

REID'S CASE IN POLICE COURT ALL DAY

Fredericton Junction Woman Arraigned on Charge of Murder.

WITNESSES TELL OF CARRYING SUIT CASE

Nurse in Evangeline Home Identifies Clothes on Infant—Dr. Bailey Expresses Opinion Babe Was Alive When Placed Where Found.

The preliminary hearing in the case of Viola Reid, charged with infanticide, was continued in the police court before Magistrate Ritchie all day yesterday afternoon. B. L. Gerow conducted the prosecution and F. A. Guthrie of Fredericton appeared for the defense. The court opened at 2 o'clock when the evidence of Dr. Bailey, which was commenced at the morning session, was continued. Four other witnesses were called by the prosecution during the afternoon and evening. They were Samuel Alexander, David Duplissie and Samuel Burns of Fredericton Junction, and Miss Phoebe Cook of the Salvation Army Evangeline Home. The different witnesses told of seeing the infant's body and Duplissie and Burns told of carrying a heavy suit case for the prisoner. Miss Cook, a nurse in the Evangeline Home, was the most important witness of the session. She was on the stand for an hour in the afternoon and for two hours and a half in the evening. Miss Cook told the story of the body on the infant's home, of her leaving the home with the intention of going to Sackville to give the baby into the keeping of her cousin on April 16th. Miss Cook identified the clothing which the baby wore when found, as having been made in the home. She would not swear, however, that the clothing which was worn by the prisoner's child, when it was taken from the home, was the same as the clothing which she saw on the child. The afternoon session adjourned shortly after six and resumed at eight o'clock. The evening session was given over to the continued examination of Miss Cook.

Prisoner is Complacent. During the entire day the prisoner was in the court room and did not seem to be disturbed by the evidence. At times she smiled and talked to her counsel and seemed to take considerable amusement out of Mr. Guthrie's cross-examination of Miss Cook. During her examination Miss Cook showed signs of nervous breakdown and admitted she was unable to keep her story. Mr. Guthrie was unable to break through her testimony. Dr. Bailey, whose testimony was continued from the morning session, was the first witness. He told of the situation of the body on the infant's home, and of the baby grasping a twig in one hand.

Found Twig in Child's Hand. In answer to Mr. Guthrie, Dr. Bailey said the child when found tightly grasped a twig in one of its hands. The twig extended through the whole hand and it was necessary for the witness to unclasp the hand so tightly was it clenched. Witness did not think the mark on the child's neck could have been made by a neck chain such as children wear. Even a fleshy child wore such a chain and it was rather tight there would be no permanent mark. When found the child was clean and showed evidence of attention. The time elapsed since death could not be judged by rusty pins in the clothing of the infant. Reverting to the cord around the child's neck, Dr. Bailey said the discoloration could not be noticed until the cord was removed. The cord was capable of being moved perhaps half an inch. He did not think death was due to the cord. "Was the cloth drawn tightly over the baby's head as if put there for smothering?" first saw the child this cloth was drawn tightly over its head. "Did you notice earth in the child's hand?" "Yes." "To Mr. Gerow Dr. Bailey said it rained on the day the body was found. He thought decomposition in a body would set in more quickly in summer weather. He could not give an opinion as to the length of time the child had been dead when the body was found.

Samuel Alexander, father of the boy who found the body, said that on the 28th day of April, about eleven o'clock in the forenoon, he was notified by his son that he had found a dead infant. He at once sent the boy to go and see Dr. Bailey, who was also away, but was later got by telephone, while the boy kept watch over the body. The coroner did not arrive until the evening train from Fredericton brought him. In the evening witness was on the ground when the coroner arrived and saw the body of the child. He looked

NETA OTTARIO TOWNS SWEEPED BY BUSH FIRE

Fifty Families Lose Homes and Forced to Flee.

WORST SINCE GREAT PORCUPINE FIRE.

Townships Wiped Out But No Fatalities—Saw Mills Burned and Lumber Camps are Destroyed.

Cobalt, June 13.—Nearly fifty settlers in the township of Tudhope, Truxar, Robillard and Dack, in the immediate vicinity of the town of Charlton, lost their homes and all their belongings in a bush fire which cut a swath through the townships Wednesday and Thursday. The settlers with their families fled from their homes and no fatalities have occurred. Not since the Porcupine fire of 1911, has the district known such a disaster. Not only Charlton is affected but practically every other township in the district where slashings have been made. In addition to the farmers' homes which were destroyed many sawmills also have fallen, and lumber camps wiped out. Twelve miles in length was covered by the fire in the Long Lake and the Northern Ontario Lumber Company, which stood on the shores of Long Lake was destroyed by fire late Wednesday evening. The company's loss will amount to about \$15,000.

It ever carefully noticed the cord around its neck. Its only clothing was a shirt and a napkin pinned on with safety pins. He waited until the doctor and coroner made their examinations. They put the child in a coffin and placed it in the school house shed. The coroner empaneled a jury and the inquest was held, which witness did not attend.

About nine o'clock that evening, the coroner notified the witness to take charge of the body and see to its burial, which was done next morning.

On May 31st Chief Rideout notified the witness that the body was to be exhumed, which was done. Witness identified the body as the one which had been found.

Identified the Cord. Mr. Gerow: "Would you recognize the string taken from the child's neck?" Answer: "Yes, I think I would." Mr. Gerow: "Is this it?" Answer: "Yes, I think it is."

To Mr. Guthrie witness said there was no paper on the body when he saw it. That Suit Case. David Duplissie was the next witness called. He said he lived at Fredericton Junction and that on April 16th he carried the prisoner's suit case from the station there to the short cut going past the school. He stated that he turned into the path at the school house.

Referring to the position of the body when found, witness said it could be seen by any person passing within a few feet of the spot. If there were children at play near he did not think the body could remain long undiscovered. The body did not seem to have been dead long. He had no recollection of Chief Rideout presenting to him a certificate from anyone ordering that the body should be exhumed. The magistrate who questioned witness regarding the suit case which he carried for Miss Reid, witness said it was heavy but not too heavy for her to carry. He did not look at it closely but it seemed quite heavy.

To Mr. Guthrie he said he was sure that Miss Reid got off the Montreal train. He was not surprised to see her going through the short cut as most of the back road people used that way. If the suit case were packed full of clothing he thought it would be about as heavy. The weather during April 24th to 27th, inclusive, was the hottest of the season to date.

To Mr. Gerow he said that the distance from the spot where he left Miss Reid to her home would be about two miles.

Burns Also Carried It. Samuel Burns, of Fredericton Junction, was the next witness. Burns recalled carrying a suit case for defendant on the same date as Mr. Duplissie. He had carried it in the opposite direction. Witness saw Miss Reid going down the track and taking the suit case he carried it to the station and placed it in the ladies waiting room. The suit case was heavy. Mr. Gerow: "Do you remember the weather of April last?" Witness: "It rained a lot, but we had several hot days."

Mr. Guthrie then established that

MANY NEW IMMIGRANTS SETTLERS ON WAY HERE

Several Steamers on the Ocean With Big Passenger Lists.

THE PATRICIA HAS FOURTEEN HUNDRED IMMIGRANTS COMING FROM MANY COUNTRIES IN EUROPE—FRENCH LINER BRINGING FIVE HUNDRED FROM HAVRE.

