alone was 80,830.

One of the most lucrative businesses, however, in the earlier days of the colony was the timber trade, which since the removal of duties on Baltic lumber cannot be considered remarkably profitable, though still carried on with a tolerable amount of success. In 1791, when the export of timber from New Brunswick had barely commenced, the duty on Baltic timber was only six shillings and six pence per load; that duty was gradually raised, and in 1812 amounted to £2. 14. 8 per load, while in 1820, though afterwards lowered, it was as high as £3. 5. 0 per load.

At the present day mill owners are doing a large and profitable business in the manufacture of sugar shooks, which are sent down in immense numbers to the West Indies. As St. John is the terminus of a line of railway from Shediac, which taps the settled route of the Inter-colonial, and of the unfinished line of railway running westward towards the United States, a brilliant prospect seems open to the city; and if a renewal of the reciprocity treaty is only effected it seems not at all improbable that St. John may at some future and not far distant day, fairly claim the name which has been already applied to her as the Liverpool of British North America."

**ST. NICHOLAS STREET,  
 MONTREAL.**

THE undersigned has greatly enlarged and otherwise improved his premises, which he has adapted, in every respect, for carrying on an extensive Book and Job Printing and Blank Book Manufacturing Business. The Compositors' Rooms are well stocked with a large variety of Plain and Fancy Types, embracing the newest designs. The establishment is furnished with twelve Steam Printing Presses, nine Steam Smashing, Sawing, Cutting, Stamping and Hoisting Machines, six Hydraulic and Hand Presses, together with Ruling, Backing and Paging Machines, all in thorough working order, which enables him to turn out large quantities of work at very short notice. Over 150 persons are employed in this Establishment.

A very large assortment of WOOD TYPE enables the undersigned to print the very largest description of

**POSTING BILLS,**

In various colors, at short notice, and at moderate charges.

Country Orders for PRINTING and BLANK BOOKS carefully attended to, and work dispatched by the safest and cheapest modes of conveyance.

# JOHN LOVELL, BOOK AND JOB PRINTER

AND

Blank Book Manufacturer,  
ST. NICHOLAS STREET,  
MONTREAL.

THE undersigned has greatly enlarged and otherwise improved his premises, which he has adapted, in every respect, for carrying on an extensive Book and Job Printing and Blank Book Manufacturing Business. The Compositors' Rooms are well stocked with a large variety of Plain and Fancy Types, embracing the newest designs. The establishment is furnished with twelve Steam Printing Presses, nine Steam Smashing, Sawing, Cutting, Stamping and Hoisting Machines, six Hydraulic and Hand Presses, together with Ruling, Backing and Paging Machines, all in thorough working order, which enables him to turn out large quantities of work at very short notice. Over 150 persons are employed in this Establishment.

# AYER'S HAIR VIGOR,

For Restoring Gray Hair to its Natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. **Faded or gray hair is soon restored to its original color with the gloss and freshness of youth.** Thin hair is thickened, falling hair checked, and baldness often, thought not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a party sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

## HAIR DRESSING,

nothing else can be found so desirable. Containing neither oil nor dye, it does not soil white cambric, and yet lasts long on the hair, giving it a rich glossy lustre and grateful perfume.

# AYER'S SARSAPARILLA,

FOR PURIFYING THE BLOOD.

The reputation this excellent medicine enjoys, is derived from its cures, many of which are truly marvellous. In severe cases of Scrofulous disease, where the system seemed saturated with corruption, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contamination until they were painfully afflicting, have been radically cured in such great numbers in almost every section of the country, that the public scarcely need to be informed of its virtues or uses.

Persons afflicted with the following complaints generally find immediate relief, and at length, cure, by the use of this **SARSAPARILLA: St. Anthony's Fire, Rose or Erysipelas, Tetter, Salt Rheum, Scald Head, Ringworm, Sore Eyes, Sore Ears,** and other eruptions or visible forms of Scrofulous disease. Also in the more concealed forms, as **Dyspepsia, Dropsy, Heart Disease, Fits, Epilepsy, Neuralgia,** and the various Ulcerous affections of the muscular and nervous systems.

