# How Canada's Bond Markets Have Changed

GREAT BRITAIN Took 73 Per Cent. and United States 10 Per Cent. of our Securities Issued During the First Four Months of Last Year-This Year to date the United States Has Taken 55 and Great Britain 30 Per Cent.-Analysis of Sales as Compiled by The Monetary Times

ANADA is keeping busy its new banker, the United States. During the first four months of 1915, it has sold 29 issues of high-grade bonds aggregating \$47,589,947. The beginning of December really saw the commencement of the new trend of the Canadian bond market. Between August and December practically no sales were made. Then the buying commenced, and the British market being closed to practically all except war loans, Canada had to place its securities in the United States. Since December, the sales of high-grade Canadian bonds in that market have totalled \$73,179,947. As bond statistics are usually given for the calendar year, however, the sales as compiled by *The Monetary Times* may be divided as follows:—

d

S

g

1.

Sal	es of Canadian bonds in December, 1914 January-April, 1915	Amount. \$26,590,000 46,589,772
	Total	\$73,179,772

The records of these sales have been carefully revised and corrected in the light of the most recent information received. It is understood, for instance, that a little more than half of the 4,533,696 Toronto issue of  $4\frac{1}{2}$  per cent. long-term bonds is being placed in the United States. Early advices told of a sale of 3,000,000 6 per cent. oneyear notes of Edmonton. Negotiations were in progress for this sale when a hitch occurred and to date only 1,000,000 of these notes have been placed in the neighboring market. These are typical examples of the revision made of the figures previously published in these columns.

Taking the total sold during the first four months of 1915, we have the following result:-

Borrowers.	No. of issues	s. Amount.
Provincial Gove	ernment 7	\$21,375,000
Municipal	20	16,214,772
Railroad	····· I	2,000,000
Public utilities	I	7,000,000
•		
Ser Printer	29	\$46,589,772

Numerically, the municipal borrowers have been the strongest, 20 of them having raised over \$16,000,000. Seven provincial government issues account for \$21,-375,000. The Montreal Tramways and Power Company's issue has been the only important one this year in the public utilities class. The amount was \$7,000,000. Of issues in the near future there are probably many provincial government and municipal loans. The corporation issues are not likely to be heavy.

The maturity of the 29 issues made this year is an interesting question. The following table classifies the same loans with that point in view:—

Maturity (years).	No. of issues.	Amount.
One and two	7	\$13,925,000
Three	6	7,036,000
Five		17,300,000
Ten	3 -	2,138,772
Long terms	8	6,190,000
	20	\$46,589,772

Only eight of 29 issues mature in a period longer than to years. They represent securities aggregating \$6,-190,000 of a total of \$46,589,772. There are 3 ten-year issues, accounting for a little more than \$10,000,000. The Eighteen loans are for 5 years and less and account for over \$38,000,000 of the total. The tendency to invest in short-term securities, therefore, is very marked although brokers state that investors are now beginning to seek longer terms.

The rate of interest is another important phase of the present bond market. The following table shows the rates carried by the 29 loans under review :---

Bearing	%	No. of issues.
41/2		4
5		16
51/2		
6		8
		-
		20 1

The change in rates in recent years is clearly reflected in the comparatively high rate of  $4\frac{1}{2}$  per cent. for the \$5,000,000 Dominion five and ten-year loan made in London last month. As was pointed out in *The Monetary Times* last week, it is a long time since the Dominion government had to issue a loan with such conditions attached as  $4\frac{1}{2}$  per cent. at a discount. In 1860 a 5 per cent. loan was issued for the purpose of consolidating the various outstanding loans. This was followed by an issue of £4,800,000 of 4 per cent. bonds in 1868-1875 guaranteed by the British Government, and between 1868 and 1875 £4,500,000 of 4 per cent. bonds were also issued in London, whilst at the end of 1875 there were two outstanding earlier issues bearing 6 per cent. interest. Afterwards, the Dominion Government was able to borrow in the London market upon reasonable terms, and an increasingly high status. A prolonged period of cheap money enabled our finance minister to arrange a loan in the English market in 1897 upon a 21/2 per cent. basis at an average price of about 91 1/2, following upon issues in 1884 and 1888 at the rates of respectively 31/2 per cent. and 3-per cent. Up to 1912-with the exception of the loan offered in January, 1909, upon a 33/4 per cent. basis -the Dominion was able to satisfy all her requirements in London at  $3\frac{1}{2}$  per cent. Towards the end of 1913 4 per cent. had to be paid, and that rate has since remained operative.

#### Markets This Year and Last.

Coming now to sales of Canadian bonds, not only in the United States but also in other markets, it is found that the neighboring republic has done the lion's share of Canadian financing this year to date. The following table, compiled by *The Monetary Times*, shows a complete change during the past year in the market situation, so far as Canadian bond sales are concerned:—

Sales of Cana bonds in Great Brita United State Canada	in	16,747,616	January-April, 1915. \$25,000,000 46,589,772 13,249,028	and a strength of
	· Mar	\$152,399,199	\$84,838,800	

Great Britain was our chief banker during the first months of 1914, as it had always been previously, but owing to war conditions, the United States has assumed that role during the current year.

#### War and Railroad Financing.

The only Canadian loan in Great Britain since the war has been the £5,000,000  $4\frac{1}{2}$  per cent. bond issue maturing in 10 years and underwritten at 99 $\frac{1}{2}$  last month. This has been the only Canadian issue in London since August. The Canadian government's war financing, as previously pointed out in these columns, is being done under a special arrangement with the British government by which Canada is receiving loans of £2,000,000 monthly. These will be repaid later by the issue of Canadian war loans in the London market.

In the matter of railroad financing, there has been some difficulty. While the Canadian Pacific Railway is pretty well supplied with funds, the Grand Trunk Pacific and the Canadian Northern are not so well off. In the session of 1914, parliament authorized the government to guarantee bonds of the Canadian Northern Railway to the

Mr. Lyndhurst Ogden, for over thirty years secretary of the Toronto Stock Exchange, died last week.

Mr. A. A. Adams, of Hamilton, has received a letter from Mr. Sydney W. Pascall, of the London wholesale house, James Pascall, Limited, which reads in part: "The other day I was rather amused to receive an article from a Canadian trade paper in support of the 'made-in-Canada' campaign, counselling all its readers to buy Canadian products and eschew foreign manufactures. From the figures, etc., it appeared that one of the chief foreign countries aimed at was Great Britain. By the same post I had a request from amount of \$45,000,000, and bonds of the Grand Trunk Pacific Railway to the extent of \$15,000,000. The former company succeeded in floating \$15,000,000 of bonds in the London market at 91½. However, the underwriters under the English moratorium were able to withhold payment. The Grand Trunk Pacific Company was unable to float any of its bonds. Both companies asked the Dominion government for loans last fall.

#### Banks Were Unwilling.

The government endeavored to have the loans made through the banks, pointing out that the bonds were guaranteed by the Dominion of Canada and the Dominion notes could be issued to the banks on the security of those bonds under the legislation passed last August. The banks, however, declined to intervene. The government thereupon passed an order-in-council whereby \$10,000,000in Dominion notes was advanced to the Canadian Northern on the security of \$12,000,000 of guaranteed bonds and \$6,000,000 in notes was lent to the Grand Trunk Pacific Railway on the security of \$7,500,000 of guaranteed bonds. Had the money not been supplied by the government the two railway companies would have had to cease construction work and thus thrown 12,000 men out of employment.

Sir Robert Borden, premier, recently pointed out that the bonds of the two railways could have been sold at an advance of eight or ten per cent. over the figure at which the loans were made, but that it had been felt that by a delay a better price might be obtained and more money would be available for the construction of the roads.

#### United States as Bond Market.

While the United States is not likely to supplant London as Canada's banker after the war, it seems reasonable to expect the neighboring republic from now on to be an important purchaser of Canadian bonds. This supposition is strengthened by the fact that Canada is the second best customer of the United States in the matter of trade and commerce.

Discussing the Canadian bond statistics of *The Mone*tary *Times*, the New York Annalist says: "It appears certain that Canada must look to the United States to fulfil the most of her monetary requirements during the war period. It seems reasonably sure that she will of necessity continue to do so for a long time after the war is over. The demand for capital which will follow to replace the property destroyed by war will in all probability be so pressing as to preclude the possibility of Europe's exporting it for a long period. Meanwhile, tariff changes are tending to increase Canada's merchandise exports to us, and if that movement should grow to any extent, the United States, even under normal conditions, would be the natural place for Canada to seek the funds necessary to develop her great natural resources."

the same paper for an advertisement. Naturally, I declined (with proper courtesy) to enter into competition in its advertisement columns with the opinions expressed in its leader columns. Fortunately, most people in this country who read this sort of thing understand that it is—what do you call it —hot air! They realize that the desire to keep out British goods at a time when Britain wants all the help she can get is merely the passing crank of a few people, and that the real mind of Canada is expressed by the fine young fellows in khaki who are spending themselves so nobly for the United Empire."

# Confidence and Facts Back Canadian Situation

# After nine Months of War the Position in the Dominion Shows Strength Rather than Weakness-Signs of the Times

INE months of war have shown how many of the business fears of last August were groundless. Then, Canadian business and finance almost threw

up hands in despair, the despair largely of predicted future events rather than of existing facts. With a great effort, business kept its head but towards fall, commenced to worry again about what bad things might happen after the Christmas trade had passed. The prophets of pessimism having proved wrong again, persisted, and forcasted poor spring business.

After nine months of war, and bearing always in mind that the country was due for a drastic economic readjustment, Canada is rapidly assuming a healthy condition. It is beginning to realize that speculative froth is not prosperity. After a wild gallop along the bridle path of easy money, it is settling down to a staid pace in the avenues of legitimate trade, business and finance. It is realizing that the recognized principles of business are, after all, the correct ones, and that the new-fangled ideas

#### NO DIFFICULTY IN FINANCING

Despite the fact that the London market is closed to Canada except for war purposes, the Dominion is having little trouble in financing its requirements. As will be gathered from the leading article in the current issue of *The Monetary Times*, Canada has sold \$83,000,000 worth of its bonds during the first four months of 1915, compared with \$152,000,000 worth sold in the first four months of 1914. In view of prevailing conditions, that is a gratifying achievement. It means that Canada has been able to find, with little trouble, a new money market to take the place of the old one during war time. After the war, we are likely to have the benefit to a greater extent, of both the British and United States markets.

Stick to business and business will stick to you.

Why spoil good business prospects with a Dominion election which nobody wants, except the politicians?

#### MORE FUNDS FOR CANADA

Mr. A. M. Eedy, secretary of the Mutual Life and Citizens Insurance Company of Melbourne, Australia, is visiting Canada in the interests of his company. Mr. Eedy, who granted an interview to *The Monetary Times* this week, has until recently been travelling on this continent with Hon. James Ashton, a fellow director of the company, which is one of the oldest and most substantial in Australia. Mr. Ashton is now on his way home, but Mr. Eedy will remain for some time yet visiting the Western provinces and British Columbia and returning to Australia from San Francisco.

Columbia and returning the Western provinces and Drivin The Mutual Life and Citizens have for some years had investments in Canada. About three years ago, the company established a Canadian office at Montreal in charge of Mr. J. P. Moore, A.I.A., and obtained a Dominion license. Since then considerable sums of money have been invested by the company in the Dominion. The present trip of the company's directors has resulted in the investment of a further \$1,000,000. Their funds have been placed in city mortgages in Toronto. Montreal, Ottawa, Winnipeg and Vancouver and in farm mortgages in the West. This is being done through several Canadian trust companies. The company also has blocks of provincial government and municipal bonds including those of Alberta, Saskatchewan, Toronto, Hamilton, Ottawa and Brandon. Mr. Eedy and Mr. Ashton are well satisfied with their Canadian investments of finance jerked into the country by some young men who are now among the wisest and saddest, were nice but not nourishing.

Spring finds Canada with business and finances in fairly good condition. There is an increased demand for bonds and a growing volume of stock exchange transactions. Money continues to accumulate for investments. Wholesale and retail trade in staple lines is good. The agricultural outlook is excellent. War orders are stimulating industrial activity for the time being at least. Preparations are being made for the new trade movement after the war. Exports are increasing.