Halifax, June 13.—Five thousand immigrants are now on their way across the Atlantic from various European ports to Halifax on route to the Canadian West. A sailing of especial interest is that of the 15,000 ton Hamburg-American liner Patricia from Hamburg with no less than 1,400 passengers on board for Halifax. The Patricia sailed from Hamburg June 7th.

Another special sailing of more than ordinary interest is that of the French liner Virginia from Havre with 44 cabin and 515 steerage passengers for Halifax. One of the most recent sailings is that of the East Asiatic liner Neckar from Bremen June 5, has 430 immigrants, the Birma from Lisbon June 3, has 320, the Rinlan from Rotterdam June 7 has 230, the Allan liner Sardinian from Lisbon June 5, has about 135. The Parlian, scheduled to sail from Glasgow yesterday for Halifax and Boston is expected to have 400 or 500 and one of the Transatlantic liners sailing from Rotterdam is expected to have a number. There are the approximate total of passengers now on their way here from Europe is 5,000.

FOUNDATION GIVES WAY AND HOUSE FALLS

Defect in Concrete Work Cause of Accident—One Killed and Others Injured When Three Stories Collapse.

Vancouver, June 13.—With a crash that was heard for many blocks, three stories of a new four story building near Main and Vander streets East, collapsed at 10 o'clock this morning, instantly killing Harry Anderson, a carpenter, burying two more in a mass of debris and injuring five others so seriously that they were taken to the general hospital in an unconscious condition.

The accident was caused by a defect in the concrete work at the base end of the structure. Three of the injured men taken to the General Hospital were bricklayers, A. Robinson, Tom Evans and A. Boyle.

TWO MEN DROWN WHEN THEIR BOAT CAPSIZED

Edmonton, June 13.—Robert Gilkinson, 35 years old, and Charles May, 30, were drowned in the Saskatchewan river here today by the upsetting of a boat in which they were crossing the stream. Mitchell was also in the boat but succeeded in reaching the shore. Both the victims were single men, and so far as known, have no relatives in the city.

Witness was surprised that the prisoner should have gone down the short cut and retraced so soon. Mr. Guthrie—"Did you notice anything peculiar about the suit case?" "It was heavy. I remark, I think, at the City Hall tomorrow night, when a public reception will be accorded to him."

NEW YORK BANDIT CHOKES WOMAN AND STEALS HER MONEY

New York, June 13.—Miss Dorothy Daniels, a frail little woman of twenty two, was beaten, choked and robbed in the streets this afternoon by a bandit who had followed her to the bank and two thirds of the way back to her place of employment on Varck street. The highwayman escaped with \$128 in currency and a check for \$1,000. Hurrendy pursued him for several blocks, but he eluded them by darting through a hallway. The hold-up occurred in a busy downtown section in the fall of the noonday

PREMIER IN HALIFAX

Halifax, N.S., June 13.—The Premier, Mr. R. L. Hon. R. L. Borden, Hon. Frank Cochrane, Minister of Railways, and P. G. Tuttle, general manager of government railways, will arrive in Halifax at 8 o'clock tomorrow (Saturday) evening. The Prime Minister will attend at the City Hall tomorrow night, when a public reception will be accorded to him.

LAURIER MAY REFLECT TO HIS DISADVANTAGE

Liberal Leader Worried Over Senate's Action.

MAY REFLECT TO HIS DISADVANTAGE

Ottawa, Ont., June 13.—The perturbation and uneasiness of Sir Wilfrid Laurier is causing much interest and some amusement in Ottawa. It appears that the Liberal leader has been dwelling upon the events of the last month of the parliamentary session. He has gone sleep by sleep over the defeat of the Naval Aid Bill by the Liberal majority in the Senate at his orders. It has dawned upon him that the activity of one or two of his French Canadian followers in the upper house were much too noticeable; that the game was badly played; that while the plot was all right from the purely local point of view in Quebec, it was likely to do the Liberal party a great deal of harm in other parts of Canada.

Sir Wilfrid has been much agitated over the fact that the Nationalist influence in the Senate was so open to the Liberal party. He has been making a series of visits to Montreal, where, it is said, he has been in earnest conversation with the Nationalist lieutenant.

About the time of Sir Wilfrid's arrival in Montreal, he appeared in the local press an open letter over the signature of Senator L. O. David, Laurier's appointee and an active member of the Liberal majority in the Senate.

Senator David said that he would come before the three ships could be built if it did come from Canada. He would send men and arms and ammunition, and that the moral effect was much better under the naval service than it is in an unconscious condition.

So much impressed with this difficulty has Sir Wilfrid become that he has been making a series of visits to Montreal, where, it is said, he has been in earnest conversation with the Nationalist lieutenant.

WOULD PROBE INCREASE OCEAN RATES

Montreal, June 13.—The text of the resolution recently adopted by council of the Montreal Board of Trade with regard to the advance in ocean freight rates was given out from the offices of the board today and is as follows:

Resolved, that in view of the very considerable increases in ocean freight rates to and from Canadian ports, the council of the Montreal Board of Trade desires to suggest to the government the advisability of the appointment of a commission to enquire into the whole question of ocean freight rates, as to the reasonableness or otherwise of those now prevailing, and thereafter, if the rates be found unreasonable, to take such steps as may be practicable in the interests of shippers.

Copies of the resolution have been forwarded to the premier and to the ministers of trade and commerce and marine and fisheries.

JAIL FULL AS RESULT OF ASSASSINATION

Two Hundred Arrested for Complicity in Constantinople Outrage Which Had Been Planned in Advance.

London, June 13.—A despatch to a news agency from Constantinople says that as a result of the assassination of Grand Vizier Mahmud Shekret Pasha, and the capacity of the jails is being taxed in their detention. De-fad Sali Pasha, who is suspected of complicity in the plot because his signature was on a cheque for a large sum of money, which was found in the possession of one of the accused men, the son-in-law of the late Prince Ahmed Kemal Ed Din, a brother of the Sultan.

ARSON SQUAD ACTS IN SCOTLAND

Militants Make Raid on Letter Boxes in Edinburgh.

CLOCK-WORK-BOMB FOUND IN STATION

Edinburgh, Scotland, June 13.—The militant suffragettes campaign was resumed last night with the biggest raid that has yet been made on letter boxes. Twelve of these from one end of the town to the other were attacked. Chemists' test tubes, filled with a colorless acid, which caught fire when the glass was broken, were dropped into the boxes by the suffragettes and many letters were badly damaged. A bomb, sewed up in an oil-soaked cushion, was found tonight in the rail way station at Edinburgh, Kent. Attached to it was a clock which was timed to explode at two o'clock Saturday morning.

HE ADMITS SETTING NORTH END FIRES

And Also Pleads Guilty to Sending in False Alarms on Several Occasions—Caught on Mill Street.

About 1:30 o'clock this morning Police Officers Rankine and Totten arrested James Morish, who will probably throw some light on recent incendiarism in the North End. Morish was caught by the officers when about to pull in a false alarm from box 152, Mill street.

After he had been taken in-custody he told the policemen that he had pulled in several false alarms and also admitted setting different fires. He said that he rung in the false alarm on Thursday night and also admitted setting fire to the McAlary barn, Douglas Avenue, where two horses were burned, and also the McMillan shed that was burned last Saturday evening.

It is probable that the man under arrest is the one who in last Monday's paper was reported to have been seen setting fire to the McMillan property. Morish is eighteen years of age.

Premature Blast Hurls Three to Death—One Man Blown a Thousand Feet From the Scene.