**Syphilis or Venereal and Mercurial Diseases** are cured by it, though a long time is required for subduing the obstinate maladies by any medicine. But long continued use of this medicine will cure the complaint. **Leucorrhœa or Whites, Uterine Ulcerations, and Female Diseases,** are commonly soon relieved and ultimately cured by its purifying and invigorating effect. Minute Directions for each case are found in our Almanac, supplied gratis. **Rheumatism and Gout,** when caused by accumulations of extraneous matters in the blood, yield quickly to it, as also **Liver Complaints, Torpidity, Congestion or Inflammation of the Liver and Jaundice,** when arising as they often do, from the rankling poisons in the blood. The **SARSAPARILLA** is a great restorer for the strength and vigor of the system. Those who are **Languid and Listless, Despondent, Sleepless,** and troubled with **Nervous Apprehensions, or Fears,** or any of the affections symptomatic of **Weakness,** will find immediate relief and convincing evidence of its restorative power upon trial.

# SURVEYOR'S OFFICE,

AUSTIN'S BUILDINGS,

INDIANTOWN, ST. JOHN, N. B.

The Subscriber most respectfully begs leave to inform the Public that he is at all times prepared to receive and SURVEY LUMBER which they may be pleased to intrust him with, and if necessary, can, upon early application, supply them with Boats, Warps, and Anchors, free of expense, except cost of carriage to their place of destination; to assist in bringing LUMBER to market.

Having had upwards of fourteen years practical experience in the business, customers as usual may rely upon a correct SURVEY OF ALL LUMBER, that passes through his hands, and will continue to find him still anxious to advance their interests to the best of his ability.

Communications addressed to the Subscriber seeking information with regard to prices and prospects of LUMBER, the state of the market, or any other matters connected therewith, will be punctually attended to.

First class references furnished either amongst buyers or sellers.

# ALBION HOTEL,

McGill & St. Paul Streets, Montreal, Canada.

The "NEW ALBION HOTEL," the largest Hotel in Montreal, has just been opened under the most favorable auspices.

Whilst the "Old Albion" has been long noted for the strict attention paid to its numerous guests, the "New Albion" takes its position as a first-class Hotel.

Being situated on the Widest and Healthiest Street in Montreal, commanding a magnificent view of the River St. Lawrence and the Victoria Bridge on the left, and a full view of the Victoria Square, with its numerous *Jets d'Eau*, and Mount Royal on the right, it cannot fail to commend itself to the travelling public.

From its situation on McGill Street, the great thoroughfare and commercial centre of the City, it cannot fail to be, as the "Old Albion" has always been, a strong favorite with the Merchants of Canada.

Notwithstanding the very large outlay in building and furnishing the House, the old price of \$1.50 per day will not be departed from.

**THE BEST SHINGLE MILLS IN THE WORLD.**

**Lath Mills, double edgers, Butters and every description of Sawing Machinery.**

**Hydraulic Presses, Steam Winches and Dericks.**

**TO SAW MILL OWNERS AND LUMBER MEN,**

**Manufacturers of every description of Self Acting Machinery of Circular, Gate, Muley, and Cross Cut Saws.**

The Double Carriage Self Feeding Mill is Capable of Sawing from thirty to forty thousand shingles per day. No Saw Mill should be without one. Great saving in working up waste lumber, ends of logs, &c., &c., which can be cut into first quality shingles at very little expense. Fifteen per cent of the lumber saved by the thinness of the saw. Shingles are sawed with the grain, nearly as smooth as if planed. The single carriage hand Feeding Mill is easily managed, does not get out of repair and makes from fifteen to twenty-five thousand shingles per day. Our Mills are built to secure the perfection of their work, not only when new, but for years to come; several of them are now in use in Ontario and Quebec and make smoother, better, and more shingles, and give greater satisfaction than any other machine in the United States or the Dominion.

To satisfy the public of the excellence of our Mills we take pleasure in referring to the following gentlemen who have them in use:—

P. W. WRIGHT, Hull.  
J. ROCHESTER, Ottawa.  
C. W. McCREA, Arnprior.

Official letters addressed to the Provincial and Military Departments, are exempt from prepayment.

Registered letters for the Provincial Public Departments and the Military Departments, addressed to St. John, can be sent without prepayment of postage or registry fee.

REGISTRATION.—Letters for registry must be posted half an hour previous to the closing of the Mail by which they are to be sent. The postage as well as the Registration fee *must be prepaid*. The registration of a letter addressed to any place in New Brunswick or the Dominion, is 2 cts., to the United States is 5 cents; to the United Kingdom, 8 cents; to Australia and all other places, when passing through the United Kingdom, 25 cents. No registered letters forwarded between two Way offices.