Little confidence, then, need be placed in the views of those predicting dull business this spring and summer. Ear has been given to these prophets for nine months and they have been found wanting. While we have war and are undergoing changes, that there are also favorable facts, confidence and good business sentiment in Canada must not be overlooked.

and have no doubt as to the stability and future prospects of this, country.

Both gentlemen were given a taste of the enterprise of Canadian bond houses, two of which had heard of their proposed visit to Canada and had representatives camping at their hotel in New York. They were greatly impressed by the clean-cut and businesslike type of salesmen employed by the Canadian bond house.

A visit was paid by Mr. Eedy to Canada's exhibit at the San Francisco exhibition. He describes it as magnificent and doubts whether there is a more effective exhibit anywhere in the fair grounds.

Mr. Eedy is an official delegate to the world's insurance congress at San Francisco and was also appointed official representative of the Life Officers' Association of Australasia and of the Melbourne Insurance Institute, for the purposes of his present trip.

Even half of the faith displayed in the palmy days of 1912 would be of service now.

#### COOD TRADE RETURNS

The statement of Canadian trade shows a total for the fiscal year ended March 31, 1915, of \$1,078,173,240, as compared with \$1,112,562,107 for the previous year, a good showing in view of the dislocation of the world's trade by the war and the unfavorable economic conditions which prevailed before the war.

In the last month of the year a decided improvement was noticeable, the trade total being \$110,540,998, as against \$92,887,053 in March, 1914.

\$92,887,053 in March, 1914.
 The exports of manufactures increased from \$6,239,290
 to \$15,600,790; agriculture from \$6,512,546 to \$12,438,145, and animals and products from \$3,202,066 to \$5,471,249.

Now that the farmer's important place in the country is being recognized by the city man, we may hope for prosperity on a more substantial basis.

#### CROP OUTLOOK IS COOD

Sir Thomas Shaughnessy interviewed in Vancouver said that advices to him showed that in Canada business was proceeding with renewed confidence and special investigations carried out by the Canadan Pacific Railway during the

南

last few days show that the outlook for the crop in the West this year is of the very best.

To each man who is a producer of wealth, will come a turn in the general distribution.

#### BIC CEMENT ORDER

An order for 2,500.000 barrels of cement has been awarded to the Canada Cement Company by the Dominion government for the Welland Canal enlargement. The company has been doing a fairly good business, and the management report improvement.

Confidence is an intangible asset, but it helps the tangible ones.

#### SAVINGS ARE ACCUMULATING

An examination of the March bank statement shows that the savings deposits in the chartered banks now total \$676,-

#### LOOK TO CANADA AFTER WAR

#### Chairman Smithers of Grand Trunk Sees a Prosperous Future for Dominion's Development

The year's gross receipts on the Grand Trunk Railway proper as reported by Mr. A. W. Smithers, chairman of the company, at the annual meeting were £8,596,767, as compared with £9,620,176 in 1913, or a decrease of £1,023,408, and the working expenses were £6,841,919, compared with £7,261,810, or a decrease of £419,891. The net traffic receipts were £1,-754,848, as compared with £2,358,366, or a decrease of £603,-518. Receipts from passengers showed a decrease of £314,-000; mail and express traffic a decrease of £1,500; freight and live stock traffic a decrease of £700,000; and from other miscellaneous traffic a decrease of £7,000. With the decline in the gross receipts economies were effected wherever possible, but, it was absolutely impossible to immediately reduce expenses commensurate with the falling off in the receipts. The reduction effected is, well distributed over all the items of expenditure. Maintenance of way and structures decreased £53,000; maintenance of equipment decreased £90,-000; traffic expenses decreased £13,000; conducting transportation decreased £266,000; taxes decreased £7,000, the only item of increase being £10,000 under the head of general expenses, which is accounted for by our keeping on the pay-rolls for five months those of our men who had joined the Canadian Forces for service at the front, and which amounts to £17,000.

#### Accumulation of Troubles.

Then there is the unsatisfactory result of the working of the Grand Trunk Western Railway, which shows, including the debit balance brought forward from the previous year, a net revenue deficiency of £135,000, the net revenue deficiency for the year thus being £112,000. This line runs through the State of Michigan and partly through the States of Indiana and Illinois. All the lines running through these states have severely felt the effect of bad trade in the United States and of the increased expenses caused by the requirements of the federal and state authorities, the poorer lines having been hit most severely. These results are unsatisfactory, and the railways have brought, and are bringing, all the pressure possible to bear on the authorities to remedy this state of things.

Mr. Smithers when commenting on these returns said: "When we met in April of last year there were signs that business in Canada was quiet. Traffic receipts were falling off, and we had already commenced cutting down expenses. As the year progressed the hopes that were entertained of a good harvest gradually faded, owing to a long continued drought in the north-west. When that broke, there was still time for some of the damage to be repaired, but early frosts 000,000, compared with \$646,000,000 a year ago. This is one of many indications that savings are accumulating. There is likely to be a good demand this year for first-class securities. Highly speculative stuff will find it hard to get buyers. Even after the heavy war loans are provided, there should be a substantial surplus for investment in sound and legitimate enterprises.

British faith and endurance never lost anything yet.

#### TORONTO BONDS ABSORBED

The Monetary Times is informed by Messrs. Wood, Gundy and Company, Messrs. A. E. Ames and Company and Messrs. Osler and Hammond, Toronto, that a large proportion of the city of Toronto issue which they purchased on joint account two weeks ago, has already been sold. This was an issue of \$4,533,696 4½ per cent. long term bonds. A little over half of the amount will probably go to the United States and the demand in Ontario for these securities has been excellent.

Business isn't half as bad as the man who wants yours says it is.

in August did considerable damage in the north-west, and the wheat harvest, which was expected to reach a total of over 210,000,000 bushels, eventually turned out to be a total of only 140,000,000 bushels, with oats, barley and other crops decreased in like proportions.

"Notwithstanding all this, we still thought we should be able to earn the dividend on the first preference stock and a portion of the dividend on the second preference stock, but these hopes were seriously dashed when the terrible catastrophe happened in the early days of August of the outbreak of the war on a scale unparalleled in history. Even then, during September and October, the traffic receipts, although bad, kept up better than one could have expected considering the outbreak of war and the colossal interests involved, but our worst forebodings were more than realized when we received the traffic statements in November and December, with results most disheartening and disappointing.

#### War Orders Are a Benefit.

'There are indications, however, that the requirements both of the mother country and her allies are leading to renewed activity in the United States and Canada, and there is every sign that the money which will be spent in requirements for the war by Great Britain and the allies in the United States and Canada will reach large sums. The price of wheat and foodstuffs has caused the people of the northwest to prepare for seeding a larger acreage than in 1914. I do not wish to neglect the warning not to prophesy unless you know. Well, no one can know what is going to happen. Still, I think," suggested Mr. Smithers, "it is my duty to point out that a new country like Canada is subject to fluctuations of adversity, and prosperity to an extent which it is difficult for people living in an old country to gauge. As I have shown, in 1914 there was an accumulation of adverse fortune beyond the power of any man or body of men to control, but these would have all been met, with comparatively small adverse results, but for the culminating disaster of the war. It has hit with terrible force the whole world, but it has hit hardest the new countries in process of development. Of the new countries none have seen such progress of development as Canada has experienced in the last twelve years, and consequently she was the most vulnerable to the effects of such a catastrophe as this war. Not only has Canada had to bear the shock upon the culmination of a period of great devlopment, but she has, in addition, undauntedly taken upon herself the patriotic task of helping the Mother Country to the utmost extent of her resources. The question that transcends all others is the cessation or continuance of the war. While the war continues it is true Canada will reap some commercial advantage from the large orders placed there by Great Britain and her allies, but it is to the cessation of the war we anxiously look, and when that day arrives, and if we are blessed with good, or even average, harvests, I feel confident that Canada will soon show to the world a different state of things from that which exists to-day."

The Monetary Times was established in 1867, the year of Confederation. It absorbed in 1869 The Intercolonial Journal of Commerce, of Montreal; in 1870, The Trade Review, of Montreal; and the Toronto Journal of Commerce. The Monetary Times does not necessarily endorse the statements and opinions of its correspondents, nor does it hold itself responsible therefor. The Monetary Times invites information from its readers to aid in excluding from its columns fraudulent and objectionable advertisements. All information will be treated confidentially.

#### SUBSCRIBERS PLEASE NOTE:

When changing your mailing instructions, be sure to state fully both your old and your new address. All mailed papers are sent direct to Friday evening trains. Any subscriber who receives his paper late will confer a favor by complaining to the circulation department.

RAILROAD TROUBLES

A

If Mr. A. W. Smithers, chairman of the Grand Trunk Railway, is correctly reported by cable, he is wrongly blaming the war for Canadian and Grand Trunk troubles. The war is the governing cause of his company's ills, he said. But decreased railroad earnings are not due alone to the European struggle. Indeed, some of the railroad companies have benefited by the transport of troops and army supplies. That fact has been reflected periodically in the returns. Railroad financing naturally has been made difficult on account of money market conditions due to the war, but war or no war, the railroad companies had to face the problem of getting enough business to pay interest charges on a heavy debt-one which, with the help of a little more foresight and less politics on the part of both parties at Ottawa and of the railroads themselves, need not have been nearly so large. The railroad companies will have to develop traffic and help to create freight. They are vitally concerned in the movement for more production. Practically every bushel and every ton has to be hauled somewhere.

Professor Adam Shortt, chairman of the Civil Service Commission, is correct in his counsel that Canada should begin at once to consider the question of immigration and the best means of turning it to the interests of the Dominion. At the Canadian Club, Montreal, this week he recalled the exodus from Europe to America that followed the Crimean war, when many thousands of British-born subjects came to Canada. Owing, for the most part, to Canada's lack of preparation to meet their wants, these immigrants became dissatisfied with their lot in Canada and drifted over to the United States, where they became prosperous and contented. The Canadian immigration authorities have an important task before them. After the war, we want the proper type of immigrant and, more than that, we want him in the right place, producing wealth on the agricultural lands.

#### SINKING FUNDS AND MORTGAGES

0

Several Western cities were inclined to be sensitive when The Monetary Times in the "good old days" criticized the tendency to invest their sinking funds in first mortgages. Legitimate criticism then was considered out of keeping with the pace. In the annual statement of Mr. A. M. Mouatt, city auditor, of Edmonton, appear some striking figures which strengthen the opinion frequently expressed in these columns. The inventory of sinking fund investments shows the value on December 31, 1914, to be \$1,554,208, of which \$1,071,000 consists of nineteen first mortgages on real estate within the city. An examination of these mortgages reveals the fact that on the date mentioned there was in arrears the interest on no less than twelve of them, representing sinking fund investments to the amount of \$621,000.

"There is every indication," says Mr. Mouatt, "that a number of these mortgages will require to be nursed along for a number of years. The condition of these, together with the shrinkage in values of real estate, must decrease that margin of security which originally formed the basis of the loans, and it is necessary that attention be directed to the undesirable nature of this class of investment for the city's sinking funds."

Mr. Mouatt points out that the city of Edmonton's charter permits of investments being made in more liquid securities than in real estate mortgages, and very properly recommends for the serious consideration of the civic authorities, that no further loans on real estate be made. Here, then, is a concrete case of trouble as a result of unwise municipal practice.

Seven hundred and four pages constitute the report on certified cheques, dividends, unclaimed balances and drafts or bills of exchange remaining unpaid in the chartered banks of Canada for five years and upwards prior to December 31, 1913. The publication and circulation of this weighty volume is a heavy and unnecessary expense. It has no interest for the general public. The banks should make their returns to the government and the returns should be open to inspection by the public, who will never inspect them. The present system is a waste of public time and money.

#### GERMAN WAR FINANCING

"If this is to be a war of silver bullets, Germany is prepared. The German people have over-subscribed two war loans. They stand ready to over-subscribe a third, should a third prove necessary." This is the opinion expressed by Dr. Earl Helfferich, secretary of the German treasury. The statement was made to Carl W. Ackerman, of the United Press service. Dr. Helfferich is a leading financier of Germany and was a director of the Deutsche Bank until appointed to handle Germany's war finances. Speaking of the war loans, he stated that the money already subscribed, will last until October or November. "If the war is continued," the interview continues, "and more money is needed, a third loan will be floated. And it will be also over-subscribed. Let me tell you why," he said, leaning forward through puffs of cigarette smoke-"there are two reasons. German money stays in Germany, as everything the army needs is made in Germany. When supplies are purchased the money goes to German industries and to German workmen.