Vernon, B. C., June 13.—Three men were killed and three seriously injured in a premature explosion in a rock cut near Naramata, Wednesday afternoon at 6 o'clock. The killed outright were Pietro Giuseppe, Camillo Allersio and his brother, Antonio. The injured men were buried yesterday afternoon after an inquest had been held by Dr. R. D. White. The injured men were taken to the Naramata Hospital. So severe was the explosion that two of the bodies were not recognizable and one was thrown a thousand feet.

AGREEMENT IN GRAIN SHOWS AN INCREASE

Crop Reports for Canada Published by Census and Statistics Office.

MAY WEATHER KEPT BACK YOUNG GRAIN

Fall Wheat Better Than Last Year—Alfalfa Only Crop to Make Poorer Showing—Bad Weather Caused It.

Ottawa, June 13.—A bulletin of the Census and Statistics office issued today gives preliminary estimates of the areas sown to the principal grain crops and their condition at the end of May, according to returns received from the crop-reporting correspondents throughout Canada. The reports show that the month of May proved cold and dry, with frequent night frosts and that these conditions, while favorable to seeding, retarded the growth of the crops sown and caused them to be unusually backward.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912. The area in spring wheat being 3,950,500 acres, or 13,100 acres more than in 1912. Oats occupy 5,095,500 acres, compared with 5,216,000 acres in 1912, an increase of 209 acres; barley occupies 1,425,200 acres, an increase of 10,000 acres; and rye 125,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 453,000 acres. The estimated increase under hay and clover is 7,475,600 acres, compared with 7,623,000 acres last year.

For the three northwest provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,500 acres, as compared with 8,961,800 acres, oats at 5,207,500 acres compared with 4,915,800 acres and that of barley at 852,600 acres compared with 809,500 acres. These differences representing increases of 52,000 acres for wheat, 292,800 acres for oats, and 42,800 acres for barley or 388,600 acres for the three crops. On May 31 the condition of the crops was reported as generally fair.

THE STEFFANSEN EXPEDITION

Victoria, June 13.—Steffansen announced today that the Karlik, carrying his party aboard would leave for the north next Wednesday. Variable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the conditions on May 31 for the Dominion was as follows: Fall wheat 96.62; spring wheat 91.55; oats 91.72; barley 91.19; rye 87.70; peas 88.24; mixed grains 90.15; hay and clover 81.12; pastures 85.08; and alfalfa 71. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye 87.24, peas, 83.85, and mixed grains 87.72. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.

BLOW FROM M'INTYRE'S STICK KILLED SABOTIS, SAYS JURY

Verdict in Gagetown Murder Inquest Delivered Yesterday by Coroner's Jury—McIntyre was Behind His Victim when Fatal Blow was Struck.

Special to The Standard.
Gagetown, June 13.—Today Coroner J. P. Hoban held an inquest into the death of Gabe Sabotis, who was killed on Tuesday by the blow of an edging in the hands of Charles Medley McIntyre.

The witnesses examined were G. McIntyre, Frank Hamilton, James Briggs and Frank Sabatis. All testified that they had seen McIntyre and the Indian just before the blow was struck, but the others said they had not noticed the men quarrelling. All agreed that McIntyre had struck his victim from behind. The negro was passing Sabatis with a bundle of edging in his hands when, without warn-

HEALTH AWAITS GOOD DIGESTION

When the Stomach is Wrong the Whole Body Suffers— How to Keep It Healthy.

Indigestion is one of the most distressing maladies afflicting mankind. The stomach is unable to perform the work nature calls upon it to do, and the result is extreme pain after eating, nausea, heartburn, painful bursting of the heart, sick headache, and often a loathing of food, even though the sufferer is half starved. People with poor digestion are prone to try all sorts of experiments to aid the process of digestion, and there is only one way in which trouble can be actually cured, and that is through the blood. That is why the tonic treatment with Dr. Williams' Pink Pills cures even the most obstinate cases of indigestion. They make the rich, red blood that strengthens the stomach and its nerves, thus enabling it to do its work. The process is simple, but the result means a good appetite, and increased health and pleasure.

Mr. E. Lassier, of Sorel, Que., offers ample proof of this. He says: "For several years I was a sufferer from indigestion, and the torture I suffered after meals was often almost unendurable. Often I would go without a meal rather than undergo the suffering that followed. Accompanying the trouble I had headaches, dizziness, and often a feeling of nausea. All the time I was taking one medicine after another in the hope of getting relief, but without avail. Finally I read of the case of a similar sufferer cured through the use of Dr. Williams' Pink Pills and I decided to try them. I took the Pills steadily for about six weeks with the result that I was fully cured, and could eat anything I cared for. I may add that I have not since had any return of the trouble."

If you are suffering from indigestion do not waste time experimenting, but begin to cure yourself today with Dr. Williams' Pink Pills, which go right to the root of the trouble through the blood. Sold by all medicine dealers by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

WOLA REID'S CASE IN POLICE COURT ALL DAY

Continued From Page One.

Mr. Guthrie—Were you there when the child was found?

Witness—Yes.

Witness then corroborated the evidence of former witnesses with regard to the position of the body. The witness on re-examination said that he did not remember the accused making any answer to his remarks as to the weight of the suit case.

Said Babe Was in Michigan.

Miss Phoebe Cook was the next witness called by the prosecution and the witness made witness and newspaper reporters were requested to leave the room. This was at five o'clock. At this examination Miss Cook testified that the accused had come to the Home and had given birth to a baby there on March 23rd. She left the Home in a coach on April 15th and said she was going to Sackville to give the child into the care of her cousin, a man named McIntyre. On May 26th she returned to the Home and requested the nurse not to tell anyone of the child. Miss Cook said that she told her that if the detective called she would have to tell him the truth. The prisoner had also made the same request to Dr. Loggie.

Continuing the witness stated that the prisoner told her that her cousin had gone to Michigan and had taken the baby with her. The accused did not know her cousin's address.

While in the Home the prisoner went under the name of Annie Cameron, and after giving birth to the child had requested the nurse to write to her mother, explaining the difference in name as being due to the second marriage of her mother. Miss Cook stated that the prisoner's brother had called twice.

The court then adjourned for supper and reopened at eight o'clock when the examination of Miss Cook was continued.

Miss Cook, who was taken to Fredericton to identify the body, then told of being driven to the graveyard and shown the body of the child. Mr. Reid asked her if she could identify any of the clothing except the napkin, which was marked after the manner of the Home. The articles of clothing were then shown. The witness, who identified them as being worn by the prisoner's baby when she left the Home. The shirt was sewn by hand.

In reply to the magistrate the witness said the shirt was made by the prisoner.

Magistrate—"When the baby left the Home did it only have on those clothes?"

Witness—"No; it had on a coat and

dress and I loaned the prisoner a shawl."

Mr. Gerow then exhibited a pink shawl which the witness stated she had placed around the child before it left the Home.

On cross examination by Mr. Guthrie the witness stated that she suffered from heart trouble.

Mr. Guthrie—"Are you liable to faint if asked questions?"

Witness—"No, I don't think so."

Mr. Guthrie—"You have identified a lot of clothing. What do these marks on the napkin mean? Would you wear the prisoner's coat the letters there?"

Ans.—"No."

Mr. Guthrie—"Then you didn't see her write them?"

Witness—"No; but it is customary to so mark clothes made in the Home."

