The copy filmed here has been reproduced thanks to the generosity of:

Library of the Public
Archives of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol → (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

La bibliothèque des Archives
publiques du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole → signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

In the following list we offer for sale about 60,000 acres of the choicest lands in the Province of Manitoba.

They have been selected with great care for the express purpose of being offered to *actual* settlers, and are either in the vicinity of Winnipeg or in the various prosperous settlements scattered throughout the Province. We can therefore recommend them to those proposing to settle at once upon a farm in this Province, as they offer inducements by making speedy returns for any labor expended upon them.

A large quantity of these lands are, even at the present time within marketable distance from Winnipeg or the Pembina Branch, C. P. R., so that those settling upon them can readily sell their produce at fair prices.

It is impossible to obtain desirable homesteads from the Government lands, without going over 100 miles from Winnipeg or the C. P. R.

By going so far from market farmers will find it almost impossible to dispose of their surplus produce till a railway passes their doors which will likely be from four to ten years hence.

Alexander Begg, Esq., in his "Guide to Manitoba," has the following:

"It is our opinion that an immigrant would be unwise to go far beyond the line of settlement, or to undertake to go to the Saskatchewan in advance of civilization, for the following reasons:

1. The heavy cost of getting to his claim.
2. His isolation until settlements reach him.
3. The high cost for procuring the necessaries of life.
4. The distance from a market; even with the chance of selling his produce to traders and others, his profits would be eaten up by the cost of procuring necessaries which he is unable to raise on his farm.
5. His isolation from churches and schools.
6. The nearer he keeps to the line of settlement the quicker will he obtain all the benefits of civilization, especially as the march of development is rapid in this country.

It is for this reason that we condemn the idea of inducing immigrants to go to the North-West in advance of settlements and before proper means of communication are opened up to that vast country.

It must not be understood, however, that we have any desire to belittle the Saskatchewan country, on the contrary we are of opinion that in the near future that great territory will afford homes for thousands of hardy and industrious farmers;

and we are also aware that as far as climate, soil, and other advantages are concerned, the Saskatchewan is equal to Manitoba. But our desire is not to mislead people for the mere purpose of advancing immigration, and the development of the country will be sufficiently promoted by allowing the progress of settlements to be gradual rather than scattered in its character."

Farmers coming to Manitoba should not take very much goods and merchandise with them for they can purchase all they require at reasonable rates in Winnipeg as can be seen from the following, also from Begg's Guide :

In the above we have only given quotations for a few of the principal articles required by a settler, so as to give you an idea of the general cost of goods in Manitoba, and we are of opinion that parties can purchase to better advantage in this Province, than to bring their old worn-out effects with them, and pay freight on them.

If the settler takes any of his effects through with him from the other Provinces, he should make out an invoice—in triplicate—of his goods or animals, go before the Collector of Customs at or near his place of departure, and make a declaration that the goods or animals are the manufacture or production of the Dominion of Canada, or that duty has been paid upon them, and the said collector will then attach his seal to the invoice. With this invoice he can bond his goods at the first United States port he enters, leaving two copies of the invoice with the collector of this port, and retaining the other for the arrival of his goods in Manitoba.

If, however, he comes with a large party of emigrants, there will be no difficulty, as the cars, with their effects, will be bonded through.

The emigrant can take the all rail route *via* Detroit, Chicago and St. Paul, or the rail and water routes *via* rail to Collingwood or Sarnia, lake steamer to Duluth, and thence by rail.

Arrangements have been made to issue through tickets from all the leading places in Quebec and Ontario by any of the above routes.

We give extracts from the Surveyors' Reports of Township Surveys in Manitoba and the North-West Territories, published by the Surveyor-General on the 31st Dec., 1877:

RANGE I. EAST.

TOWNSHIP 5—SCRATCHING RIVER.

"Is high dry land with a very rich soil. It is open prairie, with the exception of one poplar grove, in section No. 33, three-fourths of a mile long by one-fourth broad, and a few small patches of willows. The Rivière aux Grâties runs in a south-eastern direction through the township."

1. N hf of Sec. 7, clear land, prairie soil, first-class, near town of Morris, 320 acres, \$3.00 per acre.

"In places where these meadows had been cut the second crop was found to be eighteen inches high. Two crops of hay may be procured in one season with ease.

"A prominent ridge runs from the north-west to the south-east containing lime, marl and gravel. There is no running stream or natural spring of water in this township, but wells have been dug by the hay-makers, of which one contained some water in a depth of eight feet, at dry season, leading to the conclusion that a supply of water will never fail when properly looked for.

"At the places where the wells have been dug the section of the ground was two to four feet of black mould, and under it blue or yellow clays."

TOWNSHIP 12.

"Is, for the most part, an open prairie, there being but three or four groves of poplar, a few oak, and some swamp willow found on it.

"With the exception of some small areas of salty land, where a very scanty herbage grows, the entire township may be classed as superior agricultural land."

20. The SW qr of and the S hf of the NW qr of sec 22; 200 acres high prairie, balance hay land, soil good; twelve miles from Winnipeg; 240 acres, \$4 per acre.

TOWNSHIP 14—VICTORIA.