London, with good reason, is inclined to regard the statements of Dr. Helfferich as "bluff." There are facts to confirm that view. Mr. Lloyd George has said that the silver bullet is an important factor in the present struggle. It is: Great Britain is able to pay her large expenditures on the war for five years, if necessary, even allowing a substantial sum for depreciation, out of the proceeds alone of her investments abroad. France is also able to carry on the war for two or three years at least, out of the proceeds of her investments abroad. Both countries still have something to spare to advance to their allies.

10

On the other hand, it was stated authoritatively soon after the outbreak of war, that the financial measures which Germany was passing might live in the event of victory, but that in the event of defeat, they would bring disaster. Since then, it has also been stated that a percentage of the German people's savings has been appropriated for investment in the German war loans, while Swiss and other creditors of Germany have been informed that their debts have been invested also in those war loans.

Finally, the "Kolnzeitung" recently published a circular which shows to what straits the German government is put to obtain subscriptions for the new loan. A means has been found to spread over a long period payments by instalments. To allow this to be carried out, certain institutions are offering advances on the future savings of public officials, civil servants and others in a position to put by money out of their salaries. The following is the text of the circular:--

#### FINANCIAL MEN ON HONOR ROLL

Major E. C. Norsworthy, who was killed in the heavy fighting in France, in which the Canadian contingent distinguished themselves by their bravery, was the Montreal manager of the Dominion Securities Corporation, and was well known in financial and social circles. His death is a

Major E. C. Norsworthy.

matter of keen regret, expressed everywhere by his many friends.

Amongst the other officers stain were the following: Lieutenant J. K. Cronyn, a son of Mr. B. B. Cronyn, Toronto, vice-president of W. R. Brock Company. Lieut. Cronyn went from Ridley College, St. Catharines, to the Royal Military College, graduating from there last spring. When war broke out he joined the Royal Grenadiers, and went to Valcartier, where he was first attached as a supernumerary, later getting his commission and going overseas with the first contingent. Capt. George Crowther Ryerson, the eldest son of Lieut.-Col. George Sterling Ryerson.

"In order to facilitate subscriptions to the Imperial Loan the German Life Assurance Company for civil servants is prepared, with the consent of the Secretary of State for War, to facilitate subscriptions to the Imperial loan by officers, public officials and civil servants generally who may not be at present in a position to provide the money for such subscriptions. The company is prepared to subscribe-on behalf of the above class of personssums of up to 1,000 marks in the new Imperial loan on, the understanding that the subscribers shall reimburse to the Assurance Company the sums so advanced, on or before 27th December, 1915. Every officer, public official or civil servant is thus given the opportunity of utilizing in advance his savings. Until the advances made by the Assurance Company shall have been repayed the scrip 'shall remain the property of the company."

In other words, Germans are asked to hypothecate their future savings in order to subscribe to the Imperial loan. The puffs of cigarette smoke which the United Press correspondent was careful to note in the interview seem to have separated Dr. Helfferich from the facts.

An amusement park to be operated in connection with the Regina municipal street railway in order to make that utility a revenue-producer is a suggestion that is receiving the consideration of the civic authorities. It is an old idea, one which has been tried by private corporations and by municipal bodies, and usually without success.

He was a member of the firm of Messrs. Mitchell and Ryerson, insurance brokers. Lieut. Alex. Douglas Kirkpatrick, of the Queen's Own Rifles, the son of Mr. A. M. M. Kirkpatrick, Toronto, and of the firm of Messrs. Wood and Kirkpatrick, insurance agents. The late Lieut. Kirkpatrick was attached to the Goyernor-General's Body Guard until war broke out, when he was transferred to the Queen's Own Rifles, known as the Third Battalion. Lieut. Guy Drummond, son of the late Sir George Drummond, president of the Bank of Montreal. Lieut. W. ("Bill") D. P. Jarvis, eldest son of Mr. Æmilius Jarvis, of the well-known financial house, and one of the most prominent of Toronto's athletes. Lieut. Jarvis was a member of the Governor-General's Body Guard. He had been in the regiment for the past four years.

Among the wounded reported were: Lieut. Arthur Ryerson, who was wounded, is a younger son of Lieut. Col. George Sterling Ryerson. After graduating from the Royal Military College he entered the service of the Dominion Bank, and was connected with the Broadview branch. Captain C. E. H. Morton, who is reported wounded,

Captain C. E. H. Morton, who is reported wounded, has been connected with the Royal Grenadiers for the past five years. For the past two years he has been the secretary of the military institute. For the eight years previous to his enlistment Captain Morton held a position in the Home Bank and when the war broke out was a supervisor in the head office. His late father was connected with the Merchants' Bank.

Capt. Eric McCuaig, who was slightly wounded, is a son of Mr. C. J. McCuaig, of the Montreal Stock Exchange. He is a science graduate at McGill, and Lieut. Melville Greenshields, who was also slightly wounded, is a member of the Montreal Stock Exchange. He was an officer with the 5th Royal Highlanders.

Major A. J. E. Kirkpatrick, who is reported missing, was second in command of the 3rd Battalion. He was connected for about twenty years with the Queen's Own Rifles. He was manager for Canada of the United States Fidelity and Guaranty Company.

#### MORE CANADIAN BONDS FOR UNITED STATES

The Monetary Times is informed that \$48,000 worth of bonds of the Taber Transit Company have been placed in Philadelphia. This company proposes to build 48 miles of railroad between Taber and Bow River, Alberta. Arrangements are being made to construct 10 miles of the line.

#### APRIL FIRE LOSSES

#### Total Was Smaller Than Previous Month-Numerous Deaths

8.4

The Monetary Times' estimate of Canada's fire loss during April amounted to \$1,463,747, compared with March loss of \$1,631,696 and \$1,916,235 for the corresponding period of last year. The following is the estimate for the April losses:

Fires exceeding \$10,000		\$1,159,500
Small fires	den en e	113,324
Estimates for unreported	l fires	190,923

\$1,463,747

The Monetary Times' estimate of the fire loss in each province for the first four months of 1915 is as follows:--

Ontario		*****	\$2,112,180
Quebec			
British Columbia .			. 576,834
New Brunswick			. 361,109
Manitoba			. 272,951
Saskatchewan

Among the presumed causes 6 were prairie fires, 4 defective wiring, 4 incendiary, 4 lightning, 4 spontaneous, 4 bonfires, 3 children and matches, 2 burning grass, 2 sparks, 2 gas jets, 1 overheated stove, 1 defective stove pipe, 1 engine backfiring, 1 candle 1 dropped cigarette stub, 1 defective grate, 1 electric iron, 1 overheated boiler, 1 exploded oil stove.

#### ALBERTA AMENDS LAND TITLES ACT

The Alberta legislature has passed an amendment to the land titles act of that province. The new legislation is a step in the right direction. Sales, in the event of trouble, can be effected with much speedier action than heretofore and long delays will be avoided. The amendment will also tend to reduce considerably the expenses in connection with sales. Altogether, the act will help greatly to restore the confidence of investors in Alberta securities and the provincial government is to be commended for its action.

#### RAILROAD EARNINGS

The following are the earnings for the first three weeks of April:--

	Canadian Pacific	Railway	1
April 7 . April 14 . April 21 .	1915. \$1,766,000 1,701,000 1,623,000	1914. \$2,237,000 2,234,000 2,100,000	Decrease. \$471,000 533,000 477,000
	Crand Trunk F	tailway	
April 14	<b>\$1,008,320</b> 864,658 869,772	\$1,041,360 1,025.518 993,502	\$ 33,040 160,857 - 123,730

The words "Rural Telephone Company, Limited," appear after the name of the company in each case.

Application for letters patent is being made by W F. Dibblee & Son, Limited, Woodstock, N.B., \$20,000.

### LAW UNION AND ROCK INSURANCE COMPANY

Founded in 1806, the Law Union and Rock Insurance Company has been through many trying tests, such as all corporations are experiencing now and largely on account of the war. A reputable careet of over a century and a business built on sound and conservative underwriting principles, have given the insuring public a corporation in which implicit faith may be placed. Last year, Mr. Alexander Mackay, who had been general manager of the company for many years, retired, and was succeeded by the deputy general manager, Mr. Robert Stirling, and 1014 was his first year in office as general manager. The year was an exceptionally trying one, but the results obtained under his management are very gratifying to all who take an interest in the company.

The company's results during 1914 are detailed on another page. In the profit and loss account \$1,350.893 was brought forward from 1913. To that amount was added: from the fire account, \$220,355; from the employers' liability account, \$51,200; from the accident account, \$24,054; from the general account, \$28,312; and from the fixed term assurance fund, \$52,350; making, with \$184,161 of interest, \$390,505 shareholders' proportion of life profits and transfer fees. \$335, a total of \$2,311,225. Therefrom were paid for dividends to shareholders, \$422,492; for interest on debentures. \$53.948; for expenses of management, \$20,000; for income tax, \$24,390; and after providing \$297,463 to meet depreciation in securities, and carrying \$126,964 to an investment reserve fund, there remained a balance of \$1,315,968 to be carried forward as a general reserve, and to support future dividends. The assets of the company at the close of the year amounted to  $\$48,698,186, \cdot$  and the total income to \$6,781,350.

The company's Canadian branch, under the management of Mr. J. E. E. Dickson, of Montreal, has, as usual, done well; contributing its share to the total business and doing its part to uphold the company's good reputation.

#### **ONTARIO HYDRO COMMISSION'S FINANCES**

16

#### Results of Operation on the Part of Sixty-nine Municipalities Last Year

According to the seventh annual report of the Hydro-Electric Power Commission of Ontario, which will be issued next week, the accounts of 69 municipalities have been consolidated into one balance, sheet on the standard form as at 

equipment, \$1,476,087.84; distribution system, overhead, \$3,-422,763.93; distribution system, underground, \$807,153.53; line transformers, \$787,613.52; meters, \$1,172,475.11; street lighting equipment, regular, \$1,071,255.37; street lighting equipment, ornamental, \$270,386.55; miscellaneous equipment and construction expense, \$2,062,035.90; steam or hydraulic plant, \$420,108.33; old plant, \$478,881.56; other miscellaneous assets, \$140,631.56; total plant, \$12,901,125.40.

Bank and cash balance, \$422,350.12; inventories, \$561,-873.08; accounts receivable, \$615,226.76; sinking fund, \$625,217.03; other assets, \$123,410.97; total liquid assets, \$2,348,077.96; total assets, \$15,249,203.36.

Liabilities: Debenture balance, \$10,678,078.36; accounts payable, \$1,682,150.29; bank overdraft, \$228,622.50; other liabilities, \$113,838.66; total liabilities, \$12,702,689.81.

Reserves: Debentures paid, \$320,129.10; sinking fund reserve, \$625,217.03; depreciation reserve, \$850,618.07; surplus, \$750,549.35; total reserves, \$2,546,513.55; total liabilities and reserves, \$15,249,203.36.

The operation of the municipalities consolidated into one report shows the following results :-

<b>1</b> - 1	Dec. 31st, 1912.	Dec. 31st, 1913.	Dec. 31st, 1914.

### News and Notes of Active Companies-Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

La Rose Consolidated Mines Company. The La Rose April statement shows a cash surplus of \$938,728 in the treasury on April 1st. Ore in transit and at smelters, as well as ore sacked at the mine ready for shipment, is given at \$126,958, making a total surplus of \$1,065,686.

1.8

1

Montreal Light, Heat and Power.—The eleven months' net income of the Montreal Light, Heat and Power Company, it is stated available for dividends is \$200,000 greater than at the same time in the preceding fiscal year.

The surplus, after allowing \$133,000 for the dividends on the new stock, is \$70,000 greater than in the same months of 1914.

Western Canada Power Company.—The annual report of the Western Canada Power Company for the year ended December 31, 1914, shows gross earnings of \$315,800, which, with a balance of \$23,848, made a total of \$339,649. Operating expenses were \$87,149, leaving a surplus of earnings for the year of \$228,650 and a total of \$252,500 available for distribution. Interest on the first mortgage bonds took \$250,-000 and \$2,500 was set aside as a reserve for doubtful accounts.