Mr. Guthrie—"What did the price pay for attendance in the Home?"

Witness—"She paid \$30 admittance and \$18 a week for a private room."

Mr. Guthrie—"I thought this institution was run with the grace of the Lord and the help of friends."

Magistrate—"The Salvation Army has cared for many people in the Home for nothing."

Mr. Guthrie then examined the witness at length as to the illness of the prisoner and the duties of the girls who enter the Home.

Mr. Guthrie witness said she was sure the shirt which was on the child was a shirt made in the Evangeline Home. It was only hommed on one sleeve as she had noticed.

Mr. Guthrie—"When you were left alone with the prisoner at Fredericton, did you advise her to ask her to make a clean breast of it?"

Witness—"Mr. Reidout."

Mr. Guthrie—"Mr. Reidout? I thought so."

Witness—"I didn't finish. Mr. Reidout gave me permission to see her."

Mr. Guthrie—"After you saw her you reported the conversation to Mr. Reidout?"

Witness—"To a certain extent."

Mr. Guthrie—"Oh, I thought so."

Mr. Gerow in re-examination of the witness, asked if she remembered any particular mark on the body of the infant.

Witness—"The only thing I could remember was the hair, it was long, black and peculiar, and similar to the hair of the baby that was in the Home."

Mr. Guthrie—"Are you willing to swear that the child you saw at Fredericton Junction was the child that left the Salvation Army Home?"

Witness—"I won't swear that was the baby."

The court rose at twenty-five minutes to eleven, and the case was adjourned until Friday morning at 10 o'clock.

CONFERENCE SPENDS BUSY DAY ON REPORTS

Continued From Page One.

John, reported that this special committee was not acting within its jurisdiction in deciding that grants from the Sustentation Fund should not be made to certain circuits after this year. Apart from the question of jurisdiction the action itself conflicts with the constitution of the Sustentation Fund. The report was adopted.

The action of the stationing committee in constituting Oromocto a mission was adopted by a two-thirds vote after considerable discussion.

Rev. John Dystant of Detroit Mich., superintendent of one of the estate districts of the Methodist Episcopal church, and former member of the society, explained what was an interesting address, comparing the work done there and here. In Detroit special attention was given to evangelism. There they deal with such large questions as "The Conquest of the World." In this conference they pay more attention to minor matters and financial details.

St. John's Work and Need.

At tonight's meeting of the conference the Missionary Society reported. Rev. George Steele explained what had been done by the church in St. John district and the present need. Already Portland street church is looking for a site for the development of expansion in the North End, and the Marsh Bridge Mission is being enlarged.

Mrs. (Rev.) George M. Young, representative of the W.M.S., was then heard. She reviewed the progress and needs of the society. Circles and bands now number 5,617. The amount collected was \$12,609, an increase of \$1,239. The work in China and Japan must be extended but Canada must not be overlooked, where there are 65 missionaries out of 84. The society's aim is to enlist all women in church work. This done, dances and whist clubs would cease to exist.

A resolution of appreciation of the W.M.S. work was passed.

Rev. George Steele reported for the superannuated special endowment fund. The amount desired is \$20,000; promised, \$19,700; collected, \$13,000. Within the next few years the fund will be better off by \$5,000.

Rev. Dr. Morton, of the Nova Scotia Conference, treasurer of the fund, addressed the conference. He said it was the ambition of the committee to pay claims in full half yearly payments. The Nova Scotia Conference is stirred by the liberality of New Brunswick and will do its share towards the endowment fund. This year the committee will be able to pay only 85 per cent. of the claims.

Chain of Restaurants.

The business of George D. Wannamaker, the well known restaurant man, will, it is understood, soon be incorporated under the name of Wannamakers, Ltd., with a capital of \$100,000. Mr. Wannamaker will open the Imperial Hotel in the near future and, it is understood, intends to open a chain of restaurants throughout the Maritime Provinces. Mr. Wannamaker, when seen with regard to the matter last evening, did not deny the report, but had no information to give out at present regarding the project.

Meeting of Checkers.

A meeting of the marine warehouse checkers was held last evening in their rooms, Union street, when a delegation from the Trades and Labor Council was received. Routine business was dealt with.

Had Lung Punctured.

While working in the Maritime Nall Company's plant yesterday afternoon Louis McKay, of Brook street, received serious injuries which resulted in a puncture of the lung. The man was working with some wire which was being drawn and a piece of it pierced him in the right side, inflicting a bad wound in the body. He was hurried to his home and Dr. C. M. Pratt was called to dress his injuries. It was found that the wire had gone through the body and reached the lung, fracturing it. It is not known whether or not other internal injuries were received. Late last evening the man was reported to be resting fairly well under the circumstances.

THE ICE CROP.
Portland Argus: Sailing vessels are not reaping much of a harvest from the ice crop on the Kennebec last winter, the greater portion of that stored in the houses on the river being shipped away in barges. The tug Watups, which came up from there Wednesday, had just left two barges to load ice, and sailed from Portland at night for New York with three laden barges which had been previously brought up by other tugs. The mate of the Watups reports on leaving the Kennebec Wednesday the big coal shed and house at Fox Head had just been completely destroyed by fire.

THE HOUSING PROBLEM.

The housing problem is no new difficulty. It is as old as the cities of the world, and has forced itself upon the consideration of legislators in every age of city expansion. In ancient Rome, when Emperor Otho was marching against Vitellius in the first century, he found his way blocked for several miles by the ruins of houses that had collapsed owing to their faulty construction, and a writer of that period describes a number of such poorly constructed tenements as living in constant dread of being buried alive by their downfall. In ancient Rome high and overcrowded tenement houses, with narrow streets, supplied many of the sanitary problems such as still jeopardize the modern city. Owing to the vast industrial development of Canada and the consequent congestion of population within its larger cities, the housing problem presents itself in an acute form. Montreal, Toronto, St. John, and indeed all similarly expanding Canadian cities find themselves confronted with identical difficulties in this matter. Officials of the local board of health have signified their approval of vesting with them authority limiting the number of occupants in overcrowded houses. At the present time there are numerous cases of overcrowding and the restrictive power of the city board of health is limited to closing up these houses under conditions of infectious disease, which is very much like locking the stable door after the horse has been stolen. It is well that these dangerous conditions should receive the attention of the official representatives of the city and province. Meanwhile in St. John, as in several other Canadian cities, the greatest difficulty arises from the lack of an adequate number of comfortable houses that may be rented at a reasonable figure by the laboring classes.

In commenting on this situation in the city of Toronto, "Saturday Night" declares: "The great handicap in respect to the erection of workmen's homes in sufficient quantities to keep up with the demand is that dwellings of this character are not considered good security by those who handle the money bags, and in consequence, while individuals or corporations have little or no difficulty borrowing funds for the erection of factories, warehouses, stores or high class private dwellings, the very people who would furnish this capital (a trust company for instance) refuse the application of the man who wishes to put up a \$2,000 or a \$2,500 dwelling. The consequence of this is that builders of small houses are dependent almost entirely upon private sources, and this means outrageous rates of interest, as compared with what the large borrower would pay. In place of 6 per cent. on first mortgage, or possibly 5 1/2 per cent. the small man would pay 8 to 12 per cent., together with all the expenses, legal and others, including the agent's commission. So it will be seen that the poor man starts out with a handicap from the very first, one that his rich neighbor never encounters."