Registration is applicable to all descriptions of letters and parcels, whether they contain articles of value or not. Registration is not an absolute guarantee against the miscarriage or loss of a letter; but a registered letter can be traced when one unregistered cannot; and the posting and delivery or non-delivery can be proven. A registered letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may effect an unregistered letter. "Moreover the safety of an unregistered letter is dependent on the integrity of a post office clerk during the whole time it remains in his custody, frequently for hours, and even days, whilst a registered letter will almost invariably have to be acknowledged at the moment of its passing into an officer's hands, and cannot therefore be suppressed without leaving him individually accountable for its disposal." "If the consequences were limited to the mere risk of the loss of the money so sent, the senders of money in unregistered letters might reasonably urge, that if they choose to encounter the risk, they should be free to do so; but higher considerations are involved in the question, and the chance of loss to the careless remitter is really but the smallest part of the evil associated with the practice." The attentive perusal of the above remarks by those who are in the habit of sending money by mail in unregistered letters is strongly recommended, and it is further suggested that letters containing money should invariably be secured with wax, and not by the usual method, by mucilage, or self sealing envelope.

| And so on, to the limit of three pounds. |           |

*Book and Newspaper Manuscript, and other Miscellaneous Matter.*

On Book and Newspaper Manuscript (meaning written articles intended for insertion in a Newspaper or Periodical, and addressed to the Editor or Publisher thereof, for insertion,) Printer's Proof-sheets, whether corrected or not, Maps, Prints, Drawings, Engravings, Music, whether printed or written, packages of Seeds, Cuttings, Roots, Scions or Grafts, and Botanical Specimens, the rate will be one cent per ounce, when posted for any place in Canada or the United States, and prepaid by Postage stamp.

*Postage Stamps.*

To enable the Public to prepay conveniently by Postage Stamps the foregoing rates, the following denominations of Postage Stamps for use throughout the Dominion, have been prepared, and will be supplied to Postmasters for sale:—

OFFIC

THE  
**WHITESIDE PATENT SPRING-BED.**

Its Peculiar Advantages over all others.

1st—It is remarkably **Clean**. There is no place for the secretion of dirt, dust, or insect-life; and a large quantity of leather is used in its construction, previously prepared to destroy all kinds of vermin.

2nd—It is **Comfortable**, having a hinge on each slat between the first and second row of springs; a self-adjustable bolster is formed for the head.

No springs are placed at the feet, presuming that none are needed where there is no pressure exerted, the body thus assumes an easy, horizontal position. The mode of fastening the springs causes a pressure exerted on any part of the Bed to be universal and even over the whole of it, and enables the occupant to move about with very little self-exertion.

3rd—It is **Durable**. The springs are firmly secured both at the top and bottom, and the slats being connected to the ends of the Bed by means of tough belting leather, prevents the springs being pressed out of place or shape.

4th—It is **Healthy**, being light, airy and clean, possessing the advantages afforded by the Self-adjustable Bolster, and having the feet on a level plane with the body.

5th—It is **Cheap**. The slats being smoothly polished, very much of the wear and tear of mattresses is saved; and since **no under Mattress** is needed, an immense deal is saved in the cost of these. It has the advantage also of being lower in price than any in the market.

6th—It is simple in Construction, Portable, Easily Handled, and therefore readily shipped from place to place.

# St. John Daily Telegraph

## AND MORNING JOURNAL

Is issued every morning from the "TELEGRAPH" Publishing Rooms, 94 Prince Wm. Street. Subscription Price, \$5.00 per annum, invariably in advance; or \$6.20, and postage paid to any part of the Dominion. This journal circulates in the Maritime Provinces to an extent greater than any of its contemporaries.

## The Weekly Telegraph,

(in which is now also embraced the WEEKLY JOURNAL,) has the largest *country* circulation of any paper in the Dominion, east of Montreal. Price, \$1.00 per annum in advance; or \$1.20 and Postage Paid.

## The Presbyterian Advocate,

(in which the COLONIAL PRESBYTERIAN has been merged,) circulates very generally in New Brunswick, Nova Scotia and Prince Edward Island. Price, \$1.50 per annum in advance; or \$1.70 Postpaid.

The combined circulation of the three papers represents an issue of about

**20,000 COPIES PER WEEK!**

and offers an advertising medium such as has never before been presented in these Provinces to merchants, manufacturers, and buyers and sellers of all descriptions.

Address,

**JOHN LIVINGSTON,**