At the annual meeting the shareholders will be asked to approve of an increase in the authorized issue of common. stock, from \$5,000,000 to \$10,000,000, and for the creation of \$5,000,000 7 per cent, cumulative preference shares. Provision will be made for the conversion of preference shares into common shares at the wish of the holder. The company has been unable to market the \$1,000,000 additional first mortgage bonds authorized in December. Duluth-Superior Traction Company.—The Duluth-Superior Traction Company's gross passenger earnings for the second week of April were \$20,107.17, as compared with \$25,432.53 for the corresponding week in 1914, there being a decrease of \$5,324.36.

Baker and Company.—At the annual meeting of the stockholders of Walter Baker and Company, of Canada, Limited, the following officials were elected: Directors: Messrs. H. C. Gallagher, Nathaniel H. Stone, Rodolph L. Agassiz, Robert F. Herrick, Thomas Nelson Perkins, William L. Putnam and Ellerton P. Whitney. Secretary-treasurer, Mr. Herbert Dabney.

Porto Rico Railways Company, Limited.—The Porto Rico Railways Company, Limited comparative statement of earnings for March, 1915, shows the following decreases:—

가 안 그 전화 중 가지 않고 있어	1915.	Decrease.
For March— Gross Net	\$ 68,593.62 30,616.89	\$ 4.327.73 5,235.35
For three months- Gross Net	\$195,508.66 94,136.03	\$19,238.30 5,731.87

Robert Simpson Company, Limited.—The annual report of the Robert Simpson Company, Limited, Toronto, for 1914 shows a decrease of \$100,545 in merchandise profits from 1913. The figures of results are as below :—

	1014.		decrease.	
Merchandise profit	\$ 652,205	- \$	100,545	1
From subsidiaries	68,880		29,060	1079
Interest and dividends	486.074		781	
Carried forward	422,208	+	140,588	
Current liabilities	904.915	+	535,323	
Current assets	4,014,393	+	573,934	
Total assets 1	9,029,739	+	1,575,912	

The assets show merchandise on hand of \$3,440,575, against \$2,685,000 a year ago, the increase being due to the fact that spring goods passed into stock before the inventory this year, and stocks have been added to in anticipation of possible inability to secure them later owing to interruption to the textile industry.

**Dominion Linens, Limited.**—The financial statement of the Dominion Linens, Limited. which has factories at Guelph and Tillsonburg, has been published and covers the period August 18th, 1914, to December 31st, 1914. The company's real estate, buildings, plant, machinery and equipment are valued in the assets at \$230,959. Twenty thousand dollars is the sum allowed in the balance sheet as representing trade marks and goodwill. The other assets are as follow: Cash on hand and in bank, \$1,143.27; accounts and bills receivable, \$9,856.21; sundry debtors (since paid), \$4,350.40; inventories, \$57,405.35; insurance premiums unexpired, \$1,-310.77; and deferred expenses, \$2,174.95.

The liabilities include accounts payable, \$6,706.76; loans and bank advances, \$23,082.36; contingent reserve, \$22.600.12; capital stock, paid up (authorized, \$300,000), preferred \$130,800, common \$125,000; total stock issued, \$255.800.

The surplus is \$14,138.50, and the balance at credit of profit and loss account, being net gain for 4½ months ended December 31st, 1914, is \$4,872.74.

The contingent liability on bills receivable discounted is \$8,047.03.

With regard to the item "sundry debtors" in the assets, this was for stock subscriptions, and was guaranteed by Messrs. Ferguson and Sanson, the Toronto investment house, and in January last was paid in full.

Real estate and buildings are down separately from plant, machinery and equipment. The preferred stock ranks for dividend from September 1, 1914, with the exception of that part that was issued in October last, which ranks for dividend

only from date of issue by the company. In addition to the preferred stock dividend, the statement shows earnings of between 4 and 5 per cent. on the common stock.

Messrs. Ferguson and Sanson, investment bankers, Toronto, who handled the company's offering of preference shares last year, will probably sell a small amount by private sale in the near future. For the current year to date the company's business showed a considerable increase over the period covered by last year's balance sheet.

Wm. A. Rogers, Limited.—The annual report of the Wm. A. Rogers Company, Limited, shows that net profits for the year 1914 were \$85,468.32 as compared with \$171,530 net profits on operations in the year previous.

That the decrease in the year's earnings was due partly to a shrinkage in the volume of business which the company suffered in common with other manufacturers, and also because of the unusually large inventory carried over from the previous year, the cutting down of which necessitated the operation of the factories on a half-time basis throughout part of the year.

The profit and loss account is augmented by \$175,000, previously transferred from that account to a real estate and plant reserve account. The appraisal of the company's properties made during the year showed that the depreciated values exceed the book values by a substantial amount and permit of the re-transfer to profit and loss account of the above amount.

A special reserve has been created to provide for the guarantee upon the preferred stock of Canadian Wm. A. Rogers, Limited, for two years.

A surplus of current assets over all liabilities of over \$1,000,000 is indicated in this return.

President, Mr. S. J. Moore, suggests that in view of improvements since the end of the year and of the present outlook for the company's business the directors believe that they are justified in continuing the dividend on the common stock at the rate of 6 per cent., and unless conditions become less favorable this rate can be maintained throughout the year.

#### CANADA'S CANAL TRAFFIC

Over 37,000,000 tons passed through the various canals of Canada last year, a decrease from the tonnage of the previous year, when 52,053,000 tons passed through these waterways. In 1914, the share of each canal was as below :----

Sault Ste. Marie, 27,549,000 tons; Welland, 3,860,000 tons; St. Lawrence, 4,391,000 tons; Chambly, 437,000 tons; St. Peters, 54,000 tons; Murray, 84,000 tons; Ottawa, 335,-000 tons; Rideau, 151,000 tons; Trent, 67,000 tons; St. Andrews, 42,000 tons.

Of the decline of 15,000,000 tons in 1914, compared with 1913, the whole was in the business of the Sault Ste. Marie waterway, which showed a falling away of 15,100,000 tons. This was the result of the depression in the United States iron trade. The Welland Canal showed an increased traffic of 290,000 tons, and the St. Lawrence Canals of 80,000 tons.

	-	Bushels.

Provincial sanction has been obtained for the expenditure of \$7.000 on stockyards, at London, Ont., provided the ratepayers agree to same;

#### BRANCH PLANT FOR CANADA

#### Corn Products Refining Company of United States to Establish at Toronto or Hamilton

The Corn Products Refining Company, of New Jersey, will build a branch plant in Canada. The company manufactures glucose, starch and similar products. Its Canadian plant will treat about 15,000 tons of grain daily. As the factory will need a very large supply of water, Toronto or Hamilton will probaby be the company's choice.

Mr. Alex. Lewis, secretary of the Toronto Harbor Commission, visited the company's New York office last week and holds high hopes that Toronto will secure the industry. In the meantime, it will not be the fault of Mr. H. M. Marsh, Hamilton's industrial commissioner, if Hamilton does not get the plant.

The company's stock and bonded debt are as follow :--

	Authorized.	Issued.
Common stock	\$ 50.000.000	\$49,777,333
Cumulative preferred, 7	% 30,000,000	29,826,867
Bonded debt		8.126.220

At the company's annual meeting last year the shareholders passed a resolution to reduce the share capital substantially. The directors, it is understood, approved the proposal, but in the absence of a plan which was considered by their attorneys to be feasible, no action was taken.

#### History of Company.

The Corn Products Refining Company was incorporated in February, 1906, in New Jersey to consolidate under one management the Corn Products Company, the New York Glucose Company, and other companies engaged in the manufacture of corn syrup (glucose), starch, and kindred products. The company has now legally absorbed all its subsidiaries, with the exception of the National Starch Company, practically all the stock of which it owns. Among the companies absorbed are the Corn Products Manufacturing Company (which had previously absorbed the properties of the Glucose Sugar Refining Company, the Illinois Sugar Refining Company, the Charles Pope Glucose Company, and the American Glucose Company), the Corn Products Company, the St. Louis Glucose Company, the Warner Sugar Refining Company (of Maine) and the New York Glucose Company. The company manufactures 75 per cent. of all the glucose made in the United States, of which about 30 per cent. is sold to confectioners for the making of candy. In 1910 the company acquired control of the Novelty Candy Company, with factories in Jersey City, Pittsburg, Chicago and Memphis. The company owns in fee plants at Pekin, Granite City and Argo, Illinois, and Edgewater, New Jersey.

#### United States Covernment Case.

The United States government on March 1st, 1913, filed a suit with the United States District Court in New York City against the Corn Products Refining Company, the National Starch Company of New Jersey, the St. Louis Syrup and Preserving Company of Missouri, the Novelty Candy Company of New Jersey, and Penick and Ford, Limited, of Louisiana, and twenty-three individuals, charging the defendants with a conspiracy to destroy competition in violation of the Sherman Anti-Trust law, and asking for the dissolution of the company. Judge Mayer, in the United States District Court at New York on May 11th, 1914, appointed Rowland W. Phillips as special master to take testimony in the suit brought by the government.

#### Results of Operations.

The company's income account for the year ended December 31st, 1913, showed the following results: Profits from operation, \$3,579.667; other income, \$86,045; total income, \$3,665,712; depreciation, etc., \$749,767; bond interest and dividends, \$1,853,248; taxes and insurance, \$277,841; and surplus for year, \$784,855.

There will probably be other large Canadian branch plants of United States companies established this year. The number in Canada already is, according to *The Monetary Times*' records, about 450, representing an investment of approximately \$135,000,000.

THE MONETARY TIMES

#### WHY ASSESSMENT INSURANCE SOCIETIES FAIL

#### Inadequate Rates Are the Cause of Most Difficulties-Nineteen Companies Survived Out of Thirty

Among the varied requests for information received by The Monetary Times during the past few days was this enquiry, "Can you tell me the number of assessment insur-ance societies that have gone out of business since 1867, or if not since some later date?"

The year 1867 is a long way back to look for the origin of the modern assessment society. There are a few such. The Canadian Order of Oddfellows, of ganized in 1852, on some sort of beneficial basis, but has only operated in a small way, having only 3,532 members in 1914, where in 1908 it had 4,955. Its assets are only \$192,140 and insurance \$2,517,656. The Ancient Order of \$192,140 and insurance \$2,517,656. The Ancient Order of Foresters, of Toronto, started in 1871, and is on a fairly sound basis, with assets of \$398,699 and insurance of \$2,-371,402. The Canadian Order of Foresters, of Brantford, and the United Workmen, of Toronto, both began business on the assessment plan in 1879, and they have, respectively, now in force \$90,889,000, with assets of \$3,276,256, and \$36,239.303, with assets of only \$913,177. The assets per \$1,000 of the one is \$58.05, and of the other only \$25.20. Four years ago the Workmen had assets of \$1,595,110 as compared with the above \$913,177, so that they appear to be considerably on the decline. In 1903 they had 46,125 members, and now have only 28,020, and these, no doubt, pretty well up in years. In 1903 the deaths came to only \$742,800, and in 1914 were \$906,029, upon little over half the former year's membership. During 1913 and 1914 the new members numbered 2,545, while the' terminated ones were 9,050. Should See to Foundations.

The Orange Grand Lodge Benefit Fund," of Toronto, dates from 1830, the Sons of England, of Toronto, from 1874, and the Sons of Scotland Benevolent Association, of Toronto, from 1876. But all three together carry only about \$16,-000,000 of benefits at risk. The united assets of the first two come to only \$136,869, while the third one makes a better show, having \$544,472. In 1914 their new members, combined, numbered only 1,271, and those who dropped out were 1.801.