That the man earning from \$1.75 to \$2.50 per day must live in unsanitary conditions is a severe arraignment of our modern civilization. Inadequate housing means uncleanness, sickness, lack of privacy and often contact with criminals and other degenerates, and breeds in the young lack of self-respect, intemperance and low morality. In New York city it was estimated not many years ago that 255,033 persons only 306 had access to a bath. High rent for the poor means a low vitality induced by the lack of nourishing food, while overcrowding opens wide the door to crime, vice and epidemics, necessitating increased taxation for the maintenance of hospitals, almshouses and prisons. In England had housing is responsible for the loss of twenty million weeks in a year among the working population between the ages of fifteen and sixty-five. Efforts by cities and private individuals, directed towards the improvement of housing conditions have met with singular success in Great Britain and Europe, as well as in several of the larger cities of America, and the results indicate that such modern methods of grappling with this situation, upon which not only the vigor of the people, but also the stability of the nation is dependent, have passed the stage of experiment. The ever increasing immigration to Canada, together with industrial development and city congestion mean that this problem will be intensified year by year. The disposition of the St. John Board of Health is commendable, and like similar action elsewhere in Canada, should be supported by public opinion, as well as by the adoption of such practical measures as may be required to bring to the solution of this problem, for the "blessed" that under present conditions it will not be many years before the completion

of our Canadian cities will decide the temper of the Dominion. In 1901 approximately one-third of the population of Canada lived in the cities, and in the subsequent ten years this proportion had increased to almost one half. Can our modern civilization sustain the enormous weight and strain of these abnormal and portentous congestions of population that have appeared within recent years? The city has always been a menace, and is now the chief problem and danger of democracy, and the key to its solution, as well as the protection against its perils, centre around the matter of adequate housing facilities.

It requires a volume of some 328 pages to relate, in tabulated form, the history of crime in Canada for the past year. Such is the Blue Book that has come to hand bearing the date 1913. This report affords an illuminating and interesting view of criminality, as that craft has been in operation within our Dominion. While all crimes are odious, some crimes in themselves and by reason of several aggravations are more heinous in the sight of the law than others. Hence the report classifies criminal offences as: (1) Indictable Offences, and (2) Summary Convictions. The total number of convictions for all offences (indictable and minor) for the year 1911 amounted to 113,290 as against 102,903 in 1910 or an increase of 10.06 per cent. in one year.

CRIME IN CANADA.

The ratio of crime in Canada has increased from 8.2 per 10,000 inhabitants in 1891 to 17.5 in 1911, or more than doubling in 20 years. Comparing criminality and population, the provinces showing higher figures for the percentage of population than for criminality in 1911 are Prince Edward Island, Nova Scotia, New Brunswick and Quebec. The number of delinquents, under 16 years of age for the year 1911, as compared with 1910, shows a decrease in every province, except Ontario, Saskatchewan, British Columbia and Yukon. Juvenile courts have been established in Montreal, Toronto, Winnipeg, Vancouver, Ottawa, Halifax, Victoria and Charlottetown.

The number of female offenders increased from 560 in 1910 to 619 in 1911, or 10.54 per cent. during the year. All of the provinces, except Nova Scotia, New Brunswick, Alberta and the Yukon, showed an increase. In these provinces the statistics mark a decrease. Of indictable offences, 61.79 per cent. of the convictions were for offences against property without violence, including larceny and theft, an increase of 3.84 per cent. over the previous year; 12,627 persons were convicted of indictable offences of which out of every hundred 89 received their first sentence, 6 were sentenced the second time and 5 were habitual criminals; 21 murderers were sentenced to death.

The total number of summary convictions for 1911 was 65,533, an increase of 9,490, or 10.24 per cent. during the year, the principal increase being found in drunkenness, violations of liquor laws, assaults, vagrancy, loitering and disorderly conduct and trespassing. Convictions for drunkenness led, with 41,379 cases, or 41.11 per cent. of the total summary convictions for the Dominion, while convictions for vagrancy, loitering and disorderly conduct and for keeping and frequenting bawdy houses amounted to 15,672.

In 1901 the proportion of population dwelling in cities and towns was 37.6 per cent., 62.4 per cent. living in rural communities, while in 1911 there was 45.5 per cent. of the population urban and 54.5 per cent. rural, or, in other words, the drift of population from rural to city life had increased from approximately one-third to one-half in ten years. The tendency of city life to produce crime is evidenced by the fact that in 1911 87 per cent. of the criminal class was returned as living in cities. It is shown that 83 per cent. of all offenders were moderate or immoderate drinkers. As to age, 55.53 per cent. of convictions were of persons from 21 to 39 years, 14.97 per cent. were 40 years, 13.79 per cent. were under 16 years and 15.71 per cent. from 16 to 39 years, 47 per cent. of those convicted were single, 11 married and 3 widowed.

The census returns for 1911 show that Canadian born constituted 77.9 per cent. of the population, British born outside Canada, 11.6 per cent.; the American born, 4.2 per cent., and the foreign born 6.3 per cent., while foreign born represented 12.2 per cent. of the total convictions; American and British born outside of Canada, 5.8 per cent., and 15.3 per cent., respectively, and Canadian born 50.5 per cent., which indicates that the largest percentage of criminality in proportion to population is derived from the foreign born, the lowest from the Canadian born.

HEALTH CER DECEDE

Indiscriminate Marriage Sc ton Chase—Innocent and Protected "Eugenics" Birth, well Worthy of Ca

Lynn, Mass., June 9.—Among the ministers of the country who have taken a stand against matrimony for persons unless they produce certificates of health, is the Rev. C. Thurston Chase, pastor of the First Congregational Church here. Mr. Chase was for some years pastor of the Flatbush Congregational Church, in Brooklyn. He has preached a sermon which has attracted to him much attention in New England. The subject was "Eugenic Marriage." In the course of his sermon he said: "The perversion of that which is good results, at all times to repulsive evil. The higher the good which is perverted, the more heinous the evil that results. And so the law is followed out in regard to marriage. That which should be most sacred is by its perversion made to wreak vengeance, not only on the individuals primarily responsible, but upon their children and their children's children after them. Their children and their children's children, are all members of the body politic, sharing in its sorrows and its joys. It is a national privilege and forwarding of its progress. That which those people do, which leaves its mark for good or evil upon their children, is thus so clearly concern the common welfare that these acts cannot be termed private or personal—they cannot be looked upon as so entirely the affair of the individual, that they are not the affair of the nation. Since they affect that nation, it is their duty to be, it becomes most essentially a nation's duty to safeguard its highest interests and its future health and integrity.

The advance of disintegrated conditions has become so appalling that a comparison is now being made between the last days of the Roman Empire, the days that immediately preceded the French Revolution, and the present. If one will recall the events which followed those similar conditions in Rome and in France, he will see why it is that those men are now earnestly striving to protect the American marriage and the American home. Let these go unprotected, and the logic of the situation certainly is that like results will follow like conditions. The Rockefeller commission has just finished his investigations into conditions in New York City. It was a coincidence worthy of notice that its findings were published in the same issues of the Nation as the report which printed the statement that cleanliness and fair health should be required of those desiring to marry. The details of that report could not be entered into here. Those who read it, however, must have been struck with its hideousness. It is a barrier to indiscriminate marriage as the proposed physical test would supply.

Need for Protection. There is much need for protection of the innocent and the ignorant. It would be crude to cite instances to substantiate this statement. I repeat, it is not necessary. The cases of duped, wrecked, heartbroken men and women, are so prevalent as to be commonly known. Many of these cases become known through divorce proceedings. Many, many more are never made public. I repeat, it is not necessary to state that the innocent and the ignorant are borne in silence and sorrow and suffering. Every ideal of marriage is shattered. All hopes and dreams are lost, never to be regained. It becomes a crude, coarse, cruel road of tasks, unlightened by respect for life's companion and the sanctity of the home. It is a lessened strength and increased anxiety.

I say again, some protection may be afforded, if the innocent and ignorant by requiring certification to the reasonable health and cleanliness of both parties before marriage. There has long been agitation over the question of divorce. If you have not studied the matter, begin and study it for yourself. It is not your most serious consideration. The inevitable conclusion will be found to be that a large proportion of divorces result from marriages which were better not have been performed. Hence one of the main cures of the divorce evil is found in the cure of the marriage evil. Set straight the marriage evil and a large part of the divorce evil will have been settled beforehand. Physicians and ministers are being again together at the fountain head of another of the devastating and tragic forces for evil in American life. Divorce is now more prevalent than it has been since the last worst days of the Roman Empire. Some students of history are even claiming that Rome, in its decadence, honored the home and its sanctity more than present day Americans.

Ideal Marriage.

If physicians and clergymen will but stand together in honesty and sincerity of purpose, there is much that they can do, by way of prevention, that will allow the rite of marriage, that will ennoble the homes of this land, and will render sacred the names of husband and wife—father and mother.

There is such a thing as an ideal marriage. There are myriads of approximations to the ideal. Thank God, they are all about us. Their happiness, their health and the welfare of their children tell the story and point the lesson of pure and rightful unions. To increase the proportion of such rightful marriages—this is a goal which every man aims at all who seek to help our race. Recent inquiry from physicians has brought to light the most conservative estimate, that 50 per cent. of all disease results directly or indirectly from two transmissible diseases. It certainly does not require a marked power of penetration to see what those two transmissible diseases are. They are gonorrhea and syphilis. It is not necessary to state that these diseases are transmitted by the same causes, and those in charge of

AROUND THE CITY

Hon. Mr. Hazen Home Tonight.
Hon. J. D. Hazen will arrive in the city this evening on the 6.30 train.

Stole a Bicycle.
Wm. Thompson was arrested yesterday on the charge of stealing a bicycle the property of Austin Clifton.

Arrested for Assault.
Patrick O'Neill was placed in custody last evening on the charge of being drunk and assaulting a man in view of the police on Pond street.

Admission by Ticket.
Admission to St. Paul's church on the occasion of the wedding of Miss Katie Hazen and Hugh Mackay, on next Wednesday, will be by ticket only. This has been found necessary on account of the large number of invitations issued and the limited seating capacity of the church.

Meeting of Mission Board.
Among the visitors to the city yesterday was Rev. Dr. Brown, of Toronto, general secretary of the Canadian board of foreign missions of the Baptist church. Yesterday afternoon a special meeting of the eastern section United Baptist Foreign Mission Board was held in the rooms of the board, Prince William street for the purpose of giving the members an opportunity to meet Dr. Brown. A large attendance of members of the board was present, and interesting discussions took place in reference to foreign mission work. The board is closing up its financial year and matters in connection with the finances were also discussed at the meeting. Dr. Brown gave interesting information in regard to the mission work. He will leave today for Nova Scotia.

MARKET LAWS KEEP THE FARMERS AWAY

Commission Man Blames Regulations—Producers Sell to Stores instead of Market.

That during the past year there has been a marked decrease in amount of produce brought into the country market by the farmers was the main theme last evening by a commission merchant, for years doing business in the market, when in conversation with a Standard reporter.

"I, myself," he said, "and other commission men are doing as great a trade and even better than in former years, but the farmers who come in are apparently fewer than in past years and those who come in seem to have a limited supply of produce."

"As far as doing business with the farmers is concerned this is one of the dulllest weeks so far this year, as very few have found their way in to the city. A small market is, of course, expected at this time of the year, when the farmers are busy at work in the fields, but according to the dealers the supply from the countrymen this week was most unusually small, and produce was scarcer than it has been for some time."

"The supply right through the winter," said the commission man, "was smaller than in other years."

When asked what he attributed the scarcity of provisions or the apparent inactivity of the farmers to, he brought in supplies, he gave it as his opinion that what had prevented a number of them from coming in was the law that had existed prohibiting the countrymen from disposing of their meat until after it had been exposed for three hours in the market.

Another law which, he says, has had a very bad effect on the farmers is the charging of a certain rent for the stands, besides the fees. A number of small traders who were accustomed to gather produce from their neighbors for disposal in the city market, through this way have, he claims, been driven away.

These farmers, he said, in answer to a question, dispose of their goods in most cases to the small stores. "More goods are being shipped direct to the storeroom than ever before," he said.

The scarcity of supply has, of course, made the price of produce high, and the merchant said he had been in business for a good many years and he never remembered butter being so high at this time of the year.

The scarcity of butter he attributed largely to the fact that in certain portions of the country the milk and cream is being collected from the countrymen and shipped to the dairies in the city. This does away with the making of butter and so lessens the supply.

The early rise in the egg market was, he thought, caused by the mild winter. A good supply was received during the winter months and the market was stocked early. The price on this commodity is now soaring.

The quotations for today are: Beef, 12 to 24 cents pound; steak, 18 to 26 cents; spring lamb, 11 to 12.50 a quarter mutton, 12 to 20 cents; veal, 12 to 18 cents; pork, 18 to 22 cents; fowl, 25 to 28 cents; butter, 30 to 32 cents; and eggs, 25 cents a dozen.

LUMBER MILLS IN CITY TO BE CLOSED DOWN TODAY

Sixteen Hundred Millmen Will Be Out of Work for Some Time.

STRIKE MAY EXTEND TO UP-RIVER MILLS

Owners Refuse Request for Increased Wage and Practically Declare Deadlock—Situation Looks Serious.

As the result of the refusal of the mill owners to grant an increase in pay to the ratmen, pondmen and deal pilers, it is said that the mills in the city and vicinity will be closed today, throwing about 1,600 men out of employment.

At a joint meeting of Local Union 225 Ratmen and Pondmen, and Local Union 333, Deal Pilers, last evening, it was said that the mill owners had declared a lockout, paying off all the ratmen, pondmen and deal pilers, and informing them that they need not come back if they were not willing to work for the present rate of wages.

Stick to Their Demands.
The members of the union in joint session decided to stand by the demand for higher wages and better conditions. In a statement issued after the meeting the officials of the two unions said:

"About three weeks ago the mill owners were notified that the members of the unions wanted more pay and better working conditions. An increase of 25 cents a day was asked. Some of the men have been getting \$2.40 a day and others \$2.50 a day. The mill owners flatly refused to consider the proposition, or meet the men in any way, and have practically locked out the members of the unions. Committees have been appointed to meet the mill owners and discuss the reasons why the request for an increase of pay was made."

It was said that while the inside mill workers had not made a formal demand for increased pay, they had been discussing doing so, and would stand by the men who had been locked out, and would take the opportunity to insist on higher wages and better conditions for themselves.

The mill owners held a meeting the other evening and decided that the conditions of the industry would not warrant them in granting an increase of pay to their employees.