Five other similar societies, and of nearly equal mod-erate size, have survived quite a long time, as follows: The Oddfellows' Relief Association (1874), of Kingston; the Catholic Mutual Benefit Association (1880), of Kingston; the Chosen Friends (1887) of Hamilton; the Commercial Tra-Chosen Friends (1887), of Hamilton: the Commercial Tra-vellers' Mutual Benefit Society (1871), of Toronto; and the Home Circles (1884), of Toronto. Putting these five societies into the form of a table, we find their present standing to be as follows :-

 Oddfellows' Relief Catholic Mutual Bene	. 28,113	Insurance. \$33,339,000	Assets. \$1,451,480	Per \$1,000. \$43 · 54	c
fit Chosen Friends Commercial Travel	25,024	29,764,000 35,720,693	710,097 1,067,617	23.85 29.88	
Home Circles	2,214	2,213,000 9,311,951	77,224 304,913	34.89	

According to the gauge shown in the last column of the table, four of the five societies look weak, compared with the first one. But all five are eking out a living, from year to year, upon very inadequate rates. Something should be done at once to bring them somewhere near the standing of, for instance, the Ancient Order of Foresters, with its \$168.09 per \$1,000; or the Independent Order of Foresters, which, by its rearrangement two years ago, has raised its per \$1,000 from \$80.51, as formerly, to \$215.40. It is doubtful if this increase is equal to its increasing death losses, which are now, with a smaller membership than in 1905, almost double in 1914 what they were then.

#### Thousands of Societies Disappeared.

Quite a severe crisis has occurred in the Home Circles, of Toronto, during the past year. Beginning the year with 19,145 members, they ended with only 7,757, as above, the insurance carried dropping from \$24,818,633 to the above \$9,311,951. The new members numbered only 137, and the outgoers were 11,525. All this resulted from the change of rates, which took effect on the 1st of May last. Previously the rates were exceedingly inadequate, being only about half of what contemporaries were receiving. Therefore, the adoption of the National Fraternal Congress rates, applied to each member at his attained age (which is the only correct way to do it), was bound to make a greater disturbance than would be the case if applied to any other society.

From other causes, and the fear that similar action must soon be taken to improve their assets per \$1,000, the other four societies all show a decline in membership during recent years. During the past year alone 5,545 members came in and 7,154 went out.

Turning to the question of the correspondent, as to how many assessment societies have disappeared, the number, taking the whole continent, may be safely set down as many thousands in all. Two charts issued by the "Bulletin" Publishing Company, Toronto, one in 1895 and the other, of recent date, embracing only the associations which were issuing certificates in Canada, show that during that period more than one-third of the societies doing business in Canada in 1895 have disappeared, and that others have lost a large share of their membership of former years, apart from losses by death. €

#### Nineteen Left Out of Thirty.

In the 1895 chart particulars are given respecting 30 associations then operating, of which number only 19 are found in the 1915 chart, showing a disappearance of eleven. Those that have survived are carrying a much smaller amount of insurance than ten years ago. Ten years ago the Royal Arcanum carried \$660,848,000 of insurance, and now has only \$467,713,000-a drop of \$193,435,000. Seven years ago the Independent Order of Foresters, of Toronto, carried insurance of \$264,027,884, and now have only \$196,412,733, making a drop of \$67,615,151. During the past two years alone 93,251 members dropped out, by death or lapse, while only 51,073 new ones came in. But by the change of two years ago there is much better security for the diminished 200,875 members than there was for the 257,267 of seven years ago, the assets showing a material increase.

Two charts of assessment fraternals doing business in the United States are available, one issued in 1905, and the other eight years later—in 1913. The first gives particulars respecting 169 societies, and the last of 174. Of the 169 in the first chart, only 114 are found in that of 1913. The balance, 55 in number, have disappeared. That is a mortality of one-third in the short space of eight years. And that is apart from the great decrease of business on the books of the remaining 174.

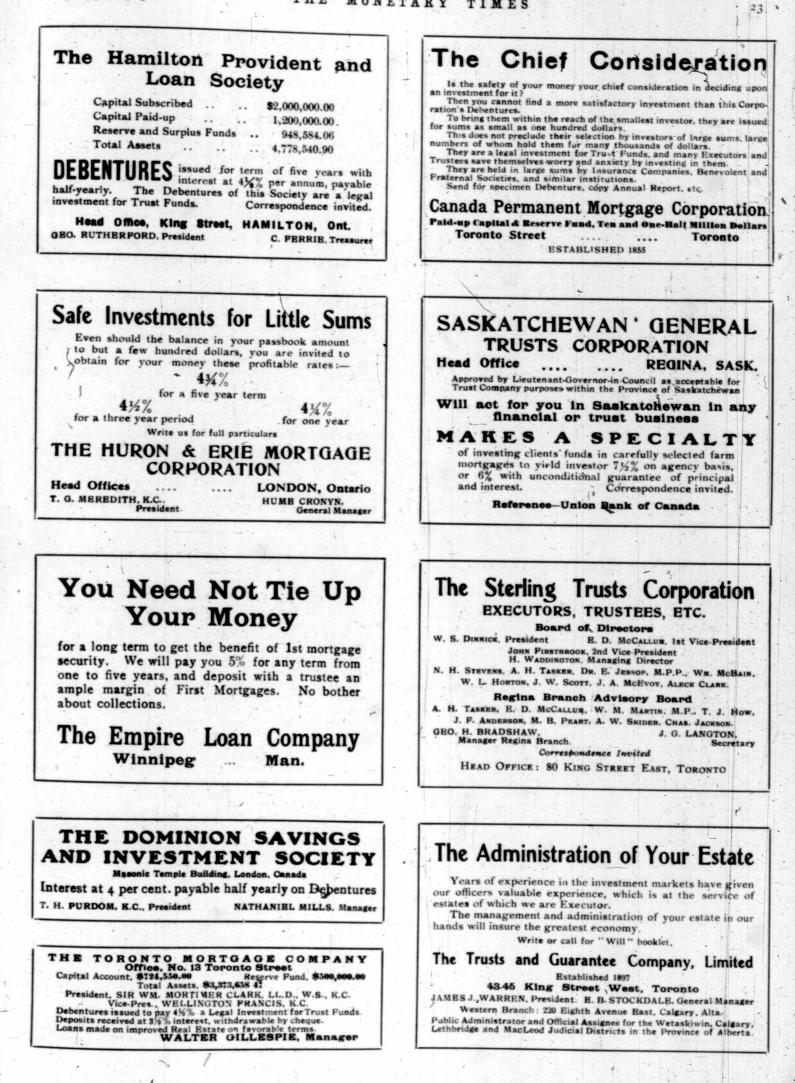

#### Remedying the Wrong Basis.

For instance, the Modern Woodmen of America had in force, in 1912, no less than the astonishing amount of \$1,863,-194,000 of insurance on its books. One year later it had only \$1,545,759,000, being a loss of \$317,435,000 during twelve months-equal to the total failure of a dozen or fifteen ordinary associations. It paid death claims in that year of \$12,-359,055. Its assets were only \$13,228,817-an inadequate amount with which to help meet the increasing losses due to the increasing age of the 962,966 members. It is the aged and diseased who cling to a society in such cases, for they cannot get acceptance as the healthy, young members can.

Much controversy always occurs among the officers of societies when they discover that their rates are inadequate, and that every year's operation is bringing their pet society nearer and nearer to the point where the outgo in death calls will exceed the income. Some of them think that all that is needed is a slight increase of the rates or an extra call, so as to provide a small temporary addition to the boasted surplus. Others think the National Fraternal rates should be used, but applied only upon ages at entry, while others again believe the more drastic plan of applying those increased rates to the attained ages, as the Home Circles have done. But none of these expedients will ever meet the difficulty arising from the large deficiency produced by the absence of the surplus that should have been saved up at compound interest for twenty or thirty years previously out of the additional rates, or additional calls that were not received, and not saved up.

When an actuary is called in and an attempt is thus made to find out how large the shortage of surplus really is, most people are astonished at the large amount needed to render the society solvent. The actuary cannot tell how much the society has lost in the past by careless management, but he can compute the present worth of the rates being collected at present in a single premium or sum which would yield

THE MONETARY TIMES

those rates if invested at, say, 41/2 per cent. interest during the time each member, according to his age, is supposed to live. This done, if the result is, say, \$200 when the proper single premium to produce solvency is on the average, \$300, then it becomes evident that the rates should, at least, be increased by one-third from that date onward. Also, that current expenses should be fully provided for, month by month, in some other manner, or else be added to the new rates thus determined.

24

To afford a good idea of what the rates of any society should have been from the beginning (but not after it has failed to collect a proper amount from thousands of members who have died, or who are now actually diseased, or on their death bed), a table of net premiums follows, based upon the American Mortality Table and 4½ per cent. interest. The first two columns are from "Principles and Practice." The third column is the National Fraternal Congress rate, and the fourth column gives what is called the Hunter 4 per cent. rate, found in the Ontario Insurance reports. The fifth column gives the ordinary life rate, without profits, but in-cluding all expenses and special benefits, as used by an ordinary life insurance company. The sixth column is the rates of the Royal Arcanum :--

 Age at entry.	life.	2 Yearly rate.	Fra.	Hunter's	C. O.'s rate.	rate	
20	237.64	\$11.97	\$10.80	\$10.55	\$15.37	\$ 9.72	
30		15.34	14.64	14.31	19.60	13.20	
35	293.35		17.52		22.70	15.60	
45	376.35		26.04		26.79	19.32	
50	430.04	32.49	32.76	30.72	39.89	30.24	

The old line company, whose rate is given in column 5, gives a liberal cash surrender if the party should drop out after three or more years. For example, upon age 35, after three years, \$18; after five, \$37; aften ten, \$107; after twenty, \$411. This is a liberal return to the man who pays about \$5 a year above the net rates.

#### COMPANIES INCREASED CAPITAL

Increases in capital stock have been made by the following companies :- Scythes and Company, Limited, with Dominion charter, from \$75,000 to \$250,000; the Gleaner, Limited, with New Brunswick charter, from \$30,000 to \$99,-000; Georgetown Silver Black Fox Company, Limited, with Prince Edward Island charter, from \$60,000 to \$98,000; the Howatt Dalton Silver Black Fox Company, Limited, from \$165,000 to \$250,000; Young Karakule Sheep Company, Limited, with Prince Edward Island charter from \$100,000 to Limited, with Prince Edward Island charter, from \$150,000 to \$200,000.

George Weston, Limited, with Ontario charter, has re-duced its capital stock from \$250,000 to \$125,000.

The following companies have been authorized to do business in Quebec :- Van Oppen and Company, Limited, bead office at Montreal, chief agent, Mr. Sydney Redman, of the same city: John R. Thompson and Company, head office at Montreal, chief agent, Mr. Edward Baldwin Savage, of the same city.

The following companies have been licensed to do busi-ness in Manitoba:-The Excess Insurance Company, Limi-ted, of London, England; the Canada Weather Insurance

Company, of Toronto, Ont. The Doctor C. C. Young Karakule Sheep Company, Limited, with Prince Edward Island charter, has changed its name to Young Karakule Sheep Company, Limited.

The surrender of the charters of the following companies have been accepted .- A. H. Read, Limited; the Oak Park Stock Farm Company, Limited; La Compagnie Robinet Freres de Sandwich, Limited; Merchants' Supply Company, Limited, all of Ontario.

The estimated value of German property in Great Britain now in the custody of the public trustee is £85,000,000. Mr. Russell Rea, who, on behalf of the Imperial board of trade, gave these figures in response to a question from Lord Charles Beresford, assured the questioner that "these Ger-man assets will be available for such disposal as seems proper at the conclusion of peace."

#### VANCOUVER BANK NEEDED HALF MILLION

In connection with Mr. Ewing Buchan's explanation of his appointment as curator of the Bank of Vancouver liqui-dation, Vancouver reports stated "that Mr. Buchan had used his best efforts to try to induce capitalists to put up \$50,000, which would have been sufficient to meet payments and carry the bank through. Mr. Shatford (president of the bank) had also tried to secure capital for this purpose in eastern Canada, but had failed. During his trusteeship he had redeemed notes in circulation to the amount of \$56,000, reducing the liability to \$660,000." Mr. Buchan informs The Monetary Times, that the sum

he stated to be sufficient to carry the bank through was \$500,-000, not \$50,000, and that the amount of notes redeemed was \$66,140.

#### MILLING INDUSTRY IN SASKATCHEWAN

Alone among the chief industries of Saskatchewan, the milling business has shown an increase in the volume of its business in 1914, as compared with the previous year. Since 1911, when the bureau of labor first began to collect statistics, this industry has shown a steady growth. In that year, there were operating in the province 22 mills, with a gross produce of \$3,596,934. In 1914 there were 37 mills operating, three less than the previous year and employing 510 men instead of 520, and less capital, but the number of working days in the year was increased on the average by 16, and the 1914 output was \$7,276,859, as compared with \$6,118,320 for 1913. An industry which seems to be making progress in this province is that of the foundries and machine shops, and though until the year 1914 it had not been considered sufficiently important to include with the other industries by reason of the probable smallness of the figures, still the amount of business done in 1914 has been recorded. There are such establishments in the province employing altogether 54 men, and the gross value of the output was \$202,380.

#### FIVE MILLION SHELLS FOR RUSSIA

The \$83,000,000 contract now being handled by the Canadian Car and Foundry Company for the Russian gov-ernment calls for 5,000,000 shrapnel and howitzer shells at an average cost price of \$17.85. According to the New York Journal of Commerce, the Canadian Car and Foundry Com-pany's profit will be, it is said, 25 per cent. The following are the principal sub-contracts sublet by the Canadian company, and their value:

pany, and their value:--Hydraulic Pressed Steel Company, \$475,000; American Rolling Mill Company, \$030,000; Barney and Smith Car Company, \$1,122,000; Dayton Manufacturing Company, \$463,000; Federal Pressed Steel Company, \$1,850,000; Northern Electric Company, Montreal, \$275,000; United Lead Company, New York, \$280,000; Recording and Com-puting Machine Company, Dayton, Ohio, \$60,000; Michi-gan Brass and Copper Company, \$2,400,000; Michi-gans; \$375,000; Auto Parts Manufacturing Com-pany, \$650,000; Vermont Farm Machine Company, \$650,000; Consolidated Manufacturing Company, \$550,000; United States Steel Products Company, \$840,000; Mead Morrison Consolidated Manufacturing Company, \$550,000; United States Steel Products Company, \$840,000; Mead Morrison Company, \$900,000; Crocker, Wheeler Company, \$450,000; Platt Iron Works, \$630,000; Lauzon Engineering Company, Levis, \$180,000; Dayton Manufacturing Company, \$320,000; Worcester Manufacturing Company, \$480,500; Bridgeport White Metals Company, \$360,000. The total of these and other contracts awarded is \$21.

The total of these and other contracts awarded is \$21,-724,000. Contracts still being negotiated include American Locomotive Company, \$10,000,000; Pressed Steel Car Com-pany, \$10,000,000; United States Cartridge Company, \$10,-000,000; Dayton Manufacturing Company, \$104,330; total, \$30,104,330.

The remainder of the \$83,000,000 contract, not shown above, is to be filled directly in Canada by the Canadian Car and Foundry Company, with the assistance of other Canadian firms.

For new paving works, etc., the city of Westmount, Que., has appropriated \$49,486.

# March Bank Statement Maintains Deposits Record

Total Deposits Exceed a Billion Dollars—Current Loans are over Eleven Millions less than a year ago—Loans to Municipalities Have Increased

Deposits on demand		
Deposits after notice		•••••
Current loans in Can	a	· · · · · · ·
Current loans elsewho		
Loans to municipalitie		
Call loans in Canada		
Gall loans elsewhere		
Circulation		*****

THE above are the changes in the principal accounts of the chartered banks' statement to the Dominion government for March. Generally speaking, the statement follows the lines of the February document, although call loans out of Canada and loans to municipalities show marked increases. Savings deposits made a further gain and current loans show another slight decrease. Compared with a year ago, the call loans abroad are 30 per cent. lower while municipal loans are 32 per cent. higher and current loans abroad, 22.6 per cent. less. After notice deposits are over \$30,000,000, or 4.6 per cent. more than in March a year ago.

The following table shows the trend of the Canadian loans account for the past thirteen months:--

	Current in /	· Call in
Loans.	Canada.	Canada.
1914-March	\$823,490,422	\$69,088,240
April	835,705,064	68,523,774
May	838,462,686	67,210,504
June	838,276,428	67,401,484
July	840,198,625	68,441,816
August	836,574,000	69,229,045
September	826,514,621	70,063,414
October	816,623,852	70,201,930
November	794,269,220	69,394,407
December	786,034,378	68,511,653
1915-January	770,118,011	66,154,891
February	771,635,208	67,591,769
March	769,138,883	68,245,261

Current loans in Canada, which give a good idea of the general volume of business, are \$54,000,000, or 6.5 per cent. smaller than a year ago, the decline during March being about \$2,500,000 or 0.25 per cent. The March figures were the lowest during the 13 months period. Two years ago these loans were \$121,000,000 larger than they were last month. Call loans in Canada increased slightly in March, probably as a result of the gradually growing activity on the stock exchanges.

The following table shows the fluctuations of loans at home and abroad during the past five years :--

March.	in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1911	\$710,604,072	\$35,512,495	\$58,369,712	\$ 85,250,789
1912	815,948,308	34,209,383	69,846,338	94,667,027
1913	890,513,446	38,277,672	70,731,030	109,227,927
1914	823,490,422	53,279,411	69,088,240	145,218,223
1915	769,138,883	41,745,737	68,245,261	101,938,685

Canadian current loans last month were lower than in any March of the past four. They are \$59,000,000 greater, however, than in March, 1911. Current loans abroad fluctuate but little and do not have a vitally important bearing on the domestic loan situation. Call loans in Canada do not show any violent changes. Call loans abroad fluctuate considerably, as the above figures

	1.		Year's	Month's

February		671,088,613
March	330.514.286	676,875,700

The deposits accounts are again an interesting study. The tendency in the past few months has been for demand deposits to decrease and after notice deposits to increase. Last month, both accounts increased, the former by approximately \$8,000,000 or 2.4 per cent., the latter by nearly \$6,000,000 or 0.89 per cent., a total increase in the two accounts of about \$14,000,000 during the month. After notice deposits, which are generally understood to be the savings, are \$30,000,000 or 4.6 per cent. larger than they were a year ago. Demand deposits, a business account, are only about \$6,000,000 or 1.7 per cent. less than a year ago.

The deposits record for the past five years for the month of March is given in the following table compiled by The Monetary Times :--

March.	On demand.	After notice.	Total.
1911	. \$278,171,792	\$553,032,466	\$831,204,258
1912	. 331,896,238	606,044,932	937.941.170
1913	. 357,756,659	630,434,708	988,191,367
1914	. 345,590,642	646,143,604	991.734.246
1915	. 339,514,286	676,875,700	1.016.300.076

The total deposits still exceed a billion dollars. This is the first March on record during which such a high mark has been reached. Total deposits have exceeded a

ASSETS

Of the deposit in Central Gold Reserves \$3,500.000 is in gold coin : the balance is in Dominion Notes.

billion dollars during other months in recent years, but never before in the month of March. A similar record was made in February last. Demand deposits are nearly \$61,000,000 larger than they were four years ago, while after notice deposits are about \$123,000,000 greater than four years ago.

The March bank statement again reflects a healthy condition, although it would be more gratifying to see an increase in current loans as a result of a larger business movement generally. The gain in after notice deposits seems to be another indication of the increasing accumulation of savings. With more definite news from Europe, the banks may be asked to release some of these savings for investment purposes.

#### TWO BANKS PAY A BONUS

With the regular dividend at 2½ per cent. for the second quarter of its fiscal year, the Bank of Montreal announced a bonus of 1 per cent., both payable June 1st to shareholders of record April outh

of record April 20th. With the regular quarterly dividend of 2½ per cent. the Canadian Bank of Commerce has also declared the usual half-yearly bonus of 1 per cent. Both will be payable June 1st to shareholders of record May 17th.

A useful office card, bearing the names of all the fire intheir head office location, has been issued by the Hamilton Fire Insurance Company, of which Mr. R. T. Kelly is the enterprising manager.

#### BANK OF SCOTLAND'S REPORT

The Bank of Scotland's latest annual statement shows liabilities aggregating £28,381,829, made up as follows:—Note circulation, £1,556,979; drafts issued payable within fourteen days, £566,183; deposits and credit balances, £21,103,759; acceptances, £2,522,997; paid-up capital, £1,325,- $\infty$ ; reserve fund, £1,200,000; half-yearly dividend, at the rate of 16 per cent. per annum, payable 15th April, 1915, (making 18 per cent. for the year), £95,488; balance of profits carried forward, £11,422.

The bank's assets are gold and silver coin, currency notes, notes of other banks, cash balance with the Bank of England, and cheques in course of transmission,  $\pounds 2,165,206$ ; British government securities, and money in London at call or payable within twenty days,  $\pounds 8,215,566$ ; Indian and colonial government securities, and other stocks and investments,  $\pounds_{3,478,747}$ ; bills discounted, cash accounts, and other advances,  $\pounds_{11,309,582}$ ; bank premises at Edinburgh and branches,  $\pounds_{293,526}$ ; freehold property, Bishopsgate, London,  $\pounds_{197,676}$ ; heritable property yielding rent,  $\pounds_{198,526}$ ; liabilities of banking and other customers for acceptances by the bank, as per contra,  $\pounds_{2,522,997}$ .

This substantial and veteran institution was constituted in 1695. Its head office is at Edinburgh, and it has important offices at London and Glasgow, together with numerous branches.

The authorized expenditure on public works, which are likely to be carried out this summer in Calgary, amounts to \$465,000.

Volume 54.

# 1914 Annual Report of the Directors of the LAW UNION & ROCK **INSURANCE COMPANY, LIMITED**

The Directors have the pleasure to submit their Report upon the operations of the Company during the twelve months ended 31st December, 1914, together with the Revenue Accounts, Profit and Loss Account and Balance Sheet for that year.

FIRE DEPARTMENT .- The Fire Premiums, after deduction of Reinsurances, amounted to \$1,230,006. The Losses by Fire, less Reinsurances, were \$585,299, or 47.58 per cent. of the Premium Income. The expenses of every description, including Commission, amounted to \$471,812, and were at the rate of 38.35 per cent. of the Net Premium Income. The Fire Reserves amount to \$1,492,000, and \$220,355 has been carried to the Profit and Loss Account.

EMPLOYERS' LIABILITY DEPARTMENT.—The Income of this Department amounted to \$185,494, and the outgoings of all descriptions to \$121,648. The Reserve for Unexpired Risk has been increased to \$71,810, and \$51,200 has been carried to the Profit and Loss Account.

ACCIDENT ACCOUNT.-The Income amounted to \$83,231, and the Claims Commission, Expenses and Bonus to Policyholders to \$58,477. The Reserve for Unexpired Risk amounts to \$32,545, and \$24,054 has been carried to the Profit and Loss Account.

**PROFIT AND LOSS ACCOUNT.**—The sum of \$1,350,893 was brought forward from 1913. To that amount has been added: from the Fire Account, \$220,355; from the Employers' Liability Account, \$51,200; from the Accident Account, \$24,054; from the General Account, \$28,312; and from the Fixed Term As-surance Fund, \$52,350; making, with \$184,161 of Interest, \$399,565 Shareholders' proportion of Life Profits, and Transfer Fees, \$335, a total of \$2,311,225. Thereout has been paid for Dividends to Shareholders, \$422,492; for Interest on Debentures, \$53,948; for Expenses of Management, \$20,000; for Income Tax, \$24,390; and after providing \$297,463 to most deprecipition in Securities and carrying \$126,964 to an Investment Reand after providing \$297,463 to meet depreciation in Securities, and carrying \$126,964 to an Investment Reserve Fund, there remains a balance of \$1,315,968 to be carried forward as a General Reserve, and to support future Dividends.

ASSETS AND INCOME.—The Assets of the Company at the close of the year amounted to \$48,698,186, and the Total Income to \$6,781,350. Old Serjeant's Inn, Chancery Lane, London, 8th March, 1915.