The mill owners affected by the trouble are Hilyard Bros., J. R. Warner, Harry Miller, F. Sayes & Co., Murray & Gregory, Stetson, Cutler & Co., John E. Moore, Charles Miller, Randolph Baker, L. Jordan and James Kelly & Son.

Outlook is Serious.
It is said that unless a speedy effort is made to settle the trouble, a rather serious situation may be developed, as the trouble may spread to other mills up the river and throughout the province generally. Any attempt to work the mills with foreign labor, it is claimed, meet with the disapproval of the longshoremen, scowmen and tugboatsmen, and probably bring on additional trouble in connection with the loading of the products of the mills on the ships. In any case, even a temporary closing of the mills will affect business throughout the city in many ways.

MUST HAVE FAITH IN LOCAL INDUSTRIES

E. N. Rhodes, M. P., Says St. John will Go Ahead if People Invest at Home — Amherst Booming.

"At the present rate of growth Amherst will have a population of 30,000 in six years," said E. N. Rhodes, M. P. of Amherst, who was at the Royal yesterday on his way home.

"In Amherst," he added, "we have the spirit, the quality, that is needed in the east. We have faith in our town and ourselves, the desire to make the most of our opportunities, the disposition to invest in local enterprises. And the town of Amherst has been growing rapidly. Last year at least 300 houses were put up, but we have a housing problem. Old industries have been expanding, new ones have been coming in, and the population has increased more rapidly than our housing accommodation. Our customs receipts and post office revenues have increased enormously. In the matter of payments of I. C. R. freights Amherst, I think, follows Montreal, Quebec, St. John and Halifax."

Mr. Rhodes said the money stringency in the west was causing a set back there, and that he knew of quite a number of young men who had come west were now coming back to their old home in the east. "Out west they have rather overreached themselves," he added. "The reaction will probably do them good, and it will certainly redound to the advantage of the east. Too much eastern money has been invested in western real estate."

After this our own people will be more inclined to put their money in eastern enterprises."

Mr. Rhodes, who accompanied the Minister of Railways on the trip from Montreal said he was much pleased with the International Railway and other branch lines they had been over. He was also much impressed with the Drummond iron and steel enterprise on the North Shore. Speaking of St. John, he said he noticed a great deal of new activity here, than during his last visit a year ago. "But shipping facilities and dry docks will not make a great city," he added. "Only the citizens can do that. If they invest their money in local enterprises and help to launch new industries they can make a great city here."

ADVANCE IN I. C. R. FREIGHT RATES SMALL

F. P. Gutelius Says They Should Not Interfere With Business.

NEW MANAGER IN CITY YESTERDAY

He is Much Pleased with Conditions on the Railway — Traffic is Good and Outlook Roseate.

"The increase in freight rates on the I. C. R. has been very small and should not interfere with business in any way," said F. P. Gutelius, manager of the I. C. R., who was in the city yesterday in company with the Minister of Railways.

"But there are always people who take advantage of an increase in freight rates to raise prices, and blame it on the railways," he added. "We had to raise freight rates a little to offset the advances in wages which have been accorded the employees of the road, but the increases will not cause any hardship to business men."

"If I have you had any complaints from the lumbermen?"

"Not personally," Mr. Gutelius said he was going over the whole system in order to get in touch with affairs and conditions, and talk with the officials of the road and business men who patronized it.

"The road," he said, "is in excellent condition, and traffic is good. At all points we visited business seemed to be good, and I don't think the money stringency has had any effect on business in the Maritime Provinces as yet."

Asked if the Grand Trunk Pacific had taken up the matter of securing running rights over the I. C. R. from Moncton to St. John, he said: "Not yet. The Grand Trunk Pacific has under a previous agreement, running rights from Moncton to Halifax, but not from Moncton to St. John. Of course they will be glad to make arrangements from Moncton to St. John if they will give us a share of the profits."

Mr. Gutelius expects to make a visit to St. John nearly every fortnight, and says that if any business men have complaints to make about the I. C. R. service he hopes they will come to him and tell him about them as he does not want any other kind of grievance which can be removed without detriment to the public's interest.

FIRE PREVENTION.

One of our local fire insurance agents, in an effort to bring before the public the numerous small faults which cause fires, has had printed the following fire prevention pledge. If the little matters referred to in this pledge were all carried out the number of fires would be greatly reduced. The pledge is as follows:

I will keep the supply of matches in metal boxes and throughout the year will see that lamps are in a proper receptacle and out of reach of children.

I will use only safety matches so far as practicable. I will not permit a child under ten years of age to use matches. I will see that lamps are not filled by artificial light, or after dark.

That no coal oil rags are left round the house, but are kept in a receptacle of a good metal receptacle. That coal oil is kept in metal cans and not in kerosene cans.

That gas brackets have wire globes over them where there is danger of window curtains being blown into the flame. That the furnace or heating apparatus is kept in good repair, by a competent person.

That all scraps, paper, excelsior, and paper are removed or placed in a receptacle before nightfall. That ashes are kept in metal receptacles.

That gasoline is not kept for use in the house, except in absolutely tight metal receptacles, and is not used by artificial light except in a descent electric light.

That cotton batting and other flammable materials are not used in Christmas trees or for other ornamentation. I will inform neatness and will always have a scrupulous care for fire prevention.

I will remedy or cause to be reported any defect in connection with the heating, lighting, cooking, or power plants within my control, within twenty-four hours after discovery. I will be very careful about lighted cigars and pipes.

During the month of October I will have all fires of stoves, furnaces examined by a competent person, repaired and put in proper condition for winter use.

I will be very careful to place my insurance in the strongest companies, those represented by FRANK R. FAIRWEATHER, The Fire Insurance Agent, 12 Canterbury Street, St. John, N. B.

"I want to inform you of what your remedy 'Fruit-a-tives' did for me. For years, I was a martyr to Dyspepsia and Constipation, often having a neighbor come to my house to whom I told of my suffering and he said to me that I had to do if I had Dyspepsia, was to take 'Fruit-a-tives'. They would cure me. He had cured himself. I immediately procured a 50c. box and continued taking them until cured. I suppose I took in all about eleven boxes and I am glad to be able to say that I have been free of Indigestion for nearly two years. They cured the Constipation also. They were worth their weight in gold to me and I will be glad to have you publish this letter, along with my photo, if it will induce another dyspeptic to take the right road to a permanent cure."

Yours truly, ALFRED FERRIS.

Had Pimples on Face
And Back Was Literally
Covered With Them.

Bad blood is the direct cause of pimples breaking out on the face and body, and it is impossible to get rid of them unless you cleanse the blood of all its impurities.

Burdock Blood Bitters is without a doubt, the very best medicine for this purpose.

This old and reliable remedy has been used for over thirty-five years, and has a reputation unequalled by any other for purifying the blood.

Mr. Peter La Pierre, Assistant Post- master, Touchwood Hills, Sask., writes: "The fall before last, I was very much troubled with pimples on my face and back. AMERICAN, NATIONAL AND INTERNATIONAL LEAGUE RESULTS

Table with columns for League, Location, Score, Batteries, and Umpire. Includes American League (Boston vs St. Louis), National League (Philadelphia vs Cincinnati), and International League (Toronto vs Montreal).

1908—Tommy Burns and Bill Squires played their second engagement on this date in Paris. The Canadian and the Australian first met in San Francisco the previous year and Squires lasted only a part of one round.

At Montreal—First game—Toronto 11, Montreal 3. Batteries: Brant and Graham; McGraynor and Madden. Second game—Toronto 10, Montreal 3.

GEORGE CUTSHAW, BROOKLYN

George Cutshaw is one of the players upon whom Bill Dahlen depends to keep the Brooklyn Club up in the fight for the National League pennant.

For a time Cutshaw was out of the game with an injured ankle, but he asserts that he has entirely recovered from that injury and is prepared to take up his snappy work where he was forced to leave off.

FINED FOR ABUSING UMPIRE

New York, June 13.—It was announced here today that the indefinite suspension imposed on Manager Jennings of the Detroit Club, of the American league by President Ban Johnson, had been lifted on payment of a fine.

In the Every Day Club league last night the Young Victorias defeated the Cubs 5 to 3. The batteries were Harding and King for the winners, and Garnet and Callahan for the Cubs.

THE PROBLEM

The problem is to count the circles. Every circle is complete and intersects or touches one or more other circles. There are no parts of circles or shams or deceptions of any sort in the puzzle. In the event that no one counts the exact number the prizes will be awarded for the nearest correct solutions. Accuracy and patience are the main requisites for arriving at the correct or nearest correct count. Those who display these qualifications to the best advantage will solve the puzzle best.

How to Enter

This contest is restricted to people residing in the Provinces of New Brunswick and Nova Scotia.

A payment on subscription to The St. John Standard of from \$1.00 to \$5.00 entitles the contestant to submit a solution of the puzzle. The amount of money paid in will cover the subscription price for the paper according to the regular rate, whether the rate be for city delivery or by mail.

AS MANY DIFFERENT SOLUTIONS MAY BE SUBMITTED AS THE CONTESTANT DESIRES UPON MAKING AN ADDITIONAL PAYMENT WITH EACH ONE, BUT NOT MORE THAN \$5.00 CAN BE PAID WITH ANY ONE SOLUTION.

It is not necessary to pay the same amount with each solution if more than one be submitted.

As the main prizes have an added value according to what is paid in on subscription with the winning solutions, contestants should familiarize themselves with the DIVIDEND schedule before sending in their subscription and solutions.

Remit by check, money order, registered letter or in 1 or 2-cent stamps.

What ever is paid, whether on one or a number of solutions, will apply on a continuous subscription to The Standard.

Solutions unaccompanied by cash subscription will not be registered. This contest is open to both old and new subscribers within the territory designated.

The Last Day

Standard's Puzzle Contest Closes Tonight at 9 o'clock

Contestants Can Mail Answers as Late as That Hour But All Solutions Must Reach the Contest Department Monday, June 16th

DECIDING TIES

In case there are ties, as many prizes will be reserved as there are contestants tied before any prizes are awarded for less correct solutions. For instance, if ten people tie on the correct solution, they would receive the first ten prizes, and those having the next nearest correct answers would receive the remaining prizes.

If there should be more ties than there are prizes offered a second puzzle will be presented. No money will have to accompany the solution of the second puzzle. The second puzzle will be practicable and solvable.

In the event of ties on the second puzzle, a third will be presented to those that have tied. The second and third puzzles will be used only in case of ties. Their purpose will be merely to decide ties, so that in the event there is a tie, the prizes can be awarded without having to divide them or without resorting to chance.

However, only three puzzles will be presented, and in the seemingly impossible event of still another tie, the prizes will be equally divided. If there are no ties, there will be only one puzzle.

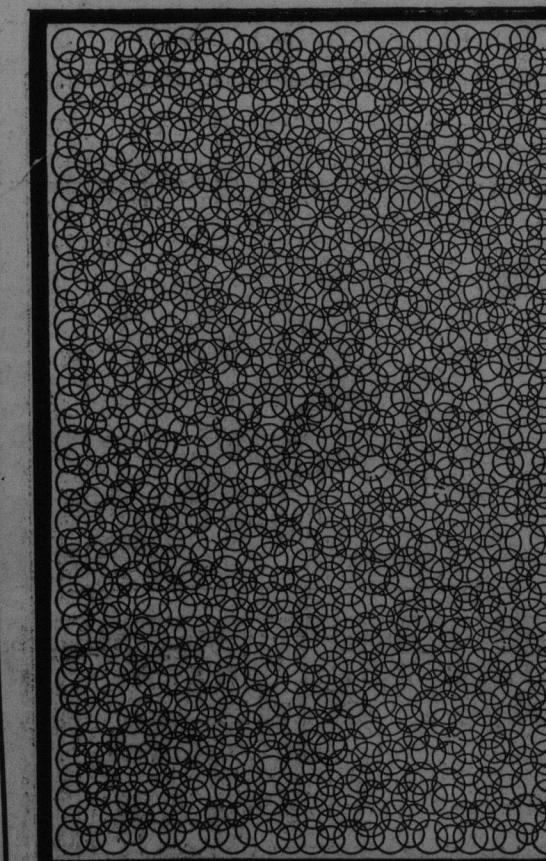

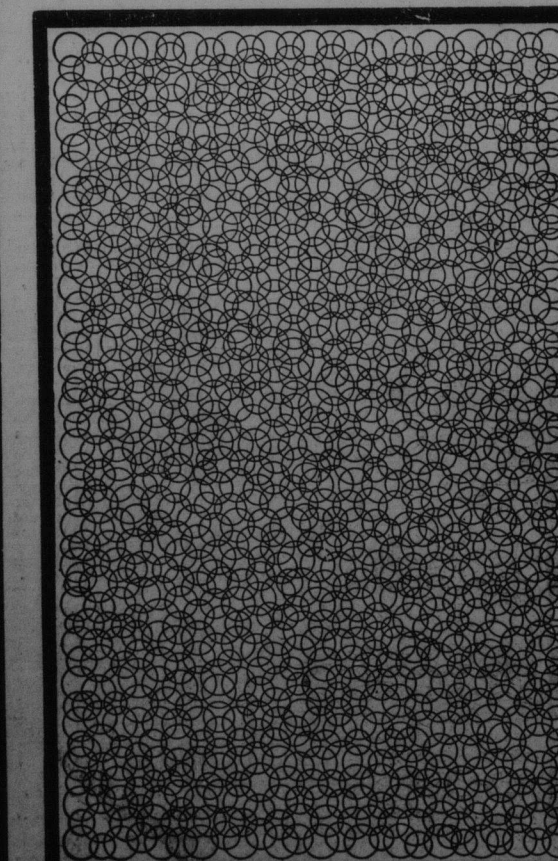

AS TO DIVIDEND PRIZES.

Same will be divided between those who have the correct or nearest correct answers. ALL DIVIDEND prizes will be divided pro rata according to the amount paid in by the winner.

For example, if there are two contestants who tie having the correct or nearest correct answer, they will divide the first and second prizes of \$100.00 and \$75.00, giving them \$87.50 each, and will also be entitled to DIVIDEND prizes, which is forty times the amount paid in for the first prize and twenty times the amount paid in on the second prize, the two tying will then be entitled to divide sixty times the amount they have paid in, making thirty times the amount paid in on their subscription.

Now, if one paid \$2.00 and the other paid in \$5.00, the one paying in \$2.00 would receive thirty times the amount paid in or \$60.00 as his DIVIDEND prize, while the one paying in \$5.00 would also receive thirty times the amount paid in, or \$150.00 as a DIVIDEND prize.

This same rule and example will be followed throughout in the awarding of prizes in case of ties.