#### PACIFIC COAST FIRE LOSSES

## How Fires Start in British Columbia's Largest Cities-

#### Values and Insurance

Fire Chief Carlisle's report shows Vancouver's fire loss and insurance involved last year were as follow:---

	Loss on buildings Loss on contents		175,128 502,643	
CONTRACTOR NO.	Total loss Insurance paid, buildings Insurance paid, contents	8	677,771 142,337 396,378	
	Total insurance paid Value of buildings Value of contents	\$3.	365,660	
	Total value property involved Insurance carried, buildings Insurance carried, contents	\$2,	121,500 741,050	
	Total insurance carried	\$4,	862,550	

#### Classes of Buildings,

The causes of fires included: unknown, 64; overheated stoves, furnaces and ranges, 24; overheated stove and furnace pipes, 20; defective flues and chimneys, 11; defective grates and fireplaces, 8; defective boiler, 1; live coals falling from grate, 1; hot ashes, 13; spontaneous combustion, 9; electric light left on inflammable material, 2; carelessness with matches, 12; rubbish fires, 8; tar pots, 7; coal oil lamp and stoves exploding, 12; drying clothes too close to fires, 9; carelessness with lighted cigars and cigarettes, 9; defective wiring, 8; flying sparks, 23; back-fire in carburettor, 14; chimney fires, 104; false alarms, 49; gas pipes and mains leaking, 8; stump and bush fires, 50; smoke scares, 24; gasolene and chemical explosions, 16; curtains blown against lamp, 3; men smoking in bed, 4; incendiary origin, 7; meat left in oven, 2; fires outside city limits, 17; exhibition runs, 2; overheated bearings, 3; heating inflammable matter, 3; electric irons left turned on, 5; fires, broke out again, 6; sparks from chimneys, 54; lime getting wet, 1; short circuit, 7; overload of current, 2; steam pipes sursting, 1; grease boiling over on stove, 3; lamps upsetting, 2; fire crackers, 1; house struck by lightping, 1; overheated smoke room, 1; second alarms, 8; third alarms, 3;

The buildings where fires occurred and damage resulted during 1914 were: warehouses, 10; dwellings, 104; stores (miscellaneous), 11; elevator motor, 1; second-hand stores, 6; automobiles, 5; hotels, 1; launches, 1; tug boats, 2; cafes, 3; rooming houses, 15; Y.M.C.A., 1; woodsheds, 3; studios, 2; tailor shops, 4; apartments, 6; offices, 4; street car, 1; garage and machine shops, 4; stores with rooms above, 13; foundry, 1; dairies, 2; wharf, 1; moving picture theatres, 2; saw mill and dry kilns, 9; renovatories, 4; vacant houses, 2; grocery 1; department store, 1; barn, 1; produce merchant's stores, 2; city hall, 1; church, 1; storehouses, 2; cabins, 2; Salvation Army barracks, 2; motor cycle, 1; paint shop, 1; power house, 1; bandstand, 1; manufactories, 4; freight car, 1; bake shops, 2; laundries, 2.

#### Losses in Victoria.

Fire Chief Davis's report shows Victoria's fire department responded to 276 alarms, an increase of 11 over that of last year, of which 61 were box alarms and 215 were telephone alarms, making a total of 276.

The total loss by fire on buildings and contents for the year 1914 amounted to \$46.952, being \$400 less than that of the previous year.

Loss by fire on buildings	\$ 19,310
Loss by fire on contents	27,641
Insurance on buildings	438,300
insurance on contents	
Loss on buildings with no insurance	490
Loss on contents with no insurance	760
Total loss by fire on buildings and contents	46,952
Total loss on buildings and contents	623.800

#### CANADA USING PANAMA CANAL

#### Lumber is One of the Chief Commodities Passing Through

#### the New Waterway

The initial benefits to Canada of the Panama Canal are indicated in results of the first six months of operation. Nearly five hundred vessels and over two and a quarter million tons of cargo is the record. The canal was formally opened to traffic August 15th, 1914, and from that date to the close of business on February 14th, 1915, a report of the Isthmian Canal Commission shows the passage of 496 vessels other than canal vessels and launches, carrying 2,367,344 tons of cargo. Slightly more than one-half of this traffic, both in vessels and cargo tonnage, was eastbound, the figures being : Eastbound, 252 vessels carrying 1,340,625 tons of cargo, and westbound, 244 vessels, 1,026,619 tons.

Somewhat more than 22 per cent. of the vessels and over 41 per cent, of the cargo handled was in the movement between ports of the United States, in what is classified as coastwise trade. In a general way this domestic traffic was equally divided between eastbound and westbound, in regard to both number of vessels and cargo tonnage.

#### Largest Traffic Eastwards.

Over 21 per cent, of the cargo passing through the canal was in the movement between the Pacific Coast of North America, principally the United States, and Europe, the exact figures being 66 vessels carrying 444,855 tons of cargo. The traffic in the other direction over this route was but a little more than one-eighth as much. Approximately 21 per cent., 69 vessels and 378,386 tons, was on the route between the west coast of South America and ports on the Atlantic seaboard of the United States and Europe. Traffic the other way was represented by half as many vessels carrying onethird as much cargo. Traffic between the Atlantic seaboard and Far Eastern ports amounted to 12 per cent, of the total traffic through the canal, the figures being 48 vessels and 287,782 tons. Only two vessels carrying 14,500 tons of cargo passed the other way over this route.

Six commodities—grain, nitrates, coal, refined petroleum products, lumber and cotton—says Commercial America, accounted for approximately one-third of the total tonnage through the Panama Canal in the first six months of its operation.

#### Trade with Orient and Europe.

Grain, consisting principally of wheat and barley, amounted to 303,124 tons, nearly all bound from the west coast of North America. Nitrates, shipped from the west coast of South America to various ports on the Atlantic seaboard of the United States and Europe, aggregated 204,441 tons. Coal, amounting to 151,745 tons, on the other hand, was exclusively westbound. 54 per cent. of the shipments originating on the Atlantic seaboard of the United States and the remaining 46 per cent. in the United Kingdom. Refined petroleum and like products, amounting to 102,456 tons, were likewise westbound almost exclusively, being shipped from the Atlantic ports of the United States to China, Japan and Korea.

Lumber shipments totalled 56,078 tons, nearly all being eastbound, originating on the Pacific Coast of the United States and Canada. Raw cotton shipments, on the other hand, amounting to 38,230 tons, were principally en route from the Atlantic seaboard of the United States to the fat east, 70 per cent, being destined for Japan.

New York advices state that J. P. Morgan and Company, the Bank of Montreal and Brown Brothers and Company, have bought the \$6,000,000 province of Quebec 5-year 5 per cent. bonds for which Tucker, Anthony and Company, of Boston were the successful bidders at the sale recently. A public offering of the bonds will probably be made shortly.

"First and paramount, absolute security to policyholders" is a good introduction and foundation for the thirty facts which have been concisely treated by Mr. Clifford Elvins in a little booklet dealing with the Imperial Life Assurance Company's policies. A series of miniature photos of kings, premiers and other personalities add to the effectiveness of the publication, which is entitled "A Few Facts."

#### MUNICIPAL BOND MARKET

#### The Monetary Times' Weekly Register of Municipal Activities and Financing

The bank loans to municipalities in March were nearly \$3,000,000, or 7.8 per cent., higher than in the previous month. Compared with a year ago, the figures are nearly \$9,000,000, or 32.2 per cent., larger. Only four times in the past 20 months have bank loans to municipalities been higher than they were last month.

The following table, compiled by The Monetary Times, gives the details of bank loans to municipalities:-

Month.	Bank loans to municipalities.
1913-August	 . \$41,310,281
September	 37,465,383
October	 37,846,360
November .	 35,173,817
December	30,518,573
1914—January	 20,301,620
February .	 . 30,372,854
March	 31,800,843
April .	 30,168,812
May	
June	
July	 . 37,260,571
July	 . 36,372,334
August	 39,664,534
September	 44,338,873
October .	 47,316,076
November	 44,706,055
December :	 . 38,256,047
1915-January	 35,952,805
February	 . 38.437.003
March	 . 41,227,449

During January, February, March and April \$13,247,028 of municipal bonds were sold in Canada and \$16,214,772 in the United States. The increase in bank loans to municipalities last month may have been due partly to municipal borrowing from the banks in advance of cash collections, while blocks of municipal bonds remaining unsold, Western especially, are also reflected in the figures.

Truro, N.S.—Tenders are desired for an issue of \$36,000 5 per cent. 30-year bonds. H. McDougall, clerk.

Shawinigan Falls, Que.—Tenders are desired for an issue of \$150,000 5½ per cent. 30-year bonds. A. J. Meunier, secretary-treasurer.

Vegreville, Alta.—Tenders are desired for \$10,200 6 per cent. bonds. T. Hermann, secretary-treasurer. (Official advertisement appears elsewhere.)

Rossland, B.C.—An issue of \$20,000 5 per cent. 20-year school bonds has been sanctioned by the provincial municipal department. J. A. McLeod, city clerk.

Hamilton, Ont.—In addition to \$350,000 bonds recently purchased, Messrs. Wood, Gundy and Company are negotiating for a further purchase of a similar amount.

Saskatchewan.—The following rural telephone bonds have been sold: Bienfait, \$1,000; Ellsworth, \$1,500; Saskatchewan River, \$6,600; Deep Lake, \$11,500; East Milden, \$3,000; Juniata \$200.

Stratford, Ont.—The by-law to wipe out the hospital indebtedness of \$7,000 has been passed by the council. The new tax rate is 27 mills for public school supporters and 25.3 for separate school supporters.

North Vancouver, B.C.—The following bonds, \$35,000 5 per cent. 50-year for street improvements, and \$8,025 6 per cent. 10-year for local improvements, have received provincial authorization. J. F. Collins, clerk.

Windsor, Ont.—Tenders are desired for issues of \$100,-000 5 per cent. 30-year school bonds and \$144.098 5½ per cent. 20-year light bonds. Closing date for bids, May 7th. M. A. Dickinson, acting clerk. (Official advertisement appears on another page.)

The Pas, Man.—Tenders are desired for \$90,000 5 per cent. 20-year electric light, sewer and waterworks bonds. The bonds are the unsold balance of an issue of \$130,000. H. H. Elliott, secretary-treasurer. (Official advertisement appears on another page.) **Brandon, Man.**—In connection with the sale of bonds noted in the last issue of *The Monetary Times*, the city council's resolution was: "That the tender of the Dominion Securities Corporation, Toronto, of 92.30 with accrued interest to the city of Brandon, payment for \$92,000 20-years sewer debentures 5 per cent, and \$13,000 boulevard 7-years 5 per cent. with option on Gordon McKay debenture for 60 days at par, city to sell no further bonds for three months, be accepted."

Lethbridge, Alta.—The auditor's annual report shows that the city has total debentures outstanding amounting to \$3,869,558, and when these deductions: Local improvement debentures, \$445,044; public utility debentures as follows: Waterworks, \$523,787; electric light and power, \$689,665; street railway, \$463,438; industrial building, \$51, 379; coal mine, \$1,500; weigh scales, \$986; sinking fund on general debentures, \$142,020, are made, the net debenture indebtedness is shown to be \$1,551,736; and the city's borrowing power is 20 per cent. of total assessment of \$25,-368,650, or \$5,073,730, thus leaving remaining borrowing power of \$3,521,994.

**Toronto, Ont.**—Mayor Church and the controllers desire an interview with the Ontario Government to secure its consent to changing the date of the waterworks debentures. Although the ratepayers sanctioned the spending of \$6,000, 000 on the construction of a duplicate system in the east end, little of the work has yet been undertaken. About \$1,000,000 has been spent on new mains and on the extension of the filtration plant at the Island. The result is that \$5,000,000 of the debentures have not yet been marketed, but, under the law, the city is required to provide sinking fund and interest on these bonds. It is proposed to ask the Government to consent to the changing of the lifetime of the bonds from 40 to 38 years, which will result in a saving of about \$500,000.

**Berlin, Ont.**—Nine tenders were made for the issue of \$6,000 debentures of Berlin mentioned in last week's issue of *The Monetary Times* as awarded to Messrs. Jarvis and Company, Toronto. The bids were :—

Jarvis and Company	103.88
Ames and Company	102 22
, Kerr, Bell and Fleming	100 00
wood, Gundy and Company	102 15
burgess and Company	100 15
Dominion Securities Corporation	102 160
Mackenzie and Company	102 11
Sumson and Company	102 00
Brent, Noxon and Company	102.74

Montreal, Que.—The city of Montreal sells to-day \$6, 100,000 3-year 5 per cent, gold bonds. The purpose of the loan is to retire \$3,650,000 maturing treasury bills and to provide for the construction of public works. The bonds are dated May 1st, 1915, due May 1st, 1918, with interest payable half-yearly on November 1st and May 1st. Principal and interest are payable in gold at the city treasurer's office, Montreal, or at the agency of the Bank of Montreal, 64 Wall Street, New York, at the option of the holder. Bonds are in the denomination of \$1,000 each, with interest coupons attached. The city retains the right to redeem at par and accrued interest the whole, but not part, of this issue at any time upon giving 60 days' notice by advertisements to be published during three consecutive days in two daily newspapers in each of the cities of Montreal, New York, Boston and Philadelphia.

Verdun, Que.— The second reading of a by-law to permit a loan of \$400,000 for public works has been passed by the Verdun, Que., council. The yearly appropriation for interest and sinking fund will have to be increased by one-third, while the present taxation rate of 7½ mills will probably have to be raised to 10 or 11 mills to meet the requirements of the loan.

Mayor Manning urged delay, stating that few of the improvements to be made with the money realized from the bond issue were absolutely necessary at the present time. He gave three other reasons for postponing the loan till better times, namely, that the loan could probably be made only at a heavy discount; that additional taxes would be involved to meet the interest and sinking fund expenses, and finally that it was imprudent to saddle the city with any further obligations until a report of the accountants, who are preparing a statement of the city's receipts and expenditures if the council insisted on the issuance of these bonds, a detailed plan of what improvements were intended should first be prepared for the information of the ratepayers.

#### Quebec Province Bonds.

The \$6,000,000 Quebec province 5 per cent. 5-year gold bonds, recently sold, are now being handled by Messrs. J. P. Morgan and Company, Messrs. Brown Brothers and Company, New York and the Bank of Montreal. They state that they have already received applications for a large part of they have already received applications for a name part of the issue, and offer the balance subject to prior sale at 100% and interest, yielding about 4.85 per cent. These bonds are a direct and primary obligation of the province of Quebec and are payable from the general revenues, which amounted in the year ending June 30, 1914, to \$9,000,377. For the last ten years the province has had an average annual surplus over ordinary and extraordinary expenditures of \$533,342.

Its net debt per capita has decreased from \$15.63 in 1901 to \$13.49 at the present time. Principal and interest

of the bonds are payable at the Bank of Montreal in New

York, Montreal or Quebec. Mr. Clarence McCuaig, Montreal, who is understood to have interested in this issue Messrs. Tucker, Anthony and Company, Boston, the original purchasers, states that in a short time he will be able to announce that some of the large United States firms who have participated in this pur-chase will make further large investments in Quebec pro-vince, as they now realize that this is the opportune moment for investment in the stable enterprises of the country.

#### Alberta to Assist Central Railway.

The recent legislation of the Alberta Government in ref-erence to a loan to the Central Canada Railway Company provides that an amount or amounts not exceeding 80 per cent. of the cost of construction, shall be advanced to the company by the provincial government, pending the disposal of the guaranteed securities of the company, and that this loan shall bear 4½ per cent. interest and be secured by a bond, debenture covenant or other security of the company. guaranteed by the Edmonton, Dunvegan and British Columbia Railway, the due payment whereof shall be further se-cured by a first mortgage or charge upon the line.

The previous act of October, 1914, stated :--"That it was expedient that that portion of the said line of railway from a point on the line of the Edmonton, Dunvegan and British Columbia Railway to the Peace River, a distance of about 50 miles, should be completed as speedily as possible for the purpose of connecting with the navigation of the said Peace River." The Alberta government in 1913 guaranteed the company's bonds to the extent of \$20,000 per mile in respect to 100 miles of railroad.

The total sales of Canadian provincial securities this year to date, according to the records of The Monetary Times, have been \$22,375,000, all made in the United States.

· Kaministiquia Power Company has declared the regular quarterly dividend of 11/2 per cent, on its stock, payable May 15 to stock of record April 30.

ĝ Both blocks of debentures may as far as practicable be made of the denomination of one thousand dollars each. Tenders must be for each block of debentures separately.

No tender necessarily accepted. Further particulars furnished on application to

M. A. DICKINSON, Acting Clerk.

Windsor, Ont., April 26th, 1915.

### HOTEL FIRES IN SASKATCHEWAN

Six hotels in Saskatoon have been destroyed by fire since . banish-the-bar policy was announced, and in every case save one an investigation is now being conducted by provincial fire commissioner McLean, says a Saskatoon despatch, which adds:, Several fire insurance companies have taken alarm and cancelled all hotel policies in this province, while others have scaled down their risks.

Mr. A. J. Trotter, of the Willoughby-Sumner company, made the above statement, and said also that a large number of applications for new policies had been rejected. "Quite a large number of hotels are insured either by mortgage companies or by breweries which are interested in them," he said, "and in these cases the insurance companies have been more inclined to continue the policies, but where a hotel is in private hands and its profit depends on the bar receipts, insurance companies have become exceedingly careful."

The Marquis of Aberdeen has re-joined the London board 5 of the Canada Life Assurance Company as chairman, a position he occupied until he was appointed viceroy of Ireland.

# Insure Your Brains In The Canada Life

4

THE able, efficient Manager is the brains of many a business. He is the firm's greatest asset. But the death of that Manager destroys this asset and may create a liability which will wreck the firm.

The Canada Life way of meeting this liability is well worth your earnest consideration. Its partnership policy takes the risk from the firm. We shall gladly send you particulars.

> HERBERT C. COX, President and General Manager.

#### Extracts from the President's Address.

In speaking to the Annual Meeting of the Shareholders, Mr. S. J. Moore, the President, said in part: "The shrinkage in Net Profits resulted from a considerable reduction in our volume of business, coupled with the fact that we were obliged to carry over from 1913 a heavy inventory. For these reasons our factories were operated at the rate of only 50 per cent. of their capacity throughout the greater part of the year.

"The reduction in our turn-over was caused by the depressed condition of trade which resulted in our customers purchasing smaller quantities than normally, and was in spite of a substantial increase in the number of customers on our books.

"During the past three months conditions in the trade have improved, and our shipments have shown increases over the corresponding months of last year. The shipments for March and April are larger than those of any March and April since 1910. We are looking forward to a steady return of normal trade conditions.

"Present indications justify the view that the 6 per cent dividend on the Common Stock will be uninterrupted during the year.

"The Balance Sheet reveals a continuance of the strong liquid condition which the Company has shown for some years past. The net surplus of liquid assets (consisting of-merchandise, receivables and cash) over all of the Company's liabilities, including the January dividends, amounts to \$1,095,946.38, which is equivalent to \$121 per share on the Preferred Stock. This, of course, does not include the Company's Real Estate, Factories and Factory Equipment."

The Board of Directors and Officers were re-elected as follows :- S. J. Moore, President; C. H. Duell, Vice-President; Robert Kilgour, W. C. Ely, H. S. Duell, W. A.Jameson, and C. W. Colby, Directors.

1,125,823.306 \*Nore-It will be noted that the figures relating to the imports of coin and bullion for the twelve months ending February, 1915. amounted to \$132,955,322, as against \$14,126,540 for the same period of 1913-14. Although it has been customary to include these figures in Trade returns, the total trade figures are seriously disturbed by them in this instance and they should not be taken as an indication of the trade of Canada.

# THE CANADA NATIONAL FIRE INSURANCE COMPANY HEAD OFFICE: WINNIPEG, MAN.

SURPLUS TO POLICYHOLDERS - \$1,576,398 A Canadian Company Investing its Funds in Canada General Fire Insurance Business Transacted .

APPLICATIONS FOR AGENCIES INVITED

Toronto, Ont., Branch: 20 King St. West C. E CORBOLD, Mgr.

# Good Places for Strong Workers-

Always ready to negotiate with energetic men capable of producing paid-for Insurance in satisfactory volume. Much unoccupied and desirable territory.

## Union Mutual Life Insurance Co. Portland, Maine

ARTHUR L. BATES, PRESIDENT. HENRI E. MORIN, SUPERVISOR Por Agencies in the Western Division. Province of Quebec and Bastern Ontario, apply to WALTER I. JOSEPH, Manager. 502 McGill Building, Montreal.

For Agencies in Western Ontario, apply to E. J. ATKINSON, Manager, 107 Manning Chambers, 72 Queen St. West, Toronto

## OCEAN ACCIDENT AND CUARANTEE CORPORATION

One of the strongest British companies, which has a wellorganized and enterprising Canadian branch, the Ocean Accident and Guarantee Corporation, held its forty-fourth annual meeting in London recently. Naturally, the company's busi-ness was seriously hit by the war, especially in the colonial and foreign branches, but as pointed out by the company's chairman, Mr. E. Roger Owen, the advantage of having a business spread over the world is that one is able to benefit to the utmost by the true insurance principle, "average," and what the company lost in some places they were able to make good in others.

The report of the company's operations for the past year shows revenue of over \$11,000,000, an increase of about \$290,-000, a very satisfactory record in view of the general con-ditions last year. Had the company not greatly restricted its underwriting on this continent, because they did not believe that the rates were sufficient to cover the risks which were here being assumed, much larger figures could have been shown. The expenses were again reduced, the percentage

being 35.90 per cent. as against 36.35 per cent. for 1913. The financial statement shows the following interesting figures :-

Government securities, \$4,108,498.83; railway debentures, \$8,150,024.76; mortgages and other assets, \$2,336, 945.62; agents' balances, \$1,184,075.85; cash in banks and offices, \$693,601.32; total assets, \$16,473 146.38. Reserve for insurance in force, \$4,069 105.68; reserve for undetermined losses, \$3,850,000.00; other liabilities, including capital \$2,-135,014.32; total liabilities, \$10 055,020.00; surplus, \$6,418,-126.28 126.38, \$16,473,146.38.

The outstanding features of the report are an increase in premium income, increase of reserves for outstanding claims unearned premiums, and reserve for depreciation of securities, which is now placed at \$600,000. After provision has been made for all active and contingent liabilities there is a surplus to policyholders of \$16,473,146; a remarkable record

The Canadian branch of the company will undertake the writing of fire insurance under the management of Mr. W.

THE MONETARY TIMES

# When the World Sleeps

do you rest serenely in the knowledge that your plant is amply protected from every danger?

Central Station Signal Service guards against every contingency. A burglar cannot enter your building, penetrate your vault, or touch your safe without sending in an alarm bringing special officers to the scene immediately.

If you employ a night watchman it keeps him on the job all the time and gives him the power to call assistance immediately in case of fire or other trouble.

In fact, any emergency whatever is shorn of ost of its danger through such service.

Write or phone nearest office for Bulletin M

DOMINION MESSENGER & SIGNAL CO. LIMITED Electric Protective Signal Systems 34 Ottows

Fudger, formerly of the British America Assurance E. Company.

Mr. E. B. Greenshields, Montreal, constitutes the com-pany's Canadian advisory board. Mr. Charles H. Neely is the general manager of the company for Canada, the Canadian head office being at Toronto. Under his capable supervision the Canadian business has proved an important factor.

Mr. George S. Harrison, manager of the Vancouver branch of the Merchants Bank, gave an excellent address to the local branch of the Credit Men's Association recently. "They say," he remarked, "that the Canadian banks are in They say," he remarked, "that the Canadian banks are in a trust. Well, we have sixty-five bank branches in Vancouver handling the business of a population of 200,000. In Seattle with a population of 350,000, there are but fifteen banks. Every bank has money to loan to honest, capable men, but the banks want to be sure of getting their money back. We hear charges of collision, but in Vancouver we cannot get any two banks to agree as to the rate of exchange on Chinese business." Mr. Harrison's humorous reference to notes. Mr. Harrison's humorous reference to notes, "those old fellows with leather backs, containing a promise to renew, instead of a promise to pay," caught the fancy of his audience.

Mr. J. R. Davison, industrial commissioner, Vancouver, speaking at a recent meeting, said: "Vancouver more than most places needs to encourage a greater variety of indus-tries. We are, as yet, dependent on one or two industries, and in the off seasons there are many men unemployed. If a variety of industries were here, employment would be more continuous the year round. Again, the prairie provinces fur-nish a great demand for labor in the summer and very little demand in the winter. Because of the milder climate, the men drift here in the winter time and have to be supported by the community. This will be true for many years, and unless we do something to encourage industries that, can run in the winter time, this unemployment will, winter after winter, be a severe tax on the ratepayers of this community. It is good business to spend a little money to prevent this." These are sound contentions.
